Introduces theory and practice of finance within corporations. Topics include intertemporal choice, valuation, capital budgeting and structure, working capital management, and risk and return analysis. Due to the presentation and application of course material, this course can only be taken by students enrolled in the Master of Arts in Business Management Program.

Prerequisite(s): Admission to BMGT program.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

BMGT 653 - Fundamentals of Behavior in Organizations

Credits: 3 (NR)
Emphasizes development of conceptual tools for understanding and analyzing individual and group behavior in organizations and organizational processes. Considerable focus on developing relevant skills for working in groups and teams. Lectures, discussions, case analyses, and class exercises. Due to the presentation and application of course material, this course can only be taken by students enrolled in the M.A. in Business Management.

Prerequisite(s): Admission to BMGT program.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

BMGT 662 - Management of Information Technology

Credits: 1.5 (NR)
Strategic, economic and managerial aspects of managing organization's IT assets are covered. Business value of IT is understood and assessed in context of its impact on organization's structure and strategy. Includes discussion on major issues pertaining management of IT infrastructure. Due to presentation and application of course material, course is only open to students enrolled in MA in Business Management Program.

Prerequisite(s): Admission to BMGT program.
BMGT 673 - Business Legal Environment

Credits: 1.5 (NR)
Examines the managerial impact of the law upon decision-making processes in business organizations. Lectures as well as discussions of judicial opinions and readings. Due to the presentation and application of course material, this course can only be taken by students enrolled in the Master of Arts in Business Management Program.

Prerequisite(s): Admission to BMGT program.

BMGT 674 - Ethics in the Global Business Environment

Credits: 1.5 (NR)
Strengthens student's ability to identify, critically analyze, appropriately respond to, and provide leadership regarding issues of ethical and socially responsible behavior which they may confront as employees and managers of people, objects and organizations. Due to the presentation and application of course material, this course can only be taken by students enrolled in the MA in Business Management Program.

Prerequisite(s): Admission to BMGT program.

BMGT 678 - Business Strategy and Firm Leadership

Credits: 3 (NR)
Capstone focusing on strategy development at business unit and corporate level. Cases, readings, and project format familiarize students with strategic management function and help develop analytical, organizational, and managerial skills to analyze complex business situations. Opportunities to integrate knowledge gained in prior course work. Due to presentation and application of course material, course only open to students enrolled in MA in Business Management.

Prerequisite(s): Admission to BMGT program.

Business, Minor in (MSOM)

Offered by the School of Management
Prerequisite for all MSOM courses is completion of 30 credits (sophomore standing). For the Business Minor, a grade of C or higher is required in each MSOM course used for the minor.

**MSOM 300 - Managing Financial Resources**

Credits: 3 (NR)
Focuses on using basic concepts of accounting and financial management to make investment, credit, and operating decisions for an organization. Emphasizes financial reports to aid planning and control of organizational activities.

**Prerequisite(s):** Completion of 30 credits (sophomore standing)

**Notes:** May not be taken for credit by SOM majors. Students who have received credit for both ACCT 203 and FNAN 301 cannot also receive credit for MSOM 300.

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0
**When Offered:** Fall, Spring, Summer

**MSOM 301 - Managing People and Organizations**

Credits: 3 (NR)
Introduces key issues in management, organizational behavior, and human resource management. Special attention to best practices used by effective managers.

**Prerequisite(s):** Completion of 30 credits (sophomore standing)

**Notes:** May not be taken for credit by SOM majors. Students cannot receive credit for both MGMT 301 and MSOM 301.

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0
**When Offered:** Fall, Spring, Summer

**MSOM 302 - Managing Information in a Global Environment**

Credits: 3 (NR)
Provides overview of strategic role of information, need for information systems, organizing information, integration of information systems in management processes and decision making, and related discussions in electronic commerce.

**Prerequisite(s):** Completion of 30 credits (sophomore standing)

**Notes:** May not be taken for credit by SOM majors. Students cannot receive credit for both MIS 301 and MSOM 302.

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0
**When Offered:** Fall, Spring, Summer
MSOM 303 - Marketing in a Global Economy

Credits: 3 (NR)
Presents marketing principles, concepts, strategies, and analytical tools used by profit and nonprofit organizations to market ideas, products, and services to selected target groups. Emphasizes how to develop, promote, distribute, and price firm's offerings in dynamic economic, social, political, and global environment.

Prerequisite(s): Completion of 30 credits (sophomore standing)

Notes: May not be taken for credit by SOM majors. Students cannot receive credit for both MKTG 301 and MSOM 303.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring, Summer

MSOM 304 - Entrepreneurship: Starting and Managing a New Enterprise

Credits: 3 (NR)
Explores behaviors required to successfully launch a new business, tools to identify and evaluate opportunities, and the issues critical to a new firm. Issues include organizational structure, effective marketing strategy, operational logistics, legal issues, financial projections, financing options, and available support structures.

Prerequisite(s): Completion of 30 credits (sophomore standing)

Notes: May not be taken for credit by SOM majors

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

MSOM 305 - Managing in a Global Economy

Credits: 3 (NR)
Multidisciplinary approach to global economy from the viewpoint of managing international business. Introduces various aspects of managing business in a global economy including theories and practices of international trade, investment, and business strategies.

Fulfills general education requirement in global understanding.

Prerequisite(s): Completion of 30 credits (sophomore standing)

Notes: May be taken for credit by SOM majors only if taken to satisfy the global understanding requirement for general education.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring, Summer
MSOM 306 - Managing Projects and Operations

Credits: 3 (NR)
Introduces project management and operations management concepts and tools including project planning, scheduling, monitoring, and control; process design, selection and improvement; supply chain management; inventory management; and quality assurance.

Prerequisite(s): Completion of 30 credits (sophomore standing)

Notes: May not be taken for credit by SOM majors. Students cannot receive credit for both OM 301 and MSOM 306.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

MSOM 491 - Special Topics: Business Minor

Credits: 3 (RD)
Topics related to a minor in business will vary on the focus of the course and by discipline.

Prerequisite(s): Sophomore standing.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

Character Education (EDCE)

Offered by the College of Education and Human Development

EDCE 601 - How Students Learn Values and Ethics

Credits: 3 (NR)
Applies theories to practice to increase learning through the study of moral and ethical development theories and how students learn personal, prosocial, and civic values.

Prerequisite(s): Admission to Character Education Program.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDCE 602 - Comprehensive Character Education Frameworks

Credits: 3 (NR)
Analyzes comprehensive character education frameworks that have emerged from research and practice, examining framework
components and their applications to character education initiatives.

**Prerequisite(s):** Admission to Character Education Program.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

## EDCE 603 - Global and Ethical Perspectives on Teaching Diverse Learners

Credits: 3 (NR)  
Analyzes ethical and moral dimensions of classroom interactions using developmental framework and foundation of democratic principles. Evaluates school politics and policies, and provides overview of prevailing ethical points of view.

**Prerequisite(s):** Admission to Character Education Program.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

## EDCE 604 - Character Education Curriculum and Programs

Credits: 3 (NR)  
Analyzes and evaluates quality of programs and curriculum materials for character education using program, implementation, and curriculum standards.

**Prerequisite(s):** Admission to Character Education Program.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

## EDCE 605 - Character Education Assessment and Evaluation

Credits: 3 (NR)  
Applies assessment standards and audit tools to analyze and evaluate formative and summative assessments of programs for character education. Utilizes backward design model.

**Prerequisite(s):** EDCE 602, 603, and 604.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

## EDCE 606 - Leadership in Character Education: An Internship in Program Development, Curriculum, Instruction, or Assessment
A 150-hour, on-site internship focusing on one of the following: instructional strategies, curriculum or program development, resource use, or assessment.

**Prerequisite(s):** EDCE 602, 603, 604, and 605.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**EDCE 607 - Educational Research for Character Educators**

Credits: 3 (NR)  
Studies and applies fundamental concepts and methods of educational action research. Emphasis on researching how students learn personal, prosocial, and civic values, and teacher and school effectiveness in this area.

**Prerequisite(s):** EDCE 600, 601, 602, 603, 604, and 605

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**Chemistry (CHEM)**

Offered by the College of Science  
CHEM 211, 212 are prerequisites to all other undergraduate CHEM courses numbered 301 or above.

**CHEM 101 - Introduction to Modern Chemistry**

Credits: 3 (NR)  
Physical and chemical discoveries and properties of matter presented along with their application and impact on way of life. Topics include atomic and molecular structure, nuclear chemistry, and chemistry in Earth and atmosphere.

Fulfills general education requirement in natural science (nonlab).

**Notes:** Not open to students majoring in chemistry. Credit will not be given for CHEM 101 and CHEM 103, or for both CHEM 101 and CHEM 211 or 212. No previous knowledge of chemistry required.

**Hours of Lecture or Seminar per week:** 1-6  
**Hours of Lab or Studio per week:** 0

**CHEM 102 - Introduction to Organic, Biochemical, Pharmacological, and Fuel Chemistry**

Credits: 3 (NR)
Modern and historical accounts of organic chemistry, biochemistry, pharmacology, and fuel chemistry. Topics include the chemistry of carbon compounds, synthesis of polymers and their utility and use in the modern world, biomolecules, DNA and animal cloning, embryonic stem cells, the chemical structure and biological activity of drugs and medicines, and fuel chemistry including petroleum through green chemistry and the future.

Fulfills general education requirement in natural science (nonlab).

**Prerequisite(s):** Not open to students majoring in chemistry.

**Notes:** Does not fulfill the requirement for a laboratory course in Chemistry. Not for Chemistry majors. No credit for both CHEM 102 and CHEM 104, or CHEM 212.

**Hours of Lecture or Seminar per week:** 1-3
**Hours of Lab or Studio per week:** 0

**CHEM 103 - Chemical Science in a Modern Society**

Credits: 4 (NR)
Terminal course in chemistry for nonscience and nursing majors. Principles and application of chemistry.

Fulfills general education requirement in natural science (lab).

**Notes:** Not open to students majoring in chemistry. Credit will not be given for both this course and CHEM 211, 212. Topics are those described for CHEM 101 and 102 but with lab to enhance scientific experience.

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 3

**CHEM 104 - Introduction to Organic, Biochemical, Pharmacological, and Fuel Chemistry**

Credits: 4 (NR)

Modern and historical accounts of organic chemistry, biochemistry, pharmacology, and fuel chemistry. Topics include the chemistry of carbon compounds, synthesis of polymers and their utility and use in the modern world, biomolecules, DNA and animal cloning, embryonic stem cells, the chemical structure and biological activity of drugs and medicines, and fuel chemistry including petroleum through green chemistry and the future. (CHEM 104 requires concomitant registration in a 104 laboratory section.)

Fulfills general education requirement in natural science (lab).

**Prerequisite(s):** Not open to students majoring in chemistry.

**Notes:** Not open to students majoring in chemistry. Credit will not be given for both CHEM 104 and CHEM 212
CHEM 105 - Introductory Chemistry Laboratory I

Credits: 1 (NR)
Introductory laboratory course to demonstrate principles and application of chemistry.

Prerequisite(s): CHEM 101

Notes: Not open to students majoring in chemistry. Credit will not be given for both this course and CHEM 211, 212.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 3
When Offered: Fall

CHEM 106 - Introductory Chemistry Laboratory II

Credits: 1 (NR)
1-credit laboratory course for non-science majors. Laboratory experience to demonstrate principles and application of chemistry.

Prerequisite(s): CHEM 102.

Notes: Not open to students majoring in chemistry. Credit will not be given for both this course and CHEM 211, 212.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 3
When Offered: Spring

CHEM 155 - Introduction to Environmental Chemistry I

Credits: 4 (NR)

Basic chemical principles of Earth's water, air, and soil systems; presented in the context of understanding environmental issues. Includes Saturday morning field trips to sites of past and present environmental contamination, alternating with Saturday morning laboratory activities. Designated a Green Leaf Course.

Fulfills general education requirement in natural science (lab).

Notes: Credit will not be given for this course and CHEM 103, 104.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 3
CHEM 156 - Introduction to Environmental Chemistry II

Credits: 4 (NR)

Basic chemical principles of Earth's water, air, and soil systems; presented in the context of understanding environmental issues. Includes Saturday morning field trips to sites of past and present environmental contamination, alternating with Saturday morning laboratory activities. Designated a Green Leaf Course.

Fulfills general education requirement in natural science (lab).

Prerequisite(s): CHEM 155.

Notes: Credit will not be given for this course and CHEM 103, 104.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 3

CHEM 201 - Introductory Chemistry I

Credits: 3 (NR)

Fundamental principles of atomic and molecular structure; chemical bonding; basic concepts of chemical reactions and thermochemistry; and properties of gases, liquids, and solids.

Fulfills general education requirement in natural science (nonlab).

Notes: Does not fulfill degree requirements for laboratory science course. Credit will not be given for this course and CHEM 211 or 103. General chemistry course for students interested in science, engineering, mathematics, or computer science who do not require a lab.

Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 0

CHEM 202 - Introductory Chemistry II

Credits: 3 (NR)

Fundamentals of reaction rates and equilibrium. Topics include kinetics, properties of solutions, ionic equilibrium, chemical thermodynamics, electrochemistry, and nuclear chemistry.

Fulfills general education requirement in natural science (nonlab).

Prerequisite(s): CHEM 201 or 211.

Notes: Does not fulfill degree requirements for laboratory science course. Credit will not be given for this course and CHEM 212 or 104. Second-semester general chemistry course for those interested in science, engineering, mathematics, or computer science who do not require a lab.
CHEM 203 - General Chemistry Laboratory I

Credits: 1 (NR)
General Chemistry laboratory course for students majoring in science, engineering, or mathematics. Laboratory experience to demonstrate general chemistry principles and applications.

Prerequisite(s): CHEM 201.

Notes: Credit will not be given for this course and CHEM 101 or 102 to students majoring in science, engineering, or mathematics.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 3
When Offered: Spring

CHEM 204 - General Chemistry Laboratory II

Credits: 1 (NR)
Second semester general chemistry laboratory course for students majoring in science, engineering, or mathematics. Laboratory experience to demonstrate general chemistry principles and applications.

Prerequisite(s): CHEM 202.

Notes: Credit will not be given for this course and CHEM 101 or 102 to students majoring in science, engineering, or mathematics.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 3
When Offered: Fall, Spring

CHEM 211 - General Chemistry

Credits: 4 (NR)
Basic facts and principles of chemistry, including atomic and molecular structure, gas laws, kinetics, equilibrium, electrochemistry, nuclear chemistry, and properties and uses of the more important elements and their compounds.

Fulfills general education requirement in natural science (lab).

Notes: Credit will not be given for this course and CHEM 103, 104. Students majoring in science, engineering, or mathematics should choose this course sequence.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 3
**CHEM 212 - General Chemistry**

Credits: 4 (NR)
Basic facts and principles of chemistry, including atomic and molecular structure, gas laws, kinetics, equilibrium, electrochemistry, nuclear chemistry, and properties and uses of the more important elements and their compounds.

Fulfills general education requirement in natural science (lab).

**Prerequisite(s):** CHEM 211. Prerequisite enforced by registration system.

**Notes:** Credit will not be given for this course and CHEM 103, 104. Students majoring in science, engineering, or mathematics should choose this course sequence.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 3

---

**CHEM 251 - General Chemistry for Engineers**

Credits: 4 (NR)
Fundamental principles of chemical structure and reactivity including atomic and molecular structure; chemical bonding; structures of ionic, covalent, and metallic lattices; oxidation reduction; electrochemistry and chemistry of metals; and introduction to organic chemistry and polymers.

Fulfills general education requirement in natural science (lab).

**Notes:** Enrollment restricted to students intending to major in engineering. Students who need two semesters of chemistry should enroll in CHEM 211. Credit will not be given for this course and CHEM 211.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 3

---

**CHEM 300 - Chemistry of Semiconductor Processing**

Credits: 3 (NR)
Chemical aspects of the manufacture of semiconductor devices. Topics include oxidation of silicon, photoresists, plasma etching, removal of metal contaminants by acid etching, and analysis of semiconductor thin films.

**Prerequisite(s):** Completion of 30 credits or permission of instructor.

**Notes:** Does not satisfy chemistry course requirements for BS in biology. Cannot be used as a chemistry elective toward BA, BS, or minor in chemistry, and does not fulfill premedical requirements.

**Hours of Lecture or Seminar per week:** 1-12  
**Hours of Lab or Studio per week:** 0
CHEM 313 - Organic Chemistry

Credits: 3 (NR)
Theoretical, synthetic, industrial, and biological aspects of the chemistry of carbon compounds.

Prerequisite(s): Minimum grade of D in CHEM 212. Prerequisite enforced by registration system.

Corequisite(s): CHEM 315

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CHEM 314 - Organic Chemistry

Credits: 3 (NR)
Theoretical, synthetic, industrial, and biological aspects of the chemistry of carbon compounds.

Prerequisite(s): Minimum grade of D in CHEM 313. Prerequisite enforced by registration system.

Corequisite(s): CHEM 318 or CHEM 320.

Hours of Lecture or Seminar per week: 1-9
Hours of Lab or Studio per week: 0

CHEM 315 - Organic Chemistry Lab I

Credits: 2 (NR)
Lab techniques and reactions arranged to accompany CHEM 313.

Prerequisite(s): Minimum grade of D in CHEM 313. Prerequisite enforced by registration system.

Corequisite(s): CHEM 313

Notes: One-hour recitation.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 1

CHEM 318 - Organic Chemistry Lab II

Credits: 2 (NR)
Continuation of CHEM 315, arranged to accompany CHEM 314.

Prerequisite(s): Minimum grade of D in CHEM 315. Minimum grade of D in CHEM 314. Prerequisite enforced by registration system.
Corequisite(s): CHEM 314.

Notes: One-hour recitation.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 1

**CHEM 321 - Elementary Quantitative Analysis**

Credits: 4 (NR)
Principles of chemical analysis emphasizing ionic equilibria. Lab consists of gravimetric, volumetric, and instrumental methods illustrating principal types of quantitative determinations.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 6

**CHEM 331 - Physical Chemistry I**

Credits: 3 (NR)
Yearlong survey covering topics including thermodynamics, equilibria, kinetics, solution properties, elementary quantum theory, electrochemistry, atomic and molecular structure, and nuclear chemistry.

Prerequisite(s): MATH 113, 114; PHYS 243 or 160

Corequisite(s): PHYS 243 or 160

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 0

**CHEM 332 - Physical Chemistry II**

Credits: 3 (NR)
Yearlong survey covering topics including thermodynamics, equilibria, kinetics, solution properties, elementary quantum theory, electrochemistry, atomic and molecular structure, and nuclear chemistry.

Prerequisite(s): MATH 113, 114, CHEM 331; PHYS 243 or 160

Corequisite(s): PHYS 243 or 160

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 0

**CHEM 333 - Physical Chemistry for the Life Sciences I**
CHEM 334 - Physical Chemistry for the Life Sciences II

Credits: 3 (NR)
Yearlong survey of principles of physical chemistry emphasizing application in biological sciences. Topics include first and second laws of thermodynamics, free energy and chemical equilibria, kinetics, transport properties, molecular interactions, molecular structure, spectroscopy, statistical thermodynamics, and x-ray diffraction.

Prerequisite(s): CHEM 333; MATH 113, 114

Notes: Credit will not be given for both this course sequence and CHEM 331, 332.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 0

CHEM 336 - Physical Chemistry Lab I

Credits: 2 (NR)
Quantitative experimental study of physicochemical principles. CHEM 336 and 337 constitute an introduction to the practice and theory of experimental physical chemistry.

Fulfills writing intensive requirement in the major.

Prerequisite(s): CHEM 331

Corequisite(s): CHEM 331

Notes: One-hour recitation.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 3

CHEM 337 - Physical Chemistry Lab II
CHEM 336 - Continuation

Credits: 2 (NR)
Continuation of CHEM 336.

Prerequisite(s): CHEM 331, 332, 336

Corequisite(s): CHEM 332

Notes: One-hour recitation.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 3

CHEM 341 - Fundamental Inorganic Chemistry

Credits: 3 (NR)
Descriptive chemistry including chemical properties, reactions, and reaction mechanisms of inorganic elements and compounds. Topics include main group and transition elements, organometallic compounds, and bioinorganic chemistry.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 0

CHEM 350 - Computer Techniques for Chemistry

Credits: 3 (NR)
Introduction to computer software, both commercial and online, emphasizing applicability to chemistry topics. Techniques include spreadsheet programming, graphing and statistics, molecular modeling, and chemical information search and retrieval.

Fulfills general education requirement in information technology (all).

Prerequisite(s): CHEM 313.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 0

CHEM 355 - Undergraduate Research

Credits: 1-3 (RD)
Original research project. May involve lab study, computer modeling and analysis, or other original research as appropriate. Research formulated and completed under instructor's guidance. Culminates in a written and oral final report. May be repeated for a total of 6 credits.

Prerequisite(s): 30 credits, chemistry major or minor.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 1-6
CHEM 413 - Synthetic and Mechanistic Organic Chemistry

Credits: 3 (NR)
General review of synthetic pathways and applications to new topics, emphasizing fused ring aromatics, heterocyclics, natural products, and biologically active compounds. Includes relationship of applied organic chemistry to consumer products, including drugs and agricultural chemicals.

Prerequisite(s): CHEM 313, 314 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CHEM 422 - Instrumental Analysis

Credits: 3 (NR)
Introduces theories of analysis by instrumental methods. Basic electronics applied to chemical measurements. Topics include introduction to theory of spectroscopy including ultraviolet, visible, and infrared, and electrochemical methods of analysis; theory of Fourier transform techniques such as FT-IR and FT-NMR; and theory of advanced pulse techniques.

Prerequisite(s): CHEM 314, 321, and 331. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 0

CHEM 423 - Instrumental Analysis Laboratory

Credits: 2 (NR)
Laboratory-based introduction to quantitative analysis of organic and inorganic substances by using modern analytical instrumentation. Laboratory highlights practice of atomic and molecular spectroscopy, spectrophotometry, chromatography, voltammetry, and potentiometry in relation to chemical experimentation.

Prerequisite(s): CHEM 422 or permission of instructor. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 6

CHEM 427 - Aquatic Environmental Chemistry

Credits: 3 (NR)
Thermodynamic and kinetic processes regulating the chemistry of surface and groundwater in natural and polluted environments with particular emphasis in explaining the aqueous concentrations of chemical species and controlling geochemical factors in the hydrosphere. Structure, sources and transformations of organic matter in the aquatic environment and interactions with aqueous solutes will be covered as related to contemporary issues in water quality.

Prerequisite(s): CHEM 321 or permission of the instructor.
CHEM 438 - Atmospheric Chemistry

Credits: 3 (NR)
The fundamental chemical processes of the Earth's atmosphere including chemical cycles, thermodynamics, reaction kinetics, photochemistry, radiative balance, ozone chemistry and environmental issues, including air pollution, acid rain and global change.

Equivalent to CLIM 438

Prerequisite(s): CHEM 331 and 332 or permission of instructor.

Hours of Lecture or Seminar per week: 1-2
Hours of Lab or Studio per week: 0

CHEM 441 - Properties and Bonding of Inorganic Compounds

Credits: 3 (NR)
Interpretation of physical and chemical properties of inorganic compounds in terms of currently used bonding concepts. Topics include molecular symmetry and applications of symmetry, structure and bonding in ionic solids; reactions and characterizations of solids; electronic and magnetic properties and applications of solids.

Prerequisite(s): CHEM 211, 212; MATH 113

Hours of Lecture or Seminar per week: 1-2
Hours of Lab or Studio per week: 0

CHEM 445 - Inorganic Preparations and Techniques

Credits: 2 (NR)
Application of techniques of inorganic chemistry to preparation, purification, and spectroscopic characterization of selected substances.

Prerequisite(s): CHEM 321 and 441.

Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 6

CHEM 446 - Bioinorganic Chemistry

Credits: 3 (NR)
Application of inorganic coordination chemistry and physical methods in study of structure and function of metal ion sites in
biomolecules. Properties of transition metal ions, ligand field theory. Topics include iron cytochromes, zinc and copper enzymes, cobalamins, iron sulfur proteins, oxygen transport, iron storage, electron transfer, inorganic model compounds, metals in medicine, and toxicity of inorganic species.

**Prerequisite(s):** CHEM 463 or BIOL 483

**Corequisite(s):** CHEM 463 or BIOL 483

**Notes:** Students may take this course concurrently with CHEM 463 or after taking CHEM 463.

**Hours of Lecture or Seminar per week:** 1-6
**Hours of Lab or Studio per week:** 0

---

**CHEM 451 - Special Projects in Chemistry**

Credits: 1-3 (NR)
Introduction to chemical research or development. Includes literature search, conferences, and lab.

**Prerequisite(s):** Chemistry major or minor, 90 credits, and permission of department research committee.

**Notes:** Written and oral technical reports required.

**Hours of Lecture or Seminar per week:** 1
**Hours of Lab or Studio per week:** 6

---

**CHEM 452 - Special Projects in Chemistry**

Credits: 1-3 (NR)
Introduction to chemical research or development. Includes literature search, conferences, and lab.

**Prerequisite(s):** Chemistry major or minor, 90 credits, and permission of department research committee.

**Notes:** Written and oral technical reports required.

**Hours of Lecture or Seminar per week:** 1-12
**Hours of Lab or Studio per week:** 6

---

**CHEM 455 - Honors Research in Chemistry**

Credits: 3 (NR)
Introduction to research on current problem in chemical sciences under supervision of faculty advisor. Includes literature search, laboratory or theoretical work, conferences with faculty advisor, attendance at regularly scheduled seminars, and oral and written presentations.

**Prerequisite(s):** CHEM 313, 314; CHEM 321; CHEM 331,332

**Notes:** Credit will not be given for both these courses and CHEM 451, 452.
CHEM 456 - Honors Research in Chemistry

Credits: 3 (NR)
Introduction to research on current problem in chemical sciences under supervision of faculty advisor. Includes literature search, laboratory or theoretical work, conferences with faculty advisor, attendance at regularly scheduled seminars, and oral and written presentations.

Prerequisite(s): CHEM 313, 314; CHEM 321; CHEM 331,332

Notes: Credit will not be given for both these courses and CHEM 451, 452.

CHEM 458 - Chemical Oceanography

Credits: 3 (NR)
The world’s oceans, including a variety of closed basins and estuaries, comprise a complex and dynamic system of chemical processes that interact with biological, geological, physical, and atmospheric processes to play a significant role in defining the earth’s fragile environment. This course will present an overview of the origin, occurrence, and distribution of the chemical components in sea water and an introduction to the basic principals of the chemical processes taking place in the marine environment.

Equivalent to GEOL 458

Prerequisite(s): CHEM 212, and CHEM 321 or GEOL 309

CHEM 463 - General Biochemistry I

Credits: 4 (NR)
Brief introduction to biochemistry, followed by in-depth look at amino acids and proteins, 3-D structure, folding and dynamics, their specialized function, and primary metabolism. Emphasizes enzymes and their chemical mechanisms, and metabolism.

Prerequisite(s): CHEM 313, BIOL 213. Prerequisite enforced by registration system.
CHEM 464 - General Biochemistry II

Credits: 3 (NR)
Continuation of general biochemistry, focusing on secondary metabolism, cell signaling, and processes of replication, transcription, and translation. Emphasizes important biochemistry research topics; much material drawn from current biochemical literature.

Prerequisite(s): CHEM 463/BIOL 483. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 6
Hours of Lab or Studio per week: 0

CHEM 465 - Biochemistry Lab

Credits: 2 (NR)
Introduction to modern biochemical experimental methods of studying chemical and physical properties of biological molecules. Includes separation, identification, and characterization of biomolecules.

Fulfills writing intensive requirement in the major.

Corequisite(s): CHEM 463.

Hours of Lecture or Seminar per week: 1-12
Hours of Lab or Studio per week: 6

CHEM 467 - The Chemistry of Enzyme-Catalyzed Reactions

Credits: 3 (NR)
Examples of enzyme mechanisms demonstrate how chemical principles are employed by living organisms. Specific enzyme mechanisms used to illustrate principles from organic, inorganic, and physical chemistry. Discusses techniques to monitor enzyme reactions.

Prerequisite(s): CHEM 313 and 463.

Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 0

CHEM 468 - Bioorganic Chemistry

Credits: 3 (NR)
Basic understanding of chemical nature of biomolecules and biomacromolecules. Introduces biomolecules such as amino acids, proteins, carbohydrates, and lipids. Lectures focus on biophysical properties and synthesis, using practical examples and visual aids.

Prerequisite(s): CHEM 314 and 463.
CHEM 470 - Laboratory Instructional Methods for Chemistry

Credits: 3 (NR)
Lecture and laboratory experience teaching chemistry in laboratory. Students work closely with faculty members and are responsible for all aspects of teaching undergraduate laboratory techniques. Students also learn techniques for acquisition and storage of chemicals and laboratory apparatus, safety, disposal of chemical waste, and literature of chemical education.

Prerequisite(s): CHEM 314.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 6

CHEM 490 - Undergraduate Seminar

Credits: 1 (RD)
Selected topics from recent chemical theory and applications, generally consisting of research presentations by invited faculty from other institutions. Attendance is required at 80% of the seminars and students must write up a one-page summary of each talk attended. This course will also be used to teach students how to give effective presentations. May be repeated for a total of 2 credits.

Prerequisite(s): 60 credits and must be a chemistry major or minor.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0

CHEM 500 - Selected Topics in Modern Chemistry

Credits: 3 (NR)
Topics of interest in analytical, biological, environmental, geological, geochemical, inorganic, organic, and physical chemistry.

Notes: May be repeated for credit with different topics. Credit not allowed toward major in chemistry.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0

CHEM 505 - Hazardous Materials Waste Management

Credits: 1-3 (NR)
Comprehensive review of subjects most frequently encountered in hazardous chemicals management.

Prerequisite(s): CHEM 313 or permission of instructor.
CHEM 513 - Synthetic and Mechanistic Organic Chemistry

Credits: 3 (NR)
General review of synthetic pathways and applications to new topics, emphasizing fused ring aromatics, heterocyclics, natural products, and biologically active compounds. Includes relationship of applied organic chemistry to consumer products, including drugs and agricultural chemicals. Organic core course.

Prerequisite(s): CHEM 313 and 314.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0

CHEM 521 - Theory of Analytical Processes

Credits: 3 (NR)
Theory of signal and noise, mass transport phenomena, thermodynamics, and ionics in analytical chemistry. Applications made to Fourier transform techniques such as FT-IR and FT-NMR, convolution and correlation spectroscopy, chemical sensors, chromatography, flow injection analysis, ion transport in membrane, and interpretation of analytical signals. Analytical core course.

Prerequisite(s): CHEM 422 or permission of instructor.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0

CHEM 529 - Instrumental Techniques of Analysis

Credits: 2 (RT)
Principles and operation of modern instrumentation, emphasizing applications to analysis of chemical, biological, and environmental samples. Methods include combined capillary column gas chromatography and mass spectrometry, high-performance liquid chromatography, optical methods, surface analysis methods, magnetic resonance spectroscopy, atomic emission and absorption spectrometry, and electroanalytical methods. With approval of research committee, students choose methods studied.

Prerequisite(s): CHEM 321 and 422 or 521, or permission of department.

Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 6

CHEM 531 - Elements of Physical Chemistry
Intensive overview of concepts, techniques, and models of physical chemistry as they apply in many branches of chemistry and allied sciences. Topics include properties of gases, first and second laws of thermodynamics, phase and chemical equilibrium, chemical kinetics, atomic and molecular structure, and spectroscopy. Emphasizes developing practical skill in using tools of physical chemistry. Extensive use of spreadsheet models to investigate chemical and physical systems.

**Prerequisite(s):** CHEM 211, 212; CHEM 313, 314; PHYS 243, 245; MATH 113; or permission of instructor.

**Hours of Lecture or Seminar per week:** 2  
**Hours of Lab or Studio per week:** 0

### CHEM 554 - Geochemistry of Environmental Hazards

Credits: 3 (NR)  
Introduction to origins and reactions of hazardous substances in air, water, and soil environments. Covers movement of trace organic and inorganic substances in geochemical cycle, with particular reference to transport processes that influence air and water quality.

**Prerequisite(s):** CHEM 314 or permission of instructor.

**Hours of Lecture or Seminar per week:** 2  
**Hours of Lab or Studio per week:** 3

### CHEM 563 - General Biochemistry I

Credits: 4 (NR)  
Brief introduction to biochemistry, followed by an in-depth look at amino acids and proteins, 3-D structure, folding and dynamics, their specialized function and primary metabolism. Emphasizes enzymes and their chemical mechanisms and metabolism. Students will be assigned papers from the primary literature and be required to answer questions from these papers on exams.

**Prerequisite(s):** CHEM 313; BIOL 213.

**Hours of Lecture or Seminar per week:** 4  
**Hours of Lab or Studio per week:** 0

### CHEM 564 - General Biochemistry II

Credits: 3 (NR)  
Previous course in biology recommended but not required. Important biological compounds, including proteins, carbohydrates, lipids, and nucleic acids, and their interrelations.

**Prerequisite(s):** CHEM 563 or equivalent.

**Hours of Lecture or Seminar per week:** 4  
**Hours of Lab or Studio per week:** 0
CHEM 567 - The Chemistry of Enzyme-Catalyzed Reactions

Credits: 3 (NR)
Examples of enzyme mechanisms demonstrate how chemical principles are employed by living organisms. Specific enzyme mechanisms used to illustrate principles from organic, inorganic, and physical chemistry. Discusses techniques to monitor enzyme reactions.

Prerequisite(s): CHEM 313 and 463 or permission of instructor.

Hours of Lecture or Seminar per week: 1-10
Hours of Lab or Studio per week: 0

CHEM 568 - Bioorganic Chemistry

Credits: 3 (NR)
Basic understanding of chemical nature of biomolecules and biomacromolecules. Introduces biomolecules such as amino acids, proteins, carbohydrates, and lipids. Lectures focus on biophysical properties and synthesis, using practical examples and visual aids.

Prerequisite(s): CHEM 314 and 463, or equivalent, or permission of instructor.

Hours of Lecture or Seminar per week: 1-10
Hours of Lab or Studio per week: 0

CHEM 579 - Special Topics

Credits: 1-6 (RT)
Current topics in chemistry, depending on instructor's specialty.

Prerequisite(s): CHEM 313 and 314 or permission of instructor.

Notes: May be repeated with different topics, with department approval.

Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 0

CHEM 613 - Modern Polymer Chemistry

Credits: 3 (NR)
Synthetic and analytical chemistry of synthetic macromolecules. Topics include polymer solutions, molecular weight determination, spectroscopy, thermal analysis, x-ray crystallinity, polymerization types, and commercial and electroactive polymers. Organic core course.
CHEM 614 - Physical Organic Chemistry

Credits: 3 (NR)
Principles underlying molecular structure, reactivity, and reaction mechanisms. Topics include valence-bond and molecular-orbital theory, electronic interpretation of organic reactions, stereochemistry, conformational analysis, kinetics and thermodynamics of organic reactions, and photochemistry. Organic core course.

Prerequisite(s): CHEM 314 or permission of instructor.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 0

CHEM 617 - Organic Structural Spectroscopy

Credits: 3 (NR)
Spectroscopic determination of organic molecular structure using 1H, 13H, 19F, and 31P nuclear magnetic resonance spectroscopy and infrared, mass, ultraviolet and visible, and Raman spectroscopy. Organic core course.

Prerequisite(s): CHEM 314 or equivalent.

Hours of Lecture or Seminar per week: 4
Hours of Lab or Studio per week: 0

CHEM 620 - Modern Instrumentation

Credits: 3 (NR)
Methods of sensing and measurement of radiation, particles, pressure, concentrations of specific elements and compounds. Topics include basic operational amplifier circuits for analog signals, digitizing devices and computerized data collection, noise and noise-reduction methods, and specialized instrumentation systems for various areas of chemistry and physics.

Equivalent to PHYS 533

Prerequisite(s): CHEM 422 or permission of instructor.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 2

CHEM 624 - Principles of Chemical Separation

Credits: 3 (NR)
Theories and models of separation with applications to analyses of a wide range of chemical, biological, and environmental
samples. Topics include high-resolution gas and high-performance liquid chromatography. Emphasizes theory of reverse phase, normal phase, ion exchange, size exclusion, and affinity based separations. Also presents instrumentation such as detectors, pumps, and columns, and data acquisition. Analytical core course.

Prerequisite(s): CHEM 422 or 521, or permission of instructor.

Hours of Lecture or Seminar per week: 5
Hours of Lab or Studio per week: 0

CHEM 625 - Electroanalytical Chemistry

Credits: 3 (NR)
Review of basic electrochemistry. Emphasizes analysis and research for applications of modern electrochemical techniques such as chronoamperometry; cyclic, stripping, and AC voltammetry; pulse polarography; coulometry; electrochemical sensors; and instrumentation.

Prerequisite(s): CHEM 321 and 331.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0

CHEM 627 - Aquatic Environmental Chemistry

Credits: 3 (NR)
Thermodynamic and kinetic processes regulating the chemistry of surface and groundwater in natural and polluted environments with particular emphasis in explaining the aqueous concentrations of chemical species and controlling geochemical factors in the hydrosphere. Structure, sources and transformations of organic matter in the aquatic environment and interactions with aqueous solutes will be covered as related to contemporary issues in water quality. Students will be assigned papers from the primary literature and be required to answer questions from these papers on exams.

Prerequisite(s): CHEM 321 or GEOL 302 or equivalent courses or permission of the instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

CHEM 633 - Chemical Thermodynamics and Kinetics

Credits: 3 (NR)
Advanced study covering application of kinetics to the elucidation of reaction mechanisms and application of statistical thermodynamics to theory of elementary reaction rates. Physical core course.

Equivalent to CSI 711

Prerequisite(s): CHEM 331 and 332.
CHEM 641 - Solid State Chemistry

Credits: 3 (NR)
Focuses on the design and synthesis, structure and bonding of solid state compounds; physical properties and characterization of solids. Topics of current interest will also be included.

Prerequisite(s): CHEM 441 or permission of instructor.

CHEM 646 - Bioinorganic Chemistry

Credits: 3 (NR)
Applies inorganic coordination chemistry and physical methods to understand structure and function of metal ion sites in biomolecules. Biochemical roles of metal centers in oxygen transport, metalloenzymes, and electron transfer. Topics include iron cytochromes, zinc and copper enzymes, cobalamins, iron sulfur proteins, inorganic model compounds, and metals in medicine. Inorganic core course.

Prerequisite(s): CHEM 441 or permission of instructor.

CHEM 651 - Environmental Chemistry of Organic Substances

Credits: 3 (NR)

Prerequisite(s): One semester of physical chemistry, or permission of instructor.

CHEM 660 - Protein Biochemistry

Credits: 3 (NR)
Proteins play critical roles in most biological processes. Therefore, to understand these processes, it is necessary to understand proteins. This course will introduce students to proteins, their biosynthesis/biodegradation and their biophysical and biochemical
properties. Biochemistry core course.

Prerequisite(s): CHEM 463 or equivalent or permission of instructor.

Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 0

CHEM 661 - Antibiotic Chemistry and Resistance

Credits: 3 (NR)
Introduces the various classes of antibiotics. Focus on the chemistry of antibiotics and how they inhibit bacterial growth and/or cause death and the response of bacteria to these compounds.

Prerequisite(s): CHEM 463 (or equivalent), or permission of instructor.

Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 0

CHEM 662 - Modern Methods of Drug Discovery

Credits: 3 (NR)
Introduction to the process of drug discovery. Covers modern methods and strategies of target identification, lead identification, and lead optimization. Biochemistry core course.

Prerequisite(s): CHEM 463 (or equivalent), or permission of instructor.

Hours of Lecture or Seminar per week: 1-9
Hours of Lab or Studio per week: 0

CHEM 665 - Protein-Protein Interactions: Methods and Applications

Credits: 3 (NR)
Introduction to the fundamental principles of protein-protein interactions, including experimental design considerations and methods for quantification of these interactions.

Prerequisite(s): CHEM 463 (or equivalent), or permission of instructor.

Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 0

CHEM 670 - Teaching Practicum

Credits: 1-2 (NR)
Prelaboratory lecture and laboratory teaching in chemistry. Students work closely with faculty and are responsible for all aspects
of teaching undergraduate laboratory techniques.

**Prerequisite(s):** Enrollment in the graduate program and permission of Chair. Lecture and lab experience teaching chemistry in the lab.

**Hours of Lecture or Seminar per week:** 1-6  
**Hours of Lab or Studio per week:** 0  
**Grading:** Graduate Special

---

**CHEM 728 - Introduction to Solid Surfaces**

Credits: 3 (NR)  
Introduces properties of solid surfaces. Topics include gas absorption isotherms, surface area measurement techniques, real and clean surfaces, physisorption and chemisorption, methods of gas adsorption and desorption, measurement of heats of adsorption, desorption kinetics, electron spectroscopies and surface sensitivities, instrumentation; and principles of vacuum technology.

Equivalent to CSI 712

**Prerequisite(s):** CHEM 422 or equivalent.

**Hours of Lecture or Seminar per week:** 1-3  
**Hours of Lab or Studio per week:** 0

---

**CHEM 732 - Quantum Chemistry**

Credits: 3 (NR)  
Illustration of fundamental concepts of quantum mechanics with applications to chemical systems, including atomic and molecular electronic structure and properties, molecular symmetry, and intermolecular forces. Physical core course.

Equivalent to CSI 713

**Prerequisite(s):** CHEM 332 or equivalent.

**Hours of Lecture or Seminar per week:** 1-6  
**Hours of Lab or Studio per week:** 0

---

**CHEM 733 - Polymer Physical Chemistry**

Credits: 3 (NR)  
Physical chemistry of macromolecules including molecular weight, conformation, configuration, characteristics of the glassy state, methods for studying polymer morphology (XRD, SEM, TEM, optical microscopy), electronic structure and behavior, band theory, conduction mechanisms, intrinsically conductive polymers, polarization, dielectric behavior, triboelectric behavior, piezo and pyroelectric behavior, and nonlinear optical properties.

**Prerequisite(s):** CHEM 332 or equivalent; or permission of instructor.
CHEM 735 - Astrophysical Chemistry of Planetary Bodies

Credits: 3 (NR)
In depth review of the chemistry of planets, comets and other bodies in the Solar System. Emphasis will be placed on the laboratory techniques and measurements made in order to understand and predict astronomical observations.

Prerequisite(s): CHEM 331, or ASTR 403, or permission of instructor.

CHEM 736 - Computational Quantum Mechanics

Credits: 3 (NR)
Study of fundamental concepts of quantum mechanics from computational point of view, review of systems with spherically symmetric potentials, electron-atom solutions to Schrodinger's equation, electron spin in many electron systems, atomic structure calculations, algebra of many electron calculations, Hartree-Fock, self-consistent field method, molecular structure calculations, scattering theory computations, and solid-state computations.

Equivalent to CSI 783/PHYS 736

Prerequisite(s): PHYS 502, 510, or permission of instructor.

CHEM 767 - Industrial Biochemistry

Credits: 3 (NR)
An introduction to industrial biochemistry. Includes a mechanistic examination of the biosynthesis of several industrially important secondary metabolites, the industrial scale process of obtaining commercially valuable biochemical products, and the regulations that oversee the industrial biochemical process.

Prerequisite(s): CHEM 463 or permission of instructor.

CHEM 790 - Graduate Seminar
Credits: 1 (RD)
Selected topics from recent chemical theory and applications, generally consisting of research presentations by invited faculty from other institutions. Attendance is required at 80% of the seminars and students must write up a 1 page summary of each talk attended. Course also used to teach students effective presentation methods.

Prerequisite(s): Admission to a graduate program in Chemistry and Biochemistry, or permission of instructor.

Notes: Requires, in last semester, seminar presentation on student's research or another topic acceptable to department. Three credits of CHEM 790 required for MS degree; an additional 3 credits required after admission to PhD program.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0

CHEM 796 - Directed Reading and Research

Credits: 1-6 (RD)
Reading and research on a specific topic in chemistry or biochemistry under direction of a faculty member. May be repeated for a total of 12 credits.

Prerequisite(s): Admission to a graduate program in chemistry and biochemistry or affiliated programs.

Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 1-6

CHEM 798 - Research Project

Credits: 3-6 (RD)
Experimental or theoretical research project chosen and completed under guidance of graduate faculty member.

Prerequisite(s): Permission of department; 6 credits of CHEM 798 or 799, but credit will not be given for both.

Notes: Requires comprehensive report acceptable to advisory committee, and final oral exam on report.

Hours of Lecture or Seminar per week: 1-12
Hours of Lab or Studio per week: 0
Grading: Satisfactory/No credit only

CHEM 799 - Master's Thesis

Credits: 1-6 (RD)
Laboratory thesis research and writing under direction of supervisor.

Prerequisite(s): Permission of department.

Notes: Minimum of 3 credits for first two enrollment periods.

Hours of Lecture or Seminar per week: 1-12
CHEM 814 - Advanced Bioorganic Chemistry

Credits: 3 (NR)
Introduces the chemical nature of biomolecules, with a focus on their organic properties. Focuses on the chemical principals that underlie the diverse structures, properties and reactions of biomolecules. Core course in the Chemistry and Biochemistry doctoral program.

Prerequisite(s): CHEM 313, 314, and 463 or equivalent; or permission from instructor.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 0

CHEM 817 - Organic Structural Spectroscopy

Credits: 3 (NR)
Spectroscopic determination of organic molecular structure using 1H, 13H, 19F, and 31P nuclear magnetic resonance, infrared, ultraviolet, visible, and Raman spectroscopy, and mass spectrometry.

Prerequisite(s): CHEM 314 or equivalent.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

CHEM 821 - Theory of Analytical Processes

Credits: 3 (NR)
Theory and application of contemporary analytical processes and methods used in chemistry research. Emphasis on analytical signals and accompanying noise, sample preparation techniques, and quality assurance in measurements. Core course in the Chemistry and Biochemistry doctoral program.

Prerequisite(s): Admission to Chemistry and Biochemistry doctoral program.

Hours of Lecture or Seminar per week: 3-6
Hours of Lab or Studio per week: 0

CHEM 833 - Physical Chemistry and Biochemistry

Credits: 3 (NR)
The theory and practical use of thermodynamics, kinetics, spectroscopy and quantum chemistry in chemical and biochemical research. Core course in the Chemistry and Biochemistry doctoral program.
CHEM 891 - Doctoral Scientific Critique, Writing and Presentation

Credits: 3 (NR)
Development of skills associated with scientific communication and research such as oral presentation of scientific material, analysis of scientific research and preparation of scientific proposals. In preparing scientific proposals, students will learn how to identify scientific questions of interest and how to plan a course of experiments to address these questions. Core course in the Chemistry and Biochemistry doctoral program.

Prerequisite(s): Permission of academic advisor, research advisor and/or research committee.

CHEM 896 - Doctoral Directed Reading and Research

Credits: 1-6 (RD)
Reading and research on a specific topic in Chemistry or Biochemistry under direction of a faculty member.

Notes: May be repeated for up to a total of 15 credits.

CHEM 998 - Doctoral Dissertation Proposal

Credits: 1-12 (RD)
Development of a research proposal under the guidance of the research advisor and graduate committee. The resulting proposal, once approved by the student's research advisor and committee, forms the basis of the student's doctoral dissertation. May be repeated for credit, but no more than 24 combined credits from CHEM 998 and CHEM 999 may be applied toward satisfying doctoral degree requirements, with no more than 12 credits of CHEM 998.

Prerequisite(s): Permission of research advisor and/or graduate committee.

CHEM 999 - Doctoral Dissertation Research

Grading: Satisfactory/No credit only
Credits: 1-12 (RD)
Research in the concentration pertinent to student's program of study under the direction of their research advisor and committee. Students may enroll for credits in this course once their research proposal has been approved. May be repeated for credit, but no more than 24 combined credits from CHEM 998 and CHEM 999 may be applied toward satisfying doctoral degree requirements, with no more than 12 credits of CHEM 998.

Prerequisite(s): Admission to candidacy in Chemistry and Biochemistry Doctoral Program.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 1-12
Grading: S/IP

Chinese (CHIN)
Offered by the College of Humanities and Social Sciences

CHIN 101 - Elementary Chinese
Credits: 3 (NR)
Introduction to Mandarin, including basic grammar, oral expression, listening comprehension, reading, and writing.

Notes: Students may not receive credit for CHIN 101 and CHIN 109 or 110.

Hours of Lecture or Seminar per week: 1-2
Hours of Lab or Studio per week: 0

CHIN 102 - Elementary Chinese
Credits: 3 (NR)
Continuation of CHIN 101.

Prerequisite(s): CHIN 101.

Notes: Students may not receive credit for CHIN 102 and CHIN 109 or 110.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CHIN 109 - Intensive Elementary Chinese
Credits: 6 (NR)
Recommended for students who desire training in Chinese language to an intermediate level of competence in a relatively short period of time.

Notes: Equivalent to CHIN 101 and 102 taught in single semester. Students may not receive credit for CHIN 109 and CHIN 101,
CHIN 110 - Elementary Chinese

Credits: 6 (NR)
Introduces elements of grammar, vocabulary, oral skills, listening comprehension, and reading.

Notes: Lab work required. Students may not receive credit for CHIN 110 and CHIN 101, 102, or 109.

CHIN 201 - Intermediate Chinese I

Credits: 3 (NR)
Further development of skills acquired in CHIN 101 and 102, including grammar, oral expression, listening comprehension, reading, and writing.

Prerequisite(s): CHIN 101 and 102.

Notes: CHIN 201 and 202 must be taken in sequence. Students may not receive credit for CHIN 201 and CHIN 209 or 210.

CHIN 202 - Intermediate Chinese II

Credits: 3 (NR)
Continuation of CHIN 201.

Prerequisite(s): CHIN 201 or equivalent.

Notes: Students may not receive credit for CHIN 202 and CHIN 209 or 210.

CHIN 209 - Intensive Intermediate Chinese

Credits: 6 (NR)
Recommended for students who desire training in Chinese to an intermediate level of competence in a relatively short period of
Prerequisite(s): CHIN 102, 109, appropriate placement score, or permission of instructor.

Notes: Equivalent to CHIN 201 and 202 taught in single semester. Students may not receive credit for CHIN 209 and CHIN 201, 202, or 210.

Hours of Lecture or Seminar per week: 6
Hours of Lab or Studio per week: 0

CHIN 210 - Intermediate Chinese

Credits: 3 (NR)
Continuation of the development of basic components of the language, with focus on listening, speaking, reading, and writing skills. Introduces students to the cultures and histories of Chinese-speaking regions.

Prerequisite(s): CHIN 110 or appropriate placement score.

Notes: Students may not receive credit for CHIN 210 and CHIN 201, 202, or 209.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CHIN 250 - Gateway to Advanced Chinese

Credits: 3 (NR)
Integration of advanced intermediate-level Chinese reading, writing, listening, and speaking skills; and the development of critical thinking about authentic texts from around the globe.

Prerequisite(s): CHIN 210, appropriate placement score, or permission of department.

Notes: Taught in Chinese.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CHIN 300 - Reading Skills Development

Credits: 3 (NR)
Develops reading proficiency, emphasizing vocabulary and grammar of standard written Chinese. Introduces discourse structure, sociolinguistic and cultural knowledge, and strategies for reading Chinese at an advanced level.

Prerequisite(s): CHIN 250, appropriate placement score, or permission of instructor.
Notes: Taught in Chinese.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**CHIN 301 - Advanced Grammar and Syntax**

Credits: 3 (NR)
In-depth review of Chinese grammar and syntax. Provides extensive practice in controlled and free writing, emphasizing fundamental difficulties and points of interference between English and Chinese.

Prerequisite(s): CHIN 250 or equivalent; appropriate placement score; or permission of instructor.

Notes: Taught in Chinese.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**CHIN 305 - Chinese for the Business World**

Credits: 3 (NR)
Introduces terminology and structure of business Chinese. Emphasizes acquiring vocabulary and developing facility in Chinese business articles and correspondence.

Prerequisite(s): CHIN 250 or equivalent; appropriate placement score; or permission of instructor.

Notes: Taught in Chinese. May be repeated for credit once with permission of department when content is different.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**CHIN 310 - Survey of Chinese Literature**

Credits: 3 (RD)
Introduces outlines of Chinese literature to the 19th century, presented through literary sources arranged in roughly chronological order. Readings include poetry; fiction; personal essays; documents of philosophy, history, and religion; and transcribed oral records.

Fulfills general education requirement in literature.

Prerequisite(s): ENGL 101/ENGH 101, or permission of instructor.

Notes: Taught in English. Knowledge of Chinese helpful but not required. May be repeated for a maximum of 6 credits when topic is different with approval of department.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
**CHIN 311 - Modern Chinese Literature in Translation**

Credits: 3 (RT)
Introduction of outlines of modern Chinese literature from early 20th century to post-Mao era, presented through literary sources arranged in roughly chronological order. Readings include poetry, fiction, personal essays.

Fulfills general education requirement in literature.

**Prerequisite(s):** ENGL 101/ENGH 101, or permission of instructor.

**Notes:** Taught in English. Knowledge of Chinese helpful but not required. May be repeated for a maximum of 6 credits when topic is different with approval of department.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**CHIN 318 - Introduction to Classical Chinese**

Credits: 3 (NR)
Introduces basic structures and vocabulary of Classical Chinese, which still has a significant influence on the formal written prose of modern newspapers and documents.

**Prerequisite(s):** CHIN 250, appropriate placement score, or permission of instructor.

**Notes:** Taught in Chinese. Fulfills the college requirement in non-Western culture.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**CHIN 320 - Contemporary Chinese Film**

Credits: 3 (NR)
Explores China from 1949 to present through cinematic and literary representations. Discussions focus on representations of cultural, social, and political changes in the movies. Also introduces critical readings that address issues of gender and youth, family, ethnicity, modernity and the nation, as well as visuality and memory.

**Notes:** Taught in English. Knowledge of Chinese language helpful but not required. Fulfills the college requirement in non-Western culture.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**CHIN 325 - Major Chinese Writers**
Credits: 3 (RD)
Studies works of major Chinese writers. Writers studied may vary.

Fulfills general education requirement in literature.

Prerequisite(s): ENGL 101/ENGH 101, or permission of instructor.

Notes: Taught in English. Knowledge of Chinese helpful but not required. May be repeated for a maximum of 6 credits when topic is different with approval of department. Fulfills the college requirement in non-Western culture.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CHIN 328 - Asian American Women Writers

Credits: 3 (NR)
Introduction to selected works by female writers of Chinese, Filipino, Indian, Japanese, and Korean descent. Analyzes themes, form, style, language, and structure of a variety of works, mainly novels and short stories. Assesses role and significance of writings as part of ethnic American and women's literature by exploring questions of identity formation and disintegration, and how they are rooted in gender, social status, ethnicity, community, geography, and generational conflict.

Fulfills general education requirement in literature.

Notes: Taught in English. Knowledge of Asian languages not required.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CHIN 355 - Readings in Chinese Poetry and Poetics

Credits: 3 (RD)
Close readings and discussions of primary texts covering major periods in Chinese poetry to 1949. Analyzes variety of themes, forms, and styles.

Prerequisite(s): CHIN 300 or permission of instructor.

Notes: Taught in Chinese. May be repeated for a maximum of 6 credits when readings are different with permission of department.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CHIN 365 - Readings in Chinese Fiction after Mao

Credits: 3 (RD)
Close readings and discussions of primary texts after the Cultural Revolution. Analyzes themes, subjects, language, and styles.
**Prerequisite(s):** CHIN 300 or permission of instructor.

**Notes:** Taught in Chinese. May be repeated for a maximum of 6 credits when readings are different with permission of department.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**CHIN 470 - Special Topics in Chinese Studies**

Credits: 3 (RD)  
Covers topics on Chinese language, literature, or culture organized by theme, genre approach, or era.

**Notes:** Taught in Chinese. May be repeated once for a maximum of 6 credits when topic is different with permission of department.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**CHIN 480 - Fourth-Year Chinese I**

Credits: 3 (NR)  
Advanced work in major grammatical and lexical topics of Chinese. Applies theoretical principles to guided written and oral exercises.

**Prerequisite(s):** CHIN 300 and 301; appropriate placement score or permission of instructor.

**Notes:** Taught in Chinese.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**CHIN 481 - Fourth-Year Chinese II**

Credits: 3 (NR)  
Advanced work in major grammatical and lexical topics of Chinese. Applies theoretical principles to guided written and oral exercises.

**Prerequisite(s):** CHIN 300, 301, 480; and appropriate placement score or permission of instructor.

**Notes:** Taught in Chinese.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0
CHIN 490 - Internship in Chinese Studies

Credits: 1-9 (RT)
Work with schools, social service programs, government agencies, interest groups, museums, or corporations locally and in Chinese-speaking regions. With a faculty supervisor, students develop an internship contract, which requires the approval of the director. For each credit, student works on site at least 45 hours.

Prerequisite(s): CHIN 210 or equivalent.

Notes: Contact the department one semester prior to enrollment. May be repeated for a maximum of 9 credits.

Hours of Lecture or Seminar per week: 1-9
Hours of Lab or Studio per week: 1-12

Civil and Infrastructure Engineering (CEIE)

Offered by the Volgenau School of Engineering.

Students may attempt an undergraduate course taught by the Volgenau School of Engineering twice. A third attempt requires approval of the department offering the course.

CEIE 100 - Environmental Engineering around the World

Credits: 3 (NR)
Introduces environmental engineering as practiced in different societies around the world. Environmental engineering is broadly defined as organizational and physical infrastructure to manage natural resources. Focuses on how different contemporary and past societies have responded to environmental challenges related to engineering opportunities. Issues include construction of large dams to manage river systems; use of forecast climate and weather data to improve agriculture, emergency response, or water supply; collection and treatment of wastewater; public health and pollution control; disposal of waste nuclear materials; and management of significantly polluted sites.

Fulfills general education requirement in global understanding.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CEIE 117 - Information Technology for Engineering

Credits: 3 (NR)
Introduces elements of computing essential for engineering students. Topics include hardware fundamentals; number systems; data types; variables; expressions; information process modeling with flow charts; data transmission; arrays; integer and floating point arithmetic; pseudo code development; spreadsheet modeling; scripting and rapid prototyping; fundamentals of web technology; and legal and ethical considerations (including privacy, intellectual property, and appropriate uses of technology).

Fulfills general education requirement in information technology (all).

Equivalent to ENGR 117 (2011-2012 Catalog)
CEIE 203 - Geomatics and Engineering Graphics

Credits: 3 (NR)
Introduces topographic surveying and engineering drawing for civil engineering applications. Topics include surveying, GPS, GIS, digital terrain modeling, design of horizontal and vertical curve geometry for road applications, engineering drawing concepts, and drawing with CAD-based software. Field work required on selected topics.

Prerequisite(s): C or better in ENGR 117 or CEIE 117 or CS 112. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring.

CEIE 210 - Statics and Dynamics

Credits: 3 (NR)
Covers general principles and fundamental concepts, including units or measurement; force vectors and their use, including vector operations; equilibrium of a particle; resultants or a system of forces; equilibrium or a rigid body; dry friction; center or gravity and centroid; moments of inertia, including parallel axis theorem and radius of gyration; kinematics or a particle.

Equivalent to ENGR 210 (2011-2012 Catalog)

Prerequisite(s): Grade of C or better in PHYS 160 and MATH 114. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring.

CEIE 240 - Hydraulics

Credits: 3 (NR)
Principles of fluids in equilibrium and motion. Topics include hydrostatic pressure; continuity, Bernoulli, and momentum equations; viscosity flow problems; pressure pipe flow and turbomachinery; measuring instruments; and applications to closed conduits and open channels.

Equivalent to CEIE 230 (2011-2012 Catalog)

Prerequisite(s): C or better in PHYS 160. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 1
When Offered: Fall, Spring
CEIE 301 - Engineering and Economic Models in Civil Engineering

Credits: 3 (NR)
Applies planning, analysis, control, and engineering economic models to life cycle of physical infrastructure. Introduces infrastructure design process and application of quantitative and probabilistic models. Presents applications of model building for engineering economics; decision making; forecasting; resource scheduling and allocation; estimating; work measurement and materials; and quality and process control in water, transportation, environmental, energy, and telecommunications infrastructure systems and the built environment.

Prerequisite(s): Grade of C or better in STAT 344 and ENGH 302. Prerequisite enforced by registration system.

Notes: Fulfills writing-intensive requirement for civil and infrastructure engineering major.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

CEIE 304 - Jr Engineering Competency Exam

Credits: 0 (RT)
Assess student preparation for the Fundamentals of Engineering exam after completing engineering science requirements for a BS degree in engineering.

Prerequisite(s): C or better in MATH 114 and PHYS 260. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0
Grading: Satisfactory/No Credit
When Offered: Fall, Spring.

CEIE 310 - Mechanics of Materials

Credits: 3 (NR)
Concepts of stress, strain, elasticity, and plasticity. Stress and strain transformation, including the use of Mohr's circle. Pure torsion. Theory of pure bending and members under transverse loading, including normal and shear stress analysis. Theory of elastic buckling. Distribution of internal forces in statically determinate systems and deflection of beams.

Equivalent to ENGR 310 (2011-2012 Catalog)

Prerequisite(s): Grade of C or better in ENGR 210 or CEIE 210. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring
CEIE 311 - Structural Analysis

Credits: 3 (NR)
Basic concepts and assumptions of structural analysis, including statical and geometric redundancy. Analysis, by integration of deformation of simple structural members. Virtual work method for the analysis of deformations of simple structural systems such as articulate beams, trusses, frames, and arches. Method of forces to analyze statically indeterminate systems, method of displacements to analyze geometrically indeterminate systems, and symmetry and antisymmetry in structural analysis. Uses computer programs for structural analysis.

Prerequisite(s): Grade of C or better in CEIE 310 or ENGR 310. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

CEIE 331 - Soil Mechanics

Credits: 3 (NR)
Covers soil classification, soil properties and engineering characteristics of soils. Includes seepage effects, effective stresses, soil strength and deformation characteristics. Also, the determination of immediate and consolidation settlement, lateral earth pressures and bearing capacities. Introduces foundation design fundamentals.

Equivalent to CEIE 305 (2011-2012 Catalog)

Prerequisite(s): Grade of C or better in (CEIE 210 or ENGR 210) and in (CEIE 230 or CEIE 240). Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 1
When Offered: Fall, Spring

CEIE 340 - Water Resource Engineering

Credits: 3 (NR)
Introduces principles and practice of water resources engineering. Topics include hydrology, governing principles, design and evaluation methods, common models, and typical applications in water resource engineering. Laboratory and field work required on selected topics.

Prerequisite(s): Grade of C or better in CEIE 240 or CEIE 230. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 3
When Offered: Fall, Spring

CEIE 355 - Environmental Engineering and Science
Introduces students to the concepts of water pollution, air pollution, noise, and solid waste generation and management. Relationships between human population growth and pollution are introduced. Contemporary environmental engineering topics such as sustainability and global climate change are presented. Designated a Green Leaf Course.

**Prerequisite(s):** Grade of C or better in (CEIE 230 or CEIE 240) and (CHEM 211 or CHEM 251). Prerequisite enforced by registration system.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall, Spring

---

### CEIE 360 - Introduction to Transportation Engineering

Credits: 3 (NR)  
Introduces transportation systems and the factors that influence their planning, design, and operation. Topics include fundamentals of urban travel, travel demand forecasting, and traffic flow; principles of highway design; highway capacity and level of services; introduction to traffic control; traffic signal control systems; intersection design; speed zoning and control; and introduction to Intelligent Transportation Systems and travel demand management. Requires laboratory, field work on selected topics.

Fulfills writing intensive requirement in the major.

**Prerequisite(s):** Grade of C or better in (ENGR 210 or CEIE 210), and (CEIE 290 or CEIE 203) and Satisfactory in CEIE 304. Prerequisite enforced by registration system.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall, Spring

---

### CEIE 370 - Construction Systems

Credits: 3 (NR)  
Overview of the modern construction industry and principles and practices of construction management. Topics include project planning, construction administration, the contract environment, equipment operations, cost estimation and scheduling, and legal theories. Current industry trends are emphasized as are the uses of modern scheduling and cost-estimating software and online databases.

**Prerequisite(s):** Grade of C or better in (CEIE 290 or CEIE 203) and CEIE 301. Prerequisite enforced by registration system.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall, Spring
CEIE 400 - Civil Engineering Planning and Management

Credits: 3 (NR)
Quantitative and qualitative analysis in planning, design, construction, and management of engineering systems and facilities. Introduces policies, programs, and regulations that influence land development, history-enabling legislation, governing and regulating bodies, control of site plan development, and approval process. Examines structure, function, and purpose of urban design systems and how they can be achieved. Discusses physical relationships among development, land use, transportation, energy, communications, and water systems. Studies public- and private-sector urban development industry. Other topics include innovation, competition, new technology, and environmental issues. Requires design projects.

Prerequisite(s): Grade of C or better in CEIE 340 and CEIE 360. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

CEIE 401 - Sustainable Land Development

Credits: 3 (NR)
Introduces students to sustainable land development topics including low impact development, site resource conservation, ultra low water design, deconstruction and materials reuse, healthy building design, green house gas reduction, zero and low energy design, and other topics related to sustainable practices in facilities and infrastructure design and construction. Designated a Green Leaf Course.

Prerequisite(s): Grade of C or better in CEIE 355, CEIE 340 and CEIE 360. Prerequisite enforced by registration system.

Corequisite(s): CEIE 400

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

CEIE 402 - Highway Design and Construction

Credits: 1.5 (NR)
Provides a survey of the tools, techniques, and methods used by the various civil engineering off-campus at disciplines to design and construct highways. Combines lectures, individual readings, and hands-on exposure to the tools and processes used by planning, environment, project management, survey and mapping, preliminary design, geotechnical, pavements, hydraulics, bridge design, PS&E design, materials, and construction.

Prerequisite(s): Senior CEIE status.

Notes: Course meets off-campus at the federal Highway Administration Eastern Federal Lands Highway Division in Sterling, VA.

Hours of Lecture or Seminar per week: 1
CEIE 403 - Experimental Methods in Civil Engineering

Credits: 1.5 (NR)
Surveys common testing and laboratory experimental methods that civil engineers encounter in their professional practice and in research settings. Students fabricate specimens of civil engineering materials and conduct experiments in the following laboratories at the Federal Highway Administration's Turner-Fairbank Highway Research Center: concrete and Steel Materials Lab, Structure Lab, Hydraulic Lab, Geotechnical Lab and Asphalt Lab.

Prerequisite(s): Senior CEIE status.

Notes: Course meets off-campus at the Federal Highway Administration's Turner-Fairbank Highway Research Center in McLean, VA.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 2
When Offered: Spring

CEIE 404 - Sr Engineering Competency Exam

Credits: 0 (RT)
Assess student preparation for the Fundamentals of Engineering exam after completing engineering design electives required for a BS degree in engineering.

Prerequisite(s): Satisfactory grade in CEIE 304. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0
Grading: Satisfactory/No Credit
When Offered: Fall, Spring.

CEIE 409 - Professional Practice and Management in Engineering

Credits: 1 (NR)
Introduces professional ethics and management principles, and prepares students for leadership roles in practice. Topics include introduction to professional and technical societies; code of ethics related to the public, clients, contractors, suppliers, employers, agreements, contracts, competitive bidding, the engineering profession, conflict of interest, legal responsibilities and case law; case studies in professional ethics; professional licensure; engineering versus engineering management; personal development; managing culture shock, time management, career versus grad school, continuing education; public policy considerations in engineering practice; practical considerations in project management; effectively communicating with employees, contractors and clients; marketing, competitive bidding and project selection; conflict resolution; and managing a small business.

Fulfills general education requirement in information technology (ethics only).

Equivalent to ENGR 401 (2011-2012 Catalog)
Prerequisite(s): Senior standing.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

**CEIE 410 - Geographic Information Systems in Engineering**

Credits: 3 (NR)
Introduces geographic information systems (GIS) and their application in environmental, transportation, land-use planning, and other situations. Explores methods, technologies for spatial data acquisition, specification, storage, manipulation, query, thematic analysis, presentation, and application in the design process. Introduces relationships, integration of GIS with computer-aided design and global positioning system. Hands-on projects.

Prerequisite(s): Grade of C or better in CS 112, ENGR 117 or CEIE 117 and CEIE 360 and CEIE 355. Prerequisite enforced by registration system.

Notes: Credit is not given for both CEIE 410 and 510.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**CEIE 411 - Introduction to Design and Inventive Engineering**

Credits: 3 (NR)
Outlines major stages of design process. Covers conceptual versus detailed design; design evaluation. Covers applications of Artificial Intelligence (AI) in design, including evolutionary computation. Covers inventive problem-solving methods, including brainstorming, Synectics, TRIZ, and morphological analysis. Includes computer tools to support design creativity. Features collaborative design: fundamentals and group projects dealing with civil engineering problems provided by industry.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring

**CEIE 412 - Structural Steel Design**

Credits: 3 (NR)
Structural design process, steel material and shapes, steel behavior, specs and codes, LRFD/ASD, loads, gravity and lateral systems, bracings, tributary areas, tension members design; shear lag, net area, load transfer, column design; column strength curve, effective length approach, local buckling, beam design, lateral-torsional buckling, unbraced length, noncompact and compact, deflections, connections design; bolts, bearing, slip-critical, eccentric shear, welds, capacity, fillets, eccentric welds, stability, frame design; beam-column connections, base plate, bracings, optimization, computer design tools.

Prerequisite(s): Grade of C or better in CEIE 311. Prerequisite enforced by registration system.

Notes: Credit is not given for both CEIE 412 and 512.
Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0  
When Offered: Spring

**CEIE 413 - Reinforced Concrete Design**

Credits: 3 (NR)  
Covers analysis and design of reinforced concrete members including beams, columns, slabs and footings; sizing of structural members for flexure, shear and torsion; determining serviceability limits including deflection, shrinkage and creep; detailing reinforcing steel bars including bond, development length and splices; design of an integrated reinforced concrete structure for gravity loads, wind loads and seismic loads in accordance with ACI code requirements.

**Prerequisite(s):** Grade of C or better in CEIE 311. Prerequisite enforced by registration system.

**Notes:** Credit is not given for both CEIE 413 and 513.

Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0  
When Offered: Fall

**CEIE 432 - Foundation Design**

Credits: 3 (NR)  
Introduction to various principles and practices of geotechnical engineering including estimation of soil properties using in-situ tests, laboratory tests, and correlations. Course includes study of earth pressure theories as applied to the design of retaining walls, anchored bulkheads, and excavation bracing. Additional topics include retaining wall stability, bearing capacity and settlement of shallow foundations on sands and clays and design considerations and capacity analysis of deep foundations.

**Prerequisite(s):** Grade of C or better in CEIE 305 or CEIE 331. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0  
When Offered: Fall, Spring

**CEIE 435 - Introduction to Engineering Geology**

Credits: 3 (NR)  
Introduction to formation and occurrence of earth materials: rock and soil; weathering processes, geomorphology, structural geology, interpreting topographic and geologic maps; field investigation fundamentals, field engineering properties of soil and rock; standards and terminology; rock mass engineering classification systems; subsurface water control; rock as a construction material; special case studies in foundations, such as sinkholes, waste impoundments, dam failures, earth spillway performance.

**Prerequisite(s):** Grade C or better in CEIE 305 or CEIE 331. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
CEIE 440 - Water Supply and Distribution

Credits: 3 (NR)
Analysis and design of public water supplies. Topics include supply evaluation; water quality and quantity requirements; treatment requirements and methods; hydraulic analysis of water distribution systems including line sizing, fire protection, pumps, valves, and storage; sustainability; security; concepts in management, business, and public policy of public water supplies; and federal, state, and local government laws and regulations related to public water systems. Requires laboratory, field work on selected topics.

Prerequisite(s): Grade of C or better in CEIE 340. Prerequisite enforced by registration system.

Notes: Credit is not given for both CEIE 440 and 540.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring.

CEIE 442 - Open Channel Flow

Credits: 3 (NR)
Analysis and design of open channels. Topics include principles of open channel flow including conservation of mass, momentum and energy; flow regimes including uniform, gradually varied, rapidly varied, and unsteady flows; sediment transport; channel design; and modeling and computer applications in open channel analysis and design.

Prerequisite(s): Grade of C or better in CEIE 340. Prerequisite enforced by registration system.

Notes: Credit is not given for both CEIE 442 and 542.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring.

CEIE 450 - Environmental Engineering Systems

Credits: 3 (NR)

Introduces systems analysis in environmental engineering. Applies linear and dynamic programming, computer modeling, and other systems analysis methodologies to solve environmental engineering problems related to air, soil, and water pollution. Reviews experimental design approaches to characterize environmental sites. Designated a Green Leaf Course.

Prerequisite(s): Grade of C or better in CEIE 355. Prerequisite enforced by registration system.
CEIE 453 - Water and Wastewater Treatment Processes

Credit: 3 (NR)
Reviews unit treatment processes used in the treatment of water and wastewater systems. Topics include water quality, regulatory requirements, physical unit processes, chemical treatment processes and an introduction to biological treatment processes as applied to a range of community sizes.

Prerequisite(s): Grade of C or better in CEIE 355. Prerequisite enforced by registration system.

CEIE 454 - Sustainable Water Resources Infrastructure in Developing Countries

Credit: 3 (NR)
This course addresses the principles of infrastructure engineering and planning in developing countries, with a focus on sustainable technologies for rural and small-scale water supply and wastewater treatment. Students will design simple, reliable water supply and sanitation systems for developing countries with limited human and material resources and with regard to local customs and socio-cultural public health and economic factors.

Prerequisite(s): Grade C or better in CEIE 355. Prerequisite enforced by registration system.

CEIE 461 - Traffic Engineering

Credit: 3 (NR)
Elements of traffic engineering analysis; system components of traffic operations: driver, vehicle, and roadway; traffic flow design elements including volume, density, and speed; intersection design elements including traffic control device warrants, signal timing, delay, capacity, and accident countermeasures; and terminal design elements including inflow, outflow, and circulation.

Prerequisite(s): Grade of C or better in CEIE 360. Prerequisite enforced by registration system.

Notes: Credit is not given for both CEIE 461 and 561.
CEIE 462 - Urban Transportation Planning

Credits: 3 (NR)
Technical and qualitative aspects of urban transportation planning process. Topics include urban travel characteristics and data collection methods; urban transportation modeling system, including land use, trip generation, trip distribution, mode choice, and trip assignment models; site traffic impact studies; environmental impacts; project and plan evaluation; and technology options for urban transport.

Prerequisite(s): Grade of C or better in CEIE 360. Prerequisite enforced by registration system.

Notes: Credit is not given for both CEIE 462 and CEIE 562.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CEIE 471 - Construction Administration

Credits: 3 (NR)
Examines the principals of project planning and administration using modern specification and project delivery methods. The role of the project manager as facilitator, constructability advisor, and on-site administrator is emphasized. Project risk transference, market conditions, and legal requirements are explored in the construction contract environment. Other topics include green specifications, design-build delivery, job order contracting, turnkey construction, and public-private partnerships. Appropriate for students, engineering and design professionals, project managers, contract administrators, and owners interested in the planning and administration needs of construction.

Prerequisite(s): Grade of C or better in CEIE 370 Prerequisite enforced by registration system.

Notes: Credit is not given for both CEIE 471 and CEIE 571.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

CEIE 472 - Building Information Modeling

Credits: 3 (NR)
Virtual design and construction techniques are covered using modern 3D Building Information Modeling (BIM) software. Historical and technological basis for virtual building and infrastructure design are presented. Design and construction coordination are emphasized using clash detection, conflict management, constructability analysis, specification mapping, and asset management. Industry supported model component databases are used with commercial software design environments for hands-on simulated design and construction projects.

Prerequisite(s): Grade of C or better in CEIE 370. Prerequisite enforced by registration system.

Notes: Credit is not given for both CEIE 472 and CEIE 572.

Hours of Lecture or Seminar per week: 3
CEIE 490 - Senior Design Project

Credits: 3 (NR)
Capstone design experience. Integrates all design fundamentals employed by a typical civil engineering design team. Major team efforts include land use, transportation, water and sewerage, stormwater, site analysis, economic and regulatory considerations, sectioning, grading, and siting. Students focus on teamwork, interdisciplinary interaction, and tradeoff decision making. Design team analyzes all aspects of a major urban project, develops solutions to design problems, and produces project report and oral presentation. Design effort completed and report is prepared, presented, and evaluated. Primary course goal is to produce design for contemporary civil infrastructure project.

Fulfills general education requirement in synthesis.

Prerequisite(s): Senior standing. Grade C or better in CEIE 301, CEIE 311, CEIE 340, CEIE 355, CEIE 360, (CEIE 305 or CEIE 331), CEIE 370, CEIE 400, and two 4xx level technical electives. Grade of S (Satisfactory) in CEIE 404. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

CEIE 498 - Independent Study in Civil Engineering

Credits: 1-3 (RT)
Directed self-study of special topics of current interest.

Prerequisite(s): Must have completed 60 credits of course work; permission of the Department Chair.

Notes: May be repeated for maximum 6 credits if topics are substantially different.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0

CEIE 499 - Special Topics in Civil Engineering

Credits: 1-3 (RT)
Varies with nature of topic. Topics of special interest to undergraduates.

Notes: May be repeated for maximum 6 credits if topics are substantially different.

Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 0
CEIE 501 - Sustainable Development

Credits: 3 (NR)

Introduction to sustainability concepts and terminology including the development and use of sustainability indices. Exploration of sustainability tools and frameworks such as the Leadership in Energy and Environmental Design (LEED) Green Building Rating System, American Institute of Architects Sustainable Design Resources Guide, and the Natural Step (TNS) Framework. Methods for evaluation of sustainable sites, water/energy efficiency, sustainable materials and resources, and indoor air quality are presented.

Designated a Green Leaf Course.

Prerequisite(s): Graduate standing.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CEIE 510 - Geographic Information Systems in Engineering

Credits: 3 (NR)

Introduces geographic information systems (GIS) and their application in environmental, transportation, land-use planning, and other engineering-related decision situations. Introduces methods and technologies for spatial data acquisition, specification, storage, manipulation, query, thematic analysis, presentation, and application in the design process. Introduces relationships, integration of GIS with computer-aided design and global positioning system. Hands-on projects.

Prerequisite(s): Knowledge of computer programming and databases or permission of instructor.

Notes: Credit is not given for both CEIE 410 and 510.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0
When Offered: Fall

CEIE 512 - Structural Steel Design

Credits: 3 (NR)

Structural design process, steel material and shapes, steel behavior, specs and codes, LRFD/ASD, loads, gravity and lateral systems, bracings, tributary areas, tension members design; shear lag, net area, load transfer, column design; column strength curve, effective length approach, local buckling, beam design; lateral-torsional buckling, unbraced length, noncompact and compact, deflections, connections design; bolts, bearing, slip-critical, eccentric shear, welds, capacity, fillets, eccentric welds, stability, frame design; beam-column connections, base plate, bracings, optimization, computer design tools

Prerequisite(s): CEIE 311

Notes: Credit is not given for both CEIE 412 and 512.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring
CEIE 513 - Reinforced Concrete Design

Credits: 3 (NR)
Covers the analysis and design of reinforced concrete members including beams, columns, slabs and footings; sizing of structural members for flexure, shear and torsion; determining serviceability limits including deflection, shrinkage and creep; detailing reinforcing steel bars including bond, development length and splices; and design of an integrated reinforced concrete structure for gravity loads, wind loads and seismic loads in accordance with the ACI code requirements.

Prerequisite(s): CEIE 311

Notes: Credit is not given for both CEIE 413 and 513.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

CEIE 524 - Introduction to Bridge Engineering

Credits: 3 (NR)
A balanced theoretical and practical insight into the art and science of bridge engineering. Various methodologies of bridge design and evaluation are investigated, including constructability reviews. Bridges of steel, reinforced concrete, and pre-stressed concrete materials are included. Short-span composites; major innovation and low cost solutions targeted at aging infrastructure.

Prerequisite(s): Graduate Standing in CEIE; CEIE 512 or CEIE 513 or equivalent.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 0
When Offered: Fall

CEIE 525 - Structural Evaluation and Rehabilitation

Credits: 3 (NR)
Structural condition survey and evaluation for strength and serviceability of existing structures including foundation elements; older building practices and materials; criteria for rehabilitation; retrofit techniques for change in function, loading, and seismic forces. Historic preservation issues. Repair, remediation, and structural strengthening methods and current trends. Carbon fiber external P.T. Material selection criteria, including mechanical and environmental factors. Cost/value feasibility analysis; estimating remedial construction costs; engineering oversight of rehabilitation work.

Prerequisite(s): Graduate Standing in CEIE.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring
CEIE 526 - Advanced Steel Design

Credits: 3 (NR)
Behavior, strength, and design of vertical steel structures using the LRFD approach; plate girders, composite beams, welded built-up columns, bolted and welded connections, beam-columns, and torsion; introduction to plastic analysis and its application to members and vertical structures; erection procedure and methods field inspection issues; unique properties of high strength steels.

Prerequisite(s): Graduate Standing in CEIE; CEIE 512 or equivalent.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring

CEIE 527 - Pre-stressed Concrete

Credits: 3 (NR)
Strength, behavior, analysis, and design of pre-stressed concrete members, vertical building structures, and bridges, with emphasis on pre-tensioned, precast construction, and post-tensioned construction; basics of segmental concrete bridges, cable-stayed bridges, and spliced-girder concrete bridges; continuous span theory; protection of pre- & post-tensioned systems; secondary effects. Composite Portland Cement with cast-in-place topping; precast as a stay-in-place system; connection detailing; durability issues; advantages in a marine environment.

Prerequisite(s): Graduate Standing in CEIE; CEIE 513 or equivalent.

Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 0
When Offered: Spring

CEIE 531 - Earth Retaining Structures and Slope Stability

Credits: 3 (NR)
Earth pressure theory and limit equilibrium theory used in the design of temporary and permanent earth retaining structures; limit equilibrium slope stability; retaining wall design and associated construction issues of gravity walls, conventional concrete retaining walls, mechanically stabilized walls, braced and tiedback excavation support systems, and soil nailing walls; guidelines for the selection of retention method for permanent and temporary conditions.

Prerequisite(s): Graduate Standing in CEIE;

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

CEIE 532 - Foundation Design
Introduction to various principles and practice of geotechnical engineering including estimation of soil properties using in-situ tests, laboratory tests, and correlations. Course includes the study of earth pressure theories as applied to the design of retaining walls, anchored bulkheads, and excavation bracing. Additional topics include retaining wall stability, bearing capacity and settlement of shallow foundations on sands and clays and design considerations for deep foundations.

Prerequisite(s): Graduate Standing.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring.

CEIE 535 - Engineering Geology

Credits: 3 (NR)
Introduction to formation and occurrence of earth materials -rock and soil; weathering processes, geomorphology, structural geology, interpreting topographic and geologic maps; field investigation fundamentals, field engineering properties of soil and rock; standards and terminology; rock mass engineering classification systems; subsurface water control; rock as a construction material; special case studies in foundations, such as sinkholes, waste impoundments, dam failures, earth spillway performance.

Prerequisite(s): Graduate Standing in CEIE.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 0
When Offered: Fall

CEIE 540 - Water Supply and Distribution

Credits: 3 (NR)
Analysis and design of public water supplies. Topics include supply evaluation; water quality and quantity requirements; treatment requirements and methods; hydraulic analysis of water distribution systems including line sizing, fire protection, pumps, valves, and storage; sustainability; security; concepts in management, business, and public policy of public water systems; and federal, state, and local government laws and regulations related to public water systems. Requires laboratory, field work on selected topics.
Designated a Green Leaf Course.

Prerequisite(s): A course in hydraulics or fluid mechanics.

Notes: Credit is not given for both CEIE 440 and 540.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CEIE 542 - Open Channel Flow
Credits: 3 (NR)
Analysis and design of open channels. Topics include principles of open channel flow including conservation of mass, momentum and energy; flow regimes including uniform, gradually varied, rapidly varied, and unsteady flows; sediment transport; channel design; modeling and computer applications in open channel analysis and design.

Prerequisite(s): A course in hydraulics or fluid mechanics.

Notes: Credit is not given for both CEIE 442 and 542.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CEIE 550 - Environmental Engineering Systems

Credits: 3 (NR)
Introduces systems analysis in environmental engineering. Applies linear and dynamic programming, computer modeling, and other systems analysis methodologies to solve environmental engineering problems related to air, soil, and water pollution. Reviews experimental design approaches for the characterization of environmental sites.

Prerequisite(s): CEIE 455.

Notes: Credit is not given for both CEIE 450 and 550.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0
When Offered: Spring

CEIE 553 - Water and Wastewater Treatment Processes

Credits: 3 (NR)
Studies unit treatment processes used in the treatment of water and wastewater systems. Topics include water quality, regulatory requirements, physical unit processes, chemical treatment processes and an introduction to biological treatment processes as applied to a range of community sizes.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring.

CEIE 555 - Principles of Environmental Engineering

Credits: 3 (NR)
Introduces principles of environmental engineering management and design pertaining to water supply and treatment, wastewater treatment, solid waste management, air pollution control, noise pollution measurement and control, and environmental impact assessment.

Notes: Credit is not given for both CEIE 355 and 555.
**CEIE 556 - Environmental Law**

Credits: 3 (NR)
Introductory course in the study of environmental laws as they pertain to urban systems infrastructure management. Reviews the National Environmental Policy Act, Clean Air Act, Clean Water Act, Safe Drinking Water Act, Resource Conservation and Recovery Act, Comprehensive Environmental Response, Compensation, and Liability Act, and other environmentally related legislation. Also reviews laws for allocation of surface and groundwater supplies, and reviews environmental law databases.

Notes: Credit is not given for both CEIE 456 and 556.

**CEIE 560 - Public Transportation Systems**

Credits: 3 (NR)
Analyzes public transportation systems in terms of their role in urban transportation. Topics include history of public transportation in the United States, quantitative performance attributes of different modes, analytical techniques for planning and operation, and management and administrative concepts.

Prerequisite(s): CEIE 360.

Notes: Credit is not given for both CEIE 460 and 560.

**CEIE 561 - Traffic Engineering**

Credits: 3 (NR)
Covers elements of traffic engineering analysis; system components of traffic operations: driver, vehicle, and roadway; traffic flow design elements including volume, density, and speed; intersection design elements including traffic control device warrants, signal timing, delay, capacity, and accident countermeasures; and terminal design elements including inflow, outflow, and circulation.

Prerequisite(s): CEIE 365.

Notes: Credit is not given for both CEIE 461 and 561.

Hours of Lecture or Seminar per week: 1-6
CEIE 562 - Urban Transportation Planning

Credits: 3 (NR)
Covers technical and qualitative aspects of urban transportation planning process. Topics include urban travel characteristics and data collection methods; urban transportation modeling system, including land use, trip generation and distribution, mode choice, and trip assignment models; site traffic impact studies; environmental impacts; project and plan evaluation; and technology options for urban transport.

Prerequisite(s): CEIE 365.

Notes: Credit is not given for both CEIE 462 and 562.

CEIE 565 - Design of Transport Systems

Credits: 3 (NR)
Covers street and highway facilities design emphasizing interaction among driver, vehicle, and geometric design elements. Design of interchanges and intersections; highway roadside safety and tort liability; pavement design, maintenance and safety; edge drop-off; clear zone concept; roadside barriers; guiderail treatments; traffic calming; pedestrian and bicycle and transit design challenges; and work-zone traffic control. Provides skills to understand interaction among driver, vehicle, and environment, and how to incorporate better design practices. Also introduces concepts of forgiving highway design and highway tort liability.

Prerequisite(s): CEIE 360.

Notes:

CEIE 571 - Construction Administration

Credits: 3 (NR)
Examines the principals of project planning and administration using modern specification and project delivery techniques. The role of the project manager as facilitator, constructability advisor, and on-site administrator is emphasized. Project risk transference, market conditions, and legal requirements are explored in the construction contract environment. Other topics include green specifications, design-build delivery, job order contracting, turnkey construction, and public-private partnerships. Appropriate for students, engineering and design professionals, project managers, contract administrators, and owners interested in the planning and administration needs of construction.

Notes: Credit is not given for both CEIE471 and 571.
CEIE 572 - Building Information Modeling

Credits: 3 (NR)
Virtual design and construction techniques are covered using modern 3D Building Information Modeling (BIM) software. Historical and technological basis for virtual building and infrastructure design are presented. Design and construction coordination are emphasized using clash detection, conflict management, constructability analysis, specification mapping, and asset management. Industry-supported model component databases are used with commercial software design environments for hands-on simulated design and construction projects.

Notes: Credit is not given for both CEIE 472 and 572.

CEIE 573 - Legal Aspects of the Construction Process

Credits: 3 (NR)
Examines the legal principles associated with the construction process. Introduces legal and project delivery concepts and review of the rights and responsibilities of construction project participants. Topics include the application of differing site conditions clauses, delay claims, termination rights, remedies for breach of contract, and dispute resolution techniques. Also includes review of industry legal issues, such as principles of risk management, LEED liability, and design-build contracts.

Prerequisite(s): Graduate Standing in CEIE.

CEIE 575 - Design for Constructability

Credits: 3 (NR)
Systems design of structures to consider foundations, structures and constructability; foundation alternatives; structural design to simplify erection; prefabrication, modulation of structures; material handling on a construction site; crane selection and placement; temporary works.

Prerequisite(s): Graduate Standing in CEIE.

CEIE 576 - Construction Cost Estimating
Overview of cost estimating and financial management in the modern construction industry. Techniques and software applications for construction take-offs, bidding, bonding, insurance, equipment ownership, material and labor costing. Additional topics include: cost recovery planning; budgeting, forecasting, acquisition, cast flow management, managerial accounting concepts, and taxes.

Prerequisite(s): Graduate Standing in CEIE.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0
When Offered: Fall

CEIE 580 - Risk and Reliability in Civil Engineering Practice

Credits: 3 (NR)
Practice engineering hazard assessment; definition of risk, reliability and uncertainty; risk identification; risk analysis concepts and models; probability in risk assessment; failure analysis; consequence analysis, risk benefit assessment; reliability-based designs; uncertainty analysis; risk communication; risk-based decision-making; risk assessment in public policy.

Prerequisite(s): Graduate Standing in CEIE.

Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 0
When Offered: Fall

CEIE 601 - Infrastructure Modeling

Credits: 3 (NR)
Concepts of modeling for infrastructure engineering. Covers modeling, simulation, optimization, deterministic and stochastic models, and limitations of modeling approaches. Also includes multiple objective, multiple decision-maker problems, and case studies in areas such as transportation, water resources, the environment, energy, telecommunications, and construction.

Prerequisite(s): CEIE 605

Hours of Lecture or Seminar per week: 1-4
Hours of Lab or Studio per week: 0
When Offered: Spring

CEIE 605 - Infrastructure Systems Analysis

Credits: 3 (NR)
Probability and statistics topics for analysis of infrastructure systems. Includes Bayesian decision theory, decision trees, Monte Carlo analysis, stochastic models, and economic analysis of infrastructure projects and systems.

Prerequisite(s): STAT 344.

Hours of Lecture or Seminar per week: 1-6
CEIE 611 - Advanced Structural Analysis

Credits: 3 (NR)
Analysis of structural members and systems in terms of deformations and stress distribution; fundamentals of the Theories of Elasticity and of Elastic Plates; applications of both theories to the analysis of basic structural members, straight and curved, using Cartesian and polar coordinates; analysis of rectangular and circular plates under various loading and support conditions.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

CEIE 612 - Advanced Mechanics of Materials

Credits: 3 (NR)
Three dimensional stress and strain theories; Linear constitutive relations; Unsymmetrical bending of beams; Shear center; Curved beams; Beams on elastic foundations; Material failure criteria; Elastic and inelastic buckling of columns.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

CEIE 621 - Applied Finite Element Methods

Credits: 3 (NR)
Introduces the theory, applications, and software of the Finite Element (FE) method to common structural and geotechnical engineering problems. Focuses on FE modeling including 1-D, 2-D, and 3-D and other special element types, loads and boundary conditions, interpreting results, and using engineering judgment and troubleshooting to verify analysis results. Covers linear and nonlinear FE modeling and analysis of reinforced concrete structures, soil-structure interaction, and construction phases.

Prerequisite(s): Graduate Standing in CEIE.

Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 0
When Offered: Fall

CEIE 633 - Advanced Foundation Design and Ground Improvement

Credits: 3 (NR)
Design of foundations for civil engineering structures, including settlement and bearing capacity. Foundation types to include shallow foundations, spread footings, mats, deep foundations (driven piles, bored piles and drilled shafts subjected to axial and lateral loading) - single and group action. Machine foundations for rotating equipment. Ground improvement including grouting,
deep soil mixing, stone columns, special compaction techniques, lightweight fill; wick drains.

**Prerequisite(s):** Graduate Standing in CEIE; CEIE 532 or equivalent.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall.

### CEIE 634 - Groundwater and Geoenvironmental Design

Credits: 3 (NR)  
Equations of groundwater flow and seepage, groundwater site investigations, parameter determination, flownets, well design and aquifer testing, design of dewatering systems, seepage control. Conservative and non-conservative pollutant transport in groundwater, transport processes, modeling techniques for flow and transport. Groundwater remediation technologies, Brownfields and land revitalization.

**Prerequisite(s):** Graduate Standing in CEIE;  

**Hours of Lecture or Seminar per week:** 1 - 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Spring

### CEIE 635 - Advanced Soil Mechanics

Credits: 3 (NR)  
Consolidation of soil: primary and secondary; and rate. Soil strength in the framework of Critical State Soil Mechanics: normally consolidated, lightly and heavily overconsolidated, drained and undrained, elastic and plastic deformation.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall, Spring

### CEIE 636 - Sources of Geotechnical Data

Credits: 3 (NR)  
Resources for conducting desk top studies; tools for field investigations; subsurface investigations (options and selection of techniques); laboratory testing of soil and rock; accepted testing procedures; typical values; empirical relationships between properties and testing techniques; risk and uncertainty; use of lab testing, insitu strength testing, and empirical methods in design; identifying slickensides.

**Prerequisite(s):** Graduate Standing in CEIE.  

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall.
CEIE 641 - Water Resources Engineering I: Principles and Practice

Credits: 3 (NR)
Introduction to the principles of hydrology and hydraulics and their application to the planning, design and management of modern water resources.

Equivalent to CEIE 631 (2010-2011 Catalog)

Prerequisite(s): Graduate standing in CEIE; CEIE 340 or equivalent.

Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 0
When Offered: Fall

CEIE 644 - Groundwater Systems Modeling

Credits: 3 (NR)
Introduces groundwater hydrology and modeling, including quantity and quality aspects. Topics include characterization of subsurface regime; well hydraulics; consideration of two-dimensional steady and unsteady-state flows; exploration of modeling approaches; simulation and optimization modeling; contaminant transport; parameter estimation; and design of systems to control groundwater quantity and quality.

Equivalent to CEIE 632 (2011-2012 Catalog)

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0

CEIE 657 - Environmental Engineering Microbiology

Credits: 3 (NR)
Addresses the fundamental aspects of microbial physiology and ecology and their application to environmental engineering processes. Specific topics include cell structure and function, energetics, metabolism, enzyme and growth kinetics, microbial/environmental interactions (e.g. interactions with organic pollutants), biogeochemical cycles, and an introduction to engineering applications including bioremediation, wastewater treatment, biosensors and microbial fuel cells.

Prerequisite(s): Graduate standing.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

CEIE 658 - Water Quality

Credits: 3 (NR)
Sources of water; Materials Balances; Water Chemistry; Stoichiometry and Reaction Kinetics; Water Quality Laboratory; Hydraulic Models; Fate and Transport; Surface Water Quality; Groundwater Water Quality; Physical and Chemical Treatment
Processes; Biological Treatment Processes; Bioremediation/Phytoremediation.

Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0  
When Offered: Fall, Spring

CEIE 659 - Hazardous Waste

Credits: 3 (NR)
Physical, chemical and biological properties of hazardous waste; abiotic and biotic transformation of hazardous wastes and their fate in the environment; design of remediation schemes including incineration, landfill, bioremediation and other physical and chemical stabilization processes; principles of risk assessment to select and optimize hazardous waste treatment; methods and strategies for hazardous waste reduction.

Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0  
When Offered: Fall, Spring

CEIE 663 - Intelligent Transportation Systems

Credits: 3 (NR)
Advanced transportation system operations and safety through the use of wireless and wireline communications; integrated transportation systems; in-vehicle technologies; industry standards; and systems architecture. Provides skills to apply advanced technologies to transportation systems to improve operational and safety performance. Provides nontraditional tools to address issues of congestion and improved safety performance.

Prerequisite(s): CEIE 561 or 562.

Hours of Lecture or Seminar per week: 1-6  
Hours of Lab or Studio per week: 0

CEIE 664 - Transportation Engineering and the Environment

Credits: 3 (NR)
Introduction to transportation and air quality; Clean Air Act; greenhouse gases, climate change, and modeling for greenhouse gases; travel activity; The NEPA process for transportation projects; road transportation and noise; noise abatement.

Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0  
When Offered: Fall, Spring

CEIE 674 - Infrastructure Finance
Reviews key financial concepts used in the management of municipal infrastructure using a case study approach. Issues related to both public and private infrastructure entities will be covered. Provides a practical introduction to a broad spectrum of infrastructure finance issues.

Prerequisite(s): Graduate standing

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CEIE 680 - Introduction to Infrastructure and Security Engineering

Credits: 3 (NR)
In-depth review of present and proposed practices and issues to manage civil infrastructure, focusing on performance and security through the full life cycle, including planning, designing, and construction of new, rehabilitated, modified, and recycled or decommissioned components. Covers asset-management methods and their effectiveness in managing all types of risk. Profiles policies leading civil infrastructure industry toward adoption of such methods, and examines industry case studies. Special attention to vulnerability assessment and risk management in context of broad sampling of potential threats.

Prerequisite(s): BS in civil engineering, or permission of instructor.

Hours of Lecture or Seminar per week: 1 - 6
Hours of Lab or Studio per week: 0

CEIE 681 - Security of Structural Systems

Credits: 3 (NR)
Basic concepts of security of structural systems; analytical models of behavior of structural systems under various security threats; computer simulation of security threats, including blasts and fire; generation of terrorist scenarios and of preventive structural measures; design for security; out-of-the-box approaches to development of preventive structural measures; lessons learned; and intelligent structural security systems.

Prerequisite(s): BS in Civil Engineering or CEIE 367.

Hours of Lecture or Seminar per week: 1-9
Hours of Lab or Studio per week: 0

CEIE 683 - Water and Wastewater Systems Security

Credits: 3 (NR)
Examines overall security of water and wastewater systems. Covers theory and methods to define water and wastewater infrastructure as physical and organizational systems. Explores concepts of infrastructure systems security; identifies actors, interactions in organizational infrastructure, and threats to water and wastewater infrastructure; describes behavior of physical and organizational infrastructures under stress; examines history of threats or attacks against water and wastewater systems; and explores evolution of design, operations, and maintenance paradigms in response to changes in threats. Covers proactive responses to security threats through vulnerability assessments, and models of organizational and physical infrastructure system.
Prerequisite(s): BS in Civil Engineering or CEIE 440 and CEIE 455.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0

CEIE 685 - Civil Engineering Information Management

Credits: 3 (NR)
Advanced course covering all phases of information management life cycle from conceptual design and data collection through systems development, archiving, and disposal. Covers software engineering such as structured analysis, rapid prototyping, and object-oriented analysis as applied to urban systems infrastructure problem solving. Reviews database technology, spreadsheets, communications software, customized applications software, groupware, and graphics software including computer-aided design and geographic information systems. Covers selection and use of appropriate software to match specific engineering problems related to the design, construction, and management of civil engineering infrastructure. Includes design and development of system for engineering application.

Hours of Lecture or Seminar per week: 1-9
Hours of Lab or Studio per week: 0
When Offered: Spring

CEIE 686 - Transportation System Security and Safety

Credits: 3 (NR)
Focuses on critical transportation systems infrastructure and operations, and technologies for predicting and managing damage and disruptions caused by potential threats, including natural and technological disasters and terrorist threats. Includes asset management, methodologies for assessing vulnerabilities, potential impact of damage and disruption, applying state-of-the-art technologies and R&D processes for harnessing best analysis methods, and technologies for hardening transportation infrastructure systems. Includes sensing and surveillance using satellite and aerial remote sensing imagery, application of GIS and spatial information technologies, information and communication, intelligent transportation systems, hardening systems, and making intelligent choices for implementing technology advances to transportation security and safety.

Prerequisite(s): BS in engineering or permission of instructor.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0

CEIE 690 - Topics in Civil Engineering

Credits: 3 (RT)
Topics not covered in the regular civil engineering offerings.

Prerequisite(s): Determined by topic.

Notes: Course content may vary each semester. Course may be repeated with change in topic.

Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 0
CEIE 742 - Water Resources Engineering II: Water Resource Systems

Credits: 3 (NR)
Introduces concepts, applications, and tools of systems analysis for water resources planning, management, and design. Problems including river basin planning, real-time hydrosystem operations, water quality management, capacity expansion, urban drainage network design, and sanitary sewer design used to illustrate applications of systems analysis. Tools include optimization and simulation modeling and knowledge-based systems.

Equivalent to CEIE 732 (2011-2011 Catalog)

Prerequisite(s): Graduate Standing in CEIE; CEIE641 or equivalent.

Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 0

CEIE 762 - Transportation System Planning Models

Credits: 3 (NR)
Covers transportation systems analysis; theory, mathematical structure, and applications of transportation planning models; network analysis and equilibrium; dynamic and stochastic equilibrium models; modal choice analysis; discrete choice models of transportation demand; and model estimation and aggregation.

Prerequisite(s): CEIE 562 or 660; CEIE 601.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0

CEIE 763 - Utility Theory and Transportation Economics

Credits: 3 (NR)
Utility theory and individual choice behavior; Binary choice model; Multinomial choice model; Characteristics of Probit and Logit models; Aggregate forecasting techniques; Travel survey and sampling; Test and choice of model structure; Correlation and nested Logit Model, Advanced models and estimation techniques; Travel, route choice and car ownership models.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

CEIE 767 - Traffic Engineering Modeling and Analysis

Credits: 3 (NR)
Covers basic principles of simulation; queuing theory and traffic signal operations at individual intersections, arterials and networks; applying models related to traffic signalization; optimization and traffic simulation; and developing skills to select most appropriate model for given scenario.
Prerequisite(s): CEIE 561.
Corequisite(s): CEIE 601.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0

CEIE 795 - Civil and Infrastructure Engineering Seminar

Credits: 0 (RD)
Invited speakers, faculty, and CEIE graduate students lecture on current topics and research. Fulfills seminar requirement for MS in civil and infrastructure engineering.

Prerequisite(s): Graduate standing.

Notes: Students must enroll in CEIE 795 each semester (fall and spring) for the duration of their M.S. studies. The course is repeatable.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0
Grading: Satisfactory/No Credit.

CEIE 796 - Directed Reading

Credits: 1-3 (RD)
Reading on specific topic under direction of faculty member.

Prerequisite(s): Graduate standing and permission of instructor.

Notes: May be repeated with change in topic.

Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 0

CEIE 798 - Research Project in Civil Engineering

Credits: 3 (NR)
Analyzes and investigates contemporary problem in civil, environmental, and infrastructure engineering. Requires prior approval by faculty member who supervises student's work.

Prerequisite(s): Permission of instructor
Corequisite(s): CEIE 795.

Notes: Written report also required.
CEIE 799 - Master's Thesis

Credits: 1-6 (RD)
Research project chosen and completed under guidance of graduate faculty member that results in technical report acceptable to three-faculty-member committee, and an oral defense.

Prerequisite(s): 18 credits of graduate-level course work and permission of instructor.

Hours of Lecture or Seminar per week: 1-21
Hours of Lab or Studio per week: 0
Grading: Satisfactory/No Credit

CEIE 800 - Civil, Environmental, and Infrastructure Engineering Colloquium

Credits: 1 (RD)
Semester long themed series, required of Civil and Infrastructure PhD students. Features variety of speakers from universities, government, and private sectors. Topics include civil engineering technologies, research advancements, and policies. Doctoral students required to take 2 credits of CEIE 800 to fulfill degree requirements. No more than 1 credit per semester may be taken. Students eligible to register upon successful completion of qualifying exams.

Prerequisite(s): Graduate Standing

Notes: Students must complete ten written critiques of seminars over the course of two credits of CEIE 800. Students must present their dissertation work once a semester when registered in CEIE 800.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

CEIE 890 - Special Topics in Urban Transportation

Credits: 3 (RD)
Includes traffic safety analysis, simulation in transportation, intelligent transportation systems, advanced public transportation systems, congestion and travel demand management, geographic information systems and information technology, and innovative refinancing and public-private partnerships.

Prerequisite(s): CEIE 560 and 660 or equivalent; or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall
CEIE 892 - Special Topics in Environmental and Water Resource Systems Engineering

Credits: 3 (RD)

Possible topics include studies in waste minimization; pollution prevention; hazardous waste management; wastewater management; air pollution control; solid waste management; environmental decision making; sustainability; water resource and environmental economics; wetlands management, design and construction; groundwater contamination modeling; stochastic hydrology; river basin planning and management; and water quality modeling.

Designated a Green Leaf Course.

Prerequisite(s): CEIE 601

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

CEIE 894 - Design and Inventive Engineering

Credits: 3 (NR)

Topics include Fundamentals: successful intelligence and creative intelligence, creative class, the Medici Effect, the Renaissance Man and Da Vinci's Seven Principles, engineering creativity; Design Engineering: system designing and architecting, designing as search, evolutionalrly designing, constraint search, constructive induction, Axiomatic and Inferential Design Theories; Inventive Engineering: Brainstorming, Synectics, Morphological Analysis, TRIZ, Visual Thinking, Inventive Design in Practice; Project Presentations.

Prerequisite(s): Graduate Status

Notes: This is transdisciplinary course focused on creativity in engineering and science. Open to all graduate students in the Volgenau School of IT and Engineering; graduate students from other schools are encouraged to register with the instructor’s permission.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

CEIE 896 - Civil Engineering Research Topics

Credits: 3 (RD)

Reading on specific topic under direction of faculty member. May be repeated with change in topic.

Prerequisite(s): Admission into CEIE PhD program, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall
CEIE 990 - Civil and Infrastructure Dissertation Topic Presentation

Credits: 1 (NR)
Opportunity for PhD students to present research proposal for critique. Covers presentation of research topic for PhD in Civil and Infrastructure Engineering. Students complete dissertation research proposal. May be repeated with change in topic, but degree credit is given only once.

Prerequisite(s): Graduate Standing; completion of all course work required for PhD in Civil and Infrastructure Engineering or permission of instructor.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

CEIE 998 - Doctoral Dissertation Proposal

Credits: 1-12 (RD)
Work on research proposal that forms basis for doctoral dissertation. May be repeated for credit.

Notes: No more than 24 credits of CEIE 998 and 999 may be applied to doctoral degree requirements.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 1-12
Grading: Satisfactory/No credit only

CEIE 999 - Doctoral Dissertation

Credits: 1-12 (RD)
Formal record of commitment to doctoral dissertation research under direction of faculty member in civil engineering and infrastructure engineering.

Notes: May be repeated for credit.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 1-12
Grading: Satisfactory/No credit only

Classical Studies (CLAS)

Offered by the College of Humanities and Social Sciences

CLAS 240 - Greek and Latin Elements in English

Credits: 3 (NR)
Studies formation of English vocabulary derived from Greek and Latin prefixes, stems, and suffixes to increase word power in
English (vocabulary, style). Special emphasis on bioscientific, medical, and legal terminology. Intended for native and non-native speakers of English. Literary texts illustrate word analyses, vocabulary uses.

Prerequisite(s): ENGL 101/ENGH 101 or equivalent, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CLAS 250 - Classical Mythology

Credits: 3 (NR)
Illustrates role of classical myths in classical and modern literature and art.

Fulfills general education requirement in literature.

Prerequisite(s): ENGL 101/ENGH 101 or equivalent, or permission of instructor.

Notes: Course work in English.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CLAS 260 - The Legacy of Greece and Rome

Credits: 3 (NR)
Introduces history, culture, and literature of Greece and Rome through close readings of central passages from classical literature dealing with some of the most important aspects of human existence. Illustrates importance of classical antiquity for the Western tradition.

Fulfills general education requirement in literature.

Prerequisite(s): ENGL 101/ENGH 101 or equivalent, or permission of instructor.

Notes: Course work in English.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CLAS 340 - Greek and Roman Epic

Credits: 3 (NR)
Examines development of classical epic as genre, from beginnings with Homer to transformations in the works of later Greek and Roman authors.

Fulfills general education requirement in literature.

Prerequisite(s): ENGL 101/ENGH 101 or equivalent, or permission of instructor.
Notes: Course work in English.

Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0

**CLAS 350 - Greek and Roman Tragedy**

Credits: 3 (NR)  
Follows development of tragedy from its origins to the works of Aeschylus, Sophocles, and Euripides, and its reappearance in the Roman world in the tragedies of Seneca. Considers influence of Greek tragedy on later cultures.

Fulfills general education requirement in literature.

Prerequisite(s): ENGL 101/ENGH 101 or equivalent, or permission of instructor.

Notes: Course work in English.

Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0

**CLAS 360 - Greek and Roman Comedy**

Credits: 3 (NR)  
Studies forms, contexts, and developments of comedy as a dramatic form in Greco-Roman world. Traces development of New Comedy in Hellenistic age and translation and adaptation of New Comedy by Roman dramatists Plautus and Terence.

Fulfills general education requirement in literature.

Prerequisite(s): ENGL 101/ENGH 101 or equivalent, or permission of instructor.

Notes: Course work in English.

Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0

**CLAS 370 - Greek and Roman Historians**

Credits: 3 (NR)  
Examines writings of major Greek and Roman historians, including Herodotus, Thucydides, Sallust, Livy, and Tacitus; their interpretations of the past; and their influence.

Prerequisite(s): ENGL 101/ENGH 101 or equivalent, or permission of instructor.

Notes: Course work in English.
**CLAS 380 - Greek and Roman Novels**

Credits: 3 (NR)
Examines novels written in antiquity, and influences on postclassical and modern literature. Emphasizes works of Longus, Heliodorus, Petronius, and Apuleius.

Fulfills general education requirement in literature.

**Prerequisite(s):** ENGL 101/ENGH 101 or equivalent, or permission of instructor.

**Notes:** Course work in English.

**CLAS 390 - Topics in Classical Literature and Culture**

Credits: 3 (RD)
Studies forms, contexts, and developments of distinctive literary genre or cultural phenomenon in the Greco-Roman world.

**Prerequisite(s):** ENGL 101/ENGH 101 (or equivalent) or permission of instructor.

**Notes:** May be repeated for credit when topic is different.

**CLAS 499 - Senior Seminar in Classical Studies**

Credits: 3 (NR)
Individual research on specialized topic culminating in seminar paper. Fulfills writing-intensive requirement. Subject of seminar determined by instructor in consultation with student.

**Prerequisite(s):** Classical studies minors, 90 credits including 15 credits in classics, and permission of instructor.

**Notes:** Permission must be obtained in advance. Students may present no more than 3 credits for graduation.

**Climate (CLIM)**
Offered by the College of Science

CLIM 101 - Global Warming: Weather, Climate, and Society

Credits: 3 (NR)

Survey of the scientific and societal issues associated with weather and climate variability and change. Examines physical phenomena observed in the Earth's weather and climate, providing sufficient scientific and technical background to enable students to critically examine arguments being discussed by policymakers and the public at large. Also reviews the current debate on climate change from a scientific point of view with a focus on those aspects that have the largest potential impact on global society.
Designated a Green Leaf Course.

Fulfills general education requirement in natural science (nonlab).

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CLIM 102 - Global Climate Change: Modeling and Predicting an Uncertain Future

Credits: 4 (NR)

Class studies the use of computer models to simulate past and present climate, and predict future climate change; discusses how complex models are built, tested, and interpreted to better understand physical, chemical, and biological processes; how uncertainty is managed. Students conduct laboratory experiments through online interface and apply results to policy and planning.

Fulfills general education requirement in natural science (lab).

Prerequisite(s): Basic math skills (Geometry, Algebra).

Notes: Computer models are used in the lab.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 1
When Offered: Spring

CLIM 111 - Introduction to the Fundamentals of Atmospheric Science

Credits: 3 (NR)

Overview of the Earth's atmosphere, its history, and the physical and chemical process that determine its characteristics. Focuses on key concepts from thermodynamics, radiation, chemistry, and dynamics that are essential for understanding the state, variability, and long term evolution of the atmosphere; especially in the context of comparisons with other planetary atmospheres.

Fulfills general education requirement in natural science (lab).
Equivalent to PHYS 111

**CLIM 112 - Introduction to the Fundamentals of Atmospheric Science Lab**

Credits: 1 (NR)
Laboratory course associated with CLIM 111. Study of the Earth's atmosphere based on concepts taken from thermodynamics, radiation transport, chemistry, and dynamics.

Fulfills general education requirement in natural science (lab).

Equivalent to PHYS 112

**Corequisite(s):** CLIM 111

**Hours of Lecture or Seminar per week:** 1-6
**Hours of Lab or Studio per week:** 1

**CLIM 301 - Weather Analysis and Prediction**

Credits: 4 (NR)
Large-scale behavior of mid-latitude weather systems. Includes coupling of synoptic motion to mesoscale processes that lead to significant weather events. Introduces the observational network, numerical weather models, and prediction. Laboratory portion gives practical experience in weather analysis, prediction, and technology currently used for visualization and analysis.

**Prerequisite(s):** MATH 113 or equivalent; one of CLIM/PHYS 111/112 or EOS 121 or GGS 121.

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 1

**CLIM 314 - Severe and Extreme Weather**

Credits: 3 (NR)
Behavior of weather events ranging from small scale (e.g., thunderstorms and tornadoes) to mesoscale (e.g., fronts and hurricanes). Introduces the dynamical and physical processes, atmospheric boundary layer processes, and coupling between different spatial scales that create and shape severe and localized weather events.

Equivalent to GGS 314

**Prerequisite(s):** MATH 113 or equivalent; CLIM/PHYS 111/112 or GGS 121.

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0
CLIM 319 - Air Pollution

Credits: 3 (NR)
Description of major types of air pollution and introduction to how their characteristics are influenced by interaction with the atmosphere. Topics include sources and distribution of pollution from local to global scales, effects of radiation and wind on pollution, modeling of plume dispersion, and pollution effects on climate.

Prerequisite(s): CLIM 111 or GGS 121.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

CLIM 390 - Topics in Climate Research

Credits: 1-4 (RD)
Selected topics not covered in fixed content courses. May be included for credit by AOES majors in the 45 credits of courses required for BS degree.

Prerequisite(s): 15 credits of AOES courses within concentration.

Hours of Lecture or Seminar per week: 1-4
Hours of Lab or Studio per week: 1-6

CLIM 408 - Senior Research

Credits: 3 (RD)
Independent research under guidance of faculty member on a research project in numerical, experimental, observational, or theoretical atmospheric or climate-related research. A written report on the project is required.

Prerequisite(s): 15 credits of AOES courses within major.

Notes: May be taken twice with department permission.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CLIM 409 - Research Internship

Credits: 3 (RD)
On-the-job experience for AOES majors in industry or government laboratories, including summer research programs. Students work in observational, experimental, or theoretical research, and prepare a written report at the end of the internship.

Prerequisite(s): 75 credits. 15 credits of courses in major and permission of department. See department for requirements and application procedure prior to enrollment.
Notes: May be taken twice with department permission.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CLIM 411 - Introduction to Atmospheric Dynamics

Credits: 3 (NR)
Covers the basic conservation laws of mass, momentum, and energy and a scaling analysis of the equation of motion and the thermodynamic equation; concepts of circulation and vorticity, balanced flows in the atmosphere (e.g., the geostrophic wind and its vertical shear, and the thermal wind relationship), planetary waves and wave-mean flow interaction. Also covers the baroclinic instability theory and energy transfer in the life cycle of the baroclinic eddies and two-layer quasi-geostrophic theory for the mid-latitude atmospheric general circulation. Hadley circulation dynamics may be discussed if time permits.

Prerequisite(s): PHYS 260, PHYS 261, MATH 214, MATH 313.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

CLIM 412 - Physical Oceanography

Credits: 3 (NR)
Reviews global patterns of temperature, salinity, currents and waves in the world’s oceans and how these patterns influence marine biota, climate, and human activity. Introduces key concepts which explain physical features of the ocean ranging from microscopic turbulence to global circulation.

Equivalent to GEOL 412.

Prerequisite(s): MATH 113 or MATH 115, and PHYS 160 or PHYS 243, or permission of instructor

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CLIM 438 - Atmospheric Chemistry

Credits: 3 (NR)
Reviews fundamental chemical processes of the Earth's atmosphere including chemical cycles, thermodynamics, reaction kinetics, photochemistry, radiative balance, ozone chemistry and environmental issues, including air pollution, acid rain and global change. Includes some review of extraterrestrial atmospheric chemistry.

Equivalent to CHEM 438

Prerequisite(s): CHEM 331 and 332 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
CLIM 690 - Scientific Basis of Climate Change

Credits: 3 (NR)
A rigorous treatment of global warming, especially with regard to anthropogenic causes, based on the IPCC 4th Assessment Report "The Physical Science Basis". Topics include 1) Overview of observed climate, 2) Variability of climate, 3) Modeling of climate response to greenhouse gas forcing, 4) Green house gases, chemistry, and aerosols, and 5) Projections of climate change and its societal impact.

Prerequisite(s): BS or MS in a natural science or engineering, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CLIM 710 - Introduction to Physical Climate System

Credits: 3 (NR)
Provides modern understanding of ocean, atmosphere, and land based on fundamental physical laws. Describes current climate and physical processes by which climate is maintained. Covers theoretical models of general circulation of atmosphere, including time mean and transient behavior. Describes basics of ocean circulation and interactions between ocean and atmosphere. Reviews past climate change, stratosphere and its interactions with troposphere, and role of land processes in modulating climate.

Prerequisite(s): BS or MS in mathematics or a physical science, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CLIM 711 - Introduction to Atmospheric Dynamics

Credits: 3 (NR)
Covers basic conservation laws of mass, momentum, and energy and scaling analysis of equation of motion and thermodynamic equation. Discusses balanced flows in atmosphere, such as geostrophic wind and its vertical shear, and thermal wind relationship. Also explores circulation and vorticity; role of atmospheric boundary layer in mass, momentum, and energy transfer; synoptic scale motions; and role of gravity and Rossby waves in controlling general circulation of atmosphere.

Equivalent to PHYS 676

Prerequisite(s): BS or MS in mathematics or a physical science, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CLIM 712 - Physical and Dynamical Oceanography
Credits: 3 (NR)
Introduces climatology and dynamics of oceans. Covers nature of seawater, heat, and salt budgets; general circulation of the ocean, including the Gulf Stream and thermohaline circulations; dynamics of wind-driven ocean circulation; and processes influencing biological and chemical behavior.

Prerequisite(s): CSI 751 or CLIM 710 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CLIM 713 - Atmosphere-Ocean Interactions

Credits: 3 (NR)
Provides comprehensive observational and mechanistic understanding of El Niño and Southern Oscillation (ENSO) phenomena. Topics include observations and theories of seasonal and interannual changes in ocean circulation and temperature and interactions with atmosphere; equations of motion and theories of wind-driven circulation; mixed layer observations and theories; midlatitude and equatorial ocean waves; interannual variability and atmosphere-ocean coupling; and tropical oceanography and meteorology.

Prerequisite(s): CLIM 712 or 711 or equivalent, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CLIM 714 - Land-Climate Interactions

Credits: 3 (NR)
Interdisciplinary course providing detailed description of surface energy and water balance over land and radiative and turbulent transfer. Introduces numerical techniques for modeling land surface and applications in weather, climate, and hydrologic forecasting and simulation. Includes hands-on experience with land surface models in computer laboratory, including sensitivity experiments to reinforce theoretical concepts. Exposure to contemporary research through reading and reviewing seminal journal papers.

Prerequisite(s): BS or MS in mathematics or physical science, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CLIM 715 - Numerical Methods for Climate Modeling

Credits: 3 (NR)
Foundation and theory of computational methods for atmosphere and ocean modeling, with special emphasis on finite-difference and spectral methods. Topics include accuracy, consistency, convergence and stability; time stepping schemes; nonlinear computational stability; energy and enstrophy conserving schemes for momentum equations; staggered and curvilinear grids; alternate vertical coordinate systems; implicit and split-explicit barotropic mode solution; pressure gradient errors and vorticity constraints; spectral methods for atmospheric models; and treatment of model physics.
CLIM 750 - Geophysical Fluid Dynamics

Credits: 3 (NR)
Introduces geophysical fluid dynamics, the study of rotating stratified flows. Covers hydrostatics; equations of motion, gravity wave dynamics, and stratified flow; effects of rotation, midlatitude dynamics, Rossby number and quasigeostrophic expansion; beta plane approximation; and equatorial Kelvin and Rossby waves.

Prerequisite(s): CLIM 711, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CLIM 751 - Predictability of Weather and Climate

Credits: 3 (NR)
Covers fundamental aspects of weather and climate predictability. Using simple dynamical models, illustrates basic theorems on divergence of trajectories in phase space and fundamental periodicity properties of flow. Explores paradigms of turbulence, barotropic and baroclinic instability, and optimal linear growth to describe fundamental error growth mechanisms. Examines examples from real weather forecasting systems. Studies predictability of time averages with simple dynamical models and experiments using complex general circulation models and historical data analysis. Emphasizes roles of boundary conditions of sea surface temperature and soil moisture.

Prerequisite(s): CLIM 711 or equivalent, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CLIM 752 - Ocean General Circulation

Credits: 3 (NR)
Description and theory of large-scale ocean circulation and how it affects climate. Focus is on ubiquitous flow structures such as gyres, equatorial currents, and meridional overturning cells. Examines how the circulation follows from wind and thermohaline forcing, as well as physical principles. The influence of the circulation on heat transport and climate variability is also discussed. Conceptual guideposts include barotropic gyres, Ekman cells, potential vorticity, western intensification, the interplay of gravity and the Earth's rotation, advective-diffusive balance, multiple flow states, and Rossby waves.

Prerequisite(s): CLIM 712 or 711 or equivalent, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
CLIM 753 - General Circulation of the Atmosphere

Credits: 3 (NR)
Overview and several theoretical perspectives of atmospheric transport of energy, moisture, and angular momentum, and how these processes fundamentally affect the climate on various time scales.

Prerequisite(s): CLIM 710 and 711.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CLIM 754 - Elements of the Tropical Climate System

Credits: 3 (NR)
Observations and dynamics of key processes of tropical weather and climate. Topics include: structure of the tropical atmosphere and ocean, convection, dynamics of tropical waves in the atmosphere and ocean, tropical intraseasonal variability, tropical the global monsoons, cyclones, and stratospheric quasi-biennial oscillation.

Prerequisite(s): CLIM 711.

Corequisite(s): CLIM 710.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring

CLIM 759 - Topics in Climate Dynamics

Credits: 3 (RT)
Covers selected topics in climate dynamics not covered in fixed-content courses.

Prerequisite(s): Permission of instructor.

Notes: May be repeated for credit when offered with different content.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CLIM 762 - Statistical Methods in Climate Research

Credits: 3 (NR)
Introduction to a core set of statistical methods that have proven useful to modern climate and predictability research. Topics include detecting and attributing climate change, describing climate variability with empirical orthogonal functions, statistical forecasting with regression and time series models, and identifying coupled patterns of variability with canonical correlation analysis.
Prerequisite(s): Undergraduate-level linear algebra and STAT 344 (or equivalent), or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CLIM 763 - Advanced Statistical Methods in Climate Research

Credits: 3 (NR)
Introduction to multivariate statistical techniques commonly used in climate science, with special emphasis on estimation in large dimensional spaces. Topics include: multivariate regression, canonical correlation analysis, predictable component analysis, field significance tests, data assimilation (especially the ensemble Kalman Filter), discriminant analysis, and multivariate detection and attribution of climate change.

Prerequisite(s): CLIM 762 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring.

CLIM 796 - Directed Reading and Research

Credits: 1-6 (RT)
Reading and research on a specific topic in climate dynamics under the direction of a faculty member.

Prerequisite(s): Admission into climate dynamics doctoral program and permission of instructor.

Notes: May be repeated as necessary.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0

CLIM 991 - Climate Dynamics Seminar

Credits: 1 (RD)
Presentations in climate dynamics field by Mason faculty and invited speakers.

Prerequisite(s): Graduate standing.

Notes: May be repeated for credit; however, a maximum of 3 credits may be applied toward the climate dynamics PhD.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0

CLIM 996 - Doctoral Reading and Research
Credits: 1-6 (RT)
Reading and research on a specific topic in climate dynamics under the direction of a faculty member.

Prerequisite(s): Admission into climate dynamics doctoral program and permission of instructor.

Notes: May be repeated as necessary.

Hours of Lecture or Seminar per week: 1-12
Hours of Lab or Studio per week: 0
Grading: Graduate Special

CLIM 998 - Doctoral Dissertation Proposal

Credits: 1-12 (RD)
Covers development of research proposal under guidance of dissertation director and doctoral committee. Proposal forms basis for climate dynamics doctoral dissertation.

Prerequisite(s): Doctoral standing and permission of instructor.

Notes: Course may be repeated, but no more than 12 credits of CLIM 998 may be applied to doctoral degree requirements.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0
Grading: Satisfactory/No credit only

CLIM 999 - Doctoral Dissertation

Credits: 1-12 (RD)
Doctoral dissertation research under direction of dissertation director.

Prerequisite(s): Admission to doctoral candidacy and permission of instructor.

Notes: May be repeated, but no more than 24 credits total in CLIM 998 and 999 may be applied to doctoral degree requirements.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0
Grading: Satisfactory/No credit only

College of Humanities and Social Sciences (CHSS)

CHSS 310 - Introduction to Entrepreneurship
Credits: 1 (NR)
Introduces students to the intellectual underpinnings of entrepreneurship, entrepreneurial leadership, social innovation, intrapreneurship, and social enterprise development. Students shape a entrepreneurial learning plan for their own professional development in line with their career aspirations.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

**CHSS 390 - Peer Tutoring in Writing across the Disciplines**

Credits: 1 (RD)
Experiential learning course in teaching of writing across disciplines. Students receive Writing Center training in theory and techniques of tutoring writing and work a minimum of 3 hours per week in Writing Center. Focus is on practical application of writing theory and pedagogy from course readings, development of tutoring skills, and self-reflection through journals and final paper.

Prerequisite(s): Grade of A in ENGL 302/ENGH 302, 60 credits, and overall minimum GPA of 3.00 with a minimum GPA in major of 3.50.

Notes: Students must submit two faculty recommendations and a sample of recent academic writing, and complete an interview with the director of the Writing Center. May be repeated for a maximum of 3 credits.

Hours of Lecture or Seminar per week: 1-12
Hours of Lab or Studio per week: 0

**College of Visual and Performing Arts (CVPA)**

**CVPA 101 - Arts Pass**

Credits: 2 (RD)
Introduction to appreciation of the arts through lectures and demonstrations in visual art, music, dance, and theater. Emphasizes aesthetic principles in modern society. Students attend performances and exhibitions and develop analytical skills through written journal and discussion.

Notes: May be repeated for total 4 credits.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 0

**CVPA 102 - Experiencing the Arts**
Credits: 3 (NR)
Reserved for high school students enrolled in CVPA. Introduces collaborative and interdisciplinary arts experiences in visual art, music, dance, theater, film, and media through daily intensive immersion in the arts for two and a half weeks.

**CVPA 105 - Special Topics in the Arts**

Credits: 1-3 (RT)
Exploration of topical studies on the arts.

**Notes:** Subject matter varies. May be repeated for a maximum 12 credits when taken under different topics.

**Hours of Lecture or Seminar per week:** 1-3
**Hours of Lab or Studio per week:** 0

**CVPA 308 - Cross-Cultural Arts Appreciation**

Credits: 3 (RT)
Provides cumulative arts experience by tying subject matter to major cultural production of Center for the Arts.

**Notes:** Subject matter varies. May be repeated for maximum 12 credits when taken under different topics.

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0

**CVPA 399 - Special Topics in the Arts**

Credits: 1-6 (RT)
In-depth presentation and exploration of topical studies on the arts.

**Notes:** Subject matter varies. May be repeated for maximum 24 credits when taken under different topics.

**Hours of Lecture or Seminar per week:** 1-6
**Hours of Lab or Studio per week:** 3

**CVPA 430 - Topics in Arts and Wellness**

Credits: 1-3 (RD)
In-depth presentation and exploration of topical studies in arts and wellness or related areas such as injury prevention, performance enhancement, and health and wellness training.

**Prerequisite(s):** Junior standing, or permission of instructor.
Notes: Topic depends on instructor. May be repeated for up to 9 credits if taken under different topics.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0

CVPA 489 - Field Experience in the Arts

Credits: 3-6 (RT)
Apprenticeship, internship, or project with organization or individual in the arts. Must be prearranged with division director before enrollment.

Prerequisite(s): Junior standing; completion of 6 credits in CVPA courses in area of residency; CVPA 305; or permission of instructor.

Notes: May be repeated for maximum 6 credits.

Hours of Lecture or Seminar per week: 1-12
Hours of Lab or Studio per week: 0

CVPA 499 - Research/Performance/Topics in the Arts

Credits: 3-6 (RD)
Advanced research, performance, or exploration of topical studies in arts.

Prerequisite(s): Permission of department chair.

Notes: May be repeated for maximum 6 credits.

Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 0

CVPA 530 - Topics in Arts and Wellness

Credits: 1-3 (RD)
In-depth presentation and exploration of topical studies in arts and wellness and/or related areas (e.g., injury prevention, performance enhancement, health and wellness training to educators and arts professionals). Topic depends on instructor.

Prerequisite(s): 90 hours or permission of the instructor.

Notes: May be repeated up to 9 credits if taken under different topics.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0
CVPA 592 - Special Topics in Interdisciplinary Arts Studies

Credits: 1-3 (RT)
Topics in interdisciplinary arts.

Prerequisite(s): Undergraduate degree or equivalent, or permission of instructor.

Notes: May be repeated for maximum 12 credits.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CVPA 599 - Independent Study

Credits: 1-6 (NR)
Independent reading, performance, or research on specific project under direction of selected faculty member. May include attendance in parallel undergraduate course.

Prerequisite(s): Undergraduate degree or equivalent, or permission of instructor.

Notes: May be repeated for total 12 credits.

Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 0

CVPA 700 - Academic Writing in the Arts

Credits: 1 (RD)
Prepares graduate students for the rigors of academic writing in the arts at the advanced level and supports students' acculturation in the academic writing skills and practices of their discourse communities.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0
Grading: Satisfactory/No Credit only

CVPA 701 - Thesis and Project Writing

Credits: 1 (RD)
Students will develop an expertise within the specific rhetorical context of the thesis/project genre, understand the specialized features of the final project or thesis, and apply the strategies they have learned in their disciplines to their capstone event.

Prerequisite(s): Completion of 21 graduate credits in a CVPA graduate degree.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0
Grading: Satisfactory/No credit only
College Teaching (CTCH)

Offered by the College of Humanities and Social Sciences

CTCH 592 - Special Topics in Education

Credits: 3 (RT)
Addresses current issues in colleges and universities, with particular attention to the multiple purposes of contemporary higher education.

Notes: May be repeated for a maximum of 6 credits when topic is different.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CTCH 601 - The Community College

Credits: 3 (NR)
Studies institutional character of the community college, including history, purpose, clientele, organization, finance, and social function. Studies issues currently faced by community colleges.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CTCH 602 - College Teaching

Credits: 3 (NR)
Describes issues that affect teaching and learning and provides basic tools to use in college classroom. Teaches how to plan course, develop syllabus, promote learning among diversity of students, and implement classroom assessment techniques.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CTCH 603 - Technology in Higher Education

Credits: 3 (NR)
Overview of technology issues in higher education and hands-on experience with select technology tools to enhance productivity and classroom and online learning. Examines issues related to using technology in administration, teaching and learning, and guides in developing policies and effective technology-enhanced learning activities for students.

Prerequisite(s): Basic familiarity with computer operations
CTCH 604 - The Scholarship of Teaching and Learning

Credits: 3 (NR)
Overview of the movement in higher education in scholarship of teaching and learning. Focuses on ways students learn, how learning can be improved, and different methods of conducting research into teaching and learning.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CTCH 605 - Curriculum and Program Design and Assessment

Credits: 3 (NR)
Prepares for designing, implementing, and assessing new courses, curricula, and programs. Examines relationships of courses and curricula to larger programs and institutional goals. Explores program planning and implementation such as documenting need, generating cost estimates, and assembling strong case for new programs.

Prerequisite(s): CTCH 601 or 602, and 603.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CTCH 606 - Diversity in Higher Education

Credits: 3 (NR)
Explores instructional interactions and communication strategies for diverse learner populations. Includes discussion of sociological, behavioral, and cognitive theory on culture.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CTCH 621 - Higher Education in the United States

Credits: 3 (NR)
History of higher education from colonial period to the present. Examines philosophic, political, social, and economic forces that have influenced development. Reviews today's issues and challenges.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
CTCH 622 - Organization and Administration in Higher Education

Credits: 3 (NR)
Provides concepts of organization and administration in contemporary institutions from macro to micro perspectives. Studies theory and practices of the organization as it relates to governance, structure, and management of the institution.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CTCH 624 - Finance and Fiscal Management in Higher Education

Credits: 3 (NR)
Overview of higher education finance and fiscal management.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CTCH 626 - Assessment in Higher Education

Credits: 3 (NR)
Focuses on political and historical context of assessment in higher education, and teaches strategies for classroom, program, and institutional assessment. Develops skills in survey and focus group research, and teaches how to develop and implement assessment plan.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CTCH 641 - Introduction to Helping Skills

Credits: 3 (NR)
Focuses on helping skills that assist others in reflecting on concerns, considers possible causes of problems, and contemplates options and strategies for problem solving. Introduces students to and practices basic helping skills. Explores ethical issues surrounding helping skills and determining when to refer students to professional counselors.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CTCH 643 - Multicultural Helping Skills

Credits: 3 (NR)
Sensitizes students to and promotes an understanding of multiple cultures and encourages students to examine their own attitudes toward various groups, explore their own identities, and to acquire expertise in the use of helping skills with various populations. Emphasizes the learning of approaches and the application of techniques that facilitate effective multicultural communication in higher education.
Prerequisite(s): CTCH 641.

CTCH 644 - Student Services in Higher Education

Credits: 3 (NR)
Focuses on development and organization of student personnel programs and services in institutions of higher learning. Covers philosophy, methods, and techniques.

CTCH 645 - The Contemporary College Student

Credits: 3 (NR)
Analyzes changing demographics, barriers, and developmental issues facing college students. Studies impact of college environment on student development, and interaction between students of varying subcultures and the environment. Examines technology issues and their impact.

CTCH 685 - Practicum

Credits: 3 (RD)
Serves as an essential part of the certificate and MAIS programs. Supervised on-the-job experience in approved college or university setting or public agency involved in higher education. Develops skills applicable to college-based teaching or higher education administration or policy. Approval of practicum coordinator needed one semester before registration.

Prerequisite(s): Admission to certificate, MAIS/CCT or MAIS/Higher Education program; approval of advisor and practicum coordinator; 12 credits of core requirements; and 3 additional credits.

Notes: Minimum 150 hours of work and participation in internship seminar. May be repeated for a maximum of 6 credits.

CTCH 701 - Higher Education Law
Introduces students to laws and legal issues that impact higher education and establishes general familiarity of higher education law. Utilizes a case study approach that allows students to be able to recognize when a legal issue presents itself in situations involving students, faculty, or administration.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CTCH 702 - Leadership in Higher Education

Credits: 3 (NR)
Focusing on the leadership of higher education and the role leaders play in institutional transformation, this course explores the complex social and political environments and the current and future trends of higher education. This focus occurs through the foundational grounding of leadership theory and research. Students will be challenged to employ multiple perspectives of leadership in higher education.

CTCH 792 - Special Topics in Higher Education

Credits: 1-3 (RT)
Covers current issues in teaching and learning in higher education.

Prerequisite(s): Admission to doctoral program or permission of instructor.

Notes: May be repeated for a maximum of 12 credits when topic is different.

Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 0

CTCH 801 - Basics of Research Design

Credits: 3 (NR)
Provides an introduction to higher education research methodologies, analysis, and decision-making through introduction of basics of research design including problem identification, literature review, method selection, data collection and analysis, application, writing, and ethics.

Equivalent to EDRS 610/810.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CTCH 821 - History of Higher Education in the United States

Credits: 3 (NR)
Key issues and moments in the history of higher education are examined as a way to understand current structures, cultures,
policies, and purposes. Historical perspective will also be used to consider the near future of higher education. Students will examine current trends and possible futures for a specific topic by doing historical research on the issue.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**CTCH 826 - Advanced Institutional and Program Assessment in Higher Education**

Credits: 3 (NR)  
Examination of educational assessment and evaluation, practices, and methods. Students critique and design an evaluation study and an evaluation report. Reviews ethical issues and impact of assessment and evaluation for students, employees, and programs.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**CTCH 830 - Ethics in Higher Education: Personal, Organizational, and Institutional Realities**

Credits: 3 (NR)  
Explores theories, definitions, and applications of ethics across multiple higher education settings, with particular attention to critical theory contributions. Includes an in-depth analysis of major complex ethical issues in higher education settings using ethical frameworks.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**CTCH 885 - Doctoral Internship in College Teaching and Administration**

Credits: 3 (RT)  
Supervised internship at a community college, four-year college or university, or nonteaching higher-education setting such as a government agency or administrative office. Develops skills applicable to college teaching or higher education administration or policy. Students must complete a minimum of 180 hours of work and participate in internship seminar.

**Prerequisite(s):** Admission to doctoral program, approval of advisor and internship coordinator, 18 credits of graduate course work.

**Notes:** Students must contact the program at least one semester before enrolling. May be repeated for a maximum of 6 credits.

**Hours of Lecture or Seminar per week:** 1  
**Hours of Lab or Studio per week:** 0  
**Grading:** S/NC

---

**CTCH 897 - Directed Reading in Higher Education**
Credits: 1-6 (RD)
Independent reading on topic agreed on by student and instructor.

Prerequisite(s): Admission to doctoral program and permission.

Hours of Lecture or Seminar per week: 1-18
Hours of Lab or Studio per week: 0

CTCH 998 - Doctoral Dissertation Proposal

Credits: 1-3 (RD)
Contact program for permission to register. Work on research proposal that forms basis for doctoral dissertation.

Prerequisite(s): Completion of at least one internship and all other course work and qualifying exams.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0
Grading: S/NC

CTCH 999 - Doctoral Dissertation

Credits: 1-12 (RD)
Doctoral dissertation research and writing under direction of dissertation committee.

Prerequisite(s): CTCH 998, two internships, and appointed dissertation committee.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0
Grading: S/NC

Communication (COMM)

Offered by the College of Humanities and Social Sciences

COMM 100 - Public Speaking

Credits: 3 (NR)
Presents principles to develop effective presentations for public and professional settings while integrating appropriate technologies. Emphasizes analyzing audience; composing meaningful, coherent messages; conducting responsible research; developing effective arguments; and improving delivery skills to strengthen confidence and credibility.

Fulfills general education requirement in oral communication.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
COMM 101 - Interpersonal and Group Interaction

Credits: 3 (NR)
Presents principles to develop appropriate and effective communication strategies in one-to-one and small group communication settings. Emphasizes analyzing and assessing communication skills to create and sustain effective communication in personal and professional relationships.

Fulfills general education requirement in oral communication.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

COMM 140 - Forensics Seminar in Creative Arts

Credits: 1 (RT)
Intensive work in creative forensics events, including rhetorical criticism and informative, persuasive, extemporaneous, after-dinner, and impromptu speaking.

Prerequisite(s): Audition.

Notes: May be taken four times.

Hours of Lecture or Seminar per week: 3-6
Hours of Lab or Studio per week: 6

COMM 141 - Forensics Seminar in Recreative Arts

Credits: 1 (RT)
Intensive work in recreative forensic events, including dramatic duo, program interpretation, poetry interpretation, dramatic interpretation, and prose interpretation.

Prerequisite(s): Audition.

Notes: May be taken four times.

Hours of Lecture or Seminar per week: 3-6
Hours of Lab or Studio per week: 6

COMM 142 - Forensics Seminar in Debate: Affirmative Strategies

Credits: 1 (RT)
Work in affirmative research, case construction, and oral presentation; directed toward affirmative analysis of intercollegiate debate proposition.
COMM 143 - Forensics Seminar in Debate: Negative Strategies

Credits: 1 (RT)
Work in negative research, case attacks, and oral presentation directed toward negative analysis of intercollegiate debate proposition.

Notes: May be taken four times.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 6

COMM 145 - Newspaper Workshop I

Credits: 1 (RT)
Practical experience in writing, editing, or business aspects of newspaper production at Broadside or other papers. Coordinated by newspaper faculty advisor.

Notes: May be repeated for total 3 credits.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 2

COMM 148 - Radio Workshop I

Credits: 1 (RD)
Practical experience in production, news writing, promotions, advertising, public relations, programming, or newscasting for student radio station WGMU.

Prerequisite(s): 100-level COMM course, or permission of instructor.

Notes: May be taken three times.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 3

COMM 150 - Communication Skills for International Students

Credits: 3 (NR)
Introduction to speaking, listening, and nonverbal skills required to communicate appropriately in university study.
Prerequisite(s): International student in first year of study in the United States, non-native speakers of English with some difficulty speaking clearly and accurately, or permission of instructor.

Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0

**COMM 157 - Video Workshop**

Credits: 1 (RD)  
Practical experience in learning production basics including camera, video, and lighting.

Notes: Students who have already completed or are in COMM 355 are not eligible to take this course. May be taken three times.

Hours of Lecture or Seminar per week: 1  
Hours of Lab or Studio per week: 2

**COMM 200 - Communication Theory**

Credits: 3 (NR)  
Introduces the field of communication, including perspectives on theory and research, topical areas within the discipline, basic research methodologies, and a survey of theories in those areas. Covers basic procedures for theory-building, research, and writing about communication.

Prerequisite(s): Declared major or minor in Communication, undeclared major, or permission of undergraduate program director.

Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0

**COMM 201 - Small Group Communication**

Credits: 3 (NR)  
Principles of communicating effectively in small group situations. Emphasizes problem-solving group communication. Practice in working cooperatively with others to complete projects using systematic approach to problem solving.

Prerequisite(s): COMM 101 or equivalent course.

Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0

**COMM 202 - Media and Society**

Credits: 3 (NR)
Examines the relationship between media and society through the study of the development of various media systems in the United States, including print media, radio, television, film, the recording industry, and new communication technologies. Introduces media effects and basic theories.

Comm 203 - Introduction to Journalism

Credits: 3 (NR)
American journalism including history and First Amendment components; role of professional journalist; print, broadcast, and computer assisted news operations; economics of publishing; and effect of new technologies. Serves as starting point for those interested in journalism careers and as orientation for those interested in learning more about news business operations.

Comm 210 - Voice and Articulation

Credits: 3 (NR)
Principles of voice production, with practice in effective vocal use of American English. Emphasizes student participation.

Comm 230 - Case Studies in Persuasion

Credits: 3 (NR)
Examines common persuasive message strategies and approaches. Covers basic principles of persuasive process. Case studies include advertisements, speeches, and persuasive activities from all segments of society.

Comm 249 - Communication Industry Experience

Credits: 2 (RD)
On-site training related to one of the five communication department concentration fields through faculty-approved field work-study programs. Related class work includes navigating in-process media workplace culture and the post-CIE progression, including refining the resume, preparing for the COMM 450 internship, and ultimately interviewing for a job.

Prerequisite(s): 45 credits total, 6 credits in Comm.
Notes: May be repeated for maximum of 4 credits.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 0
Grading: Satisfactory/No Credit

COMM 255 - Introduction to Media Literacy

Credits: 3 (NR)
Principles and practices of media literacy. Emphasizes critical viewing, listening, and reading media skills; and media effects on consumer.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

COMM 260 - Basic Debate Theory and Practice

Credits: 3 (NR)
Theory and practice of formal debate, including approaches to analytical reasoning, research, delivery, and conceptual basis for debate. Does not require tournament participation.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 3

COMM 261 - Theories of Argumentation

Credits: 3 (NR)
Analyzes argument within communicative settings. Emphasizes deductive and inductive forms of reasoning, fallacies in reasoning, tests of evidence, and models for such analyses.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

COMM 300 - Foundations of Public Communication

Credits: 3 (NR)
Theories and principles of public communication, emphasizing methods of persuasion, critical analysis, speaker-listener alignments in public setting, and measurements of effective public communication.

Fulfills writing intensive requirement in the major.

Prerequisite(s): COMM 200 with a grade of C or better. Prerequisite enforced by registration system.
COMM 301 - Foundations of Interpersonal Communication

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

Credits: 3 (NR)
Theories and principles of interpersonal communication emphasizing models of communication, verbal and nonverbal message systems, and analysis of communicative relationships.

Prerequisite(s): COMM 200 with a grade of C or better. Prerequisite enforced by registration system.

COMM 302 - Foundations of Mass Communication

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

Credits: 3 (NR)
Theories and principles of mass communication emphasizing effects, the media as institution, and role of society.

Prerequisite(s): COMM 200 with a grade of C or better. Prerequisite enforced by registration system.

COMM 303 - Writing across the Media

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

Credits: 3 (NR)
Foundation course focusing on writing for the mass media: Internet, public relations, newspapers, broadcast (television and radio) and advertising with a strong emphasis on adherence to Associated Press Style.

Prerequisite(s): 30 credits.

Notes: Prerequisite for all communication media writing courses. Lab work required.

COMM 304 - Foundations of Health Communication

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

Credits: 3 (NR)
Explores health communication research practice: the role of communication in health care delivery, health promotion and disease prevention, risk communication, and personal as well as psychological well-being. Examines interpersonal, organizational, team, family, and intercultural relationships.
COMM 305 - Foundations of Intercultural Communication

Credits: 3 (NR)
Analyzes communication variables as they relate to intercultural encounters. Emphasizes culture's influence on communication process, particularly influence of verbal and nonverbal communication on how message is interpreted.

Fulfills general education requirement in global understanding.

Prerequisite(s): 3 credits of 100 or 200-level COMM courses or 60 credits.

Notes: Communication majors are encouraged to complete COMM 200 prior to enrolling in this course.

COMM 306 - Issues in Intercultural Communication

Credits: 3 (NR)
Applies basic principles of intercultural communication to analyze specific situations involving communication and cultural differences.

Prerequisite(s): COMM 305, or permission of instructor.

Notes: Continuation of COMM 305.

COMM 307 - Field Study in Communication

Credits: 3 (RT)
Structured communication learning experience: one to three weeks of travel in a foreign environment involving another country or relevant U.S. co-cultures. Students must complete appropriate readings, laboratory assignments, and personal learning paper to process communication concepts and experiences.

Prerequisite(s): Permission of instructor

Notes: May be repeated for a maximum of 6 credits when field study is different.
COMM 310 - Oral Interpretation

Credits: 3 (NR)
Principles and theories of oral interpretation. Practice in oral communication of prose, poetry, and drama.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

COMM 320 - Business and Professional Communication

Credits: 3 (NR)
Study of basic theories and skills of communication in professional contexts, including interviewing, relationship maintenance, small group teams, and public presentations. Emphasizes developing practical and critical thinking skills.

Prerequisite(s): COMM 100, 101 or 104 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

COMM 326 - Rhetoric of Social Movements and Political Controversy

Credits: 3 (NR)
Social and political forces of contemporary era from communication perspective, emphasizing political leadership, pressures for social and political change, and transformations in communicative environment.

Fulfills general education requirement in synthesis.

Prerequisite(s): COMM 300.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

COMM 330 - Principles of Public Relations

Credits: 3 (NR)
Surveys nature, history, scope, and practice of public relations in business, trade associations, nonprofit organizations, and educational and government institutions. Covers principles, practice of public relations, including media relations, issues management, and public service announcements; marketing and research; planning and publicity for special events; house publications; and institutional advertising.

Prerequisite(s): 3 COMM credits and 60 credits, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
COMM 332 - Nonverbal Communication

Credits: 3 (NR)
Theory, principles, and methods to analyze nonverbal communication. Emphasizes physical behavior, facial expression, personal space and territoriality, physical appearance, vocal cues, and environment.

Prerequisite(s): 3 COMM credits.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

COMM 335 - Organizational Communication

Credits: 3 (NR)
Theory, practice, and methods to analyze communication in organizations. Emphasizes process and structure, interaction formats, mechanisms for modification, and career paths in organizational communication.

Prerequisite(s): COMM 100, 101, or 301; or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

COMM 340 - Forensics Seminar in Creative Arts

Credits: 1 (RT)
Intensive work in various types of creative forensics events, including rhetorical criticism and informative, persuasive, extemporaneous, after-dinner, and impromptu speaking.

Prerequisite(s): Completion of 60 hours, or 4 hours of COMM 140. Audition required.

Notes: May be taken four times.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 6

COMM 341 - Forensics Seminar in Recreative Arts

Credits: 1 (RT)
Intensive work in various types of recreative forensics events, including dramatic duo, program interpretation, poetry interpretation, dramatic interpretation, and prose interpretation.

Prerequisite(s): Completion of 60 hours, or 4 hours of COMM 141. Audition required.

Notes: May be taken four times.
COMM 342 - Forensics Seminar in Debate: Affirmative Strategies

Credits: 1 (RT)
Work in affirmative research, case construction, and oral presentation directed toward affirmative analysis of intercollegiate debate proposition.

Prerequisite(s): 4 credits of COMM 142, or 60 credits and audition.

Notes: May be taken four times.

COMM 343 - Forensics Seminar in Debate: Negative Strategies

Credits: 1 (RT)
Work in negative research, case attacks, and oral presentation directed toward negative analysis of intercollegiate debate proposition.

Prerequisite(s): 4 credits of COMM 143, or 60 credits and audition.

Notes: May be taken four times.

COMM 344 - Parliamentary Procedure

Credits: 1 (NR)
Procedures of parliamentary law as practiced in voluntary organizations. Practice in leading groups that conduct business according to Roberts Rules of Order, Newly Revised. Brief review of other parliamentary manuals.

Prerequisite(s): 60 credits, or permission of instructor.

COMM 345 - Newspaper Workshop II

Credits: 1 (RT)
Practical experience in writing and editing for student newspaper or other papers.
Prerequisite(s): 3 credits of COMM 145, COMM 351, or permission of instructor

Notes: May be taken three times.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 2

COMM 346 - Yearbook Workshop

Credits: 1 (RT)
Practical experience in promotion, marketing, and sales of video yearbook, or practical experience working on Senior Expressions, a print supplement to the video yearbook.

Notes: May be taken three times.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 2

COMM 347 - Cable TV Programming and Marketing

Credits: 1 (RD)
Practical experience in television programming, promotion, and marketing of a campus television cable network operation.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 2

COMM 348 - Radio Workshop II

Credits: 1 (RT)
Intense practical application of previously acquired skills in production, promotions, advertising, public relations, programming, or news writing for student radio station WGMU.

Prerequisite(s): COMM 148, or permission of instructor.

Notes: May be taken three times.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 3

COMM 350 - Mass Communication and Public Policy

Credits: 3 (NR)
Investigates how matters of public importance are communicated via various mass communication channels. Emphasizes
regulations to minimize influence of mass media on public decision-making, and media manipulation by pressure groups, politicians, and media gatekeepers.

**Prerequisite(s):** COMM 102, 202, or 302; or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**COMM 351 - News Writing and Reporting**

Credits: 3 (NR)  
Experience in actual news gathering. Students write and report for print and online outlets. Numerous in-class and out-of-class writing assignments train students in unique styles of print and online journalism.

**Prerequisite(s):** COMM 303. Prerequisite enforced by registration system.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**COMM 352 - News Editing: Print and Beyond**

Credits: 3 (NR)  
Copy preparation, headline writing, news judging, and layout for various forms of print and electronic formats. Introduces working on news copy desks.

**Prerequisite(s):** COMM 303. Prerequisite enforced by registration system.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**COMM 353 - Broadcast Journalism**

Credits: 3 (NR)  

**Prerequisite(s):** COMM 303. Prerequisite enforced by registration system.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**COMM 354 - Radio Production**
Theory and practice of operational radio broadcasting. Topics include programming, production, and promotion aspects of commercial and noncommercial radio.

Prerequisite(s): COMM 302, or permission of instructor.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 4

COMM 355 - Video Principles and Practices

Credits: 3 (NR)

General introduction to video production including camera, audio, lighting, and editing. Lab work required.

Notes: Lab work required.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 2

COMM 356 - Video: Performance and Writing

Credits: 3 (NR)

Writing for video, performance skills for on-air work, interviewing.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

COMM 358 - Video Producing and Directing

Credits: 3 (NR)

Introduces techniques, theory, and practices in producing and directing including studio and field producing and directing, budget, floor plans, and production material associated with video productions.

Prerequisite(s): COMM 355 with a grade of 2.00 or portfolio assessment.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 4

COMM 359 - Media Management

Credits: 3 (NR)

Principles, practices of media management from general techniques to operation of individual departments within a media
COMM 360 - Video Editing

Credits: 3 (NR)
Focus on advanced techniques in digital editing, software associated with video editing (Final Cut Pro), theories of video editing and necessary skills associated with digital editing.

Prerequisite(s): COMM 355 with a grade of 2.00 or better or portfolio assessment.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 3

COMM 361 - Online Journalism

Credits: 3 (NR)
Focuses on online journalism, research, reporting, web page and weblog creation, and writing for Internet.

Prerequisite(s): COMM 303, or permission of instructor Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

COMM 362 - Argument and Public Policy

Credits: 3 (NR)
Develops argumentative skills while examining contemporary public policy. Applies methods of argumentative analysis to design, implementation of public policy. Students learn by constructing, examining, and using public argument.

Fulfills general education requirement in synthesis.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

COMM 363 - Media Career Seminar

Credits: 1 (NR)
Practicum for students with production experience; students produce a final resume in area of expertise.

Prerequisite(s): Two courses completed in area of media production focus.
COMM 364 - Videography

Credits: 3 (NR)
Focus on camera techniques such as framing, editing within the camera, shot composition, storyboarding, camera angles, video levels, and continuity.

Prerequisite(s): COMM 355 with a grade of 2.00 or better or portfolio assessment.

COMM 365 - Gender, Race, and Class in the Media

Credits: 3 (NR)
Introduces concepts of power, influence of mass media. Allows students to see themselves as products, producers of media influence, and gives sense of the roles in the media or lack thereof, of groups based on their gender, race and/or class.

Prerequisite(s): COMM 302, or permission of instructor.

COMM 366 - Visual Communication

Credits: 3 (NR)
Teaches visual communication theories and applies them to creation of videos, web pages, multimedia production, Computer Based Training (CBT) and other technologies. Covers limits of visual communication in terms of perception, economics, and technology. Partial distance course includes viewing video modules and using electronically mediated discussion.

Prerequisite(s): COMM 355. Prerequisite enforced by registration system.

COMM 370 - Feature Writing

Credits: 3 (NR)
Introduces aspiring journalists to research techniques and critical writing skills needed to produce publishable magazine or newspaper feature stories.

Prerequisite(s): COMM 303. Prerequisite enforced by registration system.
COMM 371 - Sports Writing and Reporting

Credits: 3 (NR)
Experience in actual sports-related news gathering and reporting. Covers writing and reporting on sports-related subjects for print and online media. Numerous in-class and out-of-class writing assignments train students in the unique style of covering sports events, reporting breaking news, and writing feature stories.

Prerequisite(s): COMM 303 or permission of instructor. Prerequisite enforced by registration system.

COMM 372 - Sports and the Media

Credits: 3 (NR)
Examines the role of mass media in constructing images of athletes, sport, and sports culture. Critical attention is given to broadcast, print, and film of sport media. Assesses sociological and cultural issues that shape sport media and culture.

COMM 373 - Business and Economic Journalism

Credits: 3 (NR)
Writing and reporting about business and the economy with focus on understanding financial news and reporting about companies, trade, and markets for print, broadcast, and online media. Students practice through in-class and out-of-class writing assignments.

Prerequisite(s): COMM 303. Prerequisite enforced by registration system.

COMM 374 - Political Journalism

Credits: 3 (NR)
Writing and reporting about politics, elections and campaigns, and the legislative and executive branches of government for print, broadcast, and online media. Students practice the style and substance of covering political news through in-class and out-of-class writing assignments. A unique collaboration with C-SPAN including video conference opportunities with political and media personalities.
**Prerequisite(s):** COMM 303 or permission of instructor. Prerequisite enforced by registration system.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**COMM 375 - Mass Communication Advertising and Promotions**

Credits: 3 (NR)  
History, regulation, and ratings of advertising, as well as media buying, advertising campaigns, and strengths and weaknesses of media vehicles used in advertising.

**Prerequisite(s):** COMM 302, or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**COMM 380 - Media Criticism**

Credits: 3 (NR)  
Examines practical criticism of a wide variety of media texts including television programs, newspapers, articles, films, photographs, and advertisements. Introduces principles of major contemporary modes of analysis for systematically interpreting visual and verbal forms of communication.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**COMM 389 - Public Relations for Associations and Nonprofits**

Credits: 3 (NR)  
Principles of editing and journalism applied to publications, public relations, and advertising needs within corporate environment. Job requirements of editorial positions in public relations, publications, and information as defined by trade associations, nonprofit organizations, and large corporations.

**Prerequisite(s):** 60 credits, or 3 credits of lower-division COMM courses.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**COMM 390 - Issues in Public Relations**

Credits: 3 (NR)  
Focuses on current issues in corporate, government, and nonprofit public relations.
Prerequisite(s): COMM 330.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

COMM 391 - Writing for Public Relations

Credits: 3 (NR)
Focuses on public relations writing including news releases, client memos, broadcasting, speeches, brochures, journals, and advertisements. Includes writing styles, formats, organization, and writing research.

Prerequisite(s): COMM 303.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

COMM 392 - Public Relations Study Abroad

Credits: 3 (NR)
Concentrated survey course in public relations for business, trade associations, nonprofit organizations, and governmental institutions from the perspective of a location abroad. Emphasis placed on the global and intercultural aspects of public relations.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

COMM 398 - Research Practicum in Communication

Credits: 1-3 (RD)
Work individually with a faculty member on a faculty research project. Requires readings in research methods and topic area and a final project.

Prerequisite(s): 60 credits including at least 9 hours of COMM credit toward the major; minimum GPA of 2.5 overall and 3.0 in the major; approval of department.

Notes: Students must submit an application for COMM 398 at least one week prior to the beginning of the semester. May be repeated for a maximum of 6 credits.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 1-12

COMM 399 - Special Topics in Communication

Credits: 1-3 (RT)
Topics vary; some require laboratories.
Prerequisite(s): Permission of instructor.

Notes: May be repeated for credit when topic is different.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

COMM 400 - Research Methods in Communication

Credits: 3 (NR)
Explores applications for primary research methodologies used in communication. Research project with focus on survey, critical ethnographic, or experimental methodologies.

Prerequisite(s): COMM 200 and two of COMM 300, 301, 302, 305 each one with a minimum grade of 2.00 (C). Prerequisite enforced by registration system.

Notes: Students may not receive credit for both COMM 400 and COMM 490.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

COMM 401 - Interpersonal Communication in the Workplace

Credits: 3 (NR)
Comprehensive study of theories and research associated with dynamics of interpersonal relationships in the workplace. Emphasizes individual motivation, interpersonal needs, communication styles, leadership, problem solving, decision making, diversity, interpersonal conflict, individual adaptation to organizational change, and influence of technology on workplace relationships.

Prerequisite(s): COMM 301, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

COMM 411 - Public Relations Practicum

Credits: 3 (NR)
Helps communication majors apply their public relations education. Covers three general areas: public relations theory and applications, writing and editing, and networking/story placement. Includes public relations strategy and tactics, interviewing and analysis, writing and message delivery.

Prerequisite(s): COMM 330.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
COMM 412 - Politics and the Mass Media

Credits: 3 (NR)
Covers responsibilities; freedoms of mass media in a democracy; and media influence on citizens' opinions, elections, and decisions of public officials.

Equivalent to GOVT 412

Prerequisite(s): GOVT 103, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

COMM 420 - Senior Seminar in Theories of Communicative Interaction

Credits: 3 (NR)
Explores primary theories explaining human communicative behavior, including traditional rhetorical, contemporary social science, critical, and mass communication.

Prerequisite(s): 3 credits of 100 or 200-level COMM courses or 60 credits; grade of C or better in COMM 200.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

COMM 425 - Honors Seminar in Communication

Credits: 3 (NR)
Examines foundations, connectedness, and applications of numerous communication theories across the discipline.

Prerequisite(s): Permission of instructor.

Notes: Honors project required.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

COMM 430 - Persuasion

Credits: 3 (NR)
Theories of persuasive communication including traditional and contemporary attitudinal change; relationship among speaker, message, and audience; and relationship between attitudinal and behavioral change.

Prerequisite(s): COMM 230 or permission of instructor.
COMM 431 - Information Technology and the Political Process

Credits: 3 (NR)
Studies impact of information network of wire and wireless communications and computers on political process in advanced industrial countries.

Prerequisite(s): 60 credits or permission of instructor.

COMM 432 - Political Communication

Credits: 3 (NR)
Studies how political communication shapes development of "political reality." Examines interactions between media and politics with respect to the ways communication functions in political settings.

COMM 433 - Environmental Communication

Credits: 3 (NR)
Rhetoric and persuasion about environmental issues in contemporary society. Investigation of case studies in corporate, institutional, and movement attempts to mobilize and cope with ecological concerns. Critical assessment of public communication is emphasized.

COMM 434 - Interviewing

Credits: 3 (NR)
Theory, principles, and practical skills essential to interview process. Emphasizes information gathering, journalistic, persuasive, employment, and performance-appraisal interviews.

Prerequisite(s): 60 credits or permission of instructor

COMM 435 - Computers and Communication
Credits: 3 (NR)
Offers practical application, skill development, and theoretical and critical assessment of computer-mediated communication. Discusses culture and language, functional and dysfunctional communication, social interaction, critical perspectives and ideology, freedom and responsibility, and images of future. Students contract for course assignments within course categories.

Prerequisite(s): 60 credits.

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0

**COMM 440 - Special Occasion Speaking**

Credits: 3 (NR)
Provides students with the opportunities to develop speaking skills for a variety of contexts from eulogies to commencement speeches.

Prerequisite(s): 90+ hours or permission of instructor.

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0

**COMM 450 - Internship in Communication**

Credits: 3 (RD)
On-the-job training in communication through approved field work study programs. Internships arranged and supervised by Department of Communication through internship coordinator. Related class work in resume preparation and job interviewing.

Prerequisite(s): 75 credits, major or minor in communication, electronic journalism or sports communication, 15 credits in COMM for majors, 12 credits for non-COMM majors, and permission of department.

Notes: See department for the application process. May be repeated for a maximum of 6 credits.

**Hours of Lecture or Seminar per week:** 1
**Hours of Lab or Studio per week:** 0
**Grading:** Undergraduate Special

**COMM 451 - Facilitating Communication Education**

Credits: 3 (NR)
Theory and practice in facilitating learning of communication principles and skills. Students work as instructor aides in lower-division classes under supervision of faculty member. Activities include facilitating small-group activities and individually critiquing oral performances.

**Hours of Lecture or Seminar per week:** 1
**Hours of Lab or Studio per week:** 5
**COMM 452 - Media Production Practicum**

Credits: 3 (RD)
Theory and practice in creation, distribution, and response to media productions. Students complete minimum 150 hours of work as assistants to engineers, producers, directors, and organizers of media production facilities on campus, under supervision of faculty members. Activities include working on telecourses, public relations videos, and multimedia projects; aiding in creating in-house productions for departments; and working as cable caster for master control campus operations.

Prerequisite(s): COMM 303, 348, or 355.

Notes: May be repeated for a maximum of 6 credits.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0

**COMM 453 - Electronic News Gathering and Editing**

Credits: 3 (NR)
Teaches advanced journalism skills relevant to online and broadcast-based news programs. Students cover news assignments and shoot and edit into a feature suitable for a webcast or broadcast news program across media platforms.

Prerequisite(s): COMM 303. COMM 353 is recommended but not required.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**COMM 454 - Free Speech and Ethics**

Credits: 3 (NR)
Major issues surrounding roles of speech, press, and electronic media in society. Includes history of free speech and press issues in society, government role in regulating marketplace of ideas, and responsibility of individual in free society.

Fulfills general education requirement in synthesis.

Prerequisite(s): COMM 300, 302; or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**COMM 455 - History of Print Journalism**

Credits: 3 (NR)
Development of print journalism, emphasizing interaction of technology, audience, and government intervention. Topics include birth of press, development of modern newspaper, and American development including Revolutionary and Civil wars, rise of independent press, and yellow journalism.
Equivalent to HIST 455

**Prerequisite(s):** 3 credits in COMM or HIST courses.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**COMM 456 - Comparative Mass Media**

Credits: 3 (NR)
Survey of major foreign mass media systems as they compare with American system. Focuses on broad dimensions of international mass media and describes issues facing global journalism and media systems. Provides substantive framework to critically evaluate various national media systems.

Fulfills general education requirement in global understanding.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**COMM 465 - Topics in Communication and Gender**

Credits: 3 (RT)
Topics may include gender and culture, women as rhetors, male and female communication, and communication and gender roles. Examines specific interests, ideally in seminar setting.

**Notes:** May be repeated for credit when topic is different with permission of department.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**COMM 469 - Structure of the Telecommunications Industry**

Credits: 3 (NR)
Explores complex interrelationships that affect modern telecommunications and how major mergers, acquisitions, regulatory decisions, congressional initiatives, or engineering breakthroughs can profoundly affect telecommunications industry at any given time.

**Prerequisite(s):** 90 credits or permission of instructor.

**Notes:** Serves as capstone seminar in telecommunications minor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**COMM 475 - Journalism Law**
Credits: 3 (NR)  
Examines law as it relates to working journalist. Topics include libel, invasion of privacy, free press and fair trial, First Amendment, broadcast regulation, access to media, advertising, and effect of new technologies on these issues. Uses case approach to study leading court decisions in mass media law.

Prerequisite(s): 60 credits or permission of instructor.

Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0

**COMM 480 - College to Career: Strategies for Transition**

Credits: 1 (NR)  
Designed to assist soon-to-be graduates in the employment transition process. Fundamental to the course are effective communication skills, creative research, and the desire to actively and aggressively seek meaningful employment.

Prerequisite(s): 90+ credits or permission of instructor.

Hours of Lecture or Seminar per week: 1  
Hours of Lab or Studio per week: 1-12

**COMM 490 - Honors Research Methods in Communication**

Credits: 3 (NR)  
Honors version of COMM 400.

Prerequisite(s): Admission to honors in the major.

Notes: Students may not receive credit for both COMM 400 and 490.

Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0

**COMM 491 - Honors Research Project in Communication**

Credits: 3 (RT)  
Completion of independent honors research project under the guidance of the student's faculty sponsor.

Prerequisite(s): Completion of COMM 490 with minimum grade of 3.0 and approval of honors project prospectus.

Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0
COMM 499 - Independent Study in Communication

Credits: 1-3 (RT)
Study of a selected area in communication. Independent study application must be processed before start of semester in which work is to take place.

Prerequisite(s): 75 credits and permission of department.

Notes: May be repeated for credit with permission of director of undergraduate program. Communication courses at the 500 level open to post-baccalaureate students or advanced undergraduates with permission of department.

Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 0

COMM 504 - Communication and Interpersonal Conflict

Credits: 3 (NR)
Focuses on interpersonal interactions, including dyadic and small-group levels in various settings such as friendships, marriage, family, and workplace. Examines factors that generate conflicts and communication strategies and skills that help shape conflict interaction toward productive ends.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

COMM 506 - Communication in International Organizations

Credits: 3 (NR)
Analyzes communication variables as they relate to organizational and managerial functions in international organizations. Topics include developing understanding of how cultural differences influence managerial activities and learning to deal effectively with differences.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

COMM 530 - Theories of Small Group Communication

Credits: 3 (NR)
Advanced-level theory and practice of small group interaction. Examines current research with a focus on learning applications of theories to relevant settings.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
COMM 590 - Seminar in Communication

Credits: 3 (RT)
Intensive study of specific topics; content varies.

Notes: May be repeated for credit when topic is different.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

COMM 600 - Introduction to Graduate Studies

Credits: 3 (NR)
Offers a broad introduction to the field of communication in terms of communication-based theories and research.

Prerequisite(s): Admission to graduate program in communication or permission of graduate program director.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

COMM 601 - Communication in Professional Relationships

Credits: 3 (NR)
Explores theoretical perspectives and relevant research to communication strategies and skills for various professional roles and situations. Relates theoretical foundations to practice, assessing theories and applications in individual professional fields.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

COMM 602 - Theories and Research of Mass Communication

Credits: 3 (NR)
Explores theories that have guided development of mass media. Emphasizes major scientific and humanistic approaches to mass media effects.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

COMM 604 - Communication Research Practicum

Credits: 3 (NR)
Helps communication master's students determine focus for program of study, thesis, and projects. Includes readings in applied communication research and exercises in topic selection, analysis.
Prerequisite(s): COMM 634 or permission of instructor

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

COMM 605 - Intercultural Communication

Credits: 3 (NR)
Analyzes communication variables related to communication across cultures. Topics include nonverbal communication, time conceptualizations, perceptions and attitudes, values, social organization patterns, cultural norms, language, ethics, conflict across cultures, and research in intercultural communication.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

COMM 615 - Political Communication

Credits: 3 (NR)
Analyzes how political communication messages and strategies shape the development of perceptions and behavior in US presidential elections. Examines the interactions between media content and political action in election campaigns.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

COMM 620 - Health Communication

Credits: 3 (NR)
Examines interpersonal communicative processes associated with health in consumer-provider, family, and health communication campaign contexts. Focus on understanding cultural differences in perceptions of/communication about health and disease.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

COMM 630 - Theories of Public Relations

Credits: 3 (NR)
Provides a survey of public relations theories and major ethical issues. Examines ways theories relate to organizations, mass and international communication research, rhetoric, persuasion, and social movements.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
COMM 631 - Approaches to Group Facilitation

Credits: 3 (NR)
Introduces various theoretical and practical approaches to group facilitation with in-depth focus and practice in one approach. Students participate in group sessions, analyze videotapes of decision-making groups, and practice methodologies for facilitating group interaction.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

COMM 634 - Theories of Interpersonal Communication

Credits: 3 (NR)
Analyzes contemporary theories, concepts, and approaches to improving interpersonal communication. Examines interpersonal communication research.

Prerequisite(s): COMM 301 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

COMM 635 - Organizational Communication

Credits: 3 (NR)
Analyzes communication systems, processes in public and private organizations. Topics include conflict management, group decision making, interviewing, technical presentations, and using various channels for improving internal and external communication.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

COMM 636 - Communication Consulting

Credits: 3 (NR)
Investigates theories providing foundation for communication consulting. Provides theoretical information and mechanisms for application necessary to modify communicative behavior within organizations.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

COMM 637 - Risk Communication

Credits: 3 (NR)
Research on sharing information about physical hazards such as toxic waste, radiation, disease, injury, biohazards. Topics include
communication concerning workplace safety, environmental problems, risk assessments, and scientific uncertainties.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

COMM 639 - Science Communication

Credits: 3 (NR)
Reviews research on best practices in science communication for scientists and communication professionals. Explores theory on conceptualizing science communication as disseminating knowledge, promoting informed decision making, involving citizens in scientific research (i.e., citizen science), promoting legislative and individual actions, or creating entertainment. Students practice communicating complex science and designing contexts for public engagement with scientific research.

Prerequisite(s): Graduate Standing.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

COMM 640 - Controversies in Science Communication

Credits: 3 (RD)
Examines the communication implications related to selected current topics of scientific controversy.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

COMM 641 - Communication Competencies for Scientists

Credits: 3 (NR)
Examines the specific oral, written, and mediated communication competencies needed by scientists in modern society.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

COMM 642 - Science and the Public

Credits: 3 (NR)
Examines the relationship between science and society, with a particular emphasis on the role of communication in shaping public opinion on issues related to science and technology.

Prerequisite(s): Graduate standing.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
COMM 644 - Analysis and Criticism of Science Journalism

Credits: 3 (NR)
Examines media coverage of technically complex topics in science, social science, environment, health and medicine, and technology. Explores the influence of institutional media practices on news about science and technology.

Prerequisite(s): Graduate standing.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

COMM 650 - Research Methodologies in Communication

Credits: 3 (NR)
Introduces various research methods used by communication professionals. Focus on achieving understanding and knowledge of social scientific research, qualitative and quantitative, and critical analysis through use and application.

Prerequisite(s): Admission to graduate program in communication or permission of graduate program director.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

COMM 653 - Graduate Communication: Research and Teaching

Credits: 3 (NR)
Investigates theoretical and philosophical implications of communication instruction. Exposes graduate students to principles and practices of teaching college communication courses at upper and lower divisions.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

COMM 655 - Theories of Visual Communication in Telecommunications

Credits: 3 (NR)
Theories of visual communications and how they are used in creating images for web sites, video productions, corporate presentations, virtual reality, computer graphics. Explores problems of fitting messages to various telecommunications media, how target audience perceives the visual image, and aesthetic demands of products imposed by new technologies.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

COMM 660 - Climate Change and Sustainability Communication Campaigns
Credits: 3 (NR)
Offers practical application, skill development, and theoretical basis of communication campaigns developed in response to
global warming and other threats to sustainability. Focuses on purposive campaigns to promote changes in individual behavior
and public policy.

Prerequisite(s): Graduate standing.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

COMM 670 - Social Marketing

Credits: 3 (NR)

Offers conceptual overview of social marketing: marketing methods designed to influence people to behave in ways that benefit
society. Develops skills necessary to conduct a social marketing initiative and provides an opportunity for practical application of
those skills.
Designated a Green Leaf Course.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

COMM 690 - Special Topics in Communication

Credits: 3 (RT)
Explores contemporary issues in communication theory, research, and practice.

Prerequisite(s): Graduate standing.

Notes: Topics vary. May be repeated for a maximum of 15 credits when topic is different.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

COMM 694 - Communication Internship

Credits: 3 (NR)
Students work in approved, professional-level communication position, meeting regularly with internship supervisor from
department. Requires paper, journal, minimum 60 hours work for each credit of enrollment. Students usually enroll in internships
at end of program of study.

Prerequisite(s): 18 graduate credits and permission of department.

Hours of Lecture or Seminar per week: 1-2
Hours of Lab or Studio per week: 0
Grading: Graduate Special
COMM 696 - Directed Readings and Research

Credits: 1-3 (RT)
Reading and research on specific topic under direction of faculty member. Written report required; oral or written exam may be required.

Prerequisite(s): Permission of department.

Notes: May be repeated for a maximum 6 credits.

Hours of Lecture or Seminar per week: 1-12
Hours of Lab or Studio per week: 0
Grading: Graduate Special

COMM 697 - Independent Production

Credits: 1-3 (NR)
Media or creative production activities under direction of faculty member. Requires completed production; written report, oral exam may be required.

Prerequisite(s): Permission of department.

Notes: May be repeated for maximum 6 credits.

Hours of Lecture or Seminar per week: 1-4
Hours of Lab or Studio per week: 0
Grading: Graduate Special

COMM 705 - Intercultural Health and Risk Communication

Credits: 3 (NR)
Examines intercultural health and risk communication interventions; including health communication campaigns, public relations and advertising for health organizations, and how the media and Internet present health information.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

COMM 706 - Strategic Communication

Credits: 3 (NR)
Examines commonalities of strategic communication campaigns across fields (e.g., military, diplomacy, health, politics, marketing, public relations) in order to understand strategic communication, compare fields, and emphasize strategic and evaluative research across fields.
Comm 630 or permission of the instructor.

Comm 720 - Consumer-Provider Health Communication
Credits: 3 (NR)
Explores relational health communication research and practice. Examines the role of interpersonal communication in health care delivery, health promotion, disease prevention, risk communication, and promoting personal and psychosocial well being.

Comm 721 - E-Health Communication
Credits: 3 (NR)
Explores the use of computer-mediated communication technologies in health care and health promotion, including examination of technology in health information dissemination, health education, health communication interventions, and the management of health care delivery.

Comm 725 - Qualitative Methods
Credits: 3 (NR)
Examines qualitative research in communication. Emphasis is placed on techniques of naturalistic inquiry such as observation, interviewing, focus group methods, and ethnography, as well as tools for analyzing and reporting qualitative data.

Comm 735 - Crisis Communication
Credits: 3 (NR)
Examines crisis communication contexts with a particular emphasis on the role of communication in a variety of crises and how the media and Internet present crisis information to the public.
Prerequisite(s): Permission of instructor.
COMM 750 - Research Methods II

Credits: 3 (NR)
Extends basic research knowledge and skills learned in COMM 650 Research Methods I. Students will be taught to analyze and synthesize literature, develop theoretical linkages, and construct measurement scales.

Prerequisite(s): COMM 650.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

COMM 775 - Media Content Analysis

Credits: 3 (NR)
Introduces content analysis, a research technique for making replicable and valid inferences about text in sources such as news articles, advertisements, and television programs. Students design and conduct research using content analysis techniques.

Equivalent to COMM 675 (2012-2013 Catalog).

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

COMM 798 - Communication Studies Project

Credits: 3 (NR)
Final research seminar for all MA in communication students. Students discuss practical and theoretical issues related to project or thesis. Includes readings related to underlying theoretical, methodological, and ethical issues facing contemporary communication researchers and practitioners.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
Grading: Graduate Special

COMM 799 - Master's Thesis

Credits: 1-6 (RD)
Original research endeavor related to student's concentration in communication under supervision of faculty committee.

Prerequisite(s): 24 graduate credits and approval of thesis proposal by faculty committee.

Hours of Lecture or Seminar per week: 1-9
Hours of Lab or Studio per week: 0
Grading: Satisfactory/No credit only
COMM 800 - Studies for the Doctor of Philosophy in Education

Credits: 3-6 (NR)
Program of studies designed by student's discipline director and approved by doctoral committee. Students participate in research activity of discipline director and write paper reporting original contributions.

Notes: May be repeated.

Hours of Lecture or Seminar per week: 3-6
Hours of Lab or Studio per week: 3-6
Grading: Graduate Special

COMM 806 - International Public Relations

Credits: 3 (NR)
Provides a survey of international public relations with an emphasis in three areas: applied knowledge for actual international practice, relevant theory, and ethical issues.

Prerequisite(s): COMM 706 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

COMM 820 - Health Communication Campaigns

Credits: 3 (NR)
Explores use of communication campaigns to promote health and reduce health risks; examines how health communication campaigns are designed, implemented, and evaluated; and describes the role of communication research throughout the campaign process.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

COMM 890 - Special Topics in Communication

Credits: 3 (RD)
Selected topics reflecting specialized areas in communication.

Prerequisite(s): PhD rank or permission of instructor.

Notes: Topics vary. May be repeated for credit when topic is different.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
COMM 896 - Independent Study

Credits: 3 (RD)
Independent reading on a topic agreed on by student and faculty member.

Prerequisite(s): PhD rank or permission of instructor.

Notes: Content varies. May be repeated.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

COMM 998 - Doctoral Dissertation Proposal

Credits: 1-6 (RD)
Development of a research proposal that constitutes the basis for a doctoral dissertation.

Prerequisite(s): Approval of program director.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0
Grading: S/NS

COMM 999 - Doctoral Dissertation Research

Credits: 1-15 (RD)
Research on an approved dissertation topic under the direction of dissertation committee.

Prerequisite(s): Completion of COMM 998.

Notes: May be repeated. No more than 18 credits of COMM 998 and 999 may be applied to doctoral degree requirements.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0
Grading: S/NC

Comparative Literature (CL)

Offered by the College of Humanities and Social Sciences

CL 300 - Introduction to Comparative Literature

Credits: 3 (NR)
Introduces methods of comparative literature through study, in translation, of selected theme or motif as it appears in various periods, genres, or national literatures. Readings drawn from English, American, or European literature; on occasion, non-
Western literature featured.

**Prerequisite(s):** 60 credits.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

## CL 514 - Theories of Comparative Literature

Credits: 3 (NR)  
Intensive study of major theories of comparative literature, with special emphasis on international movements and characteristic themes. Students work with texts in foreign language of their concentration; other texts studied in translation.

**Prerequisite(s):** CL 300 and 90 credits, or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

## Computational and Data Sciences (CDS)

Offered by the College of Science

### CDS 101 - Introduction to Computational and Data Sciences

Credits: 3 (NR)  
Introduction to the use of computers in scientific discovery through simulations and data analysis. Covers historical development and current trends in the field.

Fulfills general education requirement in natural science (lab).

**Prerequisite(s):** Appropriate score on the math placement test.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

### CDS 102 - Introduction to Computational and Data Sciences Lab

Credits: 1 (NR)  
Experiments in computational and data sciences explore the connections between on-going advances in the natural sciences and the rapid advances in computing and data handling. Lab exercises demonstrate the use of computers in analyzing data, in modeling science problems, and in creating numerical simulations across the science disciplines.

Fulfills general education requirement in natural science (lab).

**Prerequisite(s):** CDS 101
Corequisite(s): CDS 101

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 3
When Offered: Fall

CDS 130 - Computing for Scientists

Credits: 3 (NR)
Covers use of computers to solve practical scientific problems. Topics include creating effective scientific presentations, analysis of experimental data, online literature, data/information ethics, scientific modeling, and communication/collaboration tools. Designed to equip students with the knowledge and confidence they need to use future hardware and software systems both as students and throughout their scientific careers.

Fulfills general education requirement in information technology (all).

Prerequisite(s): Passing score on the math placement test for MATH 110 or MATH 113.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CDS 151 - Data Ethics in an Information Society

Credits: 1 (NR)
Examination of ethical issues related to access and use of information and data in the Internet age, for the general student, with special emphasis on ethical issues that apply to the proper use and interpretation of scientific and technical information.

Fulfills general education requirement in information technology (ethics only).

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0

CDS 251 - Introduction to Scientific Programming

Credits: 3 (NR)
Focuses on elements of programming using the Fortran language and selected elements of the C language with emphasis on the aspects used in the computational and data sciences. Conducted through a combination of lecture and interactive computer laboratory.

Equivalent to CDS 351 (2011-2012 Catalog)

Prerequisite(s): CDS 130.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Summer.
CDS 301 - Scientific Information and Data Visualization

Credits: 3 (NR)
The techniques and software used to visualize scientific simulations, complex information, and data visualization for knowledge discovery. Includes examples and exercises to help students develop their understanding of the role visualization plays in computational science and provides a foundation for applications in their careers.

Prerequisite(s): CDS 101 or CDS 130.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CDS 302 - Scientific Data and Databases

Credits: 3 (NR)
Data and databases used by scientists. Includes basics about database organization, queries, and distributed data systems. Student exercises will include queries of existing systems, along with basic design of simple database systems.

Fulfills writing intensive requirement in the major.

Prerequisite(s): CDS 101 or CDS 130; STAT 344 or permission of instructor.

Notes: This course meets the writing-intensive requirement for the CDS Major.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CDS 401 - Scientific Data Mining

Credits: 3 (NR)
Data mining techniques from statistics, machine learning, and visualization to scientific knowledge discovery. Students will be given a set of case studies and projects to test their understanding of this field and provide a foundation for future applications in their careers.

Prerequisite(s): CDS 302.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CDS 410 - Numerical Analysis II

Credits: 3 (NR)
Numerical differentiation and integration, initial-value and boundary-value problems for ordinary differential equations, methods of solution of partial differential equations, iterative methods of solution of nonlinear systems, and approximation theory.
Equivalent to MATH 447

Prerequisite(s): MATH 214 or 216, and 446.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CDS 411 - Modeling and Simulation

Credits: 3 (NR)
Covers the application of modeling and simulation methods to various scientific applications, including fluid dynamics, solid mechanics, materials science, molecular mechanics, and astrophysics. Provides an introduction to modeling and simulation software, as well as high-performance computing.

Prerequisite(s): MATH 446, PHYS 262 or PHYS 245, and a 200- or higher-level computational methods course, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CDS 421 - Introduction to Computational Fluid Dynamics

Credits: 3 (NR)
 Covers the governing equations of fluid dynamics; numerical discretization of the governing equations and popular techniques for solving flow problems; applications of CFD to some classic fluid dynamics problems; and setting up the CFD simulation using a CFD software package. Students will understand the process of developing a geometrical model of the flow, applying appropriate boundary conditions, specifying solution parameters, and visualizing the results. Students are expected to complete several computer projects, including writing their own CFD computer program to analyze simple fluid flow problems, as well as setting up the CFD simulation using a CFD software package.

Prerequisite(s): MATH 446, proficiency in at least one computer programming language and computer operating system, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CDS 461 - N-Body Simulation Methods

Credits: 3 (NR)
Covers particle methods to solve variety of physical systems. Emphasizes study and development of numerical results and visualization of these results in complex physical systems. Applications and projects include stellar and galaxy dynamics, smoothed particle hydrodynamics, plasma simulations, and semiconductor device theory algorithms on parallel and vectorized systems.

Prerequisite(s): MATH 203 MATH 213 CS 211.
CDS 486 - Topics in Computational and Data Sciences

Credits: 3 (RD)
Covers selected topics in computational and data sciences not covered in fixed content courses.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CDS 487 - Electronic Structure Computations

Credits: 3 (NR)
Covers computational aspects of materials science, such as first-principles methods of electronic structure calculations of periodic solids, clusters, and molecules, as well as the use of empirical potentials. Examples will be drawn from metals, insulators, and semiconductors. Students will construct simple codes and be guided in the use of the more sophisticated available computational packages.

Prerequisite(s): PHYS 308 or PHYS 402.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CDS 490 - Directed Study and Research

Credits: 1-3 (RD)
Students work under the guidance of a faculty member on an independent study or directed research project in the computational and data sciences. May be repeated in combination with CDS 491 for a total of 6 credits between the two classes.

Prerequisite(s): Students must be CDS majors or minors in their junior or senior year and have permission of the instructor.

Hours of Lecture or Seminar per week: 1-12
Hours of Lab or Studio per week: 0

CDS 491 - Internship

Credits: 1-3 (RD)
On-the-job experience for CDS majors and minors working in industry and government laboratories, including summer programs. Supervision and approval of this course must be arranged with department before registering. May be repeated in combination with CDS 490 for a total of 6 credits between the two classes.

Prerequisite(s): Students must be CDS majors or minors in their junior or senior year and have permission of the instructor.
Computational Sciences and Informatics (CSI)

Offered by the College of Science

CSI 500 - Computational Science Tools

Credits: 3 (NR)
Introduces computer skills and packages commonly used in quantitative scientific research.

Prerequisite(s): 1 year of college calculus, knowledge of matrix algebra, and computer programming.

Notes: CSI 601 and CSI 602, including additional material, have merged to create CSI 500.

CSI 501 - Introduction to Scientific Programming

Credits: 3 (NR)
Introduces and reviews programming in C and FORTRAN with emphasis on the aspects used in the computational and data sciences. Conducted through a combination of both lecture and interactive computer laboratory.

Prerequisite(s): Permission of instructor

CSI 600 - Quantitative Foundations for Computational Sciences

Credits: 3 (NR)
Accelerated review of mathematical tools for scientific applications and analysis. Topics include vectors and matrices; differential and difference equations; linear systems; Fourier, Laplace, and Z-transforms; and probability theory.

Equivalent to SYST 500

Prerequisite(s): MATH 213 and 214.

Notes: Not applicable to 48-credit course total for CSI PhD.
CSI 615 - Quantum Computation

Credits: 3 (NR)
Introduces field of quantum computation. Emphasizes scientific principles involved and presentation of strengths and weaknesses of approach. Topics include basic quantum physics and quantum algorithms.

Prerequisite(s): Undergraduate course in quantum physics, and undergraduate degree in physical or computer sciences, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CSI 638 - The Policy Process for Scientists

Credits: 2 (NR)
Introduces relationship among government, science, scientists, and issues and processes that shape science policy. Emphasizes examples taken from space weather and meteorology.

Prerequisite(s): Graduate standing.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CSI 639 - Ethics in Scientific Research

Credits: 3 (NR)
Reviews purpose of scientific research and principles for evaluating ethical issues. Teaches skills for survival through training in moral reasoning and responsible conduct. Discusses ethical issues and applying critical-thinking skills to design, execution, and analysis of experiments. Issues include using animals, humans in research; ethical standards in computer community; research fraud; and currently accepted guidelines for data ownership, manuscript preparation, and conduct of those in authority.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CSI 654 - Data and Data Systems in the Physical Sciences

Credits: 3 (NR)
Introduces data issues associated with modern physical sciences. Examines data access, formats, browsing, analysis, visualization, and data information systems in federated environments. Uses examples from physical sciences, including astronomy and space sciences; Earth sciences; Earth observing and other fields of physics; and model output data and associated special issues. Introduces mathematical techniques particularly important for large databases.

Prerequisite(s): Competency in programming at CSI 601-607 level, or permission of instructor.
CSI 655 - Atmospheric Physics I

Credits: 3 (NR)
Introduction to basic physical and chemical processes that operate in the Earth's atmosphere. Emphasis on those concepts that provide a global description of the current atmospheric state and those processes that relate to global change and atmospheric evolution. Topics include equilibrium structure, radiative transfer models, thermodynamics of various atmospheric layers, and the various processes defining these layers.

Equivalent to PHYS 575

Prerequisite(s): PHYS 260, 262, and 305, or equivalent.

CSI 659 - Dispersal Methods of Hazardous Releases

Credits: 3 (NR)
Covers physics of aerosols; engineering, mechanics of building ventilation systems; and mechanical dissemination utilizing handheld, automatic, vehicle, and truck mounted systems. Also discusses basic concepts, theories, and models of pollutant dispersal in atmosphere, and related atmospheric systems affecting dispersal of biological agents.

Prerequisite(s): CSI 655, or permission of instructor.

CSI 660 - Space Instrumentation and Exploration

Credits: 3 (NR)
Surveys instruments, devices, and methods for space and planetary exploration. Covers remote sensing of Earth and other solar system bodies and planned manned and unmanned missions by the United States and other countries.

Equivalent to ASTR 535

Prerequisite(s): PHYS 262, MATH 213, or equivalent; or permission of instructor.

CSI 661 - Stellar Astrophysics
Survey of contemporary astrophysics. Topics include physical concepts, stellar spectra, Hertzsprung-Russell diagram, stellar atmospheres, stellar structure, interstellar matter, stellar evolution, high-energy phenomena, hydrodynamical processes in astrophysics, accretion disk formation, and shock formation.

Equivalent to ASTR 730, ASTR 530 (2010-2011)

**Prerequisite(s):** PHYS 303, 305, 308; MATH 214.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

### CSI 662 - Introduction to Space Weather

Credits: 3 (NR)  
Introduction to space weather involving systems such as the sun, the heliosphere, and the Earth's magnetosphere and ionosphere. Covers the solar magnetic field, solar flares, coronal mass ejections, particle acceleration mechanisms, the solar wind, and the Earth's magnetic field, radiation belt, geomagnetic storms, and ionospheric disturbances.

**Prerequisite(s):** PHYS 303, 305, 307, and MATH 213, or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

### CSI 670 - Economic Systems Design

Credits: 3 (NR)  
Introduces analytical and engineering principles used to develop exchange systems. Covers behavioral aspects of auction systems; matching, assignment, and transportation problems; and information markets. Introduces methods for testbedding systems using experimental economics.

**Prerequisite(s):** Course in linear and nonlinear optimization, and course in linear algebra; or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

### CSI 672 - Statistical Inference

Credits: 3 (NR)  
Covers critical aspects of probability, random variables and distributions, characteristic functions, stochastic convergence, optimal estimation, maximum-likelihood estimation, asymptotic theory, Bayesian methods, likelihood-ratio tests, statistical decision theory, sequential methods.

Equivalent to STAT 652

**Prerequisite(s):** STAT 544 with grade of B- or better, and STAT 554 with grade of B- or better. Prerequisite enforced by registration system.
CSI 674 - Bayesian Inference and Decision Theory

Credits: 3 (NR)
Introduces decision theory and relationship to Bayesian statistical inference. Teaches commonalities, differences between Bayesian and frequentist approaches to statistical inference, how to approach a statistics problem from the Bayesian perspective and how to combine data with informed expert judgment in a sound way to derive useful and policy-relevant conclusions. Teaches necessary theory to develop firm understanding of when and how to apply Bayesian and frequentist methods, and practical procedures for inference, hypothesis testing, and developing statistical models for phenomena. Teaches fundamentals of Bayesian theory of inference, including probability as a representation for degrees of belief, likelihood principle, use of Bayes Rule to revise beliefs based on evidence, conjugate prior distributions for common statistical models, and methods for approximating the posterior distribution. Introduces graphical models for constructing complex probability and decision models from modular components.

Equivalent to STAT 664/SYST 664

Prerequisite(s): STAT 544 or CSI 672, or equivalent.

CSI 676 - Regression Analysis

Credits: 3 (NR)
Simple and multiple linear regression, polynomial regression, general linear models, subset selection, step-wise regression, and model selection. Also covered are multicollinearity, diagnostics, and model building. Both the theory and practice of regression analysis are covered.

Equivalent to STAT 656

Prerequisite(s): STAT 554, matrix algebra and working knowledge of SAS. Prerequisite enforced by registration system.

CSI 678 - Times Series Analysis and Forecasting

Credits: 3 (NR)
Modeling stationary and nonstationary processes; autoregressive, moving average and mixed model processes; hidden periodicity models; properties of models; autocovariance and autocorrelation functions, and partial autocorrelation function; spectral density functions; identification of models; estimation of model parameters, and forecasting techniques.

Equivalent to STAT 658
Prerequisite(s): STAT 544 or CSI 672 or permission of instructor. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CSI 685 - Fundamentals of Materials Science

Credits: 3 (NR)
Covers fundamentals of materials science with emphasis on physical topics including crystal structure and symmetry, dislocation theory, theory of interfaces, multicomponent phase diagrams, theory of phase transformations, nano-materials, metallic glasses. Includes a term project, assignments from current literature, and application of computation in materials science.

Equivalent to PHYS 615

Prerequisite(s): CDS 385/PHYS 385; or undergraduate degree in physics, chemistry, materials, electrical or mechanical engineering or related disciplines; or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CSI 687 - Solid State Physics and Applications

Credits: 3 (NR)
Covers crystal structures, binding, lattice vibrations, free electron model, metals, semiconductors and semiconductor devices, superconductivity, and magnetism.

Equivalent to PHYS 512

Prerequisite(s): PHYS 502 or equivalent.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CSI 700 - Numerical Methods

Credits: 3 (NR)
Covers computational techniques for solving science, engineering problems. Develops algorithms to treat typical problems in applications, emphasizing types of data encountered in practice. Covers theoretical development as well as implementation, efficiency, and accuracy issues in using algorithms and interpreting results. When applicable, uses computer graphical techniques to enhance interpretation.

Equivalent to MATH 685/OR 682

Prerequisite(s): MATH 203 and 214, and some programming experience.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
CSI 701 - Foundations of Computational Science

Credits: 3 (NR)
Covers mapping of mathematical models to computer software, including all aspects of developing scientific software such as architecture, data structures, advanced numerical algorithms, languages, documentation, optimization, validation, verification, and software reuse. Examples in bioinformatics, computational biology, computational physics, and global change demonstrate scientific advances enabled by computation. Class projects involve working in teams to develop software that implements mathematical models, using software to address important scientific questions, and conducting computational experiments with it.

Prerequisite(s): Competency in UNIX and programming at CSI 601-604 level, and CSI 700; or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CSI 702 - High-Performance Computing

Credits: 3 (NR)
Hardware and software associated with high-performance scientific computing. Computer architectures, processor design, programming paradigms, parallel and vector algorithms. Emphasizes importance of software scalability in science problems.

Prerequisite(s): CSI 700 and 701; or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CSI 703 - Scientific and Statistical Visualization

Credits: 3 (NR)
Covers visualization methods used to provide new insights and intuition concerning measurements of natural phenomena and scientific and mathematical models. Presents case studies from myriad disciplines. Topics include human perception and cognition, introduction to graphics laboratory, elements of graphing data, representation of space-time and vector variables, representation of 3-D and higher dimensional data, dynamic graphical methods, and virtual reality. Work on a visualization project required. Emphasizes software tools on Silicon Graphics workstation, but other workstations and software may be used.

Prerequisite(s): STAT 554 or CS 551, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CSI 709 - Topics in Computational Sciences and Informatics

Credits: 3 (RT)
Covers selected topics in computational sciences and informatics not covered in fixed-content computational sciences and
informatics courses.

Prerequisite(s): Admission to PhD program, and permission of instructor.

Notes: May be repeated for credit as needed.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CSI 710 - Scientific Databases

Credits: 3 (NR)
Study of database support for scientific data management. Covers requirements and properties of scientific databases, data models for statistical and scientific databases, semantic and object-oriented modeling of application domains, statistical database query languages and query optimization, advanced logic query languages, and case studies such as the human genome project and Earth-orbiting satellites.

Equivalent to IT 864

Prerequisite(s): INFS 614 or equivalent, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CSI 711 - Chemical Thermodynamics and Kinetics

Credits: 3 (NR)
Advanced study of thermodynamics and kinetics. Covers application of kinetics to elucidation of reaction mechanisms and application of statistical thermodynamics to theory of elementary reaction rates.

Equivalent to CHEM 633

Prerequisite(s): CHEM 331 and 332.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CSI 712 - Introduction to Solid Surfaces

Credits: 3 (NR)
Includes gas absorption isotherms, surface-area measurement techniques, real and clean surfaces, physisorption and chemisorption, methods of gas absorption and desorption, measurement of heats of adsorption, desorption kinetics, electron spectroscopies and their surface sensitivities, instrumentation needed, and principles of vacuum technology.

Equivalent to CHEM 728

Prerequisite(s): CHEM 422 or equivalent. Introduces properties of solid surfaces.
CSI 713 - Quantum Chemistry

Credits: 3 (NR)
Illustrates fundamental concepts of quantum mechanics with applications to chemical systems, including atomic and molecular electronic structure and properties, molecular symmetry, and intermolecular forces.

Equivalent to CHEM 732

Prerequisite(s): CHEM 332.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CSI 714 - Spectroscopy and Structure

Credits: 3 (NR)
Covers quantum mechanics of the interaction of atoms and molecules with electromagnetic radiation. Also covers modern spectroscopic methods as applied to the elucidation of molecular structure and dynamics.

Prerequisite(s): CHEM 332.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CSI 715 - Quantum Complexity Theory

Credits: 3 (NR)
Discusses fundamental aspects of complexity theory and its applications from perspective of quantum physics. Explores current research in emerging field of quantum complexity theory and discusses related issues in quantum algorithms.

Prerequisite(s): CSI 615 or equivalent, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CSI 716 - Quantum Information Theory

Credits: 3 (NR)
Introduces quantum information theory and its practical applications to information processing and secure communications. Emphasizes applications involving commercial and defense systems.
Prerequisite(s): CSI 615, and CSI 783 or 784; or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CSI 717 - Quantum Computer Programming

Credits: 3 (NR)
Covers methods for programming quantum computers. Topics include quantum computing concepts, currently known algorithms for quantum computers, denotational semantics, existing languages for quantum computers, application of logic programming to quantum computers, and programming for different types of novel computer architectures.

Prerequisite(s): CSI 615 or equivalent, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CSI 718 - Quantum Computer Realization

Credits: 3 (NR)
Introduces physical implementation of quantum computation and practical applications to developing scalable quantum computers. Special emphasis on various schemes for achieving practical quantum computers.

Prerequisite(s): CSI 615, and 784 or equivalent; or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CSI 719 - Topics in Computational Chemistry

Credits: 3 (RD)
Covers selected topics in computational chemistry not covered in fixed-content computational chemistry courses.

Prerequisite(s): Permission of instructor.

Notes: May be repeated for credit as needed.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CSI 720 - Fluid Mechanics
Credits: 3 (NR)
Covers basic and advanced fluid mechanics and continuous hypothesis to define fluids. Introduces tensor analysis; Euclidean and Lagrangian representations of fluid flow; Laplace's equation; continuity equation; Navier-Stokes equations; Bernoulli's theorem and Crocco's form of the equations; steady and unsteady flows; potential, incompressible, and compressible flows; gravity and sound waves; gas dynamics; and viscous flows.

Prerequisite(s): CSI 700 and 780; or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CSI 721 - Computational Fluid Dynamics I

Credits: 3 (NR)
Covers fundamentals including spatial and temporal approximation techniques for partial differential equations, solution of large systems of equations, data structures, solvers of the Laplace/ full potential equation, and simple Euler solvers. Includes two major projects: Laplace solver and 2-D Euler solver on unstructured grids. Students expected to write their own codes.

Prerequisite(s): Course in partial differential equations such as MATH 678 or equivalent; knowledge of linear algebra at level of MATH 603 or CSI 740/MATH 625; coding experience in FORTRAN or C; or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CSI 722 - Computational Fluid Dynamics II

Credits: 3 (NR)
Covers more advanced topics in computational fluid dynamics, including high-resolution schemes for hyperbolic PDEs, advanced Euler solvers, Navier-Stokes solvers, grid generation, adaptive mesh refinement, efficient use of supercomputing hardware, and future trends. Projects include topics in grid generation and adaptive refinement. Students expected to write their own codes.

Prerequisite(s): CSI 721 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CSI 723 - Fluid Mechanics II

Credits: 3 (NR)
Covers gas dynamics, shock waves, method of characteristics, boundary layer flows, instabilities, and turbulence modeling. Special topics include biological, non-Newtonian, and free surface flows; aeroelasticity; and magneto-hydrodynamics.

Prerequisite(s): CSI 720 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
CSI 729 - Topics in Continuum Systems

Credits: 3 (NR)
Covers selected topics in the computational aspects of continuum systems not covered in fixed-content courses in dynamical systems. Possible topics are smooth-particle hydrodynamics, radiation hydrodynamics, algorithms for continuum systems, adaptive grids for continuum computations, spectral methods in computational fluid dynamics, algorithms for concurrent machines, formation of high energy particle jets in astrophysical applications, application to Earth atmospheric problems, and flow considerations in molten materials.

Prerequisite(s): Permission of instructor.

Notes: May be repeated for credit as needed.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CSI 739 - Topics in Bioinformatics

Credits: 3 (NR)
Selected topics in bioinformatics not covered in fixed-content bioinformatics courses.

Prerequisite(s): Permission of instructor.

Notes: May be repeated for credit as needed.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CSI 740 - Numerical Linear Algebra

Credits: 3 (NR)
Covers computational methods for matrix systems; theory and development of numerical algorithms for the solution of linear systems of equations, including direct and iterative methods; analysis of sensitivity of system to computer round off; and solution of least squares problems using orthogonal matrices. Also covers computation of eigenvalues and eigenvectors, singular value decomposition, and applications.

Equivalent to MATH 625

Prerequisite(s): MATH 203 and some programming experience.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CSI 742 - The Mathematics of the Finite Element Method
The finite element method is commonly used for developing numerical approximations to problems involving ordinary and partial differential equations. Course develops underlying mathematical foundation, examines specific types of finite elements, analyzes convergence rates and approximation properties, and uses method to solve important equations. Students develop their own codes and are expected to complete independent projects.

Prerequisite(s): MATH 446 or 685, or permission of instructor.

CSI 744 - Linear and Nonlinear Modeling in the Natural Sciences

Credits: 3 (NR)
Develops tools of mathematical modeling while carrying out numerical simulations. Considers examples from across the sciences. Topics include basic issues such as models, simplification, linearity, and nonlinearity; dimensionless parameters; dimensional analysis; models involving differential equations; examples from population growth and chemical kinetics; models involving partial differential equations; diffusion, transport, nonlinearity and shocks; probabilistic modeling; perturbation methods; extrapolation; and introduction to stability.

Prerequisite(s): Permission of instructor.

CSI 746 - Wavelet Theory

Credits: 3 (NR)
Studies theory and computational aspects of wavelets and wavelet transform. Emphasizes computational aspects of wavelets. Defines Fast Wavelet Transform in one and two dimensions and develops appropriate numerical algorithms and theory of wavelet bases on the real line. Covers multiresolution analysis, splines, time-frequency localization, and wavelet packets.

Equivalent to MATH 772

Prerequisite(s): Knowledge of convolution and Fourier transforms of sequences; some familiarity with Hilbert space theory helpful but not required; knowledge of scientific programming language.

CSI 747 - Nonlinear Optimization and Applications

Credits: 3 (NR)
Introduction to practical aspects of nonlinear optimization. Covers applications of optimization algorithms to solving problems in science and engineering. Applications include data analysis, materials science, nanotechnology, mechanics, optical design, shape design, and trajectory optimization.
CSI 749 - Topics in Computational Mathematics

Credits: 3 (NR)
Selected topics in computational mathematics not covered in fixed-content computational mathematics courses.

Prerequisite(s): Permission of instructor.

Notes: May be repeated for credit as needed.

 CSI 750 - Earth Systems and Global Changes

Credits: 3 (NR)
Introduces global system interactions responsible for global environmental change. Discusses natural causes of past and present global changes, and how human activities affect them; and ecological and human consequences of global changes. Topics include climate and hydrological systems, global warming, deforestation, ozone depletion, ecological system dynamics, introduction to climate and global change monitoring, satellite instrumentation and calibration, and model predictions.

Prerequisite(s): Course in ecology, environmental geology, or atmospheric physics; or permission of instructor.

CSI 754 - Earth Science Data and Advanced Data Analysis

Credits: 3 (NR)
Covers accessing and applying Earth observations and remote-sensing data for Earth system science research and applications. Major topics are data formats, analysis and visualization tools, advanced data analysis methods, and data applications. Also covers combining innovative information technology techniques and Earth science data to set up online data centers for accessing data through the web.

Prerequisite(s): GGS 579 or permission of instructor.

CSI 757 - Techniques and Algorithms in Earth Observing and Remote Sensing
Credits: 3 (NR)
Covers retrieval, analysis, and application of geophysical parameters derived from remotely sensed data for Earth system research and applications. Includes theory of visible and infrared and microwave remote sensing, heritage sensors, sensor calibration, retrieval algorithms, validation, and error estimates.

Equivalent to GGS 757

Prerequisite(s): CSI 753 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CSI 758 - Visualization and Modeling of Complex Systems

Credits: 3 (NR)
Covers elements of modeling and analysis of Earth and space sciences data and systems. Concentrates on sample projects and student-initiated projects to use visualization and graphical analysis techniques as they apply to modeling of complex data sets and systems. Uses several different analysis and visualization packages. Spacecraft data sets from the Naval Research Laboratory (NRL) Backgrounds Data Center and other NRL data sets are available for course projects; perusal of web data sets also possible. Modeling and analysis accompanied by appropriate readings from current literature.

Prerequisite(s): Permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CSI 761 - N-Body Methods and Particle Simulations

Credits: 3 (NR)
Covers particle methods to solve variety of physical systems. Emphasizes study and development of numerical results and visualization of these results in complex physical systems. Applications and projects include stellar and galaxy dynamics, smoothed particle hydrodynamics, plasma simulations, and semiconductor device theory algorithms on parallel and vectorized systems.

Equivalent to ASTR 761

Prerequisite(s): PHYS 613, CSI 780 and CSI 700 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CSI 763 - Statistical Methods in Space Sciences

Credits: 3 (NR)
Covers statistical and data analysis methods applicable to problems in space science, remote sensing, and astrophysics. Includes parametric and nonparametric hypothesis testing, parameter estimation, correlation analysis, time series analysis, spatial analysis, and image reconstruction. Emphasizes imperfect nature of actual data sets and hypothesis. Examples drawn from current space
CSI 764 - Computational Astrophysics

Credits: 3 (NR)
Covers statistical mechanics concepts important in astrophysics. Presents unified approach to particle acceleration and interaction theory based on analytical and numerical analysis of Boltzmann and Liouville equations. Discusses computational methods relevant to particle transport problems, with emphasis on Fokker-landau and Monte Carlo solution techniques. Applications from space sciences include studies of cosmic ray acceleration, photon comptonization, particle transport in the near-Earth environment, energy transport in stellar atmospheres, and self-gravitating system dynamics.

Equivalent to ASTR 764

Prerequisite(s): ASTR 530.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CSI 765 - High-Energy and Accretion Astrophysics

Credits: 3 (NR)
Overview of atomic and nuclear physics. Covers nuclear reactions of use to high-energy astrophysics; radiation processes in cosmic plasmas, emphasizing quantum mechanical calculations; stellar evolution and nucleosynthesis; computational models of stellar evolution; binary stars and accretion disks; numerical models of the structure of accretion disks; compact stars, white dwarfs, neutron stars, and black holes; acceleration processes and cosmic rays; interstellar medium and propagation of cosmic rays; high-energy processes in the center of galaxies; and ground- and space-based techniques and observations.

Equivalent to ASTR 765

Prerequisite(s): PHYS 502, ASTR 530, and PHYS 613/CSI 780 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CSI 766 - Relativity and Cosmology

Credits: 3 (NR)
Covers special relativity, four-dimensional space-time, general relativity, non-Euclidean geometries, geodesic and field equations, test of general relativity theory, black holes, cosmic background radiation, thermodynamic considerations in cosmology, and cosmological models.

Equivalent to ASTR 766
Prerequisite(s): ASTR 530 and MATH 314, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CSI 769 - Topics in Space Sciences

Credits: 3 (RD)
Selected topics in space sciences not covered in fixed-content space sciences courses.

Equivalent to ASTR 769

Prerequisite(s): Permission of instructor.

Notes: May be repeated for credit as needed.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CSI 771 - Computational Statistics

Credits: 3 (NR)
Covers basic computationally intensive statistical methods and related methods, which would not be feasible without modern computational resources. Covers nonparametric density estimation including kernel methods, orthogonal series methods and multivariate methods, recursive methods, cross-validation, nonparametric regression, penalized smoothing splines, the jackknife and bootstrapping, computational aspects of exploratory methods including the grand tour, projection pursuit, alternating conditional expectations, and inverse regression methods.

Equivalent to STAT 751

Prerequisite(s): STAT 544, 554, and 652. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CSI 772 - Statistical Learning

Credits: 3 (NR)
Focuses on statistical learning theory by introducing the statistical and optimization background essential for developing new efficient statistical learning algorithms. Also discusses applications of statistical learning algorithms to the solution of important problems in many areas of science.

Equivalent to STAT 772.

Prerequisite(s): STAT 652 / CSI 672, or permission of instructor. Prerequisite enforced by registration system.
CSI 773 - Statistical Graphics and Data Exploration

Credits: 3 (NR)
Exploratory data analysis provides a reliable alternative to classical statistical techniques, which are designed to be the best possible when stringent assumptions apply. Topics include graphical techniques such as scatter plots, box plots, parallel coordinate plots, and other graphical devices; re-expression and transformation of data; influence and leverage; and dimensionality reduction methods such as projection pursuit.

Equivalent to STAT 663

Prerequisite(s): STAT 554, or permission of instructor.

CSI 775 - Graphical Models for Inference and Decision Making

Credits: 3 (NR)
Theory and methods for inference and decision making in environments characterized by uncertain information. Covers graphical probability and decision models. Studies approaches to representing knowledge about uncertain phenomena, and planning and acting under uncertainty. Topics include knowledge engineering, exact and approximate inference in graphical models, learning in graphical models, temporal reasoning, planning, and decision-making. Practical model-building experience provided. Students apply what they learn to a project of their own choosing.

Equivalent to OR 719/STAT 719

Prerequisite(s): STAT 652 or 664, or permission of instructor.

CSI 776 - Stochastic Differential Equations

Credits: 3 (NR)
Introduces modern theory of stochastic calculus. Covers stochastic integrals, martingales, counting processes, diffusion processes, and Ito-type processes in general. Considers applications of these methods to engineering, biology, and economics.

Prerequisite(s): STAT 652, ECE 630 or ECE 632 or permission of instructor.
CSI 777 - Principles of Knowledge Mining

Credits: 3 (NR)
Principles and methods for synthesizing task-oriented knowledge from computer data and prior knowledge and presenting it in human-oriented forms such as symbolic descriptions, natural language-like representations, and graphical forms. Topics include fundamental concepts of knowledge mining; methods for target data generation and optimization; statistical and symbolic approaches; knowledge representation and visualization; and new developments such as inductive databases, knowledge generation languages, and knowledge scouts.

Prerequisite(s): INFS 614 or equivalent, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CSI 779 - Topics in Computational Statistics

Credits: 3 (RT)
Selected topics in computational statistics not covered in fixed-content computational statistics courses.

Prerequisite(s): Permission of instructor.

Notes: May be repeated for credit as needed.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CSI 780 - Computational Physics and Applications

Credits: 3 (NR)
Applies numerical methods to study of variety of physical systems, with emphasis on modeling and simulation. Develops numerical algorithms and simulation codes to gain understanding of mechanisms, processes in physical systems. Includes several projects drawn from such areas as atomic and molecular interactions, molecular dynamics, lattice dynamics, quantum systems, chaos, percolation, random walks, aggregation mechanisms of soft solids, nanomaterials, and nonlinear dynamics.

Equivalent to PHYS 613

Prerequisite(s): PHYS 502; FORTRAN, C, or C++ programming; or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CSI 781 - Plasma Science

Credits: 3 (NR)
Study of ionized matter, theory, and some computation with application to astrophysics, industrial plasma processing, magnetosphere, and ionosphere problems. Vlasov and fluid equations derived and applied in plasma science, including study of
plasmas with and without magnetic fields.

**Prerequisite(s):** PHYS 513 or PHYS 722/CSI 785; PHYS 711/CSI 782/CHEM 730 or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**CSI 782 - Statistical Mechanics for Modeling and Simulation**

Credits: 3 (NR)  
Studies microcanonical, canonical, and grand canonical ensembles and fluctuations, as well as Fermi-Dirac and Bose-Einstein statistics. Modeling of ideal, dilute, and diatomic gases, liquids, and crystals. Also covers Liouville equation and simulation in classical statistical mechanics. Introduces Brownian motion, kinetic theory, and transport processes.

**Prerequisite(s):** CSI 700 or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**CSI 783 - Computational Quantum Mechanics**

Credits: 3 (NR)  
Studies fundamental concepts of quantum mechanics from computational point of view, review of systems with spherically symmetric potentials, many electron atom solutions to Schrodinger's equation, electron spin in many-electron systems, atomic structure calculations, algebra of many-electron calculations, Hartree-Fock self-consistent field method, molecular structure calculations, scattering theory computations, and solid-state computations.

Equivalent to PHYS 736/CHEM 736

**Prerequisite(s):** PHYS 502 and PHYS 613/CSI 780, or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**CSI 786 - Molecular Dynamics Modeling**

Credits: 3 (NR)  
Introduces simulation methods in physical chemistry sciences. Covers computational approaches to modeling molecular and condensed matter systems, including interatomic and molecular potentials, molecular dynamics, time averages, ensemble distributions, numerical sampling, thermodynamic functions, response theory, transport coefficients, and dynamic structure. Includes stochastic simulations such as Brownian motion, Langevin dynamics, Monte Carlo methods and random walks, and introduction to cellular automata.

**Prerequisite(s):** PHYS 613/CSI 780 or CHEM 633/CSI 711, or permission of instructor.
CSI 787 - Computational Materials Science

Credits: 3 (NR)
Covers selected topics in computational aspects of condensed matter, such as methods of electronic structure calculations, surface science, molecular clusters, lattice dynamics, nanomaterials, semiconductors, superconductivity, magnetism, Hubbard model, mesoscopic systems, and liquids.

Prerequisite(s): PHYS 512/CSI 687 and PHYS 736/CSI 783, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CSI 788 - Simulation of Large-Scale Physical Systems

Credits: 3 (NR)
Study of diverse, large-scale physical systems with emphasis on modeling and simulation. Students will undertake several projects which will draw from such areas as many-body dynamics, atmospheric structure and dynamics, high-temperature plasmas, stellar structure, hydro dynamical systems, galactic structure and interactions, and cosmology.

Equivalent to PHYS 728

Prerequisite(s): PHYS 613/CSI 780 and CSI 700 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CSI 789 - Topics in Computational Physics

Credits: 3 (NR)
Selected topics in computational physics not covered in fixed-content computational physics courses.

Equivalent to PHYS 780

Prerequisite(s): Permission of instructor.

Notes: May be repeated for credit as needed.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CSI 796 - Directed Reading and Research
Credits: 1-6 (RD)
Reading and research on specific topic in computational sciences and informatics under direction of faculty member. May be repeated for a total of 6 credits.

Prerequisite(s): Permission of instructor.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0

CSI 798 - Research Project

Credits: 3 (NR)
Project chosen and completed under guidance of graduate faculty member, resulting in acceptable technical report.

Prerequisite(s): 12 graduate credits, and permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CSI 799 - Master's Thesis

Credits: 1-6 (RD)
Project chosen and completed under guidance of graduate faculty member, resulting in acceptable technical report (master's thesis) and oral defense.

Prerequisite(s): 12 graduate credits, and permission of instructor.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0
Grading: Satisfactory/No credit only

CSI 819 - Quantum Information Science Topics

Credits: 3 (RD)
Selected topics in quantum information science not covered in fixed-content computational sciences courses.

Prerequisite(s): Permission of instructor.

Notes: Course may be repeated for credit as needed.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CSI 854 - Hyperspectral Imaging Applications
Credits: 3 (NR)
Includes advanced hyperspectral concepts, multisystems tradeoffs, data collection and processing systems, imaging radar systems, laser systems, data fusion, calibration and data compression techniques, remote sensing and U.S. national policy. Applications include environmental, homeland security, medical, military, disaster mitigation, agricultural, and transportation topics.

Equivalent to GGS 840

**Prerequisite(s):** CSI 753 or equivalent or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**CSI 873 - Computational Learning and Discovery**

Credits: 3 (NR)

Presents modern ideas, theories, and methods for computational learning and discovery, along with relevant applications including medical diagnosis, Earth science data analysis, and neuronal modeling. Includes background elucidation of fundamental concepts in computational learning, addressing discovery of equations, theory of causality, and comparison with biological and cognitive models. Students make presentations on topics of their research interest and work on projects involving state-of-the-art systems.

**Prerequisite(s):** CS 580 or equivalent, or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**CSI 876 - Measure and Linear Spaces**

Credits: 3 (NR)

Covers measure theory and integration, convergence theorems, and the theory of linear spaces and functional analysis, including normed linear spaces, inner product spaces, Banach and Hilbert spaces, Sobolev spaces, and reproducing kernels. Topics include wavelets, applications to stochastic processes, and nonparametric functional inference.

Equivalent to STAT 876

**Prerequisite(s):** IT 776 or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**CSI 877 - Geometric Methods in Statistics**

Credits: 3 (NR)

Develops foundations of geometric methods for statistics. Topics include n-dimension Euclidian geometry; projective geometry; differential geometry, including curves, surfaces, and n-dimensional differentiable manifolds; and computational geometry, including computation of convex hulls, tessellations of two-, three-, and n-dimensional spaces, and finite element grid generation.
Examples include applications to scientific visualization.

Equivalent to STAT 877

Prerequisite(s): STAT 751 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CSI 885 - Atomistic Modeling of Materials

Credits: 3 (NR)
Advanced course focusing on utilization of atomistic modeling and computer simulation techniques to analyze structure of crystalline materials. Introduces modern methodology of largescale atomistic simulations and provides hands-on experience through numerous examples and homework assignments based on simulation packages. Provides background knowledge on theory of lattice defects (point defects, interfaces, dislocations) and thermal and mechanical properties of solid materials (plastic deformation, fracture).

Prerequisite(s): CSI 685, 700, and 786; or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CSI 888 - Topics in Quantum Systems

Credits: 3 (NR)
Selected topics in quantum systems in physics and chemistry not covered in fixed-content courses in quantum mechanics. Possible topics are new spectroscopic methods, density functional theory, energy transfer and fluorescence, nuclear magnetic resonance, Mossbauer spectroscopy, advanced computational considerations in atomic or molecular structure, nuclear scattering theory, quantum considerations in condensed matter problems, and quantum gravity.

Prerequisite(s): PHYS 736/CSI 783 or PHYS 732/CSI 784; or permission of instructor.

Notes: May be repeated for credit as needed.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CSI 898 - Research Colloquium in Computational Sciences and Informatics

Credits: 1 (RT)
Presentations in specific research areas in computational sciences and informatics by faculty and staff members and professional visitors.

Notes: May be repeated for credit, but maximum 3 credits of CSI 898, 899, and 991 may be applied to PhD.

Hours of Lecture or Seminar per week: 1
CSI 899 - Colloquium in Computational Sciences and Informatics

Credits: 1 (RT)
Presentations in specific research areas in computational sciences and informatics by faculty and staff members and professional visitors.

Notes: May be repeated for credit, but maximum 3 credits of CSI 898, 899, and 991 may be applied to PhD.

CSI 909 - Advanced Topics in Computational Sciences and Informatics

Credits: 3 (NR)
Covers selected topics in computational sciences and informatics not covered in fixed-content courses.

Prerequisite(s): Permission of instructor.

Notes: May be repeated for credit as necessary.

CSI 971 - Probability Theory

Credits: 3 (NR)
A rigorous measure-theoretic treatment of probability. Includes expectation, distributions, laws of large numbers and central limit theorems for independent random variables, characteristic function convergence, and Markov chains.

Equivalent to STAT 971

Prerequisite(s): STAT 544 and MATH 315

CSI 972 - Mathematical Statistics I

Credits: 3 (NR)
Focuses on theory of estimation, exploring method of moments, least squares, maximum likelihood, and maximum entropy
methods. Details methods of minimum variance unbiased estimation. Other topics include sufficiency and completeness of statistics, Fisher information, Cramer-Rao bounds, Bhattacharyya bounds, asymptotic consistency and distributions, statistical decision theory, minimax and Bayesian decision rules, and applications to engineering and scientific problems.

Equivalent to STAT 972

**Prerequisite(s):** CSI 672/STAT 652 or equivalent and either CSI 876/IT 876/STAT 876 or IT 971/STAT 971. Prerequisite enforced by registration system.

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0

### CSI 973 - Mathematical Statistics II

Credits: 3 (NR)
Concentrates on theory of hypothesis testing. Topics include characterizing the decision process; simple versus simple hypothesis tests; Neyman Pearson Lemma; and uniformly most powerful, unbiasedness, invariance, randomized, and sequential tests. Applies testing principles to situations in normal distribution family and other families of distributions.

Equivalent to STAT 973

**Prerequisite(s):** CSI 972. Prerequisite enforced by registration system.

**Notes:** Continuation of CSI 972.

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0

### CSI 976 - Statistical Inference for Stochastic Processes

Credits: 3 (NR)
Covers modern theory of parameter estimation and hypothesis testing for stochastic processes, counting processes with random intensities, and solutions to stochastic differential equations driven by martingales. Considers applications to engineering, biology, and economics.

Equivalent to IT 976

**Prerequisite(s):** CSI 776 or permission of instructor.

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0

### CSI 978 - Statistical Analysis of Signals

Credits: 3 (NR)
Advanced course in analysis of discrete- and continuous-time signals using methods of stochastic differential equation and time series. Presumes familiarity with methods of harmonic analysis and times series modeling. Topics include state-space modeling
and eigenvalue processing, nonlinear modeling of signals, non-Gaussian stochastic process structure, detection and estimation of vector-valued signals, robust signal detection, and array processing and target tracking.

Equivalent to IT 978

Prerequisite(s): STAT 544 and 658, or equivalent.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CSI 979 - Advanced Topics in Computational Statistics

Credits: 3 (RD)
Covers selected topics in computational statistics not covered in fixed-content computational statistics courses.

Prerequisite(s): Permission of instructor.

Notes: May be repeated for credit as needed.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CSI 986 - Advanced Topics in Large-Scale Physical Simulation

Credits: 3 (RD)
Covers simulation of physical systems not covered in fixed-content physical simulation courses.

Prerequisite(s): Permission of instructor.

Notes: May be repeated for credit as needed.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CSI 991 - Seminar in Scientific Computing

Credits: 1 (RT)
Considers selected topics in specific area of computational sciences and informatics not covered in fixed-content courses or as extension of fixed-content courses. Format for presentation is seminar with student participation.

Notes: May be repeated for credit, but maximum 3 credits of CSI 898, 899, and 991 may be applied to PhD.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0
Grading: S/NC
CSI 996 - Doctoral Reading and Research

Credits: 1-6 (RD)
Reading and research on specific topic in computational sciences and informatics under direction of faculty member. May be repeated for a total of 6 credits.

Prerequisite(s): Admission to doctoral program, and permission of instructor.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0

CSI 998 - Doctoral Dissertation Proposal

Credits: 1-12 (RT)

Prerequisite(s): Permission of advisor.

Notes: Course may be repeated as needed, but no more than 12 credits of CSI 998 may be applied to doctoral degree.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0
Grading: Satisfactory/No Credit.

CSI 999 - Doctoral Dissertation

Credits: 1-12 (RD)
Involves doctoral dissertation research under direction of dissertation director.

Prerequisite(s): Admission to doctoral candidacy.

Notes: May be repeated as needed, but no more than 24 credits in CSI 998 and 999 may be applied to doctoral degree.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0
Grading: Satisfactory/No Credit

Computational Social Science (CSS)

Offered by the Krasnow Institute for Advanced Study

CSS 600 - Introduction to Computational Social Science
Graduate-level introduction to computational concepts, principles, and modeling approaches in social sciences, emphasizing simulations and elements of complexity theory as they apply to social phenomena. Survey includes systems dynamics, cellular automata, and agent-based models.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

### CSS 605 - Object-Oriented Modeling in Social Science

Credits: 3 (NR)  
Presents and applies concepts and principles from object-based modeling paradigm. Emphasizes Unified Modeling Language (UML) to render structure and operation of complex social systems and processes.

**Prerequisite(s):** CSS 600, or approval by instructor and program director  
**Corequisite(s):** CSS 600, or approval by instructor and program director

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

### CSS 610 - Computational Analysis of Social Complexity

Credits: 3 (NR)  
Provides hands-on examination of agent-based models in social sciences by examining and experimenting with variety of social-simulation projects conducted in modeling environments such as Swarm, Repast, Ascape, and MASON (Multi-Agent Simulator of Networks and Neighborhoods).

**Prerequisite(s):** CSS 600, or permission of instructor  
**Corequisite(s):** CSS 600, or permission of instructor

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

### CSS 620 - Origins of Social Complexity

Credits: 3 (NR)  
Examines when, where, and how social complexity emerged in human societies, emphasizing long-term analysis and comparative information processing in four civilizations of the ancient world: West Asia, East Asia, Andean Peru, and Mesoamerica.

**Prerequisite(s):** CSS 600 or permission of instructor

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0
CSS 625 - Complexity Theory in the Social Sciences

Credits: 3 (NR)
Examines social phenomena including language, terrorism, the Internet, warfare, and wealth based on power laws and far-from equilibrium nonlinear dynamics. Emphasizes data analysis, and modeling and interpreting complexity-theoretic dynamics.

Prerequisite(s): CSS 600

Corequisite(s): CSS 600

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CSS 630 - Comparative Computational Social Science

Credits: 3 (NR)
Applies comparative method for analyzing different types of computational models in the social sciences. Strong crossdomain and interdisciplinary emphasis akin to comparative economic systems, government, or linguistics.

Prerequisite(s): CSS 600, or permission of instructor

Corequisite(s): CSS 600, or permission of instructor

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CSS 635 - Cognitive Foundations of Computational Social Science

Credits: 3 (NR)
Examines cognitive foundations and information processing in computational social agents and compares to human cognitive phenomena, including emotions, trust, and reciprocity. Emphasizes modeling project.

Prerequisite(s): CSS 600 and 610, or permission of instructor

Corequisite(s): CSS 600 and 610, or permission of instructor

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CSS 640 - Human and Social Evolutionary Complexity

Credits: 3 (NR)
Examines long-term evolution of human and societal complexity from global and cross-cultural perspective with emphasis on computational aspects leading to today's globalization. Global history from the computational social science perspective.
CSS 643 - Land-Use Modeling Techniques and Applications

Credits: 3 (NR)
Survey of literature on spatially explicit empirical models of land-use change. Hands-on experience developing and running simple models. Techniques include statistical models, mathematical programming models, cellular automata, agent-based models, and integrated models.

Prerequisite(s): CSS 600 or permission of instructor

Corequisite(s): CSS 600 or permission of instructor

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CSS 645 - Spatial Agent-Based Models of Human-Environment Interactions

Credits: 3 (NR)
Discusses key challenges in spatial modeling of human-environment interactions. Reviews agent-based modeling applications in urban and rural interactions, agriculture, forestry, and other areas. Hand-on development of simple ABM models. Investigates linkages between GIS and ABM.

Prerequisite(s): GGS 631 or CSS 600, or permission of instructor

Corequisite(s): GGS 631 or CSS 600, or permission of instructor

Notes: CSS 600 may be taken concurrently.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CSS 650 - Physics Methods for Analyzing Social Complexity

Credits: 3 (NR)
Surveys complexity theoretic tools including strange attractors, Ising models, correlation functions, ergodic theory, power spectra, meanfield theory, and renormalization group. Emphasizes application to social, economic, or political systems.

Prerequisite(s): CSS 600, and permission of instructor

Corequisite(s): CSS 600, and permission of instructor
CSS 655 - Social Systems Dynamics

Credits: 3 (NR)
Introduces systems dynamics modeling of social systems governed by levels/rates or stocks/flows processes, with applications to global modeling, terrorism, urban dynamics, organizations, and social and international conflict.

Prerequisite(s): CSS 600
Corequisite(s): CSS 600

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CSS 660 - Computational Social Science of Spacefaring Civilization

Credits: 3 (NR)
Focuses on goals, resources, history, and modeling issues concerning human and social dimensions of space program using CSS.
Design and development of socially viable human communities in extreme environments.

Prerequisite(s): CSS 600 and 610, and permission of instructor
Corequisite(s): CSS 600 and 610, and permission of instructor

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CSS 692 - Social Network Analysis

Credits: 3 (NR)
Methods and applications that examine complex social systems based on relations, structures, connectivity, matrix representations, location, roles, interactions, and other network properties. Applications to terrorism, cognition, organizations, and other social phenomena.

Prerequisite(s): CSS 600
Corequisite(s): CSS 600

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CSS 739 - Topics in Computational Social Science
Selected topics in computational social science not covered in fixed-content computational social science courses.

Prerequisite(s): Permission of instructor.

Notes: May be repeated for credit as needed.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CSS 796 - Directed Reading and Research

Credits: 3 (RD)
Reading and research on specific topic in computational social science under direction of a faculty member.

Prerequisite(s): Permission of instructor.

Notes: May be repeated as necessary.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CSS 798 - Research Project

Credits: 3 (RD)
Project chosen and completed under guidance of graduate faculty member, resulting in acceptable technical report.

Prerequisite(s): 12 graduate credits from core requirements, and permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
Grading: Graduate Special

CSS 898 - Research Colloquium in Computational Social Science

Credits: 1 (RD)
Presentations in specific research areas in computational social science by Center for Social Complexity-associated faculty and professional visitors.

Notes: May be repeated for credit, but maximum 3 credits of CSS 898 and 899 may be applied toward PhD.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0
Grading: Satisfactory/No credit only
CSS 899 - Colloquium in Computational Social Science

Credits: 1 (RD)
Presentations in variety of areas of computational social science by Center for Social Complexity-associated faculty and professional visitors.

Notes: May be repeated for credit, but maximum 3 credits of CSS 898 and 899 may be applied toward PhD.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0

CSS 909 - Advanced Topics in Computational Social Science

Credits: 3 (RD)
Covers selected topics in computational social science and socioinformatics not covered in fixed-content courses.

Prerequisite(s): Permission of instructor.

Notes: May be repeated for credit as necessary.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CSS 996 - Doctoral Reading and Research

Credits: 1-12 (RD)
Reading and research on specific topic in computational social science under direction of faculty member.

Prerequisite(s): Admission to doctoral program, and permission of instructor.

Notes: May be repeated as necessary.

Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 0

CSS 998 - Doctoral Dissertation Proposal

Credits: 1-12 (RD)
Covers development of research proposal, which forms basis for doctoral dissertation, under guidance of dissertation director and doctoral committee.

Prerequisite(s): Permission of advisor.

Notes: Candidates must complete a combined minimum of 12 credits of doctoral proposal (CSS 998) and doctoral dissertation research (CSS 999), of which at least three credits must be of CSS 999. A combined maximum of 24 credits of CSS 998 and CSS 999 may be applied to the degree.
CSS 999 - Doctoral Dissertation

Credits: 1-12 (RD)
Doctoral dissertation research under direction of dissertation director.

Prerequisite(s): Approval of dissertation proposal.

Notes: Candidates must complete a combined minimum of 12 credits of doctoral proposal (CSS 998) and doctoral dissertation research (CSS 999), of which at least three credits must be of CSS 999. A combined maximum of 24 credits of CSS 998 and CSS 999 may be applied to the degree.

Computer Forensics (CFRS)

Offered by the Volgenau School of Engineering

CFRS 500 - Introduction to Forensic Technology and Analysis

Credits: 3 (NR)
Presents an overview of technologies of interest to forensics examiners. It will provide an introduction to, software, hardware, analysis, and other aspects required for forensic examinations.

Prerequisite(s): Graduate standing.

When Offered: Fall, Spring

CFRS 510 - Digital Forensics Analysis

Credits: 3 (NR)
Explains computer forensics crime scene procedures, beginning with initial walk-through and evaluation; identification and collection of potential evidence; preparation of intrusion investigation; aspects of working with investigators and attorneys; reverse engineering with file identification and profiling; application of critical thinking in determination of significance of artifacts; and analysis and reporting of evidence.
Prerequisite(s): Graduate standing or permission of instructor

Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring, Summer

CFRS 590 - Special Topics in Computer Forensics

Credits: 3 (RD)
Provides selected topics from recent developments and applications in various computer forensics disciplines. Helps the professional computer forensics community keep abreast of current developments, and provides an applications-oriented introduction to emerging areas of computer forensics.

Prerequisite(s): Graduate standing or permission from department.

Notes: Repeatable for credit within the degree.

Hours of Lecture or Seminar per week: 1-12
Hours of Lab or Studio per week: 0

CFRS 660 - Network Forensics

Credits: 3 (NR)
Deals with the collection, preservation, and analysis of network-generated digital evidence such that the evidence can be successfully presented in a court of law (both civil and criminal). The relevant federal laws will be examined as well as private sector applications. The capture/intercept of digital evidence, the analysis of audit trails, the recording of running processes, and the reporting of such information will be examined.

Equivalent to TCOM 660

Prerequisite(s): TCOM 509 and TCOM 529 and a working knowledge of computer programming.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CFRS 661 - Digital Media Forensics

Credits: 3 (NR)
Covers the collection, preservation, and analysis of digital media such that the evidence can be successfully presented in a court of law (both civil and criminal). The relevant federal laws and private sector applications will be examined, as well as the seizure, preservation, and analysis of digital media.

Equivalent to TCOM 661

Prerequisite(s): CFRS 500 and a working knowledge of computer operating systems (e.g. CS 471, IT 342, or equivalent).
CFRS 663 - Operations of Intrusion Detection for Forensics

Credits: 3 (NR)
Introduces students to network and computer intrusion detection and its relation to forensics. Addresses intrusion detection architecture, system types, packet analysis, and products. Presents advanced intrusion detection topics such as intrusion prevention and active response, decoy systems, alert correlation, data mining, and proactive forensics.

Equivalent to TCOM 663

Prerequisite(s): TCOM 509 and TCOM 529 and a working knowledge of computer programming.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CFRS 664 - Incident Response Forensics

Credits: 3 (NR)
Addresses incident detection, response, and those aspects of computer forensics pertinent to the investigation of trade secret theft, economic espionage, copyright infringement, piracy, and fraud. Procedures for gathering, preserving, and analyzing forensic evidence are discussed in detail and are applied to both computer and network incident response forensics.

Equivalent to TCOM 664

Prerequisite(s): TCOM 509 and TCOM 529.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CFRS 698 - Independent Reading and Research

Credits: 1-3 (RD)
Studies selected area in computer forensics under the supervision of a faculty member. A written report is required.

Prerequisite(s): Graduate standing; completion of at least two core courses in the CFRS program; and permission of instructor

Notes: No more than a total of six credits may be taken from a combination of CFRS 698 and CFRS 798 for credit within the CFRS program.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring, Summer
CFRS 760 - Legal and Ethical Issues in IT

Credits: 3 (NR)
Presents legal and ethics topics in the context of computer forensics. Includes legal principles, types of crimes, witness testimony, and forensics report writing.

Prerequisite(s): CFRS 500

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CFRS 761 - Malware Reverse Engineering

Credits: 3 (NR)
Reviews disassembled code for potentially malicious binary, or piece of malware, in order to gain a better understanding of how a binary functions when executed. Analyzes behavioral aspects as they are executed in a controlled environment. Environment changes (file, system, network, process, etc.), network communications, communications with remote devices, and so on, are closely observed for actionable information.

Prerequisite(s): CFRS 500 or ISA 564.

Notes: Course will consist of exercises conducted in a lab environment with concurrent lectures (combined total of 3 credits for lab and lecture exercises).

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring.

CFRS 762 - Mobile Device Forensics

Credits: 3 (NR)
Reviews forensic evidence contained within mobile devices, including address books, call logs, text messages, video files, audio files, and Internet history. Discusses procedures and technologies associated with mobile devices and how such procedures differ from traditional computer forensics. Analyzes collected data and correlates information with data from carriers. Hands-on exercises included.

Prerequisite(s): CFRS 500, CFRS 661.

Notes: Course will consist of exercises conducted in a lab environment with concurrent lectures (combined total of 3 credits for lab and lecture exercises).

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring.

CFRS 763 - Registry Forensics - Windows
Credits: 3 (NR)
Presents the concepts, tools, and techniques used for forensic collection, identification, and analysis of the Windows registry; review the structure and layout of the Windows registry and be introduced to the types of artifacts that can be found within; evaluate and interpret data from the Windows registry with emphasis on hand-on exercises.

Prerequisite(s): CFRS 500, CFRS 661.

Notes: Course will consist of exercises conducted in a lab environment with concurrent lectures (combined total of 3 credits for lab and lecture exercises).

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

CFRS 764 - Mac Forensics

Credits: 3 (NR)
Presents the basic tools and techniques used to conduct a Mac and iOS forensic analysis. Application of industry best practices to both the collection and subsequent analysis of Mac iOS systems with an emphasis on hands-on exercises using currently available open-source and commercial tools.

Prerequisite(s): CFRS 500, CFRS 661.

Notes: Course will consist of exercises conducted in a lab environment with concurrent lectures (combined total of 3 credits for lab and lecture exercises).

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

CFRS 767 - Penetration Testing in Computer Forensics

Credits: 3 (NR)
Presents the concepts, tools, and techniques used for penetration testing, vulnerability exploitation, assessment, reporting, and forensics; teaches multiple attack vectors as well as the defensive measures protecting against such attacks; focuses heavily on post attack forensics allowing for a complete picture of the attack process.

Prerequisite(s): CFRS 660, CFRS 663.

Notes: Course will consist of exercises conducted in a lab environment with concurrent lectures (combined total of 3 credits for lab and lecture exercises).

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

CFRS 770 - Fraud and Forensics in Accounting
Prepares students to undertake forensic accounting, a specialty practice area of accounting, in order to develop the necessary expertise to be prepared to give expert evidence in any resultant trial.

**Prerequisite(s):** CFRS 500

**CFRS 780 - Advanced Topics in Computer Forensics**

Credits: 3 (RT)
Teaches advanced topics from recent developments and applications in various areas of computer forensics. Enhances the professional engineering community's understanding of breakthrough developments in specific areas of computer forensics. Active participation of the students is encouraged in the form of writing and presenting papers in various research areas of the advanced topic.

**Prerequisite(s):** Permission of instructor

**CFRS 790 - Advanced Computer Forensics**

Credits: 3 (NR)
Capstone course for the MS in computer forensics program. Students will be exposed to case studies and be required to conduct computer forensic investigations of digital media, intercepted packet switched data, and multisource log information to successfully complete each case study.

**Prerequisite(s):** CFRS 660, CFRS 661, and CFRS 663; minimum of 18 credits completed in the MS in Computer Forensics Program prior to registration.

**Notes:** To be taken in the last year prior to the completion of degree requirement.

**CFRS 798 - Research Project**

Credits: 1-3 (RD)
Conduct a research project to be chosen and completed under guidance of a graduate faculty member that results in an acceptable technical report.

**Prerequisite(s):** Graduate standing; completion of at least two core courses and a minimum of 12 credits in the CFRS program; permission of instructor.

**Notes:** No more than a total of six credits may be taken from a combination of CFRS 698 and CFRS 798 for credit within the
Computer Game Design (GAME)

Offered by the College of Visual and Performing Arts

GAME 101 - Introduction to Game Design

Credits: 3 (NR)
Introductory overview of the game development process with an emphasis on game design. Through detailed study of historical and current games, students will learn the language and structure needed to develop their own game ideas. Students will learn the many aspects of a game development team and how each of these roles contributes to a game's overall design.

Fulfills general education requirement in arts.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

GAME 210 - Basic Game Design

Credits: 3 (NR)
Introduction to computer game design and development including a brief history of the field and current industry practice and production. Current major game design software, hardware, and associated tools are explored through simple game design projects.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GAME 230 - History of Computer Game Design

Credits: 3 (NR)
History of computer game design including games as a new medium for education, entertainment, and communications. Aspects of the business of computer game publishing, game criticism, storytelling, interactive fiction, violence, and virtual communities will be explored.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
GAME 231 - Computer Animation for Games

Credits: 3 (NR)
2D and 3D modeling, character design, and animation projects are constructed using commercial and proprietary software and game design tool kits and engines. Simple texturing and models rigging for game animation will be discussed.

Prerequisite(s): GAME 210 and GAME 230.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GAME 232 - Online and Mobile Gaming

Credits: 3 (NR)
Class covers the history, practice, and design of online and mobile games. Class will discuss the current state of the smartphone applications and study the best practices to be successful in the applications market. Students will learn the development process for smartphone applications and develop original and innovative applications in a team-based environment.

Prerequisite(s): GAME 210 and GAME 230.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GAME 250 - Music for Film and Video

Credits: 3 (NR)
Selection, editing, processing, and integration of sounds and music (post-production) for film, video, and animation. Time, frequency, and amplitude domain digital post-production techniques will be studied.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GAME 300 - Portfolio Preparation

Credits: 1 (NR)
Student creates and refines a web portfolio to utilize throughout the course of study in presenting projects to aid in internship application and professional development.

Notes: Must have passed GAME 231 and GAME 232 with a C or better.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring
GAME 310 - Game Design Studio

Credits: 3 (NR)
Studio course that focuses on team-based game design. In collaboration with undergraduate students from VSITE's CS game design concentration, student teams design and develop complete computer-based and online serious and/or entertainment games.

Prerequisite(s): GAME 231 and GAME 232.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GAME 330 - Computer Game Platform Analysis

Credits: 3 (NR)
Current and prototype consumer gaming platforms and consoles. Analysis will include conversion, transposition, and porting game media among most commercially produced platforms for analysis and comparisons.

Prerequisite(s): GAME 310 and CS 112.

Corequisite(s): GAME 331.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GAME 331 - Consumer Gaming Platform Analysis Lab

Credits: 1 (NR)
Current and prototype consumer gaming platforms and consoles. Analysis will include conversion, transposition, and porting game media among most commercially produced platforms for analysis and comparisons.

Prerequisite(s): GAME 310 and CS 112.

Corequisite(s): GAME 330.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0
When Offered: Fall

GAME 332 - Story Design for Computer Games

Credits: 3 (NR)
Use of narrative structure and new media for designing computer game scenarios and stories. Traditional narrative techniques (text stories, novels, films) will be examined, as well as translations of the traditional to interactive, non-linear modes of communications. Analysis of current computer game story design theories, philosophies, and techniques will be covered.

Fulfills writing intensive requirement in the major.
Designated as a research and scholarship intensive course.

Prerequisite(s): Completion of 30 credits within major or permission of the instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GAME 367 - Writing and Editing Music and Sound

Credits: 3 (NR)
Composition, editing, processing, and integration of voice, environmental sounds and music into non-linear computer game environments. Special emphasis will be placed on HD sound and music post-production and mixing (3 & 5 transducer point listening spaces), sequential composition and sample-splicing techniques, and the study of competing compression algorithms for sound and music.

Prerequisite(s): GAME 250 Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GAME 398 - Advanced Game Design Animation

Credits: 3 (NR)
Advanced 2D and 3D animation projects for interactive game scenes and scenarios are built using commercial and proprietary software and game design tool kits. Advanced texturing, rigging, lighting, and perspective manipulation will be covered.

Prerequisite(s): GAME 231 Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GAME 399 - Special Topics

Credits: 1-4 (RT)
In-depth presentation and exploration of topical studies in computer game design. Subject matter varies.

Notes: May be repeated for a maximum of 12 credits when taken under different topics.

Hours of Lecture or Seminar per week: 1-4
Hours of Lab or Studio per week: 0

GAME 400 - Game Design Practicum
Credits: 3 (NR)
Studio/lecture course focuses on the design strengths and weaknesses inherent in current entertainment and serious games. UI
design, level design and map structure, scoring stratum, on-line support, game ecologies, gaming communities, and
designing/writing documentation and specifications will be studied.

**Prerequisite(s):** GAME 330, 367 or 398. Must be a Computer Game Design minor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Spring

### GAME 410 - Advanced Game Design Studio

Credits: 3 (NR)  
In collaboration with undergraduate students from VSITE's CS game design concentration, student teams design and develop complete computer-based and online serious and entertainment games.

**Prerequisite(s):** GAME 310, GAME 330 and GAME 331.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

### GAME 489 - Pre-Internship Seminar

Credits: 1 (NR)  
Student prepares for interview and application processes associated with securing an internship, finishing the course with a professional resume and portfolio ready for submission to potential employers.

**Hours of Lecture or Seminar per week:** 1  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall, Summer, Spring.

### GAME 490 - Senior Project

Credits: 2-6 (RD)  
Student develops a case study of a publicly or commercially published computer game exploring the technical, economic, ethical, social and political ramifications on its intended target market. A public lecture of the case study is required.

Fulfills general education requirement in synthesis.

**Prerequisite(s):** Completion of 60 credits in major. Students must be granted permission by the program director to take the course.

**Notes:** Restricted to GAME majors. Students must be granted permission by the program director to take the course. Students are required to complete 6 credits for the degree program.

**Hours of Lecture or Seminar per week:** 2-6
GAME 491 - Internship

Credits: 3-4 (RD)
Placement in an appropriate internship within a program approved by a federal, state or commercial game design/publishing agency or firm.

Prerequisite(s): GAME 489 and completion of 60 credits in major.

Notes: 135 hours of internship on-site work must be completed for 3 credits. 180 hours of internship on-site work must be complete for 4 credits.

GAME 492 - Independent Study

Credits: 1-6 (RD)
Advanced research, computer game design, or exploration of topical studies in computer game design.

Notes: May be repeated for a maximum of 12 credits

Computer Science (CS)

Offered by the Volgenau School of Engineering.

Students may attempt an undergraduate course taught by the Volgenau School of Engineering twice. A third attempt requires approval of the department offering the course.

CS 101 - Preview of Computer Science

Credits: 2 (NR)
Offers a broad overview of computer science designed to provide students with an introduction to the and an orientation to the department and the computing environment at the university. Includes a project to introduce problem solving using computers.

Corequisite(s): CS 112.

Notes: All computer science majors are required to take this course within their first year.

Hours of Lecture or Seminar per week: 2
CS 105 - Computer Ethics and Society

Credits: 1 (NR)
Intensive introduction to legal, social, and ethical issues surrounding software development and computer use. Stresses professional conduct, social responsibility, and rigorous standards for software testing and reliability. Examines issues such as liability, ownership of information, and computer crime.

Fulfills general education requirement in information technology (ethics only).

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0

CS 112 - Introduction to Computer Programming

Credits: 4 (NR)
Introduces the use of computer programming as a problem-solving tool. Topics in procedural programming include expressions, control structures, simple data types, input/output, graphical interfaces, testing, debugging, and programming environments.

Fulfills general education requirement in information technology (all except ethics).

Prerequisite(s): C or better in MATH 104 or MATH 105 or specified score on math placement test, or MATH 113 with a C or better. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 1

CS 123 - Computing: From the Abacus to the Web

Credits: 3 (NR)
Discusses the underlying computer science concepts behind existing and emerging technologies (such as e-mail, the Internet, search engines, blogs, computer games, and robotics). Historical, social, and technical issues related to each topic will be discussed.

Notes: Students may not take this course for credit once they have successfully completed CS 211. Intended for nonmajors.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CS 211 - Object-Oriented Programming
Credits: 3 (NR)
Focuses on problem solving, testing, and debugging; and introduces object-oriented programming. Topics include classes, inheritance, packages, collections, exceptions, and polymorphism. Examples in the course may include the use of basic data structures.

Prerequisite(s): Grade of C or better in CS 112. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 1

CS 222 - Computer Programming for Engineers

Credits: 3 (NR)
Introduces object-oriented programming and elementary data structures. Emphasis on problems and language features relevant to engineers.

Prerequisite(s): Grade of C or better in CS 112. Prerequisite enforced by registration system.

Notes: Intended as terminal course in computer programming.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CS 225 - Culture and Theory of Games

Credits: 3 (NR)
Explores the theory, history, culture, and lore of games with particular emphasis on the varieties of computer game environments.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CS 261 - Introduction to a Second Language

Credits: 1 (NR)
Advanced programming using Java programming language. Other languages may be offered at times.

Prerequisite(s): Grade of C or better in CS 211.

Notes: Not available for credit for CS majors.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0

CS 262 - Introduction to Low-Level Programming
Introduction to the language C, as well as operating system concepts, in UNIX, to prepare students for topics in systems programming.

Prerequisite(s): Grade of C or better in CS 211 or CS 222. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0

CS 306 - Synthesis of Ethics and Law for the Computing Professional

Credits: 3 (NR)
Practical course to become effective computer professional. Examines legal and ethical issues surrounding computer technology and its use, as well as the foundation building that is necessary to deal with those challenges. Applies philosophical bases for ethical decision making to modern concerns raised by computers and technology. Addresses topics covered by CS 105 in a more intensive manner and focuses on the emerging legal and ethical issues involved in e-commerce and widespread use of the Internet.

Fulfills general education requirement in synthesis.

Fulfills writing intensive requirement in the major.

Prerequisite(s): CS 105, junior standing (at least 60 credit hours). Prerequisite enforced by registration system.

Corequisite(s): All required general education courses.

Notes: Computer science majors may use this course to satisfy the general education synthesis requirement, so long as they have not previously taken CS 305 for credit.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CS 310 - Data Structures

Credits: 3 (NR)
Focuses on object-oriented programming with an emphasis on tools and techniques for developing moderate to large programs. Topics include use and implementation of linear and nonlinear data structures and the design and analysis of elementary algorithms.

Prerequisite(s): Grade of C or better in CS 211 and MATH 113. Prerequisite enforced by registration system.

Corequisite(s): CS 105.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CS 321 - Software Requirements and Design Modeling
An introduction to concepts, methods, and tools for the creation of large-scale software systems. Methods, tools, notations, and validation techniques to analyze, specify, prototype, and maintain software requirements. Introduction to object-oriented requirements modeling, including use of case modeling, static modeling, and dynamic modeling using the Unified Modeling Language (UML) notation. Concepts and methods for the design of large-scale software systems. Fundamental design concepts and design notations are introduced. A study of object-oriented analysis and design modeling using the UML notation. Students participate in a group project on software requirements, specification, and object-oriented software design.

Fulfills writing intensive requirement in the major.

Equivalent to SWE 321 (2011-2012 Catalog); CS 421 (2010-2011 Catalog)

Prerequisite(s): Grade of C or better in CS 211. Students who have received credit for CS 421 or SWE 421 may not take CS 321. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CS 325 - Introduction to Game Design

Credits: 3 (NR)
Game design, in various electronic entertainment technologies, involves a diverse set of skills and backgrounds from narrative and art to computer programming. Surveys the technical aspects of the field, with an emphasis on programming.

Prerequisite(s): Grade of C or better in CS 211. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CS 330 - Formal Methods and Models

Credits: 3 (NR)
Abstract concepts that underlie much advanced work in computer science, with major emphasis on formal languages, models of computation, logic, and proof strategies.

Prerequisite(s): Grade of C or better in CS 211 and MATH 125. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CS 332 - Object-Oriented Software Design and Implementation

Credits: 3 (NR)
In-depth study of software design and implementation using a modern, object-oriented language with support for graphical user interfaces and complex data structures. Topics covered will be specifications; design patterns; and abstraction techniques; including typing, access control, inheritance, and polymorphism. Students will learn the proper engineering use of techniques such as information hiding, classes, objects, inheritance, exception handling, event-based systems, and concurrency.
Equivalent to SWE 332

**Prerequisite(s):** Grade of C or better in CS 211. Prerequisite enforced by registration system.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

### CS 351 - Visual Computing

Credits: 3 (NR)
Focuses on programming essential mathematical and geometric concepts underlying computer graphics. Covers fundamental topics in computational geometry, 3D modeling, graphics algorithms, and graphical user interfaces using both 2D and 3D implementations. Reinforces object-oriented programming practices.

**Prerequisite(s):** C or better in CS 262 and CS 310. Prerequisite enforced by registration system.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

### CS 363 - Comparative Programming Languages

Credits: 3 (NR)
Key programming mechanisms described independently of particular machines or languages including control, binding, procedural abstraction, and types. Systematically surveys diverse high-level language capabilities.

**Prerequisite(s):** Grade of C or better in CS 262. Prerequisite enforced by registration system.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

### CS 367 - Computer Systems and Programming

Credits: 3 (NR)
Introduces students to computer systems from a programmer's perspective. Topics include data representation, assembly and machine-level representation of high-level language programs, the memory hierarchy, linking, exceptions, interrupts, processes and signals, virtual memory, and system-level I/O. Foundation for courses on compilers; networks; operating systems; and computer architecture, where a deeper understanding of systems-level issues is required.

**Prerequisite(s):** Grade of C or better in CS 262 or 222 and ECE 301 or 331. Prerequisite enforced by registration system.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

### CS 390 - Research and Project Design Principles in Computing
This course introduces students to the research and project design process within the computing field. Students will learn about the tools of the trade, work through design principles beginning with the articulation of a question, reviewing methods of exploration, gathering evidence, communicating results, and assessing and evaluating research or project outcomes.

**Prerequisite(s):** C or better in CS 262; CS 310 and CS 321 highly recommended. Prerequisite enforced by registration system.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

### CS 391 - Advanced Programming Lab

Credits: 1 (RD)  
Programming-intensive lab course. Students refine problem-solving and programming skills while gaining experience in teamwork. Focuses on data structures, recursion, backtracking, dynamic programming, and debugging. Central focus is applying familiar and new algorithms and data structures to novel circumstances.

**Corequisite(s):** Grade of C or better in CS 310 and permission of instructor.

**Hours of Lecture or Seminar per week:** 1-4  
**Hours of Lab or Studio per week:** 1

### CS 425 - Game Programming I

Credits: 3 (NR)  
Introduction to technologies and techniques used in modern computer games. Teams will explore the various facets of a complete design using sophisticated tools. Includes a project in which a game is prototyped; this prototype and initial design will serve as the starting point for the project in CS 426.

**Prerequisite(s):** Grade of C or better in CS 310, CS 325 and CS 351. Prerequisite enforced by registration system.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

### CS 426 - Game Programming II

Credits: 3 (NR)  
Project-orientated continuation of CS 425 with an emphasis on the implementation of a complete game.

**Prerequisite(s):** Grade of C or better in CS 425. Prerequisite enforced by registration system.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

### CS 440 - Language Processors and Programming Environments
Survey of basic programming language processors and software development tools such as assemblers, interpreters, and compilers. Topics include design and construction of language processors, formal syntactic definition methods, parsing techniques, and code-generation techniques.

**Prerequisite(s):** Grade of C or better in CS 310, 330, and 367. Prerequisite enforced by registration system.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**CS 444 - Introduction to Computational Biology**

Credits: 3 (NR)  
Introduces computational methods in molecular biology. Covers a broad array of topics in bioinformatics and computational biology. Organized as 3 four-week modules intended to capture the current classification of bioinformatics and computational biology methods, thereby providing students with a broad view of the field.

**Prerequisite(s):** C or better in CS 310.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**CS 445 - Computational Methods for Genomics**

Credits: 3 (NR)  
Fundamental principles and techniques for implementing computational algorithms to solve problems in biology arising from the need to process large volumes of genomic information. Topics include sequence analysis, alignment, and assembly, gene prediction, and knowledge-based protein structure prediction. Projects involve designing and programming basic alignment and prediction methods.

**Prerequisite(s):** C or better in CS 310 and STAT 344.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**CS 450 - Database Concepts**

Credits: 3 (NR)  
Covers basics to intermediate knowledge for the design, implementation, and use of relational database systems. Topics include the Entity-Relationship (ER) and Entity-Enhanced Relationship (EER) models for database design, Relational Algebra (RA), Structured Query Language (SQL), SQL programming techniques, functional dependencies and normalization, object and object-relational databases, and security. Students will practice to design, develop, and implement a relational ORACLE database and use the database for queries, transaction processing, and report generation.

**Prerequisite(s):** Grade of C or better in CS 310 and 330. Prerequisite enforced by registration system.
CS 451 - Computer Graphics

Credits: 3 (NR)
Basic graphics principles and programming. Topics include scan conversion, transformation, viewing, lighting, blending, texture mapping, and some advanced graphics techniques.

Prerequisite(s): Grade of C or better in MATH 203, CS 310, and CS 367. Prerequisite enforced by registration system.

CS 455 - Computer Communications and Networking

Credits: 3 (NR)
Data communications and networking protocols, with study organized to follow layers of Internet Protocol Suite (TCP/IP family of protocols). Topics include role of various media and software components, local and wide area network protocols, network performance, and emerging advanced commercial technologies.

Prerequisite(s): Grade of C or better in CS 310 and 367, and STAT 344. Prerequisite enforced by registration system.

CS 463 - Comparative Programming Languages

Credits: 3 (NR)
Key programming mechanisms described independently of particular machines or languages, including control, binding, procedural abstraction, types, and concurrency. Includes basic programming competence in several different types of programming languages, including a language that provides concurrency.

Prerequisite(s): C or better in CS 330 and CS 367. Prerequisite enforced by registration system.

Notes: Students who have taken CS 363 may not receive credit for CS 463.

CS 465 - Computer Systems Architecture

Credits: 3 (NR)
Computer subsystems and instruction set architectures. Single-cycle, multiple-cycle, and pipeline architectures. Memory
hierarchy, cache, and virtual memory input-output processing.

Prerequisite(s): Grade of C or better in CS 367. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CS 468 - Secure Programming and Systems

Credits: 3 (NR)
Fundamental principles and techniques for implementing secure computer systems. Topics include security and cryptography basics, vulnerability analysis, secure software development, and distributed system security. Projects involve designing and programming basic security tools, secure programs, and distributed systems.

Prerequisite(s): Grade of C or better in CS 310 and CS 367. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CS 469 - Security Engineering

Credits: 3 (NR)
Covers the software subsystems that are involved in defending computer systems. Studies threats and architecting solutions against them, including but not limited to access control and identity management, network and system security, intrusion detection and recovery systems, monitoring and forensic systems.

Prerequisite(s): C or better in CS 330, CS 367, and STAT 344. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CS 471 - Operating Systems

Credits: 3 (NR)
Issues in multiprogramming. Covers concurrent processes and synchronization mechanisms; processor scheduling; memory, file, I/O, and deadlock management; performance of operating systems; and projects dealing with synchronization in multiprogrammed OS and virtual memory management.

Prerequisite(s): Grade of C or better in CS 310 and 367. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CS 475 - Concurrent and Distributed Systems
Practical issues in designing and implementing concurrent and distributed software. Topics include concurrent programming, synchronization, multithreading, local and wide-area network protocols, distributed computation, systems integration, and techniques for expressing coarsegrained parallelism at the application level. Projects involve network programming at application level.

**Prerequisite(s):** Grade of C or better in CS 310 and 367. Prerequisite enforced by registration system.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

### CS 480 - Introduction to Artificial Intelligence

Credits: 3 (NR)  
Principles and methods for knowledge representation, reasoning, learning, problem solving, planning, heuristic search, and natural language processing and their application to building intelligent systems in a variety of domains. Uses LISP, PROLOG, or expert system programming language.

**Prerequisite(s):** Grade of C or better in CS 310 and 330. Prerequisite enforced by registration system.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

### CS 482 - Computer Vision

Credits: 3 (NR)  
Basic principles of visual perception and their implementation on computer systems. Topics include early visual processing, edge detection, segmentation, intrinsic images, image modeling, representation of visual knowledge, and image understanding. Students complete projects involving real images.

**Prerequisite(s):** Grade of C or better in CS 310, MATH 203 and STAT 344 Prerequisite enforced by registration system.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

### CS 483 - Analysis of Algorithms

Credits: 3 (NR)  
Analyzes computational resources for important problem types by alternative algorithms and their associated data structures, using mathematically rigorous techniques. Specific algorithms analyzed and improved.

**Prerequisite(s):** Grade of C or better in CS 310, CS 330 and MATH 125. Prerequisite enforced by registration system.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0
CS 484 - Data Mining

Credits: 3 (NR)
Basic principles and methods for data analysis and knowledge discovery. Emphasizes developing basic skills for modeling and prediction and performance evaluation. Topics include system design; data quality, preprocessing, and association; event classification; clustering; biometrics; business intelligence; and mining complex types of data.

Prerequisite(s): Grade of C or better in CS 310 and STAT 344. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CS 485 - Autonomous Robotics

Credits: 3 (NR)
Covers various basic software topics in autonomous robotics, including autonomous architectures, elementary kinematics and controls, simulation, localization and mapping, reasoning, and multiagent environments. Includes several projects involving physical robots.

Prerequisite(s): CS 262, CS 310, MATH 203 or permission of the instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CS 490 - Design Exhibition

Credits: 3 (RD)
Capstone course focusing on design and successful implementation of major software project, encompassing broad spectrum of knowledge and skills, developed by team of students. Requires final exhibition to faculty-industry panel.

Prerequisite(s): Grade of C or better in CS 321, CS 483; two other CS 400-level courses; and senior standing. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CS 498 - Independent Study in Computer Science

Credits: 1-3 (RT)
Research and analysis of selected problems or topics in computer science. Topic must be arranged with instructor and approved by department chair before registering.

Prerequisite(s): 60 credits, major in computer science, and permission of instructor.

Notes: May be repeated for maximum 6 credits if topics substantially different.
CS 499 - Special Topics in Computer Science

Credits: 3 (RT)
Topics of special interest to undergraduates.

Prerequisite(s): 60 credits and permission of instructor; specific prerequisites vary with nature of topic.

Notes: May be repeated for maximum 6 credits if topics substantially different.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CS 504 - Principles of Data Management and Mining

Credits: 3 (NR)

Prerequisite(s): Graduate Standing.

Notes: This course cannot be taken for credit by students of the MS CS, MS ISA, MS SWE, MS IS, CS PhD or IT PhD programs.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

CS 540 - Language Processors

Credits: 3 (NR)
Basic programming language processors such as assemblers, interpreters, and compilers. Topics include design and construction of language processors, formal syntactic definition methods, parsing techniques, and code generation techniques. Lab includes construction of language processors and experience with programming environments.

Prerequisite(s): MATH 125; and CS 310, 330, and 465

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CS 550 - Database Systems
An introduction to database management with focus on architecting databases and using them in applications. Topics to be covered include: data modeling with the Entity-Relationship model, the relational data model and its formal languages, SQL, the theory of database design, object databases, XML and Web data.

**Prerequisite(s):** CS 310, 330.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**CS 551 - Computer Graphics**

Credits: 3 (NR)  
Graphics principles and programming. Topics include graphics hardware, antialiasing, transformations, viewing, illumination, blending, texture mapping, color models, curves, surfaces, and animation.

Equivalent to CS 652 (2011-2012 Catalog)

**Prerequisite(s):** CS 310 and CS 367.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall, Spring

---

**CS 555 - Computer Communications and Networking**

Credits: 3 (NR)  
Techniques and systems for communication of data between computational devices and layers of Internet Protocol Suite. Topics include role of various media and software components, local and wide area network protocols, network design, performance and cost considerations, and emerging advanced commercial technologies. Emphasizes TCP/IP family of protocols.

**Prerequisite(s):** CS 310 and CS 367 and STAT 344, or equivalent.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**CS 571 - Operating Systems**

Credits: 3 (NR)  
Models of operating systems. Major functions including processes, memory management, I/O, interprocess communication, files, directories, shells, distributed systems, performance, and user interface.

**Prerequisite(s):** CS 310 and CS 367 and CS 465, or equivalent.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0
CS 580 - Introduction to Artificial Intelligence

Credits: 3 (NR)
Principles and methods for knowledge representation, reasoning, learning, problem solving, planning, heuristic search, and natural language processing and their application to building intelligent systems in a variety of domains. LISP, PROLOG, or expert system programming language.

Prerequisite(s): CS 310 and 330.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CS 583 - Analysis of Algorithms

Credits: 3 (NR)
Topics include analyzing sequential and parallel algorithmic strategies such as greedy methods, divide and conquer strategies, dynamic programming, search and traversal techniques, and approximation algorithms; and analyzing specific algorithms falling into these classes, NP-Hard and NP-Complete problems.

Prerequisite(s): CS 310 and 330, and MATH 125.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CS 600 - Theory of Computation

Credits: 3 (NR)
Introduction to logic and proof techniques, formal languages, automata theory, and computational complexity. Specific topics include regular and context-free languages, Turing machines, NP-completeness, and undecidability.

Prerequisite(s): CS 583 and discrete mathematics.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CS 611 - Computational Methods for Genomics

Credits: 3 (NR)
Covers fundamental principles and techniques for implementing computational algorithms to solve problems in biology arising from the need to process large volumes of genomic information. Topics include sequence analysis, alignments, sequence assembly, gene prediction, and protein structure prediction.

Prerequisite(s): CS 583; or permission of instructor.
CS 630 - Advanced Algorithms

Credits: 3 (NR)
Provides an overview of advanced algorithm design and analysis techniques. Topics include algorithms for hash tables, matrix operations, number theory, string matching, computational geometry, combinatorial optimization, and linear programming; also the areas of NP-completeness and approximation algorithms.

Prerequisite(s): CS 583

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring, Summer

CS 631 - Object-Oriented Design Patterns

Credits: 3 (NR)
Principles of object-oriented design through design patterns. Studies selection of appropriate object-oriented structure after system requirements or requirements specification of software system have been developed. Design patterns created in logic view of software system. Studies generalized design solutions for generalized software design problems and reuse of design patterns. Once developed, design patterns may be specified in any object-oriented language.

Equivalent to SWE 631

Prerequisite(s): SWE 619 or 620, or CS 540 or 571; or graduate course in object-oriented programming or equivalent.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CS 633 - Computational Geometry

Credits: 3 (NR)
Basic principles and methods for computing in field of geometric modeling. Emphasizes data structures used to represent geometric objects and algorithms for manipulating those data structures. Topics include range searching, polygon triangulation, convex hulls, motion-planning, visibility, and mesh generation.

Prerequisite(s): CS 583.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CS 635 - Foundations of Parallel Computation
Credits: 3 (NR)
Covers three major parallel computing paradigms: MIMD computation, SIMD computation, and data flow computation. Emphasizes interfaces between algorithm design and implementation, architecture, and software. Examines parallel algorithms and parallel programming languages relative to architecture of particular parallel computers.

Prerequisite(s): CS 583, and 540 or 571; or equivalent.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CS 640 - Advanced Compilers

Credits: 3 (NR)
Examines advanced compiler techniques such as code optimizations for sequential and parallel machines; compilers for logical, functional, or object-oriented languages; and other topics in current literature.

Prerequisite(s): CS 540 and 583, or equivalent

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CS 650 - Advanced Database Management

Credits: 3 (NR)
Study of the internal architecture of database systems. Topics include: physical data organization and indexing, query processing and optimization, transaction processing, database system architectures, Web services and Web data security.

Prerequisite(s): CS 550 or INFS 614.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CS 658 - Networked Virtual Environments

Credits: 3 (NR)
Topics covered in lecture are: networked virtual environment overview, networking technology, network multimedia concepts, virtual simulation concepts, efficiency/performance issues, and online conferencing/virtual classrooms. The project consists of four segments, each covering one aspect of networked virtual environments, plus a final session where one- or two-person teams create a minimally functional networked virtual environment over the Internet using overlay multicast software. The course consists of 31 50-minute sessions plus a major Java programming project which will be presented and discussed in class and two 90-minute examinations. Lectures are recorded in Network EducationWare (NEW) format and are available for playback on a flexible schedule, which is necessary since the course is shared among institutions having different academic calendars.

Prerequisite(s): CS 555

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
CS 659 - Theory and Applications of Data Mining

Credits: 3 (NR)
Concepts and techniques in data mining and multidisciplinary applications. Topics include databases; data cleaning and transformation; concept description; association and correlation rules; data classification and predictive modeling; performance analysis and scalability; data mining in advanced database systems, including text, audio, and images; and emerging themes and future challenges.

Equivalent to CS 750 (2011-2012 Catalog)

Prerequisite(s): CS 580.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Summer, Spring

CS 662 - Computer Graphics Game Technologies

Credits: 3 (NR)
Addresses some graphics game techniques including collision detection, levels of detail, physics-based simulations, textures, maps, and shadows.

Prerequisite(s): CS 551.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CS 667 - Biometrics and Identity Management

Credits: 3 (NR)
Basic principles and methods for automatic authentication of individuals. Technologies include face, fingerprint, and iris recognition; and speaker verification. Additional topics cover multimodal biometrics, system design, performance evaluation, and privacy concerns. Term project required.

Equivalent to IT 667 (2009-2010 Catalog)

Prerequisite(s): CS 580 or permission of the instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CS 671 - Advanced Operating Systems
Advanced topics in design and implementation of microkernel-based, object-oriented, and distributed operating systems. Specific topics include support for interprocess communication, interaction between computer architecture and operating systems, distributed file systems, transactions, and distributed shared memory.

**Prerequisite(s):** CS 571, MATH 351 or Permission of Instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**CS 672 - Computer System Performance Evaluation**

Credits: 3 (NR)  
Theory and practice of analytical models of computer systems. Topics include open and closed multiclass queuing networks, single and multiple class Mean Value Analysis, Markov Chains, performance and availability models of Internet data centers, software performance engineering, and e-commerce performance.

**Prerequisite(s):** CS 571 and MATH 351, or permission of instructor

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**CS 673 - Multimedia Computing and Systems**

Credits: 3 (NR)  
Focuses on technological and development environments in developing multimedia applications. Projects involve experience with multimedia authoring tools and simulations to assess performance.

**Prerequisite(s):** CS 571.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**CS 675 - Distributed Systems**

Credits: 3 (NR)  
Issues in design and implementation of distributed systems and applications. Topics include distributed communication paradigms, middleware, coordination and synchronization, distributed transactions, consistency and replication, fault-tolerance and reliability, and peer-to-peer systems.

**Prerequisite(s):** CS 571 or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0
CS 680 - Natural Language Processing

Credits: 3 (NR)
Explores principles of designing computer programs that respond appropriately to questions, commands, and statements expressed in human language, particularly English. Role of knowledge representation and linguistic theory. Students become familiar with current literature to implement a limited natural language processor.

Prerequisite(s): CS 540 and 580.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CS 681 - Designing Expert Systems

Credits: 3 (NR)
Design, construction, and evaluation of software systems that solve problems generally deemed to require human expertise. Focuses on study and use of relevant languages, environments, mathematics, and logic. Case studies of successful systems. Programming projects include development of tools or small-scale systems.

Prerequisite(s): CS 580.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CS 682 - Computer Vision

Credits: 3 (NR)
Study of computational models of visual perception and their implementation in computer systems. Topics include early visual processing, edge detection, segmentation, intrinsic images, image modeling, representation of visual knowledge, and image understanding.

Prerequisite(s): CS 580 and 583.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CS 683 - Parallel Algorithms

Credits: 3 (NR)
Examines design and analysis of parallel algorithms. Material focuses on algorithms for both theoretical and practical models of parallel computation. Considers algorithm design and analysis for PRAM and existing SIMD and MIMD type architectures. Topics include sorting, graph algorithms, numerical algorithms, and computational complexity.

Prerequisite(s): CS 583; CS 635 recommended.
CS 684 - Graph Algorithms

Credits: 3 (NR)
Data structures and analytical techniques to study graph algorithms. Data structures include disjoint sets, heaps, and dynamic trees. Algorithms include minimum spanning trees, shortest path, maximum flow, and graph planarity.

Prerequisite(s): CS 583.

CS 685 - Autonomous Robotics

Credits: 3 (NR)
Reviews developments in intelligent autonomous systems. Studies applications of artificial intelligence, computer vision, and machine learning to robotics. Topics include analysis and design of algorithms and architectures for planning, navigation, sensory data understanding, sensor fusion, spatial reasoning, motion control, knowledge acquisition, learning concepts and procedures, self-organization, and adaptation to environment.

Prerequisite(s): CS 580 or permission of the instructor.

CS 686 - Image Processing and Applications

Credits: 3 (NR)
Concepts and techniques in image processing. Discusses methods for image capture, transformation, enhancement, restoration, and encoding. Students complete projects involving naturally occurring images.

Prerequisite(s): CS 583 and either STAT 344 or MATH 351, or equivalent.

CS 687 - Advanced Artificial Intelligence

Credits: 3 (NR)
Explores foundational issues of artificial intelligence, such as roles of knowledge and search, formalization of knowledge and inference, and symbolic versus emergent approaches to intelligence. Studies advanced programming techniques for artificial intelligence, relationship to foundational issues, and important application areas for artificial intelligence.
Prerequisite(s): CS 580.

Notes: Major programming project required.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CS 688 - Pattern Recognition

Credits: 3 (NR)
Explores statistical pattern recognition and neural networks. Pattern recognition topics include Bayesian classification and decision theory, density (parametric and nonparametric) estimation, linear and nonlinear discriminant analysis, dimensionality reduction, feature extraction and selection, mixture models and EM, and vector quantization and clustering. Neural networks topics include feed-forward networks and back-propagation, self-organization feature maps, and radial basis functions. Emphasizes experimental design, applications, and performance evaluation.

Prerequisite(s): CS 580 or equivalent.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CS 689 - Planning Motions of Robots and Molecules

Credits: 3 (NR)
Covers topics from artificial intelligence, algorithms and databases. Presents algorithms that model and simulate physical and biological systems and focuses on motion-planning algorithms for robotic systems in the presence of obstacles. Simple deterministic and sampling-based approaches to motion planning will be covered, as well as advanced planning methods including planning with kinematics and dynamic constraints. Selected topics include sensor-based motion planning, manipulation planning, assembly planning, planning under uncertainty and robotics-inspired methods to compute functionally-relevant motions of molecular chains.

Prerequisite(s): CS 583

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

CS 695 - Topics in Computer Science

Credits: 3 (RT)
Special topics in computer science not occurring in regular computer science sequence.

Prerequisite(s): Completion of two core courses, and permission of instructor.

Notes: May be repeated for credit when subject distinctly different.
CS 697 - Independent Reading and Research

Credits: 1-3 (NR)
Students may undertake a course of study under supervision of consenting faculty member. Students usually submit written statement of course content and tentative reading list as part of request for approval. Literature review, project report, or other written product usually required.

Prerequisite(s): Graduate standing; completion of at least two of core courses CS 540, 571, 580, and 583; and permission of instructor.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0

CS 700 - Quantitative Methods and Experimental Design in Computer Science

Credits: 3 (NR)
Integrated treatment to models and practices of experimental computer science. Topics include scientific methods applied to computing, workload characterization, forecasting of performance and quality metrics of systems, uses of analytic and simulation models, design of experiments, interpretation and presentation of experimental results, hypothesis testing, and statistical analyses of data. Involves one or more large-scale projects.

Prerequisite(s): STAT 344, at least two 600-level courses in computer science, and doctoral status.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CS 706 - Concurrent Software Systems

Credits: 3 (NR)
Topics include concurrent programming languages and constructs, and specification, design, verification, and validation of concurrent programs. Students required to solve concurrent programming problems and check solutions by using verification, testing, and debugging tools.

Prerequisite(s): CS 571 and SWE 621 or 631, or equivalent.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CS 719 - Scaling Technologies for E-business
Discusses, from quantitative point of view, characteristics of most important technologies used to support implementation of e-business sites. Includes topics such as hardware and software architectures of e-business sites, authentication, payment services, understanding customer behavior, workload characterization, scalability analysis, and performance prediction.

Equivalent to IT 809

Prerequisite(s): At least one operating system and one networking course, and admission to VSITE doctoral program.

Notes: Term paper and project required.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CS 735 - Concurrency

Credits: 3 (NR)
Studies techniques, tools for specifying and verifying concurrent and distributed programs. Topics may include model checking, temporal logic, process algebra, and test generation. Automated verification tools used to specify and verify concurrent programs.

Prerequisite(s): CS 635 or 706, or equivalent.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CS 752 - Interactive Graphics Software

Credits: 3 (NR)
Advanced graphics methods and tools. Topics include visualization, modeling, rendering, animation, simulation, virtual reality, graphics software tools, and current research topics.

Prerequisite(s): CS 551 and CS 583.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CS 753 - Parallel Computation

Credits: 3 (NR)
Covers topics illustrating contemporary thinking on architectures, application, development environments, algorithms, operating systems, language requirements, and performance.

Prerequisite(s): CS 635 or CSI 801.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
CS 755 - Advanced Computer Networks

Credits: 3 (NR)
Current and emerging issues in advanced computer networks and applications. Topics include software systems associated with packet and cell-switched networking architectures and protocols, high-performance LANs, scheduling and congestion control, mobile networking, multimedia applications, and next generation of Internet.

Prerequisite(s): CS 555.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CS 756 - Performance Analysis of Computer Networks

Credits: 3 (NR)
Analytical and simulation techniques for modeling and analyzing computer networks. Examines elementary queuing analysis; networks of queues; routing and flow controls; and applications to local and wide area networks, Internet, and emerging networking technologies.

Prerequisite(s): CS 555.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CS 757 - Mining Massive Datasets

Credits: 3 (NR)
Covers the techniques to mine large datasets, including Distributed File Systems and Map-Reduce, similarity search, and data stream processing. Covers classic problems in data mining, such as clustering, association rule mining, and others from the point of view of scalability. Includes a final project to exercise concepts covered in class.

Prerequisite(s): CS 659 or equivalent.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

CS 773 - Real-Time Systems Design and Development

Credits: 3 (NR)
Real-time systems and principles supporting design and implementation. Emphasizes fundamental results from real-time scheduling theory and relevance to computer system design. Topics include system design issues for real-time applications involving communication networks, operating systems, databases, and multimedia.
Prerequisite(s): CS 555 or CS 671 or permission of the instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CS 774 - Computational Vision

Credits: 3 (NR)
Studies recent advances in development of machine vision algorithms and knowledge-based vision systems. Topics include scalespace; Gabor and wavelet processing; distributed and hierarchical processing using neural networks; motion analysis; active, functional, and selective perception; object and target recognition; expert systems; data fusion; and machine learning. Emphasizes system integration in terms of perception, control, action, and adaptation. Presents applications to robotics, intelligent highways, inspection, forensic, and data compression.

Prerequisite(s): CS 682 and 686 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CS 775 - Advanced Pattern Recognition

Credits: 3 (NR)
Covers statistical pattern recognition, neural network, and statistical learning theory approaches. Topics include decision theory and Bayes' theorem, density (parametric and nonparametric) estimation, linear and nonlinear discriminant analysis, SVM and kernel methods, SRM and model selection, performance evaluation, mixture of experts (AdaBoost), dimensionality reduction, feature selection and extraction, and clustering. Emphasizes experimental design, applications, and performance evaluation.

Prerequisite(s): CS 688 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CS 776 - Graphical Real-Time Simulation

Credits: 3 (NR)
Current research in advanced computer graphics, and applications in realistic real-time simulations. Topics include physically based modeling, real-time simulation, distributed interactive simulation (DIS), network virtual environments (NVE), and virtual reality (VR).

Prerequisite(s): CS 551.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CS 777 - Human-Computer Intelligent Interaction
Current and emerging issues in human-computer intelligent interaction, and human-centered systems and their applications. Topics include video processing, visualization, virtual environments, adaptation and tutoring, image and scene modeling, analysis and synthesis, face and gesture recognition, and speech and natural language processing.

**Prerequisite(s):** CS 580, and 551 or 682; or permission of instructor.

**Notes:** Term project and topical review required.

**CS 779 - Topics in Resilient and Secure Computer Systems**

Credits: 3 (NR)
Covers study of alternate computer security, including how these methods can be combined in a layered defense and factors that affect the selection of the architectures. Reviews recent papers and reports.

**Prerequisite(s):** CS 571 and ISA 562 or permission of instructor.

**When Offered:** Fall

**CS 780 - Data Mining on Multimedia Data**

Credits: 3 (NR)
Covers advanced techniques for managing, searching, and mining of various types of data such as text, web links, images, time series, video, and audio. Issues related to handling such data will be discussed, including feature selection, high dimensional indexing, interactive search and information retrieval, pattern discovery, and scalability.

Equivalent to INFS 780

**Prerequisite(s):** CS 659 or equivalent.

**CS 782 - Machine Learning**

Credits: 3 (NR)
Surveys machine learning concerning development of intelligent adaptive systems that are able to improve through learning from input data or from their own problem-solving experience. Topics provide broad coverage of developments in machine learning, including basic learning strategies and multistrategy learning.

**Prerequisite(s):** CS 681, 687, or 688; or permission of instructor.
CS 785 - Knowledge Acquisition and Problem Solving

Credits: 3 (NR)
Principles and major methods of basic stages of knowledge acquisition such as systematic elicitation of expert knowledge, knowledge base refinement, and knowledge base optimization in the context of general problem-solving methods. Includes case studies of successful knowledge acquisition and problem-solving systems and projects involving development or application of knowledge acquisition tools for knowledge-based systems.

Prerequisite(s): CS 680, 681, or 687; or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CS 787 - Decision Guidance Systems

Credits: 3 (NR)
Decision-guidance systems support an iterative process of giving actionable recommendations to and extracting feedbacks from human decision-makers, with the goal of arriving at the best possible course of action. Focuses on models, languages, algorithms and applications of Decision-Guidance Management Systems, used for fast development of decision-guidance applications.

Prerequisite(s): INFS 614 or CS 650 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

CS 788 - Autonomic Computing

Credits: 3 (NR)
Studies self-managing, self-optimizing, self-configuring, self-tuning, self-healing, and self-protecting computing systems. This course analyzes many examples of autonomic systems as well as various techniques to design and build such systems. This is a doctoral seminar based on reading and analysis of current papers.

Prerequisite(s): CS 555 or CS 571 or ISA 562 or Permission of the Instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

CS 795 - Advanced Topics in CS
Credits: 3 (RT)
Advanced topics not occurring in regular sequence.

Prerequisite(s): Admission into computer science PhD program.

Notes: May be repeated for credit when subject differs. Satisfies MS breadth requirement only if explicitly stated in syllabus in given section. Only one such course should be used for breadth requirements.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CS 798 - Project Seminar

Credits: 3 (NR)
Master's degree candidates undertake a project using knowledge gained in MS program.

Prerequisite(s): 18 credits applicable toward MS in computer science.

Notes: Topics chosen in consultation with advisor. Meets project or thesis requirement for MS in computer science.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
Grading: Graduate Special

CS 799 - Thesis

Credits: 1-6 (RD)
Original or expository work evaluated by committee of three faculty members.

Prerequisite(s): 18 credits applicable toward MS in computer science.

Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 0
Grading: Satisfactory/No Credit

CS 800 - Computer Science Colloquium

Credits: 0 (RD)
Students are required to attend colloquia including talks by distinguished speakers, faculty candidates, and Mason faculty.

Prerequisite(s): Admission to CS PhD program.

Notes: This course introduces PhD students to research topics in computer science. This course can be taken twice for credit.

Hours of Lecture or Seminar per week: 3-12
Hours of Lab or Studio per week: 0
Grading: Students will receive a grade of satisfactory (S) or no credit (NC).
CS 811 - Research Topics in Machine Learning and Inference

Credits: 3 (NR)
Presents unifying principles that underlie diverse methods, paradigms, and approaches to machine learning and inference. Reviews most known learning and inference systems, discusses strengths and limitations, and suggests most appropriate areas of application. Hands-on experience by experimenting with state-of-the-art learning and inference systems and working on projects tailored to research interests.

Prerequisite(s): CS 680 or 681, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CS 818 - Topics in Computer Systems

Credits: 3 (NR)
Discussion of current research topics in computer systems. Topics vary according to faculty interest. Possible topics include peer-to-peer computing, high-performance distributed computing, sensor and ad hoc networks, autonomic computing, virtualization, and web services and middleware.

Equivalent to IT 818

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CS 880 - Research Topics in Artificial Intelligence

Credits: 3 (RD)
Special topics in artificial intelligence not occurring in regular computer science sequence.

Equivalent to IT 910

Notes: Requires substantial student participation. Subject matter may include continuation of existing 600- or 700-level courses in artificial intelligence or other topics. May be repeated for credit when subject matter differs.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

CS 884 - Advanced Topics in Computer Vision and Robotics

Credits: 3 (RD)
Covers recent developments. Topics motivated by applications to autonomous robotic systems, mobile robot navigation, multirobot systems, human-computer-environment interaction, image/video search and analysis, content discovery, and visual
surveillance. Topics include 3D structure and motion recovery, motion understanding, map building and localization, object
detection and recognition, and target tracking. Projects and experimental evaluation emphasized.

Prerequisite(s): CS 682 or 685, or permission of instructor depending on topics offered.

Notes: Course may be repeated with change of topic.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CS 895 - Research Topics in CS

Credits: 3 (RT)
Advanced topics not occurring in regular sequence.

Prerequisite(s): Intended for doctoral students. Permission of instructor.

Notes: May be repeated for credit when subject differs. Only one such course should be used for breadth requirements.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CS 896 - Directed Reading and Research

Credits: 1-6 (RD)
Reading and research on a specific topic under the direction of a faculty member.

Prerequisite(s): Permission of Instructor.

Notes: May be repeated up to a total of 9 credits. Students can sign up for this class only after passing the CS PhD qualifying
exams.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0
When Offered: Fall, Summer, Spring.

CS 990 - Dissertation Topic Presentation

Credits: 0 (NR)
Students put together a professional presentation of a research proposal and present it for critique to fellow students and
interested faculty.

Equivalent to IT 990, STAT 990.

Prerequisite(s): Completion of all course requirements for PhD, or permission of instructor.

Notes: May be repeated with change of research topic, but credit toward doctoral degree is given once.
CS 998 - Doctoral Dissertation Proposal

Credits: 1-12 (RD)
Work on research proposal that forms basis for doctoral dissertation.

Notes: May be repeated as needed. No more than 24 credits of CS 998 and 999 may be applied to doctoral degree requirements.

CS 999 - Doctoral Dissertation

Credits: 1-12 (RD)
Formal record of commitment to doctoral dissertation research under direction of faculty member in computer science.

Prerequisite(s): Admission to candidacy.

Notes: May be repeated as needed. No more than 24 credits of CS 998 and 999 may be applied to doctoral degree requirements.

Conflict Analysis and Resolution (CONF)

Offered by the School of Conflict Analysis and Resolution

CONF 101 - Conflict and Our World

Credits: 3 (NR)
Brief history of field, survey of key conflict resolution themes and theories, and intervention methods. Overview includes general factors of conflict and its resolution; and nature of conflict in interpersonal, group, organizational, and international situations.

Fulfills general education requirement in social and behavioral science.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring, Summer
CONF 190 - Advising Seminar for Conflict Majors

Credits: 1 (NR)
Examines issues and opportunities relevant to CONF majors to enhance their overall success in the program. Topics may include academic planning, field experience processes, critical thinking in coursework, career exploration and readiness, and co-curricular opportunities.

Corequisite(s): CONF 101.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

CONF 210 - Theories of Conflict Analysis and Resolution

Credits: 3 (NR)
Students will utilize critical thinking and analytical skills to begin an in-depth examination of the major theories of conflict analysis and resolution. Theories and case studies will include root causes and dynamics of conflict and methods of conflict analysis and resolution.

Prerequisite(s): CONF 101.

Notes: Required course for all CONF majors (BA and BS) beginning Fall 2011.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

CONF 300 - Conflict Resolution Techniques and Practice

Credits: 3 (NR)
Advanced consideration of CONF 101 topics, introduction of core notion of reflective practice, conflict resolution techniques, practice, third party roles, and ethics.

Corequisite(s): CONF 101 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CONF 301 - Research and Inquiry in Conflict Resolution

Credits: 3 (NR)
Introduces social science research methods at undergraduate level. Covers basic epistemology of social research, including quantitative and qualitative methods, emphasizing participatory action research, and evaluation and assessment work.

Prerequisite(s): CONF 101 and 210 and 45 credits, or permission of instructor.
CONF 302 - Culture, Identity, and Conflict

Credits: 3 (NR)
Covers deeply rooted, intractable, or protracted social conflicts around core issues of identity, including race, ethnicity, religion, and nationalism. Explores cultural, symbolic, and discursive approaches to identity conflict.

Fulfills writing intensive requirement in the major.

Prerequisite(s): CONF 101.

CONF 310 - Special Topics in Research

Credits: 1-6 (RT)
Examines selected topics related to research in the field of conflict analysis and resolution. Seminar format is intended to assist students conducting individual research projects. Topics vary, but will address practical skills and knowledge base necessary to conduct social science research.

Notes: May be repeated for up to 6 credits if topics vary.

CONF 315 - Discovering Organizations and Actors in the Conflict Field

Credits: 3 (NR)
Designed to give students the opportunity to discover the range of actors and organizations in the field of conflict resolution and to reflect on the possibilities and constraints that shape professional engagement in real world conflicts. In this seminar based course, students will also be encouraged to think about themselves as actors and build upon their knowledge, skills, and abilities.

Prerequisite(s): CONF 101.

CONF 320 - Interpersonal Conflict Analysis and Resolution
Credits: 3 (NR)
Covers conflict at micro level, introducing theories drawn from various disciplines including psychology, anthropology, and conflict resolution. Uses readings, case studies, and role plays to develop ability to analyze and intervene in interpersonal conflicts. Also prepares for further course work for interpersonal conflict concentration.

Prerequisite(s): CONF 101 and 210 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CONF 325 - Dialogue and Difference

Credits: 3 (NR)
Covers challenges of communicating across differences of age, gender, language, culture, political orientation, and contextual situations. Students will engage in preparing and analyzing communication strategies in conflict situations and will participate in a dialogue over the term that explores the meaning and experience of difference on the Mason campus.

Equivalent to CONF 202 (2010-2011 Catalog)

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring

CONF 330 - Community, Group, and Organizational Conflict Analysis and Resolution

Credits: 3 (NR)
Covers conflict at mezzo level, introducing theories of social harmony and conflict, drawing on sociology, social psychology, community psychology, organizational psychology, administration of justice, philosophy, and conflict resolution. Uses case studies, class presentations, and group projects to develop ability to analyze conflict and make recommendations for change. Also prepares for further course work for community and organizational conflict concentration.

Prerequisite(s): CONF 101 and 210 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CONF 331 - Simulation in Community and Organizational Conflict Resolution

Credits: 1 (NR)
Builds on the theories and concepts presented in CONF 330 to focus on the practice of group and community conflict. Through intensive simulations using conflict cases, students will have the opportunity to practice conflict resolution skills such as dialogue, problem solving, mediation and negotiation and gain a practical understanding of third party roles and intervention strategies in community, group, and organizational settings.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 1-12
When Offered: Fall, Spring
CONF 340 - Global Conflict Analysis and Resolution

Credits: 3 (NR)
Covers conflict at macro level, introducing theories of international and global violence and conflict, drawing from disciplines of international relations, political science, intercultural communication, and conflict resolution. Covers impact of globalization and structural causes of conflict. Uses class discussions, case studies, and final paper to develop analytical skills to help in analysis of conflict. Prepares for further course work for international conflict concentration.

Prerequisite(s): CONF 101.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CONF 341 - Global Conflict Resolution Practice

Credits: 1 (NR)
Focuses primarily on global conflict resolution practice. Using the methodologies of dialogue, problem-solving, and intensive simulation, students will increase their theoretical and practical understanding of peace making, peace building, and transformation processes within a specific international case.

Corequisite(s): CONF 340 or permission of instructor

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CONF 345 - Social Dynamics of Terrorism, Security, and Justice

Credits: 3 (NR)
Presents students with analytical frameworks to account for terrorist acts and organizations and explore social dynamics underlying the development of, and response to, terrorism. Topics may include recruitment into violent groups, counterterrorism and human rights concerns, role of religious and political ideologies in terrorism and counterterrorism, media coverage of terrorism, and effects of terrorism on social structures and processes.

Equivalent to CONF 240 (2010-2011 Catalog)

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

CONF 370 - Internship Field Experience

Credits: 1-9 (RD)
Internships will provide an opportunity for students to gain practical experience, reflect on those experiences, and apply academic theories outside of the normal classroom environment. Students will apply academic theories learned in the classroom to
situations that arise in the work environment. Students must obtain approval and complete an internship proposal application in order to be registered for the course.

**Prerequisite(s):** CONF 101, CONF 300. Permission of instructor.

**Notes:** Course does not have a regular meeting time; students submit work via blog and e-mail; some meetings with instructor.

**CONF 375 - Special Programs Field Experience**

Credits: 1-6 (RD)
Learning experience in the application of conflict analysis and resolution (CAR) skills in special program settings. Provides supervised practice in CAR techniques, leadership, program implementation, and strategies to facilitate conflict resolution in educational institutions or community settings.

**Prerequisite(s):** Permission of instructor and director, controlled enrollment form required.

**Hours of Lecture or Seminar per week:** 2  
**Hours of Lab or Studio per week:** 0

**CONF 385 - International Field Experience**

Credits: 3 (RD)
Investigates conflict theory through international field experience including participation in formally organized course offered by Center for Global Education or another form of international field experience approved by program director.

**Prerequisite(s):** CONF 101 and permission of advisor.

**Notes:** May be repeated for up to 6 credits.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**CONF 393 - Philosophy, Conflict Theory, and Violence**

Credits: 3 (NR)
Examines causes, sources, and origins of group violence with particular attention to group violence of ethnicity conflict. Explores alternative proposals that explain why violence becomes primary, or at least viable, form of revolving conflict in some societies.

**Prerequisite(s):** CONF 101 or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0
CONF 394 - Human Rights and Inequality

Credits: 3 (NR)
Examines inequality, social justice, and human rights in an age of globalization. Topics may include international law and order, welfare-and social policy, regionalism and multilateralism, environmental protection, gender equality, terrorist and transnational criminal networks, human trafficking, modern slavery, world poverty, corporate military firms, governance of global financial institutions, security, and transnational social movements.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

CONF 397 - Study Abroad Special Topics

Credits: 1-9 (RT)
Transfer credit for relevant coursework taken during direct exchange study abroad trips.

Prerequisite(s): CONF 101.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Summer, Spring

CONF 398 - Special Topics in Advanced Techniques and Practices

Credits: 3 (RT)
Examines selected topics relating to conflict resolution techniques and practices. Topics vary but may include mediation, negotiation, reflective practice, and facilitation.

Prerequisite(s): CONF 101, CONF 300.

Notes: May be repeated for up to 9 credits if topics vary.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Summer, Spring

CONF 399 - Special Topics in Conflict Analysis and Resolution

Credits: 3 (RT)
Examines selected topics relating to analysis or resolution of conflict. Topics vary but may include historical examination of conflict, social issues stemming from conflict, ethical issues in intervention, globalization, human rights, sources of conflict, or relationship of particular identity domains to conflict.
Notes: May be repeated for up to 9 credits if topics vary.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CONF 490 - Integration

Credits: 3 (NR)
Capstone course in which students reflect on what they have learned, integrating knowledge from course work and synthesizing it to cogent body of knowledge. Includes class discussion and final project that demonstrates understanding of conflict theory and reflective practice.

Fulfills general education requirement in synthesis.

Prerequisite(s): 300-level CONF course.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CONF 499 - Independent Research in Conflict Analysis and Resolution

Credits: 1-6 (RD)
Readings and research conducted on individual basis in consultation with instructor.

Prerequisite(s): CONF 101, CONF 300, CONF 301, and permission of program director.

Notes: Student may not present more than 3 credits for graduation credit.

Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 0

CONF 501 - Introduction to Conflict Analysis and Resolution

Credits: 3 (NR)
Prerequisite or corequisite for all MS CONF majors. Introduces field of conflict analysis and resolution. Examines definitions of conflict and diverse views of its "resolution." Explores thinking about human behavior, and social systems as they relate to origins of conflict and role of conflict in violent and peaceful social change. Considers appropriate responses to conflict at interpersonal, intergroup, industrial, communal, and international levels.

Prerequisite(s): CONF 501

Notes: Permission of instructor not required for this course.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
CONF 502 - Intensive Introduction to Conflict Analysis and Resolution

Credits: 3 (NR)
Introduces field of conflict analysis and resolution. Examines the origins of social conflict, the practices and strategies for responding to conflict, and frameworks for constructive intervention. Considers interpersonal, community, and large-scale intergroup conflict.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CONF 595 - Selected Topics

Credits: 1-3 (RT)
Topics vary each semester and are announced each academic year.

Prerequisite(s): CONF 501.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CONF 601 - Theories of Conflict and Conflict Resolution

Credits: 3 (NR)
Examines major theories of conflict causation and motivation. Emphasizes need for theories to inform processes of conflict resolution. Weaves together ideas from conventional disciplines with new approaches, especially with regard to causes and methods of resolving deep-rooted conflict.

Prerequisite(s): CONF 501 or 801

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CONF 610 - Philosophy and Methods of Conflict Research

Credits: 3 (NR)
Introduces students to the philosophies behind social science research and the methods for conducting research in the field of conflict resolution. Focuses on the identification of research problems associated with particular conflict situations, selection of appropriate research methods, and the design of effective research projects.

Prerequisite(s): CONF 501 or 801

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
CONF 611 - MS Research II

Credits: 3 (NR)
Guides students through design, execution, interpretation, analysis, presentation, and evaluation of field research in conflict and resolution.

Prerequisite(s): CONF 501 and 610

Notes: Builds on CONF 610.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CONF 620 - Reflective Practice in Interpersonal-Multiparty Conflicts

Credits: 3 (NR)
Introductory skill-building course integrating conflict theory and practice using reflective practitioner model. Students learn necessary skills for third-party facilitation and mediation, including active listening, empathy, paraphrasing, reframing, and negotiation, in addition to analytical skills of problem solving and creation of transformational processes. Cases for practice focus on interpersonal and intergroup conflict.

Equivalent to CONF 713 (2011-2012 Catalog)

Corequisite(s): CONF 501.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 3
When Offered: Fall, Spring

CONF 621 - Reflective Practice in Organizational or Community Conflict

Credits: 3 (NR)
Moves from conflicts that are simply described to those with multilevel components, such as community and organizational conflicts. Expands skills acquired in CONF 620 by adding recording chronology, identifying roles played by various participants, observing turning points in process, and precisely stating agreed-on solution.

Corequisite(s): CONF 501 and CONF 620.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 3
When Offered: Fall, Spring.

CONF 622 - Reflective Practice in International Conflict and Civil Strife

Credits: 3 (NR)
Continues study of resolution processes as applied to highly complex systems, especially where one party denies legitimacy of
existing political authority. Considers third-party options for intervention in revolutionary and international conflicts, building communication and trust among parties, and implementing agreements.

**Corequisite(s):** CONF 501 and CONF 620.

**Hours of Lecture or Seminar per week:** 0  
**Hours of Lab or Studio per week:** 3  
**When Offered:** Fall, Spring

**CONF 642 - Integration of Theory and Practice**

Credits: 3 (NR)  
Taken in last semester of master's student course work. Assists in developing students' own theories of conflict and conflict resolution by reviewing and integrating prior course work. Students expected to demonstrate holistic comprehension by writing major essay of publishable quality.

**Prerequisite(s):** CONF 501, 601, 610, 713  
**Corequisite(s):** CONF 501, 601, 610, 713

**CONF 643 - Pract: Conf Anly/Resolut**

Credits: 3 (NR)  
**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**Grading:** Graduate Special

**CONF 650 - Conflict Analysis and Resolution Advanced Skills**

Credits: 3 (NR)  
Introduces innovative practices and provides structure to reflect on and improve ability to work within conflict settings. Considers the intersection of theory and practice, with special attention to the challenges of translation, adaptation, and transfer of skills and models.

**Prerequisite(s):** CONF 501 or 502  
**Corequisite(s):** CONF 501 or 502

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0
CONF 651 - Conflict Analysis and Resolution for Collaborative Leadership in Community Planning

Credits: 3 (NR)

Covers designing collaborative processes to work with diverse stakeholders to build meaningful and lasting shared agreements. Considers applications in land use, development, or other community planning contexts. Designated a Green Leaf Course.

Prerequisite(s): CONF 501 or 502

Corequisite(s): CONF 501 or 502

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CONF 652 - Conflict Analysis and Resolution for Prevention, Reconstruction, and Stabilization Contexts

Credits: 3 (NR)

Considers conflict analysis and resolution approaches to designing, implementing, and evaluating holistic cross-sectoral, conflict-sensitive initiatives in areas of potential violence and postconflict reconstruction and stabilization contexts.

Prerequisite(s): CONF 501 or 502

Corequisite(s): CONF 501 or 502

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CONF 653 - World Religions, Diplomacy, and Conflict Resolution

Credits: 3 (NR)

Analyzes ways world religions play role in conflicts, war, diplomacy, peace making, and conflict resolution.

Prerequisite(s): CONF 501 or 502

Corequisite(s): CONF 501 or 502

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CONF 656 - Integrating Complementary Approaches in Conflict Analysis and Resolution
Considers designs and methods for conflict analysis and resolution that integrate multiple approaches, stakeholders, and methods. Applies to social conflicts in local and international contexts.

**Prerequisite(s):** CONF 501 or 502

**Corequisite(s):** CONF 501 or 502

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**CONF 657 - Facilitation Skills**

Credits: 3 (NR)  
Covers range of skills in group facilitation processes, with emphasis on conflict analysis and resolution approaches to improve group communication. Includes skill-building exercises.

**Prerequisite(s):** CONF 501 or 502

**Corequisite(s):** CONF 501 or 502

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**CONF 658 - Diversity and Difference in Conflict Analysis and Resolution**

Credits: 3 (NR)  
Covers elements of cultural diversity, understanding, and awareness, as well as creative ways of approaching issues of diversity, identity, worldviews, and territory. Considers individuals, organizations, communities and nations.

**Prerequisite(s):** CONF 501 or 502

**Corequisite(s):** CONF 501 or 502

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**CONF 659 - Leadership in Conflict Analysis and Resolution**

Credits: 3 (NR)  
Covers roles and styles of leadership in interpersonal, organizational, community, group, and international conflicts. Considers cultural roles of leaders as insider-partials, negotiators, facilitators, and mediators.

**Prerequisite(s):** CONF 501 or 502

**Corequisite(s):** CONF 501 or 502
CONF 660 - Conflict Assessment and Program Evaluation

Credits: 3 (NR)
Covers assessment methods appropriate to conflict contexts and related evaluation approaches and techniques for use in areas of peace building, community processes, or interpersonal conflict.

Prerequisite(s): CONF 501 or 502

Corequisite(s): CONF 501 or 502

CONF 665 - Special Topics in Conflict Analysis and Resolution

Credits: 3 (RD)
In-depth study of contemporary areas of conflict resolution practice.

Prerequisite(s): CONF 502 or permission of the instructor

Notes: Fulfills elective requirement for certificate program. Topics vary.

CONF 668 - Applied Integration for Graduate Certificates

Credits: 3 (NR)
Capstone course facilitating integration of learning in the graduate certificate programs and appropriate mentored application and experiential learning.

Prerequisite(s): CONF 501 or 502; CONF 660; and CONF 650,651,652 or 653

CONF 682 - Principles of Environmental Conflict Resolution

Credits: 3 (NR)
Explores the nature and characteristics of environmental conflict and efforts to manage, resolve or transform it. Students will
develop a capacity to assess the strengths and weaknesses of environmental conflict resolution processes while learning about best practices for preventing, preparing for, and addressing environmental conflict. Designated a Green Leaf Course.

Equivalent to EVPP 682

Prerequisite(s): CONF 501, 502, EVPP 607 or permission of instructor

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CONF 683 - Environmental Conflict Resolution and Collaboration: Situation Assessment, Process Design and Best Practices

Credits: 3 (NR)

Explores best practices for managing, resolving, and transforming environmental conflict using environmental conflict resolution (ECR) processes. Nature and dynamics of environmental disputes, methods for assessing conflict situations, and methods for conducting various forms of ECR processes will be covered in the context of selected case studies with emphasis on student involvement. Designated a Green Leaf Course.

Equivalent to EVPP 683

Prerequisite(s): CONF 682/EVPP 682 or permission of instructor

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CONF 684 - Environmental Conflict Resolution and Collaboration: Leadership Practicum/Capstone

Credits: 3 (NR)

Capstone course for the Graduate Certificate in Environmental Conflict Resolution and Collaboration. Under supervision of the instructor, students will undertake an assessment of an active environmental conflict and recommend a range of processes that promote identified goals for preferred conflict outcomes.

Equivalent to EVPP 684

Prerequisite(s): CONF 682/EVPP 682, CONF 683/EVPP 683

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CONF 690 - Practicum in Conflict Analysis and Resolution
Credits: 3 (RD)
In-depth field study of ongoing conflict situations, and design and delivery of intervention processes to manage or resolve conflicts.

Prerequisite(s): CONF 501 or 801, and 713

Notes: Two semesters, 3 credits per semester.

CONF 694 - Internship

Credits: 1-6 (RT)
Students are expected to mesh theory and practice through observation and experience. Includes comprehensive report analyzing experiences. For 3 credits of internship students must complete 160 hours of work on site. Students must receive permission of the Internship Coordinator prior to registering.

Prerequisite(s): 21 credits, including CONF 620.

Notes: Under direction of internship coordinator, students spend at least 160 hours on project involving study, resolution of conflict for each 3-credit internship.

CONF 695 - Selected Topics

Credits: 3 (RT)
Topics vary; announced each academic year.

CONF 697 - Directed Reading

Credits: 1-3 (RT)
Independent reading at master's level on specific topic related to conflict analysis and resolution, as agreed to by student and faculty member.

Notes: May be repeated up to 6 credits.
CONF 702 - Peace Studies

Credits: 3 (NR)

Examines diverse meanings of peace, conflict, and violence, and then reviews different issues relevant to understanding peace and conflict, including the sources of war, poverty and economic disparities, and ecological degradation. Other topics to be covered are peace keeping, peace building, sustainable development, ecological preservation, nonviolence, and peace movements.

Designated a Green Leaf Course.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CONF 704 - Narrative Approaches to Conflict Analysis

Credits: 3 (NR)

This course provides participants with the analytic tools needed to conduct their own research on conflict and conflict resolution, using a narrative perspective. This course enables students to a) review the key narrative research in the field of conflict resolution; b) design a narrative analysis of conflict; c) conduct a narrative analysis of conflicts.

Corequisite(s): CONF 501, 801, or permission by instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CONF 705 - Conflict and Discourse Analysis

Credits: 3 (NR)

The study of discourse, culture, narratives and public interpretations are becoming ever more important to the field of Conflict Analysis and Resolution. In this class we explore these concepts as they have been used in cutting edge approaches to the analysis and resolution of conflict.

Corequisite(s): CONF 501, 801, or permission by instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CONF 708 - Identity and Conflict

Credits: 1-3 (NR)

Explores complex interrelations of social identity and postmodern conflicts in society. Emphasizes the role of identity in processes of conflict resolution and transformation. Critical rethinking of ethnic, national, and religious identities as both generators and outcomes of conflict are an important part of the course. Extends knowledge on structure and dynamics of
identity-based conflicts and develops a framework for their resolution. Course includes lectures, simulations, and case studies.

**CONF 709 - War, Violence, and Conflict Resolution**

Credits: 3 (NR)
Considers various theories, causes, and conditions of violence, and applies them to variety of cases: family abuse, religious and ethnic violence, terrorism, revolution, and warfare. Applies insights from study of initiation, escalation, management, resolution, and prevention of violence to theories about resolving deep rooted conflicts.

**Prerequisite(s):** CONF 501 or 801

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**CONF 720 - Ethnic and Cultural Factors in Conflict Resolution**

Credits: 1-3 (NR)
Examines the role culture plays in genesis, structuring, and resolution of processes of conflict within and between groups. Special attention to ethnicity and other subcultural markers of identity in complex social systems as generators and outcomes of conflict. Explores relevance of variables to success or failure of conflict resolution.

**Prerequisite(s):** CONF 501 or 801

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**CONF 721 - Conflict and Race**

Credits: 3 (NR)
Addresses historic analyses of racial and ethnic identity conflicts and their resolution.

Equivalent to SOCI 523

**Prerequisite(s):** CONF 501 or 801

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**CONF 722 - Conflict and Religion**
Credits: 3 (NR)
Explores role of religious ideas, practices, and organizations in conflict, war, peace making, and conflict resolution.

**Prerequisite(s):** CONF 501 or 801

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0

**CONF 723 - Conflict and Gender**

Credits: 3 (NR)
Examines constructs of gender and conflict as they relate to critical analysis of theory and practice. Reviews feminist theories for contributions to social and conflict theories. Uses narratives to explore how gender, power dynamics interact in conflict.

**Prerequisite(s):** CONF 501 or 801

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0

**CONF 724 - Conflict and 'Isms'**

Credits: 3 (NR)
**Prerequisite(s):** CONF 501 or 801; 720 recommended.

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0

**CONF 725 - Conflict and Spirituality**

Credits: 3 (NR)
**Prerequisite(s):** CONF 501 or 801.

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0

**CONF 726 - Moral and Philosophical Foundations of Conflict**

Credits: 3 (NR)
Explores major historical and contemporary positions on the intellectual, moral, and religious foundations for analyzing and resolving conflict. Enhances critical abilities in metacritique, dialectics, and intellectual self-appropriation.

**Prerequisite(s):** CONF 501 or 801
CONF 728 - Human Rights Theory and Practice in Comparative Perspective

Credits: 3 (NR)
Introduces major controversies and debates surrounding use of human rights theory and practice cross-culturally. After basic study of human rights philosophy, uses case studies from around the world to examine problems and potential of human rights in today's globalized world.

Prerequisite(s): CONF 501 or 801, or permission of instructor

CONF 729 - Approaches to Violence

Credits: 3 (NR)
Explores violence from variety of intellectual and political perspectives. Readings are wide-ranging and interdisciplinary, addressing levels of analysis from biological to nation-state and transnational processes.

Prerequisite(s): CONF 501 or 801

CONF 730 - Structural Sources of Conflict

Credits: 3 (NR)
Examines how structures and institutions affect behavior and give rise to conflictual relationships at all social levels, from interpersonal to the international. Explores role of conflict resolution as political process providing opportunities for nonviolent system change.

Prerequisite(s): CONF 501 or 801, and 601 for MS; or 803 for PhD

CONF 731 - Conflict in Organizations

Credits: 3 (NR)
Explores intersection and dynamics of organizational behavior and dimensions of conflict. Involves theoretical perspectives and cases examining conflict analysis and resolution. Practices strategies for prevention and intervention. Field research in greater metropolitan area integrates course content.
**CONF 732 - Conflict in Development**

Credits: 3 (NR)
Examines the relationship between processes of political and economic change and conflict; the relationship between democratization and conflict; the relationship between structural adjustment policies and conflict; and the challenges of postconflict reconstruction.

**Prerequisite(s):** CONF 501 or 801

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0

**CONF 733 - Law and Justice from a Conflict Perspective**

Credits: 1-3 (NR)
Contrasts legal processes and institutions with alternative approaches to dispute resolution. Defines and distinguishes among law, "alternative dispute resolution," and problem-solving analysis as methods for resolving rather than controlling conflict. Examines to what extent legal procedures are truly applicable to resolving deep-rooted conflict.

**Prerequisite(s):** CONF 501 or 801

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0

**CONF 734 - Conflict and Crime**

Credits: 3 (NR)
**Prerequisite(s):** CONF 501 or 801 or permission of instructor.

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0

**CONF 735 - Global Context of Conflict**

Credits: 3 (NR)
Advances skills and knowledge base in critical analysis and creative problem-solving. Examines root causes of conflict in global context in terms of gender inequality, cultural differences, unequal North and South relations, militarism, economic oppression, genocide, maldevelopment, religious and ethnic struggles, and environmental scarcity. Students develop their own conceptual
tool boxes to analyze conflicts in different parts of the world.

**Prerequisite(s):** CONF 501 or 801

**CONF 736 - Globalization and International Conflict**

Credits: 3 (NR)
Explores economic, political, social, and cultural meanings of globalization; how they affect conflict processes at international level; and when and under what conditions globalization promotes cooperation or conflict.

**Prerequisite(s):** CONF 501 or 801.

**CONF 737 - Societies/Globalizatn/Conflict**

Credits: 3 (NR)
**Prerequisite(s):** CONF 501 or permission of instructor.

**CONF 739 - Collective Action, Social Movements, and Globalization**

Credits: 3 (NR)
Explores how people translate underlying grievances into collective action. Examines how groups organize, frame, and develop strategies and tactics to pursue agendas, and how processes of globalization have influenced social movement dynamics.

**Prerequisite(s):** CONF 501 or 801.

**CONF 740 - Conflict Roles, Resources, and Ethics**

Credits: 3 (NR)
Analyzes and critiques nature and roles in conflicts. Uses theoretical perspectives, case histories to understand how settings affect roles. Includes ethical assessment of interventions in variety of conflict settings.

**Prerequisite(s):** CONF 501 or 801, 713
CONF 741 - Negotiations

Credits: 3 (NR)
Uses negotiating experiences to construct framework for thinking about and analyzing negotiation processes. Framework then used to organize review of research literature on rhythms and patterns of negotiation and to analyze actual cases. Interweaves exercises, class projects with state-of-the-art concepts and findings.

Prerequisite(s): CONF 501 or 801 or permission of instructor.

CONF 742 - Environment and Policy

Credits: 3 (NR)
Prerequisite(s): CONF 501 or 801 or permission of instructor.

CONF 743 - Dynamics of Conflict Termination

Credits: 3 (NR)
Investigates a number of themes relating to war termination with an emphasis on contemporary civil wars. Considers the nature of civil war, focuses attention on a number of contemporary cases, raises questions relating to settlement and series of themes relating to peace implementation and peace building.

Prerequisite(s): CONF 501 or 801

CONF 744 - Peace Keeping

Credits: 3 (NR)
Prerequisite(s): CONF 501 or 801.

Courses offered: Fall 2013, Spring 2014, Fall 2014.
CONF 745 - Leadership Roles in Conflict and Conflict Resolution

Credits: 3 (NR)
Leadership responses to conflict are affected by several variables, including race, ethnicity, and gender. Explores roles of leadership decision-making styles as agents of conflict across range of conflict scenarios at interpersonal, community, organizational, and international levels.

Prerequisite(s): CONF 501 or 801

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CONF 746 - Peace Building

Credits: 3 (NR)
Building on initiatives of United Nations and other multilateral organizations, explores dynamics of post-conflict peace building. Prepares students of conflict resolution to play innovative roles in reconstruction of civil societies.

Prerequisite(s): CONF 501 or 801

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CONF 747 - Reconciliation

Credits: 3 (NR)
Explores processes of acknowledgment, reconciliation, forgiveness, and restitution. Reviews literature, case studies, and other research to assess applicability and impact of these efforts.

Prerequisite(s): CONF 501 or 801

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CONF 748 - Comparative Peace Processes

Credits: 3 (NR)
Compares case studies drawn from actual peace processes, both successful and unsuccessful, to illuminate principles and complexities.

Prerequisite(s): CONF 501 or 801, and 601 or 803.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
CONF 749 - World Religions, Violence, and Conflict Resolution

Credits: 1-3 (NR)
Examines how world religions play a role in conflict and conflict resolution. Investigates how values, world view, and hermeneutics influence strategies for successful conflict interventions.

Prerequisite(s): CONF 501 or 801

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CONF 750 - Evaluation of Conflict Resolution Initiatives

Credits: 3 (NR)
Examination of models and methodologies for evaluation of conflict resolution initiatives. Evaluation approaches taught will include action evaluation, program evaluation, formative evaluation, and summative evaluation. Students will be expected to complete an evaluation design for an actual conflict resolution-related initiative as the major course requirement and participate in the class evaluation project.

Prerequisite(s): CONF 501 or 801.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CONF 751 - Political Economy of Civil War and Peacebuilding I

Credits: 3-6 (NR)
The course will cover the latest research, theories, and case analysis on civil wars and peacebuilding, including topics such as: The social, economic, and political institutional origins of conflict; The roles of resources, institutions, and social formations in shaping dynamics of civil war and other related forms of contentious politics; War termination and comparative peace processes; Components and dynamics of peacebuilding and the relationships among peacebuilding, democratization, and state-building; Roles of third parties in promoting negotiations, peace implementation and sustainable peacebuilding and reconciliation. Case studies of contemporary civil wars will be used to illustrate and test these conceptual frameworks. This course is the first in a year-long seminar. Students are required to take the second course in the seminar CONF 752.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

CONF 752 - Political Economy of Civil War and Peacebuilding II

Credits: 3-6 (NR)
The course will cover the latest research, theories, and case analysis on civil wars and peacebuilding, including topics such as: The social, economic, and political institutional origins of conflict; The roles of resources, institutions, and social formations in shaping dynamics of civil war and other related forms of contentious politics; War termination and comparative peace processes; Components and dynamics of peacebuilding and the relationships among peacebuilding, democratization, and state-building;
Roles of third parties in promoting negotiations, peace implementation and sustainable peacebuilding and reconciliation. Case studies of contemporary civil wars will be used to illustrate and test these conceptual frameworks. This course is the second in a year-long seminar. Students are required to have taken CONF 751 in the previous semester.

**Prerequisite(s):** CONF 751.

**CONF 753 - Post-Conflict Contexts: Between Global and Local**

Credits: 3 (NR)
Focuses on the aftermath of violent conflict, attending to issues of structural inequality, memory, narrative, gender, trauma, culture and identity. Critically evaluates theories and practices of transitional justice and post-conflict peacebuilding, including justice, reparation, truth-telling, reconciliation, memorialization and psychosocial repair. Considers forms of social change and governance that emerge through post-conflict interventions, and explores dynamic frictions between globalizing models and local concerns.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall, Summer

**CONF 795 - Professional Development Seminars**

Credits: 1-2 (RT)  
These 1- and 2-credit courses are scheduled non-conventionally using weekends, concentrated presentations, and intersession periods to develop advanced professional skills. Possible topics include marketing conflict resolution services, academic course design, training design, mediation, facilitation, family practice, fundraising, writing for publication, advanced field research techniques, and grassroots applications of conflict resolution.

**Prerequisite(s):** CONF 501 or 801, or permission of instructor.

**Notes:** May be repeated.

**CONF 797 - Proposal Development**

Credits: 1 (NR)  
Covers development of research proposal for master’s thesis, including framing a question, literature review, and designing appropriate methodology. Students form master’s thesis committee and review Human Subjects Review Board’s guidelines and procedures.

**Corequisite(s):** CONF 501 and 610
CONF 799 - Master's Thesis

Credits: 1-6 (RT)
Two semesters, usually taken as 3 credits per semester. Original research or analysis under direction of thesis committee.

Prerequisite(s): CONF 501, 713, 610.

CONF 801 - Introduction to Conflict Analysis and Resolution

Credits: 3 (NR)
Introduces field of conflict analysis and resolution for doctoral students. Examines definitions of conflict and diverse views of resolution. Explores thinking about human behavior and social systems as they relate to origins and role of conflict in violent and peaceful social change. Considers appropriate responses to conflict at interpersonal, intergroup, industrial, communal, and international levels.

Notes: Prerequisite or corequisite for all PhD CONF students

CONF 802 - Theories of the Person

Credits: 3 (NR)
Understanding human conflict requires knowledge of human behavior, motivation, and perception. Reviews and critically analyzes several psychological theories for application to conflict analysis and resolution theory and practice.

Prerequisite(s): CONF 801

Corequisite(s): CONF 801

CONF 803 - Structural Theories
Understanding social conflict and potential for conflict resolution requires that both conflict and cooperation be perceived in relation to patterns of social change. Reviews and critiques significant theories of social change to establish a basis for creative conflict analysis and resolution.

**Prerequisite(s):** CONF 801.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**CONF 804 - Alternate Theoretical Foundations**

Credits: 3 (NR)  
Familiarizes students with the ideas generated by the Frankfurt School of social theorists and others who have extended or altered these ideas. Students will use these insights to deepen an understanding of serious social conflicts and to explore the implications of critical theories for conflict resolution processes.

**Corequisite(s):** CONF 801

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**CONF 811 - Quantitative Foundations**

Credits: 3 (NR)  
Building on logic of inquiry, introduces steps in research process to prepare dissertation and implement published research. Covers wide array of quantitative research approaches in social sciences, with emphasis on conflict analysis.

**Prerequisite(s):** CONF 801.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**CONF 812 - Qualitative Foundations: Social Sciences**

Credits: 3 (NR)  
Continuation of steps in research process to prepare dissertation and implement published research. Builds on CONF 811 by examining qualitative research approaches used in social sciences, with emphasis on conflict analysis.

**Prerequisite(s):** CONF 801.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**CONF 813 - Qualitative Foundations: Humanities**
Credits: 3 (NR)
Explores qualitative research design as it pertains to the humanities, including the methods and epistemology behind the various issues likely to emerge in the process of conducting research. In addition to material on research design and methodology, reading assignments include several monographs that employ different qualitative methodologies.

Prerequisite(s): CONF 801

Corequisite(s): CONF 801

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CONF 820 - Reflective Practice in Interpersonal-Multiparty Conflicts

Credits: 3 (NR)
Introductory skill-building course integrating conflict theory and practice using reflective practitioner model. Students learn necessary skills for third-party facilitation and mediation, including active listening, empathy, paraphrasing, reframing, and negotiation, in addition to analytical skills of problem solving and creation of transformational processes. Cases for practice focus on interpersonal and intergroup conflict.

Equivalent to CONF 713 (2011-2012 Catalog)

Corequisite(s): CONF 801.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 3
When Offered: Fall, Spring

CONF 821 - Reflective Practice in Organizational or Community Conflict

Credits: 3 (NR)
Moves from conflicts that are simply described to those with multilevel components, such as community and organizational conflicts. Expands skills acquired in CONF 820 by adding recording chronology, identifying roles played by various participants, observing turning points in process, and precisely stating agreed-on solution.

Corequisite(s): CONF 801 and CONF 820.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 3
When Offered: Fall, Spring.

CONF 822 - Reflective Practice in International Conflict and Civil Strife

Credits: 3 (NR)
Continues study of resolution processes as applied to highly complex systems, especially where one party denies legitimacy of existing political authority. Considers third-party options for intervention in revolutionary and international conflicts, building communication and trust among parties, and implementing agreements.
Corequisite(s): CONF 801 and CONF 820.

Conf 890 - Practicum in Conflict Analysis and Resolution

Credits: 3 (RD)
In-depth field study of ongoing conflict situations. Design and delivery of intervention processes to manage or resolve conflicts.

Prerequisite(s): CONF 801 and 713.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 5
Grading: Graduate Special

Conf 897 - Directed Reading

Credits: 1-3 (RD)
Independent reading at doctoral level on a specific topic related to conflict and conflict resolution as agreed to by student and faculty member.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

Conf 900 - Integrating Theory, Practice, and Method in Conflict Analysis

Credits: 3 (NR)
Analyzes theoretical basis undergirding methods of research in conflict resolution. Explores how theory is built through reciprocal influence of research and practice. Assists students to fill in gaps in their knowledge and prepare for comprehensive examinations. Prepares students to write integrated research proposals.

Prerequisite(s): CONF 801 and 802, and at least 9 additional credits of required doctoral courses

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

Conf 901 - Theory Development

Credits: 3 (NR)
Prerequisite(s): CONF 801, 802, or permission of instructor.
CONF 998 - Doctoral Dissertation Proposal

Credits: 1-6 (RD)
Work on research proposal that forms basis for doctoral dissertation.

Prerequisite(s): Successful completion of all course work and doctoral qualifying exams

Notes: May be repeated.

CONF 999 - Doctoral Dissertation Research

Credits: 1-12 (RD)
Research on approved dissertation topic under direction of committee. Student's dissertation proposal must be approved before registering for 999.

Notes: At least 12 credits of 998 and 999 must be accumulated toward degree.

Conservation Studies (CONS)

Offered by the University

CONS 320 - Conservation in Practice

Credits: 3 (NR)
Work with a conservation mentor in a practicum experience. Create a portfolio documenting professional development.

Prerequisite(s): 60 credits and college level coursework in the biological or environmental sciences.

Notes: Must be taken concurrently with CONS 401, CONS 402, CONS 410, and CONS 490 or CONS 403, CONS 404, CONS 411, and CONS 491. Only offered through the Smithsonian-Mason Semester.
CONS 401 - Conservation Theory

Credits: 3 (NR)

Introduces the field of conservation biology and science-based management of threatened wildlife, habitats, and human landscapes. Provides theoretical background for understanding the importance of biodiversity conservation and sustainability. Designated a Green Leaf Course.

Prerequisite(s): 60 credits and college level coursework in the biological or environmental sciences.

Notes: Must be taken concurrently with CONS 320, CONS 402, CONS 410, and CONS 490. Only offered through the Smithsonian-Mason Semester. Students cannot get credit for this course and Biology 318 or NCLC 401.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 1

CONS 402 - Applied Conservation

Credits: 4 (NR)

A practical scientific approach to the nature of biodiversity and species loss. Students participate in field conservation exercises in a variety of settings, as well as endocrine and reproductive technology labs. Students apply field and laboratory experiences to understanding science's connection to management decision-making for conservation. Designated a Green Leaf Course.

Prerequisite(s): 60 credits and college level coursework in the biological or environmental sciences.

Notes: Must be taken concurrently with CONS 320, CONS 401, CONS 410, and CONS 490. Only offered through the Smithsonian-Mason Semester.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 2

CONS 403 - Ecology and Conservation Theory

Credits: 3 (NR)

Students learn ecological theories that underlie successful conservation practice. Content includes an in-depth examination of factors that influence the distribution and abundance of organisms within landscapes across temporal and spatial scales. In individual and group activities, students review conservation case studies, interpret scientific data, and apply their analysis to conservation scenarios at many scales. Designated a Green Leaf Course.

Prerequisite(s): Admission into the Smithsonian-Mason Monitoring Semester.
Corequisite(s): Enrollment in the Smithsonian-Mason Monitoring Semester.

Hours of Lecture or Seminar per week: 0-3
Hours of Lab or Studio per week: 0-3

CONS 404 - Monitoring and Assessment of Biodiversity

Credits: 4 (NR)

In lab and field experiences, students learn practical techniques for the assessment, monitoring and conservation of species and habitats. Students practice sampling species and learn to evaluate the effectiveness of those techniques. Through individual and group projects, students collect, analyze data across a variety of temporal and spatial scales. Designated a Green Leaf Course.

Prerequisite(s): Admission into the Smithsonian-Mason Monitoring Semester.

Corequisite(s): Enrollment in the Smithsonian-Mason Monitoring Semester.

CONS 410 - Human Dimensions in Conservation

Credits: 3 (NR)

Provides sociological, local and global perspectives on conservation issues including adaptive management, conflict resolution, environmental economics, sustainability, public policy, environmental values and public opinion, and conservation ethics. Designated a Green Leaf Course.

Fulfills general education requirement in social and behavioral science.

Prerequisite(s): 60 credits and college level coursework in the biological or environmental sciences.

Notes: Must be taken concurrently with CONS 320, CONS 401, CONS 402, and CONS 490. Only offered through the Smithsonian-Mason Semester.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CONS 411 - Science Communication for Conservation

Credits: 3 (NR)
Addresses the need for clear, direct and proactive communication of scientific processes. Students design communication strategies for diverse audiences and learn skills to engage stakeholders in dialogue related to specific conservation issues. Through individual and group activities that emphasize written, visual and oral communications techniques, students learn how the messages can affect people.
Designated a Green Leaf Course.

**Prerequisite(s):** Admission into the Smithsonian-Mason Monitoring Semester.

**Corequisite(s):** Enrollment in the Smithsonian-Mason Monitoring Semester.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**CONS 420 - Human-Wildlife Conflict**

Credits: 3 (NR)  
Covers the impact of human-wildlife conflict on conservation efforts and human health and well being.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**CONS 490 - Integrated Conservation Strategies**

Credits: 3 (NR)  
Integrates the course work of the Smithsonian-Mason Semester through study of current conservation issues. Students incorporate interdisciplinary aspects of conservation into a summative group case study on a chosen conservation issue and present formally before a faculty panel.
Designated a Green Leaf Course.

Fulfills general education requirement in synthesis.

**Prerequisite(s):** Junior standing and a college level biological or environmental science course

**Notes:** Must be taken concurrently with CONS 320, CONS 401, CONS 402, and CONS 410. Only offered through the Smithsonian-Mason Semester.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**CONS 491 - Comprehensive Conservation Planning**

Credits: 3 (NR)
Students construct a synthesis project integrating the conservation theory, application, and communications techniques presented throughout the semester. With a mentor, students develop a monitoring and assessment plan for a species or habitat of conservation concern, working individually and in teams. This plan includes background, measurable objectives, sampling strategies, proposed data analysis and a communications and media plan. Designated a Green Leaf Course.

**Prerequisite(s):** Admission into the Smithsonian-Mason Monitoring Semester.

**Corequisite(s):** Enrollment in the Smithsonian-Mason Monitoring Semester.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**CONS 497 - Special Topics in Conservation**

Credits: 1-3 (RD)  
Topics of current relevance to the field of conservation.

**Hours of Lecture or Seminar per week:** 1-3  
**Hours of Lab or Studio per week:** 0

**CONS 498 - Internship**

Credits: 1-3 (RD)  
Directed readings and final reflective paper or project in conjunction with an internship subject to instructor approval. Permission to enroll must be obtained from the Mason Center for Conservation Studies at least two weeks prior to the start of the semester.

**Hours of Lecture or Seminar per week:** 1-3  
**Hours of Lab or Studio per week:** 1-6

**CONS 499 - Independent Study/Research**

Credits: 1-3 (RD)  
An independent project or directed exploration into an area of conservation not covered by other courses.

**Prerequisite(s):** Permission of instructor.

**Hours of Lecture or Seminar per week:** 1-3  
**Hours of Lab or Studio per week:** 1-12
CONS 620 - Spatial Ecology, Geospatial Analysis & Remote Sensing for Conservation

Credits: 3 (NR)
Teaches students to use spatial ecology, geospatial analysis, and remote sensing tools to assess and model species distribution and habitat use in dynamic landscapes. Includes computer and field labs with examples using data from Smithsonian research.

Notes: Offered through the Mason Center for Conservation Studies in cooperation with the Smithsonian Conservation Biology Institute on site in Front Royal, VA. This course is not available to students pursuing a degree at George Mason without prior written approval of the graduate director of the student’s program.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CONS 625 - Statistics for Ecology and Conservation Biology

Credits: 3 (NR)
Provides an overview of experimental design and analysis techniques used in cutting-edge ecological research and conservation. Focuses on increasing knowledge of statistical tests, interpretation of results, and ability to disseminate and clearly explain these results. Students gain an overview of applied monitoring and analysis techniques such as distance sampling, genetic analysis, niche and species distribution modeling, and spatial analysis.

Prerequisite(s): Basic statistics course

Notes: Offered through the Mason Center for Conservation Studies in cooperation with the Smithsonian Conservation Biology Institute on site in Front Royal, VA. This course is not available to students pursuing a degree at George Mason without prior written approval of the graduate director of the student’s program.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CONS 630 - Species Monitoring & Conservation

Credits: 3 (RD)
Explores monitoring and conservation research methods and approaches for specific taxa through lectures, case studies, lab exercises, and field work. Focuses on conservation science and conservation outreach techniques.

Prerequisite(s): A general biology (or relevant species-related) course and a statistics course, or permission of instructor. Prior coursework in environmental science, zoology, and ecology recommended.

Notes: May be repeated for credit with approval of the Mason Center for Conservation Studies. A maximum of 6 credits may be applied to the Applied Conservation Science Certificate.

Offered through the Mason Center for Conservation Studies in cooperation with the Smithsonian Conservation Biology Institute on site in Front Royal, VA. This course is not available to students pursuing a degree at George Mason without prior written approval of the graduate director of the student’s program.
CONS 635 - Non-Invasive Genetic Techniques in Wildlife Conservation

Credits: 2 (NR)
Introduces the benefits, drawbacks and applications of non-invasive genetic techniques to wildlife conservation; focuses on answering questions in animal behavior, population biology, and population management, particularly for vertebrate populations; provides hands-on experience relating to all stages of a research project utilizing modern noninvasive methods from sample collection to data analysis and interpretation.

Prerequisite(s): College-level Genetics Course AND College-level Ecology/Evolution Course.

Notes: This course is taught as an intensive, mixed-format (lectures, discussions, lab and computer exercises) offering, in a residential, full-day, 1-week session held at the Smithsonian Conservation Biology Institute in Front Royal, VA. Students also complete pre-course reading assignments, and prepare and submit final projects after the intensive onsite session has concluded.

CONS 640 - Adaptive Management for Conservation Success

Credits: 3 (NR)
Sound training in adaptive management is essential for conservationists dealing with the challenges of a changing planet. In groups, students develop a management plan for a real-world conservation project using the adaptive management framework of the Open Standards for the Practice of Conservation. Students can extend the techniques to their own work after the course.

Notes: This Smithsonian-Mason Conservation Studies Program course is an intensive 2-week fulltime residential session, incorporating lectures, discussions, and student exercises on group projects. This course will be held at the Smithsonian Conservation Biology Institute’s 3,200 acre facility in Front Royal, VA, USA

CONS 660 - Effective Conservation Leadership

Credits: 3 (NR)
Teaches effective leadership and management through individual assignments and group exercises. Explores international environmental and conservation case studies, offers hands-on experience to help students develop their own leadership styles.

Prerequisite(s): None; students should have a basic background in conservation, ecology, environmental sciences, or similar field.

Notes: Offered through the Mason Center for Conservation Studies in cooperation with the Smithsonian Conservation Biology Institute on site in Front Royal, VA. This course is not available to students pursuing a degree at George Mason without prior written approval of the graduate director of the student’s program.
CONS 665 - Conservation Conflict Resolution

Credits: 3 (NR)

Focuses on approaches to cultivating sustainable conservation solutions, including determining root causes of complex conflict dynamics, designing decision-making processes to address conflict, and building mutual respect and trust among stakeholders. Employing principles and strategies developed by the Human-Wildlife Conflict Collaboration (HWCC), students learn how to resolve current conservation conflicts, anticipate arising ones, and reconcile old conflicts that impede new progress. Designated a Green Leaf Course.

Notes: Offered through the Mason Center for Conservation Studies in cooperation with the Smithsonian Conservation Biology Institute on site in Front Royal, VA. This course is not available to students pursuing a degree at George Mason without prior written approval of the graduate director of the student’s program.

CONS 697 - Special Topics in Conservation

Credits: 1-3 (RD)
Topics of current relevance to the field of conservation.

Prerequisite(s): Vary with topic.

Notes: May be repeated for credit with approval of the Mason Center for Conservation Studies. A maximum of 6 credits may be applied to the Applied Conservation Science Certificate.

Offered through the Mason Center for Conservation Studies in cooperation with the Smithsonian Conservation Biology Institute on site in Front Royal, VA. This course is not available to students pursuing a degree at George Mason without prior written approval of the graduate director of the student’s program.

EDCD 500 - In-Service Educational Development

Offered by the College of Education and Human Development
Credits: 1-6 (NR)
Offered at request of school division or other educational agency.

Notes: Content varies; may be repeated for credit.

**Hours of Lecture or Seminar per week:** 1-6  
**Hours of Lab or Studio per week:** 0  
**Grading:** Graduate Special

### EDCD 525 - Advanced Human Growth and Development

Credits: 3 (NR)  
Covers human development throughout the life span, including emotional, physical, and cognitive development; and emphasizes personal adjustment and achievement.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

### EDCD 597 - Special Topics in Education

Credits: 1-6 (RD)  
Provides advanced study on selected topic or emerging issue in American or international education.

Notes: May be repeated for credit with GSE permission.

**Hours of Lecture or Seminar per week:** 1-6  
**Hours of Lab or Studio per week:** 0

### EDCD 598 - Directed Reading, Research, and Individual Projects

Credits: 1-6 (RT)  
Presents various subjects and projects, principally by directed study, discussion, research, and participation under supervision of graduate faculty member.

Prerequisite(s): Admission to degree program and permission of dean.

Notes: May be repeated for up to 12 credits.

**Hours of Lecture or Seminar per week:** 1-6  
**Hours of Lab or Studio per week:** 0  
**Grading:** Graduate Special

### EDCD 599 - Thesis
Credits: 6 (NR)
Study of problem of significant interest to student using accepted research methods and under supervision of graduate faculty member.

Hours of Lecture or Seminar per week: 6
Hours of Lab or Studio per week: 0
Grading: Graduate Special

EDCD 600 - Workshop in Education

Credits: 1-6 (NR)
Offers full-time workshops and weekend seminars on selected topics in education and education tour seminars.

Notes: May be repeated for credit.

Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 0

EDCD 601 - Introduction to Research in Counseling

Credits: 3 (NR)
Enhances knowledge of and involvement in counseling research by introducing techniques and principles to design, implement, and evaluate research projects and program development in community and school settings.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDCD 602 - Foundations in Counseling

Credits: 3 (NR)
Emphasizes history of counseling; multifaceted role of counselors, professional organizations, and memberships; and APA style. Provides a thorough understanding of the CNDV Mission Statement, Mason's Honor Code and Professional Dispositions. Basic skills are briefly introduced and an orientation to multiculturalism and social justice is provided.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDCD 603 - Counseling Theories and Practice

Credits: 3 (NR)
Covers major theoretical approaches to counseling from a multicultural perspective and provides supervised introduction to basic skills.

Prerequisite(s): Admission to CNDV program; EDCD 602 (course may be taken concurrently).
EDCD 604 - Assessment and Appraisal in Counseling

Credits: 3 (NR)
Prepares students to become informed about psychological and educational tests and assessment procedures that are used and applied in a counseling context.

Prerequisite(s): Admission to CNDV program, EDCD 525, and EDCD 601.

EDCD 606 - Counseling Children and Adolescents

Credits: 4 (NR)
Presents theories, techniques, and counseling issues relevant to children and adolescents. Counseling lab provides practice with an emphasis on process and culturally competent counseling strategies.

Prerequisite(s): Admission to CNDV program, EDCD 525 and EDCD 603

EDCD 608 - Group Processes and Analyses

Credits: 4 (NR)
Presents theories appropriate to various types of groups and descriptions of group practices, methods, dynamics, and facilitative skills. Focuses on applying theory to practice. Includes lab.

Prerequisite(s): Admission to CNDV program, EDCD 603; and EDCD 606 or EDCD 609

EDCD 609 - Advanced Counseling Skills and Strategies

Credits: 4 (NR)
Covers counseling skills and process, counselor self-awareness, and strategies associated with major counseling theories. A counseling lab provides skills practice with an emphasis on process and culturally competent counseling strategies.

Prerequisite(s): Admission to CNDV program, EDCD 525 and EDCD 603
EDCD 610 - Career and Educational Counseling

Credits: 3 (NR)
 Presents theories and counseling issues relevant to career counseling in schools and community agencies.

Prerequisite(s): Admission to CNDV program; EDCD 603, 606 or 609.
Corequisite(s): EDCD 604.

EDCD 611 - Introduction to Ethical and Legal Issues in School Counseling

Credits: 2 (NR)
 Introduces principles, practices, and application of ethical and legal issues in school counseling.

Prerequisite(s): Admission to counseling and development program and EDCD 626

EDCD 618 - Principles and Practices of Counseling in International Schools

Credits: 3 (NR)
 Discusses philosophy, principles, and practices for effective international school counseling programs including leadership, advocacy, and program evaluation.

EDCD 620 - Counseling Children and Adolescents in International Schools

Credits: 3 (NR)
 Discusses counseling international school students K-12 from developmental and multicultural perspectives.
EDCD 626 - Principles and Practices of School Counseling

Credits: 3 (NR)
Introduces school counseling program development at K-12 levels. Presents philosophy, principles, and practices of effective school counseling.

Prerequisite(s): Admission to CNDV program, EDCD 602 (course may be taken concurrently).

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDCD 628 - Counseling and Social Justice

Credits: 3 (NR)
Studies relationship between counseling and social justice, and theories, models, and strategies of social justice, social change, leadership, and advocacy in community and school settings. Emphasizes application of theories and models.

Prerequisite(s): Admission to CNDV program, EDCD 603, and 626 or 654.

Corequisite(s): EDCD 660.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDCD 652 - Introduction to Substance Abuse Counseling

Credits: 3 (NR)
Introduces substance abuse counseling. Covers addiction issues, diagnosis and treatment planning, and individual and group counseling strategies with diverse populations.

Prerequisite(s): Admission to the Counseling and Development program and EDCD 603 or concurrent.

Corequisite(s): EDCD 603

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDCD 654 - Counseling, Ethics, and Consultation in Community Agencies

Credits: 3 (NR)
Emphasizes types of services and facilities provided, needs and problems of client population served, role and function of counselor in agency setting, and personnel needs of the individual agency.

Prerequisite(s): Admission to counseling and development program and EDCD 603

Corequisite(s): EDCD 603
EDCD 656 - Diagnosis and Treatment Planning for Mental Health Professionals

Credits: 3 (NR)
Reviews diagnostic criteria associated with mental illness, emphasizes the cultural component of mental illness, and helps students develop written plans and simulate implementation for overall diagnosis and treatment of clients and their families.

Prerequisite(s): Admission to CNDV program, EDCD 603 (course may be taken concurrently).

EDCD 658 - Couples and Family Counseling

Credits: 3 (NR)
Introduces major approaches to counseling couples and families. Uses case studies and simulations to facilitate transition from theory to practice.

Prerequisite(s): Admission to CNDV program; EDCD 609 (may be taken concurrently).

EDCD 660 - Multicultural Counseling

Credits: 3 (NR)
Covers counseling from a multicultural perspective. Explores counseling issues for diverse populations with a focus on ethnicity and race.

Prerequisite(s): Admission to CNDV program, EDCD 608.

EDCD 754 - Practicum in Counseling and Development

Credits: 3-6 (NR)
Provides supervised practice in counseling setting similar to setting in which student may work. Weekly graduate class emphasizes site processing.

Prerequisite(s): Completion of CNDV program except for practicum and internship; permission of advisor; overall GPA of 3.00;
no grade of C in skills courses EDCD 605, 607, 608, and 610; and no more than two grades of C in any other graduate course work required by counseling and development program.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 3

EDCD 755 - Practicum in Counseling

Credits: 3 (NR)
Provides supervised practice for a minimum of 200 hours (for school counseling students) and 300 hours (for community agency students) in counseling setting similar to setting in which student may work.

Prerequisite(s): Completion of CNDV program course work except for EDCD 610 or 611 or electives (total credits cannot exceed 3 credits); permission of advisor; overall GPA of 3.00; no grade lower than B in skills courses EDCD 603, 606, 608, and 609; no more than two grades of C in any other graduate course work required by CNDV program.

Notes: Weekly graduate class emphasizes site processing.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 3
Grading: Graduate Special

EDCD 790 - Internship in Counseling and Development

Credits: 3-6 (NR)
Provides supervised practice in counseling setting similar to setting in which student may work. Skills and practice build on previous practicum experiences. Weekly graduate class emphasizes site processing.

Prerequisite(s): Completion of CNDV program except for internship; permission of advisor; overall GPA of 3.00; no grade of C in any skills courses EDCD 605, 607, 608, 610, and 754; no more than two grades of C in any other graduate course work required by CNDV program.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 3
Grading: Satisfactory/No Credit

EDCD 791 - Internship in Counseling

Credits: 3 (NR)
Provides supervised practice for minimum of 200 hours (for school counseling students) and 300 hours (for community agency students) in counseling setting similar to setting in which student may work. Skills and practice build on previous practicum experiences. Weekly graduate class emphasizes site processing.

Prerequisite(s): Completion of CNDV program course work except for electives (total credits cannot exceed 3 credits) and internship; permission of advisor; overall GPA of 3.00; no grade lower than B in skills courses EDCD 603, 606, 608, 609; no more than two grades of C in any other graduate course work required by CNDV program.
EDCD 797 - Advanced Topics in Education

Credits: 1-6 (RT)
See EDUC 797.

Prerequisite(s): Admission to CNDV program, EDCD 603.

Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 0

EDCD 894 - Advanced Family and Systems Counseling

Credits: 3 (NR)
Develops advanced level skills and competencies in the practice of family and systems counseling. Multiple theoretical models for practice in a multicultural society will be explored, as will the applications of those models in multiple professional settings.

Prerequisite(s): Admission to PhD in Counseling and Development Program.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

EDCD 895 - Emerging Issues in Counseling and Development

Credits: 3 (NR)
Examines issues in counseling profession, including counseling theory and methodology, development of client groups, new roles and settings for counselors, emerging assessment procedures, new understanding of diagnosis; and impact of societal changes on counseling profession.

Prerequisite(s): Admission to PhD program, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDCD 896 - Advanced Multicultural Counseling

Credits: 3 (NR)
Focuses on advanced issues in multicultural counseling, including multicultural counseling theories, skills, assessment, supervision, research, and ethics.
Prerequisite(s): Master's degree in counseling or related counseling field from accredited institution of higher education, EDCD 660 or equivalent, EDCD 895, and admission to counseling and development PhD specialization; or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDCD 897 - Advanced Group Counseling

Credits: 3 (NR)
For doctoral students who have had experience and training in group work. Provides greater understanding and advanced skill application in group dynamics, group process, and group leadership.

Prerequisite(s): Master's degree in counseling or related counseling field from accredited institution of higher education, EDCD 608 or equivalent, EDCD 895, and admission to counseling and development PhD specialization; or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDCD 898 - Grant Writing and Publishing

Credits: 3 (NR)
Focuses on grant writing and publishing in counseling and psychology.

Prerequisite(s): Master's degree in counseling or related counseling field from accredited institution of higher education, EDCD 895, and admission to counseling and development PhD specialization; or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDCD 899 - The Theory and Practice of Counseling Supervision

Credits: 4 (NR)
Explores counseling supervision theory from a multicultural and social justice perspective. Students will apply these theories by supervising Master's level community agency and school counseling practicum students under the supervision of the instructor.

Prerequisite(s): Admission to PhD in Counseling and Development Program; Master's degree in Counseling or related field, or permission of the instructor.

Hours of Lecture or Seminar per week: 4
Hours of Lab or Studio per week: 0

EDCD 900 - Leadership and Advocacy in the Counseling Profession
Credits: 4 (NR)
Introduces students to broad theoretical concepts, strategies, and skills related to leadership and advocacy within the counseling profession, and will help students integrate leadership and advocacy into their professional identity.

Prerequisite(s): Admission to PhD in Counseling and Development Program.

Hours of Lecture or Seminar per week: 4
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

EDCD 990 - Advanced Internship in Counseling Leadership

Credits: 3 (NR)
Provides supervised practice in counseling leadership setting or position. Emphasizes counseling leadership in practice.

Prerequisite(s): Admission to the Ph.D. in Education program, Counseling and Development specialization; EDCD 628 or equivalent; EDCD 895.

Notes: Biweekly class emphasizes site processing, leadership skills, and topical seminars.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDCD 991 - Advanced Internship in Counseling

Credits: 6 (NR)
Provides an intensive multicultural social justice oriented field based supervised experience. Emphasizes intensive use of multicultural competencies in practice, supervision, and program development and evaluation in order to address social justice issues for clients in school or community settings.

Prerequisite(s): Admission to counseling and development PhD specialization; and EDCD 895, 896, and 628 or equivalent.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

EDCD 992 - Advanced Internship in Social Justice

Credits: 3 (NR)
Provides opportunities to implement programs and strategies to affect social justice for clients in school or community settings.

Prerequisite(s): Admission to counseling and development PhD specialization, EDCD 628 or equivalent, and EDCD 895.

Notes: Biweekly class emphasizes topical seminars and supervision.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
Grading: Graduate Special

Criminology (CRIM)

Offered by the College of Humanities and Social Sciences

CRIM 100 - Introduction to Criminal Justice

Credits: 3 (NR)
Overview of the American system of criminal justice, covering theories of justice, criminal law, policing, courts and associated pre and post-trial legal processes, punishment and corrections, and juvenile justice. Required for all criminology majors and minors.

Fulfills general education requirement in social and behavioral science.

Equivalent to ADJ 100 (2009-2010 Catalog)

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CRIM 210 - Introduction to Criminology

Credits: 3 (NR)
Explores and evaluates how crime is defined and measured, and examines crime patterns and trends. Provides an overview and critical assessment of the major theories of crime causation.

Prerequisite(s): CRIM 100.

Notes: CRIM majors who are concentrating in criminal justice are strongly encouraged to take this course before or during the first semester of taking upper-level courses in the concentration.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CRIM 220 - Introduction to Law and Society

Credits: 3 (NR)
Introduces the relationship between law and society. Discusses theoretical perspectives from a number of social science disciplines. Promotes a foundational understanding of the concept of law and the origins, development, and role of law in society, particularly outside of formal legal institutions. Topics covered may include legal mobilization, law and social change, social movements, law and inequality, and law's relationship to social control.

Prerequisite(s): CRIM 100.
Notes: CRIM majors who are concentrating in Law and Society are strongly encouraged to take this course before or during the first semester of taking upper-level courses in the concentration.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CRIM 230 - Introduction to Homeland Security

Credits: 3 (NR)
Introduces fundamental concepts of homeland security. Examines governmental actions designed to prevent, prepare for, respond to, and recover from man-made and natural disasters. Focuses on efforts to align preparedness, incident management, and emergency response plans from various agencies (federal, state, local, tribal, private sector, and non-governmental).

Equivalent to CRIM 461 (2010-2011 Catalog); ADJ 461 (2009-2010 Catalog).

Prerequisite(s): CRIM 100

Notes: CRIM majors who are concentrating in homeland security and justice are strongly encouraged to take this course before or during the first semester of taking upper-level courses in the concentration.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CRIM 301 - Public Law and the Judicial Process

Credits: 3 (NR)
Covers American judicial organization and operation, role of the Supreme Court in policy formation, and selected constitutional principles.

Equivalent to ADJ 301 (2009-2010 Catalog) and GOVT 301

Prerequisite(s): CRIM 100

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CRIM 302 - Delinquency

Credits: 3 (NR)
Presents theories of juvenile delinquency and societal reactions to it, gender differences in rates and types, historical overview, development of juvenile justice system, and critical assessment of juvenile justice and its alternative.

Equivalent to ADJ 302 (2009-2010 Catalog)

Prerequisite(s): CRIM 100
CRIM 304 - Computer Crime, Forensics, and Auditing

Credits: 3 (NR)
Covers computer crime, relevant laws, agencies, standards, auditing, logging, forensics, and related software. Explores legal principles such as chain of evidence, electronic document discovery, eavesdropping, and entrapment. Hands-on experience with forensics tools.

Equivalent to IT 357; ADJ 304 (2009-2010 Catalog)

Prerequisite(s): IT 103 and 223.

CRIM 305 - Crime and Crime Policy

Credits: 3 (NR)
Examines the development of crime policy, including the influence of crime trends, politics, public opinion, media, criminological theory, and empirical research. Considers the effectiveness of crime policy.

Equivalent to ADJ 305 (2009-2010 Catalog)

Prerequisite(s): CRIM 100

CRIM 306 - Criminal Justice Ethics

Credits: 3 (NR)
Analyzes ethical principles relevant for those working in criminal justice. Required for all criminology majors.

Equivalent to ADJ 306 (2009-2010 Catalog)

Prerequisite(s): CRIM 100.

CRIM 307 - Social Inequality, Crime, and Justice
Credits: 3 (NR)
Explores the significance of social inequality (especially race and gender inequality) for several crime and criminal justice issues. Examines the effect of gender and race on rates of criminal offending and victimization and explanations for the variation in offending and victimization.

Equivalent to ADJ 307 (2009-2010 Catalog)

**Prerequisite(s):** CRIM 100

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**CRIM 308 - Human Rights and Justice**

Credits: 3 (NR)
Studies the norms, laws, and systems for the promotion and protection of human rights. Provides a foundation for understanding historical, legal, political, economic, and ethical aspects of human rights. Examines ideological and cultural perspectives, sources of violations, the United Nations, regional and national mechanisms, special issues (e.g., women, torture, children, minorities), and the role of nongovernmental organizations.

Equivalent to ADJ 308 (2009-2010 Catalog)

**Prerequisite(s):** CRIM 100

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**CRIM 310 - Introduction to the Intelligence Community**

Credits: 3 (NR)
Introduces students to the structure, function, and process of the intelligence community including the basic skills in writing, research, and presentation used in intelligence analysis. Required for all intelligence analysis minors.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**CRIM 312 - Intelligence Analysis Techniques**

Credits: 3 (NR)
Introduces the key analytical techniques used by entry-level analysts in the Intelligence community.

**Prerequisite(s):** CRIM 310.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0
**CRIM 315 - Research Methods and Analysis in Criminology**

Credits: 3 (NR)
Provides an introduction to research design, methods, and analysis in the field of criminology. Students learn to understand, interpret, and critique quantitative and qualitative research approaches, and become intelligent consumers of research.

Equivalent to CRIM 300 (2011-2012 Catalog); ADJ 300 (2009-2010 Catalog)

**Prerequisite(s):** CRIM 100.

**Notes:** This course does not meet the College's IT requirements.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**CRIM 320 - Crime and Place**

Credits: 3 (NR)
Focuses on the analysis of locations that attract and repel crime, displacement of crime, and identifying and measuring crime concentrations.

**Prerequisite(s):** CRIM 100.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall, Spring

---

**CRIM 400 - Applied Criminal Psychology**

Credits: 3 (NR)
Uses overview of psychological and criminological theories to apply behavioral science theory to practical application in forensic settings. Focuses on analysis of various crime scenes and characteristics of offenders.

Equivalent to ADJ 400 (2009-2010 Catalog)

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**CRIM 401 - Policing in America**

Credits: 3 (NR)
Fundamental issues relevant to contemporary public policing in America: role and history of police; impact on crime, disorder, and other social problems; discretion and its control; moral hazards; police legitimacy and public support; police culture and the police organization; and community policing.

Equivalent to ADJ 401 (2009-2010 Catalog)
CRIM 402 - Punishment and Corrections

Credits: 3 (NR)
Covers theories on forms of punishment systems; punishment and corrections as a product of historical, cultural, and political changes; differences by race and gender in punishment and corrections; problems of social control and violence in prisons; alternative rehabilitation; and community prevention strategies.

Equivalent to ADJ 402 (2009-2010 Catalog)

CRIM 403 - Community Corrections

Credits: 3 (NR)
Studies the purposes and goals of community-based corrections and its various components, including pretrial diversion, probation, parole, and emerging alternatives to traditional incarceration. Addresses issues related to offenders returning to the community and critical issues facing jails, community corrections, and the management of offenders in community settings. Examines the role of community corrections within the broader correctional system.

Equivalent to ADJ 403 (2009-2010 Catalog)

CRIM 404 - Crime Victims and Victimization

Credits: 3 (NR)
Explores experiences of crime victims, distribution of the risks of victimization, and causes and consequences of victimization. Also considers nature and influence of victim’s rights advocates.

Equivalent to ADJ 404 (2009-2010 Catalog)
CRIM 405 - Law and Justice around the World

Credits: 3 (NR)
Comparative inquiry into the models of legal and justice systems around the world. Considers how social and legal norms are created, and how different societies exercise powers of social control. Evaluates justice models in action, including law and courts, policing, corrections, and juvenile justice.

Fulfills general education requirement in global understanding.

Equivalent to ADJ 405 (2009-2010 Catalog)

Prerequisite(s): CRIM 100

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CRIM 406 - Family Law and the Justice System

Credits: 3 (NR)
Introduction to the elements of family law, and exploration of its influence on American social life and contemporary notions of justice. Topics include marriage and parenting, divorce, custody and support, nontraditional families, and domestic violence.

Equivalent to ADJ 406 (2009-2010 Catalog)

Prerequisite(s): CRIM 100

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CRIM 407 - Advanced Topics in Law and Society

Credits: 3 (NR)
Provides an in-depth examination of the law's role in social life to deepen students' appreciation of the law in action. Focuses on scholarly research that describes and explains how legal actors, processes, and institutions operate in the world. Topics include: theories of legal change, law's relationship to class, gender, and race, and law, culture, and identity.

Equivalent to ADJ 407 (2009-2010 Catalog)

Prerequisite(s): CRIM 100 or GOVT 301

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CRIM 408 - Criminal Courts
CRIM 408 - The Criminal Court System

Credits: 3 (NR)
Studies the workings, advantages, and frailties of criminal courts, and explores whether the system works effectively and efficiently.

Equivalent to ADJ 408 (2009-2010 Catalog)

Prerequisite(s): CRIM 100 or GOVT 301

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CRIM 409 - Community Policing

Credits: 3 (NR)
Study of community policing, particularly in the United States. Covers history and development of community policing, community relations, problem solving, and issues of organizational change.

Equivalent to ADJ 409 (2009-2010 Catalog)

Prerequisite(s): CRIM 100

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CRIM 410 - Criminal Investigations

Credits: 3 (NR)
Focuses on criminal investigations and the role of the criminal investigator in the criminal justice system.

Prerequisite(s): CRIM 100.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Summer, Spring

CRIM 422 - Controversial Legal Issues

Credits: 3 (NR)
Focuses on the study of law as an institution that continuously interacts with other social institutions at the individual, community, state, and federal levels. Examines how constitutional and statutory laws are interpreted by the courts to determine and define the law through contemporary, controversial, legal issues. Explores how the courts, using the law, resolve today's most controversial issues.

Equivalent to ADJ 422 (2009-2010 Catalog)

Prerequisite(s): CRIM 100
CRIM 423 - Constitutional Law: Civil Rights and Liberties

Credits: 3 (NR)
Studies First Amendment freedoms of speech, press, assembly, association, and religion; the right to privacy; and Fourteenth Amendment right to equal protection.

Equivalent to ADJ 423 (2009-2010 Catalog) and GOVT 423

Prerequisite(s): CRIM 100

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CRIM 424 - Constitutional Law: Criminal Process and Right

Credits: 3 (NR)
Studies constitutional law pertaining to the rights of the criminally accused from investigation and evidence through attorney, trial, and punishment stages at federal and state levels. Required for all criminology majors.

Equivalent to ADJ 424 (2009-2010 Catalog)

Prerequisite(s): CRIM 100

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CRIM 425 - Criminal Justice Management

Credits: 3 (NR)
Explains the management function for current and future criminal justice managers. Emphasizes communication, leadership skills, and organizational development.

Equivalent to ADJ 425 (2009-2010 Catalog)

Prerequisite(s): CRIM 100

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CRIM 460 - Surveillance and Privacy in Contemporary Society
Philosophical perspectives, historical context, technological developments, and institutional changes that surround controversies about privacy and surveillance in contemporary society. Explores public and private institutions conducting surveillance, how they calculate and manage risk, and legal constraints on surveillance activities.

Equivalent to ADJ 460 (2009-2010 Catalog)

**Prerequisite(s):** CRIM 100

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

### CRIM 462 - Law Enforcement and Homeland Security

Credits: 3 (NR)  
Examines the effect of 9/11 on law enforcement organizations in the United States and explores the evolving relationship between the military, federal, state, and local law enforcement agencies in the post-9/11 era. Emphasis on understanding the entire framework of homeland security in the United States and the unique issues faced by local law enforcement.

Equivalent to ADJ 462 (2009-2010 Catalog)

**Prerequisite(s):** CRIM 100

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

### CRIM 471 - Prevention and Deterrence of Crime

Credits: 3 (NR)  
Theoretical and practical strategies for crime prevention and deterrence. Discusses social, environmental, and mechanical developments, police courts, and correctional elements of law enforcement in terms of current effectiveness and future potential for crime prevention.

Equivalent to ADJ 471 (2009-2010 Catalog)

**Prerequisite(s):** CRIM 100

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

### CRIM 475 - Theory and Politics of Terrorism

Credits: 3 (NR)  
Explores origins of terrorism, tracing development from early states to a modern mode of conflict. Presents national, regional, and global perspectives.

Equivalent to ADJ 475 (2009-2010 Catalog)
Prerequisite(s): CRIM 100

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CRIM 479 - Preparation for Internship

Credits: 3 (NR)
Preparation for internship in a justice organization or justice-related work activity. Students develop a relationship with a prospective internship sponsor and develop a plan for the internship and the research to be reported.

Equivalent to ADJ 479 (2009-2010 Catalog)

Prerequisite(s): CRIM 100.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CRIM 480 - Internship

Credits: 6-12 (RD)
Application of classroom learning to an applied justice setting. Students maintain daily journals, conduct research, and deliver written and oral reports.

Designated as a research and scholarship intensive course.

Equivalent to ADJ 480 (2009-2010 Catalog)

Prerequisite(s): CRIM 100, 306, 315, 479, and approval of department.

Notes: Before enrolling, students must have a plan approved by the instructor. Seminars are held three times during the semester for discussion and oral presentation. Minimum of 45 hours of on-the-job work time required for each credit. May be repeated for a maximum of 12 credits.

Hours of Lecture or Seminar per week: 6-12
Hours of Lab or Studio per week: 0

CRIM 490 - Special Topics

Credits: 1-3 (RT)
Recent developments in the field.

Equivalent to ADJ 490 (2009-2010 Catalog)

Prerequisite(s): CRIM 100
Notes: Topics vary. May be used to fulfill requirements for different concentrations in the BS in criminology, law, and society depending on the topic. May be repeated for a maximum of 15 credits when topic is different.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0

CRIM 491 - Honors Seminar I

Credits: 3 (RD)
Course includes readings, individual or group projects, and discussion of seminar papers.

Equivalent to ADJ 491 (2009-2010 Catalog)

Prerequisite(s): Acceptance to pursue honors in the major.

Notes: First of a two-course sequence; subject varies. May be repeated for a maximum of 6 credits when topic varies.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CRIM 492 - Honors Seminar II

Credits: 3 (RD)
Course includes readings and discussion of seminar papers, leading to a research project under the direction of a faculty member.

Designated as a research and scholarship intensive course.

Equivalent to ADJ 492 (2009-2010 Catalog)

Prerequisite(s): CRIM 491

Notes: Second of a two-course sequence. Subject varies. Oral exam on the research and report may be required. May be repeated for a maximum of 6 credits when topic varies.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CRIM 495 - Capstone in Criminology, Law and Society

Credits: 3 (NR)
Provides an in-depth examination of a historical and contemporary issues facing criminology and law and society scholars. Focuses on the philosophies, practices, and procedures used by individuals and organizations and uses a variety of materials, experiences and resources.

Fulfills general education requirement in Synthesis.

Designated as a research and scholarship intensive course.
Prerequisite(s): CRIM 100; ENGL 101/ENGH 101; ENGL 302/ENGH 302; COMM 100, or 104; 60 credits.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CRIM 498 - Research Practicum

Credits: 1-3 (RT)
Supervised research experience with a professor in a non-classroom setting. Offers students an opportunity to gain valuable research experience and training in research. Students are required to work 45 hours (across the semester) per credit.

Prerequisite(s): CRIM 100 and CRIM 315.

Notes: Open to majors in CRIM with 60 credits and permission of instructor and department. May be repeated for a maximum of 6 credits.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0

CRIM 499 - Independent Study

Credits: 1-3 (RT)
Reading and research on a specific topic under the direction of a faculty member.

Equivalent to ADJ 499 (2009-2010 Catalog)

Prerequisite(s): CRIM 100 and 90 credits.

Notes: Open to majors in CRIM with 90 credits and permission of instructor and department. Written report is required; an oral exam or report may also be required. Degree requirements to be fulfilled by a particular independent study determined by student’s advisor. May be repeated for a maximum of 9 credits.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0

CRIM 509 - Justice Organizations and Processes

Credits: 3 (NR)
Examines structures, practices, and performance of organizations involved in administration of justice: law enforcement, courts and legal agencies, corrections, regulatory and related agencies, and private organizations.

Equivalent to PUAD 509; JLCP 509 (2009-2010 Catalog)

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
CRIM 510 - Policing in a Democratic Society

Credits: 3 (NR)
Fundamental issues in policing a democratic society: police mission, subculture, performance measurement, moral hazards, discretion, impact on crime and disorder, legitimacy, community policing, and other reforms.

Equivalent to JLCP 510 (2009-2010 Catalog)

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CRIM 691 - Justice Program Planning and Implementation

Credits: 3 (NR)
Examines challenges of adapting to, planning, and implementing change in justice organizations. Provides hands-on experience in conducting, planning, and implementing project.

Equivalent to PUAD 691; JLCP 691 (2009-2010 Catalog)

Prerequisite(s): CRIM 700 or PUAD 502, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CRIM 700 - Theories of Justice

Credits: 3 (NR)
Overview of ancient and modern theories of justice with application to contemporary issues involving justice system, and other social and political institutions.

Equivalent to GOVT 726; JLCP 700 (2009-2010 Catalog)

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CRIM 702 - Comparative Justice

Credits: 3 (NR)
Survey of justice systems and their environments in different lands and cultures. Identifies commonalities and differences among justice systems, evaluates them, and considers policy implications.

Equivalent to JLCP 702 (2009-2010 Catalog)

Prerequisite(s): CRIM 700/GOVT 726, or permission of instructor.
CRIM 703 - Restorative Justice

Credits: 3 (NR)
Covers origins of restorative justice, its principles, implications for different justice organizations and processes, and application to a variety of problems, such as family violence, human rights, and reconciliation following mass victimizations.

Equivalent to GOVT 727; JLCP 703 (2009-2010 Catalog)

Prerequisite(s): CRIM 700 or permission of instructor.

CRIM 720 - Behavior of Law

Credits: 3 (NR)
Examines development of law and law’s effect on human behavior. Reviews theories of law’s meaning and aims. Examines construction of law and investigates consequences of law and legal decisions.

Equivalent to GOVT 728; JLCP 720 (2009-2010 Catalog)

CRIM 721 - The Constitution, Criminal Procedure, and Security

Credits: 3 (NR)
Focuses on understanding legal doctrines that form basis of U.S. constitutional procedural rights and how doctrines develop, why courts rule as they do, and evaluating strengths, weaknesses of rights.

Equivalent to GOVT 713; JLCP 721 (2009-2010 Catalog)

Prerequisite(s): CRIM 720/GOVT 728 or permission of instructor.

CRIM 722 - Civil Justice
Credits: 3 (NR)
Covers understanding civil justice system, rules that govern civil justice, origins and effects, strengths and weaknesses of civil law doctrines, and processes to understand power of law to order social behavior.

Equivalent to JLCP 722 (2009-2010 Catalog)

Prerequisite(s): CRIM 720/GOVT 728 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CRIM 723 - Law and Social Control

Credits: 3 (NR)
Competing conceptions of law, political systems, and social control. Intellectual traditions behind social control, its definitions, and mechanisms for regulating public and private behavior, by both individuals and organizations in society.

Equivalent to JLCP 723 (2009-2010 Catalog)

Prerequisite(s): CRIM 720/GOVT 728 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CRIM 730 - Courts and Constitutional Law

Credits: 3 (NR)
Role, influence, and effects of U.S. courts in creating constitutional norms and interpreting them. Special attention to First and Fourteenth Amendments, Commerce Clause. Analyzes leading court cases.

Equivalent to JLCP 730 (2009-2010 Catalog)

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CRIM 740 - Justice Organization and Administration

Credits: 3 (NR)
Examines organization and administration of justice and security organizations. Covers organization theory and behavior as applied to justice and security organizations.

Equivalent to PUAD 790; JLCP 740 (2009-2010 Catalog)

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
CRIM 741 - Conduct of Justice Organizations at the Street Level

Credits: 3 (NR)
How justice organizations behave at lowest levels, where service is delivered and discretion is greatest (suspects, victims, witnesses, police officers, prison guards, parole officers, attorneys, and others who interact with the justice system).

Equivalent to PUAD 793; JLCP 741 (2009-2010 Catalog)

Prerequisite(s): CRIM 740/PUAD 790 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CRIM 742 - Leadership in Justice and Security Organizations

Credits: 3 (NR)
Examines leadership theories, and explores fundamental questions about leadership in justice and security organizations today.

Equivalent to JLCP 742 (2009-2010 Catalog)

Prerequisite(s): CRIM 740/GOVT 790 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CRIM 743 - Changing Justice and Security Organizations

Credits: 3 (NR)
Examines challenges of changing justice organizations, how changes have been successfully and unsuccessfully implemented in the past, and what change strategies appear to be the most effective.

Equivalent to PUAD 797; JLCP 743 (2009-2010 Catalog)

Prerequisite(s): CRIM 740/PUAD790 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CRIM 744 - Corrections

Credits: 3 (NR)
Covers the social institutions and processes involved in punishment, control, and behavior change. Reviews the consequences of different policies and organizational approaches.

Prerequisite(s): CRIM 740.
CRIM 749 - Issues in Justice Administration

Credits: 1-3 (RT)
Explores issues in justice administration, taking into diverse perspectives. Emphasizes using theory and evidence to evaluate different viewpoints. Course topics vary, focusing on controversial matters.

Equivalent to JLCP 749 (2009-2010 Catalog)

Prerequisite(s): CRIM 509/PUAD 509 or CRIM 700/GOVT 726, or permission of instructor.

Notes: May be repeated for a maximum of 9 credits when topic is different.

CRIM 760 - Crime and Crime Policy

Credits: 3 (NR)
Explores relationship between crime policy and empirical evidence about etiology of crime. Includes crime measurement and trends in crime over time, effectiveness of various policy interventions.

Equivalent to JLCP 760 (2009-2010 Catalog)

CRIM 761 - Politics of Crime Policy

Credits: 3 (NR)
Explores political context of crime policy. Examines influence of public opinion, interest groups, scientific community, and other political forces. In-depth, case-study comparison of several crime policies.

Equivalent to JLCP 761 (2009-2010 Catalog)

Prerequisite(s): CRIM 760/GOVT 792 or permission of instructor.

CRIM 762 - Crime and Place
CRIM 764 - Sentencing

Credits: 3 (NR)
Examines theories of punishment and sentencing practices. Examines political, sociological, criminological, and organizational influences on sentencing processes and decisions.

Prerequisite(s): CRIM 760.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

CRIM 780 - Research Methods

Credits: 3 (NR)
Introduces logic and methods of scientific inquiry in justice, law, and crime policy. Includes conceptualization of research questions, observation, measurement, research design, and principles of causality. Evaluation of extant research according to scientific principles.

Equivalent to JLCP 780 (2009-2010 Catalog)

Prerequisite(s): Undergraduate course in social science research methods or statistics, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CRIM 781 - Justice Program Evaluation

Credits: 3 (NR)
Practical exploration of assessment techniques used in evaluating need for and consequences of justice programs and policies. Design and measurement, interpreting and presenting results.

Equivalent to PUAD 791; JLCP 781 (2009-2010 Catalog)

Prerequisite(s): PUAD 511/612 CRIM 780 or two graduate-level statistics courses; or permission of instructor.
CRIM 782 - Statistics I

Credits: 3 (NR)
Focuses on descriptive and inferential statistical methods and theory with application to problems within the justice field. Explores the logic of inferential statistical methods in general and null hypothesis significance testing in particular. Covers widely used statistical procedures within the applied social sciences.

Equivalent to JLCP 782 (2009-2010 Catalog)

Prerequisite(s): An undergraduate social science research methods course or an undergraduate statistics course.

CRIM 783 - Statistics II

Credits: 3 (NR)
Focuses on the theory and application of multivariate regression methods as applied within the justice field. Topics include tests for and consequences of violating assumptions of the generalized linear model, dummy coding of categorical variables, testing of interaction effects, logistic regression, ordered and multinominal logit, and missing data analysis.

Equivalent to JLCP 783 (2009-2010 Catalog)

Prerequisite(s): CRIM 782 or a comparable course.

CRIM 784 - Experimental Criminology

Credits: 3 (NR)
Discusses the methodological, statistical, ethical, and practical concerns associated with experimental research designs in criminology.

Prerequisite(s): CRIM 780.

CRIM 790 - Capstone in Policy and Practice
Credits: 3 (RD)
Student-initiated research project supervised by instructor. Students must work with a justice organization to conduct useful research and produce a policy-oriented white paper.

Equivalent to JLCP 790 (2009-2010 Catalog)

Prerequisite(s): CRIM 780 or permission of instructor.

Notes: May be repeated for a maximum of 6 credits.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Spring

### CRIM 795 - Special Topics

Credits: 3 (RT)
Recent developments in field, or topics not covered by regularly listed courses.

Equivalent to JLCP 795 (2009-2010 Catalog)

Prerequisite(s): To be determined by instructor.

Notes: Topics vary. May be repeated for a maximum of 15 credits when topic is different.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

### CRIM 796 - Directed Reading

Credits: 1-3 (RT)
Independent reading at doctoral level on specific topic related to justice, law, or crime policy as agreed to by student and faculty member and approved by coordinator of CRIM program.

Equivalent to JLCP 796 (2009-2010 Catalog)

Prerequisite(s): Successful completion of 12 graduate level CRIM credits.

Notes: Repeatable.

**Hours of Lecture or Seminar per week:** 1-6  
**Hours of Lab or Studio per week:** 0  
**Grading:** Graduate Special.  
**When Offered:** Fall, Spring, Summer

### CRIM 797 - Professionalization Seminar
Introduces doctoral students to research, scholarship and teaching practices in the field to promote their professional development.

Notes: Required for Ph.D. students.

CRIM 799 - Master’s Thesis

Credits: 1-6 (RD)
Research on approved master’s thesis topic under direction of thesis committee with approval of chair.

Equivalent to JLCP 799 (2009-2010 Catalog)

Prerequisite(s): Submission and approval of thesis proposal.

Notes: Repeatable. Minimum 3, maximum 6 credits for doctorate. Maximum of 6 credits of CRIM 799 applicable to masters degree requirements.

CRIM 998 - Doctoral Dissertation Proposal

Credits: 1-6 (RD)
Work on a research proposal forming basis for doctoral dissertation.

Equivalent to JLCP 998 (2009-2010 Catalog)

Prerequisite(s): Students must complete all core and analytical course degree requirements.

Notes: Repeatable. Minimum 3, maximum 6 credits for doctorate. Maximum of 27 credits of CRIM 998/999 applicable to doctoral degree requirements.

CRIM 999 - Doctoral Dissertation Research

Credits: 1-21 (RD)
Doctoral dissertation research and writing under direction of student’s dissertation committee.
Equivalent to CRIM 999 (Catalog 2009-2010)

**Prerequisite(s):** Advancement to doctoral Candidacy

**Notes:** Repeatable. Minimum 12, maximum 21 credits for doctorate. Maximum of 27 credits of CRIM 998/999 applicable to doctoral degree requirements.

**Hours of Lecture or Seminar per week:** 0  
**Hours of Lab or Studio per week:** 0  
**Grading:** Satisfactory/No Credit only

## Cultural Studies (CULT)

Offered by the College of Humanities and Social Sciences

### CULT 320 - Globalization and Culture

Credits: 3 (NR)  
Examines cultures in globalization, with special attention to the role of technologies and new media. Provides historical and contemporary contexts for understanding the relationships among circuits of production and consumption; population flows; social inequalities and collective identities; globalizations from "above" and "below;" built and natural environments.

**Prerequisite(s):** 30 credits; GLOA 101 or SOCI 120.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

### CULT 390 - Topics in Cultural Studies

Credits: 1-3 (RT)  
Topics of current interest in interdisciplinary cultural studies, covering such fields as media, popular culture, political economy, social identities, or regions in globalization.

**Notes:** May be repeated for a maximum of 9 credits when topic is different.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

### CULT 802 - Histories of Cultural Studies

Credits: 3 (NR)  
Historical survey of principal works and theories in the development of cultural studies.

**Prerequisite(s):** Admission to doctoral program, related master's degree, or permission of instructor.
Notes: This course is designed for PhD level students. Students in a related MA program may take this course as the capstone to their MA as they are about to matriculate into the PhD in cultural studies.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

CULT 804 - Histories of Cultural Studies II

Credits: 3 (NR)
Continues the historical survey of cultural studies up to the present and assesses possibilities for future development.

Prerequisite(s): Admission to a PhD program and CULT 802 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

CULT 806 - Research Seminar in Cultural Studies

Credits: 3 (NR)
Introduces research methods in cultural studies.

Prerequisite(s): Admission to a doctoral; completion CULT 802 and CULT 804.

Notes: Specific topics vary.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring

CULT 808 - Student/Faculty Colloquium in Cultural Studies

Credits: 1 (RD)
Forum for presentation of original and current research in cultural studies.

Prerequisite(s): Admission to doctoral program.

Notes: Students register for 1 credit per semester over a three-semester period. May be repeated for a maximum of 4 credits.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0
Grading: Satisfactory/No Credit
CULT 810 - Culture and Political Economy

Credits: 3 (NR)
Surveys social science and humanities classics that relate cultural production and consumption to underlying political economic conditions. Includes Marx, Lukacs, Frankfurt School, semiotic neo-Marxism, productivist theories of power indebted to Foucault, Baudrillard, Bourdieu, Harvey, Jameson, Mauss, Mill, Polanyi, Sahlins, A. Smith, and Weber.

Prerequisite(s): Admission to a doctoral program, or permission of instructor.

Notes: This course is designed for the PhD student. Those students not admitted to a PhD program are required to contact the instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

CULT 812 - Visual Culture

Credits: 3 (NR)
Examines theories, production, consumption, and reception of visual culture. Covers film, video, visual arts, music, display, ritual, performance, performativity, and theories of the aesthetic. Includes key readings from theorists such as Adorno, Artaud, Benjamin, Brecht, Bryson, Doane, Fiske, Heath, Marcuse, Merleau-Ponty, and Sartre.

Prerequisite(s): Admission to a doctoral program, or permission of instructor.

Notes: This course is designed for the PhD student. Those students not admitted to a PhD program are required to contact the instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CULT 814 - Gender and Sexuality

Credits: 3 (NR)
Investigates notion of gender functions in maintaining and analyzing issues of social and cultural power. Examines conflicting notions of sexuality and their role in cultural signification. Seeks to explicate relationship of sexuality, gender.

Prerequisite(s): Admission to a doctoral program, or permission of instructor

Notes: This course is designed for the PhD student. Those students not admitted to a PhD program are required to contact the instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

CULT 816 - Science/Technology
Credits: 3 (NR)
Considers theories and major debates on culture of science, social construction of nature, and effects of technology on modern cultural forms. Includes readings from theorists such as Nietzsche, Heidegger, Horkheimer, Feyerabend, Bahro, Haraway, and Latour.

Prerequisite(s): Admission to a doctoral program, or permission of instructor.

Notes: This course is designed for the PhD student. Those students not admitted to a PhD program are required to contact the instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

CULT 818 - Social Institutions

Credits: 3 (NR)
Considers theories of institutional practice and social structures, from Max Weber to Michel Foucault. Covers prisons, bureaucracies, museums, schools, political parties, and social movements.

Prerequisite(s): Admission to a doctoral program, or permission of instructor.

Notes: This course is designed for the PhD student. Those students not admitted to a PhD program are required to contact the instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

CULT 820 - After Colonialism

Credits: 3 (NR)
Surveys racial, ethnic, caste, and national identities in colonial contexts; scientific racism in periphery and core sites; subsequent history of race, ethnic, national identities and conflicts; classical and contemporary texts by authors such as DuBois, Fanon, Gilroy, and Spivak; and particular place of issues of national, racial, and ethnic identities in contemporary cultural studies.

Prerequisite(s): Admission to a doctoral program, or permission of instructor.

Notes: This course is designed for the PhD student. Those students not admitted to a PhD program are required to contact the instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CULT 860 - Special Topics in Cultural Studies
Credits: 3 (RT)
Specialized interdisciplinary topics in cultural theory and analysis.

Prerequisite(s): Admission to a doctoral program, or permission of instructor.

Notes: These courses are designed for the PhD student. Those students not admitted to a PhD program are required to contact the instructor. Topics vary. May be repeated for credit when topic is different.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

CULT 870 - Independent Study

Credits: 1-3 (RT)
Reading and research on a specific topic guided by advisors, supporting the development of a Field Concentration.

Prerequisite(s): Admission to a PhD program, successful completion of all core courses, or permission of director.

Notes: May be repeated.

Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 0
Grading: Graduate Special

CULT 880 - Field Concentration

Credits: 3 (RT)
Intensive research course, resulting in a Field Statement and oral defense.

Prerequisite(s): Admission to cultural studies doctoral program successful completion of core courses and an additional 18 credits.

Notes: Requires permission of field advisor. May be repeated for a maximum of 6 credits.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0
Grading: Graduate Special
When Offered: Fall, Spring

CULT 998 - Doctoral Dissertation Proposal

Credits: 1-6 (RD)
Develop research proposal that forms basis for doctoral dissertation.

Prerequisite(s): Advancement to candidacy.
Notes: May be repeated for credit. A maximum of 6 credits may be applied to the degree. Subject to continuous registration requirement.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 1-6
Grading: S/NC
When Offered: Fall, Spring

CULT 999 - Doctoral Dissertation

Credits: 1-12 (RD)
Doctoral dissertation research and writing under direction of dissertation committee.

Prerequisite(s): Completion of CULT 998, and public presentation of dissertation proposal.

Dance (DANC)

Offered by the College of Visual and Performing Arts

DANC 101 - Dance Appreciation

Credits: 3 (NR)
Introduces dance as universal human activity, expression of cultural identity, and art form. Survey of global dance includes folk, ceremonial and ritual, trance, court, classical, and theatrical.

Fulfills general education requirement in arts.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

DANC 114 - Rhythmic Analysis and Music Resources for Dance

Credits: 3 (NR)
Introduces rhythmic structure, notation, and basic forms of music.

Prerequisite(s): Admission to the dance major. Prerequisite enforced by registration system.

Notes: Lecture, studio.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 2
**DANC 118 - World Dance**

Credits: 3 (RT)
Performance of a world dance form through presentation of fundamental techniques, music and culture. Area of concentration may vary to include an array of world dance forms.

Fulfills general education requirement in global understanding.

*Notes:* May be repeated for total 6 credits. Fulfills non-Western requirement for CHSS and COS students.

**Hours of Lecture or Seminar per week:** 1  
**Hours of Lab or Studio per week:** 2

---

**DANC 119 - Dance in Popular Culture: Afro-Latino Dance**

Credits: 3 (RD)
Performance of a popular dance form through presentation of fundamental techniques, music, and culture. Area of concentration may vary to include an array of popular dance forms.

Fulfills general education requirement in arts.

*Notes:* May be repeated for total 6 credits.

**Hours of Lecture or Seminar per week:** 0  
**Hours of Lab or Studio per week:** 3

---

**DANC 120 - Special Topics in Dance**

Credits: 1-3 (RT)
Rotating topic. Introduction and exploration of topical studies in dance or related study areas; topic depends on instructor.

*Notes:* May be repeated for total 9 credits if course content differs.

**Hours of Lecture or Seminar per week:** 1-3  
**Hours of Lab or Studio per week:** 1-3

---

**DANC 125 - Beginning Modern Dance**

Credits: 3 (RD)
Introduces fundamentals of modern dance technique. Emphasizes improving anatomical awareness and alignment, increasing strength and flexibility, and developing rhythmic sensitivity.

Fulfills general education requirement in arts.
**DANC 131 - Beginning Jazz Technique**

Credits: 3 (RD)
Introduces fundamentals of jazz dance technique, explores the musical and cultural traditions of jazz dance, and its historical context. Emphasizes improving anatomical awareness and alignment, increasing strength and flexibility, and developing rhythmic sensitivity. Also introduces jazz improvisation and choreography.

Fulfills general education requirement in arts.

**Notes:** May be repeated for total 6 credits.

**Hours of Lecture or Seminar per week:** 0
**Hours of Lab or Studio per week:** 3

**DANC 145 - Beginning Ballet**

Credits: 3 (RD)
Introduces fundamental elements of ballet technique and vocabulary. Stresses learning vocabulary and movement characteristics of this highly stylized art form. Emphasizes improving anatomical awareness and alignment, increasing strength and flexibility, and developing musicality.

Fulfills general education requirement in arts.

**Notes:** May be repeated for total 6 credits.

**Hours of Lecture or Seminar per week:** 0
**Hours of Lab or Studio per week:** 3

**DANC 150 - Dance Improvisation**

Credits: 3 (NR)
Explores movement invention and discovery. Movement explored in relation to other art forms such as literature, painting, sculpture, and architecture; enhancing kinesthetic awareness; sensitivity to others; and the environment. Prerequisite for dance composition and choreography series.

**Prerequisite(s):** Admission to the dance major. Prerequisite enforced by registration system.

**Hours of Lecture or Seminar per week:** 0
**Hours of Lab or Studio per week:** 3
DANC 161 - Beginning Tap Dance

Credits: 3 (RD)
Introductory exploration of rhythms and steps basic to the art form of tap dancing including its musical and cultural traditions. Emphasizes improving anatomical awareness and alignment, increasing strength and flexibility and developing rhythmic sensitivity.

Fulfills general education requirement in arts.

Notes: May be repeated for total 6 credits.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 3

DANC 170 - Orientation to Dance Production

Credits: 1 (NR)
Introduces sound, lighting, and stage management elements and terminology as related to dance performance. Intensive workshop setting emphasizes laboratory experience.

Prerequisite(s): Admission to the dance major. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 1

DANC 190 - First Year Seminar

Credits: 1 (NR)
Introduction to School of Dance, CVPA, and university resources available to dance majors. Weekly meetings focus on learning about opportunities for involvement in dance, the community, and adjusting academically. Each class addresses a topic to assist dance majors to effectively transition to college life.

Prerequisite(s): Admission to the dance major. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0
When Offered: Fall

DANC 210 - Dynamic Alignment

Credits: 3 (NR)
Covers aspects of anatomy and kinesiology that directly apply to correct development of dance technique. Emphasizes exercise correctives and imagery to correct insufficient muscle pattern and reduce stress on the body.

Prerequisite(s): Admission to the dance major. Prerequisite enforced by registration system.
DANC 225 - Beginning Intermediate Modern Dance

Credits: 3 (RD)
Further develops knowledge, skills, and appreciation of modern dance through continued exploration of techniques, aesthetics, and creativity. Continuing the development of anatomical awareness and alignment, technical clarity, and rhythmic sensitivity.

Fulfills general education requirement in arts.

Prerequisite(s): DANC 125 or permission of instructor.

Notes: May be repeated for total 9 credits.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 3

DANC 231 - Intermediate Jazz Technique

Credits: 3 (RD)
Further study of the concepts of jazz dance technique, and in-depth study of 21st century jazz dance forms. Emphasizes furthering anatomical awareness and alignment, developing technical clarity, rhythm and syncopation. Continues exploration of jazz improvisation and choreography.

Fulfills general education requirement in arts.

Prerequisite(s): DANC 131 or permission of instructor.

Notes: May be repeated for 12 credits.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 3

DANC 245 - Beginning Intermediate Ballet

Credits: 3 (RD)
Further develops fundamental elements of ballet technique and vocabulary. Stresses increasing vocabulary and movement characteristics of this highly stylized art form. Continuing emphasis on improving anatomical awareness and alignment, increasing strength and flexibility, and developing musically.

Fulfills general education requirement in arts.

Prerequisite(s): DANC 145 or permission of instructor.
DANC 251 - Dance Composition I

Credits: 3 (NR)
Introduces basic principles for composing dance movement. Focuses on simple compositional forms as they apply to solo performer, discussion, analysis, and evaluation of artistic choices. Students maintain video and written journals to document their artistic process.

Prerequisite(s): DANC 150. Prerequisite enforced by registration system.

DANC 252 - Dance Composition II

Credits: 3 (NR)
Explores compositional elements in dance as they apply to group forms. Offers continued experience in developing and manipulating movement phrases using a variety of compositional forms. Introduces conducting rehearsals and selecting music. Students discuss, analyze, and evaluate artistic choices in composition using appropriate dance arts vocabulary and terminology, and maintain video and written journals to document artistic process.

Prerequisite(s): DANC 150 and DANC 251. Prerequisite enforced by registration system.

DANC 270 - Dance Production Lab

Credits: 1 (RT)
Practical experience in stage crew, sound, or lighting of dance productions through rehearsal to public performance for university dance concerts or guest artist programs.

Prerequisite(s): DANC 170. Prerequisite enforced by registration system.

Notes: May be repeated for total 6 credits.

DANC 301 - What is Dance?
Credits: 3 (NR)
Explores connections among literature, music, theater, and visual art within aesthetic framework of dance. Examines development and ideals of Western theatrical dance, and historical and social context in which they were created. Method of instruction includes lecture, discussion, and studio experiences.

Fulfills general education requirement in arts.

**Hours of Lecture or Seminar per week:** 2  
**Hours of Lab or Studio per week:** 1

---

**DANC 318 - Global Perspectives: World Dance Forms**

Credits: 3 (RD)
Continued in-depth study of world dance form including technique, music, and culture. Texts, video, performances, music, participatory events, and guest artist presentations. Lecture, studio. Area of concentration varies to include as many cultures as possible.

Fulfills general education requirement in global understanding.

**Prerequisite(s):** DANC 118 or DANC 119; or permission of instructor. Prerequisite enforced by registration system.

**Notes:** May be repeated for total 6 credits.

**Hours of Lecture or Seminar per week:** 1  
**Hours of Lab or Studio per week:** 2

---

**DANC 324 - Introduction to Dance Conditioning**

Credits: 1-3 (RT)
Course involves intensive rehabilitation and conditioning exercises and realignment training geared for the individual dancer. In-depth understanding of injury prevention and neuromuscular re-education are applied to ballet and modern technique classes.

**Prerequisite(s):** Admission to the dance major and permission of director; prerequisites enforced by registration system.

**Notes:** May be repeated for a total of 12 credits

**Hours of Lecture or Seminar per week:** 0  
**Hours of Lab or Studio per week:** 1-3

---

**DANC 325 - Intermediate Modern Dance**

Credits: 1-3 (RT)

Explores intermediate level of modern dance technique. Emphasizes improving anatomical awareness, increasing strength and flexibility, expanding modern dance vocabulary, and developing flow and dynamic range.
Prerequisite(s): Admission to the dance major. Prerequisite enforced by registration system.

Notes: Meets general education fine arts requirement. May be repeated for total 24 credits.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 1-3

DANC 326 - Dance Performance Practicum

Credits: 0-1 (RT)
Practical experience in dance performance through rehearsal process of university dance concerts.

Prerequisite(s): Audition.

Notes: May be repeated for total 8 credits.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0-1

DANC 331 - Advanced Jazz Dance

Credits: 3 (RD)
In-depth studio study of 21st century jazz dance forms. Continues concepts and vocabulary introduced in DANC 231, and further emphasizes alignment, technical clarity and virtuosity. Emphasizes mastery of rhythm and syncopation.

Prerequisite(s): DANC 231.

Notes: Meets general education fine arts requirement.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 3

DANC 345 - Intermediate Ballet

Credits: 1-3 (RT)
Provides continued ballet training for intermediate-level dancer. Emphasizes increasing technical proficiency, improving anatomical awareness, and developing deeper understanding of skills and principles of ballet technique and how they provide foundation to teach and perform.

Prerequisite(s): Admission to the dance major. Prerequisite enforced by registration system.

Notes: Meets general education fine arts requirement. May be repeated for 24 credits.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 1-3
**DANC 360 - Choreography**

Credits: 3 (NR)  
Continued choreographic exploration and research, culminating in bringing completed works to production.

**Prerequisite(s):** DANC 150, DANC 251 and DANC 252. Prerequisite enforced by registration system.

**Hours of Lecture or Seminar per week:** 0  
**Hours of Lab or Studio per week:** 3

**DANC 362 - Directed Choreography**

Credits: 1 (RT)  
Faculty-guided, individual learning experience where students learn to choreograph a dance work by auditioning dancers, costuming, staging, lighting, selecting musical accompaniment, and composing original movement material.

**Prerequisite(s):** DANC 150, DANC 251, DANC 252 and DANC 360. Prerequisite enforced by registration system.

**Notes:** May be repeated for total 6 credits.

**Hours of Lecture or Seminar per week:** 0  
**Hours of Lab or Studio per week:** 1

**DANC 370 - Dance Performance**

Credits: 0-1 (RT)  
Practical experience in performance, repertory, and choreography through rehearsal and public performance of university dance concerts or guest artist programs.

**Prerequisite(s):** Audition and admission to the dance major. Prerequisite enforced by registration system.

**Notes:** May be repeated for total 12 credits.

**Hours of Lecture or Seminar per week:** 0  
**Hours of Lab or Studio per week:** 0-1

**DANC 371 - Residency Workshop**

Credits: 0-1 (RT)  
Rehearsal and performance of new or restaged dance by guest choreographer in intensive rehearsal setting.

**Prerequisite(s):** Audition and admission to the dance major. Prerequisite enforced by registration system.

**Notes:** May be repeated for total 6 credits.
DANC 372 - Advanced Dance Production

Credits: 1 (NR)
Methodology and practice of costume and lighting design, as dictated by specific needs of dance performance.

Prerequisite(s): DANC 170 and DANC 270. Prerequisite enforced by registration system.

Notes: Taught in series of workshop settings.

DANC 390 - Dance History I

Credits: 3 (NR)
Examines dance as it developed as Western theatrical form from its beginnings in social and folk dance through evolution into ballet. Emphasizes romantic and classical ballet. Also studies American dance forms as they evolved in spectacles, burlesques, minstrelsy, and social dance. All forms of dance placed in social, political, cultural, aesthetic, and historical contexts.

Fulfills general education requirement in arts.

Fulfills writing intensive requirement in the major.

DANC 391 - Dance History II

Credits: 3 (NR)
Examines revolutions in transformation of 20th-century Western dance into forms and institutions that radically departed from predecessors. Development of contemporary dance carried with it reflections of the influence of technology and media as well as concept of global culture. Renewed interest in traditional dance forms acknowledges power of dance to serve as carrier of cultural and societal values. Dance forms placed in social, political, cultural, aesthetic, and historical contexts.

Fulfills general education requirement in arts.

Fulfills writing intensive requirement in the major.
DANC 399 - Independent Study

Credits: 1-3 (RT)
Individual research or creative project supervised by faculty member.

Prerequisite(s): Permission of director of School of Dance.

Notes: May be repeated for total 6 credits.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 1-3

DANC 410 - Introduction to Contemporary Movement Theories

Credits: 3 (NR)
Introduction to movement theories combining somatic theory with practical application to dance training. Focus on ways somatic practices can deepen perceptual processes and influence movement aesthetics. Theories studied may include: Alexander Technique, Feldenkrais Method, Body-Mind Centering, and Ideokinesis.

Prerequisite(s): DANC 210. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

DANC 418 - Global Dance Intensive

Credits: 3 (RD)
Intensive investigation of selected dance idiom within cultural and artistic contexts. Course work supplemented by participation in and observation of ambient culture. Analyzes similarities, differences, and common antecedents between selected culture and North American dance idioms.

Fulfills general education requirement in Global Understanding.

Notes: May be repeated for total 6 credits.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

DANC 420 - Special Topics in Dance

Credits: 1-3 (RT)
In-depth presentation and exploration of topical studies in dance or related study areas.

Prerequisite(s): 9 credits of dance courses, or permission of instructor.

Notes: Topic depends on instructor. May be repeated for total 9 credits.
DANC 425 - Advanced Modern Dance

Credits: 1-3 (RT)

Advanced-level exploration of modern dance technique. Emphasizes refining alignment, developing ability to self-correct, and replicating sophisticated movement sequences. Preparation to enter professional field of dance.

Prerequisite(s): Admission to the dance major. Prerequisite enforced by registration system.

Notes: Meets general education fine arts requirement. May be repeated for 18 credits.

DANC 445 - Advanced Ballet

Credits: 1-3 (RT)

Provides preprofessional ballet training for advanced-level dancer. Emphasizes attainment of high-quality technical and performance skills, application of anatomical principles, and mastery of sophisticated classical movement sequences.

Prerequisite(s): Admission to the dance major. Prerequisite enforced by registration system.

Notes: Meets general education fine arts requirement. May be repeated for 18 credits.

DANC 453 - Teaching Creative Movement

Credits: 3 (NR)

Provides theory, methodology, and practicum experience in preparation for teaching creative movement to children K-12, with some application to special populations.

Prerequisite(s): Admission to the dance major. Prerequisite enforced by registration system.

Notes: Meets general education fine arts requirement. May be repeated for 18 credits.

DANC 454 - Methods of Teaching Dance
Credits: 3 (NR)
Examines dance pedagogy, focusing on principles needed for teaching sound technique. Students learn skills, methods, and instructional procedures for classroom. Emphasizes curriculum development, proper course sequencing, implementation of teaching strategies, and classroom management techniques. Students study teaching methods appropriate for K-12, gifted and talented, and special-needs students. Intensive practice in implementing these skills includes lab, field-teaching experiences.

Prerequisite(s): Admission to the dance major; senior standing; prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

DANC 455 - Teaching Practicum

Credits: 1-6 (RT)
Full semester of supervised teaching experience in approved school or studio dance program. Credits based on number of teaching contact hours per week.

Prerequisite(s): Admission to the dance major; completion of all coursework required for teaching licensure; prerequisite enforced by registration system.

Notes: May be repeated for total 12 credits.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

DANC 480 - Introduction to Laban Movement Analysis

Credits: 3 (NR)
Introduces components of laban movement analysis: body, shape, effort, and space. Includes motif writing for recording and analyzing movement.

Prerequisite(s): DANC 210. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

DANC 490 - Senior Dance Seminar

Credits: 3 (NR)
Culminating seminar devoted to analyzing and synthesizing knowledge and skills gained through undergraduate course work as it applies to dance, arts education, and professional development. Students develop senior project including written and oral presentation in public forum.

Fulfills general education requirement in synthesis.

Prerequisite(s): Admission to the dance major; senior standing; prerequisite enforced by registration system.
DANC 501 - Graduate Dance Seminar

Credits: 1-3 (RD)
Presentation and discussion of current issues in dance specific to education, research, and professional development in the field.

Prerequisite(s): Admission to MFA in dance program.

DANC 510 - Contemporary Movement Theories

Credits: 3 (RD)
In-depth study of movement theories combining somatic theory with practical application to dance training. Focus is on ways somatic practices can deepen perceptual processes and influence movement aesthetics.

Prerequisite(s): Admission to Dance MFA program.

DANC 520 - Special Topics in Dance

Credits: 1-3 (RT)
In-depth presentation and exploration of topical studies in dance and/or related study areas.

Prerequisite(s): Admission to Dance MFA program.

Notes: Topic depends on instructor. May be repeated for total 9 credits.

DANC 525 - Advanced Modern Dance

Credits: 1-3 (RT)
Advanced study of modern technique, emphasizing sophisticated technical ability and performance skills, includes comparison of pedagogical perspectives.

Prerequisite(s): Admission to Dance MFA program.
Notes: May be repeated for total 18 credits.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 1-3

DANC 545 - Advanced Ballet

Credits: 1-3 (RT)
Advanced study of ballet technique with an emphasis on high technical ability, performance skills and ballet vocabulary, includes comparison of pedagogical perspectives.

Prerequisite(s): Admission to Dance MFA program.

Notes: May be repeated for total 18 credits.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 1-3

DANC 560 - Advanced Choreography

Credits: 3 (RT)
Intensive study and exploration of choreographic forms.

Prerequisite(s): Admission to Dance MFA program.

Notes: May be repeated for 12 credits.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 3

DANC 562 - Directed Choreography

Credits: 3 (RD)
Creation of original work including conception and development through rehearsal process, culminating in public presentation.

Prerequisite(s): Admission to Dance MFA program.

Notes: May be repeated for 9 credits.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 3
When Offered: Fall, Spring

DANC 570 - Advanced Dance Performance
Credits: 1-3 (RD)
Public performance/presentations in university or professional productions.

Prerequisite(s): Admission to Dance MFA program.

Notes: May be repeated for total 12 credits.

Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 3-9

DANC 571 - Residency Workshop

Credits: 3 (RD)
Rehearsal direction of a new or restaged work by a guest choreographer in an intensive rehearsal process.

Prerequisite(s): Admission to Dance MFA program.

Notes: May be repeated for 9 credits.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 3

DANC 580 - Laban Movement Analysis

Credits: 3 (NR)
Introduction to the components of Laban Movement Analysis: body, shape, effort and space.

Prerequisite(s): Admission to Dance MFA program.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 3

DANC 598 - Philosophy and Aesthetics of Dance

Credits: 3 (NR)
Study of philosophical theories and aesthetic principles of dance as a performing art.

Prerequisite(s): DANC 390 and 391, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

DANC 599 - Independent Study
Credits: 3 (RT)
Individual research or creative project.

**Prerequisite(s):** Admission to Dance MFA program.

**Notes:** May be repeated for total 6 credits.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**Grading:** Graduate Special

---

**DANC 615 - Contemporary Trends**

Credits: 3 (NR)  
Study of contemporary art and artists and their philosophical theories, aesthetics and practices as they relate to the creation of new work.

**Prerequisite(s):** Admission to Dance MFA program.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**DANC 627 - Advanced Teaching Seminar**

Credits: 3 (NR)  
Discussion and readings from varied pedagogical theories examining diverse approaches to teaching technique and theory culminating in development of a teaching portfolio.

**Prerequisite(s):** Admission to Dance MFA program.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**DANC 672 - Dance Production**

Credits: 3 (RD)  
Artistic Direction of university or professional performance including mentoring of choreographers, adjudication of work, coordination with lighting designer, costumer, sound technician and managing director.

**Prerequisite(s):** Admission to Dance MFA program.

**Notes:** May be repeated for 6 credits.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0
DANC 680 - Dance Management

Credits: 3 (NR)
Exploration of the technical, financial and economical aspects of dance management including areas of marketing, fundraising, publicity, incorporation, booking non-profit vs. profit making organizations and issues relating to current practices in the performing arts industry.

Prerequisite(s): Admission to Dance MFA program.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

DANC 790 - Internship

Credits: 1-3 (RD)
In depth study in selected subject area of interest.

Prerequisite(s): Admission to Dance MFA program.

Notes: May be repeated for total 9 credits.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0

DANC 799 - Thesis

Credits: 1-6 (RD)
Creation and documentation of original research including planning, performance, recording and written reflecting under direction of thesis committee.

Prerequisite(s): Admission to Dance MFA program.

Notes: May be repeated for total 6 credits.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0
Grading: Satisfactory/No credit only

Early Childhood Education (ECED)

ECED 401 - Developmental Pathways of Diverse Learners, Birth-Adolescence
Credits: 3 (NR)
Examines child and adolescent development from diverse perspectives. Addresses typical and atypical physical, social, and emotional, language, and intellectual development. Explores role of individual differences and culture in understanding and interpreting child and adolescent development.

Equivalent to EDUT 411 (2010-2011 Catalog)

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall, Spring, Summer

---

**ECED 402 - Foundations of Language and Literacy for Diverse Young Learners**

Credits: 3 (NR)
Examines complexity of language acquisition and literacy development. Focuses on typical and atypical language development, connections between language and literacy, and diversity of communication styles in families and cultures. Emphasizes first and second language acquisition.

Equivalent to EDUT 413 (2010-2011 Catalog)

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall, Spring, Summer

---

**ECED 403 - Inclusive Curriculum for Young Learners: Planning Instruction and Guidance**

Credits: 3 (NR)

Equivalent to EDUT 414 (2010-2011 Catalog)

**Notes:** Field experience required.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall, Spring, Summer

---

**ECED 404 - Families, Communities and Schools**

Credits: 3 (NR)
Focuses on strategies for developing culturally appropriate family-professional partnerships to benefit children, including children from diverse cultural and linguistic backgrounds and children with special needs. Explores theories and research supporting a family-centered approach.

**Hours of Lecture or Seminar per week:** 3
ECED 405 - Introduction to Early Childhood Special Education

Credits: 3 (NR)
Surveys current knowledge about young children with disabilities within the context of human growth and development and learning expectations in the preschool years. Includes historical factors and legislation affecting service delivery.

Notes: Field experience required.

ECED 406 - Medical Aspects of Physical and Sensory Disabilities of Diverse Young Learners

Credits: 3 (NR)

ECED 422 - Developing Language, Literacy, and Communication of Diverse Young Learners

Credits: 3 (NR)
Examines strategies to develop language, literacy, and communication in young children with varying abilities. Explores the importance of adult-child interaction and the effect of bilingualism, cultural diversity, cognitive ability, and language disorders.

Equivalent to EDUT 423 (2010-2011 Catalog)

Notes: Field experience required.

ECED 423 - Early Intervention for Infants and Toddlers with Disabilities: Collaborative and Consultative Approaches
Credits: 3 (NR)
Covers methods of service delivery for infants and toddlers with disabilities and their families. Explores key aspects of consultation, interdisciplinary collaboration, service coordination, and family-centered services. Focuses on culturally responsive practices.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring, Summer

ECED 497 - Special Topics in Early Childhood Education

Credits: 1-3 (RT)
Provides study on selected topic or emerging issue in Early Childhood Education.

Notes: May be repeated for credit with ECE program permission.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring, Summer

ECED 501 - Developmental Pathways of Diverse Learners, Birth-Adolescence

Credits: 3 (NR)
Examines child and adolescent development from diverse perspectives. Addresses typical and atypical physical, social, and emotional, language, and intellectual development. Explores role of individual differences and culture in understanding and interpreting child and adolescent development.

Equivalent to EDUT 511 (2010-2011 Catalog)

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring, Summer

ECED 502 - Foundations of Language and Literacy for Diverse Young Learners

Credits: 3 (NR)
Examines complexity of language acquisition and literacy development. Focuses on typical and atypical language development, connections between language and literacy, and diversity of communication styles in families and cultures. Emphasizes first and second language acquisition.

Equivalent to EDUT 513 (2010-2011 Catalog)

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring, Summer
ECED 503 - Inclusive Curriculum for Young Learners: Planning Instruction and Guidance

Credits: 3 (NR)

Equivalent to EDUT 514 (2010-2011 Catalog)

Notes: Field experience required

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

ECED 504 - Families, Communities, and Schools

Credits: 3 (NR)
Focuses on strategies for developing culturally appropriate family-professional partnerships to benefit children, including children from diverse cultural and linguistic backgrounds and children with special needs. Explores theories and research supporting a family-centered approach.

Equivalent to EDUT 515 (2010-2011 Catalog)

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring, Summer

ECED 505 - Introduction to Early Childhood Special Education

Credits: 3 (NR)
Surveys current knowledge about young children with disabilities within the context of human growth and development and learning expectations in the preschool years. Includes historical factors and legislation affecting service delivery.

Notes: Field experience required.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring, Summer

ECED 506 - Medical Aspects of Physical and Sensory Disabilities of Diverse Young Learners

Credits: 3 (NR)
Focuses on medical aspects of young children with disabilities and the role of professionals in service delivery. Explores etiology, symptomatology, and management of neuromotor disabilities. Emphasizes positioning, adaptive strategies, and
understanding assistive technology devices.
Equivalent to EDSE 558 (2011-2012 Catalog)

**ECED 511 - Assessment of Diverse Young Learners**

Credits: 3 (NR)
Examines types of assessment for planning and implementing effective preschool through third-grade programs across content areas for culturally, linguistically, and ability diverse children. Addresses selection, administration, analysis, and interpretation of formal and informal assessments.
Equivalent to EDUT 612 (2010-2011 Catalog)

**Prerequisite(s):** Admission to the Early Childhood Education program or approval of course instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall, Spring

**ECED 512 - Language and Literacy Assessment and Instruction for Diverse Young Learners**

Credits: 3 (NR)
Examines ways to assess and develop reading, writing, listening, and speaking in preschool through third-grade classrooms. Addresses instructional strategies and practices that promote language and literacy development in culturally, linguistically, and ability diverse children.
Equivalent to EDUT 613 (2010-2011 Catalog)

**Prerequisite(s):** Admission to the Early Childhood Education program or approval of course instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall, Spring, Summer

**ECED 513 - Curriculum Across the Content Areas for Diverse Young Learners**

Credits: 3 (NR)
Explores assessment, curriculum development, planning, and instructional practices across content areas. Examines strategies for guiding children's behavior, integrating instruction across content areas, and planning and implementing community of learners inclusive of children with diverse disabilities.
Equivalent to EDUT 614 (2010-2011 Catalog)
Prerequisite(s): Admission to the Early Childhood Education program or approval of course instructor; ECED 503 Inclusive Curriculum for Young Learners: Planning Instruction and Guidance.

Corequisite(s): ECED 790 Internship in Early Childhood Education

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

ECED 514 - Mathematics and Science for Diverse Young Learners

Credits: 3 (NR)
Examines ways to foster development of mathematics and science in preschool to third-grade children. Covers construction of math and science lessons and hands-on experiences that address the needs of culturally, linguistically, and ability diverse children.

Prerequisite(s): Admission to the Early Childhood Education program or approval of course instructor.

Notes: Field experience required.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

ECED 521 - Family-Centered Assessment of Diverse Young Learners

Credits: 3 (NR)
Examines types of assessment, including family-centered assessment, used for planning and implementing effective programs for children from diverse cultures and with varied learning needs. Addresses selection, administration, and interpretation of formal and informal assessments.

Equivalent to EDSE 656 (2011-2012 Catalog); EDUT 522 (2010-2011 Catalog)

Prerequisite(s): Admission to the Early Childhood Education program or approval of course instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

ECED 522 - Developing Language, Literacy, and Communication of Diverse Young Learners

Credits: 3 (NR)
Examines strategies to develop language, literacy, and communication in young children with varying abilities. Explores the importance of adult-child interaction and the effect of bilingualism, cultural diversity, cognitive ability, and language disorders.
ECED 523 - Early Intervention for Infants and Toddlers with Disabilities: Collaborative and Consultative Approaches

Credits: 3 (NR)
Covers methods of service delivery for infants and toddlers with disabilities and their families. Explores key aspects of consultation, interdisciplinary collaboration, service coordination, and family-centered services. Focuses on culturally responsive practices.

Equivalent to EDUT 524 (2010-2011 Catalog)

Prerequisite(s): Admission to the Early Childhood Education program or approval of course instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

ECED 524 - Families of Children with Special Needs

Credits: 3 (NR)
Focuses on strategies for developing culturally appropriate family-professional partnerships to benefit children with special needs. Explores theories and research supporting a family-centered approach. Includes family and professional rights and responsibilities in the special education process.

Equivalent to EDSE 615 (2011-2012 Catalog)

Prerequisite(s): Admission to the Early Childhood Education program or approval of course instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

ECED 585 - Research in Early Childhood Education

Credits: 3 (NR)
Develops fundamental concepts, principles, and methods of research in early childhood education, with emphasis on interpreting and applying research results. Critiques research and uses findings in educational settings.

Hours of Lecture or Seminar per week: 3
ECED 591 - Policy Perspectives in Early Childhood Education

Credits: 3 (NR)
Explores historical and current trends and issues involving legislation and policy in early childhood education, multilingual education, early childhood special education, and multicultural education. Focuses on historical role of social advocacy, development of advocacy skills, and collaboration and consultation with other professionals and staff in early childhood education. Provides understanding of continuum of services and context of service delivery.

Equivalent to EDUT 782 (2010-2011 Catalog)

Prerequisite(s): Admission to the Early Childhood Education program or approval of course instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring, Summer

ECED 597 - Special Topics in Early Childhood Education

Credits: 1-3 (RT)
Provides study on selected topic or emerging issue in Early Childhood Education.

Notes: May be repeated for credit with ECE program permission.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring, Summer

ECED 601 - Frameworks for Early Childhood Education

Credits: 3 (NR)
Analyzes foundational frameworks for developing perspectives for working with culturally, linguistically, and ability diverse young learners, birth to age 8, and their families. Examines foundational work from fields of early childhood education, early childhood special education, multicultural education, and second language acquisition and bilingual education.

Equivalent to EDUT 781 (2010-2011 Catalog)

Prerequisite(s): Must be taken with or after final course of program.

Notes: Must be taken as final course or with final courses of the program.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring, Summer
ECED 790 - Internship in Early Childhood Education

Credits: 1-6 (RD)
Enables students to participate full time in an internship in early childhood education. Links university course work to real world of working with diverse young learners and their families.

Equivalent to EDUT 790 (2010-2011 Catalog)

Prerequisite(s): Admission to the Early Childhood Education program or approval of course instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
Grading: Satisfactory/No Credit
When Offered: Fall, Spring

ECED 791 - Internship in Early Childhood Special Education

Credits: 1-6 (RD)
Enables students to participate full time in an internship in early childhood special education. Links university course work to real world of working with diverse young learners and their families.

Prerequisite(s): Admission to the Early Childhood Education program or approval of course instructor.

Notes: Students enroll in both infant/toddler (3 credits) and preschool (3 credits) internships.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
Grading: Satisfactory/No Credit
When Offered: Fall, Spring

ECED 792 - Internship in Early Childhood Education-TFA

Credits: 1-6 (RD)
Enables students to participate full time in an internship in early childhood education. Links university course work to real world of working with diverse young learners and their families.

Prerequisite(s): Admission to the Early Childhood Education program or approval of course instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
Grading: Satisfactory/No Credit
When Offered: Fall, Spring

ECED 793 - Internship in Preschool Early Childhood Special Education
Credits: 3 (RD)
Enables students to participate full time in an internship in preschool early childhood special education. Links university course work to real world of working with diverse young learners and their families.

Prerequisite(s): ECED 501, ECED 502, ECED 503, ECED 524 or Permission of the Early Childhood Education Program Coordinator.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
Grading: Satisfactory/No Credit
When Offered: Fall, Spring

ECED 795 - Internship in Kindergarten - Third Grade

Credits: 3 (RD)
Enables students to participate full time in an internship in early childhood education in kindergarten through third grade. Links university course work to real world of working with diverse young learners and their families.

Prerequisite(s): ECED 501, ECED 502, ECED 503, ECED 504, ECED 790 or Permission of the Early Childhood Education Program Coordinator.

Corequisite(s): ECED 513.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
Grading: Satisfactory/No Credit
When Offered: Fall, Spring

ECED 801 - Current Research and Trends in Early Childhood Education

Credits: 3 (RT)
Examines research and trends in the early education of children. Explores issues that influence the education of young children with special education needs and children from culturally, linguistically, and economically diverse backgrounds. Examines practices appropriate for diverse young learners.

Prerequisite(s): Admission to the PhD in Education program or post-master’s status and approval of course instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring, Summer

ECED 802 - Cognition, Language, and Literacy for Diverse Young Learners

Credits: 3 (RT)
Examines research and practice related to cognition, language, and literacy in the early education of diverse learners, including special education and multicultural/multilingual education.
ECED 803 - Personnel Preparation and Professional Development in Early Childhood Education

Credits: 3 (NR)
Explores research and current recommended practices related to professional development and teacher education in Early Childhood Education, birth through grade 3, including children with special education needs and those from culturally, linguistically, and economically diverse backgrounds. Provides opportunity for practical application with preservice or inservice early educators.

Prerequisite(s): Admission to the PhD in Education program or post-master’s status and approval of course instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring, Summer

ECED 804 - Family Research and Practice in Early Childhood Education

Credits: 3 (NR)
Explores the relationship between families and professionals in providing appropriate early care and education, birth through grade 3, including children with special education needs and those from culturally, linguistically, and economically diverse backgrounds. Includes in-depth study, analysis, and discussion of original research as well as syntheses of findings.

Prerequisite(s): Admission to the PhD in Education program or post-master’s status and approval of course instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring, Summer

Economics (ECON)

Offered by the College of Humanities and Social Sciences

Individual courses taken for credit under their former numbers may not be repeated for credit under their present numbers. A grade of C or better in ECON 103 and 104 is prerequisite to upper-division economics courses.

ECON 100 - Economics for the Citizen

Credits: 3 (NR)
Not available to economics majors. Broad introduction to economic concepts and how they can contribute to a better
understanding of the world around us. Applies and develops concepts to current economic and social problems and issues. Less formal modeling than in the 103-104 sequence.

Fulfills general education requirement in social and behavioral science.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**ECON 103 - Contemporary Microeconomic Principles**

Credits: 3 (NR)  
Introduces microeconomics in the context of current problems. Explores how market mechanism allocates scarce resources among competing uses; uses supply, demand, production, and distribution theory to analyze problems.

Fulfills general education requirement in social and behavioral science.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**ECON 104 - Contemporary Macroeconomic Principles**

Credits: 3 (NR)  
Introduces macroeconomics in the context of current problems. National income analysis, money and banking, economic growth and stability, unemployment, inflation, and role of government.

Fulfills general education requirement in social and behavioral science.

**Prerequisite(s):** ECON 103.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**ECON 105 - Environmental Economics for the Citizen**

Credits: 3 (NR)  
Introduction to economic concepts and how they can be applied to environmental policy issues such as air and water pollution, climate change, natural resource use, and sustainability. Focus is on concepts, policy, and case studies rather than formal modeling exercises.  
Designated a Green Leaf Course.

Fulfills general education requirement in social and behavioral science.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0
**ECON 110 - Introduction to Economic Science**

Credits: 2 (NR)
Introduces economics as an observational science, covering personal vs. impersonal exchange, strategic interdependence and game theory, group decision making, and market design.

Fulfills general education requirement in social and behavioral science (ECON 110 and 111 must be taken in sequence).

Notes: Registration is controlled; contact instructor for guidelines.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 0

---

**ECON 111 - Laboratory Methods in Economics**

Credits: 1 (NR)
Enables participation in experimental economics research by recruiting subjects, writing experiment instructions, and monitoring sessions.

Fulfills general education requirement in social and behavioral science (ECON 110 and 111 must be taken in sequence).

Notes: Registration is controlled; contact instructor for guidelines.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 3

---

**ECON 306 - Intermediate Microeconomics**

Credits: 3 (NR)
Basic factors of price and distribution theory: analysis of demand, costs of production and supply relationships, and price and output determination under various market structures.

Prerequisite(s): ECON 103 and 104, and MATH 108 or 113.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

---

**ECON 308 - Managerial Economics and Strategy**

Credits: 3 (NR)
Analysis of major strategic business situations including pricing strategy, incentives and contracts, game theory, and vertical and horizontal integration.

Prerequisite(s): ECON 306.
ECON 309 - Economic Problems and Public Policies

Credits: 3 (NR)
Economic problems in light of current and proposed public policies. Topics include environmental issues, international trade policies, and regulatory issues and their historical roots.

Fulfills general education requirement in synthesis.

Prerequisite(s): Completion or concurrent enrollment in all other general education courses. ECON 100 or 103 and 104 or permission of instructor.

ECON 310 - Money and Banking

Credits: 3 (NR)
Monetary, commercial, and central banking systems, with particular emphasis on their relationship with American government programs, fiscal policies, and controls.

Prerequisite(s): ECON 103 and 104, or permission of instructor.

ECON 311 - Intermediate Macroeconomics

Credits: 3 (NR)
Aggregate economic accounts, including measuring national income; determinants of levels of income and output; and causes and solutions for problems of unemployment, inflation, and economic growth.

Prerequisite(s): ECON 103 and 104, or permission of instructor.

ECON 320 - Labor Problems

Credits: 3 (NR)
Explores American labor unions and their effect on society, including causes of and proposed solutions to selected problems.
Prerequisite(s): ECON 103 and 104, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ECON 321 - Economics of Labor

Credits: 3 (NR)
Defines factors that determine levels of wages and employment, and economic consequences. Emphasizes recent developments in unionism, collective bargaining, and industrial technology.

Prerequisite(s): ECON 306.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ECON 330 - Public Finance

Credits: 3 (NR)
Covers intergovernmental financial relationships; types, incidences, and consequences of taxation; other sources of governmental income; governmental expenditures and their effect; public economic enterprises; public borrowing; and debt management and its economic effect.

Prerequisite(s): ECON 306 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ECON 335 - Environmental Economics

Credits: 3 (NR)

Microeconomic analysis of environmental problems. Topics include externalities and market failure, alternative solutions and policies, problems in monitoring and enforcement, economic analysis of development of legislation and regulation, and applications to current policy issues. Designated a Green Leaf Course.

Prerequisite(s): ECON 103 and 104

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ECON 340 - Introduction to Mathematical Economics
Mathematical treatment of theory of firm and household behavior, stabilization policy, growth theory, input-output analysis, and linear programming.

Prerequisite(s): ECON 306 and 311, and MATH 113; or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ECON 345 - Introduction to Econometrics

Credits: 3 (NR)
Modern statistical techniques in estimating economic relations.

Fulfills writing intensive requirement in the major.

Prerequisite(s): ECON 306, ECON 311, and STAT 250 and STAT 350 or STAT 344 and STAT 354.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ECON 350 - Regional and Urban Economics

Credits: 3 (NR)
Regional development and metropolitan growth, including locational decisions of households and firms, and problems associated with high-density urban economic activity.

Prerequisite(s): ECON 306 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ECON 355 - The Political Economy of Nonprofit Institutions

Credits: 3 (NR)
Applies the basic principles of economics to teach students to think critically about nonprofit institutions. Examines the economics of nonprofit institutions, how incentives influence the evolution of charities, and current issues in nonprofit organizations.

Fulfills writing intensive requirement in the major.

Prerequisite(s): ECON 103 and ECON 104 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
ECON 360 - Economics of Developing Areas

Credits: 3 (NR)
Economic growth characteristic of developing countries. Economic development, obstacles to development, policies, and planning.

Fulfills general education requirement in global understanding.

Prerequisite(s): ECON 103 and 104, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ECON 361 - Economic Development of Latin America

Credits: 3 (NR)
Economic development, institutions, and problems of Latin America.

Fulfills general education requirement in global understanding.

Prerequisite(s): ECON 103 and 104, or permission of instructor.

Notes: Fulfills the college requirement in non-Western culture.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ECON 362 - African Economic Development

Credits: 3 (NR)
Issues of economic development as applied to Africa. Includes overview of early economic history in Africa and post-independence development, and contemporary development problems.

Fulfills general education requirement in global understanding.

Prerequisite(s): ECON 103 and 104.

Notes: Fulfills the college requirement in non-Western culture.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ECON 365 - Topics in Economic History

Credits: 3 (RT)
Possible topics include ancient, medieval, modern European, and American economic history, using econometric analysis as
ECON 370 - Economics of Industrial Organization

Credits: 3 (NR)
Factors influencing industrial structure, and industrial conduct and performance.

Prerequisite(s): ECON 306, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ECON 374 - Health Economics

Credits: 3 (NR)
Microeconomic analysis of health and medicine. Topics include the determinants of health, health externalities, health insurance, the health effects of medicine, the supply and demand of medicine, medical quality and regulation, and information asymmetries.

Prerequisite(s): ECON 306 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ECON 380 - Economies in Transition

Credits: 3 (NR)
Examines problems and achievements of formerly communist and socialist countries including China, Eastern European countries, and Russia and other countries of the former Soviet Union as they transition to more market-oriented economies. Includes market economics and central planning.

Fulfills general education requirement in global understanding.

Prerequisite(s): ECON 103 and 104, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
**ECON 385 - International Economic Policy**

Credits: 3 (NR)
Introduces economic way of thinking on trade and international finance. Presents historical and current information on consequences of trade and protectionism.

**Notes:** May not be applied toward the elective course requirement needed for a major or minor in economics.

Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0

---

**ECON 390 - International Economics**

Credits: 3 (NR)
Foreign exchange market, balance of payment, foreign trade policies, and theories of international trade.

Fulfills general education requirement in global understanding.

**Prerequisite(s):** ECON 306 and 311, or permission of instructor.

Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0

---

**ECON 403 - Austrian Economics**

Credits: 3 (NR)
Microeconomic and macroeconomic models and misallocation of resources.

**Prerequisite(s):** ECON 306 and 311.

**Notes:** Alternative economic tools from noted Austrian economists.

Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0

---

**ECON 410 - Public Choice**

Credits: 3 (NR)
Applies economic theory, methodology to study nonmarket decision making.

**Prerequisite(s):** ECON 306.

Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0
ECON 412 - Game Theory and Economics of Institutions

Credits: 3 (NR)
Introduces game theory and its relevance for analyzing framework of rules and institutions within which economic processes occur. Applies game theoretical concepts to comparative analysis of causes and effects of alternative institutional arrangements.

Prerequisite(s): ECON 306 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ECON 415 - Law and Economics

Credits: 3 (NR)
Economic analysis of the law. Topics include introduction to legal institutions and legal analysis; application of economic concepts to the law of property, contracts and torts, criminal and constitutional law; economic efficiency of common law; and public choice perspective on the evolution of the law.

Prerequisite(s): ECON 306 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ECON 420 - International Money and Finance

Credits: 3 (NR)
Examines models of balance of payments, exchange rate behavior, and open economy macroeconomics. Includes international financial system and issues such as globalization and international financial instability.

Prerequisite(s): ECON 306 and 311, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ECON 435 - Economics of Energy

Credits: 3 (NR)
Examines various issues in the energy industry using tools from microeconomic theory, law and economics and public choice. Topics include issues related to oil, historical and current energy regulation, and environmental issues associated with energy.

Fulfills writing intensive requirement in the major.

Prerequisite(s): Econ 306.

Hours of Lecture or Seminar per week: 3
**ECON 440 - Economic Systems Design: Principles and Experiments**

Credits: 3 (NR)
Introduces design principles to develop systems to allocate resources. Students must participate in experiment demonstrations of different allocation mechanisms. They also are exposed to experimental methods in economics and market design.

Equivalent to SYST 480

**Prerequisite(s):** MATH 213.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**ECON 441 - Economic Systems Design: Case Studies and Analysis**

Credits: 3 (NR)
Requires students to design and develop mechanism to specific allocation problem. Students develop analytical and working engineering models of their mechanism.

**Prerequisite(s):** ECON 440.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**ECON 442 - Economic Systems Design: Implementation**

Credits: 3 (NR)
Involves students in developing experimental design to test proposed allocation solution. Design process includes construction of experimental parameters, treatments, and initial test in laboratory setting.

**Prerequisite(s):** ECON 441.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**ECON 445 - Design and Analysis of Experiments**

Credits: 3 (NR)
Topics include comparing two or more treatments, and computing and interpreting analysis of variance. Discusses randomized block, Latin square, and factorial designs; and applications to economics experiments.
Prerequisite(s): STAT 250, 344; and MATH 351 or IT 250; or permission of the instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ECON 460 - Senior Seminar in Philosophy, Politics, and Economics

Credits: 3 (NR)
Covers issues in the philosophy, economics, and political science of institutions, information, and collective action. Through case studies of existing legal and political institutions, applies the insights to problems in politics, policy making, social-choice theory, and social, moral, and political philosophy. (Specific content varies).

Equivalent to PHIL 460, GOVT 469.

Prerequisite(s): PHIL 358 and ECON 412 or permission of instructor.

Notes: Serves as the capstone course for the PPE program.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ECON 470 - Economics of regulation

Credits: 3 (NR)
Examines various issues surrounding concepts of regulation using tools from microeconomic theory and public choice. Topics include antitrust, rate regulation, policy rationales for regulation, and issues of current interest.

Fulfills writing intensive requirement in the major.

Prerequisite(s): Econ 306.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

ECON 481 - The Development of Economic Thought

Credits: 3 (NR)
Developments in economic thought from 1500 to the present. Emphasizes historical origins, impact on contemporary economics, and theoretical validity.

Prerequisite(s): ECON 306 and 311, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
ECON 490 - Senior Seminar on Problems in Economics

Credits: 3 (NR)
Applies economic tools to investigate problems in economics.

Prerequisite(s): ECON 306 and 311, OM 210, and 90 credits; economics majors only.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ECON 492 - Study Abroad

Credits: 1-6 (RD)
Study abroad under supervision of George Mason faculty. Course topics, content, and locations vary.

Notes: May be repeated for a maximum of 12 credits with permission of department.

Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring, Summer

ECON 494 - Honors Thesis Writing Seminar

Credits: 3 (NR)
Develops skills in finding and evaluating sources, oral presentation, and academic writing.

Prerequisite(s): ECON 306 and 311, an overall GPA of 3.5, and permission from the instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Summer

ECON 495 - Honors Thesis in Economics

Credits: 3-6 (RD)
Honors-level research on a self-selected topic in economics culminating in a substantial research paper and an oral presentation.

Prerequisite(s): ECON 494 with minimum grade of B or permission from the instructor with an approved research proposal.

Notes: Requirements for departmental honors in the major are in addition to the coursework required for the major. ECON 495 credit may not be applied toward the elective course requirement needed for a major or minor in economics.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
ECON 496 - Special Topics in Economics

Credits: 3 (RT)
Subject matter varies.

Prerequisite(s): Varies with topic.

Notes: May be repeated for credit when topic is different.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ECON 498 - Internship

Credits: 3-6 (NR)
Students find economics-related internship with assistance from Career Services. Pre-internship proposal and final reflections paper required.

Prerequisite(s): 6 upper-level credits of economics, junior standing, and permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
Grading: Satisfactory/No Credit

ECON 499 - Independent Study

Credits: 1-4 (RT)
Individual study of selected area of economics.

Prerequisite(s): Economics majors with 90 credits, and permission of both department and instructor.

Notes: Directed research paper required. May be repeated for a maximum of 6 credits.

Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 0

ECON 535 - Survey of Applied Econometrics

Credits: 3 (NR)
Applied introduction to estimating economic relationships. Includes simple equation and simultaneous equation system estimation.

Prerequisite(s): Admission to master’s program in economics, or OM 210 or STAT 250 and 350, and ECON 306 and 311, and MATH 113; or permission of instructor.

Notes: Contact Graduate Coordinator at econgrad@gmu.edu for permission to register and CRN. Students who take ECON 535
may not take ECON 637 for credit. Non-Degree students are permitted to enroll based on space availability determined one week before the first day of classes AND on meeting the prerequisites AND with permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

### ECON 600 - Economics for Educators

Credits: 3 (NR)  
Introduces current and prospective K-12 teachers to the fundamentals of economics. Prepares teachers to instruct students in the economics and personal finance course now required by the Virginia Department of Education. Supports teachers in successfully teaching the economics content of the Virginia SOLs in history and social sciences.

**Prerequisite(s):** Undergraduate degree.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

### ECON 611 - Microeconomic Theory

Credits: 3 (NR)  
Covers theory of behavior of consumers, firms, and resource suppliers; theories of choice under risk and uncertainty; partial equilibrium analysis of competitive and noncompetitive markets; general equilibrium analysis; and welfare economics. Introduces capital theory.

**Prerequisite(s):** Admission to master's program in economics or ECON 306 and 311, and MATH 113; or permission of instructor.

**Notes:** Contact Graduate Coordinator at econgrad@gmu.edu for permission to register and CRN. Non-Degree students are permitted to enroll based on space availability determined one week before the first day of classes AND on meeting the prerequisites AND with permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

### ECON 612 - Microeconomic Theory II

Credits: 3 (NR)  
Nature of the firm; theory of supply; and production functions, factor pricing, and supplies. Introduces microeconomic foundations of theories of public finance and public choice.

**Prerequisite(s):** ECON 611.

**Notes:** Contact Graduate Coordinator at econgrad@gmu.edu for permission to register and CRN. Non-Degree students are permitted to enroll based on space availability determined one week before the first day of classes AND on meeting the prerequisites AND with permission of instructor.
ECON 615 - Macroeconomic Theory

Credits: 3 (NR)
Survey course covering monetary theory, theories of consumption and saving, budget deficits, economic growth, international finance, and monetary and fiscal policies.

Prerequisite(s): Admission to master's program in economics, or ECON 306 and 311, and MATH 113; or permission of instructor.

Notes: Contact Graduate Coordinator at econgrad@gmu.edu for permission to register and CRN. Non-Degree students are permitted to enroll based on space availability determined one week before the first day of classes AND on meeting the prerequisites AND with permission of instructor.

ECON 623 - American Economic History

Credits: 3 (NR)
Explores development of American economy and evolution of economic institutions.

Prerequisite(s): ECON 611 and 615, or ECON 715 and 811, taken concurrently; or permission of instructor.

Notes: ECON 637 recommended.

ECON 630 - Mathematical Economics I

Credits: 3 (NR)
Includes set theory, function, differential calculus, integration, series, and matrix algebra, with special emphasis on economic applications.

Prerequisite(s): Admission to master’s program in economics, or ECON 306 and 311, and MATH 113, or permission of instructor.

Notes: Contact Graduate Coordinator at econgrad@gmu.edu for permission to register and CRN. Non-Degree students are permitted to enroll on space availability determined one week before the first day of classes AND on meeting the prerequisites AND with permission of instructor.
ECON 632 - Economic Systems Design Principles and Experiments

Credits: 3 (NR)
Introduces analytical and engineering principles to develop exchange systems. Students must become familiar with literature on applied mechanism design; and understand behavioral aspects of auction systems, matching, assignment and transportation problems, and information markets. Also introduces methods for testbedding systems using experimental economics and statistical design.

Prerequisite(s): Courses in linear and nonlinear optimization, and linear algebra.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ECON 633 - Economic Systems Design Case Studies and Analysis

Credits: 3 (NR)
Students begin process of doing research in design economic exchange system. Design process includes electronic instructions, and design of information structures. Students responsible for research into economic issues, and practical design issues.

Prerequisite(s): ECON 632.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ECON 634 - Economic Systems Design Implementation

Credits: 3 (NR)
Students do original research in economic systems design by constructing engineering model of solution to allocation problem. Research includes experimental and statistical design, and complete description of hypothesis related to construction of experimental parameters and treatments to test mechanism. Requires initial test of mechanism in laboratory setting.

Prerequisite(s): ECON 633.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ECON 637 - Econometrics I

Credits: 3 (NR)
Techniques of estimating relationships between economic variables. Introduces multiple regression and problems associated with single equation model-autocorrelation, multicollinearity, and heteroscedasticity.

Prerequisite(s): Acceptance to PhD program in economics, or permission of instructor.
Notes: Contact Graduate Coordinator at econgrad@gmu.edu for permission to register and CRN. Non-Degree students are permitted to enroll based on space availability determined one week before the first day of classes AND on meeting the prerequisites AND with permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ECON 676 - Comparative Economic Systems

Credits: 3 (NR)
Capitalism, socialism, and corporatism historical perspective. Includes examination of economies of representative contemporary countries.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ECON 695 - Special Topics in Economics

Credits: 3 (RD)
Topics vary according to interests of instructor. Emphasizes new areas of discipline.

Notes: May be repeated for a maximum of 9 credits when topic is different.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

ECON 715 - Macroeconomic Theory I

Credits: 3 (NR)
Covers classical, neoclassical, Keynesian, and post-Keynesian theories of income and employment determination; theories of inflation and growth; and demand for money and implications for effectiveness of monetary vs. fiscal policy.

Prerequisite(s): Admission to doctoral program in economics, or permission of instructor.

Notes: Contact Graduate Coordinator at econgrad@gmu.edu for permission to register and CRN. Non-Degree students are permitted to enroll based on space availability determined one week before the first day of classes AND on meeting the prerequisites AND with permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ECON 799 - Master's Thesis
Credits: 1-6 (RD)
Research on approved thesis topic under direction of thesis committee.

Prerequisite(s): Admission to MA economics program and permission of thesis advisor.

Notes: Students must register for a minimum of three credit hours in their first semester of 799 and maintain continuous enrollment in 799 while writing and submitting a thesis. A maximum of 6 credits of 799 may be applied to the degree.

Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 1-12
Grading: Satisfactory/No credit only

ECON 811 - Microeconomic Theory I

Credits: 3 (NR)
Theory and applications of behavior of consumers, firms, and resource suppliers. Partial equilibrium analysis of various market structures and introduction to intertemporal choice and capital theory. Review and analysis of classic works in microeconomic theory.

Prerequisite(s): Admission to doctoral program in economics, or permission of instructor.

Notes: Contact Graduate Coordinator at econgrad@gmu.edu for permission to register and CRN. Non-Degree students are permitted to enroll based on space availability determined one week before the first day of classes AND on meeting the prerequisites AND with permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ECON 812 - Microeconomic Theory II

Credits: 3 (NR)
Examines nature of firm; theory of supply; and production functions, factor pricing, and supplies. Introduces microeconomic foundations of theories of public finance and public choice.

Prerequisite(s): ECON 811.

Notes: Contact Graduate Coordinator at econgrad@gmu.edu for permission to register and CRN. Non-Degree students are permitted to enroll based on space availability determined one week before the first day of classes AND on meeting the prerequisites AND with permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ECON 816 - Macroeconomic Theory II

Credits: 3 (NR)
Aggregate economic activity and price levels with emphasis on dynamic models.
**Prerequisite(s):** ECON 715 and 811, or permission of instructor.

**Notes:** Contact Graduate Coordinator at econgrad@gmu.edu for permission to register and CRN. Non-Degree students are permitted to enroll based on space availability determined one week before the first day of classes AND on meeting the prerequisites AND with permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**ECON 817 - Monetary Theory and Policy**

Credits: 3 (NR)  
Theory of mechanisms through which central banking affects economic activity and prices. Analyzes demand for money and its relationship to economic activity. Develops monetary theory with emphasis on current theories and controversies in the field.

**Prerequisite(s):** ECON 615 or 715, and 535 or 637, or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**ECON 820 - History of Economic Thought**

Credits: 3 (NR)  
Explores major figures in history of economic thought and tools of analysis they created. Emphasizes classical, neoclassical, and Keynesian theories.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**ECON 821 - History of Economic Thought II**

Credits: 3 (NR)  
Covers development of economic analysis from marginal revolution of 1877 to present. Emphasizes development of neoclassical economic theory.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**ECON 823 - Topics in Economic History**

Credits: 3 (NR)  
Offers economic analysis of various historical epochs including Industrial Revolution, evolution of political reform, rise of unions, and growth of government.
Prerequisite(s): ECON 611 and 615, or ECON 715 and 811; or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**ECON 825 - Political Economy and Public Policy I**

Credits: 3 (NR)
Covers economic process of public policy formulation and implementation; and economic behavior of principals in policy making and execution.

Prerequisite(s): ECON 611 and 811, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**ECON 826 - Political Economy and Public Policy II**

Credits: 3 (NR)
Specific issues related to political economy of public policy, including privatization, political economy of deficit spending, regulation and deregulation, and economics of rent seeking.

Prerequisite(s): ECON 611 or 811; or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**ECON 827 - Economic Philosophy**

Credits: 3 (NR)
Analyzes philosophical organization, including interrelations between economics and legal and political institutions; philosophical presuppositions of capitalist economy under constitutional democracy; alternative presuppositions for non-capitalist economies; and critical evaluation of history of ideas in social and moral philosophy.

Prerequisite(s): ECON 611 or 811 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**ECON 828 - Constitutional Economics**

Credits: 3 (NR)
Analyzes existing and proposed elements of economic constitution. Emphasizes fiscal, monetary, transfer, and regulatory powers
of government and constitutional limits on such powers, especially in the United States. Includes analysis of proposed changes in limits.

**Prerequisite(s):** ECON 611 or 811 or permission of instructor.

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0

**ECON 829 - Economics of Institutions**

Credits: 3 (NR)
Analyses framework of rules and institutions for economic activities and transactions. Includes emergence and working properties of different institutions, and classical and contemporary approaches to economic theory of institutions.

**Prerequisite(s):** ECON 611 or 811 or permission of instructor.

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0

**ECON 830 - Mathematical Economics I**

Credits: 3 (NR)
Includes set theory, function, differential calculus, integration, series, and matrix algebra, with special emphasis on economic applications.

**Prerequisite(s):** Admission to doctoral program in economics, or ECON 306 and 311, and MATH 113; or permission of instructor.

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0
**When Offered:** Fall

**ECON 831 - Mathematical Economics II**

Credits: 3 (NR)
Covers mathematical treatment of economic theories. Includes static and dynamic analysis of macromodels; input-output analysis; and optimization techniques such as Lagrangian multipliers, linear programming, nonlinear programming, and game theory.

**Prerequisite(s):** ECON 630 or 830; or permission of instructor.

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0

**ECON 838 - Econometrics II**
Credits: 3 (NR)
Explores econometric models and simultaneous equation systems. Includes identifying parameters and least squares bias, alternative estimation methods, and block recursive systems.

**Prerequisite(s):** ECON 637 or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

### ECON 839 - Constitutional Economics II

Credits: 3 (NR)
Uses economic analysis and methods to explore more deeply than in Constitutional Economics I specific issues in Constitutional Economics.

**Prerequisite(s):** ECON 828

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

### ECON 840 - Law and Economics I

Credits: 3 (NR)
Uses economics to analyze U.S. Common-law system, evaluating efficiency and logic of evolution.

**Prerequisite(s):** ECON 611 or 811; or permission of instructor.

**Notes:** No prior knowledge of law required.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

### ECON 841 - Law and Economics II

Credits: 3 (NR)
Explores empirical analyses of law of property, torts, crime, and family. Also looks at law's effects on freedom and economic growth.

**Prerequisite(s):** ECON 611 or 811, and ECON 535 or 637; or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

### ECON 842 - Labor Economics
Credits: 3 (NR)
Formal models of labor demand, supply, utilization, and wage determination; determination of factor shares in open economy; theory of collective bargaining, and impact of trade unions on wage rates and resource allocation; measurement, types, and causes of unemployment; and cost-benefit analysis of labor training and development projects.

Prerequisite(s): ECON 611 and 615, or 715 and 811, or permission of instructor.

Notes: ECON 637 recommended.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ECON 844 - Industrial Organization and Public Policy I

Credits: 3 (NR)
Structure of American industry and underlying determinants. Includes structure and conduct on industrial performance in light of theory and empirical evidence; and rational antitrust policy and analysis of impact on structure and performance.

Prerequisite(s): ECON 611 or 811 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ECON 846 - Industrial Organization and Public Policy II

Credits: 3 (NR)
Covers relationship of law, economics, and theories of social control of property rights. Includes theories of market structure and industrial performance.

Prerequisite(s): ECON 844, and ECON 535 or 637; or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ECON 849 - Public Finance

Credits: 3 (NR)
Theoretical and institutional analysis of government expenditure, taxation, debt management, and intergovernmental fiscal relations. Includes allocative and distributional effects of alternative tax and subsidy techniques, principles of benefit cost, and cost-effectiveness analysis for government decisions.

Prerequisite(s): ECON 611 or 811 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
ECON 852 - Public Choice I

Credits: 3 (NR)
Applies economic theory and methodology to study of nonmarket decision making.

Prerequisite(s): ECON 611 or 811 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ECON 854 - Public Choice II

Credits: 3 (NR)
Applies public choice approach to study such topics as causes and consequences of governmental growth, behavior of public bureaucracies, and economic reasoning behind constitutional limitations on size and growth of government.

Prerequisite(s): ECON 852 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ECON 861 - Economics of the Environment

Credits: 3 (NR)
Analyzes economic models of ecosystems and pollutant discharges into environment. Includes methods of improving economic efficiency and review of public policies.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ECON 866 - Economic Development

Credits: 3 (NR)
Explores forces contributing to or retarding economic progress in developing countries. Includes role of foreign trade, economic integration, foreign investment, multinational corporations, and technological transfers.

Prerequisite(s): ECON 611 and 615, or 715 and 811, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ECON 869 - International Trade and Policy
Credits: 3 (NR)
Studies classical, neoclassical, and modern theories of international trade; theory and practice of world trade models such as project LINK; foreign investment and economic growth, tariffs and nontariff barriers, and economic integration; and recent developments, with emphasis on natural resources.

Prerequisite(s): ECON 611 or 811 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**ECON 871 - International Monetary Economics**

Credits: 3 (NR)
Examines international adjustment mechanism, price and income effects, controls, and monetarist approach; development of international monetary system; demand for international reserves; capital movements; and role of International Monetary Fund.

Prerequisite(s): ECON 615 or 715 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**ECON 880 - Theory of the Market Process I**

Credits: 3 (NR)
Examines theory developed by Menger, Mises, Hayek, and others of the Austrian School; and compares with other popular theories.

Prerequisite(s): ECON 611 or 811 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**ECON 881 - Theory of Market Process II**

Credits: 3 (NR)
Continuation of ECON 880. Topics vary and include market-process approach to analyzing capital accumulation and growth; money and credit institutions; inflation and unemployment; and industrial fluctuations.

Prerequisite(s): ECON 880, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**ECON 885 - Experimental Economics**
Credits: 3 (NR)
Designed for graduate students to learn how experimental methods can be used to inform economic research and practice. Students expected to have working understanding of basic economic concepts and multivariate calculus.

Prerequisite(s): ECON 611 or 811 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ECON 886 - Experimental Economics II

Credits: 3 (NR)
Research in experimental design. Topics represent basic tools to build, test, and implement exchange mechanisms in an applied setting.

Prerequisite(s): ECON 885 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ECON 895 - Special Topics in Economics

Credits: 3 (RT)
Topics vary according to interests of instructor. Emphasizes new areas of discipline.

Notes: May be repeated for credit when topic is different.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ECON 896 - Directed Reading and Research

Credits: 1-9 (RT)
Independent reading and research paper on a topic agreed on by student and faculty member.

Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 0

ECON 918 - Seminar in Monetary Theory and Policy

Credits: 3 (NR)
Selected topics of current interest.

Prerequisite(s): ECON 817.
ECON 950 - Seminar in Public Finance

Credits: 3 (NR)
Important public finance issues treated in seminar format.

Prerequisite(s): ECON 849 or permission of instructor.

ECON 985 - Workshop in Experimental Economics

Credits: 3 (RD)
Designed for graduate students who have taken Experimental Economics and Economic Systems Design and are applying experimental methods to their own or collaborative research projects.

Prerequisite(s): ECON 886.

Notes: May be repeated for a maximum of 6 credits.

ECON 998 - Doctoral Dissertation Proposal Research.

Credits: 1-9 (RD)
Research on prospective dissertation topic.

Prerequisite(s): Admission to PhD economics program, and completed at least 48 credits of coursework, and passed required doctoral exams, and permission of dissertation advisor.

Notes: For students who have completed course work but have not yet advanced to candidacy.

ECON 999 - Doctoral Dissertation Research
Research on approved dissertation topic under direction of dissertation committee.

**Prerequisite(s):** Admission to PhD economics program, and advancement to candidacy, and permission of dissertation advisor.

**Notes:** May be repeated; 24 credits may be applied to doctoral degree requirement.

**Hours of Lecture or Seminar per week:** 0  
**Hours of Lab or Studio per week:** 1-15  
**Grading:** S/NC

# Education (EDUC)

Offered by the College of Education and Human Development

## EDUC 203 - Human Disabilities in American Culture

Credits: 3 (NR)  
Provides a perspective in human disabilities in American culture through awareness, historical and political implications, and technological applications. Demonstrations, discussions, and explorations of this culture by age groups, professions, and life domains will be included.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

## EDUC 300 - Introduction to Teaching

Credits: 3 (NR)  
Introduction to educational issues; not applicable in graduate-level teacher education programs. Examines roles of teacher, nature of American schools, and potential contributions of students.

**Notes:** Requires school-based field experience during course.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

## EDUC 301 - Educationally Diverse Populations: Handicapped, Gifted, Multicultural

Credits: 3 (NR)  
Introduction to educational issues; not applicable in graduate-level teacher education programs. Introduces psychological, sociological, educational, and physical aspects of diverse populations in today's schools for early and middle education. Emphasizes litigation and legislation pertaining to education of diverse populations.

**Notes:** Requires school-based field experience during course.
EDUC 302 - Human Growth and Development

Credits: 3 (NR)
Introduction to educational issues; not applicable in graduate-level teacher education programs. Examines human development through life span with special emphasis on cognitive, language, physical, social, and emotional development of children. Emphasizes contemporary theories of human development and their relevance to educational practice.

Notes: Requires school-based field experience during course.

EDUC 303 - Politics of American Education

Credits: 3 (NR)
Focus on the study of the American political system. Designed for students studying the American political system and students interested in careers in education. Explores how interactions between various levels and branches of government affect education.

EDUC 372 - Human Development, Learning, and Teaching

Credits: 3 (NR)
Explores processes that influence intellectual, social, emotional, moral, ethical, and physical development of middle and high school students. Examines research and theories for understanding learning process.

Fulfills general education requirement in social and behavioral science.

Notes: School-based field experience required.

EDUC 400 - In-Service Educational Development

Credits: 1-6 (RT)
Offered at request of school division or other educational agency.

Notes: Content varies; may be repeated for credit.
EDUC 415 - Student Teaching in Physical Education

Credits: 12 (NR)
See PHED 415.

Prerequisite(s): Concurrent enrollment in PHED 472, completion of all courses in the approved program, and admission to and good standing in the Teacher Education Program.

EDUC 422 - Foundations of Secondary Education

Credits: 3 (NR)
Analyzes philosophical assumptions, curriculum issues, learning theories, and history associated with current teaching styles. Emphasizes applications to all disciplines taught in secondary schools. Examines educational trends and issues.

Prerequisite(s): Admission to the secondary Education Program.

Notes: 15 hours school-based field experience required.

EDUC 511 - Introduction to Education in International Schools

Credits: 3 (NR)
Explores structure and variations of international schools. Includes analysis of human growth and development, overview of educational psychology, and introduction to using technology across curriculum.

Prerequisite(s): Admission to FAST TRAIN or Permission of Instructor.

EDUC 512 - Teaching Elementary Social Studies in International Schools

Credits: 3 (NR)
Focuses on translation of knowledge and data-gathering processes from social sciences into appropriate and meaningful K-8 social studies experiences. Develops understanding of aims and methodologies of history, geography, government and political
science, sociology, anthropology, and psychology.

Prerequisite(s): Admission to FAST TRAIN or Permission of Instructor.

EDUC 513 - Teaching Elementary Math in International Schools

Credits: 3 (NR)
Prepresents topics in school mathematics with particular emphasis on developing common K-8 strands for application in international schools. Focuses on exploring, verifying, and explaining concepts using concrete materials.

Prerequisite(s): Admission to FAST TRAIN or Permission of Instructor.

EDUC 514 - Teaching Elementary Science in International Schools

Credits: 3 (NR)
Covers theory and practices of effective teaching of K-8 science in international schools. Uses laboratory and discovery techniques to design essential science components and integrate them with other disciplines. Introduces design and implementation of activities for developing concepts, solving problems, and strengthening thinking skills in K-8 science.

Prerequisite(s): Admission to FAST TRAIN or Permission of Instructor.

EDUC 516 - Language Across the Elementary International School Curriculum

Credits: 3 (NR)
Introduces current methods of teaching integrated language arts in elementary and middle school settings (K-8). Includes language and literacy development, second language acquisition, reading and writing in content areas, and children's literature. International focus considers needs of second-language learners in regular classroom settings.

Prerequisite(s): Admission to FAST TRAIN or Permission of Instructor.
EDUC 520 - Elementary Curriculum, Instruction, and Assessment in International Schools

Credits: 3 (NR)
Addresses interrelationship of instruction, curriculum, and assessment in international schools. Includes review of research and effective practice.

Prerequisite(s): Admission to FAST TRAIN or Permission of Instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
Grading: Graduate Special

EDUC 521 - Foundations of Education, PK-12

Credits: 3 (NR)
Introduces various ways of educating and socialization processes in American educational institutions. Analyzes current education practices in terms of history, philosophy, psychology, and sociocultural factors of formal and informal learning. Emphasizes trends, issues, and alternative futures.

Notes: School-based field experience required. Course fulfills the Virginia Department of Education requirement for provisionally licensed teachers.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDUC 522 - Foundations of Secondary Education

Credits: 3 (NR)
Analyzes philosophical assumptions, curriculum issues, learning theories, and history associated with current teaching styles. Emphasizes applications to all disciplines taught in secondary schools. Examines current educational trends and issues in relation to sociology of secondary school settings.

Notes: 15 hours school-based field experience required.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDUC 537 - Foundations of Multicultural Education

Credits: 3 (NR)
Examines multicultural education through historical, sociological, and philosophical foundations. Emphasizes role of ethnicity in development of nation and education system. Includes overview of multicultural and multilingual curricula, and culturally and linguistically responsive instructional and assessment techniques.

Notes: Requires field experience.
**EDUC 539 - Human Development and Learning PK-12**

Credits: 3 (NR)
Provides practicing teachers with foundations of psychological theory, research, and professional practice relating to development and learning in inclusive PK-12 classroom settings.

Notes: School-based field experience required.

**EDUC 542 - Foundations of Education**

Credits: 3 (NR)
Examines the historical, philosophical, and sociological foundations of education as they relate to elementary schools, with a particular emphasis on teaching a culturally diverse population. Students will develop an understanding of the relationship between society and education.

Prerequisite(s): Admission to the Elementary Education licensure program. School-based field experience required.

**EDUC 543 - Children, Family, Culture, and Schools, 4-12 Year Olds**

Credits: 3 (NR)
Examines child and family development and ways children, families, schools, and communities interrelate. Links children's developing physical, social, emotional, and cognitive abilities to planning curriculum and developing instructional strategies.

Prerequisite(s): Admission to elementary education licensure program.

Notes: Requires school-based field experience.

**EDUC 547 - Scientific Inquiry and the Nature of Science**

Credits: 3 (NR)
Incorporates understanding about scientific knowledge in K-12 classrooms. Builds fundamental knowledge of scientific inquiry and the nature of scientific knowledge and skills to weave this knowledge explicitly in curriculum. Focuses on developing
inquiry-based lessons for students to investigate science and assessing student understanding of science and the nature of science.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Summer

### EDUC 592 - Effective Collaboration for Teaching Diverse Learners in Secondary Social Studies

Credits: 3 (NR)  
Provides history-social studies candidates in secondary education with knowledge and skills necessary to meet the needs of diverse learners in the history-social studies classroom. Emphasizes teacher collaboration between general and special education teachers as an authentic model of practice.

**Notes:** This course will be taught concurrently and in close proximity with special education faculty teaching EDSE 662 to emphasize collaboration between special education and general education teachers.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall, Summer, Spring

### EDUC 597 - Special Topics in Education

Credits: 1-6 (RT)  
Provides advanced study on selected topic or emerging issue in American or international education.

**Prerequisite(s):** Admission to program in Graduate School of Education.

**Notes:** May be repeated for credit with GSED permission.

**Hours of Lecture or Seminar per week:** 1-6  
**Hours of Lab or Studio per week:** 0

### EDUC 598 - Directed Reading, Research, and Individual Projects

Credits: 1-6 (RT)  
Presents various subjects and projects, principally by directed study, discussion, research, and participation under supervision of graduate faculty member.

**Prerequisite(s):** Admission to degree program, and permission of dean.

**Notes:** May be repeated for up to 12 credits.

**Hours of Lecture or Seminar per week:** 1-6  
**Hours of Lab or Studio per week:** 0
EDUC 606 - Education and Culture

Credits: 3 (RD)
Uses cultural inquiry process (CIP) and web site to acquire cultural, social, and language-related perspectives on educational processes; and teaches skills to analyze educational settings and expand strategies to address puzzlements in students' own practice.

Prerequisite(s): Admission to the ASTL Program; EDUC 612, EDUC 613, and EDUC 614.

Corequisite(s): EDUC 615.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
Grading: Graduate Special

EDUC 611 - Cultural Issues in Second Language Acquisition

Credits: 3 (RD)
Explores impact of linguistic and cultural diversity among students in teaching of second language across curriculum. Draws on theoretical foundations in second language acquisition, cross-cultural communication, socio- and psycholinguistics, and educational anthropology.

Prerequisite(s): Admission to TESL or bilingual or multicultural education program, doctoral status, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDUC 612 - Inquiry into Practice

Credits: 2 (RD)
Provides experience using research skills to foster systematic and thoughtful inquiry into classroom practice. Explores relevant classroom practice issues through critical writing, action, and research. Emphasizes cultural diversity and gender issues in research.

Prerequisite(s): Admission to the ASTL Program.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 0
Grading: Graduate Special

EDUC 613 - How Students Learn

Credits: 3 (RD)
Advanced course in study of learning based on research and theory from different disciplines. Focuses on increasing students' learning through study of different learning systems, and understanding each learner in context of learning process itself.
**EDUC 614 - Designing and Assessing Teaching and Learning**

Credits: 2 (RD)
Explores design and development of curricular, pedagogical, and assessment strategies responsive to needs and interests of students. Investigates factors that affect teaching and learning, and examines multiple ways of knowing that teachers bring to classrooms.

**Prerequisite(s):** Admission to the ASTL Program; EDUC 612.

**Hours of Lecture or Seminar per week:** 2
**Hours of Lab or Studio per week:** 0
**Grading:** Graduate Special

**EDUC 615 - Educational Change**

Credits: 2 (NR)
Explores influences on educational change at classroom, school, community, state, and national levels. Investigates implications of factors and influences that affect educational change. Analyzes influences and factors, and involves students in reflecting on their own experiences.

**Prerequisite(s):** Admission to the ASTL Program; completion of EDUC 612, EDUC 613, EDUC 614.

**Corequisite(s):** EDUC 606.

**Hours of Lecture or Seminar per week:** 2
**Hours of Lab or Studio per week:** 0
**Grading:** Graduate Special

**EDUC 621 - Teaching and Learning in the International Baccalaureate Primary Years Program**

Credits: 3 (NR)
Focuses on principles and practices of Primary Years Program (PYP) of the International Baccalaureate (IBO), organized around four areas of inquiry: curriculum processes, teaching and learning, assessment, and professional learning. Final course in preparation for IBO Practitioner Award.

**Prerequisite(s):** Admission to GSE, enrollment in FAST TRAIN initial licensure program or permission of instructor.

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0
**Grading:** Graduate Special
EDUC 622 - Curriculum Development across IB Programs

Credits: 3 (NR)
Explores the development of practical knowledge about the design and structure of the IB programs' curricula. Provides a foundation for understanding how the programs are implemented and how student learning developed within them is assessed.

Prerequisite(s): Admission to GSE, enrollment in FAST TRAIN IB certificate program, and completion of EDUC 621, or permission of the instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
Grading: Graduate Special

EDUC 623 - Models and Strategies for Teaching and Learning in IB Schools

Credits: 3 (NR)
Focuses on the development of the capacity of teachers in IB schools to adopt appropriate teaching strategies and techniques instrumental in ensuring program learning outcomes are achieved. Furthermore, participants develop a deep understanding of the critical relationship between teaching and learning.

Prerequisite(s): Admission to GSE, enrollment in FAST TRAIN IB certificate program, and completion of EDUC 621, or permission of the instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
Grading: Graduate Special

EDUC 624 - Assessment and Learning in IB Schools

Credits: 3 (NR)
Explores the essential role of assessment in teaching IB learners. Addresses formative and summative assessment practices as an integral part of the IB curriculum as well as the use of assessment for differentiation and planning.

Prerequisite(s): Admission to GSE, enrollment in FAST TRAIN IB certificate program, and completion of EDUC 621, or permission of the instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
Grading: Graduate Special

EDUC 626 - Inquiry into Action: IB Teachers, Learners, and Schools

Credits: 3 (NR)
Uses the action research and qualitative process to help educational practitioners plan and complete an action research study
related to IB learners, teachers, or schools. Furthermore, the course examines the social, cultural, and ethical issues of conducting research with students.

**Prerequisite(s):** Admission to GSE, enrollment in FAST TRAIN IB certificate program, and completion of EDUC 621, or permission of the instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**Grading:** Graduate Special

**EDUC 627 - Contemporary Issues and Trends in IB**

Credits: 3 (NR)  
Focuses on current IB research, trends, and issues as well as international, national, and state/provincial legislation concerning schools and the potential impact on IB schools. Participants are prepared as leaders and advocates for IB programs and their students.

**Prerequisite(s):** Admission to GSE, enrollment in FAST TRAIN IB certificate program, and completion of EDUC 621, or permission of the instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**EDUC 634 - The Role of the School Library Media Specialist**

Credits: 3 (NR)  
Introduces basic concepts of library science, and professional responsibilities and ethical standards of library media specialist. Addresses this role as instructional partner and resource for students and staff.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**EDUC 640 - Selection and Utilization of Library Media Materials and Equipment, Including Technology**

Credits: 3 (NR)  
Introduces prospective library media specialists to various uses of technology in library setting, and elements involved in media collection development.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**EDUC 641 - Reference and Bibliography**
Credits: 3 (NR)
Covers library reference process, and bibliographic tools to meet needs of library patrons seeking information.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**EDUC 642 - Organization and Technical Processing of Materials**

Credits: 3 (NR)
Emphasizes application of basic cataloging principles in bibliographic description of print and nonprint materials. Students develop procedures for organizing, cataloguing, and maintaining media collection using technological support.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**EDUC 643 - Organization Administration and Evaluation of the School Library Media Center**

Credits: 3 (NR)
Develops skills to implement effective school library media program. Focuses on management principles, interpersonal skills, and lifelong learning skills in relation to evaluating services, collection development, and public relations for school libraries.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**EDUC 644 - Production of Media and Instructional Materials**

Credits: 3 (NR)
Provides guidance and practice with available audiovisual and computer-based technology to plan, produce, and present instructional materials.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**EDUC 645 - Literature for Young Adults**

Credits: 3 (NR)
Provides in-depth knowledge of young adult literature, and ability to relate that knowledge to library programs.

**Notes:** Requires extensive reading of young adult literature.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0
EDUC 646 - Literature for Children

Credits: 3 (NR)
Develop critical abilities to select and use literature for children. Focuses on selecting materials to support curriculum and promote reading.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDUC 670 - The Culture of Teaching

Credits: 3 (NR)
Explores roles, responsibilities, and realities of teaching in secondary schools. Examines teaching in context of contemporary educational issues, legal matters, diverse and exceptional learners, classroom management, and professional practices.

Prerequisite(s): Admission to secondary education program

Corequisite(s): Initial methods course.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDUC 671 - Schools and Culture in the Future

Credits: 3 (NR)
Focuses on relationship between schools and communities from the past to the future. Research-based education reform, ideas from futurists, and ISTE technology standards influence teacher planning for students in the 21st century.

Prerequisite(s): EDUC 522 and EDUC 670

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDUC 672 - Human Development and Learning: Secondary Education

Credits: 3 (NR)
Explores developmental issues associated with middle and high school students, and theories that provide basis for understanding learning process. Addresses implications for designing instruction and curriculum.

Prerequisite(s): EDUC 522.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
EDUC 674 - Assessing Learning and Teaching in the Secondary School Classroom

Credits: 3 (NR)
Supports beginning teachers' development and design of assessment practices for promoting student learning. Focuses on individual differences and classroom, teacher, school, and cultural factors that impact assessment; different types and purposes of assessment; and relationship of assessment to national and state standards.

Prerequisite(s): EDUC 522 and first and advanced methods course must be completed prior to taking this class.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDUC 675 - Research in Secondary Education

Credits: 3 (NR)
The portfolio is submitted during the semester the candidate is enrolled in EDUC 675. Helps beginning teachers become more effective by critiquing various research paradigms, reviewing the research literature, and systematically collecting and interpreting evidence to improve practice. Emphasizes linking evidence of student learning to make informed instructional decisions.

Notes: This capstone class of the MEd program should be taken last.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDUC 695 - Northern Virginia Writing Project-Service Program

Credits: 1-3 (RT)
Offered at request of school division or other educational agency.

Equivalent to ENGH 695

Notes: Content varies. May be repeated with permission of department, but no more than 6 credits in EDUC 695, 695, or 699 may be applied toward master's degree.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0

EDUC 697 - Theory of Composition

Credits: 3 (NR)
Acquaints classroom teachers with current theory relating to writing and teaching composition. Focuses on making explicit participants' theories, reading works of leading theorists, and developing statement describing implications of theoretical consistency in teaching writing.
Equivalent to ENGH 697

**Prerequisite(s):** ENGL 615/ENGH 615 and ENGL 695/ENGH 695, or equivalent.

**Hours of Lecture or Seminar per week:** 3

**Hours of Lab or Studio per week:** 0

**EDUC 751 - Mentoring/Supervising Intern Teachers and Mentor Teacher Career Development**

Credits: 3 (NR)
Examines multiple roles of teachers as they mentor and supervise intern teachers in schools. Covers career development, leadership, and instructional roles and strategies. Designed to assist intern teachers in their first year, and provide quality career and staff development to their mentors.

**Hours of Lecture or Seminar per week:** 3

**Hours of Lab or Studio per week:** 0

**EDUC 795 - Seminar in Brain-Compatible Teaching and Learning in Multicultural Settings**

Credits: 3 (NR)
Course examines brain-compatible learning styles theories and their impact on today’s classrooms comprised of culturally, linguistically, and cognitively diverse (CLCD) learners. Situates current pedagogy and its efficacy at reaching all learners. Issues examined are those involving perception, attention, consciousness, memory and emotion. Focus is particularly placed on responsive teaching methods highlighting situated cognition, brain-based learning principles and authentic learning principles.

**Prerequisite(s):** Admission to the PhD in Education program or permission of instructor.

**Hours of Lecture or Seminar per week:** 3

**Hours of Lab or Studio per week:** 0

**EDUC 797 - Advanced Topics in Education**

Credits: 1-6 (RD)
Advanced study of selected topics in education for students preparing for doctoral studies or who have been admitted to the PhD program in education.

**Notes:** May be repeated for credit with GSED approval.

**Hours of Lecture or Seminar per week:** 1-6

**Hours of Lab or Studio per week:** 0

**EDUC 800 - Ways of Knowing**
Credits: 3 (NR)
Provides understanding of characteristic ways of knowing in various liberal arts disciplines while examining subject matter, scope, key concepts, principles, methods, and theories. Analyzes philosophical traditions underlying educational practice and research.

Prerequisite(s): Admission to PhD program.

Notes: Required course during first spring semester of study in the program.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
Grading: Graduate Special

EDUC 802 - Leadership Seminar

Credits: 3 (NR)
Intensive study of leadership, emphasizing decision and change processes, and assessment and development of leadership skills.

Prerequisite(s): Admission to PhD program.

Notes: Required course during first semester of study in the program.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDUC 805 - Research and Scholarship in Education

Credits: 2 (NR)
Provides an intellectual framework for research and scholarship in education, including consideration of specific scholarship of CEHD faculty as representative of the range of educational scholarship that make up the educational research community.

Prerequisite(s): Admission to PhD in Education Program

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 0

EDUC 815 - Research Inquiries in International Education

Credits: 3 (NR)
Focuses on the intersection of international education and research methodologies in educational settings. Students will delve into the construction, implementation, and impact of research in international settings or with an internationally-minded perspective. Through critical inquiry into practice, the course offers students the opportunity to develop more sophisticated understandings of the research process in international education settings.

Prerequisite(s): EDUC 880 or permission of instructor.

Hours of Lecture or Seminar per week: 3
EDUC 845 - Multilingual Learners with Special Education Needs

Credits: 3 (NR)
Examines issues surrounding identification, assessment, and instruction of multilingual learners with special education needs. Specific topics to be discussed include disproportionate representation of culturally, linguistically, and cognitively diverse learners in special education; prevention of educational underachievement; and techniques for providing culturally and linguistically responsive instruction for all learners.

Prerequisite(s): Admission to the PhD Program in Education or Permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring, Summer

EDUC 850 - The Study of Teaching

Credits: 3 (NR)
Explores the history and development of the search for teaching effectiveness. The course will trace the various definitions of effectiveness and the methods created to assess effectiveness.

Prerequisite(s): EDRS 810.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDUC 851 - Research on Teacher Education

Credits: 3 (NR)
Explores the history and development of the search for effectiveness in the preparation of preservice teachers and the continuing professional development of practicing teachers. The students will examine the substance and gaps in the study of the education of educators.

Prerequisite(s): EDRS 810.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDUC 853 - World Perspectives of Teacher Education

Credits: 3 (NR)
Focuses on the cross-cultural analysis of current U.S. and internationally based teacher preparation and continuing professional
development pedagogical models, policy reforms, and their historical contexts.

**Prerequisite(s):** Admission to the doctoral program.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**EDUC 870 - Education Policy: Process, Context, and Politics**

Credits: 3 (NR)  
Examines public policy decision-making in education at local, state, and national levels, and its impact on education institutions, students, and public. Focuses on government entities' authority over education decision-making, and resolution of competing policy arguments in political arena.

**Prerequisite(s):** Admission to PhD in education program, or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**EDUC 871 - Advanced Policy Issues in Education**

Credits: 3 (NR)  
In-depth analysis of selected education policy issues. Focuses on issue interactions and education-related policy actions by different levels of government.

**Prerequisite(s):** EDUC 870 or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**EDUC 872 - Social Science Research and Education Policy**

Credits: 3 (NR)  
Focuses on research base used to support education policy actions. Focuses on analyzing strength of this research.

**Prerequisite(s):** EDRS 810, 811, and 812 or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**EDUC 873 - Education Policy: Comparative and International Perspectives**

Credits: 3 (NR)  
Using interdisciplinary approach, addresses education policy issues that transcend national boundaries and have implications for
educators in fostering social justice and global awareness.

**EDUC 874 - The Achievement Gap**

Credits: 3 (NR)
Focuses on achievement gap in schools. Students research and analyze gaps in student achievement related to race and ethnicity, limited English proficiency, family background, gender, poverty, and ableism, and practices designed to close the gap.

*Prerequisite(s):* Admission to PhD program or permission of instructor

**EDUC 875 - Contemporary and Emerging Issues in Education Policy**

Credits: 3 (NR)
Focuses on identifying and analyzing factors that promote new initiatives in education policy agenda. Attention given to nontraditional sources of education policy initiatives.

*Prerequisite(s):* EDUC 870

*Corequisite(s):* EDUC 870

*Notes: Must be admitted to PhD program.*

**EDUC 876 - Teacher Development and Education Policy**

Credits: 3 (NR)
Focuses on the impact of policy actions at the local, state, and national levels on teacher preparation and continuing professional development.

*Prerequisite(s):* EDUC 870 or permission of instructor.

**EDUC 880 - Introduction to International Education**
Using interdisciplinary approach, addresses education policy issues that transcend national boundaries and have implications for educators in fostering social justice and global awareness.

Prerequisite(s): Admission to PhD in education program or permission of instructor

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDUC 881 - Seminar in Bilingual Education: Policy

Credits: 3 (NR)
Examines historical development of education for language minority students in United States, including federal and state legislation and court decisions. Explores policy issues regarding administrative program models, instructional approaches, curricular reform, and assessment policies for language minority students developed in response to legal mandates, legislative decisions, and school reform movement.

Prerequisite(s): Admission to PhD program.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDUC 882 - Seminar in Bilingualism and Second Language Acquisition: Theory and Research

Credits: 3 (NR)
Examines theoretical foundations of bilingual and ESL education through focus on linguistics, anthropology, sociology, psychology, and education research addressing language minority students.

Prerequisite(s): Admission to PhD program, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDUC 883 - Seminar in Sociocultural Theory

Credits: 3 (RD)
Explores and analyzes the theoretical contributions of sociocultural theory. Focuses on the growing body of contemporary research on literacy, equity in education and emancipatory teaching for diverse students.

Prerequisite(s): Admission to PhD program in Education or permission of instructor

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
EDUC 890 - Doctoral Internship in Education

Credits: 1-6 (NR)
Interns work with appropriate staff member in cooperating school, school system, or other educational institution, agency, or setting.

Prerequisite(s): Admission to PhD program, and prior approval of advisor and PhD director.

Notes: Requires 100 hours of on-site internship completed over at least a five-week period. Up to 6 credits of EDUC 890 may be applied toward PhD degree requirements.

Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 0
Grading: Graduate Special

EDUC 892 - Social Justice and Equity in International Education

Credits: 3 (NR)
Examines ideological, cultural, and systemic structural inequities in various educational settings at national and international levels. Focuses on educational practices that promote equity and social change throughout the world.

Prerequisite(s): EDUC 880.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDUC 893 - Seminar in Educational Anthropology

Credits: 3 (NR)
Examines theories and research from educational anthropology and educational sociology to clarify and address contemporary educational issues and concerns. Focuses on U.S. public schools, with comparative materials from other educational settings and societies.

Prerequisite(s): Admission to PhD program, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDUC 894 - Seminar in Multicultural Education

Credits: 3 (NR)
Examines knowledge base, policy issues, and curricular and instructional features of multicultural education in United States and other countries.

Prerequisite(s): Admission to the Ph.D. in Education program or permission of instructor.
EDUC 895 - Seminar in Emerging Issues of Education

Credits: 3 (RT)
Study of selected emerging issues or problems in education. Students engage in research, study, discussion, and writing.

Notes: May be repeated for credit. Up to 6 hours of 895 course work may be applied to PhD requirements.

EDUC 897 - Independent Study for the Doctor of Philosophy in Education

Credits: 1-6 (RT)
Structured learning experience to extend and develop skills and knowledge relative to field of professional expertise.

Prerequisite(s): Admission to PhD program and prior approval of advisor and PhD director.

EDUC 994 - Advanced Internship in Education

Credits: 3 (NR)
Internship in setting related to student's major area of study. Requires minimum of 100 hours completed over at least a five-week period. Each intern works with appropriate staff member in cooperating school, school system, or other educational institution or agency.

Prerequisite(s): Admission to PhD program, and prior approval of advisor and PhD director.

Notes: Internship must be in setting that differs from regular employment.

EDUC 998 - Doctoral Dissertation Proposal

Credits: 1-6 (NR)
Prerequisite(s): Admission to candidacy in PhD program; successful completion of doctoral qualifying exam; and EDRS 810, 811, and 812 or their equivalents.
EDUC 999 - Doctoral Dissertation Research

Credits: 1-9 (RD)
Provides continued faculty assistance on individual basis to complete dissertation planned in EDUC 998 and initiate new projects.

Notes: Requires successful completion of EDUC 998 and faculty approval of proposal.

Education Leadership (EDLE)

Offered by the College of Education and Human Development

EDLE 412 - Schools and the Law

Credits: 3 (NR)
Provides an extensive overview of legal and ethical issues in schools. In the course, students will review and analyze key legal and ethical principles, read court decisions, and examine federal and state statutes.

Prerequisite(s): EDUC 300. Prerequisite enforced by registration system.

EDLE 420 - Organization and Management of Schools

Credits: 3 (NR)
Studies basic issues in leadership, organization, and governance of schools. Explores theories and models of leadership how leaders conceptualize school organization, with an emphasis on distributed leadership in professional environments, systems thinking, and organizational change.

Prerequisite(s): EDUC 300. Prerequisite enforced by registration system.
EDLE 597 - Special Topics in Education

Credits: 1-6 (RD)
Provides advanced study on selected topic or emerging issue in American or international education.

Prerequisite(s): Admission to program in GSE.

Notes: May be repeated for credit with GSE permission.

Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 0

EDLE 610 - Leading Schools and Communities

Credits: 3 (NR)
Examines critical functions of leadership and organizational management, complex decision making responsibilities of school executives, and constructive relationships between schools and communities. Incorporates historical, ethical, philosophical, and sociological foundations of American education and the impact of organizational structure on reform and student achievement. Practical and academic emphasis on leadership skill development and dispositions.

Prerequisite(s): EDLE 620 or EDSE 743; EDLE 690; EDLE 791; EDLE 612; EDLE 614 or EDSE 702; EDLE 616 or EDSE 626, and EDLE 618. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDLE 612 - Education Law

Credits: 3 (NR)
Provides legal foundations of U.S. public schools. Examines general principles of statutory and case law, and applies judicial decisions to educational environments. Focuses on legal responsibilities, constraints, and opportunities of public school officials. Includes component of Special Education law.

Prerequisite(s): EDLE 620 or EDSE 743; EDLE 690 and EDLE 791. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDLE 614 - Managing Financial and Human Resources

Credits: 3 (NR)
Explores basic functions in financial and human resource management. Examines legalities, ethics, and politics of resource procurement and allocation. Provides experiences to help students better understand tasks typically performed by school leaders.

Prerequisite(s): EDLE 620, EDLE 690, and EDLE 791. Prerequisite enforced by registration system.
EDLE 616 - Curriculum Development and Evaluation

Credits: 3 (NR)
Examines the relationship of the written, taught, and tested curriculum and identifies critical leadership decisions that can positively impact student achievement. Identifies components of effective curriculum guides. Mini-document for personal use is constructed.

Prerequisite(s): EDLE 620, EDLE 690, and EDLE 791 Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDLE 618 - Supervision and Evaluation of Instruction

Credits: 3 (NR)
Provides a theoretical and practical overview of the supervision and evaluation of instruction. Introduces the domains of supervision and inquiry into current issues and best practices in supervision. Uses a variety of interactive exercises to assist in the development of practical skills for using the clinical process and developmental approach to supervision.

Prerequisite(s): EDLE 620 or EDSE 743; EDLE 690, and EDLE 791 Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDLE 620 - Organizational Theory and Leadership

Credits: 3 (NR)
Studies basic organizational theories and models of leadership and management. Emphasizes shared leadership in professional environments, communication skills, systems thinking, and personal and organizational change. Bridges theory to practical applications in educational settings.

Corequisite(s): Application to the Education Leadership Program.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDLE 634 - Contemporary Issues in Education Leadership

Credits: 3 (NR)
Examines current and emerging issues and trends impacting education. Includes demographic shifts; globalization; technology; data-based decision making; inclusion of diverse learners in American schools; and recent research on student achievement when
influenced by race, gender, and poverty.

**Prerequisite(s):** Admission to program.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**EDLE 636 - Adult Motivation and Conflict Management in Education Settings: A Case Study Approach**

Credits: 3 (NR)  
Uses case studies and simulations to examine conflict mediation and resolution skills, and safety and security issues. Focuses on character and ethics education in schools, coaching and mentoring, and adult motivation to support positive behaviors in work settings.

**Prerequisite(s):** Admission to program.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**EDLE 690 - Using Research to Lead School Improvement**

Credits: 3 (NR)  
Develops skills, insights, and understanding of how leaders use research to improve schools, with emphasis on the use of assessment and research data to identify school improvement needs and to design school improvement projects. Designated a Green Leaf Course.

**Prerequisite(s):** EDLE 620 or 743 (may be taken concurrently if application has been submitted to the MEd in Education Leadership program or the MEd in EDLE with a Concentration in Special Education Leadership program) Prerequisite enforced by registration system.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**EDLE 770 - Introduction to Education Leadership**

Credits: 3 (NR)  
Introduces the study of education leadership, theoretical traditions in leadership studies, and scholarship on leadership and organizational change.

**Prerequisite(s):** Admission to Ph.D. in Education Program.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall, Summer, Spring.
EDLE 791 - Internship in Educational Leadership

Credits: 3 (NR)
Offers wide range of practical experiences and professional challenges in authentic educational settings. Activities emphasize strategic, instructional, organizational, political, and community leadership.

Prerequisite(s): Admission to the MEd in Education Leadership (EDLE) program or MEd in EDLE with a concentration in Special Education Leadership; EDLE 620 or 743 (may be taken concurrently) Prerequisite enforced by registration system.

Notes: Course must be taken in second term of program.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
Grading: Satisfactory/No Credit

EDLE 797 - Advanced Topics in Education

Credits: 1-9 (RT)
Advanced study of selected topics in education for students preparing for doctoral studies or who have been admitted to the PhD program in education.

Notes: May be repeated for credit with CEHD approval.

Hours of Lecture or Seminar per week: 1-9
Hours of Lab or Studio per week: 0
Grading: Graduate Special

EDLE 801 - Contemporary Organization Theory

Credits: 3 (NR)
Engages students in the study of major organization theories that inform educational leadership research. Students use theory to help inform their own research interests. Students begin work on analytical literature review.

Prerequisite(s): Admission to PhD in education program.

Corequisite(s): EDLE 802.

Notes: May be taken as corequisite with EDLE 802. First in three-course sequence.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Summer, Spring.

EDLE 802 - Leadership and Decision Making
Credits: 3 (NR)
Engages students in the study of major leadership and decision theories that inform educational leadership research. Students use theory to help inform their own research interests. Students begin work on analytical literature review.

Prerequisite(s): EDLE 801.

Notes: May be taken as corequisite with EDLE 801. Second in three course sequence.

EDLE 803 - Foundations of Education Leadership: Economics and Leadership

Credits: 3 (NR)
Emphasizes economic foundations of U.S. education, and evolution of school, district, and state leadership. Students complete work on analytical literature review.

Prerequisite(s): EDLE 801 and 802.

Notes: Third in a three-course sequence.

EDLE 813 - Social and Political Forces in Education Leadership

Credits: 3 (NR)
Examines the social and political forces that shape education in the United States and the effect of these forces on school leadership. Examines the social and political functions of schooling in the past and present.

Prerequisite(s): Admission to Ph.D. in Education Program.

EDLE 815 - Conceptual Frameworks in Education Leadership

Credits: 3 (NR)
Introduces three different disciplinary perspectives on education leadership, and helps identify and articulate different conceptual frameworks. Major focus is designing a conceptual framework that informs research questions.

Prerequisite(s): Admission to PhD in education program or permission of instructor
EDLE 816 - Instructional Leadership-Curriculum Policy and Practice

Credits: 3 (NR)
Focuses on curriculum and instruction theory, policy, and practice with research emphasis on instructional leadership. Students develop research proposals to investigate instructional leadership in schools and districts, and relate instructional leadership to their own specific research interests.

Prerequisite(s): Admission to Ph.D. in Education Program.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Summer, Spring.

EDLE 818 - Instructional Leadership-Supervision Policy and Practice

Credits: 3 (NR)
Introduces current topics and research in supervision and instruction, including theory and empirical work focused on instruction, teacher learning, teacher evaluation, and instructional leadership.

Prerequisite(s): Admission to Ph.D. in Education Program.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Summer, Spring.

EDLE 895 - Emerging Issues in Administration and Supervision

Credits: 3 (RD)
Covers selected emerging issues in educational leadership. Students engage in research, study, discussion, and writing about various topics selected for study.

Prerequisite(s): Admission to PhD program, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

Education Research (EDRS)

Offered by the College of Education and Human Development

EDRS 531 - Educational and Psychological Measurement
Credits: 3 (NR)
Emphasizes techniques and principles used in the construction, administration, and quantification of measuring devices for evaluation purposes. Discusses interpretation of standardized tests of ability, aptitude, achievement, interest, and personality.

Prerequisite(s): Appropriate methods and advanced methods courses.
Corequisite(s): Appropriate methods and advanced methods courses.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDRS 590 - Education Research

Credits: 3 (NR)
Develops skills, insights, and understanding to perform research, with emphasis on interpreting and applying research results. Critiques research, and uses findings in educational settings.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDRS 597 - Special Topics in Education

Credits: 1-6 (RD)
Provides advanced study on selected topic or emerging issue in American or international education.

Prerequisite(s): Admission to program in GSE.
Notes: May be repeated for credit with CEHD approval.

Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 0
Grading: Graduate Special

EDRS 620 - Quantitative Inquiry in Education

Credits: 3 (NR)
Examines fundamental concepts and methods of statistics as applied to educational problems, including descriptive and inferential statistics.

Prerequisite(s): EDRS 590 or equivalent experience.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDRS 621 - Qualitative Inquiry in Education
Focuses on basic application of naturalistic research methods. Examines major theoretical frameworks and qualitative research techniques, which include content analysis, coding, and interpretation of data.

**Prerequisite(s):** EDRS 590 or equivalent experience.

**EDRS 630 - Educational Assessment**

Credits: 3 (NR)  
Examines research theory and practice relevant to assessments. Focuses on assessment strategies for students including developing skills to select, score, and interpret educational assessments.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**EDRS 631 - Program Evaluation**

Credits: 6 (NR)  
Focuses on perspectives of existing and emerging issues, theories, and models of program evaluation. Involves implementation of program evaluation in related fields and school districts. Field experience required.

**Hours of Lecture or Seminar per week:** 6  
**Hours of Lab or Studio per week:** 0

**EDRS 797 - Advanced Topics in Education**

Credits: 1-6 (RD)  
Advanced study of selected topics in education for students preparing for doctoral studies or who have been admitted to the PhD program in education.

**Notes:** May be repeated for credit with CEHD approval.

**Hours of Lecture or Seminar per week:** 1-6  
**Hours of Lab or Studio per week:** 0

**EDRS 810 - Problems and Methods in Education Research**

Credits: 3 (NR)  
Advanced course in interpreting and applying education research methods. Emphasizes comparison of alternative philosophies of research, ways of formulating questions and hypotheses, research plans, and analysis procedures. Students evaluate existing studies, and investigate a range of research approaches.
Prerequisite(s): Admission to PhD program, or permission of instructor.

EDRS 811 - Quantitative Methods in Educational Research

Credits: 3 (NR)
Emphasizes advanced methods of conducting research using quantitative methods of data collection, and analysis appropriate for research in education. Includes design of experimental and quasi-experimental research studies, and methods of analysis appropriate to these studies, including analyzing variance and multiple linear regression.

Prerequisite(s): Satisfactory completion of EDUC 810 or equivalent, or permission of instructor. Prerequisite enforced by registration system.

EDRS 812 - Qualitative Methods in Educational Research

Credits: 3 (NR)
Teaches how to apply qualitative data collection and analysis procedures in educational research, including ethnographic and other field-based methods, and unobtrusive measures.

Prerequisite(s): Satisfactory completion of EDUC 810 or equivalent, or permission of instructor. Prerequisite enforced by registration system.

Notes: Emphases vary depending on student interests and needs.

EDRS 820 - Evaluation Methods for Educational Programs and Curricula

Credits: 3 (NR)
Explores development and types of current systems and models for evaluating educational programs and curricula. Emphasizes evaluation needs and problems of public and private elementary and secondary schools, and colleges and universities. Also considers needs of government agencies, industry, and health-related organizations.

Prerequisite(s): Successful completion of EDRS 810, or permission of instructor.

Notes: Prior completion of EDRS 811 and 812 helpful but not required.
EDRS 821 - Advanced Applications of Quantitative Methods

Credits: 3 (NR)
Advanced study of applications of quantitative methods in educational research, reinforcing and building on concepts and skills acquired in EDRS 811. Uses modular approach, and provides advanced study of techniques appropriate to survey research, group-experimental and quasixperimental research, selected multivariate procedures and factor analysis, and quantitative synthesis (meta-analysis) of research. Combines text reading assignments, critiques, and discussion of relevant journal articles; and application activities.

Prerequisite(s): EDRS 810 and 811.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDRS 822 - Advanced Applications of Qualitative Methods

Credits: 3 (NR)
Advanced seminar devoted to study of current topics in qualitative research. Deals with cutting-edge information on selected advanced topics in qualitative research, and provides opportunities to apply new skills and knowledge to projects related to students' interests.

Prerequisite(s): EDRS 810 and 812.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDRS 823 - Advanced Research Methods in Single Subject/Case Design

Credits: 3 (NR)
Prepares students to conduct research using single subject design and single case study design. Provides understanding of salient features as well as advantages, disadvantages of these research methodologies. Students critique and analyze published research using these methodologies. Provides opportunities to apply these methodologies to research questions related to student interests.

Prerequisite(s): EDRS 810, 811, and 812.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDRS 824 - Mixed Methods Research: Integrating Qualitative and Quantitative Approaches

Credits: 3 (NR)
Advanced research seminar that integrates qualitative and quantitative approaches, methods, and data in a single study. The course covers the paradigms and "mental models" that inform both approaches, and the ways in which qualitative and
quantitative goals, questions, methods, and interpretive strategies can be productively combined.

**Prerequisite(s):** EDRS 810, 811, and 812 or permission of instructor.

**EDRS 825 - Advanced Research Methods in Self-Study**

Credits: 3 (NR)
Prepares students to conduct research using the self-study research methodology, a qualitative research approach for systematically examining one's practitioner role for improvement-aimed purposes with contributions to the educational field and knowledge base.

**Prerequisite(s):** Admission to PhD in Education program; EDRS 810; EDRS 811 or EDRS 812

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0

**EDRS 826 - Qualitative Case Study Methods**

Credits: 3 (NR)
Advanced research seminar on qualitative case study design and application in educational research. Topics include descriptive, theoretical, evaluation, and policy case study design and methods. Students will conduct and critique a case study appropriate to their discipline.

**Prerequisite(s):** EDRS 812 or permission of instructor.

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0

**When Offered:** Summer.

**EDRS 827 - Development and Validation of Assessment Scales**

Credits: 3 (NR)
Focusing on the acquisition of knowledge and skills related to development of assessment scales and validation of assessment scale data in the context of education, psychology, and related fields.

**Prerequisite(s):** EDRS 811.

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0

**When Offered:** Fall.
EDRS 828 - Modern Measurement in Education and Human Development

Credits: 3 (NR)
Focuses on the acquisition of knowledge and skills related to modern theory of measurement with application in the context of education, psychology, and related fields.

Prerequisite(s): EDRS 811 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Summer, Spring.

EDRS 830 - Hierarchical Linear Modeling

Credits: 3 (NR)
Analyzes nested data structures (e.g. students within classrooms) as well as student growth. Students will learn through reading assignments, lecture and applications using a computer program for data analysis. Students will be expected to critically read multilevel methods used in published research, analyze data, and provide written report of results in APA format.

Prerequisite(s): EDRS 821.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

EDRS 831 - Structural Equation Modeling

Credits: 3 (NR)
Focusing on the development of knowledge and skills related to structural equation modeling and research applications in education, psychology, and related fields.

Prerequisite(s): EDRS 811.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring.

EDRS 890 - Research in Practice

Credits: 3 (NR)
Interns work with appropriate staff member in cooperating school, school system, or other educational institution, agency, or setting.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
Grading: Graduate Special
Educational Psychology (EDEP)

Offered by the College of Education and Human Development

EDEP 402 - Brain, Behavior, and Neuroimaging in Children

Credits: 3 (NR)
Focus on research regarding the development of cognitive processes in children, their neurobiological substrates, and the imaging technology used to explore the functioning brain.

Prerequisite(s): At least junior standing or sophomore honors/university scholar candidate.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDEP 405 - The Neuroscience of Learning and Cognition

Credits: 3 (NR)
Focuses on research regarding the development of cognitive processes in children and adults of various ages, their neurobiological substrates, and the imaging technology used to explore the functioning brain.

Equivalent to EDEP 655

Prerequisite(s): Junior standing or sophomore honors / university scholar candidate.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring

EDEP 550 - Theories of Learning and Cognition

Credits: 3 (NR)
Explores theoretical perspectives on learning and cognition, and relation of these theories to construction of learning environments, student motivation, classroom management, assessment, and technology to support teaching and learning.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDEP 551 - Principles of Learner Motivation

Credits: 3 (NR)
Focuses on theories and concepts of human motivation; and examines strategies, techniques, and interventions that promote and sustain learner motivation.
EDEP 591 - Data-Driven Decision Making for Continuous Educational Improvement

Credits: 3 (NR)
Provides an intellectual and practical framework for creating and understanding formative and summative assessments of student performance. Emphasis is placed on the learning principles, cognitive processes, and psychometric models as they pertain to assessment issues.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Summer.

EDEP 592 - Data-Driven Decision-Making: Development of Assessments

Credits: 3 (NR)
Focuses on strategies to design assessments for students and schools with a particular emphasis on developing and using assessment methods to inform instructional decisions.

Prerequisite(s): EDEP 591-may be taken concurrently

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Summer.

EDEP 593 - Data-Driven Decision Making: Analysis and Interpretation of Assessment Data

Credits: 3 (NR)
Focusing on the development of knowledge and skills related to analyzing and interpreting educational assessment data.

Prerequisite(s): EDEP 592.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

EDEP 594 - Data-Driven Decision-Making Application in Education Contexts

Credits: 3 (NR)
Applies fundamental knowledge of assessment using team-based projects. Incorporates development of assessments and the analysis, interpretation, and reporting of assessment data to inform curriculum and instruction based on the context-specific needs.
of educators.

Prerequisite(s): EDEP 593.

Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0  
Grading: Graduate Special  
When Offered: Spring.

EDEP 601 - Creativity and Cognition in the Arts and Media

Credits: 3 (NR)  
Focuses on research on cognition, development, learning, and creativity in the visual arts and media in formal and informal educational settings.

Equivalent to AVT 606

Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0

EDEP 632 - Human Development

Credits: 3 (NR)  
Examines the course of human development from early childhood to adult, with special attention paid to childhood and adolescence. Major emphasis is placed on principles of research in human development and the major areas of cognitive, linguistic, and social contexts of development as they pertain to learners in schools and beyond.

Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0  
When Offered: Fall, Spring.

EDEP 650 - High-Stakes Assessment and Accountability Systems

Credits: 3 (NR)  
Focuses on school effectiveness, assessment tools, and accountability models on state and national levels. Explores issues and methods relevant to educational policy, standardized testing, and classroom assessment.

Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0

EDEP 651 - Modern Measurement with Applications in Education and the Behavioral Sciences
Credits: 3 (NR)
Provides background in modern measurement theory and applications. Covers topics from classical test theory, generalizability theory, and item response theory. Applications include advanced techniques in test construction, analysis of binary and rating data, test equating, item fairness, and cognitive diagnosis.

Prerequisite(s): EDRS 531

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDEP 652 - Process of Learning and Development

Credits: 3 (NR)
Explores different theoretical perspectives on learning and development. Focuses on historical and contemporary theories of learning and cognitive development, and examines current research and its application in educational settings.

Prerequisite(s): EDEP 550.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDEP 653 - Culture and Intelligence

Credits: 3 (NR)
Explores different theoretical perspectives on intelligence as they relate to individual and cultural differences. Examines issues related to heritability and measures of intelligence, and intelligence in the cultural context.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDEP 654 - Learning, Motivation, and Self-Regulation

Credits: 3 (NR)
Focuses on theories and research on self-regulation of academic learning. Presents multidimensional conceptual framework for studying and applying self-regulation in educational contexts.

Prerequisite(s): EDEP 550, 551.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDEP 655 - The Neuroscience of Learning and Cognition
Credits: 3 (NR)
Focuses on research regarding the development of cognitive processes in children and adults of various ages, their neurobiological substrates, and the imaging technology used to explore the functioning brain.

Equivalent to EDEP 405

Prerequisite(s): EDEP 550

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring

EDEP 798 - Directed Reading, Research, and Individual Projects in Educational Psychology

Credits: 1-3 (RD)
Offers a capstone experience to students after completion of majority of program coursework with the exception of 6 credit hours. Enables students to demonstrate their integrative knowledge and skills accrued through study in their concentration area in educational psychology.

Prerequisite(s): Project mentor approval and completion of coursework in the MS in Educational Psychology exclusive of 6 credit hours.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 1-9
Grading: Graduate Special
When Offered: Fall, Spring, Summer

EDEP 799 - Thesis in Educational Psychology

Credits: 1-3 (RD)
The thesis is based on original research. It enables students to demonstrate their integrative knowledge and skills accrued through study in their concentration area in educational psychology.

Prerequisite(s): Thesis chair approval and completion of coursework in the MS in Educational Psychology exclusive of 6 credit hours.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 1-12
Grading: Satisfactory/No credit only
When Offered: Fall, Spring, Summer

EDEP 820 - Teaching, Learning, and Cognition

Credits: 3 (NR)
Focuses on foundational educational psychology theories including cognitive, social, and constructivist themes and their implications for improving instructional practices and learning at all developmental levels and content areas.
Prerequisite(s): EDUC 800, 805; EDLE 802; and EDRS 810.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDEP 821 - Sociocultural Processes in Learning, Instruction, and Motivation

Credits: 3 (NR)
Examines processes by which social, cultural, and linguistic variables influence human behavior. Focuses on differences within and between cultural groups related to student's learning and achievement in educational settings.

Prerequisite(s): EDUC 800, 805; EDLE 802; and EDRS 810.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDEP 822 - Advanced Learning, Motivation, and Self-Regulation

Credits: 3 (NR)
Examines development of self-regulatory and motivational processes as they relate to educational practice. Emphasizes how processes influence students' self-motivation and achievement in various domains.

Prerequisite(s): EDUC 800, 805; EDLE 802; and EDRS 810.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDEP 823 - Research Project in Educational Psychology: Sequence I

Credits: 3 (NR)
Focuses on development and implementation of research studies in educational psychology. Students acquire skills regarding developing research questions and a sound methodological approach for their study.

Prerequisite(s): EDEP 820, 821, 822.

Notes: First in two-course sequence.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDEP 824 - Research Project in Educational Psychology: Sequence II
Focuses on development and implementation of research studies in educational psychology. Students acquire skills regarding collecting, analyzing, and interpreting data.

**Prerequisite(s):** EDEP 823.

**Notes:** Second in two course sequence.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

## Electrical and Computer Engineering (ECE)

Offered by the Volgenau School of Engineering.

Students may attempt an undergraduate course taught by the Volgenau School of Engineering twice. A third attempt requires approval of the department offering the course.

### ECE 101 - Information Technology for Electrical Engineers

Credits: 3 (NR)  
Introduces fundamental concepts in information technology that provide technical underpinning for state-of-the-art applications. Presents fundamental engineering skills and perspective on range of information technology through lectures and hands-on experiments. Discusses ethics, professionalism, historical development, and social implications of IT.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 3

### ECE 201 - Introduction to Signal Analysis

Credits: 3 (NR)  
Provides technically more rigorous introduction to problems and tools commonly encountered by electrical engineers. Introduces mathematical modeling of engineering problems and their solutions. Introduces standard software packages for electrical engineering as tools to simulate engineering problems on computer. Mathematical and computer models are related to physical reality provided by hands-on experiments.

**Prerequisite(s):** Grade of C or better in MATH 113. Prerequisite enforced by registration system.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 2  
**When Offered:** Fall, Spring

### ECE 220 - Signals and Systems I
Credits: 3 (NR)
First of two-semester sequence of courses providing mathematical background for many ECE courses taken in junior and senior years. Introduces methods of representing continuous time signals and systems, and interaction between signals and systems. Covers analysis of signals and systems via differential equations and transform methods; Laplace and Fourier transforms as convenient analysis tools; frequency response of systems; and stability of systems in time and frequency domains. Presents application examples from communications, circuits, control, and signal processing.

**Prerequisite(s):** C or better in ECE 201 or equivalent. Prerequisite enforced by registration system.

**Corequisite(s):** MATH 203, 214

**Notes:** Students cannot receive credit for both ECE 220 and BENG 220.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 2  
**When Offered:** Fall, Spring, Summer

---

**ECE 280 - Electric Circuit Analysis**

Credits: 5 (NR)
Includes circuit analysis using superposition, equivalent circuits, and transient and steady-state analysis of RL, RC, and RLC circuits; applications of Laplace transform in circuit analysis; sinusoidal excitations and phasors; resonance; filters; AC steady-state analysis; coupled coils; and three-phase circuits. Includes lab demonstrating and investigating circuit analysis concepts.

**Prerequisite(s):** Grade of C or better in PHYS 260 and 261. Prerequisite enforced by registration system.

**Corequisite(s):** ECE 220 must be taken concurrently or before ECE 280.

**Notes:** Builds on simple circuit concepts introduced in PHYS 260.

**Hours of Lecture or Seminar per week:** 4  
**Hours of Lab or Studio per week:** 3  
**When Offered:** Fall, Spring, Summer

---

**ECE 285 - Electric Circuit Analysis I**

Credits: 3 (NR)
Covers the first half of electric circuit theory and practice. Topics include DC analysis of circuits including Ohm's and Kirchhoff's laws, Thevenin and Norton equivalents, and analysis of circuits with resistors, capacitors, inductors, and operational amplifiers. Includes lab experiments to reinforce topics covered in the course.

**Prerequisite(s):** PHYS 260 and 261. Prerequisite enforced by registration system.

**Corequisite(s):** MATH 214 and ECE 220.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 2  
**When Offered:** Fall, Summer, Spring
ECE 286 - Electric Circuit Analysis II

Credits: 3 (NR)
Covers the second half of electric circuit theory and practice. Topics include AC analysis of circuits including phasors, frequency response, power analysis, and transformers. Includes a project and lab experiments to reinforce topics covered in the course.

Prerequisite(s): ECE 285, MATH 214 and ECE 220. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 2
When Offered: Fall, Summer, Spring

ECE 301 - Digital Electronics

Credits: 3 (NR)
Introduces digital systems, circuits, and computers. Topics include binary systems and codes, digital logic gates and circuits, microelectronics and integrated circuits, coding and multiplexing, multivibrators, shift registers, counters, A/D converters, and elementary computer architecture.

Prerequisite(s): Grade of C or better in MATH 125 or MATH 112.

Notes: Not intended for those majoring in electrical or computer engineering.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 2
When Offered: Fall, Spring

ECE 303 - Digital Design/Intro Assembly Language

Credits: 4 (NR)
Introduces digital systems, circuits, and computers. Topics include binary systems and codes; digital logic gates and circuits; encoding and multiplexing; shift registers, counters, and elementary computer architecture/MIPS computer organization; and assembly language, including instruction format, data definition, load/store/arithmetic instructions, and addressing. Includes laboratory.

Prerequisite(s): CS 211 or IT 101, 108, and 212.

Notes: Not intended for electrical or computer engineering majors.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 2
When Offered: Fall, Spring

ECE 305 - Electromagnetic Theory
Credits: 3 (NR)
Static and time varying electric and magnetic fields, dielectrics, magnetization, Maxwell's Equations, and introduction to transmission lines. Course uses vector calculus and algebra of complex numbers.

**Prerequisite(s):** Grade of C or better in PHYS 260 and MATH 214. Prerequisite enforced by registration system.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall, Spring

---

**ECE 320 - Signals and Systems II**

Credits: 3 (NR)
Second of two-semester sequence providing mathematical background for many ECE courses taken in junior, senior years. Provides methods of representing and analyzing discrete-time signals and systems. Studies effects of converting from continuous-time to discrete time, and presents Z-transform as convenient analysis tool. Emphasizes powerful concept of frequency response of systems developed in first semester. Presents application examples from communications, circuits, control, and signal processing.

**Prerequisite(s):** Grade of C or better in ECE 220 and MATH 203. Prerequisite enforced by registration system.

**Notes:** Students cannot receive credit for both ECE 320 and BENG 320.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall, Spring, Summer

---

**ECE 331 - Digital System Design**

Credits: 3 (NR)
Covers principles of digital logic and digital system design and implementation in VHDL. Topics include number systems; Boolean algebra; analysis, design, and minimization of combinational logic circuits; analysis and design of synchronous and asynchronous finite state machines; and introduction to VHDL and behavioral modeling of combinational and sequential circuits.

Prerequisite enforced by registration system.

**Corequisite(s):** ECE 280 and 332.

**Notes:** ECE 332 should be taken concurrently with ECE 331. Credit may not be received for ECE 301 and 331.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall, Spring

---

**ECE 332 - Digital Electronics and Logic Design Lab**
Credits: 1 (NR)
Lab associated with ECE 331.

Prerequisite(s): PHYS 261 or 265, or permission of instructor Prerequisite enforced by registration system.

Corequisite(s): ECE 331.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 3
When Offered: Fall, Spring, Summer

ECE 333 - Linear Electronics I

Credits: 3 (NR)
Principles of operation and application of electron devices and linear circuits. Topics include semiconductor properties, diodes, bipolar and field effect transistors, biasing, amplifiers, frequency response, operational amplifiers, and analog design.

Prerequisite(s): Grade of C or better in ECE 280 or ECE 286. Prerequisite enforced by registration system.

Notes: ECE 334 is usually taken concurrently with ECE 333.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring, Summer

ECE 334 - Linear Electronics Lab I

Credits: 1 (NR)
Lab associated with ECE 333.

Prerequisite(s): PHYS 261 or 265, or permission of instructor Prerequisite enforced by registration system.

Corequisite(s): ECE 333.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 3
When Offered: Fall, Spring, Summer

ECE 392 - Engineering Design Studio

Credits: 1 (RD)
Identification and feasibility study of advanced engineering problems. Application of math, physics and engineering methods to challenging projects. Preliminary design, modeling, simulation and prototyping of projects. This course should be taken the semester preceding ECE/BENG 492.

Prerequisite(s): 75 hours of completed coursework applicable to the EE, CpE, or BIOE degree and permission of instructor.
ECE 410 - Principles of Discrete-Time Signal Processing

Credits: 3 (NR)
Introduces fundamental concepts of digital signal processing. Emphasis on the theoretical and numerical tools used for frequency domain analysis of sampled signals. Topics covered include sampling, the discrete Fourier transform, fast transform algorithms, spectral analysis, and digital filtering.

Prerequisite(s): ECE 320 with grade of C or better. Prerequisite enforced by registration system.

ECE 421 - Classical Systems and Control Theory

Credits: 3 (NR)
Introduces analysis and synthesis of feedback systems, including functional description of linear and nonlinear systems, block diagrams and signal flow graphs; statepace representation of dynamical systems, frequency response methods, Root Locus, Nyquist, and other stability criteria; performance indices and error criteria; and applications to mechanical and electromechanical control systems.

Equivalent to SYST 421

Prerequisite(s): Grade of C or better in ECE 220. Prerequisite enforced by registration system.

ECE 422 - Digital Control Systems

Credits: 3 (NR)
Introduces analysis, design of digital control systems, Z-transform, discrete linear systems, frequency domain, and state variable techniques. Discusses use of microcomputers in control systems.

Prerequisite(s): Grade of C or better in ECE 320 and 421. Prerequisite enforced by registration system.

ECE 429 - Control Systems Lab
Laboratory experiments for topics in control systems analysis, design, and implementation with emphasis on using microcomputers.

**Prerequisite(s):** Grade of C or better in ECE 421. Prerequisite enforced by registration system.

**Hours of Lecture or Seminar per week:** 1-6  
**Hours of Lab or Studio per week:** 3  
**When Offered:** Spring

### ECE 430 - Principles of Semiconductor Devices

Credits: 3 (NR)  
Introduces solid-state physics and its application to semiconductors and semiconductor devices. Topics include band theory, doping, p-n junctions, diffusion theory, low-frequency circuits, devices including bipolar transistor, MOSFET, CMOS, and photo transistors.

**Prerequisite(s):** Grade of C or better in ECE 333, ECE 305 and MATH 214. Prerequisite enforced by registration system.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Spring

### ECE 431 - Digital Circuit Design

Credits: 3 (NR)  
Analysis and design of discrete and integrated switching circuits. Topics include transient characteristics of diodes, bipolar, and field-effect transistors; MOS and bipolar inverters; nonregenerative and regenerative circuits; TTL, ECL, IIL, NMOS, and CMOS technologies; semiconductor memories; VLSI design principles; and SPICE circuit analysis.

**Prerequisite(s):** Grade of C or better in ECE 331 and 333. Prerequisite enforced by registration system.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall, Spring

### ECE 433 - Linear Electronics II

Credits: 3 (NR)  
Second course in linear electronics. Covers differential amplifiers, feedback circuits, power amplifiers, feedback amplifier frequency response, analog integrated circuits, operational amplifier systems, oscillators, wide band and microwave amplifiers, and computer-aided design.

**Prerequisite(s):** Grade of C or better in ECE 333. Prerequisite enforced by registration system.

**Hours of Lecture or Seminar per week:** 3
ECE 434 - Linear Electronics II Laboratory

Credits: 1 (NR)
Second lab course in linear electronics involving analysis and design of topics listed in ECE 433.

Prerequisite(s): ECE 334 Prerequisite enforced by registration system.

Corequisite(s): ECE 433.

Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 3
When Offered: Fall, Spring

ECE 435 - Digital Circuit Design Laboratory

Credits: 1 (NR)
Lab experiments for topics covered in ECE 431.

Prerequisite(s): ECE 334. Prerequisite enforced by registration system.

Corequisite(s): ECE 431.

Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 3
When Offered: Fall, Spring

ECE 437 - Principles of Microelectronic Device Fabrication

Credits: 3 (NR)
Introduces fundamentals of microelectronic semiconductor device fabrication technology. Processing steps include photolithography, oxidation, diffusion, ionimplantation, chemical vapor deposition, ohmic contact metalization, interconnects, packaging, MOS process integration, and bipolar process integration. Laboratory project integral to course.

Prerequisite(s): Grade of C or better in ECE 333 or 430. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 3

ECE 445 - Computer Organization
Credits: 3 (NR)
General overview of operating a digital computer. Topics include computer arithmetic, arithmetic unit, hardwired and microprogrammed control, memory, register-to-register, input-output operations, and behavioral modeling of computer organization using VHDL.

Prerequisite(s): Grade of C or better in ECE 331 and ECE 332 and in either CS 262 or CS 222. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring, Summer

ECE 446 - Device Driver Development

Credits: 3 (NR)
Addresses device driver and kernel level software programming and development. The C programming language and program trouble shooting are reviewed. Basics of device driver software, Character driver operations and data structures, concurrency and race conditions, kernel timers, memory allocation, communications with hardware, interrupt handling, kernel data types, memory mapping and Direct Memory Access concepts are explored.

Prerequisite(s): C or better in ECE 445. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall.

ECE 447 - Single-Chip Microcomputers

Credits: 4 (NR)
Explores designing with single-chip microcomputers and microcomputer interfacing. Topics include role of microcomputers compared with microprocessors and other computers, microcomputer architecture and organization, real-time control issues, assembly language programming for control, design of control software, input/output methods, design tools, and available single-chip microcomputers. Students select project and design, and construct system including single-chip microcomputer and ancillary hardware to implement control system.

Fulfills general education requirement in synthesis.

Prerequisite(s): Grade of C or better in ECE 445 and in either CS 367 or CS 222. Prerequisite enforced by registration system.

Notes: This course is highly recommended for ECE 492/493 students interested in using microcontroller technology in their senior design projects. It should be taken before ECE 493.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 3
When Offered: Fall

ECE 448 - FPGA and ASIC Design with VHDL
Practical introduction to modeling of digital systems with VHDL for logic synthesis. Overview and comparative analysis of design flow and tools for FPGAs and standard-cell ASICs. Discusses verification of digital systems using testbenches, prototyping boards and modern testing equipment, and illustrates VHDL-based design methodology with multiple examples from communications, control, DSP, and cryptography. Laboratory experiments create link between simulation and actual hardware implementation based on FPGA boards.

Prerequisite(s): Grade of C or better in ECE 445. Prerequisite enforced by registration system.

ECE 450 - Introduction to Robotics

Credits: 3 (NR)
Introduces mobile robotic systems. Topics include overview of power systems, motors, behavior-based programming, sensors, and sensor integration. Design projects conceived, developed, implemented, and presented.

Prerequisite(s): CS 112, ECE 280, ECE 331 and either ECE 332 or ECE 301, all with grade of C or better.

ECE 460 - Communication and Information Theory

Credits: 3 (NR)
Introduction to analog and digital communications. Topics include review of important concepts from signals and systems theory and probability theory; Gaussian processes and power spectral density; digital transmission through additive white Gaussian channels; sampling and pulse code modulation; analog signal transmission and reception using amplitude, frequency and phase modulation; and affects of noise on analog communication systems.

Prerequisite(s): Grade of C or better in ECE 220 and STAT 346. Prerequisite enforced by registration system.

ECE 461 - Communication Engineering Laboratory

Credits: 1 (NR)
Lab experiments in analog and digital communication areas covered in ECE 460.

Prerequisite(s): ECE 460 and 334. Prerequisite enforced by registration system.
ECE 462 - Data and Computer Communications

Credits: 3 (NR)
Introduces modern data communications and computer networks. Topics include point-to-point communication links and transmission of digital information, modems, and codecs; packet switching, multiplexing, and concentrator design; multiaccess and broadcasting; local area and wide area networks; architectures and protocols for computer networks; OSI reference model and seven layers; physical interfaces and protocols; and data link control layer and network layer. Provides examples of data networks.

Prerequisite(s): STAT 344 or 346, and ECE 220, and ECE 331 or 303, all with grade of C or better. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

ECE 463 - Digital Communications Systems

Credits: 3 (NR)
Introduces digital transmission systems. Topics include quantization, digital coding of analog waveforms, PCM, DPCM, DM, baseband transmission, digital modulation schemes, ASK, FSK, PSK, MSK, QAM, pulse shaping, intersymbol interference, partial response, voice-band and wideband modems, digital cable systems, regenerative repeaters, clock recovery and jitter, multipath fading, digital radio design, optimal receiver design, MAP receiver, and probability of error.

Prerequisite(s): ECE 460. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ECE 464 - Modern Filter Design

Credits: 3 (NR)
Offers solution to filtering approximation problem via Butterworth, Chebyshev, Elliptic, and Bessel approaches. Covers transfer function scaling and type transformations, review of Z-transform, time and frequency domain effects of A/D and D/A conversion, and digital filter design and implementation.

Prerequisite(s): ECE 320 with a grade of C or better.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring

ECE 465 - Computer Networking Protocols
Credits: 3 (NR)
Introduces computer networking protocols and concepts, emphasizing Internet and Internet Protocol Suite. Covers computer networking protocols at application, transport, and network layers, including multimedia networking protocols, and network security and management.

Prerequisite(s): STAT 346, and CS 112, both with a grade of C or better. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring

ECE 467 - Network Implementation Laboratory

Credits: 1 (NR)
Hands-on experience in implementing, configuring, and operating local and wide area networks in live laboratory environment equipped with modern local and wide area network devices and technologies. Students exposed to real-world computer networking scenarios including local area network implementation, asynchronous communication setup, and wide area network implementation using various protocols and technologies covering all layers of computer network protocol stack.

Prerequisite(s): ECE 462. Prerequisite enforced by registration system.

Corequisite(s): ECE 465.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 3

ECE 469 - Microwave Circuit Laboratory

Credits: 1 (NR)
Introduces microwave engineering laboratory techniques and measurements, and the design, fabrication, and test of microwave microstrip circuits.

Prerequisite(s): ECE 305 and 334.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 2

ECE 491 - Engineering Seminar

Credits: 1 (NR)
Engineering ethics, professionalism, role of engineer in society, current topics, and employment opportunities.

Equivalent to BENG 491

Prerequisite(s): 90 credits applicable to electrical engineering or computer engineering program, and COMM 100. Prerequisite enforced by registration system.
**Notes:** Students cannot receive credit for both ECE 491 and BENG 491.

**Hours of Lecture or Seminar per week:** 1  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall, Spring

---

**ECE 492 - Senior Advanced Design Project I**

Credits: 1 (NR)

Conception of senior design project and determination of feasibility of proposed project. Work includes developing preliminary design and implementation plan. Students planning to use microcontroller technology in their projects should enroll in ECE 447 before taking ECE 493.

Fulfills general education requirement in synthesis.

**Prerequisite(s):** 90 credits applicable to electrical engineering or computer engineering program and COMM 100 and ENGH 302. Prerequisite enforced by registration system.

**Hours of Lecture or Seminar per week:** 1  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall, Spring

---

**ECE 493 - Senior Advanced Design Project II**

Credits: 2 (NR)

Implementation of project for which preliminary work was done in ECE 492. Project includes designing and constructing hardware, writing required software, conducting experiments or studies, and testing complete system. Requires oral and written reports during project and at completion.

Fulfills general education requirement in synthesis.

**Prerequisite(s):** ECE 492, preferably in preceding semester. Prerequisite enforced by registration system.

**Notes:** Students planning to use microcontroller technology in their projects should enroll in ECE 447 before taking ECE 493. Completing this course with a C or better satisfies university's general education synthesis requirement.

**Hours of Lecture or Seminar per week:** 2  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall, Spring

---

**ECE 498 - Independent Study in Electrical and Computer Engineering**
Directed self-study of special topics of current interest in ECE. Topic must be arranged with an instructor and approved by department chair before registering.

Notes: Maximum 3 credits.

Hours of Lecture or Seminar per week: 1-9
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

**ECE 499 - Special Topics in Electrical Engineering**

Credits: 0-4 (RT)
Topics of special interest to undergraduates.

Prerequisite(s): Permission of instructor; specific prerequisites vary with nature of topic.

Notes: May be repeated for maximum of 6 credits if topics substantially different.

Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

**ECE 507 - Seminar in Emerging Technologies**

Credits: 3 (NR)
Study of emerging technologies, how they are identified, how they evolve, actions which may encourage or stifle their growth, government influences, societal influences, examples of success and failure, and some lessons to be learned which are unique to government information technology. Topics covered will include a general introduction to emerging technologies, with emphasis on IT, discussion of difficulty in letting go of legacy systems, the DOD Global Information Grid, Cyberwarfare, Complex Adaptive Systems, and Federal Government support of Research and Development. Cannot be used in the PhD IT program.

Prerequisite(s): Graduate Standing.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

**ECE 510 - Real-Time Concepts**

Credits: 3 (NR)
Presents design methodology, principles and practice for the development of real-time embedded systems and their application to robotics, mechatronics, sensing, signal processing, and control. Topics include system decomposition, multi-tasking, task communication and synchronization, system modeling, time analysis, principles of filter and controller implementation, 'fuzzy' engineering, and multi-microcontroller systems.

Prerequisite(s): ECE 450 or ECE 447 or permission of instructor.
ECE 511 - Microprocessors

Credits: 3 (NR)
Introduces microprocessor software and hardware architecture. Includes fundamentals of microprocessor system integration, instruction set design, programming memory interfacing, input/output, direct memory access, interrupt interfacing, and microprocessor architecture evolution. Studies Intel family of microprocessors, and reviews other microprocessor families and design trends.

Prerequisite(s): ECE 445 or equivalent.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ECE 520 - Applications of Analog and Digital Integrated Circuits

Credits: 3 (NR)
Studies analog and digital integrated circuits mainly from communications applications point of view. Covers analog, digital, and mixed (analog/digital) building block circuits used in system design including operational amplifiers, comparators, voltage regulators, video amplifiers, oscillators, modulators, phaselocked loops, multiplexers, active filters, A/D and D/A converters, and optoelectronic circuits.

Prerequisite(s): ECE 433 and 431, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ECE 521 - Modern Systems Theory

Credits: 3 (NR)
Introduces linear systems theory and design of linear feedback control systems. Reviews linear algebra, state variables, state-space description of dynamic systems, analysis of continuous-time and discrete-time linear systems, controllability and observability of linear systems, and stability theory.

Prerequisite(s): ECE 421.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ECE 524 - Process Control Fundamentals
Credits: 3 (NR)
Provides fundamentals of process control methodologies that are applicable in manufacturing industries, such as semiconductor manufacturing. Introduces the basic concepts of controlled processes equipped with digital control loops, starting with basic discrete-time models, deterministic and random signals and parameter estimation. Provides exposition of fundamentals and applications of feedback control principles, self-tuning control, run-to-run control and system diagnostics.

Prerequisite(s): Graduate standing.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ECE 525 - Hardware/Software Integration

Credits: 3 (NR)
Provides fundamentals of modern computer system and hardware/software integration through the use of quantitative approaches, cost-performance-power tradeoffs, and engineering designs. Introduces design considerations where hardware and software interlock with each other. Course topics include quantitative computer design, exploitation of hardware and software parallelism at instruction-, multiprocessor-, and thread-level, memory hierarchy, storage system, interconnection network, and embedded system design.

Prerequisite(s): Graduate standing

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ECE 528 - Introduction to Random Processes in Electrical and Computer Engineering

Credits: 3 (NR)
Probability and random processes are fundamental to communications, control, signal processing, and computer networks. Provides basic theory and important applications. Topics include probability concepts and axioms; stationarity and ergodicity; random variables and their functions; vectors; expectation and variance; conditional expectation; moment-generating and characteristic functions; random processes such as white noise and Gaussian; autocorrelation and power spectral density; linear filtering of random processes, and basic ideas of estimation and detection.

Prerequisite(s): ECE 220 and STAT 346, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ECE 530 - Sensor Engineering

Credits: 3 (NR)
Presents the fundamentals of sensor characteristics and transfer functions, sensor circuits and interfacing, sensor noise, and protection methods. Studies of different methods used in sensing position, motion, acceleration, force, humidity, temperature, chemicals, etc. are developed, followed by an analysis of specific sensor designs.

Prerequisite(s): Graduate Standing, or permission from instructor.
Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0  
When Offered: Fall, Spring.

**ECE 531 - Introduction to Wireless Communications and Networks**

Credits: 3 (NR)  
Presents the basics of modern wireless communications and wireless networking at the first-year graduate level. Topics include wireless signal design, channel characterization, receiver structure, multiple access technologies, cellular concepts, capacity enlargement, mobility management, and wireless/wireless interworking.

Prerequisite(s): ECE 460 or equivalent

Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0  
When Offered: Fall

**ECE 535 - Digital Signal Processing**

Credits: 3 (NR)  
Representation analysis and design of digital signals and systems. Covers sampling and quantization, z-transform and discrete Fourier transform, digital filter realizations, design techniques for recursive and non-recursive filters, fast Fourier transform algorithms, and spectral analysis. Additional topics may include adaptive filtering, homomorphic digital signal processing, digital interpolation and decimation.

Prerequisite(s): ECE 320 and STAT 346.

Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0  
When Offered: Fall

**ECE 537 - Introduction to Digital Image Processing (DIP)**

Credits: 3 (NR)  
First course in digital-image processing; introduces scanning systems, focal plane array detectors, data acquisition methods, display hardware, image preprocessing algorithms, feature extraction, and basic image processing methods. Semester-long image processing project includes utilizing modern image processing system prototyping software.

Prerequisite(s): Graduate standing.

Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0

**ECE 538 - Medical Imaging**
Credits: 3 (NR)
Provides an introduction to the physical, mathematical and engineering foundations of modern medical imaging systems, medical image processing and analysis methods. In addition, this course introduces engineering students to clinical applications of medical imaging. The emphasis is on diagnostic ultrasound and magnetic resonance imaging methods, although several other modalities are covered. The course also provides an overview of recent developments and future trends in the field of medical imaging, discusses some of the challenges and controversies, and involves hands-on experience applying the methods learned in class to real-world problems.

Equivalent to BENG 538

Prerequisite(s): Graduate Standing or permission of instructor; ECE 320 or equivalent; PHYS 262 or equivalent.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

ECE 540 - Modern Telecommunications

Credits: 3 (NR)
Comprehensive overview of telecommunications including current status and future directions. Topics include review of evolution of telecommunications; voice and data services; basics of signals and noise, digital transmission, network architecture, and protocols; local area, metropolitan, and wide area networks and narrowband ISDN; asynchronous transfer mode and broadband ISDN; and satellite systems, optical communications, cellular radio, personal communication systems, and multimedia services. Uses examples of real-life networks to illustrate concepts and gain insight.

Equivalent to TCOM 500

Prerequisite(s): Graduate standing

Notes: For students outside of the program. Cannot be applied toward degrees in electrical or computer engineering.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ECE 541 - Computer Architectures - A Survey

Credits: 3 (NR)
Survey of computer architectures. Covers basic concepts, definitions, single and multiple processor machines, multicore processors, parallel processing, pipelining, instruction level parallelism (ILP), simultaneous multithreading (SMT), and current trends in computer architectures. Course designed for MS AIT students. Cannot be used for credit in MSCpE or MSEE.

Prerequisite(s): IT 212 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ECE 542 - Computer Network Architectures and Protocols
Credits: 3 (NR)
Introduction to architectures and protocols of computer networks and concept of packet switching. Topics include ISO standard layer model, physical interfaces and protocols, data link control, multiaccess techniques, packet switching, routing and flow control, network topology, data communication subsystems, error control coding, local area network, satellite packet broadcasting, packet radio, interconnection of packet-switching networks, network security and privacy, and various examples of computer networks.

Prerequisite(s): STAT 344 or equivalent, and graduate standing in VSITE.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring, Summer

ECE 545 - Digital System Design with VHDL

Credits: 3 (NR)
Introduction to the design of complex digital systems using hardware description languages. Emphasizes the design methodology based on the partitioning of a digital system into a datapath and control unit. Introduces a clear sequence of steps leading from specification to synthesizable, register transfer level (RTL), and fully verified HDL code. Covers VHDL for digital circuit design, including dataflow, structural, and behavioral coding styles. Introduces and illustrates the concepts of VHDL simulation, verification, synthesis, mapping, placing, routing, timing analysis and performance optimization. Requires semester long project devoted to the design of a complex digital system using VHDL as a hardware description language and FPGA as an implementation platform.

Prerequisite(s): Graduate standing.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ECE 548 - Sequential Machine Theory

Credits: 3 (NR)
Theoretical study of sequential machines. Topics include sets, relations and lattices, switching algebra, functional decomposition, iterative networks, representation, minimization and transformation of sequential machines, state identification, state recognizers, and linear and stochastic sequential machines.

Prerequisite(s): ECE 331, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring

ECE 549 - Theory and Applications of Artificial Neural Networks

Credits: 3 (NR)

Prerequisite(s): ECE 320 or equivalent.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**ECE 563 - Introduction to Microwave Engineering**

Credits: 3 (NR)
Studies propagation, storage of microwave signals. Examines transmission lines, waveguides, resonators, scattering parameters, Smith charts, measurement techniques, instrumentation, and microwave striplines and microstrips.

Prerequisite(s): ECE 305, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**ECE 565 - Introduction to Optical Electronics**

Credits: 3 (NR)
Introduces optoelectronic devices for generation, detection, and modulation of light. Topics include electro-optic modulators, gas, solid state and semiconductor lasers, photodetectors, and detector arrays.

Prerequisite(s): ECE 305 and 333.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**ECE 567 - Optical Fiber Communications**

Credits: 3 (NR)
Studies components and integration of fiber-optic transmission systems. Topics include optical fibers, signal degradation, optical sources, power launching and coupling, photodetectors, receiver circuits, link analysis, and optical measurements.

Prerequisite(s): ECE 565 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**ECE 568 - Introduction to Imaging Sensors**
Imaging sensors are being used extensively in defense, homeland security, biomedical, scientific and consumer applications. This course provides introduction to the operating principles of the front-end optics and sensor technologies. In addition to the familiar cameras, the course will also discuss advanced microscopy, 3D medical imaging (tomography, MRI) and radar-imaging systems.

Prerequisite(s): Graduate status or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**ECE 584 - Semiconductor Device Fundamentals**

Credits: 3 (NR)

Studies principals of operation of semiconductor devices based on solid state physics. Topics include band theory of solids, intrinsic and extrinsic semiconductor properties, pn junction diode, bipolar junction transistor, Schottky diode, metal insulator semiconductor junctions, field-effect transistors, and hetero-structures.

Prerequisite(s): ECE 430 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

**ECE 586 - Digital Integrated Circuits**

Credits: 3 (NR)

Studies design and analysis of digital integrated circuits, emphasizing CMOS technology. Reviews MOSFET operation and SPICE modeling. Covers analysis and design of basic inverter circuits, structure and operation of combinational and sequential logic gates, dynamic logic circuits, chip I/O circuits, and brief introduction to VLSI methodologies.

Prerequisite(s): ECE 331 and 430, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

**ECE 587 - Design of Analog Integrated Circuits**

Credits: 3 (NR)

Studies design methodologies of CMOS-based analog integrated circuits. Topics include differential amplifiers, current sources, output stages, operational amplifiers, comparators, frequency response, noise, and computer-aided design.

Prerequisite(s): ECE 333 and 430, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall
ECE 590 - Selected Topics in Engineering

Credits: 3 (RT)
Selected topics from recent developments, and applications in various engineering disciplines. Designed to help professional engineering community keep abreast of current developments.

Prerequisite(s): Graduate standing or permission of department.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ECE 611 - Advanced Microprocessors

Credits: 3 (NR)
Covers principles of advanced 32-bit and 64-bit microprocessors. Includes microprocessor structure and architecture, pipeline hazards, instruction-level parallelism, superscalar and superpipelined execution, thread-level parallelism; and RISC principles and advantages. Offers examples of RISC-type microprocessors. Studies in detail Intel IA-32, Intel and HP IA-64, and Motorola M68000 families.

Prerequisite(s): ECE 511 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ECE 612 - Real-Time Embedded Systems

Credits: 3 (NR)
Study of real-time operating systems and device drivers for embedded computers. Emphasizes microprocessor systems and associated input device sampling strategies, including interrupt driven and polled I/O. Covers basic input/output operations, analog to digital conversion methods, I/O programming techniques and process, and communication control methodologies. Involves design project.

Prerequisite(s): ECE 511 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ECE 620 - Optimal Control Theory

Credits: 3 (NR)
Detailed treatment of optimal control theory and its applications. Topics include system dynamics and performance criteria, calculus of variations and Pontryagin's minimum principle, computational methods in optimal control, and applications of optimal control.
Prerequisite(s): ECE 521 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**ECE 621 - Systems Identification**

Credits: 3 (NR)

Prerequisite(s): ECE 521 and 528, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**ECE 624 - Control Systems**

Credits: 3 (NR)
Analysis, design, and implementation of digital feedback control systems. Topics include discrete-time models, pole-placement, controller design methods, MIMO system decoupling, and observer design.

Prerequisite(s): ECE 421 and 521, or permission of instructor.

Notes: Course may include simulation and design project.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**ECE 630 - Statistical Communication Theory**

Credits: 3 (NR)
Introduces optimum receiver design in the additive white Gaussian noise environment. Topics include efficient signal set design, modulation techniques, matched filter, correlation detector, coherent and noncoherent detections, fading and diversity channels, random amplitude and phase, diversity techniques, performance bounds of communications, and waveform communications.

Prerequisite(s): ECE 528.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**ECE 633 - Coding Theory**
Mathematics of coding groups, rings, and fields, and polynomial algebra. Topics include linear block codes, generator and parity check matrices; error syndromes, binary cyclic and convolutional codes; and implementation of encoders and decoders.

**Prerequisite(s):** ECE 528 or permission of instructor

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**ECE 635 - Adaptive Signal Processing**

Credits: 3 (NR)  
Introduces adaptive systems and adaptive signal processing. Topics include correlation functions and matrices; performance functions; search of minimum; steepest descent and Newton algorithms; least mean squares algorithm; noise perturbed search and misadjustment; sequential regression algorithm and convergence issues; recursive least squares algorithm and forgetting factor; frequency domain algorithms; adaptive equalization; pseudorandom binary sequences and system identification; adaptive interference cancellation; and adaptive beam forming and arrays. Simulates adaptive algorithms.

**Prerequisite(s):** ECE 528.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**ECE 638 - Fast Algorithms and Architectures for Digital Signal Processing**

Credits: 3 (NR)  
Studies recent advances in development of signal processing algorithms and relevant computational architectures. Topics include fast polynomial transforms, Winograd's algorithms, multirate processing of digital signals, spectral estimation, adaptive filtering, and wavelet transforms.

Equivalent to IT 838  

**Prerequisite(s):** ECE 535 or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**ECE 641 - Computer System Architecture**

Credits: 3 (NR)  
Advanced course in computer architecture. Covers definitions, multiple processors, VLSI architecture, data flow, computation, semantic gap, high-level language architecture, object-oriented design, RISC architecture, and current trends in computer architecture.

**Prerequisite(s):** ECE 511 or permission of instructor.
ECE 642 - Design and Analysis of Computer Communication Networks

Credits: 3 (NR)
Introduces queuing theory. Other topics include concentrator design, multiplexing, capacity assignments, random access schemes, polling and probing techniques, topology design, flow control and routing, packet radio, protocol specification, and validation.

Prerequisite(s): ECE 542 and 528, or equivalent.

ECE 643 - Network Switching and Routing

Credits: 3 (NR)
Fundamentals of switching and routing with application to communications networks, both wireline and wireless. Topics include concepts of space and time for switching and forwarding of data, scalability and performance, label swapping, algorithms for routing and path computation, constrained route optimization, traffic theory, control and signaling, and traffic engineering. The course also covers the concepts and issues underlying the design and implementation of the contemporary switched networks.

Prerequisite(s): ECE 528 and 542

ECE 644 - Architectures and Algorithms for Image Processing

Credits: 3 (NR)
Architectures and algorithms to analyze and process pictorial information. Topics include systems and techniques for digital representation of images; image scanning methods and their applications; picture processing languages; image data structures; feature detection, extraction, and reconstruction; detection of symmetries; systems and methods for regular decomposition; image desegmentation; object thinning; real-time orthogonal transformations; and applications. Includes design project.

Prerequisite(s): ECE 511 and 537, or equivalent.

ECE 645 - Computer Arithmetic
Covers computer arithmetic as applied to the design of general-purpose microprocessors and application-specific integrated circuits for cryptography, coding, and digital signal processing. Focuses on efficient implementations of all basic arithmetic operations in three major domains: integers, real numbers, and elements of Galois Fields GF(2^n). Illustrates tradeoffs among various hardware algorithms and architectures depending on primary optimization criteria, such as speed, area, and power consumption. Demonstrates the use of software implementations as a source of test vectors for verification of hardware implementations and for evaluating hardware versus software speed-up.

**Prerequisite(s):** ECE 545 or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**ECE 646 - Cryptography and Computer Network Security**

Credits: 3 (NR)  
Topics include need for security services in computer networks, basic concepts of cryptology, historical ciphers, modern symmetric ciphers, public key cryptography (RSA, elliptic curve cryptosystems), efficient hardware and software implementations of cryptographic primitives, requirements for implementation of cryptographic modules, data integrity and authentication, digital signature schemes, key exchange and key management, standard protocols for secure mail, the web and electronic payments, security aspects of mobile communications, key escrow schemes, zero-knowledge identification schemes, smart cards, quantum cryptography, and quantum computing.

**Prerequisite(s):** ECE 542 or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**ECE 650 - Robotics**

Credits: 3 (NR)  
Introduces robotics and advanced automation from electrical engineering standpoint. Topics include hardware overview; coordinate systems and manipulator kinematics; differential motion and inverse Jacobian; manipulator path control and motion planning; design and control of articulated hands; sensory feedback; machine vision; and applications to industrial automation.

**Prerequisite(s):** ECE 521 or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**ECE 652 - Mobile Robots**

Credits: 3 (NR)  
Treats kinematic modeling of mobile robots with wheels, steering control, navigation and remote sensing. GPS as well as inertial navigation discussed. Kalman filtering applied to state estimation of robot position and attitude and also applied to estimation of the location of detected objects. Target tracking is developed for repeated observations of a detected object as well as simultaneous tracking of multiple objects.
Prerequisite(s): ECE 521 and ECE 528 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring.

ECE 665 - Fourier Optics and Holography

Credits: 3 (NR)
Studies optical systems for processing temporal signals as well as images. Topics include use of coherent optical systems for image processing and pattern recognition, principles of holography, and acousto-optic systems for radar-signal-processing optical computers.

Prerequisite(s): ECE 565.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ECE 670 - Principles of C4I

Credits: 3 (NR)
Provides broad introduction to fundamental principles of command, control, communication, computing, and intelligence (C4I). Applies principles, techniques to wide range of civilian and military situations. Discusses modeling, simulation of combat operations; studies sensing, fusion, and situation assessment processes. Derives optimal decision-making rules. Discusses concepts of C4I architectures and tools to evaluate and design systems such as queuing theory.

Prerequisite(s): ECE 528 or SYST 611 or OR 542, or equivalent.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ECE 672 - Introduction to Architecture-Based Systems Engineering

Credits: 3 (NR)
Explores life cycles in systems engineering and human, organizational, process, and technological basis for systems integration and architecting. Includes societal and cultural basis; conceptual frameworks; structure, function, and purpose; risk management; user requirements and functional specifications; bid and proposal process; System of Systems issues; systems management; increasing returns to scale, network effects, and path dependency issues; and evolutionary systems.

Equivalent to SYST 619

Prerequisite(s): SYST 510 or SYST 520 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
ECE 673 - Discrete Event Systems

Credits: 3 (NR)
Introduces modeling and analysis of discrete event dynamical systems. Covers elements of discrete mathematics, and focuses on Petri Net Models and their basic properties: locality and concurrency, condition and event systems, place and transition nets, Colored Petri Nets, reachability graphs (occurrence nets), and invariant analysis. Includes issues in Petri Nets and temporal logic; stochastic Petri Nets; relation to other discrete event models of dynamical systems; and applications of the theory to modeling and simulation and systems engineering problems, especially in systems architecting.

Equivalent to SYST 620

Prerequisite(s): ECE 521, or SYST 611 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ECE 674 - Systems Architecture Design

Credits: 3 (NR)
Intensive study of relationships of different types of architecture representations and methodologies to obtain them. Uses approaches based on systems engineering constructs, such as structured analysis and software engineering constructs, including object orientation, to develop architecture representations and derive executable model of information architecture. Executable model is then used for behavior analysis and performance evaluation. Discusses roles of systems architect and engineer. Uses examples from current practice including C4ISR architectures.

Equivalent to SYST 621

Prerequisite(s): SYST 619/ECE 672 and SYST 620/ECE 673 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ECE 675 - System Integration and Architecture Evaluation

Credits: 3 (NR)
Explores human, organizational, societal, cultural, and technological aspects of system integration problem. Includes role of architectures in systems integration, and integration in System of Systems and Federation of Systems. Evaluates architectures; measures performance and effectiveness; analyzes alternative architecture and integration strategies; and assesses system capabilities.

Equivalent to SYST 622

Prerequisite(s): SYST 620 or ECE 673 and SYST 621 or ECE 674 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
ECE 678 - Systems Engineering of Information Architectures

Credits: 3 (NR)
An intensive study of the relationships between different types of architecture representations and the methodologies used to obtain them. Approaches based on systems and software engineering constructs, such as object orientation and structured analysis are used to develop architecture representations or views. The roles of the systems architect and the systems engineer are discussed. The function of an executable model of the information architecture in deriving requirements is presented. Examples from current practice including C4ISR architectures are included.

Equivalent to SYST 631

Prerequisite(s): SYST 520 and SYST 619 or ECE 672.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ECE 680 - Physical VLSI Design

Credits: 3 (NR)
Introduces NMOS, CMOS, and BiMOS integrated circuit technology and fabrication. Reviews MOS and BiCMOS inverter structures and operation, MOS and BiCMOS circuit design processes, MOS layers, stick diagrams, design rules, and layout. Covers subsystem design and layout illustration of design process through design of 4bit arithmetic processor and its parts, adder, multiplier, register, and memory cells; and aspects of system timing, test and testability. Reviews currently available VLSI CAS tools.

Prerequisite(s): ECE 586 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ECE 681 - VLSI Design for ASICs

Credits: 3 (NR)
Introduces VLSI design of application-specific integrated circuits (ASICs) from front-end to back-end using HDL and modern design automation software. Covers simulation, synthesis of digital circuits using standard cells, static timing analysis, formal verification, power analysis, test generation/fault simulation, and physical design including floor planning, placement, routing, and design rule checking. Addresses deep submicron CMOS scaling issues and other advanced topics.

Prerequisite(s): ECE 545, or permission of instructor.

Corequisite(s): ECE 586

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
ECE 682 - VLSI Test Concepts

Credits: 3 (NR)
Broad introduction to basic concepts, techniques, and tools of modern VLSI testing. Fundamentals of defect modeling, fault simulation, design for testability, built-in self-test techniques, and failure analysis. Test economics, physical defects and fault modeling, automated test pattern generation, fault simulation, design for test, built-in self test, memory test, PLD test, mixed-signal test, Idq test, boundary scan and related standards, test synthesis, diagnosis and failure analysis, automated test equipment, embedded core test.

Prerequisite(s): ECE 586

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ECE 684 - MOS Device Electronics

Credits: 3 (NR)
Study of Metal Oxide Semiconductor (MOS)-based device theory, characteristics, models, and limitations. Topics include MOS capacitor, MOSFETs, CMOS, charge coupled devices, scaling, hot carrier effects, latchup, radiation effects, and isolation techniques.

Prerequisite(s): ECE 584 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ECE 685 - Nanoelectronics

Credits: 3 (NR)
Emphasizes the fundamental concepts and principles that govern the operation of nano-electronic devices (100 nm down to 1 nm.). Addresses basic device building blocks such as quantum dot (QD), single electron tunneling transistor (SETT), carbon nanotube (CNT), nanowire, etc. Considers the design and analysis of a variety of nano-devices ("quantum" or "mesoscopic" devices) and examine some notable applications.

Prerequisite(s): ECE 584

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

ECE 689 - VLSI Processing

Credits: 3 (NR)
In-depth study of various steps in silicon VLSI circuit processing. Includes thermal oxidation, diffusion, ion implantation, epitaxial growth, polysilicon, metal and insulator layer deposition, photolithography, and MOS processing integration. Involves hands-on laboratory projects and using process simulator SUPREM.
Prerequisite(s): ECE 584 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ECE 698 - Independent Reading and Research

Credits: 1-3 (RD)
Independent study under the supervision of a faculty member, resulting in an acceptable technical report. No more than a combined total of 3 credits may be taken towards satisfying the master’s degree, although students may register for more credits. No more than a combined total of 3 credits may be taken of ECE 698 and ECE 798 towards satisfying the master’s degree, although students may register for more credits. Students may not count both ECE 799 and ECE 698 for master’s credit.

Prerequisite(s): Graduate standing, completion of at least two core courses, and permission of instructor.

Notes: Requires written report. May be taken no more than twice for graduate credit.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ECE 699 - Advanced Topics in Electrical and Computer Engineering

Credits: 1-6 (RT)
Advanced topics of current interest in electrical and computer engineering. Topics chosen so they do not duplicate other courses in department. Active participation encouraged in form of writing and presenting papers in research areas.

Prerequisite(s): Permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ECE 721 - Nonlinear Systems

Credits: 3 (NR)
Includes motivating examples; analysis techniques include basic fixed-point theory, implicit function theorem, and dependence of trajectories on initial data and parameters. Also covers computational simulation techniques; stability theory including Lyapunov's direct method; nonlinear control systems of input-output and absolute stability; strong positive real transfer functions; feedback linearization of nonlinear systems; nonlinear canonical forms; nonlinear decoupling; sliding control; and applications to adaptive control, neural networks, and robotics.

Equivalent to IT 846

Prerequisite(s): ECE 620 or ECE 621.
ECE 722 - Kalman Filtering with Applications

Credits: 3 (NR)
Detailed treatment of Kalman Filtering Theory and its applications, including some aspects of stochastic control theory. Topics include state-space models with random inputs, optimum state estimation, filtering, prediction and smoothing of random signals with noisy measurements, all within the framework of Kalman filtering. Additional topics are nonlinear filtering problems, computational methods, and various applications such as global positioning system, tracking, system control, and others. Stochastic control problems include linear-quadratic-Gaussian problem and minimum-variance control.

Prerequisite(s): ECE 521 and 528 or equivalent, or permission of instructor.

ECE 727 - System Identification and Adaptive Control

Credits: 3 (NR)
Advanced treatment. Topics include identification algorithms, their convergence and accuracy, and computational aspects; model reference and self-tuning adaptive control, transients, stability, and robustness; and intelligent schemes to improve robustness. Students required to study literature and complete computer project.

Prerequisite(s): ECE 621, or permission of instructor.

ECE 728 - Random Processes in Electrical and Computer Engineering

Credits: 3 (NR)
Recommended for advanced master's and doctoral students. Provides background in random processes needed for pursuing graduate studies and research in statistical signal processing, communications, control, and computer networks. Covers probability spaces, random variables, Lebesque integration, conditional mean on a sigma field, convergence of random variables, limit and ergotic theorems, Markov processes, and Martingales.

Prerequisite(s): ECE 528 or permission of instructor.

ECE 731 - Digital Communications

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall
Credits: 3 (NR)
Digital transmission of voice, video, and data signals. Covers signal digitization, pulse code modulation, delta modulation, low bit-rate coding, multiplexing, synchronization, intersymbol interference, adaptive equalization, frequency spreading, encryption, transmission codes, digital transmission using band-width compression techniques, and satellite communications.

Prerequisite(s): ECE 630 or equivalent.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ECE 732 - Mobile Communication Systems

Credits: 3 (NR)
Topics include modeling of mobile communication channel, signal set and receiver design for mobile communication channel, access and mobility control, mobile network architectures, connection to fixed network, and signaling protocols for mobile communication systems. Examples of mobile communication systems are presented, including pan-European GSM, North American D-AMPS, and personal communication systems.

Prerequisite(s): ECE 542 and 630.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ECE 734 - Detection and Estimation Theory

Credits: 3 (NR)
Introduces detection and estimation theory with communication and radar and sonar applications. Topics include classical detection and estimation theory, detection of known signals in Gaussian noise, signal parameter and linear waveform estimation, and Wiener and Kalman filters.

Equivalent to IT 830

Prerequisite(s): ECE 528.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ECE 737 - Spread Spectrum Communications

Credits: 3 (NR)
Introduces spread spectrum communications. Topics include pseudo noise spread spectrum systems, feedback shift registers, jamming strategy, code acquisition, synchronization, tracking, gold codes, burst-communication systems, time-hopping, frequency hopping, and multiple access communications.

Equivalent to IT 932

Prerequisite(s): ECE 630.
ECE 738 - Advanced Digital Signal Processing

Credits: 3 (NR)
Theory and practice of advanced digital signal processing techniques. Topics may include efficient high-speed algorithms for convolution, correlation, orthogonal transforms, multirate processing of digital signals, multiresolution time-frequency and time-scale analysis of one- and two-dimensional signals, and multitaper spectral estimation.

Prerequisite(s): ECE 528 and ECE 535.

ECE 741 - Wireless Networks

Credits: 3 (NR)
Theoretical foundation and practice in design of wireless networks. Emphasizes mobility and teletraffic modeling aspects, and networking issues and state-of-the-art performance evaluation methods of radio and system infrastructure applicable to wireless cellular and local networks. Topics include analysis of mobility, handoff, control traffic loading, resource allocation techniques, multiaccess protocols, admission policy and call control, network infrastructure and multilayer configuration, wireless LANs, and packet data systems.

Prerequisite(s): ECE 642 or equivalent.

ECE 742 - High-Speed Networks

Credits: 3 (NR)
Theories for design, analysis and evaluation of high-speed networks including scalability, performance, and issues related to local area, metropolitan, and wide area networks. Includes architecture, protocols, and applications of high-speed networks; performance modeling of high-speed networks; flow control and routing; design issues for high-speed switches, interfaces, and controllers; all optical networks and their architectures; examples of high-speed computer networks and Internet working; video, imaging, and multimedia applications; software issues, robustness, and applications; and selected topics in current research areas in high-speed computer networks.

Equivalent to IT 834

Prerequisite(s): ECE 528 and 642, or permission of instructor.
ECE 743 - Multimedia Networking and Communications Software

Credits: 3 (NR)
Advanced modern networks and services increasingly rely on communication protocols and their implementation in software. Course provides principle methodologies, constraints, and technologies for advanced store-and-forward or packet-switched communications nodes, networks and protocols, and emerging software-based applications. Specific examples include next-generation integrated Internet and Intranet, underlying transport infrastructure over wired and wireless media, switching and routing, multipoint and real-time multimedia and web-based services, and quality of services aspects.

Equivalent to IT 848

Prerequisite(s): ECE 642 or equivalent.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ECE 744 - Computer Vision and Expert Systems

Credits: 3 (NR)
Brief review of image analysis. Includes vision system architectures such as human and computer visual systems; vision system operations such as focus and zooming; picture recognition languages; knowledge-based systems; learning algorithmic schemes; and applications to text processing and analysis as expert systems. Students conceive, simulate, and test design projects.

Prerequisite(s): ECE 644 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ECE 745 - ULSI Microelectronics

Credits: 3 (NR)
Studies UltraLargeScaleIntegration (more than a million devices in a single chip) by considering limits of packing density, modeling of devices, and circuit topology. Semiconductor material and device physics imposed "second order effects" and limitations on deep submicron CMOS performance. Reliability studied through analytical (compact) modeling and numerical simulations. Presents and evaluates new ULSI technologies such as SOI CMOS.

Prerequisite(s): ECE 684.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ECE 746 - Advanced Applied Cryptography
ECE 749 - Neural Networks for Control

Credits: 3 (NR)
General neural network principles for control applications and supervised control, direct inverse control, neural adaptive control, backpropagation trout time (BTT), adaptive critics, sensorimotor principles. Topics include applications to adaptive control and system identification, neural networks for motion control and path planning in robotics, neural network process control, aerospace control problems and neural network autopilot, neural network control of aircraft flare and touchdown, and neural network control of autonomous vehicles.

Equivalent to IT 844

Prerequisite(s): ECE 549 and 620.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ECE 750 - Intelligent Systems for Robots

Credits: 3 (NR)
Reviews recent developments in intelligent autonomous systems. Studies applications of artificial intelligence, control theory, operations research, decision sciences, computer vision, and machine learning to robotics as well as correspondences between various fields. Topics include analysis and design of methods, algorithms and architecture for planning, navigation, sensory data understanding, visual inspection, spatial reasoning, motion control, learning, self-organization, and adaptation to environment.

Equivalent to CS 685/SYST 672/IT 840

Prerequisite(s): SYST 611, ECE 650, or CS 580; or SYST 555 or equivalent.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ECE 751 - Information Theory

Credits: 3 (NR)
Discusses complex cryptographic algorithms and their implementations in software and hardware. Provides mathematical background necessary to understand, implement, and break modern cryptoalgorithms. Covers implementations of cryptosystems using smart cards, network processors, and other platforms. Discusses side channel attacks against implementations of cryptography, including timing attacks, power analysis, fault analysis, cache attacks, etc. Introduces advanced topics, such as random and pseudorandom number generators, secret sharing, zero-knowledge, and quantum cryptography. Requires a semester-long project devoted to implementation of selected algorithms or protocols in software or hardware, and/or comparative analysis of various algorithms, protocols, or implementations.

Prerequisite(s): ECE 646 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
Credits: 3 (NR)
Introduces information theory, which is mathematical theory of communication systems. Topics include measures of information such as entropy, relative entropy, and mutual information; Shannon-McMillan-Breiman theorem and applications to data compression; entropy rate and source coding theorem; Huffman, arithmetic and Lempel-Ziv codes; method of types, channel capacity, and channel-coding theorem; joint source-channel coding theorem; differential entropy; Gaussian channel; rate distortion theory; and vector quantization.

Equivalent to IT 886

Prerequisite(s): ECE 528 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ECE 752 - Spectral Estimation

Credits: 3 (NR)
In-depth study of spectral analysis and application to statistical signal processing. Topics include classical Fourier analysis of deterministic signals and Wiener theory of spectral analysis for random processes; spectral estimation using Periodogram and window approaches; maximum entropy spectral estimation and relation to autoregression modeling; signal subspace approaches for frequency estimation; and wavelet transform and elation to short-time Fourier transform.

Equivalent to IT 885

Prerequisite(s): ECE 528 or STAT 652, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ECE 753 - Distributed Estimation and Multisensor Tracking and Fusion

Credits: 3 (NR)
Centralized and distributed estimation theory, hierarchical estimation, tracking and data association, multisensor multitarget tracking and fusion, distributed tracking in distributed sensor networks, track-to-track association and fusion, and Bayesian networks for fusion.

Prerequisite(s): ECE 734 or SYST 611.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ECE 754 - Optimum Array Processing I

Credits: 3 (NR)
Prerequisite(s): ECE 528 and ECE 535.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ECE 755 - Optimum Array Processing II

Credits: 3 (NR)
Adaptive beamformers, SMI and RLS estimators, spatial smoothing and FB averaging, QR decomposition, LMS algorithm, optimum detection and parameter estimation, UML and CML estimation, Cramer-Rao bounds, IQML, weighted subspace fitting, subspace algorithms such as MUSIC and ESPRIT, root versions, beam-space algorithms, sensitivity, robustness, and calibration.

Prerequisite(s): IT 837.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ECE 760 - Advances in Multi-Modeling

Credits: 3 (NR)
Focuses on the inter-operation of multiple models expressed in different modeling languages but which draw from the same data set: i.e., multi-modeling. Socio-technical systems often require a variety of modeling tools to define their operation accurately. An ontology based approach is used to analyze the validity of a proposed modeling architecture and workflow to address a specific issue.

Equivalent to SYST 740.

Prerequisite(s): ECE 673 or SYST 620 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring.

ECE 780 - High-Frequency Electronics

Credits: 3 (NR)
Studies devices and circuits in high-speed communications systems. Topics include microwave bipolar transistors and high-speed integrated circuits, and designing linear and power amplifiers using Sparameter techniques and computer simulation.

Equivalent to IT 845

Prerequisite(s): ECE 563 and 684, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
ECE 798 - Research Project

Credits: 1-3 (RD)
Research project under the guidance of a faculty member, resulting in an acceptable technical report. No more than a combined total of 3 credits may be taken towards satisfying the master’s degree, although students may register for more credits. No more than a combined total of 3 credits may be taken of ECE 698 and ECE 798 towards satisfying the master’s degree, although students may register for more credits. Students may not count both ECE 799 and ECE 798 for master’s credit.

Prerequisite(s): 9 graduate credits and permission of instructor.

Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 0
Grading: Graduate Special

ECE 799 - Master's Thesis

Credits: 1-6 (RD)
Research project chosen and completed under guidance of graduate faculty member that results in technical report and oral defense acceptable to thesis committee of three faculty members.

Prerequisite(s): 9 graduate credits, and permission of instructor.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0
Grading: Satisfactory/No Credit

ECE 836 - Special Topics in Statistical Signal Processing

Credits: 3 (RD)
Advanced topics in statistical signal processing in areas of current research interest. Topics may include detection, estimation, information theory, array processing, and underwater acoustics.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

ECE 899 - Research Topics in ECE

Credits: 3 (RD)
Studies advanced research areas in Electrical and Computer Engineering within a course format. Students will develop specialized research skills, which will also involve the presentation of their own work, developed individually and within groups. This course may be repeated for credit if the research areas differ.

Prerequisite(s): Completion of at least one 600 or 700 level course in the Research Topic area; and permission of instructor.
Notes: This will be an irregularly scheduled course intended for advanced master’s students who want to pursue a specific topic to more depth than a typical course offers at the master’s level. It will prepare students to undertake their individual research topics when they move on to pursue a Ph.D. program, or enter a research environment in their chosen professional careers.

Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0  
When Offered: Fall, Spring

ECE 998 - Doctoral Dissertation Proposal

Credits: 1-12 (RD)  
Work on research proposal that forms basis for doctoral dissertation.

Notes: May be repeated. No more than 24 credits of ECE 998 and 999 may be applied to doctoral degree requirements.

Hours of Lecture or Seminar per week: 0  
Hours of Lab or Studio per week: 0  
Grading: Satisfactory/No credit only

ECE 999 - Doctoral Dissertation

Credits: 1-12 (RD)  
Formal record of commitment to doctoral dissertation research under direction of ECE faculty member.

Prerequisite(s): Admission to candidacy.

Notes: May be repeated as needed. Students must complete minimum 12 credits of doctoral proposal (ECE 998) and doctoral dissertation research (ECE 999) Maximum of 24 credits of ECE 998 and 999 may be applied to degree. Students who choose to take less than 24 credits of ECE 998 and 999 may earn remaining credits from approved course work. Students cannot enroll in ECE 999 before research proposal accepted and approved by dissertation committee.

Hours of Lecture or Seminar per week: 0  
Hours of Lab or Studio per week: 1-12  
Grading: Satisfactory/No credit only

Elementary/Secondary Education (EDCI)

Offered by the College of Education and Human Development

EDCI 370 - Young Adult Literature in Multicultural Settings

Credits: 3 (NR)  
Examines literary works written for and about young adults, introduces critical issues surrounding teaching of young adult literature in multiculturally diverse schools, and requires reading and review of young adult literature.
Notes: Significant online work is required.

EDCI 372 - Teaching Mathematics in the Secondary School

Credits: 3 (NR)
Covers curricula, current issues, and research literature in secondary school mathematics. Emphasis is on developing different styles of teaching. Field experience is required for those seeking initial teacher licensure.

Corequisite(s): EDUC 422

EDCI 469 - Teaching English in Secondary School

Credits: 3 (NR)
Provides study of advanced methods, materials, content, and organization of English programs in secondary school.

Prerequisite(s): EDUC 422

Corequisite(s): EDUC 422

EDCI 472 - Advanced Methods for Teaching Mathematics in the Secondary School

Credits: 3 (NR)
Focuses on learning processes for mathematics. Introduces national and state standards regarding content and methodologies for teaching mathematics. Examines instructional methods and materials in relation to secondary mathematical content, curriculum, and assessment.

Prerequisite(s): EDCI 372, EDUC 422.

EDCI 473 - Teaching Science in the Secondary School
EDCI 479 - Advanced Methods of Teaching English in the Secondary School

Credits: 3 (NR)
Guides students in working effectively with national and local standards for teaching secondary English. Continuation course in methods from EDCI 469.

Prerequisite(s): EDCI 469.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDCI 483 - Advanced Methods of Teaching Science in Secondary School

Credits: 3 (NR)
Provides advanced study of teaching and curriculum development based on research and current issues. Emphasizes integrating science and technology, adapting instruction to needs of diverse learners, and promoting safety.

Prerequisite(s): EDCI 473.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDCI 490 - Student Teaching in Education

Credits: 6 (NR)
Provides intensive, supervised clinical experience in approved school for fall or spring semester.

Fulfills general education requirement in synthesis.

Prerequisite(s): Completion of licensure and all endorsement course work

Hours of Lecture or Seminar per week: 6
Hours of Lab or Studio per week: 0
Grading: Undergraduate Special
EDCI 510 - Linguistics for PreK-12 ESOL Teachers
Credits: 3 (NR)
Examines language as a system, with particular focus on teaching English as a second language (ESOL) to students in public schools, grades PreK-12. Considers teaching implications of phonology, morphology, syntax, semantics, and pragmatics.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDCI 511 - Developing Curriculum and Designing Instruction in Early Childhood Education
Credits: 3 (NR)
Covers procedures, materials, and organization of environments for young children.

Notes: Field experiences required for students without previous teaching or administrative experience in early childhood settings.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDCI 516 - Bilingualism and Language Acquisition Research
Credits: 3 (NR)
Examines research in first and second language acquisition, including interaction of bilingual person's two languages, with applications for classroom.

Corequisite(s): EDCI 560

Notes: School-based field experience required.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
Grading: Graduate Special

EDCI 519 - Methods of Teaching Multilingual Students
Credits: 3 (NR)
Examines approaches, methods, and techniques for teaching English as second language (ESL) in bilingual and ESL classrooms, as well as resources available in field. Participants critically analyze and demonstrate teaching approaches based on second language acquisition research, including teaching language through content.

Prerequisite(s): EDCI 516.

Notes: Field experience in public schools required.

Hours of Lecture or Seminar per week: 3
EDCI 520 - Assessment of Language Learners

Credits: 3 (NR)
Examines innovative approaches to assessing language minority students and English language learners. Topics include identification, placement, monitoring of student progress, development of authentic performance-based measures, design of portfolios, application of measurement concepts, analysis of assessment instruments, and linking assessment to instruction.

Prerequisite(s): EDCI 516 and 519.

EDCI 521 - Curriculum Development for Language Learners

Credits: 3 (NR)
Examines current approaches to curriculum development for second language learners and language minority students. Participants review, evaluate, and develop curricular materials, with emphasis on learner-centered activities, cooperative learning, interdisciplinary and thematic approaches, authentic and problem-based learning, integration of language and content, and linking assessment and instruction.

Prerequisite(s): EDCI 516 and 519.

EDCI 544 - Curriculum and Methods of Teaching in Elementary Education

Credits: 3 (NR)
Introduction to general methods of teaching in elementary schools focusing on planning, teaching strategies, management, assessment, and differentiation.

Prerequisite(s): Admission into elementary education graduate program; must be taken in programmatic sequence.

EDCI 545 - Assessment and Differentiation
Provides a research-based introduction to differentiated instruction for children in grades PK-6. Emphasis on the assessment of learners and differentiation of instruction to meet the needs of all learners.

**Prerequisite(s):** Admission into elementary education graduate program; must be taken in programmatic sequence.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**EDCI 546 - Integrating Technology in Elementary Classrooms: Literacy**

Credits: 1 (NR)  
Studies the development and integration of technology in the elementary education literacy curriculum.

**Prerequisite(s):** Admission into elementary education graduate program.

**Corequisite(s):** EDCI 556.

**Hours of Lecture or Seminar per week:** 1  
**Hours of Lab or Studio per week:** 0

**EDCI 547 - Integrating Technology in Elementary Classrooms: Mathematics**

Credits: 1 (NR)  
Studies the development and integration of technology in the elementary education mathematics curriculum.

**Prerequisite(s):** Admission into elementary education graduate program.

**Corequisite(s):** EDCI 552.

**Hours of Lecture or Seminar per week:** 1  
**Hours of Lab or Studio per week:** 0

**EDCI 548 - Integrating Technology in Elementary Classrooms: Social Studies and Fine Arts**

Credits: 1 (NR)  
Studies the development and integration in the elementary education social studies and fine arts curriculum.

**Prerequisite(s):** Admission into elementary education graduate program.

**Corequisite(s):** EDCI 554.

**Hours of Lecture or Seminar per week:** 1  
**Hours of Lab or Studio per week:** 0
EDCI 549 - Foreign Language Immersion in the Elementary School

Credits: 3 (NR)
Covers theories and methods of teaching foreign language through elementary school curriculum; and curriculum development, assessment, and community relations in foreign language immersion classes.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDCI 552 - Mathematics Methods for the Elementary Classroom

Credits: 1-3 (RD)
Introduces methods for teaching all children topics in arithmetic, geometry, algebra, probability, and statistics in elementary grades. Focuses on using manipulatives and technologies to explore mathematics and solve problems.

Prerequisite(s): Admission to elementary education licensure program.

Notes: Requires field experience in public schools.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0
Grading: Graduate Special

EDCI 553 - Science Methods for the Elementary Classroom

Credits: 1-3 (RD)
Develops skills and abilities in science teaching methods, applications of technology, safety practices, and creation of integrated science curricula. Examines science teaching based on contemporary theory, practice, and standards.

Prerequisite(s): Admission to elementary education licensure program.

Notes: Requires field experience in public schools.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0
Grading: Graduate Special

EDCI 554 - Methods of Teaching Social Studies and Integrating Fine Arts in the Elementary Classroom

Credits: 3 (RD)
Focuses on the design and delivery of standards-based integrated curriculum centered on the social sciences. Includes integration of fine arts and examines the central role of the arts in learning.

Prerequisite(s): Admission into elementary education graduate program; must be taken in programmatic sequence.
Notes: Field experience is required.

**EDCI 555 - Literacy Teaching and Learning in Diverse Elementary Classrooms I**

Credits: 3 (NR)
Provides research-based introduction to literacy teaching and learning for younger children. Emphasizes language development; reading and writing processes; emergent literacy; culture, families, and literacy; and literacy integration in the curriculum.

Prerequisite(s): Admission to elementary education licensure program

Notes: School-based field experience required.

**EDCI 556 - Literacy Teaching and Learning in Diverse Elementary Classrooms II**

Credits: 1-3 (RD)
Provides research-based introduction to literacy teaching and learning for older children. Emphasizes literacy and language processes and development; connections among cultures, families, and literacy; and literacy integration in curriculum.

Prerequisite(s): Admission to elementary education licensure program

Notes: School-based field experience required.

**EDCI 557 - Integrating Technology in the Elementary Curriculum**

Credits: 3 (NR)
Examines development and implementation of curriculum and instruction in elementary classroom. Emphasizes integrating technology in curriculum, and inclusion of special needs and culturally diverse students.

Prerequisite(s): Admission to elementary education licensure program

Notes: School-based field experience required.
EDCI 558 - Integrating Fine Arts and Movement in Elementary Education

Credits: 3 (NR)
Includes art, drama, music, and movement. Examines central role of arts in children's learning. Focuses on integration and interdisciplinary learning experiences. Includes developmental theory, addressing diverse learners through multiple intelligences, and movement for physical health.

Prerequisite(s): Admission to PDS or Partnership Elementary Licensure Program.

Notes: School-based field experience required.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDCI 559 - Research and Assessment in Elementary Education

Credits: 3 (NR)
Provides teacher candidates an understanding of research paradigms utilizing systematic evidence to improve practice and further skills in assessment of learning outcomes. Emphasizes linking research and practice, making instructional decisions based on systematically collected data.

Prerequisite(s): Admission into elementary education graduate program; capstone course for degree must be taken last in programmatic sequence.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDCI 560 - Methods of Teaching in Foreign/World Languages

Credits: 3 (NR)
Covers approaches, theories, and methods of teaching foreign and second languages, with practical application to classroom. Students demonstrate teaching strategies, develop lesson and unit-planning skills, and evaluate curricula and materials.

Corequisite(s): EDCI 516

Notes: Requires field experience in schools.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDCI 567 - Teaching Social Studies in the Secondary School

Credits: 3 (NR)
Advanced course in methods, materials, content, and organization of social studies programs in secondary schools.

Prerequisite(s): EDUC 522 and 15 hours school-based field experience
Corequisite(s): EDUC 522 and 15 hours school-based field experience

Notes: Requires field experience for those seeking initial teacher licensure.

EDCI 569 - Teaching English in the Secondary School

Credits: 3 (NR)
Provides study of advanced methods, materials, content, and organization of English programs in secondary school.

Prerequisite(s): EDUC 522.

Corequisite(s): EDUC 522.

Notes: 15 hours school-based field experience required.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDCI 570 - Teaching Young Adult Literacy in a Multicultural Setting

Credits: 3 (NR)
Examines literary works written for and about young adults. Introduces critical issues surrounding teaching young adult literature in multicultural public schools and requires reading and reviewing young adult literature from several genres.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDCI 572 - Teaching Mathematics in the Secondary School

Credits: 3 (NR)
Emphasizes developing different styles of teaching.

Prerequisite(s): EDUC 522.

Corequisite(s): EDUC 522.

Notes: 15 hours school-based field experience required.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
EDCI 573 - Teaching Science in the Secondary School

Credits: 3 (NR)

Provides study of methods, materials, content, and organization of science programs. Emphasizes curriculum planning, current methodologies, safety, and trends in secondary schools. Designated a Green Leaf Course.

Prerequisite(s): EDUC 522.

Corequisite(s): EDUC 522.

Notes: 15 hours school-based field experience required.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDCI 577 - Curriculum and Methods of Teaching, PK-12

Credits: 3 (RD)

Blends theory and practice by providing instruction in curriculum and planning, theoretical concepts, application of research, models of learning and teaching, and practical experiences. Examines educational standards, assessment, and classroom management in PK-12 schools.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDCI 597 - Special Topics in Education

Credits: 1-6 (RD)

Provides advanced study on selected topic or emerging issue in American or international education.

Prerequisite(s): Admission to program in GSE.

Notes: May be repeated for credit with GSE permission.

Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 0
Grading: Graduate Special

EDCI 600 - Workshop in Education

Credits: 1-6 (NR)

Offers full-time workshops and weekend seminars on selected topics in education and education tour seminars.

Notes: May be repeated for credit.
EDCI 601 - Applied Study of Communicative Competence and Classroom Discourse

Credits: 3 (NR)
Analyzes young children's language development and design of individual and group language experiences.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDCI 602 - Technology Applications in Early Childhood Education

Credits: 3 (NR)
Examines criteria and methods for integrating technology into all areas of early childhood curriculum. Emphasizes use of instructional technology to facilitate cognitive and social growth.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDCI 603 - Trends, Issues, and Research in Early Childhood Education

Credits: 3 (NR)
Examines trends, issues, research findings, and resulting program development.

Prerequisite(s): Admission to GSED.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDCI 613 - Curriculum and Assessment in Early Childhood Education I

Credits: 3 (NR)
First of two-course sequence addressing current thinking about curriculum and assessment in programs for preschool through third grade. Gives overview of effective ways to plan and implement integrated curriculum; special focus on content, subject matter.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDCI 614 - Curriculum and Assessment in Early Childhood Education II
Credits: 3 (NR)
Second of two-course sequence focusing on planning and assessing children's knowledge of content and subject matter.
Emphasizes action research.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDCI 615 - Advanced Human Development

Credits: 3 (NR)
Advanced course in development and learning across lifespan. Critically reviews contemporary research and theories of human
development and learning, and relevance to educational practice and family contexts as they relate to children under eight.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDCI 616 - The Creative Arts and Play in Early Childhood Education

Credits: 3 (NR)
Advanced course using creative arts and play as central approaches to teaching and learning. Focuses on an integrated approach
to what arts-based curriculum looks like and how it functions.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDCI 617 - Using Digital and Popular-Culture Media with Grades 4-12

Credits: 3 (NR)
Exposes students to recent knowledge on how middle and high school teachers can use digital media and popular culture texts to
engage students in subject area learning or literacy development. Focus is on grades 4-12.

Prerequisite(s): Admission to a GSE licensure, Master's, or doctoral program and at least one year of PK-12 teaching
experience, completion of EDCI 569, EDCI 567, EDCI 572, EDCI 573, or EDCI 544, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Summer

EDCI 621 - Introduction to Gifted and Talented Learners

Credits: 3 (NR)
Examines nature and needs of gifted and talented learners. Participants become knowledgeable about characteristics of gifted and
talented students, and examine role of culture in manifestation of gifts and talents as well as gifted behaviors in special
populations.
EDCI 622 - Curriculum Differentiation for Diverse Learners

Credits: 3 (NR)
Develops personal and professional rationale for differentiating instruction in mixed-ability classrooms, as well as skills and knowledge of strategies to utilize pre-assessment data and plan for and implement differentiated instruction.

EDCI 623 - Models and Strategies for Teaching Gifted Learners

Credits: 3 (NR)
Provides framework to examine and apply curriculum models and instructional strategies advocated for use with gifted students according to national and state standards that reflect best practices in gifted education.

EDCI 624 - Assessment, Identification, and Evaluation of Gifted Learners

Credits: 3 (NR)
Examines broad understandings of intelligence and assessment. Provides techniques to identify gifted students. Develops specific understandings of assessment techniques and awareness of the influences of language, culture, ethnicity, gender, and exceptionality on recognition and subsequent identification of giftedness.

EDCI 625 - Contemporary Issues and Trends in Gifted Education

Credits: 3 (NR)
Focuses on research, trends, issues, legislation, and litigation concerning gifted and talented children. Provides professionals in gifted education and related fields with knowledge and skills to serve as advocates for gifted-child education.

Prerequisite(s): EDCI 621, 622, 623, 624.
EDCI 626 - Action Research in Gifted Education

Credits: 3 (NR)
Opportunity to identify and investigate school-based problem and apply inquiry, writing, and research skills to relevant issue or concern in gifted education.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDCI 627 - Advanced Practicum in Gifted Education

Credits: 3 (NR)
Intensive supervised clinical experiences for one semester in accredited elementary or secondary school. Students supervised in setting that includes scheduled observations and seminar experiences.

Prerequisite(s): EDCI 621, 622, 623, 624.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
Grading: Graduate Special

EDCI 631 - Research in Elementary Education

Credits: 3 (NR)
Helps beginning teachers understand various research paradigms to use research literature and systemic evidence to improve practice. Emphasizes linking research and practice, and making data-based instructional decisions.

Prerequisite(s): Completion of elementary education (PK-6) licensure.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDCI 632 - Advanced Social Studies Methods for the Elementary Classroom

Credits: 3 (NR)
Provides advanced study of teaching social studies in elementary education. Uses inquiry, research, and reflection to improve teaching. Emphasizes design and delivery of integrated social studies curriculum centered on knowledge, skills, and dispositions from history, geography, civics and economics, arts and humanities, and multicultural education. Covers student assessment and using student data in instructional decision-making and improvement.

Prerequisite(s): Completion of elementary education (PK-6) licensure, and EDCI 631.

Notes: Requires extensive field experience in public schools.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
EDCI 633 - Advanced Mathematics Methods for the Elementary Classroom

Credits: 3 (NR)
Focuses on teaching all children, including those from nonmainstreamed populations. Emphasizes teaching problem-solving and higher-order thinking skills promoted by National Council of Teachers of Mathematics and Virginia Mathematics Standards of Learning. Uses techniques and materials to develop specific problem-solving strategies in hands-on, activity, and workshop-oriented experience. Explores teaching of problem-solving, reasoning, communications, and connections in PK-6 mathematics by working with manipulatives and technologies.

Prerequisite(s): Completion of elementary education (PK-6) licensure, and EDCI 631.

Notes: Requires field experience in public schools.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDCI 634 - Advanced Science Methods for the Elementary Classroom

Credits: 3 (NR)
Emphasizes inquiry and extensions of theoretical understanding of how children learn. Develops expertise in teaching and assessment, and incorporates technology, safety, and issues of culture and gender into day-to-day teaching activities.

Prerequisite(s): Completion of elementary education (PK-6) licensure, and EDCI 631.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDCI 635 - Applied Research in Elementary Education

Credits: 3 (NR)
Helps beginning teachers plan and complete action research project related to teaching assignment. Students apply research methods explored during prerequisite series of courses.

Prerequisite(s): Completion of elementary education (PK-6) licensure; and EDCI 631, 632, 633, and 634.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDCI 644 - Mathematics Learning and Assessment (K-8)

Credits: 3 (NR)
Introduces students to learning theories and associated assessment practices specific to mathematics education. Intended for mathematics specialists and teachers interested in problems of learning and assessment across K-8 settings in mathematics education.
**Prerequisite(s):** Admission to the MEd in Education Leadership Mathematics Education Leadership concentration

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**EDCI 645 - Curriculum Development in Mathematics Education**

Credits: 3 (NR)  
Analysis, design, and evaluation of school mathematics curricula.

**Prerequisite(s):** Admission to mathematics education leadership master's degree program, or permission of instructor.

**Notes:** Yearlong seminar for master's-level students in mathematics education leadership cohort program.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**Grading:** Graduate Special

---

**EDCI 646 - Mathematics Education Leadership for School Change**

Credits: 1-3 (NR)  
Surveys current literature and large-scale studies in mathematics education. Engages students in research, study, and discussion of factors that affect teaching and learning of mathematics in school settings.

**Prerequisite(s):** Admission to mathematics education leadership master's degree program, or permission of instructor.

**Notes:** Yearlong seminar for master's-level students in mathematics education leadership cohort program.

**Hours of Lecture or Seminar per week:** 1-3  
**Hours of Lab or Studio per week:** 0  
**Grading:** Graduate Special

---

**EDCI 663 - Research in Science Teaching**

Credits: 3 (NR)  
Investigates the research and methodology involved in teaching and learning biological, chemical, physical, and earth sciences from K-12.

**Prerequisite(s):** Course in teaching science in elementary or secondary school, or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**Grading:** Graduate Special
EDCI 666 - Research in Mathematics Teaching

Credits: 3 (NR)
Explores curricula, current issues, and research literature in elementary school mathematics. Emphasizes development of different styles of teaching.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDCI 667 - Advanced Methods of Teaching Social Sciences in the Secondary School

Credits: 3 (NR)
Emphasizes interdisciplinary curriculum and instruction, implementing national state standards, authentic assessment, and adaptations for diverse populations.

Prerequisite(s): EDCI 567 and EDUC 522. 15 hours school-based field experience required.

Notes: School-based field experience required.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDCI 669 - Advanced Methods of Teaching English in the Secondary School

Credits: 3 (NR)
Continuation course in methods (See EDCI 569). Guides students in working effectively with national and local standards for teaching secondary English.

Prerequisite(s): EDCI 569 and EDUC 522. 15 hours school-based field experience required.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDCI 670 - Advanced Methods in Science Teaching

Credits: 3 (NR)
Application of major principles of education and psychology for the improvements of science teaching in secondary schools.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDCI 671 - Innovations in Science Teaching
Credits: 3 (NR)
Focuses on the development and selection of teaching materials that reflect concepts of technology innovation with an emphasis on middle and secondary school science.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDCI 672 - Advanced Methods of Teaching Mathematics in the Secondary School

Credits: 3 (NR)
Focuses on learning processes for mathematics. Introduces national and state standards regarding content and methodologies for teaching mathematics. Examines instructional methods and materials in relation to secondary mathematical content, curriculum, and assessment.

Prerequisite(s): EDCI 572, EDUC 522. 15 hours school-based field experience required.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDCI 673 - Advanced Methods of Teaching Science in the Secondary School

Credits: 3 (NR)
Provides advanced study of teaching and curriculum development based on research and current issues. Emphasizes integrating science and technology, and adapting instruction to the needs of diverse learners.

Prerequisite(s): EDCI 573 and EDUC 522. 15 hours school-based field experience required.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDCI 677 - Advanced Curriculum and Methods of Teaching, Secondary

Credits: 3 (NR)
Includes application of skills in discipline-specific methodology, communication, classroom management, and evaluation of student performance appropriate to elementary level.

Prerequisite(s): EDCI 577.

Notes: Extends principles of teaching and learning introduced in EDCI 577.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDCI 678 - Advanced Curriculum and Methods of Teaching, Elementary
Includes application of skills in discipline-specific methodology, communication, classroom management, and evaluation of student performance appropriate to elementary level.

**Prerequisite(s): EDCI 577**

**Notes:** Extends principles of teaching and learning introduced in EDUC 577.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**EDCI 683 - Curriculum Development and Evaluation in Science Education**

Credits: 3 (NR)  
Advanced course in science curriculum design and development. Emphasizes instructional materials and assessment.

**Prerequisite(s): EDCI 663, or permission of instructor.**

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**Grading:** Graduate Special

---

**EDCI 684 - Advanced Methods of Teaching Foreign/Second Languages in PK-12 Schools**

Credits: 3 (NR)  
Blends theoretical knowledge and practical application. Provides advanced study of second language pedagogy and teaching trends. Topics include multiple learning styles, alternative forms and assessment, and teaching diverse populations.

**Prerequisite(s): EDCI 560 or permission of instructor. Field experience in public schools will be required during course.**

**Notes:** Requires field experience.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**EDCI 693 - Leadership and Organizational Issues in Science Education**

Credits: 3 (NR)  
Advanced course in current issues for leadership in science education. Emphasizes technology, safety, professional development, and related organizational change issues.

**Prerequisite(s): EDCI 663 and 683, or permission of instructor.**

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**Grading:** Graduate Special
EDCI 702 - Internship in Mathematics Education

Credits: 3 (NR)
Offers practical experiences and professional challenges for mathematics leaders in authentic educational settings. Activities emphasize school-based and classroom based research and leadership. Develops the skills and abilities of the mathematics leaders to analyze classroom practice, investigate teaching and disseminate information about mathematics education in professional development settings for teachers.

Prerequisite(s): Internship Math Education

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

EDCI 705 - Instructional Design

Credits: 3 (NR)
Helps students analyze, apply, and evaluate principles of instructional design to develop education and training materials spanning a wide range of knowledge domains and instructional technologies. Focuses on variety of instructional design models, with emphasis on recent contributions from cognitive science and related fields.

Equivalent to EDIT 705

Prerequisite(s): Teaching experience.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDCI 710 - Technology and the Culture of Schools

Credits: 3 (RD)
Explores relationship of human inventions and social, political, cultural, and epistemological constructions. Examines history of technology, relationship of technology and human behavior, and theories of social change and technology. Focuses on how technological and social changes influence and shape goals and outcomes of K-12 educational process. Considers links between technology and educational reform, how technology is associated with educational reform movement, and ways educators can take leadership roles in facilitating intersection of educational reform and technology.

Corequisite(s): EDIT 711.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDCI 712 - Technology and Learning
Explores ways of knowing and theories of learning as reflected in and influenced by technology. Analyzes, applies, and evaluates current theories such as constructivism, multiple intelligences, role of symbolization in human cognition, development of problem-solving and critical thinking strategies, and learning conditions. Covers relationship of technological forms and nature and structure of human cognition, especially as it influences K-12 educational practice. Explores technology and nature of individual learner attributes, learners in context, special-needs learners, access, equity, and values.

Corequisite(s): EDIT 713.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDCI 714 - Methods of Integration

Includes examples of curriculum design strategies, readings, discussions, and design of lessons or units appropriate to various contents. First course in sequence focuses on disciplinary standards, role of technology applications to support standards, and strategies for curriculum design such as learning cycle, thematic design, interdisciplinary and transdisciplinary approaches, and writing across the curriculum.

Corequisite(s): EDIT 715. Considers curriculum design strategies that facilitate technology integration.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDCI 716 - Principles of Technology Leadership

Focuses on the relationship of leadership, change, and technology advocacy with emphasis on leadership roles for technology educators.

Corequisite(s): EDIT 719

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDCI 725 - National and International Leadership Issues in Mathematics Education

Students study research on mathematics teaching and learning, including current issues and trends in mathematics education leadership at national and international levels.

Prerequisite(s): Admission to mathematics education leadership PhD program.

Notes: Yearlong seminar for PhD students in the mathematics education leadership cohort program.

Hours of Lecture or Seminar per week: 3
EDCI 726 - State and Local Leadership Issues in Mathematics Education

Credits: 3 (NR)
Students study issues and policies that affect mathematics teaching and learning, including current trends in mathematics school reform at state, district, and individual school levels.

Prerequisite(s): Admission to mathematics education leadership PhD program.

Notes: Yearlong seminar for PhD students in the mathematics education leadership cohort program.

EDCI 777 - Research to Practice

Credits: 3 (NR)
Provides culminating experience that synthesizes and applies essential elements of second language teaching and learning. Emphasizes teacher as change agent through critical inquiry into practice. Promotes collaboration between ESL and grade-level teachers to advance achievement of English language learners and language minority students.

Prerequisite(s): All other program courses except EDRS 590 and elective, or permission of instructor.

EDCI 784 - Capstone Seminar in Early Childhood Education

Credits: 3 (NR)
Culminating seminar devoted to analyzing and synthesizing knowledge and skills gained through graduate course work as it applies to early childhood education.

EDCI 790 - Internship in Education

Credits: 1-6 (RD)
Intensive, supervised clinical experience for full semester in accredited school. Students must register for appropriate section.
Prerequisite(s): EDUC 522, EDUC 672, two methods classes in content area; passing Praxis II and VCLA, completing all endorsements.

Corequisite(s): EDCI 791 only for students enrolled in Curriculum and Instruction M.Ed, Concentration in Secondary Education.

Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 0
Grading: Satisfactory/No Credit

EDCI 791 - Internship Seminar in Secondary Teaching

Credits: 2 (NR)
Evaluates the effects of teacher actions on others (students, parents, and other professionals in the learning community) and provides opportunities for professional growth.

Corequisite(s): EDCI 790.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 0
When Offered: Fall, Summer

EDCI 795 - Science Education Research

Credits: 3 (NR)
Explores science education research, theory, and practice, including sources and methods of study. Students review and report on research literature and teaching practices on topics of interest.

Prerequisite(s): EDCI 891.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
Grading: Graduate Special

EDCI 796 - Science Education Curriculum

Credits: 3 (NR)
Explores science education curriculum from preschool through high school, including identifying and evaluating curriculum materials and resources. Emphasizes research-based exemplary materials and use of technology.

Prerequisite(s): EDCI 891.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
Grading: Graduate Special
EDCI 797 - Advanced Topics in Education

Credits: 1-6 (NR)
Advanced study of selected topics in education for students preparing for doctoral studies or who have been admitted to the PhD program in education.

Notes: May be repeated for credit with CEHD approval.

Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 0
Grading: Graduate Special

EDCI 810 - Foundations of Science Education Research

Credits: 3 (NR)
Explores and analyzes the range of research designs currently utilized by science education researchers. Develops an understanding of the assumptions and frameworks of different types of science education inquiry through an examination of ways of knowing. Examines historical trends that have taken place in science education.

Prerequisite(s): Admission to Ph.D. in Education Science Education Research Concentration.

Corequisite(s): EDUC 800.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall.

EDCI 811 - Current Trends in Science Education Research

Credits: 3 (NR)
Provides an in-depth examination and analysis of literature and research in science education. Examines theoretical foundations of research studies in science education, discusses methodologies of research, critique research, and examines trends in emerging science education research. Includes presentations by science education researchers as well as opportunities for graduate students to explore research ideas with colleagues within the class.

Prerequisite(s): EDCI 810.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring.

EDCI 813 - Focused Science Education Research

Credits: 3 (NR)
Provides an opportunity for students to gain hands-on experience designing and conducting a research study in science education that leads to publication and/or conference presentations. The scholarship embodied in student development to this point in the
The doctoral program will lead students to work with a science education faculty member of their choice to develop and seek to answer a research question of interest.

**Prerequisite(s):** EDRS 810, EDRS 811, EDRS 827.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall, Summer, Spring.

---

**EDCI 855 - Mathematics Education Research on Teaching and Learning**

Credits: 3 (NR)  
Students survey most current research literature in mathematics education and engage in research, study, and discussion of mathematics education research on teaching and learning in school settings.

**Prerequisite(s):** Admission to mathematics education leadership PhD program.

**Notes:** Yearlong seminar for PhD students in the mathematics education leadership cohort program.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**Grading:** Graduate Special

---

**EDCI 856 - Mathematics Education Curriculum Design and Evaluation**

Credits: 3 (NR)  
Students engage in research, analysis, design, and evaluate school mathematics curricula.

**Prerequisite(s):** Admission to mathematics education leadership PhD program.

**Notes:** Yearlong seminar for PhD students in the mathematics education leadership cohort program.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**Grading:** Graduate Special

---

**EDCI 857 - Preparation and Professional Development of Mathematics Teachers**

Credits: 3 (NR)  
Students study attributes of effective professional development in mathematics education, develop expertise in designing and teaching mathematics methods courses, and learn to create and teach professional development experiences for practicing teachers.

**Prerequisite(s):** Admission to mathematics education leadership PhD program.

**Notes:** Yearlong seminar for PhD students in the mathematics education leadership cohort program.
**EDCI 858 - Mathematics Education Research Design and Evaluation**

Credits: 3 (NR)
Students review methods of research appropriate for mathematics education settings and develop theoretical framework and action plan for conducting research project.

**Prerequisite(s):** Admission to mathematics education leadership PhD program.

**Notes:** Yearlong seminar for PhD students in the mathematics education leadership cohort program.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**Grading:** Graduate Special

**EDCI 891 - Science Teaching and Learning**

Credits: 3 (NR)
Explores research, theory, and practice for effective science teaching and learning. Focuses on science education standards at local, state, national, and international levels. Students review common core of research literature and topics of individual interest.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**Grading:** Graduate Special

**EDCI 892 - Science Education History and Research**

Credits: 3 (NR)
Explores history of science education research, theory, and practice, including research on general teaching strategies in science instruction. Reviews common historical core of research literature; students conduct exploratory research of individual interest.

**Prerequisite(s):** EDCI 891.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**Grading:** Graduate Special

**EDCI 893 - Science Education Staff Development**
Credits: 3 (NR)
Explores staff development in science education with emphasis on planning and conducting professional development on key topics in science teaching and learning. Reviews common core of research literature; students conduct research of individual interest.

Prerequisite(s): EDCI 891.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
Grading: Graduate Special

EDCI 894 - Science Education Leadership and Policy

Credits: 3 (NR)
Focuses on leadership and policy issues at local, state, and national levels that affect science education. Emphasizes understanding decision-making structure and process; current issues; and trends. Students participate in leadership and policy events.

Prerequisite(s): EDCI 891.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
Grading: Graduate Special

EDCI 895 - Emerging Issues in Curriculum and Instruction

Credits: 3 (NR)
Covers issues in curriculum and instruction through individual and group research, discussion, writing, and presentations by experts. Students conduct critical analysis of specific field.

Prerequisite(s): Admission to PhD program, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
Grading: Graduate Special

Engineering (ENGR)

Offered by the Volgenau School of Engineering.

Students may attempt an undergraduate course taught by the Volgenau School of Engineering twice. A third attempt requires approval of the department offering the course.

ENGR 107 - Introduction to Engineering
Introduces engineering profession fundamentals and problem-solving. Topics include description of engineering disciplines, functions of the engineer, professionalism, ethics and registration, problem solving and representation of technical information, estimation and approximations, and analysis and design.

Fulfills general education requirement in information technology (ethics only).

**Corequisite(s):** MATH 105, or Math Placement Test score qualifying student for MATH 113.

**ENGR 307 - Engineering Thermodynamics**

Credits: 3 (NR)
Classical concepts of energy and temperature, first and second laws and their application to closed and open thermodynamic systems. Covers properties of pure substances, equation of state, and analysis of thermodynamic processes and systems. Presents application to engineering systems.

**Prerequisite(s):** MATH 213, PHYS 260, PHYS 261, CEIE 210. Prerequisite enforced by registration system.

**ENGR 498 - Independent Study in Engineering**

Credits: 1-3 (RT)
Directed self-study of special topics of current interest in ENGR.

**Prerequisite(s):** 60 credits; must be arranged with instructor and approved by department chair before registering.

**Notes:** May be repeated for maximum 6 credits if topics substantially different.

**ENGR 499 - Special Topics in Engineering**

Credits: 0-4 (RT)
Topics of special interest to undergraduates.

**Prerequisite(s):** 60 credits and permission of instructor; specific prerequisites vary with nature of topic.

**Notes:** May be repeated for maximum 6 credits if topics substantially different.
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

English (ENGH)

Offered by the College of Humanities and Social Sciences

Effective 2011-2012 Catalog, the English course prefix has changed from ENGL to ENGH.

Prerequisite to all 200-level and above: 3 credits of 100-level English. Prerequisite to all English courses numbered above 302 unless otherwise noted: 3 credits of 100-level English and 3 credits of general education literature. Nonnative speakers of English with limited language proficiency are encouraged to take ENGH 100 instead of ENGH 101. Students may not receive credit for both ENGH 100 and 101.

ENGH 100 - Composition for Non-native Speakers of English

Credits: 4 (NR)
Intensive practice in drafting, revising, and editing expository essays of some length and complexity. Studies logical, rhetorical, and linguistic structure of expository prose, with attention to particularly difficult aspects of the language for non-native speakers. Methods and conventions of preparing research papers.

Fulfills general education requirement in written communication (lower level).

Equivalent to ENGH 122; ENGL 122 and ENGL 100 (2010-2011 Catalog)

Notes: For non-native English speakers with limited language proficiency. Students must attain minimum grade of C to fulfill degree requirements.

Hours of Lecture or Seminar per week: 4
Hours of Lab or Studio per week: 0
Grading: Undergraduate Special

ENGH 101 - Composition

Credits: 3 (NR)
Intensive practice in drafting, revising, and editing expository essays of some length and complexity. Studies logical, rhetorical, and linguistic structure of expository prose. Methods and conventions of preparing research papers.

Fulfills general education requirement in written communication (lower level).

Equivalent to ENGH 122; ENGL 122 and ENGL 101 (2010-2011 Catalog)

Notes: Students must attain minimum grade of C to fulfill degree requirements.
**ENGH 121 - Enhanced Composition For Multilingual Writers of English I**

Credits: 3 (NR)
Provides intensive practice in drafting, revising, and editing essays in common academic genres such as description, exposition, and analysis, with additional language support for building English fluency. Addresses logical, rhetorical, and linguistic structures of expository prose. This course is the first of a two-part course for students in the ACCESS program.

Prerequisite(s): Admission to the ACCESS program for international Students.

Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0  
Grading: Undergraduate Special.

**ENGH 122 - Enhanced Composition For Multilingual Writers of English II**

Credits: 3 (NR)
Provides intensive practice in drafting, revising and editing essays in common academic genres such as argumentation and research based writing, with additional language support for building English fluency. Addresses logical, rhetorical, and linguistic structures of expository prose, and builds critical reading strategies. This course is the second of a two-part course for students in the ACCESS program.

Equivalent to ENGH 100, ENGH 101; ENGL 100, ENGL 101 (2010-2011 Catalog)

Prerequisite(s): Satisfactory progress in ENGL 121/ENGH 121.

Notes: Students must attain minimum grade of C to fulfill general education degree requirement for written communication (lower level).

Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0  
Grading: Undergraduate Special.

**ENGH 201 - Reading and Writing about Texts**

Credits: 3 (NR)
Close analysis of literary texts, including but not limited to poetry, fiction, and drama. Emphasizes reading and writing exercises to develop basic interpretive skills. Examines figurative language, central ideas, relationship between structure and meaning, narrative point of view.

Fulfills general education requirement in literature.

Equivalent to ENGL 201 (2010-2011 Catalog)

Prerequisite(s): 3 credits of 100-level English.

Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0
**ENGH 202 - Texts and Contexts**

Credits: 3 (NR)
Studies literary texts within the framework of culture. Examines texts within such categories as history, gender, sexuality, religion, race, class, and nation.

Fulfills general education requirement in literature.

Equivalent to ENGL 202 (2010-2011 Catalog)

**Prerequisite(s):** 3 credits of 100-level English.

**Notes:** Builds on reading and writing skills taught in ENGH 201.

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0

---

**ENGH 203 - Western Literary Tradition**

Credits: 3 (NR)
Major works of Western literature in historical progression. Focuses on writers such as Homer, Sophocles, Euripides, Dante, Cervantes, Machiavelli, and Montaigne.

Fulfills general education requirement in literature.

Equivalent to ENGL 203 (2010-2011 Catalog)

**Prerequisite(s):** 3 credits of 100-level English.

**Notes:** All readings are in modern English. Courses build on reading and writing skills taught in ENGH 201.

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0

---

**ENGH 204 - Western Literary Traditions**

Credits: 3 (NR)
Major works of Western literature in historical progression. Covers writers such as Moliere, Mme. de Lafayette, Goethe, Ibsen, Flaubert, Dostoyevski, Tolstoy, Mann, Kafka, Borges, and Soyinka. All readings are in modern English.

Fulfills general education requirement in literature.

Equivalent to ENGL 204 (2010-2011 Catalog)

**Prerequisite(s):** 3 credits of 100-level English.

**Notes:** Courses build on reading and writing skills taught in ENGH 201.
**ENGH 300 - Cover to Cover**

Credits: 3 (RD)
Introduction to various topics in English; many have an interdisciplinary emphasis. Appropriate for non-majors. Topic changes each time course is offered.

Equivalent to ENGL 300 (2010-2011 Catalog)

**Prerequisite(s):** ENGL 101/ENGH 101

**Notes:** May be repeated for a maximum of 6 credits when topic is different.

**ENGH 302 - Advanced Composition**

Credits: 3 (NR)
Intensive practice in writing and analyzing expository forms such as essay, article, proposal, and technical or scientific reports with emphasis on research related to student's major field.

Fulfills general education requirement in written communication (upper level).

Equivalent to ENGL 302 (2010-2011 Catalog)

**Prerequisite(s):** Completion of 45 credits including general education composition and general education literature, requires a grade of C or better.

**Notes:** Schedule of Classes designates particular sections of ENGH 302 in business, humanities, natural sciences and technology, and social sciences.

**ENGH 304 - Topics: Literary Surveys**

Credits: 3 (RT)
Advanced introduction to major movements and representative figures of two or more centuries or periods of American, British, European, or world literature.

Equivalent to ENGL 345 (2010-2011 Catalog)
Prerequisite(s): 3 credits of 100-level English and 3 credits of general education literature.

Notes: May be repeated for a maximum of 6 credits when topic is different.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ENGH 305 - Dimensions of Writing and Literature

Credits: 6 (NR)
Examines English as a discipline and develops interpretive skills for further study in the major. All sections cover issues such as form, genre, point of view, figurative language, conventions of close reading and literary interpretation, and how culture shapes texts.
Fulfills general education requirement in synthesis.
Fulfills writing intensive requirement in the major.
Equivalent to ENGL 325 (2010-2011 Catalog)
Prerequisite(s): 6 credits in literature. Students must register for a lecture section and the recitation section (301).
Notes: Open to all students. Required of those majoring or minoring in English, who should take ENGH 305 before taking other 300- or 400-level literature courses, and who must obtain a minimum grade of C to satisfy degree requirements in English major. Regular class meetings; weekly lectures, performances, or readings.

Hours of Lecture or Seminar per week: 6
Hours of Lab or Studio per week: 0

ENGH 307 - English Grammar

Credits: 3 (NR)
Overview of grammatical structure of English including word classes, phrases, and complex sentences. English grammar analyzed using modern syntactic theory. Students engage in language description through problem solving.
Equivalent to LING 307, ENGL 322 (2010-2011 Catalog)
Prerequisite(s): 3 credits of 100-level English and 3 credits of general education literature.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ENGH 308 - Introduction to Literary Theory

Credits: 3 (NR)
Introduces contemporary theories informing literary and cultural study such as deconstruction, poststructuralism, new historicism, feminism, psychoanalysis, and contemporary cultural studies.
Equivalent to ENGL 330 (2010-2011 Catalog)

Prerequisite(s): 6 credits of general education literature/humanities

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**ENGH 309 - Topics in Literature**

Credits: 3 (RT)
Studies literature by topics, such as women in literature, science fiction, and literature of the avant garde.

Equivalent to ENGL 360 (2010-2011 Catalog), ENGL 363 (2010-2011 Catalog)

Prerequisite(s): 3 credits of 100-level English and 3 credits of general education literature.

Notes: Topic varies. May be repeated for credit when topic is different.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**ENGH 310 - Topics: Women and Literature**

Credits: 3 (RT)
Explores experiences of women as both authors and subjects of imaginative literature.

Equivalent to WMST 305, ENGL 369 (2010-2011 Catalog)

Prerequisite(s): 3 credits of 100-level English and 3 credits of general education literature.

Notes: May be repeated for a maximum of 6 credits when topic is different.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**ENGH 315 - Folklore and Folklife**

Credits: 3 (NR)
Topics include folktales, personal narratives, legends, proverbs, jokes, folk songs, folk art and craft, and folk architecture. Considers ethnicity, community, family, festival, folklore in literature, and oral history. Discusses traditions in students' own lives.

Equivalent to ENGL 333 (2010-2011 Catalog)

Prerequisite(s): 3 credits of 100-level English and 3 credits of general education literature.
**ENGH 316 - Topics in Myth and Literature**

Credits: 3 (RT)
Studies how traditional mythologies are reflected in English and American literature and other texts as themes, motifs, and patterns.

Equivalent to ENGL 337 (2010-2011 Catalog)

**Prerequisite(s):** 3 credits of 100-level English and 3 credits of general education literature.

**Notes:** May be repeated for a maximum of 6 credits when topic is different.

**ENGH 318 - Introduction to Cultural Studies**

Credits: 3 (NR)
Introduces interpretive practices associated with cultural studies.

Equivalent to ENGL 327 (2010-2011 Catalog)

**Prerequisite(s):** 3 credits of 100-level English and 3 credits of general education literature.

**ENGH 319 - Popular Culture**

Credits: 3 (RT)
Emphasizes popular fiction and adaptation of popular prose genres to media that have strong verbal and visual elements. Relationship between verbal and nonverbal elements of media such as film, comics, and radio.

Equivalent to ENGL 334 (2010-2011 Catalog)

**Prerequisite(s):** 3 credits of 100-level English and 3 credits of general education literature.

**ENGH 320 - Literature of the Middle Ages**
Credits: 3 (NR)
Selected English narrative, dramatic, and homiletic literature written between 1300 and 1500, exclusive of Chaucer.

Equivalent to ENGL 400 (2010-2011 Catalog)

Prerequisite(s): 3 credits of 100-level English and 3 credits of general education literature.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ENGH 321 - English Poetry and Prose of the 16th Century

Credits: 3 (NR)

Equivalent to ENGL 401 (2010-2011 Catalog)

Prerequisite(s): 3 credits of 100-level English and 3 credits of general education literature.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ENGH 322 - Shakespeare

Credits: 3 (NR)
Survey of selected histories and comedies.

Equivalent to ENGL 335 (2010-2011 Catalog)

Prerequisite(s): 6 credits in literature

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ENGH 323 - Shakespeare

Credits: 3 (NR)
Survey of selected tragedies and romances.

Equivalent to ENGL 336 (2010-2011 Catalog)

Prerequisite(s): 6 credits in literature

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
ENGH 324 - English Renaissance Drama

Credits: 3 (NR)
Major dramas and dramatists of English Renaissance, such as Lyly, Marlowe, Jonson, Middleton, Webster, and Ford.

Equivalent to ENGL 440 (2010-2011 Catalog)

Prerequisite(s): 6 credits in literature

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ENGH 325 - English Poetry and Prose of the 17th Century

Credits: 3 (NR)
English poetry and prose from 1603 to 1688, excluding Milton.

Equivalent to ENGL 402 (2010-2011 Catalog)

Prerequisite(s): 3 credits of 100-level English and 3 credits of general education literature.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ENGH 330 - Augustan Age: 1660-1745

Credits: 3 (NR)
English literature from late 17th century to mid-18th century. Includes Dryden, Rochester, Behn, Defoe, Swift, Pope, and Montagu.

Equivalent to ENGL 404 (2010-2011 Catalog)

Prerequisite(s): 3 credits of 100-level English and 3 credits of general education literature.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ENGH 331 - Age of Sensibility: 1745-1800

Credits: 3 (NR)
English literature of later 18th century, time of American and French Revolutions, including new developments in novel, drama, biography, and poetry. Includes Johnson, Boswell, Blake, Goldsmith, Sterne, Gray, Cowper, Burney, Godwin, and Wollstonecraft.

Equivalent to ENGL 405 (2010-2011 Catalog)
Prerequisite(s): 3 credits of 100-level English and 3 credits of general education literature.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ENGH 332 - Restoration and 18th Century Drama

Credits: 3 (NR)
Restoration comedy of manners, sentimental comedy, and neoclassical and bourgeois tragedy. Theories of drama and conventions of staging. Includes writers such as Wycherley, Behn, Congreve, and Cowley.

Equivalent to ENGL 443 (2010-2011 Catalog)

Prerequisite(s): 3 credits of 100-level English and 3 credits of general education literature.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ENGH 333 - British Novel of the 18th Century

Credits: 3 (NR)
English novel from its beginnings through turn of 19th century. Covers works by Behn, Defoe, Haywood, Richardson, Fielding, Sterne, Burney, Smollett, and Austen.

Equivalent to ENGL 450 (2010-2011 Catalog)

Prerequisite(s): 6 credits in literature

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ENGH 334 - British Poetry of the Romantic Period

Credits: 3 (NR)

Equivalent to ENGL 406 (2010-2011 Catalog)

Prerequisite(s): 3 credits of 100-level English and 3 credits of general education literature.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ENGH 335 - Prose and Poetry of the Victorian Period
Poetry and nonfiction prose by such authors as Carlyle, Arnold, Tennyson, Elizabeth Barrett Browning, Robert Browning, Ruskin, Mill, and Wilde.

Equivalent to ENGL 407 (2010-2011 Catalog)

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**ENGH 336 - British Novel of the 19th Century**

Credits: 3 (NR)  
Works by Dickens, Thackeray, the Brontes, Eliot, Trollope, and Hardy.

Equivalent to ENGL 453 (2010-2011 Catalog)

**Prerequisite(s):** 3 credits of 100-level English and 3 credits of general education literature.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**ENGH 337 - British Poetry after 1900**

Credits: 3 (NR)  
Emphasizes Hardy, Yeats, Lawrence, Graves, Auden, Thomas, and Hughes. Fiction works employing poetic techniques, such as Joyce's Ulysses, may also be studied.

Equivalent to ENGL 462 (2010-2011 Catalog)

**Prerequisite(s):** 3 credits of 100-level English and 3 credits of general education literature.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**ENGH 338 - British Novel after 1900**

Credits: 3 (NR)  
Works by Conrad, Forster, Lawrence, Joyce, Woolf, Greene, Lessing, Spark, and Fowles.

Equivalent to ENGL 456 (2010-2011 Catalog)

**Prerequisite(s):** 6 credits in literature

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0
ENGH 339 - British and Irish Drama after 1900

Credits: 3 (NR)
English or Irish drama from Yeats to the present. Plays by authors such as Yeats, Synge, O'Casey, Osborne, Wesker, Pinter, Friel, Churchill, and Gems.

Equivalent to ENGL 445 (2010-2011 Catalog)

Prerequisite(s): 3 credits of 100-level English and 3 credits of general education literature.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ENGH 340 - Early American Literature

Credits: 3 (NR)
Works of first 200 years of American literature, including Edwards, Franklin, Irving, Cooper, and Bryant.

Equivalent to ENGL 423 (2010-2011 Catalog)

Prerequisite(s): 3 credits of 100-level English and 3 credits of general education literature.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ENGH 341 - Literature of the American Renaissance

Credits: 3 (NR)
Major writers of American Renaissance (1830-1865), with emphasis on Emerson, Thoreau, Hawthorne, Melville, Whitman, Poe, Stowe, Douglass, and Dickinson.

Equivalent to ENGL 425 (2010-2011 Catalog)

Prerequisite(s): 3 credits of 100-level English and 3 credits of general education literature.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ENGH 343 - Development of the American Novel to 1914

Credits: 3 (NR)
Major American novels of the pre-World War I period with emphasis on Brown, Cooper, Hawthorne, Melville, Twain, Howells, James, Crane, Dreiser, Norris, and others.

Equivalent to ENGL 452 (2010-2011 Catalog)
Prerequisite(s): 3 credits of 100-level English and 3 credits of general education literature.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**ENGH 344 - Development of the American Novel since 1914**

Credits: 3 (NR)
Works by Fitzgerald, Hemingway, Faulkner, Dos Passos, Wolfe, Bellow, and Nabokov.

Equivalent to ENGL 454 (2010-2011 Catalog)

Prerequisite(s): 3 credits of 100-level English and 3 credits of general education literature.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**ENGH 345 - American Drama of the 20th Century**

Credits: 3 (NR)
American drama of 20th century, with special attention to playwrights such as Glaspell, O'Neill, Miller, Williams, Fornes, and Albee.

Equivalent to ENGL 447 (2010-2011 Catalog)

Prerequisite(s): 3 credits of 100-level English and 3 credits of general education literature.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**ENGH 346 - American Poetry of the 20th Century**

Credits: 3 (NR)
Emphasizes work of Robinson, Frost, Stevens, Williams, Pound, Crane, Eliot, and Lowell. May include work of fiction employing poetic techniques, such as Faulkner's *The Sound and the Fury*.

Equivalent to ENGL 463 (2010-2011 Catalog)

Prerequisite(s): 3 credits of 100-level English and 3 credits of general education literature.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**ENGH 348 - Beginnings of African American Literature Through 1865**
Concentrating on such poets as Phillis Wheatley, Jupiter Hammon, Lucy Terry, and George Moses Horton, examines significant African American literary, social, and political texts produced through 1865. Special attention to narrative accounts of enslavement and freedom by Frederick Douglass, Harriet Jacobs, and Olaudah Equiano; political writings and orations of David Walker and Sojourner Truth; fiction of Harriet Wilson and William Wells Brown; and nonwritten cultural artifacts such as slave songs and spirituals.

Equivalent to ENGL 368 (2010-2011 Catalog)

Prerequisite(s): 3 credits of 100-level English and 3 credits of general education literature.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**ENGH 349 - African American Literature: Reconstruction to 1903**

Credits: 3 (NR)

Equivalent to ENGL 370 (2010-2011 Catalog)

Prerequisite(s): 3 credits of 100-level English and 3 credits of general education literature.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**ENGH 350 - African American Literature Through 1946**

Credits: 3 (NR)
Focusing on fiction, poetry, drama, and autobiography, explores evolution of African American literature and aesthetics and major social, cultural, and historical movements such as the Harlem Renaissance of the 1920s and emergence of black naturalism, realism, and modernism in the 1930s-40s. Major authors include Zora Neale Hurston, Langston Hughes, Jessie Fauset, James Weldon Johnson, Jean Toomer, Nella Larsen, Margaret Walker, Chester Himes, Richard Wright, and Ann Petry.

Equivalent to ENGL 371 (2010-2011 Catalog)

Prerequisite(s): 3 credits of 100-level English and 3 credits of general education literature.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**ENGH 351 - Contemporary African American Literature**
Encompassing array of genres and forms, examines black writing from mid-20th century to present. Engages textual, critical, political, and theoretical issues related to cardinal literary movements, such as Black Arts Movement of 1960s and Third Renaissance of 1980s-90s. Examines how musical forms such as blues, jazz, and rap shaped literary production. Major authors include Ralph Ellison, Gwendolyn Brooks, James Baldwin, Lorraine Hansberry, Amiri Baraka, Alice Walker, Ernest Gaines, Gloria Naylor, August Wilson, and Toni Morrison.

Equivalent to ENGL 372 (2010-2011 Catalog)

Prerequisite(s): 3 credits of 100-level English and 3 credits of general education literature.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ENGH 352 - Topics in Ethnic American Literature

Credits: 3 (RT)
Studies particular ethnic American literatures. Focuses on literatures such as Asian American, Native American, Latino/a, Arab American, or Jewish American.

Equivalent to ENGL 352 (2010-2011 Catalog)

Prerequisite(s): 3 credits of general education literature.

Notes: May be repeated for a maximum of 6 credits when topic (expressed by course subtitle and content) is different.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 3

ENGH 355 - Recent American Fiction

Credits: 3 (NR)
American short story writers and novelists from World War II to present, including Mailer, Barth, Cheever, Oates, Gass, Beattie, Updike, and Morrison.

Equivalent to ENGL 355 (2010-2011 Catalog)

Prerequisite(s): 3 credits of 100-level English and 3 credits of general education literature.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ENGH 356 - Recent American Poetry

Credits: 3 (NR)
Equivalent to ENGL 390 (2010-2011 Catalog)

**Prerequisite(s):** 3 credits of 100-level English and 3 credits of general education literature.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**ENGH 360 - Continental Fiction, 1770-1880**

Credits: 3 (NR)  
Selected European novels in translation. Focuses on continental novel from 18th century to end of 19th century. Includes works of Balzac, Goethe, Gogol, Stendhal, Turgenev, Flaubert, Dostoievski, Tolstoy, and Chekhov.

Equivalent to ENGL 436 (2010-2011 Catalog)

**Prerequisite(s):** 3 credits of 100-level English and 3 credits of general education literature.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**ENGH 361 - Continental Fiction, 1880-1950**

Credits: 3 (NR)  
Offered in cooperation with the Department of Modern and Classical Languages. Focuses on continental novel from beginning of 20th century to present. Includes Proust, Mann, Gide, Kafka, Yourcevar, Beauvoir, Calvino, and Garcia Marquez. Attention to influence of this literature on novel in English.

Equivalent to ENGL 437 (2010-2011 Catalog)

**Prerequisite(s):** 3 credits of 100-level English and 3 credits of general education literature.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**ENGH 362 - Global Voices**

Credits: 3 (RD)  
Studies two cultures other than contemporary British or American culture through exploration of several textual forms such as written literature, oral literature, film, folklore, or popular culture. Specific cultures vary, but at least one is non-Western.

Fulfills general education requirement in global understanding.

Equivalent to ENGL 349 (2010-2011 Catalog)

**Prerequisite(s):** 45 credits.
**Notes:** May be repeated for credit when topic is different.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**ENGH 366 - The Idea of a World Literature**

Credits: 3 (NR)  
Examines history and current status of conceptions of world literature, considering such topics as non-European influences on Western literature, shifting horizons of comparative literature, rise of postcolonial literature, place of translation, and role of international institutions such as UNESCO and the Nobel Prize. Focuses on degree to which these initiatives have been successful in promoting global understanding of literary production.

Fulfills general education requirement in global understanding.

Equivalent to ENGL 350 (2010-2011 Catalog)

**Prerequisite(s):** 45 credits.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**ENGH 367 - World Literatures in English**

Credits: 3 (RT)  
Study of selected topics, periods, genres, or authors in literature written in English, originating in Canada, Australia, New Zealand, South Asia, or Africa, for example.

Equivalent to ENGL 439 (2010-2011 Catalog)

**Prerequisite(s):** 3 credits of 100-level English and 3 credits of general education literature.

**Notes:** May be repeated for a maximum of 6 credits when topic is different with permission of department.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**ENGH 368 - Modern Drama**

Credits: 3 (NR)  
Representative plays of most influential European and American dramatists, with emphasis on dramatic styles such as realism, expressionism, epic, and existentialism. Studies Chekhov, Ibsen, Strindberg, Brecht, and Beckett.

Equivalent to ENGL 448 (2010-2011 Catalog)

**Prerequisite(s):** 3 credits of 100-level English and 3 credits of general education literature.
**ENGH 370 - Introduction to Documentary**

Credits: 3 (NR)
Considers fundamental concepts of documentary form, style, and subject matter, ethical considerations, and theories of documentary. Includes close analysis of a series of representative film and television texts.

Fulfills general education requirement in arts.

Equivalent to ENGL 331 (2010-2011 Catalog)

Prerequisite(s): 3 credits of 100-level English and 3 credits of general education literature.

**ENGH 371 - Television Studies**

Credits: 3 (NR)
Learn to identify and analyze formal elements of television. Learn how to situate and evaluate television in their cultural and historical contexts, interpret specific texts, and understand the relationships among broadcasting and networks, citizenship, audiences, and the public sphere.

**ENGH 372 - Introduction to Film**

Credits: 3 (NR)
Introduces film medium as an art form.

Fulfills general education requirement in arts.

Equivalent to ENGL 332 (2010-2011 Catalog)

Prerequisite(s): 3 credits of 100-level English and 3 credits of general education literature.

**ENGH 375 - Web Authoring and Design**
Credits: 3 (NR)
Provides a rhetorical foundation for web authoring and design in professional settings. Students will learn basic principles of writing for the web, information architecture, coding for accessibility, and usability testing. The production-oriented component of the course provides instruction in writing valid code and practice with web- and graphic-editing software tools.

Equivalent to ENGL 342 (2010-2011 Catalog)

**Prerequisite(s):** 3 credits of 100-level English and 3 credits of general education literature.

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0

---

**ENGH 376 - Rhetoric and New Media**

Credits: 3 (NR)
Critical reading of new media texts and creation of technology-enriched texts in variety of rhetorical genres. Instructs students in rhetoric of new media, whether produced as hypertext, multimedia, or interactive digital productions. Technology-enriched activities present complex textuality of words, images, word-as-image, and kinetic text.

Equivalent to NCLC 343, ENGL 343 (2010-2011 Catalog)

**Prerequisite(s):** 3 credits of 100-level English and 3 credits of general education literature.

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0

---

**ENGH 377 - Digital Creative Writing**

Credits: 3 (NR)
Combined workshop and studio course in technological and aesthetic issues of reading and writing hypermedia texts with emphasis on poetry, fiction, creative nonfiction, mixed genre, drama, or performance. Explores how genre meets hypertext and hypermedia in original creative work. Includes techniques in authoring interactive hypermedia projects using digital media tools.

Equivalent to ENGL 344 (2010-2011 Catalog)

**Prerequisite(s):** ENGL 396/ENGH 396 or permission of instructor.

**Notes:** May include reading assignments in hypertext and hypermedia theory.

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0

---

**ENGH 380 - Introduction to Writing and Rhetoric**

Credits: 3 (NR)
Introduces students to advanced strategies for writing academic, professional, and civic documents. Develops expository, persuasive, organizational, and stylistic skills through analysis of rhetorical situations and understanding of the features and
approaches of successful writing. Students develop a significant informational or argumentative writing project related to their major field, profession, or area of interest.

Equivalent to ENGL 380 (2010-2011 Catalog)

**Prerequisite(s):** ENGL 302/ENGH 302 is recommended.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**ENGH 382 - Writing Nonfiction Genres**

Credits: 3 (NR)  
Advanced practice in analyzing and writing nonfiction forms such as essay, profile, article, and technical or scientific report, depending on student's interests.

Equivalent to ENGL 382 (2010-2011 Catalog)

**Prerequisite(s):** 3 credits of 100-level English and 3 credits of general education literature.

**Notes:** Not to be taken concurrently with ENGH 399 or 486, and not to be taken by students who have taken ENGH 486. Not a remedial course.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**ENGH 384 - Writing Ethnography**

Credits: 3 (NR)  
Study and practice of ethnographic writing. Students conduct ethnographic investigations and practice journal keeping, field note recording, interviewing, transcription, and interpretation. Includes introduction to current issues in ethnographic writing.

Equivalent to ENGL 311 (2010-2011 Catalog)

**Prerequisite(s):** 3 credits of 100-level English and 3 credits of general education literature.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**ENGH 386 - Editing for Audience, Style, and Voice**

Credits: 3 (NR)  
Introduces editing as a textual and rhetorical practice. Addresses copyediting, stylistics, and design; revisions based on audience, purpose, and genre; multimedia editing; interactions between editors and authors. (Not a remedial course in fixing sentence errors.)

Equivalent to ENGL 386 (2010-2011 Catalog)
**Prerequisite(s):** 3 credits of 100-level English and 3 credits of general education literature.

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0

---

### ENGH 388 - Professional and Technical Writing

Credits: 3 (NR)
Intensive study and practice in various forms of professional and technical writing, including proposals, reports, instructions, news releases, white papers, and correspondence. Emphasizes writing for variety of audiences, both lay and informed, and writing within various professional and organizational contexts.

Equivalent to ENGL 410 (2010-2011 Catalog)

**Prerequisite(s):** ENGL 302/ENGH 302.

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0

---

### ENGH 391 - Forms of Poetry

Credits: 3 (NR)
Intensive study of and practice in formal elements of poetry through analyzing models and weekly writing assignments. Depending upon specific instructor, can cover rhyme, meter, rhythm, lineation, stanza pattern, traditional and experimental forms, free verse and open-form composition, lyric, narrative, and dramatic modes.

**Prerequisite(s):** ENGH 396.

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0

---

### ENGH 392 - Forms of Fiction

Credits: 3 (NR)
Intensive practice in the elements and forms of fiction, through analyzing models and completing weekly writing assignments. Covers short stories, short-shorts, longer narratives, and such elements as plot, narrative technique, dialogue, point of view, voice and style, along with tools such as evocation, description, and epiphany.

**Prerequisite(s):** ENGH 396.

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0

---

### ENGH 393 - Forms of Nonfiction
Intensive study of and practice in various forms of nonfiction writing, through analyzing models and completing weekly writing assignments. Includes in-depth discussion and practice in such forms as biographies, documentaries, editorials, interviews, reports, reviews, and essays.

Prerequisite(s): ENGH 396.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**ENGH 396 - Introduction to Creative Writing**

Credits: 3 (NR)
Assignments include writing exercises and original works of poetry and fiction. May also include drama or creative nonfiction. Includes reading assignments in covered genres, and may include oral presentations or in-class performance. Original student work read and discussed in class and conference with instructor.

Fulfills general education requirement in arts.

Equivalent to ENGL 396 (2010-2011 Catalog)

Prerequisite(s): 3 credits of 100-level English and 3 credits of general education literature.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**ENGH 397 - Poetry Writing**

Credits: 3 (NR)
Workshop in reading, writing poetry. Original student work read and discussed in class and conferences with instructor. Technical exercises in craft of poetry; may include reading assignments.

Equivalent to ENGL 397 (2010-2011 Catalog)

Prerequisite(s): ENGL 396/ENGH 396 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**ENGH 398 - Fiction Writing**

Credits: 3 (NR)
Workshop course in reading and writing fiction. Original student work read and discussed in class and conferences with instructor. Includes technical exercises in craft of fiction; may include reading assignments.

Equivalent to ENGL 398 (2010-2011 Catalog)
Prerequisite(s): ENGL 396/ENGH 396 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**ENGH 399 - Creative Nonfiction Writing**

Credits: 3 (NR)
Workshop in reading and writing of nonfiction that makes use of literary techniques normally thought of in context of fiction, such as evoking senses and use of dialog. Original student work read and discussed in class and conferences with instructor. Includes technical exercises in artful creating of nonfiction; may include reading assignments.

Equivalent to ENGL 399 (2010-2011 Catalog)

Prerequisite(s): ENGL 309/ENGH 382 or ENGL 396/ENGH 396 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**ENGH 400 - Honors Seminar**

Credits: 3 (RT)
Emphasizes growth in awareness of literary scholarship as a discipline, providing opportunity for advanced study in literary and cultural criticism. Covers variety of topics, including consideration of a literary period, genre, author, work, theme, discourse, or critical theory.

Equivalent to ENGL 414 (2010-2011 Catalog)

Prerequisite(s): Permission of department. Only open to English department honors students.

Notes: May be repeated for a maximum of 6 credits.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**ENGH 401 - Honors Thesis Writing Seminar**

Credits: 3 (NR)

Provides guidance in research methods to students writing an honor thesis as well as workshop for critiquing works in progress. May be taken concurrently with another approved course offered by English Department, in which case thesis work may substitute for some assigned work in second course by arrangement of both instructors.

Equivalent to ENGL 401 (2010-2011 Catalog)
Prerequisite(s): Acceptance into English honors; permission of department and ENGL 414/ENGH 400 or ENGL 416/ENGH 402.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ENGH 402 - Honors Independent Study

Credits: 1-3 (NR)
Intensive writing course. Honors students concentrating in nonfiction writing and editing may use English 416 to replace English 414 as first course in honors program.

Equivalent to ENGL 416 (2010-2011 Catalog)

Prerequisite(s): Admission to honors program in English, and permission of instructor

Notes: Honors students concentrating in creative writing may use English 402 to replace 401 as second course in honors program.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 1-12

ENGH 408 - Topics in Criticism

Credits: 3 (RT)
Studies selected approach to literary criticism, as announced, with exercises in critical analysis. Includes new criticism, structuralism, psychoanalysis, and Marxism.

Equivalent to ENGL 494 (2010-2011 Catalog)

Prerequisite(s): 3 credits of 100-level English and 3 credits of general education literature.

Notes: May be repeated when topic is different with permission of department.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ENGH 409 - Literary Modes

Credits: 3 (RT)
Theory and practice of such modes as tragedy, comedy, tragicomedy, romance, and satire, considered in separate semesters and drawn from variety of periods ranging from biblical times to present, with examples from drama, poetry, and fiction.

Equivalent to ENGL 495 (2010-2011 Catalog)

Prerequisite(s): 3 credits of 100-level English and 3 credits of general education literature.
Notes: May be repeated for a maximum of 12 credits with permission of department.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**ENGH 412 - Topics in Folklore Studies**

Credits: 3 (RT)  
Exploration of various aspects of folklore and folklife such as folklore and literature, folk arts, folk song, and material culture.

Equivalent to ENGL 491 (2010-2011 Catalog)

**Prerequisite(s):** 3 credits of 100-level English and 3 credits of general education literature.

Notes: May be repeated for a maximum of 6 credits when topic is different with permission of department.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**ENGH 414 - Folklore of the Spirit World**

Credits: 3 (NR)  
Examines traditional narratives and beliefs about otherworldly experiences and beings. Introduces traditional narrative theory and discusses how people construct and tell their stories about encounters with the supernatural. Considers the conflicts, worldviews, and competing values these stories bring into material form. Focuses on traditions from around the world as well as on personal experiences of students.

Equivalent to ENGL 480 (2010-2011 Catalog)

**Prerequisite(s):** 3 credits of 100-level English and 3 credits of general education literature.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**ENGH 415 - Folk Arts and Folk Artists**

Credits: 3 (NR)  
Examines the traditional arts of everyday life, such as festive foods, mementos and other objects of memory, textile arts, pottery, carving in wood and stone, roadside shrines, and more. Explores the folk aesthetics of group-based creativity through the lenses of biography, history, literature, and folklore studies. Considers traditional objects as narratives in material form. Examples drawn from multiple cultures as well as traditions in students' own lives.

Equivalent to ENGL 481 (2010-2011 Catalog)

**Prerequisite(s):** 3 credits of 100-level English and 3 credits of general education literature.
ENGH 416 - Ethnicity and Migration in Folklore

Credits: 3 (NR)
Explores U.S. immigration trends and the historical basis for the concepts of ethnicity, identity, and immigration in folklore scholarship, literature, film, and popular media. The course explores at least three of the following ethnic groups: Latino, Asian, Jewish, European, Arab, or African.

Equivalent to ENGL 479 (2010-2011 Catalog)

Prerequisite(s): 3 credits of 100-level English and 3 credits of general education literature.

ENGH 418 - Cultural Constructions of Sexualities

Credits: 3 (NR)
Introductory survey of cultural, literary, and theoretical constructions of sexuality that seek to complicate traditionally fixed categories of identity. Examines various representations of human sexuality, with particular attention to intersections with gender, race, ethnicity, nationality, and class.

Equivalent to WMST 302, ENGL 338 (2010-2011 Catalog)

Prerequisite(s): 3 credits of 100-level English and 3 credits of general education literature.

ENGH 419 - Topics in Popular Literature

Credits: 3 (RT)
Studies specific topic or theme in popular literature.

Equivalent to ENGL 493 (2010-2011 Catalog)

Prerequisite(s): 6 credits in literature.

Notes: May be repeated for a maximum of 6 credits when topic is different with permission of department.
ENGH 421 - Medieval Literature in Context

Credits: 3 (NR)
Examines selected topic in intellectual history of Middle Ages.

Equivalent to HIST 431/FRLN 431 and ENGL 431 (2010-2011 Catalog)

Prerequisite(s): 3 credits of 100-level English and 3 credits of general education literature.

Notes: May be taken for credit by English or history majors. Specific topic may vary. Primary emphasis is literary or historical, depending on discipline of instructor. May consider relevant material from philosophy, theology, and art.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ENGH 422 - Chaucer

Credits: 3 (NR)
Major works of Chaucer, with emphasis on *The Canterbury Tales*.

Equivalent to ENGL 471 (2010-2011 Catalog)

Prerequisite(s): 3 credits of 100-level English and 3 credits of general education literature.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ENGH 424 - Spenser

Credits: 3 (NR)
Poetry of Edmund Spenser, with central emphasis on *The Faerie Queene*.

Equivalent to ENGL 472 (2010-2011 Catalog)

Prerequisite(s): 3 credits of 100-level English and 3 credits of general education literature.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ENGH 426 - Studies in Shakespeare

Credits: 3 (RT)
Study of one aspect of Shakespeare's art or critical issues surrounding his work.

Equivalent to ENGL 473 (2010-2011 Catalog)
Prerequisite(s): 3 credits of 100-level English and 3 credits of general education literature.

Notes: May be repeated for a maximum of 6 credits when topic is different with permission of department.

**ENGH 428 - Milton**

Credits: 3 (NR)
Milton's major poetic works, with emphasis on *Paradise Lost*.

Equivalent to ENGL 474 (2010-2011 Catalog)

Prerequisite(s): 3 credits of 100-level English and 3 credits of general education literature.

Notes: May be repeated for a maximum of 6 credits when topic is different with permission of department.

**ENGH 431 - Topics: British Literary Periods**

Credits: 3 (RT)
In-depth study of selected period of British literature. In addition to literary examples, materials may be chosen from art, philosophy, or popular culture of the time.

Equivalent to ENGL 408 (2010-2011 Catalog)

Prerequisite(s): 3 credits of 100-level English and 3 credits of general education literature.

Notes: May be repeated for a maximum of 6 credits when topic is different with permission of department.

**ENGH 432 - Topics: British Authors**

Credits: 3 (RT)
Study of one or two major figures in British literature.

Equivalent to ENGL 477 (2010-2011 Catalog)

Prerequisite(s): 3 credits of 100-level English and 3 credits of general education literature.

Notes: May be repeated for a maximum of 12 credits when topic is different with permission of department.
ENGH 441 - Topics: American Authors

Credits: 3 (RT)
Study of one or two major figures in American literature.

Equivalent to ENGL 478 (2010-2011 Catalog)

Prerequisite(s): 3 credits of 100-level English and 3 credits of general education literature.

Notes: May be repeated for a maximum of 6 credits when topic is different with permission of department.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ENGH 442 - Topics: American Literary Periods

Credits: 3 (RT)
In-depth study of selected period of American literature. In addition to literary examples, materials may be chosen from art, philosophy, or popular culture of time.

Equivalent to ENGL 429 (2010-2011 Catalog)

Prerequisite(s): 3 credits of 100-level English and 3 credits of general education literature.

Notes: May be repeated for a maximum of 6 credits when topic is different with permission of department.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ENGH 451 - Science Fiction

Credits: 3 (NR)
Major works of science fiction in terms of mode, themes, and narrative techniques, especially role of hypothesis in science fiction. Focuses on novels, short stories from early 19th century to present.

Equivalent to ENGL 492 (2010-2011 Catalog)

Prerequisite(s): 3 credits of 100-level English and 3 credits of general education literature.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ENGH 452 - Critical Study of Children's Literature
Credits: 3 (NR)
Examines the history and criticism of children's literature and the strategies used by authors of children's literature to address their audience. Selected readings range from Puritan to contemporary writing for children, as well as influential works in educational philosophy, such as those by Locke and Rousseau.

Equivalent to ENGL 460 (2010-2011 Catalog)

**Prerequisite(s):** 3 credits 100-level English and 3 credits general education literature.

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0

**ENGH 453 - Topics in Fiction**

Credits: 3 (RT)
Study of selected topics, periods, or authors.

Equivalent to ENGL 459 (2010-2011 Catalog)

**Prerequisite(s):** 3 credits of 100-level English and 3 credits of general education literature.

**Notes:** May be repeated for a maximum of 6 credits when topic is different with permission of department.

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0

**ENGH 454 - Topics in Poetry**

Credits: 3 (RT)
Study of selected topics, periods, or poets.

Equivalent to ENGL 468 (2010-2011 Catalog)

**Prerequisite(s):** 3 credits of 100-level English and 3 credits of general education literature.

**Notes:** May be repeated for a maximum of 6 credits when topic is different with permission of department.

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0

**ENGH 455 - Topics in Drama**

Credits: 3 (RT)
Studies selected topics, periods, or playwrights.

Equivalent to ENGL 449 (2010-2011 Catalog)
Prerequisite(s): 3 credits of 100-level English and 3 credits of general education literature.

Notes: May be repeated for a maximum of 6 credits when topic is different with permission of department.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**ENGH 456 - Topics in Literary Nonfiction**

Credits: 3 (RD)
Special studies in literary nonfiction by topic, such as the personal essay, New Journalism, the "nonfiction novel," the memoir, or historical traditions of literary nonfiction.

Equivalent to ENGL 385 (2010-2011 Catalog)

Prerequisite(s): 3 credits of 100-level English and 3 credits of general education literature.

Notes: May be repeated for a maximum of 6 credits when topic is different.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**ENGH 459 - Internship**

Credits: 1-3 (RT)
Under supervision of a faculty director, students report and reflect on their work as interns at organizations of their choosing, usually in writing and/or editing positions. For 3 credits, students work on site at least 135 hours as specified in the agreement developed with the internship supervisor and approved by the faculty director.

Equivalent to ENGL 498 (2010-2011 Catalog)

Prerequisite(s): Permission of internship director. 60 credits. English majors need 18 credits of English (3 credits of 100-level English course; 3-6 credits of 200-level English courses; 3 credits of ENGL 302/ENGH 302, and 6-9 credits of upper-level English courses). Non-English majors must meet the same requirements, except that they replace one upper-level English course with an upper-level course in their major.

Notes: Contact the English Department one semester prior to enrollment. No more than 3 credits can be counted in concentration or English minor. May be repeated for a total of 6 credits with permission of department.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 1-9
When Offered: Fall, Spring

**ENGH 470 - Topics in Film/Media History**

Credits: 3 (RT)
Advanced studies of development of film language, both as cultural practice and medium for formal innovation. Topics might
include studies of national cinemas, historical periods, genres, or individual directors.

Equivalent to ENGL 421 (2010-2011 Catalog)

Prerequisite(s): ENGL 332/ENGH 372 or permission of instructor

Notes: May be repeated for a maximum of 6 credits when topic is different.

ENGH 472 - Topics in Film/Media Theory

Credits: 3 (RT)
Advanced studies of theories about various aspects of production, distribution, and reception of film-mediated experiences. Topics may include theories of spectator, semiotics, feminist film theory, theories of narrativity, structuralist film theory, or deconstruction.

Equivalent to ENGL 422 (2010-2011 Catalog)

Prerequisite(s): ENGL 332/ENGH 372 or permission of instructor.

Notes: May be repeated for a maximum of 6 credits when topic is different.

ENGH 474 - Topics in Film/Media Studies

Credits: 3 (RT)
American and foreign films selected by type, period, or director with emphasis varying from year to year. Required viewings, student discussion, and written critiques.

Equivalent to ENGL 490 (2010-2011 Catalog)

Prerequisite(s): ENGL 332/ENGH 372 or permission of instructor.

Notes: May be repeated for a maximum of 6 credits with permission of department.

ENGH 486 - Writing Nonfiction for Publication

Credits: 3 (NR)
Workshop course. Intensive practice in advanced nonfiction writing; emphasizes writing for publication. Occasional special topics sections in such forms as autobiography and scientific writing.
ENH 488 - Topics in Writing and Rhetoric

Credits: 3 (RD)
Advanced studies in rhetoric and writing. Introduces key rhetorical terminology and examines how texts construct meaning and how those meanings are determined within social contexts. Topics may include the relationship between rhetorics and poetics, rhetoric and new media, histories of rhetoric, global rhetorics, argument theory, discourse analysis, theories of technical communication, or advanced theories of composition and pedagogy.

Equivalent to ENGL 496 (2010-2011 Catalog)

Prerequisite(s): 3 credits of 100-level English and 3 credits of general education literature.

Notes: May be repeated for a maximum of 6 credits when topic is different with permission of department.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ENH 492 - Advanced Fiction Writing Workshop

Credits: 3 (RD)
Workshop; intensive practice in creative writing and study of creative process. Intended for students already writing original creative work.

Equivalent to ENGL 458 (2010-2011 Catalog)

Prerequisite(s): ENGL 398/ENGH 398 and manuscript review.

Notes: Enrollment is controlled. Submit 8-10 pages of fiction to instructor for review. May be repeated for a maximum of 6 credits with permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ENH 494 - Advanced Poetry Writing Workshop

Credits: 3 (RD)
Intensive practice in the craft of poetry and study of the imagination in creative process. Intended for students already writing original poetry.
Equivalent to ENGL 464 (2010-2011 Catalog)

Prerequisite(s): ENGL 397/ENGH 397 and manuscript review.

Notes: Enrollment is controlled. Submit 8-10 pages of poetry to instructor for review. May be repeated for a maximum of 6 credits with permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ENGH 495 - Capstone and Thesis

Credits: 3 (NR)
Presentations of original work for critique by peers and faculty. Students synthesize what they have learned during prior work in the program through workshops for final revisions of manuscripts for the BFA portfolio. Students submit the revised manuscripts as their final submission for evaluation by faculty. Students receive guidance in research methods as they investigate the lives of writers and learn the procedures for such tasks as submitting original work for publication and applying for jobs.

Prerequisite(s): ENGH 396; ENGH 391, 392, or 393;
ENGH 397, 398, and 399.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ENGH 497 - Topics in Creative Writing

Credits: 3 (RT)
Intensive practice in creative writing and study of creative process. Workshop course. Concentrates on specialized literary type other than short story or poetry such as playwriting, screenwriting, children's literature, travel literature, autobiography, gothic novel, or translation.

Equivalent to ENGL 497 (2010-2011 Catalog)

Prerequisite(s): ENGL 396/ENGH 396 or equivalent and permission of instructor.

Notes: For students already writing original creative work. Students must submit typed manuscript at least one week before registration. May be repeated for a maximum of 6 credits.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ENGH 499 - Independent Study

Credits: 1-6 (RT)
Intensive study of particular author, genre, period, or critical or theoretical problem in literature or linguistics, to be conducted by student in close consultation with instructor. Student produces at least one substantial piece of written work during semester on research findings.
Equivalent to ENGL 499 (2010-2011 Catalog)

Prerequisite(s): Permission of department and instructor.

Notes: Individualized section form required. May be repeated for a maximum of 6 credits with approval of department.

Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 0

**ENGH 501 - Introduction to Professional Writing and Rhetoric**

Credits: 3 (NR)
Provides historical and theoretical background in professional writing and editing in a seminar format. Explores professional writing's emergence as a field of scholarship and practice, emphasizes the relationships between rhetorical theories and practice, and introduces students to bibliographic research in the field.

Equivalent to ENGL 501 (2010-2011 Catalog)

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**ENGH 502 - Research Methods in Rhetoric and Professional Writing**

Credits: 3 (NR)
Introduces theory, methods, and ethics of conducting research in rhetoric and professional writing. Students learn to conduct and evaluate research that may include rhetorical analysis, discourse analysis, historical methods, ethnography, user-centered design, document and usability testing, and others.

Equivalent to ENGL 502 (2010-2011 Catalog)

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**ENGH 503 - Theory and Practice of Editing**

Credits: 3 (NR)
Instruction in revising, editing, and preparing specialized writing for printing. Emphasizes methods of achieving clarity, accuracy, and completeness. Lecture and discussion on editing and printing techniques; practical exercise in revision, layout, and production.

Equivalent to ENGL 503 (2010-2011 Catalog)

Prerequisite(s): 6 credits of English courses numbered above 300, including one of 382, 384, 396, 397, 398, 388, 492, 494, 486, or 497; or permission of department.
ENGH 504 - Internship

Credits: 1-6 (RD)
Under supervision of a faculty director, students report and reflect on their work as interns at organizations of their choosing, usually in writing and/or editing positions. For 3 credits, students work on site at least 135 hours as specified in the agreement developed with the internship supervisor and approved by the faculty director.

Equivalent to ENGL 504 (2010-2011 Catalog)

Prerequisite(s): Permission of internship director.

Notes: Contact the English Department one semester prior to enrollment. May be repeated for a maximum of 6 credits.

ENGH 505 - Document Design

Credits: 3 (NR)
Theory and practice of using computer programs to design and produce publications including brochures, fliers, newsletters, and small magazines. Includes readings, writing papers, and producing and editing copies and original publications.

Equivalent to ENGL 505 (2010-2011 Catalog)

ENGH 506 - Research for Narrative Writing

Credits: 3 (NR)
Combines study of basic research tools with field work and writing workshop experience. Helps students develop techniques and skills necessary for writing a research-dependent project of sufficient complexity to be of book or long essay length. Emphasis on finding story behind facts, using material from numerous sources.

Equivalent to ENGL 506 (2010-2011 Catalog)

Prerequisite(s): ENGL 565/ENGH 565 or ENGL 566/ENGH 566, or permission of instructor.
ENGH 507 - Web Authoring and Design

Credits: 3 (NR)
Provides a rhetorical foundation for web authoring and design in professional settings. Teaches basic principles of writing for the web, information architecture, coding for accessibility, and usability testing. Production-oriented component provides instruction in writing valid code and practice with web- and graphic-editing software tools.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ENGH 508 - Digital Rhetoric

Credits: 3 (NR)
Provides an examination of major works on digital rhetoric and digital media framed by contemporary rhetorical theories that inform the emergent field of digital rhetoric. Course work includes projects that engage in the design, analysis, and assessment of digital media.

Equivalent to ENGL 508 (2010-2011 Catalog)

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ENGH 511 - Styles and Modes in Literary History

Credits: 3 (NR)
Historical consideration of principal styles, modes, and intellectual paradigms in literary and cultural texts.

Equivalent to ENGL 511 (2010-2011 Catalog)

Prerequisite(s): 15 credits of advanced undergraduate work and approval of the department.

Notes: Baccalaureate degree highly recommended.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ENGH 512 - Issues in Literature and Philosophy

Credits: 3 (NR)
Interdisciplinary seminar offering opportunity to arrive at a personal synthesis of work previously done in philosophy and literature. Topic changes yearly, but focuses on themes or methodologies common to both disciplines.

Equivalent to ENGL 512 (2010-2011 Catalog)

Prerequisite(s): Graduate or senior standing, 6 credits of upper-level English, 6 credits of philosophy, and permission of instructor.
ENGH 513 - Advanced Special Topics in English

Credits: 3 (RT)
Intensive study of topics involving literary or other texts such as film, television, opera, and folklore.

Equivalent to ENGL 513 (2010-2011 Catalog)

Prerequisite(s): 15 credits of advanced undergraduate English courses and permission of department; or baccalaureate degree.

Notes: May be repeated for a maximum of 6 credits with permission of department.

ENGH 514 - Theories of Comparative Literature

Credits: 3 (NR)
Intensive study of major theories of comparative literature with special emphasis on development and redefinition of comparative outlook, from Great Books and Western Canon to transnationalism, multiculturalism, and intercultural studies.

Equivalent to CL 514

Prerequisite(s): CL 300 and senior standing, or baccalaureate degree; or permission of instructor.

ENGH 526 - Special Topics in the History and Criticism of Children's Literature

Credits: 3 (RD)
Focuses on the history and criticism of children's literature by concentrating on selected historical periods and literary modes such as "Golden Age" children's literature, contemporary fantastic and children's literature, or Romantic and Victorian children's literature.

Equivalent to ENGL 526 (2010-2011 Catalog)

Notes: May be repeated for a maximum of 6 credits with permission of instructor.
**ENGH 551 - Literary Criticism**

Credits: 3 (NR)
Studies in selected critical theories pertinent to textual and cultural analysis.

Equivalent to ENGL 551 (2010-2011 Catalog)

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**ENGH 555 - Introduction to Cinema Studies**

Credits: 3 (NR)
Advanced introduction to film study, including overview of approaches to study of cinema, methods of close analysis, basic concepts of film form and style, and contemporary theories of film.

Equivalent to ENGH 372 and ENGL 332 (2010-2011 catalog)

**Notes:** Students who have taken ENGL 332/ENGH 372 may not take this course for credit.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**ENGH 564 - Form of Poetry**

Credits: 3 (NR)
Students seeking permission must submit typed manuscript of original poetry. Intensive study of and practice in formal elements of poetry through analyzing models and weekly or biweekly writing assignments. Intended for students already writing original poetry. Covers rhyme, meter, rhythm, lineation, stanza pattern, traditional and experimental forms, free verse and open-form composition, lyric, narrative, and dramatic modes.

Equivalent to ENGL 564 (2010-2011 Catalog)

**Prerequisite(s):** Admission to MFA concentration in poetry; ENGL 464/ENGH 494 or equivalent, or permission of instructor.

**Notes:** Other interested students should contact the English Department at (703) 993-1180.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**ENGH 565 - Forms of Nonfiction**

Credits: 3 (NR)
Intensive study of and practice in various forms of nonfiction writing through analyzing models and weekly writing assignments. Includes biographies, documentaries, editorials, interviews, reports, reviews, and essays.
Equivalent to ENGL 565 (2010-2011 Catalog)

Prerequisite(s): Admission to MFA concentration in nonfiction; ENGL 489/ENGH 486 or equivalent, or permission of instructor.

Notes: Other interested graduate students should contact the English Department at (703) 993-2763.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**ENGH 566 - Forms of Fiction**

Credits: 3 (NR)

Students seeking permission must submit typed manuscript of original fiction. Intensive practice in formal elements of fiction through analyzing models and weekly or biweekly writing assignments. Intended for students already writing original fiction. Covers description, narration, plot, dialogue, voice, point of view, style, epiphany, and antifiction techniques.

Equivalent to ENGL 566 (2010-2011 Catalog)

Prerequisite(s): Admission to MFA concentration in fiction; ENGL 458/ENGH 492 or equivalent or permission of instructor.

Notes: Other interested graduate students should contact the English Department at (703) 993-1180.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**ENGH 590 - Topics in Folk Narrative**

Credits: 3 (RD)

Explores types of folk narratives such as mythology, folktale, fairy tale, legend, family narrative, personal narrative. Focuses on tales from around the world. Considers aspects of storytelling such as storytelling as performance, storytelling as therapeutic modality, and storytelling during crises and conflicts.

Equivalent to ENGL 590 (2010-2011 Catalog)

Notes: May be repeated for a maximum of 9 credits when topic is different.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**ENGH 591 - Topics in Folklore Studies**

Credits: 3 (RT)

Explores folklore and folklife topics such as folk narrative and story telling, folklore and literature, folksong, and folk arts.

Equivalent to ENGL 591 (2010-2011 Catalog)
Notes: May be repeated for a maximum of 12 credits when topic is different.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**ENGH 592 - Historical Studies of the English Language**

Credits: 3 (NR)
Either a chronological survey of development of English from Old and Middle English to Modern English and American English; or intensive study of grammar and syntax of Old English as literary language in representative texts of period.

Equivalent to ENGL 592 (2010-2011 Catalog)

Notes: May be repeated for credit with permission of department.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**ENGH 604 - Internship in Folklore**

Credits: 1-6 (NR)
Unpaid, approved work-study positions at specific sites arranged by interested students and their advisor. Under supervision of faculty advisor, student works as intern with site supervisor in agency of student's choosing, given advisor's permission.

Equivalent to ENGL 604 (2010-2011 Catalog)

Prerequisite(s): A course in folklore, which may be taken concurrently.

Notes: For 3 credits, students work 120 hours on site and write 3,500 words, or equivalent, given contract with advisor. Contact English Department one semester prior to enrollment.

Hours of Lecture or Seminar per week: 1-12
Hours of Lab or Studio per week: 0

**ENGH 608 - Craft Seminars**

Credits: 3 (RT)
Non-MFA students seeking permission must submit manuscript of original written work in appropriate genre. Various sections offer work in fiction, poetry, and nonfiction, each focusing in different ways on the practices and the craft development of writers. Numerous writing assignments mixed with reading followed by careful analytical and craft discussions.

Equivalent to ENGL 608 (2010-2011 Catalog)

Prerequisite(s): Admission to MFA program or ENGL 464/ENGH 494, ENGL 458/492, ENGL 489/486, or permission of instructor. Non-MFA students must submit manuscript for review prior to registration.

Notes: Assignments vary with genre and specific topic. May be taken concurrently with ENGH 564, 565, 566.
**ENGH 610 - Proseminar in Teaching the Reading of Literature**

Credits: 3 (NR)
Methods of teaching literature. Includes study of methods of literary analysis, and ways of developing student responses to literature, with some classroom practice.

Equivalent to ENGL 610 (2010-2011 Catalog)

**Notes:** Does not satisfy Virginia certification requirement in diagnostic or developmental reading.

**ENGH 611 - Studies in Rhetoric**

Credits: 3 (NR)
Reading and discussion of several major texts that address patterns of discourse, communication, and other issues of rhetoric.

Equivalent to ENGL 611 (2010-2011 Catalog)

**Notes:** Content varies. Recent offerings include 20th century rhetoric, collaborative writing, and computers and rhetoric. May be repeated for credit with permission of department.

**ENGH 612 - Cultures of Professional Writing**

Credits: 3 (NR)
Students work as ethnographers, studying selected sites where people write professionally, and analyzing ways production and reception of writing contribute to and result from local culture of each site. Lecture and workshop format.

Equivalent to ENGL 612 (2010-2011 Catalog)

**ENGH 613 - Technical Communication**
Credits: 3 (NR)
Intensive study of theory and practice of technical and scientific writing, with emphasis on writing for variety of audiences. Focuses on writing and evaluating formal reports, articles for lay and technical audiences, proposals, theses, manuals, and other forms of technical prose.

Equivalent to ENGL 613 (2010-2011 Catalog)

Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0

**ENGH 614 - Internship in the Teaching of Writing**

Credits: 1-3 (NR)
Internships provide experience working in a teaching program such as school or writing center. Under direction of faculty member, students must secure cooperation of on-site supervisor.

Equivalent to ENGL 614 (2010-2011 Catalog)

Notes: Students work minimum 3 hours per week per credit to be awarded, keep a weekly reflective and analytical log, and communicate regularly with faculty director. May not be repeated for credit.

Hours of Lecture or Seminar per week: 1-5  
Hours of Lab or Studio per week: 0

**ENGH 615 - Proseminar in Composition Instruction**

Credits: 3 (NR)
Methods of teaching expository writing. Includes consideration of planning courses, practice in teaching and grading papers, and study of recent developments in teaching writing.

Equivalent to ENGL 615 (2010-2011 Catalog)

Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0

**ENGH 616 - Nonfiction Writing Workshop**

Credits: 1-6 (RD)
Intensive practice in craft of nonfiction and study of creative process. Intended for students already familiar with traditional and contemporary nonfiction, and already writing original nonfiction.

Equivalent to ENGL 616 (2010-2011 Catalog)

Prerequisite(s): ENGL 565/ENGH 565, which may be taken concurrently, and permission of instructor, except for MFA students in concentration.

Notes: At discretion of instructor, reading may be required. May be repeated for credit with permission of department.
ENGH 617 - Poetry Writing Workshop

Credits: 1-6 (RD)
Intensive practice in craft of poetry and study of creative process. Intended for students already familiar with traditional and contemporary poetic modes and already writing original poetry.

Equivalent to ENGL 617 (2010-2011 Catalog)

Prerequisite(s): ENGL 564/ENGH 564, which may be taken concurrently, and permission of instructor, except for MFA students in concentration.

Notes: At discretion of instructor, reading may be required. May be repeated for credit with permission of department.

ENGH 618 - Fiction Writing Workshop

Credits: 1-6 (RD)
Intensive practice in craft of fiction and study of creative process. Intended for students already familiar with traditional and contemporary fiction and already writing original fiction.

Equivalent to ENGL 618 (2010-2011 Catalog)

Prerequisite(s): Admission to MFA concentration in fiction or ENGL 566/ENGH 566, which may be taken concurrently, or permission of instructor. Other interested graduate students should contact the English Department at (703) 993-1180.

Notes: At discretion of instructor, reading may be required. May be repeated for credit with permission of department.

ENGH 619 - Special Topics in Writing

Credits: 3 (RT)
Workshop course. Intensive practice in creative writing and study of creative process. Concentrates on specialized literary type other than short story, such as essay, playwriting, film writing, children's literature, travel literature, autobiography, gothic novel, and translation.

Equivalent to ENGL 619 (2010-2011 Catalog)

Prerequisite(s): Admission to MFA program.
Notes: Intended for students already writing original creative work. Other interested graduate students should contact the English department at (703) 993-1180. May be repeated for credit with permission of department.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**ENGH 625 - British Medieval**

Credits: 3 (RD)
Selected literary authors, works, or movements from 1300 to 1500, studied in Middle English.

Equivalent to ENGL 625 (2010-2011 Catalog)

Notes: Topics vary. May be repeated for a maximum of 6 credits when topic is different with permission of department.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**ENGH 630 - Early Modern**

Credits: 3 (RT)
Selected literary authors, works, or movements of English Renaissance.

Equivalent to ENGL 630 (2010-2011 Catalog)

Notes: Topics vary. May be repeated for a maximum of 9 credits with permission of department.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**ENGH 635 - Eighteenth-Century British**

Credits: 3 (RD)
Selected English literary authors, works, or movements of the 18th century.

Equivalent to ENGL 635 (2010-2011 Catalog)

Notes: Topic varies. May be repeated for a maximum of 6 credits when topic is different with permission of department.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**ENGH 640 - Nineteenth-Century British**
ENGH 640 - Nineteenth-Century American

Credits: 3 (RD)
Selected English literary authors, works, or movements of the 19th century.

Equivalent to ENGL 640 (2010-2011 Catalog)

Notes: Topics vary. May be repeated for a maximum of 6 credits when topic is different with permission of department.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ENGH 645 - Twentieth-Century British

Credits: 3 (RD)
Selected English literary authors, works, or movements of the 20th century.

Equivalent to ENGL 645 (2010-2011 Catalog)

Notes: Topics vary. May be repeated for a maximum of 6 credits when topic is different with permission of department.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ENGH 650 - Seventeenth-Century American

Credits: 3 (RD)
Selected literary authors, works, or movements of the "new world" before 1800.

Equivalent to ENGL 650 (2010-2011 Catalog)

Notes: Topics vary. May be repeated for a maximum of 6 credits when topic is different with permission of department.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ENGH 655 - Nineteenth-Century American

Credits: 3 (RD)
Selected American literary authors, works, or movements of 19th century.

Equivalent to ENGL 655 (2010-2011 Catalog)

Notes: Topics vary. May be repeated for a maximum of 6 credits when topic is different with permission of department.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
**ENGH 660 - Twentieth-Century American**

Credits: 3 (RT)
Selected American literary authors, works, or movements of the 20th century.

Equivalent to ENGL 660 (2010-2011 Catalog)

Notes: Topics vary. May be repeated for credit when topic is different with permission of department.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**ENGH 661 - Advanced Survey in African American Literature**

Credits: 3 (RD)
Intensive study of a period in African-American literature between 1800 and present with focus to be determined by instructor. Considers different genres including autobiography, fiction, drama, poetry, essays, and oral artifacts such as slave songs, spirituals, and hip-hop.

Equivalent to ENGL 661 (2010-2011 Catalog)

Notes: May be repeated for a maximum of 6 credits when topic is different with permission of department.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**ENGH 665 - Texts in Global Contexts**

Credits: 3 (RT)
Examines various cultural texts such as literature, drama, film, and folklore in terms of transnational circulation or production and reception in locations around the world other than Britain and United States. Engages with issues arising from globalization of English and interplay of global cultures.

Equivalent to ENGL 665 (2010-2011 Catalog)

Notes: Texts studied in English or English translation. May be repeated for a maximum of 6 credits with permission of department.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**ENGH 670 - Visual Culture: Theories and Histories**

Credits: 3 (RT)
Advanced study in histories of visual representation including film, television, and video, and in theories of production and circulation of meanings in visual culture.
Equivalent to ENGL 670 (2010-2011 Catalog)

Prerequisite(s): Introductory film course, or permission of instructor.

Notes: May be repeated for a maximum of 6 credits with permission of department.

Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0

ENGH 675 - Feminist Theory and Criticism

Credits: 3 (NR)  
Presents historically based introduction to major debates within feminist theory and criticism. Stressing gender in literature and its interpretation, explores diverse collection of feminist interpretive practices.

Equivalent to ENGL 675 (2010-2011 Catalog)

Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0

ENGH 676 - Introduction to Cultural Studies

Credits: 3 (NR)  
Advanced introduction to theoretical practice known as cultural studies, with attention to role in textual studies. Part of interdisciplinary cultural studies PhD and MA in English programs.

Equivalent to ENGL 676 (2010-2011 Catalog)

Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0

ENGH 681 - Advanced Topics in Folklore Studies

Credits: 3 (RD)  
Explores advanced folklore and folklife topics such as bodylore, sense of place, festival, folk drama, and folk narrative studies.

Equivalent to ENGL 681 (2010-2011 Catalog)

Notes: May be repeated for a maximum of 12 credits when topic is different.

Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0  
When Offered: Fall, Spring
ENGH 684 - Proseminar in Poetry

Credits: 3 (RD)
For students working on independent reading and research in poetry. Designed for students preparing to take the MFA reading exam in poetry but open to others with comparable reading projects in poetry.

Equivalent to ENGL 684 (2010-2011 Catalog)

Notes: May be repeated for a maximum of 6 credits.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
Grading: Satisfactory/No credit only

ENGH 685 - Selected Topics, Movements, or Genres of Literature in English

Credits: 3 (RT)
Content varies.

Equivalent to ENGL 685 (2010-2011 Catalog)

Notes: May be repeated for a maximum of 12 credits with permission of department.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ENGH 695 - Northern Virginia Writing Project Inservice Program

Credits: 1-3 (RT)
Offered at request of school division or other education agency to assist teachers in improving student writing and use of writing to learn.

Equivalent to EDUC 695; ENGL 695 (2010-2011 Catalog)

Prerequisite(s): Admission to graduate program, or permission of department.

Notes: Content varies. May be repeated for credit with permission of department.

Hours of Lecture or Seminar per week: 1-5
Hours of Lab or Studio per week: 0

ENGH 696 - Northern Virginia Writing Project Teacher/Research Seminar

Credits: 3 (NR)
Acquaints classroom teachers with current research on composing as well as methods of studying writing in school settings. Participants collect data and write up results of their research.
PREREQUISITE(S): ENGL 615/ENGH 615, ENGL 695/ENGH 695, the Northern Virginia Writing Project Summer Institute, or other course in the teaching of writing.

HOURS OF LECTURE OR SEMINAR PER WEEK: 3
HOURS OF LAB OR STUDIO PER WEEK: 0

ENGH 697 - Composition Theory

Credits: 3 (NR)
Acquaints classroom teachers with theory relating to writing and teaching composition. Focuses on explaining theories of participants, reading works of leading theorists, and developing statement describing implications of theoretical consistency in teaching writing.

Equivalent to EDUC 697 and ENGL 697 (2010-2011 Catalog)

HOURS OF LECTURE OR SEMINAR PER WEEK: 3
HOURS OF LAB OR STUDIO PER WEEK: 0

ENGH 699 - Workshop in English

Credits: 1-3 (RT)
Concentrated workshops, educational tours, independent studies, and special seminars dealing with selected topics in writing, linguistics, film, electronic media, and literature written in English.

Equivalent to ENGL 699 (2010-2011 Catalog)

PREREQUISITE(S): Admission to MFA program or permission of department.

NOTES: All tours are optional, and may be replaced by specified work conducted on campus. May be repeated for a maximum of 12 credits with permission of department, but no more than 6 credits of ENGH 699 may be applied to master's degree in English. No more than 3 credits of 699 may be applied to literature requirement for MFA degree.

HOURS OF LECTURE OR SEMINAR PER WEEK: 1-3
HOURS OF LAB OR STUDIO PER WEEK: 0

ENGH 701 - Research in English Studies

Credits: 3 (NR)
Introduces research in English studies, including practice in library methods, writing critical bibliography, evaluating issues and problems, and surveying scholarly activities in department.

Equivalent to ENGL 701(2010-2011 Catalog)
ENGH 702 - Research Methods in Rhetoric and Writing

Credits: 3 (NR)
Explores a variety of text-based and empirical approaches and methods for addressing questions and problems related to public rhetoric and writing programs. Seminar participants work through a complete research design and pilot study.

ENGH 705 - Literary Theory and Criticism

Credits: 3 (RD)
Major theories of literature and methods of analyzing and evaluating literary works.

Equivalent to ENGL 705 (2010-2011 Catalog)

Notes: Topics vary. May be repeated for a maximum of 6 credits when topic is different with permission of department.

ENGH 720 - Histories of Institutional Rhetorics

Credits: 3 (NR)
Examines the development of rhetorics within their historical and institutional contexts. Investigates rhetoric and rhetoricians across the development of oral rhetorics and the shift to written genres, the rise of scientific discourses, and the establishment of educational and bureaucratic organizations.

ENGH 722 - Composition Pedagogies and Programs in Context

Credits: 3 (NR)
Examines scholarship on pedagogy, curriculum design and assessment, faculty development, and program management related to the practice of teaching or training writers in an institutional setting: two- and four-year colleges, K-12 schools, and workplace training seminars. Students will complete independent projects analyzing a current or potential writing program.
ENGH 724 - Professional Writing Theory and Research

Credits: 3 (NR)
Examines current research in the field and the theories that inform it. Special emphasis is placed on workplace contexts and users in technological contexts. Course may include theories and methods such as activity theory, actor-network theory, complexity theory, cross-cultural rhetoric, digital rhetoric, discourse analysis, ethnography, genre theory, usability, and systems theory.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ENGH 726 - Rhetorical Theory and Public Spaces

Credits: 3 (NR)
Covers the major theories of public rhetoric and the public sphere; explores how rhetoric influences public perceptions; examines publics as a site of interpretive mediation.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ENGH 740 - Seminar in English/Cultural Studies

Credits: 3 (RD)
Analyzes historical shifts in literary and cultural discourse or of relationships between literary and nonliterary elements of culture within specific historical moment.

Equivalent to ENGL 740 (2010-2011 Catalog)

Prerequisite(s): 9 credits of graduate English courses including ENGL 701/ENGH 701, or permission of department.

Notes: Major research paper required. Topics vary. May be repeated for a maximum of 6 credits when topic is different with permission of department.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ENGH 750 - Advanced Workshop in Poetry Writing

Credits: 3 (RD)
Intensive practice in craft of poetry for experienced writers.

Equivalent to ENGL 750 (2010-2011 Catalog)

Prerequisite(s): Admission to MFA concentration in poetry, ENGL 564/ENGH 564, and ENGL 617/ENGH 617.

Notes: May be repeated for credit with permission of department.
ENH 751 - Advanced Workshop in Fiction Writing

Credits: 1-6 (RD)
Intensive practice in craft of fiction for experienced writers.

Equivalent to ENGL 751 (2010-2011 Catalog)

Prerequisite(s): Admission to MFA concentration in fiction, ENGL 566/ENGH 566, and ENGL 618/ENGH 618.

Notes: May be repeated for credit with permission of department.

ENH 752 - Advanced Workshop in Nonfiction Writing

Credits: 1-6 (RD)
Intensive practice in craft of nonfiction for experienced writers.

Equivalent to ENGL 752 (2010-2011 Catalog)

Prerequisite(s): Admission to MFA concentration in nonfiction, ENGL 565/ENGH 565 and ENGL 616/ENGH 616.

Notes: May be repeated for credit with permission of department.

ENH 790 - Projects in Literary Studies

Credits: 3 (NR)
Students complete a capstone project guided by instructor and a faculty consultant based on work produced in a previous graduate course. Class meetings focus on building skills in research, revision, and editing, discussing topics related to professionalization both in and out of academia, and revising work in a workshop environment. Students will produce a professional-quality article or similar final project.

Prerequisite(s): 21 credits in MA coursework including ENGH 701, permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
Grading: Satisfactory/No Credit
When Offered: Spring.
ENGH 797 - Projects in Professional Writing and Rhetoric

Credits: 3 (NR)
Students complete a capstone project guided by instructor and a faculty consultant. Reflecting on theories and methods learned in previous course work and applying them to a concrete rhetorical situation, students produce a professional-quality project for a primary audience located in the professional workplace or the discipline of rhetoric and professional writing.

Equivalent to ENGL 797 (2010-2011 Catalog)

Prerequisite(s): 21 credits in MA coursework, including the core, theory, PWR and Writing requirements, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
Grading: S/NC

ENGH 798 - Directed Reading and Research

Credits: 1-6 (RT)
Reading, research, and writing on specific project under direction of department member.

Equivalent to ENGL 798 (2010-2011 Catalog)

Prerequisite(s): Open only to degree students who have preregistered and have completed 15 credits, including ENGL 701/ENGH 701.

Notes: Oral or written report required. For MA students: May be repeated for a maximum of 6 credits with permission of department. For MFA students: May be repeated for a maximum of 12 credits; 12 credits may be applied to the MFA requirements but no more than 3 credits may count toward completing the literature requirement.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0
Grading: Graduate Special

ENGH 799 - Thesis

Credits: 1-6 (RD)
Students who take ENGH 798 to develop thesis topic and then elect thesis option receive 3 credits for ENGH 799 on completion of thesis. Students who do not take ENGH 798, or who take it to work on project unrelated to thesis, receive up to 6 credits for ENGH 799 on completion of thesis.

Equivalent to ENGL 799 (2010-2011 Catalog)

Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 0
Grading: S/NC
ENGH 822 - Studies in Composition

Credits: 3 (RT)
Offers advanced study of theoretical, practical, or pedagogical topics related to composition.

Notes: May be repeated for a maximum of 12 credits when topic is different.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ENGH 824 - Studies in Professional Writing

Credits: 3 (RT)
Offers advanced study of theoretical, practical, or pedagogical topics related to professional writing and technical communication.

Notes: May be repeated for a maximum of 12 credits when topic is different.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ENGH 826 - Studies in Public Rhetorics

Credits: 3 (RT)
Offers advanced study of theoretical, practical, or pedagogical topics related to public rhetorics.

Notes: May be repeated for a maximum of 12 credits when topic is different.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ENGH 897 - Directed Research

Credits: 1-3 (RD)
Reading, research, and writing on a specific project under direction of faculty member.

Prerequisite(s): Permission of Instructor.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0
Grading: Satisfactory/No Credit

ENGH 898 - Qualifying Exams Seminar
Credits: 1-3 (RD)
Work on PhD qualifying exams.

Prerequisite(s): Completion of 36 credits in coursework in the writing and rhetoric PhD Program.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0
Grading: Satisfactory/No Credit.

ENGH 998 - Doctoral Dissertation Proposal

Credits: 1-6 (RD)
Work on research proposal that forms the basis for the doctoral dissertation.

Prerequisite(s): Advancement to candidacy.

Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 0
Grading: Satisfactory/No Credit

ENGH 999 - Doctoral Dissertation

Credits: 1-12 (RD)
Doctoral dissertation research and writing under direction of student’s dissertation committee.

Prerequisite(s): Completion of ENGH 898.

Hours of Lecture or Seminar per week: 1-12
Hours of Lab or Studio per week: 0
Grading: Satisfactory/No Credit

Environmental Science and Public Policy (EVPP)

Offered by the College of Science

See additional course work under Biology (BIOL), Chemistry (CHEM), Public and International Affairs (PUAD), School of Public Policy (PUBP), Geography (GEOG), and Geology (GEOL)

EVPP 110 - The Ecosphere: An Introduction to Environmental Science I

Credits: 4 (NR)

Studies components and interactions that make up natural systems of our home planet. Teaches basic concepts in biological, chemical, physical, and earth sciences in integrated format with lecture, laboratory, and field exercises.
Designated a Green Leaf Course.

Fulfills general education requirement in natural science (lab).

Notes: One of two semesters of environmental lab science that fulfills general education science requirements for non science majors. Along with EVPP 111, can be taken in any order.

**EVPP 111 - The Ecosphere: An Introduction to Environmental Science II**

Credits: 4 (NR)

Studies components and interactions that make up natural systems of our home planet. Teaches basic concepts in biological, chemical, physical, and Earth sciences in integrated format with lecture, laboratory, and field exercises. Designated a Green Leaf Course.

Fulfills general education requirement in natural science (lab).

Notes: One of two semesters of environmental lab science that fulfills general education science requirements for non science majors. Along with EVPP 110, can be taken in any order.

**EVPP 201 - Environment and You: Issues for the Twenty-First Century**

Credits: 3 (NR)

Introduces broad aspects of human-environmental interactions in the contemporary world. Topics range broadly from global populations and wastewater treatment to environmental law, and genetic engineering. Includes both science and science policy of the environment. Designated a Green Leaf Course.

Fulfills general education requirement in natural science (nonlab).

**EVPP 305 - Environmental Microbiology Essentials**

Credits: 3 (NR)

Provides understanding of microbes and their function as a vital part of an environmental education. The role of microbes is central to many environmental issues such as climate change, biodegradation of toxics, wastewater treatment and drinking water
contamination. Course provides an introduction to the breadth of microbiology including essential information for students studying environmental problems and their solution.

**Prerequisite(s):** EVPP 110 and 111 or BIOL 213, and 30 semester hours, or Permission of Instructor.

**Corequisite(s):** EVPP 306

**Notes:** Laboratory section (EVPP 306 proposed) is a corequisite unless previously completed

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 3  
**When Offered:** Fall, Spring, Summer

---

**EVPP 306 - Environmental Microbiology Essentials Laboratory**

Credits: 1 (NR)  
Laboratory study of environmental microbiology. Course provides an introduction to the microbiological techniques for students studying environmental problems and their solution. Examples include wastewater treatment - a microbial reactor metabolizing organic matter, drinking water quality - is based on detection and quantification of coliform bacteria, visualization of bacteria in their natural habitat.

**Prerequisite(s):** EVPP 110 and 111 or BIOL 213, and 30 semester hours

**Corequisite(s):** EVPP 305

**Notes:** Lecture section (EVPP 305 proposed) is a corequisite.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 3  
**When Offered:** Fall, Spring, Summer

---

**EVPP 318 - Conservation Biology**

Credits: 3 (NR)  
Introduces science used to identify species in need of conservation, and techniques to manage and protect organisms.

Equivalent to BIOL 318

**Prerequisite(s):** BIOL 307 and 311.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**EVPP 322 - Business and Sustainability**

Credits: 3 (NR)
Examines the types of approaches businesses can take to respond to sustainability concerns. Designed to prepare students for assisting organizations to incorporate sustainability considerations into their strategic decision-making. Designated a Green Leaf Course.

Prerequisite(s): 30 credit hours, recommend EVPP 361/GOVT 361 - Introduction to Environmental Policy

Notes: Students from multiple disciplines (business, social sciences, natural sciences, humanities, education, etc.) can participate in the class without having had previous courses in management.

**EVPP 335 - People, Plants, and Culture**

Credits: 3 (NR)

Introduces students to the complex interactions of people and plants in historical and contemporary times. The course is team taught by professors of both natural and social science. The instructors will lend their expertise to fully address the fundamental links between botany, human ecology, and environmental health and sustainability. Designated a Green Leaf Course.

Fulfills general education requirement in synthesis.

Prerequisite(s): Completion or concurrent enrollment in all other required general education courses.

**EVPP 336 - Human Dimensions of the Environment**

Credits: 3 (NR)

Overview of current knowledge regarding human and environment interactions and human ecology. Topics include basic theoretical and conceptual issues, relationship between social and biological sciences, human causes and consequences of environmental change, and contemporary perspectives on environmental issues. Designated a Green Leaf Course.

Prerequisite(s): One of EVPP 110, EVPP 111, GEOL 101, SOCI 101, or ANTH 114

**EVPP 337 - Environmental Policy Making in Developing Countries**

George Mason University 2013-2014 Official University Catalog 2243
Overview of environmental policy process in developing countries around the world. Major focus on understanding distinctive problems and dynamics of environmental policy making in poor countries to generate better policy decisions and management. Designated a Green Leaf Course.

Fulfills writing intensive requirement in the global affairs major.

**Prerequisite(s):** 60 credits.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**EVPP 338 - Economics of Environmental Policy**

Credits: 3 (NR)

Introduction to environmental, resource, and ecological economics for non-economist undergraduates. Covers basic theories of scarce resource allocation and examines conditions under which market allocations are efficient and sustainable. Includes graphical and verbal presentation of theory. Designated a Green Leaf Course.

**Prerequisite(s):** ECON 100 or ECON 103 or ECON 105 or ECON 110, or permission from instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**EVPP 350 - Freshwater Ecosystems**

Credits: 4 (NR)

Studies physical, chemical, and biological processes in lakes, streams, and wetlands. Teaches physical and chemical aspects of aquatic systems and life cycles, and adaptations of aquatic organisms. Lectures, field trips, lab exercises.

Equivalent to BIOL 350

**Prerequisite(s):** Either CHEM 211/212 or CHEM 155/156 and either EVPP 110/111 or BIOL 307.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 3

---

**EVPP 355 - Ecological Engineering and Ecosystem Restoration**

Credits: 4 (NR)
Provides definition, classification, and practice of ecological engineering and ecosystem restoration. Describes general system ecology, ecosystem restoration (i.e., wetland and river systems), and the use of natural processes to provide ecosystem services to society. Provides students with a systems-oriented perspective on designing and managing ecosystems. Students will study principles in designing field ecological studies, ecological models, ecological engineering, and explore practices in sustainable ecological design by carrying out a hands-on experimental design project with the field wetland mesocosm on the Mason campus. One field trip is required part of the course. Designated a Green Leaf Course.

Equivalent to BIOL 355

**Prerequisite(s):** CHEM 211, BIOL 308, PHYS 243 and/or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 3

### EVPP 361 - Introduction to Environmental Policy

Credits: 3 (NR)

Environmental politics and policymaking since the 1970s. Primary focus on United States, with some discussion of global issues. Examines policy strategies and outcomes, ethical and economic debates, political controversies, lawmaking and enforcement, and role of key players. Designated a Green Leaf Course.

Equivalent to GOVT 361

**Prerequisite(s):** 30 credit hours

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

### EVPP 362 - Intermediate Environmental Policy

Credits: 3 (NR)

Examines environmental issues building on learning objectives from EVPP 361. Focuses on environmental and policy issues in the US and internationally, exploring the politics of nature and the interaction of environmental science and politics and resulting controversy. Risk and uncertainty loom large in most environmental issues. "Natural" disasters as well as direct "man-made" problems will be covered. Designated a Green Leaf Course.

**Prerequisite(s):** EVPP 361 or GOVT 361 or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall, Spring
EVPP 363 - Coastal Morphology and Processes

Credits: 4 (NR)
Studies global coastal geomorphology and processes with emphasis on U.S. Atlantic and gulf coasts. Topics include plate tectonics; sea-level changes; sediment supply; impact of waves, tides, and storms; and human activities. Lectures and extended weekend field trips to mid-Atlantic coast.

Equivalent to EVPP 563/GEOL 363

Prerequisite(s): GEOL 309, BIOL 309, or GEOL 317; or 9 credits in geography, including GGS 309.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 3

EVPP 377 - Applied Ecology

Credits: 3 (NR)
Introduces ecosystem concepts and applications to natural and managed ecosystems.

Equivalent to BIOL 377

Prerequisite(s): 60 credits, including 8 credits of biology, geology, or chemistry; or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EVPP 378 - Ecological Sustainability

Credits: 4 (NR)

Introduces the concepts and applications of several important topics relating to ecological sustainability. Focuses on the role of soils in maintaining and managing environmental quality. The Teaches students how to understand and interpret scientific data presented in various types of literature covering ecological sustainability.
Designated a Green Leaf Course.

Designated as a research and scholarship intensive course.

Equivalent to BIOL 379.

Prerequisite(s): BIOL 308 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 3
When Offered: Spring.
**EVPP 380 - Wetlands of the World**

Credits: 4 (NR)
A study of the ecosystems of the world. Emphasizes different types of wetland ecosystems and their services, including water quality, coastal protection, flood mitigation, and wildlife protection. The course includes trips to local wetlands and to the Everglades National Park.

**Prerequisite(s):** BIOL 308 or 310 or EVPP 110-111 or permission of instructor.

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0
**When Offered:** Spring

---

**EVPP 395 - Undergraduate Research in Environmental Science and Policy**

Credits: 1-3 (RD)
Original research project. May involve field and lab study, computer modeling and analysis, or other original research as appropriate. Research formulated and completed under instructor's guidance.

**Prerequisite(s):** 45 credits including at least two upper-level science lab courses.

**Notes:** Culminates in final report. May be repeated for total 10 credits.

**Hours of Lecture or Seminar per week:** 1-6
**Hours of Lab or Studio per week:** 0

---

**EVPP 396 - Directed Topic in Environmental Science and Policy**

Credits: 1-4 (RD)
Study of topics not available in fixed-topics courses. May involve readings, lectures, lab assignments, and tutorials as jointly agreed on by student and instructor.

**Prerequisite(s):** 45 credits.

**Notes:** Culminates in term paper, final exam, or both. May be repeated for maximum 8 credits.

**Hours of Lecture or Seminar per week:** 1-9
**Hours of Lab or Studio per week:** 0

---

**EVPP 408 - Mushrooms, Molds and Society**

Credits: 3 (NR)
Provides a modern, comprehensive knowledge of fungal biology including classification, phylogeny, structure, physiology/metabolism, growth and development, genetics, industrial applications including biotechnology, ecological roles including pathogenic interactions with plants, animals, and man.
Prerequisite(s): EVPP 110 and 111 or BIOL 213.

Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0  
When Offered: Spring

**EVPP 409 - Medical Mycology**

Credits: 3 (NR)  
Provides the student with current knowledge of both the medical and microbiological aspects of fungal diseases in humans, including the etiologic agents, geographic distribution, epidemiology, transmission, determinants of pathogenicity, laboratory detection, and therapy associated with the major human mycoses.

Prerequisite(s): EVPP 110 and 111 or BIOL 213.

Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0  
When Offered: Summer

**EVPP 419 - Marine Mammal Biology and Conservation**

Credits: 3 (NR)  
Covers the evolution, biology, ecology, and behavior of marine mammals from polar bears and sea otters to whales and dolphins. Marine mammal conservation and policy is also a major component of the course; several lecture sessions are devoted to the issue of whaling, threats to marine mammal populations, and recent conservation issues such as marine mammals and noise pollution. The course also includes a number of guest lectures from a variety of international marine mammal experts.

Equivalent to EVPP 519/BIOL 508

Prerequisite(s): BIOL/GEOL 309 or BIOL 449; 60 credit hours.

Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0

**EVPP 420 - Marine Mammal Biology and Conservation Field Course**

Credits: 1 (NR)  
This course provides laboratory, seminar sessions and field work to accompany EVPP 419-001 - marine mammal biology and conservation. Field work includes several day-long boat trips. The field course may take place in the US or abroad.

Prerequisite(s): EVPP 419 or BIOL 454

Corequisite(s): EVPP 419 or BIOL 454

Hours of Lecture or Seminar per week: 1  
Hours of Lab or Studio per week: 1-12  
When Offered: Summer
EVPP 421 - Marine Conservation

Credits: 3 (NR)

Provides an overview of threats to the marine environment, and discusses the scientific, socioeconomic, and political issues behind marine conservation. Covers categories of marine pollutants (chemical, biological, and physical contaminants) and their impacts on the marine ecosystem, as well as impacts on humans (health, social, and economic), threats to key marine species (e.g., coral, sharks, turtles, and marine mammals) and initiatives and laws developed to reduce these threats. Scientific and socioeconomic problems that hinder sustainable fisheries management and the science and policy behind the global warming debate are also discussed. Provides an overview of marine environmental law and policy issues related to marine conservation policy.
Designated a Green Leaf Course.
Equivalent to EVPP 521/Biol 507

Prerequisite(s): BIOL/GEOL 309 and completed or concurrent enrollment in all other required general education courses.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EVPP 430 - Fundamentals of Environmental Geographic Information Systems

Credits: 3 (NR)
Provides the basic knowledge to explore complex environmental data sets and relationships among biological, ecological, physical and anthropogenic variables using geographic information systems. Using spatial mapping and exploration tools students will be capable of independent analysis of complex environment.

Prerequisite(s): EVPP 110 and 111, and IT 103 or CDS 103, and 60 credits or Permission of Instructor.

Notes: Previous knowledge of fundamentals of geography, coordinate systems and map projections is an asset. Knowledge of operating systems, text editor and spreadsheet is required.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Summer

EVPP 432 - Energy Policy

Credits: 3 (NR)
Overview of energy policy issues, including different energy sources, electricity generation, efficiency and conservation, energy economics, related energy issues, such as climate change, energy in a global context, transmission of power, and others. Updated yearly. One field trip is part of the course.

Prerequisite(s): 60 credits and EVPP 361/GOVT 361, or Permission of Instructor

Hours of Lecture or Seminar per week: 3
EVPP 436 - The Human Dimensions of Global Climate Change

Credits: 3 (NR)
Social science investigation of humans' role(s) in global climate change, including diversity of ecological, cultural and policy issues. Focuses on current science, causes and responses, human rights and social justice, vulnerability of marginalized populations, relevant issues associated with communication and behavior change, place of policy, and the multiple existing and potential roles of academic action. Discussion format.

Prerequisite(s): EVPP 336, CLIM 101 and 60 credits, or Permission of Instructor

EVPP 445 - Principles of Environmental Toxicology

Credits: 3 (NR)
Explores basic principles of toxicology with an emphasis on the environment. Includes the history and scope of the field; absorption, distribution, metabolism and excretion of toxicants; mechanisms of toxic action; genetic toxicology; ecotoxicology as well as specific examples important toxicants. Introduces regulatory toxicology and human and ecological risk assessment.

Prerequisite(s): EVPP 110, 111 and Chem 211,212 and 60 credit hours; or permission of instructor.

EVPP 451 - Fungi and Ecosystems

Credits: 3 (NR)
Considers impact of fungi on ecosystems in terms of effects on biogeochemical cycling, primary and secondary production, and regulating community structure and populations of individual species through activities as symbionts and parasites.

Equivalent to EVPP 551; BIOL 459; BIOL 559

Prerequisite(s): BIOL 304 or course in microbiology; or permission of instructor.

EVPP 468 - Vertebrate Natural History
Credits: 4 (NR)
Introduces vertebrates with emphasis on systematics, evolution, life history, behavior, and ecology. Laboratory emphasis on identification, taxonomy, and natural history of local vertebrates.

Equivalent to BIOL 468

Prerequisite(s): BIOL 303 and BIOL 307 or permission of the instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 3
When Offered: Fall

EVPP 480 - Sustainability in Action

Credits: 4 (NR)
Provide students with valuable and tangible experience in practical aspects of realizing sustainability goals and to transfer theory into practice. Allows students to engage in real-world, sustainability-related projects that provide benefits for a target community. Identify and attempt to solve a sustainability-related problem or address a sustainability-related need in a specific target community.
Designated a Green Leaf Course.

Fulfills general education requirement in synthesis.

Prerequisite(s): Completed or concurrent enrollment in all other required general education courses; 60 credit hours completed.

Notes: Capstone course for the Sustainability Minor – see Environmental Science and Policy department listing for details.

Hours of Lecture or Seminar per week: 4
Hours of Lab or Studio per week: 3

EVPP 490 - Special Topics in Environmental Science and Policy

Credits: 0-4 (RD)
Studies selected topics in environmental science and policy using lectures, guest lectures, student presentations, or laboratory exercises.

Prerequisite(s): 60 credits, and permission of instructor.

Notes: Topics vary, but each offering has coherent syllabus. May be repeated for credit if topics are significantly different.

Hours of Lecture or Seminar per week: 1-4
Hours of Lab or Studio per week: 1-4

EVPP 503 - Field Mapping Techniques
Basic techniques for collecting, recording, and plotting spatial field data, including topographic maps, compass, transit, alidade, and global positioning systems. Field work and field-based research project.

Equivalent to GEOL 303

**Prerequisite(s):** MATH 105 or equivalent; and EVPP 110, GGS 102, or GEOL 101 or equivalent.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 6

**EVPP 505 - Selected Topics in Environmental Science**

Credits: 0-4 (RT)  
Topic depends on instructor's specialty.

**Prerequisite(s):** Course in ecology or geology, or permission of instructor.

**Hours of Lecture or Seminar per week:** 1-3  
**Hours of Lab or Studio per week:** 0-6

**EVPP 506 - Science of the Environment I**

Credits: 3 (NR)  
Environmental science is explored in this 2-semester sequence providing the foundation in chemistry (I) and biology (II) required for graduate students with social sciences backgrounds seeking a degree and career in environmental science and policy.

**Prerequisite(s):** Permission of the instructor.

**Notes:** For graduate students entering the Environmental Science and Policy or other programs. Not available to students with undergraduate degrees in the natural sciences. This course is in addition to all other degree requirements.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**EVPP 507 - Science of the Environment II**

Credits: 3 (NR)  
Environmental science is explored in this 2-semester sequence providing the foundation in chemistry (I) and biology (II) required for graduate students with social sciences backgrounds seeking a degree and career in environmental science and policy.

**Prerequisite(s):** EVPP 506 or permission of instructor.

**Notes:** For graduate students entering the Environmental Science and Policy or other programs. Not available to students with undergraduate degrees in the natural sciences. This course is in addition to all other degree requirements.
EVPP 515 - Molecular Environmental Biology I

Credits: 3 (NR)
Introduces molecular environmental biology covering basic concepts of molecular biology, molecular evolution, and bioinformatics, and application to problems in molecular and environmental biology.

Prerequisite(s): Introductory biology and genetics course, or permission of instructor.

EVPP 518 - Conservation Biology

Credits: 3 (NR)
Introduction to the science used to identify species in need of conservation, and techniques to manage and protect organisms.

Prerequisite(s): Course in Ecology.

EVPP 519 - Marine Mammal Biology and Conservation

Credits: 3 (NR)
Covers the evolution, biology, ecology, and behavior of marine mammals from polar bears and sea otters to whales and dolphins. Marine mammal conservation and policy is also a major component of the course; several lecture sessions are devoted to the issue of whaling, threats to marine mammal populations, and recent conservation issues such as marine mammals and noise pollution. The course also includes a number of guest lectures from a variety of international marine mammal experts.

Equivalent to EVPP 419/BIOL 508

EVPP 520 - Marine Mammal Biology and Conservation Field Course

Credits: 1 (NR)
This course provides laboratory, seminar sessions and field work to accompany EVPP 519-001 marine mammal biology and conservation. Field work includes several day-long boat trips. The field course may take place in the US or abroad.
Corequisite(s): EVPP 519.

Notes: At present the two week residential field course takes place in Scotland at the University (of London) Marine Biological Station, which is equipped with boats and laboratories. The course has been running for 11 years, 2 years with GMU as a special topics course.

When Offered: Summer

EVPP 521 - Marine Conservation

Credits: 3 (NR)

Provides an overview of threats to the marine environment, and discusses the scientific, socioeconomic, and political issues behind marine conservation. Covers categories of marine pollutants (chemical, biological, and physical contaminants) and their impacts on the marine ecosystem, as well as impacts on humans (health, social, and economic), threats to key marine species (e.g., coral, sharks, turtles, and marine mammals) and initiatives and laws developed to reduce these threats. Scientific and socioeconomic problems that hinder sustainable fisheries management and the science and policy behind the global warming debate are also discussed. Provides an overview of marine environmental law and policy issues related to marine conservation policy.
Designated a Green Leaf Course.
Equivalent to EVPP 421/Biol 507

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EVPP 524 - Introduction to Environmental and Resource Economics

Credits: 3 (NR)
Introduces theory of external costs and benefits, public goods, natural resource management, and benefit and cost analysis for noneconomists. Lecture-discussion format with student presentations and participation. Analytical problems set, short writing assignments, and exams.
Equivalent to GGS 524

Prerequisite(s): Basic algebra skills.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EVPP 525 - Economics of Human/Environment Interactions

Credits: 3 (NR)
Advanced topics in environmental, natural resource, and ecological economics for noneconomist. Emphasizes sustainability, intergenerational equity, and economic-ecological feedbacks. Designated a Green Leaf Course.

Equivalent to ECON 895/GGS 525

**Prerequisite(s):** EVPP 524/GGS 524 or equivalent.

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0

---

**EVPP 531 - Land-use Modeling Techniques and Applications**

Credits: 3 (NR)
Surveys literature on spatially explicit empirical models of land-use change. Offers hands-on experience developing and running simple models. Includes statistical models, mathematical programming models, cellular automata, agent-based models, and integrated models.

Equivalent to GGS 531

**Prerequisite(s):** GGS 550, or permission of instructor.

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0

---

**EVPP 532 - Animal Behavior**

Credits: 3 (NR)
Ecological aspects of animal behavior.

**Prerequisite(s):** Permission of instructor.

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0
**When Offered:** Spring

---

**EVPP 536 - Ichthyology**

Credits: 4 (NR)
Studies systematics, evolution, physiology, ecology, and behavior of fishes. Lab time used for field trips, practice in identifying species, and hands-on experience with lecture subjects.

Equivalent to BIOL 536

**Prerequisite(s):** Ecology course, or permission of instructor.
EVPP 537 - Ornithology

Credits: 4 (NR)
Study of evolution, systematics, physiology, ecology, and behavior of birds, emphasizing field work.

Prerequisite(s): Course in ecology or equivalent.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 1
When Offered: Spring

EVPP 538 - Mammalogy

Credits: 4 (NR)
Study of evolution, systematics, physiology, ecology, and behavior of mammals, emphasizing fieldwork.

Equivalent to BIOL 538

Prerequisite(s): BIOL 303 and BIOL 307 or permission of the instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 3
When Offered: Fall

EVPP 539 - Herpetology

Credits: 4 (NR)
Study of evolution, systematics, physiology, ecology, and behavior of amphibians and reptiles, emphasizing field work.

Prerequisite(s): Course in ecology or equivalent.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 1
When Offered: Spring

EVPP 543 - Tropical Ecosystems

Credits: 4 (NR)
Terrestrial, aquatic, and marine ecosystems in the tropics, emphasizing plant communities, plant-animal interactions, and role of humans in tropics.
Equivalent to BIOL 543

**Prerequisite(s):** Ecology course, and permission of instructor.

**Notes:** Requires field trip to tropics as part of lab.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 3

---

**EVPP 550 - Waterscape Ecology and Management**

Credits: 3 (NR)  
Studies physical, chemical, and biological components of freshwater ecosystems with emphasis on streams, rivers, and lakes; links between watersheds and freshwater ecosystems; and impact of human management.

Equivalent to BIOL 550

**Prerequisite(s):** A course in chemistry and a course in ecology.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**EVPP 551 - Fungi and Ecosystems**

Credits: 3 (NR)  
Considers impact of fungi on ecosystems in terms of effects on biogeochemical cycling, primary and secondary production, and regulating community structure and populations of individual species through activities as symbionts and parasites. Discusses role of fungi in ameliorating pollutants produced by anthropogenic activities.

Equivalent to EVPP 451; BIOL 459; BIOL 559

**Prerequisite(s):** BIOL 304 or course in microbiology, or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**EVPP 555 - Lab in Waterscape Ecology**

Credits: 1 (NR)  
Field and laboratory approaches to freshwater ecology with emphasis on study design, sampling methods, laboratory and data analysis, and report writing.

Equivalent to BIOL 555

**Prerequisite(s):** EVPP 550 or permission of instructor.
EVPP 563 - Coastal Morphology and Processes

Credits: 4 (NR)
Studies global coastal geomorphology and processes, emphasizing U.S. Atlantic and gulf coasts. Topics include plate tectonics; sea-level changes; sediment supply; impact of waves, tides, storms; and human activities. Lecture, extended weekend field trips to mid-Atlantic coast.

Equivalent to EVPP 363/GEOL 363

Prerequisite(s): Previous courses in geology, oceanography, marine science or physical geography; or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 3

EVPP 576 - Microbial Ecology of Soils

Credits: 3 (NR)
Surveys microbial ecology in surface and subsurface soils. Describes organisms and their function and interaction.

Equivalent to BIOL 576

Prerequisite(s): Course in microbiology or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EVPP 577 - Biogeochemistry: A Global Perspective

Credits: 3 (NR)
Structure and function of ecosystems, their interactions as components of landscapes, and contributions to the global environment. Emphasizes biogeochemical cycles of natural, disturbed, and managed ecosystems, and integration at landscape and global level as related to current ecological problems such as transfer of nonpoint source pollutants, atmospheric deposition, stratospheric ozone depletion, and global change.

Equivalent to BIOL 577

Prerequisite(s): Course in ecology and course in chemistry; or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EVPP 581 - Estuarine and Coastal Ecology
EVPP 581 - Estuarine and Coastal Ecology

Credits: 3 (NR)
Emphasizes marine biology of estuarine and coastal habitats of Chesapeake Bay region, and factors affecting distribution and abundance of organisms.

Equivalent to BIOL 581

Prerequisite(s): Course in ecology and permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EVPP 582 - Estuarine and Coastal Ecology Laboratory

Credits: 1 (NR)
Provides training in field measurement of physical and chemical parameters, and collection and identification of local organisms. Emphasizes the practice of ecological field research.

Equivalent to BIOL 582

Prerequisite(s): EVPP 581/BIOL 581

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 3

EVPP 607 - Fundamentals of Ecology

Credits: 3 (NR)
Overview of concepts in physiological, population, community, ecosystem, biogeographical and human ecology.

Equivalent to BIOL 607

Notes: Restricted to graduate students with little or no background in ecology. Students who have taken BIOL 307 or the equivalent elsewhere are ineligible for this course.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EVPP 610 - Bioremediation: Theory and Applications

Credits: 3 (NR)
Provides basis for understanding proper application of bioremedial technologies to treatment of hazardous wastes. Includes evaluation of data to determine successful treatment.

Equivalent to BIOL 610

Prerequisite(s): Courses in microbiology and either organic chemistry or biochemistry; or permission of instructor.
EVPP 613 - Environmental Geochemistry and Mineralogy

Credits: 3 (NR)
Explores hot topics and aids students in developing intellectual skills to identify key research problems. Students will also improve their writing and presentation skills.

Equivalent to GEOL 613

Prerequisite(s): Graduate standing.

EVPP 615 - Molecular Environmental Biology II

Credits: 4 (NR)
Applied course covering theory and methodology of molecular environmental biology, including analysis of selected case studies in conservation biology of macro-organisms, molecular systematics, and microbial ecology.

Prerequisite(s): EVPP 515 or permission of instructor.

EVPP 620 - Development of U.S. Environmental Policies

Credits: 3 (NR)

Examines nature and historical development of environmental policy in the United States, including consideration of social, political, economic and environmental factors, and ways it is expressed and implemented. Also considers sustainability and emerging issues.
Designated a Green Leaf Course.

Prerequisite(s): 8 graduate credits including graduate course in policy process and course in ecology; or permission of instructor.

EVPP 621 - Overview of Biodiversity Conservation
Lectures, reading assignments, class discussions, and orally presented and written case studies to explore what biodiversity is, why it is important, how conservation has evolved, and status today.

**Prerequisite(s):** 8 graduate credits in ecology and environmental science or environmental policy, or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

### EVPP 622 - Management of Wild Living Resources

Credits: 3 (NR)

Examines management of different types of wild living resources: animal and plant, aquatic and terrestrial. Reviews status of resources, analyzes factors that have led to present situation, and considers what may be required to achieve effective and sustainable management.

Designated a Green Leaf Course.

**Prerequisite(s):** 8 graduate credits of ecology or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

### EVPP 623 - Translating Environmental Policy into Action

Credits: 3 (NR)

Guest lecturers, class discussions, written and orally presented case studies, and assigned reading to identify and analyze factors involved in moving from science and policy to concrete action. Provides understanding of basic principles, skills, and strategies.

**Prerequisite(s):** 8 graduate credits in environmental science or environmental policy, or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

### EVPP 626 - Environment and Development in Asia

Credits: 3 (NR)

Examine environment and development in selected countries of South, Southeast, and East Asia. Reviews relationship between environment and development, considers background and history leading up to the present, and considers requirements to achieve more effective and sustainable results.

Designated a Green Leaf Course.

**Prerequisite(s):** 8 graduate credits in policy process, international development, and ecology; or permission of instructor.
EVPP 627 - Environmental Policy in Latin America

Credits: 3 (NR)

Examine environmental policy in Latin America. Reviews evolution of environmental policy and relationship between environment and development, considers background and history leading up to the present, and considers requirements to achieve more effective and sustainable results.
Designated a Green Leaf Course.

Prerequisite(s): 8 graduate credits in policy process, international development, and ecology; or permission of instructor.

EVPP 628 - Environment and Development in Africa

Credits: 3 (NR)

Examine environment and development in sub-Saharan Africa. Reviews relationship between environment and development, considers background and history leading up to present, and considers requirements to achieve more effective and sustainable results.
Designated a Green Leaf Course.

Prerequisite(s): 8 graduate credits in policy process, international development, and ecology; or permission of instructor.

EVPP 630 - Methods and Logic of Social Inquiry

Credits: 3 (NR)
Emphasizes gathering, interpretation, and evaluation of scientific evidence. Develops critical thinking skills and covers logic of scientific inquiry, including various data collection methods such as experiments, observational research, and Q methodology.

Prerequisite(s): Undergraduate statistics and research methods, or permission of instructor.

EVPP 631 - Spatial Agent-based Models of Human-Environment Interactions
Credits: 3 (NR)
Discusses key challenges in spatial modeling of human-environment interactions. Reviews agent-based modeling applications in urban and rural interactions, agriculture, forestry, and other areas. Hands-on development of simple ABM models, and investigation of links between GIS and ABM.

Equivalent to CSI 709; GGS 631

**Prerequisite(s):** EVPP 531 or CSS 600, or permission of instructor.

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0

---

**EVPP 632 - Qualitative Research Methods for Environmental Scientists**

Credits: 3 (NR)
Course engages questions of qualitative research methods for scientists conducting human-environment research. Focuses on tools to investigate the human-environment nexus, including community-based conservation and management research and decolonizing methodologies. Students discuss and practice 'triangulation'-- the integration of qualitative and quantitative methods-- a necessary skill for environmental/human-environment research.

**Prerequisite(s):** Graduate standing.

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0

---

**EVPP 635 - Environment and Society**

Credits: 3 (NR)

Human-environment interactions in human ecology perspective, historical basis of human environmental impact, indigenous and nonindigenous worldviews in context of modernization, environmental degradation and globalization, and contemporary policy and research initiatives geared toward resilience and sustainability. Discussion format.

Designated a Green Leaf Course.

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0

---

**EVPP 636 - Gender, Race, and the Natural World**

Credits: 3 (NR)
Advanced study of links among gender, race, and nature using social-psychological framework, original sources, and seminar and discussion. Analyzes ideologies that underpin the interlocking narratives of gender, race, and nature, and examines role of science in producing these ideologies.

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0
**EVPP 637 - Human Dimensions of Global Change**

Credits: 3 (NR)
Examines human dimensions of climate change, biodiversity loss, ozone depletion, and related anthropogenic alterations of biosphere.

Prerequisite(s): Graduate standing, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**EVPP 638 - Corporate Environmental Management and Policy**

Credits: 3 (NR)
Provides understanding of how environmental issues interact with business strategy decisions. Emphasizes learning about proactive win-win environmental management strategies being implemented by world's leading firms, and shows how government policies and regulations can be designed to simultaneously promote higher environmental protection and competitiveness. Combines mini lectures, participatory discussions.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**EVPP 641 - Environmental Science and Public Policy**

Credits: 3 (NR)
Effects of human activities on environment. Considers airborne, waterborne, and solid waste contaminants with respect to sources, control, and effect on ecosystems and humans. Focus is on scientific and technical aspects of environmental contamination. Includes discussion of science policy related to these topics.

Prerequisite(s): Course in ecology, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**EVPP 642 - Environmental Policy**

Credits: 3 (NR)

In-depth examination of U.S. efforts since 1970 to mitigate pollution of air, land, and water. Addresses issues of global concern, including biodiversity loss, ozone depletion, and climate change. Designated a Green Leaf Course.

Equivalent to PUAD 642
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**EVPP 643 - Microbial Ecology**

Credits: 4 (NR)
Studies relationships between microorganisms and their natural environment, and methodology for observing the microbes in nature and the biochemistry of environmental systems. Includes discussion of the role of microbes both in creating and removing toxic threats in the environment. Laboratory component includes field sampling/analyses and laboratory isolation and identification of microbes as well as measurement of their physiological activities.

Equivalent to BIOL 643

Prerequisite(s): Course in microbiology, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 3

**EVPP 645 - Freshwater Ecology**

Credits: 3 (NR)
Studies biotic and abiotic interactions that affect structure and composition of freshwater ecosystems. Emphasizes research literature.

Prerequisite(s): EVPP 550, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**EVPP 646 - Wetland Ecology and Management**

Credits: 3 (NR)
Emphasizes structure, functions, and ecological processes of created and natural wetlands from an ecosystem perspective. Students will be expected to develop an understanding of hydrologic, physicochemical, and ecological aspects of wetlands and the management of these systems through in-class and field/lab works. Each student is required to carry out an individual research project that involves field and lab works, and write a research paper.

Prerequisite(s): BIOL 307 or EVPP 377, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**EVPP 647 - Wetland Ecology Lab and Field**
Use laboratory and field work to study the structure and function of wetland ecosystems.

**Prerequisite(s):** EVPP 646 (formerly EVPP 644)

**EVPP 648 - Population Ecology**

Credits: 3 (NR)
Surveys ecological models and theory. Topics include population growth and regulation, competition, predator-prey, herbivore-plant, and parasite-host interactions, mutualism, and metapopulation ecology.

Equivalent to BIOL 648

**Prerequisite(s):** Course in ecology or permission of instructor.

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0

**EVPP 650 - Environmental Analysis and Modeling**

Credits: 4 (NR)
Introduces principles, history, and methodologies of systems ecology, emphasizing development and simulation of ecological models for natural resource/ecosystem management, conceptual and symbolic models, and simulation techniques on microcomputers.

**Prerequisite(s):** Course in ecology or permission of instructor.

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 3

**EVPP 651 - Multivariate Data Analysis for Ecology and Environmental Science**

Credits: 3 (NR)
Provides graduate students in ecology and environmental science with tools needed to analyze multivariate data sets. Topics include classification and ordination.

**Prerequisite(s):** EVPP 607 or equivalent.

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0
**When Offered:** Spring
EVPP 652 - The Hydrosphere

Credits: 3 (NR)
Components and transfer processes within hydrosphere, which consists of aqueous envelope of Earth including oceans, lakes, rivers; snow, ice, glaciers, soil, moisture, ground water, and atmospheric water vapor.

Equivalent to GGS 656

Prerequisite(s): Two semesters of calculus and partial differential equation.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EVPP 670 - Environmental Law

Credits: 3 (NR)
Studies environmental laws such as the National Environmental Policy Act, and regulatory issues such as the Clean Water and Clean Air Acts. Emphasizes critical evaluation of alternatives to unresolved issues in environmental policies.

Equivalent to BIOL 670

Prerequisite(s): Courses in ecology and environmental biology, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EVPP 675 - Environmental Planning and Administration

Credits: 3 (NR)
Examines interaction of man and ecological systems; causes of damage or deterioration in environment; content, oversights, and externalities in management decision processes that affect environment and effectiveness of plan implementation; means of assessing environmental impact; and administrative approaches for minimizing environmental impact.

Prerequisite(s): Permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

Credits: 3 (NR)
Uses ecological principles to manage natural resources. Emphasizes hierarchical levels of organization within ecological systems, and management of ecosystems to conserve biodiversity, natural resources, and environment.

Prerequisite(s): BIOL 607 or EVPP 607 or equivalent.
EVPP 681 - Introduction to Bioinformatics

Credits: 3 (NR)
Overview of methods and tools in bioinformatics including Internet interfaces to sequence databases, methods for performing searches of biological databases, sequence alignment, phylogenetic analysis, other types of DNA sequence analysis, web-based tools, and databases in structural biology.

Prerequisite(s): Course in molecular biology, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EVPP 682 - Principles of Environmental Conflict

Credits: 3 (NR)
Explores the nature and characteristics of environmental conflict and efforts to manage, resolve or transform it. Students will develop a capacity to assess the strengths and weaknesses of environmental conflict resolution processes while learning about best practices for preventing, preparing for, and addressing environmental conflict.

Equivalent to CONF 682

Prerequisite(s): EVPP 607, CONF 501, and CONF 502, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

Credits: 3 (NR)
This course explores best practices for managing, resolving, and transforming environmental conflict using environmental conflict resolution (ECR) processes. Nature and dynamics of environmental disputes, methods for assessing conflict situations, and methods for conducting various forms of ECR processes will be covered in the context of selected case studies with emphasis on student involvement.

Equivalent to CONF 683

Prerequisite(s): EVPP 682 or CONF 682, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
EVPP 684 - Environmental Conflict Resolution and Collaboration: Leadership Practicum/Capstone

Credits: 3 (NR)
This course is the capstone course for the Graduate Certificate in Environmental Conflict Resolution and Collaboration. Under supervision of the instructor, students will undertake an assessment of an active environmental conflict and recommend a range of processes that promote identified goals for preferred conflict outcomes.

Equivalent to CONF 684

Prerequisite(s): EVPP 682 or CONF 682, and EVPP 683 or CONF 683.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EVPP 692 - Master's Seminar in Environmental Science and Public Policy

Credits: 1 (RT)
Explores selected topics in environmental science and public policy using lectures, guest lectures, student presentations, and discussions of current literature.

Notes: Topics vary. May be repeated for credit.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0

EVPP 693 - Directed Studies in Environmental Science and Public Policy

Credits: 1-4 (RT)
Studies topic not otherwise available in graduate program. May involve reading assignments, tutorials, lectures, papers, presentations, and lab or field study determined in consultation with instructor.

Prerequisite(s): Permission of instructor and chair.

Notes: Short study plan required. May not be used to fulfill explicit undergraduate prerequisites for graduate work.

Hours of Lecture or Seminar per week: 1-4
Hours of Lab or Studio per week: 0
Grading: Graduate Special

EVPP 730 - Environmental Policy Research in Practice

Credits: 3 (RD)
Course is designed for students interested in social science-oriented environmental research. Student learn how to ground their research ideas in social science theory, develop a central research question and construct original research hypotheses that are grounded in social science literature. They also hone their peer reviewing skills by assessing other students' research and offering
constructive commentary.

Prerequisite(s): 12 credit hours of graduate course work at Mason or approval of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring

EVPP 738 - Sustainable Enterprise Theory

Credits: 3 (NR)
This course is designed to critically evaluate the scholarly research related to sustainable enterprise. The class provides an overview of the major theories, research designs, and methodologies associated with this emerging research domain. Students apply these theories to develop social science research proposals for empirical investigation.

Prerequisite(s): EVPP 638 Corporate Environmental Management and Policy, equivalent class, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring

EVPP 741 - Advanced Topics in Environmental Science and Public Policy

Credits: 0-4 (RT)
Studies selected advanced topics in environmental science and public policy. Lectures, guest lectures, student presentations, laboratory exercises.

Prerequisite(s): 8 credits of graduate course work in environmental science and public policy, or permission of instructor.

Notes: Topics vary; each offering has coherent theme. May be repeated for credit if topics significantly differ.

Hours of Lecture or Seminar per week: 0-4
Hours of Lab or Studio per week: 0-4

EVPP 745 - Environmental Toxicology

Credits: 3 (NR)
Studies nature, distribution, and interaction of toxic chemicals released into environment. Topics include acute, subchronic, and chronic toxicity testing; uptake, distribution and metabolism of toxins as well as their distribution in the environment. Emphasizes effects on nonhuman biota, detection and fate of chemicals, and includes discussion of implications for government regulation.

Equivalent to BIOL 745

Prerequisite(s): Courses in ecology and physiology, or permission of instructor.
EVPP 758 - Environment and Public Policy

Credits: 3 (NR)
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EVPP 791 - Colloquium in Earth Systems Science

Credits: 1 (NR)
Covers various parts of Earth systems. Invited talks by Mason faculty and primarily Earth science experts in region. Students graded on written reports demonstrating understanding of wide topics covered.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0

EVPP 792 - Seminar in Earth Systems Science

Credits: 2 (NR)
Seminar for Earth systems science graduate students with background in major systems. Capstone experience. Seminars presented by faculty and students.

Equivalent to GGS 792

Prerequisite(s): 15 graduate credits; and courses on atmosphere, hydrosphere and lithosphere.

Notes: Topics vary from semester to semester.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 0

EVPP 793 - Research in Environmental Science and Public Policy

Credits: 1-3 (RD)
Library, laboratory, or field investigation under supervision of instructor.

Prerequisite(s): 8 graduate credits in EVPP, and permission of instructor and chair.

Notes: Short proposal required. May be repeated for total of 6 credits.

Hours of Lecture or Seminar per week: 1-3
EVPP 798 - Master's Research Project in Environmental Science and Public Policy

Credits: 1-3 (RD)
Experimental, observational, literature-based, or theoretical research project chosen and completed under guidance of faculty member. Proposal required before enrollment. Comprehensive report acceptable to student's committee required for completion.

Prerequisite(s): Approved project proposal, and permission of instructor and chair.

Notes: Students taking EVPP 798 may receive no more than 6 credits for both EVPP 793 and EVPP 798.

EVPP 799 - Master's Thesis in Environmental Science and Public Policy

Credits: 1-6 (RD)
Experimental, observational, or theoretical research under instructor's supervision that culminates in production of thesis. Thesis work should be potentially publishable.

Prerequisite(s): Approved thesis proposal, and permission of instructor and chair.

Notes: No more than 6 credits of EVPP 793 and EVPP 799 may be applied to master's degree.

EVPP 894 - Supervised Internship

Credits: 3-12 (RD)
Training in application of ecological skills to environmental management and policy under supervision of a qualified environmental scientist at governmental agency, consulting firm, industry, or other acceptable organization.

Prerequisite(s): Permission of student's doctoral committee, graduate program director and department chair.

EVPP 991 - Advanced Seminar in Environmental Science
Credits: 2 (RT)
Topics generally address interface between environmental science and public policy.

Prerequisite(s): 8 hours of ecology, or permission of instructor.

Notes: May be repeated for credit.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 0

EVPP 998 - Doctoral Dissertation Proposal

Credits: 1-6 (RD)
Work on research proposal that forms basis for a doctoral dissertation.

Prerequisite(s): Admission to doctoral candidacy.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0
Grading: S/IP

EVPP 999 - Doctoral Dissertation Research

Credits: 1-12 (RD)
Research on basic or applied problem in environmental science and public policy.

Prerequisite(s): Approval of dissertation proposal.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0
Grading: S/IP

Executive Master of Business Administration (EMBA)

Offered by the School of Management

EMBA 500 - Workshop

Credits: 0 (RT)
Workshop.

Prerequisite(s): Acceptance into EMBA program.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 3
Grading: Not Gradable.
When Offered: Fall, Summer, Spring.

**EMBA 603 - Managerial Economics**

Credits: 3 (NR)
Develops and applies economic analysis tools in managerial decision situations. Focuses on economic analysis to understand firm's competitive environment.

Prerequisite(s): Admission to EMBA program, or permission of the director.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
Grading: Graduate Special
When Offered: Fall

**EMBA 612 - Cost Accounting**

Credits: 1-3 (NR)
Focuses on developing accounting information for use by managers in planning and control activities. Examines traditional and emerging cost-management systems. Special emphasis on information for decision-making, operational control, and performance evaluation.

Prerequisite(s): Admission to EMBA program.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0
Grading: Graduate Special
When Offered: Fall

**EMBA 613 - Financial Accounting**

Credits: 3 (NR)
Develops framework of concepts and procedures essential for interpreting general-purpose financial statements and internal managerial accounting reports. Emphasizes understanding basic concepts and applying selected procedures to problem-solving situations.

Prerequisite(s): Admission to EMBA program.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
Grading: Graduate Special
When Offered: Fall

**EMBA 623 - Marketing**
Credits: 3 (NR)
Develops market-based knowledge and skills for effective marketing strategy design, implementation, and evaluation. Develops
ability to make marketing decisions in wide variety of institutional and competitive situations. Addresses the importance of
companies being market-driven and customer-focused. Emphasis on case studies, team work, and projects.

Prerequisite(s): Admission to EMBA program.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
Grading: Graduate Special
When Offered: Spring

EMBA 633 - Applied Business Decision Models

Credits: 3 (NR)
Applies statistical methods in analyzing problems in business decision-making. Topics include descriptive statistics, probability
distributions, estimation and hypothesis testing, and linear regression.

Prerequisite(s): Admission to EMBA program, or permission of the director.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
Grading: Graduate Special
When Offered: Fall

EMBA 638 - Services and Operations Management

Credits: 3 (NR)
Integrates theory and practice of operations management with mathematical modeling and quantitative techniques of
management science. Addresses range of operations management issues, including technology and strategy decisions, systems
design issues, project operations, quality control, and inventory planning.

Prerequisite(s): Admission to EMBA program, or permission of the director.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
Grading: Graduate Special
When Offered: Spring

EMBA 641 - Building the High-Performing Team

Credits: 0-3 (NR)
Develops the knowledge and skills needed for creating powerful, high-performance teams within and among organizational units.
Strategies are offered for alignment of goals, building conditions for coordinated action, generating innovation, and resolving
breakdowns.

Prerequisite(s): Admission to EMBA program.
EMBA 643 - Managerial Finance

Credits: 3 (NR)
Introduces theories of finance and their application to the formulation of business policy. Topics include internal financial analysis, financial forecasting, valuation, risk and return analysis, capital allocation, and capital structure.

Prerequisite(s): Admission to EMBA program.

EMBA 653 - Organizational Behavior and Teams

Credits: 3 (NR)
Examines development, theories, and practice of management within organizations. Emphasizes human behavior and how it influences organizational effectiveness.

Prerequisite(s): Admission to EMBA program.

EMBA 660 - Management of Information Technology

Credits: 3 (NR)
Examines computer-based information technologies and their interrelation with management processes, especially problem-solving and decision-making at individual, work group, and organization levels. Topics include management information system life cycle, with emphasis on manager's perspective, and modeling and analysis to support decision-making.

Prerequisite(s): Admission to EMBA program, or permission of the director.
EMBA 673 - Legal Environment for Executives

Credits: 1.5 (NR)
Examines the managerial impact of the law upon decision-making processes in business organizations. Lectures as well as discussions of judicial opinions and readings.

Prerequisite(s): Admission to EMBA program.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0
Grading: Graduate Special
When Offered: Fall

EMBA 674 - Business Ethics

Credits: 1-3 (NR)
Designed to strengthen the ability to identify, critically analyze, appropriately respond to, and provide leadership regarding the issues of ethical and socially responsible behavior you may confront as an executive in charge of people, projects, and organizations.

Prerequisite(s): Admission to the EMBA program.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

EMBA 678 - Business Strategy

Credits: 3 (NR)
Integrates business strategy and policy with functional knowledge developed in other courses and business practice. Issues include formulation of strategy, industry analysis, building core competencies, and strategy implementation.

Prerequisite(s): Admission to EMBA program.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
Grading: Graduate Special
When Offered: Spring

EMBA 703 - Financial Markets

Credits: 0-3 (RD)
Explores the relationships between financial markets and their impact on corporate financial decision making. Considers cross-market interrelationships, including how financial markets respond by creating financial instruments to meet the varying financial requirements of business firms. The course includes a domestic financial residency in New York that focuses on contemporary developments in these markets.
EMBA 709 - Global Capital Markets

Credits: 1-3 (NR)
Considers emerging topics in finance, with focus on links between global markets and strategic firm decisions. Emphasizes understanding valuation of strategic investment opportunities, and identification of financing alternatives.

Prerequisite(s): Admission to EMBA program.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0
Grading: Graduate Special
When Offered: Offered on an irregular basis at the discretion of the department or school

EMBA 710 - Global Macro Economics

Credits: 1.5 (NR)
Focuses on the modern system of international trade and the opportunities that the global trading environment creates for firms. Attention will be directed toward the roles of national policies, international agreements, and business activities in the development of the system.

Prerequisite(s): Admission to EMBA program.

Hours of Lecture or Seminar per week: 1.5
Hours of Lab or Studio per week: 0
Grading: Graduate Special
When Offered: Spring

EMBA 712 - International Macroeconomics: Concepts and Country Strategy

Credits: 1.5 (NR)
Focuses on the basic concepts of international macroeconomics—national income accounts, monetary and fiscal policies, balance of payments, and exchange rates. These concepts are introduced and discussed in situations where national economic strategies affect the decisions and performance of business operations.

Prerequisite(s): Admission to EMBA program.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0
When Offered: Fall
EMBA 715 - Special Topics in Accounting

Credits: 1-6 (RT)
In-depth examination of advanced topics in accounting.

Prerequisite(s): Admission to EMBA program.

Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 1-12
Grading: Graduate Special
When Offered: Offered on an irregular basis at the discretion of the department or school

EMBA 716 - Managing Change

Credits: 1.5 (NR)
Focuses on how organizations can successfully adapt and change. Topics include understanding forces that make change necessary, developing vision of appropriate course, aligning organization behind that vision, and motivating people to achieve it.

Prerequisite(s): Admission to EMBA program.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0
Grading: Graduate Special
When Offered: Fall

EMBA 718 - Leadership and Change Management

Credits: 3 (NR)
Focuses on the essential elements of successful organizational change. Emphasis on understanding the forces for change, as well as developing skills to manage a successful change process. Gives a deeper understanding of organizational leadership and an increased ability to be a successful leader. Incorporates and integrates theory, research, and application, with the ultimate goal of providing the student with practical information about leadership.

Prerequisite(s): Admission to the EMBA program.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

EMBA 725 - Leadership

Credits: 1.5 (NR)
Explores key leadership roles in organizations and their own leadership competencies. Provides understanding of leadership development, power and influence, motivation, strategic decision making, leading change, the influence of globalization and
diversity on leadership, and ethical issues.

**Prerequisite(s):** Admission to the EMBA program or permission of the program director.

**Hours of Lecture or Seminar per week:** 1-3  
**Hours of Lab or Studio per week:** 0  
**Grading:** Graduate Special  
**When Offered:** Fall

**EMBA 735 - Systems Thinking and Dynamics**

Credits: 1-3 (NR)  
Enables students to develop, express, improve, and validate holistic mental models of problems. In doing so, they will build a foundation for better decision making leading to improved business performance. The main strength of the systems-thinking approach is its emphasis on long-term strategic outcomes as opposed to short-term tactical ones.

**Prerequisite(s):** Admission to the MBA program, or permission of the program director.

**Hours of Lecture or Seminar per week:** 1-3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall

**EMBA 745 - Special Topics in Finance**

Credits: 1-6 (RT)  
In-depth examination of advanced topics in finance.

**Prerequisite(s):** Admission to EMBA program.

**Hours of Lecture or Seminar per week:** 1-3  
**Hours of Lab or Studio per week:** 0  
**Grading:** Graduate Special  
**When Offered:** Offered on an irregular basis at the discretion of the department or school

**EMBA 750 - Capstone Project: Action Learning Project**

Credits: 1.5 (RT)  
The Integrated Project Application is a lab-based course designed to provide an action learning experience that integrates course content from throughout the EMBA program. Students work in teams to develop solutions to organizational challenges and opportunities. They select one project from those offered by sponsoring organizations and approved by the faculty members for the course. Student teams evaluate the strategic issues for their assigned clients, design a solution, and present results to an executive panel. Depending on the nature of the issue and faculty requests, team presentations of results include one or more of the following sections: 1) an analysis of the situation 2) recommendations including changes in goals and organizational design, 3) a plan of action integrating marketing, human resource development, organizational design, finance, and operations, and 4) an implementation plan using theories of communication and change management, to include the business case and a business plan. Students are expected to draw upon course work from multiple disciplines in completing this project.
Prerequisite(s): Admission to the EMBA program or permission of the program director.

Notes: Course is repeatable within the term. Offered twice in spring semester for a total of 3 credit hours.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring

EMBA 751 - Corporate Global Strategy and Capstone

Credits: 1.5-3 (NR)
Examines issues in strategy for firms operating in multiple markets or businesses, including diversification, portfolio approaches to corporate strategy, mergers and acquisitions, corporate alliances and joint ventures, restructuring, and coordinating multibusiness corporations.

Prerequisite(s): Admission to EMBA program.

Hours of Lecture or Seminar per week: 1.5-3
Hours of Lab or Studio per week: 0
Grading: Graduate Special
When Offered: Spring

EMBA 752 - A Strategic View of the Firm

Credits: 0-3 (NR)
Examines the interplay between the industry environment and a firm's resources and capabilities to drive superior performance. The course seeks to integrate multiple functional perspectives to arrive at a complete understanding of the firm within its environment.

Prerequisite(s): Admission to EMBA program.

Hours of Lecture or Seminar per week: 0-3
Hours of Lab or Studio per week: 0
Grading: Satisfactory/No Credit
When Offered: Fall

EMBA 755 - Special Topics in Management

Credits: 1-6 (RT)
In-depth examination of advanced topics in management.

Prerequisite(s): Admission to the EMBA program or permission of the program director.

Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 1-9
Grading: Graduate Special
EMBA 765 - Special Topics in Management Information Systems

Credits: 1-6 (RT)
In-depth examination of advanced topics in management information systems.

Prerequisite(s): Admission to EMBA program.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0
Grading: Graduate Special
When Offered: Offered on an irregular basis at the discretion of the department or school

EMBA 775 - Special Topics in Marketing

Credits: 1-6 (RT)
In-depth examination of advanced topics in marketing.

Prerequisite(s): Admission to EMBA program.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0
Grading: Graduate Special
When Offered: Offered on an irregular basis at the discretion of the department or school

EMBA 790 - National Defense Residency # 1

Credits: 1-6 (NR)
Develops National Defense perspective through seminars led by professors and high-level managers; briefings by officials of government and other policy-making organizations.

Prerequisite(s): Admission to EMBA Program or permission of the program director.

Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 0
Grading: Satisfactory/No Credit
When Offered: Fall, Summer

EMBA 791 - The Regulatory and Business Environment of the European Union

Credits: 0-1.5 (RD)
Considers contemporary interactions of businesses, government, and regulation. Seminars and presentations with business, government, and regulatory officials.

Prerequisite(s): Admission to the EMBA program, or permission of the director.
**EMBA 792 - National Defense Residency 2**

Credits: 1-6 (NR)
Develops National Defense perspective through seminars led by professors and high-level managers; briefings by officials of government and other policy-making organizations.

Prerequisite(s): Admission to EMBA Program or permission of the program director.

**Hours of Lecture or Seminar per week:** 1-6  
**Hours of Lab or Studio per week:** 0  
**Grading:** Satisfactory/No Credit  
**When Offered:** Spring

---

**EMBA 795 - Global Residency**

Credits: 0-3 (RT)
Develops global perspective through seminars led by professors and high-level managers; briefings by officials of government and other policy-making organizations; and site visits to production and distribution facilities, research centers, IT units, and other corporate offices.

Prerequisite(s): Admission to the EMBA program or permission of the program director.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**Grading:** Graduate Special  
**When Offered:** Spring, Summer

---

**Exercise, Fitness, and Health Promotion (EFHP)**

Offered by the College of Education and Human Development

---

**EFHP 500 - Workshop in Exercise, Fitness, and Health Promotion**

Credits: 1-3 (RD)
Provides concentrated full-time workshops, weekend seminars, and workshops on selected topics in exercise, fitness, and health promotion.

Prerequisite(s): Graduate standing or permission of instructor
Notes: May be repeated. No more than 6 credits may be applied for degree credit.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0

EFHP 522 - Anatomy for the Athletic Trainer: Structure and Function of the Neuromuscular and Musculoskeletal Systems

Credits: 3 (NR)
Promotes familiarity and proficiency with anatomy of neuromuscular and musculoskeletal systems, which relate directly to sports related injuries.

Prerequisite(s): BIOL 124 and 125 or equivalent, and permission of instructor

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 1

EFHP 524 - Physiology for the Athletic Trainer Including the Pharmacology of Sports Injuries

Credits: 3 (NR)
Promotes familiarity and proficiency in physiology, pharmacology, and rehabilitation of sports injuries.

Prerequisite(s): BIOL 124 and 125 or equivalent, and permission of instructor

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 1

EFHP 526 - Athletic Training Perspectives: Evaluation and Prevention of Sports Injuries

Credits: 3 (NR)
Promotes familiarity and proficiency with assessment and physical examination of sports-related injuries.

Prerequisite(s): BIOL 124 and 125 or equivalent, and permission of instructor

Notes: Recommended that this course be taken concurrently with EFHP 522.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 1

EFHP 528 - Advanced Athletic Training

Credits: 3 (NR)
Promotes familiarity and proficiency with assessment and intervention of neuromusculoskeletal system and other systems of
body that relate directly to sports-related injuries.

**Prerequisite(s):** BIOL 124 and 125 or equivalent, EFHP 526, and permission of instructor

**Hours of Lecture or Seminar per week:** 2  
**Hours of Lab or Studio per week:** 1

**EFHP 598 - Special Topics**

Credits: 1-6 (RT)  
Focuses on projects related to exercise, fitness, or health promotion.

**Prerequisite(s):** Graduate standing or permission of instructor

**Notes:** May be repeated with no more than 6 credits earned.

**Hours of Lecture or Seminar per week:** 1-6  
**Hours of Lab or Studio per week:** 0

**EFHP 599 - Independent Study EFHP**

Credits: 1-3 (RD)  
Studies problem areas in exercise, fitness, and health promotion research, theory, or practice under direction of faculty member. May be repeated. No more than 3 credits may be earned.

**Hours of Lecture or Seminar per week:** 1-3  
**Hours of Lab or Studio per week:** 1-6

**EFHP 605 - History of American Sport, Exercise, and Physical Culture**

Credits: 3 (NR)  
Role of sport and physical education in Europe and its impact on developments in America.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**EFHP 610 - Advanced Exercise Physiology**

Credits: 3 (NR)  
Lecture, demonstration, and seminar experiences in applying research findings to understanding physiological function and effects of exercise on people.

**Prerequisite(s):** Graduate standing or permission of instructor
EFHP 611 - Fitness Assessment: Theory and Practice

Credits: 3 (NR)
Promotes familiarity and proficiency with methods and instrumentation in assessing individual fitness and establishing base for exercise and other lifestyle alternatives to improve fitness.

Prerequisite(s): Graduate standing or permission of instructor

EFHP 612 - Scientific Foundation of Applied Kinesiology

Credits: 3 (NR)
An integrated study of human anatomy, physiology, chemistry, and microbiology, presenting a complete picture of how the body functions and the diseases and disorders that cause the body to malfunction.

EFHP 613 - Advanced Applied Biomechanics

Credits: 3 (NR)
Focuses on kinetic and kinematic concepts and how they apply to the qualitative and quantitative assessment of human movement. Designed for advanced study of motion analysis techniques.

Prerequisite(s): Full admission to EFHP graduate program. Introductory Biomechanics, Basic Human Anatomy, and Physics or permission of instructor.

EFHP 614 - Advanced Exercise Nutrition

Credits: 3 (NR)
Advanced study of nutrition's relation to physical activity, exercise, and sports. Reviews biochemical, physiological, and behavioral aspects of nutrition in promoting health, fitness, and sports performance. Focuses on nutrient needs during life cycle stages.

Prerequisite(s): Graduate standing or permission of instructor
EFHP 615 - Epidemiology and Environmental Health

Credits: 3 (NR)
Principles, methods, and application of epidemiology. Reviews behavioral, psychological, social, and environmental risks to disease distribution. Focuses on lifestyle, exercise patterns, and environmental factors to health and disease conditions.

Prerequisite(s): Graduate standing or permission of instructor

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EFHP 616 - Motor Behavior and Development

Credits: 3 (NR)
Human motor behavior development and theory with application to evaluation of skill acquisition.

Prerequisite(s): Graduate standing or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EFHP 618 - Exercise and Sport Psychology

Credits: 3 (NR)
Covers psychological and social-psychological antecedents and consequences of exercise, physical activity, and sports participation. Emphasizes theory and research on personality, motivation, arousal, cognition, attributions, attitudes, self-efficacy, leadership effectiveness, and group dynamics.

Prerequisite(s): Graduate standing or permission of instructor

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EFHP 620 - Research Methods for Applied Kinesiology

Credits: 3 (NR)
Introduction to the techniques of research generally employed in the fields of exercise science and health.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
EFHP 621 - Statistical Methods for Applied Kinesiology

Credits: 3 (NR)
Introduction to practical and applied aspects of both descriptive and applied aspects of both descriptive and inferential statistics in exercise science and health.

Prerequisite(s): Full admission to EFHP graduate program, MATH 102, STAT 250 or permission of the instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EFHP 623 - Research Design and Statistical Reasoning

Credits: 3 (NR)
Introduces techniques of research and methods of data analysis.

Prerequisite(s): Graduate standing or permission of instructor

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EFHP 630 - Exercise, Health, and Fitness Program Development

Credits: 3 (NR)
Covers exercise and health program development related to fitness and health of adult populations.

Prerequisite(s): Graduate standing or permission of instructor

Notes: Provides 3 to 6 hours of field experience.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EFHP 650 - Scientific Principles of Motor Learning

Credits: 3 (NR)
Biomechanical analysis and application of scientific principles of movement to instructing sport skills in physical education and sport programs.

Prerequisite(s): Graduate standing or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
EFHP 660 - Management of Exercise, Fitness, and Health Promotion Organizations

Credits: 3 (NR)
Advanced study in management and administration of organizations dedicated to human development and improvement of quality of life. Covers application of theories and practices of management and behavioral sciences, fiscal management, marketing, and evaluation research.

Prerequisite(s): Graduate standing or permission of instructor

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EFHP 670 - Analysis of Teaching in Physical Education

Credits: 3 (NR)
Presents qualitative and quantitative research methods for studying teacher and student behaviors in physical education setting, and engaging teacher as researcher. Revisits teaching strategies, develops action research projects, and examines current education reform movements.

Prerequisite(s): Graduate standing or permission of instructor

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EFHP 671 - Teaching PHED in Secondary School

Credits: 3 (NR)
Advanced study of methods, materials, content and organization of physical education programs. Emphasis on curriculum planning, current methodologies, and trends.

Prerequisite(s): Graduate standing or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EFHP 680 - Ethical Issues in Exercise, Fitness, and Health Promotion

Credits: 3 (NR)
Covers formulation of coherent framework for ascertaining good, right, and just; and for assessing evidence and reason underlying positions and arguments. Examines ethical issues in exercise, fitness, and health promotion.

Prerequisite(s): Graduate standing or permission of instructor
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EFHP 690 - Scientific Communications

Credits: 3 (NR)
Studies and applies written and verbal communication skills in reading, analyzing, writing, and distributing scientific information in Applied Kinesiology.

Prerequisite(s): EFHP 612, EFHP 620, EFHP 621, or Permission of Instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall.

EFHP 798 - Project

Credits: 1-3 (RD)
Addresses an applied exercise, fitness, and health promotion issue under supervision of graduate faculty member.

Prerequisite(s): Graduate standing or permission of instructor

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0
Grading: Graduate Special

EFHP 799 - Thesis

Credits: 1-6 (RD)
Explores exercise, fitness, and health promotion problem using appropriate research methodology and under supervision of graduate faculty member.

Prerequisite(s): Graduate standing or permission of instructor

Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 0
Grading: Satisfactory/No Credit

EFHP 802 - Readings for the Doctor of Arts in Community College Education

Credits: 3-9 (RD)
Intensive reading in recent scholarship in physical education and related fields. Students must propose reading list that must be approved by faculty advisor and use list to prepare potentially publishable literature review.
Prerequisite(s): Graduate standing or permission of instructor

Hours of Lecture or Seminar per week: 3-9
Hours of Lab or Studio per week: 0
Grading: Graduate Special

Film and Video Studies (FAVS)

Offered by the College of Visual and Performing Arts

FAVS 100 - Film and Video Studies Colloquium

Credits: 1 (RD)
Students are exposed to the film and video industry through film professionals. Students are required to attend all sessions, review the speaker's materials prior to the class, prepare questions, and complete written critiques. FAVS majors are required to take FAVS 100 twice.

Prerequisite(s): FAVS majors only.

Notes: Students may repeat for a total of 5 credits but only 2 credits of C or better may be applied to the degree.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 2
When Offered: Fall, Summer, Spring

FAVS 225 - The History of World Cinema

Credits: 3 (NR)
This course is a survey of the history of cinema. It explores the development of world cinema from its beginnings in the late nineteenth century to the 1990s. The course will enable students to comprehend the evolution of the history and language of cinema in order to connect the art of filmmaking with the "outside forces" (i.e., the economic institutions, key figures, historical events and social issues) that profoundly shape and influence it.

Fulfills general education requirement in arts.

Hours of Lecture or Seminar per week: 3
When Offered: Fall, Summer, Spring

FAVS 300 - Global Horror Film

Credits: 3 (NR)
Taking an historical approach through various national and international cinemas, the course begins with horror films literary and theatrical origins and traces its development into a modem (and postmodem) form of universal storytelling.

Fulfills general education requirement in global understanding.
FAVS 335 - Sound and Lighting for Film and Video

Credits: 3 (NR)
This course will instruct students on the theories, techniques, and technologies pertaining to recording audio and lighting scenes in both field and studio video productions. The course will be lecture based with practical lab styled exercises reinforcing topics presented during lecture.

Prerequisite(s): COMM 355 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

FAVS 352 - Ethics of Film and Video

Credits: 3 (NR)
An examination of ethical issues associated with image production and consumption. Topics include the technological development of the film apparatus, privacy, the pursuit of objectivity, excess, consent, and representing others. All issues highlight the increasingly sophisticated and powerful role of film and media authorship. Students will develop a more complex view of the ethics of screen representation (both fiction and nonfiction) and be encouraged to take stock of the ethics of their own media literacy.

Fulfills general education requirement in synthesis.

Prerequisite(s): Completion or concurrent enrollment in all other required general education courses and completion of 21 credits within the FAVS program.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

FAVS 355 - Film Business Practices

Credits: 3 (NR)
An overview of the film industry from a business perspective. Students learn basic business practices, film financing, business plans, film distribution, and management and marketing techniques appropriate for the film industry.

Prerequisite(s): COMM 454 or FAVS 352.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
FAVS 356 - Film Marketing

Credits: 3 (NR)
This course is designed to teach students how to market their film projects (pre- and post-production) using traditional methods and techniques of the 21st century.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Summer, Spring

FAVS 365 - Documentary Filmmaking I

Credits: 3 (NR)
An introduction to documentary filmmaking in which each student makes a short digital documentary, from concept development to finished piece. The class covers essential technical skills, emerging styles of nonfiction film, and documentary storytelling techniques.

Prerequisite(s): Satisfactory completion of COMM 355.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

FAVS 375 - Fiction Film Directing

Credits: 3 (NR)
This course examines techniques for directing fiction films. Students study the directorial approaches of a variety of directors by viewing and critiquing classic films. Students learn about the director's role in each stage of film production. Students shoot, direct and edit fictional scenes and sequences intended to develop and convey the beginnings of the authorial signatures.

Prerequisite(s): COMM 355 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Summer, Spring

FAVS 399 - Special Topics in Film and Video Studies

Credits: 1-3 (RT)
In-depth presentation and exploration of topical studies.

Notes: Subject matter varies. May be repeated for a maximum 12 credits when taken under different topics.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0
When Offered: Fall, Summer, Spring.
**FAVS 400 - Film and Video Career Seminar**

Credits: 1 (RD)
This course is designed to guide students through the portfolio process. At the end of the semester, students will have a completed, professionally reviewed resume and demo reel, and have experienced a professional interview.

**Prerequisite(s):** Completion of required courses within chosen concentration or permission of instructor.

**Hours of Lecture or Seminar per week:** 1  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall, Summer, Spring

**FAVS 450 - Internship in Film and Video Studies**

Credits: 3 (RD)
On-the-job training in film and video studies through approved fieldwork study programs. Internships are arranged and supervised by the FAVS director.

**Prerequisite(s):** 75 credits, 15 credits in core/elective FAVS courses, and permission of the Internship Coordinator.

**Notes:** Required for all FAVS majors.

**Hours of Lecture or Seminar per week:** 1  
**Hours of Lab or Studio per week:** 0

**FAVS 455 - Studio and Field Productions Practicum**

Credits: 3 (NR)
Practical knowledge in studio and field productions. Students complete a minimum 150 hours of work as assistants to engineers, producers, directors, and organizers of video production facilities on campus.

**Prerequisite(s):** COMM 355 and permission of instructor.

**Notes:** Not repeatable.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall, Summer, Spring

**FAVS 460 - Advanced Video Editing**

Credits: 3 (NR)
This course will instruct students on the theories, techniques and technologies pertaining to video editing for fiction and documentary films, as well as commercials. The course will combine lectures, discussions, and demonstrations with hands on projects.
Prerequisite(s): COMM 355, COMM 360 or portfolio review.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Summer, Spring.

FAVS 470 - Film and Video Screenwriting

Credits: 3 (NR)
The purpose of this course is to build a strong foundation in fundamental, narrative, screenwriting techniques for film. Students will learn how to express their unique story ideas through character development, plot and dialogue.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Summer, Spring

FAVS 483 - Feature-Length Scriptwriting

Credits: 3 (NR)
This course is an introduction to the development and analysis of feature length screenplays. The approach combines lecture, discussion, screening and presentation of student work. By the end of the semester, each student should have a complete first draft of an original screenplay. Students will also complete story reports/coverage reports of screenplays by other writers.

Prerequisite(s): FAVS 470 or THR 482 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring

FAVS 490 - Independent Study

Credits: 1-6 (RD)
Independent research on specific project under direction of selected faculty member.

Prerequisite(s): Permission of instructor.

Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 0
When Offered: Fall

FAVS 498 - Creative Producing and Development

Credits: 3 (NR)
An introduction to the creative process of researching and developing material for film and video for senior projects. The course
examines evaluating and developing existing literary material, documentary work, and/or fictional material.

**Prerequisite(s):** Senior status in the FAVS program.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall, Summer, Spring.

### FAVS 499 - Senior Project

Credits: 3 (NR)  
Culminating seminar devoted to analyzing and synthesizing knowledge and skills gained through undergraduate course work as it applies to film, video studies, and professional development.

**Prerequisite(s):** FAVS 498.

**Notes:** Students will be required to develop and present written materials and documentation related to the development and presentation of their works, as well as present their work in FAVS 100 Film and Video Studies Colloquium as part of their formal oral presentation.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

### FAVS 535 - Sound and Lighting

Credits: 3 (NR)  
This course will instruct students on the theories, techniques, and technologies pertaining to recording audio and lighting scenes in both field and studio video productions. The course will be lecture based with practical lab styled exercises reinforcing topics presented during lecture.

**Prerequisite(s):** Admission to the MAIS in Film and Video Studies or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall, Summer, Spring

### FAVS 550 - Internship

Credits: 3 (RD)  
On-the-job training in film and video studies through approved fieldwork study programs. Internships are arranged and supervised by the FAVS director.

**Prerequisite(s):** Permission of the Internship Coordinator.

**When Offered:** Fall, Summer, Spring.
FAVS 565 - Documentary Filmmaking

Credits: 3 (NR)
A documentary filmmaking workshop in which each student makes a short digital documentary, from concept development to finished piece. The class covers essential technical skills, emerging styles of nonfiction film, and documentary storytelling techniques.

Prerequisite(s): Admission to the MAIS in Film and Video Studies or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Summer, Spring

FAVS 570 - Screenwriting

Credits: 3 (NR)
Screenwriting course emphasizing student development in screenplay form, structure, and storytelling with emphasis on craft, character, and story culminating in a screenplay.

Prerequisite(s): Undergraduate degree or equivalent, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Summer, Spring

FAVS 575 - Fiction Film Directing

Credits: 3 (NR)
This course examines techniques for directing fiction films. Students study the directorial approaches of a variety of directors by viewing and critiquing classic films. Students learn about the director’s role in each stage of film production. Students shoot, direct and edit fictional scenes and sequences intended to develop and convey the beginnings of the authorial signatures.

Prerequisite(s): Admission to the MAIS in Film and Video Studies or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Summer, Spring

FAVS 590 - Independent Study

Credits: 1-6 (RD)
Independent research on specific project under direction of selected faculty member.

Prerequisite(s): Undergraduate degree or equivalent, or permission of instructor.

Hours of Lecture or Seminar per week: 1-6
FAVS 597 - Independent Production

Credits: 1-3 (RD)
Media or creative production activities under direction of faculty member. Requires completed production; written report, oral exam may be required.

Prerequisite(s): Permission from department.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0
When Offered: Fall, Summer, Spring.

FAVS 599 - Special Topics

Credits: 1-6 (RT)
In-depth presentation and exploration of topical studies.

Prerequisite(s): Undergraduate degree or equivalent, or permission of instructor.

Notes: Subject matter varies. May be repeated for a maximum 9 credits when taken under different topics.

Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 0
When Offered: Fall, Summer, Spring.

Finance (FNAN)

Offered by the School of Management

If a student takes noncore, upper-level business courses before admission to SOM, those courses will not count on an undergraduate degree application for any major in the school, except as general elective credit. A grade of C or higher must be presented on the graduation application for each upper-level course in the major. Course prerequisites are strictly enforced. Degree status is defined as formal admission to BS degree status in SOM.

FNAN 300 - Personal Financial Management

Credits: 3 (NR)
Emphasis is on understanding the importance of developing financial goals and how financial decisions affect those goals throughout their lifetime. In addition, students will develop their own financial goals along with a financial plan that would enable them to meet those goals. This course may be taken for regular grading or S/NC. Students must notify instructor which option they want. FNAN 300 may be taken for general elective credit by School of Management students.
FNAN 301 - Financial Management

Credits: 3 (NR)

Introduction to managing a firm's financial resources given wealth maximization decision criterion. Includes working capital management, fixed-asset investment, cost of capital, capital structure, and dividend decision analysis. School of Management students will not be permitted to make more than three attempts to achieve a C or higher in FNAN 301. Those who do not successfully complete this course within three attempts will be terminated from their major and will not be eligible to receive a degree from the School of Management. For more information about this, see the "Termination from the Major" section under Academic Policies.

Prerequisite(s): C or better in ECON 103, ACCT 203, and OM 210; sophomore standing. Prerequisite enforced by registration system.

Notes: Lecture, problems, and discussion. Requires attendance in weekly lectures and recitations. The final exam for FNAN 301 may be scheduled to take place for all sections at the same time during the final exam period. Accommodations will be made for exam and religious conflicts and for certain official university-sponsored activities.

FNAN 302 - Financial Analysis, Forecasting, and Valuation

Credits: 3 (NR)

Examines techniques for analyzing, understanding, and applying financial information in decision situations. Topics include financial statement analysis, development of financial models, and financial planning and forecasting.

Prerequisite(s): Degree Status and a grade of B minus or higher in FNAN 301. Prerequisite enforced by registration system.

Notes: Lecture, discussion, computer-assisted research.

FNAN 311 - Principles of Investment

Credits: 3 (NR)

Introduces analysis of the valuation of equity and debt securities given modern capital market theory. Includes discussion of portfolio analysis as related to valuation of securities.
Prerequisite(s): Degree Status and a grade of B minus or higher in FNAN 301. Prerequisite enforced by registration system.

Notes: Lecture, discussion, and computer-assisted research.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

**FNAN 321 - Financial Institutions**

Credits: 3 (NR)
Discusses basic objectives of financial institutions in light of industry structure and regulatory environment, and decision variables that management should concentrate on to achieve objectives. Includes role of financial institutions in allocation of funds in financial markets.

Prerequisite(s): Degree Status and a grade of B minus or higher in FNAN 301. Prerequisite enforced by registration system.

Notes: Lecture, discussion, and computer-assisted research.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

**FNAN 351 - Principles of Real Estate**

Credits: 3 (NR)
Studies dimensions and specialties involved in public control and private development, sale, finance, and management of real estate. Includes land planning, land-use control, appraisal, finance, brokerage, property management, and investment.

Prerequisite(s): C or higher in FNAN 301, degree status. Prerequisite enforced by registration system.

Notes: Lecture, discussion, and computer-assisted research.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

**FNAN 401 - Advanced Financial Management**

Credits: 3 (NR)
Analyzes decision-making in firm, emphasizing conceptual structure of problems and using advanced analytic techniques. Topics include current asset management, capital budgeting and structure, dividend policy, long-term financing, mergers, and corporate planning models.

Prerequisite(s): Degree Status and a grade of B minus or higher in FNAN 301. Prerequisite enforced by registration system.
Notes: Lecture, discussion, and case analysis.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

FNAN 411 - Investment Analysis and Portfolio Management

Credits: 3 (NR)
Analyzes modern techniques of portfolio management including evaluating standards for selecting individual securities to include or delete from portfolios. Presents risk-return analysis for portfolios and portfolio performance measures. Lecture, discussion, computer assisted research.

Prerequisite(s): Degree Status and a grade of C or higher in FNAN 311. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

FNAN 412 - Futures and Options Markets

Credits: 3 (NR)
Introduces options, commodity, and financial futures markets as they function to provide pricing mechanisms and alternative investment vehicles. Lecture, discussion, and computer-assisted research.

Prerequisite(s): Degree Status and a grade of C or higher in FNAN 311. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

FNAN 421 - Money and Capital Markets

Credits: 3 (NR)
Discussion of how financial markets are organized, their role in the allocation of funds to various market segments, and interaction between markets. Topics include aggregate flow of funds analysis; and money, government, corporate, and mortgage markets. Lecture, discussion, and computer assisted research.

Prerequisite(s): Degree Status and a grade of C or higher in FNAN 321. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

FNAN 430 - Empirical Methods in Finance
Credits: 3 (NR)
Examines statistical and econometric techniques used in analyzing financial data and developing financial models. Combines
development of understanding of fundamental concepts with applications. Includes extensive use of standard software.

Prerequisite(s): C or higher in FNAN 311 or FNAN 321; BS degree status. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

FNAN 432 - Fixed-Income Securities

Credits: 3 (NR)
Focuses on analysis of fixed-income securities, including corporate and government bonds, mortgage-backed securities, and
derivatives. Major topics include institutional features of fixed-income securities markets, valuation, analysis of risks, and
portfolio management decisions.

Prerequisite(s): C or higher in FNAN 311; BS degree status. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

FNAN 440 - International Financial Management

Credits: 3 (NR)
Introduces management of contemporary firm's international financial operations. Topics include foreign exchange risk, political
risk, returns and risks of international projects, international money and capital markets, financial accounting, capital structure,
and cost of capital. Lecture, discussion, readings, and problems.

Prerequisite(s): Degree Status and a grade of B minus or higher in FNAN 301. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

FNAN 451 - Real Estate Finance

Credits: 3 (NR)
Studies mechanisms of real estate finance, sources of funds, loan contracts, principles of mortgage risk analysis, and secondary
mortgage markets. Develops analytical skills including using microcomputer and appropriate software.

Prerequisite(s): C or higher in FNAN 351, degree status. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring
FNAN 454 - Real Estate Development

Credits: 3 (NR)
Examines commercial real estate development process and principles plus actual residential, office, retail, and industrial projects. Includes financial analytical techniques to investigate project feasibility, density, financing viability, cash flows, and valuation. Emphasis placed on real-world, entrepreneurial, decision-making skills for developing commercial real estate. Lecture, discussion, project analysis.

Prerequisite(s): C or higher in FNAN 351, degree status. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

FNAN 462 - Honors Seminar in Finance

Credits: 3 (NR)
Provides an in-depth study and analysis of contemporary developments and topics of interest in finance. Topics and format will vary. Enrollment is limited and competitive.

Prerequisite(s): Finance major, degree status, senior standing, permission of the instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

FNAN 491 - Special Topics in Finance

Credits: 3 (NR)
Advanced study of special topics in finance.

Prerequisite(s): C or higher in FNAN 301, degree status. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

FNAN 499 - Independent Study

Credits: 1-3 (RT)
May be repeated to a maximum of 6 credits if topics vary. Degree status. Research and analysis of selected problems or topics in finance.

Prerequisite(s): Finance majors with at least 9 upper-level credits, degree status.
Notes: Must be arranged with instructor and approved in writing by associate dean for undergraduate programs before registration. Written report required. May be repeated for maximum 6 credits if topics vary.

Hours of Lecture or Seminar per week: 1-10
Hours of Lab or Studio per week: 0

Foreign Languages (FRLN)

Offered by the College of Humanities and Social Sciences

FRLN 310 - Outside of Hitler's Shadow: Germany in its Global Context

Credits: 3 (NR)
Critical examination of images of Nazis, Hitler, and Holocaust in media, popular culture. Course seeks to demystify and deglamorize such images while highlighting philosophical, cultural, and scientific contributions of Germany, Austria, and Switzerland.

Prerequisite(s): Completion of concurrent enrollment in all other general education courses.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

FRLN 330 - Topics in World Literature

Credits: 3 (RT)
Major works of world literature with varying perspectives and topics, such as specific cultures, histories, myths, or music and the arts, as represented in literature.

Fulfills general education requirement in literature.

Prerequisite(s): ENGL 101/ENGH 101 and 45 credits, or permission of instructor.

Notes: Taught in English. May be repeated for a maximum of 9 credits when topic differs with permission of department.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

FRLN 331 - Topics in World Cinema

Credits: 3 (RD)
Major works of world cinema with varying perspectives and topics, such as specific genres, periods, schools.

Prerequisite(s): English 101 or permission of instructor.
Notes: Course work in English. May be repeated for a maximum of 9 credits when topic is different with permission of department.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

FRLN 380 - Topics in the Sociopolitics of Language

Credits: 3 (RD)
Addresses relationship between language and other social and cultural systems (macro sociolinguistics), and critical study of people's ideas about language (language ideology). Utilizes comparative approach to explore ways people use language to perform and communicate various social identities and categories; how and why people attach social meanings and values to particular ways of using language; development of official and unofficial language policies; and impact of language policies.

Prerequisite(s): ENGL 101/ENGH 101 and 45 credits, or permission of instructor.

Notes: May be repeated for a maximum of 6 credits when topic is different.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

FRLN 385 - Multilingualism, Identity, and Power

Credits: 3 (NR)
Study of individual and societal aspects of multilingualism including language choice, linguistic maintenance and shift, code-switching, language planning, educational policy, and representations of multilingualism. Interdisciplinary approach emphasizes the social and political aspects of multilingualism, as well as the relationship of language to cultural, ethnoracial, and national identities and categories.

Fulfills general education requirement in synthesis.

Prerequisite(s): Completion or concurrent enrollment in all other required general education courses.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

FRLN 430 - Topics in Comparative World Literatures

Credits: 3 (RD)
Explores comparative studies of a topic through literary works written in at least two different languages. All material provided in translation.

FRLN 431 - Medieval Intellectual Topics
Credits: 3 (NR)
Focuses on topic in intellectual history of Middle Ages. Emphasizes literary or historical, depending on discipline of instructor. Relevant material may be drawn from philosophy, theology, and art.

Equivalent to ENGH 421/HIST 431, ENGL 431 (2010-2011 Catalog)

Notes: May be taken for credit by English or history majors.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

FRLN 510 - Bibliography and Research in Foreign Languages and Literature

Credits: 3 (NR)
Use of basic bibliographical tools and methodologies for scholarly research in French, German, and Spanish. Taught in cooperation with university library staff.

Prerequisite(s): Graduate standing or permission of department.

Notes: Conducted in English.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

FRLN 525 - Literary Translation

Credits: 3 (NR)
Critical approach and analysis of diverse texts such as poetry, drama, essay, and novel excerpts.

Prerequisite(s): Graduate standing or permission of department and advanced coursework in literary translation.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

FRLN 550 - Special Topics

Credits: 3 (RT)
Themes, periods, or genres vary from semester to semester. Focuses on topics that incorporate one or more languages taught in department, but instruction is in English.

Notes: May be repeated for a maximum of 6 credits with permission of department.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
FRLN 551 - Special Topics

Credits: 3 (RD)
Themes, periods, or genres vary from semester to semester. Focuses on topics that incorporate one or more languages taught in department, but instruction is in English.

Notes: May be repeated for a maximum of 6 credits with permission of department.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

FRLN 565 - Theory of Translation

Credits: 3 (NR)
Lectures on nature, function of translating process. Evaluates theories of translation with respect to text typology. Critiques selected translations from target languages to English and vice versa.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

FRLN 572 - Integrating Technology into Language Learning

Credits: 3 (NR)
Explores pedagogical and theoretical basis for integrating interactive technologies into language learning programs, and examines potential for learning, teaching, testing, and research. Includes hands-on analysis and evaluation of materials.

Prerequisite(s): Graduate standing or permission of department, language teaching methods course, and language teaching experience.

Notes: Prior experience with technology not required.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

FRLN 573 - Basic Issues in Language Pedagogy

Credits: 3 (NR)
Explores major issues controversial in language pedagogy. Topics include communicative competence as pedagogical goal, role of explicit grammar teaching, proficiency movement, cultural authenticity, student-centered learning, and technology.

Prerequisite(s): Graduate standing or permission of department, language teaching methods course, and language teaching experience.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
FRLN 590 - Internship and Seminar in Translation

Credits: 3 (NR)
Internships are nonpaying, work-study positions that focus on the practice of translation. Qualified students placed with area institutions, interest groups, agencies, or corporations.

Prerequisite(s): Admission to translation certificate program.

Notes: Placement depends on availability of positions.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

FRLN 600 - Workshop in Foreign Languages

Credits: 1-6 (RT)
In-service workshops, tours, and seminars on selected topics in literature, language, bilingualism, culture, methodology.

Notes: May not be applied toward MA in foreign languages without permission of department.

Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 1-12

FRLN 620 - Literary Theory and Criticism

Credits: 3 (NR)
Studies nature of literary work, and analyzes contemporary critical approaches to literature.

Notes: May not be taken for credit by students who previously received credit for FRLN 615.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

FRLN 650 - The Teaching of Culture in Foreign Language Programs

Credits: 3 (NR)
Purpose and methods of study of culture, with emphasis on strategies and techniques for teaching culture in foreign language programs.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

FRLN 660 - Approaches to the Study of Language
Credits: 3 (NR)
Linguistics and its relationship to other disciplines, including study of generative grammar with syntactic problems drawn from commonly taught foreign languages.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

FRLN 670 - Foreign Language Learning and Teaching

Credits: 3 (NR)
Theories, methods, and strategies of second and foreign language learning and teaching.

Notes: May not be taken by students who have completed FRLN 570.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

Forensics (FRSC)

Offered by the College of Science

FRSC 200 - Survey of Forensic Science

Credits: 3 (NR)
This course will familiarize students with the basic principles and uses of forensic science in the American system of justice. This course will review the basic applications of biological, physical, chemical, medical and behavioral sciences to questions of evidence and law. In doing so, students should gain a basic understanding of the capabilities and limitations of the forensic sciences as they are practiced.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

FRSC 201 - Introduction to Criminalistics

Credits: 3 (NR)
An overview of the field of criminalistics, with a focus on the recognition, collection, preservation, and analysis of physical evidence. An introduction to topics such as fingerprints examination, trace evidence analysis, and to prepare students for additional, more in-depth classes in criminalistics/forensic science.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall
FRSC 302 - Forensic Bio-Trace

Credits: 3 (NR)
This course will familiarize students with an overview of the field of forensic science, including areas of trace and biological evidence. Various topics address the analysis of blood and physiological fluid identification, typing, reporting results, and expert testimony.

Prerequisite(s): Admitted to Forensic Science Program FRSC 200, FRSC 201, BIOL 213.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

FRSC 303 - Forensic Evidence and Ethics

Credits: 3 (NR)
This course will acquaint the student with the application of scientific methods and the interaction it may have with legal principles. It will prepare, in a broad sense, the student for future applications of forensic science with its role in the administration of justice, and the ethical rules and duties under codes of professional conduct.

Prerequisite(s): Admitted to Forensic Science Program, FRSC 200, and CRIM 100; or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

FRSC 304 - Forensic Chemistry and Microscopy

Credits: 3 (NR)
Introduction to the theme of forensic science in its application to the fundamentals of chemistry exposing students to widely used concepts of toxicology and arson investigation. An introduction to microscopy helps students master the foundational principles of microscopy in analyzing forensic trace evidence.

Prerequisite(s): Admitted to Forensic Science Program, CHEM 211, and CHEM 212; or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring

FRSC 405 - Independent Studies / Research

Credits: 3 (NR)
Independent Studies / Research. Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.
Prerequisite(s): Admitted to Forensic Science Program and 90 hours, or permission of instructor.

Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0  
When Offered: Fall, Spring, Summer

FRSC 415 - Selected Topics in Forensic Science

Credits: 3 (RD)  
Topics vary according to instructor's specialty.

Prerequisite(s): Permission of instructor

Notes: May be repeated only with permission of program chair.

Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0  
When Offered: Fall, Spring

FRSC 420 - Forensic Toxicology

Credits: 3 (NR)  
Examines toxic substances and their effects on human cellular and organ systems. The course focuses on human physiological concepts, the human enzymatic detoxification processes, methodologies for identifying toxins, and specific toxic analytes.

Prerequisite(s): Completion of forensic science foundation courses

Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0

FRSC 440 - Forensic Chemistry

Credits: 3 (NR)  
The principles of forensic chemistry will be addressed in this course, including analytical chemistry, instrumentation, sample handling, drug chemistry and pharmacology, and analysis of physical evidence such as papers, inks, paints, and coatings.

Prerequisite(s): Completion of forensic science foundation courses

Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0

FRSC 460 - Forensic DNA Sciences
Presentation of the general principles and methodologies used in forensic DNA profiling. Topics include the development of DNA profiling methods, current DNA typing techniques, forensic DNA and paternity-related issues, and legal issues associated with quality control, frequency estimates, sample conditions, chain of custody, and admissibility.

Prerequisite(s): Completion of forensic science foundation courses

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

FRSC 500 - Introduction to Forensic Science

Credits: 3 (NR)
Overview of forensic science and related investigative techniques. Includes coverage of crime scene investigation, crime scene procedures, the role of the forensic pathologist, the modern forensic laboratory, DNA analysis techniques, microanalysis, examination of trace evidence, hair and fibers, examination of questioned documents, forensic anthropology, forensic odontology, homicide investigation, and analysis of a mock crime scene.

Prerequisite(s): Graduate standing.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

FRSC 510 - Basic Crime Analysis

Credits: 3 (NR)
Examines the role of the first officer at the scene, search, seizure and related legal issues, traditional crime scene measurements, photogrammetry, processing latents, crime scene reconstruction methods, 2-D and 3-D impressions, blood spatter analysis, collection of trace evidence, packaging and preserving evidence, outdoor crime scenes, and explosion and fire scenes.

Prerequisite(s): Graduate standing.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

FRSC 511 - Advanced Crime Scene Analysis

Credits: 3 (NR)
Advanced Crime Scene Analysis is designed to build on concepts introduced in FRSC 510 (Basic Crime Scene Analysis), and to provide an enhanced foundation in the field of criminalistics for those students who are interested in learning the application of science to solving crimes.

Prerequisite(s): FRSC 510 or permission of instructor

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring
FRSC 512 - Physical Evidence Analysis

Credits: 3 (NR)
This is a series of practical laboratory exercises that introduces the student to sophisticated crime scene documentation techniques including collection of evidence, examination of hairs, fibers, toolmarks and other trace evidence. Advanced topics in blood spatter, trajectory, pattern casting, and alternate light sources will be explored.

Prerequisite(s): FRSC 510 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring

FRSC 513 - Forensic Photography

Credits: 3 (NR)
This series of lecture and practical exercises introduces the student to sophisticated crime scene documentation techniques including photography, digital imaging, use of lighting, and legal issues relating to images.

Prerequisite(s): Admitted to the Forensic Science Master's Program, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring

FRSC 515 - Selected Topics in Forensic Science

Credits: 3 (RD)
Topics vary with instructor's specialty. May be repeated only with permission of program chair.

Prerequisite(s): Permission of instructor

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Summer, Spring

FRSC 520 - Toxicology

Credits: 3 (NR)
Examines toxic substances and their effects on human cellular and organ systems. The course focuses on human physiological concepts, the chemistry of toxins, the human enzymatic detoxification processes, and the analytical techniques required for detecting the presence of toxins and their metabolites in human tissue or serum.

Prerequisite(s): Advanced level undergraduate course in molecular or cellular biology, biochemistry or permission of instructor.
FRSC 530 - Law and Forensic Science

Credits: 3 (NR)
A detailed examination and analysis of the law affecting forensic science across the discipline range. Special emphasis is given to the laws affecting evidence, courtroom procedure, and the forensic expert.

Prerequisite(s): Minimum of 10 credit hours of graduate Forensic Science coursework.

FRSC 540 - Forensic Chemistry

Credits: 3 (NR)
The principles of forensic chemistry will be addressed in this course, including analytical chemistry, instrumentation, sample handling, drug chemistry and pharmacology, and analysis of physical evidence such as papers, inks, paints, and coatings.

Prerequisite(s): Undergraduate degree in chemistry or biology, or permission of instructor.

FRSC 550 - Issues in Forensic Anthropology

Credits: 3 (NR)
Examines issues related to skeletal analyses and interpretation of forensic case reports in determining personal identification and cause of death. Discussions include skeletal variation, age criteria, sexing criteria, pathology, trauma, and postmortem damage.

Prerequisite(s): Graduate standing.

FRSC 560 - Forensic DNA Sciences

Credits: 3 (NR)
Intensive introduction to parameters affecting data QC and analysis, including factors arising from biochemistry, chemistry, genetics, statistics, instrumentation, and software.

Equivalent to BINF 637
Prerequisite(s): Graduate standing or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

FRSC 570 - Introduction to Biochemical Forensics

Credits: 3 (NR)
An introduction to biochemical forensics for non-scientists. This class will first lay a basic groundwork in chemistry and biochemistry. This background will be used in the explanation of forensic toxicology, DNA and blood analysis, identification of bodily fluids and stains, and analysis of controlled substances.

Prerequisite(s): A course in introductory biology or chemistry, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

FRSC 580 - Image Analysis in Forensic Science

Credits: 3 (NR)
This course begins with an introduction to methods used in image analysis, and the methods of facial reconstruction. The course will then explore modern techniques applied to several areas of forensic imaging. Advance topics in forensic sculpturing, 3D imagery, and post-mortem imagery will be explored.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

FRSC 600 - Forensics Seminar

Credits: 1 (RD)
Selected topics in forensic science research, generally consisting of research presentations by forensic professionals and faculty members. Students must write up a one page summary of each talk attended.

Prerequisite(s): Admission to the Forensic Science MS program.

Notes: Students enrolled in the forensic science MS program must attend at least 80% of the seminars. May be repeated for a total of 3 credits.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0

FRSC 610 - Forensics Research Project
Credits: 1-4 (RD)
Research project in a current area of forensic science performed under the direction of a faculty member or affiliated forensic science professional.

Prerequisite(s): Admission to Forensic Science MS program.

Notes: May be repeated for a total of 4 credits.

Hours of Lecture or Seminar per week: 1-4
Hours of Lab or Studio per week: 0
When Offered: Fall, Summer, Spring

FRSC 690 - Forensics Capstone Course

Credits: 3 (NR)
Integrates all the various techniques used in the study of forensic science and medicine, and applies them to the interpretation of facts and the reconstruction of the sequence of events at a variety of typical death scenes. Integrates medical, scientific, sociological, and legal methodology as they apply to medicolegal death investigations, using a variety of forensic literature and text resources. Presents an integrative approach to crime scene analysis based on actual case studies, in which students apply theoretical concepts discussed in class to real-world situations. Includes weekly group projects, with students organized in rotating groups and assigned a research topic in forensic medicine. Students discuss, examine, and analyze forensic, medical, and physical elements present at the death scenes, and develop their own hypotheses, which are then evaluated and discussed as the case is reconstructed.

Prerequisite(s): Permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

FRSC 790 - Internship in Forensic Science

Credits: 1-3 (RD)
On the job experience for Forensic Science majors in industry or government laboratories or investigative units, or approved study programs with specific employers. Students work in observational, experimental, or theoretical research, and prepare weekly journals, as well as a written report at the end of the internship.

Prerequisite(s): Admitted to Forensic Science Program, or permission of instructor. See department for requirements and application procedures prior to enrollment.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring, Summer

FRSC 799 - Master's Thesis

Credits: 1-6 (RD)
Project chosen and completed under guidance of graduate faculty member. Comprehensive report (thesis) acceptable to student's
advisory committee is required.

**Prerequisite(s):** Permission of forensic science MS program director.

**Hours of Lecture or Seminar per week:** 1-3  
**Hours of Lab or Studio per week:** 0  
**Grading:** Satisfactory/No credit only

## French (FREN)

Offered by the College of Humanities and Social Sciences

Placement: See Academic Testing in the Admissions section.

*See also FRLN course listings.*

### FREN 101 - Elementary French I

Credits: 3 (NR)  
For students with no knowledge of French. Introduces elements of grammar, vocabulary, oral skills, listening comprehension, and reading.

**Notes:** Students may not receive credit for FREN 101 and FREN 105, 109, or 110.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

### FREN 102 - Elementary French II

Credits: 3 (NR)  
Continuation of FREN 101.

**Prerequisite(s):** FREN 101, appropriate placement score, or permission of instructor.

**Notes:** Students may not receive credit for FREN 102 and FREN 105, 109, or 110.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

### FREN 109 - Intensive Elementary French

Credits: 6 (NR)  
Equivalent to FREN 101 and 102 taught in single semester.

**Notes:** Recommended for students who desire intensive introduction. Students may not receive credit for FREN 109 and FREN
101, 102, 105 or 110.

Hours of Lecture or Seminar per week: 6
Hours of Lab or Studio per week: 2

FREN 110 - Elementary French

Credits: 6 (NR)
Introduces elements of grammar, vocabulary, oral skills, listening comprehension, and reading.

Notes: Students may not receive credit for FREN 110 and FREN 101, 102, 105, or 109.

Hours of Lecture or Seminar per week: 6
Hours of Lab or Studio per week: 0

FREN 115 - Review of Elementary French

Credits: 3 (NR)
Reviews elements of French for students who have studied French previously.

Prerequisite(s): Appropriate placement score or permission of the department.

Notes: Students may not receive credit for FREN 115 and also FREN 105, 102, 109 or 110.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

FREN 201 - Intermediate French I

Credits: 3 (NR)
Further development of skills in listening, speaking, reading, and writing.

Prerequisite(s): FREN 102, 105, and 109; appropriate placement score; or permission of department.

Notes: FREN 201 and 202 must be taken in sequence. Students may not receive credit for FREN 201 and FREN 209 or 210.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

FREN 202 - Intermediate French II

Credits: 3 (NR)
Applies language skills to reading, composition, and class discussion.
Prerequisite(s): FREN 201, appropriate placement score, or permission of department.

Notes: Students may not receive credit for FREN 202 and FREN 209 or 210.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

FREN 209 - Intensive Intermediate French

Credits: 6 (NR)
Equivalent to FREN 201 and 202 taught in single semester.

Prerequisite(s): FREN 102, 105, and 109; appropriate placement score; or permission of department.

Notes: Students may not receive credit for FREN 209 and FREN 201, 202, or 210.

Hours of Lecture or Seminar per week: 6
Hours of Lab or Studio per week: 0

FREN 210 - Intermediate French

Credits: 3 (NR)
Continuation of the development of basic components of the language, with focus on listening, speaking, reading, and writing skills. Introduces students to the cultures and histories of French-speaking regions.

Prerequisite(s): FREN 110 or appropriate placement score.

Notes: Students may not receive credit for FREN 210 and FREN 201, 202, or 209.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

FREN 250 - Gateway to Advanced French

Credits: 3 (NR)
Integration of advanced intermediate-level French reading, writing, listening, and speaking skills, and the development of critical thinking about authentic texts from around the globe.

Prerequisite(s): FREN 210, appropriate placement score, or permission of department.

Notes: Taught in French.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
FREN 300 - Study Tour in France

Credits: 1-6 (NR)
Directed study tour of cultural and literary points of interest in France. Briefing sessions and reading selection given before the trip.

Prerequisite(s): FREN 250, appropriate placement score or permission of instructor.

Notes: All papers and exams required for credit are due by end of summer session.

Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 1-12

FREN 309 - Reading and Writing Skills Development

Credits: 6 (NR)
Development of ability to write on topics of current interest. Readings provide examples of each topic and necessary vocabulary for compositions. Introduces reading strategies and provides practice in reading of different kinds of texts.

Fulfills writing intensive requirement in the major.

Prerequisite(s): FREN 202, 250, or equivalent; appropriate placement score; or permission of instructor.

Notes: Taught in French.

Hours of Lecture or Seminar per week: 6
Hours of Lab or Studio per week: 0

FREN 310 - Oral Proficiency in French

Credits: 3 (NR)
Develops conversational proficiency in French with attention to various specific communicative strategies and functions. Practice in pronunciation and diction based on systematic study of sound system of French.

Prerequisite(s): FREN 250, appropriate placement score or permission of instructor.

Notes: Taught in French.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

FREN 320 - Contemporary Tour de France

Credits: 3 (NR)
Examines contemporary social, political, economic, cultural trends in France. Covers domestic and international topics such as debates around French identity, migration and civil rights, political parties, the media, family life, work-related issues,
participation in international organizations and involvement with former colonies and overseas regions.

Prerequisite(s): FREN 309 or permission of the instructor.

Notes: Taught in French.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

FREN 325 - Major French Writers

Credits: 3 (NR)
Studies works of major French writers. Writers to be studied vary.

Fulfills general education requirement in literature.

Prerequisite(s): ENGL 101/ENGH 101 or equivalent, or permission of instructor.

Notes: Taught in English. May be repeated for credit with permission of department.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

FREN 329 - Problems of Western Civilization in French Literature

Credits: 3 (NR)
Basic philosophical, moral, social, and political dilemmas reflected in literature of major French writers.

Fulfills general education requirement in literature.

Prerequisite(s): ENGL 101/ENGH 101 or equivalent, or permission of instructor.

Notes: Taught in English. May be repeated for credit with permission of department.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

FREN 340 - Francophone Identities

Credits: 3 (NR)
Provides opportunity to learn about richness, variety, and complexity of francophone world through study of literature, culture, social life, and identities of various francophone regions including Caribbean, Africa, Quebec, and Indochina.

Prerequisite(s): FREN 309, appropriate placement score, or permission of instructor.

Notes: Taught in French.
FREN 357 - Introduction to Translation

Credits: 3 (NR)
French to English, English to French translations, of texts from current periodicals and newspapers in various fields.

Prerequisite(s): FREN 250, appropriate placement score or permission of instructor.

Notes: Recommended for students who wish to improve language skills.

FREN 370 - French Civilization, Culture, and Literature: Ancient Gaul to 1789

Credits: 3 (NR)
Examines history, civilization (daily life, politics, science, philosophy, religion), culture (architecture, art, music, dance), and literature of France from Ancient Gaul to the eve of the French Revolution. Studies development of French nation and its people through written texts, visual arts, and music.

Prerequisite(s): FREN 309, or permission of instructor.

FREN 371 - French Civilization, Culture, and Literature: 1789 to the Present

Credits: 3 (NR)
Examines history, civilization (daily life, politics, science, philosophy, religion), culture (architecture, art, music, dance), and literature of France from French Revolution of 1789 to present. Studies development of French nation and its people through written texts, visual arts, and music.

Prerequisite(s): FREN 309, or permission of instructor.

FREN 381 - Introduction to Literary Analysis

Credits: 3 (NR)
Structured approach to reading and analysis of French literary texts.
Prerequisite(s): 15 credits of French.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

FREN 391 - French for the Business World

Credits: 3 (NR)
Studies written and oral styles of communication in commercial, governmental and non-governmental settings. Satisfies needs of students preparing for work in multinational business and foreign service.

Prerequisite(s): 15 credits of French, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

FREN 400 - Study Abroad in France or Francophone Region

Credits: 1-6 (RD)
2 to 4 week programs in France or the Francophone world with language, culture and literature courses, local visits and excursions.

Prerequisite(s): 15 credits of French at the 300 level or permission of instructor.

Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 0

FREN 415 - Topics in Medieval French Literature and Culture

Credits: 3 (RD)
Analyzes a selection of important literary texts (chanson, novel, poetry, short story) and authors in their historical and cultural contexts: geste, feudalism, socio-political and religious (in)stability.

Prerequisite(s): 15 credits of French at the 300 level or permission of instructor.

Notes: May be repeated for a maximum of 6 credits when topic is different.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

FREN 416 - Topics in Renaissance French Literature and Culture

Credits: 3 (RD)
Analyzes a selection of important literary texts (novel, short story, poetry, and theater) and authors in their historical and cultural
contexts: humanism, reformation, codification of language and birth of nation-state.

Equivalent to FREN 405 (2011-2012 Catalog)

Prerequisite(s): 15 credits of French at the 300 level or permission of instructor.

Notes: May be repeated for a maximum of 6 credits when topic is different.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

FREN 417 - Topics in Seventeenth-Century French Literature and Culture

Credits: 3 (RD)
Analyzes a selection of important literary texts (novel, short story, poetry, and theater) and authors in their historical and cultural contexts: baroque, classicism, social and philosophical essays, satirical plays.

Equivalent to FREN 413 (2011-2012 Catalog), FREN 414 (2011-2012 Catalog).

Prerequisite(s): 15 credits of French at the 300 level or permission of instructor.

Notes: May be repeated for a maximum of 6 credits when topic is different.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

FREN 418 - Topics in Eighteenth-Century French Literature and Culture

Credits: 3 (RD)
Analyzes a selection of important literary texts (novel, short story, poetry, and theater) and authors in their historical and cultural contexts: enlightenment, social, political and philosophical trends and issues, pre-romanticism.

Equivalent to FREN 421 (2011-2012 Catalog), FREN 422 (2011-2012 Catalog).

Prerequisite(s): 15 credits of French at the 300 level or permission of instructor.

Notes: May be repeated for a maximum of 6 credits when topic is different.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

FREN 419 - Topics in Nineteenth-Century French Literature and Culture

Credits: 3 (RD)
Analyzes a selection of important literary texts (novel, short story, poetry, and theater) and authors in their historical and cultural contexts: pre-Romanticism; Romanticism; Realism; Symbolism; Naturalism.
Equivalent to FREN 431 (2011-2012 Catalog), FREN 432 (2011-2012 Catalog).

Prerequisite(s): 15 credits of French at the 300 level or permission of instructor.

Notes: May be repeated for a maximum of 6 credits when topic is different.

FREN 420 - Topics in Twentieth and Twenty-First-Century French Literature and Culture

Credits: 3 (RD)
Analyzes a selection of important literary texts (novel, short story, poetry, and theater) and authors in their historical and cultural contexts: surrealists, existentialists, new novelists, feminists, etc.

Equivalent to FREN 441 (2011-2012 Catalog), FREN 442 (2011-2012 Catalog).

Prerequisite(s): 15 credits of French at the 300 level or permission of instructor.

Notes: May be repeated for a maximum of 6 credits when topic is different.

FREN 450 - Special Topics Related to French Literature and Culture

Credits: 3 (RD)
Analyzes selected texts, authors, movements, and issues within a comparative historical and cultural context over two or more centuries or with an interdisciplinary approach.

Prerequisite(s): 15 credits of French at the 300 level or permission of instructor.

Notes: May be repeated for a maximum of 6 credits when topic is different.

FREN 451 - Topics in Sub-Saharan Francophone Literature and Culture

Credits: 3 (RD)
Analyzes a selection of literary texts (novel, short story, poetry, and/or theater) and authors in their historical and cultural contexts: Négritude, (post)colonialism, new African voices within and beyond the continent.

Prerequisite(s): 15 credits of French at the 300 level or permission of instructor.

Notes: May be repeated for a maximum of 6 credits when topic is different. Fulfills the college requirement in non-Western
culture.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

FREN 453 - Topics in North African Francophone Literature and Culture

Credits: 3 (RD)
Analyzes a selection of literary texts (novel, short story, poetry, and/or theater) and authors in their historical and cultural contexts with a focus on the construction of identity: Maghreb in pre and (post)colonial era, recent ideological trends in writing.

Prerequisite(s): 15 credits of French at the 300 level or permission of instructor.

Notes: May be repeated once for credit with permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

FREN 454 - Topics in Caribbean Francophone Literature and Culture

Credits: 3 (RD)
Analyzes a selection of important literary texts (novel, short story, poetry, and/or theater) and authors in their historical and cultural contexts: the construction of identity through and beyond Nègritude, Antillanité, Créolité, and migration.

Prerequisite(s): 15 credits of French at the 300 level or permission of instructor.

Notes: Fulfills the college requirement in non-Western culture.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

FREN 455 - Special Topics related to Francophone Literature and Culture

Credits: 3 (RD)
Analyzes a selection of important literary texts (novel, short story, poetry, and/or theater) and authors in their historical and cultural contexts: gender studies, migration and identity-building, ethno-social tensions, political strife, religious conflicts throughout the francophone world.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
Credits: 3 (RD)
Analyzes representative literary texts (novel, short story, poetry, and/or theater) and authors in their historical and cultural contexts. Emphasizes contemporary works.

**Prerequisite(s):** 15 credits of French at the 300 level or permission of instructor.

**Notes:** May be repeated for a maximum of 6 credits when topic is different.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**FREN 460 - Advanced Oral and Written Expression**

Credits: 3 (NR)
Intensive course designed to help students obtain fluency in oral and written French. Develops conversational skills and mastery of vocabulary through class discussions, oral and written reports, debates and presentations on current topics and events linked to the French and Francophone world.

**Prerequisite(s):** 15 credits of French, or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**FREN 461 - Linguistic Structure of Modern French**

Credits: 3 (NR)
Analyzes phonology, morphology, and syntax of modern standard French, through a close study of selected texts (newspaper articles, short stories, novel excerpts, informal correspondence.)

**Prerequisite(s):** 15 credits of French, or permission of instructor.

**Notes:** Optional lab work.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**FREN 462 - Stylistics**

Credits: 3 (NR)
Describes and analyzes the variability of forms and styles and the more complex aspects of the French language. Develops writing skills through readings, discussions, and compositions.

**Prerequisite(s):** 15 credits of French at the 300 level or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0
FREN 463 - History of the French Language

Credits: 3 (NR)
Diachronic study of the French language from the 9th to the 20th century, with a focus on morphology, syntax and lexicon changes. Close study of various texts (prose, poetry, political writing, theater and short stories,) in the light of their socio-historical contexts.

Prerequisite(s): 15 credits of French at the 300 level or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

FREN 464 - Advanced Translation

Credits: 3 (RD)
Analyzes theories and methods of translation, with a focus on translation practice (French to English and English to French) of a varied selection of texts (periodicals, short stories, novel excerpts, newspaper articles, etc.).

Prerequisite(s): 15 credits of French at the 300 level or permission of the instructor.

Notes: May be repeated for a maximum of 6 credits when topic is different.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

FREN 465 - Special Topics related to the French language

Credits: 3 (RD)
Content varies: diachronic or synchronic study of the French language or one of its aspects; sociolinguistics; language teaching methodology; etc.

Prerequisite(s): 15 credits of French at the 300 level or permission of instructor.

Notes: May be repeated for a maximum of 6 credits when topic is different.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

FREN 467 - Special Topics related to French and Francophone Literature and Culture

Credits: 3 (RD)
Analyzes selected texts, authors, movements, and issues within comparative historical and cultural contexts as related to France and to various francophone regions of the world or with an interdisciplinary approach.
Prerequisite(s): 15 credits of French at the 300 level or permission of instructor.

Notes: May be repeated for a maximum of 6 credits when topic is different.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

FREN 470 - French and Francophone Cinema

Credits: 3 (RD)
Analyzes topics such as the early days of French cinema, la nouvelle vague, women film directors, Quebecois, African and Caribbean films, selected by type, period or director.

Prerequisite(s): 15 credits of French at the 300 level or permission of instructor.

Notes: May be repeated once with permission of department or film studies advisor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

FREN 475 - Grammatical Analysis

Credits: 3 (NR)
Study of characteristic features of contemporary French. Examines spoken and written French, including syntactic analysis, distributional analysis, and generative-transformational grammar. Emphasis on problem areas for American learner.

Prerequisite(s): 15 credits of French at the 300 level or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

FREN 490 - Independent Study

Credits: 1-3 (NR)
Research and analysis of selected problem in literature or linguistics in consultation with department member.

Prerequisite(s): French majors with 90 credits, and permission of chair.

Notes: Only 6 credits of independent study may be applied to fulfilling requirements in concentration.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0

FREN 491 - Independent Study
Research and analysis of selected problem in literature or linguistics in consultation with department member.

**Prerequisite(s):** French majors with 90 credits, and permission of chair.

**Notes:** Only 6 credits of independent study may be applied to fulfilling requirements in concentration.

**Hours of Lecture or Seminar per week:** 1-5
**Hours of Lab or Studio per week:** 0

**FREN 497 - Senior Honors Tutorial**

Credits: 3 (NR)
Students who meet these requirements admitted to candidacy after submitting letter of application to departmental Honors Committee in second half of junior year. Also requires faculty recommendation and interview by Honors Committee. First semester involves weekly meetings with faculty member to discuss readings from comprehensive list prepared by French faculty. Second semester requires independent research and completion of honors essay under supervision of French faculty member.

**Prerequisite(s):** French majors with 90 credits, cumulative GPA of 3.00, and 3.00 in major field.

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0

**FREN 498 - Senior Honors Tutorial**

Credits: 3 (NR)
Students who meet these requirements admitted to candidacy after submitting letter of application to departmental Honors Committee in second half of junior year. Also requires faculty recommendation and interview by Honors Committee. First semester involves weekly meetings with faculty member to discuss readings from comprehensive list prepared by French faculty. Second semester requires independent research and completion of honors essay under supervision of French faculty member.

**Prerequisite(s):** French majors with 90 credits, cumulative GPA of 3.00, and 3.00 in major field.

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0

**FREN 500 - Study Abroad in France or Francophone Region**

Credits: 1-6 (RD)
2 to 4-week programs in France or the Francophone world with language, culture and literature courses, local visits and excursions. Advanced critical research and writing required.

**Notes:** May be repeated for a maximum of 6 credits.

**Hours of Lecture or Seminar per week:** 1-6
**Hours of Lab or Studio per week:** 0
FREN 515 - Topics in Medieval French Literature and Culture

Credits: 3 (RD)
Analyzes a selection of important literary texts (chanson, novel, poetry, short story) and authors in their historical and cultural contexts: geste, feudalism, socio-political and religious (in)stability. Advanced critical research and writing required.

Notes: Course work in French. May be repeated for a maximum of 6 credits when topic is different.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

FREN 516 - Topics in Renaissance French Literature and Culture

Credits: 3 (RT)
Analyzes a selection of important literary texts (novel, short story, poetry, and theater) and authors in their historical and cultural contexts: humanism, reformation, and codification of language and birth of nation-state. Advanced critical research and writing required.

Notes: May be repeated for a maximum of 6 credits when topic is different.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

FREN 517 - Topics in Seventeenth-Century French Literature and Culture

Credits: 3 (RD)
Analyzes a selection of important literary texts (novel, short story, poetry, and/or theater) and authors in their historical and cultural contexts: enlightenment, social, political and philosophical trends and issues, pre-romanticism. Advanced critical research and writing required.

Notes: Content varies. May be repeated once for credit. Course work in French.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

FREN 518 - Topics in Eighteenth-Century French Literature and Culture

Credits: 3 (RD)
Analyzes a selection of important literary texts (novel, short story, poetry, and/or theater) and authors in their historical and cultural contexts: enlightenment, social, political and philosophical trends and issues, pre-romanticism. Advanced critical research and writing required.

Notes: Content varies. Course work in French. May be repeated for a maximum of 6 credits when topic is different.
FREN 519 - Topics in Nineteenth-Century French Literature and Culture

Credits: 3 (RD)
Analyzes a selection of important literary texts (novel, short story, poetry, and/or theater) and authors in their historical and cultural contexts: pre-Romanticism; Romanticism; Realism; Symbolism; Naturalism. Advanced critical research and writing required.

Notes: Content varies. Course work in French. May be repeated for a maximum of 6 credits when topic is different.

FREN 520 - Topics in Twentieth and Twenty-First-Century French Literature and Culture

Credits: 3 (RD)
Analyzes a selection of important literary texts (novel, short story, poetry, and/or theater) and authors in their historical and cultural contexts: surrealists, existentialists, new novelists, feminists, etc. Advanced critical research and writing required.

Notes: May be repeated for a maximum of 6 credits when topic is different.

FREN 550 - Special Topics

Credits: 3 (RT)
Specialized topics relating to French culture and literature.

Notes: Content varies. May be repeated once for credit. Course work in French.

FREN 551 - Topics in Francophone Sub-Saharan Literature and Culture

Credits: 3 (RD)
Analyzes a selection of important literary texts (novel, short story, poetry, and/or theater) and authors in their historical and cultural contexts: Négritude, (post)colonialism, new African voices within and beyond the continent. Advanced critical research and writing required.
Notes: May be repeated for a maximum of 6 credits when topic is different.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

FREN 553 - Topics in North African Francophone Literature and Culture

Credits: 3 (RD)
Analyzes a selection of literary texts (novel, short story, poetry, and/or theater) and authors in their historical and cultural contexts with a focus on the construction of identity: Maghreb in pre and (post)colonial era, recent ideological trends in writing. Advanced critical research and writing required.

Notes: May be repeated for a maximum of 6 credits when topic is different.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

FREN 554 - Topics in Francophone Caribbean Literature and Culture

Credits: 3 (RD)
Analyzes a selection of important literary texts (novel, short story, poetry, and/or theater) and authors in their historical and cultural contexts: the construction of identity through and beyond Négritude, Antillanité, Créolité, and migration. Advanced critical research and writing required.

Notes: May be repeated for a maximum of 6 credits when topic is different.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

FREN 555 - Special Topics related to Francophone Literature and Culture

Credits: 3 (RD)
Analyzes a selection of important literary texts (novel, short story, poetry, and/or theater) and authors in their historical and cultural contexts: gender studies, migration and identity-building, ethno-social tensions, political strife, religious conflicts throughout the francophone world. Advanced critical research and writing required.

Notes: May be repeated for a maximum of 6 credits when topic is different.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

FREN 557 - Topics in Quebec and French-Canadian Literature and Culture
Credits: 3 (RD)
Analyzes representative literary texts (novel, short story, poetry, and/or theater) and authors in their historical and cultural contexts. Emphasizes contemporary works. Advanced critical research and writing required.

Notes: May be repeated for a maximum of 6 credits when topic is different.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

FREN 561 - Linguistic Structure of Modern French

Credits: 3 (NR)
Analyzes phonology, morphology, and syntax of modern standard French, through a close study of selected texts (newspaper articles, short stories, novel excerpts, informal correspondence). Advanced critical research and writing required.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

FREN 562 - Stylistics

Credits: 3 (NR)
Describes and analyzes the variability of forms and styles and the more complex aspects of the French language. Develops writing skills through readings, discussions, and compositions. Advanced critical research and writing.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

FREN 563 - History of the French Language

Credits: 3 (NR)
Analyzes a selection of literary texts (novel, short story, poetry, and/or theater) and authors in their historical and cultural contexts with a focus on the construction of identity: Maghreb in pre and (post)colonial era, recent ideological trends in writing. Advanced critical research and writing required.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

FREN 564 - Advanced Translation

Credits: 3 (NR)
Analyzes theories and methods of translation, with a focus on translation practice (French to English and English to French) of a varied selection of texts (periodicals, short stories, novel excerpts, newspaper articles, etc.) Advanced critical research and writing required.
Notes: Translations from French to English and English to French.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

FREN 565 - Special Topics Related to the French Language

Credits: 3 (RT)
Content varies: diachronic or synchronic study of the French language or one of its aspects; sociolinguistics; language teaching methodology; etc. Advanced critical research and writing required.

Notes: May be repeated for a maximum of 6 credits when topic is different.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

FREN 567 - Special Topics related to French and Francophone Literature and Culture

Credits: 3 (RD)
Explores issues related to the francophone world. Emphasis on comparative issues, not geographical areas.

Prerequisite(s): 15 credits of French at the 300 level or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

FREN 570 - French and Francophone Cinema

Credits: 3 (RD)
Topics such as early days of French cinema, a nouvelle vague, women film directors, Quebecois, African and Caribbean films, selected by type, period or director. Advanced critical research and writing required. Viewing of films outside of class time.

Notes: May be repeated for a maximum of 6 credits when topic is different.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

FREN 575 - Grammatical Analysis

Credits: 3 (NR)
Analyzes selected texts, authors, movements, and issues within comparative historical and cultural contexts as related to France and to various francophone regions of the world or with an interdisciplinary approach. Advanced critical research and writing required.
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

FREN 798 - Directed Reading and Thesis Research

Credits: 3 (NR)
Reading and research for thesis under direction of a faculty member.

Notes: Open to degree students who desire to work on independent study with a faculty mentor or who have completed at least 24 credits and have been approved by the French Graduate Faculty to conduct research for a M.A. thesis. See Modern Classical Languages Graduate Student Handbook for complete explanation of the thesis option.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
Grading: Graduate Special

FREN 799 - Thesis

Credits: 1-6 (RD)
Research on approved thesis topic under direction of thesis committee.

Prerequisite(s): FREN 798 and approval of director.

Notes: Students must register for a minimum of 3 credits in the first semester of 799 and maintain continuous enrollment in 799 while writing and submitting the thesis.

Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 0
Grading: S/NC

Geography and Geoinformation Science (GGS)

Offered by the College of Science

Graduate standing is prerequisite to all 600-level courses.

GGS 101 - Major World Regions

Credits: 3 (NR)
Patterns, problems, and prospects of the world’s principal human-geographic regions. Emphasizes areal differentiation and role of geographic differences in interpreting current world scene.

Fulfills general education requirement in global understanding.
Equivalent to GEOG 101 (2009-10 catalog)

Notes: Fulfills the college-level requirement in non-Western culture.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GGS 102 - Physical Geography

Credits: 3 (NR)

Interrelated processes affecting global distribution and character of climate, soils, vegetation, hydrology, and landforms. Includes elements of mapping. Designated a Green Leaf Course.

Fulfills general education requirement in natural science (nonlab).

Equivalent to GEOG 102 (2009-10 catalog)

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GGS 103 - Human Geography

Credits: 3 (NR)

Overview of major ideas and approaches to studying spatial aspects of human social and behavioral systems. Surveys distribution and movement of human populations, characteristics and distribution of cultural mosaics, patterns of economic interdependence, and study of forces of cooperation and conflict among people from global perspective. Designated a Green Leaf Course.

Fulfills general education requirement in social and behavioral science.

Equivalent to GEOG 103 (2009-10 catalog)

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GGS 110 - Maps and Mapping

Credits: 3 (NR)

Introduces maps and spatial analytic tools and methods, including geographic information systems. Familiarizes students with key geographic concepts and skills through integrating information technology with map-making technology. Includes introduction to computer and web-based geographic applications, databases, and graphics.
GGS 121 - Dynamic Atmosphere and Hydrosphere

Credits: 4 (NR)

Systematic study of weather, climate, energy, and hydrologic systems viewed from a geospatial and global perspective. Studies the spatial distribution and relationships of the Earth’s climate and hydrologic systems to other Earth systems, as well as the processes driving and changing them, including energy, climate, weather, and water resources. Designated a Green Leaf Course.

Fulfills general education requirement in natural science (lab).

Equivalent to EOS 121 (2009-10 catalog)

GGS 122 - Dynamic Geosphere and Ecosphere

Credits: 4 (NR)

Systematic study of biogeography and soils, viewed from a geographic, or spatial, perspective. We will study the spatial distribution and relationships of Earth’s biomes and soils systems to other Earth systems, and the processes driving them, including energy, climate, nutrients, chemistry, and moisture. Designated a Green Leaf Course.

Equivalent to EOS 122 (2009-10 catalog)

GGS 300 - Quantitative Methods for Geographical Analysis

Credits: 3 (NR)

Comprehensive introduction to quantitative methods in spatial analysis, with emphasis on solving geographical research problems. Topics include nature of spatial data; collection of spatial data; preparation of spatial data for mapping, geographic information systems, and statistical analysis; descriptive spatial statistics; areal sampling theory and methods; probability theory and distributions; hypothesis testing; correlation and regression; and areal and point pattern spatial statistics.

Equivalent to GEOG 300 (2009-10 catalog)
Prerequisite(s): 30 credits, including GGS 102 and 103, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GGS 301 - Political Geography

Credits: 3 (NR)
Distribution and effects of power on landscape, particularly on national and global scales.

Equivalent to GEOG 301 (2009-10 catalog)

Prerequisite(s): 30 credits

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GGS 302 - Global Environmental Hazards

Credits: 3 (NR)

Introduces applications of observational and modeling techniques to natural hazards and the threat they pose to the world, as well as a general introduction to global climate change and its effect on regional and local scales. Examples include topics of interest to different countries and regions of the world, such as earthquakes, sand and dust storms, slope failures, volcanoes, land slides, droughts and desertification, floods, hurricanes and typhoons, severe weather, wild fires (U.S., Indonesia, Africa, S. America), sea-level rise, and tsunamis. Covers Earth system science topics related to the above hazards and their coupling with anthropogenic hazards as well as how societies respond to natural disasters and mitigation.
Designated a Green Leaf Course.

Equivalent to EOS 305 (2009-10 catalog)

Prerequisite(s): 30 hours and undergraduate status

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GGS 303 - Conservation of Resources and Environment

Credits: 3 (NR)

Provides analysis of world resources distribution, conservation, and preservation; and problems resulting from their natural occurrence and utilization. Uses knowledge from physical and social sciences to develop complex and sophisticated understanding of issues surrounding natural resource exploitation and management, conservation, and preservation.
Designated a Green Leaf Course.
GGS 304 - Populations Dimensions of Global Change

Credits: 3 (NR)

Spatial distribution of population, its causes and effects, and changing patterns resulting from population mobility. Emphasizes spatial characteristics of variables such as age, sex, race, education, and income. Designated a Green Leaf Course.

Fulfills general education requirement in synthesis.

Fulfills writing intensive requirement in the major.

Equivalent to GEOG 304 and EOS 304 (2009-10 catalog)

Prerequisite(s): 30 credits and completion of or concurrent enrollment in all general education requirements

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GGS 305 - Economic Geography

Credits: 3 (NR)

Analyzes pattern of distribution of world economic activity, spatial economics behind this pattern, and influence of distribution on other spatial systems.

Equivalent to GEOG 305 (2009-10 catalog)

Prerequisite(s): 30 credits

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GGS 306 - Urban Geography

Credits: 3 (NR)

Structure and internal differentiation of cities. Variety of perspectives on nature of cities, and opportunities for intensive use of space. Urban problems and alternatives in their spatial context.
Equivalent to GEOG 306 (2009-10 catalog)

**GGS 307 - Sustainable Development**

Credits: 3 (NR)

Explores the concepts, applications, and tools for analysis and decision making in support of environmentally sustainable development. Case studies and problem-solving exercises will be used to stimulate learning and provide practical experience in addressing sustainable development issues.

Designated a Green Leaf Course.

Equivalent to EOS 306 (2009-10 catalog)

**Prerequisite(s):** 60 hours; GGS 122 and GGS 302, or permission of instructor.

**Hours of Lecture or Seminar per week:** 3

**Hours of Lab or Studio per week:** 0

**GGS 308 - Field Mapping Techniques**

Credits: 3 (NR)

Basic techniques for collecting and recording spatial field data, including topographic maps, compass, transit, alidade, and geographic positioning systems. Includes field work.

Equivalent to GEOG 308 (2009-10 catalog)

**Prerequisite(s):** MATH 105, GGS 102 or GEOL 101, and 30 credits.

**Hours of Lecture or Seminar per week:** 3

**Hours of Lab or Studio per week:** 6

**GGS 309 - Meteorology and Climate**

Credits: 3 (NR)

Elements of meteorology; analysis of world distribution of meteorological controls as bases of regional climatic variations.

Equivalent to GEOG 309, EOS 312 (2009-10 catalog)

**Prerequisite(s):** GGS 102, 121, or equivalent; permission of instructor.

**Hours of Lecture or Seminar per week:** 3

**Hours of Lab or Studio per week:** 0
GGS 310 - Introduction to Digital Cartography

Credits: 4 (NR)
Origins, principles, and methods of thematic map design and production. Principles of graphic design, data compilation, analysis, and display.

Equivalent to GEOG 310 (2009-10 catalog)

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 2

GGS 311 - Introduction to Geographic Information Systems

Credits: 3 (NR)
Fundamental concepts and theories for appropriate use of geographic information systems (GIS). Discusses basic GIS functionality and applications in various fields.

Equivalent to GEOG 311 (2009-10 catalog)

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GGS 312 - Physical Climatology

Credits: 3 (NR)

Quantitative description of nature and theory of the climate system, dynamics of atmosphere-ocean-land surface, internal interactions and response to external forcing, description of the climate record and simple climate models.
Designated a Green Leaf Course.

Equivalent to EOS 312 (2009-10 catalog)

Prerequisite(s): 30 hours; and GGS 121, MATH 113, PHYS 243-244, or permission of instructor

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GGS 314 - Severe and Extreme Weather

Credits: 3 (NR)

Behavior of weather events ranging from small scale (e.g., thunderstorms and tornadoes) to mesoscale (e.g., fronts and
Introduces the dynamical and physical processes, atmospheric boundary layer processes, and coupling between different spatial scales that create and shape severe and localized weather events. Designated a Green Leaf Course.

Equivalent to CLIM 314; EOS 310 (2009-10 catalog)

Prerequisite(s): MATH 113 or equivalent; CLIM/PHYS 111/112 or EOS 121 or GGS 121

GGS 315 - Geography of the United States

Credits: 3 (NR)
Diversity of US physical and cultural landscapes.

Equivalent to GEOG 315 (2009-10 catalog)

Prerequisite(s): 6 credits of geography or American studies, or permission of instructor.

GGS 316 - Geography of Latin America

Credits: 3 (NR)
Regional survey of physical resources, populations, cultural characteristics, and economic activities in Latin America.

Equivalent to GEOG 316 (2009-10 catalog)

Prerequisite(s): 6 credits of geography or Latin American studies, or permission of instructor.

Notes: Fulfills the college-level requirement in non-Western culture.

GGS 319 - Air Pollution

Credits: 3 (NR)

Description of major types of air pollution and introduction to how their characteristics are influenced by interaction with the atmosphere. Topics include sources and distribution of pollution from local to global scales, effects of radiation and wind on pollution, modeling of plume dispersion and pollution effects on climate.
Designated a Green Leaf Course.

Equivalent to EOS 320 (2009-10 catalog)

**Prerequisite(s):** CLIM 111 or GGS 121.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall, Spring

---

**GGS 320 - Geography of Europe**

Credits: 3 (NR)  
Environmental, economic, social, and political factors influencing regional structure of Europe.

Equivalent to GEOG 320 (2009-10 catalog)

**Prerequisite(s):** 6 credits of geography or European studies, or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**GGS 321 - Biogeography: Space, Time and Life**

Credits: 3 (NR)  
A survey of the relationship between distribution of plants and animals on the earth surface and the physical geography and environmental characteristics.

Equivalent to BIOL 374; EOS 321 (2009-10 catalog)

**Prerequisite(s):** GGS 122 or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**GGS 322 - Issues in Global Change**

Credits: 3 (RD)

Provides the basis for evaluating existing and emerging issues in the environmental sciences at the regional and global scale, using interdisciplinary scientific principles. Combines activities designed to provide an understanding of the following: first principles underlying regional/global issues in the environmental sciences, with attention to links among the disciplines of atmospheric sciences, biology, ecology, hydrology, oceanography, geology, human health, toxicology, and mathematical modeling; concepts of systems control, feedbacks, modeling, and hierarchical scales (spatial and temporal); role of retrospective analyses in developing a scientifically sound basis for evaluation and analysis; and studies of specific issues of interest on a regional to global scale.
Designated a Green Leaf Course.

Equivalent to EOS 322 (2009-10 catalog)

**Prerequisite(s):** GGS 121, GGS 122, or permission of instructor

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

### GGS 325 - Geography of North Africa and the Middle East

Credits: 3 (NR)  
Environmental, economic, and social factors of differentiation of regional structure and distribution of resources in North African and Middle Eastern countries.

Equivalent to GEOG 325 (2009-10 catalog)

**Prerequisite(s):** 6 credits of geography or courses related to Middle East; or permission of instructor.

**Notes:** Fulfills the college-level requirement in non-Western culture.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

### GGS 330 - Geography of the Soviet Succession States

Credits: 3 (NR)  
Analyzes geographic factors involved in history, economic development, and geopolitical situation of the former Soviet Union.

Equivalent to GEOG 330 (2009-10 catalog)

**Prerequisite(s):** 6 credits of geography or Russian studies, or permission of instructor.

**Notes:** Fulfills the college-level requirement in non-Western culture.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

### GGS 333 - Issues in Regional Geography

Credits: 3 (NR)  
Geographical study of particular region or relevant regional issue.

Equivalent to GEOG 333 (2009-10 catalog)

**Prerequisite(s):** 30 credits
GGS 353 - Observations of the Earth and its Climate

Credits: 3 (NR)

Provides a general introduction to observations of the Earth and its climate, focusing on regional and global aspects. Introduces remote sensing and other Earth-observing techniques, as well as providing a survey of some of the physical and mathematical aspects of remote sensing at a very high level. Concepts and foundations of remote sensing in addition to different approaches and techniques are discussed. Covers several key Earth system science topics such as El Niño, carbon dioxide increase, climate change including sea rise, ozone depletion, and the energy budget of the Earth.

Designated a Green Leaf Course.

Equivalent to EOS 353 (2009-10 catalog)

Prerequisite(s): GGS 121, GGS 122 or permission of instructor

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GGS 354 - Data Analysis and Global Change Detection Techniques

Credits: 3 (NR)

Introduces basic time series methods, especially those used in detecting trends and randomness in time series data. Various data related to global changes on different temporal and spatial scales will be identified, and the relevant analysis methods will be used to those data so that students can detect or confirm changing trends or lack of them in data. Other topics such as data formats, data visualization, and data mining may also be included based on the background of the student body.

Equivalent to EOS 354 (2009-10 catalog)

Prerequisite(s): IT 103 STAT 250 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GGS 357 - Structures in Urban Governance and Planning

Credits: 3 (NR)

Reviews spatial, policy, and administration principles that guide planning activity in United States. Outlines differences between theory and practice; and provides tools, methods, and perspectives commonly incorporated into practice of urban and regional policy analysis. Provides orientation to public-sector economy in general; and urban administration, planning, and policy in particular.

Equivalent to GEOG 357 (2009-10 catalog)
GGS 380 - Geography of Virginia

Credits: 3 (NR)
Natural and cultural forces of Virginia. Studies regional makeup and analysis of human and environmental characteristics.

Equivalent to GEOG 380 (2009-10 catalog)

Prerequisite(s): 30 credits

GGS 398 - Selected Topics in Global Change

Credits: 3 (RT)
Covers selected topics in global change not covered in fixed-content global change courses.

Equivalent to EOS 399 (2009-10 catalog)

Prerequisite(s): 30 credits or permission of instructor.

Notes: Content varies and is determined by instructor. May be repeated.

GGS 399 - Selected Topics in Geography

Credits: 3 (RT)
Content varies; determined by instructor.

Equivalent to GEOG 399 (2009-10 catalog)

Prerequisite(s): 30 credits.

Notes: May be repeated for maximum of 12 credits.
Fulfills the college-level requirement in non-Western culture.
GGS 410 - Introduction to Hyperspectral Imaging

Credits: 3 (NR)
Provides an introduction to quantitative measurements by remote-sensing methods covering an introduction to quantitative spectroscopy, spectral and thermal signatures, atmospheric physics, and the electromagnetic spectrum. Emphasis will be on the scientific principles involved and the transition of the technology to real-world applications. The requisite materials to begin to understand hyperspectral imaging (HSI) technology and its many civil and military applications are presented. The course covers the needed mathematics used in the analysis of n-dimensional data. Topics such as hyperspectral concepts, data collection systems, data processing techniques, case studies, and U.S. national policy issues will be covered. The data processing techniques will include N-dimensional space, scatterplots, spectral angle mapping, spectral mixture analysis, spectral matching, and other techniques. Applications and case studies will include environmental, medical, agricultural, military, and others. Ground, airborne, and spaceborne hyperspectral systems will be covered.

Equivalent to EOS 410 (2009-10 catalog)

Prerequisite(s): PHYS 243-244, 245-246, MATH 113-114, GGS 353 GGS 416, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GGS 411 - Advanced Digital Cartography

Credits: 3 (NR)
Design and production of full-color digital maps and information graphics, map cognition and use, and principles of desktop mapping.

Equivalent to GEOG 411 (2009-10 catalog)

Prerequisite(s): GGS 311

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GGS 412 - Air Photography Interpretation

Credits: 3 (NR)
Methods and techniques of interpreting and using information contained in aerial photography, including applications to various aspects of physical and cultural landscape.

Equivalent to GEOG 412 (2009-10 catalog)

Prerequisite(s): 60 credits and GGS 102 or 103, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
GGS 415 - Seminar in Geography

Credits: 3 (NR)
Students produce, present original research papers.

Fulfills writing intensive requirement in the major.

Equivalent to GEOG 415 (2009-10 catalog)

Prerequisite(s): GGS 300 and 310

Notes: Capstone seminar for geography majors integrating previous course work into disciplinary framework.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

GGS 416 - Satellite Image Analysis

Credits: 3 (NR)
Examines methods and techniques of interpreting and using information obtained by non-photographic remote sensing systems, with particular emphasis on space-borne platforms. Includes analysis of imagery for both physical and cultural environments.

Equivalent to GEOG 416 (2009-10 catalog)

Prerequisite(s): 60 credits and GGS 412, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GGS 455 - Environmental Impact Assessment

Credits: 3 (NR)

Evaluates current methods and practices for conducting and planning environmental assessments to include techniques and requirements for assessing impacts on air, water, natural resources, transportation, water facilities, and industrial and community development.
Designated a Green Leaf Course.

Equivalent to EOS 455 (2009-10 catalog)

Prerequisite(s): GGS 122 GGG 302 or EVPP 377 or 6 hours of courses in ecology and environmental sciences or permission of instructor

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
GGS 456 - Introduction to Atmospheric Radiation

Credits: 3 (NR)
The content of this course is designed to help students learn about the fundamental aspects of atmospheric radiation. The goal is to understand their essential roles in advanced remote sensing, atmospheric sciences and global and environmental change. It will provide a foundation for and will be beneficial to students in taking advanced courses in those areas.

Equivalent to EOS 456 (2009-10 catalog)

Prerequisite(s): GGS 353/GGS 309 and a course in physics, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

GGS 463 - Applied Geographic Information Systems

Credits: 3 (NR)
Selected applications in geographic information systems (GIS). Topics include automated data capturing and processing, spatial data models and structure including object-oriented approach, advanced spatial analytical techniques including raster modeling and network analysis, programming, and algorithm development in GIS. Major purpose of course is to extend fundamental theories and concepts in GIS so students are able to conduct research with and on GIS.

Equivalent to GEOG 463 (2009-10 catalog)

Prerequisite(s): 2.00 or better in GGS 300 and 311.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GGS 470 - Special Topics in Geographic Techniques

Credits: 3 (RT)
Content varies in the subject of Geographic Techniques.

Prerequisite(s): GGS 110.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GGS 480 - Internship in Geography

Credits: 1 to 3 (RD)
Approved study programs with specific employers.

Equivalent to GEOG 480
**GGS 490 - Practicum in Geographical Applications**

Credits: 1-3 (RD)
Application of geographical research tools and techniques in conjunction with faculty instruction and research. Individualized sections taught by arrangement with full-time faculty.

Equivalent to GEOG 490 (2009-10 catalog)

**Prerequisite(s):** Open only to authorized geography majors with 90 credits. Permission of department and instructor required.

**Notes:** May be repeated to a total of 6 credits

**Hours of Lecture or Seminar per week:** 0
**Hours of Lab or Studio per week:** 1-9

**GGS 495 - Senior Research in Global and Environmental Change**

Credits: 3 (NR)
Applications of research tools and techniques on specific global change topics, in conjunction with faculty instruction and research. Individualized sections taught by arrangement with full-time faculty.

Equivalent to EOS 495 (2009-10 catalog)

**Prerequisite(s):** 90 credit hours authorized major with permission of department and instructor.

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0

**GGS 499 - Independent Study in Geography**

Credits: 1 to 3 (RD)
Individual study of selected area of geography.

Equivalent to GEOG 499 (2009-10 catalog)

**Prerequisite(s):** Open only to geography majors with 90 credits and GPA of 2.50 or higher. Permission of department and instructor required.
Notes: Requires directed research paper. May be repeated to a maximum of 6 credits with permission of the department.

Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 0

GGS 503 - Problems in Environmental Management

Credits: 3 (NR)
Case studies of effects of human activities on atmospheric, hydrologic, geomorphic, and biotic processes.

Equivalent to GEOG 503 (2009-10 catalog)

Prerequisite(s): 6 credits of geography, including GGS 102.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GGS 505 - Transportation Geography

Credits: 3 (NR)
Structure, principles, location, and development of world transportation. Critical role of transportation in moving people, goods, and ideas at international, national, regional, and urban levels.

Equivalent to GEOG 505 (2009-10 catalog)

Prerequisite(s): 6 credits of geography

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GGS 520 - Geography for Teachers

Credits: 3 (NR)
Emphasizes problems and techniques in teaching geography; and current developments in research, methodology, and philosophy in the discipline.

Equivalent to GEOG 520 (2009-10 catalog)

Prerequisite(s): Graduate standing, or permission of department.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GGS 524 - Introduction to Environmental and Resource Economics
Credits: 3 (NR)
Introduces theory of external costs and benefits, public goods, natural resource management, and benefit and cost analysis for
noneconomists. Lecture-discussion format with student presentations and participation. Analytical problem set, short writing
assignments, and exams.

Equivalent to GEOG 524 (2009-2010 Catalog) and EVPP 524

Prerequisite(s): Basic algebra skills.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

GGS 525 - Economics of Human/Environment Interactions

Credits: 3 (NR)

Advanced topics in environmental, natural resource, and ecological economics for noneconomist. Emphasizes sustainability,
intergenerational equity, and economic-ecological feedbacks.
Designated a Green Leaf Course.

Equivalent to GEOG 525 (2009-2010 Catalog) and ECON 895/EVPP 525

Prerequisite(s): EVPP 524/GGS 524 or equivalent

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

GGS 531 - Land-Use Modeling Techniques and Applications

Credits: 3 (NR)

Survey of literature on spatially explicit empirical models of land-use change. Hands-on experience developing and running
simple models. Techniques covered include statistical models, mathematical programming models, cellular automata, agentbased
models, and integrated models.

Equivalent to EVPP 531 and GEOG 531 (2009-10 catalog)

Prerequisite(s): GGS 550, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GGS 533 - Issues in Regional Geography
Credits: 1-6 (RT)
Geographical study of particular region or relevant regional issue.

Equivalent to GEOG 533 (2009-10 catalog)

Notes: Content varies. May be repeated to a total of 12 credits with permission of the department.

Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 0

GGS 540 - Medical Geography

Credits: 3 (NR)
Spatial approaches to study of health and disease. Topics include disease ecology and diffusion, and geographic perspectives on improving health care delivery.

Equivalent to GEOG 540

Prerequisite(s): Course in statistics.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GGS 550 - Geospatial Science Fundamentals

Credits: 3 (NR)
Introduces geospatial sciences, emphasizing concepts and theories of cartography, remote sensing, air photo interpretation, Global Positioning Systems, spatial data structures, and geographic information systems. Lectures accompanied by hands-on exercises.

Equivalent to GEOG 550 (2009-10 catalog)

Notes: Only available for students without previous course work in cartography.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GGS 551 - Thematic Cartography

Credits: 3 (NR)
Analyzes nature of perceptual organization and visual systems in thematic map communication portrayal, graphic handling, and data analysis.

Equivalent to GEOG 551 (2009-10 catalog)

Prerequisite(s): GGS 310 or 550
**GGS 553 - Geographic Information System**

Credits: 3 (NR)
Sources of digital geospatial data; and methods of input, storage, display, and processing of spatial data for geographic analysis using GIS. Lectures, hands-on exercises familiarize students with current technology.

Equivalent to GEOG 553 (2009-10 catalog)

**Prerequisite(s):** GGS 550 or course in cartography

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0

---

**GGS 554 - History of Cartography**

Credits: 3 (NR)
History of cartographic portrayal of Earth from ancient times through 19th century, emphasizing interrelation of human culture, technological development, and geographical knowledge as reflected in maps.

Equivalent to GEOG 554 (2009-10 catalog)

**Prerequisite(s):** Graduate standing

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0

---

**GGS 560 - Quantitative Methods**

Credits: 3 (NR)
Survey of quantitative methods commonly used in geographic research. Emphasizes spatial analysis techniques.

Equivalent to GEOG 585 (2009-10 catalog)

**Prerequisite(s):** Previous course work in statistics, GGS 310 or 550

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0

---

**GGS 562 - Photogrammetry**
Treatment of photogrammetric problems, including least squares adjustments, image coordination refinements, colinearity equation, resection, relative orientation, and analytic aerotriangulation.

Equivalent to GEOG 562 (2009-10 catalog)

Prerequisite(s): GGS 412, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GGS 563 - Advanced Geographic Information Systems

Credits: 3 (NR)
Discusses advanced GIS concepts including spatial data structure, spatial analysis, programming data fusion, Internet components, and spatial database management. Hands-on activities demonstrate concepts and specific applications in both cultural and physical geography.

Equivalent to GEOG 563 (2009-10 catalog)

Prerequisite(s): GGS 553 or equivalent.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GGS 575 - Reconstructing Past Environments: Seminar in Geoarchaeology

Credits: 3 (NR)
Research seminar examining intersection of geoarchaeology and paleoecology with cultural ecology. Addresses methods common to these research areas, and ranges of scales and reliability of evidences to reconstruct past environments, both natural and cultural. Applied examples cover selected geoarchaeological and paleoecological projects from variety of geographical regions.

Equivalent to GEOG 575

Prerequisite(s): Permission of instructor and course work in geography, biology, geology, or archaeology.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GGS 579 - Remote Sensing

Credits: 3 (NR)
Examines use of various types and combinations of electromagnetic energy to obtain spatial information. Concentrates on nonphotographic and spaceborne remote sensing platforms and sensors. Examines essential operational parameters for existing and future systems and strategies for visual extraction of features.
Equivalent to EOS 753 and GEOG 579 (2009-10 catalog)

Prerequisite(s): GGS 416 or permission of instructor

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GGS 581 - World Food and Population

Credits: 3 (NR)
Topics include maldistribution of population, regional disparities in growth rates and income distribution, food production, and world hunger. Discusses population policies, with emphasis on Third World countries.

Equivalent to GEOG 581 (2009-10 catalog)

Prerequisite(s): Graduate standing.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GGS 590 - Selected Topics in Geography

Credits: 1-3 (RT)
Analyzes topics of immediate interest.

Equivalent to GEOG 590 (2009-10 catalog)

Notes: Content varies. May be repeated to a maximum of 12 credits.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 1-6

GGS 600 - Communication Skills for Scientists

Credits: 2 (NR)
Develops basic set of essential skills for scientific communication of written and oral materials. Oral skills focus on delivery of successful and informative presentations to both peers and the general public. Written communication skills focus on writing of scientific abstracts, manuscripts, and grant proposals. Meets objectives through combination of activities, including practical writing assignments, planned and extemporaneous oral presentations, discussion of grant preparation for extramural competition, and personal advice on developing and delivering oral presentations.

Equivalent to EOS 600 (2009-10 catalog)

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
**GGS 603 - Geographic Perspectives on Complex Natural Resource Management**

Credits: 3 (NR)
Develops better understanding of strengths, limitations of restoring large and complex natural resource systems by examining critical aspects of one such effort.

Equivalent to GEOG 603 (2009-10 catalog)

*Hours of Lecture or Seminar per week: 3*
*Hours of Lab or Studio per week: 0*

**GGS 605 - Socioeconomic Applications of GIS**

Credits: 3 (NR)
Provides those working with spatially referenced data the technical skills to use GIS to conduct spatial analyses on socioeconomic phenomena related to labor, retail, and real estate markets. Introduces and emphasizes the development of technical and methodological skills to understand the potential and the pitfalls of using GIS for spatial analyses of socioeconomic phenomena.

Equivalent to GEOG 605

*Prerequisite(s): GGS 553*

*Hours of Lecture or Seminar per week: 3*
*Hours of Lab or Studio per week: 0*

**GGS 631 - Spatial Agent-Based Models of Human-Environment Interactions**

Credits: 3 (NR)
Discusses key challenges in spatial modeling of human-environment interactions. Reviews agent-based modeling applications in urban and rural interactions, agriculture, forestry, and other areas. Hands-on development of simple ABM models and investigation of linkages between GIS and ABM.

Equivalent to EVPP 631 and GEOG 631 (2009-10 catalog)

*Prerequisite(s): GGS 531 or CSS 600, or permission of instructor.*

*Hours of Lecture or Seminar per week: 3*
*Hours of Lab or Studio per week: 0*

**GGS 644 - Fundamentals and Interpretation of Imaging Radar**

Credits: 3 (NR)
Provides understanding of components, functionality, and use of radar remote sensing for acquiring spatial information. Concentrates on operational systems. Includes hands-on assignments.
Equivalent to GEOG 644 (2009-10 catalog)

**Prerequisite(s):** GGS 579, or other basic course in remote sensing.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

### GGS 650 - Introduction to GIS Algorithms and Programming

**Credits:** 3 (NR)  
Introduction to programming methods and their application to Geographic Information Systems, including the fundamentals of object-oriented programming and GIS-specific data structures and algorithms. Employs an object-oriented language such as Visual Basic.Net, and existing freeware and commercial GIS libraries. Topics covered include variables, arrays, control structures, objects and classes, raster and vector data structures, spatial algorithms, and spatial indexing methods.

Equivalent to EOS 650 and GEOG 650 (2009-10 catalog)

**Prerequisite(s):** GGS 553 or equivalent introductory GIS course, or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

### GGS 653 - Geographic Information Analysis

**Credits:** 3 (NR)  
Explores existing and potential capabilities of geographic information systems in conducting spatial analysis and modeling

Equivalent to GEOG 653 (2009-10 catalog)

**Prerequisite(s):** GGS 553 and 560

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

### GGS 655 - Map Design

**Credits:** 3 (NR)  
Advanced examination of principles of map design, including discussions of map design research.

Equivalent to GEOG 655 (2009-10 catalog)

**Prerequisite(s):** GGS 310 or 550.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0
GGS 656 - The Hydrosphere

Credits: 3 (NR)
Covers components and transfer processes in hydrosphere, which consists of aqueous envelope of Earth including oceans, lakes, rivers, snow, ice, glaciers, soil moisture, ground water, and atmospheric water vapor.

Equivalent to EVPP 652; EOS 656 and GEOG 570 (2009-10 catalog)

Prerequisite(s): Two semesters of calculus, partial differential equation recommended; or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GGS 657 - The Lithosphere

Credits: 3 (NR)
Global-scale overview of lithosphere; the solid nonliving Earth, its materials, cycles, plate tectonic and geomorphic processes; and history, including interactions with and history of hydrosphere, atmosphere and biosphere, and methods of analysis.

Equivalent to GEOL 601, EOS 657 and GEOG 671 (2009-10 catalog)

Prerequisite(s): Graduate standing

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GGS 658 - Terrain Mapping

Credits: 3 (NR)
Covers fundamental methods of digitally representing terrain data, major technologies, and programs for generating terrain data; methods for quantifying terrain error and assessing terrain data quality; and a variety of applications.

Equivalent to GEOG 656 (2009-10 catalog)

Prerequisite(s): GGS 553 or equivalent, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GGS 660 - Automated Cartography

Credits: 3 (NR)
Survey of algorithms and techniques to generalize information on maps and in geographic information systems. Covers simplified representation of geographic objects, surfaces, and thematic information. Includes GIS programming component.
Equivalent to GEOG 556 (2009-10 catalog)

**Prerequisite(s):** GGS 650 or permission of instructor.

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0

---

**GGS 661 - Map Projections and Coordinate Systems**

Credits: 3 (NR)
Covers development of various map projections and coordinate systems, property analysis, distortions, and applications.

Equivalent to GEOG 661 (2009-10 catalog)

**Prerequisite(s):** GGS 310 or 550.

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0

---

**GGS 664 - Spatial Data Structures**

Credits: 3 (NR)
Studies spatial data structures and their application in digital cartography, geographic information systems, and image-processing systems. Examines raster and vector data structures, and attribution schemes and topological models. Includes data transformation, information loss, data quality, and the role of metadata.

Equivalent to GEOG 664 (2009-10 catalog)

**Prerequisite(s):** B or better in GGS 650

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0

---

**GGS 670 - Introduction to Atmosphere and Weather**

Credits: 3 (NR)
Applies climatic concepts to natural and human-modified environments, and analyzes climatic change.

Equivalent to EOS 670 and GEOG 670 (2009-10 catalog)

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0

---

**GGS 671 - Algorithms and Modeling in GIS**
Credits: 3 (NR)
Examines several fundamental GIS algorithms based upon computational geometry and computer graphics. Also discusses issues in modeling features of different dimensions and surfaces in GIS. Significant programming expected.

Equivalent to EOS 771 (2009-10 catalog)

Prerequisite(s): Prior course or experience in GIS, and knowledge of computer programming language.

Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0

**GGS 674 - Environmental Impact Analysis**

Credits: 3 (NR)
Scientific and administrative processes involved in environmental impact analysis and environmental impact statements.

Equivalent to GEOG 674 (2009-10 catalog)

Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0

**GGS 675 - Location Science**

Credits: 3 (NR)
This course presents the theory and practice of Location Science - the study of the optimal or near optimal spatial location or allocation of facilities, routes, personnel, or other assets. A variety of algorithms and heuristics for location problems is presented. Lectures and both in-class and take-home exercises reinforce students’ mastery of the techniques and understanding of advanced theoretical issues.

Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0  
When Offered: Fall

**GGS 680 - Earth Image Processing**

Credits: 3 (NR)
Focuses on how geoinformation technologies, including GIS, RS, and GPS, and spatial analytical techniques can be integrated to address various situations in environmental risk assessment, monitoring, and planning.

Equivalent to EOS 758 and GEOG 580 (2009-10 catalog)

Prerequisite(s): GGS 416 or GGS 579 or permission of instructor.

Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0
GGS 681 - Environmental Applications of Integrated Geographic Information Technologies

Credits: 3 (NR)
Focuses on how geoinformation technologies, including GIS, RS, and GPS, and spatial analytical techniques can be integrated to address various situations in environmental risk assessment, monitoring, and planning.

Equivalent to EOS 680 (2009-10 catalog)

Prerequisite(s): GGS 753 and GGS 550 or GGS 560 or permission of instructor

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GGS 684 - Selected Topics in Geospatial Intelligence

Credits: 3 (NR)
Covers topics relevant to geospatial intelligence, especially addressing emerging trends, focused intelligence applications, and relevant technological advances, not covered by existing courses. Sample topics addressed in this course include geosensor networks, landmine detection using remote sensing techniques, the use of unmanned aerial vehicles in geospatial intelligence, and the use of virtual reality techniques for geospatial information modeling and analyst training.

Equivalent to EOS 684 (2009-2010 Catalog)

Prerequisite(s): Admission to the Geospatial Intelligence Certificate program or permission from the program's academic director.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

GGS 685 - Capstone Course in Geoinformatics

Credits: 3 (NR)
A course for students completing their geospatial intelligence (GI) certificate program. It is intended to provide a capstone experience by synthesizing the knowledge and experience they acquired in their previous courses to address a complex geospatial intelligence problem. The course requires analytical, collaborative, and communication skills.

Prerequisite(s): 12 credits in the geospatial intelligence certificate program or permission of program coordinator.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

GGS 689 - Seminar in Geographic Thought and Methodology
Credits: 3 (NR)
Includes historical development of geographic thought and current philosophy of geography; rationale for various subfields; and geographic research techniques and methods of analysis.

Equivalent to GEOG 680 (2009-10 catalog)

Prerequisite(s): GGS 560

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GGS 690 - Advanced Practicum in Geographical Applications

Credits: 1-6 (RD)
Applies spatial technologies in conjunction with faculty instruction and research. Individualized sections taught by arrangement with full-time faculty.

Equivalent to GEOG 690 (2009-10 catalog)

Prerequisite(s): Permission of department.

Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 1-9

GGS 695 - Internship in Geography

Credits: 1 to 6 (RD)
Approved study programs with specific employers. Students and employer supervisors must demonstrate relevancy of study program to degree requirements.

Equivalent to GEOG 695 (2009-2010 Catalog)

Prerequisite(s): Permission of department.

Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

GGS 698 - Directed Readings and Research

Credits: 1-3 (RT)
Reading and research on specific topic under direction of faculty member.

Equivalent to GEOG 698 (2009-10 catalog)

Prerequisite(s): Permission of instructor and department.
GGS 704 - Spatial Analysis and Modeling of Population

Credits: 3 (NR)
Intermediate-level, population geography course discussing demographic concepts and spatial dimensions of population. Features various indices, measures, and models commonly used in human geography.

Equivalent to EOS 704 (2009-10 catalog)

Prerequisite(s): Prior courses in quantitative methods and GIS recommended.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GGS 721 - Biogeography

Credits: 3 (NR)
Provides broad understanding of how physical geography and environment influence spatial and temporal distribution of plants and animals on Earth's surface.

Equivalent to EOS 721 (2009-2010 Catalog)

Prerequisite(s): Courses in ecology, chemistry, and geology.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

GGS 722 - Regional and Global Issues in the Earth Sciences

Credits: 3 (NR)
Provides basis for evaluating existing and emerging issues in Earth sciences at regional and global scales, utilizing interdisciplinary scientific principles.

Equivalent to EOS 722 (2009-2010 Catalog)

Prerequisite(s): Courses in ecology, chemistry, and physics.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring
GGS 725 - Advanced Hydrosphere

Credits: 3 (NR)
Uses mathematical and modeling approaches for in-depth study of different components and transfer processes within hydrosphere. Topics include transfer processes relevant for oceans, lakes, rivers, snow, ice, glaciers, soil moisture, ground water, and atmospheric water vapor.

Equivalent to EOS 725 (2009-2010 Catalog)

Prerequisite(s): Two semesters of calculus, preferably partial differential equations; or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

GGS 740 - Hyperspectral Imaging Systems

Credits: 3 (NR)
Provides requisite materials to understand hyperspectral imaging technology and its many civilian and military applications. Emphasizes scientific principles involved and technology application to real-world imaging systems. Topics include hyperspectral concepts and system tradeoffs; data collection systems; calibration techniques; data processing techniques and software; classification methods; and case studies. Data processing techniques include N-dimensional space, scatterplots, spectral angle mapping, spectral mixture analysis, spectral matching, and mixture tuned matched filtering. Discusses ground, airborne, and spaceborne hyperspectral remote sensing systems.

Equivalent to EOS 740 (2009-2010 Catalog)

Prerequisite(s): CSI 660 or equivalent, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

GGS 750 - Advanced Geographical Research Applications

Credits: 1-6 (RT)
Advanced research employing geographical tools and research techniques.

Equivalent to GEOG 750 (2009-10 catalog)

Prerequisite(s): Permission of instructor.

Notes: Content varies. May be repeated to a maximum of 12 credits with permission of the department.

Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 1-15
GGS 754 - Earth Science Data and Advanced Data Analysis

Credits: 3 (NR)
Covers accessing and applying Earth observations and remote-sensing data for Earth system science research and applications. Major topics are data formats, analysis and visualization tools, advanced data analysis methods, and data applications. Also covers combining innovative information technology techniques and Earth science data to set up online data centers for accessing data through the web.

Equivalent to EOS 754 (2009-2010 Catalog)

Prerequisite(s): GGS 753 or permission of instructor

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

GGS 756 - Physical Principles of Remote Sensing

Credits: 3 (NR)
Emphasizes fundamental physical and mathematical principles of remote sensing. Also provides overview of the current Earth Observation System as well as the National Polar-Orbiting Operational Environmental Satellite Systems (NPOESS), and NPOESS Preparatory Project missions.

Equivalent to EOS 756 (2009-2010 Catalog)

Prerequisite(s): GGS 753 or permission of instructor

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

GGS 759 - Topics in Earth Systems Science

Credits: 1-6 (NR)
Covers selected topics in Earth systems and global changes not covered in fixed-content Earth systems and global changes courses.

Equivalent to EOS 759 (2009-10 catalog)

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GGS 760 - Advanced Topics in Remote Sensing

Credits: 3 (RT)
Content varies in the area of remote sensing.
Equivalent to EOS 760 (2009-2010 Catalog)

**Prerequisite(s):** GGS 579 or GGS 680

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall, Spring

---

**GGS 772 - Distributed Geographic Information Systems**

Credits: 3 (NR)  
Examines different aspects of science and technology in the context of distributed GIS. Includes general concepts, architecture, component design and development, and system integration as well as other advanced topics, including interoperability and agent-based GIS.

Equivalent to EOS 772 (2009-10 catalog)

**Prerequisite(s):** Introductory course in GIS and some programming experience, or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**GGS 773 - Interoperability of Geographic Information Systems**

Credits: 3 (NR)  
Advanced course addressing theories, standards, and implementations of web-based interoperable geographic information systems for online data and information services. Reviews international standards, including OGC, and associated tools for interoperability.

Equivalent to EOS 773 (2009-10 catalog)

**Prerequisite(s):** GGS 553 and 754, or a course in GIS.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**GGS 777 - Remote Sensing Natural Hazards**

Credits: 3 (NR)  
Provides an overview of major natural hazards, their governing dynamics and remote-sensing techniques used to study, forecast, and mitigate hazards.

Equivalent to EOS 777 (2009-2010 catalog).

**Prerequisite(s):** GGS 579 or GGS 680; or permission of instructor.
**GGS 780 - Graduate Internship in Earth System Science**

Credits: 1-6 (RD)
Applications of knowledge and skills in Earth systems and geoinformation sciences to real-world issues and problems in private industry, government agencies, or nonprofit organizations.

Equivalent to EOS 780 (2009-10 catalog)

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**GGS 785 - Geographic Field Work**

Credits: 3 (NR)
Introduces nature, scope, and objectives of geographic field methods and techniques, including use of base maps, acquisition of data, and field research design. Taught as much as possible in field situations with students required to develop and carry out relevant field research projects pertaining to both physical and cultural geography.

Equivalent to GEOG 785 (2009-10 catalog)

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**GGS 787 - Scientific Data Mining for Geoinformatics**

Credits: 3 (NR)
Covers specialized data mining algorithms, geoscience data models, and data information systems. Emphasis on domain-specific data mining algorithms suitable for spatial data and spatio-temporal data with geoscience and geoinformatics applications. Introduces real geoscience data mining applications in detailed applications.

Equivalent to EOS 787 (2009-2010 Catalog)

**Prerequisite(s):** Competency in programming at the level of CSI 601-607 or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**When Offered:** Fall, Spring

**GGS 791 - Advanced Spatial Statistics**
Advanced course focusing on analyzing georeferenced or spatial data represented as points or polygons. Addresses higher moments, point pattern analyses, and interpolations of points to surfaces. Includes spatial regression.

Equivalent to EOS 791 (2009-10 catalog)

**Prerequisite(s):** GGS 560 or STAT 535/554, or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**GGS 792 - Seminar in Earth Systems Science**

Credits: 2 (NR)  
Capstone experience. Seminars presented by faculty and students.

Equivalent to EVPP 792 and EOS 792 (2009-10 catalog)

**Prerequisite(s):** 15 Graduate Credits including CSI 655, GGS 656, and GGS 657, or permission of instructor.

**Hours of Lecture or Seminar per week:** 2  
**Hours of Lab or Studio per week:** 0

---

**GGS 795 - Seminar in Regional Analysis**

Credits: 3 (NR)  
Analyzes and synthesizes physical and cultural elements of geography in selected region. Should be taken near end of master’s degree program. Provides opportunity to apply selective knowledge gained in previous systematic courses to specific region.

Equivalent to GEOG 795 (2009-10 catalog)

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**GGS 796 - Directed Readings and Research in Earth Systems Science**

Credits: 1-6 (RD)  
Reading and research on specific topic in Earth systems and geoinformation sciences under direction of faculty member.

Equivalent to EOS 796 (2009-10 catalog)

**Prerequisite(s):** Graduate standing, permission of instructor.

**Notes:** May be repeated as necessary.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0
GGS 798 - Research Project in Earth Systems Science

Credits: 1-6 (RD)
Reading project chosen and completed under guidance of graduate faculty member resulting in acceptable technical report.

Equivalent to EOS 798 (2009-10 catalog)

Prerequisite(s): Admission to Earth Systems Science MS program, 12 graduate credits, and permission of instructor.

Notes: For students enrolled in Earth Systems Science master's program.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GGS 799 - Thesis

Credits: 1-6 (RD)
Degree candidacy and departmental approval of thesis proposal.

Equivalent to EOS 799 and GEOG 799 (2009-10 catalog)

Prerequisite(s): Degree candidacy and departmental approval of thesis proposal.

Notes: May be repeated to a maximum of 6 credits earned.

Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 0
Grading: Satisfactory/No Credit

GGS 840 - Hyperspectral Imaging Applications

Credits: 3 (NR)
Introduces advanced hyperspectral imaging and multisensor concepts with emphasis on real-world civilian and military applications. Topics include advanced hyperspectral concepts, multisystem tradeoffs, data collection and processing systems, imaging radar systems, laser systems, calibration techniques, data fusion, quantitative remote sensing techniques, data compression techniques, case studies, and U.S. national policy. Applications and case studies include environmental, homeland security, medical, military, disaster mitigation, agricultural, and transportation.

Equivalent to EOS 840 (2009-2010 Catalog)

Prerequisite(s): CSI 660 or equivalent, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring
**GGS 854 - Air Pollution Dispersion**

Credits: 3 (NR)
Covers the basic concepts, theories, and models of pollutant dispersal in the atmosphere and the related atmospheric systems affecting dispersal of hazardous atmospheric releases.

Equivalent to EOS 854 (2009-2010 Catalog)

Prerequisite(s): CLIM 710 or 711, or permission of instructor

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

**GGS 855 - Introduction to Mesoscale Atmospheric Modeling**

Credits: 3 (NR)
Introduces physical and numerical modeling issues involved in mesoscale atmospheric flows. These flows involve time and space scales associated with diurnal cycle, atmospheric inertial mode, thermal and mechanical forcing due to mesoscale terrain inhomogeneities, mesoscale precipitation systems, and downscale energy transfer from synoptic scale to mesoscale due to nonlinear flow interactions.

Equivalent to EOS 855 (2009-2010 Catalog)

Prerequisite(s): Permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

**GGS 900 - Colloquium Earth Systems Sciences**

Credits: 1 (RD)
Presentations in specific research areas of Earth systems and geoinformation sciences by faculty and staff, Mason faculty in related programs, and professional visitors.

Equivalent to EVPP 791; EOS 900 and GEOG 791 (2009-10 catalog)

Prerequisite(s): Graduate standing

Notes: May be repeated for credit, but maximum 3 credits may be applied to Earth systems and geoinformation sciences PhD.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0

**GGS 998 - Dissertation Proposal**
Credits: 1-12 (RD)
Covers development of research proposal that forms basis for doctoral dissertation, under guidance of dissertation director and doctoral committee.

Equivalent to EOS 998 (2009-10 catalog)

Prerequisite(s): Doctoral student, permission of instructor.

Notes: May be repeated, but no more than 12 credits of GGS 998 may satisfy doctoral degree requirements.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0
Grading: Satisfactory/No credit only

GGS 999 - Dissertation

Credits: 1-12 (RD)
Doctoral dissertation research under direction of dissertation advisor.

Equivalent to EOS 999 (2009-10 catalog)

Prerequisite(s): Permission of instructor.

Notes: May be repeated, but no more than total 24 credits in GGS 998 and 999 may be applied to doctoral degree.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0
Grading: Satisfactory/No credit only

Geology (GEOL)

Offered by the College of Science

GEOL 101 - Introductory Geology I

Credits: 4 (NR)
Covers Earth, processes that operate within Earth and on surface, and human interaction with Earth. Topics include minerals, earthquakes and seismology, isostasy, igneous processes and rocks, paleomagnetism and plate tectonics, weathering, mass movements, rivers and streams, groundwater, glaciers, and marine processes.

Fulfills general education requirement in natural science (lab).

Notes: May include field trips.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 3
GEOL 102 - Introductory Geology II

Credits: 4 (NR)
Earth processes in historical context. Topics include sedimentary rocks and principles, deformation and metamorphism, mountain building and plate tectonics, geologic time, fossils, and historical development of continents.

Fulfills general education requirement in natural science (lab).

Prerequisite(s): GEOL 101

Notes: May include field trips.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 3

GEOL 134 - Evolution and Extinction

Credits: 3 (NR)
Evolution and Extinction is a science class for non-science majors that explores how diversity of animals and plants has changed through geologic time, when mass extinctions occurred, when major diversifications of life occurred, and how the position of continents on the surface of the earth influenced the evolution, extinction, and distribution of life, landforms and the atmosphere.

Fulfills general education requirement in natural science (nonlab).

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall.

GEOL 206 - Topics in Geology I

Credits: 1-3 (RT)
Discusses particular topic in geology.

Notes: May include field trips.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0

GEOL 302 - Mineralogy

Credits: 4 (NR)
Crystallographic, optical, chemical, and physical properties of minerals.

Prerequisite(s): GEOL 101 and 102 with grade of C or better, and CHEM 211.

Notes: May include field trips.
GEOL 303 - Field Mapping Techniques

Credits: 3 (NR)
Basic techniques for collecting, recording, and plotting spatial field data including use of topographic maps, compasses, transit, alidade, and global positioning systems (GPS).

Prerequisite(s): 30 credits including MATH 105 or equivalent, and GGS 102 or GEOL 101.

Notes: Includes field work.

GEOL 304 - Sedimentary Geology

Credits: 4 (NR)
Introduces sedimentation, sedimentary petrology, facies analysis, and stratigraphy.

Prerequisite(s): GEOL 101 and 102, and grade of C or better in GEOL 302.

Notes: May include field trips.

GEOL 305 - Environmental Geology

Credits: 3 (NR)
Investigates geological principles directly relating to environmental hazards. Geological causes and effects of natural disasters such as earthquakes, tsunamis, volcanoes, floods and landslides; climate variability and change; prediction of, and planning for geological hazards and disasters and understanding their major societal impacts; and medical geology. Designated a Green Leaf Course.

Prerequisite(s): GEOL 101, and either GEOL 102, GEOL 309/BIOL 309, or GGS 309.

Notes: May include field trips.
GEOL 306 - Soil Science

Credits: 3 (NR)
Composition, classification, physical properties, and origin of soils.

Prerequisite(s): GEOL 101, and CHEM 103 or 211.

Notes: May include field trips.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GEOL 308 - Igneous and Metamorphic Petrology

Credits: 4 (NR)
Genesis, classification, and recognition of igneous and metamorphic rocks.

Prerequisite(s): GEOL 101 and 102, grade of C or better in GEOL 302, and MATH 105 or equivalent.

Notes: May include field trips.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 3

GEOL 309 - Introduction to Oceanography

Credits: 3 (NR)
Introduces physical, chemical, biological, and geological aspects of oceanic environment.

Equivalent to BIOL 309

Prerequisite(s): GEOL 101 and BIOL 103 or 213.

Notes: May include field trip.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GEOL 312 - Invertebrate Paleontology

Credits: 4 (NR)
Classification, evolutionary trends, and distribution of common invertebrate fossils.

Prerequisite(s): GEOL 101, 102; or BIOL 103, 104; or BIOL 213, 303, 304.

Notes: May include field trips.
GEOL 313 - Hydrogeology

Credits: 3 (NR)
Geological and hydrologic factors controlling occurrence, distribution, movement, quality, and development of groundwater.

Prerequisite(s): GEOL 101 or GGS 102, MATH 113, and CHEM 211.

GEOL 315 - Topics in Geology II

Credits: 1-3 (RT)
Discusses particular topic in geology.

Prerequisite(s): GEOL 101 or GEOL 102 or permission of instructor.

Notes: May include field trips.

GEOL 316 - Computers in Geology

Credits: 3 (NR)
Uses of mainframe and microcomputers, with emphasis on geologic applications.

Prerequisite(s): GEOL 101, 102, and 302, and one semester of mathematics; or permission of instructor.

GEOL 317 - Geomorphology

Credits: 4 (NR)
Analyzes processes that occur at Earth's surface and resulting landforms. Labs stress recognition and evaluation of landforms using maps and aerial photographs, and methods of data collection used in study of surficial geology.

Fulfills writing intensive requirement in the major.
Prerequisite(s): GEOL 101 and 102, with grade of C or better; or 6 credits in GGS, including GGS 102; GGS 412 strongly recommended.

Notes: May include field trips.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 3

GEOL 320 - Geology of Earth Resources

Credits: 3 (NR)
A survey of earth resources, including metallic and non-metallic ore deposits, mineral resources, precious gems, sand and gravel, water, and air.

Prerequisite(s): GEOL 101, GEOL 102, GEOL 302. GEOL 305 strongly suggested.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring

GEOL 321 - Geology of Energy Resources

Credits: 3 (NR)
A survey of energy resources, including fossil fuels, renewable, nuclear and unconventional sources. Emphasis on origin, use and implications of development.

Prerequisite(s): GEOL 101 or GEOL 102, and completion of all General Education Science requirements.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

GEOL 332 - Paleoecology

Credits: 3 (NR)
This course will explore the natural evolution of Earth's climate with the goal of providing a baseline for understanding present climate variability and future trends through increased knowledge of the physical, chemical, and biological processes that influence climate over the long-term.

Prerequisite(s): GEOL 102 or BIOL 103 or EVPP 110.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring.
GEOL 334 - Vertebrate Paleontology

Credits: 4 (NR)
Vertebrate Paleontology explores the evolution of vertebrates from the early Paleozoic to Recent. The course will cover the systematics, anatomy, paleogeography, and ecology of extinct vertebrates. Discussions will include fishes, early tetrapods & amniotes, dinosaurs, birds and mammals. Lab portion includes paleontology techniques, analysis, and study of fossil specimens and casts. A weekend field trip is included.

Equivalent to BIOL 334

Prerequisite(s): Any two courses from the following list: GEOL 101, GEOL 102, BIOL 103, BIOL 104, BIOL 213, BIOL 303 or the permission of the instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring

GEOL 363 - Coastal Morphology and Processes

Credits: 4 (NR)
Studies global coastal geomorphology and processes with emphasis on U.S. Atlantic and Gulf coasts. Topics include plate tectonics, sea level changes, sediment supply, waves, tides, storm impacts, and human activities. Lecture and extended weekend field trips to mid-Atlantic coast.

Prerequisite(s): GEOL 309 or BIOL 309 or GEOL 317 with a grade C or better; or 9 credits in geography, including GGS 309.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 3

GEOL 364 - Marine Geology

Credits: 3 (NR)
This course will present a global overview of the geologic origin and composition of the ocean seafloor, and an introduction to the basic principles of the geologic processes occurring in the marine environment. Primary topics include geologic, tectonic and sedimentary characteristics of the deep ocean basins and continental margins; transport and deposition of marine sediments; micropaleontology and paleoceanography; geochemistry and hydrothermal systems; and marine mineral resources.

Prerequisite(s): GEOL 101, 102, 302, and CHEM 211

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GEOL 401 - Structural Geology

Credits: 4 (NR)
Igneous, sedimentary, and metamorphic rocks in folded, faulted, and metamorphosed terrains.
Prerequisite(s): Grade of C or better in GEOL 302 and 317; successful completion of one or both of GEOL 304 or 308; and MATH 110, 111, or 113. PHYS 160 or 243 highly recommended.

Notes: May include field trips.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 3

GEOL 402 - Geological Development of North America

Credits: 3 (NR)
Geological history of North America in terms of plate tectonics. Geological development and history of North America's major regions.

Prerequisite(s): GEOL 101, 102, 302, 304, 308, and 401.

Notes: May include field trips.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GEOL 403 - Geochemistry

Credits: 3 (NR)
Includes stable isotope, crystal, water, and organic geochemistry; geochronology; and geochemistry of rocks.

Prerequisite(s): GEOL 101 and 102 and CHEM 211.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GEOL 404 - Geological Field Techniques

Credits: 1-8 (RD)
Mapping techniques involved in collecting geological field data.

Prerequisite(s): GEOL 101, 102, 302, 304, 308, and 401.

Notes: Includes field work.

Hours of Lecture or Seminar per week: 1-12
Hours of Lab or Studio per week: 6-12

GEOL 405 - Advanced Seminar in Earth Resources
Credits: 3 (NR)
Analyzes current issues involving renewable and non-renewable earth resources with consideration of the economic, political, social and aesthetic significance of these resources and their utilization. Taught seminar style examining case-studies, with emphasis on discussion, reading, writing and student oral presentations.

Prerequisite(s): GEOL 101 and 102 and GEOL 302, 304 and 308 OR GEOL 305, 320 and 321 and completion of General Education.

Notes: May include field trips.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GEOL 406 - Seminar in Earth and Environmental Science

Credits: 3 (NR)
Students read, discuss research literature; produce, present original papers.

Prerequisite(s): 90 credits.

Notes: Capstone seminar for Earth and environmental science majors.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GEOL 408 - Practicum for Geology Laboratories

Credits: 1 (NR)
Studies techniques to make geology lab effective component in geological education. Discusses developing testing materials, supplemented by experience operating geology course lab section.

Prerequisite(s): Geology major with 80 credits, and permission of department chair.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 3

GEOL 409 - Practicum for Geology Laboratories

Credits: 1 (NR)
Studies techniques to make geology lab effective component in geological education. Discusses developing testing materials, supplemented by experience operating geology course lab section.

Prerequisite(s): Geology major with 80 credits, and permission of department chair.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 3
GEOL 410 - Research Proposal Preparation

Credits: 1 (NR)
Prepares students for research in GEOL 411. Includes literature research, initial data collection, and preparing research proposal.

Prerequisite(s): Geology or Earth Science major with 90 credits, cumulative GPA of 2.80 or higher, and permission of the Geology undergraduate coordinator.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0

GEOL 411 - Geological Research

Credits: 3 (NR)
Geological research: data collection and reduction, interpretation, preparation of written report, and oral presentation of results.

Prerequisite(s): GEOL 410.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 3

GEOL 412 - Physical Oceanography

Credits: 3 (NR)
Course describes the global patterns of temperature, salinity, currents and waves in the world’s oceans, and how these patterns influence marine biota, climate, and human activity. Course introduces key concepts which explain physical features of the ocean ranging from microscopic turbulence to global circulation.

Equivalent to CLIM 412

Prerequisite(s): MATH 113 or MATH 115, and PHYS 160 or PHYS 243, or permission of instructor

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GEOL 417 - Geophysics

Credits: 3 (NR)
Basic principles of geophysics including gravity, magnetism, and seismic reflection and refraction.

Prerequisite(s): GEOL 101, MATH 113, and one year of physics; or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
GEOL 420 - Earth Science and Policy

Credits: 3 (NR)
Discusses Earth science issues that have policy implications. Course uses a broad definition of Earth science, from atmosphere to geosphere. Course taught seminar-style, with emphasis on discussion, reading, writing, critical analysis, and student oral presentations.

Fulfills general education requirement in synthesis.

Prerequisite(s): Completion of or concurrent enrollment in all other required general education courses; completion of at least 18 credit hours in major or minor (geology, Earth science, ocean and estuarine science, or global and environmental change), and one of the following social science-based courses: EVPP 361; ECON 103; ANTH 114; GGS 103; GLOA 101; GOVT 132 or 133; HIST 125 or 130; SOCI 101, 102, or 120.

Notes: Course may include field trips.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GEOL 458 - Chemical Oceanography

Credits: 3 (NR)
The world’s oceans, including a variety of closed basins and estuaries, comprise a complex and dynamic system of chemical processes that interact with biological, geological, physical, and atmospheric processes to play a significant role in defining the earth’s fragile environment. This course will present an overview of the origin, occurrence, and distribution of the chemical components in sea water and an introduction to the basic principals of the chemical processes taking place in the marine environment.

Equivalent to CHEM 458

Prerequisite(s): CHEM 211 and CHEM 212, and CHEM 321 or GEOL 302.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GEOL 480 - Internship

Credits: 1-3 (NR)
Approved study programs with specific employers.

Prerequisite(s): Open only to majors with 90 credits.

Notes: Contact department one semester before enrollment.

Hours of Lecture or Seminar per week: 1-2
Hours of Lab or Studio per week: 0
GEOL 500 - Selected Topics in Modern Geology

Credits: 1-3 (RD)
Topic designated in class schedule.

Prerequisite(s): Baccalaureate degree in geology, or permission of instructor.

Notes: Lecture, lab, field trip.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0

GEOL 501 - Selected Topics in Modern Geology

Credits: 1-3 (RD)
Topic designated in class schedule. Lecture, lab, field trip.

Prerequisite(s): Baccalaureate degree in geology, or permission of instructor.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0

GEOL 503 - Special Topics in Earth Science

Credits: 1-6 (RD)
In-service course to strengthen and update knowledge of Earth science.

Prerequisite(s): Employment or anticipated employment as an Earth Science teacher.

Notes: May include field trips.

Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 0

GEOL 534 - Vertebrate Paleontology

Credits: 4 (NR)
Explores the evolution of vertebrates from the early Paleozoic to Recent. Covers systematics, anatomy, paleogeography, and ecology of extinct vertebrates. Discussions include fishes, early tetrapods and amniotes, dinosaurs, birds, and mammals. Lab portion includes paleontology techniques, analysis, and study of fossil specimens and casts.

Prerequisite(s): Undergraduate degree in biology or geology or permission of instructor.

Notes: A weekend field trip is included. Students who have taken GEOL 334 as an undergraduate may not take 534 as a graduate
GEOL 601 - The Lithosphere

Credits: 3 (NR)
Global-scale overview of lithosphere, solid non-living Earth, materials, cycles, plate tectonic and geomorphic processes; and history, including interactions with and history of hydrosphere, atmosphere and biosphere, and methods of analysis.

Prerequisite(s): Graduate standing.

GEOL 613 - Environmental Geochemistry and Mineralogy

Credits: 3 (NR)
Explores hot topics and aids students in developing intellectual skills to identify key research problems. Students will also improve their writing and presentation skills.

Prerequisite(s): Graduate standing.

GEOL 800 - Studies for the Doctor of Philosophy in Education

Credits: 1-6 (NR)
Program of studies designed by discipline director and approved by doctoral committee that allows student to participate in current research of discipline director and results in paper reporting student's original contributions.

Prerequisite(s): Admission to PhD in education program to study geology.

Notes: Enrollment may be repeated.

German (GERM)

Offered by the College of Humanities and Social Sciences
Placement: See Academic Testing in the Admissions section.

See also FRLN course listing.

**GERM 101 - Elementary German I**

Credits: 3 (NR)
Designed for students with no knowledge of German. Introduces elements of grammar, vocabulary, oral skills, listening comprehension, and reading.

Notes: Students may not receive credit for GERM 101 and GERM 105 or 110.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**GERM 102 - Elementary German II**

Credits: 3 (NR)
Continuation of GERM 101.

Prerequisite(s): GERM 101, or permission of department.

Notes: Students may not receive credit for GERM 102 and GERM 105 or 110.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**GERM 110 - Elementary German**

Credits: 6 (NR)
Introduces elements of grammar, vocabulary, oral skills, listening comprehension, and reading.

Notes: Lab work required. Students may not receive credit for GERM 110 and GERM 101, 102, or 105.

Hours of Lecture or Seminar per week: 6
Hours of Lab or Studio per week: 1

**GERM 201 - Intermediate German I**

Credits: 3 (NR)
Further development of skills in listening, speaking, reading, and writing.

Prerequisite(s): GERM 102 and 105, appropriate placement score, or permission of department.

Notes: GERM 201 and 202 must be taken in sequence. Students may not receive credit for GERM 201 and GERM 210.
GERM 202 - Intermediate German II

Credits: 3 (NR)
Applies skills to reading, composition, and discussion.

Prerequisite(s): GERM 201, appropriate placement score, or permission of department.

Notes: Students may not receive credit for GERM 202 and GERM 210.

GERM 210 - Intermediate German

Credits: 3 (NR)
Continuation of the development of basic components of the language, with focus on listening, speaking, reading, and writing skills. Introduces students to the cultures and histories of German speaking regions.

Prerequisite(s): GERM 110 or appropriate placement score.

Notes: Students may not receive credit for GERM 210 and GERM 201 or 202.

GERM 250 - Gateway to Advanced German

Credits: 3 (NR)
Integration of advanced intermediate-level German reading, writing, listening, and speaking skills, and the development of critical thinking about authentic texts from around the globe.

Prerequisite(s): GERM 210, appropriate placement score, or permission of department.

Notes: Taught in German

GERM 301 - Culture and Civilization
Credits: 3 (NR)
Covers development of German civilization from 18th century to present. Includes German cultural contributions to world civilization.

Prerequisite(s): 60 credits, or permission of instructor.

Notes: Taught in English.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GERM 310 - Conversation and Composition

Credits: 3 (NR)
Develops fluency in speaking and proficiency in writing German through discussion, reports, and compositions based on texts dealing with contemporary events and issues.

Prerequisite(s): GERM 250, appropriate placement score, or permission of instructor.

Notes: Taught in German. Not for native speakers of German.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GERM 316 - German for the Business World

Credits: 3 (NR)
Introduces terminology and structural features of business German. Emphasizes acquiring vocabulary and developing facility in reading German business articles and correspondence.

Prerequisite(s): GERM 250, appropriate placement score, or permission of instructor.

Notes: Taught in German.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GERM 318 - Translation of Texts

Credits: 3 (NR)
Introduces principles and techniques of translation. Translation of texts from the natural and social sciences, current events, and contemporary culture.

Prerequisite(s): GERM 250 or equivalent; appropriate placement score; or permission of instructor.

Notes: Taught in German. Translations mainly from German into English.
GERM 325 - Major Writers

Credits: 3 (RD)
Works of major German, Austrian, and Swiss writers in translation.

Fulfills general education requirement in literature.

**Prerequisite(s):** ENGL 101/ENGH 101 or equivalent, or permission of instructor.

**Notes:** Taught in English. Writers studied vary. May be repeated for a maximum of 6 credits when topic is different with permission of department.

GERM 340 - Survey of German Literature

Credits: 3 (NR)
Overview of history of German literature to 1880.

**Prerequisite(s):** GERM 250, appropriate placement score or permission of instructor.

**Notes:** Taught in German.

GERM 355 - Readings in Poetry

Credits: 3 (NR)
Intensive reading of German poetry in its historical context. Studies genre characteristics and development. Types of poetry studied vary.

**Prerequisite(s):** GERM 250, appropriate placement score or permission of instructor.

**Notes:** Taught in German. May be repeated for credit when subject is different, with permission of department.

GERM 365 - Readings in Narrative Prose
Credits: 3 (NR)
Intensive reading of German narrative prose, such as autobiographical fiction, fairy tales, and film. Studies genre characteristics and development. Topics to be studied vary.

Prerequisite(s): GERM 250, appropriate placement score or permission of instructor.

Notes: Taught in German. May be repeated for credit when subject is different, with permission of department.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GERM 375 - Readings in Drama

Credits: 3 (NR)
Intensive reading of German dramas in their historical context. Study of genre characteristics and development, including performance aspects. Genre varies; may be historical drama, radio play, or epic theater.

Prerequisite(s): GERM 250, appropriate placement score, or permission of instructor.

Notes: Taught in German. May be repeated for credit with permission of department when subtitle differs.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GERM 415 - Advanced Grammar and Style

Credits: 3 (NR)
Studies syntax, idiomatic features, and levels of style. Extensive practice in different types of written expression.

Prerequisite(s): 15 credits of German or permission of instructor.

Notes: Taught in German.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GERM 418 - Advanced Composition

Credits: 3 (NR)
Develops proficiency in writing German through intensive practice in preparing guided and original compositions.

Prerequisite(s): 15 credits of German, or permission of instructor.

Notes: Taught in German.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
GERM 442 - The Age of Goethe

Credits: 3 (NR)
Major works of Enlightenment, Sturm und Drang, Classicism, and early Romanticism. Emphasizes drama and poetry by Goethe and Schiller, with additional works by Lessing, Kleist, and other important writers of the era.

Prerequisite(s): 15 credits of German, or permission of instructor.

Notes: Taught in German.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GERM 444 - The Literature of Romanticism

Credits: 3 (NR)
German Romantic poetry and prose. Background and some theory included.

Prerequisite(s): 15 credits of German, or permission of instructor.

Notes: Taught in German.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GERM 450 - Modern Literature: 1880-1925

Credits: 3 (NR)
Literature of Naturalism, Impressionism, and Expressionism in Germany, Austria, and Switzerland.

Prerequisite(s): 15 credits of German, or permission of instructor.

Notes: Taught in German.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GERM 451 - Modern Literature: 1925 to the Present

Credits: 3 (NR)
Literary trends since 1925 in Germany, Austria, and Switzerland.

Prerequisite(s): 15 credits of German, or permission of instructor.
GERM 480 - Special Topics

Credits: 3 (NR)
Special topics on language, literature, or culture by theme, approach, or era.

Prerequisite(s): 15 credits of German, or permission of instructor.

Notes: Taught in German. May be repeated for credit with permission of department.

Global Affairs (GLOA)

Offered by the College of Humanities and Social Sciences

GLOA 101 - Introduction to Global Affairs

Credits: 3 (NR)
Surveys wide range of global topics: previous periods of globalization, international organizations and law, transnational corporations and global economy, immigration and refugees, world environmental concerns, world culture, war and peace, paradoxical presence of nationalism and fundamentalism in global world, and antiglobalization movement.

Fulfills general education requirement in global understanding.

GLOA 450 - Topics in Global Affairs

Credits: 1-3 (RD)
Selected topics in global affairs. Content varies.

Prerequisite(s): GLOA 101 or SOCI 120.

Notes: May be repeated for a maximum of 9 credits when topic is different.
**GLOA 480 - Study Abroad**

Credits: 1-6 (RD)
Study abroad under supervision of Mason faculty. Course topics, content, and locations vary.

**Notes:** May be repeated for a maximum of 6 credits with permission of department.

**Hours of Lecture or Seminar per week:** 1-6  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall, Spring, Summer

**GLOA 490 - Independent Study in Global Affairs**

Credits: 1-6 (RT)
Reading or research on specific topic related to globalization, under direction of faculty member.

**Prerequisite(s):** Global affairs majors with 90 credits, GLOA 101, and permission of instructor.

**Notes:** At least one written paper required. Course may involve combination of reading assignments, tutorials, presentations, or off-campus activities. May be repeated for a maximum of 6 credits.

**Hours of Lecture or Seminar per week:** 1-3  
**Hours of Lab or Studio per week:** 0

**GLOA 491 - Honors Seminar in Global Affairs**

Credits: 3 (NR)
Emphasizes an interdisciplinary approach to the study of global affairs. Covers a variety of topics, including consideration of economic, political, and cultural forces at work in the complex interactions among global processes.

**Prerequisite(s):** Admission to Global Affairs honors in the major.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall

**GLOA 492 - Honors Research Project in Global Affairs**

Credits: 3 (NR)
Honors-level research on specialized topic in Global Affairs culminating in substantial paper and oral presentation.

**Prerequisite(s):** Completion of GLOA 491 with minimum grade of B.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Spring
GLOA 495 - Global Experiential Learning

Credits: 1-18 (RT)
On-the-job training in transnational or international fields through approved internship programs.

Notes: Enrollment and credits controlled by Global Affairs Program. Contact Global Affairs Program one semester before planned enrollment. May be repeated for a maximum of 18 credits.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0

GLOA 498 - Global Policy Fellow

Credits: 0 (RD)
The Global Policy Fellows program is a 15 credit academic program for selected students majoring in Government and International Politics and Public Administration. This course indicates participation in the program.

Prerequisite(s): Acceptance into Global Policy Fellows Program.

Grading: Satisfactory/No Credit.
When Offered: Fall, Spring

GLOA 600 - Global Competencies

Credits: 3 (NR)
Explores the nature of globalization. Students will understand the characteristics of the current global system; be familiar with key global issues and debates; have an advanced understanding of and appreciation for organizations, languages, cultures in many global contexts; and be better habituated to thinking across disciplinary lines.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GLOA 610 - Economic Globalization and Development

Credits: 3 (NR)
Focuses on the intersection of countries and firms in the arenas of international trade, investment and finance, as the lenses into understanding better today’s “global” economy: countries of differing levels of economic development and economic system structure, factors of monetary union and currency disequilibria, trade liberalization or protectionism, market entry, cross-border variables, risk and relations.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
GLOA 620 - Human Systems

Credits: 3 (NR)
Examines the human dimensions relative to international educational systems and their relationship to basic education and higher education policy, research policy, science and technology, culture, language, social justice, equity, conflict and peace, human resources and national development.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GLOA 690 - Independent Study

Credits: 3 (NR)
Reading or research on specific topic related to globalization, under directions of faculty member.

Prerequisite(s): Global Affairs major with 12 MA credits and permission of instruction.

Notes: At least one written paper required. Course may involve combination of reading assignments, tutorials, presentations, or off-campus activities.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GLOA 710 - Seminar Abroad

Credits: 3 (RD)
Intensive program in a foreign setting focusing on a deep overview of the research specialization of the supervising faculty member. Required pre-departure component to set the intellectual, logistical and culture terms of the abroad period. Locations vary from year to year.

Notes: May be repeated for a maximum of 6 credits with permission of program.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GLOA 720 - Capstone Research Seminar

Credits: 3 (RD)
Provides students with the opportunity to engage in significant original research an analysis of a topic in global affairs. Topics vary from year to year.

Notes: May be repeated for a maximum of 6 credits.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
Global and Community Health (GCH)

Offered by the Health and Human Services

GCH 205 - International Health

Credits: 3 (NR)
Examines cross-cultural values in health and nutrition, exploring health- and nutrition-related problems that afflict populations throughout the world and efforts to achieve optimal health for all. Introduces nutrition and health concerns from variety of cultures and considers population dynamics, vital statistics, global disease patterns, and cultural variations. Includes lectures, discussion, video presentations, oral presentations, and web research.

Fulfills general education requirement in global understanding.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GCH 300 - Introduction to Public Health

Credits: 3 (NR)
Addresses population-focused health care and examines concepts of community and public health, and health policies affecting U.S. populations. Emphasizes primary, secondary, and tertiary levels of prevention related to health problems/diseases.

Notes: Open only to non-BS-COMH majors.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GCH 310 - Health Behavior Theories

Credits: 3 (NR)
Introduces students to various theoretical models for understanding health and illness behavior. Case studies examine the nature of health from planning, implementing, and evaluating to prevention and treatment of health problems.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GCH 320 - Community Health and Literature

Credits: 3 (NR)
This on-line course explores key historical worldwide public health events and humankind's responses to them, through in-depth study of selected literary works. The course includes investigation of scientific, social, cultural, geographical, and political factors that affect health and policy development on local, community and global levels.
GCH 325 - Stress, Coping and Health

Credits: 3 (NR)
Explores the influences of stress on population-based health issues. The causes and pathways of the stress experience are explored from an ecological public health perspective. Theoretical aspects of stress and coping are considered, along with methods for relieving and preventing the stress response in both individuals and communities.

GCH 332 - Health and Disease

Credits: 3 (NR)
Introduces epidemiology, health promotion, and disease prevention, and effect on health status of culturally diverse and vulnerable individuals, families, small groups, and communities. Focuses on health problems and potential interventions throughout life span, and incorporates principles of teaching and learning as they apply to health professionals.

Prerequisite(s): Junior standing.

GCH 350 - Health Education

Credits: 3 (NR)
Enables students to survey health and wellness issues related to their personal profile and explore options in reducing personal risk factors. Students define health in context of family, environment, culture, society, and life span. By examining, comparing, and using various methods of health-risk appraisal and assessment tools, students plan health education and promotion projects for targeted populations. Stresses motivational strategies for improving and maintaining health.

GCH 360 - Health and Environment

Credits: 3 (NR)
Examines principles and methods, risk factors, prevention and control, and policies related to the aspects of human health determined by biological, physical, and chemical factors in the environment at the local, regional, and global levels.
Prerequisite(s): STAT 250 or equivalent.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GCH 370 - Sexuality and Human Behavior

Credits: 3 (NR)
Introduction to human sexual behavior with an emphasis on the interaction between psychological, social, and biological factors. Topics include sexual differentiation and development, sexually transmitted infections and HIV, sexual orientation, patterns of sexual behavior, and the sexual health of individuals, communities, and global populations.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Summer, Spring.

GCH 405 - International Health Policy and Practice

Credits: 3 (NR)
Examines the development and implementation of international health policies and programs. Develops planning and communication skills. Emphasizes infectious disease, maternal and child health, and nutrition.

Prerequisite(s): GCH 205, International Health

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GCH 411 - Health Program Planning

Credits: 3 (NR)
Addresses process of program planning, development, and fundamental evaluation principles for health promotion programs. Focus on development of clear, concise objectives leading to design and evaluation of effective primary, secondary, and tertiary prevention strategies.

Prerequisite(s): GCH 332, 350
Corequisite(s): GCH 310 or instructor approval

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring

GCH 412 - Fundamentals of Epidemiology
GCH 430 - Community Health Systems and Agencies

Credits: 3 (NR)
Introduces students to local, state, and national community health systems and agencies. Topics include the historical impact of community health systems and agencies, the influence of health advocacy groups; the relationship between human rights and health; and the need for collaboration between groups advocating for optimum human health.

Corequisite(s): GCH 411.

GCH 445 - Social Determinants of Health

Credits: 3 (NR)
Examine the social determinants of health and the application of this framework to social work and public health policy and practice interventions. Explore the many social justice factors that affect health and consider which community systems and social change approaches may decrease or eliminate health inequities.

Equivalent to SOCW 445

Prerequisite(s): 45 credits or permission of the instructor.

GCH 450 - Culture, Sexuality and the Global AIDS Epidemic

Credits: 3 (NR)
Examines how the cultural values and mores regarding sexuality shape HIV/AIDS social policy and how these values and mores facilitate and hinder prevention and care efforts. Also examines several sexuality-related topics that interface with culture (e.g., gender, the sex industry, homosexuality) and the effectiveness of prevention and care initiatives around such issues as condom use, blood donation restrictions, immigration laws, sex education, and HIV testing.

Prerequisite(s): BIOL 301: (HIV/AIDS topic only) or permission of instructor
GCH 460 - Program Evaluation

Credits: 3 (NR)
This introductory research course is designed to present basic concepts and methods of public health research. Emphasis is placed on critique and use of current community and public health research methods.

Prerequisite(s): Junior standing. STAT 250 or equivalent.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GCH 462 - Health Promotion across the Lifespan

Credits: 3 (NR)
Addresses health maintenance issues in humans from birth to death, emphasizing prevention. Compares and contrasts prevention of acute and chronic illnesses. Analyzes health communication approaches for effective translation of evidence-based.

Prerequisite(s): GCH 332
GCH 350

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

GCH 465 - Community Health Capstone

Credits: 3 (NR)
Assists students in synthesizing their roles as community health professionals in a global society. Provides students with opportunities to examine issues in community health. Course content builds on knowledge and skills acquired through coursework and field experience. Student writings and presentations receive written self-evaluation as well as formal review by peers and multiple faculty members. (Writing intensive course).

Fulfills general education requirement in synthesis.

Prerequisite(s): Senior standing.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

GCH 480 - Health Maintenance and Health Aspects of Aging

Credits: 3 (NR)
Studies physiological and psychological factors that influence health and have implications for preventive measures in disease
and health disorders. Examines nutrition, nature of health problems, and methods of assessing physical and psychological needs.

**GCH 494 - Special Topics in Global and Community Health**

Credits: 3 (RT)
Selected topics analyzing specialized areas in global and community health.

*Notes:* Content varies. Lecture, seminar, laboratory, workshops.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**GCH 496 - Violence in Today's Society**

Credits: 3 (NR)
Examines magnitude of problem of violence globally and more specifically within the United States. Discussion and reflective activities engage students in the learning process.

Equivalent to NURS 496

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**GCH 498 - Global and Community Health Internship**

Credits: 6 (NR)
Provides advanced students with the opportunity to apply community health knowledge while working under the supervision of a community preceptor in a local health organization. Students submit an application to the GCH internship coordinator the semester prior to enrollment for review. Students who have demonstrated academic excellence will receive priority internship placement.

*Prerequisite(s):* GCH 332, GCH 350, and GCH 411; permission of instructor; junior or senior status.

*Notes:* Open to community health majors only. Students are required to work a minimum of 224 hours during the semester they take the internship. This course provides for experiential learning in a community health organization under the direction of a faculty advisor and a preceptor in the community health organization. Students are expected to understand the roles and functions of the community health organization and complete a project approved by the faculty advisor and the preceptor.

The internship elective may be taken in lieu of two 3-credit elective courses by junior or senior GCH students. The course requires a weekly two-hour seminar and 15-20 hours per week of work in a community health organization.

**Hours of Lecture or Seminar per week:** 2  
**Hours of Lab or Studio per week:** 15-20
Grading: Satisfactory/No Credit
When Offered: Fall, Spring, Summer

GCH 499 - Independent Study in Global and Community Health

Credits: 1-6 (RT)
Provides individual study of a particular problem area in global and community health research, theory development, or education under the direction of faculty.

Prerequisite(s): Permission of instructor

Notes: May be repeated for maximum 6 credits.

Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 0

GCH 515 - Lesbian, Gay, Bisexual, Transgender, and Queer Health

Credits: 3 (NR)
Examines health status and health disparities among lesbian, gay, bisexual, transgender, and queer (LGBTQ) communities across the lifespan. Measurement and methodological considerations in LGBTQ health research, as well as health-related interventions targeting LGBTQ populations will be emphasized.

Notes: Offered every other year. Upper level undergraduates interested in taking this course are encouraged to contact the instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

GCH 543 - Global Health

Credits: 3 (NR)
Examines the major infectious, nutritional, noncommunicable, neuropsychiatric, and other causes of morbidity, mortality, and disability in each world region. Explores sociocultural, economic, political, biological, and environmental factors that contribute to global and community health.

Notes: Lecture, discussion.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

GCH 560 - Environmental Health
A page from the 2013-2014 Official University Catalog of George Mason University. The page contains course information related to global and community health, with specific details about courses such as credits, course descriptions, and other pertinent information. The courses detailed include:

**GCH 571 - HIV/AIDS: Concepts, Principles, and Interventions**
- Credits: 3 (NR)
- Overview: Examines development of therapeutic tools and skills to educate, reduce risks, control infection, and affect care and healing of client, family, and community, and issues of increasing dilemma for health care professionals.
- Equivalent to NURS 571.
- Notes: GCH 571 will be offered in the Fall of even years.
- Hours of Lecture or Seminar per week: 3
- Hours of Lab or Studio per week: 0
- When Offered: Fall

**GCH 594 - Special Topics in Global and Community Health**
- Credits: 3 (RD)
- Overview: Selected topics analyzing specialized areas in health care.
- Equivalent to HAP 594/NURS 594
- Notes: Content varies. Lecture, seminar, laboratory, and workshops.
- Hours of Lecture or Seminar per week: 3
- Hours of Lab or Studio per week: 0

**GCH 600 - Health Promotion Methods**
- Credits: 3 (NR)
- Overview: Fundamental principles and practices of public health promotion and education, including historical origins; professional responsibilities; ethics; health behavior and learning theories; models for planning, implementing and evaluating programs; health literacy; public health advocacy; and the development, selection and implementation of effective instructional materials, methods, and interventions.
- Hours of Lecture or Seminar per week: 3
**GCH 601 - Introduction to Biostatistics**

Credits: 3 (NR)
Applies selected biostatistics techniques to public health and health system management issues. Includes univariate and bivariate statistics, and regression analysis.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

**GCH 602 - Global Health Issues Related to Violence**

Credits: 3 (NR)
Explores worldwide view of violence and its impact on health. Examines biological, psychological, and social determinants of violence. The epidemiology of violence is examined with special attention to collective violence, youth violence, abuse and neglect of children and the elderly, intimate partners, sexual violence, self-directed violence, and transgenerational violence. Preventive approaches attempted to help reduce the prevalence of violence will be addressed.

Prerequisite(s): Admission to a graduate program or permission of instructor.

Notes: GCH 602 will be offered in the spring of odd years.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring

**GCH 605 - Social Epidemiology**

Credits: 3 (NR)
Students will learn the basic foundations of social epidemiology and learn how they can apply these principles to the global community and their own professions. Throughout the course, students will explore the health-enhancing and health-deteriorating effects of social factors, with special emphasis on the personal social environment. They will also examine the effect of macrosocial variables, such as socioeconomic status, cultural traditions, lifecycle stages, and circumstantial changes, such as migration and relocation on health and well-being.

Prerequisite(s): GCH 712 or instructor permission.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

**GCH 610 - Health Behavior Theory**
Introduces students to the fundamentals of social and behavioral sciences, emphasizing current health behavior theories and models. Students develop an understanding of the theoretical and scientific basis of health promotion/health education interventions and develop community need and asset assessment skills.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Spring

---

**GCH 611 - Health Program Planning and Evaluation**

Credits: 3 (NR)  
Addresses the process of program planning, development, and fundamental evaluation principles, emphasizing health promotion programs. The focus is on development of clear and concise objectives leading to the design of effective primary, secondary, and tertiary prevention strategies.

**Corequisite(s):** GCH 610.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall, Spring

---

**GCH 612 - Interventions in Public Health**

Credits: 3 (NR)  
Application of intervention mapping to the design of theory-based interventions for target populations; collaboration with communities to design and implement interventions; selection of evidence-based interventions (EBIs); adaptation of EBIs for new populations; dissemination of EBIs; and cultural and ethical issues related to intervention development, implementation, evaluation, and sustainability.

**Notes:** There are no prerequisites for the course. Students may find completion of GCH 600 or GCH 610 to be beneficial preparation for the course.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall, Spring

---

**GCH 622 - Mental Health: A Global Perspective**

Credits: 3 (NR)  
An introduction to mental health and mental disorders; a critical view of national and international classification of disorders; an introduction to public health perspectives on mental health and mental disorders; and a review of cultural factors related to public health dilemmas and services, locally, regionally and in the global community, from a bio-psycho-social perspective.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall
GCH 628 - Refugee Health

Credits: 3 (NR)
Intensive course aimed at addressing the specific health care problems and needs of refugees and internally displaced persons worldwide, the provision of basic health requirements for that population, and the coordination of care among the agencies concerned with them.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring

GCH 637 - Normal Aging and Health Deviations

Credits: 3 (NR)
Examines biopsychosocial aspects of aging. Examines effects of age changes and health deviations on functional capacity of older persons and interventions and promotion of the elderly's capacity for self care.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GCH 640 - Global Infectious Diseases

Credits: 3 (NR)
Examines principles and methods for the prevention and control of infectious and parasitic diseases of global importance, including malaria, HIV/AIDS, tuberculosis, influenza, helminthic infections, emerging infections, and others.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring

GCH 645 - U.S. and Global Public Health Systems

Credits: 3 (NR)
Examines the organization, financing, and delivery of health services for individuals and populations in the United States and across the globe. Compares international health systems and policies.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring

GCH 650 - Global Non-Communicable Diseases
Credits: 3 (NR)
Examines principles and methods for the prevention and control of NCDs of global importance, including cardiovascular diseases, cancer, COPD, diabetes, dementias, and others.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall

### GCH 651 - Behavioral Research Methods

Credits: 3 (NR)
Explores quantitative and qualitative research methods, principles and techniques necessary for implementation of health science research.

Equivalent to RHBS 651 (2011-2012 Catalog); GCH 551 (2010-2011 Catalog).

**Corequisite(s):** GCH 601 or graduate course in applied statistics

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Summer

### GCH 680 - International Research Ethics and Methods

Credits: 3 (NR)
Prepares students to conduct global and community health research. Discusses ethical issues in international health research. Develops plans for identifying a research project, collecting and analyzing data, and reporting results of international health research.

**Prerequisite(s):** GCH 712 and a graduate-level statistics course.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall

### GCH 690 - Independent Study

Credits: 1-3 (NR)
In-depth studies of selected area of health science theory, research, or practice under direction of faculty.

**Notes:** May be repeated for a maximum of 3 credits.

**Hours of Lecture or Seminar per week:** 1-3  
**Hours of Lab or Studio per week:** 0
GCH 691 - Project Management in Public Health

Credits: 3 (NR)
Course examines project management roles and environments, the project lifecycle and various techniques of work planning, and control and evaluation to achieve project objectives. Emphasizes leadership, communication, grant writing and ethics.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring

GCH 701 - Program Evaluation

Credits: 3 (NR)
Examines the methods used by public health professionals to determine whether and how a particular health-related program "works". Process and outcomes evaluation will be covered. Skills and knowledge relevant to evaluation strategies will be addressed, including the fundamentals of study design, how to frame evaluation questions, and understanding basic quantitative and qualitative analysis techniques for assessing program process and effects.

Prerequisite(s): GCH 601, GCH 611, and GCH 712 or Instructor Permission.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring

GCH 712 - Introduction to Epidemiology

Credits: 3 (NR)
Explores epidemiological methods for measuring population health, designing and implementing observational and experimental studies, critically reading the public health literature, and applying research findings to global and community health.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

GCH 722 - Infectious Disease Epidemiology

Credits: 3 (NR)
Focuses on the epidemiology of infectious and parasitic diseases. Emphasizes study design and data analysis to support the prevention and control of communicable diseases.

Prerequisite(s): GCH 712

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring
GCH 726 - Advanced Methods in Epidemiology

Credits: 3 (NR)
Develops epidemiological skills through the study and exploration of special topics in epidemiology. Focuses on epidemiological methods and analysis, critical review of the literature, and scientific writing.

Prerequisite(s): GCH 601 or a graduate-level statistics course; one of GCH 722, 732, or 752; or instructor permission.

Notes: For MS-EBST or MPH-EPID majors only, or by instructor approval.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Summer

GCH 732 - Chronic Disease Epidemiology

Credits: 3 (NR)
Focuses on the epidemiology of chronic diseases, including cancers, cardiovascular and lung diseases, and mental health disorders. Emphasizes study design, critical reading, and public health approaches to disease control, such as surveillance and screening.

Prerequisite(s): GCH 712.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

GCH 742 - Behavioral Epidemiology

Credits: 3 (NR)
Focuses on applying epidemiological principles to the study of behavior and human health, emphasizing the role of behavior in public health, determinants of behavior, and research methods for studying health and disease in relation to behavior.

Prerequisite(s): GCH 712.

Notes: Offered every other year.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring

GCH 752 - Nutritional Epidemiology

Credits: 3 (NR)
Focuses on the examination of the methodologies of dietary assessment and their application to design, conduct, analysis, and interpretation of epidemiologic studies related to nutrition. Introduces the practical application of nutritional epidemiology to
health programs and policy.

Prerequisite(s): GCH 712

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring

**GCH 762 - Environmental Epidemiology**

Credits: 3 (NR)
Focuses on applying epidemiological principles to the study of the environment exposures and human health, emphasizing research methods and data analysis, critical review of research, communication of research results, and applications to public health.

Prerequisite(s): GCH 712.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Summer

**GCH 780 - Practicum Seminar**

Credits: 0 (NR)
Provides students with guidance and preparation for engaging in the public health practicum.

Notes: This course should be taken one semester prior to enrollment in the practicum course.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0
Grading: Satisfactory/No Credit
When Offered: Fall, Spring, Summer

**GCH 788 - Public Health Research I**

Credits: 3 (NR)
Provides students with skills to develop their research proposal, conduct their research goals, and complete their master's thesis, which will be completed in Public Health Research II.

Prerequisite(s): Completion of all core courses for GCH Master's degree

Notes: Course restricted to graduate students in GCH. Repeatable to maximum of 6 credits.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
Grading: Satisfactory/No Credit
GCH 789 - Public Health Research II

Credits: 3 (RD)
Provides students with skills to complete their research projects and write the master's thesis.

Prerequisite(s): All core courses for the Global Health masters program and GCH 788.

Notes: Repeatable to maximum of 6 credits.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
Grading: Satisfactory/No Credit

GCH 790 - Practicum in Public Health

Credits: 3 (NR)
The practicum provides students with an in-depth supervised experience in an approved public health organization. The practicum will require students to complete a project related to an actual public health issue that is a focus within the organization.

Prerequisite(s): Students must be enrolled in the MPH program in good standing. Must have completed GCH 780 and 21 credit hours in the MPH program.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring, Summer

GCH 792 - Culminating Experience

Credits: 0 (NR)
Provides a structured experience for students to synthesize and integrate knowledge acquired in coursework and to apply theory and principles in a situation that approximates professional practice. Serves as a means by which faculty judge whether a student has mastered public health competencies.

Prerequisite(s): Must be enrolled in the MPH program in good standing and have completed at least 30 credit hours in the MPH program.

Notes: This course should be taken during the final semester of the program. It is highly recommended that students complete all other MPH Core Courses and at least two Concentration Courses prior to enrollment in this course.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0
Grading: Satisfactory/No Credit
When Offered: Fall, Spring
GCH 794 - Global Health Research Capstone

Credits: 3 (NR)
Provides a supervised, collaborative research experience on a global health topic that allows students to synthesize, integrate, and apply the knowledge and skills acquired in coursework.

Prerequisite(s): Completion of at least 30 credits towards the M.S. Global Health with a grade of B- or higher. Completion of GCH 601 and GCH 712.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
Grading: Graduate Special
When Offered: Fall, Spring

GCH 795 - Advanced Special Topics in Global and Community Health

Credits: 1-3 (RD)
Advanced special topics course to address in-depth study of contemporary areas of global and community health insufficiently covered in other courses.

Prerequisite(s): Must be enrolled in a graduate program and have permission of the instructor.

Notes: Fulfills elective requirement for MS in global health degree and global health certificate program. Topics vary. May take up to 6 credits within their degree program.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0

GCH 804 - Advanced Quantitative Data Analysis for Health Care Research I

Credits: 3 (NR)
Examines factorial ANOVA, factorial ANCOVA, repeated measures ANOVA, ANOVA and ANCOVA via regression approach, and multiway frequency analysis. Students apply mathematical calculations and interpret SPSS outputs using health care research data.

Equivalent to NURS 804

Prerequisite(s): A graduate-level statistics course.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

GCH 805 - Advanced Quantitative Data Analysis for Health Care Research II
Credits: 3 (NR)
Examines multivariate analysis of variance (MANOVA), multivariate analysis of covariance (MANCOVA), multiple regression (ordinary least squares), and logistic regression. Students apply mathematical calculations and use linear combinations of multivariate tests in health care research data.

Equivalent to NURS 805

Prerequisite(s): GCH/NURS 804 or an equivalent multivariate statistics course.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring

GCH 806 - Advanced Multivariate Statistics and Data Analysis for Health Care Research

Credits: 3 (NR)
Examines canonical correlation, discriminant analysis, factor analysis and causal analysis (path models and structural equation modeling). Students analyze and interpret data using these statistical techniques.

Equivalent to NURS 806

Prerequisite(s): GCH/NURS 805 or an equivalent multivariate statistics course.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GCH 807 - Measurement Theories and Applications in Health Care Research

Credits: 3 (NR)
Theories, principles, and techniques presented as foundation for the development and evaluation of instruments for use in health care research. Includes review of statistical techniques required for understanding measurement theory, reliability, validity, item analysis, and instrument construction. Students required to design, construct, administer, analyze, and evaluate an original instrument or evaluate an existing instrument in health care research.

Equivalent to NURS 807

Prerequisite(s): GCH/NURS 805 or permission of instructor.

Notes: Completion of GCH/NURS 805 or GCH/NURS 806 is highly recommended.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

Government and International Politics (GOVT)

Offered by the College of Humanities and Social Sciences
GOVT 101 - Democratic Theory and Practice

Credits: 3 (NR)
Comparative exploration; topics include contemporary analysis of the meanings of liberty, equality, representation, property rights, voting rights, and civil responsibilities.

Fulfills general education requirement in social and behavioral science.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GOVT 103 - Introduction to American Government

Credits: 3 (NR)
American government examined in light of basic concepts and institutions of democracy. Includes citizenship project, a first-hand observation or participation in and analysis of some public activity.

Fulfills general education requirement in social and behavioral science.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GOVT 132 - Introduction to International Politics

Credits: 3 (NR)
Nature of international politics, approaches to study of international politics, state and nonstate actors in international system, patterns of action and interaction between nation-states, international institutions, and major global issues.

Fulfills general education requirement in global understanding.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GOVT 133 - Introduction to Comparative Politics

Credits: 3 (NR)
Discusses methods and subject matter of comparative political analysis. Includes political systems, politics, participation in politics, government structures, policy-making process, and evaluation of political performance.

Fulfills general education requirement in global understanding.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
GOVT 300 - Research Methods and Analysis

Credits: 4 (NR)
Emphasizes asking clear, researchable questions and using appropriate evidence to answer them. Introduces broad range of evidence including quantitative and qualitative information. Studies design and analysis of surveys, government archives, case studies, and interpretations of events in journals. Examines ethical implications of information technologies.

Fulfills general education requirement in information technology (all).

Notes: Required for all majors in government and international politics, and public administration. Strongly recommended before or during first semester of enrolling in 300-level courses.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 1

GOVT 301 - Public Law and the Judicial Process

Credits: 3 (NR)
American judicial organization and operation, role of the Supreme Court in policy formation, and selected constitutional principles.

Prerequisite(s): GOVT 103.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GOVT 302 - American Political Development

Credits: 3 (NR)
Examines American political development, both in itself and compared to other nations. Addresses the extent to which the United States has or has not been exceptional in its development as a nation state.

Prerequisite(s): GOVT 103.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GOVT 304 - American State and Local Government

Credits: 3 (NR)

Prerequisite(s): GOVT 103.

Notes: Students may not receive credit for GOVT 204 and 304.
GOVT 305 - Contemporary American Federalism

Credits: 3 (NR)
Legal, administrative, fiscal, and political dimensions of evolving American federalism.

Prerequisite(s): GOVT 103.

GOVT 307 - Legislative Behavior

Credits: 3 (NR)
Organization, processes, functions, and roles of legislature and U.S. Congress members. Topics include state legislatures and cross-national comparisons as time and resources permit.

Prerequisite(s): GOVT 103.

GOVT 308 - The American Presidency

Credits: 3 (NR)
Survey of modern presidency, including constitutional origins of office, growth and influence of White House staff, Cabinet, presidential appointees and control of executive branch, relations with Congress, and domestic and national security policy making.

Prerequisite(s): GOVT 103

GOVT 309 - Government and Politics of Metropolitan Areas

Credits: 3 (NR)
Government, politics, and problems of metropolitan centers and surrounding areas.

Prerequisite(s): GOVT 103.
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GOVT 311 - Public Opinion and Electoral Behavior

Credits: 3 (NR)
Studies actions of voters, candidates, and political parties in relation to the expression of relevant public opinion in a democratic system.

Prerequisite(s): GOVT 103 and 300.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GOVT 312 - Political Parties and Campaigns

Credits: 3 (NR)
Characteristics and functions of political parties, influence of parties and other political forces on electoral decisions, and emphasis on parties' inability or ability to hold government accountable to citizens.

Prerequisite(s): GOVT 103.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GOVT 318 - Interest Groups, Lobbying, and the Political Process

Credits: 3 (NR)
Role, internal operations, strategies, and activities of interest groups. Evaluates ability of these groups to enable citizens to influence or control government and enhance democratic process. Considers conditions under which social movements become, or fail to become, effective interest groups.

Prerequisite(s): GOVT 103.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GOVT 319 - Issues in Government and Politics

Credits: 1-3 (RT)
Studies special issues relevant to government and politics. Topics announced in advance. Examples include politics and the arts, ethnic conflict and the political system, gender politics, and changing dynamics in political institutions.

Prerequisite(s): GOVT 103.
Notes: May be repeated for a maximum of 9 credits when topic is different with permission of department.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GOVT 322 - International Relations Theory

Credits: 3 (NR)
Advanced inquiry into international relations. Studies theories, concepts of international relations, and major forces and issues in international politics.

Prerequisite(s): GOVT 132 or 133.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GOVT 323 - Classical Western Political Theory

Credits: 3 (NR)
Lectures, discussions of developments in Western tradition of political thought from time of Greek city-state to late medieval Christendom. Topics include nature and purpose of politics, relationship between individual and state, political significance of religion and tradition, and concept of natural law.

Prerequisite(s): GOVT 101, or 3 credits of philosophy.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GOVT 324 - Modern Western Political Theory

Credits: 3 (NR)
Lectures, discussions of developments in Western tradition of political thought from Renaissance to mid-19th century. Topics include rise of individualism in political theory, early developments in social contact theory, theories of radical popular sovereignty, and early criticisms of liberal theory.

Equivalent to PHIL 324

Prerequisite(s): GOVT 101, or 3 credits of philosophy.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GOVT 327 - Contemporary Western Political Theory
Credits: 3 (RT)
Lectures, discussions of developments in Western tradition of political thought from mid-19th century to today. Different sections focus on various political theories that have been influential during this period, such as liberal, libertarian, conservative, communitarian, Marxist, feminist, and postmodern thought.

Equivalent to PHIL 327

Prerequisite(s): GOVT 101, or 3 credits of philosophy.

Notes: May be repeated for a maximum of 12 credits when topic is different.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GOVT 328 - Non-Western Political Theory

Credits: 3 (NR)
Theory and history of political community, governance, and development as understood by various non-Western societies, including China, Japan, India, Africa, and Islamic World; relations to Western tradition; methodology of studying other cultures; postcolonial theories; and cultural politics on contemporary globalization.

Prerequisite(s): GOVT 101 or 133.

Notes: Fulfills the college requirement in non-Western culture.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GOVT 329 - Issues in Political Theories and Values

Credits: 1-3 (RT)
Studies special issues relevant to theoretical and value aspects of government and politics. Topics announced in advance. Examples include ethics and politics, ethics and environmental policy, changing perspectives on civil rights and liberties, religion and politics, and changing views of public space.

Prerequisite(s): GOVT 103.

Notes: May be repeated for a maximum of 9 credits when topic is different with permission of department.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GOVT 331 - Government and Politics of Latin America

Credits: 3 (NR)
Contemporary political systems of Latin America, with emphasis on institutions, political processes, and political behavior. Presents case studies of several key Latin American politics; discusses problems of political development.
Prerequisite(s): GOVT 132, 133.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GOVT 332 - Government and Politics of the Middle East and North Africa

Credits: 3 (NR)
Societies of Middle East and North Africa and their response to impact of internal sociocultural-political determinants and external forces. Focuses on contemporary politics, ideologies, popular manifestations, institutions, and operations.

Prerequisite(s): GOVT 132, 133.

Notes: Fulfills the college requirement in non-Western culture.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GOVT 333 - Government and Politics of Asia

Credits: 3 (NR)
Government structures and political processes of Asian countries. Examines patterns of conflict and cooperation, and issues of economic development and political reform in rapidly changing world.

Prerequisite(s): GOVT 132, 133.

Notes: Fulfills the college requirement in non-Western culture.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GOVT 334 - Government and Politics of Europe

Credits: 3 (NR)
Contemporary democratic political systems of Europe, with emphasis on political processes, institutions, and behavior. Presents case studies of key European policies. Discusses problems of multiparty systems, coalition governments, Eurocommunism, and stability and change in postindustrial societies.

Prerequisite(s): GOVT 132, 133.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GOVT 336 - Political Development and Change
Process of political development and change in context of modernization and industrialization. Examines patterns of political development, with emphasis on developing world.

**Prerequisite(s):** GOVT 132, 133.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

### GOVT 337 - Ethnic Politics in Western Europe and North America

Credits: 3 (NR)  
Studies resurgence of ethnic nationalism in industrial democracies of Western Europe and North America, and the comparative analysis of policy issues related to ethnonationalism. Case studies drawn from the industrial democracies.

**Prerequisite(s):** GOVT 132, 133.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

### GOVT 338 - Government and Politics of Russia

Credits: 3 (NR)  
Examines continuity and change in Russia's Soviet era and post-Soviet era politics and international relations.

**Prerequisite(s):** GOVT 132, 133.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

### GOVT 339 - Issues in the Politics of Advanced Industrial Societies

Credits: 1-3 (RT)  
Studies selected current political issues in industrial democracies of Western Europe and North America. Specific topics chosen each semester to reflect contemporary political concerns in these countries, but political process in advanced industrial countries is organizing principle throughout the course.

**Prerequisite(s):** GOVT 103 or 133, or permission of instructor.

**Notes:** May be repeated for a maximum of 9 credits when topic is different.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

### GOVT 340 - Central Asian Politics
Comparative examination of political change in Central Asia with attention to national identity formation, political economy, political conflict, political Islam, and democratization.

Notes: Fulfills the college requirement in non-Western culture.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GOVT 341 - Chinese Foreign Policy

Credits: 3 (NR)
Discusses theories and practices of Chinese foreign policy decision making, which are then used to understand China's relations with United States, Japan, Russia, Europe, and its Asian neighbors, and China's policy in issues such as human rights, environmental protection, and nuclear nonproliferation.

Prerequisite(s): GOVT 132, 133.

Notes: Fulfills the college requirement in non-Western culture.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GOVT 342 - Diplomacy

Credits: 3 (NR)

Prerequisite(s): GOVT 132, 133.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GOVT 343 - International Political Economy

Credits: 3 (NR)
Introduces international political economy. Examines interplay of economics and politics, and applies these to different issues. Focuses on issues of contemporary significance, with attention to historical issues and basic political and economic concepts.

Prerequisite(s): GOVT 132, 133; or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
GOVT 344 - American Foreign Policy

Credits: 3 (NR)
Central issues surrounding the conduct of America's foreign relations, with special emphasis on structural and constitutional questions, national policy objectives abroad, and conduct of foreign policy in a democracy.

Prerequisite(s): GOVT 132, 133.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GOVT 345 - Political Islam

Credits: 3 (NR)
Covers politics of religion in Muslim societies; history, ideology, and practices of key individuals, movements, and institutions; case studies of political Islam in the Middle East, Asia, Africa, and the West; plurality and diversity of political expression in Muslim world; nature of democracy in Islam; and Islamic state.

Notes: Fulfills the college requirement in non-Western culture.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GOVT 346 - American Security Policy

Credits: 3 (NR)
Approaches U.S. National security policy from perspective of organization and implementation of specific policies. Applies theoretical concerns to historic cases to illuminate problems that continue to challenge country.

Prerequisite(s): GOVT 132, 133

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GOVT 347 - International Security

Credits: 3 (NR)
Explores enduring security problems and new developments. Examines effects of international system on defense policies of states, particularly tensions of world caught between emerging interdependence and national demands. Encourages development of critical-thinking and group and oral presentation skills.

Prerequisite(s): GOVT 132.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
GOVT 351 - Administration in the Political System

Credits: 3 (NR)
Administrative structures and processes in political setting of public management. Presents organization and administrative theory, critiques, and current practices; and examines impact of changes in social, political, and economic environment on concepts, models.

Prerequisite(s): GOVT 103.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GOVT 353 - Social Entrepreneurship

Credits: 3 (NR)
Introduces students to the different steps that social entrepreneurs work through to drive social change: identifying problem to address, developing a strategy to address the social need, fundraising, growing the organization, tracking results, and maximizing impact.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GOVT 354 - Third-Party Government and the Nonprofit Sector

Credits: 3 (NR)
Introduces students to the concept of third-party government and the new realities of governments employing networks of public and private actors to orchestrate the production of public goods and services. Also explores the role of nonprofit organizations as the most prominent "third parties" that governments heavily depend on in social welfare provision.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GOVT 355 - Public Personnel Administration

Credits: 3 (NR)
Analyzes techniques and tools in human resource management including merit system, classification, compensation, evaluation, recruitment, and labor relations. Emphasizes current legal and policy issues in personnel administration, such as diversity and privatization.

Prerequisite(s): GOVT 351.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
GOVT 356 - Public Budgeting and Finance

Credits: 3 (NR)
Covers tools and techniques in budgeting and financial management in U.S. governments, including management of public financial institutions, budgetary process and reform, and relationship of public budgeting to national economic policy.

Prerequisite(s): GOVT 351.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GOVT 357 - Urban Governance and Planning

Credits: 3 (NR)
Framework, subject matter, uses, methods, administration, and future of public planning. Emphasizes setting goals, defining objectives, and choosing between program alternatives. Discusses political and bureaucratic constraints, and problems of implementation. Planning illustrations may be drawn from various levels of government.

Prerequisite(s): GOVT 351.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GOVT 358 - Nonprofit Financial Planning

Credits: 4 (NR)
Provides understanding of social mission and entrepreneurial cross pressures underlying financial planning and accounting in nonprofit sector. Topics include revenue sources and projections, entrepreneurial techniques, and cost analysis for nonprofit and nongovernmental entities. Lectures, student case studies.

Prerequisite(s): 60 credits or permission of instructor

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 1

GOVT 359 - Computers in Public Management

Credits: 3 (NR)
Applies computer-based techniques to management information in public sector. Focuses on the logic and implementation of computer applications, internet technology, web development, security, and mobile apps.

Prerequisite(s): GOVT 300.
GOVT 361 - Introduction to Environmental Policy

Credits: 3 (NR)

Environmental politics and policy making since the 1970s. Primarily U.S. focus, with some discussion of global issues. Examines policy strategies and outcomes, ethical and economic debates, political controversies, lawmaking and enforcement, and role of key players.

Designated a Green Leaf Course.

Equivalent to EVPP 361

Prerequisite(s): 30 credits

GOVT 362 - Intermediate Environmental Policy

Credits: 3 (NR)

Examines environmental issues building on learning objectives from GOVT 361. Focuses on environmental and policy issues in the US and internationally, exploring the politics of nature and the interaction of environmental science and politics and resulting controversy. Risk and uncertainty loom large in most environmental issues. Covers "natural" disasters as well as direct "man-made" problems.

Prerequisite(s): EVPP 361 or GOVT 361 or permission of instructor.

GOVT 364 - Public Policy Making

Credits: 3 (NR)

Processes, agencies, and politics involved in the proposal making, implementation, evaluation, and revision of U.S. public policy.

Prerequisite(s): GOVT 103.

GOVT 365 - State and Regional Public Policy
Examines public policy decisions that affect local and state jurisdictions in context of federal system of government. Examines context, substance, and impact of such policies as housing, transportation, land use, crime prevention, service delivery, and health care.

**GOVT 366 - Public Policy Analysis**

Credits: 3 (NR)
Methods of public policy analysis, evaluation, and research. Studies design and development of alternative courses of government action and evaluation of results, and problems in applying systematic analysis to political issues.

Prerequisite(s): GOVT 300.

**GOVT 367 - Money, Markets and Economic Policy**

Credits: 3 (NR)
Applies basic economic concepts and principles to issues facing the U.S. and global economies. Topics include productivity and economic growth, taxes, health care, globalization, income distribution and financial crises, with an emphasis on market structure, social institutions and the not-always rational behavior of investors and consumers.

Fulfills general education requirement in social and behavioral science.

**GOVT 398 - Study Abroad**

Credits: 3 (RT)
Study abroad. Course topics, content, and locations vary.

Notes: GOVT 398 may only be applied to a major or minor with prior written approval from the department. A maximum of 6 credits may be applied to the BA in government and international politics, the BS in public administration, or any minor offered by the Department of Public and International Affairs.

**GOVT 399 - Research Practicum in Public and International Affairs**
Credits: 1-3 (RD)
Applies research methods in context of assisting with faculty research. Individualized sections taught by arrangement with full-time faculty. Methods adopted vary, but generally include library research, data collection, data analysis, and report construction.

**Prerequisite(s):** GOVT 300, and permission of instructor

**Notes:** May be repeated for a maximum of 6 credits.

**Hours of Lecture or Seminar per week:** 1-3
**Hours of Lab or Studio per week:** 0

---

**GOVT 407 - Law and Society**

Credits: 3 (NR)
Explores relationship between law and society, including concept of law; origin, development, and role of law in society; and relationship between law and social change. Assesses different approaches and methodologies.

**Prerequisite(s):** CRIM 100 or GOVT 301.

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0

---

**GOVT 409 - Virginia Government and Politics**

Credits: 3 (NR)
Examines history of politics in Virginia and current political issues. Particular attention to changing dynamics of political parties, key legislative issues, and policies of recent administrations.

**Prerequisite(s):** GOVT 103.

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0

---

**GOVT 412 - Politics and the Mass Media**

Credits: 3 (NR)
Responsibilities and freedoms of mass media in democracy. Explores influence of media on citizens' opinions, elections, and decisions of public officials.

Equivalent to COMM 412

**Prerequisite(s):** GOVT 103.

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0
GOVT 414 - Politics of Race and Gender

Credits: 3 (NR)
Examines political, economic, and social impact of public policies and implications for race, gender, and age.

Prerequisite(s): GOVT 103.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GOVT 420 - American Political Thought

Credits: 3 (NR)
Major political values and theories in America from formation of American republic to present. Covers changes in American political values in crisis periods and contemporary American political theory including pluralism, elite theories of democracy, and empirical political theory.

Prerequisite(s): GOVT 103

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GOVT 421 - Contemporary Political Ideologies

Credits: 3 (NR)
Studies political ideologies that shape values, beliefs, and actions of contemporary regimes and political movements. Topics include liberalism, conservatism, socialism, communism, and fascism in theory and contemporary practice; and totalitarianism and nationalism in postindustrial and developing societies.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GOVT 422 - Constitutional Interpretation

Credits: 3 (NR)
Examines Supreme Court's interpretation of constitutional powers of Congress, presidency, and judiciary. Includes examination of major decisions concerning state regulation, taxation, and interstate relations.

Prerequisite(s): GOVT 103.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GOVT 423 - Constitutional Law: Civil Rights and Liberties
Credits: 3 (NR)
Studies First Amendment freedoms of speech, press, assembly, association, and religion; right to privacy; and Fourteenth Amendment equal protection.

Prerequisite(s): GOVT 103.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**GOVT 424 - Constitutional Law: Criminal Process and Rights**

Credits: 3 (NR)
Studies constitutional law pertaining to rights of criminally accused from stages of investigations and evidence through attorney, trial, and punishment stages at federal and state levels.

Prerequisite(s): GOVT 103.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**GOVT 427 - Feminist Political Thought**

Credits: 3 (NR)
Explores feminist political thought in historical context. Topics include feminist political movements, feminist critiques of political philosophy, and feminist contributions to political theory.

Prerequisite(s): GOVT 101, WMST 200, 3 credits of philosophy, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**GOVT 428 - Advanced Democratic Theory**

Credits: 3 (NR)
Explores various theoretical approaches to nature and justification of democracy. Topics may include liberal, communitarian, pluralist, and deliberative theories and their critics; constitutionalism; role of markets; and transnational democracy.

Equivalent to PHIL 428

Prerequisite(s): GOVT 101 or one course in philosophy

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**GOVT 430 - Comparative Political Leadership**
Credits: 3 (NR)
Comparative political leadership, relationships between political cultures and types of leadership, patterns of leadership recruitment, and linkages between political elites and citizenry.

Prerequisite(s): GOVT 132, 133.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GOVT 432 - Political Change and Social Development in Sub-Saharan Africa

Credits: 3 (NR)
Examines relationship of culture, history, ethnicity, and religion, and contemporary political and socioeconomic developments in Africa. Special attention to implications of ethnic conflict for nation-building in the post-Cold War period, and strategies for resolving conflicts.

Prerequisite(s): GOVT 132, 133.

Notes: Fulfills the college requirement in non-Western culture.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GOVT 433 - Political Economy of East Asia

Credits: 3 (NR)
Discusses different theoretical perspectives of East Asian political economy; transformation of East Asia; and issues such as money, finance, trade, investment, environment, and energy. Focuses on issues of contemporary significance, but attention also given to history.

Prerequisite(s): GOVT 133 and 60 credits, or permission of instructor.

Notes: Fulfills the college requirement in non-Western culture.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GOVT 434 - Democracy in Global Perspective

Credits: 3 (NR)
Comparative study of structures and performance of democracies around the world since 1975. Examines growing influence of global forces such as economy, media, and culture in process of democratization. Examines select current elections.

Prerequisite(s): GOVT 133.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
GOVT 443 - Law and Ethics of War

Credits: 3 (NR)
Explores sources of morality in armed conflict, and implications of such ideas for international relations. Examines content and philosophy of modern law of war.

Prerequisite(s): GOVT 132.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GOVT 444 - Issues in International Studies

Credits: 1-3 (RT)
Major issues in international systems, including international political economy and security.

Prerequisite(s): GOVT 132, 133.

Notes: May be repeated for a maximum of 9 credits when topic is different with permission of department.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GOVT 445 - Human Rights

Credits: 3 (NR)
Explores philosophical, legal, and political issues at heart of modern international human rights movement. Examines historical background legal architecture of modern human rights movement.

Prerequisite(s): GOVT 132.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GOVT 446 - International Law and Organization

Credits: 3 (NR)
Nature, sources, and subject of law of nations; law and individual; territorial questions; nature, sources, and functions of international organizations; international transactions and organizations; war and present; and future status of international law.

Prerequisite(s): GOVT 132, 133.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
GOVT 447 - Revolution and International Politics

Credits: 3 (NR)
Historical overview of modern revolutions as well as different theories about causes and consequences of revolutions. Special attention to Marxist-Leninist, Arab nationalist, and Islamic revolutions.

Prerequisite(s): GOVT 133.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GOVT 448 - Ethics and International Politics

Credits: 3 (NR)
Ethics and international politics ask students to wrestle with dilemmas raised by a desire to behave morally in an international system in which consensus about ethical matters is absent. Distributive justice and use of force are two overarching themes. Students also develop, apply, and justify their own perspectives on ethical problem using philosophical theory, history, and social science research.

Prerequisite(s): 60 credits, and GOVT 132 or PHIL 151.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GOVT 452 - Administrative Law and Procedures

Credits: 3 (NR)
Law of public office. Studies procedures followed by and the legal limits on administrative agencies and their officers and employees.

Prerequisite(s): GOVT 351.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GOVT 460 - Surveillance and Privacy in Contemporary Society

Credits: 3 (NR)
Philosophical perspectives, historical context, technological developments, and institutional changes that surround controversies about privacy and surveillance in contemporary society. Explores public and private institutions doing surveillance, how they calculate and manage risk, and legal constraints on surveillance activities.

Prerequisite(s): CRIM 100.
GOVT 464 - Issues in Public Policy and Administration

Credits: 1-3 (RT)
Analyzes selected policy issues in administering public policies. Topics announced in advance. Examples include environmental policy, government regulation, federal mandates, state policy, and regional policy.

Prerequisite(s): GOVT 103 plus 60 credits.

Notes: May be repeated for a maximum of 9 credits when topic is different with permission of department.

GOVT 467 - Current Issues in Economic Policy

Credits: 3 (NR)
Applies basic concepts of economics, political science and ethics to some of the most pressing issues facing the U.S. and global economies. Topics include productivity and economic growth, taxes, soaring costs for healthcare and higher education, globalization, income inequality, financial crises, the size of government and the proper role of regulation.

Prerequisite(s): Open to PPE concentrators or permission of instructor.

GOVT 469 - Philosophy, Politics, and Economics

Credits: 3 (NR)
Covers issues in the philosophy, economics, and political science of institutions, information, and collective action. Through case studies of existing legal and political institutions, applies the insights to problems in politics, policy making, social theory, and social, moral, and political philosophy. (Specific content varies).

Equivalent to PHIL 460, ECON 460.

Prerequisite(s): PHIL 358, ECON 412, and GOVT 467, or permission of instructor.

GOVT 470 - Faith and Reason in the Making of the Modern Mind
Investigates the interlocking claims of religious faith and human reason in Western culture, from Biblical times to the present. First covers tightly focused reading assignments in theology and philosophy, and second covers particular case studies, from Galileo to the Intelligent Design debate.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GOVT 471 - Millennialism and Philosophies of History in Western Culture

Credits: 3 (NR)
Is there purpose in human history? Are we really going anywhere as humanity moves through time? This seminar studies major patterns by which thinkers in the West have discerned meaning in humanity's temporal existence. Extends from the Jewish roots of historical understanding, through Christian millennialism, to contemporary naturalism.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GOVT 472 - Christianity, Secularism, and Democracy

Credits: 3 (NR)
Examines the evolving relationship between religion and the American political order, from the Reformation to George W. Bush.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GOVT 480 - Internship

Credits: 3 (RT)
Approved internships with specific employer. Programs relate in some capacity to government, politics, public policy, or the law. Students develop individual contracts defining learning and competencies they plan to gain from the experience. For 3 credits, a minimum of 135 hours is required.

Prerequisite(s): GOVT 101, 103, 132, 133

Notes: Contact the department one semester before enrolling. A maximum of 6 credits of GOVT 480 may be applied to a degree in government and international politics or in public administration. 3 of those credits may be applied to requirements for the major (to the advanced government field requirement for the BA in government and international politics) with prior approval of the internship coordinator. A maximum of 3 additional credits may be used for general elective credit toward the 120 credits required for the bachelor's degree.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
Grading: Satisfactory/No Credit.
GOVT 490 - Synthesis Seminar

Credits: 3 (NR)
Readings, individual or group projects, and discussion of papers reflecting on connections between liberal arts and sciences and political world.

Fulfills general education requirement in synthesis.

Fulfills writing intensive requirement in the major.

Prerequisite(s): Completion or concurrent enrollment in all other required general education courses, GOVT 300, and 18 credits in major.

Notes: Students may not receive credit for 490 more than once.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GOVT 491 - Honors Seminar

Credits: 3 (NR)
Readings, individual or group projects, and discussions of seminar papers.

Fulfills general education requirement in synthesis.

Fulfills writing intensive requirement in the major.

Prerequisite(s): Completion or concurrent enrollment in all other required general education courses, GOVT 300, and 18 credits in major.

Notes: Subject varies.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GOVT 496 - Directed Readings and Research

Credits: 1-3 (RT)
Reading and research on specific topic under direction of faculty member.

Prerequisite(s): Major in government and international politics with 90 credits and permission of instructor and department.

Notes: Written report required; oral report of research may be required. May be repeated for a maximum of 6 credits.

Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 0
GOVT 500 - The Scientific Method and Research Design

Credits: 3 (NR)
Grounds students in the principles of the scientific method as the framework for investigating all research questions in political science, whether qualitative or quantitative in character (or both). Focus is on sound and rigorous research design.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GOVT 510 - American Government and Politics

Credits: 3 (NR)
Examines institutions and processes of American government, including separate institutions of power in national government, theory and practice of federal system, role of interest groups and political parties, and effects of media and public opinion on electoral behavior and policy making. Seminar examining normative and empirical research.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GOVT 511 - Problem Solving and Data Analysis I

Credits: 3 (NR)
Introduces fundamental statistical and quantitative techniques for analyzing social science data rigorously and soundly. Focuses on problem definition, research design, and problem solving under conditions of uncertainty in political science.

Equivalent to PUAD 511; GOVT 711 (2011-2012 Catalog)

Prerequisite(s): GOVT 500 and passing grade on screening exam.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GOVT 520 - Political Theory

Credits: 3 (NR)
Analyzes selected major works of ancient, modern, or contemporary political theory that illuminate basic problems and questions for people engaged in political or civic life. Examines justice, liberty, equality, autonomy, rights, obligation, participation, and nature of politics.

Prerequisite(s): Admission to the MA in political science or permission of department.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
GOVT 530 - Comparative Politics

Credits: 3 (NR)
Examines fundamental issues in comparative politics and provides broad coverage of the central themes under study. Designed to help students think theoretically and critically about the study of comparative politics, its scientific objectives, and its epistemological assumptions. Within this context, students will look at concepts and approaches, as well as important theories and debates that characterize the subfield. Helps prepare students for qualifying exams in comparative politics.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GOVT 540 - International Relations

Credits: 3 (NR)
Focuses on changing structure of international politics, post-Cold War security issues, effect of globalized economy and information technology revolution, enhanced role of global corporations and nongovernmental organizations, and rise of nonsecurity issues in emerging international agenda.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GOVT 541 - Introduction to Critical Analysis and Strategic Response to Terrorism

Credits: 3 (NR)
Introduces terrorism as a complex threat to human security. Focuses on tools for analyzing terrorism and the underlying sources and conditions that contribute to it. Considers similarities and differences between terrorism and other threats to human security. Explores the lessons learned in the history of responding to terrorism. Focuses not only on different tactics of response, but also includes how different types of societies (dictatorship, democracies, etc.) have responded to terrorism and what the results of those responses have been. Includes case studies of responses to terrorism.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GOVT 550 - Seminar in Theories of Public Administration

Credits: 3 (NR)
Reviews the theoretical traditions in American public administration, from the earliest days of the founding to the present. Concludes with consideration of contemporary theoretical debates over the proper role of public administrators and controversies about conflicting demands made on the public service and the public sector.

Prerequisite(s): GOVT 510.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
GOVT 603 - Seminar in the Courts and Constitutional Law

Credits: 3 (NR)
Analyzes role, influence, and effects of U.S. courts in creating constitutional legal norms and interpreting them. Special attention to First and Fourteenth Amendments and Commerce Clause. Lecture and discussion; students expected to read and analyze leading court cases.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GOVT 604 - Seminar on Congress and Legislative Behavior

Credits: 3 (NR)
Examines theories and empirical research on the U.S. Congress and legislative behavior, including elections, representation, structures, and processes. Also examines Congress' impact on the design and implementation of public policy, interactions with other branches of government, and comparisons with parliamentary systems.

Prerequisite(s): GOVT 510.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GOVT 605 - Seminar on the Presidency

Credits: 3 (NR)
Examines the American presidency from a number of substantive and methodological perspectives. Readings and discussions in the course appraise the presidency within the system and focus on the role the presidency plays in formulating and implementing public policy.

Prerequisite(s): GOVT 510.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GOVT 631 - Seminar in Comparative Politics and Institutions

Credits: 3 (RT)
Examines theories and practices of governance and development in comparative national settings. Course explores key subsets of the comparative politics literature in depth, including institutional change, regime types and transitions, democracy and authoritarianism, states and state-society relations, revolution, social movements, political cultures, and methods. Course is explicitly conceptual and cross-regional.

Notes: May be repeated for a maximum of 9 credits when topic is different.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
GOVT 640 - Strategic Responses to Terrorism: Coordinated Decision Making

Credits: 3 (NR)
Revisits, expands, and examines the critical themes developed in the terrorism certificate program. Provides students with the opportunity to apply the theoretical concepts developed in practice. Integrates the ideas, theories, and practices considered in this track within the larger field of terrorism analysis and strategic responses to this threat.

Corequisite(s): GOVT 541

Notes: This is the capstone course for the terrorism certificate program and must be completed in the final semester of the certificate program.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GOVT 641 - Global Governance

Credits: 3 (NR)
Applies systems approach to understanding global politics. Emphasizes properties and functions of global systems such as population, food, disease, energy, and trade, and how world's political systems interact with them. Discusses how governance at municipal, national, and international levels affected by global systems. Examines role of nongovernmental organizations in global affairs.

Prerequisite(s): GOVT 540.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GOVT 706 - Federalism and Intergovernmental Relations

Credits: 3 (NR)
Examines broad trends in governance, including theory and practice of federal, state, and local governments. May include privatization, devolution, mandating, regulatory reform, and comprehensive federalism reform.

Prerequisite(s): GOVT 510.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GOVT 712 - Problem Solving and Data Analysis II

Credits: 3 (NR)
Advanced techniques and skills for solving policy-related problems or analyzing political data. Focuses on data gathering and analysis, use of statistical software, and multivariate analysis.
GOVT 713 - The Constitution, Criminal Procedure, and Security

Credits: 3 (NR)
Explains legal doctrines that form basis of U.S. constitutional procedural rights, how these doctrines develop, and why courts rule as they do. Evaluates strengths, weaknesses of these rights.

Prerequisite(s): CRIM 720/GOVT 728, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GOVT 717 - Qualitative Methods

Credits: 3 (NR)
Focuses on scientific design of qualitative research questions and use of specific qualitative methods in scientific analysis. Covers when and how to use qualitative research methods to answer empirical questions in political science; primary data collection methods (interviews, observations, document review); the appropriateness of different research approaches; procedural and ethical concerns that may arise in use of qualitative methods.

Prerequisite(s): GOVT 511 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GOVT 719 - Issues in American Politics

Credits: 3 (RD)
Examines significant issue in American politics and political behavior. Analyzes topic of contemporary and emerging concern.

Prerequisite(s): GOVT 510.

Notes: May be repeated for a maximum of 6 credits when topic is different.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GOVT 725 - Democratic Theory
Credits: 3 (NR)
Examines democracy in terms of versions of liberalism, theories of social capital and civic participation, and discourses about civil, political, and human rights. How is democracy conceptualized normatively and empirically? What underlying economic, social, and cultural conditions promote democracy? What role do institutions play in creating and sustaining a stable democratic society? Takes a broadly comparative perspective, focusing on variety of established and emerging democracies around the world. Elective for students specializing in American government or international politics and comparative governments.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GOVT 726 - Theories of Justice

Credits: 3 (NR)
Overview of ancient and modern theories of justice with application to contemporary issues involving justice system and other social and political institutions.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GOVT 727 - Restorative Justice

Credits: 3 (NR)
Origins of restorative justice, its principles, implications for different justice organizations and processes, and application to problems such as family violence, human rights, and reconciliation following mass victimizations.

Prerequisite(s): CRIM 700, GOVT 726, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GOVT 728 - Behavior of Law

Credits: 3 (NR)
Examines development of law, and law's effect on human behavior. Reviews theories of law's meaning and aims. Examines construction of law, and investigates consequences of law and legal decisions.

Equivalent to CRIM 720

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GOVT 731 - Advanced Seminar in Comparative Politics
Credits: 3 (RT)
Assumes basic proficiency in comparative analysis. Regionally based examination of key debates in the comparative politics field. Key theoretical and methodological debates are addressed through in depth examination of regional political processes. Regions include Latin America, Asia, Middle East, European Union, Africa, and Russia.

Prerequisite(s): GOVT 530.

Notes: May be repeated for a maximum of 6 credits when topic is different with permission of department.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GOVT 732 - Comparative Justice

Credits: 3 (NR)
Survey of justice systems and their environments in different lands and cultures. Identifies commonalities and differences among justice systems, evaluates them, and considers policy implications.

Prerequisite(s): CRIM 700/ GOVT 726, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GOVT 733 - Islam and Politics

Credits: 3 (NR)
Provides an overview and understanding of the multifaceted nature of political Islam in the contemporary world. Covers brief history of Islam, formation of modern states in the post-colonial Muslim world, nature of contemporary Islamic radicalism and militancy and the future of Islamism.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GOVT 734 - Democratization

Credits: 3 (NR)
Examines concepts and concrete cases of democratization and cases where democratization is absent or incomplete. Investigates methods for measuring democracy and authoritarianism; the role state and society play in political change; the effects religion, the military, ethnic division, and technology have on government reform; and the extent to which international actors can encourage democratization.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GOVT 735 - Comparative Public Management
Examines the comparative decision environments for public managers and policy elites in the OECD countries generally, focusing on four models: 1) Franco-Japanese model, 2) German concentration model, 3) "Anglo-Saxon" (United States) model, 4) Chinese model.

Notes: May apply to elective credit in the fields of comparative politics and public administration.

GOVT 739 - Issues in Comparative and International Politics

Credits: 3 (RT)
Explores issues of contemporary and emerging concern in comparative and international politics.

Prerequisite(s): GOVT 540.

Notes: May be repeated for a maximum of 6 credits when topic is different.

GOVT 741 - Advanced Seminar in International Politics

Credits: 3 (RT)
Examines theoretical and methodological issues central to study of international relations by focusing on specific topic: American foreign policy, diplomacy, international law and organization, international relations theory, international ethics, human rights and humanitarian intervention, the environment, and others.

Prerequisite(s): GOVT 540.

Notes: May be repeated for a maximum of 9 credits when topic is different with permission of department.

GOVT 742 - International Negotiation

Credits: 3 (NR)
Examines frameworks and perspectives that have guided scholarly work on negotiation. Students will analyze complex cases of negotiations in the areas of security, trade, and the environment, and practice negotiating key security and environmental issues on the agendas of nations and international organizations.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
GOVT 743 - International Political Economy

Credits: 3 (NR)
Examines interplay of international politics and economics. Discusses theoretical perspectives and analytical tools in academic field of international political economy, and applies theories and tools to trade, investment, exchange rates, development, regionalization, and globalization. Explores how international economic and political forces increasingly shape domestic interests, and how domestic politics affect international political economy. Lecture, discussion.

Prerequisite(s): GOVT 343 or equivalent.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GOVT 744 - Foundations of Security Studies

Credits: 3 (NR)
Introduces students to a selection of the original sources of the most important ideas that form the basis of security studies as a subfield of political science.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GOVT 745 - International Security

Credits: 3 (NR)
Examines interplay of international politics and international security. Discusses theoretical perspectives and analytical tools in academic field of international security, and applies theories and tools to nuclear, biological, and chemical weapons, strategy and defense, and arms control. How domestic issues affect defense policies, terrorism, changing nature of international conflict, and human security will be examined.

Prerequisite(s): GOVT 540.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GOVT 746 - Media and International Affairs

Credits: 3 (NR)
Examines government/media interaction and media coverage of war and foreign policy since Vietnam and considers a range of critical policy questions.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
GOVT 753 - Third-Party Governance

Credits: 3 (NR)
Examines design and management of government programs that rely on other levels of government and the private sector for delivery, with focus on such governmental tools as contracts, grants, loans, regulation, and tax credits.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GOVT 755 - Seminar in Politics and Bureaucracy

Credits: 3 (NR)
Explores research and theory on political causes and effects of actions of government bureaucratic agencies. Readings examine origins of agencies, influences on decisions and programs, sources of internal and external accountability, pathologies of bureaucracies, and contributions bureaucracies make on effective and just governance.

Prerequisite(s): GOVT 510.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GOVT 758 - Homeland/Transportation Security Administration

Credits: 3 (NR)
Examines the terrorist attacks of 9/11, vulnerabilities of the aviation security at that time, failure of elected officials and administrators to act more decisively to improve security before 9/11, and the policy and administrative responses to the 9/11 attacks, including the creation of the Transportation Security Administration and the Department of Homeland Security. Includes the development of radical Islam and the rise of Osama bin Laden and Al Qaeda.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GOVT 759 - Issues in Public Administration and Management

Credits: 1-3 (RD)
Current issues in administration and management of public organizations in contemporary American government. Includes practical applications of theories and analysis to managerial problems. Emphasizes competence in improving management in selected government settings.

Notes: May be repeated for a maximum of 6 credits when topic is different.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
GOVT 794 - Internship

Credits: 1-6 (RT)
Work-study program with specific employers.

Prerequisite(s): Admission to graduate program and 12 credits.

Notes: Contact internship coordinator one semester before enrollment. Credit determined by department. May be repeated for a maximum of 6 credits.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0
Grading: Graduate Special

GOVT 796 - Directed Readings and Research

Credits: 1-6 (RT)
Reading and research on specific topic under direction of faculty member.

Prerequisite(s): 15 credits of GOVT courses at 500 level and above, and permission of instructor.

Notes: Written paper required.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0

GOVT 798 - Political Science Research Project

Credits: 3 (NR)
Research project related to student's concentration under supervision of a faculty advisor. Student produces substantial and original contribution to political science knowledge on model of article in scholarly journal.

Prerequisite(s): 24 credits.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
Grading: Graduate Special

GOVT 799 - Political Science Thesis

Credits: 1-6 (RT)
Substantial and original research paper with guidance of faculty advisor. Thesis proposal must be approved in advance by advisor and two faculty members who comprise thesis committee. Completed research must be approved by committee and defended publicly in oral presentation.

Prerequisite(s): 24 credits, and approval of thesis proposal.
GOVT 800 - PhD Research Seminar

Credits: 3 (NR)
Provides an opportunity for PhD students in political science to present and refine independent research, and to further improve understanding of social scientific method as they prepare for conference presentations, qualifying exams, and subsequent dissertations.

Notes: Open to PhD students in political science only.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring.

GOVT 810 - American Political Development

Credits: 3 (NR)
Advanced graduate-level seminar on historical roots of American politics. Examines political culture and historical development of U.S. institutions, and how laws and programs have been affected by historical and cultural development.

Prerequisite(s): GOVT 510.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GOVT 811 - Advanced Seminar in American Institutions

Credits: 3 (RT)
Advanced graduate-level seminar on specific topics of contemporary research and theory in American governmental institutions. Topics vary to include presidential politics, Congress, and politics of the judiciary. Readings include classic and contemporary literature. Seminar format with discussion, student presentations.

Prerequisite(s): GOVT 510.

Notes: May be repeated for a maximum of 9 credits when topic is different.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GOVT 815 - Advanced Seminar in Political Behavior
Credits: 3 (RT)
Advanced graduate-level seminar on specific topics of contemporary research and theory in American political behavior. Topic varies to include political parties, electoral politics, public opinion and voting behavior, interest groups, and lobbying. Readings include classic and contemporary literature. Seminar format with discussion, student presentations.

Prerequisite(s): GOVT 510.

Notes: May be repeated for a maximum of 9 credits when topic is different.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GOVT 820 - Advanced Topics in Political Thought

Credits: 3 (RT)
Advanced graduate-level seminar on topics of contemporary research and theory in political thought. Topics vary to include political ideologies, feminist theory, and political theory. Seminar format with discussion, student presentations.

Prerequisite(s): GOVT 520.

Notes: May be repeated for a maximum of 9 credits when topic is different.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GOVT 831 - Research Seminar in Regional Political Culture and Development

Credits: 3 (NR)
Advanced graduate-level seminar on theories of political culture and economic development applied to Middle East, Latin America, Asia, and Africa. Debates economic growth and development from broad and rigorous analytical base.

Prerequisite(s): GOVT 540.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GOVT 841 - Ethics and Human Rights in International Affairs

Credits: 3 (NR)
Seminar on ethical behavior in an international system in which consensus about ethical matters is absent. Overarching themes are distributive justice, human rights, and use of force. Students develop, apply, and justify their own perspective on an ethical problem using ethical theory and social science research.

Prerequisite(s): GOVT 540.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
GOVT 843 - Diplomacy

Credits: 3 (NR)
Advanced graduate seminar on theory and practice of diplomacy; alliance construction and destruction; coercive and cooperative diplomacy; diplomacy of certain great powers such as America, Russia, China, France, and Japan, and small and revolutionary powers. Also examines diplomacy and the media, and day-to-day diplomacy.

Prerequisite(s): GOVT 540.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GOVT 850 - Advanced Seminar in Public Administration Research and Theory

Credits: 3 (RD)
Focuses on a topic of central concern in contemporary public administration research and theory. Content of the seminar varies but includes such topics as organizing for homeland security, managerial and political effects of e-government, or the application of principal-agency models in public management.

Prerequisite(s): GOVT 510, 650.

Notes: May be repeated for a maximum of 9 credits when topic is different.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GOVT 851 - Doctoral Seminar in Theories of Organization and Bureaucracy

Credits: 3 (NR)
Examines key issues in organization theory and behavior. Issues include organization design; interorganizational coordination, intelligence and decision making systems; leadership and motivation theories; and theories or organizations as agents of political and social change. Uses case studies.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GOVT 852 - Seminar in Political Leadership

Credits: 3 (NR)
Graduate seminar on theories and practices of political and governmental leadership in American and comparative settings. Domestic and comparative cases of leadership in state-building, presidency, and public administration. Primary or secondary research on leaders encouraged.

Prerequisite(s): GOVT 510.
GOVT 853 - Advanced Seminar in Global Innovations in Public Finance

Credits: 3 (NR)
Explores how financial decisions by government jurisdictions are affected by global competition and global markets. The impact of cross-national movements of capital and information on tax, tariff, and interest rate policies will be examined, as will the numerous organizations, such as the World Bank, that have been created to reduce the impact on developing nations. Government and supernational efforts to deal with the unintended consequences and global capital flows will also be examined.

GOVT 998 - Doctoral Dissertation Proposal

Credits: 3-6 (RT)
Work on research proposal that forms basis for doctoral dissertation.

Prerequisite(s): Advancement to candidacy.

GOVT 999 - Doctoral Dissertation Research

Credits: 1-12 (RT)
Research on approved dissertation topic under direction of dissertation committee.

Prerequisite(s): Approval of dissertation proposal.

Notes: May be repeated for up to 9 credits in a semester, but no more than 15 total.

Graduate School of Management (GSOM)

Offered by the School of Management
**GSOM 540 - Analysis of Financial Decisions**

Credits: 3 (NR)
Provides a survey of financial decision-making. Assists students with developing a framework within which they can understand the linkages between financial decisions and organizational performance. Examines methods for using information based on financial statements in making decisions and assessing performance, evaluating investment opportunities, and choosing among alternative sources of funds. Focuses on public firms in the corporate sector as well as applications for privately-held companies and organizations in the government and non-for-profit sectors.

Prerequisite(s): Graduate admission or permission of instructor.

Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0

**GSOM 746 - Real Estate Analysis and Valuation**

Credits: 3 (NR)
Overview of real estate assets, markets, and decisions. Emphasizes development of analytical techniques and information required for implementation. Includes legal, economic, and public policy perspectives.

Equivalent to MBA 746

Prerequisite(s): Graduate admission or permission of instructor.

Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0

**GSOM 747 - Real Estate Finance**

Credits: 3 (NR)
Examines financing of residential and income-producing real estate from perspectives of both suppliers and users of funds. Focuses on financing alternatives, primary and secondary markets, and decision implications of available arrangements.

Equivalent to MBA 747

Prerequisite(s): Graduate admission or permission of instructor.

Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0

**GSOM 748 - Real Estate Investment**

Credits: 3 (NR)
Develops frameworks for analyzing decisions about investing in real estate assets. Focuses on acquisition and analysis of information required to evaluate potential performance of assets. Applications of theories and techniques through case studies.
Equivalent to MBA 748

**Prerequisite(s):** Graduate admission or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**Greek (GREE)**

Offered by the College of Humanities and Social Sciences

**GREE 150 - Classical Greek I**

Credits: 3 (NR)  
Addresses linguistic, semantic, and cultural aspects. Covers basic structure and vocabulary, its place among other world languages and its unique role in development of modern thought.

**Notes:** Lectures, discussions supplemented by web-posted material.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**GREE 160 - Classical Greek II**

Credits: 3 (NR)  
Expands proficiency, refines grasp of morphology and syntax, and fosters greater command of vocabulary. Introduces selected original passages from Greek classical authors.

**Prerequisite(s):** GREE 150 or permission of instructor.

**Notes:** Lectures, discussions supplemented by web-posted material.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**Health Administration and Policy (HAP)**

Offered by the Health and Human Services

**HAP 201 - Health Professions Careers**

Credits: 3 (NR)  
Acquaints students early in their college education with a variety of health professions careers. Provides overview of the health
care system, and identifies the current supply and demand for health care professionals. Presents information about educational and licensing requirements as well as expected salaries. Defines professionalism and outlines the principal rights and responsibilities of being a health care professional.

Equivalent to HHS 201 (2010-2011 Catalog)

**HAP 202 - Medical Terminology**

Credits: 3 (NR)
Prepares students with a basic understanding of medical terminology needed to work in a wide variety of healthcare environments.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall, Summer, Spring.

**HAP 290 - Lifestyle Management through Systems Analysis**

Credits: 3 (NR)
In this introductory course on practical application of Bayesian causal modeling techniques and Statistical Process Control tools, students make resolutions and analyze their progress toward goal achievement. Each student maintains a diary and analyses it using Bayesian causal modeling techniques to understand the constraints and causes leading to their success and failures. Students analyze their pattern of success using Statistical Process Control tools and engage cyclical assessment of their self improvements.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall

**HAP 301 - Health Care Delivery in the United States**

Credits: 3 (NR)
Introduces history and current structure and function of U.S. health care delivery. Explores components and subsystems of health care, and sociopolitical (public and private) context that shapes system and affects access to health care and delivery of health services.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**HAP 307 - Assisted Living/Senior Housing Management and Philosophy**
Overview of growth of assisted living industry, its role in health care continuum, current or proposed regulatory environments, and differences between assisted living and other forms of senior health care and senior living services. Specific instruction provided in philosophy and day-to-day management of assisted-living communities, including resident care, operations, finance and budgeting, human resources and staffing, and successful marketing and community relations. Also examines industry future, including cutting-edge programs and technologies, and approaches to creating next generation of assisted-living services.

**HAP 310 - Healthcare Ethics**

Credits: 3 (NR)
Introduces current ethical ideas and issues in healthcare and the healthcare system. Case studies require students to apply critical thinking in ethical decision making situations encountered by healthcare professionals.

Prerequisite(s): HAP 301.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall, Summer, Spring.

**HAP 312 - Healthcare Law**

Credits: 3 (NR)
Introduces students to the legal environment in healthcare with emphasis on laws and regulations of routine importance to healthcare managers in the areas of labor, contracts, real estate, medical malpractice, general business, and intellectual property.

Prerequisite(s): HAP 301.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall, Summer, Spring.

**HAP 360 - Introduction to Health Information Systems**

Credits: 3 (NR)
An introduction to basic information management in health care service organizations. Provides an overview of health information systems for selected administrative functions and clinical care services, including electronic data interchange for billing and claims management, institutional approaches to ensuring data security and privacy, and information management and decision support for managers and clinicians.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0
HAP 361 - Health Databases

Credits: 3 (NR)
Introduces students to the design and use of various health and healthcare databases, and provides hands-on experience with database design and use. Reviews database management systems. Examines the application of databases for both clinical and managerial purposes.

Prerequisite(s): HAP 360

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

HAP 392 - Human Resources Management in Healthcare

Credits: 3 (NR)
Exposes students to the major issues, laws, administrative processes, procedures, and psychological factors to be considered when developing a human resources management system in healthcare organizations.

Prerequisite(s): HAP 301.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Summer, Spring.

HAP 395 - Health Care Finance

Credits: 3 (NR)
Introduces finance in health care organizations. Reviews issues in reimbursement structures, regulatory mechanisms, cost control, and related factors affecting financial management of health service organizations including financial decision support skills.

Prerequisite(s): HAP 301

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HAP 396 - Strategic Health Management and Planning

Credits: 3 (NR)
Introduces past and present interventions that affect supply and demand for health care at community, state, regional, and national levels. Presents health planning and regulatory entities, and discusses strategic and program planning in context of current economic and market conditions.

Prerequisite(s): HAP 301
HAP 410 - Introduction to Health/Medical Practice Management

Credits: 3 (NR)
An introductory course in the leadership and management of ambulatory health service practices and small provider organizations. Content covers a variety of health/medical practice management functions, including administrative systems, operations and strategies for effective management of quality, efficiency and business performance (contracts and marketing), and human resources. Trends in practice integration and affiliations with multiprovider groups and larger enterprises will be covered.

Prerequisite(s): HAP 301

HAP 416 - Leadership and Management of Health Systems I

Credits: 3 (NR)
Introduces theoretical concepts and their application to the leadership and management of effective health care organizations. Explores the structure and function of health-related organizations and selected administrative and operational issues in program development and service design, emphasizing strategies for effective performance management, decision making, and communication.

Prerequisite(s): HAP 301. Completion of HAP 300-level course requirements.

HAP 417 - Leadership and Management of Health Systems II

Credits: 3 (NR)
Explores challenges to providing effective leadership and management of health care organizations and systems of care related to operational issues such as personnel management and labor relations, information management, conflict and goal alignment, financial management, accountability, and quality and safety improvement. Focuses on identification of management skills, technology, and strategy that influence optimal performance and communication between clinicians, administrative staff, and managers.

Prerequisite(s): Completion of HAP 416.

HAP 420 - Management of Project Resources
An introductory course in the management of project resources, including, but not limited to, assessing return on investment for projects and costing out resources needed in project subtasks. Includes hands-on application of project management tools as they are applied in the health-related organization and the health service industry. Also includes a variety of variables that may affect cost control and cost variation, including the impact of finishing projects in shorter time frames than originally planned and activity-based costing.

Prerequisite(s): HAP 360 and HAP 378

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HAP 425 - Health Economics and Policy

Credits: 3 (NR)
An introduction to the role of economics in health care policy. Concepts used by economists to analyze health outcomes, health behaviors, health care markets, health insurance markets, and the role of government. Concepts are linked to current health policy debates, Relevance and limits of the health economics approach to analyzing health issues are discussed.

Prerequisite(s): ECON 103

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring

HAP 430 - Process Improvement in Healthcare Organizations

Credits: 3 (NR)
Introduction to the process of quality management in health care organizations. Principles of quality management and guidelines for implementing total quality in health care are discussed, and differentiation between quality assurance and quality management presented.

Prerequisite(s): HAP 301.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Summer, Spring.

HAP 442 - Introduction to Health Care Politics and Policy

Credits: 3 (NR)
Reviews health care system issues and trends, and economic concepts, ways to understand the critical role of public health policy and the policy-making process in the United States. Identifies the major political institutions and policy processes that shape health policy. Examines the past and present health policy and its impact on changes in the ability of patients to access health services, the practice of health sciences professionals, and the quality and process of care. Explores the role of politics at both the federal and state government in health policy-making and critical aspects of the U.S. health system are compared to those of other countries.
Prerequisite(s): HAP 301

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HAP 445 - Introduction to Health Services Research

Credits: 3 (NR)
An introductory course for undergraduate students in understanding the basic methods of interdisciplinary health services research and program evaluation in health systems and policy. Emphasis is placed on understanding, assessing and using relevant findings from health services research. The course covers a variety of topics related to policy, management, and program evaluation in health delivery systems.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HAP 459 - Health Data Standards

Credits: 3 (NR)
Introduction to prevailing and emerging data standards applicable in health information technology. Students will learn about standard-making organizations, such as HL7 and Healthcare Information Technology Standards Panel (HITSP), and their standardization processes. The structure of and relationship between standard terminologies applicable in healthcare, such as International Classification of Diseases (ICD-10-CM), Logical Observation Identifiers Names and Codes (LOINC) and Systematized Nomenclature of Medicine--Clinical Terms (SNOMED-CT), will be explained.

Prerequisite(s): HAP 301 or permission of instructor.
HAP 361.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

HAP 460 - Information Technology Project Management

Credits: 3 (NR)
Focuses on project management as applied to management of health care information technology projects. Students learn critical path analysis, project resource management, crashing projects, vendor selection, assessment of project quality, and analysis of project risks. Students learn to use media for effective project communication.

Prerequisite(s): HAP 360

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
HAP 461 - Internet and Web Technology Applications for Healthcare

Credits: 3 (NR)
Introduces students to the major applications of Internet and Web technology in healthcare. Two major applications are studied: online promotion/marketing for consumer-oriented health web sites, and online Personal Health Records (PHR). Students will learn about Search Engine marketing and the practical skill of creating an online health marketing/promotion campaign. They also will learn to create and manage PHR. The technological challenges such as reliability, privacy, security and organizational barriers to adoption are discussed.

Prerequisite(s): HAP 360.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall.

HAP 462 - Privacy and Security in Health Informatics

Credits: 3 (NR)
Health information security and privacy issues in the current healthcare system. Evaluates methods to achieve privacy and security. Discusses the important role of sound security policies and procedures; looks into technical solutions and non-technical solutions for achieving privacy and security.

Prerequisite(s): HAP 360.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall.

HAP 463 - Aging and Health Care Policy

Credits: 3 (NR)
Introduces issues and controversies surrounding need to sustain viability of Medicare, Medicaid and Social Security. Provides insights on the interaction of health policy, health economics, and aging of the population to help students understand and participate in ongoing debates about key U.S. entitlement programs. Provides skills in policy process and analysis as applied to aging and health policy.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall.

HAP 465 - Integration of Professional Skills and Issues

Credits: 3 (NR)
Assists students in synthesizing the varied dimensions of their roles as health professionals in a global society. Provides opportunities to examine issues in health care through reflection on the natural and behavioral sciences, humanities and other prerequisite coursework. Selected topics examined through writing, presentation, reading and discussion. (Writing intensive
course).

Fulfills general education requirement in synthesis.

Prerequisite(s): Senior standing.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring, Summer

HAP 468 - Health System Reform Policy Debates

Credits: 3 (NR)
Introduction to competing views about US health system reform. Financing, insurance, delivery system and federalism issues will be covered, using theme of personal vs. collective responsibility. Topics include: determinants of health; private insurance markets, regulation, and public insurance; sources of and alternative solutions to inequitable access, poor quality and excess cost growth. Emphasizes evidence, beliefs, and self-interest behind competing visions.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring

HAP 480 - Research Internship in Health and Human Services

Credits: 3 (NR)
The student works as a member of a team engaged in health and human services research and attends a bi-weekly research seminar. Under direction of the course seminar leader and the faculty research mentor, the student will acquire selected research skills and develop introductory research writing and presentation skills.

Equivalent to HHS 480, SOCW 480.

Prerequisite(s): Open only to CHHS majors or students who have completed CHHS minor or certificate courses.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

HAP 489 - Pre-Internship Seminar

Credits: 1 (NR)
Provides students with guidance and preparation for engaging in the internship.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0
Grading: Satisfactory/No Credit
When Offered: Fall, Spring.
HAP 494 - Special Topics in Health Administration and Policy

Credits: 3 (RT)
Selected topics analyzing specialized areas in health administration and policy.

Notes: Content varies. Lecture, seminar, laboratory, and workshops.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HAP 498 - Health Administration Internship

Credits: 6 (NR)
Provides variety of applied management experiences in a health systems or related organization (field agency), under the direction of a HAP faculty member and a preceptor in the field. Students integrate and apply critical-thinking, project-planning, and management and communication skills in the internship experience and toward completion of an approved internship project.

Prerequisite(s): Open to HAP majors only.

Notes: Taken in last semester of studies. Capstone course involves a two-hour weekly seminar and a 12-hour internship in a health-related organization. Not repeatable for credit.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 12

HAP 499 - Independent Study in Health Administration and Policy

Credits: 1-6 (RT)
Provides individual study of a particular problem area in health administration and policy research, theory development, or education under the direction of faculty.

Prerequisite(s): Permission of instructor and department.

Notes: May be repeated for maximum 6 credits.

Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 0

HAP 511 - Ethics in Public Health

Credits: 3 (NR)
Explores selected ethical issues in public health practice, research, and policy; specific ethical theories identified as the proper basis of public health; relevant ethical concepts and principles and how they inform existing public health policies, practices, and research; and how ethical reasoning can operate in public health practice, research, and policies.
HAP 540 - Introduction to Emergency Preparedness/Disaster Recovery for Health Care Professionals

Credits: 3 (NR)
Introductory course in emergency preparedness and disaster recovery issues for health and human service professionals, using blended learning methods. Introduces policy guiding public and private sector emergency preparedness activities, and provides overview of issues in emergency preparedness infrastructure, needs assessment, and interdisciplinary roles in emergency response operations. Uses knowledge acquired from recent state and federal responses to disasters.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 1

HAP 594 - Special Topics in Health Care

Credits: 3 (RD)
Selected topics analyzing specialized areas in health care.

Equivalent to GCH 594/NURS 594

Notes: Content varies. Lecture, seminar, laboratory, and workshops.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HAP 601 - E-Commerce and On-line Marketing for Health Services

Credits: 3 (NR)
Explores development of online health services; organization of online businesses; online marketing, financial, and clinical transactions; and venture capital and the IPO process. Explores creating and maintaining web pages and databases. Reviews literature on effect of computer services on patient care and health care organizations. Also reviews examples of both successful and bankrupt technology firms in health care. Student groups draft business plan and develop early version of service proposal.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HAP 602 - Statistics in Health Services Management

Credits: 3 (NR)
An introductory course in basic statistics applied to applications in health systems management. Students use spreadsheet
applications to perform a variety of statistical analyses (parametric and nonparametric statistics, including regression) to support
program evaluation and managerial decision making in health systems.

Equivalent to HAP 501 (2010-2011 Catalog)

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

HAP 605 - Introduction to Health Policy

Credits: 3 (NR)
An introductory survey to the process and politics of health policy as it relates to the delivery and financing of health care in the
United States. Examines the major public and private sector institutions responsible for health policy development, the interaction
of these institutions and their competing interests to create and implement health policies, and public programs providing health
coverage and services. Classroom and field experience involved.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Summer.

HAP 609 - Comparative International Health Systems

Credits: 3 (NR)
Uses Roemer's Model of Health Systems to examine resource allocation, management, and health outcomes in the United States
and around the globe. The structure and functioning of national health systems based on geographic location and governance in
developing and developed countries (democracies, monarchies, and communist nations). Resource allocation across the
continuum of nations and relationship to national health needs, health status, and longevity are examined.

Notes: An online course in comparative international health care systems.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HAP 610 - Health/Medical Practice Management

Credits: 3 (NR)
Regulatory pressures, technology, managed care contracting, revenue cycle management, and legal issues are making medical
practice management more complex. Physicians groups struggling with these demands are finding a need for sophisticated
management. Prepares the student to manage the modern practice by providing a foundation in the leadership and management of
ambulatory health services and small provider organizations.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
HAP 612 - Maintaining Business Continuity in Health Care

Credits: 3 (NR)
Considers potential types of catastrophes, their likely impact, and how organizations could continue their mission in the aftermath. Explores interdependences among various components of the health care delivery system, regional health services, disaster planning, business record protection, patient information and information systems protection, manpower planning, professional credentialing, access to supplies and drugs, and financial implications and resources.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HAP 615 - Revenue Management for Clinical Practices

Credits: 3 (NR)
Assists healthcare leaders and managers to become more effective decision makers, problem solvers, and communicators in revenue and financial management of clinical practices.

Prerequisite(s): HAP 610.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring

HAP 621 - Organization Behavior and Healthcare Leadership

Credits: 3 (NR)
This is an introductory course in the application of organizational behavior and theories of leadership to the management of interdisciplinary teams and decision making in healthcare organizations.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HAP 632 - Grants Funding and Development

Credits: 3 (NR)
Provides knowledge of private and public funders, funding mechanisms, tools and resources. Includes content on private and government funding streams relevant to public health, hospitals and other non-profit health related entities, interpretation of funder motivations and engagement strategies; essential skills for developing externally funded projects; grant proposal writing and grant requirements; assessment skills/strategies and award management/stewardship.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring
HAP 642 - Health Policy Development and Analysis

Credits: 3 (NR)
Examines the process and factors that influence formulation, implementation and modification of health policy in the United States, including competing interests and the relationship between public decisions and the market place. Emphasis is on the application of commonly-used frameworks for policy analysis, including contributions from health economics, health services research, and other policy-related disciplines, to contemporary policy issues in health care delivery, organization, and financing.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HAP 645 - Introduction to Health Services Research

Credits: 3 (RD)
An introductory course in the basic methods of interdisciplinary health services research and program evaluation in health systems and policy. The course covers topics related to policy, management, and program effect and evaluation within health delivery systems, including research design, existing data systems, measurement of quality and basic cost benefit, and effectiveness analysis.

Prerequisite(s): HAP 678 (if required in program of study).

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HAP 647 - Regulatory Requirements for Health Care Systems

Credits: 3 (NR)
Helps health care professionals understand link between infrastructures of organization and regulatory and accreditation processes for health care organizations. Covers major accrediting agencies and their roles, accreditation principles, and survey process. Focuses on hospitals with reference to ambulatory care, managed care organizations, rehabilitation centers, laboratories, and home health and long-term care facilities. Emphasizes requirements of Joint Commission on Accreditation of Health Care Organization and regulations mandated by Health Care Finance Administration.

Equivalent to HAP 447, HAP 547 (Catalog 2010-2011)

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

HAP 650 - Senior Housing Management and Operations

Credits: 3 (NR)
Issues, trends, and practices related to administration of assisted-living and senior housing communities. Emphasizes budgeting; staffing; hospitality services; resident care and risk management indicators; and evaluation of demographic, cultural, and regulatory environments affecting industry.
HAP 651 - Senior Housing Sales and Marketing

Credits: 3 (NR)
Introduction and analysis of sales and marketing practices within senior housing environments, including but not limited to Active Adult (55+), assisted living, Alzheimer’s assisted living, and Continuing Care Retirement Communities (CCRC’s). Topics include a review of the role of marketing in health care, the senior housing consumer and product, the development of marketing plans, and administrative management of the promotion, lead management, and sales process.

HAP 652 - Essentials of Health Insurance and Managed Care

Credits: 3 (NR)
Survey course in US health insurance and managed care. Provides an overview of the different types of health insurers and managed care organizations, with content on sales and marketing, provider network management and reimbursement, medical and quality management, claims processing, member services, IT and operational finance. Policy, laws and regulations affecting the industry will also be addressed.

HAP 661 - Policy Development and Analysis for Community Health Programs

Credits: 3 (NR)
Prepares students to critically analyze issues and develop skills pertinent to effective policy development for community and family public health programs. Explores what constitutes a vulnerable population and examines current government programs and policies supporting these programs for such populations. Recent case examples ground students in current issues faced by community groups and other health interests.

HAP 662 - Health Policy for Elders and People with Disabilities

Credits: 3 (NR)
An introduction to health policy, health economics, and the aging of the American population. Focuses on the effect of chronic illness and disability on health care costs and provides students with skills in policy process and analysis as applied to acute care,
long-term care, and health promotion for elders and people with disabilities.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Spring

### HAP 678 - Introduction to the U.S. Health System

Credits: 3 (NR)  
Explores the U.S. Health System focusing on historical development, current configuration and possible future direction. Includes study of health system development, key influencers, accessibility, financing, changing components and effects system has on patients, providers, financers, employers, government, insurers and society. Role of population health management and public health is explored, including impact of social, cultural, economic, and environmental factors on health care systems and practices.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

### HAP 680 - Applied Public Health Leadership and Management

Credits: 3 (NR)  
Survey course in leadership, management, and planning applied to public health systems. Students apply theoretical knowledge from a variety of disciplines relevant to development and implementation of public health policy, regulatory directives, public health program planning and management (including human resources and financial management), and the design and evaluation of public health services/functions. Content includes strategies for ensuring access to essential public health services and use of evaluation and monitoring systems to ensure the safety, efficiency, and effectiveness of local public health programs/systems. Course emphasizes leadership, communication, systems thinking, data-driven decision making, and ethical practice in public health systems.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

### HAP 686 - Quality Improvement in Health Services

Credits: 3 (NR)  
Examines how improved work processes lead to quality improvement. Explores contribution of operations research and quality management to improve delivery and production of health services and business processes from the perspective of health care managers.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall

### HAP 690 - Independent Study
Credits: 1-3 (RD)
In-depth studies of selected area of health science theory, research, or practice under direction of faculty.

Notes: May be repeated for a maximum of 3 credits.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0

HAP 700 - Introduction to Health Informatics

Credits: 3 (NR)
Introduces the study of data and information flow in healthcare delivery. Covers the history and evolution of methods in information management and the role and contributions of an inter-disciplinary health informatics workforce.

Corequisite(s): HAP 678 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

HAP 701 - Health Data: Vocabulary and Standards

Credits: 3 (NR)
Explores the challenges of representing health care data using standardized vocabulary in health information systems. Topics include data standards and semantics, policy, and theory and practice of standardization.

Corequisite(s): HAP 678, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

HAP 702 - Managerial Accounting in Health Care

Credits: 3 (NR)
Practical examination of controllership function in health care organizations and systems (profit and nonprofit), with emphasis on policy formulation and evaluation of performance, including cost methods and systems; measurement criteria; and managerial planning, methods, and techniques.

Prerequisite(s): Graduate-level statistics course.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HAP 703 - Financial Management in Health Systems
Examines tools and methods of financial management in health care organizations and systems, with emphasis on allocation and use of funds. Analyzes costs and constraints of alternative source of funds, and applies financial decision instruments and effect on operational management and market value of entity.

**Prerequisite(s):** Graduate-level statistics course.

**HAP 704 - Contemporary Issues in Health Systems Management**

Credits: 3 (NR)

Analyzes management theory and practice from recently evolving works that identify, analyze, and resolve strategic organizational problems and issues in health care systems. Applies leadership strategy to effectively manage variety of critical issues, including organizational development, change management, human relations and diversity, quality management for organizational and clinical effectiveness, technology, competing priorities, conflicting constituencies, delivery system redesign, and health services research.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**HAP 705 - Strategic Management and Marketing in Health Care**

Credits: 3 (NR)

Explores role of strategic management and marketing in healthcare organizations and process used to formulate, implement, and evaluate cross-functional decisions to achieve their objectives. Reviews formulation of strategic plans to address strengths, weakness, opportunities and threats facing organizations from both external and internal environments. Considers type of environmental forecasts and competitor intelligence healthcare organizations need to make timely and adaptive strategic and marketing decisions. Addresses conditions necessary for successful strategic execution.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**HAP 706 - Integrated Health Systems Management**

Credits: 3 (NR)

Explores emerging structures for financing and delivery of comprehensive health services in integrated health systems. Covers successful development and management of alliances, provider hospital organizations, and managed care systems with emphasis on strategies for vertical integration, community partnering, contract negotiation, governance, and management of antitrust situations.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0
HAP 709 - Health Care Databases

Credits: 3 (NR)
Introduces design and use of health and medical databases, providing hands-on experience. Explores uses of medical record systems. Includes review and analysis of databases and database management systems. Examines application of databases to clinical and managerial transaction.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HAP 710 - Inferential Statistics in Health Services Research and Management

Credits: 3 (NR)
Introduction and practical application of advanced statistical analyses and their use/application in health services (research, management, policy analysis) using various software applications (STATA, Microsoft Excel and Access, SAS, SPSS, MINITAB). Topics include analysis of variance (one and two way) and design of experiments, multiple regression, model building, chi-square and the analysis of contingency tables, and nonparametric statistics.

Prerequisite(s): Graduate-level statistics course.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 1

HAP 712 - Topics in Public Policy

Credits: 3 (NR)
Presents selected topics current in public policy related to health care and health care administration.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HAP 713 - Project Management in Health Information Technology

Credits: 3 (NR)
Applies body of knowledge in project management to the implementation of information technology and systems in healthcare organizations. Examines how tasks such as needs assessment, project planning, project cost analysis, risk management, and management of personnel are readily included in the use of health information systems.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

When Offered: Spring

HAP 714 - Ethical Issues in Health Administration and Policy
Credits: 3 (NR)
Seeks to explore selected ethical issues in health administration and policy and decision options by understanding ethical theories, concepts, and principles and their role and selective application in the development, organization, and administration of health policy, as well as the organization and delivery of health services. Students will learn specific ethical concepts, theories, and principles, how these inform existing health policies and practices, and how ethical reasoning can operate in the policy process and administrative decisions in the health delivery systems.

Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0

**HAP 715 - Health Economics**

Credits: 3 (NR)
Emphasizes understanding of economic efficiency in the U.S. health system. Microeconomic methods examine markets and resources in health care. Health care examined as commodity. Explores demand for health and medical care services, provider behavior, and function and behavior of insurance markets. Topics include government role, financing arrangements, insurance reform, rationing, price regulation, and provider competition.

Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0

**HAP 720 - Health Data Integration**

Credits: 3 (NR)
Students learn to manipulate large databases, create link table queries, write SQL application programs, understand sources of data conflicts, and identify methods of integrating ODBC databases with legacy data. Covers data warehousing, methods of analyzing large databases, including Bayesian belief networks and machine learning in health care context. Features semester long data integration group project.

Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0

**HAP 727 - Program Evaluations in Health Care**

Credits: 3 (NR)
Methods of evaluating health and social programs, including anthropological case studies, decision analytic and quasi-experimental approaches. Emphasis is placed on using methods of continuous quality improvement and benchmarking exchanges in evaluating multisite programs. Assess cost effectiveness of programs (including assessment of patient census, employee activities and program outcomes). Evaluation of health care interventions, rate setting, and managed care are discussed.

Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0

**HAP 730 - Health Care Decision Analysis**
Students analyze practice patterns and find optimal methods of improving them. Uses decision analysis and failure mode analysis in health care settings. Students integrate scientific evidence, patients' preferences, and experts' opinions to identify optimal alternatives.

Prerequisite(s): Graduate-level statistics course.

**HAP 735 - Fundamentals of Patient Safety and Risk Management**

Credits: 3 (NR)

Students build and interpret causal model of risks and test the accuracy of them against extant incidence reports using risk analysis models, risk analysis life cycle, as well as methods of evaluating the validity and reliability of risk analysis. Bayesian probability models, probabilistic risk analysis, root-cause analysis, and failure model analysis are covered. Includes applications to terrorism, unauthorized disclosures, and patient safety.

Prerequisite(s): HAP 730 or equivalent approved by instructor.

**HAP 740 - Management of Health Information Systems**

Credits: 3 (NR)

Introduces health and medical information systems with emphasis on systems analysis and design to support managerial and clinical communications and decision making. Explores trends and innovations in information technology and systems, focusing on managerial oversight of health and medical information systems. Explores contemporary management strategies for information systems personnel.

**HAP 745 - Health Care Security Policy**

Credits: 3 (NR)

Focuses on health security and privacy policy and compliance issues. Students will develop policies for the type of threats faced by facilities. The legal and business policies for facility, personnel, travel, information, and patient security will be discussed.

**HAP 746 - Health Policy Leadership**
Credits: 3 (RD)
Identifies and assesses critical leadership skills in many areas of health policy making necessary for health care professionals.
Teaches individuals how to link health issues with policy development and pursue appropriate strategies.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**HAP 750 - Legal Issues in Health Administration**

Credits: 3 (NR)
Prepares health professionals to understand legal principles, statutes, regulations, and case law related to managing health care organizations and health professionals' practice. May compare legal health care issues from domestic and international perspectives.

Equivalent to HHS 750 (2010-2011 catalog)

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Spring

**HAP 752 - Advanced Health Information Systems**

Credits: 3 (NR)
Provides in-depth analyses of the challenges of supporting clinical providers across all settings through information integration in electronic health records (EHR). Analyzes architectural trends, workflow redesign, and implementation strategies. Attention is given to life cycle management strategies for health information systems. Laboratory time provides learning experience in various allied situations.

**Prerequisite(s):** HAP 709, or permission by the instructor or Program Coordinator.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall

**HAP 755 - Analysis of Causality in Health Services Research**

Credits: 3 (NR)
Covers philosophical and statistical problems with analysis of causes as separate and distinct from associations. Topics discussed include structural modeling, self selection, risk adjustment, propensity scoring, and Bayesian networks. Students examine real health care databases and the pitfalls of causal inferences. Special attention is made to investigation of causes of outbreaks and illness.

**Prerequisite(s):** Graduate-level statistics course.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0
HAP 760 - Philosophy of Science in Health Services Research

Credits: 3 (NR)
An introductory course on the theory and philosophy of science and humanism that relate to the design and conduct of health services research. The course examines selected theories on the nature of reality (ontology), the justification of knowledge claims (epistemology), and how knowledge is constructed (methodology) in design and analysis of health services research.

Prerequisite(s): Admission to a doctoral program or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HAP 762 - Cost-Effectiveness for Health Care Management and Policy Decisions

Credits: 3 (NR)
A survey course in health services research methods for the application of economic evaluation techniques used in health care policy analysis and clinical or administrative applications for health care service planning and evaluation. Introduces methods applied to health care technology assessment, medical decision making, health resource allocation, and policy-making.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HAP 764 - Health Policy and Government Payment Systems for Health Care Services

Credits: 3 (NR)
Examines the rationale for government intervention in provider payment and explores the current policy issues and politics of major government provider payment systems, including Medicare and Medicaid, and examines options for managing these programs more effectively. The course will "follow the money" as it flows through government and provider payment systems, model potential changes in such systems, and identify policies for improving the operation of these programs and payment systems.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HAP 765 - Methods for Health Policy Analysis

Credits: 3 (NR)
Explores conceptual, analytic, and technical methods/approaches used in health policy analysis and planning. Students will learn to select from among alternative methods for applied concept modeling, graphical data presentation, needs assessment, goal clarification, group decision methods, and a variety of quantitative applications and frameworks for evaluating policy impact.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
HAP 766 - Policy Implementation and Health System Management Dilemmas

Credits: 3 (NR)
Analyzes selected public policies and regulations and the impact of implementation and compliance/noncompliance on health care systems and organizations. Examines management responsibilities, challenges, and dilemmas (fiduciary and ethical) of implementing selected policies and regulations (promulgated or proposed).

Prerequisite(s): HAP 703 or equivalent, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HAP 770 - Medical Decision Making and Decision Support Systems

Credits: 3 (NR)
Introduces the complex subject of medical decision making. Examines systematic approaches to decision making. Explores principles governing the design, application, and maintenance of clinical decision support systems. Laboratory time provides learning experience in various applied situations.

Prerequisite(s): HAP 701 or permission of instructor.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 1
When Offered: Spring

HAP 775 - Implementing Health Reform in Health Service Organizations

Credits: 3 (NR)
Prepares health professionals to understand, lead, and manage health service organizations undergoing payment reform, evolving quality and outcomes reporting requirements, process redesign challenges, culture change, and a changing regulatory environment.

Prerequisite(s): HAP 678.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring

HAP 780 - Data Mining in Health Care

Credits: 3 (NR)
An introductory course to data mining and knowledge discovery in health care. Methods for mining health care databases and synthesizing task-oriented knowledge from computer data and prior knowledge are emphasized. Topics include fundamental concepts of datamining, data preprocessing, classification and prediction (decision trees, attributional rules, Bayesian networks),
constructive induction, cluster and association analysis, knowledge representation and visualization, and an overview of practical tools for discovering knowledge from medical data. These topics are illustrated by examples of practical applications in health care.

Prerequisite(s): Graduate-level statistics course.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HAP 783 - Quantitative Analysis for Healthcare Executive Decision Making

Credits: 3 (NR)
This advanced course in executive decision making in healthcare organizations challenges students to demonstrate the application of quantitative skills and critical thinking to the resolution of complex case studies.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

HAP 789 - Pre-Capstone Professional Development Seminar

Credits: 1 (NR)
Provides students with guidance and preparation for engaging in the capstone practicum.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0
Grading: Satisfactory/No Credit
When Offered: Fall, Spring

HAP 790 - Capstone Practicum in Health Systems Management

Credits: 3 (NR)
Field practicum in health systems management where students function as an integral member of an organizational entity to complete a non-thesis project while continuing to build skills in leadership, critical thinking and systematic problem analysis.

Prerequisite(s): All coursework in the major. Practicum hours required in addition to class meetings. Permission of instructor required.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 2
When Offered: Fall, Spring, Summer

HAP 791 - Practicum in Public Health
The practicum provides students with an in-depth supervised experience in an approved public health organization. The practicum will require students to complete a project related to an actual public health issue that is a focus within the organization.

**Prerequisite(s):** Students must complete all of the core MPH coursework (epidemiology, biostatistics, health education, environmental health, and public health administration) and pass the MPH comprehensive exam with a 70% or better.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall, Spring, Summer

### HAP 792 - Practicum in Health Policy

Credits: 3 (NR)  
The practicum provides students with an in-depth supervised experience in an approved health policy related organization. The practicum will require students to complete a project related to an actual public health policy issue that is a focus within the organization.

**Notes:** Students must complete all the core MSHMP coursework prior to registering for HAP 792. Only students enrolled in the MSHMP concentration in Health Policy program may register. Proposal of practicum experience and selection of practicum location and preceptor must be determined one semester prior to taking the practicum.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall, Summer, Spring.

### HAP 799 - Master's Thesis

Credits: 1-6 (RD)  
Provides students with skills to develop their research proposal, conduct their research, and complete their thesis in a relevant field of study.

**Prerequisite(s):** Admission to one of the master’s programs in the department and permission of instructor.

**Hours of Lecture or Seminar per week:** 1-6  
**Hours of Lab or Studio per week:** 0  
**Grading:** Satisfactory/No Credit only  
**When Offered:** Fall, Spring, Summer

### HAP 820 - Analytic Models in Health Services Management, Policy, and Research

Credits: 3 (NR)  
An advanced statistics course in applied linear and multiple regression analysis, including polynomial regression, indicator variables and covariance analysis, model selection and validation, methods for measurement errors, diagnostic methods for outliers, influence and multicollinearity, nonlinear regression, logistic regression with non-normal distributions, correlations, and time-series analysis and forecasting as used in health services administration research and policy analysis.
Prerequisite(s): HAP 710 or equivalent graduate statistics course.

HAP 821 - Analysis of Categorical Data in Health Policy and Administration

Credits: 3 (NR)
An advanced statistics course in analysis of categorical data. Topics include tests and measures of association for contingency table analysis, including chi-square, odds ratio, relative risk, comparative trials, analysis of categorical data with matched samples, log-linear models, and logistic regression. Econometric models involving categorical variables could also be covered.

Prerequisite(s): HAP 710 or equivalent graduate statistics course.

HAP 822 - Research Designs and Analysis in Pharmaceutical and Health-Related Clinical Trials

Credits: 3 (NR)
A survey course that introduces students to the design and management of clinical trials research and pharmaceutical research and development, including drug development and FDA drug approval. This course also covers a variety of biostatistical methods as they apply to biomedical and biotechnology industry research with human subjects.

Prerequisite(s): HAP 710 or equivalent graduate statistics course.

HAP 866 - Politics of Influencing Health Care Policy

Credits: 3 (NR)
Focuses on process of formulating health care policy and analyzing implications for nursing, administration in nursing, and education and nursing service. Examines current and impending health issues, legislative process, and program implementation evaluation.

HAP 868 - Advanced Research Seminar in Health Policy Analysis
Seminar on advanced research methods that analyzes theoretical and analytic foundations to critique health services research and health policy analysis. Students synthesize, integrate, and apply theoretical knowledge and advanced skills relevant to health services research, policy analysis, and program evolution.

**Prerequisite(s):** HAP 703 or equivalent or permission of instructor.

**Notes:** Limited to doctoral students having completed core courses in statistics and research design, or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**Health and Human Services (HHS)**

Offered by the Health and Human Services

---

**HHS 432 - Healthy Aging**

Credits: 3 (NR)  
Offers a broad perspective of normal aging in the older adult, and the impact of chronic disease and psychosocial and cultural factors on the aging process.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall

---

**HHS 480 - Research Internship in Health and Human Services**

Credits: 3 (NR)  
The student works as a member of a team engaged in health and human services research and attends a bi-weekly research seminar. Under direction of the course seminar leader and the faculty research mentor, the student will acquire selected research skills and develop introductory research writing and presentation skills.

Equivalent to SOCW 480, HAP 480.

**Prerequisite(s):** Open only to CHHS majors or students who have completed CHHS minor or certificate courses.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 1  
**When Offered:** Spring

---

**HHS 597 - Approaches to Quantitative Data Analysis in Health Care Research**

Credits: 3 (NR)  
Examine univariate and bivariate statistical procedures appropriate for analyzing quantitative health care research data. Includes
selecting, applying, and interpreting data analysis procedures.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HHS 648 - Aging and Health

Credits: 3 (NR)
Provides an overview of normal aging and explores factors that affect health and well being in older adults; demonstrates strategies for maintaining health and managing chronic illness in older adults; examines common misconceptions about aging and healthcare issues; and explores the process of normal aging and the presentation of common health conditions in older adults.

Equivalent to NURS 648

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

HHS 830 - The Scholarship of Writing

Credits: 3 (NR)
Boyer’s framework for scholarship shapes the presentation of theory related to writing for scholarship. Students apply research in composition to inform writing for a variety of scholarly purposes, including overall conceptualization of research papers and proposals, writing for publication, and writing for scientific, creative, quantitative, and qualitative research. Seminar and intensive writing.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

Health Education (HEAL)

Offered by the College of Education and Human Development

HEAL 110 - Personal Health

Credits: 3 (NR)
Focuses on individual health improvement by studying mental/emotional well-being, fitness, nutrition, drug abuse prevention, consumerism, safety and other topics.

Notes: One section of HEAL 110 will be dedicated as Distance Education while remaining sections will be traditional classroom, 100% face-to-face.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring
HEAL 205 - Principles of Accident Causation and Prevention

Credits: 4 (NR)
Investigates safety-related problems. Emphasizes fire, home, occupational, and vehicle safety; identification, care, and treatment of various medical emergencies; and violence and property crime prevention.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 1

HEAL 220 - Dimensions of Mental Health

Credits: 3 (NR)
Focuses on integrating behavioral and sociocultural factors in studying mental health.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HEAL 230 - Introduction to Health Behavior

Credits: 3 (NR)
Introduces health behavior in context of health psychology. Explores various theoretical models to understand health, illness and sick-role behaviors. Studies health and disease from a biopsychosocial perspective. Examines means of preventing and treating health problems.

Fulfills general education requirement in social and behavioral science.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HEAL 310 - Drugs and Health

Credits: 3 (NR)
Analyzes drug use, with emphasis on positive aspects, and presents alternatives to drug misuse and abuse.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HEAL 312 - Health and Wellness Choices

Credits: 3 (NR)
Actively involves students in becoming managers of their personal health and well-being throughout life span. Consistent with Healthy People 2000 goals for nation. Emphasizes lifestyle activity and fitness, behavioral change, and maintenance.
Notes: May be taken by nonmajors.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HEAL 314 - Community Health Issues and Strategies

Credits: 3 (NR)
Explores health promotion and disease prevention issues in a range of community health settings: schools, colleges, governmental agencies, municipal organizations, private sector workplaces, community service groups, and health care centers. Issue exploration will be global, national, and local levels.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HEAL 323 - Program Leadership and Evaluation

Credits: 3 (NR)
Covers leadership and evaluation of health, fitness, and recreation programs. Uses computer technology to study evaluative aspects of program planning and administration.

Prerequisite(s): PRLS 310 or permission of instructor Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HEAL 325 - Health Aspects of Human Sexuality

Credits: 3 (NR)
Covers biological, behavioral, and sociocultural factors in human sexual behavior.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HEAL 327 - Women's Health

Credits: 3 (NR)
Examines health issues unique to women, including health care, food and exercise, reproductive and gynecological issues, chronic diseases, and issues of violence.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
HEAL 330 - Nutrition

Credits: 3 (NR)
Assesses dietary habits and patterns in relation to nutrient requirements. Emphasizes weight control, diet and fitness, and current nutritional controversies.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HEAL 331 - Men's Health

Credits: 3 (NR)
Examines socio-cultural influences on men's development and expression of health beliefs and practices. Explores health issues specific to men. Analyzes research literature on interventions to improve men's health.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring

HEAL 350 - Interventions for Populations and Communities at Risk

Credits: 3 (NR)
Identifies culturally, physically, emotionally, mentally, and demographically diverse populations and communities at risk. Covers implications for developing innovative programs and role of HFRR interventions.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HEAL 351 - Relationship Health

Credits: 3 (NR)

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

HEAL 370 - Health Determinants and Status

Credits: 3 (NR)
Focuses on determining person's health status and health behavior change strategies. Covers skills acquisition in health-risk appraisal, screening, and related instruction.
HEAL 372 - Health Communication

Credits: 3 (NR)
Applies research-based models and theories of health assessment and promotion at individual, organizational, agency, and community levels. Uses communication approaches and skills in context of behavior change strategies, including policy and program development.

HEAL 402 - Introduction to Driver Education Instruction

Credits: 3 (NR)
Introduces vehicle operator's tasks in highway transportation system. Provides essential knowledge and skills to instruct driver education.

HEAL 403 - Driver Education Practice and Administration

Credits: 3 (NR)
Applies driver education to simulated and actual driving environments. Provides essential knowledge and skills to administrate driver education.

HEAL 405 - Teaching Methods in Health Education (K-12)

Credits: 3 (NR)
Covers content, methodology, and resource materials in teaching health education for physical education teaching majors.

Prerequisite(s): BSED status or permission of instructor

Notes: Field experience required.
HEAL 430 - Seminar in Exercise Science and Health Promotion

Credits: 3 (NR)
Provides overview of contemporary and often controversial health issues with analysis of selected problems of current concern to society.

Equivalent to KINE 330.

Prerequisite(s): 90 hours.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HEAL 450 - Epidemiology and Environmental Health

Credits: 3 (NR)
Covers incidence, distribution, and causes of diseases and injuries in human populations. Emphasizes essential diagnostics and planning for community health problem-solving with environmental consideration.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 1

HEAL 470 - Community Health Systems

Credits: 3 (NR)
Examines complexities of community health and community health system infrastructure. Focuses on planning and navigating multi system agency environment, including population and subpopulation health.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HEAL 480 - Special Topics

Credits: 1-3 (RD)
Presents selected health issues or problems. Focuses on applying information to education programs.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0

HEAL 490 - Internship

Credits: 12 (NR)
Provides directed experience in observing and participating in health promotion and exercise science programs at community agencies, health care centers, and private sector organizations.
HEAL 499 - Independent Study in Health Education

Credits: 1-3 (NR)
Studies problem area in health education research, theory, or practice under faculty direction.

Prerequisite(s): 90 credits or permission of instructor

Notes: May be repeated, but no more than 3 credits may be earned.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0

HEAL 516 - Program Development and Resources in Health Education

Credits: 3 (NR)
Open to licensed and provisionally licensed health and physical education teachers in the commonwealth of Virginia and students in ASTL physical education program. Focuses on program development, health content, methodology, and resources for teaching preK-12 health education.

Notes: Distance learning course.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

Hebrew (HEBR)

Offered by the College of Humanities and Social Sciences

HEBR 101 - Elementary Hebrew I

Credits: 3 (NR)
Designed for students with no knowledge of Hebrew. Introduction including grammar, vocabulary, oral skills, listening comprehension, and reading.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 1
HEBR 102 - Elementary Hebrew II

Credits: 3 (NR)
Continuation of HEBR 101.

Prerequisite(s): HEBR 101 or equivalent.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HEBR 150 - Introduction to Biblical Hebrew

Credits: 3 (NR)
Introduces basic vocabulary, grammar, and development of reading skills with introduction to religion and culture of ancient Israel that produced the Hebrew Bible/Old Testament.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HEBR 160 - Readings in Biblical Hebrew

Credits: 3 (NR)
Continuation of HEBR 150 to increase students' proficiency in vocabulary and understanding of morphology and syntax. Selected passages from Hebrew Bible read; students introduced to text formation and analysis.

Prerequisite(s): HEBR 150 or equivalent.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HEBR 201 - Intermediate Hebrew I

Credits: 3 (NR)
Further development of skills acquired in HEBR 101 and 102, including grammar, oral expression, listening comprehension, reading, and writing.

Prerequisite(s): HEBR 102 or equivalent.

Notes: Lab work required.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 1
HEBR 202 - Intermediate Hebrew II

Credits: 3 (NR)
Continuation of HEBR 201.

Prerequisite(s): HEBR 201 or equivalent.

Notes: Lab work required.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 1

History (HIST)

Offered by the College of Humanities and Social Sciences

HIST 100 - History of Western Civilization

Credits: 3 (NR)
History of Western civilization from ancient Mediterranean origins through medieval and modern development of Europe to contemporary world.

Fulfills general education requirement in western civilization/world history.

Notes: Students who take HIST 100 may not receive credit for HIST 101 or HIST 102.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HIST 101 - Foundations of Western Civilization

Credits: 3 (NR)
Evolution of Western culture from ancient Mediterranean world to formation of modern Europe in 17th century.

Notes: Students may not receive credit for HIST 101 if they have taken HIST 100.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HIST 102 - Development of Western Civilization

Credits: 3 (NR)
History of Western institutions and ideas from 17th century to the present.

Notes: Students may not receive credit for HIST 102 if they have taken HIST 100.
HIST 121 - Formation of the American Republic

Credits: 3 (NR)
Social, political, economic, and intellectual growth of American institutions from colonization through Reconstruction.

Fulfills general education requirement in social and behavioral science.

Notes: Students may not receive credit for HIST 121 if they have taken HIST 120.

HIST 122 - Development of Modern America

Credits: 3 (NR)
History of the United States since 1877.

Fulfills general education requirement in social and behavioral science.

Notes: Students may not receive credit for HIST 122 if they have taken HIST 120.

HIST 125 - Introduction to World History

Credits: 3 (NR)
Analytical approach to world history overview that surveys major features of principal existing civilizations of world, as originally formed and as altered by key global processes including forces of modernity.

Fulfills general education requirement in western civilization/world history.

HIST 130 - History of the Modern Global System

Credits: 3 (NR)
Provides understanding of processes that have shaped modern world. Beginning in 1500, traces developments that reorganized peoples, reshaped cultures, and generated new economies in interaction between Western and non-Western societies. Focuses on
Western and non-Western regions of world, and their participation in global networks resulting from mercantile expansion, industrial revolution, imperialism, nationalism, and legacies in postcolonial period.

Fulfills general education requirement in global understanding.

Notes: Fulfills the college requirement in non-Western culture.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HIST 200 - Freshman/Sophomore Seminar in U.S. History

Credits: 3 (NR)
Focuses on skills, methods of learning, and subject matter to introduce discipline of history.

Prerequisite(s): Freshman or sophomore standing.

Notes: Topics vary.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HIST 201 - Freshman/Sophomore Seminar in European History

Credits: 3 (NR)
Focuses on skills, methods of learning, and subject matter to introduce discipline of history.

Prerequisite(s): Freshman or sophomore standing.

Notes: Topics vary.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HIST 202 - Freshman/Sophomore Seminar in Global History

Credits: 3 (NR)
Focuses on skills, methods of learning, and subject matter to introduce discipline of history.

Prerequisite(s): Freshman or sophomore standing.

Notes: Topics vary.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
HIST 251 - Survey of East Asian History

Credits: 3 (NR)
Surveys history of China and Japan from prehistoric times to ca. 1600.

Fulfills general education requirement in global understanding.

Notes: Fulfills the college requirement in non-Western culture.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HIST 252 - Survey of East Asian History

Credits: 3 (NR)
Surveys history of China and Japan from early modern times (ca. 1600) to present.

Fulfills general education requirement in global understanding.

Notes: Fulfills the college requirement in non-Western culture.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HIST 261 - Survey of African History

Credits: 3 (NR)
Focuses on the sub-Saharan region and examines evolving systems of kinship power, spirituality, and slavery. Explores the interactions between Africans and global influences from the religions of the book and colonialism to the politics of development and continuities and changes in production. HIST 261 surveys African history from the earliest times to 1800. HIST 262 surveys African history from 1800 to the present.

Fulfills general education requirement in global understanding.

Notes: Fulfills the college requirement in non-Western culture.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HIST 262 - Survey of African History

Credits: 3 (NR)
Focuses on the sub-Saharan region and examines evolving systems of kinship power, spirituality, and slavery. Explores the interactions between Africans and global influences from the religions of the book and colonialism to the politics of development and continuities and changes in production. HIST 261 surveys African history from the earliest times to 1800. HIST 262 surveys African history from 1800 to the present.
HIST 271 - Survey of Latin American History

Credits: 3 (NR)
Surveys colonial era to 1825. Emphasizes interactions of United States, Latin America.

Fulfills general education requirement in global understanding.

Notes: Fulfills the college requirement in non-Western culture.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HIST 272 - Survey of Latin American History

Credits: 3 (NR)
Surveys development of independent Latin America since 1825. Emphasizes interactions of United States, Latin America.

Fulfills general education requirement in global understanding.

Notes: Fulfills the college requirement in non-Western culture.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HIST 281 - Survey of Middle Eastern Civilization

Credits: 3 (NR)
Survey of Middle Eastern history from rise of Islam to present, emphasizing processes that led to emergence of economic, cultural, social, and political institutions that characterize region today. Surveys period from rise of Islam in 570 to medieval period (ca. 1258)

Fulfills general education requirement in global understanding.

Notes: Fulfills the college requirement in non-Western culture.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HIST 282 - Survey of Middle Eastern Civilization
Survey of Middle Eastern history from rise of Islam to present, emphasizing processes that led to emergence of economic, cultural, social, and political institutions that characterize region today. Surveys medieval period to present.

Fulfills general education requirement in global understanding.

Notes: Fulfills the college requirement in non-Western culture.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HIST 298 - History and the Web

Credits: 1 (NR)
Introduces techniques and methods of creating historical web sites. Overview of historical resources on web, including Internet archives, hypertext scholarly articles, and online exhibits. Examines new narrative and interpretive possibilities for doing history.

Notes: Combines lecture, lab.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0

HIST 299 - Databases for Historians

Credits: 1 (NR)
Introduces techniques and methods to create historical databases. Overview of web, CD-ROM, and personal databases helpful for historical research. Examines database as electronic archive and interpretive and analytical tool.

Notes: Combines lecture and lab.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0

HIST 300 - Introduction to Historical Method

Credits: 3 (NR)
Introduces research skills and methods, as well as historical interpretation, culminating in written and oral presentations.

Fulfills general education requirement in synthesis.

Fulfills writing intensive requirement in the major.

Prerequisite(s): History majors with 30 credits or permission of instructor.

Notes: Topics vary according to instructor. History majors strongly urged to take HIST 300 early in their program of upper-level courses. Grade of C or better is required to graduate with BA in history.
HIST 301 - Classical Greece

Credits: 3 (NR)
Political, social, economic, and cultural history of classical Greece from development of the city-state through 5th century.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HIST 302 - Classical Rome

Credits: 3 (NR)
Political, social, economic, and cultural history of classical Rome from founding of the city through fall of Roman republic.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HIST 304 - Western Europe in the Middle Ages

Credits: 3 (NR)
Survey of development of European society from collapse of Roman rule in 5th century to advent of Black Death in 14th century. Emphasizes political, social, cultural, and intellectual growth of society that developed from Roman, Catholic, and Germanic roots.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HIST 305 - The Renaissance

Credits: 3 (NR)
Survey considering Renaissance as phenomenon rather than chronological period. Emphasizes growth of humanism in Italy in 14th and 15th centuries, development of new political concepts, and laicization of society. Includes transmission of these developments to transalpine Europe in late 15th and 16th centuries.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HIST 306 - The Reformation
Late medieval ecclesiastical conditions and reform movements, late scholasticism, Protestant Reformation, Catholic Reformation, dynastic rivalries, and religious wars. Concludes with Peace of Westphalia.

**HIST 307 - Old Regime and Revolutionary Europe**

Credits: 3 (NR)
Political, social, economic, and cultural history of Europe from 1648 to 1815. Crisis of authority, consolidation of the state, absolutism, colonial expansion, the Scientific Revolution and the Enlightenment, and the French Revolution and Napoleon.

**HIST 308 - Nineteenth-Century Europe**

Credits: 3 (NR)
History of Europe from Congress of Vienna to outbreak of World War I.

**HIST 309 - Europe in Crisis: 1914-1948**

Credits: 3 (NR)
Two world wars, the Great Depression, and political and cultural revolutions transformed Europe as never before. Explores causes and consequences of these tumultuous events, and concludes with consideration of reconstruction that caps period.

Prerequisite(s): 45 credits or permission of instructor.

**HIST 312 - Nationalism in Eastern Europe**

Credits: 3 (NR)
Examines history of modern Eastern Europe from mid-19th century through collapse of communist regimes in 1989, and includes focus on Yugoslav wars of 1990s. Nationalism provides organizing theme; topic approached through literature, political, social, cultural, and new media sources. Class sessions emphasize discussion of central issues and sources.
HIST 314 - History of Germany

Credits: 3 (NR)
Political, diplomatic, economic, social, and cultural development of Germany from dissolution of Holy Roman Empire to present.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HIST 322 - Modern Britain

Credits: 3 (NR)
History of Britain from mid-18th century to present. Focuses on social, political, and economic transformations of industrialization; culture of 19th-century industrial society; problems of late 19th-century economic competition and imperialism; creation of welfare state; and experience of post-World War II political, social, and economic realignments.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HIST 327 - The Soviet Union and Russia Since World War II

Credits: 3 (NR)
Analyzes the Soviet Union, the Cold War "enemy" of the United States, from victory in World War II under Joseph Stalin through collapse in 1991. Studies the fifteen independent countries that emerged from the Soviet collapse, including Russia, the Baltic States, Ukraine, Belarus, Moldova, Central Asia, and the Caucasus, which continue to influence world politics and culture today.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HIST 328 - Rise of Russia

Credits: 3 (NR)
Political, social, and cultural development of Russia from early times to the end of the 19th century.

Fulfills general education requirement in global understanding.

Notes: Fulfills the college requirement in non-Western culture.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HIST 329 - Modern Russia and the Soviet Union
HIST 331 - Postwar United States, 1945-1973

Credits: 3 (NR)
Examines political, cultural, and economic history in the three decades after 1945. Themes include the emergence of the civil rights movement and feminism; the domestic and international events of the Cold War, especially the Vietnam War; and the rise and fall of the presidency's prestige in the years of the Great Society and Watergate.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HIST 332 - United States since 1973

Credits: 3 (NR)
Examines political, cultural, and economic history since the end of the Vietnam War. Themes include the shifting political economy of the country during the resurgence of conservatism, the political debates over culture and identity, and the waning of the Cold War and its replacement with other international concerns.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HIST 333 - The Automobile in the United States

Credits: 3 (NR)
Examines the biography of one of the most important characters in twentieth-century U.S. history: the automobile. Embraces the histories of business, policy, labor, the environment, technology, and culture, and seeks a holistic understanding of the role of the car in American life.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HIST 335 - The African American Experience in the United States: African Background to 1885

Credits: 3 (NR)
Russia and the Soviet Union from the early 20th century to the present. Focuses on the Russian Revolution and the political, social, cultural, and economic developments of the Soviet and post-Soviet eras.

Fulfills general education requirement in global understanding.

Notes: Fulfills the college requirement in non-Western culture.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
Credits: 3 (NR)
History of African American experience in United States including African origins; trans-Atlantic slave trade; development of slavery in colonial, revolutionary, and antebellum periods; abolitionist movements; and African American participation in Civil War and during Reconstruction.

Prerequisite(s): 6 credits of history, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HIST 336 - The African American Experience in the United States: Reconstruction to the Present

Credits: 3 (NR)
History of African American life in post-slavery America, and rise and consequences of racial segregation in 19th and 20th centuries. Examines African American response to continued racial inequality and repression. Covers great migration, urbanization, black nationalism, and civil rights era, as well as contemporary debates about race.

Prerequisite(s): 6 credits of history or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HIST 337 - Race and Gender in American Sports

Credits: 3 (NR)
Examines how ideas about race and gender have affected sports in America from late 19th century to the 1980s. Will also consider how athletes and sporting activities have shaped American racial and gender paradigms.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HIST 338 - History of College Athletics

Credits: 3 (NR)
Examines America's unique blend of higher education and sports from 1870s to modern collaborations between college athletic programs and America's media outlets.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HIST 339 - History of Baseball
Credits: 3 (NR)
Examines development of baseball in U.S. context of labor, intellectual, economic and political events including racial segregation.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HIST 341 - History of Sport in the United States

Credits: 3 (NR)
Examines the roots of American sport in colonial play and recreation, the emergence of organized and national sports, issues of gender and race in the sporting world, and the intersection of U.S. sport with events such as the Civil Rights Movement and the Cold War.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HIST 350 - U.S. Women's History

Credits: 3 (NR)
History of women and their changing status and gender roles in American society from colonial period through "second wave" of feminism in 1970s. Explores images and lives of women of different class, ethnic, and regional origins. Also focuses on women's political, economic, and legal conditions, and changes in them.

Prerequisite(s): 45 credits or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HIST 351 - History of the Old South

Credits: 3 (NR)
History of South to outbreak of Civil War, with particular emphasis on rise of sectionalism. Focuses on development of distinct Southern culture through emergence of economic, political, social, agricultural, and intellectual institutions.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HIST 352 - The South since 1865

Credits: 3 (NR)
History of South during Reconstruction, Redeemer era, and New South, with particular emphasis on race relations. Covers political, economic, cultural, and intellectual development from aftermath of war.
HIST 353 - History of Traditional China

Credits: 3 (NR)
China from earliest times to period of modern Western intrusion. Development of traditional Chinese culture, society, and government.

Prerequisite(s): 6 credits of history or permission of instructor.

Notes: Fulfills the college requirement in non-Western culture.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HIST 354 - Modern China

Credits: 3 (NR)
China from 1644 to the People's Republic of China. Emphasizes coming of West and various stages of Chinese reaction.

Prerequisite(s): 6 credits of history or permission of instructor

Notes: Fulfills the college requirement in non-Western culture.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HIST 356 - Modern Japan

Credits: 3 (NR)
Japan from Meiji Restoration to World War II. Emphasizes Japan's modernization in face of challenge.

Fulfills general education requirement in global understanding.

Notes: Fulfills the college requirement in non-Western culture.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HIST 357 - Postwar Japan

Credits: 3 (NR)
History of Japan from World War II to present. Examines Japanese experience of several key moments: Japan's defeat in Pacific
War, reconstruction during U.S. occupation, rise to economic prominence during 1960s and 1970s, and cultural and international identity crisis during 1980s and 1990s.

**Prerequisite(s):** 45 credits or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**HIST 358 - Post-1949 China**

Credits: 3 (NR)  
Puts People's Republic of CHINA (PRC) into historical context by assessing legacies of China's socialist revolution (1949-1976) and post-socialist reforms (1978-present). Explores revolutionary heritage of the Chinese Communist Party, goals and agendas of China's socialist state, ideologies and policies shaping urban and rural development, individual agency and responses to revolutionary mass mobilization and market reforms.

Fulfills general education requirement in global understanding.

**Prerequisite(s):** 6 credits of history or permission of instructor

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**HIST 360 - History of South Africa**

Credits: 3 (NR)  
Explores the historical processes that led to the rise of African kingdoms, colonialism, industrialization, resistance movements, and legalized segregation.

Fulfills general education requirement in global understanding.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall, Spring, Summer

---

**HIST 364 - Revolution and Radical Politics in Latin America**

Credits: 3 (NR)  
During 20th century, Latin America has witnessed both peaceful political movements and violent revolutions aimed at achieving social justice. Considers several of these movements in comparative perspective: Mexican Revolution, Arbenz government in Guatemala, Allende regime in Chile, Cuban and Nicaraguan revolutions, and Brazilian Worker's Party.

Fulfills general education requirement in global understanding.

**Prerequisite(s):** 6 credits of history or permission of instructor.
HIST 365 - Conquest and Colonization in Latin America

Credits: 3 (NR)
Examines forms of conquest and colonization practiced by Aztec, Inca, Spanish, and Portuguese in what is now Latin America. Includes role of ideology and religion in imperial rule, use of warfare to create empires and colonies, and implementation of political and economic systems to rule subject people.

Fulfills general education requirement in global understanding.

Prerequisite(s): 45 credits or permission of instructor.

Notes: Fulfills the college requirement in non-Western culture.

HIST 366 - Comparative Slavery

Credits: 3 (NR)
Examines systems of slavery from ancient world to modern world, with special emphasis on Atlantic slave trade and slave societies in Latin America and Anglo America. Considers impact of slaves and slavery on cultural, economic, and political systems in Africa and Americas from 16th to 19th centuries.

Prerequisite(s): 45 credits or permission of instructor.

Notes: Fulfills the college requirement in non-Western culture.

HIST 367 - History, Fiction, and Film in Latin America

Credits: 3 (NR)
Explores modern Latin American history through different types of texts: scholarly histories, historical novels, fictional films, documentary films, and oral history. Explores ways these texts produce knowledge about the past. What motivates different approaches? What counts as evidence? How do we know what really happened? How do we decide what mattered and what did not? Also introduces several important episodes in 20th century Latin American history.

Notes: Fulfills the college requirement in non-Western culture.
HIST 370 - War and American Society

Credits: 3 (NR)
Examines war and American society from the colonial period to the post-Cold War era, including how military institutions, war, and the preparation for war have affected American society, and how Americans have thought about military service, experience war, and made peace through their history. Special emphasis on civil-military relations and the role of war and militarism in American culture.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HIST 373 - The Civil War and Reconstruction

Credits: 3 (NR)
Analyzes the history of the American Civil War from its origins in the late 18th century to the withdrawal of federal troops from the south in 1877. Examines the political, social, and economic issues that led to war; the home fronts, war leadership, diplomacy, combat motivation, and grand strategy; problems associated with reconstituting the nation's political institutions; and the integration of millions of newly freed slaves.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HIST 377 - The Vietnam War

Credits: 3 (NR)
Covers the causes, major events, and legacies of America's Vietnam War, including an introduction to Vietnamese history and culture, American decisions for war, strategy and major military engagements, diplomacy and peace talks, and the aftermath of the conflict in Vietnam and United States.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HIST 386 - Topics in History

Credits: 3-6 (RT)
Study of historical topics of special interest.

Notes: Topics announced in advance. May be repeated for credit when topic is different.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HIST 387 - Topics in Global History
Credits: 3-6 (RT)
Study of historical topics or periods of special interest in global, Latin American, African, Asian, or Middle Eastern history.

Fulfills general education requirement in global understanding.

Notes: Topics announced in advance. May be repeated for credit when topic is different. Fulfills the college requirement in non-Western culture.

Hours of Lecture or Seminar per week: 3-6
Hours of Lab or Studio per week: 0

**HIST 388 - Topics in European History**

Credits: 3 (RT)
Study of historical topics or periods of special interest.

Notes: Topics announced in advance. May be repeated for credit when topic is different.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**HIST 389 - Topics in U.S. History**

Credits: 3 (RT)
Study of historical topics or periods of special interest.

Notes: Topics announced in advance. May be repeated for credit when topic is different.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**HIST 390 - The Digital Past**

Credits: 3 (NR)
Teaches the fundamentals of information technology within the context of a history course. Students learn fundamentals and skills as well as how our society became so enamored of and dependent on these knowledge and information tools. Understanding a new technology requires understanding how new technologies transform the societies that embrace them. Emphasizes the use of free and open-source software whenever possible.

Fulfills general education requirement in information technology (all).

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**HIST 391 - History of Virginia to 1800**
Credits: 3 (NR)
Discovery and settlement of Virginia. Colonial period with emphasis on development of representative government and race relations, Golden Age of Virginia dynasty, and coming of Civil War.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**HIST 392 - History of Virginia Since 1800**

Credits: 3 (NR)
Decision to secede, Civil War and Reconstruction, Readjustors and Populism, disfranchisement and Constitution of 1902, and rise of Senator Harry F. Byrd. Recent developments.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**HIST 393 - Topics in Film and History**

Credits: 3 (RT)
Study of historical periods or topics from perspective of feature films and documentaries.

**Notes:** Topics available in advance from the department. May be repeated for a maximum of 6 credits when topic is different. A maximum of 6 credits may be applied to the BA in history.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**HIST 398 - Historical Study Abroad**

Credits: 1-6 (RD)
Intended for participation in formally organized course offered by Center for Global Education during intersession or spring break.

**Notes:** May be repeated for a maximum of 6 credits with permission of department.

**Hours of Lecture or Seminar per week:** 1-6  
**Hours of Lab or Studio per week:** 0

**HIST 399 - Internship**

Credits: 1-9 (RD)
Approved work-study programs in cooperation with specific organizations including area museums; archives; historic sites; and local, state, and federal agencies.
HIST 401 - Colonial America

Credits: 3 (NR)
Intensive study of colonial American history from European origins through Revolutionary War.

HIST 403 - Revolutionary Era in American History, 1763-1812

Credits: 3 (NR)
Study of formative years of new republic from Treaty of Paris of 1783 to election of 1820.

HIST 404 - Jacksonian America, 1812-1854

Credits: 3 (NR)
Study of age of Andrew Jackson. Emphasizes democratic institutions that emerged as dominant influences in American society.

HIST 426 - The Russian Revolution

Credits: 3 (NR)
Era of revolutionary activity from 19th century to end of 1920s, with emphasis on Russian Revolutions of 1917. Explores why revolutionary situation developed; political, social, and cultural issues at stake; why it took various forms; and revolution's contribution to nature of Soviet state and post-Soviet problems.

Prerequisite(s): 45 credits or permission of instructor.

Notes: Fulfills the college requirement in non-Western culture.
HIST 431 - Medieval Intellectual Topics

Credits: 3 (NR)
Selected topics in intellectual history of Middle Ages. Topics vary, depending on discipline of instructor.

Equivalent to ENGH 421/FRLN 431, ENGL 431 (2010-2011 Catalog)

Notes: May be taken for credit by English or history majors.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HIST 435 - Society and Culture in Early Modern Europe

Credits: 3 (NR)
Examines social and cultural lives of Europeans from end of Middle Ages to Industrial Revolution. Emphasizes popular and elite culture, as well as bridges and interrelationships between them. Focuses on religious, artistic, literary, and recreational behavior. Covers political activity and riots, strikes, royal receptions, and rituals.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HIST 436 - European Society and Culture: 19th and 20th Centuries

Credits: 3 (NR)
Examines major cultural trends in Europe since French Revolution. Major themes include romanticism; socialism; Marxism; and social effect of modernization, science, and societies.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HIST 455 - History of Print Journalism

Credits: 3 (NR)
Development of print journalism from inception to present, with emphasis on interaction of technology, audience, and government intervention. Topics include birth of press; development of modern newspaper and American development, including Revolutionary and Civil wars; rise of independent press; and yellow journalism.

Equivalent to COMM 455

Prerequisite(s): 3 credits in COMM or HIST courses.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
HIST 460 - Modern Iran

Credits: 3 (NR)
Modern Iran, from 1800 to present, in context of several broad themes: institutional structure of state; role of great powers in Iran and Iranian response to economic, military, technological, and ideological challenge posed by West; interaction of religion and other ideologies and politics; economic development and impact on politics and society; and ways historians have sought to understand and interpret modern Iranian history.

Fulfills general education requirement in global understanding.

Prerequisite(s): 45 credits or permission of instructor.

Notes: Fulfills the college requirement in non-Western culture.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HIST 461 - Arab-Israeli Conflict

Credits: 3 (NR)
Overview of history of Arab-Israeli conflict. Examines conflict from various perspectives: over land and between competing nationalisms and identities; in terms of national interests of various states, including Israelis and Palestinians as well as other Arab governments and great powers; and in terms of peace making and conflict resolution. Some knowledge of history of Middle East since World War I strongly advised.

Prerequisite(s): 45 credits or permission of instructor.

Notes: Fulfills the college requirement in non-Western culture.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HIST 462 - Women in Islamic Society

Credits: 3 (NR)
Surveys history of women in Islamic society from rise of Islam to present day. Examines historical processes that affected role and status of women in society, and specific topics around which issues of gender status and identity coalesced, especially in modern period.

Fulfills general education requirement in global understanding.

Prerequisite(s): 6 credits of history or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
HIST 465 - The Middle East in the 20th Century

Credits: 3 (NR)
Political, social, and cultural history of Middle East since World War I. Emergence of Israel, Arab nationalism, and political and economic influence of Middle East in world affairs.

Prerequisite(s): 6 credits of history or permission of instructor.

Notes: Fulfills the college requirement in non-Western culture.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HIST 466 - Origins of Conflict in Southern Africa

Credits: 3 (NR)
Explores historical origins of conflict in South Africa, focusing on themes of economic change, cultural interaction, and political consolidation during past five centuries.

Notes: Fulfills the college requirement in non-Western culture.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HIST 480 - Alexander the Great

Credits: 3 (NR)
Rise of Persia, Persian wars with Greece, subjugation of Greece by Philip II of Macedonia, and Alexander the Great and his conquest of Persian empire.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HIST 490 - Honors Directed Readings, Honors Directed Research

Credits: 3 (NR)
Students must have completed at least one course in the field, or with the professor, chosen for these honors courses.

Prerequisite(s): Admission to history honors program and permission of instructor

Notes: The 3 reading credits should be taken before 3 research credits, though they may be taken concurrently. Either may be taken concurrently with HIST 499. Linked, individualized courses, usually given by same instructor. Involves directed readings.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
HIST 491 - Honors Directed Readings, Honors Directed Research

Credits: 3 (NR)
Students must have completed at least one course in the field, or with the professor, chosen for these honors courses.

Prerequisite(s): Admission to history honors program and permission of instructor

Notes: The 3 reading credits should be taken before 3 research credits, though they may be taken concurrently. Either may be taken concurrently with HIST 499. Linked, individualized courses, usually given by same instructor. Culminates in research paper related to subject of readings.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HIST 498 - Directed Readings/Research in History

Credits: 1-3 (RT)
Readings, research conducted on individual basis in consultation with instructor.

Prerequisite(s): History majors with 90 credits and permission of instructor.

Notes: May be repeated for a maximum of 6 credits. Only 3 credits may be applied to credits for degree.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0

HIST 499 - Senior Seminar in History

Credits: 3 (NR)
Research on specialized historical topic culminating in seminar paper and oral presentation. Synthesis course; students expected to integrate knowledge and skills acquired in general education courses.

Fulfills general education requirement in synthesis.

Fulfills writing intensive requirement in the major.

Designated as a research and scholarship intensive course.

Prerequisite(s): History majors with 90 credits, ENGL 302/ENGH 302, HIST 300, and completion or concurrent enrollment in all university general education courses.

Notes: Subject determined by instructor. Student may present no more than 3 credits for graduation credit. Must receive passing grade to graduate with BA in history.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring
HIST 510 - Approaches to Modern World History

Credits: 3 (NR)
Introduces historical study of world beyond Europe and United States. Students read major theoretical works and case studies of particular regions. Examines imperialism, national identity, and various forms of popular resistance; familiarizes students with range of scholarly approaches, including world systems theory and subaltern studies.

Prerequisite(s): Admission to graduate program in history.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HIST 523 - Issues in American History

Credits: 1-3 (RT)
Reading, analysis of selected problems.

Notes: Open to advanced undergraduates and graduates. Topic determined by instructor. May be repeated for credit when content differs.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0

HIST 524 - Issues in European History

Credits: 3 (RT)
Reading, analysis of selected problems.

Notes: Open to advanced undergraduates and graduates. Topic determined by instructor. May be repeated for credit when topic is different.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HIST 525 - Problems in Latin American History

Credits: 3 (RT)
Analysis of selected problems. Emphasizes reading and discussion of historical interpretations, and development of bibliography.

Notes: May be repeated for credit when topic is different.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
HIST 535 - Problems in Comparative World History

Credits: 3 (RT)
Investigates selected problems in global and comparative history, covering multiple countries or world regions.

Notes: May be repeated for credit when topic is different.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HIST 555 - Problems in Asian History

Credits: 3 (RT)
Discussion of readings and historical interpretations and compilation of a comprehensive bibliography on given theme.

Notes: Topics announced by instructor. May be repeated for credit when topic is different.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HIST 565 - Problems in African History

Credits: 3 (RT)
Analysis of selected problems in African history. Emphasis on reading and discussion of historical interpretations and development of bibliography.

Notes: May be repeated for credit when topic is different.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HIST 575 - Approaches to Middle East and Islamic History

Credits: 3 (NR)
Introduces students to the central issues and debates surrounding the study of the Middle East, Islam, and Muslim societies. Covers key methodological issues including the role of area studies vis-à-vis disciplinary approaches and debates on the politics of knowledge production and historiography.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HIST 585 - Problems in Middle Eastern History
Credits: 3 (RT)
Analyzes selected problem. Emphasizes reading and discussion of historical interpretations, and development of bibliography.

Notes: May be repeated for credit when topic is different.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HIST 598 - Historical Study Abroad

Credits: 1-3 (RT)
Intended for participation in formally organized course offered by the Center for Global Education.

Notes: May be repeated for a maximum of 6 credits.

Hours of Lecture or Seminar per week: 1-4
Hours of Lab or Studio per week: 0

HIST 601 - Themes in U.S. History I

Credits: 3 (NR)
Survey of U.S. History prior to 1877. Designed for individuals entering the graduate program who need to strengthen preparation in area, or who seek to enhance knowledge of latest interpretations in field. Stresses factual knowledge and its interpretation.

Prerequisite(s): Graduate standing.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HIST 602 - Themes in U.S. History II

Credits: 3 (NR)
Continuation of HIST 601.

Prerequisite(s): Graduate standing.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HIST 605 - Themes in European History I

Credits: 3 (NR)
Survey of European history from 1500 to 1815. Designed for individuals entering graduate program who need to strengthen preparation in this area, or who seek to enhance knowledge of latest interpretations in field. Stresses factual knowledge and its
interpretation.

**Prerequisite(s):** Graduate standing.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**HIST 606 - Themes in European History II**

Credits: 3 (NR)  
Survey of European history from 1815 to present. Designed for individuals entering graduate program who need to strengthen preparation in this area, or who seek to enhance knowledge of latest interpretations in field. Stresses factual knowledge and its interpretation.

**Prerequisite(s):** Graduate standing.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**HIST 610 - The Study and Writing of History**

Credits: 3 (NR)  
Methodology of the historian including techniques of research, use of documentation and other sources, development of bibliography, and synthesis of material.

**Prerequisite(s):** Graduate standing.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**HIST 613 - The Colonial Origins of American Society**

Credits: 3 (NR)  
Study of evolution of elements in colonial society that affect contemporary American institutions and patterns of behavior.

**Prerequisite(s):** Graduate standing.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**HIST 615 - Problems in American History**

Credits: 1-6 (RT)  
Readings and discussion of bibliographies, interpretations, and research trends in topics selected by instructor.
Prerequisite(s): Graduate standing.

Notes: May be repeated for credit when topic is different.

Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 0

**HIST 616 - U.S. Westward Movement**

Credits: 3 (NR)
Investigates continuity and change in American West. Topics include economic development, ethnicity, rural and urban life, and role of federal government.

Prerequisite(s): Graduate standing.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**HIST 617 - Topics in the American Civil War Era**

Credits: 3 (NR)
Joint project of instructor and students into various aspects of common topic in Civil War era, with emphasis on historiography and historical method.

Prerequisite(s): Graduate standing.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**HIST 618 - The Age of Jackson, 1815-1854**

Credits: 3 (NR)
Survey of social, cultural, intellectual, economic, and political changes in United States during period of rapid growth and expansion. Topics include second-party system; growth of sectionalism, nationalism, and expansionism; industrialization and spread of market economy; rise of romantic reform and evangelical religion; and growth of abolitionist and proslavery movements.

Prerequisite(s): Graduate standing.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**HIST 619 - The Constitution, Civil Liberties, and the Supreme Court**
Credits: 3 (NR)
Investigates evolution of civil liberties in American history, and interaction of three branches of government in applying various constitutional guarantees. Students read extensively in Supreme Court decisions and secondary literature, and undertake independent research.

Prerequisite(s): Graduate standing.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HIST 620 - Development of the Early Republic, 1783-1815

Credits: 3 (NR)
Investigates breakdown of Confederation, Constitutional Convention, and role of revolutionary ideology of republicanism. Discusses leadership and policies of republic in hostile international context. Students read extensively in monographic literature and prepare research paper.

Prerequisite(s): Graduate standing.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HIST 621 - Virginia and the American Revolution

Credits: 3 (NR)
Detailed examination of Virginia society on eve of American Revolution, and role in events from 1750 to 1789. Combines lectures, discussion of major themes, ideas, and personalities.

Prerequisite(s): Graduate standing.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HIST 623 - Recent U.S. History, 1945 to Present

Credits: 3 (NR)
Selected political, social, economic, diplomatic, and cultural forces that shaped the post-World War II American experience.

Prerequisite(s): Graduate standing.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HIST 624 - U.S. Diplomatic History
Study of selected issues in American foreign relations and changing historical interpretations of American diplomacy.

Prerequisite(s): Graduate standing.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**HIST 626 - Approaches to American Culture**

Credits: 3 (NR)
Focuses on various approaches historians have taken to history of American culture: questions they asked, assumptions they made, disciplinary tools they used, and types of materials they analyzed. Concentrates on patterns of culture, and what they say about American past and present.

Prerequisite(s): Graduate standing.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**HIST 628 - Immigration and Ethnicity in the United States**

Credits: 3 (NR)
Examines immigration and ethnicity in America since 1840. Considers why immigrants came, from where, under what circumstances, and how they adapted. Examines immigration policy and American attitudes toward immigration and ethnicity.

Prerequisite(s): Graduate standing.

Notes: Conducted as readings colloquium.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**HIST 629 - The Gilded Age and Progressive Era**

Credits: 3 (NR)
Examines history of United States from 1877 to 1918, with attention to history of reform movements and politics, and social history of the period. Familiarizes with major issues and historical literature of the period.

Prerequisite(s): Graduate standing.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**HIST 630 - U.S. Women's History**
Wide-ranging survey of burgeoning field of women's history, emphasizing critical evaluation of sources and interpretation. Readings represent variety of approaches, which may include material culture studies, medical history, history of sexuality, political history, and social and cultural history.

Prerequisite(s): Graduate standing.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HIST 631 - Era of the American Revolution

Credits: 3 (NR)
Examines history and historiography of revolutionary era, with special emphasis on social and ideological interpretations of period. Includes events leading to War for Independence, war itself, and social and political effects of war on American society.

Prerequisite(s): Graduate standing.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HIST 633 - Reconstruction

Credits: 3 (NR)
Examines panoply of political, social, economic, and constitutional concerns from 1863 to 1880, as North and South struggled over outcome of Civil War. Addresses political institutions and power in postwar North and South, and place of former slaves in society, politics, and economy.

Prerequisite(s): Graduate standing.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HIST 634 - Interwar America: 1918-1939

Credits: 3 (NR)
Considers issues of United States between the two world wars. Explores various ways issues complemented and contradicted each other in rich and complex historical era.

Prerequisite(s): Graduate standing.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HIST 635 - Problems in European History
Credits: 3 (RT)
Investigates selected problems. Readings, discussions, development of bibliographies. Primary sources used where possible.

Prerequisite(s): Graduate standing.

Notes: May be repeated for credit when topic is different.

Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 0

HIST 636 - Political Culture in Twentieth-Century Germany and Austria: Continuities and Discontinuities

Credits: 3 (NR)
Recent interpretations of key political events of 20th century. Asks if there were fundamental continuities in structure of German and Austrian society that can be observed throughout the period under review.

Prerequisite(s): Baccalaureate degree in history or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HIST 637 - Great Britain: Empire to Commonwealth, 1870-1970

Credits: 3 (NR)
Examines rise of "new imperialism" in Great Britain from 1870 to end of empire, and gradual formation of Commonwealth of Nations.

Prerequisite(s): Graduate standing.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HIST 638 - Western Europe in the Post-War Period

Credits: 3 (NR)
Examines process of reconstruction, reconciliation, and integration in Western Europe in 20 years after World War II.

Prerequisite(s): Graduate standing.

Notes: Conducted as readings colloquium.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
HIST 639 - Society and Politics in Western Europe, 1750-1914

Credits: 3 (NR)
Focuses on changes in social conditions and ramifications in political life. Attention to urbanization of workers, changes in peasantry, growth of middle classes, decline of nobility, and major political developments and expansion of liberal reforms.

Prerequisite(s): Graduate standing.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HIST 640 - Metropolitan Cities of Europe in the Nineteenth and Twentieth Centuries

Credits: 3 (NR)
Studies individual cities, and investigates particular cities in depth. Considers economic, social, cultural, and political features of urban life.

Prerequisite(s): Graduate standing.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HIST 642 - Humanism and the Renaissance

Credits: 3 (NR)
The Renaissance as a unique period in European cultural history from ca. 1350 to 1520. Concentrates on Italian situation as standard, with consideration given to manifestations of Renaissance in northern Europe, especially Germany, until Reformation. Focuses on recent studies of political, social, intellectual, and religious changes. Students write class reports and a larger bibliographic paper.

Prerequisite(s): Graduate standing.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HIST 643 - Religion and Society in the Reformation Era

Credits: 3 (NR)
The Reformation, ca. 1500 to 1650, was a time of major religious, intellectual, social, and political upheaval in European history. Investigates reasons for changes, and effects on European society. First half focuses on Germany, but major events throughout Europe are studied.

Prerequisite(s): Graduate standing.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
HIST 644 - Society and Culture in Early Modern Europe

Credits: 3 (NR)
Overview of most recent historical work on social and cultural history of premodern West, ca. 1400 to 1800. Uses theoretical approaches and empirical methodologies of other disciplines, especially social anthropology, sociology, and literary theory, to shed new light on popular culture, class, manners, taste, rituals, religion, language, gender, and the state. Formulates new topics of research and poses new questions, and suggests new approach to more traditional topics such as politics, religion, and ideas.

Prerequisite(s): Graduate standing.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HIST 645 - The Russian Revolution and the Origins of the Soviet State

Credits: 3 (NR)
Period between 1890 and 1924 with concentration on sources of Bolshevism, problems of old regime as they led to revolutions of 1905 and 1917, and establishment of new regime and its survival in environment of foreign and civil war.

Prerequisite(s): Graduate standing.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HIST 670 - Introduction to Behavioral History

Credits: 3 (NR)
Analyzes and investigates the historical origins and development of contemporary behaviors and values, with particular emphasis on how these behaviors and values, as well as our perceptions of them, have changed over time and place.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HIST 675 - Problems in Military History

Credits: 3 (RD)
Readings and discussion of bibliographies, interpretations, and research trends in military history topics selected by the instructor.

Prerequisite(s): Graduate standing or permission of instructor.

Notes: May be repeated once when topic is different.
HIST 677 - The Vietnam War

Credits: 3 (NR)
Considers the causes, major events, and historiographic debates of America’s Vietnam War including the war’s antecedents in Vietnamese history, American decisions for war, strategy and major military engagements, the American antiwar movement, and diplomacy and peace talks.

Prerequisite(s): Graduate standing or permission of instructor.

HIST 679 - War and Remembrance

Credits: 3 (NR)
Considers various approaches to the study of public or collective memory as it pertains to war, in particular how people around the world have constructed memories of war and how those memories have been expressed in literature, popular culture, memorials, and commemorative activities.

Prerequisite(s): Graduate standing or permission of instructor.

HIST 689 - Teaching and Learning History in the Digital Age

Credits: 3 (NR)
Examines what happens when instructors integrate new media technology into history classroom. Includes consideration of learning theory, new media theory, and an in-depth examination of state-of-the-art in practice. In the final third of semester, students produce practicum that is either working history teaching web site or concept paper for site, depending on student's degree of technical sophistication. No prior facility with information technology required. Course appropriate for graduate students working as teachers or planning career in teaching.

Prerequisite(s): Graduate standing.

HIST 690 - The Administration of Archives and Manuscripts
Credits: 3 (NR)
Introduces principles and practices of managing records and administering archival and manuscript collections, public and private. Designed for graduate students with special interest in historical sources as well as for those specializing in applied history.

Prerequisite(s): 6 credits of U.S. history, or permission of department. Graduate standing.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HIST 691 - Museum Studies

Credits: 3 (NR)
General introduction to museums of history and museum studies in the United States, intended for interested citizen as well as for assistance to students in course and career choices. Explores development, present state, and future possibilities of U.S. Museums, with some reference to international developments.

Prerequisite(s): 6 credits of U.S. history or permission of department. Graduate standing.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HIST 692 - Historical Editing

Credits: 3 (NR)
Introduces fundamentals of historical editing of documents, including microform, word processing, and computer techniques. Designed for those seeking introduction to various areas of applied history, and those intending to edit historical documents for publication.

Prerequisite(s): Graduate standing.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HIST 693 - Historic Preservation

Credits: 3 (NR)
General introduction to historic preservation in the United States, intended for interested citizen and to assist students in course and career choices. Explores development, present state, and future possibilities of historic preservation in the United States, with some reference to international aspects of preservation.

Prerequisite(s): Graduate standing and 6 credits of U.S. history or permission of department.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
HIST 695 - History Symposium

Credits: 1-3 (NR)
Subject of academic and community interest pursued through discussions and lectures by distinguished guest instructors.

Prerequisite(s): Graduate standing.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HIST 696 - Clio Wired: An Introduction to History and New Media

Credits: 3 (NR)
Students with limited computer competency should consult department before enrolling. Introduces changes that new media and technologies are bringing to how we research, write, present, and teach about the past. Students explore theoretical and historical issues as well as learn hands-on skills in digital history.

Prerequisite(s): Graduate standing.

Notes: Students with limited computer competency should consult with department before enrolling.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HIST 697 - Creating History in New Media

Credits: 3 (NR)
Seminar; students create original historical projects in digital media.

Prerequisite(s): HIST 696 or permission of instructor. Graduate standing.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HIST 698 - Advanced Topics in History and New Media

Credits: 3 (NR)
Advanced topics in history and new media not covered in HIST 696, 697. Covers a range of topics at the frontiers of using new media to enable and enhance historical practice and research and will involve in-depth analysis of theoretical frameworks and pragmatic concerns related to the use of specific digital technologies.

Prerequisite(s): HIST 696, 697, or literacy in new media.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
**HIST 711 - Research Seminar in U.S. History**

Credits: 3 (RT)
Research in specialized topics using primary sources.

**Prerequisite(s):** Admission to MA in history, PhD in cultural studies, or a degree in the Higher Education Program and HIST 610 or permission of department.

**Notes:** May be repeated for a maximum of 6 credits.

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0

**HIST 731 - Research Seminar in European History**

Credits: 3 (RT)
Research in specialized topics using primary sources.

**Prerequisite(s):** Admission to MA in history, PhD in cultural studies, or a degree in the Higher Education Program and HIST 610 or permission of department.

**Notes:** May be repeated for a maximum of 6 credits.

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0

**HIST 751 - Research Seminar in Comparative World History**

Credits: 3 (NR)
Research seminar requiring comparative research and analysis. Organized around significant topic or theme in field of world history.

**Prerequisite(s):** HIST 610 or permission of department.

**Notes:** Topics vary from year to year. Maximum 6 credits may be earned.

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0

**HIST 790 - Comprehensive Readings in U.S. History**

Credits: 3 (NR)
Integrates past work in major field and fills gaps before comprehensive exam. After a review of graduate experience, student and instructor design reading list to round out preparation for exam.

**Notes:** To be taken in final semester of program.
HIST 791 - Comprehensive Readings in Comparative World History

Credits: 3 (NR)
Integrates past work in major field and fills gaps before comprehensive exam. After a review of graduate course work, student and instructor design reading list to round out preparation for exam.

Notes: To be taken in final semester of program.

HIST 792 - Comprehensive Readings in European History Since 1500

Credits: 3 (NR)
Integrates past work in major field and fills gaps before comprehensive exam. After review of graduate experience, student and instructor design reading list to round out preparation for exam.

Notes: To be taken in final semester of program.

HIST 794 - Internship in Applied History

Credits: 3-6 (RD)
All internship placements must be approved by the department to ensure suitability to student's program. Introduces applied history through work and study at historical museum, site, library archive, editing project, or other approved agency.

Prerequisite(s): Admission to graduate program in history and 3 hours of applied history.

Notes: May be repeated for a maximum of 6 credits.

HIST 795 - Practicum in Digital History

Credits: 3 (RD)
Exposes students to various projects in digital history through work and study at the Center for History and New Media. All
placements must be approved by CHNM to ensure the suitability of students and projects.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**Grading:** Graduate Special

**HIST 796 - Directed Readings**

Credits: 1-6 (RD)  
Independent reading on topic agreed to by student and faculty member.

**Notes:** May be repeated for a maximum of 6 credits.

**Hours of Lecture or Seminar per week:** 1-6  
**Hours of Lab or Studio per week:** 0

**HIST 798 - Directed Research and Writing in History**

Credits: 3 (NR)  
Intended for students in department's predoctoral track who are not writing master's thesis. Goal is to produce substantial and original contribution to historical knowledge on model of article in scholarly journal.

**Prerequisite(s):** Admission to MA program, HIST 610, and research seminar.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**Grading:** Graduate Special

**HIST 799 - Thesis**

Credits: 1-6 (RD)  
Master's thesis research and writing under direction of faculty committee.

**Notes:** May not be taken prior to successful completion of comprehensive exam.

**Hours of Lecture or Seminar per week:** 1-6  
**Hours of Lab or Studio per week:** 0  
**Grading:** S/NC

**HIST 801 - New Developments in History**

Credits: 3 (NR)  
Survey of current developments in historical analysis and methodology.
### Prerequisite(s): Admission to doctoral program.

#### Hours of Lecture or Seminar per week: 3
#### Hours of Lab or Studio per week: 0

#### HIST 802 - Readings for Doctor of Arts in Community College Education

Credits: 1-6 (RT)
Intensive reading of recent scholarship in broad areas of historical study. With advisor, students develop readings list and define at least three areas in which to prepare readings courses.

**Prerequisite(s):** Admission to doctor of arts in community college education program to study history.

**Notes:** May be repeated for credit.

#### Hours of Lecture or Seminar per week: 1-6
#### Hours of Lab or Studio per week: 0

#### HIST 803 - Doctoral Readings for Major Field

Credits: 3 (RT)
Independent readings for PhD students on topic agreed on by student and instructor, taken in preparation for completing major field exam. Should be broadly comprehensive of field, and cover major historical themes and historiographical debates.

**Prerequisite(s):** Admission to doctoral program.

#### Hours of Lecture or Seminar per week: 3
#### Hours of Lab or Studio per week: 0

#### HIST 804 - Doctoral Readings for Minor Field

Credits: 3 (RT)
Independent readings for PhD students on topic agreed on by student and instructor, taken in preparation for completing minor field statement. Designed to help student master literature of subfield that is subject of field statement.

**Prerequisite(s):** Doctoral standing.

#### Hours of Lecture or Seminar per week: 3
#### Hours of Lab or Studio per week: 0

#### HIST 810 - History Doctoral Colloquium

Credits: 1 (NR)
Introduces array of scholars and scholarship through discussions of innovative historical events, important theories, and
significant methodological breakthroughs in history.

**Prerequisite(s):** Doctoral standing.

**Notes:** May be taken for credit 6 times.

**Hours of Lecture or Seminar per week:** 1  
**Hours of Lab or Studio per week:** 0  
**Grading:** S/NC

---

**HIST 811 - Doctoral Research Seminar**

Credits: 3 (NR)  
Students pursue research projects in their areas of specialization.

**Prerequisite(s):** Doctoral standing.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**HIST 998 - Doctoral Dissertation Proposal**

Credits: 1-6 (RD)  
Work on research proposal that forms basis for doctoral dissertation.

**Prerequisite(s):** Advancement to candidacy

**Notes:** May be taken for maximum 6 credits.

**Hours of Lecture or Seminar per week:** 0  
**Hours of Lab or Studio per week:** 0  
**Grading:** S/NC

---

**HIST 999 - Doctoral Dissertation Research**

Credits: 1-12 (RD)  
Doctoral dissertation research and writing under direction of student's dissertation committee.

**Prerequisite(s):** Completion of HIST 998.

**Hours of Lecture or Seminar per week:** 0  
**Hours of Lab or Studio per week:** 0  
**Grading:** S/NC

---

**Honors Program in General Education (HNRS)**
Offered by the College of Humanities and Social Sciences

Only students enrolled in the Honors Program are eligible to take HNRS courses. HNRS 110 must be taken in the first semester.

**HNRS 110 - Research Methods**

Credits: 4 (NR)
Prepares students in humanities and social sciences research practices. Offers students the opportunity to learn about research practices in the natural sciences, mathematics, economics, management, and law. Students learn how to choose and focus a research question, find and analyze sources, organize evidence in an essay shaped by an original thesis, write clearly, and address an audience of scholars.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 1

**HNRS 122 - Reading the Arts**

Credits: 3 (NR)
Explores relationship of parts to whole in artworks, connections among different art forms, and links between art and its historical context.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**HNRS 130 - Conceptions of Self**

Credits: 3 (NR)
Drawing from appropriate works in social sciences, arts, and humanities, examines different conceptions and definitions of the self from diverse cultures and historical contexts.

Prerequisite(s): HNRS 110. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**HNRS 131 - Contemporary Society in Multiple Perspectives**

Credits: 3 (NR)
Explores methods and perspectives in social sciences and humanities to evaluate contributions of different disciplines to understanding significant social issues and their global ramifications and our responsibilities as citizens of the world.

Prerequisite(s): HNRS 110. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
HNRS 230 - Cross-Cultural Perspectives

Credits: 3 (NR)
Enables students to broaden cultural horizons and understand human behavior by studying societies in depth and in comparison.

Prerequisite(s): HNRS 110. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HNRS 240 - Reading the Past

Credits: 3 (NR)
Considers constructions of historical narratives by examining significant current topics such as revolution, race, empire, and religion over time. Considers how public narratives about history are constructed.

Prerequisite(s): HNRS 110. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HNRS 353 - Technology in the Contemporary World

Credits: 3 (NR)
Analyzes emergence and impact of specific technologies on contemporary cultures. Explores television, automobile, newspapers, Internet, and computer games from historical, scientific, political, economic, and global perspectives.

Prerequisite(s): Completion or concurrent enrollment in all other required HNRS courses. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HNRS 490 - Undergraduate Apprenticeship

Credits: 1-3 (NR)
Independent work with a faculty mentor on an inquiry-based project involving research, the arts, design, or teaching and mentoring.

Prerequisite(s): 45 credits and acceptance into the Undergraduate Apprenticeship Program.

Notes: This course is open only to undergraduates who have been accepted to the Undergraduate Apprenticeship Program.
Honors Program Sciences (HNRT)

HNRT 125 - A Liberal Arts Approach to Calculus

Credits: 3 (NR)
Assumes understanding of basic algebra and functions. Studies exponential models and develops mathematical concepts of limit and infinity including the topic of derivatives.

Equivalent to HNRS 125 (2010-2011 Catalog)

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

HNRT 225 - Applied Calculus

Credits: 3 (NR)
A second course in the theory and applications of calculus for nonSTEM students. Topics include exponential models in the life sciences and business, and may include improper integrals and infinite series, differential equations, or probabilities.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

HNRT 226 - Topics in Quantitative Analysis

Credits: 3 (NR)
Studies selected topics of special interest to honors students with suitable preparation.

Equivalent to HNRS 226 (2010-2011 Catalog)

Notes: For students who have taken calculus in high school. HNRT 226 is an alternative to HNRT 125

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

HNRT 227 - Scientific Thought and Processes I
Explores and integrates principles of classical and modern science through study of such topics as cosmology, evolution, ecology, mechanics, relativity, and quantum physics.

Equivalent to HNRS 227 (2010-2011 Catalog)

Notes: Includes a weekly lab session.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 3  
**When Offered:** Fall, Spring

### HNRT 228 - Scientific Thought and Processes II

Credits: 4 (NR)

Explores and integrates principles of classical and modern science through study of such topics as cosmology, evolution, ecology, mechanics, relativity, quantum physics, and the environment.  
Designated a Green Leaf Course.

Equivalent to HNRS 228 (2010-2011 Catalog)

Prerequisite(s): HNRT 227

Notes: Includes a weekly lab session.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 3  
**When Offered:** Fall, Spring

### Human Development and Family Science (HDFS)

#### HDFS 200 - Individual and Family Development

Credits: 3 (NR)

Examines how individuals and families function and develop over the lifespan. Uses a multidisciplinary approach to integrate theories of family science and human development emphasizing the role of contextual factors in contemporary families' lives.  
Explores the impact of gender, socioeconomics, race/ethnicity, culture, and immigrant status on human development and family relationships. Introduces a basic model of scientific inquiry and theorizing.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall, Summer, Spring
HDFS 300 - Individual and Family Services Delivery

Credits: 3 (NR)
Overview of human services delivery with a focus on families. Explores the historical and social contexts as well as the theoretical orientations of systems that shape delivery of services to families. Examines: 1) economic and cultural barriers that prevent families from gaining access to services; 2) social policy surrounding services for families; 3) ethical and legal issues in family services.

Prerequisite(s): HDFS 200.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Summer, Spring

HDFS 498 - Internship and Analysis in Human Development and Family Science

Credits: 3 (NR)
First course in a two-course series that supports students in their internship and in transitioning from student to professional. Enables students to discuss work-related experiences within the context of developmental and family theories and research. Fosters and promotes professional development through class and small group discussions, activities, lectures, guest speakers, and practical assignments.

Prerequisite(s): HDFS 300.

Notes: Students will have 135 contact hours for the semester; however, 125 will be in the field and 10 in the classroom.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0
When Offered: Fall, Summer, Spring

HDFS 499 - Advanced Internship & Analysis in Human Development and Family Science

Credits: 3 (NR)
Accompanies the second semester of the required internship experience. Supports students in the development and implementation of a program for staff and/or clients at internship site. Examine internship-related experiences within the context of developmental and family theories and empirical research. Contemplate and prepare for the transition to professional.

Prerequisite(s): HDFS 498.

Notes: Students will have 135 contact hours for the semester; however, 125 will be in the field and 10 in the classroom.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0
When Offered: Fall, Summer, Spring

Information Security and Assurance (ISA)
ISA 522 - Information Security Essentials

Credits: 3 (NR)
Course covers basic concepts and techniques in applied information security. Begins introducing the student to basic concepts of security including confidentiality, integrity, availability, and current concerns of anonymity, privacy and safety of web-based transactions, forensics investigations etc. Also covers the main safeguards available in security such as authentication, authorizations, and network security, and shows how these techniques are applied to the concerns of business, health care, nursing, sociology and law.

Prerequisite(s): An introductory information systems class or permission of instructor.

Notes: This course does not count for MS programs in the Computer Science Department.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ISA 562 - Information Security Theory and Practice

Credits: 3 (NR)
A technical introduction to the theory and practice of information security, which serves as the first security course for the MS-ISA degree, is required as a prerequisite for all subsequent ISA courses (at the 600 and 700 levels) and subsumes most topics covered by the CISSP examination. Also serves as an entry-level course available to non-ISA students, including MS-CS, MS-IS, and MS-SWE students.

Prerequisite(s): INFS 501, 515, 519, and SWE 510, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ISA 563 - Fundamentals of Systems Programming

Credits: 3 (NR)
Introduces systems and network programming for UNIX and Windows using lectures and hands-on labs. Covers ANSI C programming, system libraries and APIs, forking and threads, interprocess communications, synchronization, Windows API, and code debugging.

Prerequisite(s): An intermediate programming language course or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ISA 564 - Security Laboratory
Credits: 3 (NR)
Provides hands-on experience in configuring and experimenting with commodity-networked systems and security software in a live laboratory environment, with the purpose of understanding real-world security threats. Takes both offensive and defensive approaches and exposes students to a variety of real-world attacks, including viruses, worms, rootkits, and botnets. Possible mitigation and defending mechanisms, such as firewalls and intrusion detection software, also covered.

Prerequisite(s): ISA 562.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ISA 650 - Security Policy

Credits: 3 (NR)
Focuses on security policy and its management for information systems having national and international connectivity. Issues include legal, international, cultural, and local factors. Students are expected to participate regularly in presenting material, in discussion of recent security issues, and by writing short papers on major current issues.

Prerequisite(s): ISA 522 or ISA 562.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ISA 652 - Security Audit and Compliance Testing

Credits: 3 (NR)
Presents the fundamental concepts of the IT-security audit and control process that is being conducted in a plethora of environments, including government, the financial industry, and the healthcare industry. The goal of this course is to enable the students to structure and perform audits based on the specifications of Sarbanes-Oxley, HIPAA, and FISMA audit programs. Covers all the CISA certification requirements in depth. Students completing the course are encouraged to attempt the certification exam on their own.

Prerequisite(s): ISA 562 or ISA 522 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ISA 656 - Network Security

Credits: 3 (NR)
An in-depth introduction to the theory and practice of network security. It assumes basic knowledge of cryptography and its applications in modern network protocols. Studies firewalls architectures and virtual private networks and provides deep coverage of widely used network security protocols such as SSL, TLS, SSH, Kerberos, IPSec, IKE, and LDAP. It covers countermeasures to distributed denial of service attacks, security of routing protocols and the Domain Name System, e-mail security and spam countermeasures, wireless security, multicast security, and trust negotiation.

Prerequisite(s): ISA 562 and INFS 612 or CS 555.
ISA 673 - Operating Systems Security

Credits: 3 (NR)
Covers fundamentals and advanced topics in operating system (OS) security, including OS-level security mechanisms and policies in investigating and defending against real-world attacks on computer systems, such as self-propagating worms and large-scale botnets. Basic OS security techniques, such as logging, system call auditing, and memory protection, will be discussed. Recent advanced techniques, such as honeypots and honeyfarms, system randomization, vulnerability fingerprinting, and virtualization, will also be introduced.

Prerequisite(s): CS 571 and ISA 562 or permission of instructor.

ISA 674 - Intrusion Detection

Credits: 3 (NR)
Studies methodologies, techniques, and tools for monitoring events in computer system or network, with the objective of preventing and detecting unwanted process activity and recovering from malicious behavior. Topics include types of threats, host-based and network-based information sources, vulnerability analysis, denial of service, deploying and managing intrusion detection systems, passive versus active responses, and designing recovery solutions.

Prerequisite(s): (ISA 563 or (CS 262 and CS 367)) AND ISA 656.

ISA 681 - Secure Software Design

Credits: 3 (NR)
Theory and practice of software security, focusing in particular on some common software security risks, including buffer overflows, race conditions and random number generation, and the identification of potential threats and vulnerabilities early in the design cycle. Emphasis is on methodologies and tools for identifying and eliminating security vulnerabilities, techniques to prove the absence of vulnerabilities, and ways to avoid security holes in new software and on essential guidelines for building secure software. Explores how to design software with security in mind from the ground up and integrate analysis and risk management throughout the software life cycle.

Equivalent to SWE 781 (2012-2013 Catalog), SWE 681.

Prerequisite(s): SWE 619 or permission of instructor.
ISA 685 - Emerging Topics in Cyber Security

Credits: 3 (NR)
This seminar course provides a student team-based learning experience based on topics selected by leading experts in the area of applications of Information Security Concepts in the real-world scenarios. The (five to six) invited lecturers will lead a discussion followed by two days of project work after each lecture. Teams of students will be assigned to discuss different applications of the concept of discussion. Students develop the critical skills of applying security concepts and analysis to real world scenarios.

Prerequisite(s): Graduate standing in IT&E.

Notes: This course is intended for students in the MS- AIT program. Students in the MS-CS, MS-ISA, MS-INFS and MS-SWE programs cannot use this course for their degree.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

ISA 697 - Topics in Information Security

Credits: 1-6 (RT)
Special topics in information security and assurance not occurring in regular ISA sequence.

Prerequisite(s): Permission of instructor.

Notes: May be repeated for credit when distinct offerings of course differ in subject.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ISA 763 - Security Protocol Analysis

Credits: 3 (NR)
Teaches how to design, understand, verify, and test communication protocols so they meet their objectives of recognizing the basic components of a communication protocol; specifying security properties accurately; modeling actors and mal-actors against which a protocol ought to be secure; discussing verification and testing methods and their limitations by ensuring that the specified protocol satisfies stated security objectives in the presence of specified mal-actions; designing a medium-size protocol that satisfies a specification of requirement; using existing tools to specify and verify security protocols; and testing protocols for satisfying their security objectives.

Prerequisite(s): ISA 650 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
ISA 764 - Security Experimentation

Credits: 3 (NR)
Teaches how to conduct security experimentations and empirically demonstrate, validate, and evaluate security vulnerabilities, exploits, and defense mechanisms. By the end of the course, students will gain a deeper understanding and first-hand experience on capturing packets of interests from both wired and wireless networks, and replying interested network flows and how shellcode various buffer overflows attacks, worms, spyware, rootkits, botnets, anonymous communication and traceback mechanisms work.

Prerequisite(s): ISA 562, ISA 564, ISA 674, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ISA 785 - Research in Digital Forensics

Credits: 3 (NR)
Focuses on research-related aspects of digital forensics including open problems in digital forensics, countermeasures against digital forensics, and fundamental and practical limitations of current digital forensics techniques. Also covers currently established techniques and tools for digital forensics as well as common legal and ethical issues.

Prerequisite(s): ISA 562, CS 571 and CS 555 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ISA 796 - Directed Readings in Information Security

Credits: 3 (RD)

Research and analysis of contemporary problem in information security.

Prerequisite(s): Graduate standing in information security and assurance, with at least 12 prior credits in MS.

Notes: Prior approval required by faculty sponsor who supervises student's work. To register, students must complete independent study form available in department office. It must be initialed by faculty sponsor and approved by department chair. Written report also required. Maximum of 6 credits may be earned.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
Grading: Graduate Special

ISA 797 - Advanced Topics in Information Security
Special advanced topics not occurring in regular ISA sequence.

**Prerequisite(s):** Permission of instructor.

**Notes:** May be repeated for credit when distinct offerings of course differ in subject.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**ISA 798 - Research Project**

Credits: 3 (RD)

Research project chosen under guidance of full-time graduate faculty member, resulting in written technical report.

**Prerequisite(s):** 18 credits applicable toward MS.

**Notes:** Prior approval required by faculty sponsor who supervises student's work. To register, students must complete independent study form available in department office. It must be initialed by faculty sponsor and approved by department chair.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**Grading:** Graduate Special

---

**ISA 799 - Thesis**

Credits: 1-6 (RD)

Original or expository work chosen and completed under supervision of graduate faculty member, which results in technical report accepted by three-member faculty committee. Report must be defended in oral presentation.

**Prerequisite(s):** 18 credits applicable toward MS or permission of instructor.

**Notes:** To register, students must complete independent study form available in department office. It must be initialed by faculty sponsor and approved by department chair.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**Grading:** Satisfactory/No Credit

---

**ISA 862 - Models for Computer Security**

Credits: 3 (RD)

This class will be focused on current research in Security with emphasis in Network and Software Security.
Prerequisite(s): ISA 562.

Notes: May be repeated with change in topic.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

ISA 863 - Advanced Topics in Computer Security

Credits: 3 (RD)
Current topics of advanced research. Content varies depending on faculty interests, research developments, and student demand. Requires substantial student participation. May include formal models for computer security, multilevel data models, multilevel database management system architectures, secure concurrency control protocols, distributed secure system architectures, integrity models and mechanisms, security policy, and requirements analysis.

Prerequisite(s): IT 862 or 865, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

Information Systems (INFS)

Offered by the Volgenau School of Engineering.

Students may attempt an undergraduate course taught by the Volgenau School of Engineering twice. A third attempt requires approval of the department offering the course.

INFS 315 - High-Level Programming Languages

Credits: 3 (NR)
Studies structure and application of high-level languages by stressing design and implementation of data types, data structures, and algorithms. Includes computing lab. Credit does not count toward requirements for major in computer science.

Prerequisite(s): INFS 310 or CS 112.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

INFS 501 - Discrete and Logical Structures for Information Systems

Credits: 3 (NR)
Study of discrete and logical structures for information systems analysis and design including basic set theory and proof techniques, propositional and predicate logic, trees and graphs, finite state machines, formal languages and their relation to
automata, computability and computational complexity, formal semantics-operational, axiomatic and denotational approaches.

Prerequisite(s): 6 credits of undergraduate mathematics.

Notes: Credit cannot be applied to a graduate degree in the Volgenau School or the BS degree in computer science.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

INFS 515 - Computer Organization

Credits: 3 (NR)
Computer hardware architecture concepts including number systems, machine representation of numbers, instruction set formats, addressing techniques, memory organization, internal processor structure and operation. Symbolic assembly language fundamental operating systems concepts: process synchronization and scheduling, interprocess communication, memory management, virtual memory, deadlocks, file I/O and disk management, and LINUX operating system case studies.

Prerequisite(s): Undergraduate courses or equivalent knowledge in structured programming in a high-level language.

Notes: Credit cannot be applied to a graduate degree in the Volgenau School or the BS degree in computer science.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

INFS 519 - Program Design and Data Structures

Credits: 3 (NR)
Study of the fundamentals of data structures and algorithms applied in programming solutions to application problems. The course stresses programming in a modern high-level language. Laboratory required.

Prerequisite(s): Undergraduate courses or equivalent knowledge in structured programming in a high-level language.

Notes: Credit cannot be applied to a graduate degree in the Volgenau School or the BS degree in computer science.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

INFS 524 - Database Management Essentials

Credits: 3 (NR)
Relational database management systems. Covers logical and physical database design; query languages and database programming; and examines commercial systems.

Equivalent to AIT 524
Prerequisite(s): One programming course and six credits of college math.

Notes: Computing lab. This course does not count toward MS programs offered in the Computer Science Department.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**INFS 612 - Principles and Practices of Communication Networks**

Credits: 3 (NR)
Introduces principles of computer networks and applications to Internet. Discusses details of layering, protocols, performance, resource allocation, management, security and other contemporary issues related to networks. Examples of course material are protocols such as HTTP(S), DNS, TCP/IP, RSVP, SNMP, algorithms such as Dijkstra's link state routing; and security measures such as firewalls and encryption, the principles behind them and analysis of performance.

Prerequisite(s): INFS 501, 515, 519, and SWE 510, or equivalent

Notes: No substitutions can be made for this class.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**INFS 614 - Database Management**

Credits: 3 (NR)
Introduces database systems, emphasizing study of database models and languages and practice of database design and programming. Topics include Entity-Relationship model, relational model and its formal query languages, SQL, theory of relational database design, and object-oriented and logic-based databases.

Prerequisite(s): INFS 501, 515, 519, and SWE 510, or equivalent.

Notes: Requires computing lab. No substitutions can be made for this class.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**INFS 622 - Information Systems Analysis and Design**

Credits: 3 (NR)
Integration of computing technologies, systems analysis, system design practices, and management criteria in the design of large-scale information management and decision-support systems. Includes cases, computing lab.

Prerequisite(s): INFS 501, 515, and 519, or equivalent

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
INFS 623 - Web Search Engines and Recommender Systems

Credits: 3 (NR)
Study of Web search engines and recommender systems. Topics to include classical information retrieval methods, Boolean retrieval systems, ranked retrieval, performance metrics, Web crawling, link analysis, overall search engine architecture, fundamentals and classification of recommender systems, learning user interests and object properties, and case studies.

Prerequisite(s): INFS 501, 515, 519, and SWE 510.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

INFS 640 - Introduction to Electronic Commerce

Credits: 3 (NR)
Studies electronic commerce from both managerial and technical perspectives. Topics include e-commerce models and concepts; Internet and web protocols and infrastructure; e-commerce marketing and branding; security protocols and standards; e-commerce payment systems; and case studies of business-to-consumer, business-to-business, consumer-to-consumer, and e-government.

Prerequisite(s): INFS 501, 515, and 519; and SWE 510 or equivalent.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

INFS 697 - Topics in Information Systems

Credits: 1-6 (RD)
Presents special topics in information systems not occurring in regular INFS sequence.

Prerequisite(s): Permission of instructor.

Notes: May be repeated for credit when distinct offerings of course differ in subject.

Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 0

INFS 740 - Database Programming for the World Wide Web

Credits: 3 (NR)
Information systems accessible through web and Internet are becoming prevalent. Course focuses on technologies and industry standards for accessing and manipulating persistent data that are suitable for web applications.

Prerequisite(s): INFS 614.
INFS 755 - Data Mining

Credits: 3 (NR)

Prerequisite(s): STAT 344 or equivalent undergraduate course in probability, INFS 614 or equivalent.

INFS 760 - Advanced Database Management

Credits: 3 (NR)
Study of advanced database models and languages, database design theory, transaction processing, recovery, concurrency, distributed database, and security and integrity. Discusses recent developments and research directions.

Prerequisite(s): INFS 614.

INFS 770 - Knowledge Management for E-Business

Credits: 3 (NR)
Addresses knowledge management (KM) from managerial, technical viewpoints in context of large organizations doing business over web and Internet. Topics include KM life cycle for knowledge creation, aggregation, dissemination, and sharing; ontology modeling, design, and engineering; role of standards such as XML, RDF, web services, and semantic web for e-business; business rules and reasoning engines; and digital rights management for e-business.

Prerequisite(s): INFS 622 or permission of instructor.

INFS 772 - Intelligent Agents and the Semantic Web

Credits: 3 (NR)
Course covers the role of intelligent agents in cooperating to access, harvest, sift and winnow information and knowledge from
the semantic web. Topics include agent architectures, practical reasoning and deductive agents, beliefs-desires-intentions (BDI) framework for agent reasoning, commitments and actions; Semantic Web ontology languages, description logics, reasoning and rule languages; and agent communication languages, protocols and standards.

Prerequisite(s): INFS 614

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

INFS 774 - Enterprise Architecture

Credits: 3 (NR)
This course presents the basic concepts and methodologies for the discipline known as Enterprise IT Architecting within a framework, structure, and methodology. Enterprise IT Architecting is a necessary step for designing and developing a system of information systems. It includes the definition of the business, work, functional, information and technical perspectives. As such, it is the enabling approach for the system development process that builds complex information systems.

Equivalent to IT 874

Prerequisite(s): INFS 622 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

INFS 796 - Directed Readings in Information Systems

Credits: 3 (RT)
Research and analysis of contemporary problem in information system development.

Prerequisite(s): Graduate standing in information systems, with at least 12 prior credits in MS.

Notes: To register, students must complete independent study form available in department office. It must be initialed by faculty sponsor and approved by department chair. Prior approval required by faculty sponsor who supervises student's work. Written report required. Maximum 6 credits may be earned.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

INFS 797 - Advanced Topics in Information Systems

Credits: 1-6 (RD)
Special advanced topics not occurring in regular INFS sequence.

Prerequisite(s): Permission of instructor.

Notes: May be repeated for credit when distinct offerings of course differ in subject.
INFS 798 - Research Project

Credits: 3 (NR)
Research project chosen under guidance of full-time graduate faculty member, resulting in written technical report.

Prerequisite(s): 18 credits applicable toward MS.

Notes: To register, students must complete independent study form available in department office. It must be initialed by faculty sponsor and approved by department chair. Prior approval required by faculty sponsor who supervises student's work.

INFS 799 - Thesis

Credits: 1-6 (RD)
Original or compilary work evaluated by a committee of three faculty members.

Prerequisite(s): 18 credits applicable toward MS

Notes: To register, students must complete independent study form available in department office. It must be initialed by faculty sponsor and approved by department chair.

INFS 861 - Distributed Database Management Systems

Credits: 3 (NR)
Topics include transaction management, concurrency control, deadlocks, replicated database management, query processing reliability, and surveys of commercial systems and research prototypes.

Prerequisite(s): INFS 614 or equivalent.

INFS 867 - Intelligent Databases
Credits: 3 (NR)
Studies models and techniques that empower database systems with intelligent and cooperative behavior, with emphasis on subjects such as knowledge-rich databases, logic databases, epistemological queries, intentional answering, and knowledge discovery. Topics include user interfaces, cooperative query interfaces, interactive query constructors, graphical interfaces, and browsers; uncertainty representing, manipulating, and retrieving uncertain, imprecise, or incomplete information; and formulating and interpreting vague or incomplete queries.

Prerequisite(s): INFS 760, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

Information Technology (IT)

Offered by the Volgenau School of Engineering.

Students may attempt an undergraduate course taught by the Volgenau School of Engineering twice. A third attempt requires approval of the department offering the course.

IT 101 - Introduction to Information Technology

Credits: 3 (NR)
Introduces fundamental concepts underpinning state-of-the-art applications. Topics include quantitative and historical perspectives underlying major information technologies, theoretical background on wide range of information technologies as well as issues surrounding the social, economic, and political contexts in which IT exists. Provides exposure to cutting-edge technologies and trends including wireless multimedia, mobile communications, computer security, digital video and audio, and high-performance computing.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

IT 103 - Introduction to Computing

Credits: 3 (NR)
This course, using both lecture and laboratory practice, introduces students to basic computer concepts in hardware, software, networking, computer security, programming, database, e-commerce, decision support systems, and other emerging technologies such as blogs, wiki, RSS, podcasting, and Google applications. Additional lectures examine social, legal, ethical issues including privacy, intellectual property, health concerns, green computing, and accessibility. Students learn techniques to search, evaluate, validate, and cite information found online. Widely used applications including word processing, spreadsheets, databases, presentation, and web development software are studied.

Fulfills general education requirement in information technology (all).

Prerequisite(s): Knowledge of high school algebra.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 2
IT 106 - Introduction to IT Problem Solving Using Computer Programming

Credits: 3 (NR)
Introduces use of procedural programming as an IT resource for developing solutions to business problems. Emphasizes techniques & practices for design of solutions. Includes use of expressions, scalar data types, control structures as well as use of IDEs for development and debugging.

Prerequisite(s): IT 103 or permission of department. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 1
When Offered: Fall, Spring

IT 198 - Independ Study Informatn Tech

Credits: 1-3 (RD)
Prerequisite(s): Permission of instructor. Individualized section form required.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0

IT 206 - Object Oriented Techniques for IT Problem Solving

Credits: 3 (NR)
This course introduces the use of object-oriented programming as an IT tool for developing solutions to business problems. Emphasizes role and use of classes, methods, and exceptions in creating solutions. Introduces concepts of event-driven programming.

Prerequisite(s): IT 106 and MATH 112; or permission of department. Prerequisite enforced by registration system.

Notes: Students cannot receive credit for both IT 108 and IT 206.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 1
When Offered: Fall, Spring

IT 207 - Applied IT Programming

Credits: 3 (NR)
Building on fundamentals of structured and object-oriented programming, this course covers client and server side scripting languages and an SQL database management system. Students will use open source software tools to develop database-enabled web applications.
Prerequisite(s): IT 103 and IT 206; or permission of department. Prerequisite enforced by registration system.

Corequisite(s): IT 214.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**IT 212 - Computer Hardware Fundamentals**

Credits: 3 (NR)
This course explains the basic principles of how computers work. It provides a comprehensive understanding of the essential components associated with computers with a focus on PCs. Topics include history of computers, the microprocessor, motherboard, memory, graphics and sound adapters, input and output devices, and storage media. An overview of operating systems and other software, as well as the various methods used to connect computers to each other and the Internet, are presented. The course also addresses recent advances in computer architectures and computer hardware and how they affect computer performance. Presentations of actual hardware are included so that students can gain experience in identifying the various internal and external components of a PC.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**IT 213 - Multimedia and Web Design**

Credits: 3 (NR)
Through lecture, class demonstration, class discussion, and hands-on lab experience, introduces multimedia and web computer graphics. Focuses on development of web-enabled multimedia applications from practical business perspective. Introduces and discusses technological, aesthetic, and human factors.

Prerequisite(s): IT 103 or permission of department. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 1

**IT 214 - Database Fundamentals**

Credits: 3 (NR)
Introduces relational database management systems and their applications. Students learn about types of databases, data modeling, designing relational databases, normalization and relationships, and recent trends in database management. Students apply learned concepts using modern database applications to create tables, queries, forms, and reports.

Prerequisite(s): IT 103; or permission of department. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
IT 223 - Information Security Fundamentals

Credits: 3 (NR)
Introduces concept of information security. Discusses need for organizational policy to define required services such as confidentiality, authentication, integrity, nonrepudiation, access control, and availability, and mechanisms to implement those services. Covers different types of security including physical security, computer security, and network security; common threats to and attacks against information systems, including accidental damage, identity theft, malicious software, and "spam"; and defensive measures.

Prerequisite(s): IT 103 or equivalent; or permission of department. Prerequisite enforced by registration system.

Notes: Students cannot receive credit for both IT 221 and 223.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

IT 293 - Applied IT: Junior Transition

Credits: 1 (NR)
Focuses on transition issues for sophomores and transfer students in Applied Information Technology programs. Assists sophomore and transfer students with choice of concentration, course selection, and career readiness.

Prerequisite(s): Sophomore standing

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring, Summer

IT 300 - Modern Telecommunications

Credits: 3 (NR)
Comprehensive overview of the fundamental principles of telecommunications, including current status and future directions of the public switched telephone network, cellular networks, satellite networks, and computer networks.

Prerequisite(s): IT 101 or permission of department. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

IT 304 - IT in the Global Economy

Credits: 3 (NR)
Explores how IT changed nature of society and contributed to evolution of global economy. Examines changing nature of work, education, and communication, and ethical issues such as intellectual property rights, computer-related crime, privacy concerns, and public policy issues.
Fulfills general education requirement in information technology (ethics only).

**Prerequisite(s):** IT 103 or equivalent; or permission of department. Prerequisite enforced by registration system.

**Notes:** Students cannot receive credit for both IT 304 and CS 306.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**IT 306 - Program Design and Data Structures**

Credits: 3 (NR)  
Fundamentals of data structures and analysis of algorithms. Large programs written in a modern, high-level programming language. Stresses abstraction, modular design, code reuse, and correctness.

**Prerequisite(s):** IT 206, MATH 112; or permission of department. Prerequisite enforced by registration system.

**Notes:** Students cannot receive credit for both IT 208 and IT 306.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall, Spring

**IT 308 - Event-Driven Programming**

Credits: 3 (NR)  
Building on the programming concepts covered in IT 206, this course focuses on graphical user interfaces. Students will design, develop, and document event-driven programs using an object-oriented language.

Equivalent to INFS 310 (2012-2013 Catalog).

**Prerequisite(s):** IT 206; or permission of department. Prerequisite enforced by registration system.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**IT 314 - Database Management**

Credits: 3 (NR)  
The course introduces students to the Oracle Developer application development utilities and tools and describes how to create and manipulate databases in Oracle database management system. The course provides an extensive overview of SQL and introduction to PL/SQL. Topics include data definition and manipulation languages, stored procedures, triggers, indexing techniques, and elementary query optimization.

Equivalent to INFS 311 (2012-2013 Catalog).

**Prerequisite(s):** IT 214, or permission of department. Prerequisite enforced by registration system.
IT 315 - Mobile Development

Credits: 3 (NR)
Studies business-oriented applications for popular mobile platforms including Blackberry, Android and Apple. Provides overview of mobile platforms and devices including evaluation, uses, design and development of applications.

Prerequisite(s): IT 206 and IT 213; or permission of department. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring.

IT 322 - Healthcare Data Challenges

Credits: 3 (NR)
Covers methodology and tools used to work with healthcare data structures supporting an organization's need for reliable data that are integrated, structured and prepared for further querying, decision making, data mining and knowledge discovery. Analyzes how to utilize an enterprise-wide data store to link information from diverse sources and make it accessible for a variety of user purposes.

Prerequisite(s): HAP 301, HAP 360, IT 214; or permission of the department. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring.

IT 324 - Electronic Health Records

Credits: 3 (NR)
Introduces the importance and implementation of electronic health records (EHRs) within healthcare environments. Students learn about EHRs' creation and evolution, data structure, impact on healthcare delivery, and recent trends, including privacy and security issues. Students apply learned concepts and best practices using technology tools to simulate the development, implementation, and usage of a functional EHR system.

Prerequisite(s): HAP 301 and HAP 360 and IT 214; or permission of the department. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring
IT 328 - Health Information Networking and Technologies

Credits: 3 (NR)
The course aims to develop an in-depth understanding of principles and practicalities needed for information technology professionals wishing to specialize in healthcare network implementations. Students learn the protocols, processes, and privacy and security considerations when working within a healthcare environment to design, secure, troubleshoot, and support networks that support healthcare settings.

Prerequisite(s): HAP 301 and HAP 360 and IT 341; or permission of the department. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

IT 331 - Web I: Web Development

Credits: 3 (NR)
Introduces the principles and techniques necessary for successful clientside web development. Topics such as XHTML, Cascading Style Sheets, JavaScript, DOM, XML, RSS, and AJAX are presented. Students will learn to develop attractive and interactive web pages and applications and use client-side web-scripting languages to solve problems both with a text editor and more powerful WYSIWYG HTML editor.

Prerequisite(s): IT 103, IT 106 and IT 213; or permission of department. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

IT 332 - Web Site Administration

Credits: 3 (NR)
Covers the installation, configuration, and administration of Web servers, mail servers, FTP servers, and directory services; related security setups and administration and associated performance issues are also covered.

Prerequisite(s): IT 213; or permission of department. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

IT 335 - Web Development using Content Management Systems

Credits: 3 (NR)
Through lectures and hands-on lab experience, presents web development techniques using content management systems (e.g. Joomla, Dot net nuke). Introduces characteristics of various types of websites (corporate portals, intranets and extranets; online magazines, newspapers, and publications; e-commerce and online reservations, government applications, small business websites). Presents methods, languages, tools related to web content management systems from an applied perspective.
Prerequisite(s): IT 207 and IT 213; or permission of department. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

IT 341 - Data Communications and Network Principles

Credits: 3 (NR)
Focuses on primary aspects of data communications and networking. Open Systems Interconnection (OSI) and Internet models; Layer 1 interfaces and cabling configurations; IP network addressing, network design, router and port configurations; security protocols; static routing, RIPv2, and OSPF configurations; TCP, UDP, data reliability, and error correction methods; Telnet, FTP, TFTP, HTTP, SMTP, POP, and DNS protocols.

Prerequisite(s): IT 101, IT 106, IT 212 and MATH 108; or permission of department. Prerequisite enforced by registration system.

Notes: This course is 50 percent lab work of configuration of routers and network design, implementation, and testing.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

IT 342 - Operating Systems Fundamentals

Credits: 3 (NR)
Practices and procedures for installing and configuring modern operating systems, including user accounts, file, print, and terminal servers, mobile computing, and disaster recovery. Through practical lab sessions, students receive real-world experiences with multiple operating systems.

Prerequisite(s): IT 101, IT 106 and IT 212; or permission of department. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

IT 343 - IT Project Management

Credits: 3 (NR)
Provides essential strategies and procedures for planning, organizing, staffing, monitoring, and controlling design, development, and production of system to meet stated IT-related need in effective and efficient manner. Fulfills writing-intensive requirement for BS in information technology.

Fulfills writing intensive requirement in the major.

Prerequisite(s): IT 293 and junior standing in BS in applied information technology program, or permission of department.
IT 344 - Information Storage and Management Technologies

Credits: 3 (NR)
Provides an introduction to principles of information storage and management technologies. Covers Direct Attached Storage (DAS), networked storage models such as Network Attached Storage (NAS), Storage Area Network (SAN), and Content Addressed Storage (CAS); and applications in business continuity, replication, and disaster recovery. Includes exposure to real-world storage networking technologies.

Prerequisite(s): IT 341 or permission of department. Prerequisite enforced by registration system.

IT 348 - Cloud Computing

Credits: 3 (NR)
Cloud Computing gives students hands-on experience creating programs hosted on the Google cloud. The course teaches Python and its use. Students create a small business application-style program using Python and App Engine-specific tools, following the Model-View-Controller-based paradigm, using HTML/Django I/O templates, with data storage on the Google Big Table.

Prerequisite(s): IT 207 or permission of department. Prerequisite enforced by registration system.

IT 353 - Information Defense Technologies

Credits: 3 (NR)
This course will examine and assess the role of information technology as a tool of warfare and civil defense. Topics will be discussed from both defensive and offensive perspectives and will include asset tracking, asymmetric warfare, network centric warfare, physical attacks, cyberterrorism, espionage, psyops, reconnaissance and surveillance, space assets, and applications of GPS and cryptographic technology. Students will research and write about the social, ethical, and political effects of such technology.

Prerequisite(s): IT 101 (or equivalent), IT 103 (or equivalent), and IT 223; or permission of department. Prerequisite enforced by registration system.
IT 357 - Computer Crime, Forensics, and Auditing

Credits: 3 (NR)
Covers computer crime, relevant laws, agencies, and standards. Presents auditing, logging, forensics, and related software. Explores legal principles such as chain of evidence, electronic document discovery, eavesdropping, and entrapment. Students get hands-on experience with forensics tools.

Equivalent to CRIM 304

Prerequisite(s): IT 103 and IT 223; or permission of department. Prerequisite enforced by registration system.

Notes: Students cannot receive credit for both IT 222 and 357.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

IT 366 - Network Security I

Credits: 3 (NR)
Examines information security services and mechanisms in network context. Topics include symmetric and asymmetric cryptography; message authentication codes, hash functions and digital signatures; digital certificates and public key infrastructure; access control including hardware and biometrics; intrusion detection; and securing network-enabled applications including e-mail and web browsing.

Prerequisite(s): IT 206 and IT 223; or permission of department. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

IT 413 - Digital Media Editing

Credits: 3 (NR)
Examines three areas of digital media editing- tools for editing, content and logic decision process, and information technology used by major corporations for development and distribution- through video examples from entertainment industry and corporate productions as well as hands-on editing experience.

Prerequisite(s): IT 213; or permission of department. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

IT 414 - Database Administration

Credits: 3 (NR)
Explores advanced concepts of database administration using enterprise-level database management system. Topics include: backup, recovery, corruption, automatic management, resource management, job scheduling, space management, memory
management, storage management, diagnosis and corresponding tools.

Equivalent to INFS 414 (2012-2013 Catalog).

**Prerequisite(s):** IT 314 Prerequisite enforced by registration system.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**IT 415 - Information Visualization**

Credits: 3 (NR)  
Provides an overview of information visualization applications in intelligence analysis, decision support systems, and network monitoring. Covers human factors, human interface with information, and current and future trends in information visualization. Students also learn to develop a rudimentary visualization application.

**Prerequisite(s):** IT 213 or permission of department. Prerequisite enforced by registration system.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**IT 429 - Security Accreditation of Information Systems**

Credits: 3 (NR)  
This course explains basic principles of performing FISMA certification and accreditation (C&A) of an IT System: covering methodology for completing C&A, explaining the role of the Certifier and the Information System Security Officer (ISSO), and giving students real world experience on the performing the process: valuable experience since IT Systems in the Federal Government need C&A every three years.

**Prerequisite(s):** IT 223 and IT 341 and IT 342. Prerequisite enforced by registration system.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall, Summer

---

**IT 431 - Web II: Advanced Web Development**

Credits: 3 (NR)  
Focuses on database-driven Web application development, AJAX, security through SSL and cookies, and Web presentation using server-side coding. Additional topics include Web server configuration and Web services.

**Prerequisite(s):** IT 331, or permission of the department. Prerequisite enforced by registration system.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0
IT 435 - Applied Knowledge Technologies for the Semantic Web

Credits: 3 (NR)
Methods, languages, and tools related to the knowledge technologies for semantic web from an applied perspective. Combines survey lectures with in-depth presentation of relevant issues and hands-on experience with existing technologies.

Prerequisite(s): IT 331; or permission of department. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

IT 441 - Network Servers and Infrastructures

Credits: 3 (NR)
Covers IP networking concepts and practices for IPv6 addressing, DHCP and DNS in IPv6 networks, secure communication over VPNs, VoIP architecture, Virtual Computing, Cloud Computing, MPLS, traffic monitoring and network connectivity between operating systems. Students learn the latest technologies of IP networks and understand application-level services used in the Internet. Lab sessions focus on installation of applications on virtual servers.

Prerequisite(s): Junior level standing and IT 341, MATH 108 and either of MATH 112 or MATH 125; or permission of department. Prerequisite enforced by registration system.

Notes: Term project.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

IT 445 - Advanced Networking Principles

Credits: 3 (NR)
This course focuses on Layer 2 and 3 of the OSI model and WAN technologies. Frame Relay and ISDN, complex router configurations of Variable Length Subnet Masking (VLSM), Classless Inter-Domain Routing (CIDR), Network Address Translation (NAT), Dynamic Host Configuration Protocol (DHCP), and study of Network Management Systems available for Data Communications Networks. Layer 2 involves Ethernet-switching components, including detailed hands-on configuration covering all aspects of switches using the command-line interface method.

Prerequisite(s): IT 341; or permission of department. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

IT 455 - Wireless Communications and Networking

Credits: 3 (NR)
Covers fundamental principles underlying wireless data communications. Topics include wireless transmission basics, radio propagation issues, antennas, digital modulation, spread spectrum techniques and their applications, and popular standards: WiFi,
WiMAX and Bluetooth. Also presents practical knowledge to enable the design, testing, deployment, debugging and commissioning of WiFi, WiMAX networks and point-to-point microwave systems. Discussions on cellular network technologies are also included.

Prerequisite(s): IT 101 and IT 341; or permission of department. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

IT 462 - Information Security Principles

Credits: 3 (NR)
Studies security policies, models, and mechanisms for secrecy, integrity, availability, and usage controls. Topics include models and mechanisms for mandatory, discretionary, and role-based access controls; authentication technologies; control and prevention of viruses and other rogue programs; common system vulnerabilities and countermeasures; privacy and security policies and risk analysis; intellectual property protection; and legal and social issues.

Equivalent to INFS 462 (2012-103 Catalog).

Prerequisite(s): IT 212 or equivalent, and IT 223; or permission of department. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

IT 466 - Network Security II

Credits: 3 (NR)
Detailed study of certain symmetric and asymmetric cryptographic schemes; analysis of network data (including "packet sniffing"); security at different network layers (including IPSec, SSL/TLS and Kerberos); and secure e-commerce. Teaches principles of designing and testing secure networks, including use of network partitioning, firewalls, intrusion detection systems, and vulnerability assessment tools.

Equivalent to INFS 466

Prerequisite(s): IT 206, IT 223, IT 341, IT 366, and either Math 112 or Math 125 or permission of the department. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

IT 467 - Network Defense

Credits: 3 (NR)
Practices and procedures for defending business-class, heterogeneous networks against threats (including system failure, environmental events, human error) and attacks (including intrusion, malicious software, denial of service). Through practical lab sessions, students receive real-world experience designing networks, installing and configuring system components, detecting and recovering from problems and attacks, and gathering data to support prosecution of offenders and refinement of
countermeasures.

Prerequisite(s): IT 366, or permission of instructor.

Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0  
When Offered: Fall, Summer

IT 471 - Applications of Digital Technologies

Credits: 3 (NR)  
The course covers an overview of technologies and applications of a wide array of digital components used within state of the art IT systems. Topics include an understanding of the applications of such digital devices embedded within telecommunications systems, storage systems, computing systems, multimedia systems, and computer networks.

Prerequisite(s): IT 101 and at least Junior standing in program; or permission of department. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0

IT 481 - Concepts of Multimedia Processing and Transmission

Credits: 3 (NR)  
Covers fundamentals of audio and image processing and transmission. Technical topics include audio and video compression algorithms for efficient storage and transmission of multimedia content, streaming video, high definition video, multimedia storage technologies. Other issues discussed include legal aspects concerning distribution of multimedia content, multimedia standards, the entertainment industry as well as the future of multimedia processing and transmission.

Prerequisite(s): IT 101 and IT 213; or permission of department. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0

IT 484 - Voice Communications Technologies

Credits: 3 (NR)  
Examines current and emerging technologies for transmission of voice signals over telecommunications systems. Highlights significant differences between the requirements for voice and other forms of data. Topics provide a balance between traditional voice technologies and those that use data networks. Real-world implementations are analyzed to determine reliability, quality, and cost effectiveness. Includes lab experiments with analog and digital technologies.

Prerequisite(s): IT 300 and IT 341; or permission of department. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0
IT 488 - Fundamentals of Satellite Communications

Credits: 3 (NR)
Provides a comprehensive overview of the principles of satellite communications systems. Major topics include satellite orbits and constellations, the space segment, antennas, modulation, coding, satellite access methods and link analysis. Also covers satellite applications, with emphasis on recent developments in the satellite communications field. Hands-on design experience is gained through the use of readily available vendor software systems.

Prerequisite(s): IT 300, IT 341, and MATH 108; or permission of department. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

IT 492 - Senior Design Project I

Credits: 3 (NR)
Students use information technology as a tool to redesign business processes so the enterprise can achieve its objectives. Student teams analyze the business processes of real organizations, quantify the negative impact caused by current process challenges, then develop and present a compelling Business Case for Change. Students develop skills critical for preparing and delivering effective verbal briefings and presentations.

Fulfills general education requirement in synthesis.

Prerequisite(s): Senior standing in BS information technology program, IT 343, and completion or concurrent enrollment in all other required general education courses; or permission of department. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

IT 493 - Senior Design Project II

Credits: 4 (NR)
Students, in teams, complete projects demonstrating preparedness as an IT professional. This work includes ethical challenges, status reports and engineering notebooks evaluated during class. Teams members develop detailed designs, build solutions up to Beta, present final written reports and final verbal presentations before review panels of business leaders. Students must register for the section that continues their IT 492 section.

Prerequisite(s): IT 492, IT 343, senior standing (90 credits) in BS in information technology program, and all general education requirements completed; or permission of department. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 4
Hours of Lab or Studio per week: 0

IT 495 - Turning Ideas into Successful Companies
This is a practical course in entrepreneurship. Each class session will focus on specific topics associated with building a business: team creation, business planning, market research, product development, financial planning, funding, people and organizations, competitive strategies, operations, growth and exit strategies, and more. Students will have reading assignments and will participate in competitive team assignments.

Prerequisite(s): Senior standing or permission of department.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**IT 498 - Independent Study in Information Technology**

Credits: 1-3 (RT)
Directed self-study of special topics of current interest in IT.

Notes: Topics must be arranged with instructor and approved by department chair before registering. Maximum 3 credits.

Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 0

**IT 499 - Special Topics in Information Technology**

Credits: 3 (RT)
Topics of special interest to undergraduates.

Prerequisite(s): Permission of department; specific prerequisites vary with nature of topic.

Notes: May be repeated for maximum 6 credits if topics are substantially different.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**IT 796 - Directed Reading and Research**

Credits: 1-6 (NR)
Reading and research on specific topic in information technology under direction of faculty member.

Prerequisite(s): Permission of Chair.

Notes: May be repeated as needed.

Hours of Lecture or Seminar per week: 1-12
Hours of Lab or Studio per week: 0
IT 797 - Directed Reading and Research

Credits: 1-3 (NR)
Reading and research on specific topic in information technology under direction of faculty member.

Notes: May be repeated as needed.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0

IT 990 - Dissertation Topic Presentation

Credits: 1 (NR)
Students put together a professional presentation of a research proposal and present it for critique to fellow students and interested faculty. May be repeated with change of research topic, but credit toward doctoral degree is given once.

Equivalent to CS 990, STAT 990

Prerequisite(s): Completion of all course requirements for PhD, or permission of instructor.

Notes: May be repeated with change in topic, but degree credit is given only once.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0
Grading: Graduate Special

IT 991 - Engineer Project Presentation

Credits: 1 (RD)
Opportunity for engineer degree students to present project proposal for critique to interested faculty and students. Covers presentation of project topic for engineer degree in information technology, and is required of all engineer degree students. Students complete project proposal.

Prerequisite(s): Completion of all course requirements for engineer degree in information technology, or permission of instructor.

Notes: May be repeated with change in topic, but degree credit is only given once.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0
Grading: Graduate Special

IT 996 - Engineer Project Proposal

Credits: 1-6 (RD)
Work on project proposal that forms basis for dissertation for engineer degree.
**Prerequisite(s):** Completion of all course requirements for the Engineer degree in Information Technology and permission of Project Director. Students must submit a Project Proegree Report form to the Graduate Student Service Office.

**Notes:** May be repeated. No more than 12 credits of IT 996 and 997 may be applied to engineer degree requirements.

**Hours of Lecture or Seminar per week:** 1-4  
**Hours of Lab or Studio per week:** 0  
**Grading:** Satisfactory/No Credit

---

**IT 997 - Engineer Project Dissertation**

Credits: 1-6 (RD)  
Formal record of commitment to engineer project dissertation under direction of advisory committee in information technology.

**Prerequisite(s):** Admission to candidacy.

**Notes:** May be repeated as needed.

**Hours of Lecture or Seminar per week:** 1-3  
**Hours of Lab or Studio per week:** 0  
**Grading:** Satisfactory/No Credit

---

**IT 998 - Doctoral Dissertation Proposal**

Credits: 1-12 (RD)  
Work on research proposal that forms basis for doctoral dissertation.

**Notes:** May be repeated. No more than 24 credits of IT 998 and 999 may be applied to doctoral degree requirements.

**Hours of Lecture or Seminar per week:** 0  
**Hours of Lab or Studio per week:** 0  
**Grading:** Satisfactory/No Credit

---

**IT 999 - Doctoral Dissertation**

Credits: 1-12 (RD)  
Formal record of commitment to doctoral dissertation research under direction of faculty member in information technology.

**Prerequisite(s):** Admission to candidacy.

**Notes:** May be repeated as needed.

**Hours of Lecture or Seminar per week:** 0  
**Hours of Lab or Studio per week:** 0  
**Grading:** Satisfactory/No Credit
Initiatives in Educational Transformation-Teaching (IETT)

Offered by the College of Education and Human Development

**IETT 500 - Introduction to IETT**

Credits: 0 (NR)
Introduces students to the ideas and the experiential pedagogy of the IET program in an intensive summer session designed to develop relationships among participating educators and faculty by building a vibrant learning community through shared and emerging knowledge and experience.

*Hours of Lecture or Seminar per week:* 0
*Hours of Lab or Studio per week:* 0
*Grading:* Not Gradable

**IETT 750 - Studies in Language and Culture I**

Credits: 3 (NR)
Explores the interdependence and mutual construction of languages and cultures, as well as how both provide interpretive frames and thus mediate lived experiences. Investigates culture and language as primary shapers of relationships and identities. Engages teachers in constructing culturally responsive curriculum and pedagogy.

*Hours of Lecture or Seminar per week:* 3
*Hours of Lab or Studio per week:* 0

**IETT 751 - Studies in Language and Culture II**

Credits: 3 (NR)
Deepens understandings of how language and culture shape interpretations that affect people's lives. Investigates student achievement in relationship to classroom experiences and the language and cultural knowledge students bring to school. Examines vernacular discourses, including those in cyberspace and popular culture, while considering pedagogical implications. Probes social justice issues in and out of educational institutions.

*Hours of Lecture or Seminar per week:* 3
*Hours of Lab or Studio per week:* 0

**IETT 752 - Research in Practice: The Team Project**

Credits: 6 (NR)
Builds further understanding of teacher research with an emphasis on collaborative research process to develop skills, construct knowledge, and transform practice. Teams engage in collaborative inquiry as they form and frame salient questions, take actions to improve teaching and learning, gather, analyze and interpret multiple forms of data, and share their experience in communities of practice.
Prerequisite(s): MNPE 704

Hours of Lecture or Seminar per week: 6
Hours of Lab or Studio per week: 0

**IETT 753 - Teaching and Learning**

Credits: 3 (NR)
Provides a structured opportunity for offering evidence of individual growth and transformation of professional practice. Through a process of deep reflection, examines fundamental philosophical and pedagogical assumptions, explores individual educational experiences, and critically examines professional practices related to meeting K-12 students' needs, continuous improvement, and program experiences.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**IETT 754 - Introduction to Teaching Historic Places with Diverse Populations**

Credits: 1 (NR)
Explores and interprets national, regional, and local historic sites in the Washington DC area, students will practice historical thinking and teaching through an analysis of historic sites as primary sources.

Corequisite(s): MNPE 700; MNPE 703

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0
When Offered: Spring.

**IETT 755 - Advanced Teaching Historic Places with Diverse Populations**

Credits: 2 (NR)
Building on the exploration and interpreting skills learned in IETT 754, students will practice historical thinking and teaching for diverse P-12 classroom populations to convey critical thinking skills and civic engagement.

Prerequisite(s): IETT 754.

Corequisite(s): IETT 750.

Hours of Lecture or Seminar per week: 1.5
Hours of Lab or Studio per week: 0.5
When Offered: Fall

**Instructional Technology (EDIT)**
Offered by the College of Education and Human Development

EDIT 201 - Strategies for Online Learning Success

Credits: 1 (NR)
Helps students assess their readiness for online learning using effective strategies for online interaction and activities designed to promote successful online experiences.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0
When Offered: Fall, Summer, Spring

EDIT 401 - Introduction to Learning Technologies

Credits: 3 (NR)
Provides an overview of the field of learning technologies, including its history, theoretical foundations, design processes, and technologies. Illustrates how learning technologies can be applied in a variety of teaching and training contexts including e-learning, educational software, instructional design, corporate training, and curriculum development.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Summer, Spring

EDIT 413 - Technology, Society, and the Culture of Learning

Credits: 3 (NR)
Explores the relationship between technological change and education reform initiatives. Emphasis will be placed on the ways in which technological and social changes influence and shape the goals and outcomes of the K-12 educational process.

Prerequisite(s): EDUC 300.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDIT 426 - Web Accessibility and Design

Credits: 3 (NR)
Provides instruction for accessible web design using HTML and existing authoring tools. Section 508 web accessibility standards and assistive technologies to access the computer will be explored.

Notes: Class may be delivered via distance education.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
EDIT 504 - Introduction to Educational Technology

Credits: 3 (NR)
Examines uses of and issues in educational technology. Explores curriculum integration of technology, and focuses on learning and using commercially available applications software.

Notes: Field experience in public schools will be required during course.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDIT 526 - Web Accessibility and Design

Credits: 3 (NR)
Develops understanding of principles of universal web design. Students apply this understanding by designing and developing accessible web site using web authoring tools.

Equivalent to EDSE 526 (2012-2013 Catalog).

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDIT 530 - Scripting and Programming

Credits: 2 (RT)
Enables development of computer-based educational materials using widely known educational scripting language. Students explore basic authoring capabilities, and learn to apply those capabilities by designing and producing materials using commands, procedures, and functions of scripting language.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 0

EDIT 561 - Teaching with Telecommunications

Credits: 1 (NR)
Develops expertise with various aspects of telecommunications tools, and models ways these tools can be used for personal learning and integration into teaching/learning process. Addresses e-mail, Internet, web, and online databases.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0

EDIT 562 - Teaching with Databases
Develops expertise with various aspects of databases, and models ways databases can be integrated into teaching and learning process. Focuses on strategies for searching, sorting, creating, and communicating with information, much of which is structured by variety of online and offline databases.

**EDIT 563 - Teaching with Graphics**

Credits: 1 (NR)
Explores various graphic programs available for constructing visual images. Addresses draw and paint programs, scanning and editing images, and using visual communication to support K-12 learning.

**EDIT 564 - Teaching with Web 2.0**

Credits: 2 (NR)
Develops expertise with social, cognitive, and learning implications of film, video, and television. Engages students in process of planning, storyboarding, and filming with video.

**Prerequisite(s):** EDIT 561.

**EDIT 565 - Teaching with Educational Software**

Credits: 1 (RD)
Explores variety of educational software, including simulations, problem-solving software, computational tools (calculators, probeware, LOGO, and spreadsheets), and drill-and-practice/integrated learning systems. Emphasizes ways these programs support K-12 teaching and learning process.

**EDIT 566 - Teaching with Multimedia/Hypermedia**

Credits: 2 (RD)
Covers variety of hypertext/hypermedia and multimedia tools. Emphasizes students' ability to use tools and then teach others. Covers the ways integration of tools in K-12 curriculum support learning, and difference between hypermedia and multimedia.
Prerequisite(s): EDIT 563.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 0

EDIT 567 - Teaching with Desktop Publishing

Credits: 2 (RD)
Explores variety of publishing tools, including word processors, desktop publishers, and idea processors. Emphasizes using tools to communicate. Covers design and layout principles, appropriate use of images to facilitate communication, and ways K-12 teachers can design opportunities for students to learn concepts.

Prerequisite(s): EDIT 563.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 0

EDIT 568 - Teaching with the Web

Credits: 2 (NR)
Examines the various aspects of web-based learning and the ways these tools can be integrated into the teaching/learning process. The course is taught online.

Prerequisite(s): EDIT 561

Hours of Lecture or Seminar per week: 1-12
Hours of Lab or Studio per week: 0

EDIT 571 - Visual Design and Applications

Credits: 1-3 (RT)
Provides basic knowledge of the range of capabilities of available graphic and visual design applications. Students learn to cultivate effective visual design practices for creating instructional products.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0

EDIT 572 - Digital Audio/Video Design and Applications

Credits: 1-3 (RT)
Provides basic knowledge of the range of capabilities of available audio and video design applications. Students learn to cultivate effective audio and video design practices for creating instructional products.
EDIT 573 - Project Management

Credits: 1-3 (RT)
Explores project management principles and applications used to manage, plan, and track large-scale, complex instructional design projects.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0

EDIT 574 - Social Media and Digital Collaboration Applications

Credits: 1-3 (RD)
Provides basic knowledge of the range of capabilities of available social networking, teleconferencing, and collaboration applications. Students learn to integrate the latest information and communication technologies into the creation of instructional products.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0

EDIT 575 - e-Learning Design Applications

Credits: 1-3 (RT)
Provides basic knowledge of available applications for creating, delivering, managing and tracking e-learning experiences. Students learn to create instructional products using the latest e-learning design applications.

Notes: Content customized to particular software tool presented.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0

EDIT 590 - Educational Research in Technology

Credits: 3 (NR)
Focuses on developing skills, insights, and understanding basics to performing research with emphasis on interpretation, application, critique, and use of findings in educational settings. Students develop expertise in action research methodology, design, and implementation.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
EDIT 593 - Instructional Hardware Systems

Credits: 3 (NR)
Teaches basic technical features of computer-based hardware systems used in educational settings, including stand-alone computers, peripheral devices, and networking systems.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDIT 597 - Special Topics in Education

Credits: 1-6 (RT)
Provides advanced study on selected topic or emerging issue in American or international education.

Notes: May be repeated for credit with GSE permission.

Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 0

EDIT 601 - Instructional Design and Development (IDD) Portfolio

Credits: 1 (NR)
Enables students to create and publish electronic portfolio that demonstrates effective and meaningful integration and syntheses of instructional design and development concepts, principles, and competencies learned across program courses at mid-degree program point.

Notes: To be taken at mid-degree program point with minimum 12 and maximum 15 credits.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0

EDIT 611 - Innovations in e-Learning

Credits: 3 (NR)
Explores leading-edge learning technologies and their integration into the e-learning design process. Hands-on activities focus on technology planning, selection, implementation, and evaluation utilizing instructional design best practices.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDIT 641 - Understanding Virtual Schools

Credits: 1 (NR)
Develops knowledge about online learning for K-12 students. Examines history and trends of online learning, and characteristics
of K-12 virtual learners.

**EDIT 642 - The Online Academy**

Credits: 1 (NR)
Develops knowledge about Mason's virtual high school. Focuses on design model with attention to representative problems, performances of understanding, communities of practice, and mentors.

**Prerequisite(s):** EDIT 641

**Corequisite(s):** EDIT 641

**Hours of Lecture or Seminar per week:** 1
**Hours of Lab or Studio per week:** 0

**EDIT 643 - Online Mentoring I: Building Virtual Relationships**

Credits: 1 (NR)
Assists in developing online mentoring skills related to integral role that building relationships plays in success of online learning.

**Hours of Lecture or Seminar per week:** 1
**Hours of Lab or Studio per week:** 0

**EDIT 644 - Online Mentoring II: Promoting Self-Regulation**

Credits: 1 (NR)
Assists in developing online mentoring skills related to integral role that self-regulation plays in success of online learning.

**Prerequisite(s):** EDIT 643

**Hours of Lecture or Seminar per week:** 1
**Hours of Lab or Studio per week:** 0

**EDIT 645 - Online Mentoring III: Conceptual Learning**

Credits: 1 (NR)
Assists in developing online mentoring skills related to role of support of conceptual and content understanding in success of online learning.

**Prerequisite(s):** EDIT 644
EDIT 646 - Online Mentoring IV: Moderating

Credits: 2 (NR)
Assists in developing expertise with moderating student learning asynchronous and synchronous in online environments including discussion boards, chat rooms, and general communication patterns.

Prerequisite(s): EDIT 645 or permission of instructor

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0

EDIT 701 - Advanced Instructional Design and Development (IDD) Portfolio

Credits: 1 (NR)
To be taken in the last semester of course work. Enables students to create and publish electronic portfolio that demonstrates effective and meaningful integration and syntheses of instructional design and development concepts, principles, and competencies learned across program courses at end degree program point.

Prerequisite(s): EDIT 601. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0

EDIT 704 - Instructional Technology Foundations and Theories of Learning

Credits: 3 (RD)
Reviews practical and pedagogical issues related to design and development of technological instruction. Emphasizes investigating instructional design as a field and community of practice, and reviewing core learning theory constructs applicable to design of instructional technology.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDIT 705 - Instructional Design

Credits: 3 (NR)
Helps students analyze, apply, and evaluate principles of instructional design to develop education and training materials spanning a wide range of knowledge domains and instructional technologies. Focuses on variety of instructional design models, with emphasis on recent contributions from cognitive science and related fields.
Equivalent to EDCI 705

**Prerequisite(s):** Teaching experience.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**EDIT 711 - Teaching with Technology I: Telecommunications and Databases**

Credits: 3 (RD)  
Explores and develops expertise with various aspects of telecommunications and databases, and models how tools can be used for personal learning and integration into teaching and learning process. Addresses e-mail, Internet, and web, and online and multimedia databases. Also focuses on strategies for searching, sorting, creating, and communicating with information, many of which are structured by online and offline databases.

**Corequisite(s):** EDCI 710.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**EDIT 713 - Teaching with Technology II: Graphics, TV and Video, and Simulations**

Credits: 3 (RD)  
Explores and develops expertise with various graphic programs for constructing visual images, interpreting and creating video, and structuring and using simulations for learning. Addresses draw and paint programs, scanning and editing images, and using visual communication to support K-12 learning. Explores social, cognitive, and learning implications of film, video, and television, and engages students in planning, storyboarding, and filming with video. Also focuses on various categories of simulation, relationship between simulations and ways of knowing, and strategies for using simulations to promote K-12 learning.

**Corequisite(s):** EDCI 712.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**EDIT 715 - Teaching with Technology III: Publishing and Computational Tools**

Credits: 3 (RD)  
Explores and develops expertise with variety of publishing tools, including word processors, desktop publishers, and idea processors. Emphasizes using tools to communicate. Covers design and layout principles, appropriate use of images to facilitate communication, and ways K-12 teachers can design opportunities for students to learn these concepts. Also helps students explore and develop expertise with tools commonly used as part of "computational science" and mathematical modeling. Tools include programming languages such as LOGO, calculators, spreadsheets, probeware, and graphing calculators.

**Corequisite(s):** EDCI 714.
EDIT 717 - Teaching with Technology IV: Hypermedia and Emerging Technologies

Credits: 3 (RD)
Develops expertise with hypertext/hypermedia and multimedia tools. Emphasizes ability to use tools and then teach others. Focuses on understanding difference between hypermedia and multimedia. Also examines educational technologies expected to become important applications soon, including virtual reality and distributed learning.

Corequisite(s): EDCI 716.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDIT 719 - Tools 5: Web 2.0 and Digital Video Editing

Credits: 3 (NR)
Explores emerging Web2 tools (blogs, wikis, and podcasts) and digital video with attention to conceptual understanding and potential applications in K-12 settings. Culminates in the design and development of products and lesson plans for K-12 settings.

Prerequisite(s): EDIT 717.

Corequisite(s): EDCI 716.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDIT 720 - Leadership Issues in Educational Technology

Credits: 3 (NR)
Examines how educational technology can provide infrastructure for creating, managing, and evaluating innovative types of teaching and learning environments. Explores new assumptions about learning, instructional technology, and organizational development as foundation for planning how schools can use technology to evolve beyond conventional approaches.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDIT 721 - Web-Based Learning

Credits: 3 (NR)
Examines web-based learning and how these tools can be integrated into the teaching/learning process in K-12 settings.
EDIT 725 - Technology and Diversity

Credits: 3 (NR)
Focuses on technology to support learning needs of all students, including English-as-a-second-language, bilingual, and special-needs students. Emphasizes helping teachers use technology to support learning when faced with such diverse learners in one classroom.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDIT 730 - Advanced Instructional Design

Credits: 3 (NR)
Capstone course of three-course sequence on theory and practice of instructional design. Helps students apply ideas developed in prior courses to complete major instructional design project. Covers leading-edge ideas in evolution of instructional design.

Prerequisite(s): EDCI/EDIT 705

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDIT 732 - Analysis and Design of Technology-Based Learning Environments

Credits: 3 (NR)
Enables design, implementation, and evaluation of technology-based education and training materials using advanced computer-based authoring tools.

Prerequisite(s): EDIT 730 or permission of instructor

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDIT 742 - Interactive Technologies: Gaming and Robotics

Credits: 3 (NR)
Project-based, hands-on course focusing on technology, science, and engineering. LEGOS, controlled by small microcomputers, used to show principles behind many technological innovations. Other technological advances explored.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
EDIT 745 - Technology Leadership Issues

Credits: 3 (NR)
Explores relationship of leadership, innovations, change, and technology advocacy. Emphases implementation of ideas and strategies to influence decisions of policy makers. Explores sources of grant funding, and interaction with professional organizations.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDIT 746 - Educational Technology and Assessment

Credits: 3 (NR)
Covers fundamentals of educational assessment and measurement, and relates them to current attempts to use technology for educational assessment. Explores use of computer technology to support traditional testing and innovative ways to assess complex learning.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDIT 747 - Technology and Teacher Development

Credits: 3 (NR)
Investigates latest research and issues related to teacher education to include staff development in K-12 in-service as well as university courses. Students paired with preservice teachers who act as online mentors to develop leadership and mentoring skills.

Prerequisite(s): EDIT 590 or equivalent.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDIT 748 - TIP 2 Technology Innovations Project

Credits: 3 (NR)
Continuation of design and development of EDIT 741 technology-enriched learning module. Students conduct action research, and implement advanced action research project.

Prerequisite(s): EDIT 741 and 590.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDIT 750 - Emerging Educational Technologies
Credits: 3 (NR)
Examines range of educational technologies expected to become important applications in three to eight years. Assesses potential of these emerging technologies to improve practice and alter mission and content of education, and helps students develop skills in strategic planning.

Notes: To be taken in final year of course work.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDIT 752 - Design and Implementation of Technology-based Learning Environments

Credits: 3 (RD)
Students design and produce multimedia/hypermedia applications based on current theory and research in instructional design and cognitive science. Examines user needs, information models, structure, and media selection and uses to inform design and production of final project.

Prerequisite(s): EDIT 732 or permission of instructor. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDIT 760 - Online Teachers and Learners

Credits: 1 (NR)
Examines the attributes of teachers and K-12 learners with emphasis on attitudes, behaviors, and adaptations required by online teachers and learners.

Corequisite(s): EDIT 761.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0
When Offered: Fall

EDIT 761 - Models of Online Learning

Credits: 2 (NR)
Provides opportunities for learners to identify, explore, and evaluate a range of educational models for K-12 online learning. These include blended learning (web-enhanced, web-supported), the flipped classroom, mentor-mentee dyad, group collaborative, synchronous, asynchronous, parent directed e-learning, mobile learning, and web-delivered programmed instruction.

Prerequisite(s): Admissions to Integration of Online Learning in Schools program (IOLS).

Corequisite(s): EDIT 760.

Hours of Lecture or Seminar per week: 2
EDIT 762 - Quality K-12 Online Learning

Credits: 1 (NR)
Examines and evaluates quality indicators for the design of online learning pointing to the six major areas for consideration: instructor-learner, learner-learner, learner-content, learner-interface, learner-instructional strategies, and social presence.

Prerequisite(s): EDIT 760, EDIT 761.

Corequisite(s): EDIT 763.

EDIT 763 - Tools for K-12 Online Learning

Credits: 2 (NR)
Examines tools that structure and support online learning with particular emphasis on the unique affordances of each tool including tools for producing, delivering, and supporting online learning.

Prerequisite(s): EDIT 760, EDIT 761.

Corequisite(s): EDIT 762.

EDIT 764 - The ART of Online Communication

Credits: 3 (NR)
Examines strategies to assess, respond to, and target online communication and develops expertise in questioning and listening, supporting self-regulation, and clarifying conceptual understanding using a series of case studies and role playing activities.

Prerequisite(s): EDIT 763; may also be taken as corequisite.

Corequisite(s): EDIT 763.
EDIT 765 - Facilitating K-12 Online Learning

Credits: 2 (NR)
Develops expertise in facilitating and moderating online learning to include synchronous and asynchronous environments, community building strategies, questioning strategies, prompting reflection, and facilitating conceptual understanding.

Prerequisite(s): EDIT 764.

Corequisite(s): EDIT 766.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 0
When Offered: Fall

EDIT 766 - Understanding Online Presence

Credits: 2 (NR)
Examines impacts of distance on teachers and learners and develops strategies to establish teacher presence, to establish and express self, to promote learner-learner connections, and to compensate for the separation of teacher-learner and learner-learner.

Prerequisite(s): EDIT 764.

Corequisite(s): EDIT 765.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 0
When Offered: Fall

EDIT 767 - Designing K-12 Online Learning

Credits: 3 (NR)
Develops frameworks for designing and structuring online learning opportunities and emphasizes course content and learning outcomes, selection of appropriate online models, and organization of online lessons and courses, online learning tools, and assessment and evaluation strategies.

Prerequisite(s): EDIT 766.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring

EDIT 768 - K-12 Online Design I

Credits: 1 (NR)
Develops frameworks for designing and structuring online learning opportunities and emphasizes course content and learning outcomes, selection of appropriate online models, and organization of online lessons and courses online learning tools, and
assessment and evaluation strategies.

Prerequisite(s): EDIT 764.

Corequisite(s): EDIT 791.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0
When Offered: Summer

EDIT 769 - K-12 Online Design II

Credits: 1 (NR)
Focuses on the creation of online courses appropriate for K-12 learners and culminates in comprehensive design documents that detail goals, assessments, learning tools, and detailed scripts or documents ready for the production phase.

Prerequisite(s): EDIT 767.

Corequisite(s): EDIT 792.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0
When Offered: Summer

EDIT 771 - Overview of Digital Media

Credits: 1-3 (NR)
Provides overview of media and technology tools used in teaching, learning and training. Focuses on developing skills necessary to implement digital media approaches using a systematic design process.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0

EDIT 772 - Virtual Worlds, Augmented Reality, and Gaming Applications

Credits: 1-3 (RT)
Provides basic knowledge of available applications and platforms for creating contextually-based learning environments such as immersive virtual worlds, simulated worlds, alternate reality games, and massive multiplayer online role playing games for e-learning.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0

EDIT 773 - Human Computer Interface Design for Teaching and Learning
Credits: 3 (RD)
Provides overview of human-computer interface issues related to instructional design of technology-centered learning environments. Examines continuum of human-computer feedback.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDIT 790 - Practicum in Instructional Technology

Credits: 1-6 (RD)
Provides supervised practice in applying knowledge and skills of student's chosen track through placement in appropriate work setting.

Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 0
Grading: Graduate Special

EDIT 791 - Project Development Practicum I

Credits: 6 (NR)
Designed for students in the Division of Learning Technologies programs to facilitate the application of design and production processes to the solution of learning challenges with particular emphasis on the design and development phase of the design process.

Prerequisite(s): Permission of Instructor.
Corequisite(s): EDIT 768.

Hours of Lecture or Seminar per week: 6
Hours of Lab or Studio per week: 0
When Offered: Summer

EDIT 792 - Project Development Practicum II

Credits: 6 (NR)
Facilitates the application of design and production processes to the solution of learning challenges with particular emphasis on the implementation and evaluation phase of the design process.

Prerequisite(s): Permission of Instructor.
Corequisite(s): EDIT 769.

Hours of Lecture or Seminar per week: 6
Hours of Lab or Studio per week: 0
When Offered: Summer
EDIT 797 - Advanced Topics in Education

Credits: 1-6 (RD)
Advanced study of selected topics in education for students preparing for doctoral studies or who have been admitted to the PhD program in education.

Notes: May be repeated for credit with CEHD approval.

Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 0

EDIT 801 - Nature and Process of Design

Credits: 3 (NR)
Examines multi- and cross-disciplinary perspectives on the nature and process of designing and developing learning technologies.

Prerequisite(s): EDCI 716, EDIT 752, or EDSE 649

Corequisite(s): EDIT 802 or permission of instructor

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDIT 802 - Cognition and Technology: A Multidisciplinary Approach

Credits: 3 (NR)
Examines learning interactions between cognition and technology using multiple disciplinary perspectives including, cognitive science, psychology, neuroscience, education, design theory, instructional design, technology design, anthropology, sociology, information science, philosophy, semiotics, and linguistics.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDIT 803 - Design-Based Research

Credits: 3 (NR)
Provides an introduction to systematic cycles of design-based research in education. Applicable to all content domains to explore cycles of research within design, development and implementation of educational and training interventions.

Prerequisite(s): EDIT 801

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

When Offered: Fall, Spring
EDIT 891 - Design Research Practicum

Credits: 1-9 (RD)
Applies multiple design research cycles to an identified research problem to systematically test and improve technology-based product interventions or other curriculum/training strategies or materials in order to systematically develop knowledge related to teaching, learning and/or training in context.

Prerequisite(s): EDRS 811, EDRS 812, and EDIT 803 or equivalent

Hours of Lecture or Seminar per week: 1-9
Hours of Lab or Studio per week: 1-12
Grading: Graduate Special
When Offered: Fall, Spring, Summer

EDIT 895 - Emerging Issues in Instructional Technology

Credits: 3 (NR)
Covers selected emerging issues. Examines ways instructional technology provides infrastructure for creating, managing, and evaluating innovative types of teaching-learning environments.

Prerequisite(s): Admission to PhD program, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

Interdisciplinary Studies (MAIS)

Offered by the College of Humanities and Social Sciences

MAIS 796 - MAIS ProSeminar

Credits: 1 (NR)
Introduces students to the structure of the MAIS program; students create a portfolio of their work which continues during their studies; the portfolio prepares students for the capstone project or thesis.

Prerequisite(s): Acceptance into the MAIS Program

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0
Grading: Satisfactory/No Credit

MAIS 797 - Interdisciplinary Studies Proposal

Credits: 1 (NR)
Focused on formulating and writing a MAIS project or thesis proposal.
Prerequisite(s): Admission to MAIS and completion of 21 credits of graduate course work, including any required research methodology course; MAIS 796. ZAL students must have completed 30 credits or have obtained ZAL Director's permission before enrolling in MAIS 797.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0
Grading: Satisfactory/No Credit.

MAIS 798 - Interdisciplinary Studies Project

Credits: 1-5 (RD)
Research project related to student's concentration taken under supervision of faculty advisor and project evaluation committee.

Prerequisite(s): MAIS 797 and prior approval of a project proposal by the committee chair, two committee members, and MAIS director. ZAL student project proposals must have been approved in writing by their institutional supervisor and the ZAL Director.

Notes: Individualized section form required.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0
Grading: S/NC

MAIS 799 - Interdisciplinary Studies Thesis

Credits: 1-5 (RD)
Original research endeavor related to student's MAIS program concentration. Research must result in document meeting MAIS and university standards.

Prerequisite(s): MAIS 797 and prior approval of a thesis proposal by the committee chair, two committee members, and MAIS director.

Notes: Individualized section form required.

Hours of Lecture or Seminar per week: 1-5
Hours of Lab or Studio per week: 0
Grading: S/NC

International Commerce and Policy (ITRN)

Offered by the School of Public Policy

ITRN 500 - Global Political Economy
Foundation course in the ICP program. Explores issues and ideas affecting global security, stability, growth and development from country, regional and thematic perspectives. Introduces students to key concepts, policies, and practices that underpin international commerce, international relations more broadly, and non-governmental transnational activities.

**ITRN 501 - Methods of Analysis for International Commerce and Policy**

Credits: 4 (NR)
Provides the skills necessary to conduct qualitative and quantitative research and analysis of issues related to international commerce and policy. Students obtain practical information on sources of data, their origins, strengths, and weaknesses. Helps develop tools for statistical analysis of data, and includes use of computers for analyzing and displaying information. It covers major data sources as well and literature and indices related to international policy, including trade data, economics and financial indicators, and development indicators.

**ITRN 503 - Investment and Macroeconomics**

Credits: 1-4 (NR)
Provides overview of basic concepts in macroeconomic theory, as well as mathematical skills, with emphasis on application to problems of contemporary global economy. Covers monetary systems, balance of payments, foreign exchange market, foreign investment and international institutions, and issues in world monetary arrangements.

**ITRN 504 - Trade and Microeconomics for International Commerce**

Credits: 1-4 (NR)
Provides foundation in international economics, and presents fundamentals of international trade, finance, and transactions. Focuses on alternative approaches to understanding international economic system. Topics include classical and neoclassical theories of trade, alternative theories of trade and their extensions, tariffs, customs unions, institutions, and economic development. Students learn to employ appropriate analytical approaches, including graphical analyses, and communicate the results concisely. Throughout, emphasizes relating theory to practical applications.

**ITRN 602 - International Financial Institutions and Globalization**
Credits: 3 (NR)
Examines nature and dynamics of financial interactions between public and private sectors worldwide. Covers aims and actions of international financial institutions in fostering trade and development, with emphasis on emerging economies. Policy issues include devolving political and economic structures, differing resource and cultural endowments, privatization, financial crises, sector imbalances, and equity. Reviews international and domestic financial markets and instruments.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**ITRN 603 - International Trade Relations**

Credits: 3 (NR)
Examines U.S. role in world economy and evolving global trading system. Analyzes regulatory framework for trade and political dynamics of international trade relations. Particular attention to domestic trading institutions, and global and regional institutions such as the GATT/WTO, NAFTA, EU, and APEC. Examines debate between free and fair trade advocates, and prospects for U.S. trade policy.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**ITRN 604 - International Trade and Technology**

Credits: 3 (NR)
Examines science and technology policies and international trade, with emphasis on relationships and interactions. Assesses roles of science and technology as economic drivers, and explores strategies employed by companies and governments to link research and development to economic growth and competitiveness. Examines research and development systems and technology-related trade policies of United States, Japan, Europe, major developing countries, and selected newly industrialized economies, emphasizing policies affecting trade and technology. Explores specific cases involving interactions among science, technology, and international trade.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**ITRN 612 - International Business Operations and the Multinational Corporation**

Credits: 3 (NR)
Examines international business environment and challenges facing companies in conducting operations in increasingly interconnected global marketplace. Focuses on issues of management and organization, and resolution of conflicts that may arise between business organizations and home and host governments. Also focuses on role of multinational corporations in international environment, and impact on global trade, economic development, and political system. Also studies trade and international investment theories and world financial environment. Explores broad issues such as sovereignty of decision making and global impact of business activities.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
ITRN 701 - Special Topics in International Commerce and Policy

Credits: 1-3 (RT)
Offers specialized courses on various aspects of international commerce and policy.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0

ITRN 702 - Special Topics in International Commerce and Policy: Study Abroad

Credits: 3-6 (RT)
Provides opportunity for study abroad under supervision of Mason faculty.

Notes: Course topics, content, and locations vary.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ITRN 710 - International Business Transactions: Finance and Investment

Credits: 3 (NR)
Focuses on techniques for financing trade and payment methods, including letters of credit, counter trade, and other approaches. Covers issues of direct concern in financing international business operations, such as preparing financing proposals, risk insurance, international taxation, pricing policies, and currency conversion and foreign exchange risk management. Introduces foreign direct investment, alliances and acquisitions, joint ventures, and other methods for investing overseas.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ITRN 711 - United States Law and Global Trade

Credits: 3 (NR)
Surveys types of regulations imposed by United States, foreign governments, and international institutions on transnational business activities. Reviews principal regulatory bodies in United States and overseas, and powers and authorities. Covers tariffs and customs regulations; product safety and environmental restrictions; intellectual property, copyright, trademark, and patent regulations; and licensing rules. Also covers special restrictions that may be imposed because of political considerations such as embargoes, munitions controls, and antibribery and antiboycott regulations.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ITRN 712 - World Trade Organization and Global Trade
Credits: 3 (NR)
Focuses on legal aspects of international trade regulation by studying international legal and political regime established under WTO, and assessing impact of domestic economic legislation on U.S. trade regulations.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**ITRN 715 - Global Environment and the World Economy**

Credits: 3 (NR)
Examines growing relationship between environmental interdependence and developing world economy. Assesses increased globalization of environmental and health issues with a focus on the impact on those issues on international transactions involving trade and development. Attempts to develop an understanding of relationship of scientific knowledge to global environment in context of existing political and economic institutions. Emphasizes formulating and assessing policies and structures for corporations, nations, regions, and international organizations. Tensions among free trade, international competitiveness, and regulatory responses are central. Gives attention to practices of nations and international organizations, emerging forms of regional and international cooperation, and growing use of multilateral agreements.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**ITRN 716 - European Union in the International System**

Credits: 3 (NR)
Examines current developments in European market integration from global perspective. Emphasizes impact of single market, and proposed economic and monetary union of United States and other major trading partners. Examines European economic relations with Eastern Europe, former Soviet Union, and Lome Pact countries.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**ITRN 717 - International Science and Technology**

Credits: 3 (NR)
Examines U.S. science and technology policies (S&T) and structures, as well as those in other leading countries. Assesses functional links between S&T and international transactions focusing on trade, national security, finance, and development assistance. Considers emergence of multilateralism and international institutional arrangements as alternatives to traditional bilateral patterns of cooperation.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**ITRN 718 - Global Economic and Human Development**
Credits: 3 (NR)
Interdisciplinary examination of economic and human development in world economy. Introduces alternative concepts and theories of economic and human development, and analytical frameworks for assessing important issues that arise in development process. Topics include colonialism, economic growth, population, health, education, industrialization, and rural development.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**ITRN 720 - Regional and Supranational Organizations**

Credits: 3 (NR)
Assesses role of international organizations in international system today, and focuses on wide range of international and regional economic and political institutions. Emphasizes changing nature of these organizations in relation to nation states, and relationship of international organizations to U.S. national security and economic interests.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**ITRN 731 - Business-to-Business Marketing in International Commerce**

Credits: 3 (NR)
Provides understanding of concepts of international marketing process and international environment within which companies operate.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**ITRN 734 - Pricing in International Commerce**

Credits: 3 (NR)
Deals with theory and techniques of pricing that enable organizations to effectively pursue marketing and business strategies.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**ITRN 736 - Sources of Growth in East Asia**

Credits: 3 (NR)
Examines extraordinary economic success of East Asian NIEs and some of their problems. Focuses on understanding proximate sources of growth, role of technological development, and salient political issues.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
ITRN 738 - Fundamentals of International Marketing

Credits: 3 (NR)
Offers working knowledge of principles and practices that enable managers to effectively market organizations, products, services, and brands. Emphasizes international dimensions of marketing where appropriate.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ITRN 740 - ABCs of Exporting and Importing

Credits: 3 (NR)
Acquaints students with legal, regulatory, and practical issues in importation and exportation of merchandise. Topics include theoretical framework for government oversight of international movement of goods; legal issues between parties and governments; and practical guidance concerning structuring of import and export transactions to avoid legal and tariff liability.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ITRN 742 - Technology Policy and International Strategies

Credits: 3 (NR)
Introduces opportunities and problems created for organizations and society by Internet, and policies affecting trajectory of Internet developments. Also covers technological factors in planning horizon; domestic policy and international treaty factors affecting Internet trajectory; and new horizons for Internet applications.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ITRN 744 - The Politics of International Competitiveness

Credits: 3 (NR)
Provides inquiry into governance problems of public managers and political leaders as they cope with global competitiveness in post-industrial era. Focuses on integrating public and private sectors worldwide, with special emphasis on U.S. role and how it influences such areas as technology transfer, national security, electronic commerce, trade policies, money flows, and human resources.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ITRN 750 - Trade and Politics in Eastern Europe and the Former Soviet Union
Credits: 3 (NR)
Examines background and recent developments in political, business, and cultural environment confronting American firms seeking to do business in Eastern Europe and former Soviet Union. Emphasizes international trade patterns and relations between these states and United States. Examines modes of doing business in these countries, and unique problems American firms confront. Focuses on privatization, joint ventures, and counter trade.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ITRN 752 - Global Business and Policy

Credits: 3 (NR)
Focuses on the multinational firm (MNE) and examines the international activities of large companies as well as small and medium sized enterprises. Assesses how firms strategize across national borders and address the challenges posed by different governance structures, political economies, institutions and cultures. Theoretical concepts are applied to ‘real’ business situations and case studies.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

ITRN 754 - International Commercialization of Space

Credits: 3 (NR)
Identifies and analyzes problems and transactions concerning privatization and commercialization of transnational space activities, including launch and satellite operations. Emphasizes interplay of new technologies with existing legal, political, and business structures in formulating viable commercial satellite and launch operations. Focuses on planning and implementing private space actions in conjunction with various public and private international organizations. Sessions focus on interdisciplinary aspects of space commercialization involving technology, finance, tax, insurance, joint venture and business matters, and international legal and national regulatory issues. Guest lecturers include leading business executives engaged in space and satellite operations.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ITRN 756 - National Security and the Global Economy

Credits: 3 (NR)
Examines impact of globalization and changes in international economic and political systems on concepts of national security. Emphasizes nexus of economic and security concerns in post-Cold War era, with particular attention to emerging issues including trade and economic security, proliferation of advanced military technology and control of weapons of mass destruction, international drug trafficking, and defense conversion. Focuses on implications of changing security requirements on U.S. defense and economic policy and activities.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
ITRN 757 - Business and Politics in Emerging Markets

Credits: 3 (NR)
Examines developing countries that are major destination points for international financial flows and foreign direct investment. Emerging markets have become a major influence in the world economy both because of the potential for growth and the downside risks from economic crises. The course uses the new institutional economics to analyze the interplay of political, economic, and business conditions. Institutional economics is a combination of economics, economic history, and political science. Topics covered include the politics of economic reform, drivers of globalization and investment, the informal sector, and relationships of risk and reward.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ITRN 758 - Global Market Planning Practicum

Credits: 3 (NR)
Provides opportunity to develop international market plan for specific industry or service sector. Students consult with industry experts and use key trade databases to develop strategic plan that recommends market entry strategies. Completed market plan submitted to industry experts for use and dissemination.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ITRN 759 - Country Risk Analysis

Credits: 3 (NR)
Presents a wide variety of country risk analysis methods used by corporations, financial institutions, governments, international organizations, specialized consulting groups, and publications. These methods are used to design policies, programs, and projects in the international arena. The course explores natural, commercial, economics, political and financial risk. It also provides a conceptual foundation for understanding the sources of risk, the impacts of risk on public and private sector activities, and the ways that risk can be successfully mitigated or managed.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ITRN 760 - International Environmental Politics

Credits: 3 (NR)
Examines growing concerns related to global environmental issues and problems they pose to domestic, foreign, and international political institutions. Covers major environmental issues including global warming, ozone depletion, cross-border flow of pollution, and threats to biodiversity. Assesses strengths and weaknesses of traditional political institutions in dealing with these issues and providing for sustainable economic development while limiting environmental damage.
Designated a Green Leaf Course.

**ITRN 761 - European Political and Economic Union**

Credits: 3 (NR)
Examines movement for European integration since World War II, focusing on political and institutional development of European Community/Union. Topics include theories of European integration, Treaties of Rome, Single European Act, Maastricht Treaty, European Union (EU) policies and programs, and EU's external relations. Analyzes changing nature of U.S.-EU relations and prospects for EU enlargement into Central and Eastern Europe.

**ITRN 764 - Trade, Investment, and Politics in East Asia**

Credits: 3 (NR)
Examines issues related to international transactions involving Korea, China, Taiwan, and Hong Kong, with some attention to Japan. Focuses on trade and financial relations between these East Asian nations and United States. Assesses impact of culture and domestic political and economic institutions within these states, and roles in regional institutions and in international system.

**ITRN 765 - Trade, Investment, and Politics in Sub-Saharan Africa**

Credits: 3 (NR)
Examines role and potential of sub-Saharan Africa in international trading system. Emphasizes political, historical, cultural, and development factors. Focuses on perspectives of U.S. firms and on international institutions trading or investing in region.

**ITRN 766 - Trade, Investment, and Politics in the Middle East and North Africa**

Credits: 3 (NR)
Examines major economic, political, and cultural issues that influence trade and investment relations with Middle East and North Africa. Focuses on roles of international and regional institutions in economic development, and develops understanding of challenges facing region and their implications for formulating trade and investment strategies by U.S. firms.
ITRN 767 - Political Economy and Integration in Latin America

Credits: 3 (NR)
Examines contemporary political, economic, and cultural dynamics of Latin American and Caribbean regions. Emphasizes issues and trends that affect U.S.-Latin American political, business, and trade relations, particularly recent political and economic reforms. Examines roles of domestic interest groups and decision-making systems in individual countries, and evolution of regional integration arrangements and integration with international system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ITRN 768 - Global Intellectual Property Rights and International Trade

Credits: 3 (NR)
Examines national and regional systems, international contractual relations (licensing), and the evolving global system for protecting intellectual property. Addresses current international treaty system and the ongoing multilateral efforts to strengthen worldwide intellectual property protection. Examines intellectual property regimes worldwide, including regional and bilateral challenges and opportunities, and relevant U.S. law and policy responses.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ITRN 769 - International Entrepreneurship

Credits: 3 (NR)
Introduces practical planning approach for small and medium-size entrepreneurial firms seeking to enter international marketplace. Focuses on key business and financial documents related to doing business overseas; and assesses role of language, technology, and information systems in formulating successful business strategy. Role playing and simulated negotiations provide opportunities for students to sharpen business skills.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ITRN 770 - International Contract Negotiation

Credits: 3 (NR)
Reviews growing role of arbitration in international transactions. Examines international, national, and government arbitration bodies, with particular emphasis on how differing cultural characteristics affect negotiating behavior and effectiveness of arbitration.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
ITRN 771 - Trade, Investment, and Politics in South and Southeast Asia

Credits: 3 (NR)
Focuses on trade and finance issues in the most dynamic countries of South and Southeast Asia. Assesses cultural and political factors, regional trade patterns, and institutions, focusing on implications for regional development and business opportunities for U.S. firms.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ITRN 772 - International Telecommunications

Credits: 3 (NR)
Focuses on developments in international telecommunications and satellite regulation. Examines regulatory environment, and business and financial aspects of global telecommunications industry.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ITRN 773 - International Strategic Management

Credits: 3 (NR)
Presents comprehensive approach to international strategy formulation, implementation, and evaluation processes affecting policy and program development within multinational firms and government agencies. Integrates marketing, finance, accounting, and management. Covers techniques for forecasting international business, political, economic, technological, legal, and sociocultural forces.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ITRN 780 - Internship

Credits: 1-3 (NR)
Provides practical work experience in state, federal, or international agencies or private sector. Requires written project integrating work experience and academic program.

Prerequisite(s): Permission of Department and Advisor. Majors only.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
Grading: Satisfactory/No Credit

ITRN 790 - Independent Study
Credits: 1-3 (RT)
Provides opportunity to pursue intensive research in area of interest not covered by other courses.

Prerequisite(s): Permission of Department and Advisor. Majors only.

Notes: Note: Not all courses earn 3 graduate credits. Some courses may vary in length and thus, in credits earned. Some course requirements subject to change.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ITRN 791 - Advanced Trade Policy

Credits: 3 (NR)
Covers international trade theory, trade policy analysis, regional economic integration, and institutional arrangements governing world trade. Examines dispute settlement regimes, and relationship between trade and environment. Includes WTO and constituent agreements in the areas of goods, services, intellectual property, and trade-related investment measures.

Prerequisite(s): Permission of instructor required.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ITRN 795 - Final Project

Credits: 1-3 (RD)
Includes writing 40-page capstone paper that draws together key themes of program.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
Grading: Graduate Special

Italian (ITAL)

Offered by the College of Humanities and Social Sciences

ITAL 101 - Elementary Italian I

Credits: 3 (NR)
Designed for students with no prior knowledge of Italian. Includes elements of grammar, vocabulary, oral skills, listening comprehension, and reading.

Notes: Students may not receive credit for ITAL 101 and ITAL 110.
ITAL 102 - Elementary Italian II

Credits: 3 (NR)
Continuation of ITAL 101.

Prerequisite(s): ITAL 101 or permission of instructor.

Notes: Students may not receive credit for ITAL 102 and ITAL 110.

ITAL 110 - Elementary Italian

Credits: 6 (NR)
Introduces elements of grammar, vocabulary, oral skills, listening comprehension, and reading.

Notes: Students may not receive credit for ITAL 110 and ITAL 101 or 102.

ITAL 201 - Intermediate Italian I

Credits: 3 (NR)
Further development of skills in listening, speaking, and writing.

Prerequisite(s): ITAL 102 or permission of department.

Notes: ITAL 201 and 202 must be taken in sequence. Students may not receive credit for ITAL 201 and ITAL 210.

ITAL 202 - Intermediate Italian II

Credits: 3 (NR)
Application of language skills to reading, composition, and discussion.

Prerequisite(s): ITAL 201 or permission of department.
Notes: Students may not receive credit for ITAL 202 and ITAL 210.

**ITAL 210 - Intermediate Italian**

Credits: 3 (NR)
Continuation of the development of basic components of the language, with focus on listening, speaking, reading, and writing skills. Introduces students to the cultures and histories of Italian-speaking regions.

Prerequisite(s): ITAL 110 or appropriate placement score.

Notes: Students may not receive credit for ITAL 210 and ITAL 201 or 202.

**ITAL 250 - Gateway to Advanced Italian**

Credits: 3 (NR)
Development of advanced intermediate-level proficiency with a primary focus on seven major communicative functions: describing, comparing, recommending and expressing opinions, recounting the past, expressing likes and dislikes, hypothesizing, and talking about the future. Examination of authentic materials from various Italian-speaking regions.

Prerequisite(s): ITAL 210; appropriate placement score; or permission of department.

Notes: Taught in Italian.

**ITAL 320 - Topics in Italian Film and Literature**

Credits: 3 (NR)
Explores Italian history through the lens of literary and cinematic movements from 1911 onwards. Compares the representations of historical movements in different artistic languages, from poetry and prose to the moving image. Topics include neorealism, Fascism, the Resistance, the Mafia and others.

Fulfills general education requirement in literature.

Prerequisite(s): ENGH 101, or equivalent.

Notes: Taught in English.
ITAL 325 - Major Italian Writers

Credits: 3 (NR)
Works of major Italian or Italian-American authors in translation. Writers to be studied vary.

Fulfills general education requirement in literature.

Prerequisite(s): ENGL 101/ENGH 101 or equivalent; or permission of instructor

Notes: Taught in English.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ITAL 330 - Advanced Italian: Language and Culture

Credits: 3 (NR)
Develops linguistic and critical proficiency in Italian language and culture for students who have completed intermediate studies in Italian. Analyzes authentic texts that reveal the diversity of Italian experience in regional, national and international contexts. Fosters advanced reading, writing, speaking, and listening skills that will enable students to understand and to critique Italian with greater ease and sophistication.

Prerequisite(s): ITAL 250; appropriate placement score; or permission of instructor

Notes: Taught in Italian.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ITAL 331 - Advanced Italian Language and Culture

Credits: 3 (NR)
An advanced course that emphasizes linguistic fluency and cultural awareness in contemporary Italian realities. Highlights changes in the domestic, regional, and national spheres.

Prerequisite(s): ITAL 330

Notes: Taught in Italian.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ITAL 340 - Italian through Film

George Mason University 2013-2014 Official University Catalog 2603
ITAL 420 - Global and Local Italy

Credits: 3 (NR)
Examines Italian culture in its urban, regional, national, and diasporic manifestations. Analyzes authentic texts, from literature to journalism, in the spirit of a cultural studies approach. Fosters advanced reading, writing, speaking, and listening skills that will enable students to understand and critique contemporary Italy with greater ease and sophistication.

Prerequisite(s): ITAL 330.

Notes: Taught in Italian.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

Japanese (JAPA)

Offered by the College of Humanities and Social Sciences

JAPA 101 - Introduction to the Japanese Language

Credits: 3 (NR)
Includes basic grammar, oral expression, listening comprehension, and reading and writing.

Notes: Students may not receive credit for JAPA 101 and JAPA 109 or 110.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

JAPA 102 - Introduction to the Japanese Language

Credits: 3 (NR)
Includes basic grammar, oral expression, listening comprehension, and reading and writing.
Notes: Students may not receive credit for JAPA 102 and JAPA 109 or 110.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

JAPA 109 - Intensive Japanese I

Credits: 6 (NR)
Equivalent to JAPA 101, 102 taught in a single semester.

Notes: Recommended for students who desire intensive introduction to Japanese. Students may not receive credit for JAPA 109 and JAPA 101, 102, or 110.

Hours of Lecture or Seminar per week: 6
Hours of Lab or Studio per week: 0

JAPA 110 - Elementary Japanese

Credits: 6 (NR)
Introduces elements of grammar, vocabulary, oral skills, listening comprehension, reading, and writing.

Notes: Students may not receive credit for JAPA 110 and JAPA 101, 102, or 109.

Hours of Lecture or Seminar per week: 6
Hours of Lab or Studio per week: 0

JAPA 201 - Intermediate Japanese I

Credits: 3 (NR)
Further development of skills acquired in JAPA 101 and 102, including grammar, oral expression, listening comprehension, reading and writing. Use of written language (katakana, hiragana, and kanji) emphasized.

Prerequisite(s): JAPA 102 or equivalent.

Notes: Students may not receive credit for JAPA 201 and JAPA 209 or 210.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

JAPA 202 - Intermediate Japanese II

Credits: 3 (NR)
Continuation of JAPA 201.
Syllabus:

**JAPA 209 - Intensive Japanese II**

Credit: 6 (NR)
Equivalent to JAPA 201, 202 taught in a single semester.

**Prerequisite(s):** JAPA 102 or 109, or equivalent.

**Notes:** Students may not receive credit for JAPA 209 and JAPA 201, 202, or 210.

**Hours of Lecture or Seminar per week:** 6
**Hours of Lab or Studio per week:** 0

**JAPA 210 - Intermediate Japanese**

Credit: 3 (NR)
Continuation of the development of basic components of the language, with focus on listening, speaking, reading, and writing skills. Also introduces students to Japanese culture and society.

**Prerequisite(s):** JAPA 110, appropriate placement score, or permission of instructor.

**Notes:** Students may not receive credit for JAPA 210 and JAPA 201, 202, or 209.

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0

**JAPA 250 - Gateway to Advanced Japanese**

Credit: 3 (NR)
Development of advanced intermediate-level Japanese language skills in the interpersonal, interpretive, and presentational modes of communication. Incorporates strong component of critical and comparative analysis of Japanese cultural products, practices, and perspectives of the past and the present.

**Prerequisite(s):** JAPA 210, appropriate placement score, or permission of department.

**Notes:** Taught in Japanese.

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0
JAPA 310 - Japanese Culture in a Global World

Credits: 3 (NR)
Study of globalizing Japanese cultural phenomena from the 19th through the 21st century. Explores how movements of ideas, technologies and products across borders influence both local and global ideas and practice.

Fulfills general education requirement in global understanding.

Prerequisite(s): ENGL 101/ENGH 101 or equivalent; or permission of instructor.

Notes: Taught in English. Fulfills the college requirement in non-Western culture.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

JAPA 320 - Japanese Cinema

Credits: 3 (RT)
Comprehensive analysis of Japanese cinema based on cross-cultural perspectives and cultural criticism. Major developments and trends as viewed in selected Japanese films with emphasis on post war and contemporary eras. Knowledge of Japanese history, communication, and cultural studies or film and media studies helpful.

Notes: Taught in English. May be repeated for a maximum of 6 credits when topic is different with approval of department.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

JAPA 330 - Advanced Reading and Speaking I

Credits: 3 (NR)
Designed for students to develop conversational proficiency and reading skills. Students work toward a mastery of linguistic and sociolinguistic rules by incorporating reading and speaking abilities through class discussions, reports, and presentations.

Prerequisite(s): JAPA 250, appropriate placement score, or permission of instructor.

Notes: Taught in Japanese.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

JAPA 331 - Advanced Reading and Speaking II

Credits: 3 (NR)
Designed for students to develop conversational proficiency and reading skills. Students continue to develop mastery of linguistic and sociolinguistic rules by incorporating reading and speaking abilities through class discussions, reports and presentations.
Prerequisite(s): JAPA 330, appropriate placement score, or permission of instructor.

Notes: Taught in Japanese.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

JAPA 340 - Topics in Japanese Literature

Credits: 3 (RD)
Study of selected topics in Japanese literature in English translation. Content varies.

Fulfills general education requirement in literature.

Prerequisite(s): ENGH 101 or equivalent, or permissions of instructor.

Notes: May be repeated for a maximum of 6 credits when topic is different with permission of department. Fulfills the college requirement in non-Western culture.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

JAPA 350 - Readings in Japanese Culture

Credits: 3 (NR)
An integrated content-based Japanese course designed to advance students’ oral and writing skills, as well as their critical understanding of Japanese culture and mythology. Introduces a variety of genres, such as rakugo (traditional comical storytelling), shinwa (myths), and mukashi-banashi (folk legends).

Prerequisite(s): JAPA 250, appropriate placement score, or permission of department.

Notes: Taught in Japanese.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

JAPA 440 - Integrated Study of Japanese Language and Society I

Credits: 3 (NR)
Integrated approach to study of Japanese language and society through grammar review, vocabulary and kanji development, intensive practice in spoken and written Japanese, and sociological and cultural readings and analysis. Includes class discussion, oral and written reports, and out-of-class direct interactions with native speakers.

Prerequisite(s): JAPA 331, appropriate placement score, or permission of instructor.

Notes: Taught in Japanese.
JAPA 441 - Integrated Study of Japanese Language and Society II

Credits: 3 (NR)
Integrated approach to study of Japanese language and society through grammar review, vocabulary and kanji development, intensive practice in spoken and written Japanese, and sociological and cultural readings and analysis. Includes class discussion, oral and written reports, and out-of-class direct interactions with native speakers. More emphasis on actual use of Japanese language.

Prerequisite(s): JAPA 440, appropriate placement score, or permission of instructor.

Notes: Taught in Japanese.

Kinesiology (KINE)

Offered by the College of Education and Human Development

KINE 100 - Introduction to Kinesiology

Credits: 3 (NR)
Provides an overview of the field of kinesiology in the form of an introductory course. Students gain exposure to: history of the field, policies and procedures for the concentration, career options, and the model of evidence-based knowledge.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Summer, Spring

KINE 200 - Principles of Health Related Fitness

Credits: 2 (NR)
Provides students with basic knowledge and skills associated with exercise training methods, lifting techniques, and health-related fitness testing procedures. Selection of developmentally appropriate exercises emphasized. Participation in fitness tests required.

Prerequisite(s): BIOL 124, BIOL 125, ATEP 300. Prerequisite enforced by registration system.

Corequisite(s): KINE 310.

Hours of Lecture or Seminar per week: 2
KINE 249 - An Analysis of Boxing
Credits: 3 (NR)
Provides study of the sport of boxing from cultural, historical, physical, and scientific perspectives. Well-known writings from literature on boxing as well as boxing training methods, and program design will be addressed. Physical participation will include basic boxing skills, conditioning, and fitness testing of participants.

Prerequisite(s): ENGH 100 or ENGH 101.

Notes: All students must purchase hand wraps, heavy bag gloves, mouthpieces, and jump ropes. Boxing and/or wrestling shoes are strongly recommended.

KINE 250 - Endurance Sport Program Design
Credits: 3 (NR)
Provides students with knowledge necessary to train another individual safely and effectively for endurance sports. Emphasis will be placed on running; however, cycling and swimming will be covered. Topics covered include: functional, physiology, psychological aspects of endurance competitions, basic nutritional requirements, injury reduction, training techniques, safety, race management, and history of endurance sports.

Prerequisite(s): BIOL 124, BIOL 125, ATEP 300, KINE 200.

KINE 310 - Exercise Physiology I
Credits: 3 (NR)
Introduces students to the physiologic, neuroendocrine, and biochemical changes of the human body that are associated with exercise and work.

Prerequisite(s): BIOL 124, BIOL 125, ATEP 300. Prerequisite enforced by registration system.

Corequisite(s): KINE 200.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Summer
**KINE 330 - Seminar in Kinesiology**

Credits: 3 (NR)
Prepares students for the fieldwork experience in KINE 341: Kinesiology Internship I. Topics covered include: professionalism, review of evidence-based position papers, and discussion of contemporary issues in kinesiology.

Equivalent to HEAL 430.

**Prerequisite(s):** Junior standing (60 credit hours)
KINE 100, KINE 200, ATEP 300, KINE 310, KINE 370. Prerequisite enforced by registration system.

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0
**When Offered:** Fall, Spring

---

**KINE 341 - Kinesiology Internship I**

Credits: 3 (NR)
Provides a paid or voluntary supervised professional experience in an approved exercise science professional setting under the supervision of a practicum University Supervisor and Agency Supervisor.

**Prerequisite(s):** KINE 200, KINE 310, KINE 330, KINE 350, KINE 370.
Junior status (60 credits).
Current CPR, AED, and First Aid. Prerequisite enforced by registration system.

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0
**When Offered:** Fall, Summer, Spring

---

**KINE 350 - Exercise Prescription and Programming**

Credits: 3 (NR)
Provides students with an opportunity to develop an understanding of the assessment and evaluation process used in cardio-respiratory training and anaerobic conditioning for healthy, athletic, and symptomatic populations.

**Prerequisite(s):** KINE 200
ATEP 300
KINE 310
KINE 370 Prerequisite enforced by registration system.

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0
**When Offered:** Fall
KINE 360 - Strength Training: Concepts and Applications

Credits: 3 (NR)
Provides students with an opportunity to develop an in-depth understanding of the principles of strength training and conditioning, including: anatomical and physiological considerations, lifting techniques, equipment selection, program development/evaluation, and weightlifting safety; thus enabling them to teach and train client.

Equivalent to PHED 364

Prerequisite(s): BIOL 124 and BIOL 125; ATEP 300 and KINE 310. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring

KINE 370 - Measurement and Evaluation of Physical Fitness

Credits: 3 (NR)
This course provides students with an opportunity to develop a understanding of the assessment and evaluation process in the determination of physical fitness.

Equivalent to PHED 365

Prerequisite(s): BIOL 124 and BIOL 125; ATEP 300 and KINE 310. Prerequisite enforced by registration system.

Notes: This is designated a writing intensive course.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

KINE 380 - Exercise Prescription and Programming for Special Populations

Credits: 3 (NR)
Provides the study of the pathophysiology of common diseases and conditions with concentration in the design and implementation of exercise programs.

Prerequisite(s): KINE 200, KINE 310, KINE 330, KINE 350, KINE 370; or permission of instructor. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring

KINE 400 - Biomechanics
Focuses on kinetic and kinematic concepts and how they apply to the quantitative assessment of human movement. Analyzes human movement and the functional dynamics of tissue such as muscle or bone.

**Prerequisite(s):** BIOL 124, BIOL 125, ATEP 300, KINE 360. Prerequisite enforced by registration system.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**KINE 410 - Exercise Physiology II**

Credits: 3 (NR)  
Provides study in the advanced theory of exercise physiology. Knowledge related to the physiologic, neuroendocrine, and biochemical changes of the human body associated with both a single bout of exercise and chronic exercise training will be addressed.

**Prerequisite(s):** BIOL 124, BIOL 125, KINE 310. Prerequisite enforced by registration system.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall, Summer

---

**KINE 420 - Sport and Exercise Nutrition**

Credits: 3 (NR)  
Explores the fundamental biochemical and physiological rationale for optimal nutrient intake for health, physical fitness, and athletic performance. Specific attention is focused upon the relationship nutrition has with exercise, physical fitness, health, and athletic performance.

**Prerequisite(s):** HEAL 330  
KINE 310 Prerequisite enforced by registration system.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall

---

**KINE 441 - Kinesiology Internship II**

Credits: 3 (NR)  
Provides a supervised professional experience in two separate approved kinesiology professional settings under the supervision of both a University Supervisor and an Agency Supervisor with emphasis placed upon exercise programming and implementation for both clinical (site 1) and performance (site 2) populations.

**Prerequisite(s):** 90 credits (Senior status)  
KINE 330, KINE 341, KINE 350, KINE 360, KINE 370, KINE 380  
Current CPR, AED, and First Aid Prerequisite enforced by registration system.
KINE 490 - Kinesiology Internship III

Credits: 12 (NR)
Provides a directed, field-based experience, in which students observe and participate in conditions, practices, and settings where sought career roles are conducted. The kinesiology fieldwork coordinator must approve placement for the practicum. Both a University supervisor and an approved agency supervisor with recognized professional certifications coordinate and oversee the student's internship experience.

Prerequisite(s): 90 credits, KINE 330, KINE 341, KINE 400, KINE 410, KINE 420, KINE 441, Current CPR, AED, and First Aid Certification. Prerequisite enforced by registration system.

KINE 499 - Independent Study in Kinesiology

Credits: 1-3 (RD)
Study of a topic regarding theory, research, or practice in kinesiology under the direction of a faculty member. May be repeated, but no more than 3 total credits hours may be earned.

Prerequisite(s): Completion of 90 credit hours and Permission of Instructor.

Korean (KORE)

Offered by the College of Humanities and Social Sciences

KORE 110 - Elementary Korean

Credits: 6 (NR)
Introduces elements of grammar, vocabulary, oral skills, listening comprehension, and reading.

Hours of Lecture or Seminar per week: 6
Hours of Lab or Studio per week: 0
KORE 201 - Intermediate Korean I

Credits: 3 (NR)
Continuation of basic Korean listening, speaking, reading, and writing skills. Online and lab work required.

Prerequisite(s): KORE 102, appropriate placement score, or permission of department

Notes: Students may not receive credit for KORE 201 and KORE 210.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

KORE 202 - Intermediate Korean II

Credits: 3 (NR)
Continuation of KORE 201. Online and lab work required.

Prerequisite(s): KORE 201, appropriate placement score, or permission of department

Notes: Students may not receive credit for KORE 202 and KORE 210.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

KORE 210 - Intermediate Korean

Credits: 3 (NR)
Continuation of the development of basic components of the language, with focus on listening, speaking, reading, and writing skills. Introduces students to the cultures and histories of Korean-speaking regions.

Prerequisite(s): KORE 110 or appropriate placement score.

Notes: Students may not receive credit for KORE 210 and KORE 201 or 202.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

KORE 250 - Gateway to Advanced Korean

Credits: 3 (NR)
Develops advanced-intermediate level reading, writing, listening, and speaking skills through a comparative analysis of Korean cultural products and practices and a critical analysis of the influence of globalization and East Asian regional dynamics.

Prerequisite(s): KORE 210; appropriate placement score; or permission of instructor.
Latin (LATN)

Offered by the College of Humanities and Social Sciences.

Placement: See Academic Testing in the Admissions section.

LATN 101 - Elementary Latin

Credits: 3 (NR)
Introduction including basic grammar, vocabulary, and development of reading skills, and introduction to Roman civilization.

Notes: Must be taken in sequence. Students may not receive credit for LATN 101 and LATN 109.

LATN 102 - Elementary Latin

Credits: 3 (NR)
Introduction including basic grammar, vocabulary, and development of reading skills, and introduction to Roman civilization.

Notes: Must be taken in sequence. Students may not receive credit for LATN 102 and LATN 109.

LATN 109 - Intensive Elementary Latin

Credits: 6 (NR)
Recommended for students in minors of classical studies or Latin, and for students who want intensive introduction.

Notes: Students may not receive credit for LATN 109 and LATN 101 or 102.

LATN 201 - Intermediate Latin I

Credits: 3 (NR)
Intensive review of elementary grammar. Introduces more advanced grammatical constructions and patterns of usage, continued
development of reading proficiency, and vocabulary and readings in Latin literature.

**Prerequisite(s):** LATN 102 or equivalent.

**Notes:** Students may not receive credit for LATN 201 and LATN 209.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**LATN 202 - Intermediate Latin II**

**Credits:** 3 (NR)  
Study of advanced grammatical constructions, vocabulary, and patterns of usage. Reading of selections from Roman authors of late Republic and early Empire, and study of cultural and political backgrounds.

**Prerequisite(s):** LATN 201 or equivalent.

**Notes:** Students may not receive credit for LATN 202 and LATN 209.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**LATN 209 - Intensive Intermediate Latin**

**Credits:** 6 (NR)  
Intensive Intermediate Latin.

**Notes:** Students may not receive credit for LATN 209 and LATN 201 or 202.

**Hours of Lecture or Seminar per week:** 6  
**Hours of Lab or Studio per week:** 2

---

**LATN 351 - Roman Prose Literature**

**Credits:** 3 (RD)  
Introduces major work of prose, themes, and literary qualities. Emphasizes interpretation and stylistic analysis. Concentrates on one complete work; topics, authors vary.

**Prerequisite(s):** LATN 202 or equivalent.

**Notes:** Readings in Latin. May be repeated for a maximum of 6 credits when topic is different.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0
LATN 352 - Roman Poetry

Credits: 3 (RD)
Introduces major work of poetry and themes, meters, and poetic techniques. Emphasizes interpretation, metrical and stylistic analysis, and poet's role in society. Topics and authors vary.

Prerequisite(s): LATN 202 or equivalent.

Notes: Readings in Latin. May be repeated for a maximum of 6 credits when topic is different.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

LATN 451 - Studies in Roman Literature

Credits: 3 (RD)
Focuses on a single Latin author or literary genre. Approaches subject from variety of interpretive perspectives, and uses secondary literature as well as primary texts. Topics and authors vary.

Prerequisite(s): LATN 351/352 or equivalent, or permission of instructor.

Notes: Readings in Latin. May be repeated for a maximum of 6 credits when topic is different.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

LATN 452 - Studies in Roman Literature

Credits: 3 (RD)
Focuses on a single Latin author or literary genre. Approaches subject from variety of interpretive perspectives, and uses secondary literature as well as primary texts. Topics and authors vary.

Prerequisite(s): LATN 351/352 or equivalent, or permission of instructor.

Notes: Readings in Latin. May be repeated for a maximum of 6 credits when topic is different.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

Latin American Studies (LAS)

Offered by the College of Humanities and Social Sciences

LAS 100 - Introduction to Latin American Studies
Credits: 1 (NR)
Weekly series of presentations by various Latin American Studies faculty. Short reading assignments and journal entries required.

Notes: Required for all Latin American studies majors.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0
Grading: Satisfactory/No credit

LAS 490 - Internship

Credits: 1-6 (RD)
Approved work-study programs in cooperation with specific organizations including area museums, NGOs, and local, state and federal agencies.

Prerequisite(s): Latin American studies majors with permission of director.

Notes: Credit determined by program. May be repeated for a maximum of 9 credits.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0

LAS 491 - Directed Reading for Honors in Latin American Studies

Credits: 3 (NR)
Directed readings on specialized topic in Latin American Studies to prepare students for LAS 492, the honors research seminar in the major.

Prerequisite(s): admission to Latin American studies honors program.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

LAS 498 - Study Abroad

Credits: 1-6 (RD)
Study abroad.

Notes: May be repeated for a maximum of 6 credits with permission of department.

Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 0

LAS 499 - Research Seminar in Latin American Studies
Research on specialized topic in Latin American Studies culminating in substantial paper and oral presentation. Students expected to integrate knowledge and skills acquired in general education courses.

Fulfills general education requirement in synthesis.

Fulfills writing intensive requirement in the major.

**Prerequisite(s):** 90 credits and complete or concurrent enrollment in all other required general education courses.

**Notes:** Must receive passing grade to graduate with a BA in Latin American studies.

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0

**Linguistics (LING)**

Offered by the College of Humanities and Social Sciences

**LING 306 - General Linguistics**

Credits: 3 (NR)

Fulfills general education requirement in social and behavioral science.

Equivalent to LING 326 (2010-2011 Catalog)

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0

**LING 307 - English Grammar**

Credits: 3 (NR)
Overview of grammatical structure of English including word classes, phrases, and complex sentences. Analyzes English grammar using modern syntactic theory. Students engage in language description through problem solving.

Equivalent to ENGH 307, LING 322 (2010-2011 Catalog)

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0

**LING 450 - Introduction to Sociolinguistics**
Overview of the study of language variation and change. Topics to be covered include the interaction between language and social factors (age, sex, social class), dialects of English, speech communities, language contact, and language and gender.

Prerequisite(s): LING 326.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

LING 485 - Semantics and Pragmatics

Credits: 3 (NR)
Developments in theoretical linguistics that explore how language form is related to meaning and context. Topics include reference, lexical semantics, logic, quantification, truth conditions and sentential meaning, presuppositions, and speech acts.

Prerequisite(s): LING 326.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

LING 486 - Syntax I

Credits: 3 (NR)
Nature and form of syntactic theory, and examination and analysis of the properties of several major natural language syntactic structures.

Prerequisite(s): LING 326.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

LING 490 - Generative Phonology

Credits: 3 (NR)
Sound systems of English and other languages from perspectives of phonological theory. Topics include articulatory phonetics, distinctive features, nature of phonological representations, rhythm and stress, and phonological universals and constraints.

Prerequisite(s): LING 326.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

LING 499 - Independent Study
Credits: 1-3 (RD)
Intensive study of particular theoretical problem in linguistics conducted by student in close consultation with instructor. Student produces substantial piece of written work on research findings.

Prerequisite(s): LING 326 and 3 other LING credits, and permission of instructor.

Notes: May be repeated for a maximum of 6 credits with permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

LING 507 - Field Work in Applied Linguistics

Credits: 3 (RD)
Field work providing working experience in language-teaching program or educational research organization.

Prerequisite(s): LING 326, 520, 521, or 582.

Notes: Contact the department one semester prior to enrollment. May be repeated for a maximum of 6 credits.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

LING 520 - Introduction to Linguistics

Credits: 3 (NR)
Introduces terminology and methodology of modern linguistic science, and detailed structural analysis of English phonology, morphology, and syntax.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

LING 521 - Applied Linguistics: Teaching English as a Second Language

Credits: 3 (NR)
Theories and basic principles of teaching a second language, especially as they relate to English language. Introduces students to methods of teaching English to speakers of other languages.

Prerequisite(s): LING 520, 690, or 786.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

LING 522 - Modern English Grammar
Overview of structure of modern English beginning with word classes and ending with analyses of complex sentences. Most topics introduced as problems of language description; in solving them, principles of syntactic argumentation are demonstrated. Students learn to tap intuitions about English to analyze grammatical structure.

Prerequisite(s): One course in linguistics, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

LING 523 - English Phonetics

Credits: 3 (NR)
In-depth description and analysis of sound system processes of modern English. Topics include segmental phonetics, syllable structure, connected speech, and prosodic phenomena. Also addresses implications for language instruction.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

LING 525 - Practicum in ESL

Credits: 3 (NR)
Involves preparation and presentation of lessons to adult English as second language (ESL) learners under guidance of mentor teacher and practicum professor. Field experience consists of observation and teaching in assigned ESL classroom.

Prerequisite(s): LING 521

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
Grading: Satisfactory/No Credit

LING 581 - Psycholinguistics

Credits: 3 (NR)
Study of mental and psychological aspects of human language, including aphasia, association, autism, language acquisition, verbal concept formation, and perception.

Prerequisite(s): LING 520, 690, or 786; or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

LING 582 - Second Language Acquisition
LING 650 - Introduction to Sociolinguistics

Credits: 3 (NR)
An overview of the study of language variation and change. Topics to be covered include the interaction between language and social factors (age, sex, social class), dialects of English, speech communities, language contact, and language and gender.

Prerequisite(s): LING 520, 523, or 690.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

LING 686 - Special Topics in Linguistics

Credits: 3 (NR)
Detailed advanced study of selected area of linguistics.

Prerequisite(s): Varies with topic.

Notes: Content varies. May be repeated once for credit with permission of department.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

LING 690 - Generative Phonology

Credits: 3 (NR)
Sound systems of English and other languages from the perspective of phonological theory. Topics include articulatory phonetics, distinctive features, nature of phonological representations and processes, rule ordering, abstractness, role of external evidence, and nonlinear phonology.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

LING 691 - Theories of Language
Seminar in linguistic metatheory. Examines wide range of theories about language and linguistic theory, including those of Saussure, Bloomfield, Chomsky, and others. Readings from original sources.

Prerequisite(s): LING 520, 690, or 786; or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

LING 692 - Phonology II

Credits: 3 (NR)
Recent trends in phonological theory. Topics include stress assignment, tone spreading, and vowel harmony, from within nonlinear framework. Discusses segmental structure and underspecification.

Prerequisite(s): LING 690.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

LING 770 - Research Methods

Credits: 3 (NR)
Conceptualizing and conducting second language research, including process of developing research questions, gathering data, obtaining permission from institutional review board, choosing data collection measures, and coding linguistic and nonlinguistic data.

Prerequisite(s): LING 582 and one of LING 690, 785, or 786; or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

LING 782 - Second Language Acquisition II

Credits: 3 (NR)
Advanced course in second-language acquisition theory. Detailed analysis of internal and external constraints. Variation addressed from linguistic, psychological, and environmental perspectives.

Prerequisite(s): LING 582 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

LING 785 - Semantics and Pragmatics
Developments in theoretical linguistics that explore how language form relates to meaning and context. Topics include reference, lexical semantics, logic, quantification, truth conditions and sentential meaning, presuppositions, and speech acts.

Prerequisite(s): LING 520, 690, or 786; or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

LING 786 - Syntax I

Credits: 3 (NR)
Nature and form of syntactic theory. Examines and analyzes properties of several major natural language syntactic structures.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

LING 787 - Syntax II

Credits: 3 (NR)
Theoretical treatment of syntactic phenomena that have emerged as standard problems for syntactic analysis. Problems include binding, extraction, and quantification. Extensive reading in primary theoretical literature.

Prerequisite(s): LING 786.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

LING 788 - Semantics and Pragmatics II

Credits: 3 (NR)
Advanced course in semantic and pragmatic theory. Study of meaning under truth-conditional, model-theoretic framework explored and related to syntax and pragmatics.

Prerequisite(s): LING 785 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

LING 798 - Directed Reading and Research

Credits: 1-3 (RD)
Reading, research, and writing on specific project under direction of departmental member.
Prerequisite(s): 18 credits of linguistics courses.

Notes: Open only to students who have completed at least 18 credits of LING courses. Prior approval by faculty member required. Written report required. May be repeated for a maximum of 6 credits with permission of director.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 0
Grading: Graduate Special

LING 799 - Thesis

Credits: 1-6 (RD)
Students who take LING 798 to develop thesis topic and then elect thesis option receive 3 credits after completing thesis. Students who do not take LING 798, or who take it to work on project unrelated to thesis, receive up to 6 credits after completing thesis.

Hours of Lecture or Seminar per week: 3-6
Hours of Lab or Studio per week: 0
Grading: Satisfactory/No credit only

LING 882 - Seminar in Language Acquisition

Credits: 3 (RT)
Advanced topics seminar in current language acquisition theory.

Prerequisite(s): LING 782 or permission of instructor.

Notes: Topics vary. May be repeated for a maximum of 9 credits.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

LING 886 - Advanced Syntax Seminar

Credits: 3 (RT)
Advanced course in current syntactic theory.

Prerequisite(s): LING 786, LING 787, or permission of instructor.

Notes: Topics vary. May be repeated for a maximum of 9 credits.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

LING 890 - Advanced Phonology Seminar
Advanced topics seminar in current phonological theory.

Prerequisite(s): LING 692 or permission of instructor.

Notes: Topics vary. May be repeated for a maximum of 9 credits.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

LING 897 - Independent study

Credits: 3 (RD)
Independent reading on a topic agreed on by student and faculty member.

Prerequisite(s): PhD rank or permission of instructor.

Notes: May be repeated

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

LING 898 - Advanced Qualifying Seminar

Credits: 3 (RT)
Work on PhD qualifying paper.

Prerequisite(s): Completion of 33 credits of core courses in linguistics.

Notes: May be repeated for a maximum of 6 credits.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

LING 998 - Doctoral Dissertation Proposal

Credits: 1-6 (RD)
Work on research proposal that forms basis for the doctoral dissertation.

Prerequisite(s): Advancement to candidacy.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0
Grading: S/NC
LING 999 - Doctoral Dissertation

Credits: 1-12 (RD)
Doctoral dissertation research and writing under direction of student's dissertation committee.

Prerequisite(s): Completion of LING 998.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0
Grading: S/NC

Management (MGMT)

Offered by the School of Management

If a student takes noncore, upper-level business courses before admission to SOM, those courses will not count on an undergraduate degree application for any major in the school, except as general elective credit. A grade of C or higher must be presented on the graduation application for each upper-level course in the major. Course prerequisites are strictly enforced. Degree status is defined as formal admission to BS degree status in SOM.

MGMT 301 - People and Organizations

Credits: 3 (NR)

Explores how individuals behave in the workplace, and how group and organizational structures affect behavior. Builds managerial skills required for working with and through others to reach organizational goals. Topics include individual differences, groups and teams, managing conflict, organizational ethics, culture, diversity, influence, leadership, and motivational theories and techniques. The course format provides opportunities to discuss and apply concepts.

School of Management students will not be permitted to make more than three attempts to achieve a C or higher in MGMT 301. Those who do not successfully complete this course within three attempts will be terminated from their major and will not be eligible to receive a degree from the School of Management. For more information about this, see the "Termination from the Major" section under Academic Policies

Prerequisite(s): Sophomore standing.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring, Summer

MGMT 312 - Principles and Practices of Management

Credits: 3 (NR)
Builds on fundamental theories and concepts learned in MGMT 301 by examining the nature of managerial work under a range of business models and under rapidly changing business conditions. Managerial functions and activities such as planning, strategizing, organizing, controlling, and directing are examined in depth and in the context of current organizational examples and scenarios.
MGMT 321 - Introduction to Human Resource Management

Credits: 3 (NR)
The field of human resource management examines what can or should be done to make workers more productive and satisfied. The course builds on MGMT 301 by introducing key concepts and techniques that managers need to attract, retain, develop, compensate, and motivate quality talent. Also emphasizes legal and ethical considerations in human resource management.

Prerequisite(s): C or higher in MGMT 301 and degree status. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

MGMT 412 - Diversity in Organizations

Credits: 3 (NR)
Builds on MGMT 301 by emphasizing intrapersonal, interpersonal, organizational, and societal phenomena relevant to issues of diversity. Examines phenomena and processes in general and with regard to specific dimensions such as gender, race, and ability. Designed to increase students' knowledge of diversity in organizations, understanding of others' perspectives, and ability to work well with people who differ from themselves.

Prerequisite(s): C or higher in MGMT 301 and degree status. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

MGMT 413 - Organizational Development and Management Consulting

Credits: 3 (NR)
Introduces theory and practice of organization development. Assumes some basic knowledge of organizational behavior, and addresses how to use knowledge about organizations to change them. Focuses on ways of understanding organizations with attention to theoretical underpinnings of field and diagnostic models, and processes for entering organizations. Later sessions focus on contracting, data collection, organizational diagnosis, data feedback, and change technologies.

Prerequisite(s): C or higher in MGMT 301; degree status. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring
MGMT 421 - Advanced Human Resource Management

Credits: 3 (NR)
Builds on MGMT 321 by using a case-based approach to deepen understanding of HRM practices. Students conduct projects requiring application of strategic HR processes. Includes discussion of advanced topics not thoroughly covered in MGMT 321. Relevant for management majors, particularly those seeking a human resource management career. Helps prepare for SHRM Professional in Human Resources certification exam.

Prerequisite(s): C or higher in MGMT 301 and 321, and degree status. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

MGMT 431 - The Legal Environment for Employee and Labor Relations

Credits: 3 (NR)
Examines the legal aspects of employee and labor relations from a managerial perspective. Topics include the employment at will doctrine; wrongful discharge; federal and state employment discrimination legislation; and regulation of employee welfare. Includes lectures, cases, readings.

Prerequisite(s): C or higher in MGMT 321 and BULE 302; degree status. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

MGMT 451 - New Venture Creation

Credits: 3 (NR)
Explains process of conceptualizing and creating new venture. Using central concepts of innovation, strategic opportunities, and globalization, students learn to evaluate new venture opportunities and consider external environment's impact. Students gain greater understanding of entrepreneurial concepts by developing business plans that address critical issues, including management composition and structure, effective business and functional strategies, operational logistics, legal issues, financial projections, and financing options.

Prerequisite(s): C or higher in MGMT 301 and degree status. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring
MGMT 461 - Cross Cultural and Global Management

Credits: 3 (NR)
Explores theory and practice of managing culturally diverse organizations in domestic and international contexts. Topics include management customs and practices in different world regions, cross-cultural communication and learning, and the developing culturally and internationally sophisticated employees and managers.

Prerequisite(s): C or higher in MGMT 301, and degree status. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

MGMT 462 - Honors Seminar in Management

Credits: 3 (NR)
Topic and format vary. In-depth study of topic of interest to managers and organizations.

Prerequisite(s): Invitation by professor.

Notes: Enrollment limited and competitive.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

MGMT 463 - Negotiations in Organizations

Credits: 3 (NR)
Focuses on theory, processes, and practice of negotiation within and across organizations, including attention to ethical issues. Explores systematic ways to increase quality of negotiated agreements, including methods of preparation and use of rational assumption, bidding and decision criteria. Format includes negotiation exercises, lecture, and discussion.

Prerequisite(s): C or higher in MGMT 301 and degree status. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

MGMT 464 - Teamwork and Interpersonal Skills

Credits: 3 (NR)
Focuses on intensive development of high professional-level skill set for collaboration and leadership in contemporary environments. Builds on content introduced in MGMT 301, 312. Attention to developing personal leadership capabilities, collaborating in traditional and virtual environments, improving group processes, project management, tolerating ambiguity, improving communication, creative problem solving, time management, coaching, and empowering employees.
**Prerequisite(s):** C or higher in MGMT 301 and degree status. Prerequisite enforced by registration system.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall, Spring

---

**MGMT 471 - Competitive Strategy**

Credits: 3 (NR)  
Explores industry structures and competitive behavior of firms. Attention to how firm uses tangible, intangible, and human resources to develop sustainable competitive advantage, and how competitors interact in marketplace. Introduces tools and concepts to analyze industry dynamics and competitive interactions of firms in these industries.

**Prerequisite(s):** C or higher in MGMT 301 and degree status. Prerequisite enforced by registration system.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**MGMT 491 - Current Topics in Management**

Credits: 3 (RD)  
Advanced study of management concepts and selected topics. Incorporates intensive analysis of management problems of long-term strategic significance or current urgency for organizational planning and operations. Includes significant contemporary research findings.

**Prerequisite(s):** C or higher in MGMT 312; degree status. Prerequisite enforced by registration system.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall, Spring

---

**MGMT 499 - Independent Study**

Credits: 1-3 (RT)  
Research and analysis of selected problems or topics in management must be arranged with instructor and approved in writing by associate dean for undergraduate programs.

**Prerequisite(s):** Management majors with at least 9 upper-level management credit hours.

**Notes:** Written report required.

**Hours of Lecture or Seminar per week:** 1-3  
**Hours of Lab or Studio per week:** 0
Management Information Systems (MIS)

Offered by the School of Management

If a student takes noncore, upper-level business courses before admission to SOM, those courses will not count on an undergraduate degree application for any major in the school, except as general elective credit. A grade of C or higher must be presented on the graduation application for each upper-level course in the major. Course prerequisites are strictly enforced. Degree status is defined as formal admission to BS degree status in SOM.

MIS 102 - Spreadsheet Applications for Business

Credits: 1 (NR)
Hands-on course using popular spreadsheet package. Business examples used to teach fundamentals of spreadsheets and their use in business applications.

Hours of Lecture or Seminar per week: 2-3
Hours of Lab or Studio per week: 1
Grading: S/NC
When Offered: Fall, Spring, Summer

MIS 301 - Introduction to Business Information Systems

Credits: 3 (NR)

Introduces fundamentals of hardware, software, and networking. Emphasizes role of technology in improving contemporary business processes and competitive advantage. Includes basic relational concepts, hands-on experience in building business database applications and decision support using spreadsheet software.

School of Management students will not be permitted to make more than three attempts to achieve a C or higher in MIS 301. Those who do not successfully complete this course within three attempts will be terminated from their major and will not be eligible to receive a degree from the School of Management. For more information about this, see the "Termination from the Major" section under Academic Policies

Prerequisite(s): Sophomore standing.

Notes: Projects required.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring, Summer

MIS 302 - Introduction to Programming for Business Applications

Credits: 3 (NR)

Covers design and implementation of program data structures and algorithms to solve business problems using structured
programming techniques. Students become familiar with program development life cycle using standard programming language such as Visual BASIC.NET supported by a modern Integrated Development Environment (IDE). Students complete assignments involving development of real-life business application.

**Prerequisite(s):** Degree status.

**Notes:** IT 108 highly recommended but not required.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall, Spring

---

**MIS 310 - Database Management Systems**

Credits: 3 (NR)  
Introduces principles of designing and manipulating relational databases with a focus on business applications. Theoretical database concepts and hands-on experience with a relational package. Term project requiring implementation of a substantial business database application.

**Prerequisite(s):** C or higher in MIS 301, degree status. Prerequisite enforced by registration system.

**Notes:** SOM majors may not receive credit for both MIS 310 and IT 214. Requires hands-on implementation using software package.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall, Spring, Summer

---

**MIS 320 - Networks and Security**

Credits: 3 (NR)  
Introduces students to fundamentals of networking technologies and their role in businesses. Emphasis is on understanding the business implications of different networking technologies and solutions. Students learn to identify and understand the business requirements, and bring together the different technological components to design the required communication solutions. Also focuses on the types of security threats to the business network infrastructure, and approach to tackling such threats through business practices combined with appropriate technological solutions.

**Prerequisite(s):** C or higher in MIS 301, degree status. Prerequisite enforced by registration system.

**Notes:** The course also includes lab work and exercises.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall, Spring

---

**MIS 330 - Systems Analysis and Design**
Understanding systems analysis and design methods is a necessary skill for contemporary business analysts, managers, software engineers and system users. Provides students with the foundations for effectively using modern systems analysis and design tools and methodologies for developing modern software and applications. Topics include systems planning and feasibility analysis, requirements analysis, economics, systems design and project management.

Prerequisite(s): C or higher in MIS 310, degree status. Programming course recommended. Prerequisite enforced by registration system.

Notes: Requires team project.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring, Summer

MIS 411 - Management and Control of Information Systems

Credits: 3 (NR)
Managerial perspective on issues arising in managing information systems through their life-cycle. The topics include using different methodologies for estimating software development costs, maintenance costs, systems project management, and pricing information products and services. The course also covers methodologies for monitoring performance of information systems, and ways for assessing the strategic and business value of use of information technology.

Prerequisite(s): C or higher in MIS 301, degree status. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

MIS 412 - E-Business Systems Development

Credits: 3 (NR)
Introduces students to the development of web-based information systems for E-business. Students learn to develop web-based database applications for eCommerce using ASP.NET. Also covers Web 2.0 technologies and contemporary business trends and issues related to web application development. Emphasizes technologies, methods, and application development tools.

Prerequisite(s): C or higher in MIS 301, degree status. Prerequisite enforced by registration system.

Notes: Requires team project and computer lab.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

MIS 430 - Data Warehousing and Data Mining
Deals with the challenges faced by businesses in managing large amounts of data and making meaningful use of this data for informed decision making. Introduces students to data warehousing fundamentals, practices, and technologies; and their application to solving business problems. Specific emphasis is on designing of data warehouse to meet the business requirements and hands-on learning of the design principles through implementation on commercially used data warehouse technologies. Also introduces students to OLAP solutions and data mining approaches to supporting business decision making.

**Prerequisite(s):** C or higher in MIS 310, degree status. Prerequisite enforced by registration system.

**Notes:** Term project required.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall, Spring

---

**MIS 435 - Knowledge Management**

Credits: 3 (NR)  
Focuses on new trends on how knowledge management works for organizations, best strategy for such transition, and what are knowledge management elements.

**Prerequisite(s):** C or higher in MIS 310, degree status. Prerequisite enforced by registration system.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall, Spring

---

**MIS 440 - E-Commerce Business Models and Applications**

Credits: 3 (NR)  
Introduces students to business models used in E-commerce and E-business. Covers B2B, B2C, and C2C business models and also introduces current business trends of the Web 2.0 era and the core concepts of the information economy, networked business models, and the social web. The class will discuss Blogging, Wikis, Social Networks, Information Goods, and E-Tailing. Students complete a group project in which they create a business plan for a viable Internet-based business.

**Prerequisite(s):** C or higher in MIS 310, degree status. Prerequisite enforced by registration system.

**Notes:** Requires a term project.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall, Spring

---

**MIS 462 - Honors Seminar in Management Information Systems**

Credits: 3 (NR)  
Topic and format vary. In-depth study of a topic in the area of information technology management. Enrollment limited and
MIS 491 - Seminar in Management Information Systems

Credits: 3 (RT)
Analyzes selected topics that highlight latest developments in information resource management field, including contemporary research findings and case studies of information systems in business and other organizations.

Prerequisite(s): C or higher MIS 301, degree status. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

MIS 499 - Independent Study in Management Information Systems

Credits: 1-3 (RT)
Research and analysis of selected problems or topics in information resource management.

Prerequisite(s): C or higher in MIS 301; degree status. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

Management of Secure Information Systems (MSEC)

MSEC 510 - Foundations of Cyber Security

Credits: 2 (NR)
Provides an overview of the introductory topics in cyber security, which will be the basis for the other security-related in the MSIS. Topics include basic concepts on CIA (confidentiality, integrity, and availability), risk management, disaster recovery, access control, basic cryptography and software application vulnerabilities.

Prerequisite(s): Admission to the Executive MS in Management of Secure Information Systems.

Notes: 4 class sessions will be 3.5 hours long.
1 class session will be 2 hours and 20 minutes long.
MSEC 511 - Security Practices in the Enterprise

Credits: 2 (NR)
Provides the practices and methods currently used by information security professionals to manage and operate the secure IT infrastructures in the enterprise industry and in the US Federal Sector. It covers tools and knowledge required to design, execute, and/or evaluate the INFOSEC standards and procedures required of government and industry. The topic includes security operation center (SOC), network security, malware countermeasures, operational systems security, risk analysis and incident response practices.

Prerequisite(s): MSEC 510.

Notes: 4 class sessions will be 3.5 hours long.
1 class session will be 2 hours and 20 minutes long.
(5 classes; 16 hours and 20 minutes total)

MSEC 520 - Networking Principles

Credits: 1 (NR)
Introduction to the principles guiding the design and operation of modern communication networks; using the structure provided by layered service models, this course explores systematically the architecture and protocols of large, decentralized networks. Topics include medium access control in local area networks, switching, routing, and addressing, reliable and secure transport, flow and congestion control. Throughout, examples are drawn from the suite of Internet protocols.

Prerequisite(s): Admission to the Executive MS in Management of Secure Information Systems.

MSEC 620 - Networking Security

Credits: 2 (NR)
Provides a comprehensive introduction to network security concepts and problems and the mechanisms and tools to secure networks. Focuses on the Internet, discusses the threats to and from the Internet and examines existing Internet security techniques and protocols and their limitations. Topics include secret key and public key cryptography, Hash algorithms, authentication, IPSEC/VPN, IPSEC key exchange, SSL/TLS, firewall, anonymous communication, and VoIP security.
MSEC 630 - Secure Information System Governance, Regulation, and Compliance

Credits: 2 (NR)
Provides insight into secure information system governance, regulations, and compliance including noteworthy legislation, regulations, and compliance issues as well as commonalities and significant differences between departments and agencies within the Federal Executive Branch (FEB). The course is presented as formal lectures complemented by group discussion. Each topic is addressed as part of the larger Secure Information System structure.

Prerequisite(s): MSEC 510

Notes: 4 class sessions will be 3.5 hours long.
1 class session will be 2 hours and 20 minutes.
(5 total class sessions; 16 hours and 20 minutes total).

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring, Summer

MSEC 640 - Privacy and Ethics in an Interconnected World

Credits: 2 (NR)
Course considers key ethical issues for professionals in network security in an emerging age of internet access, virtual environments, and wireless capabilities. Intellectual property, privacy, computer abuse, free speech, and commerce are examined

Prerequisite(s): Admission to the Executive MS in Management of Secure Information Systems program.

Notes: 4 class sessions will be 3.5 hours long.
1 class session will be 2 hours and 20 minutes long.
(5 class sessions; 16 hours 20 minutes total)

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring, Summer

MSEC 641 - Enterprise Security Threats

Credits: 1 (NR)
Provides a broad exposition of emerging cyber-security threats for large-scale enterprises: Denial of Service (DoS), insider attacks, remote exploitation. It covers defenses that may mitigate or curtail some aspects of these emerging security threats.

Prerequisite(s): MSEC 511.
MSEC 642 - Enterprise Security Technologies

Credits: 2 (NR)
Provides an overview of enterprise security tools used in advanced security IT departments of enterprises today. In addition to understanding the tools, their capabilities, and their gaps, students participate in hands-on laboratory exercises with enterprise security tools.

Prerequisite(s): MSEC 511.

Notes: 4 class sessions will be 3.5 hours long.
1 class session will be 2 hours and 20 minutes long.
(5 class sessions; 16 hours 20 minutes total)

MSEC 650 - Seminar: Enterprise Security Case Studies

Credits: 1 (NR)
Provides an exposition of large enterprise security systems including operational requirements, threat model, security analysis, economic analysis, and defense posture options that expose the operational and economic trade-offs when architecting Enterprise security.

Prerequisite(s): MSEC 641.

MSEC 710 - Global Residency

Credits: 1-4 (RD)
Students spend a week in an international residency. Emphasis is on how other nations deal with management of secure information system, the management of those systems, and related public policy issues. Corporate site visits are combined with presentations by professors from universities outside the United States and relevant practitioners. Students are required to write a paper summarizing their observations and attend pre-residency preparatory sessions.

Equivalent to TECM 757

Prerequisite(s): Admission to Executive MS in Management of Secure Information Systems.

Hours of Lecture or Seminar per week: 1-4
MSEC 720 - Capstone Project in Management of Secure Information Systems

Credits: 1-3 (RD)
Teams undertake a strategic evaluation and plan for the management of secure information systems. They develop plans that include technical, organizational, and policy aspects. A report is produced and presented to the entire cohort for discussion.

Equivalent to TECM 737

Prerequisite(s): Admission to Executive MS in Management of Secure Information Systems.

Marketing (MKTG)

Offered by the School of Management

If a student takes noncore, upper-level business courses before admission to SOM, those courses will not count on an undergraduate degree application for any major in the school, except as general elective credit. A grade of C or higher must be presented on the graduation application for each upper-level course in the major. Course prerequisites are strictly enforced. Degree status is defined as formal admission to BS degree status in SOM.

MKTG 301 - Principles of Marketing

Credits: 3 (NR)

Examines marketing principles and practices for analyzing, creating, delivering, capturing, and communicating value to customers. Focuses on managing customer relationships using market-driven strategies, particularly segmentation, targeting, and positioning. The role of customer satisfaction in achieving organizational objectives and ethical decision making in a global economy are also emphasized.

School of Management students will not be permitted to make more than three attempts to achieve a C or higher in MKTG 301. Those who do not successfully complete this course within three attempts will be terminated from their major and will not be eligible to receive a degree from the School of Management. For more information about this, see the "Termination from the Major" section under Academic Policies.

Prerequisite(s): Grade of C or higher in ACCT 203 or ACCT 204. Grade of C or higher in ECON 103; sophomore standing. Prerequisite enforced by registration system.
MKTG 311 - Sales Management

Credits: 3 (NR)
Familiarizes students with marketing-sales interfaces including sales force role and capabilities, personal selling strategies, organizational relationships, and responsibilities of sales managers including training, motivating, and evaluating sales force.

Prerequisite(s): C or higher in MKTG 301, degree status. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

MKTG 312 - Consumer Behavior

Credits: 3 (NR)
Marketing strategy implications of internal and external influences on consumer decision making, purchase, and consumption behaviors. Emphasizes demographics, lifestyle, situation, perception, learning, and attitude formation and change, focusing on customer segmentation, satisfaction and loyalty.

Prerequisite(s): C or higher in MKTG 301, degree status. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

MKTG 313 - Integrated Marketing Communications

Credits: 3 (NR)
Examines development of integrated communications programs, including advertising, sales promotion, public relations, direct marketing, and other communication tools. Focuses on setting communications objectives and budgets, media planning, creative strategy, execution, and evaluation. Provides skills for analyzing the strengths, weaknesses and synergies of marketing communication tools.

Prerequisite(s): C or higher in MKTG 301, degree status. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

MKTG 315 - Internet Marketing

Credits: 3 (NR)
Explores impact of Internet technology on marketing strategy and practice. Topics include online advertising campaigns (focusing on search marketing), web site usability and content, and the use of social and interactive media to build customer
relationships and foster brand loyalty.

Prerequisite(s): C or higher in MKTG 301, degree status. Prerequisite enforced by registration system.

**MKTG 332 - Retailing and E-Commerce Management**

Credits: 3 (NR)
Examination of retailing as a specialized economic and social institution within the distribution process and as it relates to overall marketing activities. The planning and implementing of store and nonstore (catalog, Internet) retail marketing strategies are addressed. Critical decision alternatives, variables, forces, and processes are considered from a managerial perspective.

Prerequisite(s): C or higher in MKTG 301, degree status. Prerequisite enforced by registration system.

**MKTG 333 - Business to Business Marketing**

Credits: 3 (NR)
Examines unique challenges and opportunities of marketing systems among suppliers, manufacturers, resellers, and government. Focuses on developing a capability to identify and nurture long-term B2B relationships. Provides tools and techniques commonly leveraged by B2B marketers to develop these relationships with their clients.

Prerequisite(s): C or higher in MKTG 301, degree status. Prerequisite enforced by registration system.

**MKTG 351 - Marketing Research Techniques and Applications**

Credits: 3 (NR)
Presents the concepts and techniques underlying the marketing research process and their role in managerial decision making. Focuses on skills required to conduct a marketing research project: qualitative and quantitative research designs, survey methodology, instrument creation, sampling procedures, data collection, data analysis, and reporting of findings.

Prerequisite(s): C or higher in OM 210 and MKTG 301, degree status. Prerequisite enforced by registration system.
MKTG 407 - International Marketing

Credits: 3 (NR)
Multidisciplinary approach to international marketing from viewpoint of business management. Examines major marketing issues affecting companies operating in a global environment. Students achieve understanding of economic, political, and cultural differences among nations as they affect marketing opportunities and operations, and develop skills to identify and evaluate international marketing opportunities.

Prerequisite(s): C or higher in MKTG 301, degree status. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

MKTG 451 - Competitive Intelligence and Information Security

Credits: 3 (NR)
Develops understanding of benefits to commerce and society because of Internet-based commerce, escalating threats against Internet-based marketing initiatives, and protection of knowledge-based assets of firms.

Prerequisite(s): C or higher in MKTG 301, degree status. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

MKTG 455 - Ethnic and Multicultural Marketing

Credits: 3 (NR)
Ethnic and Multicultural Marketing examines the critical marketing issues and opportunities that have arisen with the changing U.S. demographics. The focus is domestic markets. The growth in minority populations indicates a need for specialized approaches for the entire marketing mix. Segmentation can be powerful when considering non-mainstream markets if the marketer understands and capitalizes on the different approaches cultural and ethnic groups use as consumers.

Prerequisite(s): "C" or higher in MKTG 301; Degree Status. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

MKTG 462 - Honors Seminar in Marketing

Credits: 3 (NR)
Topic and format vary. In-depth study of topic of interest to managers and organizations.
Prerequisite(s): Degree status in MKTG major; senior standing; permission of department.

Notes: Enrollment limited and competitive.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

MKTG 471 - Marketing Management

Credits: 3 (NR)
Emphasizes managerial aspects of marketing, including developing marketing strategies and plans, and integrating specific elements of marketing process. Emphasizes case analysis.

Prerequisite(s): Senior standing; C or higher in MKTG 312 and 351; degree status. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring, Summer

MKTG 481 - Marketing in the Nonprofit Sector

Credits: 3 (NR)
Examines the unique challenges of applying marketing principles and practices to not-for-profit groups such as human service and philanthropic organizations, museums, health and wellness advocates, educational institutions, industry associations and government. Emphasis on case studies, team work, and projects.

Prerequisite(s): C or higher in MKTG 301, degree status. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring

MKTG 491 - Special Topics in Marketing

Credits: 3 (RT)
In-depth treatment in seminar format of contemporary topics in marketing. Culminates in preparation of substantial paper and oral presentation.

Prerequisite(s): C or higher in MKTG 301, 9 credits of marketing, degree status. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring

MKTG 499 - Independent Study
Primary research proposal in marketing area. Requires prior approval from instructor and associate dean for undergraduate programs.

Prerequisite(s): 90 credits (senior class standing) and a minimum of 24 credits of business courses, including principles of marketing, finance, and management.

Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring, Summer

Master of Business Administration (MBA)

Offered by the School of Management

MBA 603 - Managerial Economics and Decisions of the Firm

Credits: 0-3 (RD)
Provides fundamental understanding of applying microeconomics concepts to managerial decision making. Explores principles of microeconomic theory, including market supply and demand, production and cost functions, industry structure, and product and resource pricing.

Prerequisite(s): Admission to the MBA or MSA program or permission of the program director.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
Grading: Graduate Special.
When Offered: Fall, Spring

MBA 612 - Managing Costs and Evaluating Performance

Credits: 1.5 (NR)
Examines impact of cost and cost allocation on performance and evaluation.

Prerequisite(s): Admission to the MBA or MSA program or permission of the program director.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring, Summer

MBA 613 - Financial Reporting and Decision Making

Credits: 0-3 (RD)
Foundation course focusing on economics and analysis of business transactions and related financial reporting issues. Topics include introduction to accounting framework used in financial reporting; and analysis of financial statements, economic events
and their impact on financial reports, and impact of accounting methods on financial reports.

**Prerequisite(s):** Admission to MBA program.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**Grading:** Graduate Special.  
**When Offered:** Fall, Spring

---

**MBA 623 - Marketing Management**

Credits: 0-3 (RD)  
Develops market-based knowledge and skills for effective marketing decision making, strategy design, implementation, and evaluation in wide variety of institutional and competitive situations. Addresses the importance of companies being market-driven and customer-focused.  
Emphasis on case studies, team work, and projects.

**Prerequisite(s):** Admission to MBA program.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**Grading:** Graduate Special.  
**When Offered:** Fall, Spring

---

**MBA 633 - Statistics for Business Decision Making**

Credits: 0-3 (RD)  
Uses statistical methods as analytical tools for understanding and solving business problems and supporting business decision making. Includes descriptive statistics, sampling, inferencing and regression. Extensive use of applied business scenarios to illustrate concepts and computer software for data analysis.

**Prerequisite(s):** Admission to the MBA or MSA program or permission of the program director.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**Grading:** Graduate Special.  
**When Offered:** Fall, Spring

---

**MBA 638 - Operations Management**

Credits: 0-3 (RD)  
Focuses on design, planning, and control activities to produce and deliver goods and services in modern organizations. Introduces wide range of operations management decisions, such as operations strategy, process analysis and design, capacity planning, supply chain management, total quality management, and project management. Uses quantitative modeling, case studies, and computer software to analyze and solve operations management problems.

**Prerequisite(s):** Admission to MBA or MSA program.
MBA 643 - Managerial Finance

Credits: 0-3 (RD)
Introduces theory and practice of finance within corporations. Topics include intertemporal choice, valuation, capital budgeting and structure, working capital management, and risk and return analysis.

Prerequisite(s): Admission to the MBA or MSA program or permission of the program director.

MBA 653 - Organizational Behavior

Credits: 0-3 (RD)
Emphasizes development of conceptual tools for understanding and analyzing individual and group behavior in organizations and organizational processes. Considerable focus on developing relevant skills for working in groups and teams. Lectures, discussions, case analyses, and class exercises.

Prerequisite(s): Admission to MBA or MSA program.

MBA 662 - Management of Information Technology

Credits: 1.5 (NR)
The strategic, economic and managerial aspects of managing an organization's IT assets are covered. The business value of IT is understood and assessed in context of its impact on the organization's structure and strategy. The course includes discussion on major issues pertaining management of IT infrastructure.

Prerequisite(s): Admission to the MBA or MSA program of permission of the program director.
MBA 673 - Legal Environment for Management

Credits: 1.5 (NR)
Examines the managerial impact of the law upon decision-making processes in business organizations. Lectures as well as discussions of judicial opinions and readings.

Prerequisite(s): Admission to MBA program or MSA program or permission of the program director.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring, Summer

MBA 674 - Ethical and Social Environment of Business in the 21st Century

Credits: 1.5 (NR)
Strengthens the student's ability to identify, critically analyze, appropriately respond to, and provide leadership regarding the issues of ethical and socially responsible behavior which they may confront as employees and eventually as managers of people, objects, and organizations.

Prerequisite(s): Admission to the MBA or MSA program or permission of the program director.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring, Summer

MBA 678 - Strategy and Organizational Leadership

Credits: 0-3 (RD)
Capstone course focusing on strategy development at business unit and corporate level. Cases, readings, and project format familiarize students with strategic management function and help them develop analytical, organizational, and managerial skills to analyze complex business situations. Provides opportunities to integrate knowledge gained in prior course work.

Prerequisite(s): Admission to MBA program.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
Grading: Graduate Special.
When Offered: Fall, Spring

MBA 701 - Business Analysis and Valuation

Credits: 0-3 (RD)
Develops framework for business analysis and valuation using financial statement data. Analyzes management decisions such as equity valuation, creditworthiness, merger valuation, corporate financial structure, and management communication strategy.

Equivalent to ACCT 701.
Prerequisite(s): Completion of MBA or MSA core requirements or permission of the program director.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
Grading: Graduate Special.
When Offered: Spring

MBA 702 - Corporate Financial Policy

Credits: 0-3 (RD)
Applies theories and methods of corporate financial management to series of complex cases. Topics include capital projects as real options, cost of capital and capital structure, firm valuation, project finance, and merger and acquisition analysis.

Prerequisite(s): Completion of MBA core requirements, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
Grading: Graduate Special.
When Offered: Fall

MBA 703 - Financial Markets

Credits: 0-3 (RD)
Explores relationship among financial markets including global equity markets, U.S. Treasury securities, and exchange-traded and over-the-counter financial derivative instruments such as futures, options, swaps, and asset-backed securities.

Prerequisite(s): Completion of MBA core requirements, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
Grading: Graduate Special.
When Offered: Summer

MBA 704 - Risk Management and Financial Innovation

Credits: 0-3 (RD)
Considers how to identify, measure, and manage financial risk using innovative financial instruments and diversification strategies. Focuses on derivatives as tools in risk-management plans.

Prerequisite(s): Completion of MBA core requirements, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
Grading: Graduate Special.
When Offered: Fall
MBA 705 - Venture Capital and Private Finance

Credits: 0-3 (RD)
Considers market microstructure of venture capital and private finance: costs and benefits from employing private financing, interaction between the financiers and entrepreneurs, financial analysis of potential ventures, and investor exit strategies.

Prerequisite(s): Completion of MBA core requirements, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
Grading: Graduate Special.
When Offered: Spring

MBA 706 - Investment Analysis

Credits: 0-3 (RD)
Focuses on analyzing equity securities and debt instruments given implications of efficient market hypothesis and modern capital market theory.

Prerequisite(s): Completion of MBA core requirements, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
Grading: Graduate Special.
When Offered: Spring

MBA 708 - Taxes and Business

Credits: 0-3 (RD)
Provides framework for making managerial decisions in global tax environment. Examines business decisions such as location of facilities, employee compensation, mergers and acquisitions, capital and asset structure, and business form.

Equivalent to ACCT 708.

Prerequisite(s): Completion of MBA core requirements, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
Grading: Graduate Special.

MBA 711 - Entrepreneurship

Credits: 0-3 (RD)
Considers fundamental aspects of entrepreneurship and process of new venture creation. Draws on broad range of business
disciplines including management, marketing, finance, and accounting to develop evaluation and execution skills.

**Prerequisite(s):** Completion of MBA core requirements, or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**Grading:** Graduate Special.  
**When Offered:** Fall

---

**MBA 712 - Project Management**

Credits: 0-3 (RD)  
Focuses on designing, planning, monitoring, and controlling projects. Involves practical examination of how projects should be managed from start to finish, including specific emphasis on how to avoid common pitfalls. Includes hands-on experience with a common project management software package.

**Prerequisite(s):** Completion of MBA core requirements, or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**Grading:** Graduate Special.  
**When Offered:** Fall

---

**MBA 713 - Human Resource Management**

Credits: 0-3 (RD)  
Strategic human resource functions from both a general manager and HR perspective. Students become acquainted with current talent management matters facing organizations in today's business environment and are challenged to generate and debate creative solutions to prevalent issues. Topics include hiring, firing, rewarding, compensating, managing performance, career development, global HR issues, and workplace security.

**Prerequisite(s):** Completion of MBA core requirements, or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**Grading:** Graduate Special.  
**When Offered:** Spring

---

**MBA 714 - Managing Growth of Small Businesses**

Credits: 0-3 (RD)  
Focuses on unique challenges faced by small and entrepreneurial firms that seek long-term growth. Builds on concepts and knowledge of creating start-up company, and introduces processes and strategies required to become significant player in industry segment. Designed for students interested in understanding opportunities and problems in their own businesses, employment in small or entrepreneurial businesses, or exploring corporate entrepreneurship within large firms.

**Prerequisite(s):** Completion of MBA or MSA core requirements or permission of the program director.
MBA 715 - Advanced Project and Program Management

Credits: 0-3 (RD)
Examines advanced topics in project and program management with specific attention to issues and skills that managers need to effectively manage multiple projects and programs. Topics include project selection, multiple project resource allocation, and organization of project office.

Prerequisite(s): Completion of MBA core requirements, or permission of instructor.

MBA 716 - International Business Strategy

Credits: 0-3 (RD)
Focuses on the globalization of business activities, the strategic challenges faced by companies in global competition, and how companies strategically respond to these new competitive challenges.

Prerequisite(s): Completion of MBA core requirements

MBA 717 - International Finance

Credits: 0-3 (RD)
Advanced analysis of managing firm's international financial operations. Topics include currency risk, political risk, returns and funding of international projects, international markets and accounting, and cost of capital. Lecture, discussion, readings, and cases.

Prerequisite(s): Completion of MBA or MSA core requirements or permission of the program director.
MBA 718 - International Marketing

Credits: 0-3 (RD)
Addresses marketing process for products and services within major international markets. Topics include marketing mix strategies using standardization, localization, or globalization approaches. Emphasizes the introduction of service innovations and new products in the global market.

Prerequisite(s): Completion of MBA or MSA core requirements or permission of the program director.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
Grading: Graduate Special.
When Offered: Spring

MBA 719 - Entrepreneurship Laboratory

Credits: 1.5 (RT)
Permits MBA students to work with entrepreneurial community to gain first-hand knowledge of process of soliciting second-stage funding for new businesses, evaluating applications for second-stage funding, consulting for entities seeking funding, and negotiations for obtaining second-stage funding.

Prerequisite(s): Completion of MBA or MSA core requirements or permission of the program director.

Notes: May be repeated three times in same semester.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 1.5
When Offered: Fall, Spring, Summer

MBA 721 - Marketing Decision Systems

Credits: 0-3 (RD)
Develops skills to plan and implement effective marketing research studies. Topics include research design, data collection, statistical analysis, and use of database systems. Offers perspective on how managers can use market data to develop successful product or service strategies.

Prerequisite(s): Completion of MBA core requirements, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
Grading: Graduate Special.
When Offered: Fall

MBA 722 - Consumer Behavior
An integrated analysis of internal and external influences on consumer decision making, purchase, and consumption behaviors with attention to marketing strategy implications. Emphasizes demographics, lifestyle, situation, perception, learning, and attitude formation and change, focusing on customer segmentation, satisfaction, loyalty, and product-person relationships.

**Prerequisite(s):** Completion of MBA core requirements, or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**Grading:** Graduate Special.  
**When Offered:** Spring

### MBA 723 - Supply Chain Management

Credits: 0-3 (RD)  
Examines logistics of supply chain systems, including inventory management, distribution channels, and information systems. Emphasizes strategic alliances and international issues.

**Prerequisite(s):** Completion of MBA core requirements, or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**Grading:** Graduate Special.  
**When Offered:** Spring

### MBA 724 - Marketing Communications

Credits: 0-3 (RD)  
Examines all forms of communication and sources of brand or company contacts as potential message channels in building relationship with customers. Focuses on integrated planning process for all communication elements, including consumer and trade advertising, public relations, direct and database marketing, promotions, and sales presentations to achieve synergy in communicating with various constituencies.

**Prerequisite(s):** Completion of MBA core requirements, or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**Grading:** Graduate Special.  
**When Offered:** Fall

### MBA 725 - Leadership

Credits: 0-3 (RD)  
Overview of major conceptualizations of leadership and motivation in organizations. Integrates theory, research, and applications. Students apply principles of leadership and motivation to their own work situations and case evaluation.

**Prerequisite(s):** Completion of MBA core requirements, or permission of instructor.
MBA 726 - Negotiations

Credits: 0-3 (RD)
Focuses on theory, processes, and practice of negotiation within and across organizations, including attention to ethical issues. Explores systematic ways to increase quality of negotiated agreements, including methods of preparation, effective communication, and various strategies to increase power. Format includes negotiation exercises, lecture, and discussion.

Prerequisite(s): Completion of MBA core.

MBA 730 - Management of Technology and Innovation Processes

Credits: 0-3 (RD)
Students will develop a strong conceptual foundation for managing technological innovation. It introduces frameworks for analyzing how firms can create, commercialize and capture value from products and services. Topics covered comprise the formulation of innovation strategies, the process of developing new products and services, and how to create and manage an innovative organization to drive revenue growth.

Prerequisite(s): Admission to the MBA program or permission of the program director.

MBA 731 - Business Application and Life Cycle Management

Credits: 0-3 (RD)
Studies methods and tools for analyzing and designing business information systems with emphasis on business processes. Topics include data modeling, process modeling, interaction analysis, and user interface.

Prerequisite(s): Completion of MBA or MSA core requirements or permission of the program director.
MBA 732 - Knowledge Management

Credits: 0-3 (RD)
Examines firms that use knowledge management principles and approaches: intellectual capital, human capital, customer capital, tacit and explicit knowledge, new role of chief knowledge officer, leveraging of knowledge management.

Prerequisite(s): Completion of MBA core requirements, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
Grading: Graduate Special.
When Offered: Summer

MBA 733 - Business Data Communications

Credits: 3 (NR)
Introduces data communications and telecommunications technologies and application in business, including LANs, WANs, PBXs, voice services, network operating systems, corporate internetworking, and Internet. Analyzes data communications industry, and business applications in manufacturing and service sectors, along with regulatory issues and impact of globalization.

Prerequisite(s): Completion of MBA core requirements, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

MBA 734 - Electronic Commerce and E-Business

Credits: 0-3 (RD)

Prerequisite(s): Completion of MBA core requirements, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
Grading: Graduate Special.
When Offered: Spring

MBA 735 - Systems Thinking for Business Performance

Credits: 0-3 (RD)
The business world is increasingly interconnected. "Systems Thinking" is a way to understand the structure of a system and its relationship to behavior, and provides a foundation for making more effective management decisions in an interconnected world.
The course introduces fundamentals of systems thinking, and involves hands-on use of "systems thinking" tools and techniques to improve performance in a variety of situations spanning different industries.

Prerequisite(s): Completion of MBA or MSA core requirements or permission of the program director.

Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0  
Grading: Graduate Special.  
When Offered: Summer

MBA 737 - Information Technology Governance and Policy

Credits: 0-3 (RD)
Considers specific objectives of IT governance and policy, frameworks that help chart roadmap for this function, and tools and techniques used in specific areas of IT governance.

Prerequisite(s): Completion of MBA or MSA core requirements or permission of the program director.

Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0  
Grading: Graduate Special.

MBA 738 - Business Intelligence and Data Mining

Credits: 0-3 (RD)
Examines how data warehouses and data mining are used to help businesses successfully gather, structure, analyze, understand and act on relevant data, both operational and contextual.

Prerequisite(s): Completion of MBA core requirements, or permission of instructor.

Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0  
Grading: Graduate Special.  
When Offered: Fall

MBA 741 - Information Technology Auditing

Credits: 0-3 (RD)
Introduces methodologies to assess security and control issues concerning accounting and other information systems. Key feature of course is applying computer-assisted audit tools and techniques to test effectiveness of application.

Equivalent to ACCT 741

Prerequisite(s): Admission to MSA or MBA program, or permission of program director.

Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0
MBA 742 - Corporate Governance and Ethics

Credits: 0-3 (RD)
Focuses on developing understanding of corporate governance issues and ethical decision-making. Topics include examination of internal and external and international governance issues, and ethical analysis in current business environment.

Equivalent to ACCT 742

Prerequisite(s): Admission to MSA or MBA program, or permission of program director.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
Grading: Graduate Special.
When Offered: Spring

MBA 743 - Corporate Financial Reporting

Credits: 0-3 (RD)
Addresses contemporary issues in corporate financial reporting. Focuses on role of financial reporting in providing decision-useful information to participants of capital market, and theoretical and empirical assessments of performance.

Equivalent to ACCT 743

Prerequisite(s): Admission to MSA or MBA program, or permission of program director.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
Grading: Graduate Special.
When Offered: Summer

MBA 744 - Fraud Deterrence and Detection

Credits: 0-3 (RD)
Introduces strategies and techniques for fraud prevention and detection. Focuses on financial fraud such as bribery, contract rigging and kickbacks, embezzlement, fraudulent financial reporting, payroll fraud, and misappropriation of inventory and other assets.

Equivalent to ACCT 744

Prerequisite(s): Admission to MSA or MBA program, or permission of program director.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
MBA 745 - International Financial Reporting

Credits: 0-3 (RD)
Examines accounting from an international perspective, including the study of various functional areas of accounting across countries and the reporting requirements encountered by companies engaged in international trade and making foreign direct investments.

Equivalent to ACCT 745

Prerequisite(s): Completion of MBA or MSA core requirements, or permission of program director.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
Grading: Graduate Special.

MBA 746 - Real Estate Analysis and Valuation

Credits: 0-3 (RD)
Overview of real estate assets, markets, and decisions. Emphasizes development of analytical techniques and information required for implementation. Includes legal, economic, and public policy perspectives.

Equivalent to GSOM 746

Prerequisite(s): Completion of MBA or MSA core requirements or permission of the program director.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
Grading: Graduate Special.

MBA 747 - Real Estate Finance

Credits: 0-3 (RD)
Examines financing of residential and income-producing real estate from perspectives of both suppliers and users of funds. Focuses on financing alternatives, primary and secondary markets, and decision implications of available arrangements.

Equivalent to GSOM 747

Prerequisite(s): Completion of MBA or MSA core requirements or permission of the program director.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
Grading: Graduate Special.
MBA 748 - Real Estate Investment

Credits: 0-3 (RD)
Develops frameworks for analyzing decisions about investing in real estate assets. Focuses on acquisition and analysis of information required to evaluate potential performance of assets. Applications of theories and techniques through case studies.

Equivalent to GSOM 748

Prerequisite(s): Completion of MBA or MSA core requirements or permission of the program director.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
Grading: Graduate Special.

MBA 752 - Turning Ideas into Successful Companies

Credits: 0-3 (RD)
An advanced course in entrepreneurship focused on discovery and development of an achievable business concept. The centerpiece of the course is development of the formal business plan and associated presentation materials. Students are assigned to teams and must hypothesize a new business, research and test their hypothesis, and develop a comprehensive written business plan. The plan must be for an actual business that the students intend to start upon the successful completion of the course. Technology-based projects are encouraged, but not required. Because the course is cross-listed with IT&E and SOM, most teams will include both engineering and business students. Weekly presentations of the team's progress are required.

Prerequisite(s): Completion of MBA or MSA core requirements or permission of the program director.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
Grading: Graduate Special.
When Offered: Spring

MBA 795 - Global Business Perspectives

Credits: 0-3 (RD)
Applies MBA core courses to global business enterprise through site visits to facilities located outside the United States.

Prerequisite(s): Admission to the MBA program or permission of the program director.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
Grading: Graduate Special.
When Offered: Spring, Summer

MBA 796 - Directed Studies in Business Administration
Credits: 1-3 (RD)
Approval by faculty member and MBA program director required prior to registration. Studies specialized topics in business administration not otherwise available in curriculum.

Prerequisite(s): Admission to the MBA or MSA program or permission of the program director.

Notes: May be repeated for up to 3 credits.

Hours of Lecture or Seminar per week: 1-9
Hours of Lab or Studio per week: 0

MBA 797 - Special Topics in Business

Credits: 1-3 (RT)
Sections established as necessary to focus on various topical issues that emerge in practice of business administration.

Prerequisite(s): Admission to the MBA program or permission of the program director.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
Grading: Graduate Special.
When Offered: Fall, Spring, Summer

Master of New Professional Studies (MNPS)

Offered by the School of Public Policy

MNPS 700 - The New Professionalism: Theory and Practice

Credits: 3 (NR)
Experientially explores contemporary and relevant ethical theories and their diverse applications to professional studies field. Examines ethical relationship between professionals and clients, ethical accountability and responsibility, ethos of institutions, and the professional's role in sustaining ethical standards. Explores philosophical and pedagogical assumptions to understand professional management issues, and social and individual purposes of being professional.

Notes: Customized for each track; for detailed course content, contact appropriate program directors.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

MNPS 702 - The New Professional as Reflective Practitioner

Credits: 3 (NR)
Identifies central problems in epistemology. Examines how an epistemology appropriate to professional practice may be constructed, what is meant by "ways of knowing" and the "reflective practitioner," and implications for professional learning.
Studies core issues of generalizability; objective knowledge and understanding; and how evidence, truth, and meaning affect
nature of organizational reality and professional's practice. Special attention to developing skills for "double-loop learning," and
reflection in professional lives through journals, narrative, autobiography, and imaginative literature.

Notes: Customized for each track; for detailed course content, contact appropriate program directors.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**MNPS 703 - Technology and Learning in the New Professions**

Credits: 3 (NR)
Examines enormous potential for enhancing the way organizations can learn, notably through developing Internet literacy and
skills in using differing Internet navigation tools. Focuses on applying technology to real-world problems in different
professional work-sites and offers in-depth training in use and development of groupware applications.

Notes: Customized for each track; for detailed course content, contact appropriate program directors.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**MNPS 704 - Research Methodologies in the New Professionalism**

Credits: 3 (NR)
Concentrates on understanding and using research methodologies from such varied sources as Friere, McKeon, and Janowitz,
with a practical team activity in which students study organization or aspects of it, using ethnography, field study, or any
appropriately defensible research methodology.

Corequisite(s): EDUC 597

Notes: Customized for each track; for detailed course content, contact appropriate program directors.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**MNPS 720 - Learning Community**

Credits: 3 (NR)
Workshops, seminars, and reading groups involving at least 60 hours of contact time and culminating in two-day retreat during
which candidates for MS in New Professional Studies (organizational learning) make presentations to class and faculty on
research practica. Theme of module is communication, collaboration, and interaction in organizations. After initial one-and-a-half
day workshop, MNPS candidates meet with all faculty once a month to give talks and presentations on application of ideas in
their organizations, discuss issues in organizational learning, and provide feedback about using collaborative computing
technology in learning process.

Equivalent to ODKM 740
Notes: Only for MNPS in organizational learning degree candidates.

Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0  
Grading: Graduate Special

**Master of New Professional Studies-Teaching (MNPE)**

Offered by the College of Education and Human Development

**MNPE 700 - The New Professionalism: Theory and Practice**

Credits: 3 (NR)

Explores the philosophical and pedagogical assumptions of teachers as individuals and professionals. Critiques educational issues such as accountability, institutional structures, and professional roles engage teachers to be more just and responsive in their relationships with students, families, and colleagues. Provides a deeper understanding of a teacher's participatory and ethical role in a democracy, which includes questioning the status quo.

Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0

**MNPE 702 - The New Professional as a Reflective Practitioner**

Credits: 3 (NR)

Explores the central questions of epistemology to encourage depth of understanding of the assumptions and issues of education. Uses reflection to consider how personal and professional identities are influenced by intentions and commitments to learning and teaching. Provides an understanding of the processes of critical inquiry, dialogue, reflection, and action.

Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0

**MNPE 703 - Technology and Learning in the New Professions**

Credits: 3 (NR)

Supports effective technology integration for teaching and learning by constructive knowledge not just of content, technology and pedagogy, but also of their mutually reinforcing relationships. Develops repertoire of technology-mediated learning approaches with appropriate context specific strategies and representations to support learning. Includes concurrent critique of technology and includes equal access to information, critical web literacy, and privacy issues.
**MNPE 704 - Research Methodologies in the New Professionalism**

Credits: 3 (NR)

Introduces teacher research in a school setting. Supports intentional, systematic, public, ethical, and contextual inquiry into practice; participants form and frame salient questions, take actions to transform curriculum, gather, analyze and interpret multiple forms of data, and share experience in communities of practice.

**Mathematical Sciences (MATH)**

Offered by the College of Science

Knowledge of high school algebra is a prerequisite for all mathematics courses. In exceptional cases, the prerequisite for a course above the calculus sequence may be waived at the discretion of instructor.

*Prior knowledge of linear algebra and single and multivariable calculus assumed in all math graduate courses. A double number separated by a comma (MATH 555, 556) indicates both graduate courses normally constitute a sequence, and the first semester is prerequisite to the second. The prerequisite may be waived by permission of department chair. See also STAT and OR courses.*

**MATH 104 - Trigonometry and Transcendental Functions**

Credits: 2 (NR)

Exponential and logarithmic functions, trigonometric functions, and analytic trigonometry. This course does not satisfy the university's quantitative reasoning requirement. May not be taken for credit after receiving a C or better in MATH 105 or in any MATH course numbered 113 or higher. May not take MATH 105 for credit after receiving a C or better in MATH 104.

**Prerequisite(s):** Specified score on math placement test. Prerequisite enforced by registration system.

**Notes:** May not be used as credit toward BA or BS in mathematical sciences.

**MATH 105 - Precalculus Mathematics**
Credits: 4 (NR)
Reviews mathematics skills essential to studying calculus. Topics include equations, inequalities, absolute values, graphs, functions, exponential and logarithmic functions, and trigonometry.

Prerequisite(s): Appropriate score on the math placement test or successful completion of the algebra tutorial program offered through the Math Literacy Center. Prerequisite enforced by registration system.

Notes: Call Mathematical Sciences Department at 703-993-1460 for details. May not be used as credit toward BA or BS in mathematical sciences. This course does not satisfy the university's quantitative reasoning requirement for the BA degree. May not be taken for credit after receiving grade of C or better in any MATH course numbered 113 or higher.

Hours of Lecture or Seminar per week: 4
Hours of Lab or Studio per week: 0

MATH 106 - Quantitative Reasoning

Credits: 3 (NR)
Quantitative skills for real world. Topics include critical thinking, modeling by functions, graphs, growth, scaling, probability, and statistics.

Fulfills general education requirement in quantitative reasoning.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

MATH 108 - Introductory Calculus with Business Applications

Credits: 3 (NR)
Functions, limits, derivative, and integral. Applications of differentiation and integration.

Fulfills general education requirement in quantitative reasoning.

Prerequisite(s): Specified score on Math Placement Test, or successful completion of self-paced Basic Math Program offered by Math Literacy Center. Prerequisite enforced by registration system.

Notes: Call Mathematical Sciences Department at 703-993-1460 for details. Students who have received credit for MATH 113 or 114 may not receive credit for this course.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

MATH 110 - Introductory Probability

Credits: 3 (NR)
Elementary set theory, probability, and statistics.

Fulfills general education requirement in quantitative reasoning.
Prerequisite(s): Specified score on Math Placement Test, or successful completion of self-paced Basic Math Program offered by Math Literacy Center. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**MATH 111 - Linear Mathematical Modeling**

Credits: 3 (NR)
Matrix algebra, systems of linear equations, Markov chains, difference equations, and data fitting.

Fulfills general education requirement in quantitative reasoning.

Prerequisite(s): Specified score on Math Placement Test, or successful completion of self-paced Basic Math Program offered by Math Literacy Center. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**MATH 112 - Discrete Mathematics for IT**

Credits: 3 (NR)
Introduces ideas of discrete mathematics including mathematical induction, sets, logic, graphs, trees, basic counting arguments, and discrete probability. Students who have received credit for MATH 125 may not receive credit for this course.

Prerequisite(s): Specified score on Math Placement Test, or successful completion of self-paced Algebra Tutorial Program offered through Math Learning Center. Prerequisite enforced by registration system.

Notes: Intended for IT students; does not count toward a major or minor in mathematics.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**MATH 113 - Analytic Geometry and Calculus I**

Credits: 4 (NR)
Functions, limits, the derivative, maximum and minimum problems, the integral, and transcendental functions.

Fulfills general education requirement in quantitative reasoning.

Prerequisite(s): C or better in MATH 104 or MATH 105 or specified score on math placement test. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 4
Hours of Lab or Studio per week: 1
MATH 114 - Analytic Geometry and Calculus II

Credits: 4 (NR)
Methods of integration, conic sections, parametric equations, infinite series, and power series.

Prerequisite(s): Grade of C or better in MATH 113. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 4
Hours of Lab or Studio per week: 1

MATH 115 - Analytic Geometry and Calculus I (Honors)

Credits: 4 (NR)
More challenging version of MATH 113. Functions, limits, the derivative, maximum and minimum problems, the integral, and transcendental functions.

Fulfills general education requirement in quantitative reasoning.

Prerequisite(s): Permission of department. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 4
Hours of Lab or Studio per week: 1

MATH 116 - Analytic Geometry and Calculus II (Honors)

Credits: 4 (NR)
More challenging version of MATH 114. Methods of integration, conic sections, parametric equations, infinite series, and power series.

Prerequisite(s): Successful completion of MATH 115, or grade of A in MATH 113 and recommendation of MATH 113 instructor. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 4
Hours of Lab or Studio per week: 1

MATH 123 - Calculus with Algebra/Trigonometry, Part A

Credits: 3 (NR)
Math 123, with 124 is a two semester sequence for students with limited math background who desire careers in the sciences. In two semesters, students progress from algebra through the basic calculus covered in Math 113. Math 123 integrates the beginnings of calculus through the derivative with relevant precalculus algebra and trigonometry.

Prerequisite(s): C or better in MATH 104 or 105 or specified score on the math placement test.
Notes: Students who successfully complete Math 123-124 are considered the same as having successfully completed MATH 113 and can sign up for Math 114, Calculus II.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall.

MATH 124 - Calculus with Algebra/Trigonometry, Part B

Credits: 3 (NR)
Math 123, with 124 is a two semester sequence for students with limited math background who desire careers in the sciences. In two semesters, students progress from algebra through the basic calculus covered in Math 113. Math 124 will review basic differentiation and applications and then proceed to cover integration including transcendental functions.

Prerequisite(s): C or better in MATH 123.

Notes: Students who successfully complete Math 123-124 are considered the same as having successfully completed MATH 113 and can sign up for Math 114, Calculus II.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall.

MATH 125 - Discrete Mathematics I

Credits: 3 (NR)
Introduces ideas of discrete mathematics and combinatorial proof techniques including mathematical induction, sets, graphs, trees, recursion, and enumeration.

Fulfills general education requirement in quantitative reasoning.

Prerequisite(s): Specified score on Math Placement Test or successful completion of self-paced Algebra Tutorial Program offered by Math Learning Center. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

MATH 203 - Linear Algebra

Credits: 3 (NR)
Systems of linear equations, linear independence, linear transformations, inverse of a matrix, determinants, vector spaces, eigenvalues, eigenvectors, and orthogonalization.

Prerequisite(s): C or better in MATH 114. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
**MATH 213 - Analytic Geometry and Calculus III**

Credits: 3 (NR)
Partial differentiation, multiple integrals, line and surface integrals, and three-dimensional analytic geometry.

**Prerequisite(s):** Grade of C or better in MATH 114. Prerequisite enforced by registration system.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**MATH 214 - Elementary Differential Equations**

Credits: 3 (NR)
First-order ODEs, higher-order ODEs, Laplace transforms, linear systems, nonlinear systems, numerical approximations, and modeling.

**Prerequisite(s):** Grade of C or better in MATH 213 or 215. Prerequisite enforced by registration system.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**MATH 215 - Analytic Geometry and Calculus III (Honors)**

Credits: 3 (NR)
Vectors and vectorvalued functions, partial differentiation, multiple integrals, line integrals, surface integrals, and transformation of coordinates.

**Prerequisite(s):** Grade of C or better in MATH 113 and 114. Prerequisite enforced by registration system.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**MATH 216 - Theory of Differential Equations**

Credits: 3 (NR)
First- and second-order equations, existence uniqueness of solutions, systems of differential equations, and phase plane analysis.

**Prerequisite(s):** Grade of C or better in MATH 203 and 213 or 215. Prerequisite enforced by registration system.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0
**MATH 271 - Mathematics for the Elementary School Teachers I**

Credits: 3 (NR)
Concepts and theories underlying elementary school mathematics, including problem solving, whole numbers and numeration, whole numbers operations and properties, number theory, fractions, decimals, ratio and proportion, and integers. Intended for school educators.

**Notes:** Does not count toward major in mathematics.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**MATH 272 - Mathematics for the Elementary School Teachers II**

Credits: 3 (NR)
MATH 271 recommended before enrolling. Continuation of MATH 271. Topics include rational and real numbers, introduction to algebra, geometry, statistics, and probability.

**Notes:** Intended for school educators; does not count toward major in mathematics.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**MATH 290 - Introduction to Advanced Mathematics**

Credits: 3 (NR)
Introduction to proofs and the language of mathematics. Topics include induction, equivalence relations, cardinality and basic properties of the real numbers. Designated as a writing intensive course for mathematics majors.

Fulfills writing intensive requirement in the major.

**Prerequisite(s):** Grade of C or better in MATH 114. Prerequisite enforced by registration system.

**Notes:** Primarily intended for mathematics majors.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**MATH 301 - Number Theory**

Credits: 3 (NR)
Prime numbers, factorization, congruences, and Diophantine equations.

**Prerequisite(s):** 6 math credits.
MATH 302 - Foundations of Geometry

Credits: 3 (NR)
Fundamental concepts of incidence. Axioms of Euclidean geometry and the resulting theory, and axioms and development of non-Euclidean and projective geometry.

Prerequisite(s): 6 math credits.

MATH 307 - Mathematical Modeling

Credits: 3 (NR)
Focuses on the development and analysis of mathematical models that make qualitative and quantitative predictions. Students will address particular situations while learning general modeling strategies.

Prerequisite(s): MATH 203 and MATH 214 or MATH 216.

MATH 313 - Introduction to Applied Mathematics

Credits: 3 (NR)
Vector differential calculus, vector integral calculus, Fourier analysis, and complex analysis.

Prerequisite(s): Grade of C or better in MATH 213 or 215 Prerequisite enforced by registration system.

MATH 314 - Introduction to Applied Mathematics

Credits: 3 (NR)

Prerequisite(s): Grade of C or better in MATH 214 or 216. Prerequisite enforced by registration system.
MATH 315 - Advanced Calculus I

Credits: 3 (NR)
Number system, functions, sequences, limits, continuity, differentiation, integration, transcendental functions, and infinite series.

Prerequisite(s): Grade of C or better in MATH 213 or 215 and 290. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

MATH 316 - Advanced Calculus II

Credits: 3 (NR)
Sequences of functions, Taylor series, vectors, functions of several variables, implicit functions, multiple integrals, and surface integrals.

Prerequisite(s): Grade of C or better in MATH 315. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

MATH 321 - Abstract Algebra

Credits: 3 (NR)
Theory of groups, rings, fields.

Prerequisite(s): Grade of C or better in MATH 213 or 215 and 290. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

MATH 322 - Advanced Linear Algebra

Credits: 3 (NR)
Abstract vector spaces, linear independence, bases, linear transformations, matrix algebra, inner product, and special topics.

Prerequisite(s): Grade of C or better in MATH 203 and 290. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
MATH 325 - Discrete Mathematics II

Credits: 3 (NR)
Advanced counting, binomial identities, generating functions, advanced recurrence, inclusion-exclusion, and network flows.

Prerequisite(s): Grade of C or better in MATH 125. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

MATH 351 - Probability

Credits: 3 (NR)
Random variables, probability functions, special distributions, and limit theorems.

Prerequisite(s): Grade of C or better in MATH 213 or 215. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

MATH 352 - Statistics

Credits: 3 (NR)
Estimation, decision theory, testing hypothesis, correlation, linear models, and design.

Prerequisite(s): Grade of C or better in MATH 351. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

MATH 400 - History of Math

Credits: 3 (NR)
Explores internal controversies and dynamics of mathematics in larger intellectual and social settings. Topics vary but might include differential equations devised for mechanics and astronomy by Euler, Lagrange, and Laplace; foundation of mathematical analysis from Cauchy to Weierstrass; algebras of Galois and Boole; or creation of non-Euclidean geometry and Cantor's transfinite sets.

Fulfills general education requirement in synthesis.

Prerequisite(s): Completion or concurrent enrollment in all other required general education courses, and completion of MATH 290. Prerequisite enforced by registration system.

Notes: Credits may not be used toward "upper division" math hours required of math majors.
MATH 405 - Honors Thesis in Mathematics I

Credits: 3 (NR)
A project, which is intended to result in a thesis, is to be chosen and completed under the guidance of a full-time faculty member. An oral presentation is required for MATH 405.

Prerequisite(s): MATH 315, 3 additional credits of MATH above the 300 level (excluding MATH 400), and admission to the Mathematics Honors Program.

MATH 406 - Honors Thesis in Mathematics II

Credits: 3 (NR)
A project, which is intended to result in a thesis, is to be chosen and completed under the guidance of a full-time faculty member. Oral and written presentations are required in MATH 406.

Prerequisite(s): MATH 405 Prerequisite enforced by registration system.

MATH 411 - Functions of a Complex Variable

Credits: 3 (NR)
Analytic functions, contour integration, residues, and applications to such topics as integral transforms, generalized functions, and boundary value problems.

Prerequisite(s): Grade of C or better in MATH 214 or 216. Prerequisite enforced by registration system.

MATH 413 - Modern Applied Mathematics I

Credits: 3 (NR)

Prerequisite(s): Grade of C or better in MATH 203 and 214 or 216. Prerequisite enforced by registration system.
MATH 414 - Modern Applied Mathematics II

Credits: 3 (NR)
Continuation of MATH 413, which involves synthesis of pure mathematics and computational mathematics. Fourier analysis and its role in applied mathematics developed (differential equations and approximations). Discrete aspects emphasized in computational models.

Prerequisite(s): Grade of C or better in MATH 413. Prerequisite enforced by registration system.

MATH 431 - Topology

Credits: 3 (NR)
Metric spaces, topological spaces, compactness, and connectedness.

Prerequisite(s): C or better in MATH 315. Prerequisite enforced by registration system.

MATH 441 - Deterministic Operations Research

Credits: 3 (NR)

Prerequisite(s): Grade of C or better in MATH 203 Prerequisite enforced by registration system.

MATH 442 - Stochastic Operations Research

Credits: 3 (NR)
Equivalent to OR 442

**Prerequisite(s):** Grade of C or better in MATH 351. Prerequisite enforced by registration system.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

### MATH 446 - Numerical Analysis I

Credits: 3 (NR)  
Significant figures, round-off errors, iterative methods of solution of nonlinear equations of a single variable, solutions of linear systems, iterative techniques in matrix algebra, interpolation and polynomial approximation.

**Prerequisite(s):** Grade of C or better in MATH 203 and CS 112. Prerequisite enforced by registration system.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

### MATH 447 - Numerical Analysis II

Credits: 3 (NR)  

**Prerequisite(s):** Grade of C or better in Math 214 or 216 and 446. Prerequisite enforced by registration system.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

### MATH 453 - Advanced Mathematical Statistics

Credits: 3 (NR)  
Maximum likelihood tests, sufficiency, most powerful tests, distributions of quadratic forms, topics from nonparametric statistics, Bayesian statistics and linear models.

**Prerequisite(s):** C or better in MATH 352.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall.

### MATH 478 - Introduction to Partial Differential Equations with Numerical Methods
Introduces basic facts about partial differential equations, including elliptic equations, parabolic equations and hyperbolic equations. Methods of solution, characteristics, initial/boundary-value problems, and numerical approximation techniques.

Prerequisite(s): C or better in MATH 203 and 214 or 216. Prerequisite enforced by registration system.

**MATH 491 - Reading and Problems**

Credits: 1-3 (RT)
For mathematical sciences majors only. Independent study in math.

Notes: Must be arranged with instructor before registering.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0

**MATH 492 - Reading and Problems**

Credits: 1-3 (RT)
For mathematical sciences majors only. Independent study in math.

Prerequisite(s): For mathematical science majors only. Permission of Instructor required.

Notes: Must be arranged with instructor before registering.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0

**MATH 493 - Topics in Applicable Mathematics**

Credits: 3 (RT)
Topics that have been successfully used in applications of mathematics.

Prerequisite(s): 6 credits of math at or above 310 level.

Notes: Subject determined by instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**MATH 494 - Topics in Pure Mathematics**
Credits: 3 (RT)
Topics of pure math not covered in other courses. Topics might include Galois theory, cardinal and ordinal arithmetic, measure theory, mathematical logic, and differential geometry.

Prerequisite(s): 6 credits of math at or above 310 level.

Notes: Subject determined by instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

MATH 495 - Undergraduate Seminar

Credits: 1 (RD)
Prerequisite(s): Permission of instructor.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0

MATH 551 - Regression and Time Series

Credits: 3 (NR)
Mathematics of regression, exponential smoothing, time series, and forecasting. Material included in this course constitutes Society of Actuaries Validation by Educational Experience (VEE) for applied statistics and corresponds to part of Casualty Actuary Society Exam 3.

Prerequisite(s): MATH 352, STAT 652, SOA Exam P, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

MATH 554 - Financial Mathematics

Credits: 3 (NR)
Simple and compound interest, annuities, present and future value, yield rates, capital budgeting, amortization schedules, mortgages, bonds. Material corresponds to the Society of Actuaries Exam: Financial Mathematics (FM). Not appropriate for graduate science and engineering majors not considering actuarial or financial career. Cannot be counted toward MS or PhD degree in mathematics.

Prerequisite(s): MATH 113

Corequisite(s): MATH 114

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
MATH 555 - Actuarial Modeling I

Credits: 3 (NR)
Two-semester sequence covering portions of the material corresponding to the Society of Actuaries Exam M, Casualty Actuary Society Exam 3, and Joint Board Exam EA1. The remaining material for these exams is covered in MATH 551 and 653. Topics include survival distribution and life tables, life insurance, life annuities, net premiums, net premium reserves, multiple life and multiple decrement models, pensions, insurance models including expense, and nonforfeiture benefits and cash values.

Prerequisite(s): MATH 554 and either MATH 351 or STAT 344.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

MATH 556 - Actuarial Modeling II

Credits: 3 (NR)
Two-semester sequence covering portions of the material corresponding to the Society of Actuaries Exam M, Casualty Actuary Society Exam 3, and Joint Board Exam EA1. The remaining material for these exams is covered in MATH 551 and 653. Topics include survival distribution and life tables, life insurance, life annuities, net premiums, net premium reserves, multiple life and multiple decrement models, pensions, insurance models including expense, and nonforfeiture benefits and cash values.

Prerequisite(s): MATH 554 and either MATH 351 or STAT 344.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

MATH 557 - Financial Derivatives

Credits: 3 (NR)

Prerequisite(s): MATH 554 and either MATH 351 or STAT 344, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring

MATH 600 - Special Topics in Mathematics

Credits: 1-6 (RT)
Mathematical workshops, special courses, or other projects.
MATH 601 - Analysis I for Teachers

Credits: 3 (NR)
Develops continuous ideas of calculus with particular emphasis on concepts as opposed to computational aspects of calculus. Specific topics include decimal representation of real numbers, sequences, series, and limits; differentiation to find speed, slopes of curves, and tangents; integration to find volumes and distances and area under curves. Optimization problems including maximization of area and volume, and modeling of these concepts. Graphing techniques supported by theory of calculus and graphing utilities such as TI-83 calculator or computer software such as Maple.

Prerequisite(s): Open to in-service teachers of mathematics at middle or secondary level. Others may enroll with permission of instructor.

Notes: Background in mathematics desirable but not necessary. Some topics from college algebra will be reviewed in class, but thorough understanding of high school algebra and trigonometry expected.

MATH 602 - Analysis II for Teachers

Credits: 3 (NR)
Develops continuous ideas of calculus with particular emphasis on concepts as opposed to computational aspects of calculus. Specific topics include decimal representation of real numbers, sequences, series, and limits; differentiation to find speed, slopes of curves, and tangents; integration to find volumes and distances and area under curves. Optimization problems including maximization of area and volume, and modeling of these concepts. Graphing techniques supported by theory of calculus and graphing utilities such as TI-83 calculator or computer software such as Maple.

Prerequisite(s): Open to in-service teachers of mathematics at middle or secondary level. Others may enroll with permission of instructor.

Notes: Background in mathematics desirable but not necessary. Some topics from college algebra will be reviewed in class, but thorough understanding of high school algebra and trigonometry expected.

MATH 604 - Geometry for Teachers

Credits: 3 (NR)
Covers standard topics from Euclidean geometry, and includes discussion of non-Euclidean geometries. Emphasizes informal and explorative approach to geometry, and makes use of geometry sketchpad. Other topics include geometric constructions, and role of proof in geometry.

Prerequisite(s): Open to in-service teachers of mathematics at middle or secondary level. Others may enroll with permission of
instructor.

Notes: Background in mathematics desirable but not necessary.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 1

MATH 605 - Discrete/Finite Mathematics for Teachers

Credits: 3 (NR)
Thorough understanding of high school algebra assumed. Discusses finite mathematics in juxtaposition to continuous ideas of calculus. Topics may consist of elementary counting and combinatorics including recursion and difference equations and their analogy to calculus; thorough discussion of probability and central measures of statistics; and graph theory and its connection to geometry.

Prerequisite(s): Open to in-service teachers of mathematics at middle or secondary level. Others may enroll with permission of instructor.

Notes: Background in mathematics desirable but not necessary.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 1

MATH 607 - Algebraic Structure for Teachers

Credits: 3 (NR)
Expands on customary operations on integers and rationals to discuss systems that mimic these operations. Emphasizes multiplicative and additive inverses and their corresponding identities as they occur in other systems. Topics might include permutation groups, rigid transformations, groups of symmetry of the plane and connection to geometry, and matrices treated as linear transformations and connections to solutions of systems of equations.

Prerequisite(s): Open to in-service teachers of mathematics at middle school level. Others may enroll with permission of instructor.

Notes: Background in mathematics desirable but not necessary. Thorough understanding of high school algebra assumed.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 1

MATH 608 - Problem Solving in Mathematics

Credits: 3 (NR)
Introduces variety of challenging mathematical problems appropriate for middle school student to analyze, and solving problems using mathematics learned in previous courses. Also asks students to search for such problems and orally present solutions.

Prerequisite(s): Open to in-service teachers of mathematics at middle school level. Others may enroll with permission of instructor.
Notes: Background in mathematics or science desirable but not necessary. Assumes exposure to most of topics covered in MATH 601, 604, 605, and 607.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 1

MATH 610 - Number Systems and Number Theory for K-8 Teachers

Credits: 3 (NR)
This course covers the topics: ways of representing numbers, relationships between numbers, number systems, the meanings of operations and how they relate to one another, and computation within the number system as a foundation for algebra. It also includes episodes in history and development of the number system, and will examine the developmental sequence and learning trajectory as children learn this material.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

MATH 611 - Geometry and Measurement for K-8 Teachers

Credits: 3 (NR)
The course explores the foundations of informal measurement and geometry in one, two, and three dimensions. The van Hiele model for geometric learning is used as a framework for how children build their understanding of length, area, volume, angles, and geometric relationships. Visualization, spatial reasoning, and geometric modeling are stressed. As appropriate, transformational geometry, congruence, similarity, and geometric constructions will be discussed.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

MATH 612 - Probability and Statistics for K-8 Teachers

Credits: 3 (NR)
An introduction to probability, descriptive statistics, and data analysis. Topics studied will include the exploration of randomness, data representation, modeling. Descriptive statistics will include measures of central tendency, dispersion, distributions, and regression. The analysis of experiments requiring hypothesizing, experimental design and data gathering will also be discussed.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

MATH 613 - Algebra and Functions for K-8 Teachers

Credits: 3 (NR)
The course will examine representing and analyzing mathematical situations and structures using generalization and algebraic symbols and reasoning. Attention will be given to the transition from arithmetic to algebra, working with quantitative change,
and the description of and prediction of change.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**MATH 614 - Rational Numbers and Proportional Reasoning for K-8 Teachers**

Credits: 3 (NR)  
This course will cover the basic number strands in fractions and rational numbers, decimals and percents, and ratios and proportions in the school curriculum. Instruction will cover interpretations, computations, and estimation with a coordinated program of activities that develop both rational number concepts and skills and proportional reasoning.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**MATH 619 - Topics in Mathematical Logic**

Credits: 3 (RT)  
Special topics in foundations of mathematics not included in regular mathematics curriculum. May be repeated for credit.

**Prerequisite(s):** Permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**MATH 621 - Algebra I**

Credits: 3 (NR)  
Groups, linear algebra, and matrix groups.

**Prerequisite(s):** Familiarity with basic properties of groups and rings, or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**MATH 624 - Euclidean Geometry**

Credits: 3 (NR)  
Euclidean space, geometry of k-dimensional planes, the affine structure of Euclidean space, rigid motions and similarities, parallelopertes and volumes, convex polytopes, quadric surfaces, and additional topics by instructor's choice.

**Prerequisite(s):** MATH 315 and MATH 322, or equivalent.
MATH 625 - Numerical Linear Algebra

Credits: 3 (NR)
Theory and development of numerical algorithms for solving variety of matrix problems: linear systems, least squares problems, eigenvalue problems, and singular value decomposition. Direct and iterative method, analysis of sensitivity to rounding errors, and applications.

Equivalent to CSI 740

Prerequisite(s): Computer literacy, including some programming experience.

MATH 629 - Topics in Algebra

Credits: 3 (RT)
Special topics in pure and applied algebra not covered in regular algebra. May be repeated for credit.

Prerequisite(s): Permission of instructor.

Notes: Topic may not be repeated.

MATH 631 - Topology I: Topology of Metric Spaces

Credits: 3 (NR)
Covers definition and basic examples of metric spaces, open and closed sets, subspaces and finite products, sequences and convergence, compactness and separability, continuous functions, uniform continuity, metric space C(X) and uniform convergence, and homotopy.

Prerequisite(s): MATH 315 or equivalent.

MATH 639 - Topics in Geometry and Topology
Credits: 3 (RD)
Special topics in geometry and topology not covered in regular geometry and topology sequence. May be repeated for credit.

Prerequisite(s): Permission of instructor.

Notes: Topic may not be repeated.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

MATH 641 - Combinatorics and Graph Theory

Credits: 3 (NR)
Covers enumerative combinatorics, including partially ordered sets; Möbius inversion and generating functions; and major topics in graph theory such as graph coloring, Ramsey theory, and matching.

Prerequisite(s): MATH 321 or equivalent.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

MATH 644 - Convex and Discrete Geometry

Credits: 3 (NR)
Basic properties of Euclidean space, convex sets and convex cones, convex hulls, extremal structure of convex sets, support and separation properties, polyhedra and polytopes, special classes of convex sets, Helly-type theorems, selected problems of discrete geometry.

Prerequisite(s): MATH 315 and MATH 322, or equivalent.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

MATH 649 - Topics in Combinatorics

Credits: 3 (RT)
Special topics in combinatorics not covered in regular combinatorics sequence. May be repeated for credit.

Prerequisite(s): Permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Summer, Spring
MATH 653 - Construction and Evaluation of Actuarial Models I

Credits: 3 (NR)
Economics of insurance, individual risk models for short term, collective risk models for single period, collective risk models over an extended period, and applications of risk theory. Material included in this course corresponds to portions of the Society of Actuaries Exam M and Casualty Actuary Society Exam 3. The remaining material for these exams is covered in MATH 551, 555, and 556.

Prerequisite(s): MATH 351 or STAT 644 are required. MATH 555 is recommended but not required.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

MATH 654 - Construction and Evaluation of Actuarial Models II

Credits: 3 (NR)
Nature and properties of survival and loss models, methods of estimates from complete and incomplete data, tabular and parametric models, and practical issues in survival model estimation. Material included in this course corresponds to most of the Society of Actuaries Exam C and Casualty Actuary Society Exam 4.

Prerequisite(s): MATH 556 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

MATH 655 - Pension Valuation

Credits: 3 (NR)
Basic mathematics used in pension actuarial work without regard to pension law. Material included in this course corresponds to all of the Joint Board Exam EA-2A and portions of the Society of Actuaries Exam 8. This course cannot be counted toward the MS or PhD degree in mathematics.

Prerequisite(s): MATH 556, SOA Exam EA-1, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

MATH 661 - Complex Analysis I

Credits: 3 (NR)
Topology of complex numbers, holomorphic functions, series, complex integration. Meromorphic, multivalued, and elliptic functions.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
MATH 671 - Fourier Analysis

Credits: 3 (NR)
Study of fundamental ideas in Fourier analysis. Topics include orthonormal systems, Fourier series, continuous and discrete Fourier transform theory, generalized functions, and introduction to spectral analysis. Uses applications to physical sciences, linear systems theory, and signal processing to integrate topics.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

MATH 673 - Dynamical Systems

Credits: 3 (NR)
Contemporary topics in nonlinear dynamical systems illustrated in mathematical models from physics, ecology, and population dynamics. Traditional qualitative analysis of difference and differential equations provides background for understanding chaotic behavior when it occurs in these models. Topics include stability theory, fractals, Lyapunov exponents, and chaotic attractors.

Prerequisite(s): Elementary courses in linear algebra and differential equations.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

MATH 674 - Stochastic Differential Equations

Credits: 3 (NR)
Introduces stochastic calculus and differential equations. Includes Wiener process, Ito and Stratonovich integrals, Ito formula, martingales, diffusions, and applications, including financial applications. Simulations and numerical approximations of solutions.

Prerequisite(s): MATH 214 and 351

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

MATH 675 - Linear Analysis

Credits: 3 (NR)
Metric spaces, normed linear spaces, completeness, compactness, continuous (bounded) linear transformations, Banach spaces, Hilbert spaces, and orthogonal series.

Prerequisite(s): MATH 315 and MATH 322, or equivalent.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
MATH 677 - Ordinary Differential Equations

Credits: 3 (NR)
Qualitative and quantitative theory of ordinary differential equations. Phase portrait analysis of linear and nonlinear systems, including classification of stable and unstable equilibrium states and periodic orbits. Poincare-Bendixson theorem, Lyapunov stability and Lyapunov functions, and bifurcation theory. Optional topics include averaging and perturbation methods, numerical solution techniques, and chaos.

Prerequisite(s): MATH 214 or equivalent.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

MATH 678 - Partial Differential Equations

Credits: 3 (NR)
Physical examples, characteristics, boundary value problems, integral transforms, and other topics, such as variational, perturbation, and asymptotic methods.

Prerequisite(s): Elementary differential equations course.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

MATH 679 - Topics in Analysis and Potential Theory

Credits: 3 (RT)
Special topics not covered in regular analysis or potential theory sequence. May be repeated for credit.

Notes: Topic may not be repeated.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

MATH 680 - Industrial Mathematics

Credits: 3 (NR)
Takes examples from industry and goes through complete solution process: formulation of mathematical model of problem; solution, possibly by numerical approximation; and interpretation and presentation of results. Emphasizes working in groups, relating mathematics to concrete situations, and communication and presentation skills.

Prerequisite(s): Permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
MATH 683 - Modern Optimization Theory

Credits: 3 (NR)
Introduces basic mathematical ideas and methods for solving linear and nonlinear programming problems, with emphasis on mathematical aspects of optimization theory. Reviews classical topics of linear programming, and covers recent developments in linear programming, including interior point method. Considers basic results in nonlinear programming, including very recent developments in this field.

Prerequisite(s): Permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

MATH 685 - Numerical Methods

Credits: 3 (NR)
Computational techniques for solving problems arising in science and engineering. Includes theoretical development as well as implementation, efficiency, and accuracy issues in using algorithms and interpreting results. Specific topics include linear and nonlinear systems of equations, polynomial interpolation, numerical integration, and introduction to numerical solution of differential equations.

Equivalent to CSI 700

Prerequisite(s): Computer literacy, including some programming experience.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

MATH 686 - Numerical Solutions of Differential Equations

Credits: 3 (NR)
Finite difference methods for initial value problems, two-point boundary value problems, Poisson equation, heat equation, and first-order partial differential equations.

Prerequisite(s): MATH 214 and MATH 446 or 685.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

MATH 687 - Variational Methods

Credits: 3 (NR)
Weak formulation of partial differential equations, energy principles, Galerkin approximations, and finite element methods. Includes review and development of necessary analysis.

Prerequisite(s): MATH 446 or 685, and elementary differential equations course.
MATH 689 - Topics in Applied and Computational Mathematics

Credits: 3 (RT)
Special topics in applied and computational mathematics not covered in the regular applied and computational mathematics sequence. May be repeated for credit.

Prerequisite(s): Permission of instructor.

Notes: Topic may not be repeated.

MATH 697 - Independent Reading and Research

Credits: 1-6 (RT)
In areas of importance, but with insufficient demand to justify a regular course, students may undertake a course of study under the supervision of a consenting faculty member. Written statement of the content of the course and a tentative reading list is normally submitted as part of the request for approval. Literature review, project report, or other written product is normally required. May be repeated for credit.

Prerequisite(s): Graduate standing and permission of instructor.

MATH 721 - Algebra II

Credits: 3 (NR)
Rings, fields, and Galois theory.

Prerequisite(s): MATH 621.

MATH 722 - Algebraic Topology

Credits: 3 (NR)
Covers simplices and simplicial complexes, cycles and boundaries, simplicial homology, homological algebra, homotopy and the
MATH 723 - Combinatorial Structures

Credits: 3 (NR)
Studies structural properties of objects encountered in pure and applied combinatorics. Topics include partially ordered sets, codes, designs, matroids, buildings, symmetrical structures, permutation groups, and face lattices of polytopes.

Prerequisite(s): MATH 321 or equivalent.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

MATH 724 - Commutative Algebra

Credits: 3 (NR)
Study of commutative rings and their ideals, and of modules over commutative rings and their homological properties. More specific topics include Noetherian rings, primary decomposition, completions, graded rings and dimension theory with applications to algebraic geometry.

Prerequisite(s): MATH 621.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

MATH 732 - Topology II: Set-Theoretic Topology

Credits: 3 (NR)
Topics include review of basic set theory (including cardinal numbers products of sets, the Axiom of Choice), definition of topological spaces, bases for topological spaces, forming new topological spaces by taking subspace, quotients, and products, separation properties (Hausdorff, regular, Tychonoff, and normal spaces) compactness, the Lindelof property, separability, connectedness, continuity and homeomorphism, manifolds.

Prerequisite(s): MATH 631 or equivalent.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

MATH 740 - Differential Topology
Differential forms, manifolds, smooth maps, vector fields, the Euler characteristic, integration on manifolds, and de Rham cohomology.

**Prerequisite(s):** MATH 621 and Math 631, or equivalent.

**Notes:** MATH 740 will be an elective course acceptable (but not required) for the PhD Degree in the Mathematical Sciences offered by the Department of Mathematical Sciences.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall, Spring

---

**MATH 762 - Complex Analysis II**

Credits: 3 (NR)  
Harmonic functions, generalizations of the maximum principle, entire and meromorphic functions, analytic continuation, and the Riemann mapping theorem.

**Prerequisite(s):** MATH 661.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**MATH 763 - Functions of Several Complex Variables**

Credits: 3 (NR)  
Covers the important results for analytic functions in several variables, including analyticity in several variables and the differences between the theory of one and the theory of several complex variables.

**Prerequisite(s):** MATH 661 and 762, or equivalent preparation in one complex variable.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**MATH 772 - Wavelet Theory**

Credits: 3 (NR)  
Study of the theory and computational aspects of wavelets and the wavelet transform. Emphasizes computational aspects of wavelets, defining the Fast Wavelet Transform in one and two dimensions. Developing the appropriate numerical algorithms. Includes developing the theory of wavelet bases on the real line, discussing multiresolution analysis, splines, time-frequency localization, and wavelet packets.

Equivalent to CSI 746

**Prerequisite(s):** MATH 315 or equivalent.
MATH 776 - Measure and Integration

Credits: 3 (NR)
Lebesgue measure and integration. Theory of Lp spaces with p between one and infinity on the real line. Theory of linear operators on Banach spaces, including the Hahn-Banach theorem, open mapping theorem, closed graph theorem and the uniform boundedness principle.

Prerequisite(s): MATH 675.

MATH 781 - Advanced Methods in Applied Mathematics

Credits: 3 (NR)
Bifurcation theory and perturbation methods for solutions in ordinary and partial differential equations. This course will develop and apply these mathematical tools in current scientific fields, such as biology, materials science, or financial mathematics.

Prerequisite(s): MATH 677 or permission of instructor.

MATH 784 - Nonlinear Functional Analysis

Credits: 3 (NR)
Techniques in nonlinear functional analysis with applications. Contraction mapping principle, Frechet and higher derivatives, the implicit function theorem, Lyapunov-Schmidt method, and bifurcation theory. Finite and infinite dimensional degree theory with applications in partial differential equations.

Prerequisite(s): MATH 675 or permission of instructor.

Notes: Different backgrounds may be appropriate, but generally, a student is expected to be an upper level graduate student who has already taken Linear Analysis. Since the applications given in the course are for differential equations, some familiarity with differential equations is extremely useful.

MATH 790 - Classical Potential Theory
Potential theory of Laplace's equation in Euclidean space. Harmonic functions, superharmonic functions, potentials, polar sets and capacity, the Dirichlet problem, the Martin boundary, boundary behavior of superharmonic functions using real variable techniques, and minimal fine limit techniques.

**Prerequisite(s):** Math 675 and 776

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**MATH 795 - Graduate Seminar**

Credits: 1 (NR)  
Mandatory for all PhD students. Weekly seminar graded on presentations and attendance. Faculty presentations on potential thesis topics and presentations by students.

**Prerequisite(s):** Admission to PhD program in mathematical sciences.

**Hours of Lecture or Seminar per week:** 1  
**Hours of Lab or Studio per week:** 0

---

**MATH 799 - MS Thesis**

Credits: 1-6 (RD)  
Original or compilatory work evaluated by committee of three faculty members.

**Hours of Lecture or Seminar per week:** 1-6  
**Hours of Lab or Studio per week:** 0  
**Grading:** S/NC

---

**MATH 800 - Studies for the Doctor of Philosophy in Education**

Credits: 1-6 (NR)  
Program of studies designed by student's discipline director and approved by student's doctoral committee, which brings the student to participate in current research of discipline director and results in paper reporting the original contributions of student. Enrollment may be repeated.

**Prerequisite(s):** Admission to PhD in education program to study in mathematical sciences.

**Hours of Lecture or Seminar per week:** 1-6  
**Hours of Lab or Studio per week:** 0  
**Grading:** Graduate Special

---

**MATH 998 - PhD Thesis Proposal**
MATH 999 - PhD Thesis Research

Credits: 1-12 (RD)
Formal record of commitment to doctoral dissertation research under the direction of a faculty member. May be repeated for credit. No more than 24 credit hours of 998 and 999 may be applied to doctoral degree requirements.

Prerequisite(s): Advancement to doctoral candidacy.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0
Grading: S/IP

Mechanical Engineering (ME)

ME 320 - Fluid Mechanics

Credits: 3 (NR)
Introduces fundamental concepts of basic and applied fluid mechanics. Topics include fluid properties, statics, kinematics, and dynamics; Bernoulli equation; conservation laws; inviscid and viscous incompressible flow. Also, dimensional analysis and similitude, laminar and turbulent flow, internal and external flow, boundary layers, separation, wakes, drag, and flow measurement. Introduces turbomachinery with applications.

Prerequisite(s): ENGR 307. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

ME 330 - Heat Transfer

Credits: 3 (NR)
Introduces basic principles of conduction, convection, and thermal radiation. Topics include rate laws and conservation of energy, analysis of steady and transient one-and two-dimensional conduction, fins and enhanced heat transfer, forced and natural
convection in internal and external flows, heat exchangers, and thermal radiation. Considers thermal design of engineering processes and systems.

**Prerequisite(s):** ENGR 307. Prerequisite enforced by registration system.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall, Spring

---

**ME 350 - Mechanical Engineering Laboratory I**

Credits: 1 (NR)  
Introduces experimental methods in mechanical engineering. Reviews principles of measurement, sources of experimental error, quantification of experimental uncertainty, measurement standards and accuracy. Utilizes instrumentation including detectors and transducers, and digital data acquisition systems. Laboratory exercises include experimental measurements of properties of engineering materials, and experimental investigation of both mechanical and thermal systems and processes. Involves technical report writing.  

**Prerequisite(s):** ENGR 307. Prerequisite enforced by registration system.

**Hours of Lecture or Seminar per week:** 0  
**Hours of Lab or Studio per week:** 3  
**When Offered:** Fall, Summer, Spring

---

**ME 360 - Mechanical Engineering Design**

Credits: 3 (NR)  
Introduces modern engineering design methodology. Develops systematic approach to design beginning with problem specification. Topics include reverse engineering and product development, idea generation, alternative designs, and selection methods, design and analysis of basic mechanical components, computer-aided design and finite element methods. Reviews common manufacturing processes and engineering materials.  

**Prerequisite(s):** CEIE 210. Prerequisite enforced by registration system.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall, Summer, Spring

---

**ME 362 - Mechanical Elements**

Credits: 3 (NR)  
Introduces common mechanical components and methods for their analysis and design. Topics include kinematic analysis and design of screws and fasteners, springs and dampers, bearings, cams, gears, clutches, brakes, and linkages; dynamic modeling of mechanisms using velocity, acceleration, and force analysis; rotor dynamics and balancing; finite element analysis; and synthesis of linkages.  

**Prerequisite(s):** CEIE 310. Prerequisite enforced by registration system.
ME 368 - Manufacturing

Credits: 3 (NR)
Surveys selected manufacturing processes including rapid prototyping, metal cutting and machining, casting and molding, and thermoforming. Considers selection and use of engineering materials, including composites. Explores the use of Computer Numerical Control (CNC) machine tools for automated component design. Uses a computer-aided design (CAD) and computer-aided manufacturing (CAM) system to design and analyze a mechanical system.

Prerequisite(s): ME 362. Prerequisite enforced by registration system.

ME 380 - System Dynamics

Credits: 3 (NR)
Develops mathematical models of behavior of physical systems, including mechanical, thermal, fluid, electrical, electromechanical, and hybrid systems. Considers transient and steady-state behavior. Topics include use of state variable and transfer functions, mathematical analysis of system response, use of computer tools for modeling, and design and simulation.

Prerequisite(s): MATH 214, PHYS 260, PHYS 261, CEIE 210. Prerequisite enforced by registration system.

ME 390 - Control Engineering

Credits: 3 (NR)
Introduces fundamentals of feedback control and modern control theory. Topics include linear analyses of mechanical, thermal, fluid, and electrical feedback control systems by root locus and frequency response techniques. Explores use of sensors and transducers in control systems, data acquisition and analysis.

Prerequisite(s): ME 380. Prerequisite enforced by registration system.
Medical Technology (MTCH)

Offered by the College of Science

Prerequisite for the following courses except 200: completion of requirements for BS with major in medical technology except for 30 credits of professional study, and admission to school of medical technology approved by National Accrediting Agency for Clinical Laboratories.

MTCH 200 - Introduction to Medical Technology

Credits: 1 (NR)
Introduction to the profession of medical technology.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0

MTCH 401 - Orientation to the Problems and Practices of the Clinical Laboratory

Credits: 1-2 (NR)
Orientation to clinical lab; specimen collection and record keeping; management principles and problems; educational theories as they apply to the teaching of clinical laboratory procedures; and quality control principles.

Notes: Not offered on campus.

Hours of Lecture or Seminar per week: 1-12
Hours of Lab or Studio per week: 0

MTCH 402 - Clinical Hematology and Coagulation

Credits: 1-8 (RD)
Morphology of blood cells in health and disease; theories of hematopoiesis and coagulation; techniques for measurement of hematologic parameters; and hematologic pathologies and their lab evaluation.

Notes: Not offered on campus.

Hours of Lecture or Seminar per week: 1-12
Hours of Lab or Studio per week: 0

MTCH 403 - Clinical Microscopy

Credits: 1-3 (NR)
Methods for the routine examination of urine, feces, and certain other body fluids, especially the microscopic identification of normal and pathologic components. Includes a study of the kidney and theories of microscopy.
Notes: Not offered on campus.

**MTCH 404 - Serology and Immunohematology**

Credits: 1-7 (RD)
Clinical lab procedures involving antigen-antibody reactions, and theoretical bases of such procedures. Includes both diagnostic and blood bank techniques.

Notes: Not offered on campus.

**MTCH 405 - Clinical Microbiology**

Credits: 1-8 (RD)
Biology and pathology of bacteria, rickettsia, fungi, parasites, and viruses of clinical importance and their culture and identification.

Notes: Not offered on campus.

**MTCH 406 - Clinical Chemistry**

Credits: 1-10 (RD)
Chemical reactions and procedures used in clinical determinations on blood, urine, and cerebral spinal fluid. Includes manual, automated methods of chemical analyses.

Notes: Not offered on campus.

**Middle East and Islamic Studies (MEIS)**
MEIS 500 - Critical Issues and Debates in Middle East and Islamic Studies

Credits: 3 (NR)
Introduces the interdisciplinary study of the Middle East and the Islamic world through an examination of recent seminal works and debates in the field representing the disciplinary perspectives of history, religious studies, political science, and sociology.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

MEIS 799 - Thesis Research and Writing in Middle East and Islamic Studies

Credits: 1-6 (RD)
Original research and thesis writing for students in the Middle East and Islamic Studies MA program.

Prerequisite(s): Completion of MEIS 500, HIST 535, GOVT 731, GOVT 733, RELI 644; and 27 credit hours toward MA in MEIS degree; permission of MEIS director.

Grading: Satisfactory/No Credit

Military Science (MLSC)

Offered by the University

MLSC 100 - Introduction to Army/ROTC

Credits: 1 (NR)
Introduces leadership values and ethics; responsibilities of officership; the organization, customs, and traditions of the U.S. Army; time management; and physical well-being. Includes a laboratory in applied leadership, common military tasks, and physical fitness.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 2

MLSC 102 - Leadership Skills II

Credits: 1 (NR)
Introduces leadership principles, dimensions, styles, and assessment, among other varied topics. Includes a laboratory in applied leadership, common military tasks, and physical fitness.

Equivalent to MLSC 101 (2012-2013 Catalog)

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 1
When Offered: Spring
MLSC 200 - Self/Team Development

Credits: 1 (NR)
Covers leadership skills, such as values and ethics. Also teaches how to influence, how to communicate, how and when to make decisions, how to engage in creative problem solving, and how to plan and organize. Includes a laboratory in applied leadership, common military tasks, and physical fitness.

Prerequisite(s): MLSC 100 and 101, or approval of professor of military science

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 2

MLSC 202 - Leadership Skills IV

Credits: 1 (NR)
Builds on the leadership skills developed in Leadership Skills III with additional emphasis on communication, team building, and team leadership. Includes a laboratory in applied leadership, common military tasks, and physical fitness.

Equivalent to MLSC 201 (2012-2013 Catalog)

Prerequisite(s): MLSC 100 level completion/dual enrollment or military waiver granted by Professor of Military Science (Dept Head).

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 1
When Offered: Spring

MLSC 300 - Applied Leadership I

Credits: 0 or 1 (NR)
Applied leadership with an introduction to the principles of physical fitness and healthy lifestyle; counseling as means of subordinate development; problem solving; operational analysis, development, and execution; and methods for preparing and presenting instruction. Students are given an introduction to the Leader Development Program that is used to evaluate their leadership performance and provide students with developmental feedback. Some weekend training required. Includes a laboratory in applied leadership, common military tasks, and physical fitness.

Prerequisite(s): MLSC 100, 101, 200, and 201; and credit or veteran status with approval from military science professor

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 2

MLSC 302 - Applied Leadership II
Credits: 1 (NR)
Applied leadership covering the models of communications (verbal and nonverbal), technology to communicate, how to prepare and conduct formal briefings, an introduction to the Army branches, diversity and equal opportunity training, ethical decision making, & group cohesion and dysfunction. Some weekend training required. Includes a laboratory in applied leadership, common military tasks, and physical fitness.

Equivalent to MLSC 301 (2012-2013 Catalog)

Prerequisite(s): MLSC 100 & 200 level completion or military credit exemption granted by Professor of Military Science (Dept Head).

Notes: Enrollment in MLSC 300 level course is restricted to students who are contracted or are pre-approved by department/Army ROTC as pending contracting.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 1
When Offered: Spring

MLSC 400 - Leadership and Management

Credits: 3 (NR)
Considered the "transition to lieutenant" phase in which managerial theories are applied to personnel, training, and logistics management situations. Students have command and staff responsibilities for the Mason cadet corps and receive hands-on experience operating as a management team. There are several briefing and writing requirements as well. Includes a laboratory in applied science, common military tasks, and physical fitness.

Prerequisite(s): MLSC 300 and 301

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 2

MLSC 402 - Leadership and Ethics

Credits: 3 (NR)
Continuing the "transition to lieutenant" phase of ROTC, examines ethics of military environment to include customs, ethical codes & decision making, constraints, and appeals to moral principles. American judicial system is also examined, with emphasis on the Uniform Code of Military Justice. Command and staff responsibilities are assigned to students for hands-on experience operating as a management team for Mason cadet corps. Includes a laboratory in applied leadership, common military tasks, and physical fitness.

Equivalent to MLSC 401 (2012-2013 Catalog)

Prerequisite(s): MLSC 300 & 302

Hours of Lecture or Seminar per week: 3
Music (MUSI)

Offered by the College of Visual and Performing Arts

All private music instruction is by arrangement. Students must consult the director of applied music studies in the School of Music for teacher assignment and registration numbers. Applied music fee applies. Majors and minors who register for applied music must also register for an ensemble.

For music major, music minor, or jazz studies minor: half-hour lesson per week, 1 credit, $193; hour lesson per week, 2 or 3 credits, $390. For non-major or minor: half hour lesson per week, 1 credit, $390; hour lesson per week, 2 credits, $780.

MUSI 100 - Fundamentals of Music

Credits: 3 (NR)
Study of musical notation, interval and triad construction, reading of treble and bass clefs, scale construction, rhythm, elementary sight singing and ear training, and application at keyboard.

Fulfills general education requirement in arts.

Notes: Cannot be applied toward degree in music.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

MUSI 101 - Introduction to Classical Music

Credits: 3 (NR)
Introduces art-music tradition of West. Techniques for expanding listening skills developed through study of musical elements, styles, and selected masterworks of musical literature.

Fulfills general education requirement in arts.

Notes: Music majors may take only as free elective.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

MUSI 102 - Popular Music in America
Investigates popular music styles and development in the United States with particular emphasis on the past 50 years. Lectures, recordings, and video enhance critical listening skills and examine stylistic and social contexts of popular music.

Fulfills general education requirement in arts.

Notes: Music majors may take only as free elective.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

MUSI 103 - Musics of the World

Credits: 3 (NR)
Study and comparison of musical structure and expression in several world cultures, with special attention to social context and function. Studies selected Asian, Middle Eastern, African, and American (Latin, Native, African) cultures.

Fulfills general education requirement in global understanding.

Notes: For non-music majors only. Fulfills the college-level requirement in non-Western culture.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

MUSI 104 - Introduction to Twentieth-Century Music

Credits: 3 (NR)
Survey of various styles found in 20th-century music. Tonal, atonal, serial, and experimental music.

Notes: Music majors may take only as free elective.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

MUSI 105 - Music in the United States

Credits: 3 (NR)
Study of music in the United States from colonial times to present. Through interaction with musical examples, traces significant African and European influences on emerging style and artistic activity in the United States.

Notes: Music majors may take only as free elective.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
MUSI 107 - The Development of Jazz

Credits: 3 (NR)
Historical, analytical, and aural survey of jazz from inception to present day. Looks at trends resulting from synthesis of jazz with other musical idioms.

Fulfills general education requirement in arts.

Notes: Music majors may take as free elective or part of jazz studies concentration.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

MUSI 113 - Aural Skills I

Credits: 1 (NR)
Students taught to sing a line of music without accompaniment of instrument. Matching tones, major and minor scales, key signatures, intervals, rhythm, treble and bass clefs, and rhythmic and melodic dictation.

Prerequisite(s): Restricted to MUSI majors, MUSI minors, and Jazz Studies minors, or to those with permission of music associate chair.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

MUSI 114 - Aural Skills II

Credits: 1-2 (NR)
Continuation of MUSI 113. Alto and tenor clefs, modulation, various modes, and melodic and harmonic dictation.

Prerequisite(s): MUSI 113, or permission of instructor

Hours of Lecture or Seminar per week: 1-2
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

MUSI 115 - Theory I

Credits: 3 (NR)
Music notation, scales, key signatures, intervals, chords, cadences, and figured bass.

Prerequisite(s): Student must be able to read music, be able to pass a fundamentals of music test (administered during first week
of classes), and have some proficiency on a musical instrument or in voice. Restricted to MUSI majors; MUSI minors and Jazz Studies minors need permission of music associate chair; non-MUSI majors need permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall

**MUSI 116 - Theory II**

Credits: 3 (NR)  
First- and second-inversion chords, modulation, nonharmonic tones, figured bass, seventh chords. Analysis of Bach chorales; composition of four-part chorales in 18th-century style.

**Prerequisite(s):** MUSI 115, or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Spring

**MUSI 121 - NonMaj PMI:First Instrum**

Credits: 1-2 (RD)  
**Prerequisite(s):** For non-music majors only. Two-credit level restricted to students with substantial prior private study.

**Hours of Lecture or Seminar per week:** 1-2  
**Hours of Lab or Studio per week:** 0

**MUSI 122 - NonMaj PMI:Secnd Instrum**

Credits: 1-2 (RD)  
**Hours of Lecture or Seminar per week:** 1-2  
**Hours of Lab or Studio per week:** 0

**MUSI 171 - Keyboard Skills I**

Credits: 1 (NR)  
Study of piano keyboard as it relates to various clefs in music. Emphasis on solution of basic stylistic and technical problems.

**Prerequisite(s):** Restricted to MUSI majors, MUSI minors, and jazz studies minors, or to those with permission of music associate chair.

**Hours of Lecture or Seminar per week:** 1-6  
**Hours of Lab or Studio per week:** 3  
**When Offered:** Fall
MUSI 172 - Keyboard Skills II

Credits: 1 (NR)
Study of piano keyboard as it relates to intermediate song and combined in various music forms.

Prerequisite(s): MUSI 171. Restricted to MUSI majors, MUSI minors, and jazz studies minors, or to those with permission of music associate chair.

Notes: Nonmusic majors must have permission of instructor.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 3
When Offered: Spring

MUSI 213 - Aural Skills III

Credits: 2 (NR)
Continuation of Music 114. Emphasizes modulation, chromatic and nontonal melodies, various modes, melodic and harmonic dictation, c clefs, and improvisation.

Prerequisite(s): Music 114, or permission of instructor.
Corequisite(s): Music 114, or permission of instructor.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 0

MUSI 214 - Aural Skills IV

Credits: 2 (NR)
Continuation on MUSI 213 with emphasis on chromatic and non-tonal harmonies.

Prerequisite(s): MUSI 213, or permission of instructor.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 0

MUSI 215 - Theory III

Credits: 3 (NR)
Study of four-part chromatic harmony and analysis of 19th-century compositions.

Prerequisite(s): MUSI 116 or permission of instructor. Restricted to music majors; music minors and jazz studies minors need permission of music associate chair; non-music majors need permission of instructor.
MUSI 216 - Theory IV

Credits: 3 (NR)
Study of melodic, harmonic, rhythmic, and formal processes in post-tonal music.

Prerequisite(s): MUSI 215, or permission of instructor.

MUSI 221 - Applied Music I

Credits: 1 (RD)
Applied music studies 1.

Prerequisite(s): Audition or portfolio.

Notes: May be repeated for up to 8 credits.

MUSI 222 - Applied Music in Keyboard

Credits: 1 (RD)
Applied music studies in Keyboard.

Prerequisite(s): Audition.

Notes: May be repeated for up to 8 credits.

MUSI 223 - Applied Music in Voice

Credits: 1 (RD)
Applied music studies in Voice.
Prerequisite(s): Audition.

Corequisite(s): MUSI 381, 384, or 385.

Notes: May be repeated for up to 8 credits.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0.5

MUSI 224 - Applied Music in Woodwind

Credits: 1 (RD)
Applied music studies in Woodwind.

Prerequisite(s): Audition.

Notes: May be repeated for up to 8 credits.

Hours of Lecture or Seminar per week: 1-12
Hours of Lab or Studio per week: 0.5

MUSI 225 - Applied Music in Brass

Credits: 1 (RD)
Applied music studies in Brass.

Prerequisite(s): Audition.

Notes: May be repeated for up to 8 credits.

Hours of Lecture or Seminar per week: 1-12
Hours of Lab or Studio per week: 0.5

MUSI 226 - Applied Music in String

Credits: 1 (RD)
Applied music studies in String.

Prerequisite(s): Audition.

Notes: May be repeated for up to 8 credits.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0.5
MUSI 227 - Applied Music in Percussion

Credits: 1 (RD)
Applied music studies in Percussion.

Prerequisite(s): Audition.

Notes: May be repeated for up to 8 credits.

Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 0.5

MUSI 228 - Applied Music in Composition

Credits: 1 (RD)
Applied music studies in Composition.

Prerequisite(s): Portfolio of recent compositions.

Notes: May be repeated for up to 8 credits.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0.5

MUSI 229 - Non-Major Applied Music I

Credits: 1 (RD)
Applied music studies I.

Prerequisite(s): Audition or portfolio.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 1

MUSI 241 - Applied Music II

Credits: 2 (RD)
Applied music studies 2.

Prerequisite(s): Audition or portfolio.

Notes: May be repeated for up to 16 credits.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 1
MUSI 242 - Applied Music in Keyboard

Credits: 2 (RD)
Applied music studies in Keyboard.

Prerequisite(s): Audition.

Notes: May be repeated for up to 16 credits.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 1

MUSI 243 - Applied Music in Voice

Credits: 2 (RD)
Applied music studies in Voice.

Prerequisite(s): Audition.

Corequisite(s): MUSI 381, 384, or 385.

Notes: May be repeated for up to 16 credits.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 1

MUSI 244 - Applied Music in Woodwind

Credits: 2 (RD)
Applied music studies in Woodwind.

Prerequisite(s): Audition.

Notes: May be repeated for up to 16 credits.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 1

MUSI 245 - Applied Music in Brass

Credits: 2 (RD)
Applied music studies in Brass.

Prerequisite(s): Audition.

Notes: May be repeated for up to 16 credits.
MUSI 246 - Applied Music in String

Credits: 2 (RD)
Applied music studies in String.

Prerequisite(s): Audition.

Notes: May be repeated for up to 16 credits.

MUSI 247 - Applied Music in Percussion

Credits: 2 (RD)
Applied music studies in Percussion.

Prerequisite(s): Audition.

Notes: May be repeated for up to 16 credits.

MUSI 248 - Applied Music in Composition

Credits: 2 (RD)
Applied music studies in Composition.

Prerequisite(s): Portfolio of recent compositions.

Notes: May be repeated for up to 16 credits.

MUSI 249 - Non-Major Applied Music II

Credits: 2 (RD)
Applied music studies II.
Prerequisite(s): Audition or portfolio.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 2

MUSI 251 - The Art of Teaching Music

Credits: 3 (NR)
Introduces and explores various music teaching professions. Examines philosophical, pedagogical, and practical issues in context of diverse teaching situations and venues that range from private studio and public school to community music schools and commercial establishments.

Fulfills general education requirement in oral communication for the Music BM only.

Prerequisite(s): Admission to music major or minor program, or jazz studies minor program.

Notes: Requires observing professionals in the field.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

MUSI 252 - Popular Music Arranging

Credits: 3 (NR)
This course explores popular music styles and genres. Using this information to analyze popular music and arrange the music for various ensembles.

Prerequisite(s): MUSI 215.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Summer, Spring

MUSI 254 - Music and Technology

Credits: 3 (NR)
Study of technology related to music, including audio synthesis and computer-based hardware and software.

Equivalent to MUSI 315.

Prerequisite(s): MUSI 100 or MUSI 115.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Summer, Spring
MUSI 259 - Music in Computer Technology

Credits: 3 (NR)
Overview of ways computer is used in music. Topics include principles of musical instrument digital interface (MIDI); various kinds of synthesis; acoustics and sound processing; and musical composition under the computer. Explores music resources of Internet and surveys current multimedia applications in music history, theory, ear training, improvisation, and notation.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 1
When Offered: Fall, Summer, Spring

MUSI 273 - Keyboard Skills III

Credits: 1 (NR)
Continuation of MUSI 172. Study of techniques of harmonization at the piano keyboard.

Prerequisite(s): MUSI 172. Restricted to MUSI majors, MUSI minors, and Jazz Studies minors, or permission of music associate chair.

Notes: Nonmusic majors must have permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 3
When Offered: Fall

MUSI 280 - Athletic and Ceremonial Ensemble

Credits: 0-1 (RT)
Students gain an understanding of American popular and other musics developing personal expression via performance and creative design. Students also learn and develop leadership and management skills. An understanding of the vital role of community outreach and service is gained through first-hand experience.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0
When Offered: Fall, Summer, Spring

MUSI 300 - Recital Attendance

Credits: 0 (RD)
Students attend 10 student recitals to be selected from departmental and music education recitals, and junior, senior, and graduate recitals.

Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 0
Grading: S/NC
When Offered: Fall, Spring

MUSI 301 - Music in Motion Pictures

Credits: 3 (NR)
Intensive study and analysis of using music tracks in motion pictures to introduce the picture, set a scene, create moods, or for musical numbers. From the silent film scores of the 1920s to the present (including electronic music).

Fulfills general education requirement in arts.

Prerequisite(s): 30 credits.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

MUSI 302 - American Musical Theater

Credits: 3 (NR)
Intensive study of the musical elements in the American musical theater from its European and later African roots to its evolution between the wars into a native form, and its continual assimilation of external influences such as new forms of jazz and rock to the eclectic form of the present day.

Fulfills general education requirement in arts.

Prerequisite(s): 30 credit hours or permission of the instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

MUSI 311 - Jazz Studies

Credits: 3 (NR)
Musicianship course integrating jazz improvisation, theory, composition, and arranging. Focuses on concepts unique to our time in style, form, and harmony.

Prerequisite(s): MUSI 379 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

MUSI 315 - Music Technology
Credits: 3 (NR)
Study of technology related to music, including audio synthesis and computer-based hardware and software.

Equivalent to MUSI 254.

Prerequisite(s): MUSI 100 or 115

Notes: There is a course fee beyond tuition charges.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

MUSI 316 - Topics in Music Technology

Credits: 3 (RD)
Selected topics in music technology with an emphasis on musical creativity. Includes consideration of recent developments in areas such as electronic composition, the science of music, recording industry and practices, and music industry.

Equivalent to MUSI 359.

Prerequisite(s): MUSI 315.

Notes: Can be repeated for up to 9 credits. There is a course fee beyond tuition charges.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

MUSI 319 - Class Composition and Arranging

Credits: 3 (NR)
Students write original compositions for specified instruments, voices, or combinations. They then apply compositional principles to the creative arrangement of existing music of various styles.

Prerequisite(s): MUSI 114 or 216, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

MUSI 321 - Non-Major PMI

Credits: 1-2 (NR)
Prerequisite(s): 4 credits in Non-Major Private Music Instruction or audition for the PMI coordinator.

Hours of Lecture or Seminar per week: 1-2
Hours of Lab or Studio per week: 0
MUSI 323 - Music Education Recital

Credits: 0 (NR)
Recital on major instrument given by student during junior or senior year.

Prerequisite(s): Minimum 8 credits in private music instruction in major instrument

Corequisite(s): Concurrent enrollment in appropriate 2-credit private music instruction course.

Notes: Recital must be at least 25 minutes long. All recitals by arrangement. Students must consult with director of applied music studies to register and schedule dates.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
Grading: S/NC

MUSI 324 - Junior Recital

Credits: 1 (NR)
Public recital by student during junior year.

Corequisite(s): Concurrent enrollment in appropriate 3-credit private music instruction course.

Notes: Junior recital must be at least 25 minutes long. All recitals by arrangement. Students must consult with director of applied music studies to register and schedule dates.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

MUSI 325 - Performance Seminar and Vocal Literature for Singers and Accompanists I

Credits: 2 (RD)
Students assigned vocal literature in Italian, English, German, and French from Baroque to 21st century, and perform in a weekly master class format. Designed for vocal performance and piano and accompanying majors; develops and improves artistic and performance skills, repertoire preparation and execution, diction, interpretation, style, and overall stage presence.

Prerequisite(s): Admission to the Music major program or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 1

MUSI 326 - Performance Seminar and Vocal Literature for Singers and Accompanists II
Credits: 2 (RD)
Students assigned vocal literature in Italian, English, German, and French from Baroque to 21st century, and perform in a weekly master class format. Designed for vocal performance and piano and accompanying majors; develops and improves artistic and performance skills, repertoire preparation and execution, diction, interpretation, style, and overall stage presence.

Prerequisite(s): Admission to the Music major program or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 1

MUSI 331 - Music History in Society I

Credits: 3 (NR)
Historical survey of Western music from Greek times through the late Baroque era, with emphasis on specific musical genres and composers who developed them. Musical developments are related to other aspects of society. Instruction conducted by lectures, recordings, and video. Learning process enhanced by reading, listening, writing, and analytical assignments.

Prerequisite(s): MUSI 215 or permission of instructor

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring

MUSI 332 - Music History in Society II

Credits: 3 (NR)
Historical survey of Western music from the early Classical era through mid-19th century, with emphasis on specific musical genres and composers who developed them. Musical developments related to other aspects of society. Lectures, recordings, video. Learning process enhanced by reading, listening, writing, and analytical assignments.

Fulfills writing intensive requirement in the major.

Prerequisite(s): MUSI 216 and 331, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

MUSI 338 - Music History in Society A

Credits: 3 (NR)
Historical survey of Western music from the late Renaissance through the Romantic era, with emphasis on specific musical genres and composers who developed them. Musical developments are related to other aspects of society. Instruction conducted by lectures, recordings, and video. Learning process enhanced by reading, listening, writing, and analytical assignments.

Prerequisite(s): MUSI 215, or permission of instructor.
MUSI 341 - Diction for Singers I: Italian Diction and English Diction

Credits: 2 (NR)
Increases proficiency in singing in Italian and English by teaching International Phonetic Alphabet (IPA), and strengthens performance of Italian and English art songs and operatic repertoire. Focuses on intensified, systematic study of phonetics as it applies to singing in Italian and English.

Prerequisite(s): Admission to the Music major program or permission of instructor.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 1

MUSI 342 - Diction for Singers II: German Diction and French Diction

Credits: 2 (NR)
Increases proficiency in singing in German and French by teaching International Phonetic Alphabet (IPA), and strengthens performance of German and French art songs and operatic repertoire. Focuses on intensified, systematic study of phonetics as it applies to singing in German and French.

Prerequisite(s): Restricted to MUSI majors and minors. Non majors need permission of instructor.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 1

MUSI 351 - Keyboard Pedagogy

Credits: 3 (NR)
Investigates methods, theories, techniques, and materials to teach keyboard to children and adults in individual and group situations.

Prerequisite(s): MUSI 114, 216 and 273; and 8 credits in piano, organ, or harpsichord; or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Summer

MUSI 352 - Vocal Pedagogy and Lab

Credits: 3 (NR)
Instruction in teaching of voice through systematic study of vocal physiology and its implications for pedagogical methods.
Includes theoretical and systematic study of processes, procedures, and practices to develop art of singing. Offers technical, physiological, theoretical, and practical principals of the singing art, with emphasis on the importance of vocal health.

Prerequisite(s): Admission to the Music major program or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 1

MUSI 353 - Instrumental Pedagogy and Literature

Credits: 3 (NR)
Instruction in teaching instrumental music techniques for all levels through study of pedagogical methods, standard literature, and musical instruments produced by present-day manufacturers.

Prerequisite(s): Junior standing in instrumental private music instruction, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

MUSI 354 - Electronic Composition

Credits: 3 (NR)
This course explores the techniques used in recording music with current software and hardware to edit, modify, and market music.

Prerequisite(s): MUSI 255.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Summer, Spring

MUSI 355 - Recording Techniques

Credits: 3 (NR)
Explores the techniques used in recording music with current software and hardware to edit, modify, and market music.

Prerequisite(s): MUSI 255.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Summer, Spring

MUSI 359 - Topics in Music Technology
Credits: 3 (NR)
Selected topics in music technology with an emphasis on musical creativity. Includes consideration of recent developments in areas such as electronic composition, the science of music, recording industry and practices, and music industry.

Equivalent to MUSI 316

Prerequisite(s): MUSI 354, MUSI 355.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Summer, Spring

MUSI 361 - Class Strings: Violin, Viola, Cello, and Bass

Credits: 1 (NR)
Study of playing and teaching string instruments with emphasis on violin and cello through beginning method book. Study of fingerings and bowing techniques to teach and play viola and bass at beginning levels. Survey of string playing techniques to conduct rehearsals at intermediate-, advanced-, and artist-level ensembles.

Prerequisite(s): Admission to music major program, or permission of instructor.

Notes: Three hours per week studying violin, viola, cello, and bass; one hour per week in laboratory ensemble.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 4

MUSI 363 - Class Woodwinds: Flute, Clarinet, Saxophone

Credits: 1 (RD)
Study of techniques of playing and teaching flute and clarinet. Survey of instructional materials, and mouthpiece and instrument selection.

Prerequisite(s): Admission to music major program, or permission of instructor.

Notes: Three hours per week studying flute and clarinet; one hour per week in laboratory ensemble.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 4

MUSI 364 - Class Woodwinds: Oboe and Bassoon

Credits: 1 (RD)
Study of techniques of playing and teaching oboe and bassoon. Survey of instructional materials, instrument selection, and reed adjustment.

Prerequisite(s): Admission to music major program, or permission of instructor.
Notes: Three hours per week studying oboe and bassoon; one hour per week in laboratory ensemble.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 4

MUSI 365 - Class Brass: Trumpet and French Horn

Credits: 1 (NR)
Study of techniques of playing and teaching trumpet and French horn. Survey of instructional materials, and mouthpiece and instrument selection.

Prerequisite(s): Admission to music major program, or permission of instructor.

Notes: Three hours per week studying trumpet and French horn; one hour per week in laboratory ensemble.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 4

MUSI 366 - Class Percussion

Credits: 1 (NR)
Study of techniques of playing and teaching percussion instruments. Survey of instructional materials and instrument selection.

Prerequisite(s): Admission to music major program, or permission of instructor.

Notes: Three hours per week studying percussion instruments; one hour per week in laboratory ensemble.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 4

MUSI 367 - Class Guitar

Credits: 1 (NR)
Study of techniques of playing and teaching guitar. Survey of instructional materials and instrument selection.

Prerequisite(s): Admission to music major program, or permission of instructor.

Notes: Three hours per week studying guitar; one hour per week in laboratory ensemble.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 4

MUSI 368 - Class Voice
Credits: 1 (NR)
Study of the human voice in artistic singing. Emphasizes practical application of basic principles.

Prerequisite(s): Admission to music major program, or permission of instructor.

Notes: Three hours per week studying voice; one hour per week in laboratory ensemble.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 4

MUSI 369 - Class Brass: Trombone, Euphonium, and Tuba

Credits: 1 (NR)
Study of techniques of playing and teaching trombone, euphonium, and tuba. Survey of instructional materials and mouthpiece and instrument selection.

Prerequisite(s): Admission to music major program, or permission of instructor.

Notes: Three hours per week studying trombone, euphonium, or tuba; one hour per week in laboratory ensemble.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 4

MUSI 371 - Techniques of Accompanying I

Credits: 1 (NR)
Development of accompanying skills through collaboration with solo singers, instrumentalists, and small ensembles. Students perform for each other; observe lectures, demonstrations, and performances by professionals; and participate in master classes.

Prerequisite(s): Restricted to piano majors and minors, or to those with permission of instructor.

Notes: May be taken two times for credit.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 3
When Offered: Fall, Spring, Summer

MUSI 372 - Techniques of Accompanying II

Credits: 1 (NR)
Development of accompanying skills through collaboration with solo singers, instrumentalists, and small ensembles. Students perform for each other; observe lectures, demonstrations, and performances by professionals; and participate in master classes.

Prerequisite(s): MUSI 371. Audition on a keyboard instrument for admission to a music degree program, 4 credits in undergraduate Private Music Instruction on a keyboard instrument, or permission of instructor.

Notes: May be taken two times for credit.
MUSI 373 - Advanced Accompanying and Musicianship Skills

Credits: 3 (NR)
Advanced study and techniques for accompanying choirs, vocal soloists, and instrumentalists. Additional instruction in keyboard reduction of orchestral scores for concertos, continuo/figured bass reading, lead-sheet reading, transposition, improvisation, transcription, and "playing by ear."

Prerequisite(s): MUSI 372 or permission of instructor.

Corequisite(s): MUSI 372 or permission of instructor.

MUSI 379 - Introduction to Jazz Improvisation

Credits: 1 (NR)
Study of improvisation techniques and styles, with emphasis on common practice period of jazz. Application on the student's major instrument or voice to develop creativity and personal expression.

Prerequisite(s): MUSI 116 or permission of instructor; corequisite for Jazz Studies minors: MUSI 485 (Jazz Chamber Ensembles).

MUSI 380 - Wind Symphony

Credits: 1 (RT)
Students develop an understanding of major artistic works, including a consideration of how theoretical and historical insights find expression via performance. Highly selective group of instrumentalists perform works from wind symphony repertoire.

Fulfills general education requirement in arts.

Prerequisite(s): Audition.

Notes: Public concerts required.
**MUSI 381 - University Chorale**

Credits: 1 (RT)
Students develop an understanding of major artistic works, including a consideration of how theoretical and historical insights find expression via performance. Performance of works from choral repertoire.

Fulfills general education requirement in arts.

**Prerequisite(s):** Audition.

**Notes:** Public concerts required.

**Hours of Lecture or Seminar per week:** 1-6  
**Hours of Lab or Studio per week:** 3  
**When Offered:** Fall, Spring

---

**MUSI 382 - Piano Ensemble**

Credits: 1 (RT)
Students develop an understanding of major artistic works, including a consideration of how theoretical and historical insights find expression via performance. Study and performance of original four-hand works for one and two pianos.

Fulfills general education requirement in arts.

**Prerequisite(s):** 4 hours of PMI (Piano) and audition. Written Permission of Instructor required.

**Notes:** Public performances required.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 3  
**When Offered:** Fall, Spring

---

**MUSI 383 - Symphonic Band**

Credits: 1 (RT)
Students develop an understanding of major artistic works, including a consideration of how theoretical and historical insights find expression via performance. Performance of works from band repertoire.

Fulfills general education requirement in arts.

**Prerequisite(s):** Audition.

**Notes:** Public concerts required.

**Hours of Lecture or Seminar per week:** 1-12  
**Hours of Lab or Studio per week:** 3  
**When Offered:** Fall, Spring
**MUSI 384 - Symphonic Chorus**

Credits: 1 (RT)
Students develop an understanding of major artistic works, including a consideration of how theoretical and historical insights find expression via performance. Performance of major works from the choral repertoire.

Fulfills general education requirement in arts.

**Prerequisite(s):** Audition.

**Notes:** Public concerts are given.

**Hours of Lecture or Seminar per week:** 1-6
**Hours of Lab or Studio per week:** 3
**When Offered:** Fall, Spring

---

**MUSI 385 - Chamber Singers**

Credits: 1 (RT)
Students develop an understanding of major artistic works, including a consideration of how theoretical and historical insights find expression via performance. Students explore their levels of artistic development through discovery, interpretation, and performance of choral music for vocal chamber music ensembles from multiple historical periods. Students bring to Mason and surrounding community musical compositions not readily accessible in regular concert repertoire.

Fulfills general education requirement in arts.

**Prerequisite(s):** Audition.

**Hours of Lecture or Seminar per week:** 1-12
**Hours of Lab or Studio per week:** 3
**When Offered:** Fall, Spring

---

**MUSI 387 - Symphony Orchestra**

Credits: 1 (RT)
Students develop an understanding of major artistic works, including a consideration of how theoretical and historical insights find expression via performance. Performance of works from symphony orchestra repertoire.

Fulfills general education requirement in arts.

**Prerequisite(s):** Audition.

**Notes:** Public concerts required.

**Hours of Lecture or Seminar per week:** 1-6
**Hours of Lab or Studio per week:** 3
**When Offered:** Fall, Spring
MUSI 388 - Fundamental Techniques of Stagecraft for Opera and Music Theater

Credits: 2 (NR)
Study of basic to intermediate stage movement techniques necessary to the performance of opera and music theater roles. Emphasis on acting, improvisation, theater production, musical theater, and operatic role study.

Prerequisite(s): Admission to music program, or permission of instructor.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 1

MUSI 389 - Jazz Ensemble

Credits: 1 (RT)
Students develop an understanding of major artistic works, including a consideration of how theoretical and historical insights find expression via performance. Provides practical experience in various aspects of jazz performance: section work within a large aggregation, combo work, and improvisation.

Fulfills general education requirement in arts.

Prerequisite(s): Audition.

Notes: Public concerts required.

Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 3
When Offered: Fall, Spring

MUSI 391 - Conducting I

Credits: 2 (NR)
Study of basic techniques of conducting a musical ensemble.

Prerequisite(s): MUSI 114, 216, and 273; or permission of instructor.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 3
When Offered: Fall

MUSI 393 - Music Administration and Management

Credits: 2 (NR)
Prepares students to address aspects of administration and management of music programs in public and private schools. Investigates principles and concepts of management styles and planning. Covers curriculum, budget, student recruitment and
retention, external relations of the music unit, and legal issues for music educators.

Prerequisite(s): MUSI 116, or permission of instructor.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 0
When Offered: Spring

MUSI 395 - Teaching Internship

Credits: 1-4 (RT)
Internship with a professional individual or organization in teaching. Introduction to teaching or augmentation of teaching skills. Students develop individual contracts defining the learning and competencies to be gained from the experience.

Prerequisite(s): MUSI 251.

Notes: Maximum of 9 internship credits (MUSI 395, 495, 496) can be applied toward a degree.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

MUSI 396 - Conducting II

Credits: 2 (NR)
Advanced conducting course emphasizing techniques for instrumental and choral conducting. Refining gestures, full score analysis and interpretation, rehearsal techniques, and changing meters.

Prerequisite(s): MUSI 391, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 3

MUSI 401 - Impact of the Arts on Civilization

Credits: 3 (NR)
Analyzes how genres of art impact us intellectually, emotionally, and subliminally. Broadens aesthetic and historical perspective, exposes students to major strands of contemporary thought, and develops discursive abilities through role-playing in round table discussions.

Prerequisite(s): 30 credits, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
MUSI 415 - Music in Computer Technology

Credits: 3 (NR)
Overview of ways computer is used in music. Topics include principles of musical instrument digital interface (MIDI); various kinds of synthesis; acoustics and sound processing; and musical composition using the computer. Explores music resources of Internet and surveys current multimedia applications in music history, theory, ear training, improvisation, and notation.

Fulfills general education requirement in information technology (all).

Prerequisite(s): MUSI 319, or permission of instructor.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 1
When Offered: Spring

MUSI 419 - Orchestration

Credits: 3 (NR)
Principles of combining and balancing instruments in orchestral and chamber contexts. Attention to orchestral terminology and general notation as well as timbre, range, clefs, transposition, special effects, and scoring procedures.

Prerequisite(s): MUSI 114, 216, and 319; or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring

MUSI 421 - Applied Music III

Credits: 1 (RD)
Applied music studies 3.

Prerequisite(s): Audition or portfolio of recent compositions.

Notes: May be repeated for up to 8 credits.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0.5

MUSI 424 - Senior Recital

Credits: 1 (NR)
Public recital by student during senior year.

Corequisite(s): Concurrent enrollment in appropriate 3-credit private music instruction course.
Notes: Senior recital must be at least 50 minutes long. All recitals by arrangement. Students must consult with director of applied music studies to register and schedule dates.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

MUSI 431 - Music History in Society III

Credits: 3 (NR)
Studies contributions to the world of music in selected cultures such as India, Indonesia, China, Japan, Africa, Middle East, and Americas. Emphasizes comparative musical characteristics as well as sociological function. Lectures, recordings, and video. Learning process enhanced by reading, listening, writing, and analytical assignments.

Fulfills general education requirement in global understanding.

Prerequisite(s): MUSI 216, 331, and 332; or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring

MUSI 432 - Music History in Society IV

Credits: 3 (NR)
Historical survey of Western music from late 19th century to present, with emphasis on specific musical genres and composers who developed them. Relates musical developments to other aspects of society, and considers interaction between world music. Lectures, recordings, and video. Learning process enhanced by reading, listening, writing, and analytical assignments.

Prerequisite(s): MUSI 216, 331, 332, and 431; or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

MUSI 438 - Music History in Society B

Credits: 3 (NR)

Historical survey of Western vernacular and classical music from 1877 to 1945, with emphasis on musical genres, composers, and performers. Musical developments are related to other aspects of society. Instruction conducted by lectures, recordings, and video.
Fulfills writing intensive requirement in the BA in music with a concentration in Music Technology.

Prerequisite(s): MUSI 338 or permission of instructor.

Hours of Lecture or Seminar per week: 3
MUSI 439 - Music History in Society C

Credits: 3 (NR)
Historical survey of Western vernacular and classical music from 1945 to present, with emphasis on specific musical genres, composers, and performers. Musical developments are related to other aspects of society. Instruction conducted by lectures, recordings, and video. Learning process enhanced by reading, listening, writing, and analytical assignments.

Prerequisite(s): MUSI 438, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Summer, Spring

MUSI 441 - Private Music Instruction IV

Credits: 2-3 (RD)
Applied music studies 4.

Prerequisite(s): Audition or portfolio of recent compositions.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 1

MUSI 442 - Applied Music in Keyboard

Credits: 2-3 (RD)
Applied music studies in Keyboard.

Prerequisite(s): Audition.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 1
When Offered: Fall, Spring

MUSI 443 - Applied Music in Voice

Credits: 2-3 (RD)
Applied music studies in Voice.

Prerequisite(s): Audition.
Corequisite(s): MUSI 381, 384, or 385.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 1
When Offered: Fall, Spring

MUSI 444 - Applied Music in Woodwind

Credits: 2-3 (RD)
Applied music studies in Woodwind.

Prerequisite(s): Audition.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 1
When Offered: Fall, Spring

MUSI 445 - Applied Music in Brass

Credits: 2-3 (RD)
Applied music studies in Brass.

Prerequisite(s): Audition.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 1
When Offered: Fall, Spring

MUSI 446 - Applied Music in String

Credits: 2-3 (RD)
Applied music studies in String.

Prerequisite(s): Audition.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 1
When Offered: Fall, Spring

MUSI 447 - Applied Music in Percussion

Credits: 2-3 (RD)
Applied music studies in Percussion.
Prerequisite(s): Audition.
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 1
When Offered: Fall, Spring

**MUSI 448 - Applied Music in Composition**

Credits: 2-3 (RD)
Applied music studies in Composition.

Prerequisite(s): Portfolio of recent compositions.

**MUSI 450 - Jazz Improvisation I**

Credits: 2 (NR)
Emphasizes improvisational materials and language developed in common practice period of jazz.

Prerequisite(s): MUSI 379 or permission of instructor.

**MUSI 451 - Keyboard Pedagogy II**

Credits: 3 (NR)
Intensive study of methods, theories, techniques, and materials to teach keyboard to children and adults in individual and group situations.

Prerequisite(s): MUSI 351 or permission of instructor.

**MUSI 452 - Jazz Improvisation II**

Credits: 2 (NR)
Emphasis on advanced improvisational techniques and contemporary tunes.

Prerequisite(s): MUSI 399 or permission of instructor.
MUSI 454 - Jazz Arranging

Credits: 3 (NR)
Transcription, analysis, and scoring for small and large jazz ensembles.

Prerequisite(s): MUSI 311 or permission of instructor.

MUSI 461 - The Teaching of General Music in the Elementary and Middle School

Credits: 3 (NR)
Studies theory, methods, practice, and materials to teach general music in elementary and middle school. Students spend three hours per week in class and one hour per week observing and teaching in laboratory ensemble. Students also participate in field observation of music classes in the public schools.

Prerequisite(s): MUSI 114, 216, 273; and acceptance into music education concentration.

Corequisite(s): MUSI 391

Notes: For music majors only.

MUSI 463 - The Teaching of Vocal Music in the Secondary School

Credits: 3 (NR)
Survey of repertoire and methods for teaching high school choral groups, small ensembles, and voice classes. Students spend three hours per week in class, and one hour per week observing and teaching in laboratory ensemble. Students also participate in field observation of music classes in public schools.

Prerequisite(s): MUSI 114, 216, 273, and 391; and acceptance into music education concentration.

Corequisite(s): MUSI 396.

Notes: For music majors only.
MUSI 464 - Instrumental Music Methods I

Credits: 3 (NR)
Prepares students to successfully plan, organize, and administer marching band and jazz ensemble programs in secondary public school music curriculum. Students spend three hours per week in class, and one hour per week observing and teaching in laboratory ensemble. Students also participate in field observation of music classes in public schools.

Prerequisite(s): MUSI 114, 216, and 273; and acceptance into music education concentration.

Corequisite(s): MUSI 391

Notes: For music majors only.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 1
When Offered: Fall

MUSI 465 - Selected Topics in Music Education

Credits: 1-3 (RD)
Topics of practical interest to prospective and practicing music educators covering pedagogy, performance, and logistics of teaching music in schools, private studios, and communities.

Notes: May be repeated for credit.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0

MUSI 466 - Instrumental Music Methods II

Credits: 3 (NR)
Prepares students to teach instrumental music in elementary, middle, and secondary schools. Students spend three hours per week in class, and one hour per week observing and teaching in laboratory ensemble. Students also participate in field observation of music classes in public schools.

Prerequisite(s): MUSI 114, 216, 273, and 391; and acceptance to music education concentration.

Corequisite(s): MUSI 396.

Notes: For music majors only.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 1
When Offered: Spring
MUSI 467 - Instrumental Music Methods I: Orchestra

Credits: 3 (NR)
Prepares students to successfully plan, organize, and administer string classes from the beginning levels through performing ensembles (grades 4-12), and explore teaching materials appropriate for individual and class instruction. Students spend three hours per week in class, and one hour per week observing and teaching in laboratory ensemble. Students also participate in field observation of music classes in public schools.

Prerequisite(s): MUSI 114, 216, 273, and 361; and acceptance into music education concentration.

Corequisite(s): MUSI 391

Notes: For music majors only.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 1

MUSI 485 - Chamber Ensembles

Credits: 1 (RT)
Students develop an understanding of major artistic works, including a consideration of how theoretical and historical insights find expression via performance. Performance of works from chamber music repertoire.

Fulfills general education requirement in arts.

Prerequisite(s): Audition.

Notes: Public performances required.

Hours of Lecture or Seminar per week: 1-4
Hours of Lab or Studio per week: 3
When Offered: Fall, Spring

MUSI 490 - Musical Communication in Context

Credits: 3 (NR)
Explains nature of musical communication in a variety of contexts, and combines knowledge gained in general education courses with knowledge and skills specific to the major to serve as a capstone course synthesizing both areas. How does music itself communicate, and how do musicians communicate about it with each other and with the world around them? Students address these through essays in the style of a journal or portfolio, substantial paper, and oral presentation of paper before faculty and student panel.

Fulfills general education requirement in synthesis.

Prerequisite(s): Must be in senior year of the B.A. program in Music and have completed all other general education requirements.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
**MUSI 491 - Musical Communication in Performance**

Credits: 1 (NR)
Helps student conceive of musical performance as communication in a variety of contexts, and combines knowledge in general education courses with knowledge and skills specific to the major to serve as a capstone course synthesizing both areas. Students consider various aspects of musical communication to prepare senior recital. Students explore social, historical, analytical, and aesthetic aspects of the music they are to perform by composing essays in the style of a journal or portfolio. Students prepare a substantial paper on recital repertoire and present that paper before a faculty and student panel.

**Prerequisite(s):** Completion of all other required general education courses for BM performance concentration.

**Corequisite(s):** Concurrent enrollment in appropriate 3-credit private music instruction course and Music 424.

**Hours of Lecture or Seminar per week:** 1
**Hours of Lab or Studio per week:** 0

---

**MUSI 492 - Selected Topics in Music**

Credits: 1-3 (RT)
Topics of practical interest to students in composition, music history and literature, world music, jazz studies, and performance practices.

**Prerequisite(s):** 45 credits, or permission of instructor.

**Notes:** May be repeated for credit.

**Hours of Lecture or Seminar per week:** 1-3
**Hours of Lab or Studio per week:** 0

---

**MUSI 493 - Topics in Music Theory**

Credits: 3 (NR)
Intensive exploration of selected topics in music theory and analysis.

**Prerequisite(s):** MUSI 216 or permission of the instructor.

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0

**When Offered:** Fall, Summer, Spring

---

**MUSI 495 - Internship in Music Education: Student Teaching**

Credits: 6-12 (NR)
Full semester of intensive student teaching experience in approved Virginia schools.
Prerequisite(s): Completion of all other courses required for BM with concentration in music education.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0

MUSI 496 - Internship

Credits: 2-6 (NR)
Contact the department one semester before enrollment. Internships are approved work-study programs with specific employers or agencies.

Prerequisite(s): Open to music majors with 90 credits.

Notes: Credit is determined by the department. Maximum 9 internship credits (MUSI 395, 495, 496) can be applied toward degree.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

MUSI 497 - Independent Study

Credits: 1-3 (NR)
Individual research and study of selected subject in close consultation with instructor. Student may choose from the musicological, ethnomusicological, theoretical, compositional, or educational areas, and produce at least one major written work based on research.

Prerequisite(s): Music majors with 90 credits, and permission of instructor and department chair.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

MUSI 498 - Independent Study

Credits: 1-3 (NR)
Individual research and study of selected subject in close consultation with instructor. Student may choose from the musicological, ethnomusicological, theoretical, compositional, or educational areas, and produce at least one major written work based on research.

Prerequisite(s): Music majors with 90 credits, and permission of instructor and department chair.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

MUSI 501 - Graduate Theory Review
Vocabulary and conceptual review of diatonic and chromatic harmony, part writing, form, harmonization, 20th-century techniques.

**Prerequisite(s):** Baccalaureate degree in music, graduate placement exam.

**Notes:** Does not count toward required credits of a graduate music degree.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

### MUSI 502 - Graduate Aural Skills Review

Credits: 3 (NR)  
Music reading and aural skills including intervals, dictation (melodic and harmonic), scales, chords, rhythms, and meter.

**Prerequisite(s):** Baccalaureate degree in music, graduate placement exam.

**Notes:** Does not count toward required credits of a graduate music degree.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

### MUSI 515 - Music in Computer Technology

Credits: 3 (NR)  
Overview computer use in music. Topics include principles of musical instrument digital interface (MIDI); synthesis; acoustics and sound processing; and musical composition using the computer. Explores music resources of Internet, and surveys multimedia applications in music history, theory, ear training, improvisation, and notation.

**Prerequisite(s):** Baccalaureate degree in music, or permission of instructor.

**Hours of Lecture or Seminar per week:** 2  
**Hours of Lab or Studio per week:** 1  
**When Offered:** Spring

### MUSI 516 - Keyboard Skills

Credits: 3 (NR)  
Enhance keyboard skills for the non-keyboard major, including technique, harmonization, transposition, reading, and accompanying.

**Prerequisite(s):** Baccalaureate degree in music, graduate placement exam.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 4
MUSI 517 - Score Reading Skills

Credits: 3 (NR)
Enhance score study and score reading skills for the conductor.

Prerequisite(s): Baccalaureate degree in music, graduate placement exam.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 4

MUSI 525 - Performance Seminar and Vocal Literature for Singers and Accompanists I

Credits: 2 (NR)
Students assigned art songs or operatic arias in Italian, German, French, and English, from Baroque to 21st century, and perform in weekly master class format. Develops and improves musical and artistic preparation and performance, increases repertoire, and establishes dependable methods for creating consistently high standards of artistic performance.

Prerequisite(s): Audition.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 1

MUSI 526 - Performance Seminar and Vocal Literature for Singers and Accompanists II

Credits: 2 (NR)
Students assigned art songs or operatic arias in Italian, German, French, and English, from Baroque to 21st century, and perform in weekly master class format. Develops and improves musical and artistic preparation and performance, increases repertoire, and establishes dependable methods for creating consistently high standards of artistic performance.

Prerequisite(s): Audition.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 1

MUSI 532 - Music History Review I

Credits: 3 (NR)
Enhance understanding of music history and the context of musical style, chronologically through the mid-18th century.

Prerequisite(s): Baccalaureate degree in music, graduate placement exam.

Notes: Does not fulfill courses requirements for graduate degrees in music.
MUSI 533 - Music History Review II

Credits: 3 (NR)
Enhance understanding of music history and the context of musical style, from the mid-18th century to today.

Prerequisite(s): Baccalaureate degree in music, graduate placement exam.

Notes: Does not fulfill course requirements for graduate music degrees.

MUSI 541 - Diction for Singers I: Italian Diction and English Diction

Credits: 2 (NR)
Increases proficiency in singing in Italian and English by teaching International Phonetic Alphabet (IPA), and strengthens performance of Italian and English art song and operatic repertoire. Intensified, systematic study of phonetics as it applies to Italian and English.

Prerequisite(s): Graduate status in applied voice or permission of instructor.

MUSI 542 - Diction for Singers II: German Diction and French Diction

Credits: 2 (NR)
Increases proficiency in singing in German and French by teaching International Phonetic Alphabet (IPA), and strengthens performance of German and French art songs and operatic repertoire. Intensified, systematic study of phonetics as it applies to singing in German and French.

Prerequisite(s): Graduate status in applied voice or permission of instructor.

MUSI 551 - Keyboard Pedagogy I

Credits: 3 (NR)
Intensive study of methods, theories, techniques, and materials to teach keyboard to children and adults in individual and group situations.
Prerequisite(s): Graduate status in applied piano, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

MUSI 552 - Vocal Pedagogy and Lab

Credits: 3 (NR)
Instruction in teaching voice through systematic study of vocal physiology and its implications for pedagogical methods. Includes theoretical and systematic study of processes, procedures, and practices to develop art of singing. Offers technical, physiological, theoretical, and practical principals of the singing art, with emphasis on vocal health.

Prerequisite(s): Graduate status in applied voice or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 1

MUSI 553 - Instrumental Pedagogy and Literature

Credits: 3 (NR)
Instruction in teaching of instrumental music techniques for all levels through the study of pedagogical methods, standard literature, and musical instruments produced by present-day manufacturers.

Prerequisite(s): Baccalaureate degree in music, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring, Summer

MUSI 555 - Music as a Healing Art

Credits: 3 (NR)
Study of the relationship between musical vibrations and the natural rhythms of the body. Topics include history of music and healing, theory of sound, cymatics, toning, and performance practice as well as a survey of vibrational healing modalities and related therapies. Considers learning examples as they apply to healing with music. Students sing and play instruments in directed improvisatory performance.

Prerequisite(s): Basic proficiency with instrument or voice, and bachelor's degree in music.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

MUSI 563 - Orff Schulwerk I
Credits: 3 (NR)
Intensive introduction to Orff teaching philosophy with practical and theoretical instruction and immersion in the method itself. Students learn concepts of rhythm, harmony, solfege, modes, improvisation, and pedagogy. Students learn basic performance technique on soprano recorder, and learn to apply movement and dance in their teaching.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**MUSI 564 - Orff Schulwerk II**

Credits: 3 (NR)
Continues intensive study of Orff teaching philosophy with practical and theoretical instruction and immersion. Teaches further concepts of rhythm and meter including asymmetrical patterns. Reviews pentatonic modes and their transpositions, studies pentachordal and hexachordal scales, and begins intensive work with diatonic modes. Students work with a variety of percussion instruments including body percussion, unpitched instruments, and barred instruments. They sing and play soprano, alto, tenor, and bass recorders. Movement studies continue with intensive study of vocabulary of dance and mime.

Prerequisite(s): MUSI 563, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**MUSI 565 - Orff Schulwerk III**

Credits: 3 (NR)
Continues intensive study of Orff teaching philosophy to complete certification process in Orff Schulwerk. Students continue intensive work in rhythm, melody, harmony, timbre, form, and pedagogy. Tenor, bass, and soprano recorders introduced. Movement and rhythmic studies concentrate on mixed meters and non-Western source materials and styles.

Prerequisite(s): MUSI 563 and 564, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**MUSI 571 - Techniques of Accompanying I**

Credits: 1 (NR)
Development of accompanying skills through collaboration with solo singers, instrumentalists, and small ensembles. Students perform for each other; observe lectures, demonstrations and performances by professionals; and participate in master classes.

Prerequisite(s): Admission to graduate-level private music instruction in keyboard instrument, or permission of instructor.

Notes: Each course may be taken two times for credit.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 3
When Offered: Fall, Spring, Summer
MUSI 572 - Techniques of Accompanying II

Credits: 1 (NR)
Development of accompanying skills through collaboration with solo singers, instrumentalists, and small ensembles. Students perform for each other; observe lectures, demonstrations and performances by professionals; and participate in master classes.

Prerequisite(s): Admission to graduate-level private music instruction in keyboard instrument, or permission of instructor.

Notes: Each course may be taken two times for credit.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 3
When Offered: Fall, Spring, Summer

MUSI 573 - Accompanying and Musicianship III

Credits: 3 (NR)
For piano majors or students with significant keyboard skills.

Prerequisite(s): MUSI 572. Study of complex accompanying skills including open score reading and orchestral reduction.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

MUSI 592 - Topics in Music

Credits: 1-6 (RT)
Intensive study of selected topics in performance, composition, or conducting. Individual research, group discussions, and participation in related activities.

Prerequisite(s): Baccalaureate degree in music.

Notes: May be repeated for up to 12 credits as topics change.

Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 0

MUSI 610 - Topics in Music Theory

Credits: 3 (RD)
Uses music analytical theories to examine repertoire from a given time period or style.

Prerequisite(s): MUSI 501, 502, and 516, or appropriate score on the graduate placement examination.
Notes: May be repeated for up to 9 credits as topics change.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**MUSI 611 - Analytical Techniques**

Credits: 3 (NR)
Detailed formal and stylistic examination of music selected from the major style periods. Development of graduate-level analytical skills.

**Prerequisite(s):** MUSI 501, 502, and 516, or appropriate score on the graduate placement examination.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**MUSI 613 - Graduate Orchestration**

Credits: 3 (NR)
Intensive study of instrumentation through analysis and arrangement. Includes contemporary techniques and scoring for large forces.

**Prerequisite(s):** MUSI 501, 502, and 516, or appropriate score on the graduate placement examination.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**MUSI 614 - Music Theory Pedagogy**

Credits: 3 (NR)
Study of materials and procedures in the teaching of undergraduate-level music theory subjects.

**Prerequisite(s):** Baccalaureate degree in music, graduate placement exam.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**MUSI 615 - Advanced Jazz Improvisation**

Credits: 3 (NR)
Advanced techniques and applications of jazz improvisation.

**Prerequisite(s):** Graduate placement exam or permission of instructor.
MUSI 621 - Graduate Applied Music

Credits: 1 (RD)
Graduate Applied music studies

Prerequisite(s): Audition or portfolio.

Notes: May be repeated for up to 6 credits.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0.5

MUSI 622 - Applied Music in Keyboard

Credits: 1 (RD)
Applied music studies in Keyboard.

Prerequisite(s): Audition.

Notes: May be repeated for up to 6 credits.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0.5

MUSI 623 - Applied Music in Voice

Credits: 1 (RD)
Applied music studies in Voice.

Prerequisite(s): Audition.

Notes: May be repeated for up to 6 credits.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0.5

MUSI 624 - Applied Music in Woodwind

Credits: 1 (RD)
Applied music studies in Woodwind.
Prerequisite(s): Audition.

Notes: May be repeated for up to 6 credits.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0.5

MUSI 625 - Applied Music in Brass

Credits: 1 (RD)
Applied Music studies in Brass.

Prerequisite(s): Audition.

Notes: May be repeated for up to 6 credits.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0.5

MUSI 626 - Applied Music in String

Credits: 1 (RD)
Applied Music studies in String.

Prerequisite(s): Audition.

Notes: May be repeated for up to 6 credits.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0.5

MUSI 627 - Applied Music in Percussion

Credits: 1 (RD)
Applied Music studies in Percussion.

Prerequisite(s): Audition.

Notes: May be repeated for up to 6 credits.

Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 0.5

MUSI 628 - Applied Music in Composition
MUSI 629 - Applied Music in Conducting

Credits: 1 (RD)
Applied Music studies in Conducting.

Prerequisite(s): Audition.

Notes: May be repeated for up to 6 credits.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0.5

MUSI 630 - Topics in Music History and Literature

Credits: 3 (RD)
Examination of a musical style, genre, composer, compositional school, or historical development. Primary and secondary source materials studied in historical and analytical contexts.

Prerequisite(s): MUSI 532 and 533, or appropriate score on the graduate placement exam.

Notes: Repeatable for up to 9 credits as topics change.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

MUSI 640 - Topics in World Musics

Credits: 3 (RD)
Study of musics from selected cultures. Students will study structural, social, and cognitive foundations of the music.

Prerequisite(s): Baccalaureate degree in music, graduate placement exam.

Notes: Repeatable for up to 9 credits as topics change.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
MUSI 650 - Topics in Jazz Studies

Credits: 3 (RD)
Study of selected topics in performance, composition, arranging and analysis. May be repeated for up to 9 credits as topics change.

Prerequisite(s): Graduate placement exam or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

MUSI 654 - Graduate Conducting

Credits: 3 (RD)
Classroom study of conducting, including refining gestures, rehearsal leadership, and the communication of musical style.

Prerequisite(s): Baccalaureate degree in music, graduate placement exam.

Notes: May be repeated for up to 9 credits.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

MUSI 660 - Topics in Music Education

Credits: 1-6 (RT)
Examination of specific areas of concern to music educators. Individual research, group discussions, and participation in related activities.

Prerequisite(s): Baccalaureate degree in music, graduate placement exam.

Notes: Repeatable for up to 9 credits as topics change.

Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 0

MUSI 661 - Psychology of Music Teaching and Learning

Credits: 3 (NR)
Study of the learner's musical behaviors (affective, cognitive, and psychomotor) in an effort to devise an empirically based teaching method founded on learning principles.

Prerequisite(s): Baccalaureate degree in music, graduate placement exam.
**MUSI 662 - Introduction to Research in Music**

Credits: 3 (NR)
Development of skills, attitudes, and understanding to conduct and report research in music, including philosophical bases, scope and organization, stylistic practices in writing research reports, study of materials and resources in music and music education, and proper use of library and other research services.

**Prerequisite(s):** Baccalaureate degree in music, or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall

---

**MUSI 663 - Aesthetics of Music Education**

Credits: 3 (NR)
Study of philosophical foundations of contemporary music education, and critical examination of music programs and activities in aesthetic education and efforts by music education establishment to enhance them.

**Prerequisite(s):** Baccalaureate degree in music, or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**MUSI 664 - Advanced Pedagogy**

Credits: 3 (NR)
Advanced instruction in pedagogy including study of methods, theories, techniques, and materials for teaching children and adult students.

**Prerequisite(s):** MUSI 551, or MUSI 552, or MUSI 553, or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall, Summer, Spring

---

**MUSI 681 - Graduate Choral Ensembles**

Credits: 1 (RD)
Performance of works from the choral repertoire.
Prerequisite(s): Audition.

Notes: Public concerts are given. May be repeated for up to 6 credits total.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 3

**MUSI 682 - Wind Symphony**

Credits: 1 (RD)
Highly selective group of instrumentalists performing works from the wind repertoire.

Prerequisite(s): Audition.

Notes: Public concerts are given. May be repeated for up to 6 credits.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 3

**MUSI 683 - Symphonic Band**

Credits: 1 (RD)
Performance of works from band repertoire.

Prerequisite(s): Audition.

Notes: Public concerts are given. May be repeated for up to 6 credits.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 3

**MUSI 685 - Graduate Chamber Ensemble**

Credits: 1 (RD)
Performance of works from chamber music repertoire.

Prerequisite(s): Audition.

Notes: Public concerts are given. May be repeated for up to 6 credits.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 3

**MUSI 687 - Symphony Orchestra**
Performance of works from orchestral repertoire.

**Prerequisite(s):** Audition.

**Notes:** Public concerts are given. May be repeated for up to 6 credits.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 3

---

**MUSI 688 - Opera and Musical Theater Ensemble**

Credits: 3 (RD)  
Solo-vocal, performance-oriented ensemble class that presents operatic works or excerpts from them, from Baroque to 21st century, as well as works or excerpts from American musical theater.

**Prerequisite(s):** Audition.

**Notes:** May be repeated for up to 12 credits.

**Hours of Lecture or Seminar per week:** 2  
**Hours of Lab or Studio per week:** 4

---

**MUSI 689 - Jazz Ensemble**

Credits: 1 (RD)  
Provides practical experience in aspects of jazz performance. Participation in section rehearsals and small and large jazz groups. Jazz improvisation expected.

**Prerequisite(s):** Audition.

**Notes:** Public concerts given. May be repeated for up to 6 credits total.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 3

---

**MUSI 690 - Graduate Lecture Recital**

Credits: 1-3 (RD)  
Combination of musical performance and scholarly presentation on a well-defined topic.

**Prerequisite(s):** Baccalaureate degree in music, audition.

**Corequisite(s):** MUSI 621 (3-credit level).

**Notes:** Public presentation required. May be repeated for a maximum of 6 credits.
MUSI 695 - Teaching Internship

Credits: 2 (RD)
Teaching beginner, intermediate, and early advanced students in private or group lessons under faculty supervision.

Prerequisite(s): MUSI 660.

Notes: May be repeated for up to 4 credits.

MUSI 699 - Independent Study

Credits: 1-3 (RT)
Individual research and study a concentration available in the master of music.

Prerequisite(s): Baccalaureate degree in music and permission of graduate coordinator.

Notes: May be taken for maximum 6 credits.

MUSI 710 - Advanced Topics in Music Theory

Credits: 3 (RD)
Advanced study of specific styles and repertoire from the perspective of various analytical approaches.

Prerequisite(s): MUSI 501, 502, and 516, or appropriate score on the graduate placement exam.

Notes: May be repeated for up to 9 credits total as topics change.

MUSI 712 - Composition for Conductors and Performers

Credits: 3 (NR)
Advanced study of new music for various media.
Prerequisite(s): Undergraduate degree in music, graduate placement exam.

Notes: This course is not for students in the composition concentration.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

MUSI 720 - Advanced Topics in Applied Music

Credits: 3 (RD)
Advanced study of concepts in applied music.

Prerequisite(s): Baccalaureate degree in music, graduate placement exam.

Notes: May be repeated for up to 6 credits total as topics change.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

MUSI 721 - Applied Music

Credits: 2-3 (RD)
Applied Music studies.

Prerequisite(s): Audition or portfolio.

Notes: May be repeated for up to 18 credits.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 1

MUSI 722 - Applied Music in Keyboard

Credits: 2-3 (RD)
Applied music studies in Keyboard.

Prerequisite(s): Audition.

Notes: May be repeated for up to 18 credits.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 1

MUSI 723 - Applied Music in Voice
MUSI 724 - Applied Music in Woodwind

Credits: 2-3 (RD)
Applied music studies in Woodwind.

Prerequisite(s): Audition.

Notes: May be repeated for up to 18 credits.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 1

MUSI 725 - Applied Music in Brass

Credits: 2-3 (RD)
Applied music studies in Brass.

Prerequisite(s): Audition.

Notes: May be repeated for up to 18 credits.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 1

MUSI 726 - Applied Music in String

Credits: 2-3 (RD)
Applied music studies in String.

Prerequisite(s): Audition.

Notes: May be repeated for up to 18 credits.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 1
MUSI 727 - Applied Music in Percussion

Credits: 2-3 (RD)
Applied music studies in Percussion.

Prerequisite(s): Audition.

Notes: May be repeated for up to 18 credits.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 1

MUSI 728 - Applied Music in Composition

Credits: 2-3 (RD)
Applied music studies in Composition.

Prerequisite(s): Portfolio of recent compositions.

Notes: May be repeated for up to 18 credits.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 1

MUSI 729 - Applied Music in Conducting

Credits: 2-3 (RD)
Applied music studies in Conducting.

Prerequisite(s): Audition.

Notes: May be repeated for up to 18 credits.

Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 1

MUSI 730 - Advanced Topics in Music History

Credits: 3 (RT)
Advanced study of specific genres, composers, or repertoire from a historically analytical perspective.

Prerequisite(s): MUSI 532 and 533, or appropriate score on the graduate placement exam.

Notes: May be repeated for up to 9 credits total as topics change.
MUSI 760 - Advanced Topics in Music Education

Credits: 3 (RD)
Advanced study of selected issues in music education.

Prerequisite(s): Baccalaureate degree in music, graduate placement exam.

Notes: May be repeated for up to 9 credits total as topics change.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

MUSI 770 - Advanced Topics in Pedagogy

Credits: 3 (RD)
Advanced study of a specific topic in the pedagogy of music.

Prerequisite(s): Baccalaureate degree in music, graduate placement exam.

Notes: May be repeated for up to 6 credits total as topics change.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

MUSI 790 - Graduate Recital

Credits: 1 (RD)
Public performance. Repertoire and performance standards as approved by faculty.

Prerequisite(s): At least three credits of graduate PMI in the appropriate instrument or voice.

Corequisite(s): MUSI 700-level PMI (3-credits).

Notes: May be repeated for up to 4 credits total.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0

MUSI 796 - Directed Reading/Research
Credits: 1-3 (RD)
Individualized study on a topic approved by faculty.

Prerequisite(s): Baccalaureate degree in music, graduate placement exam.

Notes: May be repeated for up to 6 total credits.

Hours of Lecture or Seminar per week: 1  
Hours of Lab or Studio per week: 0  
Grading: Graduate Special

**MUSI 799 - Thesis**

Credits: 1-6 (RD)
Supervised research on approved thesis topic.

Prerequisite(s): At least 12 graduate credits including MUSI 511, and approval of thesis topic.

Notes: Students in the music education concentration must also have taken MUSI 562, and have successfully passed comprehensive exit exam.

Hours of Lecture or Seminar per week: 1  
Hours of Lab or Studio per week: 0  
Grading: S/NC

**MUSI 800 - Studies for the Doctor of Philosophy in Education**

Credits: 1-6 (RD)
Program of studies designed by the student's discipline director and approved by student's doctoral committee that brings student to participate in research, performance, or creative activity of discipline director and results in a paper reporting original contributions.

Prerequisite(s): Admission to PhD in education program to study music.

Notes: Enrollment may be repeated.

Hours of Lecture or Seminar per week: 1-6  
Hours of Lab or Studio per week: 0

**MUSI 810 - Doctoral Seminar in Analysis**

Credits: 3 (RD)
Seminar study of a specific genre or repertoire from various analytical perspectives.

Prerequisite(s): Graduate placement examination.

Notes: May be repeated for up to 9 credits as topics change.
MUSI 821 - Doctoral Private Music Instruction

Credits: 2-3 (RD)
Private instruction in performance, conducting, or composition.

Prerequisite(s): Audition portfolio

Notes: May be repeated for up to 18 credits.

MUSI 822 - Doctoral Applied Music in Keyboard

Credits: 2-3 (RD)
Doctoral applied music studies in Keyboard.

Prerequisite(s): Audition.

Notes: May be repeated for up to 18 credits.

MUSI 823 - Doctoral Applied Music in Voice

Credits: 2-3 (RD)
Doctoral applied music studies in Voice.

Prerequisite(s): Audition.

Notes: May be repeated for up to 18 credits.

MUSI 824 - Doctoral Applied Music in Woodwind

Credits: 2-3 (RD)
Doctoral applied music studies in Woodwind.
Prerequisite(s): Audition.

Notes: May be repeated for up to 18 credits.

Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 1

MUSI 825 - Doctoral Applied Music in Brass

Credits: 2-3 (RD)
Doctoral applied music studies in Brass.

Prerequisite(s): Audition.

Notes: May be repeated for up to 18 credits.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 1

MUSI 826 - Doctoral Applied Music in String

Credits: 2-3 (RD)
Doctoral applied music studies in String.

Prerequisite(s): Audition.

Notes: May be repeated for up to 18 credits.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 1

MUSI 827 - Doctoral Applied Music in Percussion

Credits: 2-3 (RD)
Doctoral applied music studies in Percussion.

Prerequisite(s): Audition.

Notes: May be repeated for up to 18 credits.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 1

MUSI 828 - Doctoral Applied Music in Composition
MUSI 829 - Doctoral Applied Music in Composition

Credits: 2-3 (RD)
Doctoral applied music studies in Composition.

Prerequisite(s): Portfolio of recent compositions.

Notes: May be repeated for up to 18 credits.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 1

MUSI 829 - Doctoral Applied Music in Conducting

Credits: 2-3 (RD)
Doctoral applied music studies in Conducting.

Prerequisite(s): Audition.

Notes: May be repeated for up to 18 credits.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 1

MUSI 830 - Doctoral Seminar in Music History

Credits: 3 (RD)
Seminar study of a specific genre, composer, or repertoire from a historically analytical perspective.

Prerequisite(s): Graduate placement exam.

Notes: May be repeated for up to 9 credits as topics change.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

MUSI 860 - Doctoral Seminar in Music Education

Credits: 3 (RD)
Seminar study of a specific issue in music education.

Prerequisite(s): Graduate placement exam.

Notes: May be repeated for up to 12 credits as topics change.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
MUSI 880 - Doctoral Major Ensemble

Credits: 1 (RD)
Selective ensemble experience for doctoral students in music.

Prerequisite(s): Audition.

Notes: Public concerts are given. May be repeated for up to 6 credits.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 3

MUSI 890 - Doctoral Recital

Credits: 1 (RD)
Public performance. Repertoire and performance standards as approved by faculty.

Prerequisite(s): At least 3 credits in MUSI 821 in the appropriate instrument or voice.

Corequisite(s): MUSI 821 (3-credit level).

Notes: May be repeated for up to 4 credits.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0

MUSI 998 - Dissertation Proposal

Credits: 1-3 (RD)
Preparation of a proposal for a dissertation study in music under the supervision of music faculty members.

Prerequisite(s): Admission to doctoral program in music, permission of faculty.

Notes: May be repeated for up to 6 credits.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0
Grading: Satisfactory/No Credit

MUSI 999 - Dissertation

Credits: 1-12 (RD)
Preparation of a dissertation in music under the supervision of music faculty members.

Prerequisite(s): Candidacy in a doctoral program in music.
Notes: May be repeated for credit.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0
Grading: Satisfactory/No Credit

Native American and Indigenous Studies (NAIS)

Offered by the College of Humanities and Social Sciences

NAIS 201 - Introduction to Native American and Indigenous Studies

Credits: 3 (NR)
Introduction to the history, social organization, political experience, and artistic expression of indigenous peoples of the western hemisphere, focusing primarily on American Indians, using methods and materials from a number of disciplines.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

NAIS 499 - Independent Study

Credits: 3 (NR)
Intensive study of a particular area, topic, or critical or theoretical problem related to Native American and Indigenous Studies to be conducted in close consultation with an instructor. At least one substantial, researched piece of written work required.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

Nanotechnology (NANO)

Offered by the College of Science

NANO 500 - Introduction to Nanomaterials and Interactions

Credits: 3 (NR)
Introduction to nanotechnology. Discussion of the Feynman challenge and its relation to modern science. Applications to nanostructures of charges, currents, diamagnetics, paramagnetics, and ferromagnetics.

Prerequisite(s): BS in any physical science, mathematics, or engineering; or permission of certificate director.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
NANO 510 - Strategies for Nanocharacterization

Credits: 3 (NR)
Introduces various nanocharacterization techniques, with a discussion of which techniques are most useful in various applications. Includes gates and bridges, chemical thermodynamics, kinetics, and solid-state reactions.

Prerequisite(s): NANO 500 or permission of certificate director.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

NANO 520 - Survey of Nanostructures

Credits: 3 (NR)
Discusses nanomechanical oscillators and nanoresonators, nanofibers, and conducting polymer nanowires. Nanomechanical beams for reacting ion etching. Electron-beam lithography and photolithography.

Prerequisite(s): NANO 500 and 510 or permission of certificate director.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

NANO 530 - Nanofabrication

Credits: 3 (NR)
Covers pulsed laser deposition, molecular beam epitaxy, controlled vapor deposition, reactive sputtering, and doping and implant isolation.

Prerequisite(s): NANO 500 and 510, or permission of certificate director.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

NANO 540 - Nanotechnology in Commerce and Government

Credits: 3 (NR)
Discusses competitive position of United States and other countries in nanoscience and nanotechnology. Covers business strategies, environmental, and public health aspects of nanotechnology applications. Also introduces students to issues involving legal, economic, social, and political controls over nanotechnology and nanoscience research.

Prerequisite(s): NANO 500, and admission into graduate certificate program in nanotechnology and nanoscience.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
NANO 610 - Nanoelectronics

Credits: 3 (NR)
Introduces basic elements of nanoelectronic structures, including quantum layers, quantum wires, and quantum dots. Covers sub-band structure, transport in quantum layers, behavior in the presence of magnetic fields, Coulomb blockades, CMOS nanodevices and nanoelectronics, and SOI multigate device physics and modeling.

Prerequisite(s): NANO 500, 510, and 520, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

NANO 620 - Computational Modeling in Nanoscience

Credits: 3 (NR)
Introduction to simulation methods used in nanoscience. Covers computational approaches to modeling molecular and condensed matter at the nanoscale level, including interatomic and molecular potentials, molecular mechanics, molecular dynamics, monte carlo averaging, ensemble distributions, numerical sampling, thermodynamic functions, dynamic structure, and introduction to cellular automata.

Prerequisite(s): NANO 500, 510, and 520, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

Neurosciences (NEUR)

Offered by the University

NEUR 327 - Cellular, Neurophysiological, and Pharmacological Neuroscience

Credits: 3 (NR)
Basic concepts of cellular and molecular level neuroscience, including neuronal functions, cellular anatomy and membrane functions, electrical properties of neurons, and cellular basis of plasticity.

Prerequisite(s): PSYC 375 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring
**NEUR 335 - Molecular, Developmental, and Systems Neuroscience**

Credits: 3 (NR)
In-depth survey of genetic and embryological development of the brain and introduction to systems neuroscience, including sections on patterning gene expression, generation and migration of neurons, axonal and dendritic outgrowth, and basic neuroanatomy.

**Prerequisite(s):** NEUR 210 or permission of instructor.

**Hours of Lecture or Seminar per week:** 2  
**Hours of Lab or Studio per week:** 3  
**When Offered:** Fall

**NEUR 380 - Biological Bases of Alzheimer's Disease**

Credits: 3 (NR)
A survey of the causes, symptoms, drug treatments, risk factors and preventative measures associated with Alzheimer's disease.

**Prerequisite(s):** PSYC 375, 376.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Spring

**NEUR 395 - Laboratory Methods in Behavioral Neuroscience**

Credits: 3 (NR)
Introduction to experimental methods used in behavioral neuroscience research. Laboratory work includes surgical, histological and behavioral techniques. Proper use and handling of animals, ethical issues, evaluation of neuroscience literature, experimental design and data analysis are addressed. This course requires working with laboratory rodents.

**Prerequisite(s):** PSYC 300, BIOL 312 or equivalent.  
PSYC 372 or PSYC 376 or permission of instructor.

**Hours of Lecture or Seminar per week:** 0  
**Hours of Lab or Studio per week:** 3  
**When Offered:** Fall, Spring

**NEUR 410 - Current Topics in Neuroscience**

Credits: 3 (NR)
Overview of current topics in neuroscience, focusing on research at Mason.

**Prerequisite(s):** PSYC 375, 376. NSCI 327 recommended.

**Notes:** NSCI 410 is a writing intensive course.
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

NEUR 411 - Seminar in Neuroscience

Credits: 3 (RD)
Advanced seminar on a selected topic in neuroscience. Includes in depth reading and discussion of current research in human and nonhuman animals, with an emphasis on critical evaluation.

Fulfills writing intensive requirement in the major.

Prerequisite(s): PSYC 375 and PSYC 376. NEUR 327 and NEUR 335 recommended.

Notes: Course may be repeated if selected topic is different.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring

NEUR 440 - Independent Study in Neuroscience

Credits: 1-3 (RD)
Independent research based a laboratory or field investigation under the guidance of a faculty member, assisting with research on faculty projects, or reviewing the literature on a specific research topic.

Prerequisite(s): NEUR 327, 30 hours of course work with a grade point average of 3.0. or permission of instructor.

Notes: A maximum of 6 hours of independent study may be applied towards the major.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0
When Offered: Fall, Summer, Spring

NEUR 450 - Honors Thesis Proposal

Credits: 2-3 (NR)
Work on proposal for thesis based a laboratory or field investigation under the guidance of a faculty member.

Prerequisite(s): NEUR 327; 335;410 or 411, may be taken as co-requisites.
PSYC 300 or equivalent statistics course.
Permission of NAC undergraduate committee and thesis director.

Notes: A total of 6 hours must be taken in NEUR 450 and 451. A minimum of 2 hours and a maximum of 3 hours may be taken in NEUR 450.
NEUR 451 - Honors Thesis

Credits: 3-4 (NR)
Thesis based a laboratory or field investigation under the guidance of a faculty member.

Prerequisite(s): NEUR 450.

Notes: A total of 6 hours must be taken in NEUR 450 and 451. A minimum of 3 hours and a maximum of 4 hours may be taken in NEUR 451.

NEUR 461 - Special Topics in Neuroscience

Credits: 1-3 (RT)
Selected topics reflecting in specialized areas of neuroscience.

Equivalent to NSCI 461 (2009-10 catalog)

Prerequisite(s): PSYC 372, 375, or equivalent or permission of instructor.

Notes: May be repeated three times for credit when topic is different.

NEUR 600 - Chemistry and the Brain

Credits: 3 (NR)
Fundamentals of general chemistry, atoms, molecules, and reactions, with emphasis on water solutions. Organic compounds and functional groups, biosynthesis and properties, and examples from nervous system. Also includes biopolymers and their roles in cellular and neuronal organization, ionic channels, neurotransmitter receptors, and psychoactive substances.

Equivalent to PSYC 556

Prerequisite(s): Admission to neuroscience PhD program or permission of instructor.
NEUR 601 - Developmental Neuroscience

Credits: 2 (NR)
Introduction to developmental neurobiology with overview of embryological development of the nervous system. Topics include neural induction, patterning/cell fate specification, and neural circuit assembly together with modern molecular methods for exploring neural development.

Equivalent to PSYC 527

Prerequisite(s): PSYC 372, or BIOL 213 and 303, or the equivalent.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 0

NEUR 602 - Cellular Neuroscience

Credits: 3 (NR)
Detailed overview of the functioning and interactions of the cellular elements of the central nervous system. Topics include structure and function relationships, the chemical, physical, and electrical basis of neural signaling, local versus long-distance signaling, generation of action potentials, and essentials of synaptic communication.

Prerequisite(s): Admission to the PhD program in Neuroscience or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

NEUR 603 - Mammalian Neuroanatomy

Credits: 3 (NR)
Functional anatomy of the brains of mammals, with emphasis on regional and systems neuroanatomy of humans. Anatomy is correlated with material from clinical neurology where possible. Laboratory component includes brain dissections and clinical correlations.

Equivalent to PSYC 531

Prerequisite(s): PSYC 372, or BIOL 213 and 303, or the equivalent.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 3

NEUR 604 - Ethics in Scientific Research

Credits: 1-3 (NR)
Reflects on purpose of scientific research and reviews foundational principles for evaluating ethical issues. Offers skills for
survival in scientific research through training in moral reasoning and teaching of responsible conduct. Discusses ethical issues in research, and teaches how to apply critical thinking skills to design, execution, and analysis of experiments. Issues include using animals and humans in research, ethical standards in computer community, and research fraud. Currently accepted guidelines for behavior in data ownership, manuscript preparation, and conduct of persons in authority may be presented and discussed in terms of relevant ethical issues.

Equivalent to PHIL 691

**Prerequisite(s):** Graduate standing.

**Hours of Lecture or Seminar per week:** 1-3  
**Hours of Lab or Studio per week:** 0

---

**NEUR 611 - Philosophical Foundation of Neuroscience**

Credits: 3 (NR)  
This course presents the joint histories of the nature of thought, the philosophy of science, the construct of self, and the nature of mind.

**Prerequisite(s):** Any course in neuroscience or permission of the instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**NEUR 621 - Synaptic Plasticity**

Credits: 3 (NR)  
Course on activity-dependent modification of functional connectivity in the central nervous system as it relates to development, cognition, and disease.

**Prerequisite(s):** NEUR 602

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**NEUR 634 - Neural Modeling**

Credits: 3 (NR)  
Introduces the objectives, philosophy, and methodology of neuronal modeling. Instructs students in the use of some of the more popular neural modeling software packages. Students learn the syntax of several software packages, how to create neurons from subcellular components, and how to create networks by connecting neuron models.

**Prerequisite(s):** NEUR 602 or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0
NEUR 689 - Topics in Neuroscience

Credits: 3 (RT)
Selected topics in neuroscience reflecting specialized areas or new subfields not covered in fixed-content neuroscience courses.

Notes: Course may be repeated for credit as needed.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

NEUR 701 - Neurophysiology Laboratory

Credits: 3 (NR)
Hands-on training in current techniques of modern neurophysiology. Acquaints students with the theoretical basis of each technique and trains the student in the laboratory skills necessary to perform each technique. Includes intracellular and extracellular recording techniques.

Prerequisite(s): NEUR 602 and admission to neuroscience PhD program or permission of instructor.

Notes: Meets once weekly for six hours.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 6

NEUR 702 - Research Methods

Credits: 3 (NR)
Trains students in research methodologies, techniques, and data analysis in neuroscience. The course is divided into three modules that introduce separate but equally significant components of any research project. The first module will focus on parameters required for outlining and synthesizing a problem. The second module will cover various techniques of measurement and analysis used by neuroscientists. The last module will cover various approaches used for data analysis and interpretations.

Prerequisite(s): Graduate standing.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

NEUR 703 - Laboratory Rotation and Readings

Credits: 3 (NR)
Intensive introduction to a research laboratory in neuroscience. The student will read background material pertinent to the problem under study, learn and practice research methods of the laboratory, and formulate a short final project, which may be a proposal or an actual project, demonstrating some mastery of the techniques and approaches employed.
Prerequisite(s): Admission to the PhD program in Neuroscience.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 3

NEUR 709 - Neuroscience Seminars

Credits: 1 (NR)
Special seminar series for first year neuroscience PhD students. Detailed overview of neuroscience research at Mason. Each week, a different neuroscience laboratory and principal investigator lectures to students. The lecture includes the neuroscience basics necessary to appreciate the laboratory research theme and mission, and a more practical description of the active research program, possibly including a visit to the laboratory.

Prerequisite(s): Admission to neuroscience PhD program.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0

NEUR 710 - Special Topics in Neuroscience

Credits: 1 (NR)
Examines topics in neurosciences, including neurogenetics, neural imaging, and the competing computational and biological approaches to understanding the mind.

Prerequisite(s): Admission to neuroscience PhD program.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0

NEUR 734 - Computational Neurobiology

Credits: 3 (NR)
Intense review of neurobiology for graduate students interested in studying how nerve cells integrate and transmit signals, and how behavior emerges from integrated actions of populations or circuits of nerve cells. Covers electrical and biochemical properties of single neurons, and electrical and chemical communication between neurons. Emphasizes mathematical descriptions and computational techniques to study and understand neurons and networks of neurons.

Prerequisite(s): NEUR 602 and MATH 214, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

NEUR 735 - Computational Neuroscience Systems
Intensive introduction to systems neuroscience from quantitative perspective. Covers computational techniques used to study function of networks of neurons. Uses spike train statistics, neural encoding, and information theory to investigate behaviors that emerge from integrated actions of networks of neurons.

**Prerequisite(s):** NEUR 734, or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**NEUR 741 - Introduction to Neuroimaging**

Credits: 3 (NR)  
Introduction to physics and techniques of magnetic resonance imaging (MRI) and their applications to clinical and basic neuroscience. Students learn about the protocols used in the acquisition of images in both structural and functional contexts, and experimental paradigms applied to the exploration of cognition, learning, and development. Students gain experience with creating an experimental design for a study and understanding practical logistics involved in imaging, such as MRI safety and subject screening.

**Prerequisite(s):** NEUR 602 or 603, or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**NEUR 742 - Cognitive Neuroscience**

Credits: 3 (NR)  
Introduces cognitive neuroscience topics, including aspects of cognitive science covering an array of perceptual, sensory, cognitive, and affective processes. Incorporates studies of brain lesions, brain imaging, and animal and computational models.

**Prerequisite(s):** NEUR 602 or 603, or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**NEUR 751 - Applied Dynamics in Neuroscience**

Credits: 3 (NR)  
Covers recent developments in the application of applied dynamics to neuroscience. Emphasizes dynamical system approach to the understanding of neural processes. Topics include neural synchrony and control; formation of waves; oscillations; patterns within neural ensembles; network topology and dynamics of neurons; and decoding and encoding of neural signals.

**Prerequisite(s):** NEUR 603 or NEUR 734, or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0
NEUR 752 - Modern Instrumentation in Neuroscience

Credits: 3 (NR)
Builds on knowledge of how and what things are measured and controlled in modern bioinstrumentation. Topics include fundamental instrumentation; principles of sensing; basic electronics; computer interfaces and data acquisition; signals in biological systems; biopotential and ionic concentration measurements; and optical techniques.

Prerequisite(s): NEUR 602 or 734, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

NEUR 851 - Advanced Computation and Brain Dynamics

Credits: 3 (NR)
In-depth study of open issues and the state-of-the-art in advanced brain dynamics. Using mathematical and physical models, the course covers the neurodynamical aspects of neural nets, receptive fields, ion-channels, intercortical interactions, phase-locking, synchronicity, and the possible nontrivial role of quantum effects.

Prerequisite(s): NEUR 603 or NEUR 734, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

NEUR 996 - Doctoral Reading and Research

Credits: 1-6 (RD)
Reading and research on specific topic in neuroscience under direction of faculty member.

Prerequisite(s): Admission to NEUR PhD, and permission of instructor.

Notes: May be repeated as needed.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0

NEUR 998 - Dissertation Proposal

Credits: 1-6 (RD)
Covers development of a research proposal under guidance of dissertation director and doctoral committee. Proposal forms the basis for the doctoral dissertation.

Prerequisite(s): Admission to the Neuroscience Ph.D. program.
Notes: Course may be repeated as needed; however, no more than a total of 24 credits in NEUR 998 and 999 may be applied toward satisfying doctoral degree requirements. Out of the 24, no more than 12 credits of NEUR 998 may be applied.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0
Grading: Satisfactory/No Credit

NEUR 999 - Doctoral Dissertation

Credits: 1-12 (RD)
Doctoral research performed under the direction of the dissertation director.

Prerequisite(s): Admission to candidacy in neuroscience doctoral program.

Notes: May be repeated as needed; however, no more than a total of 24 credits in NEUR 998 and 999 may be applied toward satisfying doctoral degree requirements.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0
Grading: S/IP

New Century College (NCLC)

Offered by the College of Humanities and Social Sciences

NCLC 101 - Narratives of Identity

Credits: 6 (NR)
Explores the concept of identity through the study of literature and oral communication. Introduces aesthetic, cultural, and historical aspects of these forms of communication as well as their psychological, political, and practical significance, with special emphasis on the role of communication in a free society.

Hours of Lecture or Seminar per week: 6
Hours of Lab or Studio per week: 0

NCLC 102 - Global Networks and Communities

Credits: 6 (NR)

Prepares students for participation in a global society by investigating global and local issues in a historical context. Considers critical topics of western civilization, globalization, (neo)colonialism, imperialism, and hegemony. Students gain an in-depth perspective of the intricate relationships between people and cultures at various moments in our history.
Designated a Green Leaf Course.
NCLC 103 - Human Creativity: Science and Art

Credits: 6 (NR)

Investigates the vital role played by human creativity in fine arts and natural sciences. Fosters an understanding of the aesthetic and intellectual components of the arts while exploring the scientific method, the relation of theory and experiment, and the development and elaboration of major ideas in science. Designated a Green Leaf Course.

NCLC 111 - Composition, Communication and Community

Credits: 7 (NR)

Students study key skills for our information economy. They research original ideas and analyze critically the ideas of others. They also learn to communicate their conclusions through writing, speech, and the creative use of electronic media. Topics covered include writing to learn, information literacy, individual and small-group communication, and collaborative problem solving.

Notes: Credit distribution: written communication (3), oral communication (2), quantitative reasoning (1), and information technology (2).

NCLC 121 - Science, Mathematics, and Technology in Society

Credits: 7 (NR)

Building on skills developed in NCLC 110/111, designed for students pursuing a BA or BS in integrative studies within New Century College. Introduces natural sciences and their relation to mathematics. After building a knowledge base, students explore the natural world through contemporary issues. Discusses man and nature from biological, historical, and contemporary viewpoints, while developing an understanding of how science develops and communicates ideas. Students learn to work in groups to solve problems and work through issues, then publicly present ideas through debates, posters and various written formats.

Notes: Credit distribution: math/analytical reasoning (3), and natural science (4).
NCLC 165 - Independent Study

Credits: 1-12 (RT)
Individualized section form required. Study of a topic not otherwise available to the student. May involve any combination of reading assignments, tutorials, lectures, papers, presentations, or field/laboratory study (determined in consultation with instructor). Students are encouraged to work as a team on a particular topic.

Prerequisite(s): Permission of instructor and dean.

Notes: Maximum 12 credits can be used to fulfill graduation requirements.

Hours of Lecture or Seminar per week: 1-12
Hours of Lab or Studio per week: 1-12

NCLC 190 - Internship

Credits: 1-6 (RT)
Internship credit may be applied to 12 credits required in experiential learning. Primary purpose is to connect the student's academic course work to experiences and challenges outside the university classroom. The faculty also expects that students will enhance their competencies and skills and explore career options.

Prerequisite(s): Sophomore standing and permission of instructor.

Notes: Students may take no more than 6 credits in any one semester, unless approved by director of experiential learning or associate dean. Structured and supervised professional experience, within an approved agency, for which the student earns academic credit.

Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 1-6
Grading: Undergraduate Special

NCLC 194 - Service-Learning Experience

Credits: 1-15 (RT)
Service-learning courses offer students, faculty, and community partners an opportunity to work together to integrate and apply knowledge to address community needs. Learning goals, action strategies, and assignments developed collaboratively. Students demonstrate progress through critical reflection that illustrates growth in acquiring and comprehending values, skills, and knowledge content. Critical reflection may take the form of papers, presentations, portfolios, journals, and exams.

Hours of Lecture or Seminar per week: 1-15
Hours of Lab or Studio per week: 0

NCLC 195 - Field-Based Work

Credits: 1-6 (RT)
Directed field studies in topic not otherwise available to students.
Notes: Topics vary, but entire course or significant component is located off campus. In addition to fieldwork, course may also include reading assignments, tutorials, lectures, papers, presentations, portfolios, journals, and exams. Students bear costs of required field trips and should consult Center for Field Studies for more information.

Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 0

NCLC 196 - Teaching Assistant Experience

Credits: 1-6 (RD)
Teaching assistantship and peer-mentoring duties carried out through existing university programs, such as Technology Assistants, Writing Tutors, and Residence Advisors. Also includes teaching assistantship arrangements for specific courses detailed in individualized course contract signed by instructor and student. In addition to peer mentoring/advising, course work may include logistical support, reading assignments, papers, presentations, and portfolios.

Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 0

NCLC 197 - Add-On Experiential Learning

Credits: 1-3 (RT)
For students who wish to add one or more experiential learning credit to existing experiential learning course or learning community.

Prerequisite(s): Must be enrolled in a learning community or experiential learning class to add this additional credit.

Notes: May also be used by students who wish to add an experiential learning component to course that provides no experiential learning credit (with permission of instructor). Unless experiential learning add-on requirements are spelled out in course syllabus, requirements for add-on experiential learning credit must be detailed in individualized course contract signed by instructor and student.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0

NCLC 198 - Field-Based Work

Credits: 1-15 (RT)
Experiential-based individualized studies, mentored by instructor.

Notes: Topics decided by student and instructor, and approved by associate dean. Requirements must be detailed in individualized course contract signed by student, instructor, and associate dean. May include reading assignments, papers, journals, and portfolios.

Hours of Lecture or Seminar per week: 1-15
Hours of Lab or Studio per week: 0
NCLC 200 - Visual Thinking and the Creativity

Credits: 3-15 (NR)
Investigates modes of visual and textual creativity through art, literature, and variety of visual and textual forms. Through interdisciplinary approach to picturing text, provides opportunity to experiment with creative composition that includes visual elements, and with art forms that include textual elements. Explores blocks to creativity, and provides understanding of how to evaluate and write about visual texts as well as how to produce documents that integrate words and images.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 1

NCLC 201 - The World Since 1945

Credits: 6 (NR)
Examines the history of the past 50 years to illuminate the contemporary world as well as build connections between the global and local. Using historical works, fiction, autobiographies, films, and daily newspapers, students explore such major events as the Cold War, the struggle against apartheid in South Africa, the Vietnam War, the Chinese Cultural Revolution, and the continuing conflict in the Middle East. As a learning community, requires active student participation in group projects and discussions.

Hours of Lecture or Seminar per week: 3-15
Hours of Lab or Studio per week: 0

NCLC 202 - Public Speaking and Critical Thinking Skills

Credits: 4 (NR)
Combines process of learning to speak in front of audiences with analysis of arguments and persuasive appeals. Students learn how to create and present effective speeches, adapt messages to specific audiences, and evaluate and critique messages produced for others. One credit of experiential learning enables students to examine public speeches, news stories, political campaigns, and advertising, among others, to make meaningful connections between public speaking theory and practice.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 1

NCLC 203 - Inquiry for Action: Facilitating Change

Credits: 6 (NR)
Examines the relationships between academic research, individual acts and society's social and political structures. Students design a community-based research project, explore a rich array of qualitative and quantitative approaches, apply information and communication technologies to all aspects of the research process, and learn from individuals and organizations outside the classroom.

Hours of Lecture or Seminar per week: 6
Hours of Lab or Studio per week: 0
NCLC 204 - Leadership Theory and Practice

Credits: 3 (NR)
Examines historical and contemporary leadership theories and invites students to be reflective of their own leadership experiences through the lenses of those theories. Students develop critical lenses through which to evaluate their own self-awareness, effectiveness in groups, and ability to navigate structures and systems.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 1

NCLC 210 - Sustainable World

Credits: 4 (NR)
Covers basic issues in the natural and social sciences that underlie current environmental problems. Considers ethical matters such as equity as they pertain to global resource consumption, pollution, and climate change. Designated a Green Leaf Course.

Hours of Lecture or Seminar per week: 4
Hours of Lab or Studio per week: 0

NCLC 211 - Introduction to Conservation Studies

Credits: 3-6 (NR)
Provides foundation for the integrative study of environmental conservation. Formal and informal writing assignments and oral presentations designed to strengthen critical thinking and communication skills important to students who pursue conservation-related professions. Instructors encourage students to use course assignments and off-campus work to identify suitable educational and career paths within the conservation world. Designated a Green Leaf Course.

Hours of Lecture or Seminar per week: 4
Hours of Lab or Studio per week: 2

NCLC 215 - Introduction to Science and Society

Credits: 2 (NR)
Provides students in the interdisciplinary minor in science and society with general background information and common frame of reference for developing an individualized core of course work. Students design a plan for their course work in the minor, envision the specific topic they will address, and begin preliminary preparation for NCLC 415.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 0
NCLC 220 - Energy and Environment

Credits: 3-6 (NR)

Investigates current sources of energy, various modes of their utilization, and environmental effects. Offers an overview of the mechanical, physical, and chemical methodologies of energy use and delves into the biological, environmental, and ecological aspects of pollution-generating mechanisms. Designated a Green Leaf Course.

Hours of Lecture or Seminar per week: 3-6
Hours of Lab or Studio per week: 0

NCLC 230 - Math and Culture

Credits: 6 (NR)

Focuses on mathematical problems and their emergence in different cultures and historical moments. Emphasizes interdisciplinary nature of the motivations for the development of mathematics and on the process of mathematical discovery. High degree of faculty/student interaction, which enables students to demonstrate, through the use of presentations and projects, their understanding and mastery of fundamental mathematical ideas and techniques and the role of mathematics in the development of human culture.

Hours of Lecture or Seminar per week: 3-15
Hours of Lab or Studio per week: 0

NCLC 231 - Introduction to Community Studies

Credits: 4 (NR)

Examines relationship between sustainable communities and democratic citizenship in a diverse society. The objectives are to improve one's understanding of and thinking critically about communities and democratic principles, theories and practice. Students identify and work through problems that communities address by working in a community service-learning setting.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 1

NCLC 244 - Beats, Rhyme, and Culture

Credits: 4 (NR)

Examines the history of hip-hop and the effect it has had on our society. The primary focus is to consider hip-hop as a medium of communication that impacts, represents, and misrepresents the life experiences of youth in the United States. Students are exposed to historical, socioeconomic, and musical/aesthetic contexts of this genre through in-class activities and by attending related cultural events.
NCLC 245 - Visual Culture and Society

Credits: 4 (NR)
Explores the role of visual culture in contemporary society including an examination of photography, the visual and performing arts, film and video, and electronic media. Readings focus on the historical foundations of visuality as well as theories of visual culture and aesthetics. Students investigate the ways that forms of visual culture function in society and how these are linked to race, class, and gender as well as politics and economics. Students will gain hands-on experience working with contemporary visual media tools such as computer graphics and digital video editing.

NCLC 249 - Digital Literacy

Credits: 4 (NR)
Investigates information literacy, the mobile web, and interactive and immersive media, including gaming, social networking, blogging and micro-blogging, intellectual, political and civic collaborations, digital aesthetics and emerging digital cultures and art forms. Explores major theories of digital literacy and culture and introduce diverse social, artistic, theoretical and cultural practices that characterize today's digital domains and virtual environments.

Notes: One experiential credit is required in this class.

NCLC 265 - Independent Study

Credits: 1-12 (RT)
Individualized section form required. Study of a topic not otherwise available to the student. May involve any combination of reading assignments, tutorials, lectures, papers, presentations, or field/laboratory study (determined in consultation with instructor). Students are encouraged to work as a team on a particular topic.

Prerequisite(s): Permission of instructor and dean.

Notes: Maximum 12 credits can be used to fulfill graduation requirements.

NCLC 275 - Special Topics
Credits: 1-18 (RT)
Studies topics of special interest to undergraduates.

Notes: May be repeated for a maximum of 18 credits when topic is different.

Hours of Lecture or Seminar per week: 3-15
Hours of Lab or Studio per week: 0

NCLC 290 - Internship

Credits: 1-6 (RT)
Internship credit may be applied to 12 credits required in experiential learning.

Prerequisite(s): Sophomore standing and permission of instructor.

Notes: Students may take no more than 6 credits in any one semester, unless approved by director of experiential learning or associate dean. Structured and supervised professional experience, within an approved agency, for which the student earns academic credit. The primary purpose of an internship is to connect the student's academic course work to experiences and challenges outside the university classroom. The faculty also expects that students will enhance their competencies and skills and explore career options.

Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 1-6
Grading: Undergraduate Special

NCLC 294 - Service-Learning Experience

Credits: 1-15 (RT)
Service-learning courses offer students, faculty, and community partners an opportunity to work together to integrate and apply knowledge to address community needs. Learning goals, action strategies, and assignments developed collaboratively. Students demonstrate progress through critical reflection that illustrates growth in acquiring and comprehending values, skills, and knowledge content. Critical reflection may take the form of papers, presentations, portfolios, journals, and exams.

Hours of Lecture or Seminar per week: 1-15
Hours of Lab or Studio per week: 0

NCLC 295 - Field-Based Work

Credits: 1-18 (RT)
Directed field studies in topic not otherwise available to students.

Notes: Topics vary, but entire course or significant component is located off campus. In addition to fieldwork, course may also include reading assignments, tutorials, lectures, papers, presentations, portfolios, journals, and exams. Students bear costs of required field trips and should consult Center for Field Studies for more information.

Hours of Lecture or Seminar per week: 1-15
Hours of Lab or Studio per week: 0
NCLC 296 - Teaching Assistant Experience

Credits: 1-6 (RD)
Teaching assistantship and peer-mentoring duties carried out through existing university programs, such as technology assistants, writing tutors, and residence advisors. Also includes teaching assistantship arrangements for specific courses detailed in individualized course contract signed by instructor and student. In addition to peer mentoring/advising, course work may include logistical support, reading assignments, papers, presentations, and portfolios.

Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 0

NCLC 297 - Add-On Experiential Learning

Credits: 1-3 (RT)
For students who wish to add one or more experiential learning credit to existing experiential learning course or learning community.

Prerequisite(s): Must be enrolled in a learning community or experiential learning class to add this additional credit.

Notes: May also be used by students who wish to add an experiential learning component to course that provides no experiential learning credit (with permission of instructor). Unless experiential learning add-on requirements are spelled out in course syllabus, requirements for add-on experiential learning credit must be detailed in individualized course contract signed by instructor and student.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0

NCLC 298 - Field-Based Work

Credits: 1-15 (RT)
Experiential-based individualized studies, mentored by instructor.

Notes: Topics decided by student and instructor, and approved by associate dean. Requirements must be detailed in individualized course contract signed by student, instructor, and associate dean. May include reading assignments, papers, journals, and portfolios.

Hours of Lecture or Seminar per week: 1-15
Hours of Lab or Studio per week: 0

NCLC 301 - Science in the News

Credits: 3 (NR)
Examination and discussion of the current trends in science as reported in the popular media. Students learn how to evaluate the science that is reported so they may become informed consumers; discuss how scientific advancement might shape society by
looking at how science and society have changed together over time; and use examples from the past to discuss future trends.

Fulfills writing intensive requirement in the major.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**NCLC 302 - Argument and Advocacy**

Credits: 6 (NR)
Develops theoretical background and skills necessary for effective civic engagement and deliberative discourse. Teaches fundamentals of argument construction, function, and analysis. Covers role of argument and advocacy in a democratic society.

Fulfills writing intensive requirement in the major.

**Hours of Lecture or Seminar per week:** 6  
**Hours of Lab or Studio per week:** 0

---

**NCLC 304 - Social Movements and Community Activism**

Credits: 4 (NR)
Examines how citizens, individually and collectively, accomplish social change in society through case study analysis. Considers advantages and limits of social change strategies from communication and social movement theory perspectives. Surveys topics including how leaders maintain momentum in face of opposition; how movements and organizations use slogans, symbols and music to inspire followers; and how participants construct persuasive media campaigns and political arguments to facilitate policy change.

Fulfills writing intensive requirement in the major.

**Notes:** One credit of experiential learning enables students to explore their role as social advocates and effective citizens in context of community.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 1

---

**NCLC 305 - Conflict Resolution and Transformation**

Credits: 6 (NR)
Examines the nature and dynamics of conflict and ways to resolve and transform conflict. Experiential learning is used as the vehicle through which students explore their assumptions about communication and develop their skills for resolving interpersonal conflicts.

Fulfills writing intensive requirement in the major.

**Hours of Lecture or Seminar per week:** 6  
**Hours of Lab or Studio per week:** 0
**NCLC 306 - Our Common Futures**

Credits: 3-6 (NR)

Students and faculty work together to model patterns of life that fit within the planet's ecological means. Involves the study of "environomics," introductions to urban systems and planning, and studio work to actually create models of alternative growth.

Fulfills writing intensive requirement in the major.

**Hours of Lecture or Seminar per week:** 3-6  
**Hours of Lab or Studio per week:** 0

---

**NCLC 307 - Narratives of Nature**

Credits: 6 (NR)

Course begins with the individual's connection to the infinite, the cosmos, and ends in a microscopic examination of the behavior of the human animal. Looks at the fundamental questions relating to scientific thinking and writing.

Fulfills writing intensive requirement in the major.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 3

---

**NCLC 308 - American Landscapes in Fiction, Film, and History**

Credits: 6 (NR)

Waterways and roadways have always had practical, spiritual significance for Americans. Course looks at American literary works and films in historical context to better understand the roles roads, rivers play in shaping physical, cultural landscape of United States. Students explore course themes outside classroom on weekend field trips, and conduct self-directed road trip as a main learning events.

Fulfills general education requirement in synthesis.

Fulfills writing intensive requirement in the major.

**Notes:** Satisfies requirements for ENGH 302.

**Hours of Lecture or Seminar per week:** 4  
**Hours of Lab or Studio per week:** 2

---

**NCLC 310 - Violence and Gender**

Credits: 3-6 (NR)

Using nonfiction, research documentaries, oral histories, case studies, literature, feature films, music, dance, and visual arts, examines the dynamics of violence through different cultural lenses. Students work in university and community settings to
integrate their academic experiences with practice.

Fulfills writing intensive requirement in the major.

**Hours of Lecture or Seminar per week: 3-6**
**Hours of Lab or Studio per week: 0**

**NCLC 311 - The Mysteries of Migration: Consequences for Conservation**

Credits: 6 (NR)

Investigates the biology of migration and its implications for science policy. Students consider the phenomenon of migration in the context of natural history, conservation, and cultural issues. The course includes several weekend trips for field study. Designated a Green Leaf Course.

Fulfills writing intensive requirement in the major.

**Hours of Lecture or Seminar per week: 3-15**
**Hours of Lab or Studio per week: 0**

**NCLC 312 - Images and Experiences of Childhood: Social Construct, Literature, and Film**

Credits: 3-6 (NR)

Immerses students in the images of childhood through the media of literature, video, and poetry, with a strong emphasis on historical perspectives of childhood. The class is interactive, requires some work in groups, and requires classroom participation.

Fulfills writing intensive requirement in the major.

**Hours of Lecture or Seminar per week: 3-6**
**Hours of Lab or Studio per week: 0**

**NCLC 313 - Strangers in a Strange Land: Immigration in 20th Century America**

Credits: 3-6 (NR)

Examines immigration experience as historical reality, culture. Through explorations of historical and contemporary discourse of immigration in United States, illuminates connections between current-day events, and ideas and policies that inform them.

Fulfills writing intensive requirement in the major.

**Hours of Lecture or Seminar per week: 3-15**
**Hours of Lab or Studio per week: 0**

**NCLC 314 - Conflict, Trauma and Healing**
Develops in students an appreciation of human resilience and helps them acquire better coping mechanisms. Imparts knowledge of the nature and dynamics of trauma and healing. Investigates the difficulties people face in responding to settings of conflict such as war, school shootings, abuse, domestic violence, including natural disaster. Examines case studies from a variety of personal, national, and international settings.

Fulfills writing intensive requirement in the major.

**NCLC 315 - Spirituality and Conflict Transformation**

Credits: 6 (NR)
Examines dimensions of spirituality, including peacemaking efforts in large-scale conflicts, conflicts within faith communities, and interpersonal disputes. Experiential learning explores spiritually informed resolution.

Fulfills writing intensive requirement in the major.

**Hours of Lecture or Seminar per week: 6**
**Hours of Lab or Studio per week: 0**

**NCLC 316 - Introduction to Childhood Studies**

Credits: 4 (NR)
Focuses on the study of childhood from birth to adolescence from the perspective of several disciplines. Covers childhood theory, research, and policy and their applications to decisions regarding children and youth.

Fulfills writing intensive requirement in the major.

**Hours of Lecture or Seminar per week: 3**
**Hours of Lab or Studio per week: 0**

**NCLC 317 - Issues in Family Relationships**

Credits: 4 (NR)
Dynamics of family systems and issues that shape relationships among family members. How families evolve as members grow, leave, and create related family systems; family roles and forms; and communication patterns, decision-making, conflict, stress, and power. Content draws from family communication, family relations, psychology, and counseling. Lecture, discussion, observation, analysis, research, and role-playing.

Fulfills writing intensive requirement in the major.

**Prerequisite(s):** 55 credits.

**Notes:** One credit counts for experiential learning; students complete 45 credits of course-related work outside classroom.
NCLC 318 - Exploring Virginia's Watersheds

Credits: 4 (NR)

Comprehensive overview of history, geography, economics, and management of water resources in Virginia; and how rapidly growing population has measurably degraded resource. Includes one weekend field trip. Designated a Green Leaf Course.

Fulfills writing intensive requirement in the major.

Prerequisite(s): HIST 120, 121, 122, or equivalent; and EVPP 110 or GGS 102 or GEOL 109 or NCLC 120.

NCLC 320 - Construction of Differences: Race, Class, and Gender

Credits: 6 (NR)

Investigates race, sex, sexual orientation, and social class in contemporary American society. Examines commonalities in the construction of these categories and experiences of those who occupy them.

Fulfills writing intensive requirement in the major.

NCLC 322 - Teacher: A Historical Perspective

Credits: 3 (NR)

Examines the rich heritage of the teaching profession in Western society. Traces the history of educational philosophy and teaching, beginning with the ancient Greeks and culminating in the 21st century United States. Using the exploration of the various philosophies of education as a foundation, examines contemporary images of teachers in literature and film.

NCLC 330 - Enterprise Development

Credits: 6 (NR)

Prepares students for enterprise development in diverse environments by examining the spectrum of sociocultural, organizational, behavioral, strategic, and management factors that impact enterprise creation. Instructional method is interactive, using case
studies, scenarios, role playing, guest speakers, and student-driven semester projects to link theory to practice.

Fulfills writing intensive requirement in the major.

**Hours of Lecture or Seminar per week:** 3-15
**Hours of Lab or Studio per week:** 0

### NCLC 331 - The Nonprofit Sector

Credits: 4 (NR)
Readings, classroom discussions and activities, and practical experience reveal historical, legal, and socioeconomic forces that define and influence the American nonprofit sector. Explores structures, issues that affect nonprofit management, governing, and financial systems.

Fulfills writing intensive requirement in the major.

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 1

### NCLC 333 - The Nature of Mathematics

Credits: 3 (NR)
Sections include theoretical framework, historical context, connections with some other disciplines, and current issues. The sections are illustrated with selected mathematics topics (more advanced algebra and geometry plus introductions to set theory, probability, calculus, and number theory) Student presentations (in pairs) on what they have read and learned in mathematics, and result of optional experiential learning component of the course.

Fulfills writing intensive requirement in the major.

**Prerequisite(s):** Performance on Math Placement Exam equivalent to requirements for entrance to MATH 110 or MATH 111, successful completion of algebra program in mathematics learning center, or any mathematics course that fulfills university’s general education requirement in quantitative reasoning; OR permission of instructor.

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0

### NCLC 334 - Environmental Justice

Credits: 4 (NR)

Examines historical and contemporary sociopolitical and socioeconomic conditions that have given rise to the environmental justice movement. Analyzes how individuals contribute to environmental justice or injustice through everyday decisions. Considers how environmental justice movement responds to these issues. Designated a Green Leaf Course.

Fulfills writing intensive requirement in the major.
NCLC 335 - Ethics, Communication, and Freedom

Credits: 3-6 (NR)
Students examine ethical principles, discuss some underlying bases for these principles, and work to understand how such principles are experienced and can be applied in a free society. Focus is on examining potential conflicts between ethics and the freedoms believed essential to a healthy democratic society. Cases drawn from sports, medicine, media, politics, and business.

Fulfills writing intensive requirement in the major.

Prerequisite(s): Sophomore standing and 3 credits each of communication and philosophy; or permission of instructor.

NCLC 336 - Poverty, Wealth and Inequality in the US

Credits: 3 (NR)
Explores the social, cultural, political, and spiritual implications of poverty, wealth, and inequality in the United States. Examines the ways in which class identity informs one's views of the world and its politics; how socioeconomic status affects one's access to education and other social goods; and how dominant discourses and stereotypes related to poverty influence mass perception regarding a range of social issues, from educational policy to welfare.

NCLC 337 - Social Justice Consciousness and Personal Transformation

Credits: 3 (NR)
Explores the many spaces at which the quest to strengthen social justice consciousness interacts with processes and commitments for personal transformation. Analyzes through the lens of the activist and in the spirit of bringing mindfulness to activism, how we come to see and experience the world. Examines how socialization informs consciousness.

NCLC 338 - Animal Rights and Humane Education

Credits: 3 (NR)
Explores a combination of critical theories, experiential learning, and dialogical practices to examine the ways in which non-
human animals are exploited for human profit. Examines the ramifications of this exploitation ecologically, as a question of sustainability, and spiritually, as a question of the impact of animal abuse on the human spirit. Discusses the use of animals in entertainment, factory farming, animal testing, and sport or trophy hunting; and how individuals and organizations are fighting these practices.

Designated a Green Leaf Course.

**NCLC 340 - Progress: Can America Figure Out What It Means?**

Credits: 3-6 (NR)
Explores our land, the built and the left natural, as valued and sacred. Challenges students as developers and environmentalists, as citizens and business persons, to strive for a win-win scenario.

Fulfills writing intensive requirement in the major.

**Hours of Lecture or Seminar per week:** 3-6

**Hours of Lab or Studio per week:** 0

**NCLC 341 - Progress: Washington, the New Edge City?**

Credits: 6 (NR)
NCLC 340 investigates how the city, both the good parts and the bad parts, came to be. This course investigates what we might do about the situation. Requires active engagement of the students in research and discussion. Collective field work and class field trips both semesters.

Fulfills writing intensive requirement in the major.

**Notes:** Students may take either Part I or Part II of this course but are encouraged to take both.

**Hours of Lecture or Seminar per week:** 3-15

**Hours of Lab or Studio per week:** 0

**NCLC 343 - Interactive Digital Texts**

Credits: 3 (NR)
Writing-intensive course devoted to critical reading of new media texts and creation of technology-enriched texts in a variety of rhetorical genres targeted to specific audiences. Includes analysis of text embedded within technology-enhanced writing and that which surrounds this emerging medium. Critical reading and interpretive skills, historical and theoretical contexts for development of contemporary textual media. Allows students to explore critically such genres and gain command of a new rhetorical field for academic, educational, informational, technical, and business communication.

Fulfills writing intensive requirement in the major.

Equivalent to ENGH 376
Prerequisite(s): ENGL 101/ENGH 101 or equivalent.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

NCLC 345 - Introduction to Multimedia

Credits: 5 (NR)
Technological, aesthetic, and educational issues of using interactive multimedia. Topics include theoretical underpinnings of some technological issues involved in multimedia computing as well as techniques for authoring interactive multimedia projects using a variety of digital media tools.

Fulfills writing intensive requirement in the major.

Hours of Lecture or Seminar per week: 5
Hours of Lab or Studio per week: 0

NCLC 346 - Art as Social Action

Credits: 4 (NR)
This learning community explores historical records to understand different ways art has been produced, distributed, and consumed. Examines ways artists have affected change in their worlds. Through interdisciplinary studies, teaches major social movements and artists and theories used in socially engaged art. Students engage in experiential learning outside classroom as course requirement.

Fulfills writing intensive requirement in the major.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 1

NCLC 347 - Gender Representation in Popular Culture

Credits: 3-6 (NR)
Explores the way in which masculinity and femininity have been represented across the decades in television, movies, music videos, pop art, and print media. Provides a review of the scholarship on the historical and contemporary roles of women and men in society, and examines the contradictions and expectations associated with gender roles. Incorporates active group learning through creative, insight-oriented exercises, critical thinking and discussions, and group presentations and media research activities.

Fulfills writing intensive requirement in the major.

Hours of Lecture or Seminar per week: 3-6
Hours of Lab or Studio per week: 0

NCLC 348 - Digital Futures
Credits: 3 or 6 (NR)
Investigates important contemporary issues such as surveillance-privacy, censorship, piracy, gender and ethnicity, digital labor and play, mobile media and globalization, and the commercialization and political potential of the digital public spheres. Introduces students to the latest technological, philosophical and creative thinking on the future of human society in a digital age.

Fulfills writing intensive requirement in the major.

Prerequisite(s): NCLC 249.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 3

NCLC 349 - Writing for Multimedia

Credits: 4 (NR)
Looks at how literary traditions of 20th century meet the cybercultures of 21st century. Workshop course exploring writing tasks facing multimedia professional, whether as a concept and storywriter, a producer, or a hands-on creator of multimedia presentations and narratives. Students practice creative and project-focused writing. Scripting interactivity is a key component of both kinds of multimedia writing; class time is spent working on the skills and concepts needed to creatively communicate interactively.

Fulfills writing intensive requirement in the major.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 1

NCLC 355 - Consciousness, Meaning and Life Purpose

Credits: 3 (NR)
Examines scientific evidence about states of consciousness, providing opportunities for experiences and reflections about the personal impact of states of consciousness on how we find meaningful direction for using our talents. Includes the theory and practice of mindfulness and mediation; finding meaning in dreams; the stress-reduction and creativity-enhancement effects of visualization; and traditions of vision-questing about personal meaning and life purpose.

Fulfills writing intensive requirement in the major.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring, Summer

NCLC 360 - The Built Environment

Credits: 6 (NR)
Examines, records, and interprets objects, structures, and landscapes that compose our built environment. Draws on the fields of historical archaeology, architectural history, and urban geography, and employs photography, cartography, and evocative writing to represent the material world we inhabit. Builds on study of one neighborhood in Arlington, Virginia, and expands to entire metropolitan area.
Fulfills writing intensive requirement in the major.

**NCLC 361 - Neighborhood, Community, and Identity**

Credits: 3-6 (NR)
Examines processes of neighborhood formation and transformation in the context of urbanism, suburbanism, immigration, and transmigration. Students explore the history and meaning of neighborhoods in the Northern Virginia and the Washington, D.C., metropolitan area.

Fulfills writing intensive requirement in the major.

**NCLC 365 - Independent Study**

Credits: 1-12 (RT)
Individualized section form required. Study of a topic not otherwise available to the student. May involve any combination of reading assignments, tutorials, lectures, papers, presentations, or field/laboratory study (determined in consultation with instructor) Students are encouraged to work as a team on a particular topic.

Fulfills writing intensive requirement in the major.

**Prerequisite(s):** Permission of instructor and dean.

**Notes:** Maximum 12 credits can be used to fulfill graduation requirements.

**Hours of Lecture or Seminar per week:** 1-12
**Hours of Lab or Studio per week:** 1-12

**NCLC 375 - Special Topics**

Credits: 1-18 (RT)
Studies topics of special interest to undergraduates.

Fulfills writing intensive requirement in the major.

**Notes:** May be repeated for a maximum of 18 credits when topic is different.

**Hours of Lecture or Seminar per week:** 3-15
**Hours of Lab or Studio per week:** 0
NCLC 378 - Medicine, Justice, and Public Policy

Credits: 3 (NR)
Explores formation of public policy relating to several key issues in medicine. Students examine basic theories of justice and public policy formation and apply these to contemporary issues in the field of medicine. The goal is to examine how current policy on these issues was established and to give examples of major stakeholders in the debate. This course involves some traditional lecture and discussion classes and also features participative learning through group work and web-based discussions.

Fulfills writing intensive requirement in the major.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

NCLC 379 - Cancer and Its Social Impact

Credits: 4 (NR)
Introduces epidemiology and biological basis for treatment and prevention of cancer. Students consider the social impact of cancer by looking at how patients and families cope with the disease. A portion of the learning community focuses on working with and learning from people living with cancer. Designed for biology and premedicine students as well as nonscience majors interested in connecting the physiology of health and disease to the human spirit.

Fulfills writing intensive requirement in the major.

Prerequisite(s): 60 credits, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 1

NCLC 381 - When Cultural Worlds Collide

Credits: 6 (NR)
Explores what happens when "civilization" encounters "the jungle" by reading, writing, discussing, and viewing written and filmed works dealing with contacts between cultures with colliding world views. Literature (from Conrad's *The Heart of Darkness* to Shakespeare's *The Tempest* to Burrough's *Tarzan*), news articles, radio broadcasts, web home pages, art exhibits, and many film and video presentations provide the basis for in-class and out-of-class activities.

Fulfills writing intensive requirement in the major.

Hours of Lecture or Seminar per week: 3-15
Hours of Lab or Studio per week: 0

NCLC 390 - Internship

Credits: 1-6 (RT)
Internship credit may be applied to 12 credits required in experiential learning.
Fulfills writing intensive requirement in the major.

**Prerequisite(s):** Sophomore standing and permission of instructor.

**Notes:** Students may take no more than 6 credits in any one semester, unless approved by director of experiential learning or associate dean. Structured and supervised professional experience, within an approved agency, for which the student earns academic credit. The primary purpose of an internship is to connect the student's academic course work to experiences and challenges outside the university classroom. The faculty also expects that students will enhance their competencies and skills and explore career options.

**Hours of Lecture or Seminar per week:** 1-12  
**Hours of Lab or Studio per week:** 1-6  
**Grading:** Undergraduate Special

---

**NCLC 391 - Introduction to Integrative Studies**

Credits: 3 (NR)  
Describes key components of the Integrative Studies Program in New Century College. Students prepare for active participation as a community of learners to develop skills in reflective learning and self-assessment, and identify areas of intellectual and professional interests, values and skills so that students may take greater advantage of opportunities in NCC. As a learning community, this course fosters group collaboration, intensive writing, and reflective learning.

Fulfills writing intensive requirement in the major.

**Notes:** Students may not enroll in this course after completing 12 or more learning community credits or simultaneously with or after completing NCLC 491.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**NCLC 394 - Service-Learning Experience**

Credits: 1-15 (RT)  
Service-learning courses offer students, faculty, and community partners an opportunity to work together to integrate and apply knowledge to address community needs. Learning goals, action strategies, and assignments developed collaboratively. Students demonstrate progress through critical reflection that illustrates growth in acquiring and comprehending values, skills, and knowledge content. Critical reflection may take the form of papers, presentations, portfolios, journals, and exams.

Fulfills writing intensive requirement in the major.

**Hours of Lecture or Seminar per week:** 1-15  
**Hours of Lab or Studio per week:** 0

---

**NCLC 395 - Field-Based Work**

Credits: 1-18 (RT)  
Directed field studies in topic not otherwise available to students.
Fulfills writing intensive requirement in the major.

Notes: Topics vary, but entire course or significant component is located off campus. In addition to field work, course may also include reading assignments, tutorials, lectures, papers, presentations, portfolios, journals, and exams. Students bear costs of required field trips and should consult Center for Field Studies for more information.

Hours of Lecture or Seminar per week: 1-15
Hours of Lab or Studio per week: 0

NCLC 396 - Teaching Assistant Experience

Credits: 1-6 (RD)
Teaching assistantship and peer-mentoring duties carried out through existing university programs, such as Technology Assistants, Writing Tutors, and Residence Advisors. Also includes teaching assistantship arrangements for specific courses detailed in individualized course contract signed by instructor and student. In addition to peer mentoring/advising, course work may include logistical support, reading assignments, papers, presentations, and portfolios.

Fulfills writing intensive requirement in the major.

Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 0

NCLC 397 - Add-On Experiential Learning

Credits: 1-3 (RT)
For students who wish to add one or more experiential learning credit to existing experiential learning course or learning community.

Fulfills writing intensive requirement in the major.

Prerequisite(s): Must be enrolled in a learning community or experiential learning class to add this additional credit.

Notes: May also be used by students who wish to add an experiential learning component to course that provides no experiential learning credit (with permission of instructor). Unless experiential learning add-on requirements are spelled out in course syllabus, requirements for add-on experiential learning credit must be detailed in individualized course contract signed by instructor and student.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0

NCLC 398 - Field-Based Work

Credits: 1-15 (RT)
Experiential-based individualized studies, mentored by instructor.

Fulfills writing intensive requirement in the major.
**Notes:** Topics decided by student and instructor and approved by associate dean. Requirements must be detailed in individualized course contract signed by student, instructor, and associate dean. May include reading assignments, papers, journals, and portfolios.

**Hours of Lecture or Seminar per week:** 1-15  
**Hours of Lab or Studio per week:** 0

**NCLC 399 - Study Abroad**

Credits: 1-6 (RT)  
Intended for participation in formally organized course offered by Center for Global Education.

Fulfills writing intensive requirement in the major.

**Notes:** May be repeated for a maximum of 16 credits.

**Hours of Lecture or Seminar per week:** 1-6  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall, Spring, Summer

**NCLC 400 - Temptress: Constructs of Sex and Power**

Credits: 3 (NR)  
Examines the portrayal of powerful and/or sexual women throughout history, identifying famous historical "temptresses" and investigating the facts known about them. Explores representations and perceptions of contemporary female sexuality, considering possible future concepts and images of female power and sexuality.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**NCLC 401 - Conservation Biology**

Credits: 6 (NR)  
Provides students with a working knowledge of conservation biology. Integrates the study of social, economic, and political factors with biodiversity, population modeling, habitat degradation, and management issues. Students confront the leading edge of this exciting field by developing real species conservation plans. The experiential learning component of the course will include trips to the Smithsonian Institution's Conservation and Research Center in Front Royal, Virginia, to study with nationally known experts.  
Designated a Green Leaf Course.

**Prerequisite(s):** Junior standing, or permission of instructor.

**Hours of Lecture or Seminar per week:** 3-15  
**Hours of Lab or Studio per week:** 0
NCLC 402 - Plants and People - Sustenance, Ceremony, and Sustainability

Credits: 6 (NR)

Examines the direct relationships between people and plants by integrating perspectives from both ethnobotany and economic botany. Provides students with an appreciation of the fundamental role of plants and plant-derived products in all aspects of human life in both industrialized and non-industrialized societies. Explores how plants and their uses have shaped both past and present cultures around the world. Designated a Green Leaf Course.

Hours of Lecture or Seminar per week: 6
Hours of Lab or Studio per week: 0

NCLC 404 - Ethics and Leadership

Credits: 4 (NR)

Uses an interdisciplinary approach to deepen and broaden student's learning about theories, models, and constructs related to the study and practice of ethics and leadership. Teaches students to develop ethical decision making strategies, communicate effectively in diverse group settings, value civic engagement and actively apply ethical leadership skills. Includes experiential learning activities and discussions that connect formal knowledge with real world experiences and includes one credit of experiential learning.

Hours of Lecture or Seminar per week: 4
Hours of Lab or Studio per week: 0

NCLC 405 - Women and Leadership

Credits: 4 (NR)

Examines leadership within the context of the theoretical principles of women's studies through discussion of course texts, interactive exercises, field trips, documentary films, guest speakers, and reflection. Investigates the role that gender plays in the various forms of leadership and leadership styles. Explores the historical record of women in leadership roles, identifying the barriers as well as the opportunities.

Hours of Lecture or Seminar per week: 4
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring, Summer

NCLC 410 - Contemporary Health Issues

Credits: 3-18 (NR)

Looks at a variety of health and health care issues. Examines several of the major health concerns of women and, to a lesser degree, men. Also explores the biology and medical implications of these diseases and how our society deals with potential life-altering information. Examines who is making the decisions on the allocation of research funds and prevention of diseases.
NCLC 415 - Perspectives on Science and Society

Credits: 1 (NR)
Capstone course for the interdisciplinary minor in science and society. Helps students integrate material from their individualized core of courses and make explicit connections among the various disciplines. Provides opportunity for students to share their experiences, expanding their breadth of knowledge in this important and timely area of study.

Prerequisite(s): NCLC 215 and completion of 17 credits toward the minor in science and society.

NCLC 416 - Refugee and Internal Displacement

Credits: 3 (NR)
Provides students with a deeper understanding of refugee and internal displacement. Explores causes of displacement and its impact on people and societies. Studies the role played by governments, non-governmental organizations (NGOs) and the international community in addressing problems faced by refugees in internally displaced persons in terms of relief assistance and humanitarian services.

NCLC 420 - Work Effectiveness Skills

Credits: 3 (NR)
Develops a variety of work-readiness skills needed to become successful in both local and global marketplaces. Topics and skills covered include communication, problem solving in the business setting, workplace ethics, listening skills, how to influence others, building team project rapport, and meeting effectiveness skills.

NCLC 422 - An Experiential Approach to American Foreign Policy

Credits: 3-6 (NR)
Takes an experiential approach to the study of American foreign policy. Through case studies, discussions, group projects, and directed research, students learn how foreign policy is made and executed and how they as citizens, activists, or officials can influence national decisions.
NCLC 423 - Management in the Global Marketplace

Credits: 6 (NR)
Experiential approach to the study of global management and organizational behavior. Through exercises, case studies, discussions, group projects, and individual research and essays, students learn the principles of effective management as they apply to modern global organizations, whether public, private, or nonprofit.

Hours of Lecture or Seminar per week: 6
Hours of Lab or Studio per week: 0

NCLC 431 - Principles of Fund Raising

Credits: 4 (NR)
Examines history of philanthropy and public policy, and the economic and legal frameworks that shape it. Combining theory and practice, students study human behavior, communications, and management systems that are hallmarks of successful fund raising, and begin to develop skills to generate donations, foundation grants, and other unearned revenue for a nonprofit organization.

Prerequisite(s): NCLC 331.

Notes: Includes 1 experiential learning credit.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 1

NCLC 435 - Leadership in a Changing Environment

Credits: 4 (NR)
Examines diverse definitions and processes of change across multiple complex contexts. Focuses on identifying innovative, collaborative solutions to seemingly intractable social problems. Explores topics such as social change and globalization, creative conflict resolution, the nature of power, oppression and influence, and systemic leadership.

Prerequisite(s): 60 credits.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 1

NCLC 436 - Social Justice Education

Credits: 4 (NR)
Examines educational policy, practice, and materials using a variety of lenses informed by social justice theory and praxis.
Investigates ways in which racism, sexism, economic injustice, heterosexism, ageism, and other forms of discrimination influence schools and educational access and opportunity for youth. Considers and practices what individuals and communities can do to ensure that all students have equitable educational opportunities.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 1

**NCLC 440 - Death, Dying, and Decision Making**

Credits: 3 (NR)
Interdisciplinary examination of clinical care of dying persons along with psychosocial issues related to processes of death and dying. Special emphasis on application of ethical principles in resolving complex problems for individuals with life-threatening illnesses and their families as care givers or decision makers. Students consider the changing norms and mores surrounding end-of-life decisions and explore the care available to terminally ill patients.

Prerequisite(s): 60 credits, or permission of instructor

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**NCLC 445 - Multimedia Design**

Credits: 5 (NR)
Technological, aesthetic, and educational issues of using interactive multimedia. Topics include theory and practice, integration of digital media, interface and navigation studies, and technical constraints on design.

Prerequisite(s): NCLC 345, or permission of instructor.

Hours of Lecture or Seminar per week: 4
Hours of Lab or Studio per week: 1

**NCLC 446 - Art, Beauty, and Culture**

Credits: 3-6 (NR)
Designed to help students understand the culture- and time-bound nature of beauty as it relates to art. Exploration of how the codes of acceptability in art forms have changed over time, with discussion about the subversive nature of art and the role that beauty plays in art that is created to engage the viewer in some type of action. Exercises include research projects, site visits, and gallery attendance.

Hours of Lecture or Seminar per week: 3-6
Hours of Lab or Studio per week: 0

**NCLC 449 - Multimedia Research and Project Development**
Credits: 4 (NR)
Provides a solid background in multimedia research and concept development from a scientific yet practical point of view. Students gain a full understanding of the computer-based principles behind multimedia and appreciate the symbiotic relationship between the two. Students also learn about the life cycle of development for a multimedia application including what constitutes a good idea, usability testing, and copyright issues.

Prerequisite(s): NCLC 345, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 1

NCLC 455 - Consciousness and Transformation in Action

Credits: 3 (NR)
Covers how principles and practices of consciousness and transformation relate to the major and career pathway it represents. Includes the theory and practices for deepening the student's own experience with the mindfulness and contemplative approaches to inquire. Capstone course for the minor in consciousness and transformation.

Prerequisite(s): NCLC 355 and 356

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring, Summer

NCLC 465 - Independent Study

Credits: 1-12 (RT)
Individualized section form required. Study of a topic not otherwise available to the student. May involve any combination of reading assignments, tutorials, lectures, papers, presentations, or field/laboratory study (determined in consultation with instructor) Students are encouraged to work as a team on a particular topic.

Prerequisite(s): Permission of instructor and dean.

Notes: Maximum 12 credits can be used to fulfill graduation requirements.

Hours of Lecture or Seminar per week: 1-12
Hours of Lab or Studio per week: 1-12

NCLC 475 - Special Topics

Credits: 1-18 (RT)
Studies topics of special interest to undergraduates.

Notes: May be repeated for a maximum of 18 credits when topic is different.

Hours of Lecture or Seminar per week: 3-15
Hours of Lab or Studio per week: 0
NCLC 490 - Internship

Credits: 1-6 (RT)
Internship credit may be applied to 12 credits required in experiential learning.

Prerequisite(s): Sophomore standing and permission of instructor.

Notes: Students may take no more than 6 credits in any one semester, unless approved by director of experiential learning or associate dean. Structured and supervised professional experience, within an approved agency, for which the student earns academic credit. The primary purpose of an internship is to connect the student's academic course work to experiences and challenges outside the university classroom. The faculty also expects that students will enhance their competencies and skills and explore career options.

Hours of Lecture or Seminar per week: 1-2
Hours of Lab or Studio per week: 1-6
Grading: Undergraduate Special

NCLC 491 - The Senior Capstone Experience

Credits: 3 (NR)
Should be taken semester before graduation; 85 credits required. Graduation requirement for integrative studies students. Students complete final NCC portfolio and senior exposition. Provides information on issues of professional development (interviewing skills, resume development, career strategies, and alumni opportunities).

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

NCLC 492 - Graduation Portfolio

Credits: 0 (RD)

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0
Grading: Satisfactory/No Credit

NCLC 493 - Graduation Portfolio

Credits: 0 (RD)

Notes: NCLC 493 is for students who will not be enrolled in any other course work for the semester.
**NCLC 494 - Service-Learning Experience**

Credits: 1-15 (RT)

Service-learning courses offer students, faculty, and community partners an opportunity to work together to integrate and apply knowledge to address community needs. Learning goals, action strategies, and assignments developed collaboratively. Students demonstrate progress through critical reflection that illustrates growth in acquiring and comprehending values, skills, and knowledge content. Critical reflection may take the form of papers, presentations, portfolios, journals, and exams.

**Hours of Lecture or Seminar per week:** 1-15  
**Hours of Lab or Studio per week:** 0

---

**NCLC 495 - Field-Based Work**

Credits: 1-18 (RT)

Directed field studies in topic not otherwise available to students.

**Notes:** Topics vary, but entire course or significant component is located off campus. In addition to field work, course may also include reading assignments, tutorials, lectures, papers, presentations, portfolios, journals, and exams. Students bear costs of required field trips and should consult Center for Field Studies for more information.

**Hours of Lecture or Seminar per week:** 1-15  
**Hours of Lab or Studio per week:** 0

---

**NCLC 496 - Teaching Assistant Experience**

Credits: 1-6 (RD)

Teaching assistantship and peer-mentoring duties carried out through existing university programs, such as technology assistants, writing tutors, and residence advisors. Also includes teaching assistantship arrangements for specific courses detailed in individualized course contract signed by instructor and student. In addition to peer mentoring/advising, course work may include logistical support, reading assignments, papers, presentations, and portfolios.

**Hours of Lecture or Seminar per week:** 1-6  
**Hours of Lab or Studio per week:** 0

---

**NCLC 497 - Add-On Experiential Learning**

Credits: 1-3 (RT)

For students who wish to add one or more experiential learning credit to existing experiential learning course or learning community.

**Prerequisite(s):** Must be enrolled in a learning community or experiential learning class to add this additional credit.

**Notes:** May also be used by students who wish to add an experiential learning component to course that provides no experiential learning credit (with permission of instructor). Unless experiential learning add-on requirements are spelled out in course syllabus, requirements for add-on experiential learning credit must be detailed in individualized course contract signed by instructor and student.
NCLC 498 - Field-Based Work

Credits: 1-15 (RT)
Experiential-based individualized studies, mentored by instructor.

Notes: Topics decided by student and instructor and approved by associate dean. Requirements must be detailed in individualized course contract signed by student, instructor, and associate dean. May include reading assignments, papers, journals, and portfolios.

NCLC 504 - Leadership Theory, Praxis, and Development

Credits: 3 (NR)
Explores contemporary leadership theories, models, and concepts using a theory-to-practice-to theory framework. Covers leadership theory, supporting research, and practical application. Focuses on active learning through classroom presentations, course texts, a reflection on theory and practice, and team work.

Prerequisite(s): Permission of instructor.

NCLC 510 - Institutional Records Keeping

Credits: 3 (NR)
Offers students the theory and mechanics of animal records-keeping and identifies the important role accurate records play in successful captive management. Instruction is in the new ISIS Zoological Information Management System (ZIMS) Application, with hands-on training to learn about the capacity of ZIMS for use as a complete information management system.

Prerequisite(s): Admission to MAIS ZAL concentration or permission of instructor.

NCLC 511 - Career Development
Credits: 3 (NR)
Focuses on traditional and industry-specific nonprofit management topics ranging from marketing to education. It is one of a series of three management courses for MAIS ZAL students.

Prerequisite(s): PUAD 505 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 1

NCLC 512 - Organizational Development

Credits: 3 (NR)
Covers traditional zoo and aquarium organization topics, strategic planning, human resources, leadership styles, crisis management, and personal ethics. It is one of a series of three management courses for MAIS ZAL students.

Prerequisite(s): NCLC 511

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 1

NCLC 513 - Population Management I: Data Acquisition and Processing

Credits: 3 (NR)
Teaches students to collect, process, and enter data into the studbook computer software program PopLink. Introduces basic principles of captive population management and how to use the studbook data to describe the history of the population as well as the natural history of the species in zoo and aquarium collections.

Prerequisite(s): Admission to MAIS ZAL program or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 1

NCLC 514 - Population Management II: Data Analysis and Breeding Recommendations

Credits: 3 (NR)
Educates students to be competent population managers with the ability to manage the genetic health of captive populations in zoos and aquariums.

Prerequisite(s): NCLC 513 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 1

NCLC 515 - Information Technology for Zoos and Aquariums
NCLC 520 - Conservation Education

Credits: 3 (NR)
Examines opportunities and best practices for leading and managing zoos and aquariums in the information age. Includes connecting zoo strategy and technology strategy; developing IT governance; and utilizing technology to further animal care, enhance operations, connect to patrons and increase revenues. Specific applications include zoological information systems, back office enterprise systems, GIS, eCommerce, and social media.

Prerequisite(s): Graduate or graduate non-degree standing.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

NCLC 522 - Developing an Institutional In Situ Conservation Strategy

Credits: 3 (NR)
Educates students about the process and disciplines necessary to facilitate the professional development of an institutional in situ conservation strategy. Teaches students key components of a successful institutional conservation strategy. Presents model for strategy development that can be used as a guide to develop institutionally specific strategies.

Prerequisite(s): Admission to MAIS ZAL program or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 1

NCLC 523 - Managing Animal Enrichment and Training Programs

Credits: 3 (NR)
Provides students with skills to develop and/or enhance their zoo or aquarium’s enrichment and training programs. Specifically, the goal of the course is to provide the leadership skills and structural framework needed to create and maintain successful enrichment and training programs.

Prerequisite(s): Admission to MAIS ZAL program or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 1
Grading: Graduate Special
NCLC 531 - Principles of Elephant Management

Credits: 3 (NR)
Train students to be competent elephant managers through understanding and application of behavioral science, reproductive physiology, population genetics, and conflict resolution.

Prerequisite(s): Admission to MAIS ZAL concentration or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 1

NCLC 565 - Independent Study in Zoo and Aquarium Leadership

Credits: 1-3 (RD)
Study of a topic not otherwise available to the student. May involve any combination of reading assignments, tutorials, lectures, papers, presentations, or field/laboratory study. Requires course contract sign by instructor and NCC dean.

Notes: May be repeated for a maximum of 6 credits when topic is different.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0

NCLC 595 - Experiential Learning

Credits: 1-3 (RT)

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0

NCLC 625 - Online Library Research for the Zoo and Aquarium Professional

Credits: 3 (NR)
Examines methods and resources used to conduct effective research online. Topics include searching library research databases, locating full text articles and books, citation management, and the ethical use of information. Students develop their understanding of the expectations of the scientific method and ethical conduct among zoo and aquarium professionals through the discussion of relevant case studies.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

Nursing (NURS)

Offered by the Health and Human Services
**NURS 305 - Application of Basic Nursing Techniques**

Credits: 1 (NR)
To be taken fall semester of accelerated second degree program. Introduces basic nursing technologies, and provides opportunities to apply these skills in simulated technology lab.

**Prerequisite(s):** Acceptance into accelerated second degree pathway.

**Hours of Lecture or Seminar per week:** 1-3  
**Hours of Lab or Studio per week:** 2

---

**NURS 309 - Introduction to Basic Nursing Care**

Credits: 3 (NR)
Enrollment restricted to second-degree students only. Introduces basic fundamentals of nursing care across the life span. Emphasis on nursing process, critical thinking, and foundational technologies and skills required to practice in the health care setting.

**Prerequisite(s):** Acceptance into accelerated nursing pathway.

**Corequisite(s):** NURS 310

**Notes:** Enrollment restricted to second-degree students only.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**NURS 310 - Application of Basic Nursing Care**

Credits: 3 (NR)
Application of basic nursing care in acute care settings utilizing the nursing process.

**Prerequisite(s):** Acceptance into accelerated second degree program.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 9

---

**NURS 312 - Basic Nursing Care of Adults**

Credits: 4 (NR)
Provides the student the opportunity to practice health assessment and fundamental nursing skills with adult medical/surgical clients, including those who are culturally diverse, vulnerable, and experiencing physiological, psychological, and social health problems.
NURS 319 - Pathophysiological Basis for Nursing Care of Individuals and Small Groups

Credits: 4 (NR)
Focuses on pathophysiological, psychological, sociocultural, and risk-reduction factors related to nursing care for clients with psychiatric conditions, as well as for child-bearing women, infants, children, and adolescents with acute health care needs.

Prerequisite(s): Acceptance into accelerated nursing pathway.

Hours of Lecture or Seminar per week: 4
Hours of Lab or Studio per week: 0

NURS 330 - Nursing Fundamentals

Credits: 3 (NR)
Introduces nursing process and communication skills as the foundation for beginning health assessment and fundamental nursing care for culturally diverse individuals throughout the life span.

Prerequisite(s): Acceptance into traditional nursing pathway.
Corequisite(s): NURS 331.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

NURS 334 - Nursing as a Health Profession and Discipline

Credits: 3 (NR)
Introduces nursing as a dynamic and caring health profession, the impact of epidemiology, health promotion, and disease prevention on health status of culturally diverse and vulnerable individuals, families, small groups, and communities throughout life span. Incorporates nursing and critical thinking processes as they apply to the art and science of nursing. Historical perspectives on ethical, legal, political, and social issues are included.

Prerequisite(s): Acceptance into RN or accelerated nursing pathway.
Corequisite(s): NURS 309 and 310 for second-degree students only.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring
NURS 336 - Concepts in Professional Nursing as a Discipline

Credits: 3 (NR)
Provides an analysis of the profession and explores nursing philosophies and theories. Explores legal, ethical, political, and technological issues in health care at various nursing levels. Addresses critical thinking and its application to the collaborative nursing process. Utilizes the American Psychological Association formatting style for professional writing within the nursing profession.

Notes: Must be admitted to the RN-to-BSN program.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

NURS 337 - Application of Nursing Fundamental Technologies

Credits: 1 (NR)
Opportunity to practice health assessment and fundamental nursing technologies while using communication skills with culturally diverse and vulnerable populations in a variety of settings.

Prerequisite(s): Junior standing.

Corequisite(s): NURS 330 and 331

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 2

NURS 343 - Pharmacology

Credits: 3 (NR)
Covers principles of pharmacokinetics, pharmadynamics of selected drug classifications, and nursing responsibilities related to drug administration to individuals throughout life span.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

NURS 344 - Intermediate Nursing Technologies

Credits: 1 (NR)
Laboratory course to assist students in acquiring therapeutic nursing interventions. Technologies presented are asepsis and wound care, administration of medications including dosage calculations, and management of intravenous therapy.

Prerequisite(s): NURS 330, 331, 332, 337, 347, 357, 425.

Corequisite(s): NURS 341.
NURS 347 - Adult Pathophysiology and Nursing Care

Credits: 2 (NR)
Introduces changing health needs of culturally diverse and vulnerable populations. Focuses on nursing care; and pathophysiological, psychological, sociocultural, and risk reduction implications of frequently experienced health problems in the adult population.

Prerequisite(s): Acceptance into junior standing.

NURS 348 - Maternal-Newborn Physiology, Pathophysiology, and Nursing Care

Credits: 2 (NR)
Introduces normal and abnormal processes with maternal-infant clients including cultural diversity and vulnerable populations. Focuses on normal physiological, pathophysiological, psychological, sociocultural, risk reduction, and nursing care of these clients.

Prerequisite(s): Acceptance into junior standing.

NURS 349 - Pediatric Pathophysiology and Nursing Care

Credits: 2 (NR)
Focuses on changing health needs of culturally diverse and vulnerable populations. Includes nursing care, pathophysiological, psychological, sociocultural, and risk-reduction implications of frequently experienced health problems in pediatric population.

Prerequisite(s): Acceptance into junior standing.

NURS 350 - Application of Nursing Care for Individuals and Small Groups

Credits: 5 (NR)
Includes five weeks of clinical experience in each specialty area, with focus on obstetric and family nursing, pediatric, and psychiatric mental health nursing. Students may also follow selected clients in clinics or home situations. Clinical consists of two
full days per week in acute-care agencies.

Prerequisite(s): NURS 334, 305, 309, 310, 319, and 425

Corequisite(s): NURS 351, 419, and 353.

Notes: Open to accelerated second degree students

Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 15

NURS 351 - Application of Intermediate Nursing Technologies

Credits: 1 (NR)  
Introduces intermediate nursing technologies and provides opportunities to apply these skills in simulated technology lab.

Prerequisite(s): NURS 309, 310, 319, 334, 425

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 2

NURS 358 - Health Promotion and Disease Prevention in Maternal/Infant Nursing

Credits: 2 (NR)  
Provides the student an opportunity to perform nursing care to the maternal/infant client, including those who are culturally diverse and vulnerable, and experiencing physiological, psychological, and social health problems in a variety of settings.

Prerequisite(s): NURS 348

Corequisite(s): NURS 348

Notes: Enrollment is controlled.

Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 6

NURS 359 - Health Promotion and Disease Prevention in Pediatric Nursing

Credits: 2 (NR)  
Provides the student an opportunity to perform nursing care to the pediatric client, including those who are culturally diverse and vulnerable, and experiencing physiological, psychological, and social health problems in a variety of settings.

Prerequisite(s): NURS 349

Corequisite(s): NURS 349

Notes: Enrollment is controlled.
NURS 388 - Problem-Based Clinical Inquiry

Credits: 3 (NR)
Focuses on analyzing clinical problems and attempts to resolve issues using critical thinking. Students examine the data in the cases, draw inferences, make deductions, identify assumptions, generate interpretations, evaluate weakness and strengths of arguments, and document their findings.

Prerequisite(s): Completion of NURS 425, 330, 331, 332, 337, and one junior-level clinical course (NURS 357, 358, or 359)

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 0

NURS 410 - Nursing Care of Clients with Pathological Conditions

Credits: 3 (NR)
Encompasses complex health problems of culturally diverse and vulnerable populations throughout the life span. Focuses on nursing care needs and pathophysiological, psychological, and sociocultural implications of complicated health problems.

Prerequisite(s): Completion of all junior year nursing courses

Corequisite(s): Completion of computer NCLEX review required to fulfill course requirements

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

NURS 419 - Pathophysiological Basis for Nursing Care of Individuals and Small Groups II

Credits: 3 (NR)
Enrollment restricted to second degree students only. Focuses on pathophysiological, psychological, sociocultural, and risk reduction factors related to nursing care of child-bearing women, infants, children, and adolescents experiencing acute health care problems.

Prerequisite(s): NURS 305, 309, 310, 319, 334, 425.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

NURS 425 - Comprehensive Health Assessment
Credits: 3 (NR)
Open only to RNs and LPNs. Introduces systematic health assessment across the life span, and expands that knowledge base to include knowledge and skills necessary to perform comprehensive health assessments with culturally diverse and vulnerable populations.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 2
When Offered: Fall, Spring

NURS 427 - Advanced Technologies for the Accelerated Pathway

Credits: 1 (NR)
Advanced technology course developing knowledge base related to acquisition of advanced skills in nursing practice. Refinement of assessment skills associated with selected advanced technologies integrated into this laboratory course.

Prerequisite(s): NURS 305, 309, 319, 334, 350, 351, 419, 425, 436, 440, 453.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 2

NURS 428 - Community Health Clinical for the Accelerated Pathway

Credits: 2 (NR)
Clinical experience with a focus on collaborative nursing care with individuals, families, and large groups in the community. Emphasis on health promotion and disease prevention for well populations, and community-based care for individuals and families with acute and chronic illness.

Prerequisite(s): NURS 436 and 440.

Hours of Lecture or Seminar per week: 1-9
Hours of Lab or Studio per week: 6

NURS 429 - Preceptorship for the Accelerated Pathway

Credits: 3 (NR)
Opportunity to deliver collaborative nursing care to culturally diverse and vulnerable populations.

Prerequisite(s): NURS 309, 310, 320, 343, 419, and 436.

Notes: Concentrated clinical experiences available in selected institutional settings.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 9

NURS 434 - Vulnerable Populations
Credits: 3 (NR)
Focuses on the care of vulnerable and aging populations. Students will examine health disparities, health literacy, and multicultural issues that impact the delivery of health care. Students will analyze health care policies and health care delivery models that offer potential interventions for the identified needs of these populations.

Prerequisite(s): Completion of General Education requirements.

Corequisite(s): Completion of NURS 334 as pre or co-requisite.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring, Summer

NURS 436 - Leadership and Management of Health Care

Credits: 3 (RD)
Introductory course in the leadership and management of health-related organizations. Reviews administrative issues in health-related services with particular emphasis on developing organizational strategies for effective interfacing of medical, nursing, allied health, and administrative staff.

Prerequisite(s): Completion of all junior year nursing courses

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

NURS 440 - Community Health and Epidemiology

Credits: 3 (RD)
Addresses population-focused health care. Emphasis is on primary, secondary, and tertiary prevention of health problems. Concepts of community, public health, and health policy affecting culturally diverse and vulnerable populations are examined.

Prerequisite(s): Senior standing.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

NURS 451 - Advanced Clinical Preceptorship

Credits: 5 (NR)
Opportunity to provide complex, collaborative nursing care to culturally diverse and vulnerable populations.

Notes: Concentrated clinicals available in selected institutional settings.

Hours of Lecture or Seminar per week: 1-6
NURS 453 - Research in Nursing

Credits: 3 (RD)
Introductory research course designed to present basic concepts and methods of research. The research process is examined as a foundation for scholarship. Emphasis on critique and use of current nursing and research in clinical practice.

Prerequisite(s): STAT 250 or equivalent; acceptance into one of BSN nursing pathway.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

NURS 455 - Advanced Technologies in Nursing

Credits: 1 (NR)
Opportunity to acquire advanced skills in nursing practice. Refinement of assessment skills associated with selected advanced technologies integrated into this laboratory course.

Corequisite(s): NURS 451.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 4

NURS 457 - Introduction to Nursing Informatics

Credits: 3 (NR)
This introductory course focuses on the use of computer technology in nursing and healthcare. The student evaluates software applications and assesses the merit of health-related information on the Internet. Students will engage in projects aimed at solving patient care problems in a variety of technologically-enhanced health care settings.

Corequisite(s): Senior year

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring, Summer

NURS 465 - Examination and Integration of Professional and Health Care Issues

Credits: 3 (NR)
Provides students with opportunities to examine issues in health care through reflection on the natural and behavioral sciences, humanities and other prerequisite coursework. Selected topics are examined through reading, writing and discussion. Formal and informal writing on issues is expected. Students receive written self-evaluation as well as formal review by peers and faculty.
members involved in teaching the course.

Fulfills general education requirement in synthesis.

Equivalent to HAP 465 (2011-2012 Catalog); HHS 465 (2010-2011 Catalog).

**Prerequisite(s):** Required General Education courses (including ENGL 302/ENGH 302).

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall, Spring, Summer

---

**NURS 466 - Community Health Nursing**

Credits: 2 (NR)  
This course addresses population-focused health care. Concepts of public health, epidemiology, environmental health, extended roles in nursing and health policy affecting culturally diverse and vulnerable populations are examined.

**Prerequisite(s):** Completion of all junior year nursing courses

**Hours of Lecture or Seminar per week:** 2  
**Hours of Lab or Studio per week:** 0

---

**NURS 467 - Clinical in Community Health Nursing**

Credits: 2 (NR)  
Clinical experience with a focus on collaborative nursing care with individuals, families, and large groups in the community. Emphasis is on health promotion and disease prevention for well populations and community-based care for individuals and families with acute chronic diseases.

**Prerequisite(s):** NURS 410, 436, 466  
**Corequisite(s):** NURS 442, 466

**Hours of Lecture or Seminar per week:** 1-3  
**Hours of Lab or Studio per week:** 6

---

**NURS 468 - Psychiatric and Mental Health Nursing**

Credits: 2 (NR)  
Focuses on the nursing care, pathophysiological and psychological, social-cultural, and risk reduction implications of health problems in the area of mental health and psychiatric nursing.

**Prerequisite(s):** Completion of all junior year nursing courses

**Notes:** Open to traditional and LPN students only.
NURS 469 - Clinical in Psychiatric and Mental Health Nursing

Credits: 2 (NR)
Clinical experience with a focus on collaborative nursing care with individuals, families, and large groups in the community. Emphasis is on health promotion and disease prevention for well populations and community-based care for individuals and families with acute chronic diseases.

Prerequisite(s): NURS 410, 436
Corequisite(s): NURS 442, 468

Notes: Open to traditional and LPN students only.

Hours of Lecture or Seminar per week: 1-12
Hours of Lab or Studio per week: 6

NURS 488 - Inquiry-Based Clinical Seminar

Credits: 2 (NR)
Students focus on a selected client they have provided care for during their NURS 451 clinical preceptorship. Students examine the data in the case, draw inferences, make deductions, identify assumptions, and generate interpretations regarding the client's problems. The class will participate as a group in the inquiry process to identify strengths and weaknesses of the arguments presented.

Prerequisite(s): Completion of junior-level nursing courses, NURS 410 and NURS 436

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 0

NURS 491 - Critical Thinking and Analysis of Test Taking Strategies

Credits: 3 (NR)
Increases test-taking abilities and improves critical-thinking skills related to nursing situations. Also guides the student to analyze and organize content to assist in decision making about nursing interventions. With faculty supervision, students work independently based on their learning needs.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 0

NURS 492 - Death, Dying, and Decision Making
Interdisciplinary examination and analysis of clinical care of dying and psychosocial issues related to death and dying. Special emphasis on applying ethical principles in resolution of complex problems for individuals with life-threatening illnesses and their families as caregivers or decision makers. Decision-maker models provide basis for clinical case discussions. Questions of futility examined with associated care issues. Current professional and lay literature discussed in context of socially changing norms and mores. Explores hospice and alternative palliative care models, and reviews policies, laws, and regulations that affect caregivers and health service providers. Includes advance directives, do-not-resuscitate orders, and assisted suicide. Presents bereavement as part of death, dying, and grieving process.

Notes: Lecture-discussion.

NURS 495 - Directed Reading in Nursing

Credits: 1-2 (RT)
Examines literature on specialized topic in nursing practice, education, or scholarship. Readings conducted in consultation with faculty.

Prerequisite(s): Senior status or permission of school.

Notes: May be repeated for a maximum of 4 credits.

NURS 496 - Violence in Today's Society

Credits: 3 (NR)
Examines magnitude of problem of violence globally and more specifically within the United States. Discussion and reflective activities engage students in the learning process.

Equivalent to GCH 496

NURS 499 - Independent Study in Nursing

Credits: 1-3 (RT)
Provides individual study of a particular problem area in nursing research, theory development, or education under the direction of faculty. Clinical practice may be arranged.

Prerequisite(s): Permission of instructor and Assistant Dean for the Undergraduate Program.

Notes: May be repeated for maximum 6 credits.
NURS 505 - Case Management

Credits: 3 (NR)
Open to seniors. Survey course on state of case management programs and practice for health and human service professionals. Special emphasis on comparing the nature, process, and outcomes for baccalaureate and graduate students guided by the objectives.

Prerequisite(s): Bachelor's degree, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

NURS 508 - Psychopharmacology

Credits: 3 (NR)
Surveys therapeutic effects and side effect profiles of psychopharmacological drugs including psychotropic and recreational drugs. Emphasizes understanding mechanisms of actions, drug interactions, and subject variables influencing drug effects.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

NURS 509 - Introduction to Emergency Nursing

Credits: 3 (NR)
Introduces emergency-care nursing, focusing on relevant pathophysiological disease processes, diagnostics, medical therapeutics and relevant technology as applied to emergency nursing. Focuses on care of multicultural clients across the life span, as well as the patient-family unit of care. Addresses collaboration and triage, as well as legal, ethical, and psychosocial issues. Course based on core curriculum of the Emergency Nursing Association (ENA)

Prerequisite(s): Admission to graduate program

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

NURS 513 - Advanced Pharmacology in Nursing

Credits: 3 (NR)
Does not meet requirements for nurse practitioner majors, but may be taken as an elective. Provides knowledge of physiologic responses and pharmacokinetic principles of pharmacologic agents that will undergird the student's learning of advanced pharmacologic concepts. Topics include advanced pharmacokinetic principles, pharmacotherapeutics of single and multiple drug
regimens, client education needs, special population needs, and legal requirements for prescriptive authority.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

### NURS 514 - Advanced Health Assessment Methods

**Credits:** 1 (NR)  
Expands on undergraduate skills in systematic health assessment across the life span. Teaches application of advanced health assessment skills in specialty advanced nursing practice setting. Integration of skills and techniques in collecting health assessment data towards appropriate decision making, clinical assessments, and therapeutic interventions in select population emphasized.

**Prerequisite(s):** Undergraduate-level health assessment course for degree credit or approved CEU course.

**Hours of Lecture or Seminar per week:** 1  
**Hours of Lab or Studio per week:** 1

### NURS 530 - Nurses as Writers

**Credits:** 3 (NR)  
Focuses on theories and practices related to writing in nursing. Researching, composing, revising, and editing practiced in a variety of writing styles.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

### NURS 546 - Leadership Strategies in Health Policy

**Credits:** 3 (NR)  
Examines the leadership process from a policy and organizational perspective to expand students' ability to impact the health policy-making process.

Equivalent to GCH 546

**Prerequisite(s):** Graduate standing or permission of instructor

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

### NURS 550 - Pathophysiologic Bases for Major Health Deviations of Individuals

**Credits:** 3 (NR)  
Examines health deviations occurring in people in the United States that require long-term or terminal health care interventions.
Deviations are presented within a developmental framework as they influence physiologic integrity at the cellular level. Focus is on man as a whole, open system. Complex health programs from the perspective of maintaining homeodynamics are examined.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**NURS 556 - Principles of Assessment and Evaluation in Nursing Education**

Credits: 3 (NR)  
Presents techniques of assessment, measurement, and evaluation of nursing knowledge and skills in classroom and clinical settings. Provides opportunities for the informal assessment of learning; formal construction, analysis, and evaluation of tests; and evaluation of standardized tests. Examines the current research and the legal and ethical principles related to assessment and evaluation in nursing education.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**NURS 557 - Introduction to Clinical Genetics in Health Care**

Credits: 3 (NR)  
Focuses on human clinical genetics including basic Mendel genetics; cytogenetics; molecular genetics; genetic disease, diagnosis, testing, and screening. Discusses central principles and impact of Human Genome Project on health care practice in terms of ethical and legal issues, including genetic testing and counseling.

**Prerequisite(s):** Graduate standing.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**NURS 570 - Cultural Dimension of Aging**

Credits: 3 (NR)  
Examines the impact of cultural definitions of aging, research methodologies, and findings of crosscultural studies. Implications for health care and nursing are explored.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**NURS 571 - HIV/AIDS: Concepts, Principles, and Interventions**

Credits: 3 (NR)  
Provides overview of all aspects of HIV disease to include retrospective and current concepts and analyses of the epidemic, global, and societal impact, and cutting-edge research. Examines development of therapeutic tools and skills to educate, reduce risks, control infection, and affect care and healing of client, family, and community; and issues of increasing dilemma for health
NURS 580 - Operating Room - RN First Assistant

Credits: 3 (NR)
Prepares the experienced operating room nurse to become a registered nurse first assistant. Modeled after the official AORN RNFA core curriculum. Student receives hands-on practice in knot tying and suturing, as well as experience with microscope and endoscopy labs.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

NURS 585 - Entrepreneurship in Health Care

Credits: 3 (NR)
Overview of models of entrepreneurship in health care. Provides opportunities for collaborative problem solving to support business development, entrepreneurial behavior, and leadership. Explores innovative approaches to and alternatives for nursing practice and health care delivery.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

NURS 587 - Parish Nursing II

Credits: 3 (NR)
Students must be registered nurses. Focuses on skill development in spiritual assessment, ethical decision making, and effective use of prayer. Emphasizes health promotion, working with volunteers, and utilizing community resources. Self-care and professional identity for the parish nurse are addressed. Students continue the processes of case consultation and spiritual formation.

Prerequisite(s): NURS 586.

Notes: Students must be registered nurses.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

NURS 594 - Special Topics in Nursing
Credits: 1-3 (NR)
Presents selected topics analyzing specialized areas in nursing.

Equivalent to GCH 594/HAP 594

Notes: Content varies. Lecture, seminar, laboratory, workshop.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

NURS 605 - Clinical Nurse Educator Academy

Credits: 3 (NR)
Integrates knowledge and skills from clinical practice with new knowledge and skills needed as a clinical nurse educator. Narratives are used to teach essential skills for clinical nurse educators, such as assessment of learning needs, writing of objectives, teaching strategies, clinical simulation, and performance evaluation.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

NURS 611 - Anthropology of Health

Credits: 3 (NR)
Explores cross-cultural issues of health and illness from medical anthropology theory. Discusses cultural dimensions of developmental cycle and health care systems.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

NURS 613 - Advanced Health Assessment

Credits: 2 (NR)
The course expands on undergraduate skills in systematic health assessment across the life span. The student will learn advanced health assessment skills in specialty advanced nursing practice. Integration of skills and techniques in collecting health assessment data towards appropriate decision-making, clinical assessments and therapeutic interventions in select populations is emphasized in this lab and didactic course.

Prerequisite(s): Undergraduate-level Health Assessment course for degree credit.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 0

NURS 618 - Pathophysiology: Health and Illness
Credits: 3 (NR)
Focuses on the biological and pathophysiological foundations of health problems. Biological changes in selected health problems and health risks, will be used as a framework for critically appraising assessment data and to advance nursing strategies.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**NURS 620 - Advanced Psychiatric/Mental Health Nursing**

Credits: 3 (NR)
Build on basic psychiatric and mental health nursing knowledge and skills in assessment, diagnosis, therapeutic intervention, and management. Focuses on enhancing fundamental roles of psychiatric or mental health advanced practice nurse, including practice, teaching, consultation, supervision, and research in relation to clients and their families.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**NURS 623 - Clinical Concepts in Community-Oriented Primary Care**

Credits: 3 (NR)
Theoretical and clinical application of community-oriented primary care concepts with focus on health promotion and disease prevention. Examines scope of practice of advanced practice nurse practitioner. Students work with interdisciplinary groups to improve health indictors for populations.

Prerequisite(s): NURS 665.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 3

**NURS 630 - Acute Care Nursing for Advanced Practice**

Credits: 3 (NR)
Focuses on acute-care nursing for advanced practice with individuals and their families diagnosed with potentially life-threatening alterations in health. Emphasizes risk factors, physical symptoms, evidence-based interventions, functional capacity, and patient and family dynamics; and psychosocial, economic, and cultural factors and their impact on care.

Prerequisite(s): Admission to the graduate program or permission of the instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**NURS 632 - Pathogenesis of Mental Disorders**
NURS 633 - Individual Psychotherapy

Credits: 3 (NR)
Explores major approaches to individual psychotherapy such as psychodynamic, humanistic, interpersonal, behavioral, cognitive, dialectical behavioral, brief, crisis, and multicultural therapies as they relate to advanced nursing practice in mental health. Applications of individual psychotherapies across the lifespan and among diverse populations are critically examined.

Prerequisite(s): Admission to the Doctor of Nursing Practice program or with permission of instructor; NURS 632.

Notes: Required course in Psychiatric Mental Health Nurse Practitioner (PMHNP) or Clinical Nurse Specialist (PMHCNS) concentrations.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring

NURS 634 - Group, Family and Couple Psychotherapy

Credits: 2 (NR)
Explore the major psychotherapeutic approaches for groups, families, and couples. Emphasis is placed on the application of theories and models of group, family, and couple psychotherapy across the lifespan and among diverse populations.

Prerequisite(s): Admission to the Doctor of Nursing Practice program or with permission of instructor; NURS 632.

Notes: Required course in Psychiatric Mental Health Nurse Practitioner (PMHNP) or Clinical Nurse Specialist (PMHCNS) concentrations.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 0
When Offered: Spring

NURS 643 - Community-Oriented Primary Care
Credits: 3 (NR)
Theoretical and clinical application of community-oriented primary care concepts with a focus on health promotion and disease prevention.

Prerequisite(s): Admission to MSN or DNP Program or permission of instructor.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 3
When Offered: Fall, Summer, Spring.

NURS 645 - Gerontological Nursing 1

Credits: 3 (NR)
Provides content related to nursing care of older adults with emphasis on advanced practice and issues relevant to improved health care of the elderly. Focuses on biological, psychological, and sociocultural elements that influence the aging process, and onset of age-related illnesses.

Prerequisite(s): NURS 680 and 688.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

NURS 646 - Gerontological Nursing 2

Credits: 3 (NR)
Builds on content in NURS 645, and focuses on health care deviations and nursing interventions in advanced gerontological nursing practice. Age-related illnesses and common disorders are discussed in the context of health behaviors, healthy adaptation, cultural sensitivity, developing appropriate coping strategies, and family, community and nursing supports.

Prerequisite(s): NURS 645.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

NURS 648 - Aging and Health

Credits: 3 (NR)
Provides an overview of normal aging and explores factors that affect health and well being in older adults; demonstrates strategies for maintaining health and managing chronic illness in older adults; examines common misconceptions about aging and healthcare issues; and explores the process of normal aging and the presentation of common health conditions in older adults.

Equivalent to HHS 648

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall
**NURS 650 - Healthcare and Law**

Credits: 3 (NR)
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**NURS 654 - Nursing Administration Financial Management**

Credits: 3 (NR)
Investigates managerial technologies related to financial planning and control functions of mid-level nurse administrators. Content develops knowledge and skills necessary for effective participation in financial management as related to business plan development, program budget planning, and control.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring

**NURS 660 - Seminar in the Ethics of Health Care**

Credits: 3 (NR)
Examines moral dilemmas in the health care profession, with special emphasis on patients' rights, professionals' obligations to other professionals, and issues of social justice in health care. Methods of moral deliberation based on ethical knowledge and justification are applied to ethical dilemmas in health care.

Equivalent to PHIL 510

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**NURS 665 - Theoretical and Ethical Foundations Related to Nursing**

Credits: 3 (NR)
Selected nursing and related discipline theories which impact nursing practice are analyzed and evaluated with special attention given to ethical aspects of practice and ethical decision-making frameworks. Moral dilemmas in the health care profession, with emphasis on patients’ rights, professionals’ obligations to other professionals, issues of social justice in health care, and methods of moral deliberation are examined.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**NURS 680 - Theoretical Foundations Related to Nursing**
Credits: 2 (NR)
Examination and evaluation of assumptions, concepts, and propositions inherent in selected nursing and related discipline
theories.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 0

**NURS 685 - Advanced Nursing Research Methods**

Credits: 3 (NR)
Examines principles and methods of research in problem identification, theoretical framework, design, data collection, and
analysis. Students develop a nursing research proposal.

Prerequisite(s): Admission to graduate nursing program and a bivariate statistics course and NURS 680.

Corequisite(s):

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**NURS 686 - Projects in Nursing Research**

Credits: 2 (NR)
Applies knowledge gained in NURS 790 to implement research proposal designed in NURS 790.

Prerequisite(s): NURS 685.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 0

**NURS 688 - Organization of Nursing and Health Care Delivery Systems**

Credits: 3 (NR)
Provides foundational overview of U.S. nursing and health care delivery systems. Surveys key concepts, frameworks, processes,
and structures related to health care delivery organizations.

Prerequisite(s):

Notes: Lecture, discussion.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**NURS 690 - Independent Study in Nursing**
Credits: 1-3 (RD)
Studies in-depth a selected area of nursing theory, research, or practice under direction of faculty.

**Prerequisite(s):** Admission to graduate nursing program, and permission of associate dean for academic programs.

**Notes:** May be repeated; maximum 6 total credits.

**Hours of Lecture or Seminar per week:** 1-3  
**Hours of Lab or Studio per week:** 0  
**Grading:** Graduate Special

---

**NURS 704 - Nursing Administrative Leadership Academy**

Credits: 3 (NR)
Uses a leadership competency framework to integrate knowledge, skills, values, and best practices of innovative nursing leadership. Lectures, interactive collaborative discussion, written projects, and leadership self-assessment identify and teach the proficiencies specific to the administrative executive role.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**NURS 713 - Decision Making and Pharmacologic Management in Practice**

Credits: 2 (NR)
Analyzes clinical cases using student participation in decision-making formulation. Correlates pathophysiology with symptom manifestations across the lifespan, from prenatal to old age, including death. Evaluates family, medical and social history, physical findings, laboratory data and radiographic studies as they contribute to the decision making process. Examine the theoretical basis for selecting pharmacological and non-pharmacological therapies is explored.

**Prerequisite(s):** Admission to MSN or DNP Program Nurse Practitioner Concentration.

**Corequisite(s):** NURS 769; NURS 761.

**Hours of Lecture or Seminar per week:** 2  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall, Summer, Spring.

---

**NURS 714 - Health Assessment in Clinical Practice**

Credits: 2 (NR)
Application of advanced health assessment skills that includes all body systems and clinical decision making with clients across the lifespan. Students will formulate differential diagnoses and explore advanced communication techniques related to motivating and changing health behaviors. Students will apply advanced skills and techniques in a supervised lab setting.

**Prerequisite(s):** Admission to MSN or DNP Program or permission of instructor.

**Hours of Lecture or Seminar per week:** 2
NURS 715 - Nursing Informatics Inquiry

Credits: 3 (NR)
This course introduces theoretical and practice components of nursing and healthcare informatics for the graduate level nurse. Computer systems will be analyzed. The systems life cycle will be explored. Health care data standards, classification schemes, and the electronic health record (EHR) will be introduced. Students will evaluate informatics as it applies to patient safety, outcomes measurement, complex decision-making, consumer use, and legal and ethical issues.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

NURS 719 - Advanced Health Assessment

Credits: 2 (NR)
Application of advanced health assessment skills and clinical decision making with adults of all ages in primary care settings. Students formulate differential diagnosis related to body systems and presenting signs and symptoms. Students explore communication techniques related to motivating and changing health behaviors. The performance of skills and techniques needed to collect data for comprehensive health assessment is emphasized in this supervised practicum by nurse practitioner preceptors.

Notes: Course meets at George Washington University. Students receive a George Mason bill, but tuition is calculated at the George Washington University rate. Contact department for specific meeting dates and information.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 4

NURS 720 - Practicum in Family Primary Care Nursing I

Credits: 4 (NR)
Performance of beginning-level nurse practitioner clinical decision-making skills in assessment and management of families and individuals across the life span, with emphasis on health maintenance and health promotion. Seminar, lab, and clinical practicum.

Prerequisite(s): NURS 719, 723, 745, 747, 756.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 6
Grading: Graduate Special

NURS 721 - Practicum in Assessment and Management of the Developing Family

Credits: 8 (NR)
Theoretical and clinical application of health assessment, health maintenance and promotion, anticipatory guidance, diagnosis,
and management of common primary health care concerns through clinical decision-making skills focused on childrearing and childbearing families. Seminar, lab, clinical practicum.

Prerequisite(s): NURS 720.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 15
Grading: Graduate Special

NURS 722 - Practicum in Family Primary Care Nursing II

Credits: 8 (NR)
Students perform advanced clinical decision making in the role of family nurse practitioner. Family primary care problems throughout the life span are assessed and managed, particularly families with elderly and medically underserved members. Seminar, lab, and clinical practicum.

Prerequisite(s): NURS 720 and 721.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 5
Grading: Graduate Special

NURS 723 - Clinical Decision Making

Credits: 2 (NR)
Course is offered through George Washington University and is charged at GWU tuition rates. Analyzes clinical cases using student participation in decision-making formulation. Correlates pathophysiology with symptom manifestations. Evaluates family, medical, and social history; physical findings; laboratory data; and radiographic studies as they contribute to the decision-making process. The theoretical basis for selecting pharmacological and nonpharmacological therapies is explored. Therapies are justified by examining the evidence to support them.

Corequisite(s): NURS 756 and 747.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 0

NURS 724 - Health Assessment Practicum

Credits: 1 (NR)
Demonstrates the ability to perform advanced health assessment skills that includes all systems across the lifespan. The student will perform advanced techniques and clinical decision making that is necessary for a comprehensive health assessment in this clinical practicum.

Prerequisite(s): Admission to MSN or DNP Program or permission of instructor.

Corequisite(s): NURS 714.
Notes: Five clinical hours are required per week for each credit. Required course in Nurse Practitioner concentration.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 5
When Offered: Fall, Summer, Spring.

**NURS 725 - Hermeneutic Research Methodologies in Health Care**

Credits: 3 (NR)
Uses seminar/discussion for in-depth exploration of interpretive phenomenology, philosophical background for hermeneutics, and hermeneutics as method in context of conducting research in health care. Uses readings from philosophers such as Heidegger, Merleau-Ponty, and Gadamer to situate hermeneutical methodologies in philosophy of science.

Prerequisite(s): Graduate-level qualitative research course

Corequisite(s): Graduate-level qualitative research course

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**NURS 726 - Perspectives in Nursing Education**

Credits: 3 (NR)
Uses seminar approach to provide an overview of nursing education. Provides the foundation for teaching and learning in nursing with emphasis on relevant research.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**NURS 727 - Application of Nursing Education Principles to Curriculum and Program Development**

Credits: 3 (NR)
Uses seminar and discussion forums to analyze and apply theoretical principles and teaching and learning strategies in planning, developing, and evaluating nursing programs. Examines the overall creative, planned, and collaborative process of program development and evaluation.

Prerequisite(s): NURS 726.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**NURS 728 - Practicum and Seminar in Nursing Education I**
Credits: 3 (NR)
Uses seminar/discussion approach and practicum experience to analyze the role and functions of the nurse educator in the academic classroom. Emphasis is on the application of teaching/learning strategies, legal and ethical issues in nursing education, and role development as a nurse educator.

**Prerequisite(s):** NURS 514, 550, 726, and 727; NURS 556 or EDRS 531.

**Hours of Lecture or Seminar per week:** 1  
**Hours of Lab or Studio per week:** 6

**NURS 729 - Practicum and Seminar in Nursing Education II**

Credits: 3 (NR)
Uses seminar/discussion approach and practicum experience to analyze the role and functions of the nurse educator in the clinical setting. Application of research-based teaching and evaluation strategies in the clinical setting are emphasized.

**Prerequisite(s):** NURS 514, 550, 726, and 727; NURS 556 or EDRS 531.

**Hours of Lecture or Seminar per week:** 1  
**Hours of Lab or Studio per week:** 6

**NURS 730 - Leadership Strategies for the Clinical Nurse Leader**

Credits: 2 (NR)
Explores aspects of horizontal and vertical leadership central to clinical nurse leader (CNL) role. Emphasizes quality management and improvement, communication processes, evidenced-based practice initiatives in microsystem, and strategies for efficient use of resources while maintaining safe and effective patient care.

**Prerequisite(s):** NURS 597 and 685

**Corequisite(s):** NURS 597 and 685

**Hours of Lecture or Seminar per week:** 2  
**Hours of Lab or Studio per week:** 0

**NURS 733 - Introduction to Forensic Science**

Credits: 3 (NR)
Examines the introductory concepts of forensic science including the various professional roles of forensic scientists and practitioners. This course provides a broad overview of the forensic science profession. Different types of violence, as well as prevention and reduction strategies, are discussed. The forensic professional's role in policy and legal processes are explored. Forensic research is introduced. Professional certification options are explored.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0
NURS 734 - Role of the Sexual Assault Nurse Examiner and Interpersonal Violence

Credits: 3 (NR)
Focuses on the incidence and consequences of interpersonal violence across the lifespan. Identifies the role of sexual assault nurse examiner (SANE) as a member of the Sexual Assault Response Team (SART). Examines forensic techniques used to collect evidence. The role of the SANE in the judicial process is explored.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

NURS 735 - Crime Lab and Crime Scene Investigation

Credits: 3 (NR)
Examines the components of the crime lab and the crime scene analysis process. Explores the role of the forensic scientist in crime scene investigation. This course covers the initial crime scene response and initial assessment measures needed to properly collect and handle evidence. Documentation and preservation efforts are reviewed for various types of evidence collected.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

NURS 736 - Psychological and Legal Aspects of Forensic Science

Credits: 3 (NR)
Evaluates the psychological and legal aspects of forensic science. Reviews victimology and the role of the forensic professional when dealing with victimized individuals. This course reviews various types of violence and identifies the assessment criteria needed to pursue prosecution. Examines the legal process and the role of the forensic professional in providing testimony in a court of law.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

NURS 737 - Investigation of Injury and Death

Credits: 3 (NR)
Explores the role of the forensic scientist in death investigation. Examines death, manners of death, and causes of death, along with the death certification process. The role of the medical office professional and autopsy procedures will be reviewed. DNA evidence and the CODIS system will be analyzed.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

NURS 738 - Family Primary Care I
Credits: 2 (NR)
Theoretical application of health assessment, health management/promotion, anticipatory guidance, diagnosis and management of common primary care health care concerns through clinical decision making skills for families with a focus on adults. Lecture, student presentations and seminar.

Prerequisite(s): Students must be admitted to the Family Nurse Practitioner Program.

Corequisite(s): NURS 742.

Notes: Required course in Family Nurse Practitioner concentration.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 0
When Offered: Summer

NURS 739 - Family Primary Care II

Credits: 4 (NR)
Theoretical application of health assessment, health maintenance/promotion, anticipatory guidance, diagnosis and management of common primary health care concerns through clinical decision making skills focused on childbearing and childbearing families. Seminar, student presentations and lectures.

Prerequisite(s): Students must be admitted to the Family Nurse Practitioner Program; NURS 738.

Corequisite(s): NURS 744

Notes: Required course in Family Nurse Practitioner concentration.

Hours of Lecture or Seminar per week: 4
Hours of Lab or Studio per week: 0
When Offered: Fall

NURS 740 - Clinical Nurse Specialist Internship

Credits: 3 (RT)
A continuation of clinical application of theory from NURS 775 to a selected clinical specialty with attention to the health illness continuum of individuals, families, and community.

Notes: This course may be taken twice.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 9

NURS 741 - Family Primary Care III

Credits: 3 (NR)
Theoretical application of assessment, diagnosis and management of primary health care problems which will enable the nurse
practitioner student to assume increased responsibility in the delivery of primary care to families and individuals across the life span. Special emphasis is given to the primary care needs of families with elderly and medically underserved members. Seminar, student presentations and lectures.

Prerequisite(s): Students must be admitted to the Family Nurse Practitioner Program; NURS 739.

Corequisite(s): NURS 749

Notes: Required course in Family Nurse Practitioner concentration.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Summer

NURS 742 - Family Primary Care Practicum I

Credits: 3 (NR)
Demonstrates the ability to function at a beginning level in the role of the nurse practitioner. Performance of advanced skills in assessment and the development of plans for health maintenance and promotion for families with a focus on the adult. Clinical practicum, lab and seminar.

Prerequisite(s): Students must be admitted to the Family Nurse Practitioner Program.

Corequisite(s): NURS 738.

Notes: Five clinical hours are required per week for each credit. Required course in Family Nurse Practitioner concentration.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 1-12
When Offered: Summer

NURS 743 - Clinical Psychopharmacology

Credits: 2 (NR)
Introduce psychotropic medications, including neurochemical basis, mode of action and clinical application. Discuss principles of pharmacological medication selection and use based on clinical indicators.

Notes: Required course in Psychiatric Mental Health Nurse Practitioner (PMHP) or Clinical Nurse Specialist (PMHCS) concentrations. Admission to the Doctor of Nursing Practice program or with permission of instructor.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 0
When Offered: Spring

NURS 744 - Family Primary Care Practicum II
Clinical application of health assessment, health maintenance/promotion, anticipatory guidance, diagnosis and management of common primary health care concerns through clinical decision making skills focused on childrearing and childbearing families. Clinical practicum, seminar, lab.

Prerequisite(s): Students must be admitted to the Family Nurse Practitioner Program; NURS 738.

Corequisite(s): NURS 739

Notes: Five clinical hours are required per week for each credit. Required course in Family Nurse Practitioner concentration.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 1-12
When Offered: Fall

NURS 745 - Pharmacology

Credits: 3 (NR)
Describes the pharmacologic principles and pharmacodynamic actions of major classes of drugs. Distinguishes between the major drug classes by the pharmacologic properties of the drugs on the cellular, organ, and whole organism level. Study of indications and contraindications of appropriate therapeutic entities for health deviations is based on a thorough knowledge of drugs including their mechanism of action, possible toxic effects, and their fate in the human body. Evaluation and recognition of drug interactions for the possible impact on each drug's therapeutic behavior, as well as on the body as a whole is emphasized. Chooses and interprets appropriate monitoring mechanisms for drug efficacy and toxicity.

Notes: Course is offered through George Washington University and charged at GWU tuition rates.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

NURS 746 - Practicum in Adult Primary Care Nursing I

Credits: 6 (NR)
Demonstration of the ability to function at a beginning level in the role of the nurse practitioner. Performance of advanced skills in assessment and the development of plans for health maintenance and promotion for adults.

Prerequisite(s): NURS 719, 723, 745, 747, 756

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 12
Grading: Graduate Special

NURS 747 - Pharmacology in Disease and Pathophysiology

Credits: 1 (NR)
Analyze drugs and their interaction with physiologic processes on the cellular level. Discuss the therapeutic actions of drugs in
relationship to pathophysiologic states. Recognize those physiologic and pathophysiologic states that have direct consequences on the actions of drugs.

**Corequisite(s):** NURS 723 and 756.

**Notes:** Course is offered through George Washington University and charged at the George Washington University rate.

**NURS 748 - Practicum in Adult Primary Care Nursing II**

Credits: 8 (NR)
Enables nurse practitioner student to assume increased responsibility in the delivery of primary care to adults. Special emphasis on primary care needs of elderly and medically underserved groups.

**Prerequisite(s):** NURS 746.

**Hours of Lecture or Seminar per week:** 2
**Hours of Lab or Studio per week:** 16
**Grading:** Graduate Special

**NURS 749 - Family Primary Care Practicum III**

Credits: 5 (NR)
This practicum enables the nurse practitioner student to assume increased responsibility in the delivery of primary care to families. Family primary care problems across the life span are assessed and managed, particularly families with elderly and medically underserved members. Practicum, clinical lab and seminar.

**Prerequisite(s):** Students must be admitted to the Family Nurse Practitioner Program; NURS 739.

**Corequisite(s):** NURS 741

**Notes:** Five clinical hours are required per week for each credit.
Required course in Family Nurse Practitioner concentration.

**Hours of Lecture or Seminar per week:** 0
**Hours of Lab or Studio per week:** 5
**When Offered:** Spring

**NURS 752 - Advanced Family Primary Care**

Credits: 8 (NR)
Seminar and clinical practicum that focuses on the integration of the family nurse practitioner role through the application of family theory and concepts in primary care settings. Application of advanced critical thinking and decision making of family care needs and family systems is emphasized.
NURS 753 - Diagnosis and Management of the Developing Family

Credits: 4 (NR)
Didactic and laboratory course focused on primary care needs of families. Integration of advanced health assessment, health maintenance and promotion, anticipatory guidance, and diagnosis and management of common primary care health concerns to advance the knowledge and skills of primary care nurse practitioner needs of family care as provided by family nurse practitioners.

Corequisite(s): NURS 751.

Notes: Taught through George Washington University Distance Learning. For advanced students in the Post Master Advanced Practice Nurse Practitioner Program.

Hours of Lecture or Seminar per week: 8
Hours of Lab or Studio per week: 0

NURS 754 - Advanced Adult Primary Care

Credits: 4 (NR)
Enables the post-master's nurse practitioner student to develop and assume increased responsibility in delivery of primary care to adults. Clinical preceptorship and instructional and informative didactic material in primary care enable students to demonstrate advanced skills in the assessment, clinical diagnostic, and clinical management of common acute and chronic primary care problems. Special emphasis to the development of community-based health promotion and disease prevention strategies with adults and medically underserved populations.

Prerequisite(s): NURS 719, 723, 745, 747, 756

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 9

NURS 756 - Advanced Pathology and Pathophysiology

Credits: 4 (NR)
Analyze health deviations in the physiologic and pathophysiologic aspects of systems functioning across the life span. Students assimilate the process of systematic assessment and management of health deviations foundational for making clinical decisions. Collaborate in interprofessional student groups to develop strategies for health promotion and disease prevention in vulnerable populations.

Corequisite(s): NURS 723 and 747.
Notes: Course is offered through George Washington University and charged at the George Washington University rate.

Hours of Lecture or Seminar per week: 4
Hours of Lab or Studio per week: 0

NURS 757 - Nursing Research and Biostatistics I

Credits: 3 (NR)
Provides a broad framework for understanding and applying commonly used research designs and data analysis techniques in nursing and health care research. Exposed to an overview of qualitative and quantitative research methods integrated with appropriate data analyses techniques. Univariate and bivariate statistical techniques will be used to address research questions or hypotheses as appropriate.

Prerequisite(s): Admission to the graduate nursing program; Undergraduate Statistics Course

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

NURS 758 - Nursing Research and Biostatistics II

Credits: 3 (NR)
Empirically address practice related problems using complex bivariate and multivariate statistical analysis. Using an established data set as a basis for simulation of the research process, student will identify clinical problems in research traditions to provide evidence for nursing practice. Emphasis is on evaluating the quality of research for its strength as evidence for nursing practice.

Prerequisite(s): NURS 757

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

NURS 761 - Pharmacotherapeutics

Credits: 3 (NR)
Describes the pharmacologic principles and pharmacodynamic actions for all broad categories of agents. Distinguishes between the major drug classes by the pharmacologic properties of drugs on the cellular, organ and whole organism level. Study of indications and contraindications of appropriate therapeutic entities for health deviations based on a thorough knowledge of drugs and their fate in the human body.

Prerequisite(s): Admission to MSN or DNP Program or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Summer, Spring.
NURS 762 - Managed Care Concepts for Primary Care Practice

Credits: 1-4 (RD)
Presents managed-care concepts specific to primary care practice through self-paced learning modules, seminars, and selected nondirect care internship experiences in managed care settings.

Prerequisite(s): Admission to the nurse practitioner program.

Hours of Lecture or Seminar per week: 1-4
Hours of Lab or Studio per week: 3-12

NURS 763 - Administrative Theory in Nursing

Credits: 3 (NR)
Uses administrative theory and management principles and processes as related to roles and functions of the nurse in management in health-related agencies.

Prerequisite(s): Admission to graduate nursing program or master's degree. NURS 680 and Management/Organizational Theory

Corequisite(s): NURS 680 and Management/Organizational Theory

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

NURS 765 - Practicum in Nursing Administration I

Credits: 3 (NR)
Applies administrative theory and management principles and processes in a selected health-related agency. Roles and functions of the nurse in management are explored.

Prerequisite(s): Admission to graduate nursing program; NURS 680, 763

Corequisite(s): NURS 763

Notes: Lab arranged.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 8
When Offered: Fall

NURS 766 - Administrative Strategies in Nursing

Credits: 3 (NR)
Explores roles and functions of the nurse in management as the nurse manager develops patterns of nursing care, articulating nursing education, and nursing service.
Prerequisite(s): NURS 763 and 765.

Corequisite(s): NURS 768.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring

NURS 768 - Practicum in Nursing Administration II

Credits: 3 (NR)
Implements and integrates roles and functions of the nurse in management. Emphasizes using appropriate management principles and processes in a selected health-related agency.

Prerequisite(s): NURS 763, 765, 766

Corequisite(s): NURS 766

Notes: Lab arranged.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 8
When Offered: Spring

NURS 769 - Physiology and Pathophysiology in Advanced Practice

Credits: 3 (NR)
Analyze health deviations in the physiologic and pathophysiologic aspects of systems functioning across the life span. Students assimilate the process of systematic assessment and management of health deviations foundational for making clinical decisions.

Prerequisite(s): Admission to MSN or DNP or permission of instructor.

Corequisite(s): NURS 713

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Summer, Spring.

NURS 770 - Adult Primary Care I

Credits: 3 (NR)
Theoretical application of health assessment, health management/promotion, anticipatory guidance, diagnosis and management of common primary care health care concerns through clinical decision making skills focusing on adults. Lecture, student presentations and seminar.

Prerequisite(s): Students must be admitted to the Adult Nurse Practitioner Program.
Corequisite(s): NURS 772.

Notes: Required course in Adult Nurse Practitioner concentration.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

NURS 771 - Adult Primary Care II

Credits: 4 (NR)
Theoretical application of assessment, diagnosis and management of primary health care problems which will enable the nurse practitioner student to assume increased responsibility in the delivery of primary care to adults. Special emphasis is given to the primary care needs of elderly and medically underserved groups. Lectures, student presentations and seminars.

Prerequisite(s): Adult Primary Care I.

Corequisite(s): Adult Primary Care Practicum II.

Notes: Students must be admitted to the Adult Nurse Practitioner Program. Required course in Adult Nurse Practitioner concentration.

Hours of Lecture or Seminar per week: 4
Hours of Lab or Studio per week: 0
When Offered: Fall

NURS 772 - Adult Primary Care Practicum I

Credits: 3 (NR)
Demonstrates ability to function at a beginning level in the role of the nurse practitioner. Performance of advanced skills in assessment and the development of plans for health maintenance and promotion for adults. Clinical practicum, lab and seminar.

Prerequisite(s): Students must be accepted to the Adult Nurse Practitioner program.

Corequisite(s): NURS 770.

Notes: Five clinical hours are required per week for each credit.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 1-12
When Offered: Fall

NURS 773 - Clinical Applications of Theory in Advanced Clinical Nursing

Credits: 3 (NR)
Foundational theory relevant to the emerging roles in advanced clinical nursing, focusing on therapeutic nursing interventions in
a variety of clinical specialties, with attention to health-illness continuum of individuals, families, and communities.

**Prerequisite(s):** Admission to graduate nursing program. NURS 550, 680.

**Corequisite(s):** NURS 550, 680.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**NURS 774 - Adult Primary Care Practicum II**

Credits: 4 (NR)  
Enables the nurse practitioner student to assume increased responsibility in the delivery of primary care to adults. Special emphasis is given to the primary care needs of elderly and medically underserved groups. Practicum, clinical lab and seminar.

**Prerequisite(s):** Students must be admitted to the Adult Nurse Practitioner Program; NURS 770.

**Corequisite(s):** NURS 771.

**Notes:** Five clinical hours are required per week for each credit. Required course in Adult Nurse Practitioner concentration.

**Hours of Lecture or Seminar per week:** 0  
**Hours of Lab or Studio per week:** 4  
**When Offered:** Spring

---

**NURS 775 - Advanced Specialty Practice I**

Credits: 3 (RT)  
Focuses on clinical application of theory from NURS 773 to a selected clinical specialty with attention to the health illness continuum of individuals, families, and communities.

**Prerequisite(s):** NURS 665.

**Corequisite(s):** NURS 768.

**Hours of Lecture or Seminar per week:** 2  
**Hours of Lab or Studio per week:** 7

---

**NURS 776 - Development of Advanced Practice Nursing Role**

Credits: 3 (NR)  
Expansion of selected content included in NURS 773 for the delivery of advanced nursing care in a variety of settings. Emphasizes development and evaluation of the advanced practice nursing role in complex health care systems.

**Prerequisite(s):** NURS 773.
NURS 778 - Advanced Specialty Practice II

Credits: 3 (NR)
Applies concepts of the advanced practice nursing role from NURS 776 to a selected clinical specialty.

Prerequisite(s): NURS 665.
Corequisite(s): NURS 773.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

NURS 780 - Practicum in Gerontological Nursing I

Credits: 3 (NR)
Demonstrates the ability to function at a beginning level in the role of the gerontological nurse practitioner. Performance of advanced skill in geriatric assessment with a special emphasis on the delivery of health promotion and disease prevention services (practicum of at least 100 clinical hours and case analysis conferences).

Prerequisite(s): NURS 719, 723, 745, 747, 756.
Corequisite(s): NURS 746.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 3
Grading: Graduate Special

NURS 781 - Practicum in Gerontological Nursing II

Credits: 3 (RD)
Demonstrates the ability to function at an advanced level in the role of the gerontological nurse practitioner in varied settings, including primary care, long-term care, and sub-acute care (practicum of at least 100 clinical hours and case analysis conferences).

Prerequisite(s): NURS 773 and 775.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 3
Grading: Graduate Special

NURS 782 - Family Psychiatric Nurse Practitioner Practicum I
Credits: 4 (NR)

**Prerequisite(s):** Admission to the Doctor of Nursing Practice program or with permission of instructor; NURS 632, NURS 633, NURS 634, and NURS 743.

**Corequisite(s):** NURS 783.

**Notes:** Five clinical hours per week are required for each credit.

Required course in the Family Psychiatric Mental Health Nurse Practitioner (FPMHNP) concentration. Admission to the Doctor of Nursing Practice program or with permission of instructor.

**Hours of Lecture or Seminar per week:** 0
**Hours of Lab or Studio per week:** 20
**When Offered:** Fall

---

**NURS 783 - Family Psychiatric Nurse Practitioner Seminar I**

Credits: 1 (NR)
Analyzes the professional role of family psychiatric mental health nurse practitioners. Students share assessment, diagnostic, intervention, evaluation, teaching-coaching, cultural competence, and therapeutic relationship development techniques through case studies from their practica. Management of client cases are evaluated and discussed. Students analyze the impact of advocacy actions, including duty to report, on the therapeutic relationship.

**Prerequisite(s):** Admission to the Doctor of Nursing Practice program or with permission of instructor; NURS 632, NURS 633, NURS 634, and NURS 743.

**Corequisite(s):** NURS 782.

**Notes:** Required course in the Family Psychiatric Mental Health Nurse Practitioner (FPMHNP) concentration. Admission to the Doctor of Nursing Practice program or with permission of instructor.

**Hours of Lecture or Seminar per week:** 1
**Hours of Lab or Studio per week:** 0
**When Offered:** Fall.

---

**NURS 784 - Family Psychiatric Nurse Practitioner Practicum II**

Credits: 5 (NR)
Builds on Family Psychiatric Nurse Practitioner Practicum I, improving diagnostic and clinical reasoning ability and competence in assessment, diagnosis, and management of psychiatric disorders. Enables the student to assume increased responsibility in the delivery of comprehensive mental health care. Participates in professional and community organizations to promote the health of patients while enhancing the role of practitioner.
Prerequisite(s): Admission to the Doctor of Nursing Practice program or with permission of instructor; NURS 782.

Corequisite(s): NURS 785.

Notes: Five clinical hours per week are required for each credit.

Required course in Family Psychiatric Mental Health Nurse Practitioner (FPMHNP) concentration. Admission to the Doctor of Nursing Practice program or with permission of instructor.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 5
When Offered: Spring

NURS 785 - Family Psychiatric Nurse Practitioner Seminar II

Credits: 1 (NR)
Discusses role transition and development of advanced practice psychiatric mental health nurses. Regulatory and economic policies affecting advanced psychiatric mental health nursing practice in the evolving health care system are discussed. Students demonstrate competence in comprehensive management of acute and chronic psychiatric disorders through case presentations from their practica. Performs a comprehensive assessment of the mental health needs of a community.

Prerequisite(s): Admission to the Doctor of Nursing Practice program or with permission of instructor; NURS 783.

Corequisite(s): NURS 784

Notes: Required course in the Family Psychiatric Mental Health Nurse Practitioner (FPMHNP) concentration. Admission to the Doctor of Nursing Practice program or with permission of instructor.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0
When Offered: Spring.

NURS 786 - Adult Gerontology Primary Care Practicum I

Credits: 3 (NR)
Application of health assessment, health maintenance/promotion, anticipatory guidance, genetics/genomics, diagnosis and management of common primary health care concerns, including women’s health issues. Focus is on care of adolescents and adults across the life. Clinical Practicum, lab and seminar.

Corequisite(s): NURS 787.

Notes: Five clinical hours are required per week for each credit.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 15
When Offered: Summer
**NURS 787 - Adult Gerontology Primary Care I**

Credits: 2 (NR)
Theoretical application of health assessment, health maintenance/promotion, anticipatory guidance, diagnosis and management of common primary health care concerns, including women’s health, through clinical decision making skills in adolescents, adults and older adults.

Corequisite(s): NURS 786.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 0
When Offered: Summer

**NURS 788 - Adult Gerontology Primary Care Practicum II**

Credits: 4 (NR)
Demonstration of the ability to function at a beginning level in the role of the nurse practitioner. Performance of advanced skills in assessment and the development of plans for health maintenance and promotion for adolescents, adults and older adults. Clinical practicum, lab and seminar.

Corequisite(s): NURS 789.

Notes: Five clinical hours are required per week for each credit.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 15
When Offered: Fall

**NURS 789 - Adult Gerontology Primary Care II**

Credits: 3 (NR)
This course consists of the application of health assessment, health management/promotion, genetics and genomics, anticipatory guidance, diagnosis and management of common primary care health care concerns of the adolescent, adult and older adult through clinical decision making skills. Lecture, student presentations and seminar.

Corequisite(s): NURS 788.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

**NURS 790 - Adult Gerontology Primary Care Practicum III**

Credits: 4 (NR)
This practicum enables the nurse practitioner student to assume increased responsibility in the delivery of primary care to adults of all ages, adolescents through older adults. Special emphasis is given to the primary care needs of elderly and medically
underserved groups. Practicum, clinical lab and seminar.

**Prerequisite(s):** NURS 787, NURS 789.

**Corequisite(s):** NURS 791.

**Notes:** Five clinical hours are required per week for each credit.

**Hours of Lecture or Seminar per week:** 0  
**Hours of Lab or Studio per week:** 20  
**When Offered:** Spring

---

**NURS 791 - Adult Gerontology Primary Care III**

Credits: 4 (NR)  
Theoretical application of assessment, diagnosis and management of primary health care problems which will enable the adult gerontology nurse practitioner student to assume increased responsibility in the delivery of primary care. Focus will be on the primary care needs of older adult and medically underserved.  
Lectures, student presentations and seminars

**Prerequisite(s):** NURS 789.

**Corequisite(s):** NURS 790.

**Hours of Lecture or Seminar per week:** 4  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Spring

---

**NURS 804 - Advanced Quantitative Data Analysis for Health Care Research I**

Credits: 3 (NR)  
Examines factorial ANOVA, factorial ANCOVA, repeated measures ANOVA, ANOVA and ANCOVA via regression approach, and multiway frequency analysis. Students apply mathematical calculations and interpret SPSS outputs using health care research data.

Equivalent to GCH 804

**Prerequisite(s):** A graduate-level statistics course.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**NURS 805 - Advanced Quantitative Data Analysis for Health Care Research II**

Credits: 3 (NR)  
Examines multivariate analysis of variance (MANOVA), multivariate analysis of covariance (MANCOVA), multiple regression (ordinary least squares), and logistic regression. Students apply mathematical calculations and use linear combinations of
multivariate tests in health care research data.

Equivalent to GCH 805

**Prerequisite(s):** GCH/NURS 804 or an equivalent statistics course.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**NURS 806 - Advanced Multivariate Statistics and Data Analysis for Health Care Research**

Credits: 3 (NR)  
Examines canonical correlation, discriminant analysis, factor analysis, and causal analysis (path models and structural equation modeling). Students analyze and interpret data using these statistical techniques.

Equivalent to GCH 806

**Prerequisite(s):** GCH/NURS 805 or an equivalent multivariate statistics course.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**NURS 807 - Measurement Theories and Applications in Health Care Research**

Credits: 3 (NR)  
Theories, principles, and techniques presented as foundation for the development and evaluation of instruments for use in health care research. Includes review of statistical techniques required for understanding measurement theory, reliability, validity, item analysis, and instrument construction. Students required to design, construct, administer, analyze, and evaluate an original instrument or evaluate an existing instrument in health care research.

Equivalent to GCH 807

**Prerequisite(s):** GCH/ NURS 805 or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**NURS 808 - Translating Nursing and Health Care Research into Evidence-Based Policy**

Credits: 3 (NR)  
This course prepares students to assess the policy dimensions of nursing issues in clinical practice, education, and research environments and translate nursing research into policy.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0
NURS 809 - Research Design and Methods in Nursing and Health Care

Credits: 3 (NR)
Explore strategies for converting nursing and health care problems into research questions. Evaluate and apply quantitative and qualitative designs, measures and analysis strategies to various research questions.

Prerequisite(s): NURS 804 or equivalent advanced statistical course, NURS 955 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

NURS 810 - Evaluation Research in Nursing Education

Credits: 3 (NR)
Uses seminar/discussion to analyze and apply theoretical models for implementing evaluation research in nursing education. Examines quantitative approaches for evaluating process and outcomes of domestic or international nursing education programs, including role of accreditation guidelines.

Prerequisite(s): NURS 920 and 930
Corequisite(s): NURS 920 and 930

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

NURS 811 - Nurse as Educator and Scholar

Credits: 2 (NR)
Uses seminar/discussion to explore role of nurse educator in meeting research and scholarship expectations of college, university, or service setting. Addresses approaches to scholarship in relation to types of evidence appropriate for various scholarly expectations in academic setting.

Prerequisite(s): NURS 920 and 930.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 0

NURS 820 - Human Genetics Concepts for Health Care

Credits: 4 (NR)
The study of human genetics, principles of heredity, and disease risks.

Hours of Lecture or Seminar per week: 4
Hours of Lab or Studio per week: 0
NURS 870 - Nursing and Health Care Administration I
Credit: 3 (NR)
Examines the theoretical basis of scholarship and practice in leadership and management of health systems and nursing organizations. Includes discovery of concepts and forces influencing the organization and performance of health care systems.

Prerequisite(s): Admission to the PhD or DNP program.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

NURS 871 - Nursing and Health Care Administration II
Credit: 2 (NR)
Analyzes and applies selected concepts related to nursing and health system leaders and managers as well as factors influencing the performance of health systems and organizations.

Prerequisite(s): NURS 870.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 0

NURS 874 - Internship in Health Care Administration/Policy/Education
Credit: 4 (NR)
Internship experience of at least 126 hours with leader in field of nursing, health care administration, policy, or education. Participatory activities require integration and application of principles, frameworks, and science related to executive preceptor role.

Prerequisite(s): Completion of all other course work except NURS 998; written advanced application and permission of instructor by due dates (April/November 1) in advance of semester.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 9

NURS 875 - Research Internship
Credit: 3 (NR)
Provides guided research experience of hours, during which students participate as a member of a research team engaged in scientific inquiry. Designed to enhance professional socialization in research scholarship at the doctoral level.

Prerequisite(s): Must have taken or be taking a doctoral level research course and, meeting these requirements, can take any semester prior to comprehensive exams.

Corequisite(s): A doctoral level research course.
NURS 883 - Evidence-Based Practice in Nursing and Healthcare

Credits: 4 (NR)
Building on knowledge of research methodologies and personal expertise, student will identify practice and system problems, analyze the variations of processes and outcomes, evaluate research studies and systematic reviews, and develop a proposal to address issues related to the design of new model of care, translation of evidence into practice, or evaluation of current programs in the context of evidence-based practice. Emphasis is placed on the development of strategies to ensure quality improvement.

Prerequisite(s): NURS 757 and NURS 758

NURS 920 - Qualitative Research in Nursing and Health Care

Credits: 3 (NR)
Examination and application of principles in qualitative research in nursing and health care. Qualitative research will be analyzed within the scholarship of discovery, integration, and application.

Prerequisite(s): NURS 955

NURS 921 - Clinical Practicum I

Credits: 1-10 (NR)
Students, in consultation with their academic advisor, complete supervised practicum hours to meet both the post-baccalaureate and post-masters DNP practicum requirement. A practicum course that prepares students to perform clinical decision making in their role as advance practice nurses in individualized specialty areas. They will work with advanced practice nurse preceptors to develop clinical expertise, and to develop an understanding of leadership roles in the clinical setting that can enhance the system of health care delivery. One credit hour of seminar with the remaining hours in clinical practice.

Nursing 922 - Clinical Practicum II

Credits: 1-10 (RD)
Students, in consultation with their academic advisor, complete supervised practicum hours to meet both the post-baccalaureate
and post-masters DNP practicum requirement. A practicum course that continues to prepare students to practice in an expanded, advanced clinical practice role. Students will learn to become change agents in the clinical setting with a focus on health care delivery systems. The student will apply advanced health assessment skills and clinical decision making in an area of specialty practice, correlating pathophysiology with symptom manifestations. One credit hour of seminar with the remaining hours in clinical practice.

Hours of Lecture or Seminar per week: 1-10
Hours of Lab or Studio per: 0

**NURS 925 - Methodological Issues in Nursing and Health Care Qualitative Research**

Credits: 3 (NR)
Explores, analyzes, and synthesizes conceptual, methodological, and ethical issues in qualitative research within the scholarship of discovery, integration, application, and teaching. Seminar.

Prerequisite(s): NURS 920/HSCI 920 or equivalent course, and permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**NURS 930 - Quantitative Methods in Nursing and Health Care**

Credits: 3 (NR)
Examination and application of principles in quantitative research in nursing and health care. Computer analysis of quantitative data will be required.

Prerequisite(s): NURS 955, 804, and 805.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**NURS 940 - Independent Study for the Doctoral Student**

Credits: 1-6 (NR)
Studies in depth a selected area of nursing theory, research, or practice under direction of faculty.

Prerequisite(s): Admission to a doctoral nursing program.

Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 0

**NURS 950 - Special Topics in Nursing**
Credits: 3 (NR)  
Presents selected topics analyzing specialized areas in nursing. Content varies. Lecture, seminar, laboratory, workshop.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**NURS 955 - Philosophical Bases of Inquiry**

Credits: 3 (NR)  
Philosophical bases of discipline and practice of health-related disciplines are examined within scholarship of discovery, integration, application, and teaching. Compares nursing and health science philosophy with relevant related discipline philosophies.

**Prerequisite(s):** Admission to nursing or other doctoral program or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**NURS 957 - Ethics of Health Care Research**

Credits: 3 (NR)  
Provides a firm foundation for understanding and promoting responsible conduct of research. The ethical principles that govern research design and methodology with subjects including vulnerable populations will be critically analyzed.

**When Offered:** Spring

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**NURS 980 - Practice Inquiry I**

Credits: 4 (RD)  
Synthesize the literature related to the problem. Analyze the environmental factors impacting the problem. Identify the standard of care related to the clinical problem. Assess the quality of evidence that supports the standard of care. Develop a proposal that will impact the delivery of care in the identified area of practice inquiry. Develop the appropriate outcome measures to address the specific practice inquiry area.

**Prerequisite(s):** Completion of DNP core courses.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 1

---

**NURS 981 - Practice Inquiry II**
Credits: 4 (RD)
Implement the proposal developed in Practice Inquiry I. Maintain an ongoing process analysis of the project. Collect data. Analyze the findings from the practice inquiry. Disseminate the findings from the practice inquiry in a scholarly manner.

Prerequisite(s): NURS 980.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 2

NURS 998 - Doctoral Dissertation Proposal

Credits: 1-9 (RD)
A seminar for doctoral students to accompany the development of a doctoral dissertation proposal. Development of the research problem with analysis and critique of methodology discussed.

Prerequisite(s): Completion of all other course work except NURS 999; and completion of doctoral comprehensive examination.

Notes: Students must enroll in the course for 3-credits the first time they take the course.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0
Grading: Satisfactory/No Credit
When Offered: Fall, Spring

NURS 999 - Doctoral Dissertation

Credits: 1-9 (RT)
Provides continued faculty assistance on an individual basis toward completion of approved dissertation.

Prerequisite(s): NURS 998.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0
Grading: Satisfactory/No Credit

Nutrition (NUTR)

NUTR 295 - Introduction to Nutrition

Credits: 3 (NR)
Introduces students to nutrition as a scientific discipline, providing a working knowledge of basic nutrition including the sources and functions of the nutrients, the components of a healthy diet, and the relationship between diet and overall health. Students will learn about the processes of digestion, absorption, and metabolism of nutrients, and several 'hot topics' in the field of
nutrition.

Equivalent to GCH 295 (2010-2011 Catalog)

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall, Spring, Summer

### NUTR 314 - Food in Italy

Credits: 3 (NR)  
Exposes student to Italian foodways, culture, and sustainability. Travel and field trips will supplement classroom learning and form the basis of a research project focusing on food's place in Italian society.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Summer

### NUTR 408 - Introduction to Food Security

Credits: 3 (NR)  
Examines the human health aspects of food security at the local, regional, and global levels.

**Prerequisite(s):** NUTR 295.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Summer, Spring

### NUTR 420 - Strategies for Nutrition Education

Credits: 3 (NR)  
Examines methods and techniques for educating individuals about nutrition. Addresses nutrition education issues from variety of populations with respect to culture, age, religion, and specific disease states.

Equivalent to GCH 420 (2010-2011 Catalog)

**Prerequisite(s):** NUTR 295 or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Spring

### NUTR 421 - Community Nutrition
Credits: 3 (NR)
Focuses on nutrition and health problems of specific community settings, and examines practices of nutrition services in various communities.

Equivalent to GCH 421 (2010-2011 Catalog)

Prerequisite(s): NUTR 295 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring

NUTR 422 - Nutrition throughout the Life Cycle

Credits: 3 (NR)
Focuses on nutrient needs and food habits throughout life cycle. Emphasizes nutrient needs prior, during, and after pregnancy, and nutritional requirements of infants, children, adolescents, adults, and elderly.

Equivalent to GCH 422 (2010-2011 Catalog)

Prerequisite(s): NUTR 295 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Summer

NUTR 423 - Nutrition and Chronic Illnesses

Credits: 3 (NR)
Examines nutrient needs related to specific chronic illnesses, including cardiovascular disease, cancer, obesity, and diabetes. Focuses on principles of nutritional therapy and prevention.

Equivalent to GCH 423 (2010-2011 Catalog)

Prerequisite(s): NUTR 295 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

NUTR 466 - Nutrition and Weight Management: Obesity, Anorexia, and Bulimia

Credits: 3 (NR)
Focuses on the physiological, emotional, genetic, and societal and cultural factors that influence the relationship between eating and weight regulation.

Equivalent to GCH 466 (2010-2011 Catalog)
Prerequisite(s): NUTR 295, GCH 332, or approval of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Summer

**NUTR 494 - Special Topics in Nutrition and Food Studies**

Credits: 3 (RD)
In-depth study of contemporary areas of nutrition and food studies. Topics vary each semester. Students may take to apply up to 6 credits of NUTR 494 to their degree program.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Summer, Spring

**NUTR 502 - U.S. Role in Global Health, Nutrition, and Population**

Credits: 3 (NR)
The course will cover U.S. history in responding to health, nutrition, and population challenges worldwide; examine current programs in each area, including those of the U.S. government and nongovernmental organizations, foundations, and the private sector; and examine future directions for responding to health, nutrition, and population trends.

Equivalent to GCH 502 (2010-2011 Catalog)

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring

**NUTR 515 - Fundamentals of Cooking**

Credits: 3 (NR)
Introduces students to the fundamental concepts of food and its preparation. The biological components, the chemical transformation, and sensorial properties of food are explored throughout the course.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring

**NUTR 520 - Introduction to Wine and Beer**

Credits: 3 (NR)
Takes a multidisciplinary approach to understand beer, wine, and spirits across time and space. The student will learn the
fundamentals of alcohol production as well as the social and cultural dimensions of alcohol. Topics include the effects of climate change on wine production, prohibition and neoprohibition, the health effects of alcohol and alcoholism, craft versus industrial production, among others.

Equivalent to GCH 520 (2010-2011 Catalog)

Notes: Will include off-campus field trips. Students must be 21 to enroll in the course.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring.

NUTR 522 - Nutrition Across the Lifespan

Credits: 3 (NR)
Explores the nutrient needs and food habits across the lifespan. Focuses on nutrition policies, programs, and interventions across the lifespan.

Prerequisite(s): NUTR 295.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

NUTR 566 - Nutrition and Weight Management

Credits: 3 (NR)
Focuses on the physiological, emotional, genetic, and societal/cultural factors that influence the relationship between eating and weight regulation.

Equivalent to GCH 566 (2010-2011 Catalog)

Prerequisite(s): GCH 295 or other introductory nutrition course.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring

NUTR 583 - Biocultural Perspectives on Food and Nutrition

Credits: 3 (NR)
Examines food and eating behaviors, diet, and nutrition from a cross-cultural perspective. Focuses on how and why people choose what to eat, range and significance of cross-cultural variability in diet, how diets have changed, and health and social implications of those changes. Lecture, discussion, video presentations, audiovisual aids, student presentations, and case study analyzes.

Equivalent to GCH 583 (2011-2012 Catalog)
Prerequisite(s): GCH 295 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

NUTR 594 - Special Topics in Nutrition and Food Studies

Credits: 3 (RD)
In-depth study of contemporary areas of nutrition and food studies. Topics vary each semester. Students may take up to 6 credits of NUTR 594 within their degree program.

Prerequisite(s): Graduate level course.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Summer, Spring.

NUTR 608 - Perspectives on Food Security

Credits: 3 (NR)
Overview of the major concepts and perspectives of food security. Explores and applies the definitions, means of measurement, and policy implications of food security from a multidisciplinary approach.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall.

NUTR 610 - Food Safety and Defense

Credits: 3 (NR)
Focuses on the possible sources of unintentional and intentional contaminations in the food supply, and on the roles and guiding policies of the various levels of government and the food industry, as well as individual responsibility, in managing risk to ensure a safe food supply.

Prerequisite(s): NUTR 608.

Notes: Fees may apply.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring.

NUTR 611 - Food and Nutrition Security Policy
In-depth analysis of food security and nutrition policies and programs aimed at reducing hunger and malnutrition among individuals and populations.

**NUTR 620 - Nutrition Education**

Credits: 3 (NR)
An overview of current nutrition education research, theories, programs, and policies. Explores how nutrition education can influence dietary behavior and food choice.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall

**NUTR 626 - Food Systems**

Credits: 3 (NR)
Survey of issues surrounding food production from a processing perspective. Students will gain an understanding various forms of food processing and the issues that surround industrial food systems.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Spring

**NUTR 630 - Global Nutrition**

Credits: 3 (NR)
Directed at students from a variety of disciplines, this course examines what malnutrition is and how it occurs by looking at several situations from around the world. It looks at the impact of nutrition on a society and community and examines the benefits of a well-nourished population.

Equivalent to GCH 530 (2010-2011 Catalog)

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall, Spring

**NUTR 642 - Macronutrients**
Credits: 3 (NR)
Expands understanding of the biological roles of the macronutrients through application of advanced nutritional concepts relating to digestion, absorption and metabolism of carbohydrates, proteins, and lipids. Practical implications in the diet are emphasized, and particular attention is placed on the etiology and prevention of macronutrient-related diseases, including atherosclerosis, diabetes, and metabolic syndrome.

Prerequisite(s): NUTR 295 and undergraduate biochemistry course.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring

NUTR 644 - Micronutrients

Credits: 3 (NR)
Expands understanding of the biological roles of the micronutrients through application of advanced nutritional concepts relating to digestion, absorption, transport, and metabolism of vitamins and minerals. Practical implications in the diet are emphasized, with particular attention on the etiology and prevention of micronutrient-related diseases, including nutritional anemia and osteoporosis.

Prerequisite(s): NUTR 295 and Undergraduate biochemistry equivalent.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring

NUTR 651 - Nutrition Assessment, Monitoring and Surveillance

Credits: 3 (NR)
Introduces students to methods and tools used in assessing nutritional status and, the practice and application of these to monitoring among individuals and population groups. Methods of interpretation of nutrition-related information will be examined.

Equivalent to NUTR 751 (2012-2013 Catalog)

Prerequisite(s): NUTR 630 or an introductory nutrition course.

Notes: Will include off campus practice

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring

NUTR 652 - American Agriculture in the 20th Century

Credits: 3 (NR)
Survey of issues surrounding food from an agricultural perspective. Students gain an understanding of how agricultural production shifted from a Jeffersonian ideal to an industrial and political practicality. Topics that may be covered: the agrarian ideal of the yeoman farmer, the ascendancy of markets and agricultural commodification, the politicization of agriculture and the farm bill, and sustainable agricultural systems.

Designated a Green Leaf Course.

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0
**When Offered:** Fall

**NUTR 670 - Nutrition Research Methods**

Credits: 3 (NR)
Introduction to the fundamentals of research design and data collection methods. Students will learn about quantitative, qualitative, mixed method, participatory approaches, and ethical issues in nutrition-related research and evaluation.

**Prerequisite(s):** GCH 601 or GCH 712, NUTR 651 OR Equivalent courses.

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0
**When Offered:** Fall

**NUTR 675 - Nutrition Program Development, Interventions and Assessments**

Credits: 3 (NR)
Provides students with the knowledge and skills for planning, developing and evaluation of community nutrition programs and interventions.

**Prerequisite(s):** NUTR 620, NUTR 670, GCH 601 and NUTR 651 OR Equivalent course.

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0
**When Offered:** Spring

**NUTR 788 - Pre-Practicum Seminar**

Credits: 1 (NR)
Provides guidance and preparation for engaging in the capstone practicum.

**Hours of Lecture or Seminar per week:** 1
**Hours of Lab or Studio per week:** 0
**Grading:** Satisfactory/No credit only
**When Offered:** Fall
NUTR 790 - Nutrition Practicum

Credits: 2 (NR)
An in-depth supervised experience in an approved nutrition-related organization. Includes a project related to a nutrition issue within the organization.

Prerequisite(s): NUTR 788.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 0
When Offered: Spring

NUTR 799 - Thesis Research

Credits: 1-6 (RD)
Thesis research and writing.

Prerequisite(s): Core courses in MS program.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
Grading: Satisfactory/No credit only
When Offered: Fall, Spring

Operations Management (OM)

Offered by the School of Management

If a student takes noncore, upper-level business courses before admission to SOM, those courses will not count on an undergraduate degree application for any major in the school, except as general elective credit. A grade of C or higher must be presented on the graduation application for each upper-level course in the major. Course prerequisites are strictly enforced. Degree status is defined as formal admission to BS degree status in SOM.

OM 210 - Statistical Analysis for Management

Credits: 4 (NR)

Introduces application of statistical methods to support quantitative decision analysis for resolving business problems. Topics include descriptive statistics, probability distributions, statistical inference and regression. May be taught in lecture/recitation format. Students may not receive credit for both OM 210 and OM 211.

Equivalent to OM 211

Prerequisite(s): C or higher in MATH 108, MATH 113, HNRS 125, HNRT 125, or HNRT 225. Prerequisite enforced by
OM 211 - Honors Statistical Analysis for Management

Credits: 4 (NR)
Introduces the application of statistical methods to support quantitative decision analysis for resolving business problems. Topical coverage includes descriptive statistics, probability, random variables, probability distributions, sampling and sampling distributions, estimation, hypothesis testing, and linear regression (both simple and multiple). Requires extensive use of case studies to integrate, synthesize and extend the concepts presented in order to foster a "learning by doing" approach that develops and promotes critical thinking abilities. Active class discussions via individual and/or group presentations of case assignments is an important learning activity. Extensive use of computer software for statistical modeling, problem solving, and analysis of case studies is a significant component of this course.

Equivalent to OM 210

Prerequisite(s): Cumulative GPA of 3.5 or higher; B or higher in MATH 108, MATH 113, HNRS 125, HNRT 125, or HNRT 225. Prerequisite enforced by registration system.

Corequisite(s): MIS 102.

Hours of Lecture or Seminar per week: 4
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

OM 301 - Operations Management

Credits: 3 (NR)

Examines an organization's operations, including design, management and improvement processes, projects and supply chains, in both product and service environments. Uses analytical models to support key planning and control activities. School of Management students will not be permitted to make more than three attempts to achieve a C or higher in OM 301. Those who do not successfully complete this course within three attempts will be terminated from their major and will not be eligible to receive a degree from the School of Management. For more information about this, see the "Termination from the Major" section under Academic Policies.

Prerequisite(s): C or higher in OM 210. Sophomore standing. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring, Summer
OM 320 - Supply Chain Management and E-Business

Credits: 3 (NR)
Design, development, and management of supply chain systems, including production and inventory management, distribution channels, and information systems that support them. Emphasizes impact of e-business on companies and industries, including Internet's impact on the way goods and services flow through value chain from providers to customers.

Prerequisite(s): C or higher in OM 301, degree status. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

OM 352 - Methods and Models of Management Science

Credits: 3 (NR)
Introduces operation research and management sciences (OR/MS) techniques for supporting business management decisions. Specific mathematical programming and probabilistic topics include linear programming, integer programming, goal programming, network flow models, decision analysis, game theory, queuing models, and Monte Carlo simulation.

Prerequisite(s): C or higher in OM 301, degree status. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

OM 435 - Business Process Analysis and Simulation

Credits: 3 (NR)
Introduces concepts and tools used in designing, modeling, analyzing, and improving business processes. Various business process analysis and simulation methods, such as process mapping/flowcharting, process flow and capacity analysis, service process design, theory of constraints, process modeling and simulation, and business process reengineering are discussed. Introduces methods and analytical tools such as queue theory and computer simulation used to design, model, analyze, and improve business processes. Discusses methods such as process mapping/diagramming, service process design, process modeling, and business process reengineering.

Prerequisite(s): C or higher in OM 301, degree status. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

OM 452 - Business Forecasting

Credits: 3 (NR)
Introduces techniques for producing predictions of future business operations as aids to making planning decisions. Specific
topics include judgmental forecasting, forecast accuracy, correlation analysis, smoothing methods, regression models, decomposition, and autoregressive and ARIMA models. Methods demonstrated and used through computer software.

Prerequisite(s): C or higher in OM 301, degree status. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0  
When Offered: Fall, Spring

OM 456 - Quality Management

Credits: 3 (NR)  
Provides an understanding of the multifaceted nature of quality management by emphasizing topics such as quality philosophies, total quality management, design quality, process quality, and managing quality in information systems development. Discusses ISO 9000 and Capability Maturity Model. Uses software, case studies.

Prerequisite(s): C or higher in OM 301, degree status. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0  
When Offered: Fall, Spring

OM 462 - Honors Seminar in Operations Management

Credits: 3 (NR)  
Topic and format vary. In-depth study of a topic in the area of operations management. Enrollment limited and competitive.

Prerequisite(s): Degree status in ISOM major; senior standing; permission of department.

Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0

OM 491 - Seminar in Operations Management

Credits: 3 (NR)  
Analyzes selected topics that highlight latest developments in the operations management field, including contemporary research findings and case studies of operations management in business and other organizations.

Prerequisite(s): C or higher in OM 301, degree status. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0  
When Offered: Fall, Spring

OM 493 - Management of Technology Projects
Credits: 3 (NR)
Focuses on managerial problems associated with meeting technical, cost, and time constraints of technology projects. Discusses project management areas including organization, teams, scheduling, cost control, earned value analysis, risk management, and quality. Includes software cost estimation models and the management of IT projects. Software and case studies.

Prerequisite(s): C or higher in OM 301, degree status. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

OM 499 - Independent Study in Operations Management

Credits: 1-3 (RT)
By special arrangement with instructor, and approval from associate dean for undergraduate programs. Investigates business problem according to student interest, using state-of-the-art decision science methodology.

Prerequisite(s): C or higher in OM 301, degree status. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0

Operations Research (OR)

Offered by the Volgenau School of Engineering.

Students may attempt an undergraduate course taught by the Volgenau School of Engineering twice. A third attempt requires approval of the department offering the course.

OR 335 - Discrete Systems Modeling and Simulation

Credits: 3 (NR)
Introduction to basic concepts of modeling complex discrete systems by computer simulation. Topics include Monte-Carlo methods, discrete event modeling, specialized simulation software, and statistics of input and output analysis.

Equivalent to SYST 335

Prerequisite(s): CS 211 or permission of the department; and STAT 344, or STAT 346, or MATH 351.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring

OR 441 - Deterministic Operations Research
Credits: 3 (NR)
Survey of deterministic methods for solving real-world decision problems. Covers linear programming model and simplex method of solution, duality, and sensitivity analysis; transportation and assignment problems; shortest path and maximal flow problems; and introduction to integer and nonlinear programming. Emphasizes modeling and problem solving.

Equivalent to MATH 441

Prerequisite(s): MATH 203, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

**OR 442 - Stochastic Operations Research**

Credits: 3 (NR)
Survey of probabilistic methods for solving decision problems under uncertainty, probability review, decision theory, queuing theory, inventory models, reliability, Markov chain models, and simulation are covered. Emphasis on modeling and problem solving.

Equivalent to MATH 442

Prerequisite(s): STAT 344 or STAT 346 or MATH 351, or equivalent.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring

**OR 481 - Numerical Methods in Engineering**

Credits: 3 (NR)
Modern numerical methods and software. Emphasis on problem solving through software and assessing the quality of solutions obtained. Topics include computer arithmetic, linear equations and least squares data fitting, interpolation, nonlinear optimization, and differential equations. Involves extensive computer use.

Equivalent to MATH 446

Prerequisite(s): Grade of C or better in MATH 203 and CS 112.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

**OR 498 - Independent Study in Operations Research**

Credits: 1-3 (NR)
Directed self-study of special topics of current interest in operations research.
Prerequisite(s): 60 credits; must be arranged with instructor and approved by department chair before registering.

Notes: May be repeated for maximum 6 credits if topics substantially different.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring, Summer

OR 531 - Analytics and Decision Analysis

Credits: 3 (NR)
Course focus is predominantly on prescriptive analytics with some parts focused on predictive analytics. Topics include operations research techniques and their application to decision making such as mathematical optimization, networks modeling, stochastic modeling, and multi-objective modeling. Other topics such as PERT, CPM, computer simulation, decision analysis using decision trees and quantitative value functions, and heuristic methods are covered, as well as use of contemporary computer software for problem solving. In particular, the course will extensively use MS Excel for solving the decision making problems. Case-study approach to problem solving is used.

Prerequisite(s): Graduate Standing.

Notes: Cannot be used for credit for the PhD IT program.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring

OR 540 - Management Science

Credits: 3 (NR)
Operations research techniques and their application to managerial decision making. Mathematical programming, Markov processes, queuing theory, inventory models, PERT, CPM, and computer simulation are covered, as well as use of contemporary computer software for problem solving. Case-study approach to problem solving is used.

Equivalent to SYST 540

Prerequisite(s): MATH 108, and STAT 250 or OM 200; or equivalent.

Notes: Students who have taken OR 541 or OR 542 and OR MS majors do not receive credit.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

OR 541 - Operations Research: Deterministic Models
Survey of deterministic methods of solving real world decision problems. Covers linear programming model and simplex method of solution, duality, and sensitivity analysis, transportation and assignment problems; shortest path, minimal spanning tree, and maximal flow problems; and an introduction to integer and nonlinear programming. Emphasis on modeling and problem solving.

**Prerequisite(s):** MATH 203 or equivalent.

**Notes:** Students who have taken OR 441/MATH 441 will not receive credit.

**Hours of Lecture or Seminar per week:** 3

**Hours of Lab or Studio per week:** 0

---

**OR 542 - Operations Research: Stochastic Models**

Credits: 3 (NR)

**Prerequisite(s):** STAT 344 or MATH 351, or equivalent.

**Notes:** Students who have taken OR 442/MATH 442 do not receive credit.

**Hours of Lecture or Seminar per week:** 3

**Hours of Lab or Studio per week:** 0

---

**OR 574 - Quality Control and Process Management**

Credits: 3 (NR)

An overview of quality control techniques widely used in a number of manufacturing industries. The course teaches students about combining engineering process quality management and traditional statistical quality control procedures that are applicable in industry and are based on contemporary technologies such as lean Six Sigma, total quality management and predictive maintenance for achieving superior quality, reliability and maintainability.

Equivalent to SYST 574

**Prerequisite(s):** Graduate standing or permission of instructor.

**Hours of Lecture or Seminar per week:** 3

**Hours of Lab or Studio per week:** 0

---

**OR 576 - Manufacturing Systems Analysis**

Credits: 3 (NR)

An overview of modeling and analysis of general manufacturing systems techniques widely used in a number of manufacturing industries, such as semiconductor manufacturing. The course teaches students about best scheduling
and inventory control practices, enterprise resource management principles, and details of engineering economy that are applicable in the industry.

Equivalent to SYST 576

**Prerequisite(s):** Graduate standing or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**OR 588 - Financial Systems Engineering I: Introduction to Options, Futures, and Derivatives**

Credits: 3 (NR)  
This course is an introduction to financial engineering. Financial engineering is a cross-disciplinary field which relies on mathematical finance, numerical methods, and computer simulations to make trading, hedging, and investment decisions. This course will introduce basic types of derivatives, such as forward, futures, swaps, and options; as well as financial models such as Brownian motion, Ito's formula, and Black-Scholes model.

Equivalent to SYST 588.

**Prerequisite(s):** Eng. or Math Graduate standing, or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall, Spring

**OR 604 - Practical Optimization**

Credits: 3 (NR)  
Survey of optimization methods for students whose main focus is on application of optimization. Covers modeling, search methods, convexity, linear programming, sensitivity, networks, multiobjective optimization, heuristic methods, integer programming, nonlinear programming and dynamic programming; use of modeling languages and optimization tools, including NEOS.

**Prerequisite(s):** 6 credits of calculus and graduate standing, or permission of instructor.

**Notes:** Course cannot be counted toward MSOR degree. Students who have taken OR 541 or 644 cannot receive credit.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**OR 635 - Discrete System Simulation**

Credits: 3 (NR)  
Computer simulation as a scientific methodology in operations analysis, with emphasis on model development, implementation,
and analysis of results. Discrete-event models, specialized software, input modeling, and output statistics are covered. Extensive computational work is required.

**Prerequisite(s):** OR 542, or STAT 354 or 344, or equivalent; and knowledge of scientific programming language.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

### OR 640 - Global Optimization and Computational Intelligence

**Credits:** 3 (NR)  
Introduction to global optimization of nonconvex mathematical programs and numerical methods for the solution of such problems. Topics covered include high-level survey of traditional mathematical programming algorithms; critical comparison of metaheuristics and artificial intelligence (AI) algorithms to traditional mathematical programming algorithms; probabilistic search, multistart methods, statistical tests of performance and confidence, simulated annealing, genetic algorithms, neural networks, Tabu search, homotopies and tunneling; the traveling salesman problem, the Steiner problem, Stackelberg-Cournot-Nash mathematical games and other classical nonconvex optimization problems.

**Prerequisite(s):** MATH 203 or equivalent, and knowledge of a scientific programming language.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

### OR 641 - Linear Programming

**Credits:** 3 (NR)  
In-depth look at the theory and methodology of linear programming: Computational enhancements of the revised simplex method; sparse-matrix techniques, bounded variables and the dual simplex method. Alternative interior point methods described and computational complexity of various algorithms analyzed.

**Prerequisite(s):** OR 541, or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall

### OR 642 - Integer Programming

**Credits:** 3 (NR)  
Cutting plane and enumeration algorithms for solution of integer linear programs; bounding strategies and reformulation techniques; heuristic approaches to the solution of complex problems; knapsack problems, matching problems, set covering and partitioning problems; applications to problems in OR/MS, such as capital budgeting, facility location, political redistricting, engineering design, and scheduling.

**Prerequisite(s):** OR 541, or permission of instructor.
OR 643 - Network Modeling

Credits: 3 (NR)
Introduction to network problems in operations research, computer science, electrical engineering, and systems engineering. Solution techniques for various classes of such problems are developed. Topics include minimal-cost network flow, maximal flow, shortest path, and generalized networks; plus stochastic networks, network reliability, and combinatorially based network problems. Complexity of each problem class analyzed.

Prerequisite(s): OR 541, or permission of instructor.

OR 644 - Nonlinear Programming

Credits: 3 (NR)
Nonlinear optimization theory and techniques applicable to problems in engineering, economics, operations research, and management science. Covers convex sets and functions, optimality criteria and duality; algorithms for unconstrained minimization, including descent methods, conjugate directions, Newton-type and quasi-Newton methods; and algorithms for constrained optimization, including active set methods and penalty and barrier methods.

Prerequisite(s): MATH 213 or equivalent, and OR 541; or permission of instructor.

OR 645 - Stochastic Processes

Credits: 3 (NR)
Selected applied probability models including Poisson processes, discrete- and continuous-time Markov chains, renewal and regenerative processes, semi-Markov processes, queuing and inventory systems, reliability theory, and stochastic networks. Emphasis on applications in practice as well as analytical models.

Equivalent to STAT 645

Prerequisite(s): OR 542 or STAT 544, or permission of instructor.
OR 647 - Queuing Theory

Credits: 3 (NR)
Unified approach to queuing, organized by type of model. Single- and multiple-channel exponential queues; Erlangian models, bulk and priority queues, networks of queues; general arrival and/or service times; and statistical inference and simulation of queues are covered. Extensive use of computational software.

Prerequisite(s): OR 542, STAT 544, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring

OR 649 - Topics in Operations Research

Credits: 3-6 (RT)
Advanced topic chosen according to interests of students and instructor from dynamic programming, inventory theory, queuing theory, Markov and semi-Markov decision processes, reliability theory, decision theory, network flows, large-scale linear programming, nonlinear programming, and combinatorics.

Prerequisite(s): Permission of instructor.

Notes: May be repeated for maximum 6 credits if topics are substantially different.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

OR 651 - Military Operations Research I: Cost Analysis

Credits: 3 (NR)
While drawing on other disciplines (managerial accounting, econometrics, systems analysis), cost analysis uses operations research to assist decision makers in choosing preferred future courses of action by evaluating selected alternatives on the basis of their costs, benefits, and risks. Cost analysis is distinctly different from cost estimating in that projecting future courses of action almost always requires mathematical modeling. Topics include analysis overview, economic analysis, estimating relationships (factors, simple and complex models), acquiring and verifying cost data, cost progress curves, life-cycle costing, scheduling estimating, effectiveness and risk estimation, relationship of effectiveness models and measures to cost analysis.

Corequisite(s): OR 541 or 542.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring

OR 652 - Military Operations Research Modeling II: Effectiveness Analysis
Credits: 3 (NR)
Examines issues and modeling underlying military decisions at the Military Service, Joint Staff, and Department of Defense level. Analytical methods with applications to theater campaign analysis, equipment and weapon system modernization, force structure development, strategic mobility and deployment, small-scale contingency operations, logistics, and requirements determination are considered. Optimization, simulation, and statistical techniques are stressed. Realistic problems presented and solved as case studies. Display of results and presentation techniques for military decision makers emphasized.

Corequisite(s): OR 541 or 542.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

OR 660 - Air Transportation Systems Modeling

Credits: 3 (NR)
Introduces range of current issues in air transportation, including public policy toward the industry, industry economics, system capacity, current system modeling capability, human factors considerations, safety analysis and surveillance systems, and new technological developments. Students expected to develop broad understanding of contemporary and future issues. Knowledge evaluated through class discussions, a take-home midterm exam and a term project to be completed by the end of the semester.

Equivalent to SYST 660

Prerequisite(s): SYST 460/560, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring

OR 670 - Metaheuristics for Optimization

Credits: 3 (NR)
Course on the theory and practice of metaheuristics, i.e. solution search techniques for solving combinatorial optimization problems. It will introduce the theory, applications (scheduling in manufacturing, transportation, and in other engineering and service industries), and computational aspects of directly searching for solutions to solve computationally complex optimization problems without a well-defined analytical model.

Equivalent to SYST 670.

Prerequisite(s): OR 441/541 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring

OR 671 - Judgment and Choice Processing and Decision Making
How do people make judgments and decisions? Course presents an initial review of scientific literature directed toward answering this question, and emphasizes its importance when performing decision analysis and designing systems to support judgment and decision processes.

Equivalent to SYST 671

**Prerequisite(s):** STAT 344/354.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall, Spring.

### OR 674 - Dynamic Programming

Credits: 3 (NR)  
Course on the theory and practice of dynamic programming, i.e., optimal sequential decision making over time in the presence of uncertainties. Stresses intuition, the mathematical foundations being for the most part elementary. Introduces the theory, applications (finance, engineering, and biology), and computational aspects of dynamic programming for deterministic and stochastic problems.

Equivalent to SYST 674

**Prerequisite(s):** OR 442 or OR 542 or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

### OR 675 - Reliability Analysis

Credits: 3 (NR)  
Introduction to component and system reliability, their relationship, and problems of inference. Topics include component lifetime distributions and hazard functions, parameter estimation and hypothesis testing, life testing, accelerated life testing, system structural functions, and system maintainability.

Equivalent to SYST 675

**Prerequisite(s):** STAT 544 or 554, or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

### OR 677 - Statistical Process Control

Credits: 3 (NR)  
Introduces concepts of quality control and reliability. Acceptance sampling, control charts, and economic design of quality control systems are discussed, as are system reliability, fault-tree analysis, life testing, repairable systems, and the role of
reliability, quality control and maintainability in life-cycle costing. Role of MIL and ANSI standards in reliability and quality programs also considered.

Equivalent to STAT 677/SYST 677

Prerequisite(s): STAT 544 or 554, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

OR 681 - Decision and Risk Analysis

Credits: 3 (NR)
Application of analytic reasoning and skills to practical problems in decision-making. Topics include problem structure, analysis and solution implementation, emphasizing contemporary approaches to decision analytic techniques.

Equivalent to SYST 573

Prerequisite(s): OR 542 or MBA 638.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

OR 682 - Computational Methods in Engineering and Statistics

Credits: 3 (NR)
Numerical methods have been developed to solve mathematical problems that lack explicit closed-form solutions or have solutions that are not amenable to computer calculations. Examples include solving differential equations or computation probabilities. Discusses numerical methods for such problems as regression, analysis of variance, nonlinear equations, differential and difference equations and nonlinear optimization. Applications in statistics and engineering are emphasized. Involves extensive computer use.

Equivalent to CSI 700

Prerequisite(s): MATH 203 and 213 or equivalent, and modern numerical methods and software.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

OR 683 - Principles of Command, Control, Communications, Computing, and Intelligence (C4I)

Credits: 3 (NR)
Fundamental principles of C4I are developed from descriptive, theoretical, and quantitative perspectives. Principles and techniques applicable to wide range of civilian and military situations. Topics include C2 process; modeling and simulation for combat operations; detection, sensing, and tracking; data fusion and situation assessment; optimal decision making;
methodologies and tools of C4I architectures; tools for modeling and evaluations of C4 systems such as queuing theory.

Equivalent to SYST 680/ECE 670

Prerequisites: ECE 528, OR 542, or SYST 611; or equivalent.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

**OR 688 - Financial Systems Engineering II: Derivative Products and Risk Management**

Credits: 3 (NR)
Financial engineering is a cross-disciplinary field which relies on mathematical finance, numerical methods, and computer simulations to make trading, hedging, and investment decisions, as well as facilitating the risk management of those decisions. This course will focus on risk management for both market risk and credit risk. It will cover a broad range of derivatives products and hedging strategies with emphasis on how risks are managed in financial institutions.

Equivalent to SYST 688.

Prerequisite(s): OR/SYST 588 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

**OR 690 - Optimization of Supply Chains**

Credits: 3 (NR)
Focuses on both supply chain optimization from an enterprise-wide perspective, and supply chain optimization from a business-to-business e-commerce concern. Concerned with optimizing the value of goods and services and assuring a reasonable return on such sales. Describes both heuristic and exact algorithms for scheduling, production, inventory management, logistics, and distribution. New software that enables such optimization is presented, as are manufacturing and service examples from the public and private sectors. New techniques to handle risk, quality of data, and robustness of solutions are presented. Students perform case studies using state-of-the-art software.

Prerequisite(s): Graduate standing, mathematics through linear algebra, and STAT 344.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**OR 699 - Masters Project**

Credits: 3 (NR)
Capstone project course for MS/OR program. Key activity is completion of a major applied team project resulting in an acceptable technical report and oral briefing. Student should plan to take this course in the last semester of studies.
OR 719 - Graphical Models for Inference and Decision Making

Credits: 3 (NR)
Theory and methods for inference and decision making in environments characterized by uncertain information. Covers graphical probability and decision models. Studies approaches to representing knowledge about uncertain phenomena, and planning and acting under uncertainty. Topics include knowledge engineering, exact and approximate inference in graphical models, learning in graphical models, temporal reasoning, planning, and decision-making. Practical model-building experience provided. Students apply what they learn to a project of their own choosing.

Equivalent to STAT 719/CSI 775

Prerequisite(s): STAT 652 or SYST/STAT 664, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

OR 735 - Advanced Stochastic Simulation

Credits: 3 (NR)
Special topics and recent developments in Monte Carlo simulation methodology for discrete-event stochastic systems. Contents vary; possible topics include statistical analysis of simulation output data, random number and random variate generation, variance reduction techniques, sensitivity analysis and optimization of simulation models, distributed and parallel simulation, object-oriented simulation, and specialized applications.

Equivalent to SYST 735

Prerequisite(s): OR 635 or permission of instructor.

Notes: May be repeated for credit when topics are distinctly different.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

OR 741 - Advanced Linear Programming

Credits: 3 (NR)
Recent developments in linear programming. Highlights advances in interior point methods and also addresses developments in the simplex method. Projective methods, affine methods, and path-following methods are examined, including Karmarkar's original work. Discusses relationships between these methods, and relationships to methods in nonlinear programming. Also
discussed are advances in data structures and other implementation issues. Students test software and solve large-scale linear programs.

**Prerequisite(s):** OR 541 and 641.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**OR 750 - Advanced Topics in Operations Research**

Credits: 3 (RT)  
Special topics, applications, or recent developments in operations research. Contents vary and may include topics in optimization, stochastic methods, or decision support that are not covered in the standard OR curriculum.

**Prerequisite(s):** OR 541 or 542, and 600-level course that varies with content of course.

**Notes:** May be repeated for credit when topics are distinctly different.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**OR 751 - Advanced Topics in Operations Research for Planning and Scheduling**

Credits: 3 (NR)  
Introduces combinatorial optimization problems in scheduling and logistics. Solution techniques for various classes of such problems are developed. Topics include deterministic and stochastic scheduling algorithms with applications in manufacturing and service sectors.

**Prerequisite(s):** OR 541.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**OR 763 - Research Methods in Systems Engineering and Information Technology**

Credits: 3 (NR)  
Examines alternative paradigms of scientific research and their applicability to research in information technology. Topics include fundamental elements of scientific investigation, basic principles of experimental design and statistical induction, philosophy of science and its relation to the information technology sciences, and case studies of information technology research.

Equivalent to IT 763/SYST 763

**Prerequisite(s):** STAT 554.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0
OR 774 - Advanced Dynamic Programming

Credits: 3 (NR)
Covers advanced topics on the theory and practice of dynamic programming, i.e., optimal sequential decision making over time in the presence of uncertainties. Stresses the mathematical foundations and introduces the theory, computational aspect, and applications of dynamic programming for deterministic and stochastic problems.

Prerequisite(s): OR674/SYST674 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

OR 780 - Queuing Modeling of Computer-Communication Networks

Credits: 3 (NR)
Studies analytical modeling of computer and communication networks and performance evaluations. Topics include Markovian systems, open networks, closed networks, approximations, decomposition, simulation, sensitivity analysis, and optimal operation of systems. Presents local area networks, manufacturing systems, and other applications.

Equivalent to IT 780

Prerequisite(s): OR 645 or 647, or ECE 542; or equivalent.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

OR 782 - Advanced Topics in Combinatorial Optimizations

Credits: 3 (RD)
Studies problems using most recent developments. Topics include cutting plane procedures based on polyhedral combinatorics; column-generation procedures for large, complex problems; heuristic approaches such as genetic algorithms, simulated annealing, and tabu search; study of special structures; reformulation techniques; and bounding approaches. Topics stress most recent developments in field.

Prerequisite(s): OR 641 and 642.

Notes: May be repeated for credit when topics are distinctly different.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

OR 783 - Advanced Topics in Network Optimization
Recent developments in solving optimization problems on networks. Prepares doctoral students to perform advanced research on network-related problems. Topics include linear, discrete, nonlinear, and stochastic problems. Several aspects of problems also studied, including computational complexity, exact algorithms, heuristics, solvable special cases, and computer implementation issues.

**Prerequisite(s):** OR 643.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**OR 784 - Advanced Topics in Nonlinear Programming**

Credits: 3 (NR)  
Studies theory and algorithms for solving nonlinear optimization problems. Contents vary; possible topics include large-scale and parallel-unconstrained optimization, theoretical issues in constrained optimization, duality theory, Lagrangian and sequential quadratic programming methods.

**Prerequisite(s):** OR 644.

**Notes:** May be repeated for credit when topics are distinctly different.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**OR 842 - Models of Probabilistic Reasoning**

Credits: 3 (NR)  
Survey of alternative views about how incomplete, inconclusive, and possibly unreliable evidence might be evaluated and combined. Discusses Bayesian, Baconian, Shafer-Dempster, and Fuzzy systems for probabilistic reasoning.

Equivalent to IT 842, SYST 842

**Prerequisite(s):** STAT 544 or OR 681, or permission of the instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**OR 888 - Distributed Estimation and Multisensor Tracking and Fusion**

Credits: 3 (NR)  
Centralized and distributed estimation theory, hierarchical estimation, tracking and data association, multisensor multitarget tracking and fusion, distributed tracking in distributed sensor networks, track-to-track association and fusion, and Bayesian networks for fusion.

Equivalent to SYST 888/ECE 753
Prerequisite(s): ECE 734 or SYST 611.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

OR 944 - The Process of Discovery and Its Enhancement in Engineering Applications

Credits: 3 (NR)
Studies ingredients of imaginative reasoning as it concerns efficient discovery of new ideas and valid evidential test of them. Topics include different interpretations of Peirce's theory of abductive reasoning and other forms of reasoning, Hintikka's analysis of process of inquiry, and current attempts to design systems that provide assistance in discovery-related or investigative activities.

Equivalent to SYST 944

Prerequisite(s): OR 842 or SYST 842 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

OR 981 - Optimization in Medicine

Credits: 3 (NR)
Course focuses on the application of optimization to medicine, as well as on modeling used and solution approaches to the optimization problems generated. Particular attention is paid to algorithms and methodology not discussed in other optimization courses. Topics covered include nonlinear integer programs, large-scale nonlinear and integer programs, problems governed by differential equations, and more.

Prerequisite(s): OR 641, OR 642, OR 643, or OR 644.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

Organization Development and Knowledge Management (ODKM)

Offered by the School of Public Policy

ODKM 700 - Organizations, Management and Work: Theory and Practice

Credits: 3 (NR)
This introduction to organizations, management, and work examines ideas and practices from two perspectives: conventional ones that go back to the industrial age and scientific management; and contemporary ones that have to do with organizing knowledge-work. Covers contributions of a range of writers and deals with foundations of OD from the standpoint of both theory and practice.
ODKM 705 - Group Dynamics and Team Learning

Credits: 3 (NR)
Engaging in unstructured and semi-structured learning environment, students will learn how to facilitate team learning for organizational effectiveness. By exploring various aspects of group dynamics such as power, perception, motivation, leadership, and decision making, students will develop various competencies to manage teams and enhance their emotional and appreciative intelligence.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ODKM 710 - Social and Organizational Inquiry

Credits: 4 (NR)
Introduces participants to the ethics, conduct and evaluation of research into human, social and organizational realities. Explores relationships between what and how we measure and what we find. Students develop the capacity to reflect on themselves as research instruments, on their own impact on the systems under study, and on the impact of the research assumptions, framing and approach both on the results obtained and on the future development of those systems.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ODKM 715 - Creating Learning Organizations

Credits: 3 (NR)
Focuses on the epistemological and ontological implications of organizational life in the twenty-first century. Reevaluates traditional management approaches in light of global economies, instantaneous communication, changing technologies, and diverse workgroups in knowledge economies. Special attention to developing skills for "double- and triple-loop learning," and reflection in professional lives through learning conversations, journals, narrative, autobiography, and imaginative literature.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ODKM 720 - Collaborative Technologies for Knowledge Sharing

Credits: 3 (NR)
Examines the potential of collaborative technologies for creating effective knowledge sharing in organizations. Through the use of tools such as SharePoint, students will gain a comprehensive understanding of the state of the art of virtual work and collaboration technology and other subjects related to successful design of a collaborative knowledge work environment.
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ODKM 725 - Strategic Knowledge Management

Credits: 3 (NR)
An in-depth look at knowledge management, both theory and practices, which distinguishes between technology-oriented KM practices and people-oriented ones, with an emphasis on leveraging and sharing knowledge to get work done well and develop more effective organizations. Examines effective ways of organizing knowledge-work, including social networks, communities of practice, and the use of collaborative technologies.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ODKM 730 - Special Topics

Credits: 1-3 (NR)
Selected special topics in organization development and knowledge management not covered by existing ODKM courses.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ODKM 731 - Consulting Skills for Organizational Change

Credits: 3 (NR)
Explores various theories and practices of change management, collaborative consulting, action research, and organization development. Using class projects and case studies, students bring together their understanding of organization development, their values, and their personal style to perform more effectively in various consulting roles. Students also learn various aspects of process consulting and client relationship management.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ODKM 735 - Organizational Development Practices

Credits: 3 (NR)
Students develop applied knowledge of various organizational development practices such as action research and appreciative inquiry. Includes simulations to understand the complexities of real-world change management. Group projects with selected organizations will help students develop their diagnostic and analytical skills to become better facilitators of organizational learning.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
ODKM 740 - Learning Community

Credits: 3 (NR)
Using workshops, seminars, simulations, and structured experiences, students will learn how to build a learning Community of Practice (CoP) as practitioners of organization development. They will also reflect upon the community building experience using research findings and design practice sessions to apply the lessons learned to the work environment.

Equivalent to MNPS 720

Prerequisite(s): Candidates for the M.S. in ODKM degree only.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

Parks, Recreation, and Leisure Studies (PRLS)

Offered by the College of Education and Human Development

PRLS 110 - Exploring Outdoor Adventure

Credits: 2 (NR)
Provides students with an introduction to outdoor adventure activities and the leadership theory involved to plan the activities. Aims to bridge theory and practice as it pertains to outdoor adventure activities. Focuses on developing skills in a variety of outdoor recreation activities which include but are not limited to rock climbing, orienteering, canoeing, and challenge course team building.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 1
When Offered: Fall, Summer, Spring

PRLS 115 - Introduction to Fly Fishing

Credits: 1 (NR)
A practical course designed for students with little or no knowledge of fly fishing. The course will involve activities to teach students the basics of fly fishing to include terms and equipment, casting, knot tying, aquatic entomology, fly selection, reading water, wading techniques and safety, and fly fishing tactics. In addition to the one-hour classes required during the week, a full day on a stream will be included.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0

PRLS 116 - Introduction to Indoor Rock Climbing

Credits: 1 (NR)
Introduces equipment, techniques, safety, and planning related to basic rock climbing.
PRLS 117 - Rock Climbing

Credits: 2 (NR)
For individuals who have never done any formal rock climbing. Involves activities to teach students basic climbing terms, techniques, equipment, and safety practices for top rope belay climbing and rappelling. Builds communication skills and trust.

Notes: Fee required.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0

PRLS 118 - Intermediate Rock Climbing

Credits: 2 (NR)
For individuals who have some prior skills in rock climbing looking to further increase their skill level. Involves teaching students climbing terms, advanced knots, equipment, safety practices for redirect belay and top rope belay, as well as setting up techniques using rope and webbing. Special emphasis on anchor building will also be included. Ability to climb and rappel at least at the beginner's level will be required. This is not a certification course.

Prerequisite(s): PRLS 117

Notes: Fee required.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 0

PRLS 119 - Trap and Skeet Shooting

Credits: 2 (NR)
Designed to educate the student on gun and range safety. Includes hands-on learning of the games trap and skeet, where competitors fire at clay targets (approximately 4 ¼ inches in diameter and 1 ½ inches in height) launched from a trap at varying angles.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 0

PRLS 120 - Introduction to Backpacking
This practical and experiential course is designed for students with little or no knowledge of backpacking. Involves discussions, demonstrations, and activities to teach students the basics of backpacking. Topics covered include equipment selection and use, map and compass skills, backcountry cooking, staying healthy in the outdoors, safety and emergency procedures, backcountry ethics (Leave No Trace), and natural history. Application of these skills will be realized over a four-day backpacking trip. Not only will students have the opportunity to practice these skills, but they will also develop their leadership abilities by working in a collaborative team environment.

Notes: Fee required.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 0

PRLS 121 - Intermediate Trap and Skeet Shooting

Credits: 2 (NR)
Designed to increase the skill competencies in trap shooting. Includes hands-on learning of the different trap games (16-yard, handicap, doubles, and Olympic trap shoot on a wobble trap) where competitors fire at clay targets (approximately 4 ¼ inches in diameter and 1 ½ inches in height) launched from a trap at varying angles. Gun and range safety will also be emphasized.

Prerequisite(s): PRLS 119 or permission of instructor

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 0

PRLS 122 - Introduction to Horsemanship

Credits: 1 (NR)
Introduces the basics of horseback riding and horsemanship. Emphasis will be on learning how to care for a horse, tack a horse, and basic riding skills. Students will learn how to walk, trot, and jump small obstacles.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0

PRLS 123 - Intermediate Indoor Rock Climbing

Credits: 1 (NR)
Introduces the practices designed to move into the intermediate indoor climbing realm with a focus on efficient and creative body positions, including specific, more advanced techniques and strength training.

Prerequisite(s): PRLS 116 or permission of instructor

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0
PRLS 124 - Pistol Marksmanship

Credits: 1 (NR)
Introduces students to marksmanship skills in Olympic sport and target shooting. Increases students' knowledge of shooting safety, position shooting, equipment care and maintenance, and shooting sports competition methods and techniques.

Notes: Previous firearms experience is not required. Each student responsible for $120.00 range fee.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

PRLS 125 - Tracking, Trailing and Orienteering

Credits: 2 (NR)
Develops outdoor navigational and tracking skills and assumes no prior experience in tracking, trailing, or orienteering. Use of modern topographical maps and navigational compasses in a variety of settings.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

PRLS 170 - Introduction to White-water Kayaking

Credits: 2 (NR)
Designed to provide students an overview and entry-level skills and knowledge necessary to navigate rapids up to Class II difficulty and plan and execute trips on moving water. Includes instruction in, but not limited to, paddle strokes and maneuvers, boat handling, basic terminology, equipment, proper clothing, kayak design, trip planning, river safety, self and group rescue techniques, water reading, river etiquette, and environmental ethics. A high priority is placed on emphasizing safety aspects.

Notes: Fee required.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0

PRLS 173 - Basic Coastal Kayaking

Credits: 2 (NR)
This course is designed to provide students with the core skills and knowledge necessary to safely paddle sea/coastal kayaks and execute trips on rivers and coastal environments. Includes instruction in, but not limited to, boat handling, terminology, kayak design, trip planning, marine hazards and safety, rules of the nautical road, weather and tides, and environmental ethics. There will be several trips within 50 miles of Mason.

Notes: Fee required.
PRLS 174 - Open Water Coastal Kayaking

Credits: 2 (NR)
This course is designed to provide experienced coastal kayaking students with an introduction to advanced strokes and maneuvers, open water rescues, on-water navigation, and safety concerns related to open water.

Prerequisite(s): PRLS 173 or permission of instructor

Notes: Fee required.

PRLS 175 - Introduction to Rowing

Credits: 1 (NR)
This course is designed to provide students with the skills and knowledge necessary to row successfully in an eight-oared rowing shell. Includes instruction in, but not limited to, proper handling of rowing equipment, basic terminology, the proper execution of the rowing stroke, water safety, and team building.

PRLS 180 - White-water Canoeing

Credits: 2 (NR)
A practical course designed for students with little or no knowledge or skills in moving water and white-water canoeing. Involve activities to teach basic terms, rules, techniques for river safety, paddle strokes, boat control and maneuvering, reading river currents and conditions, self-rescue techniques, ethics and river etiquette, and running rivers up to Class II+ in difficulty. There will be one classroom and four all-day paddling sessions on regional rivers.

Prerequisite(s): Ability to swim fully clothed for five minutes and put on a PFD in water

PRLS 181 - White-water Canoeing II

Credits: 2 (NR)
A practical methods course to advance and refine the student's white-water canoeing skills with regard to paddle strokes, turns, maneuvers, boat control, and safety rescue skills.
Prerequisite(s): PRLS 180 or permission of instructor

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 0

PRLS 190 - Downhill Skiing

Credits: 1 (NR)
Basic skills and techniques of downhill skiing are taught and refined. Includes becoming familiar with use of ski equipment, terminology, and safety rules. Includes lecture and field experience to improve downhill skiing skills.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0

PRLS 191 - Snowboarding

Credits: 1 (NR)
Basic skills and techniques of snowboarding are taught and refined. Includes becoming familiar with use of equipment, terminology, and safety rules. Includes lecture and field experience to improve snowboarding skills. This course also consists of demonstrations, discussions, and videos.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0

PRLS 195 - Introduction to Hot Air Ballooning

Credits: 2 (NR)
Includes history, FAA regulations, equipment, weather, instruments, flight planning, balloon operations, and medical factors. Laboratory includes skill development as a crewmember and pilot, using an AX-8 hot air balloon. FAA student pilot certificates will be offered to all students. Although this is an introductory course, those completing it with a grade of B or better will be eligible to sit for the FAA written examination for lighter-than-air, free balloon, a requirement for the private pilot certificate.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 0

PRLS 200 - Wilderness First Responder

Credits: 2 (RD)
Examines the role of outdoor professionals in wilderness medicine and the response, care and rescue of outdoor participants in non-urban outdoor environments. Uses the Patient Assessment System (PAS) to assess backcountry patients in an intensive experiential course which addresses the issues of medico legal concerns, blood borne pathogens and infectious diseases.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 2
When Offered: Fall, Spring, Summer

PRLS 210 - Introduction to Recreation and Leisure

Credits: 3 (NR)
Traces the development of current concepts of recreation and leisure and their implications and consequences. Covers influences of philosophy, religion, science, economics, sociology, and politics on discretionary time and its uses.

Notes: Open to nonmajors.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PRLS 214 - Field Study in Natural History

Credits: 3 (RD)
Provides an introduction to natural history and its application in natural area interpretation through field study investigation of the environment. Covers fundamentals of bird, plant, animal, and rock identification, as well as sky and landscape interpretation.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PRLS 220 - Experiential Education Theory and Application

Credits: 3 (NR)
Provides a broad theoretical, as well as practical, background in teaching and learning experientially. Concepts presented, experienced, and discussed include the basic premises of experiential learning according to a wide variety of educators and philosophers. The content and experience applies to recreation, education, development, and therapeutic settings.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PRLS 221 - Challenge Course Facilitation

Credits: 3 (RD)
Provides the fundamental principles and techniques of challenge course facilitation. Classroom learning is combined with an experiential setting through leading youth groups in the field. Students are provided with an introduction to safety, skills, and facilitation techniques for low and high elements of outdoor challenge courses.

Prerequisite(s): CPR Certification and PRLS 220, or permission of instructor

Hours of Lecture or Seminar per week: 3
PRLS 241 - Practicum

Credits: 3 (NR)
Paid or voluntary work experience in a park and recreation agency. Minimum period of 10 to 12 weeks of part-time employment or experience. Capstone course for minors, allowing for integration and application of course work, theories, and research to a work setting. Work sites chosen among four approved sites. Includes meetings and assignments prior to and during the practicum.

Prerequisite(s): 60 hours and PRLS 210.

Notes: Open to departmental majors and minors only. Serves as a capstone for minors who have completed PRLS 310, 316, and 327.

PRLS 250 - Wilderness Travel and Sustainability

Credits: 2 (NR)
This experiential course is designed for students with prior backpacking experience. Involves discussions, demonstrations, and activities that teach students wilderness skills, safety and judgment, leadership and teamwork, and environmental ethics. Topics covered include basic wilderness first-aid, hazard evaluation, emergency procedures, expedition behavior, self awareness, judgment and decision making, campsite selection, shelter and stove use, fire building, sanitation and hygiene, cooking, nutrition and rationing, equipment care and selection, staying warm and dry, route finding and navigation, Leave No Trace backpacking, weather, natural history, and wilderness ethics. Application of these skills will occur during the 14-day offtrail backpacking trip in a remote wilderness area. Not only will students practice these wilderness skills, but they will also develop leadership abilities by working in a collaborative team environment.
Designated a Green Leaf Course.

Prerequisite(s): PRLS 120

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
Grading: Satisfactory/No Credit

PRLS 253 - Florida Everglades Canoe Expedition

Credits: 3 (NR)
Focuses on developing the knowledge and skills necessary to plan, manage, and participate in extended wilderness excursions by canoe in remote locations, while exploring a region's natural history. Students will be engaged in classroom preparation; training in canoeing and wilderness travel/living skills; group leadership; and environmental education in the Everglades National Park ecosystem. The class will travel and camp for 6 days/night in the Everglades back country by canoe as a self-contained group.
Students will perform a service project in the park. For students planning careers in outdoor recreation, interpretation, and natural resources management and planning; and students with a general interest in the course topics.

**Hours of Lecture or Seminar per week:** 2  
**Hours of Lab or Studio per week:** 1

**PRLS 300 - People with Nature**

Credits: 3 (NR)

Traces philosophical evolution of perceptions of and attitudes toward nature. Examines role of philosophers, scientists, nature-writers, and artists in the shaping of environmental thought. Includes extensive reading of Emerson, Thoreau, Muir, Leopold, Carson, Wilson, and others.  
Designated a Green Leaf Course.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**PRLS 302 - Park Management and Operations**

Credits: 3 (NR)  
Focuses on management and operations of park resources, including the management of visitors and recreation development. Emphasizes understanding of contemporary threats to park integrity and preservation of resources. Also covers maintenance management systems.

**Prerequisite(s):** PRLS 300

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**PRLS 310 - Program Planning and Design**

Credits: 3 (NR)  
Fundamental principles and techniques of the planning process for health, fitness, and recreation programs. Covers specifying an area of need; goals, objectives, and mission statement; generating solutions; and selecting a program design for implementation.

**Prerequisite(s):** HEAL 205, PHED 200, PRLS 210, SPMT 201 or TOUR 200. Prerequisite enforced by registration system.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**PRLS 316 - Outdoor Education and Leadership**
Focuses on promotion of lifelong health and fitness via noncompetitive and informal outdoor activities. Introduces safety, skills, and leadership techniques. Covers sustainable use, conservation, and stewardship of natural resources.

**PRLS 317 - Social Psychology of Play and Recreation**

Credits: 3 (NR)
Applies social psychological theories and research to the study of leisure, play, and recreation behavior, including correlates, antecedents, and consequences of and constraints to these concepts.

**Prerequisite(s):** Tour 200, PRLS 210, SPMT 201, or PHED 200.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**PRLS 327 - Foundations of Therapeutic Recreation**

Credits: 3 (NR)
An introduction to the processes and techniques of therapeutic recreation to meet the unique needs of people with disabilities. This course examines the history, concepts, theories, and foundations of therapeutic recreation.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**PRLS 360 - Bill of Rights Issues in Parks, Schools, and Public Places**

Credits: 3 (NR)
Examines issues, particularly those involving First Amendment free speech and freedom of religion issues such as political protests, religious displays, and use permits.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**PRLS 362 - Cultural and Environmental Interpretation**

Credits: 3 (NR)
Focuses on communication processes and practices used to explain and interpret special characteristics of cultural and environmental resource sites for visitors. Conceptual principles for planning interpretive programs and multi-media delivery techniques are discussed. Methods for programming interpretive services, addressing multi-audience accessibility, and administration and evaluation of interpretive services used at recreation and tourism sites are also examined.
**Prerequisite(s):** PRLS 300, or PRLS 328, or TOUR 352 or permission of instructor.

**Hours of Lecture or Seminar per week:** 0  
**Hours of Lab or Studio per week:** 1-12  
**When Offered:** Spring

---

**PRLS 402 - Human Behavior in Natural Environments**

Credits: 3 (NR)

Applies social and behavioral theories to management for recreational users of land and water resources. Examines deterioration and pollution of land and water, noise, crowding, and conflicts among users. Discusses strategies for mitigation of deleterious impacts and depreciative behaviors, and attitudes toward resource conservation, preservation, and use. Designated a Green Leaf Course.

**Prerequisite(s):** PRLS 210 and 300, or permission of instructor, and 60 credits

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**PRLS 405 - Planning, Design, and Maintenance of Leisure Facilities**

Credits: 3 (NR)

Covers quantity, location, and design standards for facilities. Includes safety, functionality, durability, and maintenance demand criteria in planning and design; programmatic and operational objectives to be met, including user comfort and convenience, crowd management, and traffic flow, and space relationships. Includes field study of local facilities.

**Prerequisite(s):** PRLS 310 or permission of instructor, and 60 credits

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**PRLS 410 - Administration of RHT Organizations I**

Credits: 3 (NR)

Focuses on operation and management of health, fitness, and recreation services organizations. Covers management and leadership theories and techniques, problem-solving and decision making, organizational communications, design of organizational structures, and budgeting.

**Prerequisite(s):** 60 hours or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0
PRLS 411 - Administration of RHT Organizations II

Credits: 3 (NR)
Focuses on planning techniques for health, fitness, and recreation organizations. Covers program and organizational marketing principles and strategies; service quality assessment and organizational evaluation techniques; and organizational financing.

Prerequisite(s): PRLS 410 and 60 hours.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PRLS 416 - Trends and Programming Assessment in Therapeutic Recreation

Credits: 3 (NR)
Explores the role of leisure in human development with a specific focus on needs, demands, and services for people with disabilities and illness. Presents concepts associated with leisure, aging, physical challenge, targeting leisure services, research, and public policy.

Prerequisite(s): PRLS 327

Notes: Field experience required.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PRLS 417 - Processes, Techniques and Supervision in Therapeutic Recreation

Credits: 3 (NR)
Exploration of processes and techniques used in Therapeutic Recreation, with a focus on the nature and diversity of recreation and leisure activities, modalities and interventions, facilitation techniques and approaches, leadership roles and tasks, communication skills, clinical supervision, health and safety considerations, and the impact of the impairment and/or treatment on the individual.

Prerequisite(s): PRLS 327 and PRLS 416

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

PRLS 418 - Assessment in Therapeutic Recreation

Credits: 3 (NR)
Presents methods of assessment, development of treatment program plans, and evaluation of all components. Extends program design by developing competencies in the planning approaches, individual and group assessment techniques, program evaluation, and documentation strategies for people with disabilities and illness.
**Prerequisite(s):** PRLS 327 and 416

**Notes:** Field experience required.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**PRLS 435 - Recreation Special Uses and Appeals**

Credits: 3 (NR)  
Management of extensive and varied commercial and noncommercial demands on federal lands. Policies and procedures used by federal land managers. Implementation, effects, and problems of permit systems; appeal provisions.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**PRLS 442 - Foundations of Public Domain Management**

Credits: 1 (NR)  

**Hours of Lecture or Seminar per week:** 1  
**Hours of Lab or Studio per week:** 0

---

**PRLS 443 - Special Uses Management on Federal Lands**

Credits: 4 (NR)  
Special use authority and authorizations. Policies, regulations, and directives in processing applications. Coordination and administration of special uses and integration with land and resource management plans. Includes agriculture, industry, community, aviation, water, treasure trove, and cultural uses.

**Hours of Lecture or Seminar per week:** 4  
**Hours of Lab or Studio per week:** 0

---

**PRLS 444 - Linear Uses and FERC Licenses on Federal Lands**

Credits: 3 (NR)  
Legislation, regulation policies, and directives governing linear uses. FERC licensing of hydroelectric power generation and distribution. Right-of-way for oil, gas, and electric transmission, railroads, communication, trams, conveyors, roads, and trails. FERC consultation, exemption, and licensing.
PRLS 445 - Valuation and Landownership Adjustment

Credits: 5 (NR)
Landownership authority, coordination, and adjustment processes; land valuation and rules, and processes of appraisal, title exchange, purchase, donation, transfer, sale, and condemnation of properties.

Hours of Lecture or Seminar per week: 5
Hours of Lab or Studio per week: 0

PRLS 446 - Right-of-Way Acquisition

Credits: 3 (NR)
Authorities and procedures right-of-way acquisition from public agencies and private landowners. Planning, coordination, and project scheduling requirements. Steps in the acquisition process. Cooperative development and use of roads.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PRLS 447 - Land Status, Boundaries, Claims, and Withdrawals

Credits: 3 (NR)
Land survey and status records system, programs for maintaining and managing boundaries, handling claims and encroachments, the land status record system, and Bureau of Land Management master title plot system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PRLS 448 - American Indian Rights and Claims

Credits: 3 (NR)
American Indian sovereignty, Alaska Native corporations, colonization; treaties, rights, and claims; cultural resources an Indian laws and consultation with tribal governments.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PRLS 450 - Research Methods
Credits: 3 (NR)
Covers the development of empirical research designs for both practical and theoretical problems in health, fitness, and recreation resources management. Includes literature review of hypothesized relationships, and formulation of research proposals.

Fulfills writing intensive requirement in the major.

Prerequisite(s): 60 credits and one of the following: STAT 250, DESC 210 OM 210, SOC 313, OM 250, or IT 250. Prerequisite enforced by registration system.

Notes: Only STAT 250 meets the Mason Quantitative Reasoning General Education requirement.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PRLS 460 - Sport and Recreation Law

Credits: 3 (NR)
Emphasizes safety, liability, and risk. Covers current law and liability issues for administrators of RHT facilities and programs.

Prerequisite(s): 60 credits

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PRLS 480 - Special Topics in Parks, Recreation, and Leisure Studies

Credits: 1-3 (NR)
Selected topics reflecting interest in specialized areas of parks and outdoor recreation or therapeutic recreation.

Prerequisite(s): 60 credits.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PRLS 490 - Internship

Credits: 12-15 (NR)
Paid or voluntary work experience in a park and recreation agency for a minimum period of 10-12 weeks of full-time employment, and 480 hours for therapeutic recreation students. Applies course work, theories, and research to work settings. Work sites are chosen by students after approval of faculty supervisors. Includes meetings and assignments before and during internship.

Prerequisite(s): 90 credits; HEAL 205 and 323; PHED 200; and PRLS 210, 310, 316, and 410

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 12
Grading: Satisfactory/No credit only
PRLS 499 - Independent Study

Credits: 1-3 (NR)
Individual study of topic area in leisure research, theory, or practice under direction of faculty.

Prerequisite(s): 90 credits

Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 0

PRLS 501 - Introduction to Natural Resources Law

Credits: 3 (NR)

Selected legal issues involving conflicting use and preservation demands on our nation's limited natural resource base, particularly those involving public lands, open space, and recreation resources. Uses case studies of recent court decisions. Designated a Green Leaf Course.

Prerequisite(s): PRLS 460 and 90 credits, graduate status, or permission of instructor

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PRLS 503 - Administration and Disability Rights in Therapeutic Recreation

Credits: 3 (NR)
Overview of major law and policy issues related to therapeutic recreation services for people with disabilities. Primary focus is on the Americans with Disabilities Act and related federal legislation.

Prerequisite(s): PRLS 460 and 90 credits, or graduate status; or permission of instructor

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PRLS 526 - Environmental Education and Resource Interpretation

Credits: 3 (NR)
Provides methods for communicating and disseminating information pertaining to the use of natural recreation resources. Covers design and implementation of educational materials and programs to enhance understanding and appreciation of cultural, historical, and natural resources.

Prerequisite(s): PRLS 402 or permission of instructor, and 90 credits
PRLS 531 - Natural Resources Recreation Planning

Credits: 3 (NR)

Origins and evolution of recreation use philosophy, policies, and service of public estate management. Examines planning for a spectrum of opportunities, from wilderness to developed sites, with attention to financial consideration and sustainable use of cultural and visual resources. Designated a Green Leaf Course.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PRLS 533 - Visitor Services

Credits: 3 (NR)

Examines motivation of resource-based recreation participants. Covers visitors' expectations and perceptions, with emphasis on implication for service quality, staff training, and other management responsibilities. Discusses use and user conflicts and placement, information and interpretive service, and human and other interpretive service resources.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PRLS 535 - Evaluating Recreation Outcomes

Credits: 3 (NR)

Covers application of quantitative and qualitative research methods to the evaluation of programs provided to visitors and users of public lands for outdoor recreation. Focuses on needs assessment and application of meaningful measures for formative and summative evaluations.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PRLS 542 - Foundations of Public Domain Management

Credits: 1 (NR)

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0
PRLS 560 - Liability and Risk Management

Credits: 3 (NR)
Examines liability and risk; federal jurisdiction, legal apparatus, and decision-making; and analysis of resource-based recreation case law.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PRLS 598 - Special Topics

Credits: 1-6 (RD)
Projects related to parks, recreation, and leisure studies.

Prerequisite(s): 90 credits

Notes: May be repeated for a total of 6 credits.

Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 0

PRLS 599 - Independent Study

Credits: 1-3 (RD)
Study of a problem area in parks, recreation, and leisure studies research; theory or practice under the direction of faculty member.

Prerequisite(s): 90 credits

Notes: May be repeated. No more than 3 credits may be earned.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0

PRLS 601 - History of Leisure and Sport in American Society

Credits: 3 (NR)
Examines leisure and sport in American society from the early colonial period to the present day. Investigates the pattern of leisure and sport as America moved from a largely agrarian to a highly industrialized nation.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
PRLS 610 - Recreation Administration and Planning

Credits: 3 (NR)
Examines recreational administration concepts regarding organizational structure and operations, personnel management, financing, policy development, and public relations procedures.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PRLS 611 - Social Psychology of Leisure

Credits: 3 (NR)
Addresses historical, theoretical, and empirical foundations of social psychological constructs relative to social behavior in park, recreation, sport, and tourism settings. Focuses on attitudinal, social, and motivational theories as applied to leisure-related contexts.

Prerequisite(s): Graduate student status

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PRLS 612 - Philosophy of Leisure and Sport

Credits: 3 (NR)
Investigates the phenomenon of leisure and sport from a philosophical perspective. Utilizes the philosophical approach to better explain the role that leisure and sport play in American society.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PRLS 614 - Legal Issues in Recreation Administration

Credits: 3 (NR)
Surveys current legal issues relevant to Recreation Administration, including, but not limited to, tort law, civil rights law, employment law, constitutional law, and copyright law. This course uses case studies of recent court decisions.

Prerequisite(s): Graduate status or permission of instructor

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PRLS 635 - Recreation Special Uses and Appeals
Management of extensive and varied commercial and noncommercial demands on federal lands. Policies and procedures used by federal land managers. Implementation, effects, and problems of permit systems; appeal provisions.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**PRLS 643 - Special Uses Management on Public Lands**

Credits: 4 (NR)  
Special use authority and authorizations. Policies, regulations, and directives in processing applications. Coordination and administration of special uses and integration with land and resource management plans. Includes agriculture, industry, community, aviation, water, treasure trove, and cultural uses.

**Hours of Lecture or Seminar per week:** 4  
**Hours of Lab or Studio per week:** 0

**PRLS 644 - Linear Uses and FERC Licenses on Federal Lands**

Credits: 3 (NR)  
Legislation, regulation policies, and directives governing linear uses. FERC licensing of hydroelectric power generation and distribution. Right-of-way for oil, gas, and electric transmission, railroads, communication, trams, conveyors, roads, and trails. FERC consultation, exemption, and licensing.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**PRLS 645 - Valuation and Landownership Adjustment**

Credits: 5 (NR)  
Landownership authority, coordination, and adjustment processes; land valuation and rules, and processes of appraisal, title exchange, purchase, donation, transfer, sale, and condemnation of properties.

**Hours of Lecture or Seminar per week:** 5  
**Hours of Lab or Studio per week:** 0

**PRLS 646 - Right-of-Way Acquisition**

Credits: 3 (NR)  
Authorities and procedures right-of-way acquisition from public agencies and private landowners. Planning, coordination, and project scheduling requirements. Steps in the acquisition process. Cooperative development and use of roads.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0
PRLS 647 - Land Status, Boundaries, Claims, and Withdrawals

Credits: 3 (NR)
Land survey and status records system, programs for maintaining and managing boundaries, handling claims and encroachments, the land status record system, and Bureau of Land Management master title plot system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PRLS 648 - American Indian Rights and Claims

Credits: 3 (NR)
American Indian sovereignty, Alaska Native corporations, colonization; treaties, rights, and claims; cultural resources an Indian laws and consultation with tribal governments.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PRLS 670 - Environmental Law

Credits: 3 (NR)
Focuses on interpretation of environmental laws and regulatory issues. Emphasizes critical evaluation of alternatives to unresolved issues in environmental policies involving endangered species, hazardous waste, and toxic substances.

Prerequisite(s): Graduate status and courses in ecology and environmental biology, or permission of instructor

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

Persian (PERS)

PERS 110 - Elementary Persian

Credits: 6 (NR)
Introduces elements of grammar, vocabulary, oral skills, listening comprehension, and reading.

Hours of Lecture or Seminar per week: 6
Hours of Lab or Studio per week: 0
PERS 210 - Intermediate Persian

Credits: 3 (NR)
Continuation of the development of basic components of the language, with focus on listening, speaking, reading, and writing skills. Introduces students to the cultures and histories of Persian-speaking regions.

Prerequisite(s): PERS 110, appropriate placement score, or permission of department.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

Philosophy (PHIL)

Offered by the College of Humanities and Social Sciences

PHIL 100 - Introduction to Philosophy

Credits: 3 (NR)
Introduction to the nature of philosophical reasoning and some of the main problems of philosophy.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PHIL 101 - Introduction to Philosophy for Prospective Majors

Credits: 3 (NR)
In this course, students can learn what distinguishes philosophy from other intellectual fields, major contributions in the history of philosophy, and basic philosophical issues, as well as how to develop the skills needed to address those issues oneself. The course is geared to the needs and the interests of students who may want to consider declaring philosophy as their major.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PHIL 112 - Ethics and the Cybersociety

Credits: 1 (NR)
Examines ethical issues associated with new developments in information technology, including privacy rights, intellectual property rights, and the effect of information technology on society.

Fulfills general education requirement in information technology (ethics only).

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0
PHIL 151 - Introduction to Ethics

Credits: 3 (NR)
Considers some perennial issues in ethical theory.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PHIL 156 - What Is Art?

Credits: 3 (NR)
Introduction to philosophical reflection on the arts by looking at the critical issues in the history of aesthetics. Applies considerations to specific works and exploring these works in terms of their historical contexts and influences. Concentrates on one form of art or one period and always emphasizes questions of critical evaluation and art historical analysis.

Fulfills general education requirement in arts.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PHIL 173 - Logic and Critical Thinking

Credits: 3 (NR)
Basic concepts and techniques of deduction, emphasizing the modern treatment of such topics as quantification and rules of inference, with study of the classical treatment. Basic principles of induction, informal fallacies, and uses of logic in everyday life.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PHIL 243 - Global Environmental Ethics

Credits: 3 (NR)
Examines the global dimensions of environmental problems. Although environmental problems are global in reach, because different societies make different philosophical and ethical assumptions, they are understood in different ways. Examines several environmental problems, including climate change, population growth, and resource depletion, from a variety of scientific, policy, and cross-cultural perspectives.

Fulfills general education requirement in global understanding.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PHIL 253 - Philosophy and Literature
Credits: 3 (NR)
Examines differences and relations between literary and philosophical texts. Examines texts from a given period in the history of literature and philosophy. Topics include the presence of common issues in literary and philosophical writings, the influence of philosophical ideas on the production of literary texts and literary theory, and the development in literary texts of issues that are possible objects of philosophical inquiry.

Fulfills general education requirement in literature.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PHIL 301 - History of Western Philosophy: Ancient

Credits: 3 (NR)
Classical Greek philosophy, including pre-Socratics, Socrates, Plato, and Aristotle.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PHIL 302 - History of Western Philosophy: Medieval

Credits: 3 (NR)
Figures and problems of medieval philosophy. Study of leading thinkers from the 5th to the 15th centuries.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PHIL 303 - History of Western Philosophy: Modern

Credits: 3 (NR)
Figures and problems of modern philosophy. Study of philosophers such as Descartes, Locke, Berkeley, Hume, Kant, and Hegel.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PHIL 305 - Business Ethics

Credits: 3 (NR)
Examines some moral problems that arise with regard to the responsibilities of various segments of the business community, including employers, management, stockholders; to one another; to the consumer; and to society at large.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
PHIL 306 - Philosophy Internship

Credits: 3 (NR)
Gives students the opportunity to apply philosophical skills in real-world settings. Internships arranged and supervised by faculty in the Department of Philosophy.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PHIL 309 - Bioethics

Credits: 3 (NR)
Examines some major moral issues involved in practice and research in medicine and health care. Topics to be chosen from medical experimentation, definition of death, physician-assisted dying, genetics and human reproduction, distribution of scarce resources, fertility, and organ transplants.

Fulfills general education requirement in synthesis.

Prerequisite(s): Completion or concurrent enrollment in all other general education courses.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PHIL 311 - Philosophy of Law

Credits: 3 (NR)
Investigation of theories of natural law, legal positivism, and legal realism as they pertain to some of the central philosophical questions about law.

Prerequisite(s): 3 credits of philosophy, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PHIL 312 - Philosophy of Technology

Credits: 3 (NR)
Philosophical examination of modern technology in its broadest human context. Several alternative philosophies of technology are considered. Examines the relationships between technology and religion, economics, and politics. Ethical issues raised by the use of technology are also examined. Typically, the course focuses on the ethical issues raised by the use of one kind of technology.

Prerequisite(s): 3 credits of philosophy, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
PHIL 313 - Philosophy of Religion

Credits: 3 (NR)
Study of classical appeals to philosophy in support of belief in god's existence (Philo, Augustine, Anselm, Aquinas, Descartes); the fideism of Hume and the metaphysical agnosticism of Kant; the concept of religious experience in the philosophies of Hegel, Schleiermacher, and Kierkegaard; and the problem of religious language in contemporary empirical philosophy.

Prerequisite(s): 3 credits of philosophy, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PHIL 323 - Classical Western Political Theory

Credits: 3 (NR)
Exploration through lecture and discussion of developments in the Western tradition of political thought from the time of the Greek city-state to late medieval Christendom, focusing on such topics as the nature and purpose of politics, the relationship between the individual and the state, the political significance of religion and tradition, and the concept of natural law.

Prerequisite(s): GOVT 101, or 3 credits of philosophy.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PHIL 324 - Modern Western Political Theory

Credits: 3 (NR)
Exploration through lecture and discussion of developments in the Western tradition of political thought from the Renaissance to the middle of the 19th century, focusing on such topics as the rise of individualism in political theory, early developments in social contact theory, theories of radical popular sovereignty, and early criticisms of liberal theory.

Equivalent to GOVT 324

Prerequisite(s): GOVT 101, or 3 credits of philosophy.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PHIL 325 - Karl Marx's Social and Political Thought

Credits: 3 (NR)
Study and evaluation of Marx's social and political ideas based on writings selected from several phases of his career. Examination of relation of Marx's thought to post-Marxian socialist theory and practice.
**PHIL 327 - Contemporary Western Political Theory**

Credits: 3 (RT)
Exploration through lecture and discussion of recent developments in the Western tradition of political thought from the middle of the 19th century to today. Different sections focus on one or another of the various political theories that have been influential during this period such as liberal, libertarian, conservative, communitarian, Marxist, feminist, and postmodern thought.

Equivalent to GOVT 327

**Prerequisite(s):** GOVT 101, or 3 credits of philosophy.

**Notes:** May be repeated for a maximum of 12 credits when topic is different.

**Hours of Lecture or Seminar per week: 3**
**Hours of Lab or Studio per week: 0**

**PHIL 332 - Twentieth-Century Analytic Philosophy**

Credits: 3 (NR)
Examination of the attempts of 20th-century philosophers to solve philosophical problems by an analysis of language. Figures and movements covered include Russell, Moore, Wittgenstein, logical positivism, and ordinary language philosophy.

**Prerequisite(s):** 3 credits of logic and PHIL 303, or permission of instructor.

**Hours of Lecture or Seminar per week: 3**
**Hours of Lab or Studio per week: 0**

**PHIL 333 - American Philosophy: Pragmatism**

Credits: 3 (NR)
Examines the philosophical movement of American Pragmatism, with emphasis on its origin in the late nineteenth century. Figures covered include Peirce, James, Dewey, and Mead.

**Prerequisite(s):** 3 credits of philosophy, or permission of the instructor.

**Hours of Lecture or Seminar per week: 3**
**Hours of Lab or Studio per week: 0**

**PHIL 335 - Nineteenth-Century Philosophy**
Credits: 3 (NR)
Development of German Romanticism and Idealism during a brilliant period in the history of the West rivaled only by ancient Greece. Kant, Fichte, Hegel, Kierkegaard, Schopenhauer, and Nietzsche mount a revolt against the rationalism and scientism of the modern world.

Prerequisite(s): 3 credits of philosophy, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PHIL 336 - Twentieth-Century Continental Thought: Existentialism

Credits: 3 (NR)
Examination of existential philosophy from its 19th-century origins to its 20th-century expressions. Philosophers studied include Kierkegaard, Nietzsche, Sartre, De Beauvoir, and Buber.

Prerequisite(s): 3 credits of philosophy, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PHIL 337 - Twentieth-Century Continental Thought: Phenomenology

Credits: 3 (NR)
Examines phenomenological way of doing philosophy, its findings in regard to the "life-world," questions of "first philosophy," and the subject matter of the social sciences, as well as critical difficulties in its development. Texts by Husserl, Heidegger, Merleau-Ponty, Sartre, Schutz, and Derrida.

Prerequisite(s): 3 credits of philosophy, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PHIL 338 - Philosophy, Sex, and Gender

Credits: 3 (NR)
An exploration of how concepts of sex and gender both structure key philosophical ideas and put such ideas into question. The course examines the ways patriarchal structures situate woman as the 'other' as well as alternative feminist approaches to sexuality, subjectivity, the body, and language. An overriding theme is the relationship between questions of sexual difference and other key issues in contemporary philosophy.

Prerequisite(s): 3 credits of philosophy, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring
PHIL 340 - Hermeneutic Philosophy

Credits: 3 (NR)
Study of the development of hermeneutic philosophy in works by Heidegger, Gadamer, and Ricoeur, as an effort toward coming to terms with the historicity of human experience. Implications for interpretive understanding of artworks, institutions, events, texts, and the human condition.

Prerequisite(s): 3 credits of philosophy, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PHIL 343 - Topics in Environmental Philosophy

Credits: 3 (NR)
An in-depth examination of selected environmental issues from a philosophical perspective. Such issues might include the value of nature, the moral status of animals, duties to protect wilderness areas, economics and environmental protection, environmental justice, and environmental aesthetics.
Designated a Green Leaf Course.

Fulfills general education requirement in synthesis.

Prerequisite(s): Completion or concurrent enrollment in all other required general education courses.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PHIL 344 - Ethical Issues in Global Health

Credits: 3 (NR)
This course will consider ethical questions that arise in global health policy, practice and research.

Prerequisite(s): Sophomore standing or higher.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PHIL 349 - Christian Ethics

Credits: 3 (NR)
Examines the foundations of Christian and Jewish ethics from the Hebrew Bible and studies the meaning of Christian teachings. Examines Catholic, Orthodox, and Protestant texts as the framework to explore various Christian positions on major ethical
issues such as war, embryonic stem cell research, abortion, and euthanasia in order to understand the meaning of the Christian life as it is faithfully practiced by members of the major Christian groups.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**PHIL 354 - Topics in Modern Jewish Thought**

Credits: 3 (NR)  
Surveys modern Jewish thought, engaging some of the most important themes of this period including Jewish responses to rationalism, romanticism, idealism, existentialism, and legalism. Studies work from Baruch Spinoza to Emanuel Levinas.

Equivalent to RELI 354

**Prerequisite(s):** 3 credits in religious studies or philosophy or permission of instructor.

**Notes:** Students may not receive credit for both PHIL 354 and RELI 354

**Hours of Lecture or Seminar per week:** 2.5  
**Hours of Lab or Studio per week:** 0

**PHIL 355 - Theories of Ethics**

Credits: 3 (RD)  
A critical examination of a variety of different types of classical, modern, and contemporary ethical theories, including consequentialist theories, deontological theories, and virtue theories.

**Prerequisite(s):** Three credits in philosophy or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**PHIL 356 - Philosophy of Art**

Credits: 3 (NR)  
Basic problems that arise from an inquiry into meaning and value of art and our response to art.

**Prerequisite(s):** 3 credits of philosophy, or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**PHIL 357 - Philosophy of the Social Sciences**
Philosophical issues relating to competing methodologies for the social sciences. Analysis and critique of mainstream positivism and behaviorism; paradigm theory and scientific revolutions; interpretive understanding and hermeneutical science; phenomenology and the social construction of reality; ethnomethodology and situational meaning; analytic philosophy and action theory; the "idea" of a social science; sociology of knowledge and theory of ideology; and Western Marxism and critical theory.

Equivalent to SOCI 599

Prerequisite(s): 3 credits of philosophy, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PHIL 358 - Ethics and Economics

Credits: 3 (NR)
Examines issues at the intersection of ethics and economics. Looks at the different ways in which ethics and economics impact each other.

Prerequisite(s): 3 credits in philosophy or permission of the instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PHIL 371 - Philosophy of Natural Sciences

Credits: 3 (NR)
One semester of logic recommended. Study of aims and methodology of science. Among the questions of concern are: What constitutes a good scientific explanation? What grounds are used for comparing rival theories? Is there a special method of scientific discovery?

Prerequisite(s): 3 credits of philosophy, or permission of instructor

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PHIL 373 - Theory of Knowledge

Credits: 3 (NR)
Discussion of basic problems concerning the nature of knowledge, with study of the relation of knowledge to perception, belief, and language.

Prerequisite(s): 3 credits of philosophy, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
PHIL 374 - Philosophy of Mind

Credits: 3 (NR)
Investigation of such theories as dualism, behaviorism, and materialism as they pertain to some of the central philosophical questions about mind.

Prerequisite(s): 3 credits of philosophy, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PHIL 375 - Metaphysics

Credits: 3 (NR)
Study of basic problems concerning being in general and foundations of individual being; traditional treatments of such problems and criticism of possibility of such knowledge. Selected readings from Plato, Aristotle, Aquinas, Spinoza, Leibniz, Kant, Bradley, Heidegger, and others.

Prerequisite(s): 3 credits of philosophy, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PHIL 376 - Symbolic Logic

Credits: 3 (NR)
Study of predicate calculi by means of a step-by-step construction of artificial languages. Topics include procedures for constructing a calculus, proof techniques, significant properties of predicate calculi, and procedures for recognizing phrases.

Prerequisite(s): PHIL 173 or MATH 110, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PHIL 377 - Darwin: Biology and Beyond

Credits: 3 (NR)
Introduction to and philosophical examination of the theory of evolution in its historical perspective. Examines Darwin's theory of evolution as a scientific theory, connect it to its context in the history of science, and survey its wider cultural impact. In particular, examine implications of the theory of evolution for religion and morality.

Fulfills general education requirement in synthesis.

Prerequisite(s): Completion or concurrent enrollment in all other required general education courses.
PHIL 378 - Reason, Science and Faith in the Modern Age

Credits: 3 (NR)
Historical examination of the rise of sciences in the modern age (1500-present) and the impact this has had on religion, drawing from such thinkers as Luther, Bacon, Galileo, Newton, Pascal, Hume, Darwin, Kierkegaard, and James.

Fulfills general education requirement in synthesis.

Prerequisite(s): Completion or concurrent enrollment in all other required general education courses, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PHIL 379 - Perspectives on Time

Credits: 3 (NR)
Examines the variety of ways time is conceptualized in different disciplines. Influential conceptions of time from the history of philosophy are studied in order to provide a comparative framework within which to consider specialist conceptions of time drawn from the sciences and humanities, including relativistic time, geological deep time, life cycles, and time in historical narrative.

Fulfills general education requirement in synthesis.

Prerequisite(s): 3 credits of philosophy, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring.

PHIL 391 - Special Topics in Philosophy

Credits: 3 (RT)
Examines topics of current interest such as death and dying, rights of children, and philosophical controversies in modern physics.

Notes: May be repeated for a maximum of 12 credits when topic is different.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PHIL 411 - Theories of Decision
Credits: 3 (NR)
Examines from a philosophical perspective descriptive and normative theories of individual decision, with particular focus on the strengths and weaknesses of theories of rational choice, and attempts to incorporate insights from psychology into theories of decision. Explores theoretical developments and a variety of applications.

Prerequisite(s): Two previous courses in either Philosophy, Psychology, or Economics.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PHIL 421 - Seminar

Credits: 3 (RD)
Explores topics in current philosophical research in a seminar format. Topics vary.

Prerequisite(s): 9 credits in philosophy. Students with fewer credits in philosophy may be admitted, at the discretion of the professor, if the topic is sufficiently close to their field of study.

Notes: May be repeated for a maximum of 18 credits when topic is different.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PHIL 422 - Honors Seminar

Credits: 3 (RT)
Seminar for students enrolled in the honors program in philosophy.

Prerequisite(s): 9 credits in philosophy and acceptance to the honors program in philosophy.

Notes: May be repeated for a maximum of 18 credits when topic is different.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PHIL 425 - Independent Study

Credits: 1-3 (RT)
Independent study under supervision of faculty member. Students and faculty agree on program of study to include at least a reading list and final written project. Students must arrange for independent study in the semester before they wish to enroll. Requires approval of department.

Prerequisite(s): 60 credits, including 15 credits in philosophy and permission of department.

Notes: May be repeated for credit.
**PHIL 427 - Feminist Political Thought**

Credits: 3 (NR)
Explores feminist political thought in historical context. Topics include feminist political movements, feminist critiques of political philosophy, and feminist contributions to political theory.

Prerequisite(s): GOVT 101 or WMST 200, or 3 credits of philosophy; or permission of instructor.

**PHIL 460 - Senior Seminar in Philosophy, Politics, and Economics**

Credits: 3 (NR)
Covers issues in the philosophy, economics, and political science of institutions, information, and collective action. Through case studies of existing legal and political institutions, applies the insights to problems in politics, policy making, social-choice theory, and social, moral, and political philosophy. (Specific content varies).

Equivalent to ECON 460, GOVT 469

Prerequisite(s): PHIL 358 and ECON 412 or permission of instructor.

Notes: Serves as the capstone course for the PPE program.

**PHIL 470 - Seminar: Philosophical Examination of Social Issues and the Law**

Credits: 3 (NR)
Philosophical study of social issues that are subject to legislation and judicial review. Analysis of the purpose and function of law in society lays the groundwork for reflection on specific issues such as abortion, euthanasia, capital punishment, divorce, child care, and health care.

Prerequisite(s): 3 credits in philosophy, or permission of instructor.

**PHIL 471 - Honors Seminar**
Credits: 3 (RT)
Honors version of PHIL 470.

Prerequisite(s): 9 credits in philosophy and acceptance to the honors program in philosophy.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PHIL 510 - Seminar in Ethics of Health Care

Credits: 3 (NR)
Examination of moral dilemmas within the health care profession on ethical theories and principles. Special emphasis on patients' rights, social justice of health care, and evolving health care technologies.

Prerequisite(s): 90 credits, graduate standing, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PHIL 600 - Proseminar in Philosophy

Credits: 1 (NR)
Introduces MA students to the areas and methods of philosophical scholarship.

Prerequisite(s): Graduate standing and enrollment in the Philosophy MA program.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0
Grading: Satisfactory/No Credit

PHIL 602 - Plato: Selected Dialogues

Credits: 3 (RD)
Study of the central issues in the philosophy of Plato through a close reading of selected dialogues. Issues investigated include the questions of the possibility of knowledge, the nature of being, and of the good.

Prerequisite(s): Graduate standing.

Notes: May be repeated for a maximum of 6 credits when topic is different.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PHIL 603 - Aristotle: Selected Works
Credits: 3 (RD)
Close study of Aristotle's work and its place and future in history of philosophy. Topics vary by semester and include Aristotle's metaphysics, natural sciences, ethics, political thought, logic, epistemology, and psychology.

Prerequisite(s): Graduate standing.

Notes: May be repeated for a maximum of 6 credits when topic is significantly different with permission of department.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PHIL 604 - Augustine and Aquinas

Credits: 3 (NR)
Critical examination of philosophies of Augustine and Aquinas with special attention to the mode of argument of each.

Prerequisite(s): Graduate standing.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PHIL 605 - Mind-Body Problem in Early Modern Philosophy

Credits: 3 (NR)
Examines views of major early modern philosophers on issues such as mind and body interaction, personal identity, and freedom of the will, as well as of interpretations of these philosophers by historians of philosophy.

Prerequisite(s): Graduate standing.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PHIL 608 - Hegel's Phenomenology of the Spirit

Credits: 3 (NR)
A study of the philosophy of Hegel through a reading of the text that presents an introduction to his system. Special attention is paid to Hegel's background in the work of Kant and the German Idealists.

Prerequisite(s): Graduate standing.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PHIL 611 - Philosophy of Law
Credits: 3 (NR)
Examines major jurisprudential theories that underpin law in Western society. After examining the theories, students apply them to contemporary social and political problems.

Prerequisite(s): Graduate standing, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PHIL 615 - Postmodernist Thought

Credits: 3 (NR)
In recent decades, the term "postmodern," first used by art critics in the late 19th century, has been taken up by prominent contributors to the arts, social thinkers, and philosophers, to describe developments as well as the current period. Examines three thematic concerns found in work that is identified with postmodern issues: what modernity defines itself in contrast to or against, the status of "man," and status of "subjectivity."

Prerequisite(s): Graduate standing or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PHIL 616 - Phenomenology

Credits: 3 (NR)
This major approach in philosophy is studied in regard to its basic features, the tasks to which it has been set by major contributors, certain findings of phenomenology in practice, as well as crucial problems that develop as phenomenology proceeds and how they are addressed by phenomenologists.

Prerequisite(s): Graduate standing.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PHIL 617 - Movements and Issues in the History of Political Philosophy

Credits: 3 (RD)
Explores themes, movements, and periods in the history of political theory.

Prerequisite(s): Graduate standing.

Notes: May be repeated for a maximum of 6 credits when topic is different.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
PHIL 618 - Contemporary French Feminism

Credits: 3 (NR)
Examines philosophical contexts of existential-phenomenological and psychoanalytic French Feminist. It explores the ways in which French feminist thought has influenced continental philosophical thinking and international feminist theory.

Prerequisite(s): Graduate standing.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PHIL 621 - Philosophy of Science

Credits: 3 (NR)
Explores whether and how scientific advances can be achieved. Special attention is paid to relativism and rationalism debates and to the role of technology in science.

Prerequisite(s): Graduate standing.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PHIL 631 - Freud and Philosophy

Credits: 3 (NR)
Explores philosophical aspects of Freud's thought, focusing on Freud's philosophy of human nature and culture, and influence on contemporary thought.

Prerequisite(s): 6 credits of philosophy, course in personality theory, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PHIL 632 - Twentieth-Century Logical Positivism

Credits: 3 (NR)
Examines 20th century logical positivism and its place in the history of philosophy. Topics include Russell's logical atomism and theory of descriptions, program of the Vienna Circle, attempts to formulate empiricist criteria of meaning, and legacy left by the movement.

Prerequisite(s): Graduate standing.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
**PHIL 640 - History of Ethical Theory**

Credits: 3 (NR)
Examines history of Western ethical theory from ancient Greece to the present day, including virtue theory, consequentialism, deontological theory and contemporary feminism.

Prerequisite(s): Graduate standing.

Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0

---

**PHIL 642 - Biomedical Ethics**

Credits: 3 (NR)
Explores the application of ethical theories and principles to issues in contemporary health care. Cases central to the development of the field will be examined.

Prerequisite(s): Graduate standing, or permission of instructor.

Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0

---

**PHIL 643 - Environmental Ethics**

Credits: 3 (NR)
An examination of human interactions with the natural environment from an ethical perspective. Emphasis will be placed on the strengths and weaknesses of various ethical theories and the different conceptions of the proper relationship between humans and their environment.

Prerequisite(s): Graduate standing.

Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0

---

**PHIL 644 - Business and Organizational Ethics**

Credits: 3 (NR)
Examines organizational culture as necessary for ethical development and of the application of ethics in business and organizational settings.

Prerequisite(s): Graduate standing or permission of instructor.

Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0
PHIL 645 - Research Ethics

Credits: 3 (NR)
Ethical theories, concepts, and principles, and how these shape research guidelines. Students learn to identify ethical issues in research, to reflect on them critically, and to respond effectively. Designed for students in the humanities, social sciences, life sciences, and health sciences.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PHIL 646 - International Ethics

Credits: 3 (NR)
Considers normative issues in international affairs, including global distributive justice, just war, foundations of human rights, harms to women, cultural and national identities, possibilities for transnational democracy, responsibilities of global corporations, and environmental ethics.

Prerequisite(s): Graduate standing, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PHIL 658 - Feminist Theory

Credits: 3 (NR)
Analysis of the critique of patriarchy offered by contemporary continental feminist philosophers. Examines contemporary moral, political, and epistemological issues in feminist theory.

Prerequisite(s): Admission to graduate program or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PHIL 673 - Current Issues in Theory of Knowledge

Credits: 3 (NR)
Advanced exploration of conditions and limits of knowledge, from the perspective of contemporary philosophy. Is there any infallible, or fallible but at least reasonable, foundation for achieving an understanding of the world and of our minds? This question is examined from the perspective of sense datum theory, coherentism, and various naturalized epistemologies. The nature of a priori knowledge (from mathematics and logic) is also examined.

Prerequisite(s): Admission to graduate program or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
PHIL 681 - Ancient Philosophical Figures

Credits: 3 (RT)
Examines major philosophical authors of crucial philosophical texts and their influence on philosophical thought.

Prerequisite(s): Graduate standing.

Notes: May be repeated for a maximum 6 credits when topic is different.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PHIL 682 - Early Modern Philosophical Figures

Credits: 3 (RT)
Examines major philosophical authors of the early modern period and their influence on philosophical thought.

Notes: May be repeated for a maximum of 6 credits when topic is different.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PHIL 683 - Contemporary Philosophical Figures

Credits: 3 (RT)
Examines major recent philosophical authors and their influence on philosophical thought.

Notes: May be repeated for a maximum of 6 credits when topic is different.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PHIL 691 - Special Topics in Ancient Philosophy

Credits: 3 (RT)
Examines topics of current interest in ancient philosophy.

Prerequisite(s): Graduate standing, or permission of instructor.

Notes: May be repeated for a maximum of 6 credits when topic is different.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
PHIL 692 - Special Topics in Early Modern Philosophy

Credits: 3 (RT)
Topics vary.

Notes: May be repeated for a maximum of 6 credits when topic is different.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PHIL 693 - Directed Readings in Philosophy

Credits: 3 (RT)
Directed readings and research on specific topic in philosophy chosen by student and instructor.

Prerequisite(s): Graduate standing or permission of instructor.

Notes: May be repeated for a maximum of 6 credits.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PHIL 694 - Special Topics in Contemporary Philosophy

Credits: 3 (RT)
Topics vary.

Notes: May be repeated for a maximum of 6 credits when topic is different.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PHIL 719 - Phenomenology of World

Credits: 3 (NR)
Studies one of the most fully deployed and enduring themes in phenomenological philosophy, namely, sense of "world."
Philosophers covered include Husserl, Heidegger, and Merleau-Ponty.

Prerequisite(s): Previous course in phenomenology, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PHIL 720 - Nietzsche and his Readers
Credits: 3 (NR)
Reading of major texts of Nietzsche and some of his most influential interpreters and critics.

Prerequisite(s): Graduate standing.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PHIL 721 - Advanced Seminar in Philosophy

Credits: 3 (RT)
Close study of selected topics in current philosophical discourse.

Prerequisite(s): Graduate standing.

Notes: May be repeated for credit when topic is different.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PHIL 733 - Current Issues in Cognitive Science

Credits: 3 (RD)
Examines current areas of investigation in cognitive science and philosophy of mind such as nature of consciousness, and representational and connectionist theories of mind.

Prerequisite(s): Admission to master's program in philosophy or permission of instructor.

Notes: May be repeated for a maximum of 6 credits when topic is different.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PHIL 799 - Thesis

Credits: 1-6 (RD)
Develop research and write an original thesis under the direction of their thesis director.

Prerequisite(s): Completion of 24 credits, approval of the thesis proposal, and permission of instructor (thesis director).

Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 0
Grading: Satisfactory/No Credit

Physical Education (PHED)
PHED 102 - Introduction to Soccer

Credits: 1 (NR)
This course is designed to introduce individuals to the basic elements of soccer. This includes dribbling, kicking, passing, trapping, tactics, and strategy.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0

PHED 103 - Fencing I

Credits: 1 (NR)
Gives the beginning student basic knowledge of the sport of fencing and teaches the fundamental movements required in the sport. Students should expect to learn some officiating and etiquette of the sport and acquire the ability to fence at the novice level. The instructor will use any combination of the following: instructional videos, written handouts, guest fencers for demonstrations, drills, and group and individual instruction.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0

PHED 105 - Aerobics and Basic Conditioning

Credits: 1 (NR)
Introduce students to fitness and healthy lifestyles. The course is designed to provide students with four lectures and multiple cardiovascular workouts. The lectures include cardiovascular endurance, cardiovascular diseases, body composition, nutrition, and weight management. The class also teaches students how to use cardiovascular equipment and how to design an aerobic fitness program. The course is geared for beginners, yet all students will be helped on an individual basis (therefore advanced individuals can also participate).

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0

PHED 107 - Social Dance

Credits: 1 (NR)
Provides a knowledge base of dance fundamentals and skill development in various ballroom dances and includes basic rhythms, dance positions, floor alignments, techniques of leading and following, and maintenance of dance frame in partner dancing.
PHED 108 - Weight Training and Body Conditioning

Credits: 1 (NR)
Introduces students to fitness and healthy lifestyles. The course is designed to provide students with an overview of the various types of weight training but primarily emphasizes circuit weight training method. There will usually be a brief lecture each week with a longer one two or three times during the semester. The lectures include the five health-related components of physical fitness, nutrition, and weight management. The class also teaches students how to use resistance and cardiovascular equipment, and how to design fitness programs. The course is designed for beginners, yet all students will be helped on an individual basis (therefore advanced individuals can also participate).

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0

PHED 110 - Beginning Swimming

Credits: 1 (NR)
Develops a knowledge base and basic swimming skills for the weak swimmer and nonswimmer, and make them water safe. These skills include, but are not limited to, locomotion and propulsive movements in a prone and supine position, breath control, rhythmic breathing, beginning diving techniques, personal safety, and rescue skills to maintain a water-safe environment.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0

PHED 113 - Latin Dance

Credits: 1 (NR)
Provides knowledge base of dance fundamentals and skill development in various Latin dances and will include basic rhythms, dance positions, floor alignments, techniques of leading and following, and maintenance of dance frame in partner dancing. Introduces dances which may include but not restricted to Merengue, Mambo, Samba, Salsa, and Bachata.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0
When Offered: Fall, Summer, Spring

PHED 118 - Advanced Life Guarding

Credits: 1 (NR)
Introduces and develops skills and knowledge necessary to become an American Red Cross-certified lifeguard. Focus is on training participants in aquatic facility and patron safety, in-water rescue skills, and physical conditioning. It teaches the lifeguard candidates to prevent, recognize, and respond to aquatic-related emergencies.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0

When Offered: Fall, Summer, Spring
Prerequisite(s): PHED 150 or permission of instructor

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0

PHED 120 - Introduction to Basketball

Credits: 1 (NR)
Introduces individuals to the basic elements of basketball. This includes dribbling, passing, shooting, tactics, and strategy.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 1-12

PHED 127 - Social Dance II

Credits: 1 (NR)
Provides an introduction to the tango and additional patterns for the fox trot, waltz, cha-cha, rumba, and Eastern swing.

Prerequisite(s): PHED 107 or permission of instructor

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0

PHED 128 - Fencing II

Credits: 2 (NR)
Reviews the advanced footwork and handwork techniques learned in Fencing I and expands on the third component of the sport, strategic tactics. Students are introduced to the rules and protocol of competitive fencing and use electric scoring equipment and electric fencing gear.

Prerequisite(s): PHED 103 or permission of instructor

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 0

PHED 129 - Introduction to Yoga

Credits: 1 (NR)
Introduces students to the practice of Hatha yoga. Class emphasis will be on learning yoga asanas (postures) and pranayama (breathing exercises) to enhance physical fitness and mental concentration.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0
**PHED 130 - Intermediate Yoga**

Credits: 1 (NR)
Class emphasis will be on mastering yoga asanas (postures) and pranayama (breathing techniques) to enhance physical fitness and mental concentration. Students will learn 10 new yoga poses and practice the complete Sun Salutation.

**Prerequisite(s):** PHED 129 or permission of instructor

**Notes:** Expands on the yoga practices taught in PHED 129.

**Hours of Lecture or Seminar per week:** 1  
**Hours of Lab or Studio per week:** 0

**PHED 131 - Introduction to Pilates**

Credits: 1 (NR)
Provides the history and basic foundations of Pilates including an introduction to beginning Pilates exercises and their proper execution; exploration of modifications for certain exercises and the various props which may be used in the group class setting.

**Hours of Lecture or Seminar per week:** 1-6  
**Hours of Lab or Studio per week:** 21  
**When Offered:** Fall, Spring

**PHED 134 - Self-Defense for Men and Women**

Credits: 1 (NR)
A practical self-defense course designed for students with little or no background in martial arts or self-defense. Defensive and offensive techniques are taught to prepare students for any potentially dangerous event they may encounter. The course will also improve student's physical and mental fitness.

**Notes:** Fee required.

**Hours of Lecture or Seminar per week:** 1  
**Hours of Lab or Studio per week:** 0

**PHED 135 - Self-Defense for Men and Women II**

Credits: 1 (NR)
A continuing practical self-defense course designed for students with a basic self-defense skill level or minimal martial arts experience. More advanced defensive and offensive techniques will be taught building on the student's previous training. Continued improvement in the student's physical and mental fitness will also be emphasized.

**Prerequisite(s):** PHED 134 or minimal martial arts experience.

**Notes:** Fee required.
PHED 136 - Tae Kwon Do

Credits: 1 (NR)
A beginner-level course designed to develop basic skills of Tae Kwon Do, a Korean martial art that predominantly emphasizes kicking.

Notes: Fee required.

PHED 137 - Intermediate Tae Kwon Do

Credits: 1 (NR)
An intermediate-level course that continues to develop basic skills of Tae Kwon Do. Course instruction continues to focus on the student's mental development, as well as physical training.

Prerequisite(s): PHED 136 or permission of instructor

Notes: Fee required.

PHED 138 - Brazilian Jiu-Jitsu

Credits: 1 (NR)
A practical self-defense course instructing students in Brazilian Jiu-Jitsu techniques designed for students who have no prior experience in martial arts or Brazilian Jiu-Jitsu. Brazilian Jiu-Jitsu's primary goal is to give advantage to those who use correct form, posture, and technique over strength.

Notes: Fee required.

PHED 139 - Brazilian Jiu-Jitsu II for Men and Women

Credits: 2 (NR)
A beginner-to-intermediate-level course teaching techniques in Brazilian Jiu-Jitsu. Students will learn specific defensive techniques to be used against an attacker along with escapes and submissions from a variety of different attacks. Students will
participate in basic sparring with particular attention to safety. Students will also undergo an intensive training and conditioning routine.

Prerequisite(s): PHED 138 or permission of instructor

Notes: Fee required.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 0

PHED 140 - Golf

Credits: 1 (NR)
A practical course designed for students with little or no golf knowledge. The course involves activities to teach students basic golf terms, rules, and techniques for the full swing, putting, chipping, and pitching, as well as playing on a golf course.

Notes: Fee required.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0

PHED 144 - Intermediate Golf

Credits: 2 (NR)
A practical course designed for students with basic golf knowledge and skills. The course will include course strategies, course management, the proper use of the rules, club selection, speed of play, skill building, and different golf formats.

Prerequisite(s): PHED 140 or permission of instructor

Notes: Fee required.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 0

PHED 145 - Beginning Judo for Men and Women

Credits: 1 (NR)
This is an introduction to Judo in which students will learn basic body mechanics of throwing, sweeping, grappling, and submission. Students will learn the fundamentals in these areas both for self-defense and sport. The history of judo, rules of the sport, and proper safety and falling techniques will be presented.

Notes: Fee required.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0
PHED 146 - Introduction to Badminton

Credits: 1 (NR)
A practical course designed as an introduction to badminton. Students learn badminton terms; scoring rules; and techniques for forehand, and backhand, and the serve. Students are also introduced to basic strategy for singles and doubles play.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0

PHED 147 - Advanced Tae Kwon Do

Credits: 1 (NR)
Advanced-level course that continues to enhance and refine skills of Tae Kwon Do. Students develop more extensive jump and spin kicks, as well as combinations of the same. Provides brown to black belt levels of promotion and continues to focus on each student's mental development and physical training.

Prerequisite(s): PHED 137 or permission of instructor

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

PHED 149 - Tai Chi

Credits: 1 (NR)
A beginner-level course designed to increase awareness of the mind and body. Students will be introduced to basic principles of Chi (energy) and Yin Yang (polarity) and how these apply to their bodies through practicing the Tai Chi Chih movements.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0

PHED 150 - Intermediate Swimming

Credits: 1 (NR)
A course designed to build on basic-level swimming skills by providing practice for confidence, refinement of coordination, and improvement of other aquatic skills. Presents more advanced swimming strokes and focuses on physical conditioning and aquatic safety.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0

PHED 151 - Introduction to Tennis
A practical course designed as an introduction to tennis. Involves activities to teach students tennis terms, rules, scoring, techniques for the forehand and backhand ground strokes, volley, overhead, and serve, as well as basic strategy for singles and doubles.

**Hours of Lecture or Seminar per week:** 1  
**Hours of Lab or Studio per week:** 0

**PHED 153 - Tennis II**

Credits: 1 (NR)  
Prepares experienced tennis player in advanced skills: point play, control of pace, direction, and depth of forehand and backhand, ground strokes, and topspin and underspin. Instructs tactical use of volley, styles of play, and strategies for singles and doubles. Introduces principles to refereeing. Applies skills-training to competitive and recreational play.

**Prerequisite(s):** PHED 151 or demonstrated ability.

**Notes:** Students with injuries or pre-existing conditions that might affect performance must inform the instructor. Students must provide their own tennis racquet, balls and shoes.

**Hours of Lecture or Seminar per week:** 1  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall, Summer, Spring

**PHED 155 - Introduction to Springboard Diving**

Credits: 2 (NR)  
A beginner-level course designed to increase awareness of the sport of diving, safety issues pertaining to competitive and recreational diving, competition formats, and history and evolution of the sport and scoring systems. Students will be introduced to fundamental skill progressions leading to basic dives.

**Prerequisite(s):** PHED 150 or permission of instructor

**Hours of Lecture or Seminar per week:** 2  
**Hours of Lab or Studio per week:** 0

**PHED 156 - Intermediate Springboard Diving**

Credits: 2 (NR)  
Students build on the fundamental skill progressions and perform more advanced skills and dives than in the introductory course (PRLS 155). Designed to increase awareness of the sport of diving, safety issues pertaining to competitive and recreational diving, competition formats, history and evolution of the sport, and scoring systems.

**Prerequisite(s):** PHED 155 or permission of instructor

**Hours of Lecture or Seminar per week:** 2  
**Hours of Lab or Studio per week:** 0
PHED 157 - Aikido for Men and Women

Credits: 1 (NR)
Designed for students who have no prior experience in martial arts. Can benefit those with a solid martial arts background. Mind-body techniques useful to all athletes and students are taught in a classical martial art self-defense context. Involves mind-body coordination exercises, and solo and partner practice. Gives all students a chance to execute throws, locks, and pins, both as the thrower and the one who takes falls.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0

PHED 158 - Underwater Hockey

Credits: 1 (NR)
Designed to provide basic instruction in the fundamentals of underwater hockey. Students learn free diving and snorkeling activities in preparation for underwater hockey. They will learn about and experience physiological reactions to aquatic submersion. Significant attention throughout this course will be given to safety issues related to underwater training, emphasizing current and lifelong skills.

Prerequisite(s): PHED 150 or permission of instructor

Notes: Fee required.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0

PHED 159 - Advanced Swimming

Credits: 1 (NR)
A course designed to build on intermediate-level swimming skills by providing practice to refine and perfect swimming strokes, so that students swim with more ease, efficiency, power, and smoothness over greater distances. Focuses on developing a higher level of fitness and maintaining better physical conditioning. Introduces other aquatic activities to enrich the class and broaden the horizons of the participant.

Prerequisite(s): PHED 150 or permission of instructor

Notes: Fee required.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0

PHED 160 - Intermediate Tai Chi
A second-level course for students to learn Tai Chi Weapon (Tai Chi Straight Sword), as well as practice the basic principles of Tai Chi. Students will increase awareness of the mind and body.

**Prerequisite(s):** PHED 149 or permission of instructor

**Hours of Lecture or Seminar per week:** 1  
**Hours of Lab or Studio per week:** 0

**PHED 162 - Introduction to Bowling**

Credits: 1 (NR)  
Students will learn the sport of 10-pin bowling. Topics covered are bowling etiquette, history of bowling, playing rules for league members, scoring, different approaches to the game, and the appropriate equipment for these approaches. Inexperienced and experienced bowlers are welcome to participate.

**Notes:** Fee required.

**Hours of Lecture or Seminar per week:** 1  
**Hours of Lab or Studio per week:** 0

**PHED 163 - Karate**

Credits: 1 (NR)  
American Kenpo Karate is the combination of art and science. Emphasizes techniques, forms (kata), and sets (drills). All the techniques are related by motion and principles. Each technique builds on the previous one, creating a web of knowledge.

**Hours of Lecture or Seminar per week:** 1  
**Hours of Lab or Studio per week:** 0

**PHED 164 - Intermediate Karate**

Credits: 1 (NR)  
Second-level course in American Kenpo Karate. Students review information and refine skills developed in the introductory class, as well as learn new forms and techniques to increase skill performance at the next level.

**Prerequisite(s):** PHED 163 or permission of instructor

**Hours of Lecture or Seminar per week:** 1  
**Hours of Lab or Studio per week:** 0

**PHED 165 - Introduction to Racquetball**
A practical course designed as an introduction to racquetball. Involves activities to teach students basic racquetball terms, rules, scoring, safety, and techniques for the forehand, backhand, overhead, and serve, as well as singles and doubles.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0

**PHED 166 - Intermediate Racquetball**

Credits: 1 (NR)
A practical course designed for the novice racquetball player. Course involves activities to teach students intermediate skills, including ceiling shots, kill shots, passing shots, back wall strokes, advanced serves, court positions, and tactics and strategies for singles and doubles.

Prerequisite(s): PHED 165 or permission of instructor

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0

**PHED 167 - Advanced Concepts and Strategies in Bowling**

Credits: 1 (NR)
Students will learn advanced concepts and strategies in the sport of Ten Pin Bowling. Topics covered are equipment, mental preparation, spare conversions, practice regimens, and strategies for different lane conditions. This course is intended for experienced bowlers.

Prerequisite(s): PHED 162 or permission of instructor

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0

**PHED 169 - Intermediate Judo for Men/Women**

Credits: 2 (NR)
This is a second level course with the emphasis placed on executing proper skills and movements and not the contact itself. The nature of this course incorporates both offensive and defensive movements, and these actions are accepted as part of the class. Excessive force, violence, or aggression will not be tolerated.

Prerequisite(s): PHED 145 or permission of instructor.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 0

**PHED 174 - Introduction to Volleyball**
PHED 176 - Introduction to Cricket

Credits: 1 (NR)
Introduces students to the basic knowledge and skills of volleyball.

Hours of Lecture or Seminar per week: 1
When Offered: Fall.

PHED 178 - Intermediate Pilates

Credits: 1 (NR)
Provides students with advanced knowledge and skills in Pilates techniques and exercises.

Prerequisite(s): PHED 130 or permission of instructor.

Hours of Lecture or Seminar per week: 1
When Offered: Fall.

PHED 179 - Introduction to Krav Maga

Credits: 1 (NR)
Introduces students to the principles and practice of Krav Maga, an Israeli system of self-protection. Involves knowledge of threat response, skill training in self-protection, and mental preparation for defensive tactics. Prepares students in appropriate protective action in situations of threat or attack.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0
When Offered: Fall.

PHED 181 - Introduction to Meditation

Credits: 1 (NR)
Introduces students to philosophical foundations of meditation. Guides in the practice of meditation and its application to daily mental focus and concentration.

Hours of Lecture or Seminar per week: 1
PHED 182 - Soccer II

Credits: 1 (NR)
Prepares the experienced soccer player in the aspects of the competitive game. Applies skills-training to competitive and recreational play. Covers strategies of offense and defense and variation of different systems of play.

Prerequisite(s): PHED 102 or Permission of Instructor.

Hours of Lecture or Seminar per week: 0.5
Hours of Lab or Studio per week: 0.5
When Offered: Fall, Summer, Spring

PHED 200 - Professional Dimensions of Health, Recreation, and Physical Education

Credits: 3 (NR)
Traces historical foundations of health, recreation, physical education, and sport.

Notes: Open to nonmajors.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PHED 201 - Developmental Motor Patterns

Credits: 3 (NR)
Analyzes motor-skill development and prescription of activities from immature to mature stages.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PHED 202 - Teaching Skillful Movement

Credits: 3 (NR)
Covers planning and presenting lessons on numerous motor skills using varied teaching strategies in a peer teaching setting.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PHED 230 - Asian Martial Arts: Origin and Development
Introduction to martial arts of East, South, and Southeast Asia. Lectures address martial arts from a historical, philosophical, biographical, warfare, and sport perspective.

**PHED 250 - Water Safety Instruction**

Credits: 2 (NR)
Introduces planning, organizing, and executing American Red Cross swimming and water safety courses. Focus is on educational methods, approaches, and skill development applicable to swimming and water safety instruction.

**Prerequisite(s):** PHED 150 and instructor evaluation

**Notes:** Fee required.

**Hours of Lecture or Seminar per week:** 2
**Hours of Lab or Studio per week:** 0

**PHED 255 - Basic Scuba Diving**

Credits: 2 (NR)
Provides training toward certification as an open water SCUBA diver. The course emphasizes the learning of snorkeling (free diving introduction) and SCUBA skills. Safe diving skills, the physics of diving, equipment care and maintenance, diving fitness, underwater navigation, record keeping, and other basic SCUBA knowledge will be covered in the course. On successful completion of the course, students will be qualified for open water certification by Scuba Schools International (SSI).

**Notes:** Fee required.

**Hours of Lecture or Seminar per week:** 2
**Hours of Lab or Studio per week:** 0

**PHED 273 - Net and Target Games**

Credits: 2 (NR)
Skill and content knowledge in net and target games. Includes skill progression, strategies, officiating, and authentic assessment in games such as volleyball, golf, tennis, and badminton.

**Notes:** Open only to PHED majors.

**Hours of Lecture or Seminar per week:** 1-6
**Hours of Lab or Studio per week:** 2

**PHED 274 - Dance and Educational Gymnastics**
Credits: 2 (NR)
Skill and content knowledge in dance, rhythms, and educational gymnastics.

Notes: Open to BPRE and BSED PHED majors only.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 2

PHED 275 - Field and Invasion Games

Credits: 2 (NR)
Skill and content knowledge in field and invasion games. Includes skill progression, strategies, officiating, and authentic assessment in activities such as softball, basketball, soccer, field events, and Ultimate Disc.

Notes: Open to BPRE and BSED PHED majors only.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 2

PHED 306 - Psychomotor Learning

Credits: 3 (NR)
Analyzes psychological aspects, learning theory, and practice conditions for learning motor skills.

Notes: Open only to PHED and HFRR majors.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PHED 308 - Adapted Physical Education

Credits: 3 (NR)
Introduces disabilities in public schools. Covers national standards, federal legislation, IEPs, and developmental inclusion models.

Prerequisite(s): BSED status or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PHED 340 - Social and Cultural Issues in Physical Education

Credits: 3 (NR)
Studies contemporary and historical perspectives on socio-cultural and philosophical issues influencing American public
schooling and physical education teacher preparation, including race, culture, ethnicity, nationality, globalization, socioeconomic status, gender, sexuality, ability, obesity, and urbanization.

Fulfills writing intensive requirement in the major.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

PHED 364 - Strength Training: Concepts and Applications

Credits: 3 (NR)
Provides students with an opportunity to develop an in-depth understanding of the principles of strength training and conditioning, including anatomical and physiological considerations, lifting techniques, equipment selection, program development and evaluation, and weightlifting safety.

Equivalent to KINE 360

Prerequisite(s): BIOL 124 and BIOL 125

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PHED 365 - Measurement and Evaluation of Physical Fitness

Credits: 3 (NR)
Covers selection, administration, evaluation, and construction of measurements and evaluation instruments and techniques in physical education. Also covers statistical analysis of data and survey of selected instruments.

Fulfills writing intensive requirement in the major.

Equivalent to KINE 370

Prerequisite(s): BIOL 124 and 125

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PHED 403 - Elementary School Instruction in Physical Education

Credits: 3 (NR)
Covers content, knowledge, and teaching methods for K-6 physical education. Requires field experience.

Prerequisite(s): PHED 201, 202, 273, 274, 275. Must be taken within one year of student teaching. Open to students with BSED status only.

Corequisite(s): PHED 306.
**PHED 404 - Middle and High School Instruction in Physical Education**

Credits: 3 (NR)
Examines school curriculum, assessment, content, and teaching practices for middle and high school physical education programs. Requires field experience.

**Prerequisite(s):** PHED 201, PHED 202, PHED 273, PHED 274, PHED 275, PHED 306, PHED 403, KINE 200 and 75 credit hours. Prerequisite enforced by registration system.

**Hours of Lecture or Seminar per week: 3**
**Hours of Lab or Studio per week: 0**

**PHED 410 - Social/Psychological Aspects of Health and Fitness**

Credits: 3 (RD)
Covers research, trends, and techniques of health and fitness from a behavioral perspective.

**Hours of Lecture or Seminar per week: 3**
**Hours of Lab or Studio per week: 0**

**PHED 415 - Student Teaching in Physical Education**

Credits: 9-12 (NR)
Provides supervised clinical experience for a full semester in approved schools. Requires experiences in elementary and secondary school settings. Includes participation in pre-service workshop and related activities, and weekly seminars.

Fulfills general education requirement in synthesis. (only for Physical Education BS majors).

**Prerequisite(s):** Completion of all courses in approved program, and acceptance into student teaching

**Hours of Lecture or Seminar per week: 1-4**
**Hours of Lab or Studio per week: 12**
**When Offered:** Fall, Spring

**PHED 442 - Practicum in Physical Education**

Credits: 1-3 (NR)
Provides supervised professional practice in a selected area of interest.
Prerequisite(s): 84 hours or 54 hours and Permission of Instructor.

Notes: May be repeated for up to 3 credits. Each credit requires a minimum of 60 hours of participation in the specialty over a period of six weeks. Areas selected with faculty advisor approval.

Hours of Lecture or Seminar per week: 2-3
Hours of Lab or Studio per week: 1-3

**PHED 480 - Special Topics**

Credits: 1-3 (NR)
See course description in the Schedule of Classes. Selected topics reflect interest in specialized areas of exercise science or health promotion.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**PHED 499 - Independent Study in Physical Education and Fitness**

Credits: 1-3 (NR)
Study of a problem area in physical education research, theory, or practice under direction of faculty member.

Prerequisite(s): Completion of 90 hours and Permission of Chair.

Notes: May be repeated, but no more than 3 total credits may be earned.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0

**PHED 670 - Analysis of Teaching in Physical Education**

Credits: 3 (NR)
Presents variety of research techniques for studying teacher and learner behaviors in physical education, engaging the teacher as researcher and grant writer. Goal is to prepare teachers to be leaders in their field.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**PHED 672 - Curriculum and Assessment in Physical Education**

Credits: 3 (NR)
Provides knowledge of curriculum models and assessment strategies in standards-based physical education program. Studies curriculum models such as sport education and adventure education. Examines traditional and alternative assessment.
PHED 673 - Motor Development for Special Populations

Credits: 3 (NR)
Provides knowledge that focuses on individuals with orthopedic, sensory, and learning disabilities in physical education setting. Areas of focus include development of motor patterns and skills assessment, and planning and instruction for students with disabilities.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PHED 680 - Mentoring and Supervising in Physical Education

Credits: 3 (NR)
Prepares mentors and supervisors of preservice and in-service teachers in physical education. Topics include professional dispositions, assessment and evaluation, adult learners, counseling and communication, providing feedback, and reflection and inquiry into the profession.

Prerequisite(s): PHED 670

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

Physical Sciences (PSCI)

Offered by the College of Science

PSCI 701 - Frontiers of Physical Sciences

Credits: 3 (NR)
Each semester, the course will cover between four and six topics considered to be at the frontiers of the physical sciences -the key questions that are of interest to researchers today. The topics will be chosen from interdisciplinary areas, such as nanoscience, astroparticle physics, nonlinear dynamics, and neuroscience. Approximately two to three weeks will be spent on each topic, and the specific topics may vary each semester. The course includes guest lectures given by faculty who are doing research in each area. Assignments include readings from the current literature as well as projects and class presentations.

Prerequisite(s): Admission to physical sciences doctoral program.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
PSCI 702 - Research Methods

Credits: 3 (NR)
This course trains students in research methodologies, techniques, and data analysis methods in the physical sciences. Covers approaches for outlining and synthesizing a problem, techniques for measurement and analysis, and methods used for data analysis and interpretation.

Prerequisite(s): Admission to physical sciences doctoral program.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PSCI 703 - Frontiers of Physical Sciences

Credits: 1 (RD)
Combines invited seminars from faculty (internal and external) with graduate student seminars. Presentation at a seminar is a requirement for advancement to candidacy in the physical sciences doctoral program.

Prerequisite(s): Admission to physical sciences doctoral program.

Notes: May be repeated three times.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0

PSCI 998 - Dissertation Proposal

Credits: 1-6 (RD)
Covers development of a research proposal under the guidance of a dissertation director and the doctoral committee. The proposal forms the basis for the doctoral dissertation.

Prerequisite(s): Admission to the PhD in Physical Sciences.

Notes: May be repeated as needed; however, no more than a total of 24 credits in PSCI 998 and 999 may be applied toward satisfying doctoral degree requirements. Out of 24, no more than 12 credits of PSCI 998 may be applied.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0
Grading: Satisfactory/No credit only

PSCI 999 - Doctoral Dissertation

Credits: 1-12 (RD)
Doctoral research performed under direction of dissertation director.

Prerequisite(s): Admission to the PhD in Physical Sciences.
Notes: May be repeated as needed, but no more than a total of 24 credits in PSCI 998 and 999 may be applied toward satisfying doctoral degree requirements.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0
Grading: Satisfactory/No Credit

Physics (PHYS)

Offered by the College of Science

PHYS 101 - Light and Sound in Our World

Credits: 3 (NR)
Nature of light, color, sound, electromagnetic spectrum, optical instruments, mechanisms of vision and hearing, color addition and subtraction, synthesis of musical sounds, interference of waves, polarization, Doppler effect, lasers, holography.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PHYS 102 - Sports Physics

Credits: 3 (NR)
Introduction to laws of physics in context of sports. Physics topics to be studied include two-dimensional motion, forces, conservation of energy, and momentum in the application to sports. Sports include football, basketball, baseball, swimming, and tennis.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PHYS 103 - Physics and Everyday Phenomena I

Credits: 4 (NR)
The course uses basic physics concepts from the areas of mechanics and thermodynamics to explain a wide range of everyday phenomena, such as how we walk and drive, how a ship floats, how clothing keeps us warm, and why it rains when we have a low pressure system.

Fulfills general education requirement in natural science (lab).

Notes: For nonscience majors.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 3
PHYS 104 - Physics and Everyday Phenomena II

Credits: 4 (NR)
The course uses basic physics concepts from the areas of light, sound, electricity, magnetism, and modern physics to explain a wide range of everyday phenomena. Topics include how we speak, hear, and see, what to do if the circuit breaker keeps tripping, how your computer stores and displays data, how rainbows and northern lights form, and the basic nature of matter.

Fulfills general education requirement in natural science (lab).

Prerequisite(s): PHYS 103 or permission of instructor.

Notes: For nonscience majors.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 3

PHYS 111 - Introduction to the Fundamentals of Atmospheric Science

Credits: 3 (NR)
An overview of the Earth's atmosphere, its history, and the physical and chemical processes that determine its characteristics. The focus is on key concepts from thermodynamics, radiation, chemistry, and dynamics that are essential for understanding the state, variability, and long term evolution of the atmosphere, especially in the context of comparisons with other planetary atmospheres.

Fulfills general education requirement in natural science (lab).

Equivalent to CLIM 111

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PHYS 112 - Introduction to the Fundamentals of Atmospheric Science Lab

Credits: 1 (NR)
Laboratory course associated with PHYS 111. Study of the Earth's atmosphere based on concepts taken from thermodynamics, radiation transport, chemistry, and dynamics.

Fulfills general education requirement in natural science (lab).

Equivalent to CLIM 112

Corequisite(s): PHYS 111

Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 1
**PHYS 121 - Uses of Physics**

Credits: 1 (NR)
Describes the uses of physics to a number of disciplines and professions, including medicine, information technology, energy, and environmental technology.

Notes: Introductory course intended for both majors and nonmajors.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0

**PHYS 122 - Inside Relativity**

Credits: 1 (NR)
Introductory course describing Einstein's theories of special and general relativity.

Notes: Intended for majors and nonmajors.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0

**PHYS 123 - Inside the Quantum World**

Credits: 1 (NR)
Introductory course describing quantum theory.

Notes: Intended for majors and nonmajors.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0

**PHYS 124 - Experimental Explorations in Physics**

Credits: 1 (NR)
Introductory nonmathematical course intended primarily for physics majors. Experimental studies of phenomena in mechanics, electricity and magnetism, and optics. Stresses development of familiarity with methods and techniques of measurement and with data evaluation.

Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 2

**PHYS 160 - University Physics I**
Credits: 3 (NR)
First semester of three-semester, calculus-based introductory physics sequence, designed primarily for science and engineering majors. Mechanics.

Fulfills general education requirement in natural science (lab).

Corequisite(s): MATH 114.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**PHYS 161 - University Physics I Laboratory**

Credits: 1 (NR)
Experiments in mechanics, including techniques for recording, graphically and statistically analyzing, and reporting data.

Fulfills general education requirement in natural science (lab).

Corequisite(s): PHYS 160 and MATH 114

Hours of Lecture or Seminar per week: 1-12
Hours of Lab or Studio per week: 3

**PHYS 225 - Problems in Physics I**

Credits: 1-3 (RD)
Individual study of physics problems of current interest.

Prerequisite(s): 24 credits and 2.50 GPA in physics and mathematics.

Notes: May be taken three times for credit.

Hours of Lecture or Seminar per week: 1-12
Hours of Lab or Studio per week: 0

**PHYS 243 - College Physics**

Credits: 3 (NR)
PHYS 243 is prerequisite to PHYS 245. Two-semester basic physics course with emphasis on topics of classical and modern physics of particular importance to science majors. Principles of mechanics, heat, electricity, magnetism, optics, and atomic and nuclear physics are discussed.

Fulfills general education requirement in natural science (lab).

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
PHYS 244 - College Physics Lab

Credits: 1 (NR)
Laboratory portion of two-semester basic physics course.

Fulfills general education requirement in natural science (lab).

Corequisite(s): PHYS 243 for 244, and 245 for 246.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 3

PHYS 245 - College Physics

Credits: 3 (NR)
Two-semester basic physics course with emphasis on topics of classical and modern physics of particular importance to science majors. Principles of mechanics, heat, electricity, magnetism, optics, and atomic and nuclear physics are discussed.

Fulfills general education requirement in natural science (lab).

Prerequisite(s): PHYS 243

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PHYS 246 - College Physics Lab

Credits: 1 (NR)
Laboratory portion of two-semester basic physics course.

Fulfills general education requirement in natural science (lab).

Corequisite(s): PHYS 243 for 244, and 245 for 246.

Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 3

PHYS 251 - Introduction to Computer Techniques in Physics

Credits: 3 (NR)
Introduction to using computers in physics based on examples from mechanics and astronomy.

Fulfills general education requirement in information technology (all except ethics).
Prerequisite(s): PHYS 160.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PHYS 260 - University Physics II

Credits: 3 (NR)
Waves, electricity, and magnetism.

Fulfills general education requirement in natural science (lab).

Prerequisite(s): PHYS 160 with grade of C or better (2.00)

Corequisite(s): MATH 213

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PHYS 261 - University Physics II Laboratory

Credits: 1 (NR)
Experiments in mechanics, electricity, and magnetism, including techniques for recording, graphically and statistically analyzing, and reporting data.

Fulfills general education requirement in natural science (lab).

Prerequisite(s): PHYS 161 Prerequisite enforced by registration system.

Corequisite(s): MATH 213 and PHYS 260

Hours of Lecture or Seminar per week: 1-12
Hours of Lab or Studio per week: 3

PHYS 262 - University Physics III

Credits: 3 (NR)
Thermodynamics, optics, and modern physics.

Fulfills general education requirement in natural science (lab).

Prerequisite(s): PHYS 260 with grade of C or better (2.00)

Corequisite(s): MATH 214

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
PHYS 263 - University Physics III Laboratory

Credits: 1 (NR)
Experiments in optics and modern physics, including techniques for recording, graphically and statistically analyzing, and reporting data.

Fulfills general education requirement in natural science (lab).

Prerequisite(s): PHYS 261 Prerequisite enforced by registration system.

Corequisite(s): PHYS 262

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 3

PHYS 265 - Advanced University Physics II Laboratory

Credits: 2 (NR)
Credit may be received for PHYS 261 or 265. Experiments in mechanics, electricity, and magnetism with emphasis on data analysis using spreadsheets and Matlab.

Corequisite(s): MATH 213 and PHYS 260.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 3

PHYS 266 - Introduction to Thermodynamics

Credits: 1 (NR)
Students may not receive credit for both PHYS 262 and 266. Laws of thermodynamics, kinetic theory of gases, heat engines, and entropy.

Prerequisite(s): PHYS 260.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0

PHYS 303 - Classical Mechanics

Credits: 3 (NR)
Motion of a particle in one, two, and three dimensions; systems of particles; noninertial coordinate systems; and equations of Lagrange and Hamilton.

Prerequisite(s): PHYS 262 and MATH 214 or permission of instructor.
### PHYS 305 - Electromagnetic Theory

Credits: 3 (NR)
Interaction of static charges, interaction of stationary currents, electromagnetic induction, and Maxwell's equations.

**Prerequisite(s):** PHYS 260

**Corequisite(s):** MATH 214

### PHYS 306 - Wave Motion and Electromagnetic Radiation

Credits: 3 (NR)
Vibrating string, plane waves, interference, diffraction, polarization, electromagnetic waves, dispersion, and relativity.

**Prerequisite(s):** PHYS 262

**Corequisite(s):** MATH 214.

### PHYS 307 - Thermal Physics

Credits: 3 (NR)
Classical concepts of energy and temperature, basic definitions, first and second laws of thermodynamics, properties of pure substances, and equations of state. Introduction to classical and quantum statistics and their application to physical systems.

**Prerequisite(s):** PHYS 262.

### PHYS 308 - Modern Physics with Applications

Credits: 3 (NR)
Study of modern physics with emphasis on applications. Topics include introductory quantum physics; modern optics; lasers; binding and energy bands in solids; electrical, thermal, and magnetic properties of solids; semiconductors; radioactivity; nuclear
reactions; radiation detectors; and applications of nuclear physics to other sciences.

Prerequisite(s): PHYS 262

Corequisite(s): MATH 214

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**PHYS 310 - Physics of Semiconductor Materials and Processing**

Credits: 3 (NR)
Survey of the electronic and structural properties of semiconductors and the physics of semiconductor processing. Topics to be discussed include crystal growth, crystal defects, thin films, thermal properties, lithography, and characterization.

Prerequisite(s): PHYS 160, 260, and 262; or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**PHYS 326 - Problems in Physics II**

Credits: 1-3 (RD)
Individual study of physics problems of current interest.

Notes: May be taken three times for credit.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0

**PHYS 328 - Introduction to Astrophysics**

Credits: 3 (NR)
Topics include physical concepts; magnitudes of stars; Hertzsprung-Russell diagram; stellar radiation; stellar structure and stellar evolution; white dwarfs, red giants, supernovas, neutron stars, black holes; interstellar matter, dust, and molecules; cosmic rays and magnetic fields; galactic structure, galaxies, quasars, and intergalactic matter; high energy astrophysics, cosmology, and general relativity; and models of the universe.

Equivalent to ASTR 328

Prerequisite(s): PHYS 262 and MATH 214.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
PHYS 331 - Fundamentals of Renewable Energy

Credits: 3 (NR)

Introduces the physical principles for a range of renewable energies, including solar, wind, hydropower and geothermal. Demonstrates how the application of methods and principles of physics allow us to understand the basic operation, advantages, limitations and relative merits of various renewable energy sources. Designed for students majoring in the sciences or engineering but useful for students interested in science policy, business, global change and sustainable development. Designated a Green Leaf Course.

Prerequisite(s): PHYS 262 or 266 or permission of instructor

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PHYS 346 - Quarks to Strings

Credits: 3 (NR)

An non-technical introduction to the Standard Model of Elementary Particles and String Theory, in the context of the philosophy of science. Conceptual mastery will be demonstrated through writing assignments rather than calculations.

Fulfills general education requirement in synthesis.

Prerequisite(s): PHYS 262

Notes: This course does not satisfy the PHYS elective requirement.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

PHYS 370 - Molecular Biophysics

Credits: 3 (NR)

Offers a broad introduction into molecular biophysics. Demonstrates that the application of methods of physics provides a unique opportunity to tackle complex biological programs. Mainly designed for students majoring in physics or chemistry but also useful for biology majors interested in bioinformatics and computational biology.

Equivalent to BINF 470

Prerequisite(s): PHYS 307, or CHEM 331 and CHEM 332, or permission of instructor

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PHYS 385 - Materials Science with Applications to Renewable Energy
Introduction to basic concepts and methods of materials science. Review of metallic alloys and compounds, ceramic materials, ionic solids, semiconductors, polymers, and nano-structured materials. Mechanical, thermal, electric, magnetic and optical properties of materials. Theoretical background and experimental methods of materials characterization. Various materials applications with emphasis on renewable energy. Designated a Green Leaf Course.

Equivalent to CDS 385 (2012-2013 Catalog).

Prerequisite(s): PHYS 262 or 266 or 245 and a C or better in MATH 113

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PHYS 390 - Topics in Physics

Credits: 1-4 (RT)
Selected topics in physics not covered in fixed-content courses.

Hours of Lecture or Seminar per week: 1-4
Hours of Lab or Studio per week: 0

PHYS 402 - Introduction to Quantum Mechanics and Atomic Physics

Credits: 3 (NR)
Experimental basis of quantum mechanics; the wave function; systems in one, two, and three dimensions.

Equivalent to PHYS 502

Prerequisite(s): PHYS 308, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PHYS 405 - Honors Thesis in Physics

Credits: 3 (NR)
Project chosen and completed under the guidance of a faculty member, which results in a thesis.

Prerequisite(s): 21 credits of physics courses including PHYS 262, 305, and 308; and admission to Physics Department Honors Program.

Notes: PHYS 405 is a prerequisite for PHYS 406. An oral progress report is required for PHYS 405. Oral and written presentations are required for PHYS 406. Students may receive no more than 6 credits of PHYS 405, 406, 408, and 409.
**PHYS 406 - Honors Thesis in Physics**

Credits: 3 (NR)
Project chosen and completed under the guidance of a faculty member, which results in a thesis.

Prerequisite(s): PHYS 405.

Notes: PHYS 405 is a prerequisite for PHYS 406. An oral progress report is required for PHYS 405. Oral and written presentations are required for PHYS 406. Students may receive no more than 6 credits of PHYS 405, 406, 408, and 409.

**PHYS 407 - Senior Laboratory in Modern Physics**

Credits: 3 (NR)
Advanced experiments in modern physics: electronics, optics, condensed matter, and nuclear physics. Techniques for recording, graphically and statistically analyzing, and reporting data. Typical experiments include the Frank-Hertz experiment, Hall Effect, electron spin resonance, nuclear magnetic resonance and optical pumping.

Fulfills writing intensive requirement in the major.

Prerequisite(s): 21 credits of physics courses, including PHYS 305 and 308

Notes: This course meets the writing-intensive requirement.

**PHYS 408 - Senior Research**

Credits: 2-3 (RD)
Work under guidance of faculty member on research project in experimental or theoretical physics.

Prerequisite(s): 21 credits of physics courses.

Notes: May be taken twice with permission of the Physics Department. Students may receive no more than 6 credits of PHYS 405, 406, 408, and 409.
PHYS 409 - Physics Internship

Credits: 3 (RD)
On-the-job experience for physics majors in industry or government laboratories including summer programs.

Prerequisite(s): PHYS 262 or 266, and at least 12 credits at the 300-level or above of physics, astronomy, chemistry, engineering, or mathematics courses, and permission of the school.

Notes: May be taken twice with permission of the School of Physics, Astronomy, & Computational Sciences. Students may receive no more than 6 credits of PHYS 405, 406, 408, and 409.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring, Summer

PHYS 410 - Computational Physics I

Credits: 3 (NR)
Study and development leading to computer simulations of various physical systems. Requires the study and development of computational techniques and numerical algorithms to obtain both numerical results and visualization of these results. Application to individual physical processes taking place in a variety of physical streams.

Equivalent to PHYS 510

Prerequisite(s): PHYS 303 and 305

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PHYS 412 - Solid State Physics and Applications

Credits: 3 (NR)
Crystal structures, binding, lattice vibrations, the free electron model, metals, semiconductors and semiconductor devices, superconductivity, and magnetism.

Equivalent to PHYS 512/CSI 687

Prerequisite(s): PHYS 402 or 502.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PHYS 416 - Special Topics in Modern Physics

Credits: 1 (NR)
Topics of current interest in modern physics with emphasis on the breadth of physical understanding needed to approach many of
today's problems. The course will also review all of undergraduate physics through assigned problems from the GRE test.

**Prerequisite(s):** 21 credits of physics courses.

**Hours of Lecture or Seminar per week:** 2
**Hours of Lab or Studio per week:** 0

---

**PHYS 417 - Geophysics**

Credits: 3 (NR)
Seismological and gravitational theory and application to an understanding of the Earth's interior. Geology requirement may be waived for physics and engineering students with sufficient background.

Equivalent to GEOL 417

**Prerequisite(s):** GEOL 101, 102, 201, 301; MATH 113, 114; and PHYS 160.

**Corequisite(s):** MATH 213 and PHYS 260, 261.

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0

---

**PHYS 428 - Relativity**

Credits: 3 (NR)
Special relativity; four-dimensional space-time; general relativity; non-Euclidean geometries, geodesics, and field equations; tests of general theory of relativity; black holes; cosmology; models of the universe; remnant blackbody radiation; big bang cosmology; thermodynamics; and the universe.

Equivalent to ASTR 428 (2012-2013 Catalog)

**Prerequisite(s):** PHYS 303, 305.

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0

---

**PHYS 440 - Nuclear and Particle Physics**

Credits: 3 (NR)

Accelerators, detectors and related electronics; nuclear and elementary particle structure; symmetries and conservation laws; the electromagnetic, weak, and hadronic interactions; nuclear models; the quark model; and nuclear science and technology.

Equivalent to PHYS 540
Prerequisite(s): PHYS 402 or 502.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**PHYS 475 - Atmospheric Physics**

Credits: 3 (NR)
Introduction to basic physical and chemical processes that operate in the Earth's atmosphere. Emphasis on those concepts that provide a global description of the current atmospheric state and those processes that relate to global change and atmospheric evolution. Topics include equilibrium structure, radiative transfer models, thermodynamics of various atmospheric layers, and the various processes defining these layers.

Equivalent to PHYS 575/CSI 655

Prerequisite(s): PHYS 260 and 262.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**PHYS 502 - Introduction to Quantum Mechanics and Atomic Physics**

Credits: 3 (NR)
Experimental basis of quantum mechanics, the wave function, and systems in one, two, and three dimensions.

Equivalent to PHYS 402

Prerequisite(s): PHYS 308, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**PHYS 510 - Computational Physics I**

Credits: 3 (NR)
Study and development leading to computer simulations of various physical systems. Requires the study and development of computational techniques and numerical algorithms to obtain both numerical results and visualization of these results. Application to individual physical processes taking place in a variety of physical systems.

Equivalent to PHYS 410

Prerequisite(s): PHYS 303 and 305

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
PHYS 512 - Solid State Physics and Applications

Credits: 3 (NR)
Crystal structures, binding, lattice vibrations, the free electron model, metals, semiconductors and semiconductor devices, superconductivity, and magnetism.

Equivalent to PHYS 412/CSI 687

Prerequisite(s): PHYS 402 or 502.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PHYS 513 - Applied Electromagnetic Theory

Credits: 3 (NR)
Classical electromagnetic theory with applications. Topics include electrostatics, magnetic fields and materials, electromagnetic wave propagation, waveguides, transmission lines, radiation, and antennas.

Prerequisite(s): PHYS 305, 306; and MATH 313, 314 or equivalent.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PHYS 533 - Modern Instrumentation

Credits: 3 (NR)
Topics include sensors for radiation, particles, electric and magnetic fields, pressure, and motion; electronic instruments, computer data collection, instrumentation noise and noise reduction methods; and specialized instrumentation systems for various areas of applied physics.

Equivalent to CHEM 620

Prerequisite(s): PHYS 513 and an electronics course.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PHYS 540 - Nuclear and Particle Physics

Credits: 3 (NR)
Accelerators, detectors and related electronics; nuclear and elementary particle structure; symmetries and conservation laws; the electromagnetic, weak, and hadronic interactions; nuclear models; the quark model; and nuclear science and technology.

Equivalent to PHYS 440
Prerequisite(s): PHYS 402 or 502.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**PHYS 575 - Atmospheric Physics I**

Credits: 3 (NR)
Introduction to basic physical and chemical processes that operate in the Earth's atmosphere. Emphasis on those concepts that provide a global description of the current atmospheric state and those processes that relate to global change and atmospheric evolution. Topics include equilibrium structure, radiative transfer models, thermodynamics of various atmospheric layers, and the various processes defining these layers.

Equivalent to PHYS 475/CSI 655

Prerequisite(s): PHYS 305, 262, and 260 or equivalent.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**PHYS 580 - Selected Interdisciplinary Topics**

Credits: 3 (NR)
Selected interdisciplinary topics with a strong physics content not covered in fixed-content courses.

Notes: PHYS 580 cannot be used to satisfy degree requirements for PHYS (PhD), PHAE (MA) in the standard, applied physics, and engineering physics emphases.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**PHYS 581 - Topics in Renewable Energy**

Credits: 3 (NR)
The course covers the physical principles for a range of renewable energies, including solar, wind, hydropower and geothermal using mathematical and other types of analysis. The course demonstrates how the application of methods and principles of physics allow us to understand the basic operation, advantages, limitations and relative merits of various renewable energy sources.

Prerequisite(s): PHYS 262, PHYS 266, or permission of the instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring
PHYS 590 - Selected Topics in Physics

Credits: 1-6 (RT)
Selected topics from recent theoretical or experimental developments and applications. Satisfies needs of professional community to keep abreast of current developments.

Prerequisite(s): Graduate standing, or permission of instructor.

Hours of Lecture or Seminar per week: 0-6
Hours of Lab or Studio per week: 0

PHYS 600 - Special Topics in Physics

Credits: 1-6 (RT)
In-service course to strengthen and update teachers' knowledge of physics and astronomy.

Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 0

PHYS 611 - Electro-optics

Credits: 3 (NR)
Optical modulators, display devices, types and operation of lasers, mode locking, Q-switching, photodetectors, optical fibers.

Prerequisite(s): PHYS 502 or 684, and 513 or 685.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PHYS 612 - Physics of Modern Imaging

Credits: 3 (NR)
Study of imaging methods using acoustic and electromagnetic waves to probe extended objects, and mathematical transformations to produce images from scattered waves. Topics include classical imaging, physical optics, Fourier transform, holography, tomography, seismic mapping, underwater acoustic imaging and mapping, side-looking radar, antenna arrays, applicable computer methods.

Prerequisite(s): PHYS 513 or 685.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PHYS 613 - Computational Physics II
Study of diverse physical systems with emphasis on modeling and simulation. Study and development of numerical algorithms and techniques to obtain both numerical results and visualization of these results. Projects undertaken will draw from such areas as many-body orbital dynamics, molecular interactions, quantum systems, radiative transfer in high-temperature plasmas, stellar interiors, hydrodynamics, and cosmology.

Equivalent to CSI 780

**Prerequisite(s):** PHYS 303, 305, and 510; PHYS 502 or equivalent recommended.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**PHYS 614 - Thermodynamics and Kinetics of Materials**

Credits: 3 (NR)
Advanced thermodynamics and physical kinetics with applications to materials science. The course covers an axiomatic formulation of thermodynamics, theory of phase transformations, kinetic theory of reactions and diffusion processes in solids, and interface phenomena. Possible applications considered in the course include processing and fabrication of semiconductor materials, metal oxidation and corrosion, diffusion-controlled phase growth in solid solutions, shape memory alloys, and small-size effects in physical properties of materials.

**Prerequisite(s):** MATH 113, 114, 213, 307; PHYS 262 or 266, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**PHYS 615 - Fundamentals of Materials Science**

Credits: 3 (NR)
Covers fundamentals of materials science with emphasis on physical topics including crystal structure and symmetry, dislocation theory, theory of interfaces, multicomponent phase diagrams, theory of phase transformations, nano-materials, metallic glasses. Includes a term project, assignments from current literature and application of computation in materials science.

Equivalent to CSI 685

**Prerequisite(s):** CDS 385/PHYS 385 or undergraduate degree in physics, chemistry, materials, electrical or mechanical engineering or related disciplines; or permission of instructor

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**PHYS 620 - Continuum Mechanics**

Credits: 3 (NR)
Study of continuum mechanics; topics include physical concepts, mathematical formulation and solution, elastic materials, ideal fluids, viscous fluids, waves in continuous media, turbulence, thermal convection, stability considerations, high-temperature gas
flows, radiative processes for momentum and energy transport, shocks, and computational fluid dynamics.

**Prerequisite(s):** PHYS 510 and 303 or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**PHYS 630 - Introduction to Biophysics**

Credits: 3 (NR)  
Introduces biophysics, focusing on physical and chemical concepts and their relation to rapidly expanding interdisciplinary interfaces among biology, chemistry, and physics. Reveals multiscale nature of biophysics, and includes exploration of macroscopic and microscopic applications.

Equivalent to BINF 740

**Prerequisite(s):** Undergraduate degree in physics or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**PHYS 660 - Space Weather**

Credits: 3 (NR)  
Overview of space weather including sun, heliosphere, magnetosphere, and ionosphere.

Equivalent to ASTR 660

**Prerequisite(s):** Graduate standing, or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**PHYS 676 - Atmospheric Physics**

Credits: 3 (NR)  
Covers the basic conservation laws of mass, momentum, and energy, and a scaling analysis of the equations of motion and thermodynamics. Balanced flows in the atmosphere are discussed. Concepts of circulation and vorticity; the role of the atmospheric boundary layer in mass, momentum, and energy transfer; synoptic scale motions; and the role of gravity and Rossby waves in controlling the general circulation of the atmosphere are covered.

**Prerequisite(s):** PHYS 303, 305, and 308; and MATH 314.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0
**PHYS 684 - Quantum Mechanics I**

Credits: 3 (NR)
Fundamental concepts, including one-dimensional solutions of Schrodinger's equations, operators in Hilbert space, observables, propagators, and harmonic oscillators.

**Prerequisite(s):** PHYS 305, 308; MATH 313 and 314, or equivalent.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**PHYS 685 - Classical Electrodynamics I**

Credits: 3 (NR)
Deals with static and dynamic properties of electromagnetic fields as described by Maxwell's equations. Covers electrostatics, magnetostatics, boundary value problems, multipoles, time dependent fields, propagating wave solutions, and resonant structures.

**Prerequisite(s):** PHYS 305, 308; MATH 313 and 314, or equivalent.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**PHYS 701 - Theoretical Physics**

Credits: 3 (NR)
Study of the physical basis for selection of particular mathematical tools in physics; topics include curvilinear coordinates, tensors, matrices, differential equations, special functions, complex variables, and group theory.

**Prerequisite(s):** Undergraduate degree in physics or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**PHYS 703 - Seminar in Physics**

Credits: 1 (RD)
A general seminar course that combines invited seminars from faculty (both internal and external) with graduate student seminars.

**Prerequisite(s):** Permission of instructor.

**Hours of Lecture or Seminar per week:** 1  
**Hours of Lab or Studio per week:** 0
PHYS 705 - Classical Mechanics

Credits: 3 (NR)
Study of classical mechanics; topics include variational principles, constrained motion, Lagrangian and Hamiltonian mechanics, canonical transformations, and applications (central forces, rigid-body motion, oscillations).

Prerequisite(s): Undergraduate degree in physics or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PHYS 711 - Statistical Mechanics

Credits: 3 (NR)
Topics include thermodynamics, kinetic theory, ensemble theory, quantum statistics, and applications.

Prerequisite(s): Undergraduate degree in physics or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PHYS 728 - Simulation of Large-Scale Physical Systems

Credits: 3 (NR)
Study of diverse large-scale physical systems with emphasis on the modeling and simulation of these multifaceted systems. Study and development of numerical algorithms and techniques to obtain both numerical results and visualization of these results. Projects will be drawn from such areas as many-body dynamics, molecular dynamics and interactions, atmospheric structure and dynamics, high-temperature plasmas, stellar structure, hydrodynamics systems, galactic structure and interactions, and cosmology.

Prerequisite(s): PHYS 613 and CSI 717 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PHYS 736 - Computational Quantum Mechanics

Credits: 3 (NR)
Study of the fundamental concepts of quantum mechanics from a computational point of view, review of systems with spherically symmetric potentials, many-electron-atom solutions to Schrodinger’s equation, electron spin in many-electron systems, atomic structure calculations, algebra of many-electron calculations, Hartree-Fock self-consistent field method, molecular structure calculations, scattering theory computations, and solid-state computations.

Prerequisite(s): PHYS 502, 510, or permission of instructor.
PHYS 760 - Space Plasma Physics

Credits: 3 (NR)
Covers plasma processes involved in today's space physics research, including different regimes of plasma; basic concepts in kinetic, fluid, and MHD plasmas; and existent waves in these media. Also covers basics of shocks, discontinuities, transport and acceleration of particles such as cosmic rays, reconnection, and MHD instabilities.

Equivalent to ASTR 760

Prerequisite(s): PHYS 513 or 685, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PHYS 780 - Advanced Selected Topics in Physics

Credits: 3 (RT)
Selected topics in physics not covered in fixed-content physics courses.

Equivalent to CSI 789

Prerequisite(s): Permission of instructor.

Notes: May be repeated for credit as needed.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PHYS 784 - Quantum Mechanics II

Credits: 3 (NR)
Advanced topics in quantum mechanics. Covers rotations, angular momentum, 3D solutions to Schrodinger's equations, symmetries, conservation laws, approximate methods, and spin mechanics.

Prerequisite(s): PHYS 684, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PHYS 785 - Classical Electrodynamics II
Advanced topics in electrodynamics. Covers radiation, scattering and diffraction, special relativity, relativistic particle dynamics, Lorentz transformation, 4-vectors, transformation of fields, charges and currents, Thomas precession, retarded potentials, and radiation from moving charges.

**Prerequisite(s):** PHYS 685, or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**PHYS 796 - Directed Reading and Research**

Credits: 1-12 (RT)  
Reading and research on a specific topic in physics or related field under the direction of a faculty member.

**Prerequisite(s):** Admission to master's program, and permission of instructor.

**Notes:** May be repeated as needed.

**Hours of Lecture or Seminar per week:** 1-12  
**Hours of Lab or Studio per week:** 0  
**Grading:** Graduate Special

**PHYS 798 - Research Project**

Credits: 3 (RD)  
Project chosen and completed under the guidance of a graduate faculty member, which results in an acceptable technical report.

**Prerequisite(s):** 9 graduate credits, and permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**Grading:** Satisfactory/No Credit

**PHYS 799 - Master's Thesis**

Credits: 1-6 (RD)  
Project chosen and completed under the guidance of a graduate faculty member, which results in an acceptable technical report and oral defense.

**Prerequisite(s):** 9 graduate credits, and permission of instructor.

**Hours of Lecture or Seminar per week:** 1-6  
**Hours of Lab or Studio per week:** 0  
**Grading:** Satisfactory/No Credit
**PHYS 998 - Doctoral Dissertation Proposal**

Credits: 1-12 (RD)
Covers development of a research proposal under the guidance of a dissertation director and the doctoral committee. The proposal forms the basis for the doctoral dissertation.

**Prerequisite(s):** Admission to physics doctoral program and permission of advisor.

**Notes:** May be repeated as needed; however, no more than 24 credits in ASTR/PHYS 998 and ASTR/PHYS 999 may be applied toward satisfying doctoral degree requirements in the physics PhD program. Out of the 24, no more than 12 credits of ASTR/PHYS 998 may be applied.

- **Hours of Lecture or Seminar per week:** 0
- **Hours of Lab or Studio per week:** 0
- **Grading:** Satisfactory/No credit only

**PHYS 999 - Doctoral Dissertation**

Credits: 1-12 (RD)
Doctoral research performed under direction of dissertation director.

**Prerequisite(s):** Admission to doctoral candidacy in physics doctoral program and permission of advisor.

**Notes:** May be repeated as needed; however, no more than 24 credits in ASTR/PHYS 998 and ASTR/PHYS 999 may be applied toward satisfying doctoral degree requirements in the physics PhD program.

- **Hours of Lecture or Seminar per week:** 0
- **Hours of Lab or Studio per week:** 0
- **Grading:** S/IP

**Portuguese (PORT)**

**PORT 110 - Elementary Portuguese**

Credits: 6 (NR)
Introduces elements of grammar, vocabulary, oral skills, listening comprehension, and reading.

- **Hours of Lecture or Seminar per week:** 6
- **Hours of Lab or Studio per week:** 0

**PORT 210 - Intermediate Portuguese**
Credits: 3 (NR)
Continuation of the development of basic components of the language, with focus on listening, speaking, reading, and writing skills. Introduces students to the cultures and histories of Portuguese-speaking regions.

**Prerequisite(s):** PORT 110, appropriate placement score, or permission of department.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

### Professional Development in Education (EDPD)

#### EDPD 501 - Professional Development in Advanced Teacher Research and Practice

Credits: 1-6 (RT)  
Provides opportunity for focused study on selected topics or emerging issues in advanced teacher research and practices.

**Notes:** Course may not be applied to a degree program.

**Hours of Lecture or Seminar per week:** 1-6  
**Hours of Lab or Studio per week:** 0  
**Grading:** Graduate Special  
**When Offered:** Fall, Summer, Spring

#### EDPD 502 - Professional Development in Elementary, Literacy, and Secondary Education

Credits: 1-6 (RT)  
Provides opportunity for focused study on selected topics or emerging issues in elementary, literacy and secondary education.

**Notes:** Course may not be applied to a degree program.

**Hours of Lecture or Seminar per week:** 1-6  
**Hours of Lab or Studio per week:** 0  
**Grading:** Graduate Special  
**When Offered:** Fall, Summer, Spring

#### EDPD 503 - Professional Development in Individual and Organizational Transformation

Credits: 1-6 (RT)  
Provides opportunity for focused study on selected topics or emerging issues in individual and organizational transformation.

**Notes:** Course may not be applied to a degree program.

**Hours of Lecture or Seminar per week:** 1-6
**EDPD 504 - Professional Development in Learning Technologies**

Credits: 1-6 (RT)
Provides opportunity for focused study on selected topics or emerging issues in learning technologies.

Notes: Course may not be applied to a degree program.

**Hours of Lecture or Seminar per week:** 1-6  
**Hours of Lab or Studio per week:** 0  
**Grading:** Graduate Special  
**When Offered:** Fall, Summer, Spring

**EDPD 505 - Professional Development in Educational Psychology, Research Methods and Education Policy**

Credits: 1-6 (RT)
Provides opportunity for focused study on selected topics or emerging issues in educational psychology, research methods and education policy.

Notes: Course may not be applied to a degree program.

**Hours of Lecture or Seminar per week:** 1-6  
**Hours of Lab or Studio per week:** 0  
**Grading:** Graduate Special  
**When Offered:** Fall, Summer, Spring

**EDPD 506 - Professional Development in Special Education and Disability Research**

Credits: 1-6 (RT)
Provides opportunity for focused study on selected topics or emerging issues in special education and disability research.

Notes: Course may not be applied to a degree program.

**Hours of Lecture or Seminar per week:** 1-6  
**Hours of Lab or Studio per week:** 0  
**Grading:** Graduate Special  
**When Offered:** Fall, Summer, Spring

**EDPD 507 - Professional Development in Health and Human Performance**
EDPD 508 - Professional Development in Sport, Recreation and Tourism

Credits: 1-6 (RT)
Provides opportunity for focused study on selected topics or emerging issues in sport, recreation and tourism.

Notes: Course may not be applied to a degree program.

Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 0
Grading: Graduate Special
When Offered: Fall, Summer, Spring

Provost (PROV)

PROV 103 - Language Support for Public Speaking

Credits: 1 (NR)
Academic language support course for Public Speaking. Focus on increasing students' comprehension and use of key grammatical structures, vocabulary, words forms, and reading/annotating strategies.

Equivalent to UNIV 103 (2011-2012 Catalog)

Notes: Restricted to Access students (ACCS)

Hours of Lecture or Seminar per week: 1.5
Hours of Lab or Studio per week: 0
When Offered: Fall

PROV 104 - Language Support for World History

Credits: 1 (NR)
Academic language support course for World History. Focus on increasing students' comprehension and use of key grammatical structures, vocabulary, words forms, and reading/annotating strategies.
Equivalent to UNIV 104 (2011-2012 Catalog)

Notes: Restricted to Access students (ACCS).

Hours of Lecture or Seminar per week: 1.5
Hours of Lab or Studio per week: 0
When Offered: Fall

PROV 105 - American Cultures

Credits: 3 (NR)
This course provides an introduction to US cultures with a focus on diversity within American society. The course uses the concept of culture as a basis for discussing differences in Americans' experience of family life, work, education, the arts, national and ethnic identities, gender, religion and more. Through ethnographic readings, literature, film and field projects, students develop a better understanding of similarities and differences across the American experience.

Fulfills general education requirement in global understanding (ACCESS students only).

Equivalent to UNIV 105 (2011-2012 Catalog)

Prerequisite(s): Admission to the ACCESS program.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
Grading: Undergraduate Special.
When Offered: Spring

PROV 106 - Introduction to Research Methods for International Students

Credits: 3 (NR)
Academic research is the fundamental element of university-level education. Despite the variations in research disciplines, they all share basic concepts of academic inquiry. This course is designed to teach the methods, norms and procedures of undergraduate research in the humanities and social sciences. It should equip international students with the essential skills needed to successfully produce a quality academic paper.

Equivalent to UNIV 106 (2011-2012 Catalog)

Prerequisite(s): Admission to the ACCESS program.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
Grading: Undergraduate Special.
When Offered: Spring

PROV 110 - Special Topics
Credits: 1-3 (RT)
Exploration of leadership in a specific career field(s); changing nature of that industry; understanding of organizational structures in the field(s); and introduction to career and internship opportunities for students who aspire to a career in that field.

Equivalent to UNIV 110 (2011-2012 Catalog)

Hours of Lecture or Seminar per week: 1-3  
Hours of Lab or Studio per week: 0  
Grading: Special Undergraduate.  
When Offered: Summer

**PROV 206 - Research Methods (CISA/Honors Peer Learning Partnership)**

Credits: 0-1 (RD)  
This course is an experiential credit course for Honors students partnering with ACCESS international students to develop academic research skills.

Equivalent to UNIV 206 (2011-2012 Catalog)

**Prerequisite(s):** Completion of HNRS 110 with a grade of B+ or better and official offer from Center for International Student Access.

**Corequisite(s):** Enrollment as an Honor student in good standing

Hours of Lecture or Seminar per week: 2-5  
Hours of Lab or Studio per week: 0  
Grading: Satisfactory/No Credit  
When Offered: Spring

**PROV 207 - Peer Educational Mentor Leadership**

Credits: 0-3 (RD)  
This course is an experiential leadership course for students partnering with ACCESS international students as peer educational mentors.

**Prerequisite(s):** Sophomore status or higher.

**Corequisite(s):** Student in good standing.

Hours of Lecture or Seminar per week: 3-5  
Hours of Lab or Studio per week: 0  
Grading: Satisfactory/No Credit  
When Offered: Fall, Spring

**PROV 342 - The George Mason Debates in Current Affairs**
Credits: 3 (RD)
In-depth investigation of one or more contemporary public policy issues. Examines the selected topics as discussed by scholars, public interest groups and think tanks, government officials, and the news media. Texts and guest lecturers presenting a wide range of perspectives are an important feature.

Fulfills general education requirement in synthesis.

Equivalent to UNIV 342 (2011-2012 Catalog)

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PROV 501 - Graduate Studies Preparation for International Students I

Credits: 2 or 3 (NR)
Designed especially for the Graduate BRIDGE program, this course is the first of a two-part transitional course series designed for international students who are studying abroad, emphasizing development, readiness, and success for Graduate/Professional school enrollment. This first course covers western educational systems, university policies and procedures, writing skills and research resources, and graduate school study skills and methods.

Equivalent to UNIV 501 (2011-2012 Catalog)

Notes: This course is for graduate degree seeking students whose highest degree is from a non-US institution. This course may not count towards academic degree requirements at the graduate level. Enrolled students are required to take UNIV 502 the following consecutive semester.

Hours of Lecture or Seminar per week: 2 or 3
Hours of Lab or Studio per week: 0
Grading: Graduate Special.
When Offered: Fall

PROV 502 - Graduate Studies Preparation for International Students II

Credits: 2 or 3 (NR)
Designed especially for the Graduate BRIDGE program, this second of a two-part transitional course series is designed for international students who are studying abroad, emphasizing development, readiness, and success for Graduate school enrollment. This course covers postmodernism, cultural identity and assimilation/acculturation theory, advanced program development, university resources, research reading and methods, career planning as well as professional and personal presentation.

Equivalent to UNIV 502 (2011-2012 Catalog)

Prerequisite(s): Completion of UNIV 501 with a grade of B or better, in the immediate past semester.

Notes: This course is for graduate degree seeking students whose highest degree is from a non-US institution. This course may not count towards academic degree requirements at the graduate level.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 0
PROV 503 - Interpersonal Communication for International Students: Practicum and Theory

Credits: 2 (NR)
Designed for the Graduate BRIDGE program, this course is tailored to international students who received their undergraduate degrees outside the United States. The course provides intensive practice in oral communication, with feedback on effective interpersonal interaction with faculty, graduate students, and undergraduates. Students use intensive practice in oral communication contexts typical at universities to build knowledge and skills for informal interpersonal communication settings with faculty, peers, and students as well as skills needed for formal presentations, class discussion, and tutoring. Readings cover research on first impression management; informative and explanatory communication; conveying emotional support; listening, and narrative skill. Assignments and exercises provide opportunities for feedback on intelligibility, intonation, syllable stress, vocabulary, syntax, and fluency, as well as pragmatic skills required for effective management of politeness norms, clear explanation of complexities, listening, class participation, tutoring, and provision of emotional support and humor in everyday interaction.

Equivalent to UNIV 503 (2011-2012 Catalog)

Prerequisite(s): Completion of undergraduate degree at a university outside the United States.
Corequisite(s): Enrollment in a graduate degree-seeking program at Mason.
Notes: This course may not count towards academic degree requirements at the graduate level.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring.

PROV 505 - Special Topics in Advanced English for Academic Purposes

Credits: 1-4 (RT)
Designed for the Graduate BRIDGE program, this special topics course is tailored to international students who received their undergraduate degrees outside the United States. The course provides intensive practice and individualized feedback in advanced oral and/or written communication methods appropriate at the graduate level.

Prerequisite(s): PROV 501 and PROV 503.
Notes: This course may not count towards academic degree requirements at the graduate level.

Hours of Lecture or Seminar per week: 1-2
Hours of Lab or Studio per week: 1-2
Grading: Graduate Special.
When Offered: Fall, Summer, Spring.

PROV 506 - Graduate Communication in the Disciplines I
Credits: 3-4 (NR)
Students develop strategies for completing research-based writing and presentations in their field. Students will review rhetorical structures and organizational strategies common to US academic scholarly communications generally and in their particular field. Students will also review and practice strategies at the sentence and discourse levels to increase the clarity, precision and appropriateness of their oral and written communication skills. Group instruction will be supplemented by one-on-one conferencing as students complete a major graduate-level project.

Prerequisite(s): Completion of undergraduate degree at a university outside the United States.

Corequisite(s): Enrollment in a graduate degree-seeking program at Mason.

Notes: This course may not count towards academic degree requirements at the graduate level without permission from the academic dean/director.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 1
Grading: Graduate Special.
When Offered: Fall, Spring.

PROV 507 - Graduate Communication in the Disciplines II

Credits: 3-4 (NR)
The second course in a series that helps students develop strategies for completing research-based writing and presentations in their field. Students will review rhetorical structures and organizational strategies common to US academic scholarly communications generally and in their particular field. Students will also review and practice strategies at the sentence and discourse levels to increase the clarity, precision and appropriateness of their oral and written communication skills. Group instruction will be supplemented by one-on-one conferencing as students complete a second major graduate-level project.

Prerequisite(s): Minimum grade of “B” in PROV 503.

Notes: This course may not count towards academic degree requirements at the graduate level without permission from the academic dean/director.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 1
Grading: Graduate Special.
When Offered: Fall, Spring.

PROV 601 - Thriving in Your Graduate Program

Credits: 1 (NR)
Gaining greater insight into student learning theories, the nature of research and scholarship, higher education trends, and the various career paths available to individuals with graduate degrees is important for students in the early stages of their academic programs. This seminar is designed for early career MFA and doctoral students to facilitate their success as graduate students at Mason.

Hours of Lecture or Seminar per week: 3 hours biweekly
Hours of Lab or Studio per week: 0
Grading: Satisfactory/No credit only
When Offered: Spring
PROV 701 - Preparing for Academic Careers

Credits: 1 (NR)
This seminar will be devoted to helping doctoral students explore and prepare for future academic careers and to strengthening their instructional effectiveness. The seminar will provide a clearer understanding of the roles and responsibilities of being a faculty member. Participants will learn how to construct a meaningful statement of teaching philosophy and plan for a course through syllabus design.

Equivalent to UNIV 701 (2011-2012 Catalog)

Notes: This course does not apply to required credits for doctoral degrees.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
Grading: Satisfactory/No Credit
When Offered: Fall

Psychology (PSYC)

Offered by the College of Humanities and Social Sciences

PSYC 100 - Basic Concepts in Psychology

Credits: 3 (NR)
Introduces psychology as scientific discipline. Examines concepts and methods in learning, motivation, development, personality, and measurement.

Fulfills general education requirement in social and behavioral science.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PSYC 110 - Seminar in General Psychology

Credits: 1 (NR)
Explores applications, implications, methods, and findings of psychology.

Corequisite(s): PSYC 100.

Notes: Students must be enrolled concurrently in PSYC 100. In-class work includes discussion that enriches the PSYC 100 lecture material, exploration of controversial issues in psychology, use of technology to broaden knowledge of psychology, and in-depth discussions of topics on which instructor has special expertise. Short papers are required.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0
PSYC 211 - Developmental Psychology

Credits: 3 (NR)
Review of major developmental theories including perspectives of childhood, adolescence, adulthood, and old age.

Fulfills general education requirement in social and behavioral science.

Prerequisite(s): PSYC 100 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PSYC 231 - Social Psychology

Credits: 3 (NR)
Study of human behavior development in a social matrix, including such topics as socialization, cultural behavior, group norms, and attitude formation.

Fulfills general education requirement in social and behavioral science.

Prerequisite(s): PSYC 100 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PSYC 260 - Basic Research Methods in Psychology

Credits: 1-3 (RT)
Introduction to research methods in psychology in the context of assisting faculty with research; individualized sections by arrangement with faculty. Methods taught vary but generally include basic data collection and recordkeeping methods in research.

Prerequisite(s): 6 credits of psychology or permission of instructor and department.

Notes: Course culminates in a paper describing techniques learned. No more than 6 credits in PSYC 260, 350, and 460 can be used toward a psychology major.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0

PSYC 300 - Statistics in Psychology

Credits: 4 (NR)
Descriptive and inferential statistics in design, analysis, and interpretation of psychological research with practical application
using computers in laboratory.

Fulfills general education requirement in information technology (all except ethics). PSYC 300, 301 and 372 must be taken in sequence.

Prerequisite(s): 6 credits of psychology and 3 credits of mathematics course work; or permission of instructor.

Notes: Students are strongly encouraged to take PSYC 301 concurrently.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 2

**PSYC 301 - Research Methods in Psychology**

Credits: 3 (NR)
General research design in psychology, with an emphasis on experimental design and control. Topics include use of human participants in research, reliability and validity, observational methods, and survey and longitudinal designs.

Fulfills general education requirement in information technology (all except ethics). PSYC 300, 301 and 372 must be taken in sequence.

Fulfills writing intensive requirement in the major.

Prerequisite(s): 6 credits of psychology, including PSYC 300 as prerequisite or corequisite, or permission of instructor.

Notes: Students are strongly encouraged to take PSYC 300 concurrently. Laboratory work will include designing and running research studies and writing manuscripts using appropriate style and format. PSYC 301 is a writing-intensive course.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 2

**PSYC 304 - Principles of Learning**

Credits: 4 (NR)
Principles of animal learning, including such topics as classical and operant conditioning, discrimination learning, and animal cognition.

Fulfills writing intensive requirement in the major.

Prerequisite(s): PSYC 300, or permission of instructor.

Notes: Laboratory projects require working with computer simulations. PSYC 304 is a writing-intensive course.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 2

**PSYC 309 - Sensation, Perception, and Information Processing**
Credits: 4 (NR)
Principles of perception, including topics such as psychophysics, perceptual organization, perceptual learning, and perceptual constancies.

Fulfills writing intensive requirement in the major.

**Prerequisite(s):** PSYC 300 and PSYC 301.

**Notes:** Laboratory projects demonstrate and investigate perceptual phenomena. PSYC 309 is a writing-intensive course.

 Hours of Lecture or Seminar per week: 3
 Hours of Lab or Studio per week: 2

**PSYC 313 - Child Development**

Credits: 3 (NR)
Study of human psychological development from conception to adolescence including such topics as genetic factors, emotional and intellectual growth, and environmental influences.

**Prerequisite(s):** 6 credits of psychology or permission of instructor.

 Hours of Lecture or Seminar per week: 3
 Hours of Lab or Studio per week: 0

**PSYC 314 - Adolescent Development**

Credits: 3 (NR)
Study of the biological and cultural changes accompanying adolescence, including the effect of these changes on emotional, intellectual, and social development.

**Prerequisite(s):** 6 credits of psychology or permission of instructor.

 Hours of Lecture or Seminar per week: 3
 Hours of Lab or Studio per week: 0

**PSYC 317 - Cognitive Psychology**

Credits: 3 (NR)
An in-depth overview of important topics in cognitive psychology, including memory, attention, pattern recognition, problem solving, reasoning, and psycholinguistics.

**Prerequisite(s):** 6 credits of psychology or permission of instructor.

 Hours of Lecture or Seminar per week: 3
 Hours of Lab or Studio per week: 0
PSYC 320 - Psychological Tests and Measurements

Credits: 4 (NR)
Examination and application of principles underlying the theory, interpretation, and administration of psychological tests, including a study of tests of intelligence, achievement, and ability.

Prerequisite(s): PSYC 300, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 2

PSYC 321 - Counseling Psychology

Credits: 3 (NR)
Review of the theories and methods in psychological counseling.

Prerequisite(s): PSYC 325 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PSYC 322 - Behavior Modification

Credits: 3-5 (NR)
Examination of experimental principles of human and animal learning within theoretical framework of applied behavior analysis, including design, implementation, and evaluation of operant intervention programs across a wide variety of human situations.

Prerequisite(s): PSYC 324 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PSYC 323 - Clinical and Social Psychology Research Techniques

Credits: 4 (NR)
Review and application of research techniques including interviewing, survey analysis, and process analysis. PSYC 323 is a writing-intensive course.

Prerequisite(s): PSYC 300, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 2

PSYC 324 - Personality Theory
Introduction to classical and contemporary theories of personality, and comparative evaluation of major theories in terms of relevant studies.

Prerequisite(s): PSYC 100 or permission of instructor.

Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0

**PSYC 325 - Abnormal Psychology**

Credits: 3 (NR)  
Study of development of abnormal behavior patterns, including such topics as methods of diagnosis and prevention of serious mental disorders such as psychosomatic disorders, psychoses, character disorders, and mental retardation.

Prerequisite(s): PSYC 100, and one of PSYC 211, 231, or 324; or permission of instructor.

Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0

**PSYC 326 - Therapeutic Communication Skills**

Credits: 3 (NR)  
Introduction to understanding and use of basic therapeutic communication skills used in clinical and counseling psychology.

Prerequisite(s): PSYC 325 or permission of instructor. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0

**PSYC 327 - Psychology in the Community**

Credits: 3 (RD)  
Individual placements in applied psychology settings.

Prerequisite(s): Psychology major with minimum 6 psychology credits, and permission of associate chair for undergraduate studies.

Notes: May be repeated for a maximum of 6 credits. A maximum of 6 credits of PSYC 327, 328, 421, and 422 can be applied to the psychology major.

Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0

**PSYC 328 - Psychology in the Community Laboratory**
Credits: 1 (RD)
Consists of a one-hour service learning component linked to selected psychology courses.

Prerequisite(s): Psychology major with minimum 6 psychology credits and permission of course instructor and associate chair for undergraduate studies.

Corequisite(s): Enrollment in psychology course for which this is service learning component.

Notes: May be repeated for a maximum of 6 credits. A maximum of 6 credits of PSYC 327, 328, 421, and 422 can be applied to the psychology major.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0

**PSYC 330 - Psychology of Adjustment**

Credits: 3 (NR)
Nature of effective and faulty patterns of adjustment. Factors in healthy and unhealthy personality development, unique motivation patterns of individuals, and influence of personally significant groups on adjustment. Resources for personal growth and application of contemporary psychological principles to achievement of increased intellectual, emotional, and social competence.

Prerequisite(s): PSYC 100 or permission of instructor.

Notes: PSYC 330 cannot be taken for credit by psychology majors.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**PSYC 333 - Industrial and Organizational Psychology**

Credits: 3 (NR)
Examination of application of psychological principles and methods to problems commonly encountered in business and industry.

Prerequisite(s): PSYC 100 and 300; or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**PSYC 335 - Psychology of Creativity and Innovation**

Credits: 3 (NR)
Creativity and innovation take place in many domains such business, science and the arts. Learn the distinction between creativity and innovation. Apply findings from the scientific literature about the antecedents of creativity and innovation including emotions, cognition, individual differences, and social contexts. Experiment with ways to enhance your creativity and skills for innovation.
PSYC 340 - Human Factors Psychology

Credits: 3 (NR)
Reviews history and current practice of optimal product and system design as a function of psychology. Includes a brief history of human factors psychology, a review of human memory and attentional systems as they relate to product and system design, and an introduction to current methods used to analyze and redesign products and systems for optimal human interaction.

Prerequisite(s): PSYC 100 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PSYC 350 - Directed Reading and Research in Psychology

Credits: 1-3 (RT)
Library research in psychology, culminating in a substantial formal paper; individualized sections by arrangement with faculty.

Prerequisite(s): PSYC 100 and 300, and permission of instructor and department.

Notes: No more than 6 credits in PSYC 260, 350, and 460 can be used toward psychology major.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0

PSYC 362 - Psychology of Women

Credits: 3 (NR)
Behavior and attitudes of women; influence of chromosomes and hormones on behavior, influence of culture on sex role differentiation, and theories of sex role development.

Prerequisite(s): PSYC 100 and BIOL 103, 104; or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PSYC 372 - Physiological Psychology
Credits: 3 (NR)
Survey of neuroscience, including basic neuroanatomy, neural and synaptic transmission, neural mechanisms underlying normal and abnormal behavior, and biological mechanisms of drug action.

Fulfills general education requirement in information technology (all except ethics). PSYC 300, 301 and 372 must be taken in sequence.

Prerequisite(s): PSYC 100, and BIOL 103 and 104; or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**PSYC 373 - Physiological Psychology Laboratory**

Credits: 1 (NR)
Functional anatomy and physiology of the brain, including dissection of brain and eye, and a demonstration and practice in research methods for studying physiological mechanisms underlying behavior.

Prerequisite(s): PSYC 372 or 375 or permission of instructor

Corequisite(s): PSYC 372 or 375 or permission of instructor

Hours of Lecture or Seminar per week: 1-4
Hours of Lab or Studio per week: 2

**PSYC 375 - Brain and Sensory Processes**

Credits: 3 (NR)
First half of comprehensive survey of neuroscience, including basic neuroanatomy, neural and synaptic transmission, neural mechanisms underlying normal and abnormal behavior, and biological mechanisms of drug action.

Prerequisite(s): PSYC 100 with a grade of C- or better, and BIOL 103, 104 or BIOL 213; or permission of instructor.

Notes: Students may earn credit for 372 and either 375 or 376, but they may not earn credit for all three.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**PSYC 376 - Brain and Behavior**

Credits: 3 (NR)
Second half of a comprehensive survey of neuroscience, including neural mechanisms underlying normal and abnormal behavior.

Prerequisite(s): PSYC 375 or permission of instructor.

Notes: Students may earn credit for 372 and either 375 or 376, but they may not earn credit for all three.
PSYC 379 - Applied Cross-Cultural Psychology

Credits: 3 (NR)
A review of important landmarks in cross-cultural research, showing how this research impacts psychology as a discipline. Emphasizes an empirical approach to cross-cultural study and includes topics such as theoretical and empirical developments in cross-cultural psychology, development of coherent schema's to guide cross-cultural research and interventions, comparison of psychology's goals and assumptions in Western and other cultures, and integration of course materials into educational and career goals of students.
Fulfills general education requirement in global understanding.

Prerequisite(s): PSYC 100, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PSYC 399 - Professional Issues in the Social Sciences: From College to Career

Credits: 2 (NR)
Emphasizes development and readiness for a profession in the social sciences through self-assessment and professional skill acquisition.

Prerequisite(s): At least 30 hours of completed college coursework and a declared major in the social sciences or permission of the instructor.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 0

PSYC 405 - Mystery, Madness, and Murder

Credits: 3 (NR)
Multidisciplinary approach to taboo topics that fascinate and frighten us. Instructors from disciplines across the arts and sciences bring expertise and diverse perspectives to provocative issues such as cannibalism and serial murder. Students learn to think critically and objectively while examining use in myth, literature, and popular culture.
Fulfills general education requirement in synthesis.

Prerequisite(s): PSYC 100 and completion or current enrollment in all other required general education courses, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring
PSYC 406 - Psychology of Communication

Credits: 3 (NR)
An examination of the behavior of communicating across species and sensory modalities, with an emphasis on the evolutionary basis for the various communication strategies used by animals and humans.

Fulfills general education requirement in synthesis.

Prerequisite(s): PSYC 100 or permission of instructor and completion or current enrollment in all general education requirements.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PSYC 414 - Behavior Disorders of Childhood

Credits: 3 (NR)
Review of the theories, methods, and research dealing with emotional and behavioral disorders of children.

Prerequisite(s): PSYC 313 and 325, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PSYC 415 - Psychological Factors in Aging

Credits: 3 (NR)
Examination of the sensory, perceptual, intellectual, and personality changes that occur in older people. Common adjustment problems as well as more serious adjustment difficulties are discussed. Applications of various personality theories of aging.

Prerequisite(s): PSYC 100 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PSYC 417 - Science of Well Being

Credits: 3 (NR)
This course will examine and interpret the latest research in social, personality, and clinical psychology on well-being, character strengths, and personal growth. Emphasis will be placed on the ways in which scientists generate hypotheses regarding the nature of positive psychological traits and processes and the methods by which these ideas are tested.

Prerequisite(s): PSYC 100 or permission of instructor
PSYC 418 - Death, Dying, and Grieving

Credits: 3 (NR)
Advanced survey of processes of grieving and their relationship to death and dying. Topics include ways of dying, effects of death on loved ones, and care for the terminally ill.

Prerequisite(s): PSYC 100 or permission of instructor.

PSYC 419 - Synthesis in Psychology

Credits: 3 (RD)
Understand and relate broad psychological issues to society as a whole. Possible topics include mental health in society, the psychology of food and eating behavior, and animals and society. See schedule of classes for current topic(s).

Prerequisite(s): PSYC 100 or permission of instructor.

Notes: May be repeated for a maximum of 15 credits when topic is different.

PSYC 423 - Group Psychotherapy Techniques

Credits: 3 (NR)
Review of theory and methods of group therapy with emphasis on humanistic and interpersonal approaches, including applications to family therapy, alcoholism, and drug abuse.

Prerequisite(s): PSYC 324 or permission of instructor.

PSYC 427 - Community Engagement for Social Change

Credits: 3 (NR)
Explores social problems and interpersonal, intrapersonal, and social aspects of addressing them. Addresses both theoretical aspects of social problems through readings and class discussion and application through community service.
Fulfills general education requirement in Synthesis.

**Prerequisite(s):** PSYC 100 or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**PSYC 435 - Personnel Training and Development: A Psychological Perspective**

Credits: 3 (NR)  
Overview and critique of training methods used in industry from viewpoint of psychological theory, including simulations, on-the-job training, supervisory/leadership skills training, computer-assisted instruction, and programmed texts. Principles of needs analysis, program development, and program evaluation are discussed within framework of industrial psychology.

**Prerequisite(s):** PSYC 333, PSYC 320, or permission of instructor

**Corequisite(s):** PSYC 320 or permission of instructor

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**PSYC 460 - Independent Study in Psychology**

Credits: 1-4 (RT)  
Advanced research methods in psychology in context of individual student projects or assisting with research on faculty projects; individual sections by arrangement with faculty.

**Prerequisite(s):** 18 credits of psychology including PSYC 301, with grade of C or better; 2.50 GPA in psychology; and written proposal approved before registration by instructor and department.

**Notes:** No more than 6 credits in PSYC 260, 350, and 460 can be used toward psychology major.

**Hours of Lecture or Seminar per week:** 1-3  
**Hours of Lab or Studio per week:** 0

---

**PSYC 461 - Special Topics**

Credits: 1-3 (RT)  
Selected topics reflecting interest in specialized areas.

**Prerequisite(s):** See course description in Schedule of Classes.

**Notes:** Topic announced in advance. May be repeated for credits when topic is different.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0
PSYC 465 - History and Systems in Psychology

Credits: 3 (NR)
Historical background and major theoretical systems in modern psychology. Approaches include behaviorism, cognitive/information processing approaches, and psychodynamic theories.

Prerequisite(s): 18 credits in psychology including PSYC 317, or permission of instructor

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PSYC 466 - Psychology of Intimate Relationships

Credits: 3 (NR)
Advanced survey of theories and research related to intimate relationships, including romantic relationships and those among family members and friends.

Prerequisite(s): PSYC 100 and 231; PSYC 324 recommended; or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PSYC 467 - The Psychology of Working in Groups and Teams

Credits: 3 (NR)
Teaches knowledge and the skills to meet communication, interpersonal, and task-related challenges that arise when functioning in work teams. Through readings, classroom activities, and applied problem-solving exercises, students acquire or refine team-related competencies. Students study theory of group and team processes while gaining insight from feedback on their behavior in exercises to become more effective team members.

Prerequisite(s): 60 credits including PSYC 100, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PSYC 472 - Current Topics in Brain and Behavior

Credits: 3 (RT)
Rotating topics. Physiological mechanisms underlying behavior. Selected topics include neuronal bases of learning and memory, Alzheimer's disease, and biological bases of addiction.

Prerequisite(s): PSYC 372 or 375 and 376; or permission of instructor.

Notes: May be repeated for a maximum of 6 credits with approval of instructor.
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**PSYC 490 - Psychology Honors I**

Credits: 3 (NR)
Review of topics and issues in psychology, including historical overview, theory and supporting data, and influences on behavior.

**Prerequisite(s):** Admission to Psychology Department honors status.

**Notes:** Topics vary. May not be repeated.

Hours of Lecture or Seminar per week: 3-6
Hours of Lab or Studio per week: 0

**PSYC 491 - Psychology Honors II**

Credits: 3 (NR)
Introduces advanced statistics, research methodologies, statistics packages, computing and information technology, and library technology appropriate for psychological research and pedagogy.

**Prerequisite(s):** PSYC 300, 301, and 490.

**Notes:** Students required to complete proposal in preparation for admission to Psychology Honors III. May not be repeated.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**PSYC 492 - Psychology Honors III**

Credits: 3 (NR)
Completion of final honors project or thesis. Students must complete project or thesis, and present oral defense to committee and poster to class. Students also expected to prepare proposal to present project or thesis at regional or national conference, or prepare manuscript for publication in appropriate journal.

**Prerequisite(s):** PSYC 491, and approval of proposal for final honors project or thesis.

**Notes:** May not be repeated.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**PSYC 499 - Senior Thesis**
Credits: 3 (NR)
Directed research on topic agreed on by student and advisor.

**Prerequisite(s):** Psychology major with 90 credits, experimental psychology lab course, 3.00 GPA in psychology, PSYC 460, permission of instructor, and prior approval of thesis proposal.

**Notes:** Students should take PSYC 460 with same advisor to develop thesis proposal before registering for PSYC 499. Students must complete thesis and defend it orally before advisor and two faculty members. With permission of department, students may take a second semester for maximum 6 credits.

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0

---

**PSYC 506 - Theories of Personality**

Credits: 3 (NR)
Comparative review of prevalent theories of personality with special emphasis on fundamental models, and similarities and differences.

**Prerequisite(s):** PSYC 324 or permission of instructor.

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0

---

**PSYC 518 - Death, Dying, and Grieving**

Credits: 3 (NR)
Advanced survey of processes of grieving and their relationship to death and dying. Topics include ways of dying, effects of death on loved ones, and care for the terminally ill.

**Prerequisite(s):** PSYC 100

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0

---

**PSYC 527 - Introduction to Neurobiology**

Credits: 2 (NR)
Introduction to neurobiology with overview of embryological development of nervous system in evolutionary context. Introduces regional and systems neuroanatomy by studying mammalian visual system with comparative perspective.

**Prerequisite(s):** PSYC 372 or PSYC 375 and 376, or BIOL 213 and 303.

**Hours of Lecture or Seminar per week:** 2
**Hours of Lab or Studio per week:** 0
PSYC 530 - Cognitive Engineering: Cognitive Science Applied to Human Factors

Credits: 3 (NR)
Application of cognitive theory to understand and predict interactions among human cognition, artifact, and task. Discusses recent research and case studies that emphasize empirical research, analytical modeling techniques, systems design, and development of tools and methods.

Prerequisite(s): Experimental lab course, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PSYC 531 - Mammalian Neurobiology

Credits: 3 (NR)
Functional anatomy of brains of mammals, with emphasis on regional and systems neuroanatomy of humans. Anatomy correlated with material from clinical neurology where possible. Laboratory component includes brain dissections and clinical correlations.

Prerequisite(s): PSYC 527.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 3

PSYC 541 - Survey Research

Credits: 3 (NR)
Introduces theory, method, and practice of survey research; students complete survey research project.

Prerequisite(s): PSYC 300, SOCI 221, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PSYC 552 - Histology/Histochemistry of the Brain

Credits: 5 (NR)
Explores conceptual basics and provides hands-on experience in techniques for studying brain tissue, including stereotaxic surgery, perfusion, sectioning, Nissl and myelin stains, enzyme histochemistry, immunohistochemistry, in situ hybridization, and quantitative receptor autoradiography.

Prerequisite(s): PSYC 372 or equivalent.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 2
**PSYC 555 - Neuroimaging**

Credits: 3 (NR)
Covers functional magnetic resonance imaging (fMRI) methods, experimental design and analysis issues in fMRI, structural MRI techniques and how they can contribute to cognitive neuroscience, and event-related potential methods.

**Prerequisite(s):** Graduate enrollment in either Cognitive & Behavioral Neuroscience or Human Factors & Applied Cognition programs, or instructor approval.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall.

**PSYC 556 - Chemistry and the Brain**

Credits: 3 (NR)
Fundamentals of general chemistry, atoms, molecules, and reactions, with emphasis on water solutions. Organic compounds and functional groups, biosynthesis and properties, and examples from nervous system. Also includes biopolymers and their roles in cellular and neuronal organization, ionic channels, neurotransmitter receptors, and psychoactive substances.

**Prerequisite(s):** PSYC 372 or 375 and 376; or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**PSYC 557 - Psychometric Methods**

Credits: 3 (NR)
Examines concepts of psychological measurement with emphasis on predictor test and criterion development. Discusses reliability, validity, and specialized techniques to develop tests of ability, interest, and personality.

**Prerequisite(s):** PSYC 611 and 612, or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**PSYC 558 - Neuronal Bases of Learning and Memory**

Credits: 3 (NR)
Examines neuronal mechanisms involved in learning and memory, in animals ranging from invertebrates to humans.

**Prerequisite(s):** PSYC 372 or 375 and 376; or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0
PSYC 559 - Behavioral Chemistry

Credits: 3 (NR)
Neurochemistry and neuroendocrinology, including neurotransmitter synthesis, genetic aspects of neural functioning, mechanisms of action of neurotransmitters and second messenger systems, regulation of neuroendocrine systems, neuroendocrine effects on behavior, and neuroimmunology.

Prerequisite(s): PSYC 372 or 375 and 376; or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PSYC 560 - Advanced Applied Social Psychology

Credits: 3 (NR)
Study of major trends in social psychological research with emphasis on ethical and practical problems posed by human experimentation. Topics include attitude measurement and change, conformity, social perception, and small group interaction.

Prerequisite(s): PSYC 231.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PSYC 561 - Behavioral Biology of Substance Abuse

Credits: 3 (NR)
Overview of biological effects of substance abuse, and biological mechanisms underlying addiction. Topics include alcohol, cocaine, marijuana, and other drugs; genetics of addiction; and neural systems underlying addiction and withdrawal.

Prerequisite(s): PSYC 372 or equivalent.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PSYC 562 - Research Methods in Human Experimental Psychology

Credits: 3 (NR)
Hands-on approach to selected current and/or classical human experimental psychology research methods. Course topics include experimental design, including psychophysical and physiological experimentation. In addition, mathematical, cognitive modeling and simulation, as well as advanced statistical techniques will be covered.

Prerequisite(s): Graduate enrollment in either Cognitive and Behavioral Neuroscience or Human Factors and Applied Cognition programs.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
PSYC 563 - Laboratory Methods in Behavioral Neuroscience

Credits: 3 (NR)
Lab work, to be completed in groups, will include surgical, histological, and behavioral techniques. Proper use and handling of animals, ethical issues, evaluation of neuroscience literature, experimental design and data analysis are addressed in lecture. This course requires working with laboratory rodents.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 3

PSYC 592 - Special Topics

Credits: 1-6 (RT)
Special topics reflecting interests in specialized areas.

Notes: Topic announced in advance. May be repeated for a maximum of 9 credits when topic is different.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PSYC 597 - Directed Reading and Research

Credits: 1-6 (RT)
Independent reading or research on topic agreed on by student and faculty member.

Prerequisite(s): Permission of instructor.

Notes: Directed reading or research for MA students in psychology. May be repeated within the same term or a different term for a maximum of 6 credits.

Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 0

PSYC 611 - Advanced Statistics

Credits: 4 (NR)
Test must be passed to take course. Open only to degree students. Integrates basic psychological statistics with overview of research methodology including experimental, quasi-experimental, field approaches, and measurement issues from advanced perspective. Lab work includes using computer packages for data handling and analyses.

Prerequisite(s): Screening test given on first evening of class

Notes: Students must enroll in 611 and 612 in sequential semesters.
PSYC 612 - Advanced Statistics

Credits: 4 (NR)
Open only to degree students. Integrates basic psychological statistics with overview of research methodology including experimental, quasi-experimental, field approaches, and measurement issues from advanced perspective. Lab work includes use of computer packages for data handling and analyses.

Prerequisite(s): Grade of A or B in PSYC 611.

Notes: Students must enroll in 611 and 612 in sequential semesters.

PSYC 614 - The Psychology of Aging

Credits: 3 (NR)
Review of the experimental literature in psychology of aging, including intellectual functioning, personality and adjustment, minor and major adjustment problems, and role changes in later life.

Prerequisite(s): PSYC 100 and undergraduate or graduate course in aging.

PSYC 615 - Language Development

Credits: 3 (NR)
Seminar covering theory and research on acquisition of language, including biological and environmental influences and constraints; research methods; role of parents; individual and cultural differences; links between language and other domains of development including cognitive, behavioral, social, and emotional; language and the brain; animal language; bilingualism; and atypical language development.

Prerequisite(s): 3 credits of graduate development psychology, or permission of instructor.

PSYC 617 - Child Psychopathology
Credits: 3 (NR)
Intensive survey of major types of psychopathological disturbances of infancy and childhood.

Prerequisite(s): PSYC 313 or 211, and 325.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PSYC 619 - Applied Behavior Analysis: Principles, Procedures, and Philosophy

Credits: 3 (NR)
Focuses on basic principles and procedures of applied behavior analysis; identification of factors that contribute to behavioral problems and improved performance; and procedures that can be used to minimize behavioral problems, improve performance, teach new behaviors, and increase probability of behaviors occurring under appropriate circumstances.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PSYC 621 - Applied Behavior Analysis: Empirical Bases

Credits: 3 (NR)
Focuses on basic content of applied behavior analysis, and teaches how to implement behavioral procedures and develop behavioral programs for clients with fundamental behavioral needs.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PSYC 623 - Applied Behavior Analysis: Assessments and Interventions

Credits: 3 (NR)
Further expands on basic content of applied behavior analysis, and teaches how to implement behavioral procedures and develop behavioral programs for clients with fundamental behavioral needs.

Prerequisite(s): PSYC 619 and 621, or EDSE 619 and 621.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PSYC 624 - Applied Behavior Analysis: Applications

Credits: 3 (NR)
Expands capability to deal with more complex behavioral situations, enabling ability to relate to more sophisticated professional issues and environments.
Prerequisite(s): PSYC 619 and 621, or EDSE 619 and 621.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PSYC 625 - Applied Behavior Analysis: Verbal Behavior

Credits: 3 (NR)
Further expands capability to deal with more complex behavioral situations, enabling ability to relate to more sophisticated professional issues and environments.

Prerequisite(s): PSYC 619 and 621, or EDSE 619 and 621.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PSYC 630 - Developmental Disabilities

Credits: 3 (NR)
Lectures, seminars discuss state-of-the-art and evidence-based information about developmental disabilities across life span with emphasis on mental retardation. Includes epidemiology, etiology, diagnoses, risk factors, treatment, supports, and prevention of developmental disabilities. Pertinent philosophical, ethical, and legal issues concerning this special-needs population will be discussed.

Prerequisite(s): 3 credits of graduate developmental psychology courses, or permission of instructor

Notes: In addition to course work and assigned reading, students sign up for a 20-hour per semester practicum.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 1

PSYC 631 - Industrial and Personnel Testing and Evaluation

Credits: 3 (NR)
Study of administration, scoring, and interpretation of standard tests used by industry for selection and assessment of personnel.

Prerequisite(s): PSYC 300 and 320.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PSYC 633 - Evaluative Research in Psychology
Credits: 3 (NR)
Examines research techniques specifically designed to evaluate human effectiveness of organizations and mental health programs.

Prerequisite(s): PSYC 300 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PSYC 636 - Survey of Industrial Psychology

Credits: 3 (NR)
Intensive survey of historical and current issues in major areas of applied (nonclinical) psychology.

Prerequisite(s): PSYC 300 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PSYC 638 - Training: Psychological Contributions to Theory, Design, and Evaluation

Credits: 3 (NR)
Focuses on applying learning principles derived from psychological research in development of training models and techniques of skill acquisition. Discusses research designs and empirical results appropriate to training evaluation.

Prerequisite(s): PSYC 636, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PSYC 639 - Survey of Organizational Processes

Credits: 3 (NR)
Trains at conceptual/theoretical and empirical levels in organizational processes. Includes individual, interpersonal, intra-group, and intergroup phenomena as they exist in context of organizational settings.

Prerequisite(s): PSYC 333 or 632.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PSYC 640 - Techniques in Industrial/Organizational Psychology
Skills-oriented course enabling students to construct instruments and perform functions critical to both researchers and practitioners in industrial/organizational psychology. Focuses on conducting job analysis interviews, developing and scoring task inventories, using critical incident and KSAO methods, and constructing performance appraisal and selection instruments.

**Prerequisite(s):** PSYC 300, or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

### PSYC 644 - Methods for Social Research

Credits: 3 (NR)  
Examines issues in basic and applied social science methodology including internal validity, causal generalization, and construct validity.

**Prerequisite(s):** Permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

### PSYC 645 - Research Methods in Human Factors and Applied Cognition

Credits: 3 (NR)  
Hands-on approach to selected current or classical human factors/applied cognition research methods; exact methods announced in advance. Potential methods include cognitive task analysis, usability evaluation methods, critical incident analysis, reliability analysis, workload measures, verbal protocol analysis, and engineering models of human performance.

**Prerequisite(s):** PSYC 530 and 611.

**Notes:** May be repeated for credit.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

### PSYC 646 - Issues and Methods in Longitudinal Developmental Research

Credits: 3 (NR)  
Examines techniques for measuring developmental change across lifespan.

**Prerequisite(s):** PSYC 611 and 612, and 6 credits of graduate developmental psychology.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0
PSYC 648 - Developmental Psychopathology

Credits: 3 (NR)
In-depth look at emerging discipline of developmental psychopathology. Discusses specific disorders and contexts to illustrate how knowledge of normal development, deviant development, and maladaptive behavior illuminates principles underlying adaptive functioning.

Prerequisite(s): 6 credits of graduate developmental psychology.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PSYC 652 - Quantitative Methods II: Analysis of Variance

Credits: 3 (NR)
Basic concepts in experimental design, fundamental assumptions in analysis of variance, and analysis of variance and covariance designs. Reviews multiple comparison tests.

Prerequisite(s): PSYC 300 and either 304, 305, or 309.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PSYC 654 - Naturalistic Methods in Psychology

Credits: 3 (NR)
Theory and techniques involved in studying people in their natural environment. Primary emphasis on quasiexperimental designs and methods of systematic observation.

Prerequisite(s): PSYC 300 and either 304, 305, or 309.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PSYC 666 - Cognitive and Perceptual Development

Credits: 3 (NR)
Survey of theory and research on development of perception, memory, concepts, problem solving, intelligence, and academic skills in children.

Prerequisite(s): 6 credits of child psychology and course in experimental psychology or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
PSYC 667 - Behavior in Small Groups and Teams

Credits: 3 (NR)
Theories, methods, and topics relevant to individual behavior in small group setting. Includes effects of individual on group, effects of group on individual, and interaction effects among individuals.

Prerequisite(s): PSYC 231.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PSYC 668 - Personality: Theoretical and Empirical Approaches

Credits: 3 (NR)
Presents comprehensive overview of current theoretical and empirical approaches to personality. Emphasizes areas of special relevance to clinical, developmental, and industrial/organizational psychology.

Prerequisite(s): PSYC 324, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PSYC 669 - Social and Emotional Development

Credits: 3 (NR)
Surveys theory and research relevant to development of social relationships, emotional expressiveness and regulation, aggressive and altruistic behaviors, sex roles, and morality. Emphasizes influences on such development, including parents, other adults, peers, siblings, and broader culture.

Prerequisite(s): 6 credits of developmental psychology, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PSYC 671 - Role and Function of the School Psychologist

Credits: 3 (NR)
Considers roles, functions of school psychologist in educational environment, including certification and ethical standards, issues, and trends.

Notes: Open only to school psychology MA students, or by permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
PSYC 673 - Prevention, Intervention, and Consultation in Schools

Credits: 4 (NR)
Examines theory and practice of behavior modification and consultation in school environment.

Notes: Open to practicing school psychologists and students in school psychology, or by permission of instructor.

Hours of Lecture or Seminar per week: 4
Hours of Lab or Studio per week: 0

PSYC 678 - Topics in School Psychology

Credits: 1-6 (RT)
Selected topics reflecting specialized area of school psychology.

Notes: Open to practicing school psychologists and advanced students in school psychology, or by permission of instructor. Content varies. May be repeated for a maximum of 9 credits when topic is different.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PSYC 684 - Psychological Counseling Techniques

Credits: 3 (NR)
Students gain experience in counseling techniques used in schools and contemporary practice.

Notes: Open to practicing school psychologists or psychology graduate students with prior course in counseling. Application of various counseling approaches and techniques to school-age child and adolescent.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PSYC 685 - Cognitive Neuroscience

Credits: 3 (NR)
Provides an overview of the neural basis of human mental functions. Uses neuroimaging (PET, fMRI, ERPs, TMS, etc.), computational, and information-processing methods to examine functions such as attention, memory, language, emotion, and decision making.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PSYC 701 - Cognitive Bases of Behavior
Credits: 3 (NR)
Surveys concepts in learning, cognitive, and affective processes, including theories and supporting data and their influences on behavior.

Prerequisite(s): Admission to graduate program in psychology.

Notes: Open only to degree students.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PSYC 702 - Biological Bases of Human Behavior

Credits: 3 (NR)
Surveys biological bases of behavior, including such topics as neural conduction, role of specific neurotransmitters, cortical functioning, and brain disorders.

Notes: Open only to degree students.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PSYC 703 - Social Bases of Behavior

Credits: 3 (NR)
Surveys social influences on behavior, including group processes, person perception, and attitude formation.

Prerequisite(s): Admission to graduate program in psychology.

Notes: Open only to degree students.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PSYC 704 - Life-Span Development

Credits: 3 (NR)
Surveys theories and research regarding lifespan development and personality formation.

Prerequisite(s): Admission to graduate program in psychology.

Notes: Open only to degree students.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
PSYC 705 - Historical and Philosophical Issues in Psychology

Credits: 3 (NR)
Important historical and systematic approaches to psychology and their relationship to the philosophy of science, structure of theory, and philosophical issues in psychology.

Prerequisite(s): Admission to graduate program in psychology.

Notes: Open only to degree students.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PSYC 709 - The Measurement of Intelligence

Credits: 4 (NR)
Administration, scoring, and interpretation of major infant, child, and adult intelligence tests, with emphasis on individual tests. Development of IQ tests, theories of intelligence, and current trends and developments in intellectual assessment.

Prerequisite(s): PSYC 617 or 822 and PSYC 320 or equivalent; permission of department. Coreq: PSYC 611.

Corequisite(s): PSYC 611.

Notes: Open only to school psychology MA student.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 2

PSYC 710 - Psychological Assessment

Credits: 4 (NR)
Study of major instruments used in clinical assessment and nature, problems, and predictive value; administration and scoring of major techniques for evaluation of personality; and principles of interpretation of these procedures.

Prerequisite(s): PSYC 617, 709, 822, or 810: and permission of director of School Psychology Program.

Notes: Open only to school psychology MA students.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 2

PSYC 722 - Advanced Child Assessment

Credits: 4 (NR)
Problems involved in diagnostic assessment of children with various handicapping conditions such as learning disabilities, retardation, and emotional disturbances.
Prerequisite(s): PSYC 709 and 710 or PSYC 810 and 811, five intellectual assessments at psychological clinic, and permission of department

Notes: Open only to school psychology MA or PhD students.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 2

PSYC 730 - Practicum in Applied Psychology

Credits: 1-6 (RD)
Practical experience in organizational setting as assigned.

Prerequisite(s): Admission to graduate program in psychology and permission of department.

Notes: PhD students may repeat course for a maximum of 15 credits; MA students for a maximum 6 credits.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
Grading: Graduate Special

PSYC 733 - Issues in Personnel Psychology

Credits: 3 (NR)
Examines psychological literature on job analysis, job evaluation and compensation, performance appraisal, training, and EEOL selection issues. Methodological and psychometric issues in interpretation and evaluation of personnel psychology research receive particular attention.

Prerequisite(s): PSYC 636 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PSYC 734 - Seminar in Human Factors and Applied Cognition

Credits: 3 (RT)
Emphasizes current research and application of human factors, ergonomics, applied cognition, and applied perception.

Prerequisite(s): 6 graduate credits in human factors and applied cognition, or permission of instructor.

Notes: May be repeated for a maximum of 9 credits when topic is different.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
PSYC 735 - Psychological Perspectives on Organizational Development

Credits: 3 (NR)
Theories and methods in industrial/organizational psychology as they relate to organizational change and development. Actual training in organizational diagnosis, change through supervised field work.

Prerequisite(s): 3 graduate credits in industrial/organizational psychology, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PSYC 736 - Research in Human Performance Assessment

Credits: 3 (NR)

Prerequisite(s): 3 graduate credits in industrial/organizational psychology, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PSYC 737 - Psychology of Human-Technology Interaction

Credits: 3 (RT)
Emphasizes current research and development in human-computer interaction, cognitive systems engineering, cognitive ergonomics, and cognitive engineering.

Prerequisite(s): 6 graduate credits in human factors and applied cognition or permission of instructor.

Notes: May be repeated for a maximum of 9 credits when topic is different.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PSYC 739 - Seminar in Industrial/Organizational Psychology

Credits: 3 (RD)
Rotating topics such as leadership theories and management development, and performance appraisal.

Prerequisite(s): PSYC 333 and 636, or permission of instructor.

Notes: Topics announced in advance. May be repeated for a maximum of 12 credits when topic is different.
PSYC 741 - Psychology of Work Motivation

Credits: 3 (NR)
Examines psychological literature of need, cognitive, and reinforcement theories of motivation; organizational attachment (commitment, absenteeism, and turnover); job design and quality of work issues. Emphasizes methodological and psychometric issues in interpreting and evaluating work-motivation research.

Prerequisite(s): PSYC 333 or permission of instructor

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PSYC 750 - School Psychology Practicum I

Credits: 1 (NR)
Practical experience in school psychology.

Prerequisite(s): Admission to school psychology concentration and PSYC 709.

Notes: Open only to school psychology MA students.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
Grading: Graduate Special

PSYC 751 - School Psychology Assessment Practicum II

Credits: 2 (RD)
Practical experience in school psychology.

Prerequisite(s): PSYC 750.

Notes: Open only to School Psychology MA students. Apply in writing for permission of department 60 days prior to beginning of semester. May be repeated for a maximum of 4 credits.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PSYC 754 - Quantitative Methods III: Psychological Applications of Regression Techniques
Credits: 3 (NR)
Reviews psychological applications of regression techniques in variety of contexts including experimental, field, and survey settings.

Prerequisite(s): PSYC 611 and 612.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PSYC 756 - Quantitative Methods IV: Multivariate Techniques in Psychology

Credits: 3 (NR)
Surveys multivariate statistical techniques as applied to psychological research. Emphasizes analysis of complex designs and interpretation of multivariate data analyses resulting from computer processing.

Prerequisite(s): PSYC 611 and 612, or equivalent; PSYC 755 recommended.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PSYC 757 - Advanced Topics in Statistical Analysis

Credits: 3 (RD)
Focuses on noncognitive individual differences that predict performance. Published work discussed in seminar format with emphasis on conceptual development, methodological adequacy, and new directions.

Prerequisite(s): PSYC 754.

Notes: May be repeated for credit when topic is different.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PSYC 758 - Dispositional Predictors of Performance

Credits: 3 (NR)
Focuses on individual differences other than cognitive ability that predict performance. Papers discussed in seminar format with eye toward conceptual development and empirical review.

Prerequisite(s): PSYC 636.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PSYC 759 - Applied Decision Making
Covers "basic applied" decision-making research. First half of course reviews basic psychological research on judgment and decision making; second half applies research to various practical problems. Overarching goal is to understand how basic decision-making literature can better inform applied research and practice.

**Prerequisite(s):** PSYC 611/612

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

### PSYC 768 - Advanced Topics in Cognitive Science

Credits: 3 (RT)  
Emphasizes current research in cognitive science. Topics may include computational cognitive models, nature of expertise, diagrammatic reasoning, display-based problem solving, visual attention, decision making, goal-based versus event-based cognition, and situated action.

**Prerequisite(s):** PSYC 530 or 701.

**Notes:** May be repeated for a maximum of 12 credits when topic is different.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

### PSYC 780 - Applied Developmental Psychology

Credits: 3 (NR)  
Examines how developmental theory, knowledge base, and methodology can be used to promote health and welfare of individuals across lifespan. Topics include contemporary social issues and child development, research in applied settings, developmental assessment and intervention, and program evaluation.

**Prerequisite(s):** PSYC 704 or 3 credits of other graduate developmental psychology courses and permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

### PSYC 786 - Assessment and Treatment in Gerontology

Credits: 3 (NR)  
Functional assessment of older adults including conceptual and methodological problems involved. Examines intervention strategies with older adults, including interviewing, group work with older persons, milieu therapy, reality therapy, and design of supportive environments.

**Prerequisite(s):** Course in the psychology of aging, PSYC 320 and 423, or equivalent courses.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0
PSYC 790 - School Psychology Internship

Credits: 3-6 (RD)
Supervised field experience of one school year. Advanced school psychology student functions as full-time staff member in school system. Student completes paper on practical research project involving alternative school psychology role in school system.

Prerequisite(s): Completion of required courses in school psychology and permission of program coordinator.

Notes: Enrollment is for total 9 credits (thesis option) or 12 credits (nonthesis option) in increments of 3 credits according to placement. Students enrolled in PSYC 799 are not required to complete the practical research project.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
Grading: Graduate Special

PSYC 792 - Practicum in Developmental Psychology, Biopsychology, and School Psychology

Credits: 1-6 (RD)
Supervised experience in developmental psychology, biopsychology, or school psychology.

Prerequisite(s): Admission to concentrations in developmental psychology, biopsychology, or school psychology; 3 credits of graduate developmental psychology, biopsychology, or advanced standing in school psychology.

Notes: Interested students must apply to area coordinator 60 days before registration. May be repeated for a maximum of 6 credits.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0
Grading: S/NC

PSYC 794 - Developmental Assessment

Credits: 1-6 (RT)
Introduces considerations and methods needed for evaluating young children (ages two - six). Focus on the skills necessary for formulating, conducting, and reporting comprehensive developmental evaluations. Emphasizes evaluation of preschool children and includes information relating to infants, as well as older children functioning at lower developmental levels.

Prerequisite(s): Admission to applied developmental psychology program.

Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 0
PSYC 798 - Thesis Proposal
Credits: 1-6 (RD)
Work on a proposal for master's thesis.

Prerequisite(s): Permission of program coordinator.

Notes: May not be repeated for credit.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
Grading: S/NC

PSYC 799 - Master's Thesis
Credits: 1-6 (RD)
Research on approved master's thesis topic under direction of thesis committee with approval of chair.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
Grading: S/NC

PSYC 810 - Psychological Assessment I
Credits: 4 (NR)
First of required two-course sequence that provides comprehensive coverage of principles, strategies, and techniques of psychological assessment. Emphasizes empirically supported methods.

Notes: Open only to clinical psychology PhD students.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 2

PSYC 811 - Psychological Assessment II
Credits: 4 (NR)
Second of required two-course sequence that provides comprehensive coverage of principles, strategies, and techniques of psychological assessment. Emphasizes empirically supported methods.

Notes: Open only to clinical psychology PhD students.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 2
PSYC 816 - Neuropsychological Assessment

Credits: 3 (NR)
Nature of brain behavior relationships in adults and children. Concentrates on major assessment techniques including Luria Nebraska, Halstead-Reitan, and Michigan Neuropsychological batteries.

Prerequisite(s): PSYC 702, 810, and 811; or 709 and 710

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PSYC 822 - Scientific Foundations of Clinical Psychology I

Credits: 3 (NR)
First of required two-course sequence that provides comprehensive coverage of major psychological problems, including review of empirically supported interventions.

Notes: Open only to clinical psychology PhD students.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PSYC 823 - Scientific Foundations of Clinical Psychology II

Credits: 3 (NR)
Second of required two-course sequence that provides comprehensive coverage of major psychological problems, including review of empirically supported interventions.

Notes: Open only to clinical psychology PhD students.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PSYC 830 - History, Systems, and Theories of Personality and Psychotherapy

Credits: 3 (NR)
Review of history, systems, and theories of clinical psychology emphasizing traditional theories of personality and psychotherapy.

Prerequisite(s): Admission to doctoral concentration in clinical psychology.

Notes: Open only to clinical PhD students.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
PSYC 831 - Social-Cognitive Interventions in Clinical Psychology

Credits: 3 (NR)
Survey of procedures for altering emotional distress and behavioral dysfunction within the conceptual framework of social cognitive theory and cognitive behavioral therapy.

Notes: Open only to clinical psychology PhD students.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PSYC 832 - Group, Marital, and Family Psychotherapy

Credits: 3 (NR)
Introduces major models of group, marital, and family functioning as well as current approaches to group, marital, and family psychotherapy.

Prerequisite(s): PSYC 822, 823, and 830.

Notes: Open only to clinical psychology PhD students.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PSYC 833 - Social And Cognitive Foundations Of Clinical Psychology

Credits: 3 (NR)
Review of theory and research in social psychology (particularly social cognition) relevant to understanding psychological adjustment, adjustment problems, and clinical interventions.

Notes: Open only to clinical psychology PhD students.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PSYC 840 - Community Psychology I

Credits: 3 (NR)
First of required two-course sequence. Comprehensive coverage of history, concepts, and practice of community-clinical psychology, including community mental health theory, consultation, prevention, program planning and evaluation, and human services management.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
Grading: Graduate Special
PSYC 841 - Community Psychology II

Credits: 3 (NR)
Second of required two-course sequence. Comprehensive coverage of history, concepts, and practice of community-clinical psychology, including community mental health theory, consultation, prevention, program planning and evaluation, and human services management. Includes implementation of consultation project.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PSYC 850 - Teaching Practicum in Psychology

Credits: 1 (NR)
Workshop in effective teaching of selected undergraduate psychology courses. Required of and designed to guide graduate teaching assistants assigned to teach undergraduate course (not a lab) for first time. Topics include course planning, syllabus development, lecture resources, effective lecturing skills, use of audio visuals, leading of classroom discussion, construction and grading of exams, student writing, instructional technology, and handling of student questions and problems. Individual critiques of teaching.

Corequisite(s): Teaching assignment in an undergraduate psychology course.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0
Grading: Graduate Special

PSYC 860 - Introductory Helping Skills and Motivational Interviewing

Credits: 3 (NR)
Teaches fundamental interviewing skills and the theory, research, and practice of motivational interviewing.

Prerequisite(s): Permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PSYC 861 - Cognitive Behavioral Therapy for Youth

Credits: 3 (RD)
Teaches the selection, evaluation, and application of empirically supported interventions for children and adolescents with a focus on cognitive-behavioral interventions. Instruction in evidence based assessments, cognitive-behavioral case conceptualization, outcome evaluation, and consultation. Supervision of cognitive-behavioral therapy with youth.

Prerequisite(s): Permission of instructor.

Notes: May be repeated for a maximum of 6 credits.
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
Grading: Satisfactory/No Credit.

PSYC 862 - Cognitive Behavioral Therapy for Adults

Credits: 3 (RD)
Teaches the principles of cognitive-behavioral theory, conceptualization and psychotherapy techniques for psychological problems with adults. Supervision of cognitive-behavioral therapy with adults.

Notes: May be repeated for a maximum of 6 credits.

PSYC 881 - Practicum in Clinical Psychology

Credits: 1-3 (RT)
Supervised clinical work in a professional psychological services setting. Usually includes practice in psychological assessment and clinical interventions, but can also include supervision, consultation, and program evaluation.

Prerequisite(s): Admission to doctoral concentration in clinical psychology and permission of director.

PSYC 883 - Ethical and Professional Issues in Clinical Practice

Credits: 3 (NR)
Examines ethical principles and professional guidelines to help develop ethical decision-making and behavior to meet the appropriate standards of care in providing clinical services.

Notes: Open only to clinical psychology PhD students.

PSYC 885 - Clinical Externship

Credits: 0 (RD)
Individual placements in psychological assessment or psychotherapy service settings.
Notes: Open only to clinical psychology PhD students in the third year or more of training.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
Grading: Graduate Special

PSYC 888 - Clinical Supervision: Theory, Research, and Practice

Credits: 3 (NR)
Introduces students to theory, research, and practice of clinical supervision, with an emphasis on supervision of psychotherapy. Focuses on selecting effective supervision strategies, establishing and maintaining a positive supervisory relationship, and applying supervisory practices in accordance with current research and standards. Includes didactic and applied components.

Prerequisite(s): 6 credits of PSYC 881.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PSYC 890 - Seminar in Professional Psychology

Credits: 1-3 (RD)
Each section limited to students in one concentration of MA or PhD program. See area coordinator for requirements for section in each track.

Prerequisite(s): Graduate student in psychology.

Notes: May be repeated for a maximum of 3 credits.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0
Grading: S/NC

PSYC 892 - Special Topics in Psychology

Credits: 1-6 (RT)
Selected topics reflecting specialized areas in psychology.

Notes: Open only to PhD students. Content varies. May be repeated for a maximum of 17 credits when topic is different.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PSYC 897 - Directed Reading and Research
Credits: 1-3 (RT)
Independent reading on topic agreed on by student and faculty member.

Notes: PhD students in the clinical psychology concentration may not take this course for elective credit. May be repeated for credit. May not be repeated for credit towards a degree by students who also register for PSYC 799.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PSYC 998 - Doctoral Dissertation Proposal

Credits: 1-6 (RD)
Work on research proposal that forms basis for doctoral dissertation.

Notes: May be repeated. No more than 24 credits of PSYC 998 and 999 may be applied to doctoral degree requirements.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0
Grading: S/NC

PSYC 999 - Doctoral Dissertation

Credits: 1-9 (RD)
Research on approved dissertation topic under direction of dissertation committee.

Prerequisite(s): PSYC 998

Notes: May be repeated. Students must complete a minimum of 3 credits of 999. No more than 12 credits of PSYC 998 and 999 may be applied to doctoral degree requirements.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0
Grading: S/NC

Public Administration (PUAD)

Offered by the College of Humanities and Social Sciences

PUAD 502 - Administration in Public and Nonprofit Organizations

Credits: 3 (NR)
Graduate introduction to field of public administration. Focuses on structure, functions, and processes of executive branch agencies of national, state, and local governments. Emphasizes nonprofit organizations as co-actors with government in policy-making/policy implementation nexus.
PUAD 504 - Managing in the International Arena: Theory and Practice

Credits: 3 (NR)
Theoretical and empirical examination of international system that both affects and is affected by decisions, behaviors, and subsystems of state and nonstate (organizational) actors.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PUAD 505 - Introduction to Management of Nonprofits

Credits: 3 (NR)
Examines nonprofit organizations and their role in contemporary society. Explores unique aspects of nonprofits including voluntary governance, tax-exempt status, nonprofit corporation law, accounting practices, fund raising, finance, and management of volunteers. Emphasizes board/executive relationship, and value of establishing and maintaining nonprofit organization's reputation.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PUAD 509 - Justice Organizations and Processes

Credits: 3 (NR)
Examines structures, practices, and performance of organizations involved in administration of justice (law enforcement, courts and legal agencies, corrections, regulatory and related agencies, private organizations) Explores applicability of various theoretical perspectives on organizational processes, and considers extent to which processes operate as a system. Focuses on comparing formal goals and system expectations to actual practice.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PUAD 511 - Problem Solving and Data Analysis I

Credits: 3 (NR)
Techniques, skills for public managers to solve policy-related problems or analyze policy-related data. Focuses on problem definition, research design, and problem solving under conditions of uncertainty in public sector.

Equivalent to GOVT 511; PUAD 611 (2011-2012 Catalog)

Prerequisite(s): Passing grade on screening exam.
PUAD 520 - Organization Theory and Management Behavior

Credits: 3 (NR)
Considers behavior in context of public organization, and consequent changes required in management. Focuses on such issues as perception, attitude formation, motivation, leadership, systems theory, communication and information flow, conflict theory, and decision theory.

Equivalent to PUAD 620 (2011-2012 Catalog)

PUAD 540 - Public Policy Process

Credits: 3 (NR)
Processes of making public policy, including detection of public issues, consideration of alternatives, and adoption and implementation of solutions. Highlights major actors in policy process, and environment within which they work.

Equivalent to PUAD 640 (2011-2012 Catalog)

Prerequisite(s): PUAD 502.

PUAD 612 - Problem Solving and Data Analysis II

Credits: 3 (NR)
Techniques and skills for public managers to solve policy-related problems or analyze policy-related data. Focuses on data gathering and analysis, use of computers, systems theory and analysis, and operations research.

Prerequisite(s): PUAD 511.

PUAD 613 - Economic Analysis in Public Administration

Credits: 3 (NR)
Covers major economic issues about role of markets and government in global world. Applies fundamental economic concepts such as cost benefit analysis to public sector.
Prerequisite(s): PUAD 511.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PUAD 615 - Administrative Law

Credits: 3 (NR)
Covers law as guiding and controlling force in public-sector operations. Includes application of legal processes to administrative practices and situations, and administrative determination of private rights and obligations.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PUAD 621 - Principles and Practices in Government Organization and Management

Credits: 3 (NR)
Major management theories applicable to American federal system. Emphasizes organization, structure, and operations. Explores relationship of theories to management practices in contemporary American administration.

Prerequisite(s): PUAD 520.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PUAD 622 - Program Planning and Implementation

Credits: 3 (NR)
Practical exploration of implementing public law in American federal system. Studies construction of organizational apparatus, development of operational plans, and systems of control and evaluation necessary to implement government programs. Emphasizes coordinating tasks and resources required for effective program implementation.

Prerequisite(s): PUAD 520.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PUAD 623 - Managing Government Contracting

Credits: 3 (NR)
Explores unique management and administrative challenges of providing public goods and services through contracts. Examines debates over privatization, and explores tools managers need to address unique accountability challenges associated with this governance tool.
PUAD 624 - Public and Private Partnerships

Credits: 3 (NR)
Emphasizes entrepreneurial efforts where governments, nonprofit organizations and private companies establish goals and combine resources and talents. Issues of efficiency, accountability, and democratic responsiveness will be examined. Various tools for promoting and implementing such partnerships will be explored.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PUAD 625 - Higher Education Law

Credits: 3 (NR)
Analyzes legal issues confronting higher education: governance, faculty matters, and student issues. Examples include due process, freedom of speech, and privacy. Reviews key constituents in higher education-students, faculty, administrators, board of trustees, and parents-and how their roles are changing.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PUAD 626 - Consulting Management

Credits: 3 (NR)
Explores the consulting industry, changes in the industry and future expectations of consulting as a career. Examines different sectors of consulting such as HR, IT, Operations, Marketing, Succession Planning, Organizational Consulting, Knowledge management, Non-profit and health care and government consulting.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PUAD 630 - Emergency Planning and Preparedness

Credits: 3 (NR)
Provides an understanding of the issues associated in developing plans and policies to prepare for disasters, both natural and man made. Overview of nature of challenges posed by different kinds of disasters; discussion of regulatory requirements, sample plans, equipment requirements, collateral and mutual aid support agreements, and methods for testing and updating plans.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
PUAD 631 - Disaster Response Operations and Recovery

Credits: 3 (NR)
Explores the principles and practices that promote effective disaster response operations and management. Examines nature of disasters, models for response operations in the United States and roles and responsibilities of various emergency management-related organizations.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PUAD 632 - Terrorism: Theory and Practice

Credits: 3 (NR)
Introduces students to the subject of terrorism including the history and evolution of terrorism, case studies of key terrorist groups, the current nature of the terrorist threat, and counterterrorism strategies.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PUAD 633 - Hazard Mitigation Policy

Credits: 3 (NR)
Examines the complex interplay and policy approaches to hazard prevention and protection of known hazards in terms of land use, zoning, infrastructure, and building code management. Focuses on understanding the relative roles of proactive policy design and implementation at the federal, state, and local levels of government.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PUAD 634 - Management of International Security

Credits: 3 (NR)
Examines theory and practice of managing international security. Emphasizes interplay of organizational structure and bureaucratic dynamics in international context. Presents theory and practice of crisis management, and coordination and comparison of security methods and techniques.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PUAD 635 - Emergency Preparedness: Interagency Communication and Coordination

Credits: 3 (NR)
Considers complex relationships within governments and across sectors and levels of government for effective emergency management in planning, response, recovery, and mitigation phases. Explores intergovernmental management and network
management theories and research to understand the nature of interorganizational problems and potential models for collaboration.

**PUAD 636 - The NGO: Policy and Management**

Credits: 3 (NR)
Explores unique aspects of nonprofit organizations operating in international environments, particularly in relief and development work. Examines relationship between NGO and U.S. and foreign governments. Covers international philanthropy; cross-cultural understanding; and key managerial concerns such as communications, planning, human resource management, control, group process, and project evaluation.

**Hours of Lecture or Seminar per week: 3**
**Hours of Lab or Studio per week: 0**

**PUAD 637 - Managing Homeland Security**

Credits: 3 (NR)
Focuses on the Department of Homeland Security and will cover the statutory law that provides the foundation for the department, the resources appropriated to the department, the determination of strategy and priorities, the development of operational capacity, and other challenges associated with top-level (secretarial) management of the department and its principal bureaus.

**Hours of Lecture or Seminar per week: 3**
**Hours of Lab or Studio per week: 0**

**PUAD 642 - Environmental Policy**

Credits: 3 (NR)
In-depth examination of environmental policy making. Examines U.S. efforts from 1970 to present to mitigate pollution of nation's air, land, and water; and addresses issues of global concern including biodiversity loss, ozone depletion, and climate change.
Designated a Green Leaf Course.

**Hours of Lecture or Seminar per week: 3**
**Hours of Lab or Studio per week: 0**

**PUAD 644 - Public Policy Models**

Credits: 3 (NR)
Approaches to modeling policy problems. Includes analysis and comparison of dominant paradigms in policy sciences. Reviews
assumptions and implications of different models and their utility for analysis, implementation, and evaluation.

**Prerequisite(s):** PUAD 540.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**PUAD 645 - Policy Analysis**

Credits: 3 (NR)  
Introduces concepts and techniques for formal policy analysis, development of skills in applying policy analysis techniques through case studies, and exploring legitimacy and utility of policy analysis.

Equivalent to PUAD 741 (2011-2012 Catalog)

**Prerequisite(s):** PUAD 502, PUAD 511, PUAD 540.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**PUAD 646 - Program Evaluation**

Credits: 3 (NR)  
Introduces concepts and techniques for formal policy analysis, development of skills in applying policy analysis techniques through case studies, and exploring legitimacy and utility of policy analysis.

Equivalent to PUAD 742 (2011-2012 Catalog)

**Prerequisite(s):** PUAD 502, PUAD 511.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**PUAD 649 - Advocacy and Lobbying**

Credits: 3 (NR)  
Explores how nonprofit organizations advocate and lobby for social change. Considers the different steps in the advocacy process and the broad range of strategies used by non profits seeking to influence public policy.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**PUAD 651 - Virginia Politics, Policy, and Administration**
Cultural, demographic, constitutional, and socioeconomic environment of public administration in Virginia. Covers governmental agencies, legislative functions, executive leadership, staff agencies, state-local relationships, intrastate regionalism, administrative customs peculiar to Virginia.

Prerequisite(s): PUAD 502.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**PUAD 652 - Nonprofit Leadership and Change**

Credits: 3 (NR)
Examines the principles of leadership and the process of change within the context of the nonprofit sector and its role in the community. Looks at current changes and challenges within the nonprofit sector and their effect on the sector and society as a whole.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**PUAD 654 - The Community, Marketing, and Public Relations**

Credits: 3 (NR)
Focuses on marketing concepts and communications issues of nonprofit organization as they apply to identifying market, ability to formulate public image and reputation, and capability to raise money and retain membership or volunteers.

Prerequisite(s): PUAD 502 or 505.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**PUAD 655 - Philanthropy and Fund Raising**

Credits: 3 (NR)
Examines history of philanthropy and relationship to nonprofit, government, and commercial sectors in United States. Studies principles of financial development including governance, development of organizational capacity, and identification of funding sources and donor motivations. Provides understanding of fund raising techniques that generate financial support for nonprofits, and context in which these methods may be used.

Prerequisite(s): PUAD 502 or 505

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**PUAD 657 - Association Management**
Practical application of management theory in context of professional and trade associations. Covers legal structures, tax-exempt status, and general organizational structure. Topics include volunteer management, budgeting and accounting practices in associations, fund raising, media relations, media and event planning, and human resource management.

**Prerequisite(s):** PUAD 502 or 505

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**PUAD 658 - Social Entrepreneurship and Nonprofit Enterprise**

Credits: 3 (NR)  
Explores innovative approaches for addressing social problems. Organized around the steps in the entrepreneurial process: identifying social needs, formulating program strategies, mobilizing resources, managing growth tracking results, and maximizing impact.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**PUAD 659 - Nonprofit Law, Governance, and Ethics**

Credits: 3 (NR)  
Overview of nonprofit governance as well as basic contract, labor, and tax law issues within nonprofit corporation law. Covers relationship between board and executive, and ethics topics typical to nonprofit organizations such as self-dealing, fiduciary responsibility, and human resource issues.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**PUAD 660 - Public and Nonprofit Accounting and Finance**

Credits: 3 (NR)  
Studies fundamental normative debates in public and nonprofit financial management arena with focus on resulting implementation principles and techniques in governmental accounting, financial reporting, budget and revenue decisions, debt management, cash and investment management, pensions and employee benefits, and risk management.

**Prerequisite(s):** Course open only to admitted MPA or association/nonprofit management certificate students

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**PUAD 661 - Public Budgeting Systems**
Survey focusing on policy and theoretical framework of revenue and expenditure choices at all levels of government. Topics include development, theories, structure of budgeting; political, economic, and managerial aspects of public budgeting; public policy implications; and budgetary reform movements and successes and failures.

**PUAD 662 - National Budgeting**

Credits: 3 (NR)
Examines formulation of overall national fiscal policy and budgetary priorities through presidential and congressional budget processes, including decisions over spending and revenues.

**Hours of Lecture or Seminar per week: 3**
**Hours of Lab or Studio per week: 0**

**PUAD 663 - State and Local Budgeting**

Credits: 3 (NR)
Introduces state and local government budgeting including principal actors and institutions inside and outside state and local governments that play role in budget development, appropriation, implementation, and auditing.

**Hours of Lecture or Seminar per week: 3**
**Hours of Lab or Studio per week: 0**

**PUAD 664 - Nonprofit Financial Management**

Credits: 3 (NR)
Covers nonprofit financial management with attention to conflicts between social mission and financial entrepreneurship. Topics include mission, budgeting, fund raising, commercial programs, investments, accounting and information systems, financial reporting, auditing, and internal control.

**Prerequisite(s):** Admission to MPA, certificate in association management, or certificate in nonprofit management.

**Hours of Lecture or Seminar per week: 3**
**Hours of Lab or Studio per week: 0**

**PUAD 670 - Human Resources Management in the Public Sector**

Credits: 3 (NR)
Overview of range and complexity of functions, responsibilities, and expectations of human resource staff and line managers in public sector. Focuses on human resources management in context of political, legal, and managerial systems. Human resource functions, such as hiring, performance, and development, are also presented.
Prerequisite(s): PUAD 502.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PUAD 671 - Public Employee Labor Relations

Credits: 3 (NR)
Public employee labor relations, including unionization, representational elections, bilateral policy negotiations, administration of agreements, management rights, union and membership security, strike issue and grievance procedures, impact on public administration, and assessment of future developments.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PUAD 672 - Human Resources Reforms for Public Administration

Credits: 3 (NR)
Explores recent reforms in human resources management in federal, state, and local governments. Covers pay for performance systems, flexible assignment patterns, incentives for productivity, work-life balance, job design, and changes resulting from higher levels of contracting for government programs.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PUAD 679 - Leadership Skills for the 21st Century

Credits: 3 (NR)
The class is premised on the belief that an individual’s leadership capabilities can be enhanced by better understanding and practicing day-today leadership skills which can be used in the workplace. The academic literature on leadership will also be discussed.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PUAD 680 - Managing Information Resources

Credits: 3 (NR)
Examines how managerial and analytical functions in public organizations can be performed via end-user computer applications. Provides in-depth coverage of selected database and decision support packages, and gives attention to logic and integration of application software.

Prerequisite(s): Admission to MPA program, or permission of instructor.
PUAD 691 - Justice Program Planning and Implementation

Credits: 3 (NR)
Covers development and construction of organizational systems to implement government policies and programs. Emphasizes dealing with real-world challenges, constraints, and opportunities to create feasible plans, performance-monitoring systems, and secure multiple agency coordination. Applications of planning and implementation principles to actual projects in justice agencies.

Prerequisite(s): PUAD 502 and 509.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PUAD 700 - Ethics and Public Administration

Credits: 3 (NR)
Topics of ethical dimensions including constitutionalism, democratic values and traditions, standards of conduct and ethics, and conflicting values of public officials and social equity of public programs.

Prerequisite(s): PUAD 502, PUAD 511, PUAD 520, and PUAD 540. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PUAD 701 - Cross-Cultural and Ethical Dimensions of International Management

Credits: 3 (NR)
To be taken in final two semesters of MPA program. Examines normative issues in management of programs in international context. Emphasizes interplay of cultural, sociopolitical, legal, and ethical factors, and management and policy problems arising from conflicting goals, values, and inequities among nations and regions.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PUAD 703 - Third-Party Governance

Credits: 3 (NR)
Examines design and management of government programs relying on other levels of government and private sector for delivery, with focus on such governmental tools as contracts, grants, loans, regulation, and tax credits.
Prerequisite(s): PUAD 502, PUAD 511, PUAD 520, and PUAD 540. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PUAD 720 - Performance Measurement

Credits: 3 (NR)
Methods used by managers to systematically assess performance. Includes practical tools such as focus groups, survey research, cost/benefit analysis, benchmarking, and comparison methods for revealing outcomes and impacts. Preparis managers to use information more effectively in developing programs and services and formulating policy, and covers reporting techniques to communicate performance results.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PUAD 727 - Seminar in Risk Assessment and Decision Making

Credits: 3 (NR)
Examines decision making under risk and uncertainty. Readings introduce major intellectual perspectives on topic and are drawn from variety of disciplines, including biology, economics, law, and psychology. Emphasizes making actual decisions under uncertainty.

Prerequisite(s): 12 graduate credits.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PUAD 729 - Issues in Public Management

Credits: 3 (RT)
Current issues in management of public organizations in contemporary American government. Includes practical applications of theories and analysis to managerial problems. Emphasizes competence in improving management in selected government settings.

Prerequisite(s): PUAD 502, and 9 graduate credits.

Notes: May be repeated for credit when topic is different.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0

PUAD 730 - Professional Development Workshop
Credits: 1-3 (RT)
Explores external and internal factors reshaping public and nonprofit organizations. Investigates processes and techniques that managers and staff can use to respond to rapid environmental change. Emphasizes case studies and application of techniques and processes.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0

PUAD 731 - Homeland/Transportation Security Administration

Credits: 3 (NR)
Examines the terrorist attacks of 9/11, the vulnerabilities of the aviation security system at that time, reasons why elected leaders and officials did not act more decisively to improve security before 9/11, and the policy and administration responses to the 9/11 attacks, including the creation of the Transportation Security Administration and the Department of Homeland Security. Includes the development of radical Islam and the rise of Osama bin Laden and Al Qaeda.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PUAD 738 - Issues in International Security

Credits: 3 (RT)
Examines issues of topical interest in general area of international security. Possible topics include nuclear strategy, disarmament, American defense policy, and international terrorism.

Prerequisite(s): PUAD 504 and 9 graduate credits.

Notes: May be repeated for credit when topic is different.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PUAD 739 - Issues in International Management

Credits: 3 (RT)
Examines significant current issues in public international management. Emphasizes practical applications of theories and analysis of problems in public international management arena, and competence in improving management practices in international management settings.

Prerequisite(s): PUAD 502, and 9 graduate credits.

Notes: May be repeated for credit when topic is different.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
PUAD 749 - Issues in Public Policy

Credits: 3 (RT)
Examines significant issues in public policy in contemporary American government. Emphasizes practical applications of theories and analysis to policy problems, and competence in improving policy analysis in selected government settings.

Prerequisite(s): PUAD 502, and 9 graduate credits.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PUAD 750 - Federalism and Intergovernmental Relations

Credits: 3 (NR)
Examines broad trends in governance, including theory and practice of federalism, with particular focus on intergovernmental relations and changing roles of federal, state, and local governments. May include privatization, devolution, mandating, regulatory reform, and comprehensive federalism reform.

Prerequisite(s): PUAD 502 and 9 graduate credits.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PUAD 758 - Environmental Politics

Credits: 3 (NR)
Evolution and current state of environmental policy making. Includes history, strengths, and weaknesses of key U.S. environmental laws and central international environmental agreements. Introduces analytical approaches, including cost-benefit and risk analysis. Discusses economic incentives and normative considerations.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PUAD 759 - Issues in Local Government Administration

Credits: 3 (RT)
Management and policy formulation in American local governments. Addresses environments, institutions, and actors involved. Examines contemporary problems such as education, criminal justice, transportation, land use, economic development, and environmental impact.

Prerequisite(s): PUAD 502 and 9 graduate credits.

Notes: May be repeated with different topic.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
PUAD 769 - Issues in Public Financial Management

Credits: 3 (RT)
Current issues in budgeting and financial management in contemporary American government. Emphasizes practical applications of administration and management issues and policy choices at all levels of government.

Prerequisite(s): PUAD 502, and 9 graduate credits.

Notes: May be repeated for credit when topic is different.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PUAD 781 - Information Management: Technology and Policy

Credits: 3 (NR)
Examines challenges that organizations encounter as they move to a more technologically sophisticated information and communication environment. Studies organizational policy issues evolving from new technologies, including privacy, security, authentication, content control, intellectual property, and taxation, focusing on effectiveness of previous policy solutions and analyzing proposed solutions.

Prerequisite(s): PUAD 680, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PUAD 790 - Justice Organization and Administration

Credits: 3 (NR)
Examines organization and administration of justice and security organizations. Covers organization theory and behavior as applied to justice and security organizations.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PUAD 791 - Justice Program Evaluation

Credits: 3 (NR)
Practical exploration of assessment techniques used to study need for and consequences of justice programs and policies. Covers needs assessments, process, and impact evaluations. Includes design and measurement issues for assessing performance of justice programs, and interpreting and presenting results. Emphasizes designing program evaluation for justice agency.

Prerequisite(s): PUAD 511 and 612.
PUAD 792 - Advanced Seminar in Applied Public Administration Research

Credits: 3 (NR)
An applied research experience. Students will apply skills in problem definition, issue framing, collection of data and information, interviewing, selection and analysis of alternatives, presentation of findings and recommendations, design of implementation tools and administrative procedures and organizations, report writing and oral presentation to policymakers.

Prerequisite(s): 30 PUAD credits and permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PUAD 793 - Conduct of Justice Organizations at the Street Level

Credits: 3 (NR)
Explores how justice organizations behave at lowest levels, where service is delivered and discretion is greatest. Includes suspects, victims, witnesses, police officers, prison guards, parole officers, attorneys, and others who interact with the justice system.

Prerequisite(s): CRIM 740/GOVT 790, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PUAD 794 - Internship

Credits: 3 (RT)
Open only to MPA students. Contact internship coordinator one semester before enrollment. Credit determined by the department.

Prerequisite(s): 12 PUAD credits or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
Grading: Satisfactory/NoCredit.

PUAD 795 - Leadership in Justice and Security Organizations

Credits: 3 (NR)
Examines leadership theories, and explores fundamental questions about leadership in justice and security organizations today.
**PUAD 796 - Directed Readings and Research**

Credits: 1-3 (RT)  
Reading and research on specific topic under direction of faculty member. Written report is required; oral exam covering research and report may be required.

**Prerequisite(s):** 18 PUAD credits and permission of instructor.

**Notes:** May be repeated once.

**PUAD 797 - Changing Justice and Security Organizations**

Credits: 3 (NR)  
Examines challenges of changing justice organizations, how changes have been successfully and unsuccessfully implemented in the past, and what change strategies appear to be most effective.

**Prerequisite(s):** CRIM 740/PUAD 790 or permission of instructor.

**PUAD 821 - Doctoral Seminar in Theories of Organization and Bureaucracy**

Credits: 3 (NR)  
Examines key issues in organization theory and behavior. Issues include organization design; interorganizational coordination, intelligence and decision-making systems; leadership and motivation theories; and theories or organizations as agents of political and social change. Uses case studies.

**Prerequisite(s):** PUAD 520 or equivalent, or permission of instructor.
Surveys major institutions that formulate and implement public policy in the United States. Examines translation of public preferences into public policy, and decisions about which societal and economic functions are most appropriately carried out by governments, and which are best accomplished by private institutions and individuals.

Equivalent to PUBP 840

**Prerequisite(s):** Admission to doctoral program or permission of instructor.

**Hours of Lecture or Seminar per week:** 2-3
**Hours of Lab or Studio per week:** 0-1

**PUAD 841 - Research Seminar in Policy Governance II**

Credits: 2-4 (NR)
Second of two-semester sequence (PUAD 840, 841) in governance and public management policy concentration. Focuses on division of responsibilities among several levels of government, and between public and private sectors. Explores impact of these divisions on development of public policy in several policy areas, such as urban governance, environmental policy, and health care.

Equivalent to PUBP 841

**Prerequisite(s):** Admission to doctoral program.

**Hours of Lecture or Seminar per week:** 2-3
**Hours of Lab or Studio per week:** 0-1

**Public Policy (PUBP)**

Offered by the School of Public Policy

**PUBP 501 - Policy and Organizational Analysis**

Credits: 4 (NR)
Prepares students to engage in systematic analysis, both qualitative and quantitative, and constitutes the basis for advanced analytical techniques. Emphasis on research design, information acquisition, application of data analysis techniques, and presentation, including writing for professional and lay audiences.

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0

**PUBP 502 - Governance and Policy Processes**

Credits: 1-4 (NR)
Assesses governance processes in public and private organizational settings on the basis of economic and political standards such
as efficiency, accountability, and responsiveness to societal needs in a rapidly changing global environment. Using cases, simulations, and fieldwork, students learn to evaluate the quality of institutional governance in specific venues and appraise implications for public policy.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

### PUBP 503 - Culture, Organization, and Technology

Credits: 1-4 (NR)  
Focuses on the influence of culture in societal, political, economic, and technological processes, nationally and internationally. Culture is seen as dynamic and interactional. Using case studies, students learn pertinent approaches to the study of culture, from the analysis of organization and social networks to that of belief systems and identities. Students also develop practical skills in observation, participation, and intervention.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

### PUBP 511 - Quantitative Methods in Public Policy

Credits: 3 (NR)  
Introduces students to the range of quantitative methods used for public policy analysis. Provides a broad foundation to prepare students for doing statistical analysis on the master's level.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

### PUBP 533 - Topics in Public Policy Processes

Credits: 1-3 (RT)  
Focuses on selected topics in public policy processes and procedures on an introductory level.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

### PUBP 550 - Topics in Public Policy

Credits: 1-3 (RT)  
Focuses on selected topics in public policy not covered in fixed-content public policy courses.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0
PUBP 555 - Economics Math Workshop

Credits: 0 (RD)
Short course covering math and calculus skills required for master's level managerial economics course PUBP720.

Hours of Lecture or Seminar per week: 0  
Hours of Lab or Studio per week: 0  
Grading: Not Gradable

PUBP 556 - Writing Workshop

Credits: 0 (RT)
A limited enrollment, noncredit, one-day workshop designed for master-level public policy students who want to improve their writing skills. Aimed at good writers who want to move to the next level of effectiveness. Taught by professional writers.

Hours of Lecture or Seminar per week: 0  
Hours of Lab or Studio per week: 0  
Grading: Not Gradable

PUBP 570 - Policy Writing Fundamentals

Credits: 3 (NR)
Designed for entering students whose writing skills and style must satisfy the demands of a rigorous graduate program; aims to give students the ability and confidence to write clearly and concisely for a variety of policy audiences; reviews basic rules and develops essential techniques for effective writing in graduate school and beyond.

Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0

PUBP 601 - Theory and Practice of Regional Economic Development

Credits: 3 (NR)
Helps students develop real-world skills to be a successful economic developer, consultant, policymaker, or change agent in this rapidly changing environment. Designed to provide a framework for understanding regional and national economic growth and prosperity, and provide tools to conduct concrete analyses to help decision makers, clients, and constituents make better-informed decisions.

Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0

PUBP 602 - Regional Economic Development: Strategies and Applications

Credits: 3 (NR)
Introduces range of methods for tracking the performance of metropolitan economies, identifying opportunities for economic
development, and assessing effectiveness of public and private investments designed to achieve region's economic growth. Also examines strategies and case results of economic development plans and projects.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**PUBP 605 - State and Local Government Policy and Economic Development**

Credits: 3 (NR)  
Examines state and local government policies and processes to promote local economic development, including institutional arrangements, financing and tax incentives, nonfinancial strategies and approaches, land use, environmental and other relevant regulations, and relationships across government and nongovernmental organizations.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**PUBP 610 - Organizations, Management, and Work: Theory and Practice**

Credits: 2 (NR)  
This introduction to organizations, management, and work examines ideas and practices from two perspectives: conventional ones that go back to the industrial age and scientific management; and contemporary ones that have to do with organizing knowledge-work. Covers contributions of a range of writers and deals with foundations of OD from the standpoint of both theory and practice.

**Hours of Lecture or Seminar per week:** 2  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall, Spring

**PUBP 611 - Critical Infrastructure Protection in Theory, Policy and Practice**

Credits: 2 (NR)  
Introduces critical infrastructure protection as a policy field, examines its institutional framework, and considers its foundations in political and economic theory.

**Hours of Lecture or Seminar per week:** 2  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall, Spring

**PUBP 650 - Peace Operations I**

Credits: 3 (NR)  
First course of two-semester sequence on international peace operations. Focuses on emerging theory of peace operations, including peacemaking activities of United Nations and other diplomatic initiatives; peace-building activities of international organizations and nongovernmental organizations; and peace support provided by international militaries.
PUBP 651 - Peace Operations II

Credits: 3 (NR)
Second course of two-semester sequence on international peace operations. Focuses on application of emerging theory of peace operations, including peace-making activities of United Nations and other diplomatic initiatives; peace-building activities of international organizations and nongovernmental organizations; and peace support provided by international militaries. Several guest lectures from past and present peace operations provide practical information for future staff of peace operations.

PUBP 652 - Experiential Applications

Credits: 4 (NR)
This course concentrates on the institutional mindsets, characteristics, and behaviors of the actors involved in peace operations. Readings, role-plays, and research underpin the class. Special attention is also paid to developing students' graduate-level research and writing skills.

PUBP 653 - The Interagency Process

Credits: 3 (NR)
Examines the U.S. Interagency process as it relates to peace operations. Various departments and agencies maintaining equities in overseas missions will be identified and explored. Case studies highlight instances of success or failure in application of a "whole-of-government" approach to intervention. Examines significant problems hampering Interagency cooperation today and recent policy directives, frameworks, and initiatives developed to address this situation.

PUBP 654 - Analysis for Peace Operations

Credits: 3 (NR)
Examines theories of human behavior and social systems as they relate to conflict at the interpersonal, community, and international level. The class provides a foundation of academic thinking about the role of conflict in violent and peaceful social change. At the end of the course, students should be able to think systematically and critically about conflict, and engage in
practical application of conflict analysis techniques to peace operations.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall

**PUBP 680 - Topics: Advanced Skills for Policy Professionals**

Credits: 1-3 (RT)  
Practical seminar focusing on development of advanced qualitative and quantitative skills for the professional policy world.

**Hours of Lecture or Seminar per week:** 1-3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall, Summer, Spring

**PUBP 700 - Theory and Practice in Public Policy**

Credits: 1-4 (NR)  
Theories of public policy emphasizing historical intellectual development, and role theory and ethics may play in public policy making. Assumptions made by policy professionals examined against broad range of philosophical, social, political, and economic imperatives affecting public policy environment.

**Hours of Lecture or Seminar per week:** 1-4  
**Hours of Lab or Studio per week:** 0

**PUBP 702 - Comparing Political Institutions**

Credits: 3 (NR)  
Examines political institutions and processes from comparative and international perspectives, and role of political environment in economic trade and investment policy decisions. Examines how generalizability, objective knowledge and understanding, and nature of evidence impact public policy.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**PUBP 704 - Statistical Methods in Policy Analysis**

Credits: 3 (NR)  
Graduate-level introduction to statistical methods and techniques used in policy sciences. Topics include descriptive statistics, sampling and probability theory, graphical data display, estimation and significance testing, contingency tables, bivariate regression and correlation, and multiple regression, with introduction to computer based statistical analysis.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0
PUBP 705 - Advanced Statistical Methods in Policy Analysis

Credits: 3 (NR)
Covers classical regression methods and their application to public policy analysis. Includes simple and multiple regression, analysis of variance, time series, and simultaneous equation structural models. Problems associated with applications include specification error, multicollinearity, qualitative variables, heteroskedasticity, serial correlation, and structural identification. Course develops analysis skills by discussing sample empirical studies and models using advance statistical computer software.

Prerequisite(s): PUBP 704 or equivalent.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

Credits: 3 (NR)
Studies analytical concepts and techniques used in public-sector overall budgetary and specific project decision making. Includes conceptual concerns and quantitative techniques used in benefit-cost analysis, capital budgeting, financial analysis, and various specialty applications, such as economic and fiscal impact analysis. These are all interrelated by the desire to measure the benefits versus the costs of various alternative public decisions. Attention is given to measuring results over time and the use of present value techniques. Assesses strengths and weaknesses of analytical techniques. Emphasizes the process of defining the appropriate stakeholders affected by decisions, the sources and quality of data, and the rigor of conducting studies.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PUBP 709 - Professional Writing for Policy

Credits: 3 (NR)
Professional Writing teaches effective writing for the professions. The course includes the fundamentals of writing -- grammar, word usage and paragraphing – and instruction in selected genres, including news stories, editorials, and research writing.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PUBP 710 - Topics in Public Policy

Credits: 1-3 (RT)
Focuses on selected topics in public policy not covered by fixed-content public policy courses.
PUBP 712 - Policy Systems Analysis and Management Science

Credits: 3 (NR)
Introduces analytical models and analysis to support decisions. Primary emphasis on understanding techniques of operation research and management science, cost benefits, and cost effectiveness for public decision making. Using mathematical details of algorithms to solve models not emphasized except as it contributes to understanding reliability and validity of methodologies. Through case studies and computer solutions, offers appreciation of when, where, and how to use models. Students demonstrate their understanding of techniques by applying them to term research project on government program.

PUBP 713 - Policy and Program Evaluation

Credits: 3 (NR)
Examines how programs of public agencies are proposed, established, operated, and evaluated. Covers role of research in program evaluation process, including alternative methodologies for policy assessment. Considers demand estimation, supply and pricing of publicly produced goods and services, and role of subsidies in nonmarket environments.

Prerequisite(s): PUBP 704 or equivalent.

PUBP 714 - Topics in Transportation Policy, Operations, and Logistics

Credits: 1-3 (RT)
Issues in transportation policy, operations and logistics in United States and abroad. Includes practical applications of theories and analysis to policy problems, and emphasizes competence in improving policy in selected domains. May be taken up to three times and simultaneously for sections addressing different subject matter.

PUBP 715 - Introduction to Transportation Systems

Credits: 3 (NR)
Transportation is a service that contributes substantially to well-being of advanced economies. Resource requirements and byproducts of transportation also pose sobering environmental challenges for society. Course examines history and development of transportation systems; contribution to and impact on society; institutions and practices that govern planning, design, construction, operation, maintenance, and retirement from service; and policy and managerial challenges, and tools and
techniques for addressing them.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PUBP 716 - Transportation Operations and Logistics

Credits: 3 (NR)
Provides survey of issues, methods, problems, and strategies. Topics include origins of logistics, industry structure, pricing, underwriting, rate making, compliance, inventory effects, just-in-time inventory management (JIT), materials requirements planning (MRP), customer service and order processing operations, sales functions and operations, dispatch and fleet manager functions and operations, rate-setting among three parties, typical electronic and paper document flow, routing and scheduling, route selection, satellite load tracking through dispatch-customer web inquiry, role of ITS in route selection, toll system use, congestion, training activities, and logistics markets.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PUBP 717 - Analysis for Transportation Managers

Credits: 4 (NR)
Introduces basic methods of transportation analysis and evaluation relating them to policy framework. Covers descriptive statistics, hypothesis testing, contingency tables (Chi-Square analysis), regression, optimization, demand elasticities, and gravity model. Also covers sources of transportation data and research design. Teaches mathematical base and logic of each technique, but primary emphasis is applying methods to relevant policy and management problems. Students required to complete series of assignments along with research proposal focused on applying one or more methods to problem of their own interest.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PUBP 718 - Transportation Planning and Policy

Credits: 3 (NR)
Introduces highway, rail, air, and water transport planning in United States. Teaches legislative, organizational, fiscal, legal and political environment within which planning for transportation facilities and services takes place. Introduce technical and analytical methods for transportation planning. Focus is largely on public sector, but also considers commercial transport planning and role of private sector in helping to design, manage, and finance transport systems.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PUBP 719 - Transportation Law
Credits: 3 (NR)
Examines legal environment of transportation. Topics include basic legal concepts and institutions, history and evolution of price and service regulation, environmental law and regulation, labor relations, and property.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PUBP 720 - Managerial Economics and Policy Analysis

Credits: 3 (NR)
Introduces microeconomics theory and its application in analyzing public policy issues. Provides capability to understand economic literature and theories.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PUBP 721 - Transportation Economics

Credits: 3 (NR)
Provides basis for understanding economics of transport system, and how transportation relates to urban and regional development. Treats transport generically, but includes case studies of specific modes.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PUBP 722 - Practicum in Transportation Policy, Operations, and Logistics

Credits: 3 (NR)
In-depth field study of ongoing transportation policy, operations, or logistics situations; and design and delivery of actions to manage or resolve problems and opportunities. Range of application areas depends on interests of student body and opportunities faculty identify for "clients" or real-world projects. Illustrative domain areas include surface transportation (highways and transit), airports, and aviation.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PUBP 723 - Metropolitan Transportation Policy

Credits: 3 (NR)
Recent changes in federal legislation have led to renewed importance for transportation policy and planning. Considerations of clean air, economic development, congestion management, and changing urban form have greatly increased importance of well-planned transportation facilities and policies. Course introduces basic methods of transportation policy analysis and evaluation. Topics include data collection, simplified demand estimation techniques, transportation choice modeling, transportation supply analysis, and ex-ante and ex-post evaluation methods.
PUBP 726 - Telecommunications Policy

Credits: 3 (NR)
Examines salient issues associated with telecommunications and electronic commerce in context of public policy questions facing decision makers in government, education, and business. Examples include privacy, electronic signatures, digital divide, bandwidth auctions, IP telephony, CRM, Bluetooth, and Internet taxation.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PUBP 730 - US National Policy Systems and Theory

Credits: 3 (NR)
Provides inquiry into policy-making environment, organized around U.S. federal system. Examines nation's policy systems and key components: actors, institutions of governance, outside groups, and other influential interests. Special emphasis on dynamic character of policy making. In addition, different policy theories discussed in context of current political realities.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PUBP 731 - Macroeconomic Policy Assessment

Credits: 3 (NR)
Covers monetary theory, theories of consumption and saving, budget deficits, economic growth, international finance, and monetary and fiscal policy. Investigates national income and product accounts, savings, employment, and investment, and alternatives to Keynesian principles. Evaluates theories of inflation, investment, capital accumulation, and nonproportional growth.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PUBP 733 - Urban Politics and Policy

Credits: 3 (NR)
This course explores the factors that guide and affect urban politics and policy including, but not limited to, housing, public education, criminal justice, employment, and economic development. It is designed to provide students with an introduction to the major theories and some of the significant research in urban politics and policy. The primary focus will be on large American cities.
PUBP 734 - Administrative Law and Public Policy

Credits: 3 (NR)
Covers administrative discretion, rule-making and agency proceedings, public participation, political accountability, regulatory processes, oversight, formal adjudication and informal action, lobbying agency administrators, and political and legal nature of the administrative process.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PUBP 735 - Lobbying and Interest Representation

Credits: 3 (NR)
To work effectively within a democratic political environment, policy analyst must understand contemporary methods used to influence policy. Course focuses on roles and techniques of organized influence, and its impact on policy.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PUBP 736 - International Migration and Public Policy

Credits: 3 (NR)
Examines demographic, economic, political, and social forces driving international migration on a global basis in the twenty-first century. Considers policy responses within sending and receiving countries and at the global level, including the role of international cooperation and institution-building.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

PUBP 737 - Cases and Concepts in E-Government

Credits: 3 (NR)
Electronic government has become a significant public policy issue worldwide. It offers the prospect of dramatic improvements in delivering government services, but also portends major debate about government intrusion. Course covers emerging public policy issues associated with electronic government: job displacement in public sector, privacy, procurement and supply chain management, voter profiling, scope of government services, challenges to "digital democracy," Internet-based voting, land management, the "digital divide," and others.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
PUBP 739 - Media and Public Policy

Credits: 3 (NR)
Explores complex relationship between media and public policy. Examines how these forces collide in our modern media, how coverage decisions regarding public policy are made in newsrooms, how advocates use and rely on the media to advance message, and how different media reflect different strengths and vulnerabilities.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PUBP 740 - U.S. Foreign Policy: Formulation and Practice

Credits: 3 (NR)
Focuses on policy formulation and policy implementation. The principal arenas of foreign policy are explored, including the White House, the State Department, the defense and intelligence communities, and the Congressional committees. These arenas are both affected by and influential upon the exogenous systems, such as the media, public opinion, interest groups, foreign governments, and international organizations.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

PUBP 741 - U.S. Financial Policy Processes and Procedures

Credits: 3 (NR)
Examines design and operation of expenditure and revenue systems at federal, state, and local levels of U.S. government. Stresses mobilizing and allocating resources through planning, adoption, and execution of budget. Includes theory and policy objectives of tax and spending regimes and review of financial controls, performance measurement, cash and debt management, and accounting and financial reporting systems.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PUBP 742 - Transportation Safety and Security

Credits: 3 (NR)
Examines transportation safety and security from multimodal perspective for both passenger and freight. Topics include historical context and policy framework, regulation, institutional issues, new security arrangements for preventing organized terrorist attacks, infrastructure design, vehicle design, operating protocols, and information systems.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
**PUBP 743 - National Security Management and Policy**

Credits: 3 (NR)
Examines hierarchies in national security from the president to military establishment, including National Security Council, secretary of defense, joint chiefs of staff, commanders-in-chief of unified and specified commands, and intelligence agencies. Covers policies involving national defense, peace-keeping operations, embargoes and other sanctions, defense conversion, and military acquisition policy. Also covers significant legislation affecting national security, such as National Security Act of 1947 and Goldwater-Nichols Act of 1986.

Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0

**PUBP 744 - Federal Institutions and Management**

Credits: 3 (NR)
Covers management and policy in federal government, examining policy problems within context of national system of governance, including political environment, evolution and constitutional framework of American government, U.S. Congress, executive branch from White House to agencies, and role of interest groups and political parties. Special attention to implementing legislation, regulatory process, and intergovernmental relations.

Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0

**PUBP 745 - Transportation and the Environment**

Credits: 3 (NR)
Multidisciplinary examination of implications of transportation and ways public policy has attempted to handle them, and how policy may move in the future. Explores all modes of transportation and most environmental ramifications.

Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0

**PUBP 747 - Air Transportation Policy, Operations and Logistics**

Credits: 3 (NR)
Reviews evolution of various forms of air transport such as airlines, general aviation, and military aviation; and includes basics of airline economics, especially as they intersect with airline operations and the management of hub and spoke networks; air traffic control technologies and operations and their intersection with airline economics; safety and security technologies and regulations; future of various elements of air transportation; and effects of deregulation on air travel.

Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0

**PUBP 748 - Public Transportation Policy, Operations and Logistics**
Credits: 3 (NR)
Provides general system description for components comprising typical publicly funded transit property. Topics include
organizational structure, historical context, budget development including operating and capital budgets, personnel and labor
relations, regulatory framework, operations management (bus and commuter rail), reporting structure, customer service, and
contracted operations. Also discusses current topics of interest, such as security of transit systems and transit's role in air quality.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PUBP 750 - History of Military Operations Other than War

Credits: 3 (NR)
Focuses on history of military activity in support of noncombat missions. Uses historical examples of early days of United States
and colonial histories of Western and Eastern powers. Also touches on use of military force in support of multinational peace
operations.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PUBP 751 - International Police Operations

Credits: 3 (NR)
Analyzes role of international police monitors and domestic police forces in international peace operations. Focuses on how using
international police monitors and developing indigenous law-enforcement capabilities can improve prospects for success of
international peace operations. Examines origins, mandates, planning, and deployment of international civilian police forces;
problems of coordinating international police operations with international military forces and local security forces; international
role in developing democratically oriented police forces; relationship of police to the entire judicial system; and the need to
continue assistance to all parts of the judicial system beyond initial intervention.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PUBP 752 - Infrastructure Finance

Credits: 3 (NR)
Covers planning, budgeting, and financing of infrastructure, including air, water and surface transportation, public utilities, and
other major public works. Focuses on private capital markets for projects funding as well as domestic and international loan and
grant programs.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PUBP 753 - Ethics in Public Policy
Credits: 3 (NR)
Inquiry into ethical and moral issues in public policy. Explores issues that are controversial and often confusing to public policy makers such as health care, secrecy in government, surrogate motherhood, and disability. Perspectives are national as well as global, and deal with impact of culture and politics on ethical dilemmas confronting society. Also looks at processes by which specific ethical systems are incorporated into governing bodies. Larger issues, such as war and peace, just and unjust wars, capital punishment, medical and legal ethics, and communitarian vs. individual liberties are also included, with emphasis on how they affect public policy.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PUBP 754 - Geographic Information Systems and Spatial Analysis for Public Policy

Credits: 3 (NR)
Introduces GIS including analytical tools to manipulate and study spatial data. Run mainly as a laboratory, with extensive hands-on experience. Focuses on public policy applications.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PUBP 755 - National Security Decision-Making Policy

Credits: 3 (NR)
Applies behavioral, economic, strategic, and other decision theories to U.S. government and other actors in historical national security crisis cases and current policy issues. Explores tension in decisions between rational goal seeking by actors vs. organizational process, and aims to develop usable decision tools.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PUBP 756 - Global Medical Systems Policy Analysis

Credits: 3 (NR)
Equips students with knowledge and skills to critically analyze structures, functions, governing policies, and performance of healthcare systems; to identify problems and solutions; and to devise alternative courses of action and reform policies that would contribute to achieving goals. Prepares students in policy analysis rooted in systems analysis, while linking issues, objectives, and solutions with the larger context in which a system is embedded.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

PUBP 757 - Public Policy in Global Health and Medical Practice
Credits: 3 (NR)
Introduces international medical policy. Covers globalization of health and medical policies directed at removing disparities, financing, ethical considerations of biomedical research, and use of emerging technologies.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PUBP 758 - Global Threats and Medical Policies

Credits: 3 (NR)
Explores medical and health governance, biosecurity and biosafety, health and natural and human-made disasters, humanitarian and emergency assistance, vaccine development, behavior and health, critical infrastructures, bioethics and resource allocations in global context.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PUBP 759 - National Security Law and Public Policy

Credits: 3 (NR)
Introduces legal and policy issues concerning current U.S. national security. Its emphasis is on developments since 9/11. It focuses on the legal rules governing the formulation and execution of U.S. national security policy. It examines U.S. and international law as well as general domestic and foreign policy considerations. In particular, the course considers the principal cases, legislation and treaties impacting U.S. national security. Special emphasis is on the interplay of national security concerns and civil liberties in this age of global and transnational terrorism.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PUBP 760 - Science and Technology Policy in the 21st Century

Credits: 3 (NR)
Investigates roles dynamic scientific research and technological innovation play in contemporary society. Focuses on design and analysis of alternative public policies intended to influence rate and direction of technological change in societies, and use of scientific and technical knowledge in public policy making. Uses historical and international comparative approaches to assess politics and pragmatics of science and technology policy. Includes material from policy evaluation and analysis, organization theory, economics of innovation, and sociology of science and technology. Applications focus on areas of concern to "new economy" such as biotechnology, networked telecommunications and computing, and globalization of technology-based production.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PUBP 761 - Social Entrepreneurship and Public Policy
This course is about people who start new ventures with the explicit objective of creating social as well as private value. As societies and the challenges they face become ever more complex, existing institutions and incentive structures may or may not be adequate to address new generations of problems. Social entrepreneurs innovate new organizational forms with the objective of finding solutions in the public interest. Students in this course will be challenged to integrate elements of business strategy and policy analysis toward the objective of crafting a practical plan for the launch of a novel and needed social venture.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PUBP 762 - Social Institutions and Public Policy

Credits: 3 (NR)
Limited government involvement in social policies changed drastically during the 1960s, with an explosion of social programs designed to ameliorate poverty, reduce crime, and eliminate racial segregation. These new social policies affect many institutions, including family, schools and colleges, criminal justice system, and government agencies. Many of these policies have been controversial, with debates over efficacy and whether they have cured or exacerbated social problems. Course examines evolution and status of selected American social policies, including civil rights policies, education reform, family policy, crime prevention, and other topics chosen by students. Readings and discussions on policy issues linked to readings and discussions on social theories and value systems that underpin social policies.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PUBP 763 - Illicit Trade

Credits: 3 (NR)
Examines the role that illicit trade assumes in international trade and commerce. Studies diverse international forms of illicit trade, the role that it assumes in perpetuating conflicts and the most pervasive forms of this illicit trade. Examines the actors who perpetrate this trade and the policies which are needed to stem its growth.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

PUBP 764 - Transnational Crime and Corruption

Credits: 3 (NR)
Provides an overview of transnational crime and corruption and its effects on the political, economic, and social development of countries globally. Focuses on the growing problem of transnational crime in conflict regions. The course addresses the links among crime groups, corruption and terrorism. It analyzes diverse range of activities of transnational crime groups in both the legitimate and illegitimate economy.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall
PUBP 765 - Human Smuggling and Trafficking

Credits: 3 (NR)
Examines the rapidly growing phenomenon of human smuggling and trafficking. Addresses the reasons for the growth of these phenomena and their far-reaching and diverse social, political and economic consequences globally. Transnational crime dimensions of the problem are a central component of the class. The phenomenon is examined in conflict regions, developing, diverse developed as well as transitional societies.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

PUBP 766 - Modern Counterinsurgency: Theory and Practice

Credits: 3 (NR)
This course is intended to give students a broad understanding of the nature of counterinsurgency, the policy implications of the U.S. becoming involved in an insurgency, and the multifaceted, interagency approach that is required to successfully combat an insurgency. The course includes case studies, a review of contemporary U.S. counterinsurgency practices, and insights on what the future might hold in this important type of conflict.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

PUBP 767 - Global Comparative Medical Practices, Ethics and Law

Credits: 3 (NR)
Examines major ethical issues raised in medical practice around the world. Studies issues comparatively and applies various ethical frameworks to study them. Considers various legal and policy solutions derived to deal with them. Principles of biomedical ethics as well as consideration of several major schools of thought in political philosophy, including utilitarianism, libertarianism and communitarianism will be considered.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

PUBP 768 - Education and Public Policy

Credits: 3 (NR)
Explores current issues and policy initiatives in education policy at federal, state, and local levels, with emphasis on education reform. Issues and topics vary. Typical policy issues include raising academic standards, high-stakes testing, alternative governance including school choice and voucher policies, teacher quality and certification, role of school resources in academic outputs, and equity topics.
PUBP 769 - Political Violence and Terrorism

Credits: 3 (NR)
Examines the persistent threat of terrorism and political violence to international stability generally, and U.S. national security interests in particular. Provides students with a long-term analytical and substantive foundation to deepen their knowledge and effectiveness as policy-makers in national security, diplomacy, homeland security, law enforcement, humanitarian law, peace operations, postconflict reconstruction, development assistance, public diplomacy and other related areas.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

PUBP 770 - Global Health and Medical Policy Analysis

Credits: 3 (NR)
Prepares students in global health and medical policy analysis with a focus on processes, roles, expenditures, alternatives and tradeoffs in different country settings.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PUBP 771 - Grand Strategy

Credits: 3 (NR)
Uses the traditional tools of history and theory to analyze grand strategy. The goal is to gain an in-depth understanding of effective and ineffective grand strategies so as to inform U.S. policy, or that of other countries. Analyzing the strategic implications of policy-making, it takes a long view of effective statecraft, using current means to achieve large ends.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring

PUBP 775 - Economics of Electronic Commerce

Credits: 3 (NR)
Focuses on gaining competitive advantage through electronic commerce implementation; identification and growing of new market opportunities and electronic enabling of existing business relationships; and business-to-consumer relationships and economics of strategic procurement, ERP hosting, customer relationship management, catalog hosting, portal operations, and supplier management.
PUBP 777 - Critical Infrastructure Protection: Policy and Practice

Credits: 3 (NR)
Introduces critical infrastructure protection and resilience as a policy field, examines its governance framework, and considers its foundations in institutional theory and risk analysis.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PUBP 780 - Evolution of the Washington Metropolitan Economy

Credits: 3 (NR)
Includes historical context, role of federal spending, tourism, technology sector, international business, regional organizations, local government policies, and forecasts. Evaluates development patterns in Washington, D.C., Northern Virginia, and suburban Maryland.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PUBP 781 - Entrepreneurship and Economic Development

Credits: 3 (NR)
A knowledge spillover theory of entrepreneurship is employed to link between theories of entrepreneurship and theories of innovation and regional development. Other interconnections are explored at the regional level as firms forge networks, clusters, and specialized markets. The public policy issues of these constructs, including competition policy, industrial policy, and cluster policy, are examined within a regional and global context.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PUBP 782 - International Financial Policy

Credits: 3 (NR)
Addresses theory of international finance, application to financial policy such as exchange rate regimes, and institutions of international finance. Covers operations of International Monetary Fund and World Bank, development of European Monetary Union, and debate over "international financial architecture."

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
PUBP 783 - Global Governance

Credits: 3 (NR)
Surveys important issues in global governance given changes in contemporary world. Explores dynamics and complexity of formal and informal actors, institutional arrangements, organizations, and roles in process of governance in international sphere. Considers states, governmental and nongovernmental organizations, international regimes, social movements, regional associations, and multinational corporations as actors bearing on transnational authority. Examines various vehicles for international coordination and conflict in terms of relevance and opportunities for global governance.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PUBP 784 - Entrepreneurship, Economics, and Public Policy

Credits: 3 (NR)
To demonstrate that global capitalism is a process driven by entrepreneurship, students study the Austrian school of economics, which views capitalism as a process of creative destruction, as well as other economists who emphasize entrepreneurship and change. The course reviews the history of capitalism, focusing on the so-called industrial revolutions in Britain, Germany, Japan, and the United States, and on particular historical and current entrepreneurs.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PUBP 791 - Advanced Field Research for Policy: Theory and Method

Credits: 4 (NR)
Teaches how to analyze the framing of policy questions and examine culture and organization at group, organizational, interorganizational, and societal levels. Covers case study research, open-ended interviewing, participant-observation, social network analysis, and historical and archival research.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PUBP 792 - Advanced Economic Analysis for Policy Research

Credits: 4 (NR)
Builds analytical skills in economic analysis for policy research for students with competence in elementary calculus. Reviews mathematical techniques and covers consumer theory, demand estimation and forecasting, production theory, cost-benefit analysis, technological change and productivity analysis, growth theory, market structure and competition, game theory, capital budgeting, and public sector's role in the economy.

Prerequisite(s): PUBP 720 or equivalent.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
PUBP 793 - Large-Scale Database Construction and Management for Policy Research

Credits: 4 (NR)
Explores data resources for macro-comparative policy research, and how to use these to inform decision making and evaluate policy performance. Emphasizes how social science data is generated, coded, and managed; and methods for successful presentation of evidence in support of policy recommendations.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PUBP 794 - Internship

Credits: 1-6 (RT)
Open only to students in SPP degree program requiring internship. Contact appropriate program director one semester before enrollment. Work-study programs with specific employers.

Prerequisite(s): 12 PUBP credits, or permission of instructor.

Notes: Credit determined by appropriate degree program.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
Grading: Satisfactory/No Credit

PUBP 795 - Final Project

Credits: 1-3 (NR)
Project developed drawing on key themes of the program, in consultation with the program director.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
Grading: Graduate Special

PUBP 796 - Directed Readings and Research

Credits: 1-3 (RT)
Independent reading and research at master's or doctoral level on specific topic related to public policy as agreed to by student and faculty member.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PUBP 799 - Master's Thesis
Credits: 1-6 (RD)
Individualized section form required. Original research endeavor related to student's program concentration. Research must result in document meeting public policy and university standards.

Prerequisite(s): Degree candidacy in public policy master's program; completion of required credits of graduate course work; and approval of thesis proposal by faculty advisor, two committee members, and program director.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
Grading: S/NC

PUBP 800 - Culture and Public Policy

Credits: 1-4 (NR)
Comparative analysis of the role of culture in shaping policy environments and outcomes. Introduces analytical methods for studying culture, including measurement of social and cultural change, surveys, and field studies. Presents major findings and research issues regarding the role of culture in democracy, ethnic and gender relations, economic growth and other policy issues. Focuses on differences among national and regional cultures, and their policy implications.

Hours of Lecture or Seminar per week: 2-3
Hours of Lab or Studio per week: 0-1

PUBP 801 - Research Design for Public Policy

Credits: 1-4 (NR)
Provides an introduction to the theory and practice of research in public policy. Gives students an understanding of issues in the philosophy of science and different approaches to social science research. Provides broad overviews of quantitative and qualitative methodologies, with a major emphasis on research design, including conceptualization, the role of theory, hypothesis generation, inference and bias.

Prerequisite(s): PUBB 720 and PUBP 730, or their equivalents strongly recommended.

Hours of Lecture or Seminar per week: 2-3
Hours of Lab or Studio per week: 0-1

PUBP 802 - The Logic of Policy Inquiry

Credits: 1-4 (NR)
Defines policy research problems, questions, and hypotheses. Explores modes of policy research, analysis, and rhetoric, including interdisciplinary research strategies. Uses information sources to emphasize written communication of policy research results. Also discusses professional practice issues.

Prerequisite(s): Enrollment in doctoral program in public policy.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
PUBP 804 - Multivariate Statistical Analysis in Public Policy

Credits: 4 (NR)
Explores multivariate techniques of contingency table analysis, reliability and validity assessment, factor analysis and scaling, multivariate regression and path analysis, analysis of variance and covariance, and other selected multivariate techniques. Emphasizes applying these techniques to real policy data using sophisticated statistical packages.

Prerequisite(s): PUBP 704 or equivalent.

Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0

PUBP 805 - Foundations of Social Science for Public Policy

Credits: 4 (NR)
Grounds doctoral students in core concepts of political science and economics through critical analysis of classic sources, old and new. Topics may include theory of the state, state-market relations, democratic governance, markets and economic institutions, and other relevant frameworks for public policy research.

Prerequisite(s): PUBP 730 or equivalent.

Hours of Lecture or Seminar per week: 4  
Hours of Lab or Studio per week: 0

PUBP 806 - Advanced Management Science for Public Organizations

Credits: 3 (NR)
Primary emphasis is to understand techniques of operations research and management science, cost benefits, and cost effectiveness for public policy decision making. Some familiarity with elementary calculus and linear algebra helps with understanding mathematical basis of algorithms used to solve models, and reliability and validity of these techniques. Case studies and computer solutions help students understand when and how to use OR models.

Prerequisite(s): PUBP 712 or equivalent.

Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0

PUBP 810 - Regional Development and Transportation Policy

Credits: 4 (NR)
Introduces and critiques theory and methods used in regional and transportation policy analysis. Explores central place, growth pole, and economic base theories as well as other theoretical constructs used in regional policy analysis. Introduces and examines methodological tools such as regional econometric modeling, multiobjective programming, shift-share analysis, economic base analysis, location quotient analysis, and input-output analysis. Examines selected regional and transportation public issues using
theoretical and methodological constructs introduced in first part of course.

Hours of Lecture or Seminar per week: 2-3
Hours of Lab or Studio per week: 0-1

PUBP 811 - Applied Methods in Regional Development and Transportation Policy

Credits: 4 (NR)
Students develop research papers that investigate aspect of regional and transportation policy, with goal of producing publishable papers. Students develop focus of paper based on work done in first semester, and are expected to prepare two-page proposal followed by detailed proposal and finally, completed paper. Each is critiqued in the seminar, which is organized to conform to process of review and critique. Instructor works with students individually as well as in seminar sessions.

Hours of Lecture or Seminar per week: 2-3
Hours of Lab or Studio per week: 0-1

PUBP 817 - Policy Research Topics: Transportation Policy

Credits: 3 (NR)
Research workshop examining development of policy research and relevant methodologies linked directly to faculty and student interests. Students identify cutting-edge policy concerns and execute research program. The 4-credit version of course requires discussion section and research laboratory.

Hours of Lecture or Seminar per week: 2-3
Hours of Lab or Studio per week: 0-1

PUBP 820 - Technology, Science, and Innovation: Institutions and Governance

Credits: 4 (NR)
First of two-semester core seminar sequence required for public policy PhD students in science and technology policy concentration. Explores how political and economic institutions and cultural values shape pace, direction, costs, and benefits of technological innovation and scientific research. Special emphasis on interaction between national institutions, and values and processes of globalization.

Hours of Lecture or Seminar per week: 2-3
Hours of Lab or Studio per week: 0-1

PUBP 821 - Analytic Methods for Technology, Science, and Innovation Policy

Credits: 4 (NR)
Second of two-semester core seminar sequence required for public policy PhD students in science and technology policy concentration. Covers major methodological approaches to study of technology, science, innovation, and public policy. Focuses on analytical inputs to policy making, and assesses practical consequences in such areas as security, energy, environment, and health.
PUBP 830 - Comparative Socioeconomic Policy

Credits: 1-4 (NR)
Throughout the past century, numerous socioeconomic theories have competed for primacy. This course compares, contrasts, and analyzes some of the leading socioeconomic theories and policies and places them in a global context. The role of these theories in shaping current public policy is explored.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PUBP 833 - Topics in Public Policy

Credits: 1-4 (RT)
Focuses on selected topics in public policy not covered in fixed-content public policy courses.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PUBP 834 - Entrepreneurship, Growth, and Public Policy

Credits: 1-4 (NR)
Focuses on a closer consonance among entrepreneurship, geography, and economic growth. Studies the creation and incubation of new knowledge and features three theoretical fields: the new growth theory; the new economic geography; and the new economics of innovation. Develops a knowledge spillover theory of entrepreneurship. Examines public policy issues arising from these constructs, including competition, within a regional and global context.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PUBP 835 - Entrepreneurship, Creativity, and Innovation

Credits: 1-4 (NR)
Provides multidisciplinary foundation for the study of entrepreneurship, creativity, and innovation, and their effects on regional and national economic growth. Draws from seminal thinkers and emphasizes creativity and innovation. Examines how organizational change, institutional structure, and geographic clustering drive the development of regional and national economies. Explores these issues through the lens of the three Ts of economic growth: technology, talent, and tolerance.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
**PUBP 840 - U.S. Policy-Making Institutions**

Credits: 4 (NR)
First of two-semester sequence in governance and public management policy concentration. Examines major institutions that formulate and implement policy at national level. Emphasizes presidency, Congress, and executive branch bureaucracies. Also considers agenda-building institutions such as media, interest groups, political parties, and elections.

**Hours of Lecture or Seminar per week:** 2-3  
**Hours of Lab or Studio per week:** 0-1

**PUBP 841 - U.S. Policy-Making Processes**

Credits: 4 (NR)
Second of two-semester sequence in governance and public management policy concentration. Analyzes major U.S. Public policy processes. Attention to major instruments for implementing policy, including regulation, grants, tax policy, and market-based mechanisms; and how different methodologies are appropriate for understanding aspects of policy inquiry. Covers ethical and accountability aspects of policy, including federalism, intergovernmental relations, and state and local governance.

**Hours of Lecture or Seminar per week:** 2-3  
**Hours of Lab or Studio per week:** 0-1

**PUBP 850 - Seminar in Public Policy**

Credits: 1 (RT)
Weekly colloquium series, required of public policy PhD students. Features variety of speakers from universities, government, and nonprofit sectors. Topics include policy formulation and analysis, and theoretical and methodological foundation.

**Hours of Lecture or Seminar per week:** 1  
**Hours of Lab or Studio per week:** 0  
**Grading:** Satisfactory/No Credit

**PUBP 860 - Social Theory, Culture, and Public Policy**

Credits: 4 (NR)
Covers major social and cultural theories that underlie public policies. Selections from classical and contemporary social theorists relevant to studying social change, social capital, and social organization. Focuses on interplay among culture, social institutions, social processes, and policy.

**Hours of Lecture or Seminar per week:** 2-3  
**Hours of Lab or Studio per week:** 0-1

**PUBP 861 - Culture and Social Policy Analysis**
Credits: 4 (NR)
Applies social and cultural theories to policy topics, including methodological approaches and empirical studies. Emphasizes linkage between theory and empirical research, and methods appropriate for social policy study. Policy topics may include poverty and inequality, family, education, crime and corruption, immigration, and health.

**Hours of Lecture or Seminar per week:** 2-3  
**Hours of Lab or Studio per week:** 0-1

**PUBP 862 - Institutional Analysis and Policy**

Credits: 4 (NR)
Policy analysts are increasingly cognizant of the influence of societal institutions in shaping public policy, not only in terms of policy design, but also as a determinant of implementation. This course reviews the growing literature regarding institutional analysis; furthermore, it considers the ways in which institutions help shape the policies that emerge within a given society and the context by which they are evaluated.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**PUBP 870 - Organizational and Policy Aspects of Informatics**

Credits: 1-4 (NR)
Examines effects of informatics on national and international policy; setting international policy on informatics; ethical and social change in governments and organizations; shaping national policy in informatics; industry growth; and research methods from various scientific disciplines.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**PUBP 871 - Organizational and Information Technology Challenges of the Knowledge Society**

Credits: 4 (NR)
Explores links of policy, managing organizations, and information technologies in postmodern era. Includes issues related to contradictions among conventional models of organizational and process design, policy and regulatory structures, ideologies, and information technologies. Provides framework for becoming more sophisticated analyst of policy, organizations, and information technology.

**Prerequisite(s):** PUBP 870.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**PUBP 872 - Managing Knowledge-Based, Information-Intensive Organizations**
Deals with challenges of planning, creating, integrating, and managing contemporary information-technology enabled public and private sector organizations, and managing relationships between public and private enterprises enabled by information technology initiatives.

**PUBP 880 - Global and International Public Policy I**

Credits: 4 (NR)
Explores multiple dimensions of globalization and internationalization relative to public policy processes and consequences. Offers substantive insight into contemporary public policy dynamics from global and comparative perspectives. Accordingly, it examines a broad range of international cultural, political, technological, and economic policy issues, and their interactions and implications at all levels of analysis. Engages relevant theoretical and methodological approaches and debates to provide tools for analyzing various world problems and policies.

**PUBP 881 - International Trade Policy**

Credits: 4 (NR)
Addresses international trade theory, trade policy analysis, regional economic integration, and institutional arrangements governing world trade. Covers World Trade Organization (including constituent agreements in goods, services, intellectual property and trade-related investment measures), regional trade agreements such as NAFTA, dispute settlement regimes, and relations between trade and the environment.

**PUBP 997 - Field Statement**

Credits: 1 (NR)
Requires work on field statement in preparation for field exam.

Prerequisite(s): Permission of field committee chair.

Notes: Must register in semester during which field exam will be taken. May not be repeated. Does not apply to credit degree requirements.
**PUBP 998 - Research/Proposal for Dissertation**

Credits: 1-9 (RD)
Requires work on research proposal that forms basis for doctoral dissertation.

**Prerequisite(s):** Permission of instructor. Contact program coordinator for approval and CRN to register via PatriotWeb.

**Notes:** May be repeated, but no more than 24 credits of PUBP 998 and 999 may be applied to doctoral degree requirements.

- **Hours of Lecture or Seminar per week:** 0
- **Hours of Lab or Studio per week:** 0
- **Grading:** Satisfactory/No Credit

**PUBP 999 - Dissertation**

Credits: 1-9 (RD)
Requires research on approved dissertation topic under director on dissertation committee.

**Prerequisite(s):** Permission of instructor.

**Notes:** May be repeated, but no more than 24 credits of PUBP 998 and 999 may be applied to doctoral degree requirements.

- **Hours of Lecture or Seminar per week:** 0
- **Hours of Lab or Studio per week:** 0
- **Grading:** Satisfactory/No Credit

**Real Estate (REAL)**

Offered by the School of Management

**REAL 500 - Real Estate Development Fundamentals**

Credits: 3 (NR)
A comprehensive study of the main elements of the real estate development process. Examines the intricacies between residential, commercial and mixed-use development, and approaches to optimizing each. The value of market research and analysis, determining value propositions of prospective deals, zoning considerations, design and construction issues, and asset management will also be examined.

**Prerequisite(s):** Graduate standing

- **Hours of Lecture or Seminar per week:** 3
- **Hours of Lab or Studio per week:** 0

**REAL 502 - Real Estate Client Leadership and Project Management**
A study of the challenges faced by developers, both in terms of client (owner) challenges as well as project challenges. Examines assessment approaches and frameworks to assess clients, including analyzing the maturity of a representative client and identify key approaches to optimizing the relationship of that client. Examines specific project challenges—project assessment frameworks, and improvement approaches.

**Prerequisite(s):** Graduate standing, REAL 500 (or CEIE 580), or permission of the program director.

**REAL 610 - Management of Real Estate Design and Development**

Credits: 3 (NR)
Course develops a framework for understanding and managing processes associated with design and construction of real estate assets. Course focuses on the specific phases comprising a real estate development project and integration of these elements to achieve success. Topics include developing and coordinating service providers relationships, managing stages involved in the development cycle, understanding and controlling risks, and resolving disputes.

**Prerequisite(s):** Admission to the MSREAL Program or permission of the program director.

**REAL 615 - Real Estate Market Analysis and Research**

Credits: 3 (NR)
The course will provide an introduction to the methods used in analyzing real estate markets from the perspective of decision-makers who are considering potential development, investment, or financing decisions. The courses will focus on sources and analysis of data for examining project feasibility and scope, timing and phasing of development, and communicating with prospective financial partners.

**Prerequisite(s):** Admission to the MSREAL Program or permission of the program director.

**REAL 630 - Innovative Land Use, Approvals and Real Estate Development**

Credits: 3 (NR)
Examines the challenges in designing innovative uses for land and balancing those prospective uses with local urban policies and the land development/zoning process. Introduces the entitlements process, the legal considerations of planning and zoning in America, and the language of zoning. Explores the impacts of the different forms of government on the entitlement process.

**Prerequisite(s):** Admission to the MSRED program or permission of the program director.
REAL 690 - Topics in Real Estate Development

Credits: 1-6 (RD)
Explores contemporary issues and challenges in the management and development of real estate. Topics not covered in the regular real estate development offerings. Course content may vary each semester. Course may be repeated with change in topic.

Prerequisite(s): Admission to the MSRED Program or permission of the program director.

REAL 750 - MSRED Capstone

Credits: 3 (NR)
The Capstone Project will be the culmination of the master's program, offered at the end of the program. The course will combine the theoretical teachings from the program with real world, practical situations. Students will apply concepts learned to current development and construction projects in the Washington, D.C. metropolitan area. One of the sample cases involves the potential future uses of a plot of land in the metro area, a mixed-use high-density area that is slated to undergo significant transformation. The case will request project teams to explore the various options, employing a decision-tree approach to fully analyze the options, and examining the SWOT, local urban management policies, future valuation streams, and environmental impacts of each. A site visit will be required, as well as visits to various developers engaged in similar projects.

Prerequisite(s): Admission to the MSRED Program or permission of the program director.

REAL 796 - Directed Reading

Credits: 1-6 (RD)

Admission to the MSRED program or permission of the program director.

Prerequisite(s): Admission to the MSRED program or permission of the program director.
Reading Education (EDRD)

Offered by the College of Education and Human Development

EDRD 300 - Literacy and Curriculum Integration

Credits: 3 (NR)
Introduces K-12 content area reading, writing, and language arts. Emphasizes integration of reading and other language arts across curriculum.

Notes: Intended as an introduction to educational issues and is not applicable in Mason's graduate-level teacher education programs. School-based field experience required.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDRD 301 - Facilitating Literacy in School or Community Settings

Credits: 3 (NR)
Provides knowledge, teaching strategies, and support for students working with developing readers and writers. Emphasizes implementation strategies that foster literacy development; incorporation of trade books and technology resources into individual and small group work; and reflection.

Notes: Requires 45 hours of school-based field experience during course.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDRD 419 - Literacy in the Content Areas

Credits: 3 (NR)
Assists students in understanding the language and literacy process as it applies to teaching in middle and high schools. Focuses on instructional strategies to support literacy development, including adaptations for culturally diverse and exceptional learners.

Prerequisite(s): EDCI 473 and EDCI 483.

Corequisite(s): EDCI 490.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDRD 501 - Literacy and Curriculum Integration, PK-12
Introduces PK-12 content area reading, writing, and language arts. Emphasizes integration of reading and other language arts across curriculum; instructional planning; needs of diverse learners. Field experience in public schools required.

**EDRD 525 - Emergent Literacy for English Language Learners, PK-12**

Credits: 3 (NR)
Provides an introduction to emergent reading/writing processes in first and second languages. Focuses on developing reading skills in five areas: phonemic awareness, phonics, fluency, vocabulary, and text comprehension.

Prerequisite(s): EDCI 510, EDCI 516, or Permission of Instructor

**EDRD 558 - Literacy in the Content Areas, PK-12**

Credits: 3 (NR)
Focuses on research-based introduction to PK-12 content area reading, writing, and language arts that meet state and national guidelines. Enables teachers to understand literacy needs of their students in content areas, and provide appropriate instruction.

**EDRD 597 - Special Topics in Education**

Credits: 1-6 (RD)
Provides advanced study on selected topic or emerging issue in American or international education.

Notes: May be repeated for credit with GSE permission.

**EDRD 610 - Content Literacy for English Language Learners, PK-12**

Credits: 3 (NR)
Focus on research-based instruction for teaching reading and writing in the content areas. Emphasizes similarities and differences between reading and writing in two or more languages, vocabulary development, reading fluency, and strategies for text comprehension.
Prerequisite(s): EDRD 525 or Permission of Instructor

EDRD 614 - Teaching Reading in the Secondary School
Credits: 3 (NR)
Emphasizes reading and writing in content areas; reading and writing causes, classroom diagnosis, and remediation of reading problems; study skills; and rates of reading.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDRD 615 - Reading/Writing for Multilingual Students
Credits: 3 (NR)
Develops instructional competencies in reading and writing approaches for students from culturally and linguistically diverse backgrounds. Examines teaching reading and writing across curriculum, biliteracy acquisition, historical and current approaches for second language learners, preliteracy skills for younger and older English language learners, and special issues in developmental and diagnostic reading for language minority students.

Prerequisite(s): EDCI 516 and 519, or permission of instructor or advisor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
Grading: Graduate Special

EDRD 619 - Literacy in Content Areas
Credits: 3 (NR)
Offers understanding of language and literacy process as it applies to teaching in secondary schools. Emphasizes reading and writing in content areas, and instructional strategies to support students' literacy development. Focuses on ways reading, writing, speaking, and listening are developed and used in learning discipline-specific curriculum, including adaptations for culturally diverse and exceptional learners.

Prerequisite(s): Methods I (EDCI 567, 569, 572, or 573) and Methods II (EDCI 667, 669, 672, or 673).

Corequisite(s): EDCI 790 Internship.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDRD 620 - Reading/Writing in Foreign/World Languages
Introduces reading and writing processes in foreign and second languages, research on reading comprehension, and effective teaching and assessment approaches for students in PK-12 schools. Topics include reading goals and standards for foreign language learning, sociocultural perspectives, multimedia computer-assistance, research on related strategies and skills, and performance-based assessments.

**Prerequisite(s):** EDCI 516 and 519, or permission of instructor or advisor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**EDRD 630 - Advanced Literacy Foundations and Instruction, Birth to Middle Childhood**

Credits: 3 (NR)  
Advanced study of literacy theory, research, and practice as it relates to younger learners. Addresses sociocultural, cognitive, linguistic, psychological, and developmental influences on children's literacy. Includes reading, writing, and oral communication.

**Prerequisite(s):** Admission to the literacy emphasis, or permission of program coordinator.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**EDRD 631 - Advanced Literacy Foundations and Instruction, Adolescence through Adulthood**

Credits: 3 (NR)  
Advanced study of literacy theory, research, and practice as it relates to adolescents and adults. Addresses sociocultural, cognitive, linguistic, psychological, and developmental influences on literacy. Includes reading, writing, and oral communication.

**Prerequisite(s):** EDRD 630 and admission to the literacy emphasis, or permission of program coordinator.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**EDRD 632 - Literacy Assessments and Interventions for Groups**

Credits: 3 (NR)  
Provides literacy assessments and interventions for groups of learners. Includes exploration of assessment tools for classrooms and large populations. Class members conduct related practice in their own classrooms or specified field settings.

**Prerequisite(s):** EDRD 630 and 631; admission to literacy emphasis, or permission of the program coordinator.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0
EDRD 633 - Literacy Assessments and Interventions for Individuals

Credits: 3 (NR)
Provides literacy assessments and interventions for individuals. Includes diagnosis and remediation for learners who find reading and writing difficult. Requires assigned practicum experience.

Prerequisite(s): EDRD 630, 631, and 632; admission to literacy emphasis; or permission of program coordinator.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDRD 634 - School-Based Leadership in Literacy

Credits: 3 (NR)
Prepares reading specialist as a school leader. Expands knowledge of literacy gained in prerequisite courses, and applies it to professional development work with teachers at their own site.

Prerequisite(s): EDRD 630, 631, 632, and 633; admission to literacy emphasis or permission of program coordinator.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDRD 635 - School-Based Inquiry in Literacy

Credits: 3 (NR)
Capstone course in literacy emphasis focusing on research-based inquiry related to literacy in school settings. Includes review of literature and teacher inquiry project.

Prerequisite(s): EDRD 630, 631, 632, 633, and 634; admission to literacy emphasis; or permission of program coordinator.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDRD 637 - Supervised Literacy Practicum

Credits: 2-3 (NR)
Supervised literacy practicum that requires students to conduct assessments of and provide instruction to struggling readers.

Prerequisite(s): EDRD 630, 631, 632

Corequisite(s): EDRD 633.

Hours of Lecture or Seminar per week: 2-3
Hours of Lab or Studio per week: 0
Grading: Graduate Special
EDRD 658 - Advanced Reading Methods and Language Acquisition, Elementary

Credits: 3 (RD)
Provides research-based introduction to literacy for children in grades K-6. Emphasizes oral language, reading process, literacy development, integration of reading across the curriculum, culture connections, and families and literacy.

Prerequisite(s): EDRD 558

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDRD 797 - Advanced Topics in Education

Credits: 1-6 (RD)
Advanced study of selected topics in education for students preparing for doctoral studies or who have been admitted to the PhD program in education.

Notes: May be repeated for credit with CEHD approval.

Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 0

EDRD 829 - Advanced Foundations of Literacy Education

Credits: 3 (NR)
Examines foundational theory, research, and methodology related to literacy. Includes historical and theoretical foundations; research methodologies; and issues such as literacy acquisition, beginning reading, comprehension, struggling readers, and language diversity.

Prerequisite(s): EDUC 800, EDRS 810, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDRD 830 - Foundations of Literacy: Birth through Later Childhood

Credits: 3 (NR)
Explores theory, research, and practice related to emergent literacy and literacy development during childhood. Topics include literacy acquisition and development; historical trends in theories of literacy development; psychological and linguistic, sociocultural, and instructional influences on literacy development; vocabulary development; role of narrative and scripts on linguistic development; authentic tasks and assessment and early literacy; and development in academically diverse children.

Prerequisite(s): EDUC 800 and EDRS 810.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
EDRD 831 - Foundations of Literacy: Adolescence through Adulthood

Credits: 3 (NR)
Explores theory, research, and practice related to adolescent and adult literacy. Topics include influences on adolescents' and adults' literacy practice and development, current and historical understanding of literacy, connections between literacy and learning in the content areas, and needs of diverse learners. Students review common core research literature and topics of individual interest.

Prerequisite(s): EDUC 800 and EDRS 810.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDRD 832 - Seminar in Emerging Trends and Issues in Literacy

Credits: 3 (NR)
Explores emerging trends and issues related to literacy research methods, processes, practices, and policies. Students analyze literacy research and develop a research proposal on a topic of personal interest.

Prerequisite(s): EDUC 800, EDRS 810, or permission of instructor

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

Religious Studies (RELI)

Offered by the College of Humanities and Social Sciences

RELI 100 - The Human Religious Experience

Credits: 3 (NR)
Examines main forms of religious expression as embodied in several important religious traditions in contemporary world. Investigates religious experience; myth and ritual; teachings and scripture; ethical, social, and artistic aspects of religion; and nature and function of religion in human society.

Fulfills general education requirement in global understanding.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

RELI 110 - Introduction to Jewish Ethics
Brief overview of Judaism and its classical texts. Examines a number of current ethical issues including artificial insemination, stem cell research, transplantation, abortion, homosexuality, capital punishment, from a Jewish perspective.

**Religion and Literature**

Credits: 3 (NR)
Explores the relationship between religion and literature in different times and cultures, the influence of religion on literary works, and how literature expresses major religious themes such as death and immortality, divine will and justice, suffering and human destiny, and religion and state.

Fulfills general education requirement in literature.

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0
**RELI 272 - Islam**

Credits: 3 (NR)
Introduces basic religious beliefs and practices of Islam, with view to diverse manifestations of Islamic culture in different ethnic and social contexts. Provides overview of essential rituals of Islamic life, mystical practices of Sufis, certain popular forms of religious practice, sources and application of Islamic law, and distinctive Islamic artistic and literary forms.

**Notes:** Fulfills the college requirement in non-Western culture.

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0

**RELI 313 - Hinduism**

Credits: 3 (NR)
Introduces Hindu religion and thought, beliefs, rituals, ethics and religious practices. Emphasis on classical Hinduism, but also covers Hinduism and modernity, modern Hindu movements, and Hinduism as a global religion.

Fulfills general education requirement in global understanding.

**Notes:** Fulfills the college requirement in non-Western culture.

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0

**RELI 314 - Chinese Philosophies and Religious Traditions**

Credits: 3 (NR)
Surveys major religious traditions and philosophical themes of China including Confucianism, Taoism, and Chinese Buddhism and Neo-Confucianism. Examines foundation of Chinese world view and spirituality by investigating diverse religious traditions that have created tensions and harmony among them.

**Prerequisite(s):** RELI 212, or permission of instructor.

**Notes:** Fulfills the college requirement in non-Western culture.

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0

**RELI 315 - Buddhism**

Credits: 3 (NR)
Surveys Buddhist religious traditions. Includes historical development of Buddhism in India, China, and Japan, examining both Theravada and Mahayana traditions; philosophical and religious significance of Buddhism; and social and political implications of Buddhist traditions in South Asian and East Asian countries.
Fulfills general education requirement in global understanding.

Notes: Fulfills the college requirement in non-Western culture.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**RELI 316 - Christian Thought and Practice**

Credits: 3 (NR)
Surveys origins and development of Christian beliefs, rituals, ethics, and religious practices. Emphasizes various expressions of these in different time periods, societies, and cultures.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**RELI 317 - Daoism**

Credits: 3 (NR)
Explores philosophical ideas, spiritual orientation, religious practice, and social and political values in Daoist tradition reading classic Daoist texts including Dao De Jing, Chuang-tzu, and other sources. Discusses Daoism in light of comparative and cross-cultural studies for global understanding of issues on concepts of nature, human nature, and good and evil.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**RELI 330 - Religion, Fantasy and Imagination**

Credits: 3 (NR)
Explores the worlds of religion, fantasy and imagination, presented in selected writings of 20th century fantasy authors, including Lewis, Tolkien, Pullman, Rowling. Covers ideas of quest for enlightenment, redemption or salvation, conflict between good and evil, worlds of the supernatural, parallel dimensions and their inhabitants.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**RELI 331 - Religion in America**

Credits: 3 (NR)
Religious heritage in American culture, growth of denominations and sects, and interrelationship of religion and sociopolitical life.

Equivalent to RELI 231 (2010-2011 Catalog)
RELI 337 - Mysticism: East and West

Credits: 3 (NR)
Comparative treatment of major expressions of mysticism in East and West through exploration of various ways of understanding mystical experience. Readings and discussion emphasize one or more of the Eastern (Hinduism, Buddhism, Taoism, Zen) and Western (Judaism, Christianity, Islam) traditions.

Notes: Fulfills the college requirement in non-Western culture.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

RELI 341 - Global Perspectives on Spirituality and Healing

Credits: 3 (NR)
Cross-cultural investigation of human understandings of relationship between spirituality and health. Beliefs about spiritual causes of sickness and health and spiritual techniques of healing in variety of world cultures placed in context of religious beliefs of those cultures.

Fulfills general education requirement in global understanding.

Prerequisite(s): 30 credits, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

RELI 350 - Religion and History of Ancient Israel

Credits: 3 (NR)
Examines religion and history of ancient Israel from origins around 1250 BCE to Babylonian Exile in 587 BCE. Topics include debate on historical value of biblical narratives, extra-biblical texts mentioning Israel, move from polytheism to monotheism, archaeology and artifacts, and development of Israel's unique religious and historical self-understanding.

Prerequisite(s): RELI 211, or permission of instructor

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

RELI 352 - Judaism from Exile to Talmud
Credits: 3 (NR)
Examines Jewish religion, history, and literature from the Babylonian Exile to third century C.E. Special attention to
development of Hebrew Bible, Apocalyptic and Apocryphal literature, belief in resurrection and final judgment, Dead Sea
Scrolls, Jewish sects, and emergence of Christianity and Rabbinic Judaism.

Prerequisite(s): RELI 211, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

REL 353 - Jewish Political Tradition

Credits: 3 (NR)
Explores Jewish thinkers' attitudes towards politics and state. Topics include traditional sources, theological and political crisis
of modern times, liberal Jewish thought, Zionist ideology, Israel as a separate state, relationship between religion and politics in
modern Israel.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

REL 354 - Topics in Modern Jewish Thought

Credits: 3 (NR)
Surveys modern Jewish thought, engaging some of the most important themes of this period including Jewish responses to
rationalism, romanticism, idealism, existentialism, and legalism. Studies work from Baruch Spinoza to Emanuel Levinas.

Equivalent to PHIL 354

Prerequisite(s): 3 credits in religious studies or philosophy or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

REL 355 - Sufism

Credits: 3 (NR)
Examines the tradition of Islamic mysticism, Sufism, through an exploration of the literature produced by Sufis themselves.
Provide general introduction to Sufism and its spiritual perspective and investigates various genres of Sufi literature, including
hagiography, symbolic scriptural exegesis, spiritual autobiography, didactic allegory and love poetry.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

REL 356 - Jesus and the Gospels

George Mason University  2013-2014 Official University Catalog  3096
Credits: 3 (NR)
Examines Gospel accounts of Jesus in context of first-century Christianity. Applies variety of historical and literary methods to gain understanding of Jesus and history and theology of early church.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

REL 357 - Gender and the Body in Judaism

Credits: 3 (NR)
Explores distinctively Jewish approaches to questions of gender, sexuality, and the body as described in the legal, religious, ethical, and literary material in the Jewish tradition. Topics include the "body of God," circumcision, laws of purity, rites of passage, the synagogue, feminist theology, and masculine and feminine stereotypes.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

REL 359 - Muslims in the United States

Credits: 3 (NR)
Introduces Islam in the United States past and present. Includes arrival of African Muslims slaves, the emergence of Muslim groups in the early 20th century, and the larger-scale Muslim immigration from the 1960s to the present. Topics include religious practice, media representations, political participation, institution, and cultural production.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

REL 360 - Religion and Politics

Credits: 3 (NR)
Explores the roles of religion in contemporary political life in the United States and abroad. Emphasizes religion in current political debates. Includes history, political theory, sociology, and theology to present a comprehensive understanding of the topic.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

REL 361 - Evangelical America

Credits: 3 (NR)
Introduces the intellectual and social sources of evangelical Protestant traditions in the United States. Examines varieties of evangelical beliefs and practices. Surveying a range of themes, including science, sexuality, politics, and environmentalism, students examine how evangelicals have defined themselves in opposition to secular society but also have engaged the secular in an effort to convert souls, manage personal behavior, and transform American society in their image of Christian community.
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**RELI 362 - Religion and Film**

Credits: 3 (NR)
Surveys representations of religious beliefs, practices, persons, and institutions in popular film. Focuses on the media consumption of box office movies in the United States. Examines how religion is imaged in film and how that religious imagination relates to social constructions of national, ethnic, racial, gender, and sexual identities.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**RELI 363 - Catholicism**

Credits: 3 (NR)
Focuses on the beliefs of the over one billion Roman Catholics in today's world. Probes the history, doctrine, symbols, rituals, practices, and material culture of the world's largest church. Considers Catholicism's dialog with secularism and discusses controversies and challenges facing the church today.

Prerequisite(s): 3 credits in religious studies or philosophy or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**RELI 364 - Religion and Law in the United States**

Credits: 3 (NR)
Explores issues relating to law and religion. Focuses on the legal doctrines that have arisen in cases under the Establishment and Free Exercise Clauses of the First Amendment. Topics include religion and public schools, government aid to religious institutions, including school vouchers, government endorsement of religious symbols, freedom of religious expression, and freedom of religious practice.

Prerequisite(s): 3 credits in religious studies or philosophy or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**RELI 365 - Muhammad: Life and Legacy**

Credits: 3 (NR)
Examines life and character of the founder of Islam, as remembered and understood by Muslims, as well as explores influence of his paradigmatic life and teachings on Islamic religious discourse and culture. Addresses Western critical studies of the accounts
of Muhammad's life and contemporary controversies regarding Muhammad.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**RELI 370 - Judaism**

Credits: 3 (NR)
Studies Judaism from origins to present. Includes origins of Judaism B.C.E.; Rabbinic Judaism; Jews in the Middle Ages; Hasidic and Mystical Judaism; Enlightenment; persecution and Holocaust; contemporary American Judaism; and Jewish, Christian, and Muslim relations.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**RELI 371 - Classic Jewish Texts**

Credits: 3 (NR)
Jewish life and practice have always been centered on ongoing interpretation of classic texts, such as Tanakh ("Old Testament"), Talmud (Oral Law), Midrash (readings of the Bible) and the Kabbalah (mystical teachings) Course provides survey and introduction to major texts of Judaism.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**RELI 372 - American Judaism**

Credits: 3 (NR)
Surveys Jewish religious life focusing on various types of American Judaism such as orthodox, conservative, reform, reconstructionist, as they have developed historically and continue to evolve. Emphasizes issues and challenges facing contemporary Judaism.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**RELI 374 - Islamic Thought**

Credits: 3 (NR)
Examines Islamic views on fundamental issues in religious thought, such as nature of God, nature of man, and relationship between God and man as reflected in both divine revelation and human religious vocation. Investigates intellectual approaches to these problems within Islamic tradition, including those of theological, philosophical, and mystical thinkers.

Fulfills general education requirement in global understanding.
Prerequisite(s): RELI 211, 3 credits in religious studies, or permission of instructor.

Notes: Fulfills the college requirement in non-Western culture.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

RELI 375 - Qur'an and Hadith

Credits: 3 (NR)
Explores two primary sources of Islamic belief and practice: Qur'an and Hadith. Discusses thematic structure and literary quality, and examines theological and moral issues. Also introduces various methods of interpretation and critical analysis applied to texts in both Islamic and Western scholarship. Lecture and discussion.

Prerequisite(s): 3 credits in philosophy and religious studies, or permission of instructor.

Notes: Fulfills the college requirement in non-Western culture.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

RELI 376 - Special Topics in Religious Thought

Credits: 3 (RT)
Selected topics from a philosophical perspective.

Prerequisite(s): 3 credits in philosophy or religious studies, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

RELI 377 - Special Topics in Religious Thought

Credits: 3 (NR)
Selected topics from a philosophical perspective.

Prerequisite(s): 3 credits in philosophy or religious studies, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

RELI 379 - Islamic Law, Society, and Ethics
Introduces foundational sources and principles of Islamic Law or shariah. Examines the historical development and application of Islamic law, its role in Muslim societies, and its relationship to Islamic social ideals and ethical discourse.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

### RELI 381 - Beginnings of Christianity

Credits: 3 (NR)
Examines early Christian church from time of Jesus to 700 C.E. Covers internal development of Christianity as it formed official doctrines and institutions, and external relations of Christians with followers of other religions in Roman Empire. Special attention to reasons for success of Christianity in Roman world.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

### RELI 401 - Death and the Afterlife in World Religions

Credits: 3 (NR)
Examination of the rituals, practices, and beliefs regarding death and the afterlife in world religions past and present. Emphasis placed on crosscultural and comparative aspects.

**Prerequisite(s):** 60 credits including 6 credits in religious studies or permission of instructor

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

### RELI 403 - Scripture and Authority in World Religions

Credits: 3 (NR)
Examines origins, development, and role of Scripture (religious texts) in world religions, concentrating on issues of divine inspiration, authority, authenticity, and canon.

**Prerequisite(s):** 60 credits including 6 credits in religious studies, or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

### RELI 405 - Religion, Values, and Globalization

Credits: 3 (NR)
Explores diverse value systems, ethical norms, and teaching found in different religious traditions and cultures. Examines assumption that globalization is attempt to universalize Western culture.
Prerequisite(s): 60 credits including 6 credits of religious studies, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**RELI 407 - Women in the World's Religions**

Credits: 3 (NR)
Seminar course offering theoretical and comparative study of role of women in six of the major religious traditions of the world—Judaism, Christianity, Islam, Hinduism, Buddhism, and Chinese religions.

Prerequisite(s): 60 credits; 6 credits of philosophy or religious studies.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**RELI 420 - Seminar**

Credits: 3 (RT)
Senior seminar on a specific topic of relevance to religious studies. Content varies.

Fulfills writing intensive requirement in the major.

Prerequisite(s): Major in religious studies with 60 credits including 9 credits or permission of instructor.

Notes: May be repeated three times when topic varies. Students with other majors may be take the course if the topic is sufficiently close to their field of study.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**RELI 425 - Directed Readings in Religious Studies**

Credits: 1-3 (RD)
Individual readings and research in religious studies on a topic selected in consultation with instructor.

Prerequisite(s): Major in religious studies with 60 credits including 9 credits in religious studies.

Notes: May be repeated for a total of 6 credits.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**RELI 490 - Comparative Study of Religions**
Cross-cultural examination of comparative aspects of religious phenomena. Examines significance of religious phenomena from diverse religious and cultural perspectives, and investigates patterns of religious phenomena that have appeared in world cultures and civilizations.

Fulfills general education requirement in synthesis.

**Prerequisite(s):** 9 credits in religious studies including RELI 211 and RELI 212, or permission of instructor.

**Notes:** Fulfills the college requirement in non-Western culture.

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0

### RELI 591 - Special Topics in Religious Studies

Credits: 3 (RT)
Topics in religious studies selected by importance in the field and pertinent to the role of religion in society and culture. Emphasis on historical, interdisciplinary, and cross-cultural issues.

**Notes:** May be repeated for a maximum of 12 credits when topic is different with permission of department.

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0

### RELI 630 - Approaches to the Study of Religion

Credits: 3 (NR)
Examines study of religion as academic discipline. Evaluates various intellectual approaches and methods used in study of religious phenomena.

**Prerequisite(s):** Graduate standing, or permission of instructor.

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0

### RELI 631 - Sacred as Secular in Modern Spirituality

Credits: 3 (NR)
Investigates nature of sacred and categories of sacred and secular in human experience. Both duality and interconnectedness of sacred and secular explored to facilitate fresh understanding of essential unity of human religiosity and spirituality.

**Prerequisite(s):** Graduate standing, or permission of instructor.

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0
RELI 632 - World Religions in Conflict and Dialogue

Credits: 3 (NR)
Explores reasons for instances of global religious conflicts and examines ways of engaging in interreligious dialogue. Investigates religious pluralism as an effective means for dialogue.

Prerequisite(s): Graduate standing, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

RELI 633 - Ethical Perspectives of World Religions

Credits: 3 (RD)
Examines how perceptions of ultimate reality shape ethical values and behaviors of various religious traditions. Addresses problems in interpretation of authoritative foundational teachings in contemporary contexts. Special attention to non-Western religions.

Prerequisite(s): Graduate standing, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

RELI 635 - World Religions in Transition and Transformation

Credits: 3 (RD)
Explores transitions and transformations in selected world religions as they respond to and influence forces of cultural change, social values, and the crises of history. Fresh or modified constructions of the sacred and their relationship to world and humans will be examined.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

RELI 636 - Religion and the Natural Environment

Credits: 3 (NR)
Explores contemporary religious thought on the morality and ethics of environmental responsibility. Begins with an exploration of this issue in Western Christian thought and examines religious approaches to the environment in the traditional and contemporary thought of other major world religions, including Judaism, Islam, Hinduism, Buddhism, and the Chinese traditions.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
RELI 640 - Religion and Law

Credits: 3 (NR)
Focuses on United States Supreme Court decisions on religion clauses over the last 50 years. Provides a close reading of court's opinions and considers material from religious legal traditions. Covers contemporary political debates on issues like prayer in public schools, displays of religious symbols, ceremonial references to God, and public aid to religious schools.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

RELI 642 - Sacred Language, Scripture, and Culture

Credits: 3 (RD)
Explores how sacred languages and scriptures develop in major global religious traditions: study of grammar, syntax, and morphology of sacred languages; issues of inspiration, authority and canon. Also examines cultural dimensions of sacred language.

Prerequisite(s): Graduate standing, or permission of instructor.

Notes: May be repeated once when languages are different.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

RELI 644 - Islamic Texts and Contexts

Credits: 3 (NR)
Introduces foundational Islamic texts; scholarly traditions of commentary, criticism and analysis on these texts; and application and significance of these texts in contemporary Islamic discourses.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

Rehabilitation Science (RHBS)

RHBS 270 - Applied Human Anatomy and Physiology I

Credits: 4 (NR)
Develops a comprehensive understanding of the interrelationships of anatomy and physiology as observed in the human organism, and introduces application of knowledge to health, disease and dysfunction. Emphasis on musculoskeletal, nervous, cardiovascular, respiratory and integumentary systems.

Equivalent to HHS 270 (2012-2013 Catalog)
RHBS 271 - Applied Human Anatomy and Physiology II

Credits: 4 (NR)
Develops a comprehensive understanding of the interrelationships of anatomy and physiology as observed in the human organism, and introduces application of knowledge to health, disease and dysfunction. Emphasis on digestive, endocrine, lymphatic, genitourinary, and reproductive systems.

Equivalent to HHS 271 (2012-2013 Catalog)

Prerequisite(s): RHBS 270.

RHBS 340 - Health, Disease and Dysfunction

Credits: 3 (NR)
Focuses on basic epidemiology, health promotion and disease prevention, as well as impairments in normal function of the individual resulting in disease and dysfunction. Exploration of the individual and societal impact of health and disease. Introduces current rehabilitation and intervention strategies as well as classification of disease and disability.

RHBS 350 - Clinical Physiology and Human Performance

Credits: 3 (NR)
Investigates the study of human physiology and how it relates to physical activity, health, and functional ability. Specifically, examines the metabolic, locomotive, endocrine, cardiovascular, and pulmonary responses to physical activity and their contributions and limitations to human performance.

Prerequisite(s): College-level chemistry or permission of instructor or department chair.

RHBS 410 - Physical Activity and Public Health
Investigates the basic principles and concepts of epidemiology and the influence of exercise and physical activity on the most common risk factors for prevalent chronic diseases in the United States of America.

**RHBS 415 - Clinical Movement Science**

Credits: 3 (NR)
Describes how the human nervous and musculoskeletal systems work together to move the human body, with special emphasis on movement disorders and disabilities. Topics include movement and motion principles, muscle force production, physiology, and adaptation, along with the measurement of muscle activity, body movements, and body forces.

Prerequisite(s): College-level physics or permission of instructor or department chair.

**RHBS 420 - Adult Health and Function**

Credits: 3 (NR)
Approaches the study of function and normal development, how it is attained and how it is optimized with a multi-systems viewpoint. Focuses on the components of functional movement. Addresses strategies for assessing, promoting and maintaining functional independence. Highlights current treatment approaches of disease and dysfunction.

**RHBS 490 - Clinical Research Internship**

Credits: 3 (NR)
Practical experience in a clinical research setting under the direction of a mentor. Each student is required to work with an experienced clinical investigator who agrees to provide the trainee mentorship. Clinical research embraces a spectrum of scientific disciplines that use a variety of study methods. Therefore, the multidisciplinary approach to clinical research is emphasized during didactic interactions.

Designated as a research and scholarship intensive course.

Equivalent to HHS 490 (2011-2012 Catalog)

Prerequisite(s): Course is open to honors college students only. In addition, an application must be submitted in the semester prior to enrollment in the course. During the semester prior to entry, students may be asked to acquire certain competencies/certifications in order to fully participate at their research site (for example, human subjects research protections.
training, lab safety certification, HIPAA training).

**Hours of Lecture or Seminar per week:** 1  
**Hours of Lab or Studio per week:** 3  
**When Offered:** Spring

**RHBS 491 - Directed Research**

Credits: 1-3 (RD)  
Engages students in a directed research project under the guidance of a faculty member.

**Prerequisite(s):** Permission of the instructor.

**Hours of Lecture or Seminar per week:** 0  
**Hours of Lab or Studio per week:** 1-3  
**When Offered:** Fall, Summer, Spring

**RHBS 506 - Clinical Exercise Physiology**

Credits: 3 (NR)  
Examines acute and chronic alterations, adaptations associated with exercise and training. Covers role of exercise therapy in preventing and rehabilitating from disease across lifespan. Particular emphasis on role of exercise therapy in cardiorespiratory, musculoskeletal, and metabolic diseases.

Equivalent to GCH 506 (2011-2012 Catalog).

**Prerequisite(s):** Bachelor’s degree with 8 credits in anatomy and physiology; or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall, Spring.

**RHBS 510 - Scientific Basis for Pain and Fatigue**

Credits: 3 (NR)  
Reviews the scientific literature describing the theories of the initiation and perpetuation of pain, fatigue, and suffering. Describes the methodologies used to evaluate these symptoms. Students will apply the theories of pain, fatigue, and suffering and will further their understanding of specific clinical problems.

Equivalent to GCH 510 (2010-2011 Catalog)

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Spring
RHBS 550 - Foundations of Rehabilitation Science

Credits: 3 (NR)
Examines the field of rehabilitation science with emphasis on the core theories and models of this emerging discipline. Surveys various topics within rehabilitation science including the history and development of the field, assistive technologies, pathology and impairment research, functional limitations research, disability research, translational research, and ethical considerations in clinical and research settings.

Equivalent to GCH 550 (2010-2011 Catalog)

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

RHBS 570 - Movement Analysis of Function

Credits: 3 (NR)
Applies biomechanical principles of movement to analyze functional activities, including walking, sit-stand, lifting, reaching-carrying activities, and stairs negotiation. Focuses on joints and total body kinematics and kinetics, and the contribution of muscular activity to performance. Applies methods of analyzing human motion to estimate changes in forces and moments (torques) during functional performance. Addresses how age and injuries affect functional performance.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring.

RHBS 580 - Behavior Change in Chronic Illness

Credits: 3 (NR)
Explores behavior change as related to chronic illness, especially diabetes/obesity, cardiovascular and cerebrovascular disease, and arthritis. Topics include behavior change theories; research approaches to studying behavior change; influences on behavior change of personal factors, patient-provider communication and relationships, and social support; and adherence to prescribed regimens.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Summer

RHBS 620 - Psychosocial Aspects of Rehabilitation

Credits: 3 (NR)
Explores social and psychological impacts of disability. Processes by which people with disabilities adapt to limitations will be examined, as will the influence society has in promoting independence/dependence among people with disabilities.

Equivalent to GCH 620 (2010-2011 Catalog)
RHBS 651 - Research Methods

Credits: 3 (NR)
Explores quantitative and qualitative research methods, principles and techniques necessary for implementation of health science research.

Equivalent to GCH 651 (2011-2012 Catalog); GCH 551 (2010-2011 Catalog)

Corequisite(s): GCH 601 or graduate course in applied statistics.

RHBS 702 - Biobehavioral Aspects of Health

Credits: 3 (NR)
Examines the biological, psychological, and social factors that interact with and affect efforts people make in promoting good health and preventing illness and the recovery, rehabilitation, and psychosocial adjustment of patients with serious health problems.

Equivalent to GCH 702 (2010-2011 Catalog)

Prerequisite(s): GCH 601 or equivalent, or a graduate-level research methods course.

RHBS 710 - Applied Physiology I

Credits: 3 (NR)
Examines the primary bio-regulatory and communication systems. A detailed study of physiology for graduate students interested in health and human movement, chronic illness, and disability. Covers energy metabolism, endocrine, immune, neurological, and muscular systems.

Equivalent to GCH 710 (2010-2011 Catalog)

Prerequisite(s): One-year introductory biology sequence with labs or two-semester course sequence in anatomy and physiology.

Hours of Lecture or Seminar per week: 3
RHBS 711 - Applied Physiology II

Credits: 3 (NR)
Explores general systemic function. A detailed study of physiology for graduate students interested in health and human movement, chronic illness, and disability. Covers cardiovascular, pulmonary, gastrointestinal, renal, and reproductive systems.

Equivalent to GCH 711 (2010-2011 Catalog)

Prerequisite(s): RHBS 710.

RHBS 720 - Principles of Clinical Trials

Credits: 3 (NR)
Provides a practical overview of the fundamental principles of clinical trial design and management, ethical and regulatory factors in the conduct of clinical trials, and their role in clinical practice, public health and decision making. Topics include clinical trial design, biostatistics, ethics and regulatory affairs, study management and oversight, and current concepts.

Prerequisite(s): Graduate level statistics and methods course(s) or permission of instructor.

RHBS 740 - Applied Physiology: Cardiorespiratory

Credits: 3 (NR)
Rigorous, evidence-based study of biological factors and medical conditions that limit oxidative metabolic function. Emphasis on examining current hypotheses of physical activity limitations in chronic illness and disability.

Equivalent to GCH 740 (2010-2011 Catalog)

Prerequisite(s): RHBS 506 or EFHP 610 or RHBS 710 or other graduate physiology course, plus one of the following: two-semester course sequence in anatomy and physiology (100 level or above) or one course in animal or comparative physiology (300 level or above) or one course in human physiology (300 level or above).
RHBS 745 - Metabolic Basis of Disability

Credits: 3 (NR)
Examines anatomy and physiology of organs and systems involved in regulating metabolism; assesses relationships among hormonal and central nervous system regulation in the production and regulation of energy.

Equivalent to GCH 745 (2010-2011 Catalog)

Prerequisite(s): RHBS 710

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

RHBS 746 - Neuromusculoskeletal Disability

Credits: 3 (NR)
Explores anatomy and physiology of musculoskeletal system, and its relationship to human motion; evaluates movement with respect to central and peripheral nervous systems; familiarizes students with human motion and differences in normal and disabled populations.

Equivalent to GCH 746 (2010-2011 Catalog)

Prerequisite(s): RHBS 710

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring

RHBS 760 - Rehabilitation Science Colloquium

Credits: 1 (RD)
Public forum for the presentation and discussion of contemporary issues in the field of rehabilitation science.

Equivalent to GCH 760 (2010-2011 Catalog)

Prerequisite(s): Enrollment in PhD program in Rehabilitation Science or permission of the graduate director.

Notes: May be repeated for credit; however a maximum of three credits may be applied to the rehabilitation science Ph.D.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0
Grading: Satisfactory/No Credit
When Offered: Fall, Spring

RHBS 761 - Aging and Health Behavior
Credits: 3 (NR)
Examines age-related changes in health and health behavior along with the impact of structural factors, societal, and personal attitudes toward aging. The successful aging paradigm will frame discussion of strategies for facilitating optimal health behaviors.

Equivalent to GCH 761 (2010-2011 Catalog)

Prerequisite(s): A graduate level course in psychology or research methods.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring

RHBS 808 - Outcomes Measurement

Credits: 3 (NR)
Examines the principles of measurement applied to both assessment and outcome measures commonly used in rehabilitation. The student will become familiar with the state of outcomes research in the field of rehabilitation science.

Equivalent to GCH 808 (2010-2011 Catalog)

Prerequisite(s): RHBS 550 and RHBS 551.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring

RHBS 816 - Comparative Effectiveness Research

Credits: 3 (NR)
Examines the theory and methods of comparative effectiveness studies and their relationship to developing Rehabilitation Science and other disciplines to effect better clinical practice by identifying benefits/harms of prevention and treatment and explores the implications of evidence for comparative effectiveness in developing health care policy.

Prerequisite(s): Graduate level statistics and methods course(s) or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring.

RHBS 940 - Independent Study

Credits: 1-6 (RD)
In-depth study of selected area of rehabilitation science under the direction of faculty.

Equivalent to GCH 940 (2010-2011 Catalog)
**Prerequisite(s):** Enrollment in PhD program and permission of instructor.

**Notes:** May be repeated as needed, up to a maximum of 24 credits.

**Hours of Lecture or Seminar per week:** 0  
**Hours of Lab or Studio per week:** 1-12  
**Grading:** Satisfactory/No Credit  
**When Offered:** Fall, Spring, Summer

---

**RHBS 960 - Directed Research**

Credits: 1-6 (RD)  
Research on a pertinent topic in rehabilitation science. Must be arranged with instructor before registering.

**Prerequisite(s):** Permission of instructor.

**Hours of Lecture or Seminar per week:** 1-6  
**Hours of Lab or Studio per week:** 0  
**Grading:** Satisfactory/No Credit  
**When Offered:** Fall, Summer, Spring.

---

**RHBS 999 - Dissertation Research**

Credits: 1-9 (RD)  
Dissertation research on a specific topic under the direction of a faculty member.

Equivalent to GCH 999 (2010-2011 Catalog)

**Prerequisite(s):** Enrollment in PhD program in rehabilitation science and permission of graduate director.

**Notes:** May be repeated, up to a maximum of 24 credits.

**Hours of Lecture or Seminar per week:** 0  
**Hours of Lab or Studio per week:** 1-9  
**Grading:** Satisfactory/No Credit  
**When Offered:** Fall, Spring, Summer

---

**Russian (RUSS)**

Offered by the College of Humanities and Social Sciences.

Placement: See Academic Testing in the Admissions section.

---

**RUSS 101 - Elementary Russian I**
For students with no knowledge of Russian. Introduces elements of grammar, vocabulary, oral skills, listening comprehension, and reading.

Notes: Students may not receive credit for RUSS 101 and RUSS 109 or 110.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**RUSS 102 - Elementary Russian II**

Credits: 3 (NR)
Continuation of RUSS 101.

Prerequisite(s): RUSS 101 or permission of department.

Notes: Students may not receive credit for RUSS 102 and RUSS 109 or 110.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**RUSS 109 - Intensive Elementary Russian**

Credits: 6 (NR)
Recommended for students who desire intensive introduction.

Notes: Students may not receive credit for RUSS 109 and RUSS 101, 102, or 110.

Hours of Lecture or Seminar per week: 6
Hours of Lab or Studio per week: 2

**RUSS 110 - Elementary Russian**

Credits: 6 (NR)
Introduces elements of grammar, vocabulary, oral skills, listening comprehension, and reading.

Notes: Students may not receive credit for RUSS 110 and RUSS 101, 102, or 109.

Hours of Lecture or Seminar per week: 6
Hours of Lab or Studio per week: 0

**RUSS 199 - Russian Language and Culture for Students and Professionals**
Credits: 3 (NR)
Designed for English-speaking specialists in humanities, sciences, and business studies in Russia. Covers range of topics, including elementary Russian phonetics and grammar, basic conversation, and Russian etiquette. Course theme is language needs of foreigners who happen to be traveling and conducting business activities in Russia. Acquaints students and professionals with cultural framework that forms indispensable backdrop to daily activities in Russia. Students become increasingly confident and effective in their ability to engage Russians from all walks of life in daily informal and professional conversation in the Russian language.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**RUSS 201 - Intermediate Russian I**

Credits: 3 (NR)  
Further development of skills in listening, speaking, reading, and writing.

**Prerequisite(s):** RUSS 102, 109, appropriate placement score, or permission of department.

**Notes:** RUSS 201 and 202 must be taken in sequence. Students may not receive credit for RUSS 201 and RUSS 209 or 210.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**RUSS 202 - Intermediate Russian II**

Credits: 3 (NR)  
Application of language skills to reading, composition, and discussion.

**Prerequisite(s):** RUSS 201, appropriate placement score, or permission of department.

**Notes:** Students may not receive credit for RUSS 202 and RUSS 209 or 210.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**RUSS 209 - Intensive Intermediate Russian**

Credits: 6 (NR)  
Equivalent to RUSS 201 and 202 taught in a single semester.

**Prerequisite(s):** RUSS 102, 109, appropriate placement score, or permission of department.

**Notes:** Students may not receive credit for RUSS 209 and RUSS 201, 202, or 210.

**Hours of Lecture or Seminar per week:** 6  
**Hours of Lab or Studio per week:** 0
RUSS 210 - Intermediate Russian

Credits: 3 (NR)
Continuation of the development of basic components of the language, with focus on listening, speaking, reading, and writing skills. Introduces students to the cultures and histories of Russian-speaking regions. Lab work required.

Prerequisite(s): RUSS 110 or appropriate placement score.

Notes: Students may not receive credit for RUSS 210 and RUSS 201, 202, or 209.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 1

RUSS 250 - Gateway to Advanced Russian

Credits: 3 (NR)
Integration of advanced intermediate-level Russian grammar, reading, writing, listening and speaking skills with the development of research skills and critical thinking about authentic texts from contemporary media.

Prerequisite(s): RUSS 210, appropriate placement score, or permission of department.

Notes: Taught in Russian.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

RUSS 302 - Russian Conversation and Composition

Credits: 3 (NR)
Develops students' ability to express themselves orally on topics of current interest and everyday situations. Provides practice in more difficult forms of written expression.

Fulfills writing intensive requirement in the major.

Prerequisite(s): RUSS 250, appropriate placement score, or permission of instructor

Notes: Taught in Russian.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

RUSS 303 - Russian Advanced Conversation
Credits: 3 (NR)
Development of oral proficiency. Includes current colloquial expressions.

**Prerequisite(s):** RUSS 250, appropriate placement score, or permission of instructor.

**Notes:** Taught in Russian.

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0

### RUSS 310 - Readings in Russian Literature

Credits: 3 (NR)
Readings of Russian literary works in original language with lectures, discussions, and exam in Russian.

**Prerequisite(s):** RUSS 250, appropriate placement score or permission of instructor.

**Notes:** Taught in Russian.

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0

### RUSS 311 - Contemporary Russian Short Fiction

Credits: 3 (NR)
Reading and discussion of recent short stories by best-known Russian writers of today.

**Prerequisite(s):** RUSS 250, appropriate placement score or permission of instructor.

**Notes:** Taught in Russian. Readings in original language.

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0

### RUSS 325 - Major Russian Writers

Credits: 3 (RT)
Study of works of major Russian writers in translation. Writers to be studied vary.

Fulfills general education requirement in literature.

**Prerequisite(s):** ENGL 101/ENGH 101 or equivalent, or permission of instructor.

**Notes:** Taught in English. May be repeated once for credit when course content is different.

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0
RUSS 326 - A Survey of Russian Literature

Credits: 3 (NR)
Surveys Russian literature from its beginning to 1880.
Fulfills general education requirement in literature.

Prerequisite(s): 60 credits, or permission of instructor.

Notes: Taught in English.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

RUSS 327 - A Survey of Russian Literature

Credits: 3 (NR)
Surveys Russian literature of late 19th and 20th centuries.
Fulfills general education requirement in literature.

Prerequisite(s): 60 credits, or permission of instructor.

Notes: Taught in English.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

RUSS 353 - Russian Civilization

Credits: 3 (NR)
Civilization and culture of Russia and former Soviet Union. Includes films, slides, and music in addition to readings and lectures.
Fulfills general education requirement in synthesis.

Prerequisite(s): 60 credits, and completion or concurrent enrollment in all other required general education courses

Notes: Taught in English. Fulfills the college requirement in non-Western culture.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

RUSS 354 - Contemporary Post-Soviet Life
Credits: 3 (NR)
Social life, art, economics, education, view of life, and personal aspirations of Russian citizen today.

Fulfills general education requirement in global understanding.

Prerequisite(s): 60 credits, or permission of instructor.

Notes: Taught in English. Fulfills the college requirement in non-Western culture.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

RUSS 380 - Advanced Russian I

Credits: 3 (NR)
Comprehensive study of the more difficult characteristics of contemporary standard Russian in areas of grammar, style, and vocabulary usage. Emphasizes developing fluency in oral and written expression.

Prerequisite(s): RUSS 202, 209, or equivalent; appropriate placement score; or permission of instructor

Notes: Taught in Russian.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

RUSS 381 - Advanced Russian II

Credits: 3 (NR)
Comprehensive study of the more difficult characteristics of contemporary standard Russian in areas of grammar, style, and vocabulary usage. Emphasizes developing fluency in oral and written expression.

Prerequisite(s): RUSS 202, 250, or equivalent; appropriate placement score; or permission of instructor.

Notes: Taught in Russian.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

RUSS 401 - Readings in the Social Sciences

Credits: 3 (NR)
Reading, translation, and discussion of Russian materials in fields of history, politics, geography, and sociology.

Prerequisite(s): 15 credits of Russian or equivalent.

Notes: Taught in Russian.
**RUSS 407 - Russian Drama and Theater**

Credits: 3 (NR)
Development of Russian theater including directing techniques in Moscow Art Theater. Reading and discussion of major Russian plays of 19th and 20th centuries.

**Prerequisite(s):** 60 credits, or permission of instructor.

**Notes:** Course work in English; knowledge of Russian not required.

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0

**RUSS 410 - Russian Poetry**

Credits: 3 (NR)
Historical development of Russian poetry and representative works of major poets.

**Prerequisite(s):** 15 credits of Russian or equivalent.

**Notes:** Reading in Russian; course work in English and Russian.

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0

**RUSS 470 - Topics in (Post) Soviet Film**

Credits: 3 (RD)
Russian, Soviet, and post-Soviet films selected by type, period, or director with emphasis varying from year to year. Required viewings, student discussion, and written critiques.

**Prerequisite(s):** 60 credits, or permission of instructor.

**Notes:** Taught in English. May be repeated once with permission of department or film studies adviser.

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0

**RUSS 480 - Fourth-Year Russian**
RUSS 481 - Fourth-Year Russian
Credits: 3 (NR)
Advanced work in major grammatical and lexical topics of Russian. Application of theoretical principles in guided written and oral exercises.

Prerequisite(s): RUSS 380, 381, or equivalent; or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

RUSS 490 - Independent Study
Credits: 1-3 (NR)
Research and analysis of selected problem in language, literature, or culture in consultation with member of Russian studies faculty.

Prerequisite(s): Russian studies major with 90 credits and permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

RUSS 491 - Independent Study
Credits: 1-3 (NR)
Research and analysis of selected problem in language, literature, or culture in consultation with member of Russian studies faculty.

Prerequisite(s): Russian studies major with 90 credits and permission of instructor.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0

RUSS 499 - Seminar on Russian Literary and Critical Bibliography
Credits: 3 (NR)
Comprehensive bibliographic survey of major primary and secondary works of Russian literature and criticism.

Prerequisite(s): Russian studies major with 90 credits and permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

School of Management (SOM)

Offered by the School of Management

SOM 100 - Business in American Society

Credits: 3 (NR)
Provides students with a foundation for understanding the role of business in society by exploring the nature and history of business enterprise, the social context of business, and the interaction of individuals with business by selecting current events in business and analyzing the content as well as the impact of the reported activities.

Fulfills general education requirement in social and behavioral science.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

SOM 301 - Business Models: A Communication Approach

Credits: 3 (NR)

Introduces fundamentals of business models, and writing as learning tool. Interrelationships among accounting, finance, information systems, marketing, and operations are subject of several "learning by writing" deliverables.

School of Management students will not be permitted to make more than three attempts to achieve a C or higher in SOM 301. Those who do not successfully complete this course within three attempts will be terminated from their major and will not be eligible to receive a degree from the School of Management. For more information about this, see the "Termination from the Major" section under Academic Policies.

Fulfills writing intensive requirement in the major.

Corequisite(s): OM 210 and ACCT 203

Notes: Fulfills writing intensive requirement for SOM majors. Taught in lecture/recitation format; requires attendance at weekly lecture and weekly recitation.

Hours of Lecture or Seminar per week: 3
SOM 492 - Undergraduate Internship

Credits: 3 (NR)
Opportunity to gain practical, professional experience in conjunction with academic development. Internship is an important part of academic and career preparation. May be used as elective credit, but may not be repeated.

Prerequisite(s): Degree status.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

SOM 498 - Capstone Course: Advanced Business Models

Credits: 3 (NR)
Advanced integrated exploration of business models and industry dynamics that uses case analyses to assess competition, organizational strategy, and firm performance. Students examine strategic change in organizations from multiple perspectives, integrating knowledge from core course work into several papers and major presentation. Students receive coaching from area business leaders as they complete their presentations.

Fulfills general education requirement in synthesis.

Prerequisite(s): ACCT 301, BULE 302, OM 301, FNAN 301, MGMT 301, MIS 301, and MKTG 301; senior standing; degree status. Prerequisite enforced by registration system.

Notes: Fulfills synthesis requirement for SOM majors.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring, Summer

Social Work (SOCW)

Offered by the Health and Human Services

SOCW 110 - Global Perspectives on Human Rights

Credits: 3 (NR)
Explores awareness about human rights issues around the world. Students will become familiar with current debates about human rights, especially whether rights should be culturally determined. The role of the United Nations, governmental and nongovernmental organizations, including social service organizations will be presented. Emerging issues including the rights of children; the rights to food, shelter, and health care; and racial and economic equality will be emphasized.
Notes: Open to social work and nonsocial work majors; does not count toward the social work degree requirements.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**SOCW 200 - Introduction to Social Work**

Credits: 3 (NR)
Introduces historical roots of social work profession and social welfare. Person-in-environment perspective discussed as framework for social work knowledge, values, and skills. Initial course in social work curriculum introduces social work profession, professional values, ethics, fields of practice, and settings in which social workers are employed. Highlights profession's commitment to diverse and at-risk populations and social and economic justice. Presentations by social work professionals in different fields of practice supplement classroom lecture, discussion, and small-group exercises.

Notes: Open to all majors.

**SOCW 301 - Laboratory in Interpersonal Communication**

Credits: 4 (NR)
Emphasizes experiential learning of biological, psychological, social, and cultural influences on behavior of those who need and those who give help. Students examine their own behavioral and learning patterns, values, ethics, and attitudes to increase ability to understand and help clients.

Prerequisite(s): SOCW 200, SOCI 101, PSYC 100, and at least sophomore standing.

Corequisite(s): SOCW 357.

Notes: Service learning of at least 60 hours required.
Open to majors only.

Hours of Lecture or Seminar per week: 4
Hours of Lab or Studio per week: 0

**SOCW 323 - Human Behavior and the Life Course**

Credits: 3 (NR)
Social systems approach unifying and integrating concepts and knowledge from biology, anthropology, sociology, and psychology about human behavior. Applications to professional practice, from social work literature to field experience.

Fulfills general education requirement in synthesis.

Prerequisite(s): SOCI 101, BIOL 103, and PSYC 100, or permission of the instructor.

Notes: Open to all majors.
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring, Summer

**SOCW 340 - Human Behavior within Macro Systems**

Credits: 3 (NR)
Examines social systems theories as they pertain to study of macro systems. Focus of study involves families, social group, formal organization, and community. Students apply theoretical concepts to contemporary social problems.

Equivalent to SOCW 324 (2010-2011 Catalog)

**Prerequisite(s):** SOCI 101, BIOL 103, and PSYC 100, or permission of the instructor.

**Notes:** Students may not take SOCW 340 if they have already received credit for SOCW 324.

**SOCW 351 - Social Policy and Social Justice**

Credits: 3 (NR)
Introduces students to the knowledge and skills needed to frame and analyze social problems and social policies in the context of social justice. Examines the historical development, central concepts, and institutional nature of the contemporary welfare state and major social policies that have emerged in response to changing social, political, economic, and cultural influences.

**Prerequisite(s):** SOCW 200 and SOCI 101, or permission of the instructor.

**Notes:** Open to all majors.

**SOCW 357 - Methods of Social Work Intervention I**

Credits: 3 (NR)
Social work practice from systems perspective. Particular emphasis on problem-solving activities with microsystems. Analyzes common core of knowledge, values, and skills essential to social work practice to gain insight into social work functions and role of social worker as change agent.

**Prerequisite(s):** SOCW 200, SOCI 101, PSYC 100, or permission of the instructor.

**Corequisite(s):** SOCW 301.
SOCW 358 - Methods of Social Work Intervention II

Credits: 3 (NR)
Continues generic problem-solving model, focusing on group and macro intervention systems, settings, and skills. Emphasizes working with both treatment and task groups. Group processes, such as goal formulation, contract setting, composition, and termination necessary for effective worker intervention, are part of knowledge base.

Prerequisite(s): SOCW 301 and 357 with a minimum grade of C.

Corequisite(s): SOCW 362.

Notes: Open to majors only.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

SOCW 359 - Junior Seminar

Credits: 1 (NR)
Provides opportunity to integrate theory, research, and practice in area of group work. Time is allotted to process successes and obstacles, and to share issues, knowledge, and skills learned in service-learning site.

Prerequisite(s): SOCW 301

Corequisite(s): Must be taken simultaneously with SOCW 358.

Notes: Forty hours of service learning are required. Open to SOCW majors only.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0

SOCW 362 - Group and Family Interventions

Credits: 3 (NR)
Provides students the opportunity to integrate theory, research, and practice in the area of group work and family interventions. Classroom simulation of group skills and how to work with families will occur. Collaboration with community agencies working with groups and families is required.

Equivalent to SOCW 359 (2010-2011 Catalog)

Prerequisite(s): SOCW 301 and SOCW 357 with a minimum grade of C.
Corequisite(s): SOCW 358.

Notes: Open to SOCW majors only. Students may not take SOCW 362 if they have already received credit for SOCW 359.

**SOCW 370 - Social Policy Analysis and Advocacy**

Credits: 3 (NR)
Introduces students to the knowledge and skills needed to influence social policy outcomes and advocate for social change. Explores the role of social workers in legislative policy analysis and advocacy. Students gain skills in policy practice, legislative research, developing and presenting recommendations, and testifying.

Equivalent to SOCW 352 (2010-2011 Catalog)

Prerequisite(s): SOCW 200 and GOVT 103 or 132, or permission of instructor.

Notes: Students may not take SOCW 370 if they have already received credit for SOCW 352.

**SOCW 400 - Legal and Ethical Issues in Human Services**

Credits: 3 (NR)
Overview of ethical and legal issues related to human services professions. Topics include responsibility, competence, duty to warn, confidentiality, professional relationships, and research. Emphasizes models of ethical decision making and critical thinking.

Prerequisite(s): 45 credits or permission of instructor.

**SOCW 410 - Alcohol and Substance Abuse: Policies and Programs**

Credits: 3 (NR)
Primary issues related to alcoholism and drug abuse including key concepts, theories, policies, and research regarding use and abuse of alcohol and other drugs. Emphasizes impact of policies and programs on well-being of ethnic minority and disadvantaged service populations.

Prerequisite(s): 45 credits or permission of instructor.
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**SOCW 415 - Child and Family Welfare**

Credits: 3 (NR)
Emphasizes viewing human development and child and family welfare services critically, holistically, and contextually. Integrates ecological systems, human rights, and empowerment perspectives for understanding delivery systems and persons in relation to their environment across levels from individual to global. Provides overview of existing child welfare system with focus on current issues, challenges, and at-risk populations.

**Prerequisite(s):** 45 credits or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**SOCW 417 - Integrative Methods in Social Action and Social Change**

Credits: 3 (NR)
Uses generalist social work practice concepts with large systems and provides students with a hands-on opportunity to apply concepts and principles of intervention with large systems. Students will work with organizations and communities on a local, national, or global level to promote social action and social change. The course will also focus on evaluating interventions addressing the social justice needs of diverse, at-risk, and oppressed populations.

Designated as a research and scholarship intensive course.

**Prerequisite(s):** SOCW 452, SOCW 453 and SOCW 471.

**Notes:** Open only to Social Work majors.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**SOCW 423 - Social Work with Children and Adolescents**

Credits: 3 (NR)
Major needs of children and adolescents, and implications for social work practice. Problems of family and peer group relationships, occupational choice, sexual and scholastic adjustment, and special problems of racial and cultural alienation, alcohol and drug abuse, and delinquency. Reviews various theoretical orientations and evidence from research. Analyzes both individual and group approaches to counseling and treatment.

**Prerequisite(s):** 45 credits or permission of the instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
**SOCW 425 - Planning and Organizing for Community Change**

Credits: 3 (NR)
Designed for senior social work students with interest in pursuing community organization as professional career specialty. Provides basic understanding of community organization and planning, with special emphasis on conducting needs assessment in community. Students examine environmental context in which administrative and community practice occurs. Explores role of social workers as planners and agents of social change.

Prerequisite(s): 45 credits or permission of the instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**SOCW 435 - Introduction to Gerontology**

Credits: 3 (NR)
Surveys issues related to working with older adults, their families, and care providers. Studies biological, psychological, and sociocultural aspects of aging, and unique problems with service delivery to older persons. Examines forces that impinge on an older person, and explores critical issues related to extended life span, family changes, institutionalization, and role of older persons in society.

Prerequisite(s): 45 credits, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

**SOCW 445 - Social Determinants of Health**

Credits: 3 (NR)
Examine the social determinants of health and the application of this framework to social work and public health policy and practice interventions. Explore the many social justice factors that affect health and consider which community systems and social change approaches may decrease or eliminate health inequities.

Equivalent to GCH 445

Prerequisite(s): 45 credits or permission of the instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring, Summer

**SOCW 452 - Senior Seminar I**

Credits: 2 (NR)
Provides integrative team experience to support field experience and provide opportunities to demonstrate required competencies
through special assignments.

**Prerequisite(s):** SOCW 200, 301, 357, 358, 362, 323, 340, 351, and 370 with a C or better and recommendation of faculty. Open only to SOCW majors.

**Corequisite(s):** SOCW 453.

**Hours of Lecture or Seminar per week:** 2  
**Hours of Lab or Studio per week:** 0

### SOCW 453 - Senior Practicum I

**Credits:** 3 (NR)  
Supervised learning experience (practicum) under guidance of qualified faculty liaisons and professional staff designated and approved by director of field education. Designed to facilitate practice with individuals, families, groups, and communities. Students spend two full days weekly in practicum sites.

**Prerequisite(s):** SOCW 200, 301, 357, 358, 362, 323, 340, 351, and 370 with a C or better and recommendation of faculty. Open only to SOCW majors.

**Corequisite(s):** SOCW 452.

**Notes:** Requires concurrent seminar (SOCW 452) participation and faculty-agency visits.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**Grading:** Satisfactory/No credit only

### SOCW 454 - Senior Seminar II

**Credits:** 2 (NR)  
Continuation of integrative team experience designed to support practicum experience and provide opportunities to demonstrate required competencies through special assignments.

**Prerequisite(s):** SOCW 452, 453, 471 with a grade of C or better.

**Corequisite(s):** SOCW 456

**Hours of Lecture or Seminar per week:** 2  
**Hours of Lab or Studio per week:** 0

### SOCW 456 - Senior Practicum II

**Credits:** 3 (NR)  
Continuation of supervised learning experience (practicum) begun in SOCW 453. Students spend two full days weekly in practicum sites supervised by faculty liaisons and qualified professional staff designated and approved by director of field education.
Corequisite(s): SOCW 454

Notes: Requires concurrent seminar participation (SOCW 454) and faculty-agency visits. Open to SOCW majors only.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
Grading: Satisfactory/No Credit

SOCW 471 - Research in Social Work

Credits: 3 (NR)
Principles and theory underlying scientific inquiry. Emphasizes use of research in social work practice, steps in conducting research, and research efforts in developing and evaluating social work knowledge and skills.

Fulfills writing intensive requirement in the major.

Prerequisite(s): SOCI 313, PSYC 300, or STAT 250; SOCW 358 and 362; senior standing or permission of the instructor

Notes: Must be completed with minimum grade of C.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

SOCW 475 - Selected Topics in Social Work Policy

Credits: 3 (RT)
In-depth study of special areas of social work of interest to students, faculty, and social work community.

Prerequisite(s): 45 credits, or permission of instructor.

Notes: May be repeated for maximum 9 credits if topics vary.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

SOCW 480 - Research Internship in Health and Human Services

Credits: 3 (NR)
The student works as a member of a team engaged in health and human services research and attends a bi-weekly research seminar. Under direction of the course seminar leader and the faculty research mentor, the student will acquire selected research skills and develop introductory research writing and presentation skills.

Equivalent to HHS 480, HAP 480

Prerequisite(s): Open only to CHHS majors or students who have completed CHHS minor or certificate courses.
SOCW 483 - Selected Approaches to Social Work Intervention

Credits: 3 (RT)
Opportunity to examine personal use of different approaches to social work intervention currently employed in practice settings. Students use technical skills with clients that these approaches require.

Prerequisite(s): 45 credits, or permission of instructor.

Notes: May be repeated for maximum 9 credits if topics vary.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

SOCW 499 - Independent Study in Social Work

Credits: 1-3 (RD)
Investigates research problem in field of social work.

Prerequisite(s): 60 credits and research proposal approved by instructor before enrollment.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

SOCW 598 - Special Topics in Social Work

Credits: 1-6 (RD)
Critical examination of special topics related to social work, social justice, and human rights.

Prerequisite(s): Upper-level undergraduate or graduate standing.

Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 0

SOCW 623 - Human Behavior and Social Systems I

Credits: 3 (NR)
Ecological approach to behavior of individuals, families, groups, organizations, and communities. Integrates and applies theories from psychology, sociology, biology, and anthropology to study of infants, children, and adolescents. Emphasizes human diversity.
Prerequisite(s): Graduate standing.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**SOCW 624 - Human Behavior and Social Systems II**

Credits: 3 (NR)
Continues study of human behavior and diversity by exploring application of development theory and ecological principles to those in young adulthood, middle adulthood, and older adulthood.

Prerequisite(s): SOCW 623.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**SOCW 630 - Forensic Social Work Practice**

Credits: 3 (NR)
Explores the social work role in legal processes relating to such issues as family violence, child custody, behavioral health, disabilities, aging, and juvenile/criminal justice. Apply skills in forensic interviewing, risk assessment, expert testimony, mitigation, mediation, treatment, victim advocacy, and multidisciplinary collaboration.

Prerequisite(s): SOCW 624, 652, 658, and 673.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**SOCW 640 - Advanced Clinical Practice**

Credits: 3 (NR)
Prepares students at the advanced level to apply diagnostic, assessment, prevention, treatment, and intervention skills with individuals, families, and groups in clinical mental health and health settings. Trains students in differential diagnosis and assessment using the Revised Diagnostic and Statistical Manual (DSM IV-TR). Currently accepted treatment interventions within the context of contemporary social work theory are also presented.

Prerequisite(s): SOCW 623, 624, 651, 652, 657, 658, 670, 671, 672, 673 and 680

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**SOCW 645 - Community-Centered Clinical Practice**
Students use an ecosystems framework for assessment, risk-reduction, prevention, and intervention with communities in a local, national, or international context. Possible areas of exploration include violence prevention and intervention, suicide prevention and intervention, emergency response efforts, and behavioral health or wellness interventions at the community level.

**Prerequisite(s):** SOCW 624, 652, 658, and 673.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**SOCW 651 - Social Policies, Programs, and Services**

Credits: 3 (NR)  
History of American social welfare policy and social work profession. Explores political, economic, social, cultural, and ideological influences on policy making with emphasis on consequences for populations at risk. Introduces historical policy analysis.

**Prerequisite(s):** Graduate standing

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**SOCW 652 - Influencing Social Policy**

Credits: 3 (NR)  
Introduces students to the knowledge, skills, and values needed to influence policy outcomes. Explores the role of social workers in electoral politics and policy advocacy. Students gain skills in legislative research, coalition building, testifying, constituent organizing, and lobbying, while developing strategies for promoting social justice through policy change.

**Prerequisite(s):** SOCW 651.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**SOCW 653 - Immigration Policy**

Credits: 3 (NR)  
Prepares students for advocacy on behalf of immigrants from a human rights and social justice perspective. Explores policies, economic forces and historical precedence abetting global migration. Abets development of an in-depth knowledge of national and local policies as they pertain to immigrants, and how issues relate to social work advocacy.

**Prerequisite(s):** Completion of all first-year graduate coursework or advanced standing.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall, Spring, Summer
SOCW 654 - Social Policy for Children and Youth

Credits: 3 (NR)
Examines social policies, programs, and services on behalf of children and youth with implications for social work; including child welfare, child and adolescent health and mental health, juvenile justice, and school social work. Explores how societal norms regarding family and definitions of children's well-being influenced these policies over time.

Prerequisite(s): Completion of MSW foundation coursework.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring, Summer

SOCW 655 - Aging Programs and Policies

Credits: 3 (NR)
Analyzes the evidence-based benefits and challenges of social welfare and health care policy at the local, state, and federal levels on programs and services for older persons and their families. Fosters an understanding of the context of administrative structures, and legislative context of social policy and aging with attention to diversity and ethics.

Prerequisite(s): SOCW 652 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring, Summer

SOCW 657 - Direct Social Work Practice I

Credits: 3 (NR)
Introduces role of social workers as change agents and the core knowledge, values, and skills that guide social work practice with individuals, families, small groups, organizations, and communities.

Prerequisite(s): Graduate standing and open only to students enrolled in MSW degree program.

Corequisite(s): SOCW 672.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

SOCW 658 - Direct Social Work Practice II

Credits: 3 (NR)
Continuation of social work theory and practice with individuals, families, groups, organizations, and communities. Emphasizes intervention, evaluation, follow-up, and termination, with attention to incorporating social work knowledge, values, and skills.
**Prerequisite(s):** SOCW 657; Open to students enrolled in MSW degree program

**Corequisite(s):** SOCW 673

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0

---

**SOCW 670 - Communication and Technology for Social Work Practice**

Credits: 3 (NR)
Studies various forms of written communication pertinent to social work practice. Examines impact of audience, status, culture, and purpose on effective professional writing.

**Prerequisite(s):** Graduate standing.

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0

---

**SOCW 671 - Research Methods for Social Workers**

Credits: 3 (NR)
Examines role of scientific inquiry in social work. Emphasizes construction and use of measurement instruments, data collection, analysis, and interpretation, and application of computer technologies relevant to social work practice.

**Prerequisite(s):** Graduate Standing.

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0

---

**SOCW 672 - Foundation Field Practicum and Seminar I**

Credits: 3 (NR)
Provides supervised social work learning experience in human service agencies. Students complete 16 hours per week in field practicum, and attend bimonthly seminar in which they share learning and integrate theory with practice.

**Corequisite(s):** SOCW 657.

**Notes:** Open only to MSW degree students.

**Hours of Lecture or Seminar per week:** 1
**Hours of Lab or Studio per week:** 0
**Grading:** Graduate Special
**When Offered:** Fall, Spring
SOCW 673 - Foundation Field Practicum and Seminar II

Credits: 3 (NR)
Continues the supervised social work learning experience begun in SOCW 672. Students spend 16 hours per week in field practicum, and attend bimonthly seminar in which they share learning, process experiences, and integrate theory with practice.

Prerequisite(s): SOCW 672.
Corequisite(s): SOCW 658.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0
Grading: Graduate Special
When Offered: Fall, Spring

SOCW 674 - Psychopathology

Credits: 3 (NR)
Overview of adult and child psychopathology presented within the contexts of the lives of people experiencing mental disorders and the social contexts that can have a bearing on symptom maintenance. Learn to formulate competency-based assessments and DSM IV-TR-based differential diagnoses.

Prerequisite(s): All foundation year coursework (SOCW 623, 624, 651, 652, 657, 658, 670, 671, 672, and 673).

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

SOCW 675 - Selected Topics in Clinical Practice

Credits: 3 (RT)
In-depth study of special topics related to clinical social work practice at the individual, family, small group, or community level.

Prerequisite(s): 30 credits or permission of instructor.

Notes: May be repeated for a maximum of 12 credits if the topics vary.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

SOCW 676 - Selected Topics in Social Work and Social Change

Credits: 3 (RT)
Critical examination of special topics related to understanding and improving community and societal conditions through policy practice, program development, and social action.

Prerequisite(s): 30 graduate credits or permission of instructor.
Notes: May be repeated for a maximum of 12 credits if the topics vary.

**SOCW 677 - Family Therapy**

Credits: 3 (NR)
Examines research and theory relevant for assessment and intervention with families. Students will learn to conduct a family assessment, taking cultural diversity, non-traditional family structures including single-parent and GLBTQ families, and socioeconomic factors into account. Students will develop skills in implementing an intervention based on the family’s strengths and challenges.

**Prerequisite(s):** Completion of MSW foundation coursework.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall, Spring, Summer

**SOCW 678 - Trauma and Recovery**

Credits: 3 (NR)
Explores complex traumatic stress disorders, the process of recovery, and the etiology of healing in contemporary North American Culture. Diagnostic criteria, assessment strategies and evidence-based treatment options for complex traumatic stress disorders across diverse populations including sexual trauma, war, early childhood trauma and natural disasters will be addressed.

**Prerequisite(s):** Completion of MSW foundation coursework.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall, Spring, Summer

**SOCW 679 - Military Social Work**

Credits: 3 (NR)
Examines research and theory relevant for social work practice with service members, veterans, and their families. The course addresses the military as a workplace culture, evidence-based approaches for post-traumatic stress and co-morbid conditions, clinical practice with military families, preventive care and the service delivery system in military and civilian settings.

**Prerequisite(s):** Completion of MSW foundation coursework.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall, Spring, Summer
**SOCW 680 - Clinical Field Practicum**

Credits: 6 (NR)
Supervised social work learning experience four days per week. Students placed in public, nonprofit or for-profit mental health and health venues reflecting specific interests in advanced clinical practice with individuals, families and groups, community-centered clinical practice, or forensic social work.

**Prerequisite(s):** SOCW 673, 630, 640, 645, and 688

**Hours of Lecture or Seminar per week:** 1-3  
**Hours of Lab or Studio per week:** 0

**SOCW 681 - Clinical Field Seminar**

Credits: 3 (NR)
Assists students in critically analyzing their field experiences in the application of mental health assessment and interventions, working with individuals, families, groups, and communities. Students are expected to apply social work knowledge, values, and skills from their advanced clinical course work.

**Corequisite(s):** SOCW 680.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**SOCW 682 - Substance Abuse Interventions**

Credits: 3 (NR)
Develops knowledge and skills for direct practice in the field of addictions. The course covers the knowledge base regarding evidence-based interventions at all stages in the process of intervention with individuals, families, and groups that promote recovery from addiction to drug and alcohol abuse.

**Prerequisite(s):** Completion of MSW foundation coursework.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall, Spring, Summer

**SOCW 684 - Social Work and the Law**

Credits: 3 (NR)
Students engage in close analysis of judicial opinions to explore the role of the courts in creating public policy. Areas of inquiry include the role of social workers in the legal system, the nature of legal proceedings, and how the law shapes policy in relation to issues affecting children, youth, families, older adults, women, minorities, people in poverty, and other vulnerable populations.

**Prerequisite(s):** SOCW 624, 652, 658, and 673.
SOCW 685 - Organizational Leadership for Social Workers

Credits: 3 (NR)
Examines functions and structure of human service organizations in context of service delivery. Development of theoretical knowledge, professional ethics, and skills in administration, leadership, management, organization, and supervision.

Prerequisite(s): SOCW 624, 652, 658, and 673.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

SOCW 687 - Empowering Communities for Change

Credits: 3 (NR)
Explores social work interventions at community level, including organization, planning, and development. Strategies for mobilizing community members, using community organizations, formulating coalitions, engaging in participatory planning, and social and economic development.

Prerequisite(s): SOCW 624, 652, 658, and 673.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

SOCW 688 - Advanced Research in Social Work

Credits: 3 (NR)
Explores social work intervention research, needs assessment, formative and summative program evaluation, and cost analyses. Discusses applications of systematic inquiry at the practice, organizational, and policy levels. Addresses ethical, pragmatic, and political considerations; qualitative approaches; quality performance; evidence from empirical research; and evaluation design.

Prerequisite(s): SOCW 624, 652, 658, 671, and 673.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 1

SOCW 689 - Clinical Practice with Older Adults

Credits: 3 (NR)
Examines age-associated changes and challenges faced by older adults. Focus is strengthening assessment and intervention skills with older adults, their family members and caregivers within the community and long-term care facilities, determining the best standardized instruments to use, and developing effective questions for assessment. Attention is given to the resilience of elders,
ethical issues and diversity.

Prerequisite(s): SOCW 674 or permission of the instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring, Summer

SOCW 690 - Social Change Field Practicum

Credits: 6 (NR)
Supervised social work learning experience four days per week. Students placed in public, nonprofit, or for-profit venues reflecting specific interests in agency supervision, organizational management, community change, electoral policies, or social policy.

Prerequisite(s): SOCW 673, 684, 685, 687, and 688.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0
Grading: Graduate Special

SOCW 691 - Social Change Field Seminar

Credits: 3 (NR)
Processing of field practicum experiences; analysis of successes and challenges; application of social work knowledge, values, and skills from across the curriculum. Culminates in professional presentations by students.

Corequisite(s): SOCW 690.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

SOCW 692 - Clinical Practicum I

Credits: 3 (NR)
Students participate in a supervised clinical social work field practicum for 20 hours per week. The clinical field seminar accompanies the clinical concentration year practicum. The seminar is designed to assist the student in critically analyzing their field experiences in the application of mental health assessment, risk reduction and interventions working with individuals, families, groups, and communities.

Prerequisite(s): SOCW 623, 624, 651, 652, 657, 658, 670, 671, 672, 673

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall
SOCW 693 - Clinical Practicum II

Credits: 3 (NR)
Students participate in a supervised clinical social work field practicum for 20 hours per week. The clinical field seminar accompanies the clinical concentration year practicum. The seminar is designed to assist the student in critically analyzing their field experiences in the application of mental health assessment, risk reduction and interventions working with individuals, families, groups, and communities.

Prerequisite(s): SOCW 623, 624, 630, 651, 652, 657, 658, 670, 671, 672, 673, 674, 688, and 692

Notes: This is a continuation of SOCW 692 taken in the Fall semester.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring

SOCW 694 - Social Change Practicum I

Credits: 3 (NR)
Students participate in a supervised clinical social work field practicum for 20 hours per week. The clinical field seminar accompanies the concentration year practicum. The seminar is designed to assist students in processing their field experiences and analyzing their successes and challenges. Students are expected to apply social work knowledge, values, and skills from across the curriculum.

Prerequisite(s): SOCW 623, 624, 651, 652, 657, 658, 670, 671, 672, 673

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

SOCW 695 - Social Change Practicum II

Credits: 3 (NR)
Students continue to work in a supervised social work field practicum for 20 hours per week. At the end of this semester students will have completed 300 hours of field work to meet the total number of 600 hours required for the concentration year practicum. The field seminar accompanies the concentration year practicum. The seminar is designed to assist students in processing their field experiences and analyzing their successes and challenges. Students are expected to apply social work knowledge, values, and skills from across the curriculum.

Prerequisite(s): SOCW 623, 624, 651, 652, 657, 658, 670, 671, 672, 673, 684, 685, 688, and 694

Notes: Continuation of SOCW 693 from the Fall semester.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring
**SOCW 697 - Thesis Project Seminar**

Credits: 3 (NR)
Provides structured opportunity for students to work with each other and faculty in developing their final MSW thesis projects. Integrates and applies learning from all previous course work, emphasizing knowledge, skills, and values related to research, clinical practice, policy, community practice, and organizational leadership. Social work ethics, empowerment of populations at risk, and systems transformation will be explored. In addition to group meetings, students will meet individually with their faculty mentors.

**Prerequisite(s):** Social Change: SOCW 684, 685 and 688.
Clinical Practice: SOCW 630 and 688.

**Corequisite(s):** Social Change: SOCW 676 and 687. Clinical Practice: 640 and 645.

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0

**SOCW 699 - Independent Study in Social Work**

Credits: 1-3 (RT)
Investigates research problem in field of social work.

**Prerequisite(s):** Graduate standing.

**Hours of Lecture or Seminar per week:** 1-3
**Hours of Lab or Studio per week:** 0

**Sociology (SOCI)**

Offered by the College of Humanities and Social Sciences

**SOCI 101 - Introductory Sociology**

Credits: 3 (NR)
Introduction to basic sociological concepts. Examines aspects of human behavior in cultural framework, including individual and group interaction, social mobility and stratification, status and class, race and gender relations, urbanism, crime and criminology, and social change and reform.

Fulfills general education requirement in social and behavioral science.

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0

**SOCI 120 - Globalization and Society**
Credits: 3 (NR)

Examines and analyzes important global issues and processes. Considers historical development of globalization and implications for different societies and cultures. Investigates perceptions of global processes by different cultures and nations, and efforts of international institutions to address social, political, economic, and cultural changes in global society.

Fulfills general education requirement in global understanding.

Notes: Students may not receive credit for both SOCI 120 and GLOA 101.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**SOCI 300 - Social Control and Freedom**

Credits: 3 (NR)

Explores ways in which individuals are both architects and prisoners of society. Offers a foundational course for examining the "invisible" social forces that shape our lives and the individual and collective capacity to make choices, including social and cultural change. Includes topics such as youth and culture, deviance and crime, social inequalities, and global change.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**SOCI 301 - Criminology**

Credits: 3 (NR)

Focuses on causes and meaning of crime, with emphasis on adults. Patterns of criminal behavior, including property crimes, violent crimes, organized crime, white-collar crime, and victimless crime. Critical assessment of criminal justice system as a response to crime.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**SOCI 302 - Sociology of Delinquency**

Credits: 3 (NR)

Examines social factors involved in development of delinquency, including family, political economy, schooling, community environment and culture. Examines various theories of delinquency; rates of delinquency in relation to age, race, gender and social class; and legal system that addresses causes, consequences, and policies of punishment and rehabilitation.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**SOCI 303 - Sociological Research Methodology**
Credits: 4 (NR)
Introduces empirical design in sociological research: historical development, research design, sampling, methods of gathering data, sociometric scales, analysis and interpretation of results, and research reporting.

Prerequisite(s): SOCI 101 or 102, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 2

SOCI 304 - The Future of Work

Credits: 3 (NR)
Introduces the basic concepts of economic sociology. Explores how the world of work has changed due to globalization, deindustrialization, new technologies, and economic crisis. Focuses on providing students with a better understanding of how markets and corporations work, and about new economic approaches to create new, potentially less alienating work environments.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

SOCI 307 - Social Movements and Political Protest

Credits: 3 (NR)
Explores processes for organizing resistance to current social and power arrangements, from terrorism to nonviolent civil resistance to create alternative institutions, policies, or leadership that promote human rights and social justice. Uses historical and contemporary case studies of local and global change to explore, how, why, and to what effect individuals have organized to protest the status quo and create social change.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

SOCI 308 - Race and Ethnicity in a Changing World

Credits: 3 (NR)
Explores how race and ethnicity have been shaped by policies and practices in Western and non-Western societies. Explores the evolution of racial and ethnic attitudes from a global and historical perspective. Examines how changing demographic racial patterns may affect definitions of race and ethnicity and the ways in which people individually and collectively act to create new futures.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

SOCI 309 - Marriage, Families, and Intimate Life
Credits: 3 (NR)
Uses a sociological framework to analyze and understand the diverse forms of contemporary families--traditional marriages, cohabitation, domestic partnerships, single-parents families, stepfamilies, and gay and lesbian families. Explored are topics such as changes in sexual mores, reflected in new dating practices; shifting parenting roles; effects of social class, race and ethnicity; and the outcomes of divorce for couples and children.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**SOCI 310 - Sociology of Deviance**

Credits: 3 (NR)
Analyzes macro- and microlevel deviance-producing processes, meaning and control of deviance, and major theoretical approaches to deviance.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**SOCI 311 - Classical Sociological Theory**

Credits: 3 (NR)
Explores sociological tradition through readings and discussions of ideas drawn from writings of selected sociological thinkers such as Comte, Marx, Weber, Durkheim, and others.

Prerequisite(s): 6 credits of upper level (300 or 400 level) sociology courses, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**SOCI 312 - Qualitative Research Methods**

Credits: 3 (NR)
Introduces ethnography, field work methods, interviewing, life histories, and other qualitative methods to generate data about cultures in which various groups and classes are immersed. Students learn by applying qualitative methods to term projects, developed under guidance of instructor.

Prerequisite(s): 9 credits of sociology including SOCI 101 or 102, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**SOCI 313 - Statistics for the Behavioral Sciences**
Credits: 4 (NR)
Fundamentals of applied statistics as used in behavioral science to include descriptive statistics, inferential statistics, correlation regression, analysis of variance, factor analysis, nonparametric statistics, and practical experience with calculators in applying statistical analysis to actual problems of the behavioral sciences.

Prerequisite(s): SOCI 101, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 2

**SOCI 314 - The Practice and Politics of Culture**

Credits: 3 (NR)
Examines how culture, encompassing high art or participatory culture, expressive agency or traditional constraint, is produced and reproduced in everyday social practices and across a wide range of social institutions. Explores the role of culture in public life and political discourse.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**SOCI 315 - Women and Men in Society**

Credits: 3 (NR)
Analyzes the roles of men and women in contemporary American society. Focuses on the perpetuation of and change in gender stratification using sociological concepts, theories, and research. Elucidates how gender expectations are developed and transmitted. Uses historical and comparative data and research on diversity in American society for analysis of causes and consequences of gender inequality.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**SOCI 320 - Social Structure and Globalization**

Credits: 3 (NR)
While focusing on nature and process of change in human society, considers social impact of political, economic, and environmental change and how lives are shaped by complexities of global social forces. Examines specific global issues such as conflict and security; economic disparity; ecological deterioration; populations and migration; legitimization of commerce; diffusion of innovations; and impact of class, status, and power in modern societies. Designated a Green Leaf Course.

Fulfills general education requirement in global understanding.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
**SOCI 326 - Armed Conflict and Conflict Resolution**

Credits: 3 (NR)
Examines political, economic, and sociocultural reasons why countries engage in armed conflict. Conflicts within and between states are explored with special focus on consequences for global, regional and local instability, loss of life and limb, and fragmentation of social, political, and economic fabric of societies. Examines various approaches to conflict resolution.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**SOCI 332 - The Urban World**

Credits: 3 (NR)
Examines cities and the people who live in them in the United States and around the world. Includes topics such as: social and economic development, inequality, political protests, urban democracy, and the environment.

Fulfills general education requirement in global understanding.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**SOCI 340 - Power, Politics, and Society**

Credits: 3 (NR)
Analyzes how power is defined, attained and sustained in society. Students analyze political power as related to social realities such as democratic elections, class conflict, elite networks, powersharing, protest, and revolution.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**SOCI 352 - Social Problems**

Credits: 3 (NR)
Using a sociological perspective, analyzes the problems of contemporary societies, including inequality, poverty, health, environment, oligarchy, media, militarism, and corruption.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**SOCI 355 - Social Inequality**
Credits: 3 (NR)
Studies class structures and implications for individuals and groups in modern society. Explores issues of race and ethnicity, language and immigration status, sex and gender, social class, age, and sexual orientation. Examines critically the theory and research that explore the construction, experience, and meaning of such differences.

Fulfills general education requirement in social and behavioral science.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**SOCI 360 - Youth Culture and Society**

Credits: 3 (NR)
Introduces sociology of youth and youth culture. Investigates social, economic, and political realities of youth as a group and different groups of youth, including youth cultural production, formation of youth culture, and youth identities in variety of social settings.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**SOCI 373 - The Community**

Credits: 3 (NR)
Examines small to moderate-size communities ranging through village, rural community, small town, and city subcommunity. Latter category includes city localities, ethnic villages, and suburban communities.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**SOCI 377 - Art and Society**

Credits: 3 (NR)
Introduces the many ways in which art reflects social tendencies, comments on social problems, and contributes to discussions about a wide range of social issues. Students attend theatrical performances and visit exhibition spaces on campus, and learn to analyze what they experience through both aesthetic and sociological approaches. Explores contemporary issues such as debates about artistic freedom and public morality, commercialization of art, and relationship between cultural and social hierarchies.

Fulfills general education requirement in synthesis.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**SOCI 382 - Education in Contemporary Society**
Credits: 3 (NR)
Examines classrooms and schools as social institutions that function as socializing agents for both stability and societal change. Emphasizes the influence of inequality on educational processes and outcomes and critically examines the social organization of the U.S. public school system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**SOCI 385 - Sociology of Religion**

Credits: 3 (NR)
Studies places of religious consciousness in human action and institutional and organizational networks created to sustain religious beliefs. Emphasizes comparative and historical analysis of role religion has played in human society. Examines theories of nature of religious experience, religious symbolism, and basis of religious community. Explores changing demographics in relation to older traditional religious faiths and newer nontraditional faiths.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**SOCI 390 - Sociology of Health, Illness, and Disability**

Credits: 3 (NR)
Examines social context of health, illness, and disability; relationships of health care professionals and patients; and structure and delivery of health care in different medical systems.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**SOCI 395 - Special Topics in Sociology**

Credits: 3 (RT)
Introduces the research interests of the faculty, offering new courses that reflect current issues not yet incorporated into the curriculum. Offers, in addition, advanced study into topics covered in the standing curriculum. Topics change by semester.

Prerequisite(s): 90 credits, and 12 credits of sociology.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**SOCI 399 - Independent Study**

Credits: 1-3 (RD)
Individual study of sociological topic of interest to student.
Prerequisite(s): Open to sociology majors only. 6 credits of sociology including SOCI 101, and approval of written proposal.

Notes: May be repeated for credit up to 3 credits.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0

SOCI 405 - Analysis of Social Data

Credits: 4 (NR)
Overview of management and analysis of empirical social science data, including file construction, scaling and measurement, data transformation, and treatment of missing data. Emphasizes manipulation, management, and analysis of data sets using computers.

Prerequisite(s): 60 credits, SOCI 313 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 3

SOCI 410 - Social Surveys and Attitude and Opinion Measurements

Credits: 3 (NR)
Surveys research methods and techniques to collect, measure, and analyze social data, attitudes, and opinions with special emphasis on using computer software, the Internet, and other information technologies for social research. Highlights ethical issues for social research, computing, and information technology.

Fulfills general education requirement in information technology (all except ethics).

Prerequisite(s): SOCI 303 and 313 or equivalents, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

SOCI 412 - Contemporary Sociological Theory

Credits: 3 (NR)
Presents for analysis and discussion the significant theorists and themes in contemporary sociological theory. Designed to enhance student’s skills in reading and analyzing primary texts and to encourage reflection on contemporary social reality. Fulfills writing intensive requirement.

Fulfills writing intensive requirement in the major.

Prerequisite(s): SOCI 311 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
**SOCI 416 - Internship in Sociology**

Credits: 1-6 (RT)
Intended to promote learning in application of sociological knowledge, and build skills in different work settings. Students work in approved setting as applied sociologists.

**Prerequisite(s):** 21 credits of sociology, including Research Methods, or permission of instructor.

**Notes:** Minimum 45 hours of work for each credit required. May be repeated for a maximum of 6 credits.

**Hours of Lecture or Seminar per week:** 1-6
**Hours of Lab or Studio per week:** 0

**SOCI 421 - Field Work in Social Change**

Credits: 3 (NR)
In-depth investigation of planned social change through field work internship with change organization of student's choice. Groups may be involved in influencing peace, environment, civil rights, consumer protection, poverty, or other public issues. Topics include ideologies, targets, organizational structures, opposition, and strategies of change.

**Prerequisite(s):** 6 credits of sociology or permission of instructor.

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0

**SOCI 441 - The Sociology of Aging**

Credits: 3 (NR)
Aging from a sociological perspective. Topics include demographic trends and aging population in America, social construction of life stages and creation of "old age," cultural labeling, and human resistance.

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0

**SOCI 471 - Prevention and Deterrence of Crime**

Credits: 3 (NR)

Equivalent to CRIM 471

**Prerequisite(s):** 60 credits, in-service status, or permission of instructor.
SOCI 480 - Honors Seminar in Sociology I

Credits: 3 (NR)
Develop research proposals and an appropriate bibliography for honors thesis under the guidance of a sociology faculty member.

Prerequisite(s): Admission to honors in the sociology major.

SOCI 481 - Honors Seminar in Sociology II

Credits: 3 (NR)
Pursue independent research and write honors thesis under the guidance of a faculty mentor. Present work in a colloquium at the end of the semester.

Prerequisite(s): Successful completion of SOCI 480.

SOCI 482 - Honors Internship in Sociology

Credits: 3 (NR)
Provides hands-on experience in sociology and opportunity to do research in approved work settings. In addition to 120 hours of field work (for 3 credits), students meet at discretion of instructor to plan their research and share ongoing field work experiences.

Prerequisite(s): Admission to Sociology Honors Program and permission of instructor.

SOCI 483 - The Sociology of Higher Education

Credits: 3 (NR)
Exposes students to sociological theory and research on evolution of higher learning in United States. Explores social forces that have shaped the distinctively American approach toward higher education and have led to transformation of higher education in contemporary society. Particular attention to relation between universities and elites within surrounding society, linkage between
education and industry, norms and values that are presupposed by educational institutions, and bearing of sports on values and traditions of higher education.

Fulfills general education requirement in synthesis.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**SOCI 492 - Sociology of Organizations**

Credits: 3 (NR)  
Theories, analysis of types of organizations from informal voluntary associations to large complex ones. Explores nonprofit organizations and alternatives to bureaucracies, such as feminist collectives, cooperatives, self-help groups, and social movement organizations. Students do field work in organizations applying theories and concepts to observations.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**SOCI 499 - Independent Research in Sociology**

Credits: 1-4 (RD)  
Investigation of sociological problem according to individual interest, with emphasis on research.

**Prerequisite(s):** 18 credits of sociology including SOCI 311, 313, and 412; 3.00 GPA in sociology; and research proposal approved by instructor and department chair before enrollment.

**Hours of Lecture or Seminar per week:** 1-4  
**Hours of Lab or Studio per week:** 0

**SOCI 503 - Sociology of Law**

Credits: 3 (NR)  
Classical and contemporary sociological theories applied to law and legal institutions. Social relations between law and community, special group interests, social change, and social deviance. Case studies. Consideration of legal profession.

**Prerequisite(s):** Undergraduate senior status in sociology, graduate standing, or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**SOCI 516 - Internship in Sociology**

Credits: 1-6 (RD)  
Learning experience in the application of sociological knowledge and skills in different work settings. Students work in approved
setting as applied sociologists.

**Prerequisite(s):** 21 credits of sociology including research methods, or permission of instructor.

**Notes:** Minimum 45 hours of work for every 1 credit. May be repeated for a maximum of 6 credits.

**Hours of Lecture or Seminar per week:** 1-6
**Hours of Lab or Studio per week:** 0

### SOCI 590 - Gender, Race, and the Natural World

Credits: 3 (NR)
Advanced study of links among gender, race, and nature using social-psychological framework, original sources, and seminar discussion format. Analyzes ideologies that underpin interlocking narratives of gender, race, and nature; and examines role of science in production of those ideologies.

**Prerequisite(s):** Undergraduate seniors, graduate standing, or permission of instructor.

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0

### SOCI 599 - Issues in Sociology

Credits: 1-3 (NR)
Contemporary topics in sociology including sociological theory, crime and delinquency, advanced research methods, social and cultural change, urban sociology, medical sociology, sociology of aging, and rural sociology.

Equivalent to NURS 611

**Prerequisite(s):** Undergraduate senior status in sociology, or graduate status.

**Notes:** May be taken only once for credit.

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0

### SOCI 605 - Gender and Social Structure

Credits: 3 (NR)
Reviews theories explaining the development and maintenance of gender. Using historical and comparative data, examines perceived, prescribed, and actual sex differentiation in social, political, and economic roles. Begins with gender as a social structure and then examines contemporary research as support or refutation for variety of theoretical paradigms. Includes discussion of gender in intimate relationship and the public sector.

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0
SOCl 607 - Criminology

Credits: 3 (NR)
Crime and crime causation. Topics include social basis of law, administration of justice, and control and prevention of crime.

Prerequisite(s): Graduate standing, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

SOCl 608 - Juvenile Delinquency

Credits: 3 (NR)
Sociology of adolescent behavior. Sociological factors that determine which behaviors and social categories of adolescents are likely to be labeled and treated as delinquent.

Prerequisite(s): Graduate standing, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

SOCl 609 - Sociology of Punishment and Corrections

Credits: 3 (NR)
Explores development of modern penal system as interpreted by various perspectives, including Durkheim, Marx, Weber, Foucault, Elias, and Garland. Explores recent trends and problems, including social control and violence in prisons, race and gender disparities in punishment, alternative rehabilitation, and prevention strategies.

Prerequisite(s): Graduate standing, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

SOCl 614 - Sociology of Culture

Credits: 3 (NR)
Analyzes 20th-century debates in American culture and cultural politics, with emphasis on art and popular culture, news media, and competing notions of “the public.” In-depth readings in cultural sociology cover variety of theoretical and methodological approaches.

Prerequisite(s): Graduate standing, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
**SOCI 619 - Conflict and Conflict Management: Perspectives from Sociology**

Credits: 3 (NR)
Deals with sociology of conflict. Presents major sociological theories of conflict such as those of Marx, Weber, Simmel, Dahrendorf, Coser, and Collins. Stresses role that sociological conflict theory plays in undergirding conflict management practices.

**Prerequisite(s):** Graduate standing in sociology or conflict analysis and resolution, or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**SOCI 620 - Methods and Logic of Social Inquiry**

Credits: 3 (NR)
Emphasizes gathering, interpreting, and evaluating scientific evidence. Covers logic of scientific inquiry, including the application of various research designs and data collection methods. Develops critical-thinking skills by using set of rules and logical criteria for evaluation of social science research. Focuses both on how results are obtained and disseminated via research reports.

**Prerequisite(s):** Undergraduate statistics and research methodology, or permission of instructor.

**Notes:** Restricted to SOCI majors only.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**SOCI 623 - Racial and Ethnic Relations: American and Selected Global Perspectives**

Credits: 3 (NR)
Covers demographic purview of U.S. and other global racial and ethnic groups and racial and ethnic groups as human-social-minority and dominant groups. Explores factors contributing to dominant and minority status and means of altering dominant groups assessment of minority group status.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall, Spring

---

**SOCI 631 - Survey Research**

Credits: 3 (NR)
Introduces theory, method, and practice of survey research design and analysis. Students complete survey research project.

**Prerequisite(s):** SOCI 530 and 531, or permission of instructor.
SOCI 632 - Evaluation Research for Social Programs

Credits: 3 (NR)
Studies methodological issues related to evaluation of social programs. Explores conceptual and research design issues in relation to social programs, particularly delivery of social services. Includes examination of methods used to assess need for programs, impact of delivery systems, and efficiency and effectiveness of social programs.

Prerequisite(s): SOCI 530 and 531, or permission of instructor.

SOCI 633 - Special Topics in Sociology

Credits: 3 (RT)
Specialized inquiry of topics of contemporary sociological research and scholarship. Content varies.

Notes: May be repeated for credit when topic varies for a maximum of 12 credits.

SOCI 634 - Qualitative Research Methods

Credits: 3 (NR)
Examines basic research methods involving observational techniques and procedures used in description and analysis of patterns, configurations, ethos, eidos, structures, functions, and styles typical of whole societies and cultures. Emphasizes case studies, unobtrusive methods, participant observation, longterm residence, choices of observer status role, recording data, uses of technical equipment, key informants, interviewing techniques, and ethical considerations in employing such methods and procedures.

Prerequisite(s): Graduate standing, or permission of instructor.

SOCI 635 - Environment and Society

Credits: 3 (NR)
Overview of human ecology and environmental sociology, emphasizing selected topics. Focuses on theory, since theory makes it
possible to generalize from understandings derived in an analysis of a particular problem and apply them to other problems.

Prerequisite(s): Graduate standing.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**SOCI 636 - Statistical Reasoning**

Credits: 3 (NR)
Intermediate treatment of quantitative analytic techniques used in sociology. Topics include sampling, inference, hypothesis testing, analysis of variance, and bivariate and multiple correlation and regression. Introduces logic of multivariate analysis. Focus on how results are obtained and disseminated via research reports.

Prerequisite(s): Undergraduate statistics and research methodology, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**SOCI 640 - Social Theory and Social Policy**

Credits: 3 (NR)
Major theories of social organization and social change as means of understanding social policy development. Concentration is on social policies in American society.

Prerequisite(s): Graduate standing, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**SOCI 651 - Health Care Systems**

Credits: 3 (NR)
Changing health care systems are rapidly affecting patient providers and health and quality of life of society. Offers analysis and theories of change in health care systems and impacts on society and various stakeholders. Examines for-profit and nonprofit organizations and their impacts, and offers comparative cross-cultural analysis of health care systems.

Prerequisite(s): Graduate standing, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**SOCI 660 - Historical and Comparative Sociology**
Seminar in theory and methods of historical and comparative sociology, primarily for students with background in sociological theory and methods. Examines basic approaches and research data of history and sociology, surveys development of field, and analyzes exemplary studies.

Prerequisite(s): Graduate standing, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**SOCI 686 - Sociology of Aging**

Credits: 3 (NR)
Analyzes sociological issues in aging, including class and cultural factors, problems of work, retirement, attachment and loss, and ageism. Examines different theories of aging.

Prerequisite(s): Graduate standing, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**SOCI 696 - Independent Study**

Credits: 1-3 (RD)
Theoretical and research literature chosen by student and instructor.

Prerequisite(s): Graduate standing, or permission of instructor.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0
Grading: Graduate Special

**SOCI 697 - Independent Study**

Credits: 1-3 (RD)
Theoretical and research literature chosen by student and instructor.

Prerequisite(s): Graduate standing, or permission of instructor.

Hours of Lecture or Seminar per week: 1-12
Hours of Lab or Studio per week: 0
Grading: Graduate Special

**SOCI 711 - Classical Sociological Theory**
Credits: 3 (NR)
In-depth examination of major issues in classical (pre-1930) sociological theory. Analyzes Durkheim, Marx, Weber, Mead, and others, and emphasizes social and intellectual context of their theories.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**SOCI 712 - Contemporary Sociological Theory**

Credits: 3 (NR)
Examines schools in contemporary sociological theory such as structural-functionalism, conflict, exchange, symbolic interactionism, ethnomethodology, humanist sociology, and critical theory. Analyzes contemporary theorists in relation to schools.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**SOCI 730 - Analytic Techniques of Social Research**

Credits: 3 (NR)
Introduces multiple regression and causal analysis to sociological researchers, with a focus on obtaining and disseminating results. Moves from linear regression to the general linear model with several variables, its extensions, assumptions, and regression diagnostics. Examines the use of dummy variable and the analysis of interaction effects. Considers systems of equations and nonlinear outcomes.

Prerequisite(s): Undergraduate statistics and research methodology, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**SOCI 797 - Sociology Colloquium**

Credits: 0 (RD)
Public forum for the presentation and discussion of contemporary sociological research.

Prerequisite(s): Admission to graduate program in sociology or permission of graduate director.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
Grading: Satisfactory/No credit only

**SOCI 799 - Thesis**
Credits: 1-6 (RD)
Master’s thesis research under direction of thesis committee.

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0
**Grading:** S/NC

**SOCI 801 - Proseminar in Public and Applied Sociology**

Credits: 3 (NR)
The first of a two-semester core sequence devoted to the philosophical, historical, theoretical, and methodological dimensions of public and applied sociology within the United States. Traces the evolution of the field during the 20th century, from its inception in the Chicago school and the studies of W.E.B. DuBois to more recent formulations, as these bear on the interplay between social scientific knowledge and public decisions and debates.

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0

**SOCI 803 - Institutions and Inequality**

Credits: 3 (NR)
Analyzes the interrelations between social inequalities and institutional structures, including markets, the press, prisons, mental institutions, cultural organizations, and corporations.

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0

**SOCI 804 - Sociology of Globalization**

Credits: 3 (NR)
Addresses the social, political, cultural, and economic process of globalization. Explores the limits on globalization during the precapitalist era, the relation between empire and the internal structure of imperialist societies, theoretical debates over the contemporary world system, the relation between cities and globalization, and the link between globalization and social inequality within both developed and developing societies.

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0

**SOCI 833 - Special Topics in Sociology**

Credits: 3 (RD)
Specialized inquiry of topics of contemporary sociological research and scholarship. Content varies.

**Prerequisite(s):** Have completed either 6 credits of coursework at the 600 level or permission of instructor.
Notes: May be repeated when topic is different for a maximum of 9 credits.

**SOCI 840 - Work Organizations and Social Inequality**

Credits: 3 (NR)
Examines the social, organizational, and cultural processes that account for the differential distribution of job rewards along class, gender, and racial and ethnic lines. Topics include the historical evolution of the management worker relationship, job segregation by race and gender, the effect of new technologies on social inequality, the relation between gender and professional careers, the efficacy of governmental efforts to ensure equal opportunity, and the effect of organizational change on racial and gender inequalities at work.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**SOCI 844 - Youth, Schooling, and Popular Culture**

Credits: 3 (NR)
Uses sociological perspectives to understand the various ways in which popular youth culture, schooling processes, and consumer culture intersect in contemporary American cultural life. Examines the social, economic, and political realities of youth as a group and the formation of distinct youth cultures within and outside formal school settings, including schooling and commodity culture, how markets promote and hinder particular educational ideologies, and how corner markets operate as spaces of cultural learning.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**SOCI 845 - Society and Education**

Credits: 3 (NR)
Exposes students to the major theories, debates, and findings within the sociology of education, emphasizing the reciprocal influences of schooling and social inequalities within contemporary societies. Emphasis on the historical evolution of public schooling in the United States, the complex relation between schooling and economic institutions, class differences in educational opportunity, and the politics of educational reform.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**SOCI 850 - Sociology of Development**
Credits: 3 (NR)
Analyzes socioeconomic and political change, focusing on the poor countries of Asia, Africa, and Latin America. Offers a basic
descriptive understanding of processes of change in these countries and an introduction to major theoretical perspectives on
development and globalization, from classical theories of comparative advantage to theories of imperialism, modernization,
dependency, and globalization.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

SOCI 851 - Globalization and Social Movements

Credits: 3 (NR)
Analyzes current issues in the study of social movements, with an emphasis on the ways in which globalization shapes and in
turn is shaped by social movements. Emphasis is placed on the relations among the strategies, identities, and organizations bound up with transnational social movements and the relation between the dynamics of global political and economic developments and protest movements in core and peripheral societies.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

SOCI 853 - Cities in a Global Society

Credits: 3 (NR)
Examines the scholarly literature on cities and globalization with a focus on the impact of globalization on urban environments and the effects of urbanization on the processes of globalization. Emphasis on the ways in which globalization restructures urban life in the core and periphery of the world economy with attention paid to the effects of spatial dispersion on the character of economic institutions within the advanced societies, the shifting nature of crime and security, immigration, and the cities of the Global South.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

SOCI 857 - Sociology of Human Rights

Credits: 3 (NR)
Examines the connections among inequality, conflict, social justice, and human rights in an age of globalization. Drawing from case studies from around the world, course examines institutional and structural violence and inequality as they relate to state, corporate, and military power; international law and order; welfare and social policy; global justice; regionalism, multilateralism, and transnationalism; environmental protection; gender inequality; ethnic conflict; resource wars; and national security policy before and after September 11, 2001.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

SOCI 860 - Historical and Comparative Sociology
Seminar in theory and methods of historical and comparative sociology, primarily for students with background in sociological theory and methods. Examines basic approaches and research data of history and sociology, surveys development of field, and analyzes exemplary studies.

Prerequisite(s): Graduate standing, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

SOCI 870 - Directed Readings Sociology

Credits: 3 (RD)
Intensive reading course to develop comprehensive understanding of specific field in sociology as agreed on with advisor.

Prerequisite(s): 6 credits of 600-level SOCI courses.

Notes: Content varies. May be repeated.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

SOCI 880 - Independent Study in Sociology

Credits: 3 (RD)
Reading and research on selected topic, resulting in a written project as agreed on with supervising faculty.

Prerequisite(s): 6 credits of 600-level SOCI courses

Notes: Content varies. May be repeated.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

SOCI 998 - Doctoral Dissertation Proposal

Credits: 1-9 (RD)
Work on research proposal for doctoral dissertation.

Prerequisite(s): Completion of all but final year of coursework and permission of graduate director.

Corequisite(s): Advanced grad students may enroll in 998 during final year of coursework and before completion of
comprehensive exams.

Notes: May be repeated. A maximum of 9 credits of 998 may be applied to the degree. Students may enroll in 998 in their final year of coursework while preparing for comprehensive exams.

Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0  
Grading: S/NC

**SOCI 999 - Doctoral Dissertation**

Credits: 1-12 (RD)  
Doctoral dissertation research and writing on approved dissertation topic under direction of committee.

Prerequisite(s): Successful completion of SOCI 998.

Notes: Maximum of 12 credits may be applied toward degree.

Hours of Lecture or Seminar per week: 0  
Hours of Lab or Studio per week: 0  
Grading: S/NC

**Sociology and Anthropology (SOAN)**

Offered by the College of Humanities and Social Sciences

**SOAN 500 - Communicating across the Disciplines**

Credits: 3 (NR)  
Provides an introduction to the range of disciplinary perspectives and their combinations necessary for analyzing and acting on critical research policy needs in the global arena. Using case examples from recent and contemporary events, students will analyze data, assess alternative policy and program approaches, and evaluate the relative contributions of different disciplines and fields, including the way those disciplines and fields vary across different national traditions and between the national and international levels.

Prerequisite(s): Admission to MAIS concentration in global interaction.

Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0

**SOAN 510 - Culture and Globalization**

Credits: 3 (NR)  
Provides continuing exposure to the range of disciplinary perspectives necessary for understanding crucial issues in the global arena. Through case examples, focuses on the intersections of culture and globalization. Analyzes existing data and assesses
alternative policy and program approaches, and illuminates interactions between globalization and culture.

**Prerequisite(s):** SOAN 500

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**SOAN 670 - Special Topics in Sociology and Anthropology**

Credits: 4-8 (NR)  
Provides cross-disciplinary, pedagogical format in Department of Sociology and Anthropology. Covers variety of pedagogical formats, such as combining ethnographic field techniques taught in anthropology with sociological-based urban issues, or providing archaeological laboratory analyses with grounding in statistical techniques proposed by department faculty.

**Prerequisite(s):** Graduate standing, or permission of instructor.

**Hours of Lecture or Seminar per week:** 0-8  
**Hours of Lab or Studio per week:** 0-8

---

**Software Engineering (SWE)**

Offered by the Volgenau School of Engineering.

Students may attempt an undergraduate course taught by the Volgenau School of Engineering twice. A third attempt requires approval of the department offering the course.

---

**SWE 205 - Software Usability Analysis and Design**

Credits: 3 (NR)  
Principles of user interface design. Concepts for objectively and quantitatively assessing the usability of software user interfaces. Outcomes include knowledge of quantitative engineering principles for designing usable software interfaces and an understanding that usability is more important than efficiency for almost all modern software projects, and often the primary factor that leads to product success. Major topics include cognitive models for human perceptions and needs, which are used as a basis for analytical and critical thinking about user interfaces; specific engineering principles for designing usable menus, forms, command languages, web sites, graphical user interfaces and web-based user interfaces. Assessments will include written analytical evaluations of existing user interfaces, exams, and HTML-based design projects.

**Prerequisite(s):** ENGL 101/ENGH 101

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**SWE 301 - Internship Preparation**
Credits: 0 (NR)
Preparation for Internship Educational Experience. Intended for, but not limited to, students planning internships in the Applied Computer Science Software Engineering Program. Internship employment opportunities. Basic interview skills. Techniques for applying academic knowledge to practical software development. Techniques for extracting knowledge from practical experience. Peer presentation from students who have completed internships.

Prerequisite(s): Limited to ACS or CS majors with junior standing or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
Grading: Satisfactory/No credit only

SWE 321 - Software Requirements and Design Modeling

Credits: 3 (NR)
An introduction to concepts, methods, and tools for the creation of large-scale software systems. Methods, tools, notations, and validation techniques to analyze, specify, prototype, and maintain software requirements. Introduction to object-oriented requirements modeling, including use of case modeling, static modeling, and dynamic modeling using the Unified Modeling Language (UML) notation. Concepts and methods for the design of large-scale software systems. Fundamental design concepts and design notations are introduced. A study of object-oriented analysis and design modeling using the UML notation. Students participate in a group project on software requirements, specification, and object-oriented software design.

Equivalent to CS 321 (2011-2012 Catalog); SWE 421 (2010-2011 Catalog)

Prerequisite(s): Grade of C or better in CS 211. Students who have received credit for SWE 421 or CS 421 may not take SWE 321. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

SWE 332 - Object-Oriented Software Design and Implementation

Credits: 3 (NR)
In-depth study of software design and implementation using a modern, object-oriented language with support for graphical user interfaces and complex data structures. Topics covered are specifications, design patterns, and abstraction techniques, including typing, access control, inheritance, and polymorphism. Students will learn the proper engineering use of techniques such as information hiding, classes, objects, inheritance, exception handling, event-based systems, and concurrency.

Equivalent to CS 332

Prerequisite(s): Grade of C or better in CS 211 Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

SWE 401 - Internship Reflection
SWE 432 - Design and Implementation of Software for the Web

Credits: 3 (NR)
Teaches how to develop software for web applications. Covers client-server computing, theories of usable graphical user interfaces, and models for web-based information retrieval and processing. Goals are to understand how to design usable software interfaces and implement them on web, learn how to build software that accepts information from users across web and returns data to user, and understand how to interact with database engines to store and retrieve information. Specific topics are HTML, CGI programming, Java, Java applets, Javascripts, and Java servlets.

Prerequisite(s): Grade of C or better in MATH 125 and CS 211. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

SWE 437 - Software Testing and Maintenance

Credits: 3 (NR)
Concepts and techniques for testing and modifying software in evolving environments. Topics include software testing at the unit, module, subsystem, and system levels; developer testing; automatic and manual techniques for generating test data; testing concurrent and distributed software; designing and implementing software to increase maintainability and reuse; evaluating software for change; and validating software changes.

Prerequisite(s): Grade of C or better in CS 211 and MATH 125

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

SWE 443 - Software Architectures

Credits: 3 (NR)
Teaches how to design, understand, and evaluate software systems at an architectural level of abstraction. By end of course, students will be able to recognize major architectural styles in existing software systems, describe a system's architecture accurately, generate architectural alternatives to address a problem and choose from among them, design a medium-size software system that satisfies a specification of requirements, use existing tools to expedite software design, and evaluate the suitability of a given architecture in meeting a set of system requirements.
Prerequisite(s): Grade of C or better in CS 321 or CS 421 or SWE 321 or SWE 421. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

SWE 510 - Object-Oriented Programming in Java

Credits: 3 (NR)
Introduces students to programming in the Java language. Topics include problem-solving methods and algorithm development, program structures, abstract data types, simple data and file structures and program development in a modular, object-oriented manner. Introductory use of OO language features, including data hiding, inheritance, polymorphism, and exception handling. Goals include design and development of Java classes and class type hierarchies. An introduction to Java servlets and applets is included. Emphasis on program development is reinforced through several programming projects.

Prerequisite(s): Undergraduate courses or equivalent knowledge in programming in a high-level language.

Notes: Credit cannot be applied to a graduate degree in the Volgenau School or the BS degree in computer science.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

SWE 521 - Software Engineering Essentials

Credits: 3 (NR)
Provides an overview of essential topics in software engineering, including problem solving with computers, requirements, software design, software development, testing, verification, validation, usability, and management. The course will also discuss concepts related to building software, including data structures, object-oriented programming, event handling in GUIs, and web application technologies. The course will discuss how these concepts are handled in various languages, but without requiring the students to program. Credit cannot be applied to any degree in the computer science department.

Equivalent to AIT 521

Prerequisite(s): Graduate standing.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring

SWE 619 - Object-Oriented Software Specification and Construction

Credits: 3 (NR)
In-depth study of software construction using modern, object-oriented language with support for graphical user interfaces and complex data structures. Specifications, design patterns, and abstraction techniques, including procedural, data, iteration, type, and polymorphic. Information hiding, classes, objects, and inheritance. Exception handling, event-based systems, and concurrency.
SWE 620 - Software Requirements Analysis and Specification

Credits: 3 (NR)
In-depth study of object-oriented requirements modeling, including use case modeling, static modeling and dynamic modeling with Unified Modeling Language (UML) notation. Students participate in a group project on software requirements and specification using modern methods.

Prerequisite(s): SWE foundation courses or equivalent

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

SWE 621 - Software Modeling and Architectural Design

Credits: 3 (NR)
Concepts and methods for the architectural design of large-scale software systems are presented. Fundamental design concepts and design notations are introduced. Concepts of requirements analysis and specification are taught. Several design methods are presented and compared. In-depth study of object-oriented analysis and design modeling using the Unified Modeling Language (UML) notation. Students participate in a group project on software requirements, analysis, and design modeling.

Prerequisite(s): SWE 619 or permission of instructor. MSCS students may substitute CS 540 and CS 571 for SWE 619.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

SWE 622 - Distributed Software Engineering

Credits: 3 (NR)
Hands-on introduction to techniques and programming interfaces for distributed software engineering. Networking protocols at several layers. Construction of distributed and concurrent software using network protocol services. Applications of Internet and web-based software.

Prerequisite(s): SWE foundation courses or equivalent.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

SWE 623 - Formal Methods and Models in Software Engineering
Formal mechanisms for specifying, validating, and verifying software systems. Program verification through Hoare's method and Dijkstra's weakest preconditions. Formal specification via algebraic specifications and abstract model specifications, including initial specification and refinement toward implementation. Integration of formal methods with existing programming languages, and the application of formal methods to requirements analysis, testing, safety analysis, and object-oriented approaches. Formal methods using the Object Constraint Language (OCL).

**Prerequisite(s):** SWE 619, or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**SWE 625 - Software Project Management**

Credits: 3 (NR)  
Lifecycle and process models; process metrics; planning for a software project; mechanisms for monitoring and controlling schedule, budget, quality, and productivity; and leadership, motivation, and team building.

**Prerequisite(s):** SWE foundation courses or equivalent.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**SWE 626 - Software Project Laboratory**

Credits: 3 (NR)  
Covers requirements analysis, design, implementation, and management of software development project. Students work in teams to develop or modify software product, applying sound principles of software engineering. Uses both industrial and academic standards to assess quality of work products.

**Prerequisite(s):** SWE 619, 620, and 621; or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 6

---

**SWE 630 - Software Engineering Economics**

Credits: 3 (NR)  
Covers quantitative models of software lifecycle, cost-effectiveness analysis in software engineering, multiple-goal decision analysis, uncertainty and risk analysis, software cost estimation, software engineering metrics, and quantitative lifecycle management techniques.

**Prerequisite(s):** SWE 625

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0
SWE 631 - Software Design Patterns

Credits: 3 (NR)

Equivalent to CS 631

Prerequisite(s): SWE 621.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

SWE 632 - User Interface Design and Development

Credits: 3 (NR)
Principles of user interface design, development, and programming. Includes user psychology and cognitive science, menu system design, command language design, icon and window design, graphical user interfaces, web-based user interfaces.

Prerequisite(s): SWE 619, or CS 540 and 571, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

SWE 637 - Software Testing

Credits: 3 (NR)
Students learn to test software effectively. Programmers learn practical ways to design high quality tests during all phases of software development. Students learn the theory behind criteria-based test design and to apply that theory in practice. Topics include test design, test automation, test coverage criteria, and how to test software in cutting-edge software development environments.

Prerequisite(s): SWE 619, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

SWE 641 - Systems Architecture for Large-Scale Systems

Credits: 3 (NR)
See SYST 621.

Equivalent to SYST 621
SWE 642 - Software Engineering for the World Wide Web

Credits: 3 (NR)
Detailed study of engineering methods and technologies for building highly interactive web sites for e-commerce and other web-based applications. Presents engineering principles for building web sites that exhibit high reliability, usability, security, availability, scalability, and maintainability. Teaches methods such as client-server programming, component-based software development, middleware, and reusable components.

Prerequisite(s): SWE 619, or CS 540 and 571, or permission of instructor.

SWE 645 - Component-Based Software Development

Credits: 3 (NR)
Introduces concepts and foundations of software component and component-based software. Detailed study of engineering principles of modeling, designing, implementing, testing, and deploying component-based software. Also explores state-of-the-art component technologies.

Prerequisite(s): SWE 619, or CS 540 and CS 571, or permission of instructor.

SWE 681 - Secure Software Design and Programming

Credits: 3 (NR)
Theory and practice of software security, focusing in particular on some common software security risks, including buffer overflows, race conditions and random number generation, and on identification of potential threats and vulnerabilities early in design cycle. Emphasizes methodologies and tools for identifying and eliminating security vulnerabilities, techniques to prove absence of vulnerabilities, ways to avoid security holes in new software, and essential guidelines for building secure software: how to design software with security in mind from the ground up and integrate analysis and risk management throughout the software life cycle.

Equivalent to SWE 781 (2012-2013 Catalog), ISA 681.

Prerequisite(s): SWE 619.
SWE 699 - Special Topics in Software Engineering

Credits: 3 (RT)
Special topics not occurring in regular SWE sequence.

Prerequisite(s): Permission of instructor.

Notes: May be repeated for credit when semester topic is different.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

SWE 720 - Advanced Software Requirements

Credits: 3 (NR)
State-of-the-art and state-of-the-practice in software requirements engineering. In-depth coverage of selected methods, tools, notations, or validation techniques for the analysis and specification of software requirements. Includes project investigating or applying approaches to requirements engineering.

Prerequisite(s): SWE 620 and 621.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

SWE 721 - Reusable Software Architectures

Credits: 3 (NR)
Investigates software concepts that promote reuse of software architectures. Studies influence of object technology on software design and reuse. Investigates domain modeling methods, which model the application domain as a software product family from which target systems can be configured. Covers reusable software patterns including architecture patterns and design patterns, software components, and object-oriented frameworks.

Prerequisite(s): SWE 621

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

SWE 722 - Service Oriented Architecture

Credits: 3 (NR)
This course covers the state-of-the-art approaches to building dependable Service-Oriented Architecture (SOA) software systems. A variety of relevant topics are covered, including SOA design principles, implementation platforms and standards, quality of service contracts, runtime management of service providers, and coordination and composition of services. The course includes a final project to exercise the concepts covered in class.

Prerequisite(s): SWE 622 or instructor’s permission.
SWE 723 - Precise Modeling

Credits: 3 (NR)
Discusses ongoing advances in modeling techniques for software design, including precision, performance, security and safety aspects, and UML, its meta-models, and proposed enhancements such as Object Security Constraint Language, Object Temporal Constraint Language, QoS Profiles and the theory behind them.

Prerequisite(s): SWE 621

SWE 727 - Quality of Service for Software Architectures

Credits: 3 (NR)
Builds on acquired skills for modeling architectures, and focuses on the relationship between architectural patterns and qualities of service (QoS). By the end of the course, students will be able to elicit the QoS preferences of stakeholder; recognize major architectural styles and the QoS tradeoffs that each presents; design for and reconcile competing QoS requirements; and evaluate a given architecture with respect to a set of QoS requirements.

Prerequisite(s): SWE 621 or permission of instructor.

SWE 760 - Software Analysis and Design of Real-Time Systems

Credits: 3 (NR)
Background for students who want to conduct research in software engineering of real-time systems. Provides understanding of key real-time software system analysis, design concepts and methods, and how they are used in developing large-scale, real-time software systems. Also explores potential impact of emerging technologies. Includes term project in design and analysis of complex, real-time software system.

Equivalent to SWE 860 (2012-2013 Catalog).

Prerequisite(s): SWE 621.
SWE 763 - Software Engineering Experimentation

Credits: 3 (NR)
Detailed study of scientific process, particularly using experimental method. Examines how empirical studies are carried out in software engineering. Reviews distinction between analytical techniques and empirical techniques. Other topics include experimentation required in software engineering, problems that can be solved using experimentation, methods used to control variables and eliminate bias in experimentation, and analysis and presentation of empirical data for decision making.

Prerequisite(s): SWE 621, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

SWE 795 - Advanced Topics in Software Engineering

Credits: 3 (RD)
Advanced topics not occurring in existing courses. Topics normally assume knowledge in one or more existing MS SWE courses.

Prerequisite(s): 12 credits applicable toward MS program.

Notes: Repeatable within degree for credit when subject differs.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

SWE 796 - Directed Readings in Software Engineering

Credits: 3 (NR)
Analysis and investigation of contemporary problem in software engineering. Requires prior approval by faculty member who supervises student's work. Written report also required.

Prerequisite(s): Permission of Department Chair.

Notes: Maximum 6 credits may be earned. To register, students must complete independent study form available in department office. It must be initialed by faculty sponsor and approved by department chair.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

SWE 798 - Research Project

Credits: 3 (RD)
Master's degree candidates undertake a project using knowledge gained in MS program. Topics chosen in consultation with a faculty sponsor. Research project is chosen under guidance of full-time graduate faculty member, resulting in written technical report.
Prerequisite(s): 18 credits applicable toward MS.

Notes: Prior approval required by faculty sponsor who supervises student's work. To register, students must complete an independent study form available in department office. It must be initialed by the faculty sponsor and approved by the department chair.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

SWE 799 - Thesis

Credits: 1-6 (NR)

Research project completed under supervision of faculty member, which results in technical report accepted by three-member faculty committee. Report must be defended in oral presentation.

Prerequisite(s): Permission of Advisor and Department Chair.

Notes: To register, students must complete independent study form available in department office. It must be initialed by faculty sponsor and approved by department chair.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
Grading: Satisfactory/No Credit

SWE 821 - Software Engineering Seminar

Credits: 3 (RD)

Study of application of software engineering principles, design methods, and support tools through real-life problems extracted from faculty and industry projects.

Prerequisite(s): SWE 621

Notes: May be repeated with change in topic.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

SWE 823 - Software for Critical Systems

Credits: 3 (NR)

Study of software for systems in which failure can be catastrophic. Presents techniques to construct and analyze software for critical applications and examination of inherent limitations of such techniques, and interaction between techniques used during development and behavior of software during operation. Topics include tolerance of software faults, design redundancy, data
redundancy, software safety, formal methods, statistical testing, design for analyzability, and design for testability.

Prerequisite(s): SWE 620 and STAT 554.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

SWE 824 - Program Analysis for Software Testing

Credits: 3 (NR)
Different methods for analyzing software, primarily for purpose of testing. Analysis techniques, specific algorithms, tools, and applications. Goals are to explore current research issues, learn how to build software analysis tools, and understand how these techniques can be applied to software development activities. Focuses on applications for testing software, including automatic test data generation, object oriented testing, and testing client-server applications. Also considers analysis techniques for other software-related activities such as maintenance, reuse, object-oriented development metrics and optimization.

Prerequisite(s): A compiler class (e.g., CS 540) or testing class (e.g., SWE 637) or permission of the instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

SWE 825 - Special Topics in Web-Based Software

Credits: 3 (RD)
Advanced topics in specifying, designing, modeling, developing, deploying, testing and maintaining software written as web applications and web services. May be repeated with change in topic.

Prerequisite(s): SWE 642 Software Engineering for the World Wide Web.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

Spanish (SPAN)

Offered by the College of Humanities and Social Sciences

See also FRLN course listings.

SPAN 101 - Elementary Spanish I

Credits: 3 (NR)
For students with no knowledge of Spanish. Introduction to Spanish, including elements of grammar, vocabulary, oral skills,
listening comprehension, and reading. Lab work required.

Notes: Students may not receive credit for SPAN 101 and SPAN 105, 109, or 110.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 1

**SPAN 102 - Elementary Spanish II**

Credits: 3 (NR)
Continuation of SPAN 101.

Prerequisite(s): SPAN 101, appropriate placement score, or permission of department.

Notes: Students may not receive credit for SPAN 102 and SPAN 105, 109, or 110.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 1

**SPAN 109 - Intensive Elementary Spanish**

Credits: 6 (NR)
Recommended for students who desire an intensive introduction to Spanish.

Prerequisite(s): Equivalent to SPAN 101 and 102 taught in a single semester.

Notes: Students may not receive credit for SPAN 109 and SPAN 101, 102, 105, or 110.

Hours of Lecture or Seminar per week: 6
Hours of Lab or Studio per week: 0

**SPAN 110 - Elementary Spanish**

Credits: 6 (NR)
Introduces elements of grammar, vocabulary, oral skills, listening comprehension, and reading.

Notes: Students may not receive credit for SPAN 110 and SPAN 101, 102, 105, 109 or 115.

Hours of Lecture or Seminar per week: 6
Hours of Lab or Studio per week: 1

**SPAN 115 - Review of Elementary Spanish**
Credits: 3 (NR)
Reviews elements for students who have studied Spanish previously.

**Prerequisite(s):** Appropriate placement score or permission of the department.

**Notes:** Students may not receive credit for SPAN 115 and also SPAN 101, 102, 105, 109 or 110.

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 1

---

**SPAN 201 - Intermediate Spanish I**

Credits: 3 (NR)
Further development of skills in listening, speaking, reading, and writing. SPAN 201 and 202 must be taken in sequence. Lab work required.

**Prerequisite(s):** SPAN 102, 109, 110, appropriate placement score, or permission of department.

**Notes:** Students may not receive credit for SPAN 201 and SPAN 209 or 210.

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 1

---

**SPAN 202 - Intermediate Spanish II**

Credits: 3 (NR)
Application of skills to reading, composition, and discussion. Lab work required.

**Prerequisite(s):** SPAN 201, appropriate placement score, or permission of department.

**Notes:** Students may not receive credit for SPAN 202 and SPAN 209 or 210.

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 1

---

**SPAN 209 - Intensive Intermediate Spanish**

Credits: 6 (NR)
Equivalent to SPAN 201 and 202 taught in a single semester.

**Prerequisite(s):** SPAN 102, 105, 109, appropriate placement score, or permission of department.

**Notes:** Lab work required. Students may not receive credit for SPAN 209 and SPAN 201, 202, or 210.

**Hours of Lecture or Seminar per week:** 6
**Hours of Lab or Studio per week:** 2
SPAN 210 - Intermediate Spanish

Credits: 3 (NR)

Continuation of the development of basic components of the language, with focus on listening, speaking, reading, and writing skills. Introduces students to the cultures and histories of Spanish-speaking regions.

Prerequisite(s): SPAN 102, 110, 115 appropriate placement score, or permission of department.

Notes: Lab work required. Students may not receive credit for SPAN 210 and SPAN 201, 202, or 209.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 1

SPAN 250 - Gateway to Advanced Spanish

Credits: 3 (NR)

Integration of advanced intermediate-level Spanish reading, writing, listening, and speaking skills, as well as the development of critical thinking about authentic texts from around the globe.

Prerequisite(s): SPAN 210, appropriate placement score, or permission of department.

Notes: Taught in Spanish.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

SPAN 301 - Grammar and Syntax

Credits: 3 (NR)

In-depth review of Spanish grammar and syntax. Extensive practice in controlled and free writing with emphasis on fundamental difficulties and points of interference that exist between English and Spanish.

Prerequisite(s): SPAN 202, 209, appropriate placement score, or permission of instructor.

Notes: Taught in Spanish.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

SPAN 305 - Spanish in Context I
Credits: 3 (NR)
Integrated content-based approach to the study of Spanish, designed to promote oral and written abilities, as well as critical understanding of Latin American, Latino, and/or Spanish histories and cultures. Includes vocabulary-building activities, grammar review and practice, assigned readings in a variety of genres, critical cultural analysis, in-class discussions, written essays, and the viewing of films.

Prerequisite(s): SPAN 250 or equivalent, or permission of instructor.

Notes: Taught in Spanish. Students cannot receive credit for SPAN 305 if they receive credit for SPAN 309 or 315.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

SPAN 306 - Spanish in Context II

Credits: 3 (NR)
Continuation of SPAN 305.

Prerequisite(s): SPAN 305 or equivalent, or permission of instructor.

Notes: Taught in Spanish. Students cannot receive credit for SPAN 306 if they received credit for SPAN 309 or 315.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

SPAN 309 - Intensive Spanish in Context

Credits: 6 (NR)
Intensive content-based approach to the study of Spanish, designed to promote oral and written abilities, as well as critical understanding of Latin American, Latino, and/or Spanish histories and cultures. Includes vocabulary-building activities, grammar review and practice, assigned readings in a variety of genres, critical cultural analysis, in-class discussions, written essays, and the viewing of films.

Prerequisite(s): SPAN 250 or equivalent, or permission of instructor.

Notes: Taught in Spanish. Students cannot receive credit for both SPAN 309 and SPAN 305, 306, or 315.

Hours of Lecture or Seminar per week: 6
Hours of Lab or Studio per week: 0

SPAN 315 - Spanish for Heritage Speakers

Credits: 3 (NR)
Designed for students who have some communicative ability in Spanish, normally acquired in the home, who want to improve their reading and writing abilities while developing a critical understanding of Latin American, Latino, and/or Spanish histories and cultures. Course components include orthography and vocabulary activities, grammar review and practice, assigned readings in a variety of genres, critical cultural analysis, in-class discussions, written essays, and the viewing of films.
Prerequisite(s): Appropriate placement score or permission of instructor.

Notes: Students cannot receive credit for both SPAN 315 and SPAN 305, 306, or 309.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

SPAN 321 - Introduction to Spanish Culture

Credits: 3 (NR)
History, culture, economic and social development, and scientific and artistic achievements that have contributed to the formation of modern Spain.

Equivalent to SPAN 461

Prerequisite(s): ENGH 101 or equivalent, or permission of instructor.

Notes: Taught in English. Designed for students who are not pursuing a concentration in Spanish. Students may not receive credit for both SPAN 321 and 461.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

SPAN 322 - Introduction to Latin American Culture

Credits: 3 (NR)
History, culture, economic and social development, and scientific and artistic achievements that have contributed to the formation of modern Latin America.

Fulfills general education requirement in global understanding.

Equivalent to SPAN 466

Prerequisite(s): ENGL 101/ENGH 101 or equivalent, or permission of instructor.

Notes: Taught in English. Designed for students who are not pursuing a concentration in Spanish. Students may not receive credit for both SPAN 322 and 466.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

SPAN 323 - Field Study in Hispanic Culture

Credits: 1-3 (NR)
History, culture, economic and social development, and scientific and artistic achievements that have contributed to the formation of modern Spain.
Prerequisite(s): 60 credits or permission of instructor.

Hours of Lecture or Seminar per week: 6
Hours of Lab or Studio per week: 0

SPAN 324 - Study Abroad in Spanish

Credits: 3 (NR)
Study at an academic institution in a Spanish-speaking country including classroom studies with professors from the host country and field experiences.

Prerequisite(s): SPAN 250 (or equivalent) or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

SPAN 325 - Major Hispanic Writers

Credits: 3 (RT)
Study of the works of major Hispanic writers in translation. Writers studied vary.

Fulfills general education requirement in literature.

Prerequisite(s): ENGH 101 or equivalent.

Notes: Taught in English. Designed for students who are not pursuing a concentration in Spanish. May be repeated once for credit when topic is different with permission of department.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

SPAN 326 - Treasures of Spanish American Literature

Credits: 3 (RD)
Introduction to the major themes, trends, and cultural context of Latin American literature. Writers studied vary.

Prerequisite(s): Advanced oral and written proficiency in Spanish, to be determined by the instructor.

Notes: Taught in Spanish. Designed for students who are not pursuing a concentration in Spanish. May be repeated for a maximum of 6 credits when topic is different with permission of the department.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
SPAN 329 - Special Topics in Spanish and Latin American Literature

Credits: 3 (RT)
Study of selected topics in Spanish or Latin American literature. Writers and topics vary.

Prerequisite(s): ENGL 101/ENGH 101, or permission of instructor.

Notes: Taught in English. Designed for students who are not pursuing a concentration in Spanish. May be repeated for a maximum of 6 credits when topic is different.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

SPAN 335 - Topics for Proficiency: The Americas

Credits: 3 (RD)
Integrated content-based approach to conversational Spanish. Designed to promote increased confidence and fluency in both formal and informal Spanish registers, as well as critical understanding of Latin American and/or Latino histories and cultures. Current events, films, literary texts, and popular culture reflecting issues of Latin Americans and/or Latinos serve as catalysts for class discussions, oral presentations, and debates.

Prerequisite(s): SPAN 250 (or equivalent) or permission of instructor.

Notes: Taught in Spanish. May be repeated for a maximum of 6 credits when topic is different.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

SPAN 336 - Topics for Proficiency: Spain

Credits: 3 (RD)
Integrated content-based approach to conversational Spanish. Designed to promote increased confidence and fluency in both formal and informal Spanish registers, as well as critical understanding of Spanish history and culture. Current events, films, literary texts and popular culture reflecting Spanish issues serve as catalysts for class discussions, oral presentations and debates.

Prerequisite(s): SPAN 250 (or equivalent) or permission of instructor.

Notes: Taught in Spanish. May be repeated for a maximum of 6 credits when topic is different.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

SPAN 351 - Oral Spanish

Credits: 3 (NR)
Development of oral expression on topics of current interest and everyday situations, including written assignments.
Prerequisite(s): SPAN 250 or equivalent; appropriate placement score; or permission of instructor.

Notes: Taught in Spanish. Not open to native speakers of Spanish.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

SPAN 370 - Spanish Writing and Stylistics

Credits: 3 (NR)
Improves writing skills by covering formal and stylistic concepts of the Spanish language. Includes practice and exposure to different textual genres in an interdisciplinary fashion. Includes common doubts concerning spelling, expression, and style; business Spanish; journalistic Spanish; academic Spanish; and creative writing.

Fulfills writing intensive requirement in the major.

Equivalent to SPAN 452

Prerequisite(s): SPAN 306 or 309, or 315, or permission of instructor.

Notes: Taught in Spanish.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

SPAN 385 - Introduction to Spanish Linguistics

Credits: 3 (NR)
Introduces the study of Spanish linguistics, including phonetics, phonology, morphology, syntax, pragmatics, historical linguistics, and sociolinguistics. Combines discussion of theoretical issues with linguistic analysis of Spanish.

Prerequisite(s): SPAN 370 or permission of instructor.

Corequisite(s): SPAN 370 or permission of instructor.

Notes: Taught in Spanish.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

SPAN 388 - Introduction to Latina/o Studies

Credits: 3 (NR)
Interdisciplinary approach to the study of U.S. Latina/o cultural production, designed to promote critical thinking in understanding Latina/o histories, literatures, and cultures.
Fulfills general education requirement in synthesis.

**Prerequisite(s):** Completion or concurrent enrollment in all other required general education courses. SPAN 370 or permission of instructor.

**Corequisite(s):** SPAN 370 or permission of instructor.

**Notes:** Taught in Spanish.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**SPAN 390 - Introduction to Hispanic Literary Analysis**

Credits: 3 (NR)  
Required course that prepares students for the study of Hispanic literatures. Introduces basic terminology of literary analysis and provides practice in the examination of texts in the major genres: poetry, narrative, and drama.

**Prerequisite(s):** SPAN 370 or permission of instructor.

**Corequisite(s):** SPAN 370 or permission of instructor.

**Notes:** Taught in Spanish.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**SPAN 400 - Spanish for the Professions**

Credits: 3 (RD)  
Advanced study of the language needed for use in a specific profession, such as translation, business, social service, or health professions.

**Prerequisite(s):** SPAN 385 or permission of instructor.

**Notes:** Taught in Spanish.  
May be repeated for a maximum of 6 credits when profession differs with permission of department.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**SPAN 425 - Independent Study**

Credits: 1-3 (RT)  
Research and analysis of a selected problem in literature or linguistics in consultation with a department member.

**Prerequisite(s):** Spanish major with 90 credits, and permission of instructor.
**SPAN 426 - Independent Study**

Credits: 1-3 (RT)
Research and analysis of a selected problem in literature or linguistics in consultation with a department member.

**Prerequisite(s):** Spanish major with 90 credits, and permission of instructor.

**Notes:** Maximum of 6 credits of independent study may be applied to fulfillment of requirements for the major.

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0

**SPAN 430 - Spanish in the United States**

Credits: 3 (NR)
Covers both formal and sociolinguistic aspects of Spanish in the U.S. by discussing demographic aspects and a historical overview of the varieties of Spanish spoken in the United States. Gives a foundation in issues such as linguistic variation, language choice, the relationship among race, ethnicity, and language; official language policies; individual and societal bilingualism; and language diversity in education.

**Prerequisite(s):** SPAN 385, or advanced ability in Spanish or permission of instructor.

**Notes:** Taught in Spanish.

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0

**SPAN 452 - Advanced Written Spanish**

Credits: 3 (NR)

Development of skills required in writing Spanish. Guided and original compositions. Grammatical structures reviewed and supplemented with individual corrections.

Equivalent to SPAN 370

**Prerequisite(s):** 9 credits of SPAN at 300 level or above, or permission of instructor.

**Notes:** Taught in Spanish.
SPAN 455 - Spanish-English Translation

Credits: 3 (NR)
Introduction to the history, theory, analysis, and practice of Spanish-English and English-Spanish translation. Includes literal versus free translation; denotation and connotation; regional and social variation; intercultural pragmatic differences; interlanguage influence and calques; and genre and audience. Hands-on experience with literary works, newspaper articles, and advertisements, as well as legal, medical, and technical documents.

Prerequisite(s): SPAN 370 and ENGL 302/ENGH 302; or permission of instructor.

SPAN 461 - Spanish Civilization and Culture

Credits: 3 (NR)
Survey of Spanish culture and civilization from the pre-Roman era to the 20th century.

Equivalent to SPAN 321

Prerequisite(s): SPAN 370 or permission of instructor.

Notes: Taught in Spanish. Students may not receive credit for both SPAN 321 and 461.

SPAN 466 - Latin American Civilization and Culture

Credits: 3 (NR)
Introduction to the study of Latin American civilization and culture from the pre-Columbian era to the 20th century.

Equivalent to SPAN 322

Prerequisite(s): SPAN 370 or permission of instructor.

Notes: Taught in Spanish. Students may not receive credit for both SPAN 322 and 466.
SPAN 472 - Spanish Phonetics and Phonology

Credits: 3 (NR)
Introduction to the analysis of the Spanish sound system, both phonetics and phonology. Topics include the articulatory system, sound production, the classification of vowels and consonants, phonetic transcription, the mental representation of sounds, variation and accent, and processes of sound change, among others.

Prerequisite(s): SPAN 385 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

SPAN 474 - Spanish Syntax and Semantics

Credits: 3 (NR)
Investigates the knowledge Spanish speakers possess that enables them to understand and create expressions they have not heard before. Studies the system unconsciously used by Spanish speakers and writers to connect situations in the real world to the words and sentences that express each situation. Provides opportunities to analyze samples of language in actual use.

Prerequisite(s): SPAN 385 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

SPAN 476 - Teaching Spanish in the United States

Credits: 3 (NR)
Introduction to second language acquisition theory and research, and the application to teaching Spanish as a second language and a heritage language. Includes a discussion of sociocultural and political issues surrounding the teaching of Spanish in the United States. Covers learning objectives, critical pedagogy, course design, grammar instruction, task-based language teaching, computer-assisted language learning, materials evaluation, and assessment.

Prerequisite(s): SPAN 385 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

SPAN 480 - Special Topics in Spanish

Credits: 3 (RT)
Study of a selected theme in Hispanic literature, culture, or linguistics.

Prerequisite(s): SPAN 385, 388 or 390, depending on topic, or permission of instructor.

Notes: Taught in Spanish. May be repeated for credit when topic is different.
SPAN 481 - Special Topics in Spanish

Credits: 3 (RT)
Study of a selected theme in Hispanic literature, culture, or linguistics.

Prerequisite(s): SPAN 385, 388 or 390, depending on topic, or permission of instructor.

Notes: Taught in Spanish. May be repeated for credit when topic is different.

SPAN 482 - Mass Media and Popular Culture in the Spanish-Speaking World

Credits: 3 (RD)
Critical examination of the significance of mass media and/or popular culture for the development of Spanish-speaking nations in the 19th, 20th, and 21st centuries. Forms studied may include but are not limited to: Newspapers, popular novels, lithography, photography, radio, film, television, public art, sport, performance, digital media. Students will use readings in critical theory to explore ways in which forms of mass and popular culture connect to social imaginaries. Enhancement of advanced analytical skills in Spanish through different modules of lecture, reading, discussion, and writing.

Prerequisite(s): SPAN 305/306 or 309 or 315, SPAN 370, SPAN 385, SPAN 390.

SPAN 483 - The Literature of Spain I

Credits: 3 (NR)
Examines the main periods, trends, genres, and most representative works of the Spanish peninsular literature from its beginnings to the end of the Golden Age.

Prerequisite(s): SPAN 390 or permission of instructor.

Notes: Taught in Spanish.

SPAN 484 - The Literature of Spain II
Credits: 3 (NR)
Examines the main periods, trends, genres, and most representative works of Spanish peninsular literature from the 18th century to the contemporary period.

Prerequisite(s): SPAN 390, 483, or permission of instructor.

Notes: Taught in Spanish.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

SPAN 486 - Topics in Latin American Literature I: Pre-colonial to Mid-19th Century

Credits: 3 (NR)
An interdisciplinary examination and discussion of major topics in literary texts and cultural practices of Latin America from pre-colonial times to the mid-19th century.

Prerequisite(s): SPAN 390 or permission of instructor.

Notes: Taught in Spanish.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

SPAN 487 - Topics in Latin American Literature II: Late 19th Century to the Present

Credits: 3 (NR)
Interdisciplinary examination and discussion of major topics in literary texts and cultural practices of Latin America from the late 19th century to the present.

Prerequisite(s): SPAN 390 or permission of instructor.

Notes: Taught in Spanish.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

SPAN 488 - The Literature of Spanish America

Credits: 3 (NR)
Survey of the literature of Spanish America. Study of texts that are representative of the colonial, romantic, modernista, avant garde, and contemporary periods.

Prerequisite(s): SPAN 390 or permission of instructor.

Notes: Taught in Spanish.
SPAN 490 - Internship in Spanish

Credits: 1-6 (NR)
Qualified students work with area schools, social service programs, government agencies, interest groups, museums, or corporations. Specific arrangements must be made with, and approved by, a member of the Spanish faculty during the semester prior to enrollment.

Prerequisite(s): 9 credits in Spanish at the 300 level, or permission of instructor.

SPAN 497 - Senior Honors Tutorial

Credits: 3 (NR)
First semester involves weekly meetings with a faculty member to discuss readings from a comprehensive list prepared by the Spanish faculty. In the second semester, independent research and completion of an honors essay under the supervision of a member of the Spanish faculty are required.

Prerequisite(s): Spanish major with 90 credits, cumulative GPA of 3.00, and GPA of 3.00 in major field.

SPAN 498 - Senior Honors Tutorial

Credits: 3 (NR)
Students meeting these requirements are admitted to candidacy on submission of a letter of application to the department Honors Committee in the second half of the junior year. A faculty recommendation and an interview by the Honors Committee are also required. First semester involves weekly meetings with a faculty member to discuss readings from a comprehensive list prepared by the Spanish faculty. In the second semester, independent research and completion of an honors essay under the supervision of a member of the Spanish faculty are required.

Prerequisite(s): Spanish major with 90 credits, cumulative GPA of 3.00, and GPA of 3.00 in major field.

SPAN 500 - History of the Spanish Language
Scientific study of the evolution of the Spanish language from its origin in Vulgar Latin to its present forms.

**SPAN 501 - Applied Spanish Grammar**

Credits: 3 (NR)
Analysis of Spanish grammar as a basis for teaching language skills. Terminology and methodology for the teaching of syntax are stressed.

**SPAN 502 - Hispanic Sociolinguistics**

Credits: 3 (NR)
Introduction to sociolinguistics with emphasis on bilingualism and language contact in the Spanish-speaking world including the United States.

**SPAN 505 - Applied Spanish Stylistics**

Credits: 3 (NR)
Advanced study of the written language for students who want to develop their academic writing skills. Covers the most frequent challenges of writing through intensive practice in genres such as argumentation, narration, and description. Teaches students to identify and analyze best practices in academic writing.

**SPAN 510 - Introduction to the Graduate Study of Literature in Spanish**

Credits: 3 (NR)
Study of the nature of literary work and analysis of critical approaches to literature with an emphasis on texts written in Spanish. Course is a requirement for master's students of Spanish in their first year of study.

Prerequisite(s): Graduate standing in master's program in foreign languages, or permission of instructor.
SPAN 520 - Studies in Medieval Spanish Literature

Credits: 3 (NR)
Study of a major work or a literary genre of this period.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

SPAN 525 - Studies in Renaissance Literature

Credits: 3 (NR)
Study of a literary movement or selected authors of the Spanish Renaissance.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

SPAN 530 - Studies in the Literature of the Golden Age

Credits: 3 (NR)
Study of a literary genre or a major author of Spanish literature of the Golden Age.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

SPAN 540 - Studies in 20th-Century Literature

Credits: 3 (NR)
Study of a writer, genre, theme, or movement of this period.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

SPAN 545 - Studies in Hispanic Literature

Credits: 3 (NR)
Study of major writers in a particular generation or movement.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
SPAN 551 - Special Topics in Spanish

Credits: 3 (RT)
Special studies in Spanish or Latin American language, literature, or culture. Specific topics are announced in advance.

Notes: May be repeated for credit with permission of department.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

SPAN 560 - Studies in Spanish American Poetry

Credits: 3 (NR)
Study of major poets of a given period. Literary and social atmosphere of the period are emphasized.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

SPAN 565 - Studies in Spanish American Drama

Credits: 3 (NR)
Study of playwrights who have made a major contribution to the development of the genre.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

SPAN 576 - Advanced Translation

Credits: 3 (NR)
Advanced work in translation of selected texts from diverse fields. Comparative terminology, sight translation, and précis writing. Emphasis on the function and technique of documentation in translation. Translation from Spanish to English and from English to Spanish.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

SPAN 580 - Contemporary Hispanic Institutions

Credits: 3 (NR)
Study of 20th-century cultural, social, and political institutions in Spain and Spanish America with emphasis on language and terminology used to describe their functions, regulations, and conditions.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
SPAN 635 - Seminar in Don Quixote

Credits: 3 (NR)
Study of Don Quixote and major critical approaches to the work.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

SPAN 650 - Seminar in Twentieth-Century Drama

Credits: 3 (NR)
Study of major dramatists in the generation of 1898 and contemporary theater.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

SPAN 655 - Seminar in Twentieth-Century Prose

Credits: 3 (NR)
Study of major writer, theme, or movement in novel or essay.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

SPAN 670 - Seminar in Spanish American Prose

Credits: 3 (NR)
Study of a selected theme, movement, or author in the novel, short story, or essay.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

SPAN 675 - Seminar in Literature and Art

Credits: 3 (NR)
Comparative analysis of a literary theme or style in relation to other media (painting, architecture, film) for an integral understanding of the arts.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
SPAN 680 - Seminar in Literature and Society

Credits: 3 (NR)
Study of a literary topic, a genre, or selected authors in relation to a given economic, social, or political system in Spain or Latin America.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

SPAN 685 - Seminar in Literature and Ideas

Credits: 3 (NR)
Study of major ideological-philosophical themes and their artistic expression in literature.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

SPAN 798 - Directed Reading and Research

Credits: 3 (NR)
Open only to degree students who have completed at least 18 credits. Reading and research on a specific project under the direction of a department member. Oral or written report required.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
Grading: Graduate Special

SPAN 799 - Thesis

Credits: 1-6 (RD)
Students who take SPAN 798 and then elect thesis option receive 3 credits for SPAN 799 on completion of thesis. Students who do not take SPAN 798 receive 6 credits for SPAN 799 on completion of the thesis.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
Grading: S/NC

SPAN 800 - Studies for the Doctor of Philosophy in Education

Credits: 3-6 (RD)
Studies designed by student's discipline director and approved by student's doctoral committee that prepare student for research and writing in area of interest in discipline.

Prerequisite(s): Admission to PhD in education program to study in Spanish.
Notes: Enrollment may be repeated.

Hours of Lecture or Seminar per week: 3-6
Hours of Lab or Studio per week: 0
Grading: Graduate Special

Special Education (EDSE)

Offered by the College of Education and Human Development

EDSE 401 - Introduction to Special Education

Credits: 3 (NR)
Provides a survey of current knowledge on individuals with disabilities within the context of human growth and development across the life span. Content includes historical factors, legislation, etiology, characteristics, needs, educational strategies, assessment, and support services of and for individuals with disabilities ranging from mild and moderate to severe levels of varying disabilities. Includes the impact of disabilities on academic, social, and emotional performances. Field experience required.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDSE 402 - Classroom Management and Applied Behavior Analysis

Credits: 3 (NR)
Focuses on identifying, recording, evaluating, and changing social and academic behaviors of special and diverse populations. Explores theories of classroom management and various approaches to management, including use of technological advances. Emphasizes developing classroom and individual behavior management plans.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDSE 403 - Language Development and Reading

Credits: 3 (NR)
Identifies literacy skills for typical students, and describes reading, language, and writing instruction for students with mild disabilities who access the general curriculum. Topics include emergent literacy skills, phonemic awareness, vocabulary development, and comprehension.

Prerequisite(s): EDSE 401 and EDSE 440.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
EDSE 405 - Introduction to Early Childhood Special Education

Credits: 3 (NR)
Surveys current knowledge about young children with disabilities within the context of human growth and development and learning expectations in the preschool years. Includes factors and legislation affecting service delivery. Field experience required.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDSE 411 - Characteristics of Students with Visual Impairments

Credits: 1 (NR)
Provides an overview of the characteristics of and services to persons with visual impairments, including the impact of visual impairment on infants' and children's growth and development, child and adolescent emotional and social development, and family interaction patterns. Considers the educational, conceptual, psychosocial, and physical implications of a visual impairment.

Notes: Course delivered online.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0

EDSE 412 - Braille Code

Credits: 3 (NR)
Provides understanding of the literary code of Braille and its implications for educational/literacy programs for students with a visual disability. Practice experiences will enable students to better understand the Braille code and how to teach it to students with a visual disability.

Prerequisite(s): EDSE 411.

Corequisite(s): EDSE 411.

Notes: Delivered online.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDSE 414 - Orientation and Mobility

Credits: 2 (NR)
Provides the foundation for understanding the components and essence of orientation and mobility (O&M). Establishes how the need for independent travel in the blind population created the field of O&M. Explores the philosophy and history of orientation and mobility, including cane instruction, dog guides, and methods of travel. Addresses techniques in developing orientation skills
and basic mobility instruction. Motor and concept skill development are emphasized.

**Prerequisite(s):** EDSE 411.

**Corequisite(s):** EDSE 411.

**Notes:** Delivered online.

**Hours of Lecture or Seminar per week:** 2
**Hours of Lab or Studio per week:** 0

---

**EDSE 415 - Early Intervention for Infants and Toddlers with Disabilities: Collaborative and Consultative Approaches**

Credits: 3 (NR)
Explores current public policy initiatives for coordinating services for infants and toddlers. Covers models of services delivery and approaches to family-centered service.

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0

---

**EDSE 418 - Curriculum and Assessment of Students with Visual Impairments**

Credits: 3 (NR)
Provides students with knowledge and understanding of the educational assessment of students with visual impairments and additional disabilities including deaf-blindness. Students practice assessing and planning educational programs for students with visual impairments. Addresses assessment of technology for students with visual impairments. Examines determination of learning needs and appropriate learning media, relationship of assessment, IEP development, and placement. Delivered online.

**Prerequisite(s):** EDSE 411.

**Notes:** Delivered online.

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0

---

**EDSE 422 - Augmentative Communication**

Credits: 2 (NR)
Focuses on alternative language, literacy, and communication techniques for children with severe language and speech impairments.

**Hours of Lecture or Seminar per week:** 2
**Hours of Lab or Studio per week:** 0
EDSE 428 - Elementary Reading, Curriculum, and Strategies for Students Who Access the General Education Curriculum

Credits: 3 (NR)
Applies research on instructional approaches in elementary curriculum for individuals with disabilities accessing general education curriculums. Includes curriculum and instructional strategies in reading, language arts, mathematics, science, social studies, and social skills; cognitive strategies in study skills, attention and memory, and peer-mediated instruction.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDSE 429 - Secondary Curriculum and Strategies for Mild Disabilities

Credits: 3 (NR)
Applies research on teacher effectiveness, teacher accountability, instructional approaches, and technological advances at the secondary level for individuals with emotional disturbance, learning disabilities, and mental retardation. Includes curriculum and instructional strategies in reading, language arts, math, science, social studies, and social skills; cognitive strategies in self-regulation, study skills, attention, memory, and motivation; peer-mediated instruction including cooperative learning and peer tutoring; and self-advocacy and strategies for facilitating transition to community, workplace, and post-secondary environments.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDSE 431 - Transition and Community-Based Instruction

Credits: 3 (NR)
Addresses issues in transition for youth with severe disabilities. Covers self-determination, development and implementation of a transition plan, post-secondary opportunities including education and community-based instruction, and vocational environments.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDSE 432 - Positive Behavior Supports

Credits: 3 (NR)
Focuses on employing concepts and skills to design, implement, and evaluate behavior support programs derived from functional assessment; using effective teaching strategies; addressing relevant replacement skills; facilitating generalization and maintenance of skills and incorporating individually designed crisis intervention procedures.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
EDSE 434 - Communication and Severe Disabilities

Credits: 3 (NR)
Introduces professionals to augmentative and alternative communication (AAC) for individuals with severe speech and language impairments. Addresses knowledge and skills needed to assess the potential AAC user, make team decisions, develop and implement instruction, and evaluate the effects of instruction aimed at motivating, building, and expanding communication, choice-making, and social interaction.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDSE 440 - Characteristics of Students with Disabilities Who Access the General Curriculum

Credits: 3 (NR)
Examines the characteristics of students with mild disabilities. Emphasis on etiology, contributing factors, conditions that affect learning, the challenges of identifying students with disabilities, and the need for academic, social, and emotional accommodations and support.

Notes: School-based field experience required.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Summer, Spring

EDSE 442 - Characteristics of Students with Mental Retardation

Credits: 3 (NR)
Covers theories and specific conditions in mental retardation, and provides advanced study of persons with mental retardation, ranging in age from preschool to adult. Topics include historical development of the field of mental retardation; theoretical models of mental retardation; etiological factors; characteristics; models of assessment and intervention, including technological advances; and issues and trends, including legislation and litigation. Includes the study of the impact of mental retardation on academic and social and emotional performances. Field experience required.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDSE 447 - Medical and Developmental Risk Factors for Children with Disabilities

Credits: 3 (NR)
Examines nature and causes of disabling or special health conditions. Examines screening and evaluation techniques, characteristics, and educational implications.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
EDSE 456 - Language Development and Communication for Diverse Infants and Toddlers

Credits: 3 (NR)
Provides understanding of early language development in terms of each of the five major components of language. Speech, language, and communication are discussed, particularly in terms of their interrelatedness with cognitive and sociocultural development. Explores importance of adult-child interaction, and impact of bilingualism, cultural diversity, cognitive ability, and language disorder.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDSE 457 - Foundations of Language and Literacy for Diverse Learners

Credits: 3 (NR)
Addresses first and second language acquisition and its application in the various contexts in which children develop. Explores the impact of disability and second language acquisition, and the inter-relationship of speaking, listening, and writing. Includes review of characteristics and etiology of children with language disabilities. Also addresses the diversity of communication styles in families, communities, and cultures. Field experience required.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDSE 458 - Medical Aspects of Physical and Sensory Disabilities in Young Children

Credits: 3 (NR)
Focuses on physical, sensory, medical, and health aspects of child development, including etiology and symptomatology of developmental disabilities affecting physical development. Emphasizes positioning, handling, adaptive strategies, and understanding of assistive technology devices. Focuses on the understanding of roles of related disciplines in collaborative planning and service delivery. Field experience required.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDSE 459 - Curriculum and Methods: Early Childhood Special Education

Credits: 3 (NR)
Emphasizes planning, organizing, implementing, and evaluating programs for young children with special needs.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDSE 460 - Introduction to Applied Behavior Analysis
Students will master basic principles, procedures, and ethical concepts pertaining to applying behavior analysis in schools or in other educational or therapeutic settings developed to satisfy part of the educational requirements needed for sitting for the Board Certified Assistant Behavior Analyst examination.

**EDSE 461 - Analysis and Intervention in Applied Behavior Analysis**

Credits: 3 (NR)
Teaches students basic data collection, presentation, and analysis as it pertains to applied behavior analysis; as well as procedures for determining intervention efficacy and selecting, developing, or modifying interventions based on data, in educational and other settings to satisfy part of the educational requirement to sit for the Board Certified Assistant Behavior Analyst (BCABA) examination.

**Prerequisite(s):** EDSE 460, or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Spring

**EDSE 462 - Applying Behavior Analysis in School and Community Settings**

Credits: 3 (NR)
Teaches a variety of procedural topics in applied behavior analysis pertaining to developing effective instruction and interventions for a variety of content areas, skills, and adaptive and problem behaviors. Additionally, provides instruction on gaining collaboration of those around the student in assuring the student's success, and ethical concerns in meaningfully applying behavior analysis. Course is developed to satisfy part of the educational requirement to sit for the Board Certified Assistant Behavior Analyst (BCABA) examination.

**Corequisite(s):** EDSE 460 or permission of instructor

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall

**EDSE 464 - Ethical and Professional Conduct in Applied Behavior Analysis**

Credits: 3 (NR)
Provides a basis in Virginia Behavior Analyst Licensure law, the Behavior Analyst Certification Board's Guidelines for Responsible Conduct and Disciplinary Standards, Virginia Assistant Behavior Analyst Licensure Regulations, and professional conduct consistent with the practice of applied behavior analysis. Incorporates overseeing instructional or program implementation, working with behavior change systems, managing interventions, and behavior change considerations.

**Prerequisite(s):** EDSE 460.
**Corequisite(s):** EDSE 460.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall, Summer, Spring

---

**EDSE 490 - Internship in Applied Behavior Analysis**

Credits: 3-9 (RD)  
Provides hands-on experience implementing, evaluating, and participating in development and revision of behavior analytically based instruction and related procedures with children who are diagnosed with intellectual disabilities or behavioral difficulties, under supervision of a Board Certified Behavior Analyst. Individual and group, and on-site and off-site supervision modalities are used. Additional professional development instruction is provided. Satisfies part of the experiential requirements needed for sitting for the Board Certified Assistant Behavior Analyst examination.

**Prerequisite(s):** Admission to or prior completion of the undergraduate Applied Behavior Analysis minor, completion of an undergraduate course of study that has been approved by the Behavior Analyst Certification Board, or consent of the instructor.

**Corequisite(s):** EDSE 460, EDSE 461, EDSE 462, or permission of instructor.

**Hours of Lecture or Seminar per week:** 2-4  
**Hours of Lab or Studio per week:** 0  
**Grading:** Satisfactory/No Credit only  
**When Offered:** Fall, Spring, Summer

---

**EDSE 501 - Introduction to Special Education**

Credits: 3 (NR)  
Survey of current knowledge on individuals with disabilities within the context of human growth and development across the life span. Includes historical factors, legislation, etiology, characteristics, needs, educational strategies, assessment, and support services for individuals with disabilities ranging from mild and moderate to severe. Includes the impact of disabilities on academic, social, and emotional performances. Field experience required.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**EDSE 502 - Classroom Management and Applied Behavior Analysis**

Credits: 3 (NR)  
Explores how to identify, record, evaluate, and change social and academic behaviors of special and diverse populations. Explores theories of classroom management and various approaches to management including use of technological advances. Emphasizes developing classroom and individual behavior-management plans.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0
EDSE 503 - Language Development and Reading

Credits: 3 (NR)
In-depth coverage of reading instruction for students with special needs. Topics include language development and emergent literacy skills; reading subskills including auditory discrimination and phonemic awareness, decoding and word reading; reading comprehension; and use of technological advances in the teaching of reading.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDSE 504 - Elementary Curriculum and Content for Special Educators

Credits: 2 (NR)
Reviews elementary curriculum content and instructional approaches for the instruction of individuals with disabilities in language arts/reading, mathematics, science, and social studies. Addresses core knowledge for Elementary Praxis II.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 0

EDSE 505 - Introduction to Early Childhood Special Education

Credits: 3 (NR)
Surveys current knowledge about young children with disabilities within the context of human growth and development and learning expectations in the preschool years. Includes historical factors and legislation affecting service delivery.

Notes: Field experience required

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDSE 511 - Characteristics of Students with Visual Impairments

Credits: 1 (NR)
Provides an overview of the characteristics of and services to persons with visual impairments, including the impact of visual impairment on infants' and children's growth and development, child and adolescent emotional and social development, and family interaction patterns. Considers the educational, conceptual, psychosocial, and physical implications of a visual impairment.

Notes: Course delivered online.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0
**EDSE 512 - Braille Code**

Credits: 3 (NR)
Provides understanding of the literary code of Braille and its implications for educational/literacy programs for students with a visual disability. Practice experiences enable students to better understand the Braille code and how to teach it to students with a visual disability.

**Prerequisite(s):** EDSE 511 (may be taken concurrently).

**Notes:** Delivered online.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**EDSE 513 - Medical and Educational Implications of Visual Impairments**

Credits: 3 (NR)
Provides an introduction to anatomy and physiology of the visual system and the educational implications of visual pathology. Topics include anatomy of the human eye, normal visual development, pathology of the eye, examination procedures for the identification of visual pathology, and the effects of pathology on visual learning and development.

**Prerequisite(s):** EDSE 511 (may be taken concurrently).

**Notes:** Delivered online.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**EDSE 514 - Orientation and Mobility for Students with Visual Impairments**

Credits: 2 (NR)
Provides the foundation for understanding the components and essence of orientation and mobility (O&M). Establishes how the need for independent travel in the blind population created the field of O&M. Explores the philosophy and history of orientation and mobility, including cane instruction, dog guides, and methods of travel. Addresses techniques in developing orientation skills and basic mobility instruction. Motor and concept skill development are emphasized.

**Prerequisite(s):** EDSE 511 (may be taken concurrently).

**Notes:** Delivered online.

**Hours of Lecture or Seminar per week:** 2  
**Hours of Lab or Studio per week:** 0

**EDSE 517 - Computer Applications for Special Populations**
Lecture and laboratory course for teachers of special populations in applications of computer technology for instructional programs and computer skills. Students learn to use computer technology designed for special populations.

Prerequisite(s): Graduate standing, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDSE 518 - Curriculum and Assessment of Students with Visual Impairments

Credits: 3 (NR)
Provides students with knowledge and understanding of the educational assessment of students with visual impairments and additional disabilities including deaf-blindness. Students practice assessing and planning educational programs for students with visual impairments. Addresses assessment of technology for students with visual impairments. Examines determination of learning needs and appropriate learning media, relationship of assessment, IEP development, and placement.

Prerequisite(s): EDSE 511 (may be taken concurrently).

Notes: Delivered online.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDSE 527 - Adapted Sports, Recreation, and Leisure

Credits: 1 (NR)
Introduces tools for adapting sports, recreation, and leisure activities to promote the benefits of active participation, relaxation, health, and well-being for individuals with differing abilities. Students participate in simulations, research, and design. Knowledge and awareness components may be delivered via distance education.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0

EDSE 530 - Policy Perspectives Affecting Diverse Young Learners and Their Families

Credits: 3 (NR)
Provides understanding of historical and current trends and issues involving legislation and policy in early childhood education, bilingual education, early childhood special education, and multicultural education. Focuses on historical role of social advocacy, development of advocacy skills, and collaboration and consultation with other professionals and staff in the field of early childhood education.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
EDSE 531 - Transition and Community-Based Instruction

Credits: 3 (NR)
Addresses issues in transition for youth with severe disabilities. Covers self-determination, development, and implementation of a transition plan, post-secondary opportunities including education and community-based instruction, and vocational environments.

Notes: Course is equivalent to EDSE 544 for students in the severe disabilities program.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDSE 532 - Positive Behavior Supports

Credits: 3 (NR)
Designed for professionals working with individuals with severe disabilities. Focuses on concepts and skills needed to design, implement, and evaluate behavior support programs derived from functional assessment. Covers effective teaching strategies; addresses relevant replacement skills; facilitates generalization and maintenance of skills; and incorporates individually designed crisis intervention procedures.

Notes: Course is equivalent to EDSE 620 for students in the severe disabilities program.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDSE 533 - Curriculum and Assessment in Severe Disabilities

Credits: 3 (NR)
Addresses best practices in curriculum and assessment for individuals with severe disabilities. Covers the design of assessment and evaluation techniques and procedures for the severe-needs population, including adaptations and accommodations. Covers IEP formulation and implementation with linkage to assessment. Course is equivalent to EDSE 649 for students in the severe disabilities program.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDSE 534 - Communication and Severe Disabilities

Credits: 3 (NR)
Introduces professionals to augmentative and alternative communication (AAC) for individuals with severe speech and language impairments. Addresses the knowledge and skills needed to assess the potential AAC user, make team decisions, develop and implement instruction, and evaluate the effects of instruction, aimed at motivating, building, and expanding communication, choice-making, and social interaction.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
EDSE 540 - Characteristics of Students with Disabilities who Access the General Curriculum

Credits: 3 (NR)
Examines the characteristics of students with mild disabilities. Emphasis on etiology, contributing factors, conditions that affect learning, the challenges of identifying students with disabilities, and the need for academic, social, and emotional accommodations and support.

Notes: School-based field experience required.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDSE 542 - Characteristics of Students with Mental Retardation

Credits: 3 (NR)
Covers theories and specific conditions in mental retardation, and provides advanced study of persons with mental retardation, ranging from preschool to adult. Topics include historical development of the field of mental retardation; theoretical models; etiological factors; characteristics; models of assessment and intervention, including technological advances; and issues and trends, including legislation and litigation. Includes the study of impact of mental retardation on academic and social and emotional performances. Requires field experience.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDSE 544 - Adapted Instructional Methods and Transition for Secondary Learners

Credits: 3 (NR)
Provides strategies for teaching functional academics and social/life skills, facilitating the transition to postsecondary environments. Focuses on all aspects of transition and alternative assessments for secondary learners with disabilities.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDSE 547 - Medical and Developmental Risk Factors for Children with Disabilities

Credits: 3 (NR)
Examines nature and causes of disabling or special health conditions. Covers screening and evaluation techniques, characteristics, and educational implications.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDSE 553 - Teaching Mathematics to Students with Special Needs
Credits: 3 (NR)
Covers techniques for assessing and remediating difficulties in mathematics.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

### EDSE 555 - Language Development and Emerging Literacy

Credits: 3 (NR)  

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

### EDSE 556 - Developing Language, Literacy, and Communication in Young Children

Credits: 3 (NR)  
Examines strategies to develop language, literacy, and communication in young children with varying abilities. Explores the importance of adult-child interaction and the effect of bilingualism, cultural diversity, cognitive ability, and language disorders.

Equivalent to ECED 522  
**Notes:** Field Experience required

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

### EDSE 557 - Foundations of Language and Literacy for Diverse Learners

Credits: 3 (NR)  
Examines complexity of language acquisition and literacy development. Focuses on typical and atypical language development, connections between language and literacy, and diversity of communication styles in families, and cultures. Emphasizes first and second language acquisition.

**Notes:** Field Experience required

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0
EDSE 558 - Medical Aspects of Physical and Sensory Disabilities in Young Children

Credits: 3 (NR)

Equivalent to ECED 506.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDSE 560 - Secondary Mathematics for Special Education Teachers

Credits: 3 (NR)
Provides the necessary depth and breadth of mathematics content knowledge required for prospective secondary special education mathematics teachers. Specific content includes: Algebra and Number Theory; Geometry, Measurement and Trigonometry; Functions and Calculus; Probability, Data Analysis and Statistics; Matrix Algebra and Discrete Mathematics. Students design mathematics instruction for students with mild disabilities utilizing current evidence-based practices.

Hours of Lecture or Seminar per week: 2.5
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring, Summer

EDSE 561 - Secondary Science for Special Education Teachers

Credits: 3 (NR)
Provides the necessary depth and breadth of science content knowledge required for prospective secondary special education science teachers. Prepares students for the Praxis Content Knowledge tests in five fields: Biology, Chemistry, Earth and Space Science, General Science and Physics. Design science content area instruction for students with mild disabilities utilizing current evidence-based practices.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 1
When Offered: Fall, Spring, Summer

EDSE 590 - Special Education Research

Credits: 3 (NR)
Describes fundamental concepts and practices in educational research in special education. Covers specific applications of educational research methods to problems in special education. Emphasizes review and critique of special education research, and applied classroom research for teachers.
EDSE 597 - Special Topics in Education

Credits: 1-6 (RD)
Provides advanced study on selected topic or emerging issue in Special Education.

Prerequisite(s): Admission to program in Graduate School of Education.

Corequisite(s): May be repeated for credit with GSE permission.

Notes: May be repeated for credit with GSE permission.

EDSE 612 - Special Needs Students in International Schools

Credits: 3 (NR)
Focuses on students with special learning needs at international schools in the regular classroom environment. Enhances understanding of current issues within the field of special education in the international schools in an increasingly global community.

Prerequisite(s): Admission to FAST TRAIN program and EDSE 501

EDSE 613 - Teaching Methods for Students with Visual Impairments

Credits: 3 (NR)
Emphasizes methods of teaching compensatory skills, the core curriculum, and technology for use by students who are blind and visually impaired. Addresses curriculum development, adaptations, and teaching methodology for individuals with visual impairments. Provides information on adaptations within various educational programs and adaptation of general education classroom materials and procedures for use with blind and low vision children and youth.

Prerequisite(s): EDSE 511 (may be taken concurrently).

Notes: Delivered online.
EDSE 615 - Early Intervention for Infants and Toddlers with Disabilities: Collaborative and Consultative Approaches

Credits: 3 (NR)
Covers methods of service delivery for infants and toddlers with disabilities and their families. Explores key aspects of consultation, interdisciplinary collaboration, service coordination, and family-centered services. Focuses on culturally responsive practices.

Prerequisite(s): Admission to the Early Childhood Special Education program or permission of the instructor

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDSE 616 - Braille Reading and Writing

Credits: 3 (NR)
Provides basic instruction on transcription of advanced Braille codes, including music, foreign language, chemistry, computer Braille, and Nemeth code (Braille math code). Introduces techniques for teaching skills in each code. Explores technology tools used to create Braille and tactile materials in addition to other assistive technologies used for instruction in math and science.

Prerequisite(s): EDSE 512; EDSE 511 (may be taken concurrently).

Notes: Delivered online.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDSE 619 - Applied Behavior Analysis: Principles, Procedures, and Philosophy

Credits: 3 (NR)
Focuses on basic principles and procedures of applied behavior analysis; identification of factors that contribute to behavioral problems and improved performance; and procedures that can be used to minimize behavioral problems, improve performance, teach new behaviors, and increase probability of behaviors occurring under appropriate circumstances.

Prerequisite(s): Admission to applied behavior analysis graduate certificate program.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDSE 620 - Managing Severely Challenging Behaviors and Applied Behavior Analysis

Credits: 3 (NR)
Focuses on applying behavior analysis principles and social learning theory to increase learning by students with special needs. Emphasizes single subject research designs.

Prerequisite(s): Graduate standing and permission of advisor.
EDSE 621 - Applied Behavior Analysis: Empirical Bases

Credits: 3 (NR)
Focuses on basic content of applied behavior analysis. Teaches how to implement behavioral procedures and develop behavioral programs for clients with fundamental behavioral needs.

Prerequisite(s): EDSE 619

Corequisite(s): EDSE 619

EDSE 623 - Applied Behavior Analysis: Assessments and Interventions

Credits: 3 (NR)
Further expands on basic content of applied behavior analysis and teaches how to implement behavioral procedures and develop behavioral programs for clients with fundamental behavioral needs.

Prerequisite(s): EDSE 619.

EDSE 624 - Applied Behavior Analysis: Applications

Credits: 3 (NR)
Expands capability to deal with more complex behavioral situations, enabling ability to relate to more sophisticated professional issues and environments.

Prerequisite(s): EDSE 621 and 623

EDSE 625 - Applied Behavior Analysis: Verbal Behavior

Credits: 3 (NR)
Further expands capability to deal with more complex behavioral situations, and enables students to relate to more sophisticated professional issues and environments.
EDSE 626 - The Inclusive Classroom

Credits: 3 (NR)
Introduces participants to instructional procedures for facilitating inclusive instruction for students with disabilities in general education settings. Topics include research-based strategies for adapting curriculum materials, designing instructional procedures, and evaluating students with disabilities.

Prerequisite(s): None

EDSE 627 - Assessment

Credits: 3 (NR)

Offers knowledge and experiential learning activities related to assessment of students with mild disabilities. Includes statistical and psychometric concepts in assessment. Addresses norm-referenced, criterion-referenced, curriculum-based, and informal assessment for instructional and placement decisions.

EDSE 628 - Elementary Reading, Curriculum, and Strategies for Students who Access the General Education Curriculum

Credits: 3 (NR)
Applies research on instructional approaches, in elementary curriculum for individuals with disabilities accessing general education curriculums. Includes curriculum/instructional strategies in reading, language arts, mathematics, science, social studies, cognitive strategies, study skills, attention/memory, and peer-mediated instruction.

EDSE 629 - Secondary Curriculum and Strategies for Students with Disabilities who Access the General Curriculum
Applies research on teacher effectiveness, accountability, and instructional approaches at the secondary level for individuals with mild disabilities. Includes instructional methods necessary for teaching reading, writing, math, and other content areas across the curriculum.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDSE 633 - Policy Perspectives Affecting Diverse Young Learners

Provides understanding of historical and current trends and issues involving legislation and policy in early childhood education, bilingual education, early childhood special education, and multicultural education. Focuses on historical role of social advocacy, development of advocacy skills, and collaboration and consultation with other professionals and staff. Addresses continuum of services and the context of service delivery. Requires field experience.

Prerequisite(s): Admission to the Graduate School of Education.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDSE 634 - Characteristics of Students with Autism

Describes varying characteristics of students labeled with a type of autism who receive special education services. Examines definitions, eligibility criteria, incidence rates, and etiology. Perspectives from students, families, educational, community, and career personnel are described.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDSE 635 - Interventions for Students with Autism

Research-based interventions that promote progress in the areas of communication, social, academic, behavior, and sensory motor skills for students with autism are described. Methods for monitoring the impact of interventions are identified and a variety of service delivery models are described.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDSE 648 - Introduction to Psycho-Educational Assessment
Introduces basic statistical procedures and test characteristics. Appropriate terminology and practices related to formal and informal assessment applied throughout the course. Students practice administering, scoring, and interpreting tests, including the impact of multicultural diversity on assessment.

**Prerequisite(s):** EDSE 540.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

### EDSE 655 - Curriculum Methods: Elementary ED/LD

Credits: 3 (NR)  
Applies research on teaching effectiveness, teaching accountability, and instructional approaches with specific attention to reading, language arts, social skills, and cooperative learning. May require field experience in public schools.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

### EDSE 656 - Assessment of Diverse Young Learners

Credits: 3 (NR)  
Examines types of assessment, including family-centered assessment, used for planning and implementing effective programs for children from diverse cultures and with varied learning needs. Addresses selection, administration, and interpretation of formal and informal assessments.

Equivalent to ECED 521.

**Prerequisite(s):** Admission to the Early Childhood Special Education program or permission of the instructor

**Notes:** Field Experience required

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

### EDSE 659 - Curriculum and Methods: Early Childhood Special Education

Credits: 3 (NR)  

**Prerequisite(s):** Admission to the Early Childhood Special Education program or permission of instructor.
EDSE 661 - Curriculum and Methods: Severe Disabilities

Credits: 3 (NR)
Focuses on current best practices in curriculum, and methods for students with severe disabilities, including specific strategies for teaching students with severe disabilities, general strategies for working with heterogeneous groups of students in inclusive settings, and methods for adapting the general education curriculum to include students with severe disabilities.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDSE 662 - Consultation and Collaboration

Credits: 3 (NR)
Provides professionals in special education, regular education, and related fields with knowledge and communications skills necessary for collaborative consultation and technical assistance to other educators and service providers.

Prerequisite(s): Teaching licensure, or enrollment in graduate degree program in education.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDSE 664 - Ethical and Professional Conduct for Behavior Analysis

Credits: 3 (NR)
Provides a basis in Virginia Behavior Analyst Licensure law, the Behavior Analyst Certification Board's Guidelines for Responsible Conduct and Disciplinary Standards, and professional conduct consistent with the practice of applied behavior analysis.

Prerequisite(s): EDSE 619 (May be taken concurrently) or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Summer, Spring

EDSE 665 - Families of Children with Special Needs

Credits: 3 (NR)
Focuses on strategies for developing culturally appropriate family-professional partnerships to benefit children with special needs. Explores theories and research that support a family-centered approach. Includes family and professional rights and
responsibilities in the special education process.

Equivalent to ECED 524

Prerequisite(s): Admission to the Early Childhood Special Education program or permission of the instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDSE 667 - Cognitive Development of Diverse Young Children

Credits: 3 (NR)
Explores conflicting views about how young children think and learn. Addresses cognitive theoretical approaches of leading researchers, and emphasizes their relevance to educational practice. Addresses characteristics of children with cognitive disabilities, children from multilingual and multicultural backgrounds, and those living in poverty, along with the educational implications of those characteristics. Requires field experience.

Prerequisite(s): Admission to the Graduate School of Education.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDSE 669 - Interdisciplinary Approach for Children with Sensory and Motor Disabilities

Credits: 3 (NR)
Emphasizes positioning, handling, and adaptive strategies. Focuses on understanding the roles of related disciplines in collaborative planning and service delivery.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDSE 701 - Legal Issues and Special Populations

Credits: 3 (NR)
Offers a study of the impact of legislation and litigation on the education of special populations emphasizing IDEA and Section 504. Topics of study include emerging trends in special education based on interpretation of landmark court cases related to disability, legal updates on policies and procedures for exceptional learners, and discussion of the guiding principles of special education law when addressing the needs of special populations.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDSE 702 - Managing Resources for Special Education Programs
EDSE 703 - Creating a Collaborative Culture

Credits: 3 (NR)
Examines development and delivery of specialized programs for exceptional learners. Topics include implementation of Individualized Education Plans via Universal Design, financial and human resource allocation and management, effective supervision and evaluation, and student outcome documentation.

Prerequisite(s): None

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDSE 743 - Leadership in Special Education Administration

Credits: 3 (NR)
Examines leadership issues and applies them to the administration of special education programs. Explores current challenges in the delivery of services for exceptional children through case studies and projects.

Prerequisite(s): None

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDSE 744 - Current Issues in Special Education

Credits: 3 (NR)
Helps students develop an understanding of the role of convergent research evidence in addressing current issues in special education practice and policy. Familiarizes students with current issues in special education and the group experimental, single subject, and qualitative research designs used to address these current issues. Students evaluate research studies in terms of their methodological strengths and weaknesses and their part in providing convergent bodies of evidence that can be used for defining practice and policy.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDSE 745 - Writing Grants
Identification of funding sources, description of grant components, and development of grant budgets. Independent writing of an entire small grant and a significant portion of a large grant. Participation in grant peer-review process.

Prerequisite(s): EDRS 810; or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

**EDSE 782 - Comprehensive Topics in Special Education: Trends and Issues**

Credits: 3 (NR)
Focuses on current trends and issues in special education and disabilities. Students under the direction of instructor complete individually designed projects addressing major trends and issues in their emphasis area of special education.

Prerequisite(s): Majority of course work.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**EDSE 790 - Internship in Special Education**

Credits: 1-6 (RT)
Supervised internships that apply university course work to instruction of children and their families in school and community settings.

Prerequisite(s): Passing scores on Praxis I prior to final internship, and permission of advisor.

Notes: Students enroll in two separate internships appropriate to the area of study for a total of 6 credits. Applications for field internships are due on February 15 for fall; September 15 for spring; and March 1 for summer.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
Grading: Satisfactory/No Credit

**EDSE 791 - Midpoint Portfolio**

Credits: 1 (NR)
Opportunity for students to develop their portfolio. Serves as the vehicle to assess whether they are meeting the standards of their professional organization, the Council for Exceptional Children.

Notes: Must be taken after completion of fourth EDSE prefix course or concurrently with fourth or fifth EDSE prefix course in program.

Hours of Lecture or Seminar per week: 1
EDSE 792 - Final Portfolio

Credits: 1 (RD)
Opportunity for students to develop their portfolio. Serves as the vehicle to assess whether they are meeting the standards of their professional organization, the Council for Exceptional Children.

Corequisite(s): Must be taken concurrently with last EDSE 790 internship or the last EDSE course in the program.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0
Grading: Satisfactory/No Credit (S, NC, IP)

EDSE 793 - Internship in Early Childhood Special Education

Credits: 1-6 (RT)
Supervised internships that apply university coursework to instruction of children and their families in school and community settings. Students enroll in both infant/toddler (3 credits) and pre-school (3 credits) internships.

Prerequisite(s): Admission to the Early Childhood Special Education Certificate or permission of instructor; passing Praxis I and VCLA scores.

Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 1-12
Grading: Satisfactory/No Credit
When Offered: Fall, Spring

EDSE 794 - Special Topics

Credits: 1-6 (RD)
Advanced study of selected topics in education for students preparing for doctoral studies or who have been admitted to the PhD program in education.

Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 0

EDSE 797 - Advanced Topics in Education

Credits: 1-6 (RD)
Advanced study of selected topics in education for students preparing for doctoral studies or who have been admitted to the PhD program in education.
EDSE 841 - Intervention Research in Special Education

Credits: 3 (NR)
Provides advanced graduate students with opportunities for in-depth study, analysis, and discussion of original intervention research in special education. Emphasizes analyzing research methodology, coding original intervention research, analyzing results, synthesizing findings, formulating future research questions relevant to individuals with disabilities, and gaining an understanding of the submission process for conferences and publications.

Prerequisite(s): Admission to PhD in education program, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDSE 842 - Application of Research Methodology in Special Education

Credits: 3 (NR)
Provides knowledge and skills in the application of research methodology in special education. Topics include methods for conducting survey research, experimental and quasi-experimental research, research involving correlation and regression, and qualitative research. Emphasizes application to specific issues in special education research.

Prerequisite(s): Admission to PhD in education program, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDSE 843 - Leadership in Special Education Administration

Credits: 3 (NR)
Examines leadership issues and applies them to the administration of special education programs. Explores current challenges in the delivery of services for exceptional children through case studies and projects.

Prerequisite(s): Admission to PhD in education program, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDSE 844 - Current Issues in Special Education
Develops understanding of the role of convergent research evidence in addressing current issues in special education practice and policy. Describes current issues in special education and the group experimental, single subject, and qualitative research designs used to address these current issues. Students evaluate research studies in terms of methodological strengths and weaknesses, and their part in providing convergent bodies of evidence that can be used for defining practice and policy.

**Prerequisite(s):** Admission to PhD in education program, or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**EDSE 845 - Personnel Preparation Programs in Special Education**

Credits: 3 (NR)  
Provides an in-depth study, analysis, and discussion of personnel preparation programs in special education including: scope and sequence of teacher preparation programs as they align with state and national teacher licensure standards, bodies of accreditation, syllabi development, delivery models, and frameworks for curriculum design; teacher evaluation; and how policies, research, and issues of accountability can transform teacher preparation programs.

**Prerequisite(s):** Admission to PhD program or approval by permission.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall, Summer, Spring

**EDSE 846 - Assessment, Evaluation, and Instrumentation in Special Education Research**

Credits: 3 (NR)  
Provides in-depth study, analysis and discussion of the past, present and future directions of assessment, evaluation, and instrumentation research in special education. Emphasizes reliability and validity of the research instruments, evaluating research methodology, analyzing results, synthesizing findings with respect to present assessment and evaluation policies; formulating future research questions relevant to assessment and evaluation of individuals with disabilities.

**Prerequisite(s):** Admission to PhD program or approval by permission.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall, Summer, Spring

**EDSE 847 - Problem Solving in Contemporary Initiatives in Special Education**

Credits: 3 (NR)  
Addresses contemporary initiatives in special education: those introductory and leading actions intended to implement positive change, that can be promoted by federal agencies, professional or advocacy organizations. Focuses on understanding of contemporary special education initiatives through evaluation and analysis. Background, relevant legislative history, existing empirical evidence, and designing future research addressing contemporary initiatives will be studied and discussed.
Prerequisite(s): Admission to PhD program or approval by permission.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Summer, Spring

Sport Management (SPMT)

Offered by the College of Education and Human Development

SPMT 201 - Introduction to Sport Management

Credits: 3 (NR)
Introduces sport management profession. Primary focus is on sport industry, including professional sport entertainment, amateur sport entertainment, for-profit sport participation, nonprofit sport participation, sporting goods, and sport services.

Notes: Open to non majors.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

SPMT 202 - Mental Skills for Sport Performance

Credits: 2 (NR)
Introduces mental skills training for sport performance used within the field of sport and exercise psychology. Demonstrates mental practice techniques to be practiced and assessed.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 0
When Offered: Fall.

SPMT 210 - Foundations of Sport Coaching

Credits: 3 (NR)
Introduction to the scientific bases for coaching sports and the process of coaching athletes. It includes the development of an individual coaching philosophy and the application of scientific training in the psychological, physiological, pedagogical and managerial bases of sport coaching.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Summer, Spring

SPMT 241 - Practicum
Credits: 3 (NR)
Paid or voluntary experience in sport industry setting. Work sites chosen by students after receiving approval of faculty supervisors.

Prerequisite(s): SPMT 201. Majors in BS HFRR SPMT only. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 3

SPMT 302 - Sport and Ethics

Credits: 3 (NR)
Investigates moral issues in sport and judgments about right and wrong behavior among athletes, coaches, spectators, and others.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

SPMT 304 - Sport, Culture, and Society

Credits: 3 (NR)
Analyzes sport from educational, political, economic, and cultural perspectives.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

SPMT 318 - Gender and Racial Issues in Sport

Credits: 3 (NR)
Investigates dominant gender and racial ideologies, and their influence on sport.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

SPMT 320 - Psychology of Sport

Credits: 3 (NR)
Psychological theories of personality, motivation, and anxiety explored in sport environment. Examines social-psychological research on audience effects, team cohesion, leadership, and fan behavior.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
SPMT 321 - America Through Baseball

Credits: 3 (NR)
This course is designed for the student to gain an understanding of the past and present role of baseball in American culture. The course focuses on the development of professional baseball over the past 160 years and the ways in which the history of America as a nation and culture can be "read" through baseball.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

SPMT 322 - Football and American Culture

Credits: 3 (NR)
Designed for the student to gain an understanding of the past and present role of football in American culture. Focuses on the development of college, professional and high school football over the past 120 years and contemporary issues in football culture are analyzed such as debates over racial symbols and mascots, the question of professionalizing division one college football, and tailgating and televisual football cultures.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

SPMT 323 - America and the Modern Olympics

Credits: 3 (NR)
This course is designed to provide students an understanding of the role played by the United States in the modern Olympic movement. The primary focus is on the United States relationship with the modern Olympics from the earliest days of the games up through the Cold War period and beyond.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 0

SPMT 341 - Field Experience in Sport Coaching

Credits: 3 (NR)
Application of the scientific bases for coaching sports and the process of coaching athletes. Includes paid or voluntary experience in a sport-specific setting. The practicum location is to be chosen by students after receiving approval of the faculty supervisor. A minimum of 120 clock hours is required within the timeframe of the course.

Prerequisite(s): SPMT 210 or Permission of the Instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Summer, Spring
SPMT 405 - Sport Operation and Planning

Credits: 3 (NR)
Principles and techniques of planning and operating sport facilities. Emphasizes principles and concepts of organization and administration including communication, personnel management, management of physical resources, and risk management. Examines variety of sport operations such as indoor stadiums, athletic field complexes, and managing recreation and intramural activities.

**Prerequisite(s):** SPMT 201 and completion of 60 hours.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

SPMT 412 - Sport Marketing and Finance

Credits: 3 (NR)
Investigates principles and processes in sport marketing and finance. Focuses on research and development, sport promotion, sport sponsorship, advertising, merchandising, and distribution of sporting goods.

**Prerequisite(s):** 60 hours, including SPMT 201, or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

SPMT 420 - Economics and Finance in the Sport Industry

Credits: 3 (NR)
Examines the principles of economics, budgeting, and finance as it applies to the sport industry.

**Prerequisite(s):** Completion of 60 hours, including SPMT 201, or permission of instructor. Prerequisite enforced by registration system.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

SPMT 430 - Sport Communication

Credits: 3 (NR)
Provides a senior-level exploration of the role of sport communication in contemporary cultures. Readings and discussions address questions about how communication about/in sports highlights the importance of sports, the cultural identities of those who engage in sport communication, and the pervasiveness of sport communication practices in industry.

**Prerequisite(s):** SPMT 201 and general COMM course.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0
SPMT 440 - Global Perspectives in Sport

Credits: 3 (NR)
An interdisciplinary examination of sport as a global phenomenon. Historical, cultural, economic, and governance perspectives are considered.

Prerequisite(s): SPMT 201 and completion of 60 hours. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

SPMT 455 - Governance and Policy in Sport Organizations

Credits: 3 (NR)
Examines sport organizations focused on both professional and amateur governance structures and processes. The study of policy in educational, nonprofit, and professional sport venues is also addressed.

Prerequisite(s): 60 hours, including SPMT 201, or permission of instructor Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

SPMT 475 - Sport Management Professional Development Seminar

Credits: 3 (NR)
This is a seminar format in which students synthesize and apply theories, concepts, and practices in the leadership and management of sport organizations.

Prerequisite(s): SPMT 241 and completion of 75 hours. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

SPMT 480 - Special Topics in Sport Management

Credits: 3 (RD)
See course description in the Schedule of Classes. Selected topics reflecting interest in specialized areas of sport management. Announced in advance.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
**SPMT 490 - Internship**

Credits: 9-12 (NR)
Paid or voluntary work experience in sport industry settings. Requires minimum period of 10 to 12 weeks of full-time employment. Applies course work, theories, and research to work settings. Work sites chosen by students after approval of faculty supervisors. Includes meetings and assignments before and during the internship.

**Prerequisite(s):** SPMT 475 and completion of 90 hours.

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 12
**Grading:** Satisfactory/No credit only

---

**SPMT 499 - Independent Study**

Credits: 1-3 (NR)
Faculty-directed independent study of approved topics in sport management.

**Hours of Lecture or Seminar per week:** 1-3
**Hours of Lab or Studio per week:** 0

---

**SPMT 551 - Sport in the Global Marketplace**

Credits: 3 (NR)
Explores sport business internationally including the production and consumption of professional and Olympic-linked sports and the impact of globalization on sport.

**Prerequisite(s):** Graduate status or permission of instructor

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0

---

**SPMT 555 - The Australian Model of Sport**

Credits: 3 (NR)
Examines the Australian model of sport which has been adopted in many countries. Analyzes government sport policy and the organization and administration of Australian professional sports.

**Prerequisite(s):** SPMT 551 or permission of instructor

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0

---

**SPMT 556 - The Global Soccer Industry**
Credits: 3 (NR)
Explores the international soccer industry focusing on major professional leagues, international federations, international movement of players, the production of soccer equipment, legal and social issues.

Prerequisite(s): SPMT 551 or permission of instructor

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

SPMT 611 - Sport Marketing and Sales

Credits: 3 (NR)
Investigates principles and processes in sport marketing. Focuses on research and development, sport promotion, sport sponsorship, advertising, merchandising, and distribution of sporting goods.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

SPMT 612 - Economics and Financial Management in the Sport Industry

Credits: 3 (NR)
Examines principles of economics, budgeting, and finance as they apply to the sport industry.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

SPMT 613 - Strategic Leadership in Sport Organizations

Credits: 3 (NR)
Examines the theoretical underpinnings and effective strategic processes of leadership in sport organizations. Leader behaviors, characteristics, situational influences, and the cognitive dimensions of leadership will be explored within the organizational context.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

SPMT 614 - Legal Issues in Sport

Credits: 3 (NR)
Examines legal issues as they apply to the sports industry. Course content includes, but is not limited to: tort law, risk management procedures, product liability, constitutional/contract/administrative/statutory law, crowd control/security, personal/professional values, and situational analysis.
SPMT 616 - Sport Operations, Venues, and Event Management

Credits: 3 (NR)
Examines administrative functions and operations, strategic planning, governance structures, policy development, and effective practices in the strategic management of sport programs, including managerial principles for venues and events.

SPMT 631 - Theoretical Models of Sport Coaching

Credits: 3 (NR)
Examines the scientific bases for coaching athletes. Emphasizes philosophical underpinnings and theoretical foundations in the psychological, physiological, pedagogical, and managerial bases of sport coaching.

SPMT 651 - Sport and International Development

Credits: 3 (NR)
Explores the roles of sport in international development with focus on Africa, Asia, and Latin America. Non-governmental organizations (NGOs), international federations, professional leagues and grassroots initiatives will be examined.

Prerequisite(s): SPMT 551 or permission of instructor

SPMT 652 - Governance and Policy in International Sport

Credits: 3 (NR)
Explores sport governance and policy in the international context with focus on international federations, professional leagues and comparative analyses of governmental sporting policies.

Prerequisite(s): SPMT 551 or permission of instructor
Sports and Recreation Studies (SRST)

SRST 598 - Special Topics
Credits: 1-6 (RD)
Focuses on projects related to sport and/or recreation studies.

Prerequisite(s): Graduate standing or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Summer, Spring.

SRST 599 - Independent Study in Sport and Recreation Studies
Credits: 1-3 (RD)
Studies problem area in sport and recreation studies research, theory, or practice under direction of faculty member.

Prerequisite(s): Graduate standing and completion of 18 credit hours of graduate coursework in SRST.

Notes: Students engage in one-on-one or seminar independent study with an SRST faculty member. The faculty member may be the student's thesis or project supervisor. While SRST 599 is repeatable, 3 credit hours must be designated for Preparation of Thesis or Project Proposal.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Summer, Spring.

SRST 606 - Foundations of Sport and Recreation Studies
Credits: 3 (NR)
Examines the historical development of the Sport and Recreation Studies fields. Explores the interconnection between these phenomena in the context of the social, cultural and economic forces shaping American and global societies.

Prerequisite(s): Graduate standing or permission of the instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

SRST 623 - Research Design and Statistical Reasoning
Credits: 3 (NR)
Introduces basic principles of scientific and scholarly inquiry in Sport and Recreation Studies. Explores the logic and practice of methods and techniques employed in research related to sport and recreation.

Prerequisite(s): Graduate standing.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

SRST 798 - Master's Project

Credits: 1-3 (RD)
Offers capstone experience to enable students to demonstrate their integrative knowledge and skills accrued through study in their concentration area within Sport and Recreation Studies.

Prerequisite(s): SRST 623, SRST/EFHP 599: Preparation of Thesis or Project Proposal; or permission of instructor.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0
Grading: Satisfactory/No credit only
When Offered: Fall, Summer, Spring

SRST 799 - Master's Thesis

Credits: 1-6 (RD)
Explores sport and recreation problem using appropriate research methodology and under supervision of graduate faculty member.

Prerequisite(s): SRST 623, SRST/EFHP 599: Preparation of Thesis or Proposal; or permission of instructor.

Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 0
Grading: Satisfactory/No credit only
When Offered: Fall, Summer, Spring

Statistics (STAT)

Offered by the Volgenau School of Engineering.

Students may attempt an undergraduate course taught by the Volgenau School of Engineering twice. A third attempt requires approval of the department offering the course. This policy does not apply to STAT 250, which follows the normal university policy for repeating undergraduate courses.

STAT 250 - Introductory Statistics I
Credits: 3 (NR)
Elementary introduction to statistics. Topics include descriptive statistics, probability, and estimation and hypothesis testing for means and proportions. Statistical software used for assignments.

Fulfills general education requirement in quantitative reasoning.

Prerequisite(s): High school algebra.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring, Summer

STAT 344 - Probability and Statistics for Engineers and Scientists I

Credits: 3 (NR)
Introduction to probability and statistics with applications to computer science, engineering, operations research, and information technology. Basic concepts of probability, random variables and expectation, Poisson process, bivariate distributions, sums of independent random variables, central limit theorem, sampling distributions, maximum likelihood and unbiased estimators, confidence interval construction, and hypothesis testing.

Prerequisite(s): MATH 114 or MATH 116. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring, Summer

STAT 346 - Probability for Engineers

Credits: 3 (NR)
Introduction to probability with applications to electrical and computer engineering, operations research, information technology, and economics. Basic concepts of probability, conditional probability, random variables and moments, specific probability distributions, multivariate distributions, moment-generating functions, limit theorems, and sampling distributions.

Prerequisite(s): MATH 213 or MATH 215. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

STAT 350 - Introductory Statistics II

Credits: 3 (NR)
Emphasis on applications. Topics include analysis of variance, multiple regression, and nonparametric inference. A statistical computer package is used for data analysis.

Prerequisite(s): STAT 250. Prerequisite enforced by registration system.
STAT 354 - Probability and Statistics for Engineers and Scientists II

Credits: 3 (NR)
Continuation of STAT 344. Multivariate probability distributions, variable transformations, regression, analysis of variance, contingency tables, and nonparametric methods. Applications to quality control, acceptance sampling, and reliability.

Prerequisite(s): STAT 346 and a course in Statistics, or STAT 344.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

STAT 362 - Introduction to Computer Statistical Packages

Credits: 3 (NR)
Use of computer packages in statistical analysis of data. Topics include data entry, checking, and manipulation, and use of computer statistical packages for regression and analysis of variance.

Prerequisite(s): STAT 250 or equivalent

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

STAT 435 - Analysis of Experimental Data Using SPSS

Credits: 3 (NR)
Statistical methods for analysis of experimental data, including ANOVA and regression. Parametric and nonparametric inference methods appropriate for a variety of experimental designs are presented along with data analysis using SPSS. Intended primarily for researchers in the natural, social, and life sciences.

Prerequisite(s): STAT 250, STAT 344, or equivalent.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

STAT 455 - Experimental Design
Credits: 3 (NR)
Principles of analysis of variance and experimental design. Topics include computation and interpretation of analysis of variance; multiple comparisons; orthogonal contrasts; and design of experiments, including factorial, hierarchical, and split plot designs. Optional topics may include analysis of covariance; partial hierarchical designs; incomplete block designs; principles of blocking and confounding in \(2^n\) experiments; or estimation of variance components. Computer statistical packages are used to perform computations.

Prerequisite(s): STAT 350 or 354, and STAT 362 or 501.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Alternate Spring

STAT 457 - Applied Nonparametric Statistics

Credits: 3 (NR)
Introduction to nonparametric methods with applications to the decision and information sciences and operations analysis. Topics covered are testing and estimation for one- and two-sample problems, independent and paired samples, location and dispersion problems, one- and two-way layouts, tests for independence, regression, and discussion of efficiency.

Prerequisite(s): STAT 350 or 354, or equivalent.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Offered on an irregular basis at the department's discretion.

STAT 463 - Introduction to Exploratory Data Analysis

Credits: 3 (NR)
Features statistical graphics, maps and simple models used to bring out patterns in data. Introduces statistical software and addresses data access and import. Presents exploratory strategies motivating data transformations. Stresses the cognitive foundations of good graphics. Graphics include dot plots, box plots, Q-Q plots, parallel coordinate plots, scatterplot matrices and linked views. Exploration includes use of dynamic graphics.

Prerequisite(s): STAT 350 or 354, or equivalent.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Alternate Spring

STAT 474 - Introduction to Survey Sampling

Credits: 3 (NR)
Introduction to design and analysis of sample surveys. Sample designs include simple random sampling; systematic sampling; and stratified, cluster, and multistage sampling. Analytical methods include sample size determination, ratio and regression estimation, imputation for missing data, and nonsampling error adjustment. Practical problems encountered in conducting a survey are discussed. Methods applied to case studies of actual surveys. Class project may be required.
Prerequisite(s): STAT 346 and a course in Statistics, or STAT 344.

Notes: Recommended for students of decision, information, social sciences, and mathematics.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

STAT 498 - Independent Study in Statistics

Credits: 1-3 (NR)
Directed self-study of special topics of current interest in statistics.

Prerequisite(s): 60 undergraduate credits; must be arranged with instructor and approved by the department chair before registering.

Notes: May be repeated for maximum 6 credits if topics are substantially different.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

STAT 499 - Special Topics in Statistics

Credits: 3 (NR)
Topics of special interest to undergraduates.

Prerequisite(s): 60 undergraduate credits and permission of instructor; specific prerequisites vary with nature of topic.

Notes: May be repeated for maximum 6 credits if topics substantially differ.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

STAT 501 - SAS Language and Basic Procedures

Credits: 1 (NR)
Introduction to the SAS Data Step and Base SAS Procedures. Preparation for graduate students in use of SAS for other graduate courses offered by department. Topics include observation and variable structures, data interfaces, formats, functions, and procedures for summarizing and displaying data.

Prerequisite(s): Course in statistics and experience with Microsoft OS.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0
Grading: Satisfactory/No Credit
When Offered: Spring
STAT 502 - Introduction to SAS/GRAPH

Credits: 1 (NR)
Introduction to SAS/GRAPH. Continued preparation beyond STAT 501 for graduate students in the use of SAS for other graduate courses offered by department. Topics include: an overview of SAS/GRAPH and SAS/GRAPH procedures; introduction to SAS/GRAPH output options; and in-depth coverage of the SGPLOT, G PLOT, and GCHART procedures.

Prerequisite(s): Course in statistics and working knowledge of SAS.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0
Grading: Satisfactory/No Credit
When Offered: Spring

STAT 503 - SAS Macro Language

Credits: 1 (NR)
Introduction to SAS Macro Language. Continued preparation beyond STAT 501 for graduate students in use of SAS for other graduate courses offered by department. Topics include macro language processing, macro variables, defining and calling macro variables, macro quoting, macro facility error messages, and examples of efficient code using macros.

Prerequisite(s): Course in statistics and working knowledge of SAS.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0
Grading: Satisfactory/No Credit
When Offered: Spring

STAT 504 - Introduction to SAS/IML

Credits: 1 (NR)
Introduction to SAS/IML, the matrix language within the SAS environment. Topics include defining matrices, performing standard matrix operations, operating on rows and columns of a data table, and writing efficient SAS/IML programs.

Prerequisite(s): Working knowledge of SAS and matrix algebra.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0
Grading: Satisfactory/No Credit
When Offered: Offered on an irregular basis at the department's discretion

STAT 505 - Introduction to R
Credits: 1 (NR)
Introduction to R syntax, graphical interface, and basic operations. Preparation for graduate students in use of R for other
gradient courses offered by department. Topics include import and export of data; manipulation of R object structures; function
creation; package installation; and procedures for simulation, modeling, summarizing data, and producing graphics.

Prerequisite(s): Course in statistics.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0
Grading: Satisfactory/No Credit
When Offered: Offered on an irregular basis at the department's discretion

STAT 506 - Introduction to SPSS

Credits: 1 (NR)
Introduction to SPSS, a widely-used statistical software package in social sciences. Provides an overview of SPSS procedures for
manipulating data; summarizing and displaying data; and analyzing data from a variety of experimental designs.

Prerequisite(s): Course in statistics and experience with Microsoft OS.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0
Grading: Satisfactory/No Credit
When Offered: Offered on an irregular basis at the department's discretion

STAT 515 - Applied Statistics and Visualization for Analytics

Credits: 3 (NR)
Introduces multivariate regression and random forests for modeling data. Addresses data access, variable selection and model
diagnostics. Introduces foundations for visual thinking. Reviews common statistical graphics such as dot plots, box plots, q-q
plots. Addresses more advanced methods such as scatterplot matrices enhanced by smoothed or density contours, and search
tools for finding graphics with suggestive patterns.

Prerequisite(s): STAT 250 or equivalent.

Notes: Course will introduce R software for analysis. A final project will involve visualization of a real data set.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

STAT 535 - Analysis of Experimental Data Using SPSS

Credits: 3 (NR)
Statistical methods for analysis of experimental data, including ANOVA and regression. Parametric and nonparametric inference
methods appropriate for a variety of experimental designs are presented along with data analysis using SPSS. Intended primarily
for researchers in the natural, social, and life sciences.
Prerequisite(s): STAT 250, STAT 344, or equivalent.

Notes: Can be used to satisfy requirements for certificate in federal statistics, but not MS in statistical science. Certificate program students granted credit for only one of STAT 535 or 554.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

STAT 544 - Applied Probability

Credits: 3 (NR)
The axioms of probability, conditional probability, random variables and expectation, multivariate and conditional distributions, conditional expectation, order statistics, transformations, moment generating functions, special distributions, limit theorems.

Prerequisite(s): MATH 213 and STAT 346, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

STAT 554 - Applied Statistics

Credits: 3 (NR)
Application of basic statistical techniques. Focus is on the problem (data analysis) rather than on the theory. Topics include one- and two-sample tests and confidence intervals for means and medians, descriptive statistics, goodness-of-fit tests, one- and two-way ANOVA, simultaneous inference, testing variances, regression analysis, and categorical data analysis. Normal theory is introduced first with discussion of what happens when assumptions break down. Alternative robust and nonparametric techniques are presented.

Prerequisite(s): STAT 346 or permission of instructor.

Notes: Certificate program students granted credit for only one of STAT 535 or 554.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

STAT 560 - Biostatistical Methods

Credits: 3 (NR)
Focuses on biostatistical aspects of design and analysis of biomedical studies, including epidemiologic observational studies and randomized clinical trials. Topics include randomization principle, confounding, ethics in human experimentation, methods of randomization, stratification, primary outcome analyses, covariate-adjusted analyses, epidemiologic measures, and sample size and power computation.
Equivalent to STAT 660 (2011-2012 Catalog)

Prerequisite(s): STAT 554 or STAT 535; and a working knowledge of a statistical software package, such as SAS or SPSS.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring

STAT 574 - Survey Sampling I

Credits: 3 (NR)
Design and implementation of sample surveys. Covers components of a survey; probability sampling designs to include simple random, systematic, Bernoulli, proportional to size, stratified, cluster and two-stage sampling; and ratio and regression estimators. Discusses practical problems in conducting a survey. Methods applied to case studies of actual surveys. Class project required.

Prerequisite(s): STAT 346 and a course in Statistics, or STAT 344

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

STAT 634 - Case Studies in Data Analysis

Credits: 3 (NR)
Examination of a wide variety of case studies illustrating data-driven model building and statistical analysis. With each case study, various methods of data management, data presentation, statistical analysis, and report writing are compared.

Prerequisite(s): STAT 554 and working knowledge of SAS, or permission of instructor. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

STAT 645 - Stochastic Processes

Credits: 3 (NR)
Selected applied probability models, including Poisson processes, discrete- and continuous-time Markov chains, renewal and regenerative processes, semi-Markov processes, queuing and inventory systems, reliability theory, and stochastic networks. Emphasis on applications in practice, as well as analytical models.

Equivalent to OR 645

Prerequisite(s): OR 542 or STAT 544, or permission of instructor.

Hours of Lecture or Seminar per week: 3
STAT 652 - Statistical Inference

Credits: 3 (NR)
Fundamental principles of estimation and hypothesis testing. Topics include limiting distributions and stochastic convergence, sufficient statistics, exponential families, statistical decision theory and optimality for point estimation, Bayesian methods, maximum likelihood, asymptotic results, interval estimation, optimal tests of statistical hypotheses, and likelihood ratio tests.

Equivalent to CSI 672.

Prerequisite(s): STAT 544 with a grade of B- or better, and STAT 554 with grade of B- or better. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring

STAT 655 - Analysis of Variance

Credits: 3 (NR)
Single and multifactor analysis of variance, planning sample sizes, introduction to the design of experiments, random block and Latin square designs, and analysis of covariance.

Prerequisite(s): STAT 544, STAT 554, and working knowledge of SAS. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Alternate Spring

STAT 656 - Regression Analysis

Credits: 3 (NR)
Simple and multiple linear regression, polynomial regression, general linear models, subset selection, step-wise regression, and model selection. Also covered are multicollinearity, diagnostics, and model building as well as the theory and practice of regression analysis.

Equivalent to CSI 676

Prerequisite(s): STAT 544, STAT 554, matrix algebra, and working knowledge of SAS. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall
STAT 657 - Nonparametric Statistics

Credits: 3 (NR)
Distribution-free procedures for making inferences about one or more samples. Tests for lack of independence, association or trend, and monotone alternatives are included. Measures of association in bivariate samples and multiple classifications are discussed. Both theory and applications are covered. Students are introduced to appropriate statistical software.

Prerequisite(s): STAT 544 and 554. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Alternate Fall

STAT 658 - Time Series Analysis and Forecasting

Credits: 3 (NR)
Modeling stationary and nonstationary processes, autoregressive, moving average and mixed model processes, autocovariance functions, autocorrelation functions, partial autocorrelation functions, spectral density functions, identification of models, estimation of model parameters, and forecasting techniques.

Equivalent to CSI 678.

Prerequisite(s): STAT 544 or equivalent. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Alternate Fall

STAT 662 - Multivariate Statistical Methods

Credits: 3 (NR)
Standard techniques of applied multivariate analysis. Topics include review of matrices, T square tests, principle components, multiple regression and general linear models, analysis of variance and covariance, multivariate ANOVA, canonical correlation, discriminant analysis, classification, factor analysis, clustering, and multidimensional scaling. Computer implementation via a statistical package is an integral part of the course.

Prerequisite(s): STAT 544, STAT 554, matrix algebra, and working knowledge of SAS. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Alternate Spring

STAT 663 - Statistical Graphics and Data Exploration I
Credits: 3 (NR)
Introduces statistical graphics that show distribution features and functional relationships in the presence of noise. Introduces cognitive research guidance for graphics design and reasoning. Stresses quantitative comparisons from multiple perspectives. Features new micromaps designs for spatial and temporal comparisons. Introduces R, the grammar of graphics, and dynamic graphics software.

Equivalent to CSI 773

Prerequisite(s): STAT 554 and a programming course. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

STAT 664 - Bayesian Inference and Decision Theory

Credits: 3 (NR)
Introduces decision theory and relationship to Bayesian statistical inference. Teaches commonalities, differences between Bayesian and frequentist approaches to statistical inference, how to approach a statistics problem from the Bayesian perspective and how to combine data with informed expert judgment in a sound way to derive useful and policy-relevant conclusions. Teaches necessary theory to develop firm understanding of when and how to apply Bayesian and frequentist methods, and practical procedures for inference, hypothesis testing, and developing statistical models for phenomena. Teaches fundamentals of Bayesian theory of inference, including probability as a representation for degrees of belief, likelihood principle, use of Bayes Rule to revise beliefs based on evidence, conjugate prior distributions for common statistical models, and methods for approximating the posterior distribution. Introduces graphical models for constructing complex probability and decision models from modular components.

Equivalent to SYST 664/CSI 674

Prerequisite(s): STAT 544 or 554, or equivalent.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Alternate Spring

STAT 665 - Categorical Data Analysis

Credits: 3 (NR)
Analyzes cross-classified categorical data in two and higher dimensions. Topics include association tests and measures of association in two- and three-dimensional contingency tables, logistic regression, and log linear models. SAS is used extensively for data analysis.

Prerequisite(s): STAT 656 and working knowledge of SAS. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Alternate Spring
STAT 668 - Survival Analysis

Credits: 3 (NR)
Survival Analysis is a class of statistical methods for studying the occurrence and timing of events. In medical research, the events may be deaths, and the objective is to determine factors affecting survival times of patients following treatment, usually in the setting of clinical trials. Methods can also be applied to the social and natural sciences and engineering where they are known by other names (reliability, event history analysis). Concepts of censored data, time-dependent variables, and survivor and hazard functions are central. Nonparametric methods for comparing two or more groups of survival data are studied. The Cox regression model (proportional hazards model), Weibull model, and the accelerated failure time model are studied in detail. Concepts are applied to analysis of real data from major medical studies using SAS software.

Prerequisite(s): STAT 544, STAT 554, and working knowledge of SAS. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Alternate Fall

STAT 674 - Survey Sampling II

Credits: 3 (NR)
Continuation of STAT 574. Regression estimators for complex sampling designs, domain estimation, two-phase sampling, weighting adjustments for nonresponse, imputation, nonresponse models, measurement error models, introduction to variance estimation. Applications to case studies of actual surveys.

Prerequisite(s): STAT 574. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Offered on an irregular basis at the department’s discretion.

STAT 689 - Topics in Statistics

Credits: 1-3 (RD)
Special topics of interest to graduate students in statistics.

Equivalent to STAT 789 (2011-2012 Catalog)

Prerequisite(s): Permission of instructor; specific prerequisites vary with the nature of the topic.

Notes: May be repeated for maximum of 6 credits if topics substantially differ.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0

STAT 719 - Graphical Models for Inference and Decision Making
Theory and methods for inference and decision making in environments characterized by uncertain information. Covers graphical probability and decision models. Studies approaches to representing knowledge about uncertain phenomena, and planning and acting under uncertainty. Topics include knowledge engineering, exact and approximate inference in graphical models, learning in graphical models, temporal reasoning, planning, and decision-making. Practical model-building experience provided. Students apply what they learn to a project of their own choosing.

Equivalent to OR 719/CSI 775

Prerequisite(s): STAT 652 or SYST/STAT 664, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Alternate Spring

STAT 751 - Computational Statistics

Credits: 3 (NR)
Covers basic computationally intensive statistical methods and related methods, which would not be feasible without modern computational resources. Covers nonparametric density estimation including kernel methods, orthogonal series methods and multivariate methods, recursive methods, cross validation, nonparametric regression, penalized smoothing splines, the jackknife and bootstrapping, computational aspects of exploratory methods including the grand tour, projection pursuit, alternating conditional expectations, and inverse regression methods.

Equivalent to CSI 771

Prerequisite(s): STAT 544, STAT 554, and STAT 652. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Alternate Fall

STAT 756 - Alternative Regression Methods

Credits: 3 (NR)
Presents several modern regression methodologies that are useful in data analysis when some of the assumptions of linear regression theory fail to hold. Topics include non-linear regression, quantile regression, robust regression, and computational methods for fitting these models.

Prerequisite(s): STAT 652, STAT 656, and working knowledge of SAS. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Alternate Spring

STAT 758 - Advanced Time Series Analysis
Statistical modeling and methods for model identification and forecasting of nonstationary and seasonal time series data (ARIMA models), multivariate time series, and state-space models.

Prerequisite(s): STAT 658. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Offered on an irregular basis at the department’s discretion.

Stat 760 - Advanced Biostatistical Methods

Credits: 3 (NR)
Advanced statistical methods in the drug development process. Provides the theoretical statistical basis for the design and analysis of pharmaceutical clinical trials. Topics include the theory of randomization, randomization-based inference, restricted, response-adaptive, and covariate-adaptive randomization, the modern theory of group sequential monitoring, statistical aspects of determination of dose-response relationships.

Prerequisite(s): STAT 652, STAT 656, and working knowledge of statistical programming language. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Alternate Spring

Stat 763 - Statistical Graphics and Data Exploration II

Credits: 3 (NR)
Addresses data set size and human comprehension challenges. Introduces case and variable reduction methods, and overview production. Incorporates cognitive science guidance. Utilizes data mining models and visual analytic algorithms to find patterns and prioritize graphics. Addresses applications from both information and scientific visualization. Tracks advances in web graphics including citizen science projects harnessing the visual power of thousands of people.

Prerequisite(s): STAT 663 or permission of instructor. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Alternate Spring

Stat 765 - Advanced Topics in Categorical Data Analysis

Credits: 3 (NR)
Covers advanced techniques for categorical data analysis and the theoretical basis for the analysis of categorical data. Topics include: models for multinomial responses, matched pairs, repeated measures, and ordinal data; random effects models; asymptotic theory for parametric models; theory for maximum likelihood and alternative estimation methods; and exact inference. Statistical software packages are used extensively for data analysis.
Prerequisite(s): STAT 652 and STAT 665. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Offered on an irregular basis at the department’s discretion.

STAT 771 - Spatial Data Analysis

Credits: 3 (NR)

Presents analysis techniques for spatially-indexed or spatially-correlated data that arise in many areas of science, including medicine, transportation, and atmospheric sciences. Focus is on data analysis rather than theory, though theory will necessarily be covered. Topics include analysis of point patterns, trend and surface estimation, and spatial regression.

Prerequisite(s): STAT 652, STAT 656, and working knowledge of R and SAS. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Alternate Fall

STAT 772 - Statistical Learning

Credits: 3 (NR)

The course focuses on statistical learning theory by introducing the statistical and optimization background essential for developing new efficient statistical learning algorithms. Also discusses applications of statistical learning algorithms to the solution of important problems in many areas of science.

Equivalent to CSI 772

Prerequisite(s): STAT 652 or CSI 672, or permission of instructor. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring

STAT 773 - Statistical Methods for Longitudinal Data Analysis

Credits: 3 (NR)

Presents modern statistical approaches to the analysis of longitudinal data, i.e., data collected repeatedly on experimental units over time (or other conditions). Topics include linear mixed effects models, generalized linear models for correlated data (including generalized estimating equations), and computational issues and methods for fitting models.

Prerequisite(s): STAT 652, STAT 656, and working knowledge of SAS. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Alternate Spring
STAT 796 - Independent Studies/Directed Readings

Credits: 1-3 (NR)
Reading and research on a specific topic in statistics under guidance of graduate faculty member.

Prerequisite(s): Permission of instructor and department’s graduate coordinator.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

STAT 798 - Master's Research Project

Credits: 3 (NR)
Project chosen and completed under guidance of graduate faculty member that results in acceptable technical report.

Prerequisite(s): 9 graduate credits, and permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
Grading: Graduate Special

STAT 799 - Master's Thesis

Credits: 1-6 (RD)
Project chosen and completed under guidance of graduate faculty member that results in acceptable technical report and oral defense.

Prerequisite(s): 9 graduate credits, and permission of instructor.

Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 0
Grading: Satisfactory/No Credit

STAT 871 - Statistical Data Mining

Credits: 3 (NR)
Covers basic concepts, computational complexity, data preparation and compression, databases and SQL, rule-based machine learning and probability, density estimation, exploratory data analysis, cluster analysis and pattern recognition, artificial neural networks, classification and regression trees, correlation and nonparametric regression, time series, and visual data mining.

Prerequisite(s): STAT 554 or 663, or permission of instructor.

Hours of Lecture or Seminar per week: 3
STAT 876 - Measure and Linear Spaces

Credits: 3 (NR)
Measure theory and integration; convergence theorems; theory of linear spaces and functional analysis; and probability theory. The theory of linear spaces includes normed linear spaces, inner product spaces, Banach and Hilbert spaces, Sobolev spaces, and reproducing kernels. Topics include wavelets, applications to stochastic processes, and nonparametric functional inference.

Equivalent to CSI 876

Prerequisite(s): STAT 544 and MATH 315.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Offered on an irregular basis at the department's discretion

STAT 877 - Geometric Methods in Statistics

Credits: 3 (NR)
Develops foundations of geometric methods for statistics. Topics include n-dimension Euclidian geometry; projective geometry; differential geometry, including curves, surfaces, and n-dimensional differentiable manifolds; and computational geometry, including computation of convex hulls, tessellations of two-, three-, and n-dimensional spaces, and finite element grid generation. Examples include applications to scientific visualization.

Equivalent to CSI 877

Prerequisite(s): STAT 751 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Offered on an irregular basis at the department's discretion

STAT 889 - Advanced Topics in Statistics

Credits: 3 (RD)
Advanced topics not occurring in regular sequence.

Prerequisite(s): Doctoral standing and permission of instructor.

Notes: May be repeated for a maximum of 12 credits.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
STAT 896 - Advanced Directed Reading

Credits: 3 (NR)
Individualized study with a graduate faculty member in the Department of Statistics. Syllabus and grading criteria must be preapproved by the PhD in Statistical Science Program Director.

Prerequisite(s): Admission to PhD in Statistical Science Program. Permission of PhD in Statistical Science Program Director and permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

STAT 971 - Probability Theory

Credits: 3 (NR)
A rigorous measure-theoretic treatment of probability. Includes expectation, distributions, laws of large numbers and central limit theorems for independent random variables, characteristic function methods, conditional expectations, martingales, strong and weak convergence, and Markov chains.

Equivalent to CSI 971.

Prerequisite(s): STAT 544 and MATH 315. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

STAT 972 - Mathematical Statistics I

Credits: 3 (NR)
Focuses on theory of estimation. Includes method of moments, least squares, maximum likelihood, and maximum entropy methods. Details methods of minimum variance unbiased estimation. Topics include sufficiency and completeness of statistics, Fisher information, Cramer-Rao bounds, Bhattacharyya bounds, asymptotic consistency and distributions, statistical decision theory, minimax and Bayesian decision rules, and applications to engineering and scientific problems.

Equivalent to CSI 972.

Prerequisite(s): STAT 652/CSI 672 or equivalent, and either STAT 876/CSI 876 or STAT 971/CSI 971. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 1-12
Hours of Lab or Studio per week: 0
When Offered: Fall

STAT 973 - Mathematical Statistics II
Continuation of STAT 972/CSI 972. Concentrates on theory of hypothesis testing. Topics include characterizing decision process, simple versus simple hypothesis tests, Neyman-Pearson Lemma, uniformly most powerful tests, unbiasedness and invariance of tests, and randomized and sequential tests. Applications of testing principles made to situations in normal distribution family and other families of distributions.

Equivalent to CSI 973

**Prerequisite(s):** STAT 972/CSI 972. Prerequisite enforced by registration system.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Spring

---

**STAT 990 - Dissertation Topic Presentation**

Credits: 1 (NR)  
Students put together a professional presentation of a research proposal and present it for critique to fellow students and interested faculty.

Equivalent to IT 990, CS 990.

**Prerequisite(s):** Completion of all course requirements for PhD, or permission of instructor.

**Notes:** May be repeated with change of research topic, but credit towards doctoral degree is given once.

**Hours of Lecture or Seminar per week:** 1  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall, Spring

---

**STAT 998 - Doctoral Dissertation Proposal**

Credits: 1-12 (RD)  
Work on research proposal that forms basis for doctoral dissertation.

**Notes:** May be repeated. No more than 24 credits of STAT 998 and 999 may be applied to doctoral degree requirements.

**Hours of Lecture or Seminar per week:** 0  
**Hours of Lab or Studio per week:** 0  
**Grading:** Satisfactory/No Credit

---

**STAT 999 - Doctoral Dissertation**

Credits: 1-12 (RD)  
Formal record of commitment to doctoral dissertation research under direction of faculty member in statistics.

**Prerequisite(s):** Admission to candidacy.
Notes: May be repeated as needed; no more than 24 credits of STAT 998 and 999 may be applied to doctoral degree requirements.

Hours of Lecture or Seminar per week: 0  
Hours of Lab or Studio per week: 0  
Grading: Satisfactory/No Credit

Systems Engineering (SYST)

Offered by the Volgenau School of Engineering.

Students may attempt an undergraduate course taught by the Volgenau School of Engineering twice. A third attempt requires approval of the department offering the course.

SYST 100 - Engineering Systems in a Complex World

Credits: 3 (NR)  
This course introduces students to the engineering profession and its place in a global society. Students will use case studies and historical analyses to think strategically and globally about the management and execution of engineering systems in the context of culture, environment, politics and economics, and learn how to employ such analyses as engineering decision-making tools. Students will be required to critically analyze articles and books, and work in groups to investigate and present topics of current national and international relevance.

Fulfills general education requirement in global understanding.

Hours of Lecture or Seminar per week: 2  
Hours of Lab or Studio per week: 0  
When Offered: Fall

SYST 101 - Understanding Systems Engineering

Credits: 3 (NR)  
Introduces systems engineering and curriculum for BS in field. Introduces large and small systems, and explains them through some hands-on experiences. Key concepts include understanding requirements for system and translation of system-level requirements to component-level requirements. Several different kinds of example systems presented and discussed: objectives, major components, how system works, and major design issues. Each student gives similar presentation on system of choice. Students working in groups design, develop, and test system, and give oral presentation. Students responsible for writing several short papers on curriculum and presentations they have heard.

Hours of Lecture or Seminar per week: 2  
Hours of Lab or Studio per week: 0  
When Offered: Spring

SYST 198 - Independent Study in Systems Engineering
Credits: 1-3 (RT)
Must be arranged with instructor and approved by department chair before registering. Directed self-study of special topics of current interest in systems engineering.

Notes: May be repeated for maximum 6 credits if topics are substantially different.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring, Summer

**SYST 210 - Systems Design**

Credits: 3 (NR)
Systems engineering design and integration process, development of functional, physical, and operational architectures. Emphasizes requirements engineering, functional modeling for design, and formulation and analysis of physical design alternatives. Introduces methods, software tools for systems engineering design.

Prerequisite(s): Minimum 15 credits completed or sophomore standing.

Hours of Lecture or Seminar per week: 2-4
Hours of Lab or Studio per week: 0
When Offered: Fall

**SYST 220 - Dynamical Systems I**

Credits: 3 (NR)
Introduces modeling of dynamical systems. Formulation of mathematical models from system descriptions, including computer, biological, economic, transportation, and mechanical systems. Analytical and numerical methods for solving models and studying their behavior. Discrete-time and continuous time systems. Linear and nonlinear systems. Introduction to computer modeling using MATLAB.

Prerequisite(s): MATH 114 and PHYS 160

Corequisite(s): MATH 214, MATH 203, and SYST 221.

Hours of Lecture or Seminar per week: 3-6
Hours of Lab or Studio per week: 0
When Offered: Spring

**SYST 221 - Systems Modeling Laboratory**

Credits: 1 (NR)
Companion laboratory to SYST 220. Emphasizes system design and analysis using computer modeling environment MATLAB. Simulation and numerical solutions of continuous dynamic systems. Use of built-in functions and construction of macros. Graphical presentation of results.

Prerequisite(s): CS 112.
Corequisite(s): SYST 220.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 3
When Offered: Spring

**SYST 320 - Dynamical Systems II**

Credits: 3 (NR)
Continuation of SYST 220 with emphasis in continuous-time systems. Translational, rotational, and electrical systems. Block diagrams and state variable models. Systems analysis in time domain and frequency domain. Analysis of control systems.

Prerequisite(s): SYST 220, MATH 203, MATH 214, PHYS 260. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

**SYST 330 - Systems Methods**

Credits: 3 (NR)
Analysis methods of system engineering design and management. Decision analysis, economic models and evaluation, optimization in design and operations, probability and statistical methods, queuing theory and analysis, management control techniques, reliability and maintainability analysis, and economic and life-cycle cost analysis. Laboratory exercise with different software programs included.

Prerequisite(s): MATH 114

Corequisite(s): STAT 344 and SYST 221.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0
When Offered: Spring

**SYST 335 - Discrete Systems Modeling and Simulation**

Credits: 3 (NR)
Introduces basic concepts of modeling complex discrete systems by computer simulation. Topics include Monte-Carlo methods, discrete-event modeling, specialized simulation software, and statistics of input and output analysis.

Equivalent to OR 335

Prerequisite(s): CS 211 or permission of the department; and STAT 344, or STAT 346, or MATH 351.

Corequisite(s): None.
SYST 371 - Systems Engineering Management

Credits: 3 (NR)
Study of basics of systems engineering management. Includes engineering economics, planning, organizing, staffing, monitoring, and controlling process of designing, developing, and producing system to meet stated need in effective and efficient manner. Discusses management tools, processes, and procedures, including various engineering documentation templates, managerial processes, and dealing with personnel issues.

Prerequisite(s): SYST 210

Corequisite(s): SYST 330.

SYST 420 - Network Analysis

Credits: 3 (NR)
Network nomenclature. Elementary graph theory. Linear and nonlinear network models: multicommodity flow, mathematical games and equilibria on networks, network design and control; dynamic network models; applications to transportation, telecommunications, data communications, and water resource systems.

Prerequisite(s): OR 441 and MATH 213. Prerequisite enforced by registration system.

SYST 421 - Classical Systems and Control Theory

Credits: 3 (NR)

Equivalent to ECE 421

Prerequisite(s): Grade of C or better in ECE 220.
SYST 460 - Introduction to Air Traffic Control

Credits: 3 (NR)
Introduction to Air Traffic Control (ATC) for those who plan professions in the air transportation industry. Surveys the entire field, presenting the history of ATC and how it came to be as it is, the technology on which the system is based, the procedures used by controllers to meet the safety and efficiency goals of the system, the organizational structure of the FAA, challenges facing the system, and means under investigation to meet these challenges. Some fieldwork will be required to acquire and analyze airport operational data. A brief introduction to airport design will be discussed.

Prerequisite(s): Junior standing or graduate standing.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

SYST 461 - Air Transportation System Engineering

Credits: 3 (NR)
Focuses on the theory and practice of system engineering in a national air transportation system. Stresses the application of mathematical techniques to analyze and design complex network transportation systems, airports, airspace, airline schedules, and traffic flow.

Prerequisite(s): SYST 460 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring

SYST 462 - Flight Training Lab I

Credits: 3 (NR)
This course fulfills the requirements of 14 CFR, Section 141, Appendix B for obtaining a private pilot certificate with airplane category, single engine land class rating. Flight Training 1 will include the flight training up to and including maneuvering and navigating the aircraft.

Corequisite(s): SYST 460.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 3
When Offered: Fall, Spring

SYST 463 - Flight Training Lab II
This course fulfills the requirements of 14 CFR, Section 141, Appendix B for obtaining a private pilot certificate with airplane category, Airplane - Single Engine Land class rating. Flight Training II will include the flight training up to and including the dual and solo flight instruction in cross-country navigation by pilotage, dead reckoning, and use of VOR, NDB, and HSI. Flight test preparation for private pilot certification.

**Prerequisite(s):** SYST 462.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall, Spring

---

**SYST 465 - Pricing in Optimization and Game Theory**

Credits: 3 (NR)  
Allocation of limited resources among competing activities to maximize the outcome or minimization of expenses required to produce a given assortment of goods and services are two typical problems faced by any economic institution. Mathematical modeling of such problems and finding efficient mathematical tools for solving them are two main goals of modern optimization theory. Pricing limited resources, goods, and services is the key instrument for theoretical analysis of complex economical systems. Pricing theory can also give rise to numerical methods for finding optimal solutions and economic equilibrium. Fundamental tools in pricing theory are the classical Lagrangian and Lagrange multipliers for constrained optimization. Covers the basic ideas and methods of linear programming and matrix games. Particular emphasis to pricing for both theoretical analysis and numerical methods.

Equivalent to ECON 496/MATH 493

**Prerequisite(s):** MATH 203 or 216, and OR 441, or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Spring

---

**SYST 469 - Human Computer Interaction**

Credits: 3 (NR)  
Covers principles of human-computer interaction, including information processing design, cognitive models, ergonomics, and design metaphors. Students learn to evaluate interface design in terms of effectiveness, efficiency, and cost.

**Prerequisite(s):** STAT 250 and IT 108 or IT 206.

**Notes:** Students who receive credit for SYST 470 may not receive credit for this course.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall, Spring

---

**SYST 470 - Human Factors Engineering**
Credits: 3 (NR)
Human information processing, inferential analysis, biases and heuristics in human information processing, support systems to aid in human information processing, human-system interaction, and software systems engineering considerations.

Prerequisite(s): SYST 210 and STAT 344. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

**SYST 473 - Decision and Risk Analysis**

Credits: 3 (NR)
Studies analytic techniques for rational decision making that address uncertainty, conflicting objectives, and risk attitudes. Covers modeling uncertainty; rational decision making principles; representing decision problems with value trees, decision trees, and influence diagrams; solving value hierarchies, decision trees and influence diagrams; defining and calculating the value of information; incorporating risk attitudes into the analysis; and conducting sensitivity analyses.

Prerequisite(s): STAT 344 or STAT 346 or MATH 351 or grade of C or better in STAT 250

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**SYST 480 - Economic Systems Design I: Principles and Experiments**

Credits: 3 (NR)
Introduces design principles used in developing systems used to allocate resources. Students required to participate in experiment demonstrations of different allocation mechanisms. Students are also exposed to experimental methods in economics and market design.

Equivalent to ECON 440

Prerequisite(s): OR 441

Corequisite(s): SYST 465.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**SYST 489 - Senior Seminar**

Credits: 3 (NR)
Introduces several important topics in systems engineering, providing additional experience in writing and giving presentations, and obtaining feedback on curriculum for BS in systems engineering. Several lectures devoted to ethics; writing and making presentations also covered. Students attend technical lectures and write paper. Students also required to write long paper on new technology. Instructor and guest lecturers present material not part of required course load to expand horizons. Examples are "knowledge-based" design, enterprise-wide reengineering, electronic commerce, and optimization by "natural analogy"
(simulated annealing, neural networks, genetic algorithms). In addition, students work in teams to critique and redesign curriculum. Each group delivers written product, and provides at least one briefing to class. Best critique and redesign presented to faculty.

Fulfills writing intensive requirement in the major.

Corequisite(s): SYST 490

- Hours of Lecture or Seminar per week: 3
- Hours of Lab or Studio per week: 0
- When Offered: Fall

**SYST 490 - Senior Design Project I**

Credits: 3 (NR)
First part of capstone course in systems engineering program. Students apply knowledge they have gained to group project. During first semester, students perform concept definition and requirements analysis. Plan for carrying out project is developed, culminating in proposal presented to faculty at end of semester.

Prerequisite(s): Grade of C or better in SYST 335, grade of C or better in SYST 371, and 90 satisfactory credits toward BS in systems engineering.

Corequisite(s): SYST 320, SYST 470, SYST 473, and OR 441.

- Hours of Lecture or Seminar per week: 2
- Hours of Lab or Studio per week: 1
- When Offered: Fall

**SYST 491 - Industrial Project**

Credits: 1-3 (NR)
Semester-long work experience in systems engineering in industrial or governmental organization. Work supervised jointly by systems engineer from sponsoring organization and department faculty member. Project and arrangements for supervision must be approved by student's faculty advisor. Periodic reports, written final report, and presentation are required.

Prerequisite(s): 75 credits toward BS in Systems Engineering; SYST 330; GPA of at least 3.00; must be arranged with instructor and approved by department faculty chair before registering.

- Hours of Lecture or Seminar per week: 3
- Hours of Lab or Studio per week: 3-9

**SYST 495 - Senior Design Project II**

Credits: 3 (NR)
Second part of capstone course. Design project plans formulated in SYST 490 are reviewed and modified. Additional instruction on documentation and project management is given. Design project completed; formal report prepared, presented, and evaluated. Students are strongly recommended to take STAT 354 before enrolling in STST 490/495.
Fulfills general education requirement in synthesis.

**Prerequisite(s):** Grade of C or better in SYST 490.

**Corequisite(s):** SYST 330, STAT 354.

**Hours of Lecture or Seminar per week:** 1  
**Hours of Lab or Studio per week:** 2  
**When Offered:** Spring

---

**SYST 498 - Independent Study in Systems Engineering**

Credits: 1-3 (NR)  
Directed self-study of special topics of current interest in systems engineering.

**Prerequisite(s):** 60 credits toward BS in systems engineering, and GPA of at least 3.00; must be arranged with instructor and approved by department chair before registering.

**Hours of Lecture or Seminar per week:** 1-4  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall, Spring, Summer

---

**SYST 499 - Special Topics in Systems Engineering**

Credits: 3 (NR)  
Topics of special interest to undergraduates.

**Prerequisite(s):** 60 credits toward BS in systems engineering; specific prerequisites vary with nature of topic.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**SYST 500 - Quantitative Foundations for Systems Engineering**

Credits: 3 (NR)  
Provides quantitative foundations necessary for core courses in systems engineering and operations research master's program, and certificate program in C4I. Topics include vectors and matrices, infinite series, partial differentiation, multiple integrals, differential and difference equations; linear systems; Laplace and Z-transforms, and probability theory. Students receive graduate credit for this course, which, when used on plan of study, extends minimum credit requirements for degree.

Equivalent to CSI 600

**Prerequisite(s):** MATH 203, 213.

**Hours of Lecture or Seminar per week:** 3
SYST 505 - Introduction to Systems Engineering

Credits: 3 (NR)
Introduction to systems engineering with a focus on information technology systems. Emphasize development of analytical, technical, management, and teamwork skills through exercises in planning, documentation, presentation, and the creative process of IT engineering design. Use SysML as the language for analyzing and describing case studies in systems engineering. This course cannot be counted toward the MSSE degree or the PhD IT degree.

Notes: This course was taught to students in the MS/AIT program in Spring 2009 as SYST 659 Topics in Systems Engineering. The course will become part of the MS/AIT curriculum.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

SYST 508 - Complex Systems Engineering Management

Credits: 3 (NR)
Introduces the organizational, economic, technological and societal factors (POETS) that apply to the development of large-scale, complex mega-systems, and shows that "one size does not fit all" when it comes to the project management of mega-systems.

Prerequisite(s): Graduate standing.

Notes: Course cannot be applied for credit towards the MS in Systems Engineering degree.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring

SYST 510 - Systems Definition and Cost Modeling

Credits: 3 (NR)
Comprehensive examination of methods and processes for the identification and representation of system requirements. Investigation of the systems acquisition life cycle with emphasis on requirements definition, including functional problem analysis. Examination of the systems engineering definition phase including requirements, problem analysis, definition, and functional economics. Specification of functional and nonfunctional requirements, and associated requirements proto-typing. Functional economic analysis, including the use of prevailing cost estimation models and planning and control of common operating environments. Lecture and group project including creation of requirements and use of cost estimation model.

Prerequisite(s): Graduate standing.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring
**SYST 512 - Systems Engineering for Design and Development**

Credits: 3 (NR)

**Prerequisite(s):** SYST 510 or equivalent.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Spring

---

**SYST 513 - Total Systems Engineering, Reengineering and Enterprise Integration**

Credits: 3 (NR)
Principles of strategic quality, including TQM. Quality standards including ISO9000 and 14000. Organizational leadership, cultures, and process maturity, reengineering. Quality, organization learning, and reengineering approaches to enable information integration and management and environment and framework integration in the systems engineering of knowledge intensive systems. Emphasis is placed on the role of integrated product and process design teams, standard and commercial off-the-shelf products in enterprise integration. Architecture-driven system characteristics are studied, as is transition management of legacy systems.

**Prerequisite(s):** SYST 510 or 520.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**SYST 520 - System Engineering Design**

Credits: 3 (NR)
System design and integration methods are studied and practiced, including structured analysis and object-oriented based techniques. Life cycle of systems is addressed, including definition and analysis of life cycle requirements. Software tools are introduced and used for the systems engineering cycle. Identification of preliminary architectures. Students are expected to develop a system design for a system of their choice using both the structured analysis and object-oriented techniques presented in class and they will make presentations on these designs.

**Prerequisite(s):** Graduate standing.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall, Spring
SYST 521 - Network Analysis

Credits: 3 (NR)

Equivalent to OR 643

Prerequisite(s): MATH 213 and 203 or equivalent; OR 441 or 541.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

SYST 530 - System Management and Evaluation

Credits: 3 (NR)
Provides techniques for evaluating cost and operational effectiveness of system designs and systems management strategies. Discusses performance measurement, work breakdown structures, cost estimating, quality management, configuration management, standards, and case studies of systems from different application areas.

Prerequisite(s): Graduate standing.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

SYST 540 - Analysis for Systems Management

Credits: 3 (NR)
Operations research techniques and their application to managerial decision making. Mathematical programming, Markov processes, queuing theory, inventory models, PERT, CPM, and computer simulation are covered, as well as use of contemporary computer software for problem solving. Case-study approach to problem solving is used.

Equivalent to OR 540

Prerequisite(s): MATH 108 and STAT 250 or DESC 210; or equivalent.

Notes: Students who have taken OR 541 or OR 542 and OR MS majors do not receive credit.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

SYST 542 - Decision Support Systems Engineering
Credits: 3 (NR)
Studies design of computerized systems to support individual or organizational decisions. Teaches systems engineering approach to decision support system (DSS) development. DSS is end product of development process, and process is key to successfully integrating DSS into organization. Any DSS is built on a theory (usually implicit) of what makes for successful decision support in given context. Empirical evaluation of specific DSS and the underlying theory should be carried on throughout development process. Course examines prevailing theories of decision support, considers issues in obtaining empirical validation for theory, and discusses empirical support that exists for theories considered. Students design decision support system for semester project.

Equivalent to EEP 602

Prerequisite(s): SYST 301 or graduate standing.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

SYST 560 - Introduction to Air Traffic Control

Credits: 3 (NR)
Introduction for those who plan professions in aviation industry. Surveys entire field, presenting history of ATC and how it came to be, technology on which system is based, procedures used by controllers to meet safety and efficiency goals, organizational structure of the FAA, challenges facing system, and means under investigation to meet these challenges. Involves some field work for data collection and analysis. Class project requiring system simulation required.

Prerequisite(s): Graduate standing.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

SYST 563 - Research Methods in Systems Engineering and Information Technology

Credits: 3 (NR)
Provides foundation for one of the most important activities in systems engineering: information gathering to support drawing conclusions and making decisions about design options and process improvements. Develops understanding of scientific process, use of empirical evidence to support and refute scientific hypotheses, and use of scientific information in decision-making. Covers different sources of scientific evidence: designed experiments, quasi-experiments, field studies, surveys, and case studies. Discusses process of formulating testable hypotheses, and methods of measurement including approaches to measuring soft, hard-to-quantify factors. Presentation of results is discussed. Students do project involving empirical research.

Prerequisite(s): STAT 344 and 354, or equivalent.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

SYST 571 - Systems Engineering Management
Study of more advanced topics in systems engineering management. Seminar style; students expected to read selections from current literature as well as make presentations and produce papers on engineering management topics. Examines issues such as multiproject management, quality programs, and the impacts of process change on the organization. Focuses strongly on the practical impacts of various system engineering management techniques and practices on projects, organizations, and personnel.

Prerequisite(s): SYST 471 or 530.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

SYST 573 - Decision and Risk Analysis

Credits: 3 (NR)
Study of analytic techniques for rational decision making that address uncertainty, conflicting objectives, and risk attitudes. Covers modeling uncertainty; rational decision-making principles; representing decision problems with value trees, decision trees, and influence diagrams; solving value hierarchies, decision trees, and influence diagrams; defining and calculating the value of information; incorporating risk attitudes into the analysis; and conducting sensitivity analysis.

Prerequisite(s): STAT 346 or equivalent.

Notes: Offered concurrently with SYST 473. Students may not receive credit for both SYST 473 and 573.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

SYST 574 - Quality Control and Process Management

Credits: 3 (NR)
Provides fundamentals of quality control and process management methodologies that are applicable in manufacturing industries. Introduces the basic concepts of engineering process and product quality management techniques. Provides exposition of fundamentals of lean Six Sigma and total quality management and maintainability.

Equivalent to OR 574

Prerequisite(s): Graduate standing or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

SYST 576 - Manufacturing Systems Analysis

Credits: 3 (NR)
Provides fundamentals of modeling and analysis of general manufacturing systems that are also applicable to semiconductor manufacturing. Introduces the basic concepts of scheduling, inventory control, and enterprise resource management.

Equivalent to OR 576

Prerequisite(s): Graduate standing or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

SYST 580 - Introduction to C4I Systems

Credits: 3 (NR)
This course provides a high-level introduction to fundamental principles of Command, Control, Communication, Computing, and Intelligence (C4I). The principles and techniques are applicable to a wide range of civilian and military situations. The sensing, fusion, and situation assessment processes for decision making as well as the concepts of modeling, simulation, and C4 architectures are discussed. Several cases studies of C4I systems are also included.

Prerequisite(s): Graduate standing.

Notes: Students who take SYST 680 may not take SYST 580.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

SYST 588 - Financial Systems Engineering I: Introduction to Options, Futures, and Derivatives

Credits: 3 (NR)
This course is an introduction to financial engineering. Financial engineering is a cross-disciplinary field which relies on mathematical finance, numerical methods, and computer simulations to make trading, hedging, and investment decisions. This course will introduce basic types of derivatives, such as forward, futures, swaps, and options; as well as financial models such as Brownian motion, Ito's formula, and Black-Scholes model.

Equivalent to OR 588.

Prerequisite(s): Eng. or Math Graduate standing, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring.

SYST 611 - System Methodology and Modeling
Provides broad yet rigorous foundations and applications of dynamic modeling. Emphasizes methodologies used across various disciplines. Topics include modeling and analysis of time-driven and event-driven, linear and nonlinear systems. The applications are presented with real-world example systems. Methodologies address dynamic systems using the concepts of composition, abstraction, execution, and performance. The issues of stochastic modeling and decision analysis are also covered.

Prerequisite(s): SYST 500 or equivalent.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

**SYST 619 - Introduction to Architecture Based Systems Engineering**

Credits: 3 (NR)
Lifecycles in systems engineering and the role of systems integration and architecting in these. Conceptual frameworks for systems architecting, structure, function, and purpose of systems architecting and integration. Risk management and systems architecting and integration. User requirements and functional specifications in systems architecting.

Equivalent to ECE 672

Prerequisite(s): SYST 510 or 520, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**SYST 620 - Discrete Event Systems**

Credits: 3 (NR)
Introduces modeling and analysis of discrete event dynamical systems. Course covers elements of discrete mathematics and then focuses on Petri Net models and their basic properties. Relation to other discrete event models of dynamical systems.

Equivalent to ECE 673

Prerequisite(s): SYST 611 or ECE 521, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**SYST 621 - Systems Architecture Design**

Credits: 3 (NR)
Intensive study of relationships between different types of architecture representations and methodologies used to obtain them. Approaches based on systems engineering constructs, such as structured analysis and software engineering constructs, including object orientation, are used to develop architecture representations or views and to derive an executable model of the information architecture. Executable model is then used for behavior analysis and performance evaluation. Roles of systems architect and systems engineer are discussed. Examples from current practice including the C4ISR architectures are used.
Equivalent to ECE 674

Prerequisite(s): SYST 619/ECE 672 and SYST 620/ECE 673 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

SYST 622 - System Integration and Architecture Evaluation.

Credits: 3 (NR)

Equivalent to ECE 675

Prerequisite(s): SYST 620/ECE 673 and SYST 621/ECE 674 or permission of instructor.

Corequisite(s): SYST 621/ECE 674.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

SYST 631 - Systems Engineering of Information Architectures

Credits: 3 (NR)
An intensive study of the relationships between different types of architecture representations and the methodologies used to obtain them. Approaches based on systems and software engineering constructs, such as object orientation and structured analysis are used to develop architecture representations or views. The roles of the systems architect and the systems engineer are discussed. The function of executable model of the information architecture in deriving requirements is presented. Examples from current practice including C4ISR architectures are included.

Equivalent to ECE 678

Prerequisite(s): SYST 520 and SYST 619/ECE 672.

Notes: This course does not meet the requirements for the MS/SE degree.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

SYST 632 - System Integration and Architecture Evaluation

Credits: 3 (NR)
Examines the system integration problem and its human, organizational, societal cultural, and technological aspects. The role of architectures in systems integration. Integration in a system of systems and a federation of systems. Measures of performance and
effectiveness. Analysis of alternatives.

Equivalent to ECE 679

Prerequisite(s): SYST 631/ECE 678.

Notes: This course does not meet the requirements for the MS SE degree.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**SYST 659 - Topics in Systems Engineering**

Credits: 3 (RT)
Topics not covered in department's regular systems engineering offerings. Course content may vary each semester depending on instructor and the perception of students' needs.

Prerequisite(s): Permission of instructor.

Notes: Course may be repeated once for credit.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

**SYST 660 - Air Transportation Systems Modeling**

Credits: 3 (NR)
Introduces wide range of current issues in air transportation. Issues include public policy toward industry, industry economics, system capacity, current system modeling capability, human factors considerations, safety analysis and surveillance systems, and new technological developments. Develops broad understanding of contemporary and future issues. Knowledge evaluated through class discussions, take-home midterm exam, and term project to be completed by end of semester.

Equivalent to OR 660

Prerequisite(s): SYST 460/560 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring

**SYST 664 - Bayesian Inference and Decision Theory**

Credits: 3 (NR)
Introduces decision theory and relationship to Bayesian statistical inference. Teaches commonalities, differences between Bayesian and frequentist approaches to statistical inference, how to approach statistics problem from Bayesian perspective, and how to combine data with informed expert judgment in a sound way to derive useful and policy relevant conclusions. Teaches
necessary theory to develop firm understanding of when and how to apply Bayesian and frequentist methods; and practical procedures for inference, hypothesis testing, and developing statistical models for phenomena. Teaches fundamentals of Bayesian theory of inference, including probability as a representation for degrees of belief, likelihood principle, use of Bayes Rule to revise beliefs based on evidence, conjugate prior distributions for common statistical models, and methods for approximating the posterior distribution. Introduces graphical models for constructing complex probability and decision models from modular components.

Equivalent to STAT 664 and CSI 674

Prerequisite(s): STAT 544 or 554, or equivalent.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring

SYST 670 - Metaheuristics for Optimization

Credits: 3 (NR)
Course on the theory and practice of metaheuristics, i.e. solution search techniques for solving combinatorial optimization problems. It will introduce the theory, applications (scheduling in manufacturing, transportation, and in other engineering and service industries), and computational aspects of directly searching for solutions to solve computationally complex optimization problems without a well-defined analytical model.

Equivalent to OR 670.

Prerequisite(s): OR 441/541 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring

SYST 671 - Judgment and Choice Processing and Decision Making

Credits: 3 (NR)
How do people make judgments and decisions? Course presents initial review of scientific literature directed toward answering this question, and emphasizes importance when performing decision analysis and designing systems to support judgment and decision processes.

Equivalent to OR 671

Prerequisite(s): STAT 344/354.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring.

SYST 674 - Dynamic Programming
Credits: 3 (NR)
Theory and practice of dynamic programming, i.e., optimal sequential decision making over time in the presence of uncertainties is covered. Stresses intuition, the mathematical foundations being for the most part elementary. It will introduce the theory, applications (finance, engineering, and biology), and computational aspects of dynamic programming for deterministic and stochastic problems.

Equivalent to OR 674

Prerequisite(s): OR 442 or OR 542 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

SYST 675 - Reliability Analysis

Credits: 3 (NR)
Introduction to component and system reliability, their relationship, and problems of inference. Topics include component lifetime distributions and hazard functions, parameter estimation and hypothesis testing, life testing, accelerated life testing, system structural functions, and system maintainability.

Prerequisite(s): OR 675/STAT 654

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

SYST 677 - Statistical Process Control

Credits: 3 (NR)
Introduces concepts of quality control and reliability. Acceptance sampling, control charts, and economic design of quality control systems are discussed, as are system reliability, fault-free analysis, life testing, repairable systems, and role of reliability, quality control, and maintainability in life-cycle costing. Role of MIL and ANSI standards in reliability and quality programs considered.

Equivalent to OR 677/STAT 677

Prerequisite(s): STAT 554 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

SYST 680 - Principles of Command, Control, Communications, Computing, and Intelligence (C4I)

Credits: 3 (NR)
Broad introduction to fundamental principles of command, control, communications, computers, and intelligence (C4I). Principles and techniques applicable to wide range of civilian and military situations. Discusses modeling and simulation of combat operations. Studies in detail sensing, fusion, and situation assessment processes. Derives optimal decision-making rules;
discusses concepts of C4 architectures; and develops tools to evaluate and design C4 systems such as queuing theory.

Equivalent to ECE 670/OR 683

**Prerequisite(s):** ECE 528, SYST 611, or OR 542; or equivalent.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall

**SYST 683 - Modeling, Simulation, and Gaming**

Credits: 3 (NR)  
Develops methods for designing combat models and games. Existing combat models critical to the C4I process. Exercises and games demonstrate value of properly developed C4I modules in a combat simulation.

**Prerequisite(s):** MATH 213, SYST 500 or equivalent, and graduate standing.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**SYST 684 - Sensor Data Fusion**

Credits: 3 (NR)  
Examines design issues in multisensor fusion systems. Studies use of probability, evidence, and possibility theories for object identification. Studies Bayesian networks, blackboard architectures, and spatial and temporal reasoning for situation assessment.

**Prerequisite(s):** SYST 680 or ECE 670.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**SYST 688 - Financial Systems Engineering II: Derivative Products and Risk Management**

Credits: 3 (NR)  
Financial engineering is a cross-disciplinary field which relies on mathematical finance, numerical methods, and computer simulations to make trading, hedging, and investment decisions, as well as facilitating the risk management of those decisions. This course will focus on risk management for both market risk and credit risk. It will cover a broad range of derivatives products and hedging strategies with emphasis on how risks are managed in financial institutions.

**Prerequisite(s):** OR/SYST 588 or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall, Spring.
SYST 698 - Independent Study and Research

Credits: 3 (RD)
Study of a selected area in systems engineering or C3I under the supervision of a faculty member. Written report required.

Prerequisite(s): Graduate standing, completion of at least two core courses, permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring, Summer

SYST 699 - Masters Project

Credits: 3 (NR)
Capstone project course for MS/SE program. Key activity is completion of a major applied team project resulting in an acceptable technical report and oral briefing. Student should plan to take this course in the last semester of studies.

Equivalent to SYST 798 (2011-2012 Catalog)

Prerequisite(s): 21 graduate credits in OR or SYST.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring.

SYST 735 - Advanced Stochastic Simulation

Credits: 3 (NR)
Special topics and recent developments in Monte Carlo simulation methodology for discrete-event stochastic systems. Contents vary; possible topics include statistical analysis of simulation output data, random number and random variable generation, variance reduction techniques, sensitivity analysis and optimization of simulation models, distributed and parallel simulation, object-oriented simulation, and specialized applications.

Equivalent to OR 735

Prerequisite(s): OR 635 or permission of instructor.

Notes: May be repeated for credit when topics are distinctly different.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

SYST 740 - Advances in Multi-Modeling

Credits: 3 (NR)
Focuses on the inter-operation of multiple models expressed in different modeling languages but which draw from the same data
set: i.e., multi-modeling. Socio-technical systems often require a variety of modeling tools to define their operation accurately. An ontology based approach is used to analyze the validity of a proposed modeling architecture and workflow to address a specific issue.

Equivalent to ECE 760.

**Prerequisite(s):** SYST 620 or ECE 673 or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Spring.

### SYST 750 - Advanced Topics in Systems Engineering

**Credits:** 3 (RD)  
Advanced topics not covered in department's regular systems engineering offerings. Course content may vary each semester depending on instructor and the perception of students' needs. May be repeated for credit when topics are distinctly different.

**Prerequisite(s):** 600-level course that varies with content of course.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall, Spring

### SYST 760 - Special Topics in Command, Control, Communications, Computing, and Intelligence Systems Engineering

**Credits:** 3 (NR)  
Special topics in the C4I area, with different content in different terms. Representative areas include quantitative evaluation of C4 systems, applications of artificial intelligence in C4 systems, and military communications systems.

**Prerequisite(s):** SYST 680.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

### SYST 763 - Research Methods in Systems Engineering and Information Technology

**Credits:** 3 (NR)  
Examines alternative paradigms of scientific research and their applicability to research in information technology. Topics include fundamental elements of scientific investigation, basic principles of experimental design and statistical induction, philosophy of science and its relation to the information technology sciences, and case studies of information technology research.

Equivalent to IT 763/OR 763.

**Prerequisite(s):** STAT 554.
SYST 781 - Data Mining and Knowledge Discovery

Credits: 3 (NR)
Statistical and computational methods and systems for deriving user-oriented knowledge from large databases and other information sources, and applying knowledge to support decision making. Information sources can be in numerical, textual, visual, or multimedia forms. Covers theoretical and practical aspects of current methods and selected systems for data mining, knowledge discovery, and knowledge management, including those for text mining, multimedia mining, and web mining.

Equivalent to STAT 781

Prerequisite(s): One of the following courses: CS 687, CS 650, INFS 614, STAT 663, STAT 664, or permission of the instructor.

SYST 799 - Master's Thesis

Credits: 1-6 (RD)
Research project chosen and completed under the guidance of a graduate faculty member, which results in a technical report acceptable to a three-member faculty committee, and an oral defense.

Prerequisite(s): 21 graduate credits and permission of instructor.

SYST 842 - Models of Probabilistic Reasoning

Credits: 3 (NR)
Survey of alternative views about how incomplete, inconclusive, and possibly unreliable evidence might be evaluated and combined. Discusses Bayesian, Baconian, Shafer-Dempster, and Fuzzy systems for probabilistic reasoning.

Equivalent to IT 842/OR 842

Prerequisite(s): STAT 544 or OR 681, or permission of the instructor.
SYST 850 - Topics in Systems Integration Engineering

Credits: 3 (RD)
Covers lifecycles; large systems comprising heterogeneous components; human, organizational, and technological basis for integration; societal and cultural basis; conceptual frameworks; structure, function, and purpose of industry; risk management; user requirements and functional specifications; bid and proposal process; systems integration and federal government; standards; integration of systems and federations of systems; integrated process and product development; architectures; systems management and cost estimation; reengineering; quality management; increasing returns to scale, network effects, and path dependency issues; and systems integration ecology and evolutionary systems integration

Prerequisite(s): SYST 510 or 520.

Notes: May be repeatable for a maximum of six credits within the degree if topics are substantially different.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

SYST 888 - Distributed Estimation and Multisensor Tracking and Fusion

Credits: 3 (NR)
Centralized and distributed estimation theory, hierarchical estimation, tracking and data association, multisensor multitarget tracking and fusion, distributed tracking in distributed sensor networks, track-to-track association and fusion, and Bayesian networks for fusion.

Equivalent to ECE 753/OR 888

Prerequisite(s): ECE 734 or SYST 611.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

SYST 944 - The Process of Discovery and Its Enhancement in Engineering Applications

Credits: 3 (NR)
Studies ingredients of imaginative reasoning as they concern efficient discovery of new ideas and valid evidential test of them. Topics include different interpretations of Peirce's theory of abductive reasoning and other forms of reasoning, Hintikka's analysis of process of inquiry, and current attempts to design systems that provide assistance in discovery-related or investigative activities.

Equivalent to OR 944/IT 944

Prerequisite(s): SYST 842 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

Systems Engineering and Operations Research (SEOR)
SEOR 750 - Advanced Topics in Systems Engineering and Operations Research

Credits: 3 (RD)
Advanced topics, applications, or recent developments in the interface of systems engineering and operations research. Course content may vary each semester depending on instructor and the perception of students' needs. May be repeated for credit when topics are distinctly different.

Prerequisite(s): 600-level course that varies with content of course.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

SEOR 796 - Directed Reading and Research

Credits: 1-3 (RD)
Reading and research on specific topic in systems engineering or operations research under direction of faculty member.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0

SEOR 998 - Doctoral Dissertation Proposal

Credits: 1-12 (RD)
Work on research proposal that forms basis for doctoral dissertation.

Notes: May be repeated. No more than 24 credits of SEOR 998 and 999 may be applied to doctoral degree requirements.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0
Grading: Satisfactory/No credit only

SEOR 999 - Doctoral Dissertation

Credits: 1-12 (RD)
Formal record of commitment to doctoral dissertation research under direction of faculty member approved by SEOR Department.

Prerequisite(s): Admission to doctoral candidacy.

Notes: May be repeated as needed.
### Taxation (TAX)

Offered by the School of Management

#### TAX 700 - Federal Income Taxation

Credits: 3 (NR)
Federal income tax concepts and procedures related to individual taxpayers and business entities. Emphasis on research and planning based on the Internal Revenue Code, Treasury Regulations, and administrative and judicial sources of tax law.

**Prerequisite(s):** Admission to the MS Tax program or permission of the director

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

#### TAX 701 - Accounting Methods and Periods

Credits: 1.5 (NR)
Tax accounting methods including the cash and accrual methods, inventory accounting, installment sales, accounting changes, and various book-tax difference. The accounting periods are also studied.

**Prerequisite(s):** Admission to the MS Tax program or permission of the director

**Corequisite(s):** TAX 700

**Hours of Lecture or Seminar per week:** 1.5  
**Hours of Lab or Studio per week:** 0

#### TAX 702 - Tax Practice and Procedures

Credits: 1.5 (NR)
Professional responsibilities and ethics, tax research, tax penalties, practice before the IRS, tax policy, and other issues.

**Prerequisite(s):** Admission to the MS Tax program or permission of the director.

**Corequisite(s):** TAX 700

**Hours of Lecture or Seminar per week:** 1.5  
**Hours of Lab or Studio per week:** 0
TAX 703 - Corporate Taxation

Credits: 3 (NR)
Concepts and principles that relate to federal income taxation of corporations and their shareholders. Emphasis on research of fact situations. Coverage includes the organization and capitalization of a corporation, nonliquidated and liquidated distributions, penalty taxes, collapsible corporations, and determinants of the income tax base of corporations.

Prerequisite(s): Admission to the MS Tax program or permission of the director

Corequisite(s): TAX 700

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

TAX 704 - Corporate Mergers and Acquisitions

Credits: 1.5 (NR)
Introduces taxable and tax-deferred methods of combining, dividing, and recapitalizing existing corporations. Analyzes the effects on the corporation(s), its attributes, and its shareholders.

Prerequisite(s): Admission to the MS Tax program or permission of the director. TAX 700

Hours of Lecture or Seminar per week: 1.5
Hours of Lab or Studio per week: 0

TAX 705 - Affiliated Corporations

Credits: 1.5 (NR)
Studies consolidated tax return regulations and filing requirements for affiliated corporations.

Prerequisite(s): Admission to the MS Tax program or permission of the director. TAX 703

Hours of Lecture or Seminar per week: 1.5
Hours of Lab or Studio per week: 0

TAX 706 - Partnership Taxation

Credits: 3 (NR)
Major aspects of taxation affecting partners and partnerships. Emphasis on tax planning and detailed study of the Internal Revenue Code, Treasury Regulations, and case law governing these areas.

Prerequisite(s): Admission to the MS Tax program or permission of the director

Corequisite(s): TAX 700
TAX 710 - Federal Estate and Gift Taxation

Credits: 3 (NR)
Concepts and principles that relate to federal estate and gift taxation and the federal income taxation of estates, trusts, and beneficiaries. Emphasis on estate tax planning and a detailed study of the Internal Revenue Code, Treasury Regulations, and case law governing these areas.

Prerequisite(s): Admission to the MS Tax program or permission of the director. TAX 700

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

TAX 711 - International Taxation

Credits: 3 (NR)
Taxation of individuals and corporations with foreign-source income and tax liability to the United States.

Prerequisite(s): Admission to the MS Tax program or permission of the director. TAX 700

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

TAX 712 - Seminar in Advanced Tax Policies

Credits: 3 (RD)
Selective analysis of current tax topics addressing important issues in contemporary tax practice. Discussion of two or three major topics. Consult the Schedule of Classes. Course may be repeated for credit with different topics.

Prerequisite(s): Admission to the MS Tax program or permission of the director. TAX 700

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

TAX 713 - State and Local Taxation

Credits: 3 (NR)
Detailed analysis of the principal forms of state and local taxation.

Prerequisite(s): Admission to the MS Tax program or permission of the director. TAX 700
TAX 714 - Pensions and Deferred Compensation

Credits: 3 (NR)
Analysis of the structure, operation, and requirements for obtaining and maintaining IRS approval of tax-qualified pensions, profit sharing, and deferred compensation plans.

Prerequisite(s): Admission to the MS Tax program or permission of the director. TAX 700

TAX 792 - Management of Professional Service Organizations

Credits: 3 (NR)
This course addresses the management of the modern professional service organizations with special emphasis on the strategic, marketing, human resources, risk management, and ethical and technological issues vital to management.

Prerequisite(s): Admission to the MS Tax program or permission of the director. Completion of 18 hours of MSA or MST required coursework.

Technology Management (TECM)

Offered by the School of Management

TECM 601 - HiTech Business Models

Credits: 1 (NR)
Provides an introduction to high tech industries, emerging technologies and business models that are transforming technology-intensive industries such as music, financial services and healthcare. The course covers techniques for analyzing how organizations create, deliver and capture value. The students use case-based approach to analyze traditional and high-tech organizations to understand their business models, and identify causes for success and failures.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0
When Offered: Spring

TECM 602 - Emerging Technologies and the New CIO
Credits: 1 (NR)
Provides an overview of CIOs and IT executive leadership, enabling legislation and policies on CIOs in the U.S. and abroad. The course examines the evolution of CIO core competencies, and approaches to cross agency CIO and IT coordination. Emerging ICT technologies, their corresponding potential, challenges and considerations for CIOs and IT executives in their adoption and introduction, are also discussed.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0
When Offered: Spring

TECM 610 - Communications and Leadership

Credits: 2 (NR)
Distinguishes between leadership and management, and focuses on the critical roles and functions of leadership, including communication ability, use of power and influence, providing direction, aligning an organization's systems, motivating a workforce, and creating a culture for effectiveness. It also focuses on strategies for developing oneself as an effective leader.

Prerequisite(s): Admission to Technology Management Program.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 0

TECM 611 - Leadership and Change Management

Credits: 2 (NR)
Examines the critical roles and functions of leadership with special attention to how leaders influence organizational performance and manage change. Topics include providing direction, creating a culture for effectiveness, the use of power and influence, leadership development, leading under changing conditions, and leading and managing change.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 0
When Offered: Fall

TECM 614 - Financial and Cost Accounting

Credits: 2 (NR)
Focuses on the economics and analysis of business transactions and financial reporting. Topics include an introduction to the financial reporting framework, review of how accountants measure and manage financial reporting, an introduction to cost concepts and product costing, and an analysis of capital investments and management control. Emphasis is placed on providing an analytic framework for evaluating transactions and companies.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 0
When Offered: Fall
TECM 615 - Decision Making Using Accounting and Financial Data

Credits: 3 (NR)
Provides managers with an overview of the purpose and importance of accounting within the organization and the financial valuation of information technology companies, projects, and product line. Students focus on the economics and analysis of business transactions and their related financial reporting issues from internal and external stakeholder perspectives. Students improve their skills in analyzing financial issues and presenting results in a case analysis framework.

Prerequisite(s): Admission to Technology Management Program.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

TECM 620 - Economics of Technology Management

Credits: 2-3 (NR)
Enables students to build and evaluate economic and business models that can be used to analyze real managerial questions that affect all types of institutions, especially firms in the information technology industry. Students develop a better understanding of the operation of markets in general and the use of various quantitative and qualitative methods when making decisions within the firm. The use of economic analysis allows students to identify and evaluate decision alternatives, the competitive environments of firms, and the factors that influence firm performance, especially in the information technology industry.

Prerequisite(s): Admission to Technology Management Program or permission of the program director.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 0

TECM 635 - Decision Models for Technology Management

Credits: 2-3 (NR)
Explores current metrics and metric development for quality, intangible assets, and project management as required within information technology companies. Applies statistical tools of best use with these metrics.

Prerequisite(s): Admission to Technology Management Program or permission of the program director.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 0
When Offered: Spring

TECM 640 - Management of Consulting and Technical Professionals

Credits: 1-3 (NR)
Students gain insight into conflict resolution, teamwork, communication, power and influence, career development, and ethics. Helps students understand themselves and those they manage, as they work to be as effective as possible in modern organizations.
Prerequisite(s): Admission to Technology Management Program.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

TECM 641 - Negotiation and Conflict Management for Technology Professionals

Credits: 2 (NR)
Students acquire insights and skills for negotiation and conflict resolution as they relate to a variety of organizational situations - including teamwork, communication and coordination, power and influence, legal disputes, career development, cross-cultural and international issues, as well as tackling ethical problems. The course is highly experiential, and is built on a foundation of hands-on exercises and extensive class discussion.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 0
When Offered: Summer

TECM 643 - Managerial Finance

Credits: 2 (NR)
Surveys the theory and practice of corporate financial management with specific application to the technology sector. Students develop an understanding of key elements required in the valuation of project alternatives; including their strategic importance. Students evaluate and use financial management models and gain an understanding of how finance can be employed as a source of potential competitive advantage.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 0

TECM 700 - Business Engineering and Change Management

Credits: 2 (NR)
Visualizing, planning, and implementing transitions in an organization or business unit is fast becoming a key source of competitive advantage. Course provides theory and practice of change management and strategic planning including organizational development and organizational transformation.

Prerequisite(s): Admission to Technology Management Program.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 0

TECM 702 - Building High Performance Teams

Credits: 2 (NR)
Develops behavioral skills integral to effective teamwork and interpersonal relationships in work environments. Covers
techniques for making group decisions and resolving internal team conflicts, as well as negotiating effectively with outside parties.

**Prerequisite(s):** Admission to Technology Management Program.

**Hours of Lecture or Seminar per week:** 2  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Spring

### TECM 703 - Technology Assessment, Evaluation, and Investment

Credits: 3 (NR)  
Prepares students to be educated consumers of information technology to maximize strategic advantage of IT to an organization. Information technologies, architectures, and products are categorized and analyzed with a view to develop and maintain the most favorable IT asset portfolio to successfully carry out business goals and strategies. Techniques for making group technology assessments, outsourcing decisions, project bidding, and contract negotiations.

**Prerequisite(s):** Admission to Technology Management Program.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

### TECM 704 - Management of Technology Projects and Portfolios

Credits: 2 (NR)  
Examines advanced topics in project and program management, with specific attention to the issues that managers face to effectively manage programs. This involves managing resources (both internal and external to the organization) and managing within an existing organizational structure. Specific program management topics include advanced topics for project management, program alignment with strategic objective, management of stakeholders, and development and organization of the program office. Strategic and operational tools and metrics also are discussed.

**Prerequisite(s):** Admission to Technology Management Program.

**Hours of Lecture or Seminar per week:** 2  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall

### TECM 711 - Deriving Strategic Value from IT Investments

Credits: 2 (NR)  
Reviews approaches for aligning IT strategy and investment with organizational strategy. The course covers methodologies for IT investment, planning and control including cost benefit, economic and risk analysis; benefits of alternative IT investments; methods of technology road mapping; and capital investment analysis. IT performance assessment methodologies and acquisition planning and design, are also reviewed.

**Hours of Lecture or Seminar per week:** 2
TECM 720 - Competitive Strategy in Technology Industries

Credits: 2 (NR)
Provides students with an understanding of the impact of information technology on firms and industries and equips them to develop and execute appropriate strategies. Although the emphasis is on information technology firms and industries, a key goal of the course is to better prepare students to respond to a diverse array of information technology challenges. Course work covers the demand and the supply side of information technology, as well as the development of frameworks and analytical tools to help put events, behaviors, and processes into understandable contexts.

Prerequisite(s): Admission to Technology Management Program or permission of the program director. TECM 615 and 620.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 0
When Offered: Summer

TECM 735 - Technology Management Capstone Project

Credits: 1-4 (NR)
Teams undertake a strategic evaluation and plan for IT-driven business initiatives. Presentation includes analysis of competitive forces and the value chain; recommendations, including changes in goals and organizational design; plan of action integrating marketing, human resource development, organizational design, finance, and information technology; and implementation plan using theories of communication and change management, to include business case and business plan.

Prerequisite(s): Admission to Technology Management Program or permission of the program director.

Hours of Lecture or Seminar per week: 1-4
Hours of Lab or Studio per week: 0
Grading: Special graduate.

TECM 737 - Capstone Project in Management of Secure Information Systems

Credits: 1-3 (RD)
Teams undertake a strategic evaluation and plan for the management of secure information systems. They develop plans that include technical, organizational, and policy aspects. A report is produced and presented to the entire cohort for discussion.

Equivalent to MSEC 720

Prerequisite(s): Admission to Executive MS in Management of Secure Information Systems.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
Grading: Graduate Special
When Offered: Fall, Spring, Summer
TECM 740 - Management of Client Relationships

Credits: 1-3 (RD)
Proposal development, bidding, legal issues of contracts and agreements, formation of commercial partnerships, and new business development. Methods and practices for conducting client need assessment and managing deviations of scope. Application of principles of marketing information systems and technology to internal and external customers.

Prerequisite(s): Admission to Technology Management Program or permission of the program director. TECM 610 and 630.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

TECM 741 - Marketing of Innovations and Technology Products / Services

Credits: 2 (NR)
Provides students the opportunity to conduct a detailed exploration of effective marketing strategies, including product and service development, branding, and customer relationships, in preparation for developing a marketing plan for a technology related innovation. Specific course topics include: assessing the marketplace, understanding the customer, market segmentation, developing and positioning the offering, pricing, branding, distribution, and promotion.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 0
When Offered: Spring

TECM 745 - Leading and Managing IT Operations

Credits: 2 (NR)
Explores best practices in the IT industry. Students analyze practices in terms of gaining competitive advantage in an industry where the scarcity economic model for products no longer applies. Course work focuses on leading an organization with the IT function.

Prerequisite(s): Admission to Technology Management Program.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 0
When Offered: Spring

TECM 746 - Enterprise Architecture and IT Governance

Credits: 2 (NR)
Examines the operational, financial and strategic considerations of leading enterprise architecture and reviews the historical development of enterprise architecture. Major enterprise architecture frameworks including Zachman and TOGAF are examined. The relationship of enterprise architecture to IT governance, approaches to IT governance and the role of the CIO, and the relationship of IT governance to organizational performance, are also discussed.
Hours of Lecture or Seminar per week: 2  
Hours of Lab or Studio per week: 0  
When Offered: Spring

**TECM 747 - Information Assurance and Security Management**

Credits: 2 (NR)  
Addresses the increasingly critical areas of information security and information assurance. Specific focus is on best practices for assessment, planning and management of information security strategy, policy, organizations and controls to minimize the risks pertaining to unauthorized use, processing, storage, and communication of digital information. Pertinent legislation and policy requirements are also covered.

Hours of Lecture or Seminar per week: 2  
Hours of Lab or Studio per week: 0  
When Offered: Spring

**TECM 748 - Systemic Approach to IT Management**

Credits: 2 (NR)  
The course introduces students to systems thinking, and then applies systems thinking to best practices in development and management of IT processes and connecting management of IT processes to organizational strategy. The course also reviews and considers IT processes from the strategy and service management frameworks including Balanced Scorecard and ITIL.

Hours of Lecture or Seminar per week: 2  
Hours of Lab or Studio per week: 0  
When Offered: Spring

**TECM 750 - Global IT Management**

Credits: 1-4 (NR)  
Students spend a week in an international residency. Emphasizes dealing with technological changes across international markets and amid global developments, virtual organizations, and project management across cultures. Corporate site visits combined with presentations by professors from universities outside the United States and relevant practitioners.

Prerequisite(s): Admission to Technology Management Program or permission of the program director.  
TECM 600 and 620.

Hours of Lecture or Seminar per week: 1-4  
Hours of Lab or Studio per week: 0

**TECM 752 - Global Tech Management**
Provides the opportunity for students to spend a week in a country or countries that are leading edge in technology and
technology management. Students visit corporations and governments and interact with corporate and IT executives, and
government leaders. Topics include CIO and eGovernment, commercialization of emerging technologies, national
competitiveness, international development, global supply chains and virtual teams.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 0
When Offered: Spring

TECM 757 - Global Residency

Credits: 1-4 (RD)
Students spend a week in an international residency. Emphasis is on how other nations deal with management of secure
information system, the management of those systems, and related public policy issues. Corporate site visits are combined with
presentations by professors from universities outside the United States and relevant practitioners. Students are required to write a
paper summarizing their observations and attend pre-residency preparatory sessions.

Equivalent to MSEC 710

Prerequisite(s): Admission to Executive MS in Management of Secure Information Systems.

Hours of Lecture or Seminar per week: 1-4
Hours of Lab or Studio per week: 0
When Offered: Spring, Summer

Telecommunications (TCOM)

Offered by the Volgenau School of Engineering

TCOM 500 - Modern Telecommunications

Credits: 3 (NR)
Comprehensive overview of telecommunications, including current status and future directions. Topics include review of
evolution of telecommunications; voice and data services; basics of signals and noise, digital transmission, network architecture
and protocols; local area, metropolitan and wide area networks and narrow band ISDN; asynchronous transfer mode and
broadband ISDN; and satellite systems, optical communications, cellular radio, personal communication systems, and multimedia
services. Examples of real-life networks illustrate basic concepts and offer further insight.

Equivalent to ECE 540

Prerequisite(s): TCOM 575, or equivalent.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
TCOM 501 - Data Communications and Local Area Networks

Credits: 1.5 (NR)
Network concepts; Open Systems Interconnection (OSI) reference model and layering; data coding; analog/digital communications review; physical layer and data link control; switching and multiplexing; commercial digital link standards; Data Link Layer Control (DLC) functions. DLC protocols; flow control; error control; link management; common link protocols. Local area networks (LANs); basics, definitions, media access control; LAN performance; LAN standards, rings and buses; bridging and frame relay.

Prerequisite(s): Graduate standing

Hours of Lecture or Seminar per week: 1.5
Hours of Lab or Studio per week: 0

TCOM 502 - Wide Area Networks and Internet

Credits: 1.5 (NR)
OSI reference model review; packet network layer functions; connection-oriented and connectionless packet switching; X.25 and X.75 standards; SONET and Packet-over SONET; circuit-switched networks and control signaling; congestion control and traffic management; virtual private networks; introduction to network management; routing methods; Internet working; introduction to Internet protocol concepts; OSI transport layer clientserver model; domain name systems; and telnet.

Prerequisite(s): TCOM 501.

Hours of Lecture or Seminar per week: 1.5
Hours of Lab or Studio per week: 0

TCOM 503 - Fiber Optic Communications

Credits: 1.5 (NR)
Introduction and overview of optical fiber communications systems. Course covers basic elements of fiber optic networks: semiconductor light sources (light emitting diodes and laser diodes), fiber optic waveguides, network system design issues, link budget analysis, and component requirements. Additional topics may include wave length division multiplexed and Time-Division Multiplexed networks and optical switching systems.

Prerequisite(s): TCOM 500

Hours of Lecture or Seminar per week: 1.5
Hours of Lab or Studio per week: 0

TCOM 504 - Asynchronous Transfer Mode Networks

Credits: 1.5 (NR)
Asynchronous Transfer Mode (ATM) concept, protocols, services, and applications. The emphasis is on the standards and technology of ATM for local and wide area networks. Relation to broadband ISDN; ATM switching, multiplexing and transport; user-network and network-network interface aspects; ATM Adaptation layer; access switching; ATM wide area network
switches; design and practice of networks based on ATM technology.

**Prerequisite(s):** TCOM 500, 501, 502, or equivalent.

**Hours of Lecture or Seminar per week:** 1.5  
**Hours of Lab or Studio per week:** 0

### TCOM 505 - Networked Multicomputer Systems

Credits: 1.5 (NR)  
Introduces systems engineering of a networked multicomputer system. Studies distributed multicomputer architectures, architecture of a network operating system, and key system components. The focus of this course is on the development of a thin client/server system, requirements analysis of a client/server web computing, system planning and implementation. Includes a study of example multicomputer systems and a discussion of future directions.

**Prerequisite(s):** TCOM 500, 501, or equivalent.

**Hours of Lecture or Seminar per week:** 1.5  
**Hours of Lab or Studio per week:** 0

### TCOM 506 - Personal Communication Systems (PCS)

Credits: 1.5 (NR)  
Introduces Personal Communication Systems (PCS). Topics include multiple technical layers of the PCS systems; data link level and network layer protocols, including implementation; mobile station operation and base station operation; and how voice and data services work. Also discusses vital issues of user authentication, privacy, and data or voice encryption.

**Prerequisite(s):** TCOM 500, 501, 551, and 552 or equivalent.

**Hours of Lecture or Seminar per week:** 1.5  
**Hours of Lab or Studio per week:** 0

### TCOM 509 - Internet Protocols

Credits: 1.5 (NR)  
The Internet Protocol (IP) Suite: principles, protocols, and architecture; Internet working; Internet addressing; IP; routing protocols (RIP, OSPF, BGP); Internet Control Message Protocol; Internet Group Management Protocol; User Datagram Protocol; Transmission Control Protocol; Client-Server Model; Domain Name System; Socket Interface; Internet applications (TELNET, FTP, SNMP, HTTP); Internet security; Internet multicasting; quality-of-service in the Internet (RSVP, DiffServ, MPLS); Mobile IP; Next Generation Internet (Ipv6)

**Prerequisite(s):** TCOM 501 and 502

**Hours of Lecture or Seminar per week:** 1.5  
**Hours of Lab or Studio per week:** 0
TCOM 510 - Client-Server Architectures and Applications

Credits: 1.5 (NR)
Fundamentals of application engineering for Client/Server (C/S) Internet environments. Review of C/S application architectures and system perspective on C/S middleware. Study of web-based middleware, distributed data managers and SQL middleware, distributed transaction processing middleware, and C/S object technology.

Prerequisite(s): TCOM 500 or ECE 540.

Hours of Lecture or Seminar per week: 1.5
Hours of Lab or Studio per week: 0

TCOM 513 - Optical Communications Networks

Credits: 1.5 (NR)
Introduction and overview of current developments in Optical Communication Networks. Emphasizes underlying technologies that make all-optical networks possible. Specific topics include components needed for Wavelength Division Multiplexed Systems and Dense Wavelength Division Multiplexed Systems; tunable wavelength lasers, wavelength add/drop multiplexers, space division switching, and wavelength-routing networks; optical LAN, MAN, and WAN concepts; passive and active wavelength filters, switches and routers; free-space optical networks.

Prerequisite(s): TCOM 503

Hours of Lecture or Seminar per week: 1.5
Hours of Lab or Studio per week: 0

TCOM 514 - Basic Switching: Lecture and Laboratory Course

Credits: 3 (NR)
Basic switching techniques and protocols for low and high-speed digital packet networks (Ethernet, Frame Relay, ATM, X.25) are taught within a half semester lecture series, followed by hands-on laboratory for remainder of semester. Real-life scenarios taught in the laboratory element through exercises that involve configuring switches and routers.

Prerequisite(s): TCOM 501 and 502

Hours of Lecture or Seminar per week: 1.5
Hours of Lab or Studio per week: 1.5

TCOM 515 - Internet Protocol Routing: Lecture and Laboratory Course

Credits: 3 (NR)
Internet Protocol (IP) routing overview; static routing; dynamic routing; default routing; access lists; route redistribution; RIP, OSPF, IGRP, EIGRP, IS-IS, and BGP protocols submitted for comment. Real-life scenarios taught in laboratory element through exercises that involve configuring routers as network elements.

Prerequisite(s): TCOM 501, 502, and 509
TCOM 516 - Global Positioning System (GPS)

Credits: 1.5 (NR)
Background in long-range navigation developments; early global systems; space-based systems; GPS and GLONASS systems; system architecture; spacecraft and Earth station characteristics; design concepts of the CA and P GPS signal modes; frequencies, modulation, and other design aspects; clock issues; range and accuracy calculations and limitations; advanced concepts.

Prerequisite(s): TCOM 500

Hours of Lecture or Seminar per week: 1.5
Hours of Lab or Studio per week: 0

TCOM 518 - Third Generation Cellular Telephony

Credits: 1.5 (NR)
Introduction to post-second generation cellular systems; benefits and features of third generation (3G) systems; review of air interface standards currently approved for 3G; review of 3G technologies; analysis of competing multiple access methods; transition plans and backward compatibility between 2G, 21/2G, and 3G systems; possible fallback plans.

Prerequisite(s): TCOM 506, 551, and 552.

Hours of Lecture or Seminar per week: 1.5
Hours of Lab or Studio per week: 0

TCOM 519 - Voice over IP

Credits: 1.5 (NR)
Concept of transporting voice over Packet Switched Network; typical VoIP network scenarios (campus, multisite private network, calling nationwide and international; communications protocols for VoIP (RTP, RTCP, RFC 1889, H.323); conferencing and security issues; quality issues (delay, mean opinion scores); VoIP network design.

Prerequisite(s): TCOM 501, 502, and 509

Hours of Lecture or Seminar per week: 1.5
Hours of Lab or Studio per week: 0

TCOM 520 - Economics of Telecommunications

Credits: 3 (NR)
Management of telecommunications networks; economic concepts in changing climate of telecommunications ownership,
deregulation, and privatization; resource allocation fundamentals based on internal rate-of-return, net present value, opportunity costs; valuation of potential acquisitions in broad telecommunications market; financial modeling techniques.

**Prerequisite(s):** TCOM 500

**Corequisite(s):** TCOM 521.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**TCOM 521 - Systems Engineering for Telecommunications Management**

Credits: 3 (NR)  
Advanced software principles, techniques, and processes for designing and implementing complex telecommunication systems. Planning and implementation of telecommunications systems from strategic planning through requirements, initial analysis, general feasibility study, structured analysis, detailed analysis, logical design, and implementation. Current system documentation through use of classical and structured tools and techniques for describing flows, data flows, data structures, file designs, input and output designs, and program specifications. Practical experience gained through project.

**Prerequisite(s):** TCOM 500

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**TCOM 526 - Advanced Global Positioning System (GPS)**

Credits: 1.5 (NR)  
Advanced concepts in global navigation satellite systems (GNSS) such as the American GPS (global positioning system), the European Galileo and the Russian GLONASS (GLObal Navigation Satellite System) System-level description, architecture and design of a wide area augmentation system (WAAS) comprising geostationary satellites overlaying GPS satellites and its vast network of monitoring and control ground stations. The equivalent EGNOS (European Geostationary Navigation Overlay Service), a precursor to Galileo and the Japanese MSAS (Multitransport Satellite-based Augmentation System) Updates on evolving GNSS technology and GNSS backup alternatives.

**Prerequisite(s):** TCOM 516

**Hours of Lecture or Seminar per week:** 1.5  
**Hours of Lab or Studio per week:** 0

**TCOM 529 - Advanced Internet Protocols**

Credits: 1.5 (NR)  
Presents Link-State Routing Protocols (OSPF, IS-IS): functionality, features, design criteria; TCP Performance Tuning; Routing Architectures: routing vs. forwarding tables, shortest path routing algorithms, Internet architecture; Routing Between Peers: BGP/IGP interactions; Internet Security: IPSec, SSL protocols; Internet Multicasting: Layer 2 and 3 Multicast, functionality and features, IGMP and multicast routing protocols; Mobile IP: mobility, routing and addressing; Next Generation Internet (IPv6): functionality and features, pros and cons; Internet Applications: DNS, TELNET, FTP, SNMP, HTTP, etc.)
Prerequisite(s): TCOM 509 or a strong background in networking protocols.

Hours of Lecture or Seminar per week: 1.5
Hours of Lab or Studio per week: 0

TCOM 539 - Advanced Voice over IP

Credits: 1.5 (NR)
Presents VoIP applications using Softswitches: Softswitch paradigm, advanced functionality and features. Different use of Softswitch architecture; VoIP QoS: QoS components, protocols, trade-offs. VoIP Security: Aspects of VoIP vulnerabilities, industry-standard remedies; VoIP network design considerations, traffic forecasting, product and vendor selection criteria; case studies: Enterprise and service provider implementations. Vonage example; Advanced topics (e.g., vendor interoperability issues, business case analysis, and future of VoIP).

Prerequisite(s): TCOM 519

Hours of Lecture or Seminar per week: 1.5
Hours of Lab or Studio per week: 0

TCOM 540 - Telecommunications Network Optimization: Routing, Flow Management, and Capacity Modeling

Credits: 1.5 (NR)
Provides state-of-the-art knowledge and techniques to apply operations research knowledge to optimal dimensioning, design and use of telecommunication networks. Includes review of traffic models in telecommunication networks including models for particular streams and multiplexing, as well as multirate and multihour models. Theory, algorithms and computational aspects of linear, network, and integer programming; formulation of telecommunication problems as optimization models, and review of solution strategies. Topics include maximum flow, shortest paths, minimum cost flows; data structure for trees and graphs; applications, modeling, theory and algorithms for optimal location of service facilities (concentrators, multiplexers) in telecommunication networks.

Prerequisite(s): TCOM 500

Hours of Lecture or Seminar per week: 1.5
Hours of Lab or Studio per week: 0

TCOM 541 - Network Design and Pricing

Credits: 1.5 (NR)
Capacity planning, capital budgeting and reliability modeling for determining optimal design. Economic models of pricing alternative telecommunications systems, project selection evaluation, and mechanisms for determining reliability of complex networks. Concentrates on modeling and evaluation. Software tools provided and tested throughout course.

Prerequisite(s): TCOM 540.
TCOM 542 - Stochastic Models in Telecommunications

Credits: 1.5 (NR)

Prerequisite(s): TCOM 500.

TCOM 545 - Reliability and Maintainability of Networks

Credits: 3 (NR)
Stochastic modeling of network reliability, simulation modeling, modeling replacement strategies. Introduces quality control, sampling for acceptance, economic design of quality control systems, and system reliability. Also covers fault tree analysis, life testing, repairable systems and role of reliability, quality, and maintainability in life-cycle costing.

Prerequisite(s): TCOM 500.

TCOM 546 - Financial Models of Telecommunications Systems

Credits: 3 (NR)
Telecommunication properties and systems. Broadcast, cable, and common carrier capitalization. Pricing, acquisition criteria, and forecasting techniques. Economic analysis of regulations and policies affecting telecommunications. Compares policy objectives with actual effects of policies, emphasizing economic principles. Determining appropriate discount and hurdle rates, life-cycle costing, evaluating technology horizons, and depreciation concerns will be discussed. Studies the economic analysis of regulations and policies affecting the mass media. Compares policy objectives with actual effects of policies, emphasizing economic principles. Uses economic and sociological theories to analyze impact of information technologies on economic organizations, markets, competitive strategies, and communication policy design.

Prerequisite(s): TCOM 500 and 501.

TCOM 547 - Project Management in Telecommunications
Develops integrated approach to managing major telecommunications project; evaluates and uses tools and software for project management, with specific goals of containing costs and time overruns; introduces elements for resolving conflict resolution and applying motivation within project team, and gaining the ability to monitor and control projects in changing environment; develops understanding of unique attributes of major telecommunications systems such as interoperability requirements and international technical standards.

Prerequisite(s): Graduate standing.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

TCOM 548 - Security and Privacy Issues in Telecommunications

Credits: 1.5 (NR)
Introduces philosophy of secure data and voice communications. Topics include cryptography, cipher systems, practical security schemes, confidentiality, authentication, integrity, access control, nonrepudiation, and their integration across telecommunications network. Reviews threats and vulnerabilities in distributed systems.

Prerequisite(s): TCOM 500 and TCOM 501.

Hours of Lecture or Seminar per week: 1.5
Hours of Lab or Studio per week: 0

TCOM 551 - Digital Communication Systems

Credits: 3 (NR)
Digital transmission of data, voice, and video. Covers signal digitization; modulation and demodulation; error correction coding; multiple access methods; multiplexing; synchronization; channel equalization; frequency spreading; encryption; transmission codes; digital transmission using bandwidth compression techniques; elements of information theory; and development of link budget evaluation such as system noise temperature, Nyquist filter concepts, antenna gain, and filter bandwidth.

Prerequisite(s): TCOM 500.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

TCOM 552 - Introduction to Mobile Communications Systems

Credits: 3 (NR)
Introduces mobile communication system design and analysis. Topics include mobile communication channel, access and mobility control, mobile network architectures, connection to fixed network, and signaling protocols for mobile communication systems. Offers examples of mobile communication systems including pan-European GSM system, North American DAMPS system, and Personal Communication Systems.

Prerequisite(s): TCOM 500 and 551.
TCOM 555 - Network Management Foundations and Applications

Credits: 3 (NR)
Defines and explains techniques that network managers utilize to maintain and improve performance of telecommunications network; network management system; five tasks traditionally involved with network management (fault management, configuration management, performance management, security management, and accounting management); theoretical background in transmission systems sufficient to understand network parameters such as capacity and response times; and specific network management products. Also explores how network performance data should be used for management and when considering upgrades in network architecture.

Prerequisite(s): TCOM 500, 501, and 502.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

TCOM 556 - Cryptography and Network Security

Credits: 1.5 (NR)
Broad overview of cryptographic algorithms and mechanisms, and application in today's communication networks. Discusses modern cryptographic techniques such as public key cryptography, digital signatures, secret sharing, key management, key escrow, public key certificates, and public key infrastructure. Covers cryptography on Internet including secure electronic mail, secure WWW, and electronic commerce. Compares, analyzes software implementations of cryptographic algorithms.

Prerequisite(s): TCOM 500 and 548.

Hours of Lecture or Seminar per week: 1.5
Hours of Lab or Studio per week: 0

TCOM 562 - Network Security Fundamentals

Credits: 3 (NR)
Introduces full spectrum of network security. Topics include taxonomy such as language commonality in incident handling, national strategy to secure cyberspace, and cybersecurity organizations; organizational structure for network defense; best practices, security policy, and threats; actors and tools, countermeasures, vulnerability identification/correction, intrusion detection, and impact assessment; firewalls and intrusion detection systems; antivirus software; active defense; disaster recovery; and law enforcement and privacy issues. Reviews threats and vulnerabilities in network systems based on reports, case studies available in the literature, and actual experience.

Prerequisite(s): TCOM 500.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
TCOM 575 - Quantitative Foundations for Telecommunications

Credits: 3 (NR)
Provides quantitative foundations in mathematical and electrical concepts to permit registration for courses in telecommunications MS degree and certificate programs. Topics include polynomials, exponentials, linear and quadratic equations, graphs and functions, trigonometric functions, radial measure and sine/cosine functions, exponentials and logarithms, basic probability and statistics, fundamentals of matrix algebra and vectors, basic Boolean logic; circuit elements (resistor, capacitor, inductor), basic electrical circuits, units, Ohm's law, Kirchhoff's law, decibel notation.

Prerequisite(s): Graduate standing

Notes: Course cannot be used for credit in any IT&E graduate degree program.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

TCOM 590 - Selected Topics in Telecommunications

Credits: 1.5-3.0 (RT)
Selected topics from recent developments and applications in various engineering disciplines within specialty modules 1, 2, and 3 of the TCOM program. The course is designed to help the professional engineering community keep abreast of current developments.

Prerequisite(s): Permission of instructor; specific prerequisites vary with the subject of the topic.

Notes: The 1.5-credit course lasts for one-half semester (approximately seven weeks) while the 3-credit course lasts for the full semester.

Hours of Lecture or Seminar per week: 1.5-3
Hours of Lab or Studio per week: 0

TCOM 591 - Selected Topics in Telecommunications

Credits: 1.5-3.0 (RD)
Selected topics from recent developments and applications in various engineering disciplines in specialty modules 4 and 5 of TCOM program. Designed to help professional engineering community keep abreast of current developments.

Prerequisite(s): Permission of instructor; specific prerequisites vary with subject of topic.

Notes: The 1.5-credit course lasts for one-half semester (approximately seven weeks); the 3-credit course lasts for full semester.

Hours of Lecture or Seminar per week: 1.5-3
Hours of Lab or Studio per week: 0

TCOM 598 - Independent Study in Telecommunications
Directed self-study of special topics in telecommunications that relate to specialty modules 1, 2, and 3. Topics must be arranged with instructor and approved by program director before registering.

**Prerequisite(s):** Permission of Instructor and Program Director.

**Notes:** May be taken for either 1.5 credits or 3.0 credits in fall and spring semesters. No more than total 6 credits may be taken from combination of TCOM 598, 599, 696, and 697 courses for credit in TCOM program.

**Hours of Lecture or Seminar per week:** 1.5-3  
**Hours of Lab or Studio per week:** 0  
**Grading:** Graduate Special

---

**TCOM 599 - Independent Study in Telecommunications**

Credits: 1.5-3.0 (RD)  
Directed self-study of special topics in telecommunications that relate to specialty modules 4 and 5. Topics must be arranged with instructor and approved by program director before registering.

**Prerequisite(s):** Permission of Instructor and Program Director.

**Notes:** May be taken for either 1.5 credits or 3 credits in fall and spring semesters. No more than total 6 credits may be taken from combination of TCOM 598, 599, 696, and 697 for credit in TCOM program.

**Hours of Lecture or Seminar per week:** 1.5-3  
**Hours of Lab or Studio per week:** 0  
**Grading:** Graduate Special

---

**TCOM 603 - Standards for Advanced Optical Networks**

Credits: 3 (NR)  
Introduces current and upcoming global optical networking standards. Introduces currently deployed optical networking standards, primarily SONET, and proceeds with evolution of next generation optical networks as envisioned by various standards body. Covers standard work on Automatic Switched Optical Networks being worked on at ITU and Generalized Multi-Protocol Label Switching being worked on at IETF. Also covers evolution of Ethernet from local area networking to wide area networking, specifically the G.Etna standard that is being developed by ITU, and T1.X1 committee and 802.xxx developed by IEEE.

**Prerequisite(s):** TCOM 503 and 513

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**TCOM 606 - Advanced Mobile Communications Systems**

Credits: 3 (NR)  
Introduction to post-second generation cellular systems; benefits and features of third-generation (3G) systems and personal
communications services (PCS); review of air interface standards and transmission technologies for mobile and quasi-stationary wireless systems, including cellular networks, satellite networks, indoor systems (Wi-Fi, Personal Local Area Networks, Orthogonal Frequency Multiplexing, Ultra Wide Band technologies); review of network control strategies; investigation of user authentication, privacy, and data and voice encryption aspects. Evolving technology, analysis of competing multiple access methods, transition plans, and backward compatibility between 2G, 2 1/2 G, 3G, and future systems, with possible fallback plans.

Prerequisite(s): TCOM 552

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

TCOM 607 - Satellite Communications

Credits: 3 (NR)
Topics include introduction to satellite communications systems; historical aspects; orbital mechanics and launchers; satellite components such as payload, orbital maneuvering systems, cooling systems, and antennas; look angle predictions; link budget; overall link design; multiple access such as TDMA, CDMA, ALOHA, TDMA, and MFTDMA; error control for digital satellite links; propagation effects on satellite links; elements of VSAT systems and nongeostationary satellite systems; and direct broadcast satellite services.

Prerequisite(s): TCOM 551.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

TCOM 609 - Interior Gateway Protocol (IGP) Routing

Credits: 3 (NR)
Discusses development of Interior Gateway Protocols, including standards documents; interaction between various interior and exterior gateway protocols; design procedures and implementation aspects; field trial issues; and analysis of latest RFC information posted on IETF web site.

Prerequisite(s): TCOM 509 and 515, or equivalent.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

TCOM 610 - Border Gateway Protocol (BGP) Routing

Credits: 3 (NR)
Discusses development of Border Gateway Protocol and its application in today's Internet routing architecture. Covers evolution of Internet, BGP routing standard specifications (RFCs), interaction between various routing protocols, network BGP routing design principals and procedures for enterprise and ISP networks, BGP's real-world implementation and configuration syntax, network scalability and convergence issues, and the latest extension and proposals for new standards.

Prerequisite(s): TCOM 509 and 515, or equivalent.
TCOM 611 - Multi-Protocol Label Switching (MPLS)

Credits: 3 (NR)
Develops full understanding of Multi-Protocol Label Switching (MPLS) theory, technology, and implementation aspects through detailed analysis of MPLS routing concepts and protocol stacks, and completion of major project to reinforce understanding of MPLS.

Prerequisite(s): TCOM 609 or 610

TCOM 660 - Network Forensics

Credits: 3 (NR)
Deals with collection, preservation, and analysis of network-generated digital evidence so it can be successfully presented in civil or criminal court of law. Examines relevant federal laws and private sector applications. Examines capture/intercept of digital evidence, analysis of audit trails, recordation of running processes, and reporting of such information.

Equivalent to CFRS 660

Prerequisite(s): TCOM 509, and working knowledge of computer programming.

TCOM 661 - Digital Media Forensics

Credits: 3 (NR)
Deals with collection, preservation, and analysis of digital media so this evidence can be successfully presented in civil or criminal court of law. Examines relevant federal laws and private sector applications. Examines seizure, preservation, and analysis of digital media.

Equivalent to CFRS 661

Prerequisite(s): TCOM 548 and 556, or TCOM 562, and working knowledge of computer operating systems; or permission of instructor.

TCOM 662 - Advanced Secure Networking
Advanced technologies in network security that can be applied to enhance enterprise and ISP's network security. Covers network perimeter defense concept and various components for complete layered defense system. Examines each component and its technologies, including TCP/IP protocol vulnerabilities, router access control list (ACL), dynamic ACL, firewall, network address translation (NAT), virtual private network (VPN), IPSec tunnels, intrusion detection system (IDS), routing protocol security, denial-of-service (DOS) attack, DOS detection and mitigation techniques.

**Prerequisite(s):** TCOM 509 and 562, and a working knowledge of network routing protocols.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**TCOM 663 - Operations of Intrusion Detection and Forensics**

Credits: 3 (NR)  
Introduces students to network and computer intrusion detection and its relation to forensics. It addresses intrusion detection architecture, system types, packet analysis, and products. It also presents advanced intrusion detection topics such as intrusion prevention and active response, decoy systems, alert correlation, data mining, and proactive forensics.

Equivalent to CFRS 663  
**Prerequisite(s):** TCOM 509 and 529 and a working knowledge of computer programming.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**TCOM 664 - Incident Response Forensics**

Credits: 3 (NR)  

This course addresses incident detection, response, and those aspects of computer forensics pertinent to the investigation of trade secret theft, economic espionage, copyright infringement, piracy, and fraud. Procedures for gathering, preserving, and analyzing forensic evidence are discussed in detail and are applied to both computer and network incident response forensics.

Equivalent to CFRS 664  
**Prerequisite(s):** TCOM 509 and TCOM 529.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Spring

---

**TCOM 690 - Advanced Topics in Telecommunications**
Advanced topics from recent developments and applications in various engineering disciplines in specialty modules 1, 2, and 3 of TCOM program. Advanced topics chosen so that they do not duplicate existing TCOM courses. Active participation of students encouraged in form of writing and presenting papers in various research areas of advanced topic. Enhances professional engineering community's understanding of breakthrough developments in specific areas.

Prerequisite(s): Permission of instructor; specific prerequisites vary.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

TCOM 691 - Advanced Topics in Telecommunications

Credits: 3 (RD)
Advanced topics from recent developments and applications in various engineering disciplines in specialty modules 4 and 5 of TCOM program. Advanced topics are chosen in such a way that they do not duplicate existing TCOM courses. Active participation of students encouraged in form of writing and presenting papers in various research areas of advanced topic. Enhances professional engineering community's understanding of breakthrough developments in specific areas.

Prerequisite(s): Permission of instructor; specific prerequisites vary.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

TCOM 696 - Independent Reading and Research

Credits: 1.5-3.0 (RD)
Study of selected area in specialty modules 1, 2, or 3 under supervision of faculty member. Written report required.

Prerequisite(s): Specified by instructor or advisor.

Notes: No more than total of 6 credits may be taken from combination of TCOM 598, 599, 696, and 697 for credit in TCOM program.

Hours of Lecture or Seminar per week: 1.5-3
Hours of Lab or Studio per week: 0
Grading: Graduate Special

TCOM 698 - Telecommunications Projects Course

Credits: 3 (NR)
To be taken toward end of degree program within any of modules 1, 2, or 3. Primary activity is completing major applied project, preferably with group of two to three people. Secondary goal is consolidating training before graduation so that, in some cases, it may act as capstone course. Students and outside telecommunication industry managers present ideas for projects and, through grouping of students, new skills and approaches may be learned. Some class time used for discussion of projects, either to monitor progress or explore alternative approaches. Readings, class-time discussion of current trends, difficulties, and new opportunities for industry most relevant to module. Concludes with presentations of projects to department faculty.
**Prerequisite(s):** Graduate standing with at least 18 credits or permission of department.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

### TCOM 699 - Telecommunications Project Course

Credits: 3 (NR)
Capstone of degree program under the specialty modules 4 or 5. To be taken toward end of degree program. Primary activity is completion of major applied project, preferably as two- to three-person group. Secondary goal is consolidation of training before graduation. Students, outside telecommunication industry managers present ideas for projects. From these ideas, group projects selected. Some classroom time used to discuss projects, to either monitor progress or explore alternative approaches. Readings, classtime discussion of current trends, difficulties, and new opportunities for the industry. Projects presented to department faculty at end of semester.

**Prerequisite(s):** Completion of at least 24 credits in the MS in Telecommunications program.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

### TCOM 707 - Advanced Link Design

Credits: 3 (NR)
Topics include advanced satellite link design such as VSAT optimization, intersatellite systems, and propagation mitigation trade-offs; radar link design such as primary and secondary radars, range ambiguities, false alarms, Doppler radar, FM radar, radar tracking, radar transmitters and receivers, and phased array radars; terrestrial wireless link design including line of sight, LMDS, and nonline of sight; optical link design including laser options, diffraction limits, lidar and communications links, tracking limitations, and GEO and LEO intersatellite link design; Wi-Fi link design; and directed energy systems.

**Prerequisite(s):** TCOM 551, TCOM 607, or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

### TCOM 750 - Coordinating Seminar

Credits: 3 (NR)
Open only to students in MA or MS in telecommunications programs with at least 18 credits of course work prior to registration. Topics include specific telecommunications problems in management, law, engineering, education, and communications. Focuses on ways a problem in one area can create or solve a problem in other areas.

**Prerequisite(s):** Open only to students in the MA or MS in telecommunications programs with at least 18 credit hours of course work prior to registration.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0
Telecommunications (TELE)

Offered by the School of Public Policy

TELE 694 - Telecommunications Internship

Credits: 3-6 (RT)
Students work in approved professional-level telecommunications position, meeting regularly with agency and university internship supervisors. Paper and journal are required, as well as minimum 60 hours work for each credit of enrollment. Usually, students enroll in internships at end of program of study.

Prerequisite(s): Graduate standing, and permission of MA in telecommunications program director.

Hours of Lecture or Seminar per week: 1-2
Hours of Lab or Studio per week: 0
Grading: Graduate Special

TELE 730 - Telecommunications Management

Credits: 3 (NR)
Surveys strategic and organizational issues in field of telecommunications management. Focuses on strategic management; oriented toward executive management level of telecommunications firms.

Prerequisite(s): Graduate standing.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

TELE 750 - Coordinating Seminar

Credits: 3 (NR)
Topics include specific telecommunications problems in management, law, engineering, education, and communication. Focuses on ways a problem in one area can create or solve a problem in other areas.

Prerequisite(s): Open only to students in MA or MS in telecommunications programs with at least 18 credits of course work.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

TELE 798 - Directed Readings and Research

Credits: 1-3 (NR)
Specialized course designed for students who seek to explore telecommunications topic in greater depth than through current
course work provided in curriculum. Written report required; oral or written exam may also be required.

**Prerequisite(s):** Graduate standing in telecommunications, 15 graduate credits completed, and permission of department.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**TELE 799 - Thesis**

Credits: 1-6 (RD)  
Individualized section form required. Original research related to student's concentration in telecommunications. Research must result in document meeting university standards.

**Prerequisite(s):** Degree candidacy in MA in telecommunications, completion of 24 credits of graduate course work, and approval of thesis proposal by faculty advisor and telecommunications director.

**Hours of Lecture or Seminar per week:** 1  
**Hours of Lab or Studio per week:** 0  
**Grading:** S/NC

**Theater (THR)**

Offered by the College of Visual and Performing Arts

**THR 101 - Theatrical Medium**

Credits: 3 (NR)  
Introduces a broad spectrum of theatrical experiences, including the inside workings of production from page to stage, preparing students for an informed and lively engagement with the art in the contemporary world and an understanding of the nature of theater as a performing art. Involves attendance at theatrical productions and response to those experiences.

Fulfills general education requirement in arts.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**THR 150 - Drama, Stage, and Society I**

Credits: 3 (NR)  
Examines the development of Western drama and the collective art of theater from its beginnings through Shakespeare. Considers readings in dramatic literature and history of theater in social and cultural contexts.

Fulfills general education requirement in arts.
THR 151 - Drama, Stage, and Society II

Credits: 3 (NR)
Brings study begun in THR 150 to present day. Considers readings in dramatic literature and history of theater in social context.

Fulfills general education requirement in arts.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

THR 190 - Special Topics

Credits: 1-3 (RT)
Rotating topic. Introductory seminar in areas of special interest.

Notes: May be repeated for maximum 12 credits.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0

THR 191 - Practical Theater Seminar

Credits: 0 (RT)
Each semester registered students will 1) attend a Theater at Mason production, guest lecture or workshop, and 2) participate in a production load-in and 3) participate in a production strike. To graduate as a Theater major students must complete 4 semesters of the course. Course is repeatable up to twice in one semester.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
Grading: Satisfactory/No Credit
When Offered: Fall, Spring

THR 196 - Performance and Design Practicum

Credits: 1 (NR)
Academic credit awarded for satisfactory completion of a minimum of 30 hours of assignment on Theater at Mason productions including a presentation of portfolio documents demonstrating a practical analysis of the assignment to subject area mentors. Assignments include actor; designer; assistant designer; stage manager; and assistant stage manager. Successful completion of this course is required to earn a Theater degree. Restricted to Theater majors and minors with junior or senior status.

Notes: Successful completion of this course is required to earn a Theater degree.
THR 197 - Management/Literary Practicum

Credits: 1 (NR)
Academic credit awarded for satisfactory completion of a minimum of 30 hours of assignment on Theater at Mason productions including a presentation of portfolio documents demonstrating a practical analysis of the assignment to subject area mentors. Assignments include director; assistant director; dramaturg; master electrician; technical director; playwright; house manager; and publicity. Restricted to Theater majors and minors with junior or senior status.

Notes: Successful completion of this course is required to earn a Theater degree.

THR 198 - Theatrical Construction Practicum

Credits: 1 (NR)
Academic credit awarded for satisfactory completion of a minimum of 30 hours of assignment on Theater at Mason productions. Assignments include scenery construction and scene painting; costume construction; electrician; and props. Successful completion of this course is required to earn a Theater degree.

Notes: All freshman, first year transfers, and new Theater majors must register for one THR 198 credit during their first academic year as a Theater major.

THR 199 - Production Run Crew Practicum

Credits: 1 (NR)
Academic credit awarded for satisfactory completion of a minimum of 30 hours of assignment on Theater at Mason productions. Assignments include stage crew; light board operator; sound board operator; wardrobe; and fly crew.

Notes: Successful completion of this course is required to earn a Theater degree. All freshman, first year transfers, and new Theater majors must register for one THR 198 credit during their first academic year as a Theater major.
Hours of Lab or Studio per week: 0
Grading: Satisfactory/No credit only
When Offered: Fall, Spring.

THR 200 - Play Production Practicum

Credits: 1 (RT)
Academic credit is awarded for satisfactory completion of a minimum of 30 hours of assignment on Theater at Mason productions.
Unless registered for a Theater course approved as directly connected to production (i.e. THR 196-199, 492, or 495) all students (including non-Theater majors) electing to participate in a Theater at Mason production must register for THR 200 concurrent with participation.

Notes: May be repeated for total of 8 credits.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 1
Grading: S/NC
When Offered: Fall, Spring.

THR 201 - Stage Management

Credits: 3 (NR)
Theory and technique of stage management for theater. Special emphasis on problem-solving skills.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

THR 202 - Literary Management

Credits: 1 (NR)
Principles of literary management and dramaturgy for regional/resident theater. Directed primarily toward developing new work.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0

THR 203 - Production/Company Management

Credits: 1 (NR)
Techniques of production and company management applied to university and professional theater productions.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0
THR 210 - Acting I

Credits: 3 (NR)  
Promotes and develops a practical understanding of communication and performance theory by engaging and enhancing student's presentation skills. Students practice contemporary acting techniques in individual and group exercises, thus expanding awareness of human behavior, thought, and language. Involves attendance of theatrical productions and response to those experiences.

Fulfills general education requirement in arts.

Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0

THR 230 - Fundamentals of Production

Credits: 3 (NR)  
Study of elements of stage and screen. Students explore current practices and their historical development in areas including lighting, scenery, costumes, and sound. Fundamental concepts, individual skills, and collaboration are taught in both classroom and shop environments. Participation in unit projects required.

Fulfills general education requirement in arts.

Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0  
When Offered: Fall, Spring

THR 235 - Costume Crafts

Credits: 3 (NR)  
This course serves as the foundation and prerequisite for costume courses in design and construction. Costume Crafts will introduce the principles of apparel design and construction for stage and screen costumes. Requirements for this course will include the complete construction of two items and the compilation of a sample notebook containing important construction techniques.

Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0  
When Offered: Fall, Spring

THR 300 - Voice and Speech I

Credits: 3 (NR)  
For performers, presenters, and anyone wishing to improve their speaking voice. Basic techniques in breathing, vocal production, and articulation utilizing modern text and Linklater voice progression exercises to free the natural voice. Junior or senior status recommended.
**Prerequisite(s):** THR 210 or permission of instructor.

**THR 301 - Advanced Study in Voice**

Credits: 3 (RD)
Addresses various topics in the techniques of vocal production for the actor with an emphasis on playing characters for stage, radio, voice-over, and screen.

**Prerequisite(s):** THR 300 or permission of instructor. Prerequisite enforced by registration system.

**Notes:** May be repeated for a total of 9 credits.

**THR 303 - Movement for Actors**

Credits: 3 (NR)
Develops physical side of actor's instrument emphasizing free and responsive expression of impulse and intention.

**THR 304 - Advanced Movement for Actors**

Credits: 3 (RD)
Advanced work in techniques established in THR 303.

**THR 305 - Stage Combat**

Credits: 3 (NR)
Studies safe, effective techniques for performing unarmed stage fights, falls, and rolls. Emphasizes acting the fight, safety, and storytelling.
Prerequisite(s): THR 210 and 310, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

THR 310 - Acting II

Credits: 3 (NR)
Extends principles begun in THR 210 through scene study, audition technique, and work in analysis, characterization, and relationships.

Prerequisite(s): THR 210 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

THR 313 - Event Technology

Credits: 3 (NR)
A theoretical and practical study of event technology. The course will include specifications, layout installation techniques and operation of sound systems, lighting systems and video systems for event industry sectors.

Prerequisite(s): THR 230 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall.

THR 314 - Lighting Stagecraft

Credits: 3 (NR)
Practical and theoretical instruction on becoming theatrical electrician. Includes ideas on workplace safety, basic electrical procedures, theatrical electrical production, integrating with other theater professionals, and professionalism.

Prerequisite(s): THR 230 or permission of instructor.

Corequisite(s): Must be concurrently enrolled in THR 200

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

THR 315 - Sound Engineering
Theoretical and practical study of audio production for theater and the entertainment industry. Students will have the opportunity to apply course material to live productions.

**Prerequisite(s):** THR 230 or permission of instructor

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**THR 320 - Performance Studio**

Credits: 3 (NR)
Builds on existing skills in observation, sense memory, relaxation, and improvisation. Students learn variety of methods for scene preparation to apply to their own acting process.

**Prerequisite(s):** THR 210 and 310, or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall, Spring

**THR 321 - Acting Shakespeare**

Credits: 3 (NR)
Develops understanding of challenges of performing Shakespeare by building on body of acting skills and knowledge. Focuses on how structure of language in plays reflects, reveals, and expresses character's emotional life. Students use detailed script analysis, expansion of vocal range, and use of actions and objectives to achieve experience of transforming Shakespeare's language into powerful theatrical expressions.

**Prerequisite(s):** THR 210 and 310, or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**THR 329 - Directing I**

Credits: 3 (NR)
Introduces text analysis, rehearsal procedure, staging techniques, and development of production idea. Students direct exercises and short scenes, and prepare written production notes.

**Prerequisite(s):** THR 150-151, 210, or 350; or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0
THR 330 - Seminar in Technical Theater

Credits: 3 (RT)
Offered periodically; addresses selected topic in design or technical theater on advanced level.

Prerequisite(s): THR 230 or permission of instructor. Rotating topic.

Notes: May be repeated for total 24 credits.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

THR 331 - Drafting and Model Making

Credits: 3 (NR)
Studies conventions and techniques of drafting and model making as methods of communication in the theatrical production process.

Prerequisite(s): THR 230 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

THR 332 - Costume for Stage and Screen

Credits: 3 (NR)
Explores evolution of fashion and styles of dress. Students study silhouette, color, fabric, accessories, and make-up appropriate to development of clothing during specific historical era. Offers broader understanding of context relating to sociological and psychological factors influencing Western dress. Historical era studied will rotate.

Notes: May be repeated for total 9 credits if specific course content differs.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

THR 333 - Stage Design

Credits: 3 (NR)
Fundamentals of creating, developing, and communicating design idea through sketches, plans, rendering, or models. Analysis of text from designer's perspective.

Prerequisite(s): THR 230 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
THR 334 - Lighting Design

Credits: 3 (NR)
Study of lighting design as art that defines space and reveals form. Introduces tools, equipment, and process of lighting design. Analyzes text from designer's perspective.

Prerequisite(s): THR 230.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

THR 335 - Costume Design

Credits: 3 (NR)
Project-oriented class emphasizing process of designing and building. Costume design studied in relation to historical periods and artistic demands of script. Includes lecture, lab in fundamentals of costume design for stage.

Prerequisite(s): THR 230 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

THR 336 - Advanced Technology Stage and Screen

Credits: 3 (NR)
Continuation of work begun in THR 230, stressing contributions of costumes, sound, and props to theatrical production. Intensive work in drafting for theater. Participation in theater division productions required.

Prerequisite(s): THR 230 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

THR 337 - Sound Design

Credits: 3 (NR)
Project-oriented class explores theory and practice of sound design including history, technology, script analysis, and auditory aesthetics.

Prerequisite(s): THR 230 or permission of instructor

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
THR 339 - Principles of Design

Credits: 3 (NR)
Introduction to the principles of theatrical design. Course explores various design responsibilities and methods to create visual images for the stage through script analysis, research, and production team collaboration.

Prerequisite(s): THR 230 or permission of instructor

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

THR 340 - Advanced Studies in Directing

Credits: 3 (NR)
With techniques developed in THR 329, students analyze and stage extended scenes or one-act plays. Emphasizes collaborative process and production organization.

Prerequisite(s): THR 240 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

THR 342 - Makeup Design

Credits: 3 (NR)
Project-oriented class emphasizing makeup for different performance spaces, character age analysis, facial anatomy, and specialized application for theater, opera, dance, film, and television.

Prerequisite(s): THR 230 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

THR 343 - Costume Pattern Drafting

Credits: 3 (NR)
Pattern development through draping and drafting. Laboratory study and practical experience in construction of stage costumes.

Prerequisite(s): THR 235 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
THR 345 - Puppetry: History and Technique

Credits: 2-4 (NR)
In context of comprehensive and intensive exploration of world puppetry, course experiments with building and performance styles. Emphasizes hand and rod puppets, shadow work, toy theater, and bunraku-style figures. Students develop, build, and present original work.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 4

THR 350 - Script Analysis

Credits: 3 (NR)
Critical analysis of dramatic literature as preparation for production and performance. Examination of plot, character, theme, audience impact, and cultural context, and the transformation of intellectual ideas into physical theatrical production elements.

Fulfills writing intensive requirement in the major.

Notes: Writing intensive course.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

THR 351 - Dramatic Theory and Criticism

Credits: 3 (NR)
Chronological study of development of dramatic theory and criticism from Plato and Aristotle through modern movements. Students read plays, theoretical works, and critical responses, and write original criticism of performances or texts.

Prerequisite(s): THR 150 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

THR 352 - Dramatic Literature Seminar

Credits: 3 (RT)
Rotating topic. Intensive study of particular topic, period, or genre in dramatic literature.

Notes: May be repeated for a total of 9 credits if specific course content differs.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
THR 355 - Moral Vision in American Theater

Credits: 3 (NR)
Examines vision of American society created and presented in contemporary American theater. Subject defined as "moral" vision because focus is on how we perceive ourselves in relation to others and society's value standards. Perspectives include sociology, theory of culture, practical theater craft, and literary criticism. Features plays by range of American playwrights.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

THR 359 - World Stages

Credits: 3 (NR)
Introduces variety of theatrical traditions and performance theories from around the world, with special emphasis on those not covered in introductory Western drama survey courses, 150 and 151. Students read and discuss dramatic texts, performance theory, and video clips to understand variety of theatrical traditions in cultural and historical contexts. Requirements include two team presentations (taking turns as writer and presenter), one midterm paper, and one solo presentation with accompanying paper.

Fulfills general education requirement in global understanding.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

THR 365 - Characterization

Credits: 3 (NR)
Explores method and approach of understanding and creating characters for theater modeled on people from personal experience and observation, imagination, dreams, and other media. Transforms that information into detailed, specific, and vivid physical manifestations. Through presentations of characters drawn from personal experience, students shift understanding of characterization from "outward directed" physical adjustments to physical characteristics and personality character traits that are immediate, familiar, and completely realized from "inner driven" connections to their own lives.

Prerequisite(s): THR 210.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

THR 380 - Playwriting I

Credits: 3 (RD)
Exposure to principles of dramatic writing, including character, plot, dramatic structure, dialogue, exposition, setting, and creating theatrical images using examples from plays, screenplays, and students' own work.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 3
When Offered: Fall.

**THR 381 - Playwriting II**

Credits: 3 (RD)
Intensive continuation of work begun in THR 380.

Prerequisite(s): THR 380 or permission of instructor.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 3
When Offered: Spring

**THR 382 - Screenplay Workshop**

Credits: 3 (NR)
Studies screenwriting as dramatic form of 20th, 21st centuries. Explores story, plot structure, three act-structures, mythic structures, fundamental story patterns, character, thinking, and writing visually.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**THR 395 - Theater as the Life of the Mind**

Credits: 3 (NR)
Traces four subjects (battle of the sexes, good gifts, cyclical tragedy, and eschatology) from ancient theater to contemporary plays, television, and movies, using literary criticism, history, political theory, comparative religion, sociology, and anthropology.

Fulfills general education requirement in arts.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**THR 405 - Advanced Stage Combat**

Credits: 3 (RD)
Armed Stage Combat techniques are explored, unarmed techniques solidified, and advanced choreography mastered in this study of safe and effective theatrical storytelling through violence for Stage and Screen appropriate towards national certification as Actor-Combatant.

Prerequisite(s): THR 305 or permission of instructor.

Hours of Lecture or Seminar per week: 3
THR 410 - Acting for the Camera

Credits: 3 (NR)
Designed for students with a strong interest in pursuing a professional career in acting and is focused primarily on the particular techniques for screen acting in film and television.

Prerequisite(s): Must have completed THR 310 with a grade of C or better. Prerequisite enforced by registration system.

Notes: This class is restricted to Theater majors and minor only.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring

THR 411 - Directing on Screen

Credits: 3 (NR)
Investigates directing for dramatic storytelling on screen in its historical and contemporary contexts and focuses on specific stages of creative development in movie-making. Students will be required to demonstrate their understanding in oral, written, and creative presentations.

Fulfills general education requirement in Arts.

Prerequisite(s): Sophomore standing (30 credit hours completed).

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

THR 412 - Performance on Screen

Credits: 3 (NR)
An examination of acting theories and practices associated with screen performances. Topics include evolution of acting theories and practices adapted from stage for screen, methods of analyzing screen performance, and understanding performance style and genre. Students will develop a more sophisticated appreciation for screen performance and be encouraged to demonstrate their understanding in oral, written, and performance presentations.

Fulfills general education requirement in Arts.

Prerequisite(s): Sophomore standing (30 credit hours completed).

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring
THR 420 - Advanced Performance Studio

Credits: 3 (RD)
Develops performance techniques and skills for the stage and screen with emphasis on acting process and scene study for the advanced student.

Prerequisite(s): Must have completed THR 320 with a grade of C or better. Prerequisite enforced by registration system.

Notes: Course is repeatable to 9 credits.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

THR 421 - One-Person Show

Credits: 3 (NR)
Students work with designated faculty in creative writing, staging, and performance culminating in the successful writing, rehearsing, and performing of a one-person show.

Prerequisite(s): THR 210 and THR 310 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

THR 423 - Audition Techniques: Stage and Camera

Credits: 3 (NR)
Professional directors, coaches, and casting directors offer perspectives on what makes an effective and honest audition. Students prepare a repertoire of pieces for stage and camera auditions.

Prerequisite(s): THR 310 or equivalent, or permission of instructor. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

THR 424 - Contemporary Women Playwrights

Credits: 3 (RD)
Explores identity and culture, sexuality and gender, work, relationships, and power through the eyes of female dramatists and performance artists. Analyzes texts and issues through readings, video, and live performances.

Prerequisite(s): Junior standing, or permission of instructor.
THR 425 - Verse Speaking

Credits: 3 (NR)
Explores verse literature and mechanics of verse structure through reading, discussing, and reciting major verse plays of Western drama from the Middle Ages through the 20th century. Focuses on various verse forms, paying particular attention to vocal clues within verse structure, the meaning of rhythm, and practicing vocal techniques used in speaking texts in class. Students also prepare weekly presentations of playwrights, and historical backgrounds of plays and their periods.

Prerequisite(s): THR 210 and 310, or permission of instructor.

THR 427 - Musical Theater Workshop

Credits: 3 (RD)
Develops performance techniques necessary for performance in musical theater. Students will prepare and perform musical theater pieces. This course is repeatable to twelve (12) credits.

THR 434 - Advanced Lighting Design

Credits: 3 (NR)
In-depth study of lighting design. Work with lighting distribution, composition, and color to create compelling visual pictures and moods. Extensive work with script analysis as related to lighting, drafting of light plots, and the generating associated paper work used by lighting designer.

Prerequisite(s): THR 230 and 334, or permission of instructor.

THR 440 - Advanced Studies in Directing/Dramaturgy

Credits: 3 (NR)
Examines theory and practice of collaborative development of production ideas by director and dramaturg teams. Students draw from extensive study in field to support production ideas from classical and modern repertoire to be presented as written and oral projects before faculty panel.
Fulfills general education requirement in synthesis.

Prerequisite(s): Junior or senior standing; completion of or concurrent enrollment in all general education courses; THR 150 or THR 151, and THR 329; or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

THR 448 - Foundations of Theater Education

Credits: 3 (RD)
Introduces and explores various theater teaching specialties. Examines philosophical, pedagogical, and practical issues in context of diverse teaching situations and venues that range from public school to undergraduate and graduate training to commercial establishments.

Prerequisite(s): Junior standing (60 credit hours completed) and Theater Teaching Concentration admission requirements or permission of the instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

THR 449 - Elementary Theater Education

Credits: 3 (RD)
An in-depth exploration of teaching methods and classroom management for PK-6 theater education.

Prerequisite(s): Junior standing (60 credit hours completed) Theater Teaching Concentration admission requirements or permission of the instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring

THR 450 - Secondary Theater Education

Credits: 3 (NR)
This course explores teaching methods for theater that are appropriate for all students, including exceptional students, gifted and talented, and those with disabling conditions. It will cover requirements of the Virginia Theater Standards of learning, curriculum and instructional procedures for secondary grades 6-12 (both middle and secondary schools).

Prerequisite(s): Junior standing (60 credit hours completed) Theater Teaching Concentration admission requirements or permission of the instructor.

Hours of Lecture or Seminar per week: 3
**THR 451 - Theater Pedagogy**

Credits: 2 (RD)
This advanced exploration of teaching methods for K-6 enrichment programming includes classroom hours devoted to pedagogy and field study for practical application, leadership and administration for independent arts programming.

**Prerequisite(s):** Sophomore standing and enrollment in Theater Education concentration; or permission of instructor.

**Hours of Lecture or Seminar per week:** 2  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall

**THR 455 - Practical Teaching Experience**

Credits: 4-12 (RD)  
Full semester of supervised teaching experience in approved school programs PK-12. Credits based on number of teaching contact hours per week.

**Prerequisite(s):** Successful completion of Theater Teaching Concentration Coursework and students must pass the VCLA before student teaching (and the Praxis II (Theater: Content Knowledge) test during the internship semester).

**Hours of Lecture or Seminar per week:** 4-12  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall

**THR 480 - Advanced Playwriting**

Credits: 3 (RD)  
Advanced playwriting workshop in which students explore their own voice in theatrical writing.

**Prerequisite(s):** THR 381, or permission of instructor.

**Hours of Lecture or Seminar per week:** 0  
**Hours of Lab or Studio per week:** 3  
**When Offered:** Fall, Spring.

**THR 482 - Advanced Screenplay Workshop**

Credits: 3 (RD)  
Screenwriting workshop emphasizing student development in screenplay form, structure, and storytelling with emphasis on craft, character, and story culminating in a screenplay.
Fulfills writing intensive requirement in the major.

**Prerequisite(s):** THR 382 or ENGL 332/ENGH 372 or other writing preparation course as approved by the instructor.

**Hours of Lecture or Seminar per week:** 0  
**Hours of Lab or Studio per week:** 3  
**When Offered:** Fall, Spring

**THR 484 - Translation & Adaptation for Stage & Screen**

Credits: 3 (NR)  
This interdisciplinary course will introduce students to the arts of translation and adaptation for the stage and screen. Students will read examples of translations and adaptations, identify challenges in each, and discuss them with professionals who translate or adapt works for theater, film and/or opera. Students are also expected to apply their skills to one short and one long translation/adaptation project, and present their work to the class.

**Prerequisite(s):** Junior standing

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**THR 490 - Special Topics in Drama**

Credits: 1-6 (RT)  
Rotating topic. Advanced seminar in topics of special interest, including dramatic writing or other media, and feminism in contemporary theater.

**Notes:** May be repeated for a total of 24 credits, provided specific course content differs.

**Hours of Lecture or Seminar per week:** 1-6  
**Hours of Lab or Studio per week:** 0

**THR 491 - Seminar in the Profession**

Credits: 1-3 (RD)  
Acquaints upper-division students with realities of living and working in the theater. Students develop portfolio materials specific to the demands in their areas of interest.

**Prerequisite(s):** Student must have completed at least 60 credit hours.

**Notes:** Repeatable to 6 credits with permission of the Chair. Rotating Topics. Dependent on credits hours offered, class time will vary from 1 hour to 2 hours, 40 minutes.

**Hours of Lecture or Seminar per week:** 1-3  
**Hours of Lab or Studio per week:** 0
THR 492 - Studio Project

Credits: 1-3 (RD)
Required for students assigned as director, designer, dramaturg, or stage manager for a Mason Players Studio production. Instruction and mentorship from appropriate Theater faculty to better develop the student's aesthetic. Required generation of portfolio material. This class is restricted to students participating in Studio productions within the academic year of the course offering.

Prerequisite(s): THR 329 or THR 333 or THR 334 or THR 335 or THR 337.

Notes: This course is repeatable to 9 credits.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

THR 493 - Collaborative Lab Experience

Credits: 3 (NR)
Students will collaborate in a laboratory experience to create original material for the stage or screen. Course content will be project specific.

Prerequisite(s): Theatre major with junior standing (60 credit hours completed).

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
Grading: Satisfactory/No Credit only
When Offered: Fall

THR 494 - Field Experience

Credits: 1-6 (RT)
Experience in a theatrical organization to provide opportunity to apply classroom training, knowledge, skills, and theory in a professional situation. Activity must be approved by department chair.

Prerequisite(s): Involves off-campus experience with a professional theater. Students must obtain permission of instructor prior to registering.

Notes: May be repeated for a total of 12 credits.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0
Grading: Satisfactory/No credit only
THR 495 - Senior Capstone Project

Credits: 3 (RD)
Student must submit a written project proposal to area of concentration for consultation. If accepted, proposal will be presented to the full faculty for approval.

Prerequisite(s): Must have declared a concentration, have completed at least 60 credit hours, and must have completed 4 credits of Practicum.

Notes: Production proposals will be subject to calendar availability. Course is repeatable to 6 credits with permission of Chair.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

THR 496 - Text in Production

Credits: 3 (NR)
In-depth investigation of collaborative nature of theatrical arts. Examines discrete creative disciplines; acting, directing, dramaturgy, and design as discussed by distinguished professionals and scholars. In-depth exploration of one selected playscript for the entire semester. Students will work collaboratively in small groups to research, design, direct, and perform scenes from selected text.

Fulfills general education requirement in synthesis.

Prerequisite(s): Completion or concurrent enrollment in all theater core courses and all other required general education courses, and junior standing; or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

THR 497 - Independent Study

Credits: 1-6 (RT)
Individual research and creative project in close consultation with instructor. Selection from projects in performance, directing, technical theater and design, playwriting, or theater history and criticism.

Prerequisite(s): Open only to theater majors with 90 credits and special permission of department chair

Notes: May be repeated for a total of 24 credits, provided suffix citing specific course content is different

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0

THR 525 - Advanced Musical Theater Workshop
Students hone performance techniques necessary for performance in musical theater and contemporary operetta. Students will practice and perform musical theater pieces.

Notes: Course is repeatable to 6 credits.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

**THR 530 - Advanced Design**

Credits: 3 (RD)
This course will continue the principles and terminology used in the process of design for the stage and film. The student will explore all aspects of design and the concepts used to develop productions. Design projects will emphasize research of specific historical periods, production paper work, and effective communication and design presentation skills.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
Grading: Graduate Special
When Offered: Fall, Spring

**THR 540 - Directing Techniques**

Credits: 3 (RD)
As an examination of the directorial process for stage and screen, this course will explore directing theory, preparation, and practice.

Notes: This course is repeatable to six (6) credits.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

**THR 548 - Advanced Foundations of Theater Education**

Credits: 3 (RD)
Explores various theater teaching specialties in venues that range from public school to undergraduate and graduate training to commercial establishments.

Prerequisite(s): Graduate standing, eligibility for post-baccalaureate certificate in Theater Education or permission of the instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall
THR 549 - Advanced Elementary Theater Ed

Credits: 3 (RD)
An in-depth exploration of teaching methods and classroom management for PK-6 theater education combined with advanced managerial skill training.

Prerequisite(s): Graduate standing, eligibility for post-baccalaureate in Theater Education Licensure, or permission of the instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring

THR 550 - Advanced Secondary Education

Credits: 3 (NR)
This course explores teaching methods for theater that are appropriate for all students, including exceptional students, including gifted and talented and those with disabling conditions. It will cover requirements of the Virginia Theater Standards of Learning, curriculum and instructional procedures, as well as theater classroom management, for secondary grades 6-12 (both middle and secondary schools).

Prerequisite(s): Graduate standing, eligibility for post-baccalaureate certificate in Theater Education, or permission of the instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

THR 551 - Advanced Theater Pedagogy

Credits: 3 (NR)
Advanced concepts in teaching methods for K-6 enrichment programming based on further exploration of multiple intelligences, including classroom pedagogy and field study for practical application of curriculum and administrative skills.

Prerequisite(s): Graduate standing, eligibility for post-baccalaureate certificate in Theater Education or permission of the instructor.

Notes: Graduate standing, eligibility for post-baccalaureate certificate in Theater Education or permission of the instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring

THR 555 - Practical Teaching Experience
Credits: 4-12 (RD)
Full semester of supervised teaching experience in approved school programs PK-12. Credits based on number of teaching
contact hours per week.

Prerequisite(s): Successful completion of Theater Teaching Concentration Coursework and students must pass the VCLA and
Praxis I prior to the internship semester.

Hours of Lecture or Seminar per week: 4-12
Hours of Lab or Studio per week: 0
When Offered: Fall

THR 560 - Advanced Script Analysis

Credits: 3 (NR)
Critical analysis of dramatic literature as preparation for production and performance. Examination of plot, character, theme,
audience impact, and cultural context, and the transformation of intellectual ideas into physical theatrical production elements.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

THR 571 - Advanced Playwriting Workshop

Credits: 3 (NR)
Advanced playwriting workshop in which students explore their own voice in theatrical writing.

Prerequisite(s): Undergraduate degree or equivalent, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

THR 590 - Special Topics

Credits: 1-6 (RD)
Rotating topic. Advanced seminar in topics for stage and screen studies, including education, performance, design, research,
writing, and styles in theater or other media.

Notes: May be repeated up to 18 credits with special permission of department chair.

Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

THR 591 - Advanced Seminar in the Profession
Credits: 1-3 (RD)
Acquaints students with realities of living and working in the theater. Students develop portfolio materials specific to the demands in their areas of interest.

Notes: Repeatable to 6 credits with special permission of the department chair.
Rotating Topics. Dependent on credits hours offered, class time will vary from 1 hour to 2 hours, 40 minutes.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

THR 599 - Independent Study

Credits: 1-6 (RD)
Independent reading, performance, or research on a specific project under direction of selected faculty member. May include attendance in a parallel undergraduate course.

Prerequisite(s): Undergraduate degree or equivalent, or permission of instructor.

Notes: May be repeated for a total of 18 credits.

Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 0

THR 610 - Acting Mentorship

Credits: 3 (NR)
This class gives students the chance to work with a faculty mentor while they apply their acting skills to a full-length public performance. Students create a record of the creative process through mentored practical production assignments. Actors enrolled in this course must receive prior approval for their projects for the stage or screen and will be expected to submit a written reflection on the complete acting process.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

THR 620 - Acting Techniques

Credits: 3 (RD)
Students explore selected acting techniques for stage and screen. Topics vary from scene work to specialty areas—such as movement, voice and style—with an emphasis on developing bold physical, psychological and emotional expression.

Notes: Repeatable up to 12 credits.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring
THR 640 - Directing Mentorship

Credits: 3 (NR)
This class gives students the chance to work with a faculty mentor while they apply their directing skills to a full-length public performance. Students create a record of the creative process through mentored practical production assignments. Directors enrolled in this course must receive prior approval for their projects for the stage or screen and will be expected to submit a written reflection on the full directorial process.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

THR 651 - Advanced Dramatic Theory and Criticism

Credits: 3 (NR)
A chronological study of development of dramatic theory and criticism from Plato and Aristotle through modern movements. Students read plays, theoretical works, and critical responses, and write original criticism of performances or texts. They also take turns leading critical texts, meet one-on-one with their instructor for individualized mentoring, and prepare at least one essay for publication.

Prerequisite(s): Graduate standing or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

Tourism and Events Management (TOUR)

Offered by the College of Education and Human Development

TOUR 110 - Professionalism and Civility

Credits: 1 (NR)
Focuses on developing competencies in the areas of professionalism and civility in a variety of settings including professional image, conduct at work, telephone, written, oral, and electronic etiquette, table manners, and social networking with an emphasis on the cultural needs for honoring commitments and obligation.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0

TOUR 190 - Wedding Planning
Credits: 3 (NR)
Introduction to the planning and management of weddings. Explores social, political, economic, cultural, religious, and historical influences on wedding planning decision-making and business strategies. Reviews practices relevant to successful wedding planning, and consultancy for diverse clients and settings.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

TOUR 200 - Introduction to Travel and Tourism

Credits: 3 (NR)
Introduction to travel and tourism from local to international levels. Overview of the scale, scope, and organization of the industry, with emphasis on the development of natural, cultural, heritage, and recreational resources of tourism. Identifies issues related to the economic, technological, legal, and political aspects of tourism.

Notes: Open to nonmajors.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

TOUR 210 - Global Understanding through Travel and Tourism

Credits: 3 (NR)
Examines tourism as a global industry and human activity that promotes and facilitates understanding of historical and cultural values, and of international institutions that characterize the broader global system.

Fulfills general education requirement in global understanding.

Notes: Open to nonmajors.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

TOUR 220 - Introduction to Event Management

Credits: 3 (NR)
Explores principles and practices of managing medium- and large scale events including festivals, conventions, concerts, shows, sporting events, and ceremonies. Emphasizes organization, site preparation, communications, personnel, and security as well as evaluation and innovation.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

TOUR 221 - Event Implementation and Evaluation
Introduction to event implementation and evaluation through involvement in on-site event delivery and analysis. Studies participant motivation and economic, social, environmental, and cultural impacts in relation to an event's products and services.

**Prerequisite(s):** TOUR 220. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0

**TOUR 230 - Introduction to Hospitality Management**

Credits: 3 (NR)  
This course is an introduction to hospitality management, including an overview of management in the hospitality industry and professional opportunities. The concepts and practices of hospitality management are examined and discussed. The scope and forms of hospitality organizations are reviewed, as well as trends within these organizations.

Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0

**TOUR 241 - Practicum**

Credits: 3 (NR)  
Provides 120 hours of supervised professional experience in an approved tourism or event management setting under the supervision of a practicum University Supervisor and Agency Supervisor.

**Prerequisite(s):** TOUR 200, TOUR 220, sophomore standing, and TOUR major status. Prerequisite enforced by registration system.

**Notes:** TEM majors only

Hours of Lecture or Seminar per week: 1-6  
Hours of Lab or Studio per week: 3  
**Grading:** Satisfactory/No Credit

**TOUR 301 - Hotel Management**

Credits: 3 (NR)  
Explores interrelated systems in hotel management, including front desk, reservations, housekeeping, food/beverage, telecommunications, guest services and security. Reviews and segments hotel products and associated management challenges.

**Prerequisite(s):** TOUR 230. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0  
**When Offered:** Fall
TOUR 310 - Food and Beverage Management

Credits: 3 (NR)
Explores the principles of foodservice management regarding production and selling of food and beverage products. Categorizes various types of food, wine, beer and spirits. Reviews foodservice buying, pricing, menu planning, production, storage, service, controls and quality assurance.

Prerequisite(s): TOUR 230. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

TOUR 311 - Women and Tourism

Credits: 3 (NR)
Open to nonmajors. Approved general education requirement. Focuses on women as hosts and guests. Using social theory, explores issues regarding the history and evolution of tourism as a gendered system. Addresses family, solo and business travel, and employment, taking into consideration issues related to more and lesser developed countries as they relate to the roles of women in international tourism.

Fulfills general education requirement in social and behavioral science.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

TOUR 312 - Ecotourism

Credits: 3 (NR)

Analyzes tourism that is nature-based and entails a learning component while striving for environmental and sociocultural sustainability within the context of financial viability. Considers markets, role of protected areas, impacts, business aspects, external environments, organizations and policies, and research trends and needs.
Designated a Green Leaf Course.

Prerequisite(s): TOUR 200 Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

TOUR 313 - Event Technology

Credits: 3 (NR)
Explores theoretical and practical considerations of event technology. Examines specifications, layout installation techniques and operation of sound systems, lighting systems and video systems for event industry sectors.
**TOUR 320 - Hospitality Management Information Systems**

Credits: 3 (NR)
Introduces management information systems (MIS) technology and its application to hospitality sectors from managerial and strategic perspectives. Surveys computer applications, products and trends in gathering, analyzing, storing and communicating information within hospitality sectors.

Prerequisite(s): TOUR 230. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring

**TOUR 330 - Resort Management**

Credits: 3 (NR)
Surveys effective practices in the management of resort recreation enterprises. Examines basic resort operations, including front desk, food and beverage, amenities, and housekeeping. Covers management of a variety of resort types, such as ski resorts, beach resorts, dude ranches, business retreats, adventure camps, health spas, and golf resorts.

Prerequisite(s): TOUR 200 and TOUR 220 Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**TOUR 340 - Sustainable Tourism**

Credits: 3 (NR)

Considers the characteristics of environmentally, economically, and socioculturally sustainable tourism, and assesses the possibilities and limitations for its implementation in a variety of destination and product settings. Emphasizes conventional "mass" tourism as well as small-scale "alternative" tourism.

Designated a Green Leaf Course.

Prerequisite(s): TOUR 200 and TOUR 220 Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
TOUR 352 - Heritage and Cultural Tourism

Credits: 3 (NR)
Analyzes historical and cultural attractions, including museums, canals, monuments, pilgrimage sites, military sites, and cultural and heritage landscapes. Covers presentation and interpretation, African-American and Native American heritage, management and operational considerations, and marketing.

Prerequisite(s): TOUR 200 and TOUR 220 Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

TOUR 362 - Cultural and Environmental Interpretation

Credits: 3 (NR)
Focuses on communication processes and practices used by professionals to explain and interpret special characteristics of cultural and environmental resource sites for visitors. Discusses conceptual principles for planning interpretive programs, as well as techniques for analyzing and disseminating information and entertainment through various media. Examines delivery of interpretive messages across a variety of audiences, strategies for programming interpretive services, and the administration and evaluation of interpretive services at tourism, event, and recreation sites.

Prerequisite(s): PRLS 300, or PRLS 328, or TOUR 352

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

TOUR 412 - Tourism and Events Marketing

Credits: 3 (NR)
Provides understanding and tools for marketing and management of financial resources in entrepreneurial tourism enterprises. Includes market planning, business planning, feasibility assessment, investment analysis, basic accounting, and operational control.

Prerequisite(s): TOUR 200, TOUR 220, PRLS 310, and PRLS 410 Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

TOUR 414 - Tourism and Events Finance

Credits: 3 (NR)
Develops skills and competencies for the management of financial resources in tourism and events management enterprises. Students learn about business planning, feasibility assessment, investment analysis, and basic accounting and operational control, with special emphasis on application to this unique industry.

Prerequisite(s): TOUR 200, TOUR 220, PRLS 310, and PRLS 410 Prerequisite enforced by registration system.
TOUR 416 - Hospitality Sales

Credits: 3 (NR)
Explores the principles of personal selling within hospitality sectors. Reviews the nature of buyers and sellers, situational selling, the sales process and relationship management.

Prerequisite(s): TOUR 230, PRLS 410. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

TOUR 418 - Hospitality Accounting

Credits: 3 (NR)
Reviews concepts and methods related to the collection, processing, and interpretation of accounting data for managerial planning, control and evaluation as applied to hospitality enterprises.

Prerequisite(s): TOUR 230, PRLS 410. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring

TOUR 420 - Tourism Planning/Policy

Credits: 3 (NR)
Principles of planning and policy that apply to integrated and sustainable tourism development at the international, national, state, regional, local, and site scale. Considers government, industry, and community perspectives.
Designated a Green Leaf Course.

Prerequisite(s): PRLS 310 and TOUR 340 Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

TOUR 440 - Meetings and Conventions
Credits: 3 (NR)
Analyzes meetings, incentives, conventions, and exhibitions with respect to business environment and structure, industry
suppliers, site and facility selection, human resource management, legal and financial issues, marketing and promotion, and event
organization.

Prerequisite(s): TOUR 220 and PRLS 310. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

TOUR 450 - Hospitality Human Resources Management

Credits: 3 (NR)
Reviews concepts and methods related to the achievement of strategic business goals through employee recruitment, training and
development.

Prerequisite(s): PRLS 410. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring

TOUR 460 - Hospitality Facilities Operations

Credits: 3 (NR)
Explores the principles applied to facilities systems operations in hospitality sectors. Considers design, planning, layout and
maintenance of hospitality properties and systems.

Prerequisite(s): TOUR 340. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring

TOUR 470 - Senior Seminar

Credits: 1 (NR)
Capstone educational experience focuses on current issues in tourism and event management, and career development strategies.

Prerequisite(s): TOUR 241, TOUR 340 and PRLS 410. Prerequisite enforced by registration system.

Notes: Only for TEM majors with senior status.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0
TOUR 480 - Special Topics

Credits: 1-3 (RT)
Selected topics reflect interest in specialized area of tourism and events management. Announced in advance.

Prerequisite(s): 60 credits

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0

TOUR 490 - Internship

Credits: 12 (NR)
Supervised professional experience provides a continuous and structured opportunity to apply principles and skills developed in the classroom to the solution of practical problems in the tourism and events management industry. Provides a paid or voluntary full-time work experience in an approved tourism or event management setting for a minimum of 10 to 12 weeks. Includes meetings and assignments before and during the internship.

Prerequisite(s): Open to majors only. 90 credits, TOUR 241, TOUR 340 and PRLS 410. Prerequisite enforced by registration system.

Notes: Open only to majors.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 12
Grading: Satisfactory/No Credit

TOUR 499 - Independent Study

Credits: 1-3 (NR)
Faculty directed independent study of approved topics in tourism and events management.

Prerequisite(s): TOUR 200 and 220, and 90 credits.

Notes: TEM majors only.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0

TOUR 540 - Sustainable Tourism Management

Credits: 3 (NR)

Examines components and interrelationships within tourism systems and assesses the potential economic, sociocultural, and environmental impacts associated with this sector. Considers managerial strategies that minimize the negative impacts and maximize the positive impacts, thereby attaining sustainable tourism.
Designated a Green Leaf Course.

**TOUR 710 - Advanced Administrative Practices in Tourism and Events**

Credits: 3 (NR)
Explores best practices in the administration of tourism and events businesses. Particular emphasis will be placed on contract management, and strategic planning for dynamic markets and changing technologies, with specific applications to geographically dispersed consumers and suppliers.

**TOUR 712 - Marketing Tourism and Event Planning Services**

Credits: 3 (NR)
Focuses on the unique challenges and opportunities faced by tourism and event marketers in producing, delivering, pricing, and promoting tourism and event services.

**TOUR 720 - Major Events and Convention Management**

Credits: 3 (NR)
Prepares graduate students for managing large scale events such as major festivals, conventions, sporting contests, cultural exhibitions, and commercial exhibitions. Management of human financial, information, and technology resources will be emphasized.

**Turkish (TURK)**

**TURK 110 - Elementary Turkish**

Credits: 6 (NR)
Introduces elements of grammar, vocabulary, oral skills, listening comprehension, and reading.
TURK 210 - Intermediate Turkish

Credits: 3 (NR)
Continuation of the development of basic components of the language, with focus on listening, speaking, reading, and writing skills. Introduces students to the cultures and histories of Turkish-speaking regions.

Prerequisite(s): TURK 110, appropriate placement score, or permission of department.

University/Interdisciplinary Studies (UNIV)

UNIV 101 - Freshman Academic Transition

Credits: 0-2 (RT)
This seminar focuses on academic transition and development issues for second semester freshmen. A special emphasis is placed on resources and techniques to assist students with assessing and improving their academic performance. Students will work closely with their instructor to track their academic progress over the course of the semester.

UNIV 190 - Freshman Seminar

Credits: 3 (RT)
Broad interdisciplinary subjects taught by Robinson Professors; topics vary.

Prerequisite(s): Freshman standing, minimum 3.3 cumulative GPA or permission of instructor.

Notes: Courses may be repeated for up to 12 credits.
Credits: 3 (NR)
Nontechnical introduction to ideas that have shaped the growth of science, from the building of Stonehenge to modern theories of the Big Bang. The idea behind each major advance is treated in its historical context, with special attention to its importance in mankind's understanding of the nature of the universe. Intended for nonscience majors; uses little mathematics.

Fulfills general education requirement in natural science (nonlab).

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

UNIV 391 - Students as Scholars Scholarly Inquiry

Credits: 0-9 (RD)
Students contribute to scholarly, research, or creative projects by engaging in the recursive process of scholarly inquiry as preparation for participation in an individualized original project. Students will hold regular meetings with their project mentor, and make satisfactory contributions to the project.

Notes: Enrollment only with permission from OSCAR.

Hours of Lecture or Seminar per week: 0-9
Hours of Lab or Studio per week: 0
Grading: Satisfactory/No Credit
When Offered: Fall, Spring.

UNIV 442 - Krasnow Seminar

Credits: 3 (NR)
Interdisciplinary seminar offering a window on the latest advances and research related to cognitive science, an interdisciplinary field of inquiry that seeks to understand the nature, basis, and origins of human consciousness, thinking, and cognition.

Fulfills general education requirement in synthesis.

Prerequisite(s): ENGL 302/ENGH 302, COMM 100, 101, or 104, completion of or concurrent enrollment in all other required general education courses, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

UNIV 491 - Students as Scholars Individualized Scholarly Experience

Credits: 0-9 (RD)
Students actively participate in the process of scholarship and make a significant contribution to the creation of scholarly, research, or creative project. Students will meet regularly with their project mentor, make satisfactory progress towards the completion of the project, and create a disciplinary product for evaluation.

Designated as a research and scholarship intensive course.
Notes: Enrollment only with permission from OSCAR.

Hours of Lecture or Seminar per week: 0-9
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

UNIV 495 - Undergraduate Research Scholars Program Seminar

Credits: 3 (NR)
Students accepted into Undergraduate Research Scholars Program participate in a weekly seminar, hold regular meetings with mentor, and make satisfactory progress on their research or creative project. At the end of the semester, students either complete their project and present the results in a professional context, or apply for continuation through UNIV 496. See oscar.gmu.edu for more information and application.

Designated as a research and scholarship intensive course.

Notes: Enrollment only with acceptance into the URSP through OSCAR.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

UNIV 496 - Undergraduate Research Scholars Program Continuation

Credits: 0 (RD)
Students continuing their participation in the Undergraduate Research Scholars Program hold regular meetings with mentor and make satisfactory progress on their research or creative project. At the end of the semester, either complete their project and present the results in a professional context, or apply for continuation. See oscar.gmu.edu for more information and application.

Designated as a research and scholarship intensive course.

Prerequisite(s): UNIV 495.

Notes: Enrollment only with acceptance into the URSP through OSCAR.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 9
When Offered: Fall, Spring

University Transition

UNIV 100 - Freshman Transition
Credits: 0-2 (NR)
Assists freshmen with their transition to college life. Helps freshmen adjust academically and socially, hone decision-making skills, learn about resources, and explore opportunities for involvement on campus. Although all classes have a core body of knowledge, the special topics sections also focus on a particular theme or course of study. A transition course for students of freshman standing.

Prerequisite(s): Freshman standing. An outdoor team development event is a component of every UNIV 100 section.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 0

UNIV 200 - Sophomore Transition

Credits: 0-2 (NR)
Major and Career Decisions focuses on helping students clarify or choose a major or career. Exploration of one’s own interests and skills, as well as an exploration of various majors, careers, and the world of work is undertaken in this course. A transition course for students of second semester freshman standing or higher.

Prerequisite(s): UNIV 100 or sophomore through junior standing. Students who miss more than the first class meeting of any UNIV 200 section will not be allowed to enroll.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 0

UNIV 300 - University: Junior Transition

Credits: 0-2 (RT)
This course has three tracks. Transfer Transitions is for transfer students making the transition to a new university. Internship and Career Readiness focuses on career readiness for internships and research assistantships. Peer Leadership is designed for specific groups of student leaders. A transition course for students of second semester sophomore standing or higher.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 0

UNIV 400 - Senior Transition

Credits: 0-2 (RD)
Emphasizes preparation for the workplace and College to Graduate School emphasizes preparation for graduate school. A transition course for students of second semester junior standing or higher.

Prerequisite(s): Second semester junior standing or higher.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 0
Urban and Suburban Studies (USST)

Offered by the College of Humanities and Social Sciences

**USST 301 - Urban Growth in a Shrinking World**

Credits: 3 (NR)

Examines process of urbanization historically and comparatively. For major world regions, attention is given to the political economy of urbanization and its impact on social and economic relations. Examines growing globalization of the world economy, implications for urban life, and urban political economy of the future. Designated a Green Leaf Course.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**USST 390 - Special Topics in Urban and Suburban Studies**

Credits: 3 (NR)
Subject varies according to specialization of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**USST 401 - Seminar: The Future of Metropolitan America**

Credits: 3 (NR)
Examines trends in the development of American metropolis, including impact of information economy and technological developments on metropolitan form and life, continuing outward growth and increasing decentralization of metropolitan areas, changing functional organization of urban space, and continued social segregation in metropolitan areas. Analyzes contemporary predictions about future of metropolitan life in America, and explores how alternative public policies can shape that future. Students work on research projects in metro area.

Prerequisite(s): 12 credits of USST-approved courses, including USST 301.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**USST 490 - Internship**

Credits: 3 (NR)
Approved work-study programs that focus on urban and suburban issues with an approved agency or firm. Placement depends on
student qualifications and availability of positions. Students work with onsite supervisor and coordinator of urban and suburban studies.

**Prerequisite(s):** Open only to students with 12 credits of USST; see USST coordinator

**Hours of Lecture or Seminar per week:** 1  
**Hours of Lab or Studio per week:** 0

### Women and Gender Studies (WMST)

Offered by the College of Humanities and Social Sciences

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credits</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>WMST 100</td>
<td>Representations of Women</td>
<td>3 (NR)</td>
<td>Explores ways women are portrayed in advertising, television, film, photographs, cartoons, performance arts, literature, religious texts, and news media from various worldwide sources. Through interdisciplinary study students will evaluate the powerful effects these representations have on the political, economic, and social lives of women throughout the world. Fulfills general education requirement in global understanding.</td>
</tr>
<tr>
<td>WMST 200</td>
<td>Introduction to Women and Gender Studies</td>
<td>3 (NR)</td>
<td>Interdisciplinary introduction to women's studies, encompassing key concepts in the field, history of women's movements and women's studies in America, cross-cultural constructions of gender, and a thematic emphasis on the diversity of women's experience across class, race, and cultural lines. Fulfills general education requirement in social and behavioral science.</td>
</tr>
<tr>
<td>WMST 300</td>
<td>Current Issues in Women and Gender Studies</td>
<td>1-6 (RT)</td>
<td>Study of selected topics central to contemporary women and gender studies. Topics vary but include subjects such as women and violence, women and international development, women's myth and ritual, LGBTQ topics, the history and politics of sexuality, psychoanalysis, and religion. <strong>Notes:</strong> May be repeated for credit when topic is different.</td>
</tr>
</tbody>
</table>
WMST 301 - Sex and Gender in Contemporary Society

Credits: 3 (NR)
Changing conceptions of sex roles, both female and male, in contemporary society. Using historical and comparative data, course considers the differential socialization of males and females in relation to the changing social structure in which it takes place.

Prerequisite(s): 60 credits, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

WMST 302 - Cultural Constructions of Sexualities

Credits: 3 (NR)
Introductory survey of cultural, literary, and theoretical constructions of sexuality that seeks to complicate traditionally fixed categories of identity. Examination of various representatives of human sexuality, with particular attention to its intersections with gender, race, ethnicity, nationality, and class.

Equivalent to ENGH 418

Prerequisite(s): 6 credits of 200-level English courses.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

WMST 303 - Psychology of Women

Credits: 3 (NR)
Behavior and attitudes of women, influence of sex chromosomes and sex hormones on behavior, influence of culture on sex role differentiation, and theories of sex role development.

Prerequisite(s): PSYC 100, and BIOL 103 and 104; or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

WMST 304 - Women and Media

Credits: 3 (NR)
Introduction to the concepts of the power and influence of the mass media. Allows students to see themselves as products of media influence and gives them a sense of women's roles as media professionals, as well as consumers.
Prerequisite(s): COMM 302 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

WMST 305 - Women and Literature

Credits: 3 (RD)
An exploration of the experience of women as both authors of and subjects in imaginative literature.

Equivalent to ENGH 310

Prerequisite(s): 6 credits of 200-level English courses.

Notes: May be repeated once for credit when subtitle is different, with permission of department.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

WMST 306 - Topics in Communication and Gender

Credits: 3 (RD)
Exploration of selected topics involving gender and communication. Topics may include women in media, women as rhetors, male/female communication, and communication and sex roles. Specific interests are examined in a seminar setting.

Prerequisite(s): 60 credits.

Notes: Course may be repeated with approval of department.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

WMST 307 - Women and Work

Credits: 3 (NR)
Historical and contemporary accounts of women's participation in paid and unpaid labor. Analyzes the nature of women's work through the divisions in the labor market due to gender, race, nationality, ethnicity, and class. Provides a detailed look at occupational sex segregation, sexual harassment, the glass ceiling, and the role of religion, culture, and education in determining women's opportunities and their value as workers and as family providers.

Prerequisite(s): 30 credits.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
WMST 308 - Introduction to Lesbian, Gay, Bisexual, Transgender, Transsexual, and Queer Studies

Credits: 3 (NR)
Explores major events in lesbian, gay, bisexual, transgender, transsexual, and queer culture and history in the United States and throughout the world to understand how identities, experiences, and movements have been socially constructed and have changed in different times and places, often as a result of race, class, and gender inequities.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

WMST 309 - Black Social Movements: Gendering of Violence and Activism

Credits: 3 (NR)
Examines racialized gendered conceptions of popular culture, violence, and the legal system and their role in structuring systems of segregation, discrimination and exclusion. Looks at the gendered strategies and conflicts of organizations that arose to combat racial violence and overturn legal and social barriers to equal opportunity and citizenship rights.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

WMST 310 - Women, Sex, and Psyche

Credits: 3 (NR)
Explores the changing concepts of women's psychology, sexuality, and relationships in different social and cultural contexts. Demonstrates the ways women's "psychological self" has been the source of humor, maldignment and curiosity throughout history. Discussion-based classroom explores the intersections of self, race, gender and relationship.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

WMST 311 - The Erotic and the Sacred

Credits: 3 (NR)
Explores the complex relationship between the body, sexuality and the spirit. Investigates sacred texts, novels, short stories, poetry and film that engage with a variety of cultural embodiments of sexualities and of the sacred, international in scope. Teaches students to formulate critical perspectives at the intersection of the erotic and sacred.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

WMST 312 - Gender, Trauma, and Recovery
Credits: 3 (NR)
Explores the experience of emotional trauma, the process of recovery and the etiology of healing in contemporary North American culture. Investigates memoir, poetry, film, and novel as case studies of trauma and examines the effect of gender on traumatic experiences. Applies psychological and feminist theoretical perspectives.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**WMST 313 - Women Who Kill**

Credits: 3 (NR)
Questions the assumptions that women are nonviolent by nature and commit acts of violence only in response to abuse. Explores the complexity of human interactions through popular culture, literature and film and through theoretical works that attempt to explain female violence (compared to male violence) and as it is seen by others.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**WMST 314 - Stories of Gender and Human Rights**

Credits: 3 (NR)
Examines global human rights issues through memoir, poetry and fiction. Explores the ways women use literary expression to voice their dissent and to struggle against human rights violations.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**WMST 315 - Women During the Enslavement Era**

Credits: 3 (NR)
Examines the general experiences of enslaved women and nominally free women. Includes the lives of female reformers involved in the public arena as orators, writers, preachers, abolitionists and women's rights activists. Explores the effect of gender, class, and race on the development of ideologies concerning abolition, colonization, women's rights, and enslavement.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**WMST 316 - Gendered Pan-Africanism**

Credits: 3 (NR)
Gendered Pan-Africanism. Explores the writings and activism of African Americans who traveled to Africa in search of a shared cultural past and present or an opportunity to build pan-African allegiances. Examines these encounters within the context of the Cold War, US civil rights and African anti-colonial movements, and racial and gender ideologies of the time.
WMST 330 - Theoretical Perspectives in Women and Gender Studies

Credits: 3 (NR)
Examination of feminist and queer critiques and transformations of the theories, methods, and methodologies of the sciences and humanities.

Prerequisite(s): WMST 200, or permission of instructor.

WMST 390 - Study Abroad

Credits: 1-3 (NR)
Study abroad under supervision of George Mason University faculty. Course topics, content and locations vary.

WMST 400 - Internship in Women and Gender Studies

Credits: 1-3 (RD)
Community- or campus-based service or experiential learning related to women's or gender issues. Independent course in which students develop, in consultation with a faculty member, individual contracts defining the learning and competencies they plan to gain from the experience. Includes a paper and/or portfolio component.

Prerequisite(s): Completion of 60 credits, including WMST 200, or permission of instructor.

Notes: May be repeated for credit, up to 6 credits.

WMST 401 - Experiential Learning in Women and Gender Studies

Credits: 1-3 (RD)
Community- or campus-based service or experiential learning as it relates to a specific WMST course, taken at the same time. Students develop, in consultation with faculty member, individual contracts defining learning and competencies they plan to gain from the experience.

Prerequisite(s): Concurrent enrollment in women and gender studies course and approval of advisor and instructor.
Notes: May be repeated for credit up to total 6 credits, but only 3 credits of WMST 400 or 401 may be applied toward the women and gender studies interdisciplinary minor.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0

WMST 402 - Queer Theory

Credits: 3 (NR)
Challenges rigid categories and definitions in order to create a space for marginalized voices. Examines the inconsistencies and erasures that often characterize notions of sex, gender, sexuality, and sexual desire. Explores categories that intersect with sexualized identities such as race, ethnicity, class, nationality, location, and age.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

WMST 410 - Feminist Approaches to Social Research

Credits (NR)
Introduction to feminist approaches to social research for advanced undergraduate students. Students learn the techniques for collecting, analyzing, and writing-up research data as they examine many of the central methodological issues and questions raised by feminist scholars undertaking social research. Because an understanding of how to conduct social research is best gained through experience in the social world, this course emphasizes a learning-by-doing approach.

Prerequisite(s): 60 credits, including 9 credits of WMST course work, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

WMST 411 - Gender Research Project

Credits: 3 (NR)
Students work as part of a research team and undertake a semester-long project investigating the significance of gender to the social and academic life of students at Mason. Enhances understanding of techniques for collecting, analyzing, and writing up empirical material. Involves in-depth investigation of and critical engagement with ethical, interpretive, and representational considerations relating to feminist research.

Prerequisite(s): WMST 410 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

WMST 427 - Feminist Political Thought
Credits: 3 (NR)
Explores feminist political thought in historical context. Topics include feminist political movements, feminist critiques of political philosophy, and feminist contributions to political theory.

Prerequisite(s): GOVT 101, WMST 200, 3 credits of philosophy, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

WMST 490 - Independent Study in Women and Gender Studies

Credits: 1-3 (RD)
Reading or research on a specific topic related to women and/or gender issues, under the direction of a faculty member. May involve a combination of reading assignments, tutorials, papers, presentations, or off-campus activities.

Prerequisite(s): 9 WMST credits including WMST 200, or permission of instructor.

Notes: May be repeated for credit up to a total of 6 credits.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0

WMST 600 - Special Topics

Credits: 3 (RT)
Study of selected topics central to contemporary women and gender studies. Topics vary but include representation and images, violence, public policy, international development, transmigration of labor, myth and ritual, history and politics of sexuality, psychoanalysis, and religion.

Notes: May be repeated for credit when topic is different.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

WMST 610 - Feminist Approaches to Social Research

Credits: 3 (NR)
Provides an introduction to feminist approaches to social research. Students collect, analyze, and write-up research data as they examine many of the central methodological issues and questions raised by feminist scholars. These include feminist critiques of positivism, feminist standpoint theory, social action research models, and feminist engagements with ethical concerns in doing research with human subjects. Emphasizes a learning-by-doing approach to prepare students to conduct research.

Prerequisite(s): Graduate standing and 3 credits of 600-level WMST course work, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
WMST 611 - Gender Research Project

Credits: 3 (NR)
Students work as part of a research team and undertake a semester-long project investigating the significance of gender to the social and academic life of students at Mason. Enhances understanding of techniques for collecting, analyzing, and writing up empirical material. Involves in-depth investigation of and critical engagement with ethical, interpretive, and representational considerations relating to feminist research.

Prerequisite(s): WMST 610 or SOCI 634.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

WMST 630 - Feminist Theories across the Disciplines

Credits: 3 (NR)
Multidisciplinary course examines the central issues of feminist theory and explores the various strategies of feminist theorists. Analyzes the ways in which feminist theories have challenged established disciplinary boundaries and contested the traditional assumptions of the humanities, the social sciences, and the sciences.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

WMST 640 - Women and Global Issues

Credits: 3 (NR)
Multidisciplinary course explores the complex issues women face in different regions of the world. Addresses women's diverse and shared global concerns and provides students with the tools to analyze and understand women in a global context.

Prerequisite(s): Graduate standing.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

WMST 690 - Directed Readings and Research in Women and Gender Studies

Credits: 3 (RT)
Advanced individualized study of gender through readings, discussion, research, and/or projects under the direction and supervision of a member of the women's studies faculty.

Prerequisite(s): Admission to graduate program in woman's studies and permission of director.

Notes: May be repeated for a maximum of 9 credits.
**WMST 695 - Internship**

Credits: 3 (NR)
Community or campus-based service or experiential learning related to women's or gender issues. Students develop, in consultation with a faculty member, individual contracts defining the learning and competencies they plan to gain from the experience.

**Prerequisite(s):** Completion of 15 graduate credits in Interdisciplinary Studies, including 9 credits in Women and Gender Studies or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**WMST 699 - Capstone Portfolio**

Credits: 0 (NR)
Prior to graduation and in consultation with their advisor, students will reflect on and synthesize their work in the women and gender studies certificate program by selecting three items taken from their work in the program and discussing these items in a 7-10 page essay. Work selected may include course papers, videos of their performances, exhibit photos, music recordings, and other items as agreed upon by student and advisor.

**Prerequisite(s):** Students must have completed their course work for women and gender studies certificate or be in the last semester of their course work.

**Hours of Lecture or Seminar per week:** 0  
**Hours of Lab or Studio per week:** 0  
**Grading:** Satisfactory/No credit only
