The doctoral degree in sociology provides rigorous training in public and applied social research, including skills in research design, data analysis, and substantive areas that are pertinent to various sectors in the Washington, D.C. area. Graduates have the theoretical, analytical, and professional skills that prepare them for academic positions in teaching or research. They are also well-qualified for nonacademic positions in the many settings that rely on the expertise of sociologists including human service agencies, marketing research firms, educational systems, nonprofit foundations, and law enforcement agencies.

This program of study is offered by the Department of Sociology and Anthropology.

For policies governing all graduate degrees, see Academic Policies.

**Application Requirements**

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in the Admissions section of this catalog. For information specific to the PhD in sociology, see Application Requirements and Deadlines on the departmental web site.

**Reduction of Credit**

Students who enter the program with a master’s degree may be allowed a reduction of credit up to 30 credits subject to the approval of the graduate director and the dean.

**Degree Requirements**

Students pursuing this degree must complete a minimum of 72 graduate credits. The requirements include foundation courses in theory and methods, course work in a specialization, and electives. Following completion of all required course work and passing a candidacy exam, students are advanced to candidacy by the dean and complete a dissertation, an original and independent research project.

**Eight foundation courses (24 credits)**

**One required foundation course (3 credits)**

- SOCI 801 - Proseminar in Public and Applied Sociology Credits: 3
Two courses of theory (6 credits)

- SOCI 711 - Classical Sociological Theory Credits: 3
- SOCI 712 - Contemporary Sociological Theory Credits: 3

Two required courses of methodology and analysis (6 credits)

- SOCI 620 - Methods and Logic of Social Inquiry Credits: 3
- SOCI 636 - Statistical Reasoning Credits: 3

One elective course of methodology and analysis (3 credits) chosen from:

- SOCI 730 - Analytic Techniques of Social Research Credits: 3
- SOCI 634 - Qualitative Research Methods Credits: 3

Two courses of statistics/methods (6 credits) chosen from:

- SOCI 631 - Survey Research Credits: 3
- SOCI 632 - Evaluation Research for Social Programs Credits: 3
- SOCI 634 - Qualitative Research Methods Credits: 3
- PUBP 704 - Statistical Methods in Policy Analysis Credits: 3
- PUBP 705 - Advanced Statistical Methods in Policy Analysis Credits: 3
- ANTH 650 - Ethnographic Methods and Research Design Credits: 3
- WMST 610 - Feminist Approaches to Social Research Credits: 3

Two proseminars (6 credits)

- SOCI 803 - Institutions and Inequality Credits: 3
- SOCI 804 - Sociology of Globalization Credits: 3

Three courses (9 credits) in a specialization

Students specialize in either institutions and inequalities or sociology of globalization. Depending on the topic, special topics courses SOCI 633 and SOCI 833 (or others) may be applied to the specialization with prior written approval of the director. Up to two courses (6 credits) may be from outside sociology, chosen in consultation with (and with approval of) the student’s advisor or the graduate director.

Institutions and inequalities specialization

Students complete 3 courses (9 credits) toward the degree, chosen from:

- SOCI 605 - Gender and Social Structure Credits: 3
- SOCI 840 - Work Organizations and Social Inequality Credits: 3
- SOCI 844 - Youth, Schooling, and Popular Culture Credits: 3
- SOCI 845 - Society and Education Credits: 3
- PUAD 651 - Virginia Politics, Policy, and Administration Credits: 3
Sociology of Globalization specialization

Students in this specialization must demonstrate proficiency in one foreign language at an advanced level of reading and comprehension. Students complete 3 courses (9 credits) toward the degree, chosen from:

- SOCI 850 - Sociology of Development Credits: 3
- SOCI 851 - Globalization and Social Movements Credits: 3
- SOCI 853 - Cities in a Global Society Credits: 3
- SOCI 857 - Sociology of Human Rights Credits: 3
- ANTH 631 - Refugees in the Contemporary World Credits: 3
- ANTH 632 - International Migration in Comparative Perspective Credits: 3
- ANTH 655 - Nationalism, Transnationalism, and States: Local and Global Perspectives Credits: 3
- CONF 736 - Globalization and International Conflict Credits: 3
- PUBP 602 - Regional Economic Development: Strategies and Applications Credits: 3
- PUBP 758 - Global Threats and Medical Policies Credits: 3
- SOCI 633 - Special Topics in Sociology Credits: 3 (with prior written approval of director)
- SOCI 833 - Special Topics in Sociology Credits: 3 (with prior written approval of director)

Six elective courses (18 credits)

Electives may include up to two courses (6 credits) from outside sociology, chosen in consultation with and approval of the graduate director.

Research Proficiency

Students must demonstrate proficiency in a range of quantitative and qualitative research methods prior to taking the qualifying exams for candidacy. Proficiency is determined by satisfactory course work or an exam.

Dissertation (15 credits)

Once enrolled in 998, students in this degree program must maintain continuous registration for at least 1 credit. Once enrolled in 999, students must maintain continuous registration each semester (excluding summers) until the dissertation is submitted to and accepted by the University Libraries. Once enrolled in 999, students must follow the university’s continuous registration policy as specified in the Academic Policies section of the catalog. Students who defend in the summer must be registered for at least 1 credit of 999.

Students complete a minimum of 3 credits of 998 and 3 credits of 999. They may apply a maximum of 15 dissertation credits (998 and 999 combined) to the degree. Because of the continuous registration policy, students may be required to register for additional credits of these courses.

- SOCI 998 - Doctoral Dissertation Proposal Credits: 1-9 (minimum of 3 credits)
- SOCI 999 - Doctoral Dissertation Credits: 1-12 (minimum of 3 credits)
Total: 72 credits

Advancement to Candidacy

To advance to candidacy, students must complete all course work required on their approved program of study. Students must also successfully pass two written qualifying examinations. One examination is in the foundations of sociological inquiry, linking research methods and sociological theory to public concerns. The second examination (a field statement) is in the student’s area of specialization, administered by a faculty committee appointed by the graduate program director. Additionally, students must have an approved dissertation committee. Evidence of completed requirements must be on file in the Dean's Office before a student can advance to candidacy.

Master of Arts

Anthropology, MA

Banner Code: LA-MA-ANTH

Web: soan.gmu.edu

The master’s degree program in anthropology prepares students for advanced work in anthropology through courses focusing on the study of culture. Students learn how to use participant-observation field work methods, as well as comparative and holistic knowledge and research methods. Areas of emphasis are advanced training in sociocultural anthropology; culture, health and bioethics; and transnationalism and globalization. Course work progresses from core courses to more advanced courses and culminates in a thesis or a project.

An accelerated master's option is available to students in the bachelor's program. See Anthropology, BA/Anthropology, Accelerated MA for specific requirements.

This program of study is offered by the Department of Sociology and Anthropology.

For policies governing all graduate degrees, see Academic Policies.

Application Requirements

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in the Admissions section of this catalog. For information specific to the MA in anthropology, see Application Requirements and Deadlines on the departmental web site.

Satisfactory Progress

According to university policy, students may be terminated if they fail to achieve satisfactory progress toward their degree. Students in the MA in anthropology degree program are judged as having failed to achieve satisfactory progress toward their degree for the following reasons:

- two consecutive semesters in which academic warnings appear on their transcript
- failure to successfully complete ANTH 535, 536, 650 within 4 semesters of first enrolling as degree-seeking students in the MA in anthropology program
- failure to enroll in graduate coursework in anthropology for 2 consecutive semesters, unless there are compelling reasons for not having done so
Like all academic policies, these provisions take effect with the publication of this catalog and apply to all graduate students in the MA in anthropology regardless of their calendar year.

Degree Requirements

Courses in archaeology and biological anthropology may not be used to meet any requirements for the master's degree in anthropology.

Four required core courses (12 credits)

- ANTH 535 - Anthropology and the Human Condition: Seminar I Credits: 3
- ANTH 536 - Anthropology and the Human Condition: Seminar II Credits: 3
- ANTH 650 - Ethnographic Methods and Research Design Credits: 3
- ANTH 798 - Thesis or Project Proposal Credits: 3

Elective courses (15 credits)

Electives should be advanced courses in anthropology chosen in consultation with an advisor. Students can choose to focus their electives around an emphasis in these four areas: advanced training in sociocultural anthropology; culture, health and bioethics; museums and anthropology; or transnational and global issues. Up to six credits may be from other disciplines with the prior written approval of the graduate director.

Students may take ANTH 690 - Internship Credits: 3-6 as elective credit. An internship can serve as a primary field research site for the thesis.

Thesis (3 credits) or Research Project (3 credits)

Students should be aware of the policies governing theses. They must follow the thesis enrollment policy of the university and once enrolled in ANTH 799, maintain continuous enrollment. These policies are specified in the Academic Policies section of the catalog.

- ANTH 796 - Master’s Research Project Credits: 1-6
- ANTH 799 - Master’s Thesis Credits: 1-6

Total: 30 credits

Sociology, MA

Banner Code: LA-MA-SOCI

Web: soan.gmu.edu

The MA in sociology provides opportunities for students to develop expertise in a variety of areas including applied methods, community, conflict analysis and management, development and social change, deviance, environmental sociology, gerontology, medical sociology, occupations and professions, policy analysis, race and ethnicity, sociology of science and technology, cultural studies, and survey research. The program is strongly connected to various nonprofit and community groups, providing ample opportunity for research, internships, and employment in various occupations.
Students pursuing a MA in sociology may choose an emphasis in conflict analysis and management; crime, delinquency, and corrections; race and ethnicity; sex and gender; or the sociology of culture. The sociology of culture emphasis allows maximum flexibility in the application of sociological knowledge to the analysis of social processes and systems. All emphases are appropriate for those anticipating further graduate study leading to the doctorate in sociology.

Designed as a small and selective graduate program, the MA enables students to enjoy the benefits of a personal mentoring experience as they gain skills in both basic and applied research. In addition to required and elective coursework, students are required to complete a master’s thesis to demonstrate their ability to carry out independent research. The thesis consists of a substantial sociological research or theoretical project that will contribute to sociological knowledge.

An accelerated master's option is available to students in the bachelor's program. See Sociology, BA/Sociology, Accelerated MA for specific requirements.

This program of study is offered by the Department of Sociology and Anthropology.

For policies governing all graduate degrees, see Academic Policies.

Application Requirements

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in the Admissions section of this catalog. For information specific to the MA in sociology, see Application Requirements and Deadlines on the departmental web site.

Degree Requirements

Two courses (6 credits) of social theory

- SOCI 711 - Classical Sociological Theory Credits: 3
- SOCI 712 - Contemporary Sociological Theory Credits: 3

Three courses (9 credits) of research methods

- SOCI 620 - Methods and Logic of Social Inquiry Credits: 3
  and two courses chosen from the following:
- SOCI 631 - Survey Research Credits: 3
- SOCI 632 - Evaluation Research for Social Programs Credits: 3
- SOCI 633 - Special Topics in Sociology Credits: 3 (when topic is Feminist Methods, Feminist Theory, or Critical Ethnography)
- SOCI 634 - Qualitative Research Methods Credits: 3
- SOCI 636 - Statistical Reasoning Credits: 3
- SOCI 660 / SOCI 860 - Historical and Comparative Sociology Credits: 3

Four to five elective courses (12 to 15 credits)

Students may choose their electives from the full range of offerings in sociology (any SOCI course) or focus 9 credits of electives in one of five emphases.

Emphasis in Crime, Delinquency, and Corrections
- SOCI 607 - Criminology Credits: 3
- SOCI 608 - Juvenile Delinquency Credits: 3
- SOCI 609 - Sociology of Punishment and Corrections Credits: 3

**Emphasis in Conflict Analysis and Management**

- 9 credits in the sociology of conflict and conflict management chosen in consultation with an advisor

**Emphasis in Race and Ethnicity**

- 9 credits in race and ethnicity chosen in consultation with an advisor

**Emphasis in Sex and Gender**

- 6 credits in sex and gender chosen in consultation with an advisor
  - SOCI 605 - Gender and Social Structure Credits: 3

**Emphasis in Sociology of Culture**

This emphasis prepares students for the doctoral program in cultural studies.

- one master’s-level course (3 credits) in a department other than Sociology and Anthropology that serves as an introduction to cultural studies
  - SOCI 614 - Sociology of Culture Credits: 3
  - CULT 802 - Histories of Cultural Studies Credits: 3

**Thesis (3 or 6 credits)**

A master’s thesis demonstrates the student's capacity to carry out independent research. The thesis consists of a substantial sociological research or theoretical project that will contribute to the advancement of knowledge in sociology.

Students must follow the thesis enrollment policy of the university and once enrolled in SOCI 799, maintain continuous enrollment as specified in the Academic Policies section of the catalog.

- SOCI 799 - Thesis Credits: 1-6

**Total: 33 credits**

**Non-Degree**

**Anthropology Minor**

**Banner Code:** ANTH

**Web:** soan.gmu.edu

This program of study is offered by the Department of Sociology and Anthropology.
For policies governing all minors see Academic Policies.

Course Work

Students pursuing this minor must complete 18 credits in anthropology with a minimum GPA of 2.00.

Two required courses (6 credits):

- ANTH 114 - Introduction to Cultural Anthropology Credits: 3
- ANTH 120 - Unearthing the Past: Prehistory, Culture and Evolution Credits: 3
- or
- ANTH 135 - Becoming Human: Evolution, Cognition, and Culture Credits: 3

One regional ethnography course (3 credits) chosen from:

- ANTH 301 - Native North Americans Credits: 3
- ANTH 302 - Peoples and Cultures of Latin America Credits: 3
- ANTH 304 - Peoples and Cultures of the Pacific Credits: 3
- ANTH 306 - Peoples and Cultures of Island Asia Credits: 3
- ANTH 307 - Ancient Mesoamerica Credits: 3
- ANTH 308 - Peoples and Cultures of the Middle East Credits: 3
- ANTH 309 - Peoples and Cultures of India Credits: 3
- ANTH 311 - Peoples and Cultures of Mainland Southeast Asia Credits: 3
- ANTH 330 - Peoples and Cultures of Selected Regions: Non-Western Credits: 3

Three elective courses in anthropology at the 300- or 400- level (9 credits)

Total: 18 credits

Immigration Studies Minor

Banner Code: IMMS

Phone: 703-993-1178

Web: immigrationstudies.gmu.edu

Faculty

Cleaveland, Haines, Ihara, Leeman, Rabin, Ritchie, Seligmann, Shutiika, Trencher (director)

The minor in immigration studies combines perspectives from the humanities and social sciences to provide an interdisciplinary and comparative understanding of the immigrant experience, ethnic identity, assimilation, ethnic exclusion and conflict, and refugee situations.

This program of study is an interdisciplinary minor offered by the College of Humanities and Social Sciences.
For policies governing all minors, see Academic Policies.

Course Work

Students pursuing this minor must complete 15 credits of coursework with a minimum GPA of 2.00.

One required course (3 credits)

- ANTH 340 - Comparative Perspectives on Immigration Credits: 3

One course (3 credits) focused on ethnicity in the United States chosen from:

- SOCI 308 - Race and Ethnicity in a Changing World Credits: 3
- ENGH 352 - Topics in Ethnic American Literature Credits: 3
- ENGH 416 - Ethnicity and Migration in Folklore Credits: 3

One course (3 credits) focused on global perspectives on migration and ethnicity chosen from:

- ANTH 331 - Refugees Credits: 3
- GOVT 445 - Human Rights Credits: 3
- CONF 302 - Culture, Identity, and Conflict Credits: 3

Two elective courses (6 credits) chosen from:

- FRLN 385 - Multilingualism, Identity, and Power Credits: 3
- NCLC 361 - Neighborhood, Community, and Identity Credits: 3-6
- SOCI 332 - The Urban World Credits: 3
- SPAN 430 - Spanish in the United States Credits: 3

Total: 15 credits

Sociology Minor

Banner Code: SOCI

Web: soan.gmu.edu

This program of study is offered by the Department of Sociology and Anthropology.

For policies governing all minors, see Academic Policies.

Course Work

Two required courses (6 credits)
Students must complete each of these courses with a minimum grade of 2.00.

- SOCI 101 - Introductory Sociology Credits: 3
- SOCI 311 - Classical Sociological Theory Credits: 3

Four elective courses (12 credits)

Students may focus the coursework for their minor by choosing electives from one of the five concentrations offered as part of the BA in sociology.

Total: 18 credits

Women and Gender Studies

Phone: 703-993-2896
Web: wmst.gmu.edu

Faculty

Amireh, Baily, Baker, Beach, Bergoffen, E. Bernard, Best, Burt, Carbonneau, Cattaneo, Censer, Cheldelin, Chen, Cherubin, Chollar, Christensen, Constantine, Copelman, Davidson, Dakake, Davis, Deshmukh, Dunne, Eby, Eckenwiler, Feerick, Garner, Gilbert, Gorski, Hamdani, Hanrahan, Harvey, Hattery, Hirsch, Hodges, Hughes, Jadallah, Jenkins, Johnsen-Neshati, Jordan, Jones, Kaplan, Karametou, King, Kirsch, Koch, Kravitz, Lindley, Lockwood, Masters, McNeely, Michals, Mink, Misencik, Muir, Pascarell, Peters Burton, Photos, Portillo, Regan, Reybold, Ricouart, Rosenblum, Rosenberger, Sandell, Sandole-Staroste, Schwartzstein, Scott, Seligmann, Stearns, Tichy, Todd, Travis, Vivancos Perez, Wagner, Yocom, Zawacki

Course Work

The Women and Gender Studies Program offers all course work designated WMST in the Courses section of this catalog.

About Women and Gender Studies at Mason

By choosing to pursue work in women and gender studies, students at all levels engage in an interdisciplinary exploration of gender in social, political, cultural, and economic life; gender in history; women and the media; feminist theory; the relationship between sex and gender; the impact of sex, race, class, disability, and sexual orientation on people’s lives; and the ways in which gender stereotypes influence the self in relationship to others. Students in many courses have the opportunity to investigate these issues in a cross-cultural and global perspective.

Undergraduate Programs

The Women and Gender Studies Program offers an interdisciplinary minor open to students from any major. Students have the opportunity to earn credit toward the minor while doing an internship that helps prepare them for the work place, a service learning course that combines work in a specific course with a service project, or research on gender issues on Mason's campus. Students pursuing this minor can take advantage of the many activities and resources provided by the Women and Gender Studies Center.
Graduate Programs

The program sponsors the concentration in women and gender studies in the master’s degree in interdisciplinary studies (MAIS). This concentration promotes advanced scholarship that transcends traditional disciplinary boundaries. Students combine required coursework in women and gender studies with courses in a discipline of interest such as history, literature, sociology, anthropology, health, education, public policy, philosophy, social work, conflict analysis and resolution, environmental science, and the arts. See Interdisciplinary Studies, MAIS in this section.

The program also offers a graduate certificate in women and gender studies. Students may take this as a stand-alone certificate or pursue it concurrently with any graduate degree program. A portion of the certificate course work may be applied to the degree with the approval of the director of the graduate degree and dean. Students must apply and be accepted to a graduate certificate program.

Women and Gender Studies Center

The academic program in women and gender studies is integrated with the Women and Gender Studies Center. The center organizes a wide variety of lectures, conferences, workshops, and other public events throughout the year. The center houses a library and functions as a community space for students and faculty. It supports the Global Gender Justice Research Community, a monthly forum for research on gender and global human rights, and many other groups of interest to students, faculty, and staff.

Graduate Certificate

Women and Gender Studies Graduate Certificate

Banner Code: LA-CERG-WGST

Web: wmst.gmu.edu

The graduate certificate in women and gender studies may be taken alone or in conjunction with another graduate program. Courses applied to the certificate may be applied to a degree program, subject to approval of the director of the respective program.

This program of study is offered by Women and Gender Studies Program.

For policies governing all graduate certificates, see Academic Policies.

The graduate certificate in women and gender studies may be pursued on a part-time or full-time basis.

Application Requirements

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in the Admissions section of this catalog. For information specific to the graduate certificate in women and gender studies, see Application Requirements and Deadlines on the departmental web site.

Transfer Credit

In accordance with university policy, students may transfer up to 3 graduate credits earned at another accredited institution to the certificate program with the approval of the director of the program and the dean. They may transfer up to 9 graduate credits
earned at Mason in nondegree status toward the certificate, subject to approval of the director and the dean in accordance with university policy.

Certificate Requirements

Two required courses (6 credits)

- WMST 630 - Feminist Theories across the Disciplines Credits: 3
- WMST 640 - Women and Global Issues Credits: 3

Three elective courses (9 credits)

Students choose from relevant courses subject to the approval of the director. These courses may be from departments across the university that address the study of women and gender, courses in the Women and Gender Studies Program, and appropriate directed readings or independent study courses.

Capstone portfolio

Students synthesize their work in the certificate program by reflecting on how issues, ideas, and theories raised in the core courses inform their understanding of gender issues within their area of interest. The portfolio includes three to five items produced in previous course work and a 7-10 page essay discussing them. The portfolio may include course papers, performance videos, photos of exhibits, music, or other items as agreed on by the student and advisor. The portfolio must be approved by the graduate advisor and submitted to the Women and Gender Studies Program, where it will be presented, displayed, and archived.

Total: 15 credits

Non-Degree

Women and Gender Studies Minor

Banner Code: WGST

Web: wmst.gmu.edu

The minor is for students who are interested in gender, sexuality, and feminist perspectives. While it is an especially good complement to a major in the humanities, social sciences, health and human services, or natural sciences, it is open to students in any major in the university.

The interdisciplinary minor in women and gender studies consists of two required courses and four electives. Students interested in feminist and gender issues choose their elective courses from a broad range of offerings. Those who wish to focus on LGBTQ (lesbian, gay, bisexual, transgender, and queer issues) issues, take an introductory course focused on these issues and two electives that incorporate more specifically such perspectives.

This program of study is offered by the Women and Gender Studies Program.

For policies governing all minors, see Academic Policies.

Course Work
Students pursuing this minor must complete 18 credits with a minimum GPA of 2.00 in the minor.

**One introductory course (3 credits) chosen from:**

- WMST 200 - Introduction to Women and Gender Studies Credits: 3
- WMST 308 - Introduction to Lesbian, Gay, Bisexual, Transgender, Transsexual, and Queer Studies Credits: 3

**One theory course (3 credits)**

- WMST 330 - Theoretical Perspectives in Women and Gender Studies Credits: 3

**Elective courses (12 credits) chosen from:**

Note: for students who choose a focus on LGBTQ, two of the four electives must be approved for that focus by the undergraduate advisor.

- any WMST course
- CHIN 328 - Asian American Women Writers Credits: 3
- HEAL 325 - Health Aspects of Human Sexuality Credits: 3
- HEAL 327 - Women's Health Credits: 3
- HIST 350 - U.S. Women's History Credits: 3
- PSYC 362 - Psychology of Women Credits: 3
- PSYC 466 - Psychology of Intimate Relationships Credits: 3
- NCLC 310 - Violence and Gender Credits: 3-6
- NCLC 312 - Images and Experiences of Childhood: Social Construct, Literature, and Film Credits: 3-6
- NCLC 317 - Issues in Family Relationships Credits: 4
- NCLC 320 - Construction of Differences: Race, Class, and Gender Credits: 6
- NCLC 346 - Art as Social Action Credits: 4
- NCLC 347 - Gender Representation in Popular Culture Credits: 3-6
- NCLC 400 - Temptress: Constructs of Sex and Power Credits: 3
- NCLC 405 - Women and Leadership Credits: 4
- NCLC 446 - Art, Beauty, and Culture Credits: 3-6
- SOCI 309 - Marriage, Families, and Intimate Life Credits: 3
- SOCI 315 - Women and Men in Society Credits: 3
- SOCI 355 - Social Inequality Credits: 3

**Total: 18 credits**

The College of Science (COS) serves as the nexus for research and education in the natural, mathematical, and computational sciences at Mason. The central mission of COS is to create and disseminate scientific knowledge, provide outstanding scholarship in concert with excellent teaching, and develop the human and technical resources required to address the current and future needs of society. Through its innovative and multifaceted educational and research mission, COS offers exciting opportunities to undergraduate and graduate students, scientists, educators, and other professionals in Northern Virginia and the national capital region.

In addition to the wide variety of undergraduate degree programs offered by its 10 academic units, COS also offers many innovative graduate degrees and interdisciplinary minors. The research strength of COS provides an essential resource to graduate students and to undergraduates whose involvement in research is strongly encouraged. Many undergraduates go on to graduate school and to pursue careers in public service, nonprofit organizations, and the private sector. Graduate students engage in more specialized study at the master’s and doctoral levels, preparing them for first or second careers or job advancement and providing personal enrichment.

Faculty members are committed to teaching grounded in scholarship and research. They strive to make students rigorous thinkers and clear communicators while encouraging experimentation with new approaches and ideas. Students are thus prepared for their role as informed citizens in a complex, global society and able to adapt to an ever-changing world.
Administration

Vikas Chandhoke, Dean
Evans J. Mandes, Senior Associate Dean for Faculty Matters
Timothy L. Born, Associate Dean for Academic and Student Affairs
Martha Westcoat-Andes, Associate Dean for Administration
Gregory D. Foster, Acting Associate Dean for Research
Vita M. Vock, Assistant Dean for Undergraduate Academic Affairs

Accommodations for Disabled Students

Students with documented disabilities should contact the Office of Disability Services (Student Union I, Room 222; 703-993-2474) to open a file and learn more about accommodations that may be available to them.

Graduate Degree Programs

COS offers 13 master’s degrees and 10 doctoral degrees. The requirements for each degree can be found in the departmental and degree sections and a complete listing of the graduate programs administered by the College of Science is available on the college web site: http://cos.gmu.edu/academics/degree_programs/graduate.

Graduate Admission

Admission decisions are made by the faculty committee of the respective graduate program. Denial of admission is not subject to appeal.

Provisional Admission

Students provisionally admitted to their graduate degree program are not eligible to enroll in consortium course work or study at another institution until the conditions of the provisional contract have been met. Provisionally admitted students are also not eligible to participate in any study abroad programs until the conditions of the provisional contract have been met. Transfer of credit requests for course work taken in non-degree status at Mason or from another institution prior to admission will not be considered until the provisional contract has been fulfilled.

Non-degree Enrollment

Admission to non-degree graduate study at Mason is highly competitive. Among the factors which may be considered in the admissions process are previous academic performance, professional experience, academic fit, and other standards, at the discretion of the College of Science. All non-degree applicants must complete a non-degree online application for admission and supply official transcripts from all postsecondary institutions they have attended. Once admitted to graduate non-degree status, students are considered graduate students and tuition charges are calculated as such, regardless of the level of course(s) in which they are enrolled. Up to 12 credits of graduate coursework earned in non-degree status can be considered for transfer into a graduate program within the College of Science.

Non-degree students are expected to maintain the same academic standards as degree-seeking students. See Academic Termination in the Graduate Policies section of this catalog.

Reduction of Credit
Students accepted into a Doctoral program who have earned a Master’s degree in a relevant field from a regionally accredited institution may be eligible for a credit reduction of up to 30 credits. Students must request a reduction from the Graduate Program Director of the graduate program and reductions must be approved by both the Graduate Program Director of the graduate program and by the Associate Dean of Academic Affairs. Reduction of credit requests from students who are admitted provisionally are not considered until the student has fulfilled the conditions of their admission and had the provisional qualifier removed from their record. Credits used in reduction of credit are not subject to time limits, and the credits must have been applied to a previous degree.

Transfer of Credit

To be eligible for transfer, credits must have been earned at a regionally accredited graduate degree-granting institution (and applicable to a graduate degree at that institution) or at Mason while in non-degree status. Courses accepted for transfer credit must have been completed within six years of the admission term and with a minimum grade of 3.00. Courses with grades of P or S are not accepted for transfer unless the official transcript indicates that the grade is equivalent to a 3.00 (B) or better. Some programs have more stringent standards on transfer of credit; students should contact their graduate program for specific information.

Credit from Other Institutions (Study Elsewhere)

Students enrolled in a degree program may take graduate courses at another regionally accredited institution and apply these credits to a master’s or doctoral degree with prior approval. Approval must be secured in writing from the Graduate Program Director of the graduate program and the Associate Dean of Academic Affairs of the college. Students enrolling in courses at other institutions with different drop/add timetables must still abide by Mason’s drop/add deadlines in terms of acquiring necessary approvals.

Academic Load

Graduate students can enroll in up to 12 credits of course work each semester. Non-degree students can enroll in up to 10 credits of course work each semester.

University Consortium

Students should review university policies regarding the University Consortium under Special Registration Procedures in the Academic Policies section of this catalog.

Eligible students may enroll in courses at any of the institutions in the Consortium of Universities in the Washington Metropolitan area. Students are limited to one consortium course per semester, with a career maximum of 6 credits. To register for a consortium course, students must have an overall GPA of at least 3.00 and be in good academic standing. Students with grades of IN on their record or who earned grades of C or F in the most recent semester are not eligible to register for a consortium course. Students who have received a grade less than 3.00 in a consortium course are not permitted to enroll in additional consortium courses. Newly admitted graduate students are not permitted to enroll in consortium courses during their first semester of graduate study. Students who wish to enroll in consortium courses during their second semester of study must wait until the grades for the previous semester have been posted. Credit earned through the consortium is considered resident credit and these grades will count toward the student’s GPA.

Dissertation Committee

The college follows university policies regarding dissertation committees. See Dissertation Committee in the Requirements for Doctoral Degrees section of Academic Policies. Please note that some programs within the College of Science may have a more stringent policy.
Dissertation (998/999) Registration

It is the student’s responsibility to complete registration for dissertation proposal (998) or dissertation research (999) prior to the first day of classes for the semester. If this date is missed, students must still enroll in these courses via Add or Late Schedule Adjustment procedures and are subject to Late Registration fees. Failing to register on time in a particular semester does not alter the requirement for continuous registration in 999.

All registration for doctoral dissertation research (999) must be planned with the dissertation director and approved by the Associate Dean of Academic Affairs. Dissertation research is open only to doctoral students who have advanced to candidacy, and students must register for a minimum of 3 credits of 999 per semester (excluding summers) until they have completed the minimum number of credits of 998 and 999 required by the university and their degree program. Once enrolled in 999, students must maintain continuous registration in 999 each semester until graduation, excluding summers. Students who defend in the summer must be registered for at least 1 credit of 999 in the summer. Students registered in 998 or 999 are graded IP until work in 998 or 999, respectively, is complete; at that time they are graded S/NC. Graduation candidates who miss the library deadline for dissertation submission, but do submit officially before the next semester begins, do not have to register for 999 in that next semester, but must stay active to graduate. Please see section on Special Registration for Non-enrolled Students in the University Catalog.

Time Limit for Doctoral Students

Total time to degree for doctoral students will not exceed eleven (11) calendar years from the time of first enrollment as a doctoral degree-seeking student in a program of the University. Doctoral students are expected to advance to candidacy in no more than six years and to complete all other degree requirements for graduation in no more than five years from the time of advancement to candidacy.

Students who will not meet published time limits because of circumstances beyond their control may petition for an extension. Extensions to the time limit for advancement to candidacy may be granted for a maximum period of one calendar year. The one-year extension granted to advance to candidacy will run concurrently with the five years provided to complete the dissertation so that the total time limit to degree will not exceed eleven (11) years even for those students granted a time extension for advancement to candidacy.

Students who are given permission to re-enroll following an absence from Mason remain subject to their original time limits. Failure to meet the time limits or to secure approval of an extension request may result in termination from the program. International students attending in F-1 or J-1 status have more restrictive limits. Such students should contact the Office of International Programs and Services for further information.

Requests for extension of time limits must be submitted to the Associate Dean of Academic Affairs in writing. They should explain the extenuating circumstances that prevented a timely completion of the degree, corrective action that has been taken to address those circumstances, and a timeline for completing the work within the limits of the extension. The request should include a letter from the student’s graduate program director indicating program support for the extension and confirmation that the work can be completed within the limits of the extension.

Graduate Appeals of Dismissal or Termination

All graduate students should be familiar with the university polices on dismissal and termination as stated in Graduate Academic Standing section of Academic Policies. Students who meet the criteria for dismissal or termination may submit a written appeal to the Associate Dean of Academic Affairs. Appeals should include all relevant information on the basis for appeal, as well as any appropriate documentation and a letter of support from the graduate program. Appeals of termination are reviewed by the Associate Dean of Academic Affairs with input from appropriate faculty within the student’s academic unit. The ruling represents the final decision of the college.

Undergraduate Degree Programs
COS offers five bachelor of arts degrees and 11 bachelor of science degrees. These undergraduate degrees consist of course work in university-wide general education, a major area of study, and electives. To earn a bachelor’s degree, students must complete 120 credits, of which at least 45 must be in upper-level courses (numbered 300 and above). At least one course at the 300 or 400 level must be designated “writing intensive.” All entering students who have not yet satisfied the university-wide general education requirement in quantitative reasoning are required to take the math placement test prior to enrollment.

Students should consult the University General Education section for information concerning university-wide general education requirements for undergraduate degrees. All students are responsible for meeting with their academic advisor, and reviewing their transcripts and degree audits regularly to ensure that they are correct and meet all their requirements. Transfer students are encouraged to meet with their academic advisor prior to registering for classes to review their transcripts and course equivalencies. In some cases, students may need to earn more than 120 credits to complete all of their requirements.

A complete listing of the undergraduate programs administered by the College of Science is available on the college website: http://cos.gmu.edu/academics/undergraduate/degree_programs.

College-Level Degree Requirements

The baccalaureate degree is designed to provide a broad knowledge of the world, develop in students the ability to think conceptually and critically, acquaint them with many different methods of inquiry, and provide skills to continue intellectual growth throughout life.

Bachelor of Arts

The BA degree provides students with a breadth of knowledge, as well as the necessary skills to make in-depth study of a major truly meaningful. In addition to the university-wide general education program, students pursuing a BA degree must complete the course work below, and the courses listed in the departmental sections that follow. Except where expressly prohibited, a course used to fulfill a college-level requirement may also be used simultaneously to satisfy other requirements, such as university-wide general education requirements, college-level requirements, or requirements for the major. In some cases, the COS requirements below may be superseded by requirements of the major degree program.

- Philosophy or religious studies: 3 credits, fulfilled by any course in philosophy or religious studies (PHIL, RELI), except for PHIL 323, 324, 427, 428.
- Social and behavioral science: 3 credits in addition to the university-wide requirement in social and behavioral science for a total of 6 credits. The two courses used to fulfill the combined college and university requirements must be from different disciplines in the social and behavioral sciences. This requirement may be fulfilled by completing any course in ANTH, CRIM, ECON, GOVT, HIST (except 100 or 125), LING, PSYC, or SOCI and these courses in GGS: 101, 103, 110, 301, 303, 304, 305, 306, 315, 316, 320, 325, 330, 357, 380.
- Natural science: 1 credit in addition to the university-wide requirement for a total of 8 credits. This requirement must be fulfilled by completing two of any approved natural science courses that include a laboratory experience. This requirement may not be fulfilled by BIOL 124 or 125.
- Foreign language: intermediate-level proficiency in one foreign language. This requirement may be fulfilled by completing a course in a foreign language numbered 202, 209, or 210 (or higher level courses taught in the language) or achieving a satisfactory score on an approved proficiency test. Students who are already proficient in a second language may be eligible for a waiver of this requirement. Additional information on waivers can be found at the Undergraduate Academic Affairs Office.
- Non-Western culture: 3 credits of an approved course in the study of a non-Western culture in addition to the course used to fulfill the university-wide general education requirement in global understanding. A course used to fulfill the university-wide general education global understanding requirement may not be simultaneously used to satisfy this college-level requirement. A course used to fulfill this requirement may be used simultaneously to fulfill any other requirements (university-wide general education requirements, college-level requirements, or requirements for the major). Students who can document attendance at a native school in a non-Western country for at least four years may request a waiver from this requirement through the CHSS Undergraduate Academic Affairs Office.
Requirements for each BA major are listed in the departmental sections that follow.

**Bachelor of Science**

The BS degree provides students with a more intensive approach to the technical core knowledge and concepts in their major field of study. Therefore, this curriculum has a reduced number of courses in humanities and social sciences in comparison with the BA degree to allow students to achieve greater depth in their majors. Students pursuing a BS degree must complete the university-wide general education program plus the requirements for their major. Requirements for each BS major in COS are listed in the departmental sections that follow.

**Teacher Licensure**

Degree programs that prepare students for high school teaching careers are available in the following COS departments or programs: Atmospheric, Oceanic and Earth Science; Biology; Chemistry, Mathematics, and Physics. Students who wish to become K-12 teachers, and who plan to seek teacher licensure should also consult the College of Education and Human Development section and attend an information session early in their undergraduate career. For more information, call 703-993-2892, e-mail gseadmit@gmu.edu, or go to gse.gmu.edu.

**Minors**

Students may elect to take a minor in addition to their major field of study. For policies governing all minors, see the Academic Policies section of this catalog. Students interested in earning a minor should complete the Undergraduate Declaration of Minor form.

**Undergraduate Policies**

Students should become familiar with the university's general academic policies in addition to those specific to each academic unit. Please see the Academic Policies section of this catalog.

**Questions about Academic Policies**

Students with questions regarding exceptions to academic policies and college-level requirements should contact the Undergraduate Academic Affairs Office (Science and Technology Building I, Room 103; cosdean@gmu.edu).

Additional policy information and forms are available online from the college's Office of Undergraduate Academic Affairs.

**Registration**

Students are personally responsible for correctly registering for courses and paying all tuition and fees by the official university registration and payment deadlines. Instructors do not have the authority to add students to courses. All students should verify the accuracy of their enrollment before the end of the add period.

**Academic Load**

Students should review the university policies regarding academic load in the Academic Policies section of this catalog.

In order to be considered for an overload, students must fulfill all of the following criteria:

- Be in good academic standing
• Have completed the prior semester with a GPA of 2.33 or higher
• Have a cumulative GPA of 2.33 or higher
• Have demonstrated in prior semesters at Mason the ability to handle an increased and demanding course load while maintaining high performance
• Have no remaining incompletes (INs) from a previous semester

Freshman and transfer students in their first semesters are not given permission for overloads as they have yet to establish an academic record at George Mason.

If approved for an overload, the student is responsible for adding the additional class(es) and paying for the related tuition by the official university deadlines.

**Excluded Courses**

Physical Education (PHED) and Parks, Recreation, and Leisure Studies (PRLS) activity courses cannot be used for credit for a degree in the College of Science.

MLSC 400 and MLSC 402 can be used for credit for a degree in the college, but credit from other MLSC courses may not be applied toward degrees in the college.

Once matriculated at Mason, students may not take CLEP exams and apply credits from those exams to degrees in the college. Students may apply credits from CLEP exams to degrees in the college only if those credits were awarded and reported prior to admission.

**University Consortium Registration**

Students should review the university policies regarding university consortium under Special Registration Procedure in the Academic Policies section of this catalog.

Students who have failed a course at Mason are not permitted to take the equivalent course through the consortium under any circumstances. All consortium registration requests must be submitted to the dean’s office at least 3 weeks prior to the first day of classes for the relevant semester at Mason.

**Permission to Study Elsewhere**

Once enrolled in degree status at George Mason University, students with less than 60 hours of earned transfer credits (excluding any credits earned through the Consortium of Universities of the Washington Metropolitan Area or through the Center for Global Education) may take no more than 9 credits of coursework in COS disciplines at another institution. Students with 60 or more hours of transfer credits are prohibited from taking additional coursework in COS disciplines at another institution. Students may request special permission for additional credits beyond these listed limits for summer registration if their permanent residence is more than 50 miles from George Mason University's Fairfax campus. Decisions will be made by the dean after individual consideration of each request. See the university's Permissions to Study Elsewhere policy for additional information.

**Study Abroad**

In order to be considered for study through the Center for Global Education, students must plan well in advance and receive prior, written permission from the academic dean. Students must also meet all of the following criteria:

• Students must meet all eligibility criteria for their program as specified by the Center for Global Education, including minimum GPA requirements.
• Have completed the immediately preceding semester at Mason with a GPA of 2.00 or higher
• Have completed the necessary forms and have obtained all required signatures and course equivalencies
The Center for Global Education may have higher academic standards and students must meet all eligibility requirements. Students in danger of probation, suspension, or dismissal should plan very carefully before requesting to study abroad. Students who are not in good academic standing will not be permitted to study abroad.

Withdrawals

Courses for which a withdrawal is approved receive a grade of "W."

Students are responsible for all courses in which they remain officially enrolled once the drop period has ended. Instructors do not have the authority to withdraw students from classes. Withdrawals require the approval of the academic dean and are typically allowed only for full semesters at a time (all enrolled courses) and are only permitted for non-academic reasons. No withdrawals can be approved for academic reasons. When submitting a withdrawal request, students must provide verifiable, third-party documentation for the reason for the withdrawal. Requests for withdrawals should be submitted as early in the semester as possible, and never after the last day of classes. Credits graded “W” do not affect a student’s GPA, but do count as attempted hours. The total attempted hours and cumulative GPA determine a student’s academic standing. If the cumulative GPA is below 2.00, withdrawals may affect whether a student will be on warning, probation, suspension, or dismissal. Students should be familiar with the Student Retention Categories in the Academic Policies section of the catalog.

Academic Clemency

Students should review the university policies regarding academic clemency under Academic Standing in the Academic Policies section of the catalog.

In extraordinary cases, students who (a) have been absent from George Mason for a minimum of three consecutive calendar years and (b) are currently in their first semester back at the university may request that their academic dean consider allowing clemency from up to 16 hours of coursework from previous semesters.

To be considered for this clemency, students must meet all of the following criteria:

- Be absent from George Mason for a minimum of three consecutive calendar years
- Provide a detailed explanation for why they were unsuccessful in those courses and how they have made changes to ensure their academic progress upon their return
- Submit their request within 12 months of the first day of the re-enrollment term
- In order to make this request, students should (a) enroll in at least 6 hours during their first 12 months back at George Mason and (b) earn a minimum GPA of 2.50 each semester back prior to making the clemency request, with no grade below 2.00. If these minimum academic requirements are not met during the first semester of return, then clemency will not be allowed under any circumstances.

Appeals Process

Students may appeal departmental decisions concerning academic actions to the Office of Undergraduate Academic Affairs. They may appeal decisions of the Office of Undergraduate Academic Affairs to the Dean's Council, a committee composed of college deans and faculty members. Students may appeal decisions of the Dean’s Council to the COS Associate Dean for Student and Academic Affairs. These levels of appeal are subject to the limits below concerning the final level of appeal for each type of academic action. Students who feel that the college appeal process was conducted unfairly may appeal to the Provost’s Office as specified in the Academic Policies section of this catalog. Grade appeals should be made through the Office of Undergraduate Academic Affairs. If the grade appeal is not resolved within the department or program, the chair makes a recommendation to the dean, who makes the final determination. The decision of the dean is not subject to review or further appeal. Departments set the requirements for the majors and minors that they administer. Substitutions and waivers of requirements require the approval of the Office of Undergraduate Academic Affairs.
Affairs. When a department denies a substitution or waiver of a requirement, this decision may be appealed to the Office of Undergraduate Academic Affairs on the basis of procedural irregularity only, and it is the final level of approval. The Dean’s Council is the final level of appeal for course overloads, consortium registration, study elsewhere, and withdrawals after the drop deadline within the semester. The COS Associate Dean for Student and Academic Affairs is the final level of appeal for COS college level requirements, retroactive adds, withdrawals, graduation, and return from suspension and dismissal. There is no waiver or appeal of satisfactory performance standards (minimum grades or grade point average, GPA) that have been set by the department or program faculty for the courses in their major or minor. Students should file all appeals in a timely manner, usually within the semester in which the original decision is rendered, but no later than the final day of classes of the following semester.

Grievances

Grievances should be directed in writing to the Associate Dean for Student and Academic Affairs. The COS Undergraduate Academic Affairs Office may also provide guidance to students on how to resolve their concerns.

Transfer Students

Admitted and enrolled transfer students who have completed an AA, AS or AA&S degree from the Virginia Community College System (VCCS) and have been offered admission to Mason by the Office of Admissions may be eligible for a waiver of all George Mason University’s lower level general education requirements in accordance with the Guaranteed Admission Agreement. Students eligible for this waiver are still required by the university to complete ENGH 302 and a synthesis course. Transfer students who have been offered admission under the terms of the Guaranteed Admission Agreement and are pursuing a degree in the college are considered to have met all college requirements except for proficiency in a foreign language (required of BA students). Students with a bachelor’s degree from an accredited institution who are pursuing a BA degree in COS are also considered to have met all college requirements except for proficiency in a foreign language.

Certificate

Advanced Biomedical Sciences Graduate Certificate

Banner Code: SC-CERG-ABS

The Advanced Biomedical Sciences Graduate Certificate is a premium-priced program offered jointly by George Mason University and Georgetown University. This program is aimed at students who typically have all of their prerequisites for medical, dental or other health-related fields, but otherwise may have a modest science background (non-science majors, for example), or modest grades in the sciences as undergraduates, and/or may also need to improve their Medical College Admission Test, Dental Admission Test, or other pre-professional scores. This is a 9-month full-time program that begins each fall semester. All classes are held at the Prince William Campus.

Applicants are expected to have a bachelor's degree from an accredited university, the desire to pursue a career in medicine or dentistry, completion of all of the prerequisite courses for medical school (biology, chemistry, organic chemistry, physics, math), and overall credentials suitable for acceptance to graduate programs in the College of Science at George Mason University and the Georgetown University Graduate School of Arts and Sciences.

This program of study is offered by the College of Science.

This certificate program qualifies for Title IV Federal Financial Aid. For more information about program graduation rates, the median debt of students who completed the program, and other important information, please visit the disclosure information page at: http://irr.gmu.edu/new/N_IRRHome/HEOA/Gainful.cfm

Certificate Requirements
Fall Semester (11 credits)

- BMED 601 - Cell and Molecular Physiology Credits: 4
- BMED 602 - Biomedical Statistics Credits: 3
- BMED 603 - Cell Biology and Microscopic Anatomy Credits: 3
- BMED 652 - Biomedical Career Pathways Credits: 1

Spring Semester (9 credits)

- BMED 604 - Fundamentals of Human Physiology Credits: 5
- BMED 605 - Introduction to Human Anatomy Credits: 3
- BMED 651 - Physician and Society Credits: 1

Total: 20 Credits

Master of Science

Biomedical Sciences, MS

Banner Code: SC-MS-BMED

The MS degree in biomedical sciences is a one-year program offered jointly by George Mason University and Georgetown University, and graduates of the program will receive a diploma bearing the seals of both institutions. All associated courses will be offered at George Mason’s Prince William Campus. The Biomedical Sciences MS degree is intended for students who wish to be accepted into medical school, or who wish to pursue careers in biomedical research.

Students enrolled in the Biomedical Sciences MS program complete 34 credits of coursework, including 19 credits of medical courses, and 15 credits of graduate courses. The medical school courses are taught by faculty of the Georgetown University School of Medicine, and the graduate courses are taught by George Mason University College of Science faculty. The program is built on the strength of Georgetown's medical program, combined with Mason’s expertise in the areas of systems biology, bioinformatics, and personalized medicine.

This program of study is offered by the College of Science.

Admission Requirements

Applicants to the Biomedical Sciences MS program should hold a BA or BS degree in biology, chemistry, physics, or a related field from an accredited university with a minimum GPA of 3.000, and they should have completed all of the prerequisite courses for admission to medical school (biology, chemistry, organic chemistry, physics, math). In addition to completing the Mason online graduate application package, applicants should include:

- A statement of desire to pursue a career in medicine, biomedical research, or a related field.
- Official score report for the MCAT (preferred) or GRE-GEN exam.
- Three letters of recommendation.
- Two copies of official transcripts from each institution of higher learning attended.
- Virginia Domicile Classification form.
- Official TOEFL score report (for foreign nationals; minimum score of 230 on computer-based exam).
• Current resume.
Students enrolled in the MS program in biomedical sciences may not enroll concurrently in any other graduate degree program.

Degree Requirements

Candidates for the degree must successfully complete 34 credits in the categories shown below:

General Biology Courses (15 credits)

- BMED 610 - Principles of Systems Biology Credits: 2
- BMED 611 - Molecular Genetics Credits: 2
- BMED 612 - Principles of Gross Anatomy Credits: 1
- BMED 613 - Pathophysiology Credits: 3
- BMED 614 - Introduction to Neuroscience Credits: 3
- BMED 652 - Biomedical Career Pathways Credits: 1
- BMED 653 - Forum and Research Credits: 3

Medical Courses (19 credits)

- BMED 660 - Molecular and Cellular Physiology Credits: 3
- BMED 661 - Metabolism, Nutrition and Endocrinology Credits: 4
- BMED 662 - Cardiopulmonary Biology Credits: 1-5 (students enroll for 3 credits in the fall semester and 2 credits in the spring semester)
- BMED 663 - Gastrointestinal Biology Credits: 2
- BMED 664 - Renal Biology Credits: 2
- BMED 665 - Sexual Development and Reproduction Credits: 3

Total: 34 credits

Faculty

**Professors:** DelSole, Diecchio, Dirmeyer, Hazen (Robinson Professor), Huang, Kinter, Schneider, Schopf, Shukla, Straus (Chair), Summers*

**Associate professors:** Boybeyi, Chiu, Houser**, Klinger, McBride

**Assistant professors:** Jin, Lu, Singleton, Stan, Uhen

**Term professors:** Krishnamurthy

**Term associate professors:** Nord, Verardo
Term assistant professors: Kysar-Mattietti

Term research faculty: Doty

* Primary Affiliation in the School of Physics, Astronomy, and Computational Sciences
** Primary Affiliation in the Geography and Geoinformation Science Department

Course Work

The department offers all course work designated CLIM and GEOL in the Courses section of this catalog.

Honors Program for Earth Science and Geology

Earth science majors who have completed 16 credits of math and science, including GEOL 302, BIOL 308 or CLIM 301 with a GPA of 3.00 or higher are eligible to enter the departmental honors program. Transfer students who have an incoming GPA of 3.10 or higher in math and science and a B or better in GEOL 302 or BIOL 308 are also eligible. To graduate with honors in Earth Science students are required to maintain a minimum GPA of 3.00 in math and science and complete one of the two following sets of courses with an average GPA of 3.50 or better: (1) GEOL 410, 411 and 420 or (2) CLIM 408, 409 and GEOL 420.

Bachelor of Arts

Geology, BA

Banner Code: SC-BA-GEOL

This program of study is offered by the Department of Atmospheric, Oceanic and Earth Sciences in the College of Science.

Candidates for a degree in geology must also complete the following with a minimum GPA of 2.50, and through the course work below will satisfy the university wide requirements in natural science and quantitative reasoning. GEOL 317 fulfills the writing intensive requirement for this major.

Degree Requirements

Geology Core (38 credits)

- GEOL 101 - Introductory Geology I Credits: 4
- GEOL 102 - Introductory Geology II Credits: 4
- GEOL 302 - Mineralogy Credits: 4
- GEOL 304 - Sedimentary Geology Credits: 4 *
- GEOL 308 - Igneous and Metamorphic Petrology Credits: 4 *
- GEOL 312 - Invertebrate Paleontology Credits: 4
- GEOL 317 - Geomorphology Credits: 4
- GEOL 401 - Structural Geology Credits: 4
• GEOL 404 - Geological Field Techniques Credits: 1-8 (for 6 credits) **OR** a 6-credit geology field camp (see advisor for details)

**Note**

* Students must achieve a grade of 2.00 or better in GEOL 302 before taking GEOL 304 or GEOL 308.

**Chemistry (4 credits)**

• CHEM 211 - General Chemistry Credits: 4

**Physics (4 credits)**

Choose from the following:

• PHYS 243 - College Physics Credits: 3 **and** PHYS 244 - College Physics Lab Credits: 1
  or
• PHYS 160 - University Physics I Credits: 3 **and** PHYS 161 - University Physics I Laboratory Credits: 1

**Mathematics (3-4 credits)**

Choose one from the following:

• MATH 110 - Introductory Probability Credits: 3
• MATH 111 - Linear Mathematical Modeling Credits: 3
• MATH 113 - Analytic Geometry and Calculus I Credits: 4

**Computer Science (3-4 credits)**

Choose one from the following:

• CDS 130 - Computing for Scientists Credits: 3
• GEOL 316 - Computers in Geology Credits: 3
• CS 112 - Introduction to Computer Programming Credits: 4
• IT 103 - Introduction to Computing Credits: 3

**Program Courses (9 credits)**

Students must take 9 credits of degree-related course work in a coherent program designed in coordination with advisor and approved by department chair.

**Total: 61-63 credits**

**Bachelor of Science**

**Earth Science, BS**
Baner Code: SC-BS-ESCI

This degree is intended for students interested in studying the earth and its environment. Recognizing that these are integrated disciplines, students receive a broad background in earth and environmental sciences and select one of six specialty concentrations. The concentrations in atmospheric science, earth science education, earth surface processes, environmental geoscience, and geology are solely offered by AOES. The concentration in oceanography and estuarine science is offered jointly with the Department of Environmental Science and Policy where specific advising is also available.

Students must fulfill all requirements for bachelor’s degrees including university general education requirements. In addition, students must complete the following course work with a minimum GPA of 2.00. Through the course work below, Earth science majors satisfy the university and college requirements in natural science and quantitative reasoning. GEOL 317 fulfills the writing intensive requirement for this major.

This undergraduate program offers students the option of applying to the accelerated master's degree program in curriculum and instruction (SECS concentration). See listing for specific requirements.

This program of study is offered by the Department of Atmospheric, Oceanic and Earth Sciences in the College of Science.

Degree Requirements

32-33 credits of core science and mathematics

- CHEM 211 - General Chemistry Credits: 4
- CHEM 212 - General Chemistry Credits: 4
- GEOL 101 - Introductory Geology I Credits: 4
- MATH 113 - Analytic Geometry and Calculus I Credits: 4
- MATH 114 - Analytic Geometry and Calculus II Credits: 4
- STAT 250 - Introductory Statistics I Credits: 3
- GEOL 406 - Seminar in Earth and Environmental Science Credits: 3 or GEOL 420 - Earth Science and Policy Credits: 3
- GEOL 309 - Introduction to Oceanography Credits: 3 or BIOL 309 - Introduction to Oceanography Credits: 3

Choose one of the following options:

- Option A: CLIM 111 - Introduction to the Fundamentals of Atmospheric Science Credits: 3 and lab CLIM 112 Credits: 1
- Option B: PHYS 111 - Introduction to the Fundamentals of Atmospheric Science Credits: 3 and lab PHYS 112 Credits: 1
- Option C: GGS 309 - Meteorology and Climate Credits: 3

8 credits of physics

Choose one sequence from the following, either

- PHYS 160 - University Physics I Credits: 3
- PHYS 161 - University Physics I Laboratory Credits: 1
- PHYS 260 - University Physics II Credits: 3
- PHYS 261 - University Physics II Laboratory Credits: 1

or

- PHYS 243 - College Physics Credits: 3
- PHYS 244 - College Physics Lab Credits: 1
- PHYS 245 - College Physics Credits: 3
- PHYS 246 - College Physics Lab Credits: 1
NOTE: Students in the Atmospheric Science Concentration must take the PHYS 160, 161, 260, 261 sequence.

Concentrations (29-41 credits)

Each student chooses a concentration in atmospheric science; earth science education; earth surface processes; environmental geoscience; geology; or oceanography and estuarine science. The credit requirements for each concentration differ as noted below.

▲ Atmospheric Science (ATMS)

This concentration gives students a strong quantitative undergraduate education in atmospheric and related sciences. The curriculum meets the American Meteorological Society's recommendations for a bachelor's degree in atmospheric science and the US Government Civil Service GS -1340 qualification in meteorology. Students completing the Atmospheric Science Concentration will be prepared for a wide range of career paths including operations and research (via graduate school) in meteorology, atmospheric science and climate. Students complete 41 credits as follows:

- CLIM 101 - Global Warming: Weather, Climate, and Society Credits: 3
- CS 112 - Introduction to Computer Programming Credits: 4
- MATH 213 - Analytic Geometry and Calculus III Credits: 3
- MATH 214 - Elementary Differential Equations Credits: 3
- PHYS 262 - University Physics III Credits: 3
- CLIM 301 - Weather Analysis and Prediction Credits: 4
- GGS 314 or CLIM 314 - Severe and Extreme Weather Credits: 3
- PHYS 307 - Thermal Physics Credits: 3
- CLIM 408 - Senior Research Credits: 3
- CDS 401 - Scientific Data Mining Credits: 3 or CSI 501 - Introduction to Scientific Programming CSI Credits: 3

and 9 credits from the following:

- GGS 121 - Dynamic Atmosphere and Hydrosphere Credits: 4
- MATH 313 - Introduction to Applied Mathematics Credits: 3
- GGS 319 - Air Pollution Credits: 3
- GGS 353 - Observations of the Earth and its Climate Credits: 3
- CLIM 390 - Topics in Climate Research Credits: 1-4
- CLIM 409 - Research Internship Credits: 3
- CHEM 438 - Atmospheric Chemistry Credits: 3
- CLIM 411 - Introduction to Atmospheric Dynamics Credits: 3
- CLIM 412 - Physical Oceanography Credits: 3
- GGS 456 - Introduction to Atmospheric Radiation Credits: 3
- PHYS 475 - Atmospheric Physics Credits: 3

Total: 41 credits

▲ Earth Science Education (ESE)

This concentration is for students intending to pursue secondary school teaching in earth science. Students are advised from both the Geology program and the Graduate School of Education. The concentration requires 29 credits of course work; an additional 21 credits must be earned to satisfy the optional teaching licensure requirement.
• ASTR 111 - Introductory Astronomy: The Solar System Credits: 3
• ASTR 112 - Introductory Astronomy Lab: The Solar System Credits: 1
• GEOL 102 - Introductory Geology II Credits: 4
• GEOL 302 - Mineralogy Credits: 4
• GEOL 303 - Field Mapping Techniques Credits: 3
• GEOL 408 - Practicum for Geology Laboratories Credits: 1
• GEOL 409 - Practicum for Geology Laboratories Credits: 1

and three of the following:

* Requires C or better in GEOL 302

• EVPP 110 - The Ecosphere: An Introduction to Environmental Science I Credits: 4
• GEOL 304 - Sedimentary Geology Credits: 4 *
• GEOL 308 - Igneous and Metamorphic Petrology Credits: 4 *
• GEOL 312 - Invertebrate Paleontology Credits: 4
• GEOL 317 - Geomorphology Credits: 4
• GEOL 363 - Coastal Morphology and Processes Credits: 4
• GEOL 401 - Structural Geology Credits: 4

Total: 29 credits

Optional Teacher Licensure Requirement (21 credits)

• EDUC 372 - Human Development, Learning, and Teaching Credits: 3
• EDUC 422 - Foundations of Secondary Education Credits: 3
• EDCI 473 - Teaching Science in the Secondary School Credits: 3
• EDCI 483 - Advanced Methods of Teaching Science in Secondary School Credits: 3
• EDCI 490 - Student Teaching in Education Credits: 6
• EDRD 419 - Literacy in the Content Areas Credits: 3

▲ Earth Surface Processes (EP)

This concentration focuses on a broad understanding of the physical processes and natural materials found at or near the earth's surface that have produced the primary landforms and landscapes observed today. Fundamental concepts, methods and techniques of landscape analysis are also examined. At least 31 credits are required as follows:

• GEOL 102 - Introductory Geology II Credits: 4 or EVPP 110 - The Ecosphere: An Introduction to Environmental Science I EVPP 110
• GEOL 302 - Mineralogy Credits: 4
• GEOL 303 - Field Mapping Techniques Credits: 3
• GEOL 306 - Soil Science Credits: 3
• GEOL 316 - Computers in Geology Credits: 3 or CS 112 - Introduction to Computer Programming Credits: 4 (CS 112 satisfies the general education information technology requirement)
• GEOL 317 - Geomorphology Credits: 4

and four of the following:
* Requires C or better in GEOL 302

- GEOL 304 - Sedimentary Geology Credits: 4 *
- GEOL 305 - Environmental Geology Credits: 3
- GEOL 313 - Hydrogeology Credits: 3
- GEOL 315 - Topics in Geology II Credits: 1-3
- GEOL 363 - Coastal Morphology and Processes Credits: 4
- GEOL 401 - Structural Geology Credits: 4
- GEOL 403 - Geochemistry Credits: 3
- GEOL 417 - Geophysics Credits: 3

Total: 31-37 credits

▲ Environmental Geoscience (EVGS)

This concentration provides tools for applying geologic information (about soils, rocks, water, weather and landscapes) to contemporary environmental problems such as pollution and waste management, resource extraction, natural hazards, land-use and habitat restoration, species preservation, and human health. Environmental geoscience studies the physical environment in which biological interactions take place, and so aids in the understanding of ecology. At least 35 credits are required as follows:

- GEOL 102 - Introductory Geology II Credits: 4
- GEOL 302 - Mineralogy Credits: 4
- GEOL 305 - Environmental Geology Credits: 3
- GEOL 306 - Soil Science Credits: 3
- GEOL 313 - Hydrogeology Credits: 3
- GEOL 320 - Geology of Earth Resources Credits: 3
- GEOL 321 - Geology of Energy Resources Credits: 3

and one of the following:

- GEOL 403 - Geochemistry Credits: 3
- CHEM 427 - Aquatic Environmental Chemistry Credits: 3

and one of the following:

- EVPP 336 - Human Dimensions of the Environment Credits: 3
- EVPP 361 - Introduction to Environmental Policy Credits: 3

and two of the following:

- CLIM 101 - Global Warming: Weather, Climate, and Society Credits: 3
- CLIM 412 - Physical Oceanography Credits: 3
- CONF 101 - Conflict and Our World Credits: 3
- EVPP 201 - Environment and You: Issues for the Twenty-First Century Credits: 3
- EVPP 336 - Human Dimensions of the Environment Credits: 3
- EVPP 361 - Introduction to Environmental Policy Credits: 3
- EVPP 432 - Energy Policy Credits: 3
- EVPP 436 - The Human Dimensions of Global Climate Change Credits: 3
- GEOL 304 - Sedimentary Geology Credits: 4
- GGS 302 - Global Environmental Hazards Credits: 3
- GGS 311 - Introduction to Geographic Information Systems Credits: 3
- GGS 322 - Issues in Global Change Credits: 3
- NCLC 211 - Introduction to Conservation Studies Credits: 3-6
- NCLC 220 - Energy and Environment Credits: 3-6
- PHYS 331 - Fundamentals of Renewable Energy Credits: 3
- PRLS 300 - People with Nature Credits: 3
- PRLS 402 - Human Behavior in Natural Environments Credits: 3

Total: 35 credits (minimum)

▲ Geology (GEOL)

The Geology Concentration is fashioned after traditional geology bachelor's degrees. It allows graduates to be employed as geologists in the field or pursue graduate studies in geology. At least 31 credits are required.

* Requires C or better in GEOL 302

- GEOL 102 - Introductory Geology II Credits: 4
- GEOL 302 - Mineralogy Credits: 4
- GEOL 304 - Sedimentary Geology Credits: 4 *
- GEOL 308 - Igneous and Metamorphic Petrology Credits: 4 *
- GEOL 312 - Invertebrate Paleontology Credits: 4
- GEOL 317 - Geomorphology Credits: 4
- GEOL 401 - Structural Geology Credits: 4
- GEOL 404 - Geological Field Techniques Credits: 1-8 (Not offered regularly; 6-credit geology field camp is required as substitute. See advisor for details).

Total: 31 credits (minimum)

▲ Oceanography and Estuarine Science (OEST)

This concentration provides students with a comprehensive knowledge of oceanography. Additional coursework in physical and chemical oceanography give insight into the aquatic environment and its link to both ecosystems and climate. Within the concentration, students can choose an open ocean or coastal option. The curriculum will emphasize local and regional case studies, in particular the Chesapeake Bay. The program will provide students with the basic training required to allow them to obtain entry level positions in oceanographic and estuarine career tracks or an appropriate graduate degree program. At least 29 credits are required as follows:

- CLIM 412 - Physical Oceanography Credits: 3
- GEOL 102 - Introductory Geology II Credits: 4
- GEOL 458 or CHEM 458 - Chemical Oceanography Credits: 3
  and one of the groups
- BIOL 103 - Introductory Biology I Credits: 4
- BIOL 104 - Introductory Biology II Credits: 4
  or
- BIOL 213 - Cell Structure and Function Credits: 4
- BIOL 303 - Animal Biology Credits: 4
or

- EVPP 110 - The Ecosphere: An Introduction to Environmental Science I Credits: 4
- EVPP 111 - The Ecosphere: An Introduction to Environmental Science II Credits: 4

One of the following two options:

Open Ocean Option
- GEOL 364 - Marine Geology Credits: 3
- BIOL 449 - Marine Ecology Credits: 3
- Elective chosen from list below (3-4 credits)

Coastal Ocean Option
- GEOL 363 - Coastal Morphology and Processes Credits: 4
- EVPP 581 - Estuarine and Coastal Ecology Credits: 3 and EVPP 582 - Estuarine and Coastal Ecology Laboratory Credits: 1

Plus additional 3 credits chosen from:

- BIOL 449 - Marine Ecology Credits: 3
- EVPP 581 - Estuarine and Coastal Ecology Credits: 3
- EVPP 582 - Estuarine and Coastal Ecology Laboratory Credits: 1
- BIOL 536 - Ichthyology Credits: 4
- EVPP 350 - Freshwater Ecosystems Credits: 4
- EVPP 377 - Applied Ecology Credits: 3
- EVPP 419 - Marine Mammal Biology and Conservation Credits: 3
- GEOL 302 - Mineralogy Credits: 4
- GEOL 304 - Sedimentary Geology Credits: 4
- GEOL 308 - Igneous and Metamorphic Petrology Credits: 4
- GEOL 312 - Invertebrate Paleontology Credits: 4
- GEOL 363 - Coastal Morphology and Processes Credits: 4
- NCLC 395 - Field-Based Work Credits: 1-18 (when topic is Exploring Underwater Ecology)
- BIOL 440 - Field Biology Credits: 0-4 (when topic is Coral Reef Ecology)
- Additional Recommended Course
- PHED 255 - Basic Scuba Diving Credits: 2

Total: 29 credits (minimum)

Bachelor/Accelerated Master's

Earth Science, BS/Curriculum and Instruction, Accelerated MEd
(Secondary Education Earth Science Concentration)

Highly qualified undergraduates may be admitted to a Bachelor's/Accelerated Master's program and obtain both a BS in Earth Science and an MEd in Curriculum and Instruction, Secondary Education Earth Science Concentration in an accelerated timeframe after satisfactory completion of 149 credits.

This program of study is offered jointly by the Department of Atmospheric, Oceanic and Earth Sciences in the College of Science and the Graduate School of Education in the College of Education and Human Development.
For policies governing all graduate degrees, see the Academic Policies section of the catalog.

Application Requirements

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in the Admissions section of this catalog. For information specific to this accelerated master's program, see Application Requirements and Deadlines on the College of Education and Human Development website.

Degree Requirements

Students complete the following courses in their senior year:

- EDCI 573 - Teaching Science in the Secondary School (to be taken in the Fall semester)
- EDUC 672 - Human Development and Learning: Secondary Education (to be taken in the Fall semester)
- EDCI 673 - Advanced Methods of Teaching Science in the Secondary School (to be taken in the Spring semester)
- EDRD 619 - Literacy in Content Areas (to be taken in the Spring semester)

While undergraduate students, accelerated master's students are able to apply two of the courses listed above to both the Bachelor's and Master's degrees. These courses are considered advanced standing for the MEd. A minimum grade of B must be earned to be eligible to count as advanced standing. The other two courses are taken as reserve graduate credit and do not apply to the undergraduate degree. Early in their final undergraduate semester, students must submit the Bachelor's/Accelerated Master's Transition Form and specify which of the four courses are to be designated as advanced standing and reserve graduate credit.

Doctor of Philosophy

Climate Dynamics, PhD

Banner Code: SC-PHD-CLIM

The mission of this program is to train the next generation of scientists in climate dynamics and related fields. Our students learn, through a comprehensive grounding in classwork, about how the atmosphere, ocean, and land surface work together to determine the climate. In collaboration with internationally-known scientists, students conduct independent work to further our understanding of climate, how it varies, and how much of it we can predict. Tools in the program include cutting-edge climate models, superb computing facilities, sophisticated statistical techniques, and comprehensive data sets. Our graduates have gone on to work at top laboratories and universities.

Understanding climate variability and predictability poses difficult mathematical, computational, and observational questions that have generated increasing intellectual excitement in recent years. Climate variability has important ramifications for society, from planning for next year’s electrical demand and forecasting agricultural production to answering complex questions involving long-term change in global climate, sea level, and biodiversity. While it is impossible to predict day-to-day weather more than a few weeks in advance, progress in predicting El Niño supports the idea that seasonal averages of temperature, rainfall, and other factors may be at least partly predictable months or even years in advance. Likewise, there is a strong scientific basis for predicting long-term changes in global climate due to changing greenhouse gas concentrations.

Climate dynamics faculty members have a blend of expertise in dynamics, statistics, and computational methods. They are heavily involved with national and international collaborations. Faculty members and students work closely with scientists at the Center for Ocean-Land-Atmosphere Studies (COLA), a national leader in climate modeling.

Faculty research focuses on the areas of climate prediction and predictability, climate variability, coupled ocean-atmosphere-land dynamics, and dynamical systems and retrospective analysis. Recent research topics include predictability of weather and
climate; modeling of the complex climate system; El Niño dynamics; monsoons; atmosphere-ocean interaction; land-climate interaction; decadal climate variability; ocean circulation theory; and climate change.

This program of study is offered by the Department of Atmospheric, Oceanic and Earth Sciences in the College of Science.

Admission Requirements

Applicants should have demonstrated high aptitude for quantitative reasoning, applied mathematics, and physical science. Applicants should have an undergraduate degree from an accredited institution, with a GPA of at least 3.00 in undergraduate work and a combined GRE score of 1,100 (verbal plus quantitative). To apply, prospective students should forward a completed Mason graduate application, two copies of official transcripts from each college and graduate institution attended, a current résumé, and an expanded goals statement to the COS Fairfax Campus Graduate Admissions Processing Center. Applicants should also include three letters of recommendation and an official report of scores obtained on the GRE-GEN. The GRE requirement for admission to the doctoral programs will be waived if the student holds a master’s degree from a U.S. institution. TOEFL scores are required of all international applicants who have not completed an MS degree in the United States.

Reduction of Credit

For students entering the doctoral program with a master's degree in a related field from a regionally accredited institution, the number of required credits may be reduced up to 30 credits, subject to approval of the program faculty and the associate dean for student and academic affairs. See the College of Science graduate policies section for more information.

Degree Requirements

Students must satisfy all requirements for doctoral degrees expressed in the Academic Policies section of this catalog.

The program requires 72 credits beyond the baccalaureate degree, with a minimum of 48 credits in course work, and 24 credits of dissertation research. For those holding master’s degrees, the required 48 credits may be reduced by up to 30 credits, depending on graduate courses completed. The degree will be awarded on completion of the required course work and approval of a PhD thesis that makes an original and significant contribution to the field.

The 48-credit curriculum requirement is divided into four areas: 12 credits of fundamental climate science courses, 9 credits of core computational methods, 3 credits of seminar, and a minimum of 24 credits of electives. The course work is organized as follows:

Doctoral Course Work (24 credits)

Fundamental Climate Science Courses (12 credits):

- CLIM 710 - Introduction to Physical Climate System Credits: 3
- CLIM 711 - Introduction to Atmospheric Dynamics Credits: 3
- CLIM 712 - Physical and Dynamical Oceanography Credits: 3
- CLIM 714 - Land-Climate Interactions Credits: 3

Core Computational Courses (9 credits):

- CSI 700 - Numerical Methods Credits: 3
- CSI 701 - Foundations of Computational Science Credits: 3
- CLIM 715 - Numerical Methods for Climate Modeling Credits: 3
Climate Seminar (3 credits):

- CLIM 991 - Climate Dynamics Seminar Credits: 1 (taken three times)

Electives (24 credits):

- 24 credits of electives, including up to 5 credits of independent research

Qualifying Exams

After completing the fundamental climate science courses, students take a two-part qualifying exam that includes core and specialty components. The core component is administered by an examination committee. After successfully completing the core component exam, students take the exam for the specialty component, which is administered by the dissertation committee that students typically form by the spring semester of their second year.

Advancement to Candidacy

Following successful completion of both parts of the qualifying exam, students present a written dissertation proposal to the committee. Students may enroll in CLIM 998 Doctoral Dissertation Proposal to complete this effort. After approval of the dissertation proposal, students are formally advanced to doctoral candidacy.

Dissertation Research (24 credits):

No more than 24 combined credits from CLIM 998 and CLIM 999 may be applied toward satisfying doctoral degree requirements, with no more than 12 credits of CLIM 998.

- CLIM 998 - Doctoral Dissertation Proposal Credits: 1-12
- CLIM 999 - Doctoral Dissertation Credits: 1-12 (minimum 3 credits)

Dissertation Research and Defense

After approval of the dissertation proposal, students are formally advanced to doctoral candidacy and produce the dissertation while taking CLIM 999. The degree will be awarded on completion of the required course work and approval of a dissertation that makes an original and significant contribution to the field.

Total: 72 credits

Non-Degree

Earth Science Minor

Banner Code: ESCI

Students may not receive both the minor in geology and the minor in earth science. Eight credits of course work must be unique to the minor. For policies governing all minors, see the Academic Policies section of this catalog.

This program of study is offered by the Department of Atmospheric, Oceanic and Earth Sciences in the College of Science.
Course Work

To receive this minor, students must successfully complete 18-19 credits with a minimum GPA of 2.00, distributed as follows:

- GEOL 101 - Introductory Geology I Credits: 4
- GEOL 309 or BIOL 309 - Introduction to Oceanography Credits: 3
  and one of the following:
- CLIM 111 - Introduction to the Fundamentals of Atmospheric Science Credits: 3 and CLIM 112 - Introduction to the Fundamentals of Atmospheric Science Lab Credits: 1
  or
- GGS 309 - Meteorology and Climate Credits: 3

Electives

- 8 credits of geology electives

Total: 18-19 credits

Geology Minor

Banner Code: GEOL

This program of study is offered by the Department of Atmospheric, Oceanic and Earth Sciences in the College of Science.

For policies governing all minors, see the Academic Policies section of this catalog.

Course Work

To receive the minor, students must successfully complete 20 credits, 8 of which must be unique to the minor, with a minimum GPA of 2.00 to include:

- GEOL 101 - Introductory Geology I Credits: 4
- GEOL 102 - Introductory Geology II Credits: 4
- GEOL 302 - Mineralogy Credits: 4

Two of the following courses (8 credits):

- GEOL 304 - Sedimentary Geology Credits: 4 *
- GEOL 308 - Igneous and Metamorphic Petrology Credits: 4 *
- GEOL 312 - Invertebrate Paleontology Credits: 4
- GEOL 317 - Geomorphology Credits: 4
- GEOL 401 - Structural Geology Credits: 4

Notes:

* Students must achieve a grade of 2.00 or better in GEOL 302 before taking GEOL 304 or 308.
Total: 20 credits

Ocean and Estuarine Science Minor

Banner Code: OES

To receive this minor, students must successfully complete 18-22 credits, 8 of which must be unique to the minor, with a minimum GPA of 2.00.

For policies governing all minors, see the Academic Policies section of this catalog.

This program of study is offered by the Department of Atmospheric, Oceanic and Earth Sciences in the College of Science.

Course Work

Core Requirements (9-10 credits)

- GEOL 309 or BIOL 309 - Introduction to Oceanography Credits: 3 and two of the following:
  - CLIM 412 - Physical Oceanography Credits: 3
  - GEOL 363 or EVPP 363 - Coastal Morphology and Processes Credits: 4
  - BIOL 449 - Marine Ecology Credits: 3
  - GEOL 364 - Marine Geology Credits: 3
  - GEOL 458 or CHEM 458 - Chemical Oceanography Credits: 3

at least three courses from the following: (9-12 credits)

Student may not repeat courses taken to satisfy the core requirement.

- BIOL 449 - Marine Ecology Credits: 3
- BIOL 450 or EVPP 421 - Marine Conservation Credits: 3
- BIOL 454 - Marine Mammal Biology and Conservation Credits: 3 and BIOL 455 Credits: 1*
  or
- EVPP 419 - Marine Mammal Biology and Conservation Credits: 3 and EVPP 420 Credits: 1*
- BIOL 536 or EVPP 536 - Ichthyology Credits: 4
- CLIM 101 - Global Warming: Weather, Climate, and Society Credits: 3
- CLIM 412 - Physical Oceanography Credits: 3
- EVPP 350 - Freshwater Ecosystems Credits: 4
- EVPP 581 - Estuarine and Coastal Ecology Credits: 3 *
- EVPP 582 - Estuarine and Coastal Ecology Laboratory Credits: 1 *
- GEOL 304 - Sedimentary Geology Credits: 4
- GEOL 308 - Igneous and Metamorphic Petrology Credits: 4
- GEOL 312 - Invertebrate Paleontology Credits: 4
- GEOL 363 or EVPP 363 - Coastal Morphology and Processes Credits: 4
- GEOL 364 - Marine Geology Credits: 3
- GEOL 458 or CHEM 458 - Chemical Oceanography Credits: 3
- BIOL 440 - Field Biology Credits: 0-4 (marine or estuarine oriented field courses only up to 4 credits)
• NCLC 495 - Field-Based Work Credits: 1-18 (marine or estuarine oriented field courses only up to 4 credits)

Notes:

PHED 255 is strongly recommended but not required.

*If chosen, must take both lecture and lab for a total of 4 credits

Total: 18-22 credits

Other Degrees

Atmospheric Science Minor

Banner Code: ATMS

Topics include weather forecasting, climate change, and the predictability of coupled ocean-atmosphere-land-variations. Students in physics, math, engineering, and computational sciences may be attracted to this minor because it provides a compelling application of the fundamental methods of analysis learned in their major. Such students are ideal candidates for research in atmospheric science and climate dynamics and the minor will facilitate entry into graduate studies in these fields.

Students in Earth Science, Geography and Geoinformation Science, and Environmental Science may find this minor useful because the atmosphere is an important influence on geography, ecosystems, and geological strata, and plays an important role in global change. The minor is not open to students in the Atmospheric Sciences concentration of the Earth Science major.

Contacts: Dr. Nord and Dr. Boybeyi.

This program of study is offered by the Department of Atmospheric, Oceanic and Earth Sciences in the College of Science.

Course Work

Eight credits of course work must be unique to the minor. For policies governing all minors, see the Academic Policies section of this catalog.

11 credits of Core Courses

• CLIM 101 - Global Warming: Weather, Climate, and Society Credits: 3
• CLIM 111 - Introduction to the Fundamentals of Atmospheric Science Credits: 3
• CLIM 112 - Introduction to the Fundamentals of Atmospheric Science Lab Credits: 1
• CLIM 301 - Weather Analysis and Prediction Credits: 4

6 credits of electives chosen from the following:

• CLIM 314 or GGS 314 - Severe and Extreme Weather Credits: 3
• CLIM 411 - Introduction to Atmospheric Dynamics Credits: 3
• CLIM 412 - Physical Oceanography Credits: 3
• CHEM 438 or CLIM 438 - Atmospheric Chemistry Credits: 3
• CLIM 408 - Senior Research Credits: 3
• PHYS 475 - Atmospheric Physics Credits: 3

Total: 17 credits

Paleontology Minor

Banner Code: PLEO

This program of study is offered by the Department of Atmospheric, Oceanic and Earth Sciences in the College of Science.

For policies governing all minors, see the Academic Policies section of this catalog. To receive this minor, students must successfully complete 18-21 credits, 8 credits of which must be unique to the minor, with a minimum GPA of 2.00, distributed as follows:

Course Work

Required Core (12 credits)

• GEOL 102 - Introductory Geology II Credits: 4
• GEOL 312 - Invertebrate Paleontology Credits: 4
• GEOL 334 or BIOL 334 - Vertebrate Paleontology Credits: 4

Electives (6-9 credits chosen from the following)

NOTE: Many of the courses below have additional prerequisites beyond the required core courses above so please check the individual courses carefully).

Pick 2 courses from:

• GGS 321 or BIOL 374 - Biogeography: Space, Time, and Life Credits: 3
• BIOL 377 - Applied Ecology Credits: 3
• BIOL 470 - Dinosaur Biology Credits: 3
• BIOL 471 - Evolution Credits: 3
• BIOL 468 or EVPP 468 - Vertebrate Natural History Credits: 4
• GEOL 304 - Sedimentary Geology Credits: 4
• GEOL 364 - Marine Geology Credits: 3
  OR choose one of the following four sequences
  Option 1
• BIOL 310 - Biodiversity Credits: 5
  and
• BIOL 320 - Comparative Chordate Anatomy Credits: 4
  or
• BIOL 322 - Developmental Biology Credits: 4
  or
• BIOL 331 - Invertebrate Zoology Credits: 4
  or
• BIOL 332 - Insect Biology Credits: 4
Option 2
- BIOL 308 - Foundations of Ecology and Evolution Credits: 5 and
- EVPP 468 or BIOL 468 - Vertebrate Natural History Credits: 4 Option 3
- GEOL 309 or BIOL 309 - Introduction to Oceanography Credits: 3 and
- EVPP 419 - Marine Mammal Biology and Conservation Credits: 3
- BIOL 305 - Biology of Microorganisms Credits: 3 and
- BIOL 407 - Microbial Diversity Credits: 4

Total 18-21 credits

**Biology Undergraduate Program**

Phone: 703-993-1050
Web: biology.gmu.edu

**Faculty**

**Director:** Rockwood

**Assistant Director:** Otto

**Biology Undergraduate Coordinator:** Polayes

**Medical Technology Coordinator:** Verhoeven

**Professors:** Rockwood

**Term associate professors:** Kocache, Madden, Polayes

**Term assistant professors:** Castilla, Fondufe, Laemmerzahl, Luther, Otto, Tondi, Verhoeven

**Adjunct faculty:** Bashian, Beck, Buckley-Beason, Crerar, Einhorn, Greenfield, Henley, Jones, Killorhan, Masterson, McClintock, Sudama, Van der Ham, Verardo, Wood-Salvesen

The Biology Undergraduate Program is a collaboration between the School of Systems Biology and the Department of Environmental Science and Policy (ESP). In addition, the Program has its own dedicated teaching faculty. The Program is administered by the Biology Program Director and the Assistant Program Director. It is governed by a Biology Program Committee consisting of the Program Director, two Biology Program faculty, two faculty from the School of Systems Biology and two faculty from the ESP Department.

**Course Work**

The program offers all undergraduate course work designated BIOL and MTCH in the Courses section of this catalog.

**Undergraduate Degree Programs**
The bachelor degree programs in biology provide a sound liberal arts education with substantial experience in quantitative and analytical thought, along with preparation for a related profession. In addition to ensuring the strong background necessary for graduate study in the many fields of biological science, the broad range of courses available at Mason allows students to develop careers in many areas, including secondary school teaching, environmental management, microbiology, molecular biology, biotechnology, genetics, and natural history. Alternatively, students may prepare for postgraduate studies in medicine, dentistry, veterinary medicine, wildlife management, fisheries biology, or marine science. The program also offers a BS in medical technology. Additional information can be found at the Biology Program’s web site at biology.gmu.edu or by visiting the Biology Program office in Exploratory Hall Room 1201.

Advising

All biology majors are strongly urged to see an academic advisor regularly to help them plan their schedule, so they can graduate on time. Biology majors should see an advisor for permission to register prior to their first semester and again as they complete 60 credits and 90 credits. Medical technology majors must see the medical technology advisor to obtain permission to register each semester.

Students returning from suspension are required to meet with the Undergraduate Coordinator or designee prior to being allowed to register.

For more information on advising or to set up an appointment, go to http://biology.gmu.edu.

Residence Requirement for Transfer Students

Students majoring in biology are required to complete 16 credits in the major at the 300 and 400 levels at Mason in addition to meeting the university residency requirement of at least 30 credits at Mason.

Policy on Using Biology Program Laboratories

Only authorized experiments and exercises may be carried out in any research or teaching laboratory and must be done under the supervision of a university faculty or staff member. No unauthorized work is allowed in any laboratory.

Policy on Using Organisms in Classes

Direct observations of actual organisms are considered an essential part of learning biology at all levels. Direct observations of organisms may involve the use of living or preserved specimens, dissections of organisms or parts of organisms, and microscopic examination of organisms or parts of organisms. All use of live animals conforms to National Institutes of Health guidelines for the use and care of laboratory animals. Activities specified above may be a required part of a course and thus serve as a basis for grading in the course. Any questions about the administration of this policy should be directed to the course coordinator or instructor.

Honors Program in Biology

Admission Requirements

Minimum requirements for invitation:

- GPA in biology courses must be 3.33 or better
- GPA in supporting requirements (math and other science) must be 3.00 or better
- Grade of B or better in BIOL 213
Students should apply for admission to the Honors Program during their first or second year at the university.

**Retention Requirements**

Students in honors biology must maintain a biology GPA of 3.33 or better and a supporting GPA of 3.00 or better from the time they have accumulated 30 hours and thereafter. Students who fall below this standard will be given a one semester probationary period in which to bring their GPA back up to the minimum standard.

**Requirements to Graduate with Biology Honors**

Students are required to take 6 to 8 credits in honors courses in BIOL including three semesters of BIOL 494 (honors seminar, 1 credit) or two semesters of BIOL 494 and one semester of BIOL 493 (honors research, 1 credit). BIOL 499 may count towards one of the semester requirements of BIOL 494. The GPA requirements are as follows:

- Minimum 3.33 GPA in honors biology courses
- Minimum 3.33 GPA in biology requirements
- Minimum 3.00 GPA in supporting requirements
- Minimum 3.00 GPA overall

**Writing-Intensive Requirement**

Mason requires all students to complete at least one course designated as “writing intensive” in their majors at the 300 level or above. Students majoring in biology fulfill this requirement by successfully completing BIOL 308. Medical Technology majors fulfill the requirement by completing BIOL 453.

**Minor in Biology**

Candidates for the minor in biology must complete 19-21 credits in Biology with a minimum GPA of 2.00. A grade of C or better must be earned in BIOL 213 before a student can advance to Upper Division courses. Note: Eight credits of coursework must be unique to the minor. For policies concerning minors, see the Academic Policies section of this catalog.

**Premedical, Predental, Prepharmacy, and Preveterinary Students**

Web: prehealth.gmu.edu
Many students planning to enter medical, dental, pharmacy, veterinary, optometry, or other health professional schools choose to pursue a major in biology. These students should consult the health professions advising web site on required course work and overall preparation.

**Teacher Licensure**

Students who wish to become teachers should pursue either the BA in Biology with a Concentration in Education or the BS in Biology with a Concentration in Education and consult the College of Education and Human Development section of this catalog and attend an information session early in their undergraduate career. For more information, call 703-993-2892, e-mail gseadmit@gmu.edu, or go to gse.gmu.edu.

**Biology for Nonmajors**
Students who are not majoring in science or mathematics and wish to fulfill their natural science requirement may enroll in BIOL 103 and BIOL 104. With permission of the instructor, nonmajors may enroll in BIOL 213 for further study. Chemistry, physics, and mathematics majors should consult their faculty advisor to determine which biology courses to take.

**BS in Medical Technology**

This program requires the equivalent of three years of full time professional study at the college level preceding a senior year of professional education in an affiliated school of medical technology. All affiliated schools are accredited by the National Accrediting Agency for Clinical Laboratory Sciences (NAACLS).

Responsibility for applying to schools of medical technology and gaining admission rests with the student; however, guidance is provided by the medical technology program director. Admission to medical technology schools is selective, so candidates should strive for strong academic standing. Students who fail to gain admission to a NAACLS-approved school are unable to complete the degree program. Such students may transfer to the biology major without loss of credits.

Application to medical technology schools should be initiated about a year before the desired entrance date. This fact, coupled with the large number of required courses in the pre-professional curriculum, makes it imperative that students in the program consult regularly with their faculty advisor. All medical technology majors and prospective majors are urged to enroll in MTCH 200 - Introduction to Medical Technology as early as possible. This course provides information on the profession, as well as the educational demands placed on candidates.

Students should be aware that the senior year spent off campus requires the following special interpretation of university policies. Transfer students must present at least 16 credits of 300–400 level biology or chemistry coursework taken at Mason. Students may present no more than 6 credits of D grades in biology and chemistry courses required in three years of pre-professional study. No unsatisfactory grades may be presented for courses in the senior year of professional study. Transfer students entering with more than 45 transfer credits are often unable to complete the pre-professional phase of their program in the usual three years of full-time study.

Senior students are registered at the university through special procedures. For details, consult the program director.

In addition to satisfying university general education requirements for the BS degree and completing MTCH 200, candidates must present all courses in their pre-professional programs with a minimum GPA of 2.00. Students must earn a C or better in core BIOL courses and must earn a C or better in BIOL 213 in order to advance in the major. Because of the extensive professional education requirements stipulated by NAACLS, students majoring in medical technology are exempt from the university-wide general education requirement in the fine arts.

**Major in Medical Technology as a Second Bachelor’s Degree**

While the standard program for medical technologists is three years on campus followed by a fourth year at a clinical affiliate (3 + 1), many students elect to complete a bachelor’s degree before entering the clinical program (4 + 1). Students who have completed a BS in biology or chemistry at Mason and then undertake a fifth year at a clinical affiliate may be eligible for a second bachelor’s degree with a major in medical technology. Students wishing to receive the second degree must apply before entering their fifth year. For further information, contact a medical technology advisor.

**Premedical Honor Society**

Alpha Epsilon Delta Zeta Premedical Honor Society is a national student support group, providing professional school tours, educational programs, and lectures on health topics and the professional school admissions process to students interested in such health-related fields as medicine, dentistry, optometry, and veterinary medicine. Active membership is awarded to students who have completed at least three semesters with a minimum scholastic GPA of 3.00. Associate membership is also available.

**Other Student Clubs**
Student clubs are also available for students interested in pursuing careers in dentistry, pharmacy, optometry, microbiology and veterinary medicine. Each club has its own web site and will have its own bulletin board in Exploratory Hall, second floor.

**Biology, Bachelor's/Accelerated Master's Degree**

Qualified undergraduates may be admitted to an accelerated master’s program and obtain both a BS and an MS within an accelerated time frame. This program is open only to those students who wish to pursue the master’s degree concentrations in microbiology or molecular biology. Students admitted to this program may take graduate courses after completing 90 undergraduate credits, and up to 6 credits of graduate work may be used in partial satisfaction of the requirements for the undergraduate degree. If students earn at least a 3.00 in these classes, they are granted advanced standing in the master’s program and must then complete an additional 24 credits to receive the master’s degree. All other master’s degree requirements must be met, including a minimum of 18 credits taken for the master’s after the bachelor’s degree is complete.

Students with an overall GPA of at least 3.00 may apply for provisional acceptance to the accelerated master’s program after completing BIOL 213, 214, 308, 310 and 311 and CHEM 315 and 318; Three letters of recommendation, including one from a prospective thesis or project advisor, are required.

After completing 120 credits and all requirements for the bachelor’s degree, students are awarded a bachelor's degree. Accelerated master’s students must then submit scores on the GRE and biology subject exam to have the provisional qualifier removed. Ordinarily, students should receive a minimum combined score of 1,100 on the verbal and quantitative portions of the general test and be in at least the 50th percentile on the subject exam.

**Bachelor of Arts**

**Biology, BA**

**Banner Code:** SC-BA-BIOL

This program of study is offered by the College of Science.

Students must fulfill all requirements for bachelor’s degrees, including university general education requirements. Students majoring in biology must complete additional college requirements for the BA degree in COS.

Students must complete the requirements with a minimum GPA of 2.00 in the 32 credits of BIOL courses and a minimum GPA of 2.00 in the supporting courses listed below.

Additionally:

- Students may apply no more than 4 credits of BIOL 103 or 104 toward elective credit (or equivalent transfer credit at the 100-200 level) if taken before successful completion of BIOL 213.
- Biology majors must earn a minimum grade of C in all biology core courses listed below. A grade of C or better must be earned in BIOL 213 in order to advance to other core requirements.
- Students may repeat BIOL 213 once and a second time only with permission of the Biology Undergraduate Program.
- Students may not count BIOL 124 and/or BIOL 125 toward any Biology major requirement.
- Students who take BIOL 310 may not count BIOL 303 and/or BIOL 304 toward any Biology major requirement.
- BIOL 308 meets the writing intensive requirement for this major.

Through the course work below, biology majors satisfy the university-wide requirements in natural science, quantitative reasoning, and information technology proficiency.

**Degree Requirements**
Biology core courses (22 credits)

All candidates for the BA in biology, whether pursuing the degree without concentration or with the concentration in biology education, must complete biology core courses as follows:

- BIOL 213 - Cell Structure and Function Credits: 4
- BIOL 214 - Biostatistics for Biology Majors Credits: 4
- BIOL 311 - General Genetics Credits: 4
- BIOL 308 - Foundations of Ecology and Evolution Credits: 5
- BIOL 310 - Biodiversity Credits: 5

BA without Concentration

In addition to the 22 credits of biology core courses, students pursuing the BA in biology without concentration complete 30-31 credits as follows:

10 credits of biology electives

- 10 credits of additional biology courses of which at least six credits must be upper division. One of these upper division courses must include a laboratory.

8 credits of chemistry

- CHEM 211 - General Chemistry Credits: 4
- CHEM 212 - General Chemistry Credits: 4

3-4 credits of math chosen from:

- MATH 111 - Linear Mathematical Modeling Credits: 3
- MATH 113 - Analytic Geometry and Calculus I Credits: 4
- MATH 114 - Analytic Geometry and Calculus II Credits: 4

3 credits of computer science

- CDS 130 - Computing for Scientists Credits: 3 (recommended by the biology program)
- or any course that fulfills the IT general education requirement

6 credits chosen from:

- ASTR 103 - Astronomy Credits: 3
- ASTR 111 - Introductory Astronomy: The Solar System Credits: 3
- ASTR 113 - Introductory Astronomy: Stars, Galaxies, and the Universe Credits: 3
- GEOL 101 - Introductory Geology I Credits: 4
- GEOL 102 - Introductory Geology II Credits: 4
- PHYS 243 - College Physics Credits: 3
- PHYS 245 - College Physics Credits: 3
• PHYS 160 - University Physics I Credits: 3
• PHYS 260 - University Physics II Credits: 3

Note

Students expecting to enter graduate or professional school are strongly urged to complete MATH 113 and MATH 114. Organic chemistry CHEM 313/315 and CHEM 314 /318 and PHYS 243/ 244, PHYS 245/246 are recommended.

Total: 31-33 credits

▲ Concentration in Biology Education (with Licensure) (BIED)

The education concentration consists of a selection of courses that provide essential skills to students who wish to pursue a career teaching high school biology. The concentration allows students to receive a license to teach biology in Virginia secondary schools within 120 credits.

Students majoring in biology with a concentration in biology education must complete 31-33 credits and additional course work required for licensure in Virginia. In doing so, students satisfy the university-wide general education requirements in natural science, quantitative reasoning, and information technology proficiency.

In addition to 22 credits of biology core courses, students take the following:

8 credits of anatomy and physiology courses

• BIOL 430 - Advanced Human Anatomy and Physiology I Credits: 4
• BIOL 431 - Advanced Human Anatomy and Physiology II Credits: 4

3 credits of biology elective

• One additional biology course as elective

8 credits of chemistry

• CHEM 211 - General Chemistry Credits: 4
• CHEM 212 - General Chemistry Credits: 4

3-4 credits of math chosen from:

• MATH 111 - Linear Mathematical Modeling Credits: 3
• MATH 113 - Analytic Geometry and Calculus I Credits: 4
• MATH 114 - Analytic Geometry and Calculus II Credits: 4

3 credits of computer science

• CDS 130 - Computing for Scientists Credits: 3 (recommended by the biology program)
• or any course that fulfills the IT general education requirement
6-7 additional credits chosen from:

- ASTR 103 - Astronomy Credits: 3
- ASTR 111 - Introductory Astronomy: The Solar System Credits: 3
- ASTR 113 - Introductory Astronomy: Stars, Galaxies, and the Universe Credits: 3
- GEOL 101 - Introductory Geology I Credits: 4
- GEOL 102 - Introductory Geology II Credits: 4
- PHYS 243 - College Physics Credits: 3
- PHYS 245 - College Physics Credits: 3
- PHYS 160 - University Physics I Credits: 3
- PHYS 260 - University Physics II Credits: 3

Teacher Licensure Requirement (21 credits)

- EDCI 473 - Teaching Science in the Secondary School Credits: 3
- EDCI 483 - Advanced Methods of Teaching Science in Secondary School Credits: 3
- EDUC 372 - Human Development, Learning, and Teaching Credits: 3 (Fulfills university-wide general education requirement for social and behavioral sciences)
- EDUC 422 - Foundations of Secondary Education Credits: 3
- EDCI 490 - Student Teaching in Education Credits: 6 (Fulfills university-wide general education requirement for synthesis)
- EDRD 419 - Literacy in the Content Areas Credits: 3

Total: 52-54 credits

**Bachelor of Science**

**Biology, BS**

**Banner Code:** SC-BS-BIOL

Students must fulfill all requirements for bachelor’s degrees including university general education requirements. Students must complete their biology coursework and the supporting requirements below with a minimum GPA of 2.00.

Additionally:

- Students may apply no more than 8 credits of BIOL 103 or 104 toward elective credit (or equivalent transfer credit at the 100-200 level) if taken before successful completion of BIOL 213.
- Biology majors must earn a minimum grade of C in all biology core courses listed below. A grade of C or better must be earned in BIOL 213 in order to advance to other core requirements.
- Students may repeat BIOL 213 once and a second time only with permission of the Biology Undergraduate Program.
- Students may not count BIOL 124 and/or BIOL 125 toward any Biology major requirement.
- Students who take BIOL 310 may not count BIOL 303 and/or BIOL 304 toward any Biology major requirement.
- BIOL 308 meets the writing intensive requirement for this major.

Several optional concentrations are available (see below). Through the course work described, biology majors satisfy the university-wide requirements in natural science, quantitative reasoning, and information technology proficiency.
This undergraduate program offers students the option of applying to the accelerated master’s program in biology or curriculum and instruction (SECB concentration). See each listing for specific requirements.

This program of study is offered by the Biology Undergraduate Program in the College of Science.

Degree Requirements

All students must complete 22 credits of biology core courses, below. Students then elect to complete the BS degree either with a concentration or without a concentration.

Biology Core Courses (22 credits)

All candidates for the BS in biology, whether pursuing the degree without concentration or with one of the five formal concentrations described below, must complete 22 credits of biology core courses as follows:

- BIOL 213 - Cell Structure and Function Credits: 4
- BIOL 214 - Biostatistics for Biology Majors Credits: 4
- BIOL 311 - General Genetics Credits: 4
- BIOL 308 - Foundations of Ecology and Evolution Credits: 5
- BIOL 310 - Biodiversity Credits: 5

BS without Concentration

Students who do not select an optional concentration complete 22 credits of biology core courses shown above in addition to the curriculum requirements listed below.

22 credits of biology electives

- 22 credits of additional biology courses, of which at least 14 credits must be upper division. Two of the upper division courses must include a laboratory.

13 credits of chemistry

- CHEM 211 - General Chemistry Credits: 4
- CHEM 212 - General Chemistry Credits: 4
- CHEM 313 - Organic Chemistry Credits: 3
- CHEM 315 - Organic Chemistry Lab I Credits: 2

One of the following options (3-8 credits):

Students are encouraged to consult with a biology faculty advisor to determine which option (A, B or C) best meets their career goals.

Option A
- CHEM 314 - Organic Chemistry Credits: 3 and CHEM 318 - Organic Chemistry Lab II Credits: 2

Option B
- One 3-credit chemistry course at the 300 or 400 level (not CHEM 314)

Option C
- GEOL 101 - Introductory Geology I Credits: 4 and GEOL 102 - Introductory Geology II Credits: 4

8 credits of physics

One sequence; either

- PHYS 243 - College Physics Credits: 3
- PHYS 244 - College Physics Lab Credits: 1
- PHYS 245 - College Physics Credits: 3
- PHYS 246 - College Physics Lab Credits: 1
  or
- PHYS 160 - University Physics I Credits: 3
- PHYS 161 - University Physics I Laboratory Credits: 1
- PHYS 260 - University Physics II Credits: 3
- PHYS 261 - University Physics II Laboratory Credits: 1
  The second physics course sequence (160, 161, 260, 261) will also satisfy the biology major requirement.

3-4 credits of math chosen from:

- MATH 111 - Linear Mathematical Modeling Credits: 3
- MATH 113 - Analytic Geometry and Calculus I Credits: 4
- MATH 114 - Analytic Geometry and Calculus II Credits: 4

3 credits of computer science

- CDS 130 - Computing for Scientists Credits: 3 (recommended by the biology program)
  or any course that fulfills the IT general education requirement

Note:

Students expecting to enter a professional school are strongly urged to complete MATH 113 and 114. Students who wish to take biochemistry must take BIOL 483 to receive credit toward the major in biology.

BS with Concentration

Students pursuing the degree with concentration complete 22 credits of biology core courses as shown above and the requirements for the concentration. Concentration options described below include:

- biology education (with licensure)
- biotechnology and molecular biology
- environmental and conservation biology
- marine and freshwater biology
- microbiology

▲ Concentration in Biology Education (with Licensure) (BIED)

The education concentration consists of a selection of courses that provide essential skills to students who wish to pursue a career teaching high school biology. The concentration allows students to receive a license to teach biology in Virginia secondary
schools within 120 credits. Through the course work below, students satisfy the university-wide general education requirements in social and behavioral science, natural science, quantitative reasoning, information technology proficiency and synthesis. Students who choose to undertake this concentration must complete their biology course work (including core) and the supporting requirements with a minimum GPA of 2.00 and fulfill all requirements for bachelor's degrees including university general education requirements and the additional rules for the BS in biology listed above.

8 credits of anatomy and physiology

- BIOL 430 - Advanced Human Anatomy and Physiology I Credits: 4
- BIOL 431 - Advanced Human Anatomy and Physiology II Credits: 4

8 credits of biology electives

- 8 credits of additional biology courses. BIOL 124 and 125 are not eligible to fulfill this requirement.

13 credits of chemistry

- CHEM 211 - General Chemistry Credits: 4
- CHEM 212 - General Chemistry Credits: 4
- CHEM 313 - Organic Chemistry Credits: 3
- CHEM 315 - Organic Chemistry Lab I Credits: 2

One of the following options (3-8 credits):

Students are encouraged to consult with a biology faculty advisor to determine which option (A, B, or C) best meets their career goals.

Option A
- CHEM 314 - Organic Chemistry Credits: 3 and CHEM 318 - Organic Chemistry Lab II Credits: 2

Option B
- One chemistry course at the 300 or 400 level (not CHEM 314)

Option C
- GEOL 101 - Introductory Geology I Credits: 4 and GEOL 102 - Introductory Geology II Credits: 4

8 credits of physics

One sequence; either

- PHYS 243 - College Physics Credits: 3
- PHYS 244 - College Physics Lab Credits: 1
- PHYS 245 - College Physics Credits: 3
- PHYS 246 - College Physics Lab Credits: 1
- PHYS 160 - University Physics I Credits: 3
- PHYS 161 - University Physics I Laboratory Credits: 1
- PHYS 260 - University Physics II Credits: 3
- PHYS 261 - University Physics II Laboratory Credits: 1

The second physics course sequence (160, 161, 260, 261) will also satisfy the biology major requirement.
3-4 credits of math chosen from:

- MATH 111 - Linear Mathematical Modeling Credits: 3
- MATH 113 - Analytic Geometry and Calculus I Credits: 4
- MATH 114 - Analytic Geometry and Calculus II Credits: 4

3 credits of computer science

- CDS 130 - Computing for Scientists Credits: 3 (recommended by the biology program)
- or any course that fulfills the IT general education requirement

Teacher Licensure Requirement (21 credits)

EDCI 473 and EDCI 483 will count towards the 44 required hours in biology

- EDCI 473 - Teaching Science in the Secondary School Credits: 3
- EDCI 483 - Advanced Methods of Teaching Science in Secondary School Credits: 3
- EDUC 372 - Human Development, Learning, and Teaching Credits: 3 (Fulfills university general education requirement for social and behavioral science)
- EDCI 422 - Foundations of Secondary Education Credits: 3
- EDCI 490 - Student Teaching in Education Credits: 6 (Fulfills university general education requirement for synthesis)
- EDUC 372 - Human Development, Learning, and Teaching Credits: 3
- EDRD 419 - Literacy in the Content Areas Credits: 3

▲ Concentration in Biotechnology and Molecular Biology (BTMB)

The biotechnology and molecular biology concentration consists of a selection of courses that provide essential skills to students who seek employment in the field or wish to include an applied component in their undergraduate training in biology.

Students who choose to undertake this concentration must complete their biology course work (including core) and the supporting requirements with a minimum GPA of 2.00 and fulfill all requirements for bachelor's degrees including university general education requirements and the additional rules for the BS in biology listed above. Through the course work below, they satisfy the university-wide general education requirements in natural science, quantitative reasoning, and information technology proficiency.

11 credits of biotechnology courses

- BIOL 305 - Biology of Microorganisms Credits: 3
- BIOL 306 - Biology of Microorganisms Laboratory Credits: 1
- BIOL 385 - Biotechnology and Genetic Engineering Credits: 3
- BIOL 483 - General Biochemistry Credits: 4

11 additional credits of biology chosen from:

Note: Laboratories associated with these courses are required. At least one of these electives must include a laboratory.

- BIOL 402 - Applied and Industrial Microbiology Credits: 3 with BIOL 403 - Techniques in Applied and Industrial Microbiology Credits: 1 (course plus lab = 4 credits)
- BIOL 405 - Microbial Genetics Credits: 4
- BIOL 406 - Microbial Physiology and Metabolism Credits: 4
• BIOL 411 - Advanced General Genetics Credits: 3
• BIOL 417 - Selected Topics in Molecular and Cellular Biology Credits: 1-4 *
• BIOL 418 - Current Topics in Microbiology Credits: 3 *
• BIOL 420 - Vaccines Credits: 3
• BIOL 421 - Genetics of Human Diseases Credits: 3
• BIOL 422 - Stem Cell Biology and Regenerative Medicine Credits: 3
• BIOL 452 - Immunology Credits: 3 with BIOL 453 - Immunology Laboratory Credits: 1 (course plus lab = 4 credits)
• BIOL 482 - Introduction to Molecular Genetics Credits: 3
• BIOL 484 - Eukaryotic Cell Biology Credits: 3
• BIOL 486 - Molecular Biology and Biotechnology Laboratory Credits: 2
• BIOL 497 - Special Problems in Biology Credits: 1-4 *

Note:

*Registration for BIOL 417, 418 or 497 subject to approval by program coordinator.

18 credits of chemistry

• CHEM 211 - General Chemistry Credits: 4
• CHEM 212 - General Chemistry Credits: 4
• CHEM 313 - Organic Chemistry Credits: 3
• CHEM 314 - Organic Chemistry Credits: 3
• CHEM 315 - Organic Chemistry Lab I Credits: 2
• CHEM 318 - Organic Chemistry Lab II Credits: 2

8 credits of physics

One sequence; either

• PHYS 243 - College Physics Credits: 3
• PHYS 244 - College Physics Lab Credits: 1
• PHYS 245 - College Physics Credits: 3
• PHYS 246 - College Physics Lab Credits: 1
  or
• PHYS 160 - University Physics I Credits: 3
• PHYS 161 - University Physics I Laboratory Credits: 1
• PHYS 260 - University Physics II Credits: 3
• PHYS 261 - University Physics II Laboratory Credits: 1
  The second physics course sequence (160, 161, 260, 261) will also satisfy the biology major requirement.

3-4 credits of math chosen from:

• MATH 111 - Linear Mathematical Modeling Credits: 3
• MATH 113 - Analytic Geometry and Calculus I Credits: 4
• MATH 114 - Analytic Geometry and Calculus II Credits: 4

3 credits of computer science
- CDS 130 - Computing for Scientists Credits: 3 (recommended by the biology program)
- or any course that fulfills the IT general education requirement

▲ Concentration in Environmental and Conservation Biology (ESCB)

This concentration is offered to students seeking a biology degree that focuses on ecology and organismal biology and prepares them for graduate work or employment in environmental and conservation fields, such as natural resources management, fisheries, forestry, water quality management, aquatic and wetland ecology, and conservation biology. The concentration is staffed and supported by the Department of Environmental Science and Policy.

Students who choose to undertake this concentration must complete their biology course work (including core) and the supporting requirements with a minimum GPA of 2.00 and fulfill all requirements for bachelor's degrees including university general education requirements and the additional rules for the BS in biology listed above. Through the course work below, they satisfy the university-wide general education requirements in natural science, quantitative reasoning, and information technology proficiency.

6 credits in environmental and conservation biology

- BIOL 318 - Conservation Biology Credits: 3
- BIOL 377 - Applied Ecology Credits: 3

3-4 credits in field biology chosen from:

- BIOL 345 - Plant Ecology Credits: 4
- BIOL 350 - Freshwater Ecosystems Credits: 4
- BIOL 468 - Vertebrate Natural History Credits: 4
- One 3-4 credit field course approved by the Biology Program Director

12-13 credits of biology electives chosen from:

Two courses must be selected from the list below, and one of these courses must include a laboratory.

- BIOL 309 - Introduction to Oceanography Credits: 3
- BIOL 326 - Animal Physiology Credits: 3
- BIOL 331 - Invertebrate Zoology Credits: 4
- BIOL 332 - Insect Biology Credits: 4
- BIOL 344 - Plant Diversity and Evolution Credits: 4
- BIOL 345 - Plant Ecology Credits: 4 *
- BIOL 350 - Freshwater Ecosystems Credits: 4 *
- BIOL 355 - Ecological Engineering and Ecosystem Restoration Credits: 4
- BIOL 440 - Field Biology Credits: 0-4
- BIOL 449 - Marine Ecology Credits: 3
- BIOL 454 - Marine Mammal Biology and Conservation Credits: 3
- BIOL 455 - Marine Mammal Biology and Conservation Field Course Credits: 1
- BIOL 459 - Fungi and Ecosystems Credits: 3
- BIOL 468 - Vertebrate Natural History Credits: 4 *
- BIOL 472 - Introductory Animal Behavior Credits: 3
- BIOL 473 - Introductory Laboratory in Animal Behavior Credits: 1
Note:

*If not used for field course requirement.

13 credits of chemistry

- CHEM 211 - General Chemistry Credits: 4
- CHEM 212 - General Chemistry Credits: 4
- CHEM 313 - Organic Chemistry Credits: 3
- CHEM 315 - Organic Chemistry Lab I Credits: 2

One of the following options (3-8 credits):

Option A
- CHEM 314 - Organic Chemistry Credits: 3 and CHEM 318 - Organic Chemistry Lab II Credits: 2

Option B
- One chemistry course at the 300 or 400 level (not CHEM 314)

Option C
- GEOL 101 - Introductory Geology I Credits: 4 and GEOL 102 - Introductory Geology II Credits: 4

8 credits of physics

One sequence; either

- PHYS 243 - College Physics Credits: 3
- PHYS 244 - College Physics Lab Credits: 1
- PHYS 245 - College Physics Credits: 3
- PHYS 246 - College Physics Lab Credits: 1
  or
- PHYS 160 - University Physics I Credits: 3
- PHYS 161 - University Physics I Laboratory Credits: 1
- PHYS 260 - University Physics II Credits: 3
- PHYS 261 - University Physics II Laboratory Credits: 1
  The second physics course sequence (160, 161, 260, 261) will also satisfy the biology major requirement.

3-4 credits of math chosen from:

- MATH 111 - Linear Mathematical Modeling Credits: 3
- MATH 113 - Analytic Geometry and Calculus I Credits: 4
- MATH 114 - Analytic Geometry and Calculus II Credits: 4

3 credits of computer science

- CDS 130 - Computing for Scientists Credits: 3 (recommended by the biology program)
  or any course that fulfills the IT general education requirement

▲ Concentration in Marine and Freshwater Biology (MFWB)
This concentration is offered to students seeking a biology degree that focuses on the biology of organisms in marine and freshwater environments.

Students who choose to undertake this concentration must complete their biology course work (including core) and the supporting requirements with a minimum GPA of 2.00 and fulfill all requirements for bachelor's degrees including university general education requirements and the additional rules for the BS in biology listed above. Through the course work below, they satisfy the university-wide general education requirements in natural science, quantitative reasoning, and information technology proficiency.

10 credits of marine and freshwater biology

- BIOL 309 - Introduction to Oceanography Credits: 3
- BIOL 350 - Freshwater Ecosystems Credits: 4
- BIOL 449 - Marine Ecology Credits: 3

12 credits of biology electives chosen from:

- BIOL 331 - Invertebrate Zoology Credits: 4
- BIOL 440 - Field Biology Credits: 0-4
- BIOL 450 - Marine conservation Credits: 3
- BIOL 454 - Marine Mammal Biology and Conservation Credits: 3
- BIOL 455 - Marine Mammal Biology and Conservation Field Course Credits: 1
- BIOL 472 - Introductory Animal Behavior Credits: 3
- BIOL 473 - Introductory Laboratory in Animal Behavior Credits: 1

33 credits of physical sciences

- CHEM 211 - General Chemistry Credits: 4
- CHEM 212 - General Chemistry Credits: 4
- CHEM 313 - Organic Chemistry Credits: 3
- CHEM 315 - Organic Chemistry Lab I Credits: 2
- GEOL 101 - Introductory Geology I Credits: 4
- GEOL 102 - Introductory Geology II Credits: 4
- EVPP 363 - Coastal Morphology and Processes Credits: 4
  plus
  One 8-credit physics sequence; either
- PHYS 243 - College Physics Credits: 3
- PHYS 244 - College Physics Lab Credits: 1
- PHYS 245 - College Physics Credits: 3
- PHYS 246 - College Physics Lab Credits: 1
  or
- PHYS 160 - University Physics I Credits: 3
- PHYS 161 - University Physics I Laboratory Credits: 1
- PHYS 260 - University Physics II Credits: 3
- PHYS 261 - University Physics II Laboratory Credits: 1
  The second physics course sequence (160, 161, 260, 261) will also satisfy the biology major requirement.

3-4 credits of math chosen from:
- MATH 111 - Linear Mathematical Modeling Credits: 3
- MATH 113 - Analytic Geometry and Calculus I Credits: 4
- MATH 114 - Analytic Geometry and Calculus II Credits: 4

3 credits of computer science

- CDS 130 - Computing for Scientists Credits: 3 (recommended by the biology program)
- or any course that fulfills the IT general education requirement

Note:

PHED 255 is strongly recommended but not required.

▲ Concentration in Microbiology (MIB)

This concentration offers lecture and laboratory courses in microbiology to prepare students for employment or advanced study in microbial genetics, physiology, diversity, and related fields.

Students who choose to undertake this concentration must complete their biology course work (including core) and the supporting requirements with a minimum GPA of 2.00 and fulfill all requirements for bachelor's degrees including university general education requirements and the additional rules for the BS in biology listed above. Through the course work below, they satisfy the university-wide general education requirements in natural science, quantitative reasoning, and information technology proficiency.

16 credits of microbiology courses

- BIOL 305 - Biology of Microorganisms Credits: 3
- BIOL 306 - Biology of Microorganisms Laboratory Credits: 1
- BIOL 405 - Microbial Genetics Credits: 4
- BIOL 406 - Microbial Physiology and Metabolism Credits: 4
- BIOL 407 - Microbial Diversity Credits: 4

6 credits of biology electives chosen from:

- BIOL 382 - Introduction to Virology Credits: 3
- BIOL 385 - Biotechnology and Genetic Engineering Credits: 3
- BIOL 402 - Applied and Industrial Microbiology Credits: 3
- BIOL 403 - Techniques in Applied and Industrial Microbiology Credits: 1
- BIOL 404 - Medical Microbiology Credits: 3
- BIOL 418 - Current Topics in Microbiology Credits: 3
- BIOL 420 - Vaccines Credits: 3
- BIOL 452 - Immunology Credits: 3
- BIOL 453 - Immunology Laboratory Credits: 1
- BIOL 459 - Fungi and Ecosystems Credits: 3
- BIOL 483 - General Biochemistry Credits: 4

18 credits of chemistry
• CHEM 211 - General Chemistry Credits: 4
• CHEM 212 - General Chemistry Credits: 4
• CHEM 313 - Organic Chemistry Credits: 3
• CHEM 314 - Organic Chemistry Credits: 3
• CHEM 315 - Organic Chemistry Lab I Credits: 2
• CHEM 318 - Organic Chemistry Lab II Credits: 2

8 credits of physics

One sequence; either

• PHYS 243 - College Physics Credits: 3
• PHYS 244 - College Physics Lab Credits: 1
• PHYS 245 - College Physics Credits: 3
• PHYS 246 - College Physics Lab Credits: 1

or

• PHYS 160 - University Physics I Credits: 3
• PHYS 161 - University Physics I Laboratory Credits: 1
• PHYS 260 - University Physics II Credits: 3
• PHYS 261 - University Physics II Laboratory Credits: 1

The second physics course sequence (160, 161, 260, 261) will also satisfy the biology major requirement.

3-4 credits of math chosen from:

• MATH 111 - Linear Mathematical Modeling Credits: 3
• MATH 113 - Analytic Geometry and Calculus I Credits: 4
• MATH 114 - Analytic Geometry and Calculus II Credits: 4

3 credits of computer science

• CDS 130 - Computing for Scientists Credits: 3 (recommended by the biology program)
• or any course that fulfills the IT general education requirement

Medical Technology, BS

Banner Code: SC-BS-MTCH

This program requires the equivalent of three years of full-time preprofessional study at the college level preceding a senior year of professional education in an affiliated school of medical technology. All affiliated schools are accredited by the National Accrediting Agency for Clinical Laboratory Sciences (NAACLS).

Responsibility for applying to schools of medical technology and gaining admission rests with the student; however, guidance is provided by the medical technology program director. Admission to medical technology schools is selective, so candidates should strive for strong academic standing. Students who fail to gain admission to an affiliated NAACLS-approved school are unable to complete the degree program. Such students may transfer to the biology major without loss of credits.

Application to medical technology schools should be initiated about a year before the desired entrance date. This fact, coupled with the large number of required courses in the preprofessional curriculum, makes it imperative that students in the program consult regularly with the medical technology program coordinator. All medical technology majors and prospective majors are
urged to enroll in MTCH 200 as early as possible. This course provides information on the profession, as well as the educational demands placed on candidates.

Students must fulfill all requirements for bachelor’s degrees including university general education requirements*. In addition:

- students must complete MTCH 200 and present the following courses in their biology coursework and supporting requirements with a minimum GPA of 2.00.
- A grade of C or better must be earned in BIOL 213 in order to advance to other major requirements. Students may repeat BIOL 213 once and a second time only with permission of the director of the Undergraduate Biology Program.
- Medical Technology majors must earn a minimum of C in all biology core courses listed below.
- Through the course work below, majors satisfy the university-wide general education requirements in natural science, quantitative reasoning, and information technology proficiency. Taking BIOL 453 fulfills the writing intensive requirement.
- *Note: Because of the extensive pre-professional education requirements stipulated by NAACLS, students majoring in medical technology are exempt from the university-wide general education requirement in the fine arts.

Senior students are registered at the university through special procedures. For details, consult the medical technology program coordinator.

Students should be aware that the senior year spent off campus requires the following special interpretation of university policies: transfer students must present at least 16 credits of 300- to 400-level biology or chemistry course work taken at Mason; no unsatisfactory grades (less than C) may be presented for courses in the senior year of professional study. Transfer students entering with more than 45 transfer credits are often unable to complete the preprofessional phase of their program in the usual three years of full-time study.

This program of study is offered by the Biology Undergraduate Program in the College of Science.

Degree Requirements

Biology Core (12 credits)

- BIOL 213 - Cell Structure and Function Credits: 4
- BIOL 214 - Biostatistics for Biology Majors Credits: 4
- BIOL 311 - General Genetics Credits: 4

MTCH and BIOL additional courses (17 credits)

- MTCH 200 - Introduction to Medical Technology Credits: 1
- BIOL 305 - Biology of Microorganisms Credits: 3
- BIOL 306 - Biology of Microorganisms Laboratory Credits: 1
- BIOL 452 - Immunology Credits: 3
- BIOL 453 - Immunology Laboratory Credits: 1
- BIOL 430 - Advanced Human Anatomy and Physiology I Credits: 4
- BIOL 431 - Advanced Human Anatomy and Physiology II Credits: 4

Chemistry (minimum 18 credits)

- CHEM 211 - General Chemistry Credits: 4
- CHEM 212 - General Chemistry Credits: 4
- CHEM 313 - Organic Chemistry Credits: 3
- CHEM 314 - Organic Chemistry Credits: 3
- CHEM 315 - Organic Chemistry Lab I Credits: 2
- CHEM 318 - Organic Chemistry Lab II Credits: 2

Mathematics (3-4 credits)

Choose from:

- MATH 111 - Linear Mathematical Modeling Credits: 3
- MATH 113 - Analytic Geometry and Calculus I Credits: 4
- MATH 114 - Analytic Geometry and Calculus II Credits: 4

Computer Skills Course (3 credits)

- CDS 130 - Computing for Scientists Credits: 3 (recommended course for this major)
- or any course that fulfills the IT general education requirement

Professional Study (maximum 30 credits)

Students may have up to 30 credits of professional study during the senior year awarded for clinical education at an affiliated school of medical technology. The distribution of credits in these courses varies with the school of medical technology. No more than 30 professional credits may be applied toward the degree.

Courses that may be awarded for the clinical year include:

- MTCH 401 - Orientation to the Problems and Practices of the Clinical Laboratory Credits: 1-2
- MTCH 402 - Clinical Hematology and Coagulation Credits: 1-8
- MTCH 403 - Clinical Microscopy Credits: 1-3
- MTCH 404 - Serology and Immunohematology Credits: 1-7
- MTCH 405 - Clinical Microbiology Credits: 1-8
- MTCH 406 - Clinical Chemistry Credits: 1-10

Notes:

Students are encouraged to elect additional basic science courses during their preprofessional years. Recommended courses are BIOL 465, 483, 484, and 485; CHEM 321; and PHYS 243, 244, 245, and 246.

Bachelor/Accelerated Master's

Biology, BA or BS/Curriculum and Instruction, Accelerated MEd (Secondary Education Biology Concentration)

Highly qualified undergraduates may be admitted to a Bachelor's/Accelerated Master's program and obtain a BA or BS in Biology (degree without concentration) and an MEd in Curriculum and Instruction with the Secondary Education Biology Concentration in an accelerated time frame after satisfactory completion of 149 credits.
This program of study is offered jointly by the Biology Undergraduate Program in the College of Science and the Graduate School of Education in the College of Education and Human Development.

For policies governing all graduate degrees, see the Academic Policies section of the catalog.

**Application Requirements**

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in the Admissions section of this catalog. For information specific to this accelerated master's program, see Application Requirements and Deadlines on the College of Education and Human Development web site.

**Degree Requirements**

Students must complete the following courses in their senior year:

- EDCI 573 - Teaching Science in the Secondary School (to be taken in the Fall semester)
- EDUC 672 - Human Development and Learning: Secondary Education (to be taken in the Fall semester)
- EDCI 673 - Advanced Methods of Teaching Science in the Secondary School (to be taken in the Spring semester)
- EDRD 619 - Literacy in Content Areas (to be taken in the Spring semester)

While undergraduate students, accelerated master's students are able to apply two of the courses listed above to both the Bachelor's and Master's degrees. These courses are considered advanced standing for the MEd. A minimum grade of B must be earned to be eligible to count as advanced standing. The other two courses are taken as reserve graduate credit and do not apply to the undergraduate degree. Early in their final undergraduate semester, students must submit the Bachelor's/Accelerated Master's Transition Form and specify which of the four courses are to be designated as advanced standing and reserve graduate credit.

**Biology, BS/Biology, Accelerated MS**

Qualified undergraduates may be admitted to an accelerated master’s program and obtain both a BS and an MS within an accelerated time frame. This program is open only to those students who wish to pursue the master’s degree concentrations in microbiology or molecular biology. Students admitted to this program may take graduate courses after completing 90 undergraduate credits, and up to 6 credits of graduate work may be used in partial satisfaction of the requirements for the undergraduate degree. If students earn at least a 3.00 in these classes, they are granted advanced standing in the master’s program and must then complete an additional 24 credits to receive the master’s degree. All other master’s degree requirements must be met, including a minimum of 18 credits taken for the master’s after the bachelor’s degree is complete.

Students with an overall GPA of at least 3.00 may apply for provisional acceptance to the accelerated master’s program after completing BIOL 213, 214, 308, 310 and 311 and CHEM 315 and 318; Three letters of recommendation, including one from a prospective thesis or project advisor, are required.

After completing 120 credits and all requirements for the bachelor’s degree and filing the Graduation Intent Form, students are awarded a bachelor’s degree. Accelerated master’s students must then submit scores on the GRE to have the provisional qualifier removed. Ordinarily, students should receive a minimum combined score of 1,100 on the verbal and quantitative portions of the general test and be in at least the 50th percentile on the subject exam.

This program of study is jointly offered by the School of Systems Biology and the Biology Undergraduate Program in the College of Science.

**Non-Degree**
Biology Minor

Banner Code:  BIOL

This program of study is offered by the Biology Undergraduate Program in the College of Science.

Course Work

Candidates for the minor in biology must complete 19-21 credits in biology with a minimum GPA of 2.00 or better and must earn a C or better in BIOL 213. Eight credits of course work must be unique to the minor. For policies governing all minors, see the Academic Policies section of this catalog.

- BIOL 213 - Cell Structure and Function Credits: 4
- BIOL 311 - General Genetics Credits: 4
  one of the following:
- BIOL 308 - Foundations of Ecology and Evolution Credits: 5
  or
- BIOL 310 - Biodiversity Credits: 5
  and
- Two elective courses in biology

Total: 19-21 credits

Chemistry and Biochemistry

Phone: 703-993-1070
Web: chemistry.gmu.edu

Faculty

Professors: Cozzens, Foster, Hussam, Mose, Mushrush

Associate professors: Bishop, Born, Couch, Honeychuck, Schreifels (Chair), Slayden, Weatherspoon (Associate Chair)

Assistant professors: Cooper

Term associate professor: Hatton

Term assistant professors: Hamblet, Kort, Pant, Pettigrew, Takahara

Emeritus: Davies, Stalick

Course Work

This department offers all course work designated CHEM in the Courses section of this catalog.

Writing-Intensive Requirement
Mason requires all students to complete at least one course designated as “writing intensive” in their majors at the 300 level or above. Students majoring in chemistry fulfill this requirement by successfully completing CHEM 336 or CHEM 465.

**Honors Program in Chemistry**

Chemistry majors who have completed prerequisites for CHEM 455 and CHEM 456 - Honors Research in Chemistry and have maintained an overall GPA of at least 3.00 in mathematics and science courses are eligible to enter the departmental honors program. To graduate with honors in chemistry, a student is required to maintain a minimum GPA of 3.00 in mathematics and science courses and successfully complete the two semesters of CHEM 455 and CHEM 456 with a minimum GPA of 3.50.

**Premedical, Predental, Prepharmacy, and Preveterinary Students**

Web: prehealth.gmu.edu

Many students planning medical, dental, pharmacy, veterinary, optometry, or other health professional careers choose to pursue a major in chemistry. These students should consult the health professions advising web site on required course work and overall preparation.

**Prepharmacy Society**

Mason students who are interested in pursuing careers in pharmacy are encouraged to participate in the Prepharmacy Society. This student organization organizes supplemental programming focused toward pharmacy as a career.

**Chemistry Club**

The Chemistry Club provides a social and informational network for students. It serves the Department of Chemistry and Biochemistry by sponsoring informational programs and allowing students to work at university events.

**Teacher Licensure**

Students who wish to become teachers should consult the College of Education and Human Development section and attend an information session early in their undergraduate career. For more information, call 703-993-2892, e-mail gseadmit@gmu.edu, or go to gse.gmu.edu.

**Graduate Degree Programs**

The department offers an MS in chemistry with a research project (thesis option) or an all-course-work program (nonthesis option). Within the MS, students may pursue a concentration in biochemistry. The PhD in all branches of chemistry is available through the PhD program in Chemistry and Biochemistry. Students may also pursue Chemistry-related PhD research through the Environmental Science and Policy PhD program and the Bioscience PhD program. An area of emphasis in computational chemistry is available through the PhD in computational sciences and informatics program offered in conjunction with the School of Physics, Astronomy, and Computational Sciences.

**Chemistry, Bachelor’s/Accelerated Master’s Degree**

Qualified undergraduates may be admitted to an accelerated master’s program and obtain both a BS and an MS in Chemistry within an accelerated time frame. Students admitted to this program may take graduate courses after completing 90 undergraduate credits, and up to 6 credits of graduate work may be used in partial satisfaction of the requirements for the
undergraduate degree. If students earn at least a 3.00 GPA in these classes, they are granted advanced standing in the master’s program and must then complete an additional 24 credits to receive the master’s degree. All other master’s degree requirements must be met, including a minimum of 18 credits taken for the master’s degree after the bachelor’s degree is complete.

**Bachelor of Arts**

**Chemistry, BA**

**Banner Code: SC-BA-CHEM**

This program, when coordinated with the necessary courses in education, meets requirements for teacher licensure. It also meets requirements for entrance to medical and other professional schools.

Students must fulfill all requirements for bachelor's degrees including university general education requirements. Students majoring in chemistry must complete additional college requirements for the BA degree in COS. In addition to satisfying the university-wide general education requirements and the program requirements for the BA degrees, students majoring in chemistry must complete the chemistry program requirements with a minimum GPA of 2.30 and present no more than two courses with a grade of D (1.00) in CHEM coursework at graduation. Through the course work below, chemistry majors satisfy the university-wide general education requirements in natural science and quantitative reasoning.

CHEM 336 or CHEM 465 fulfill the writing intensive requirement for students majoring in chemistry.

This undergraduate program offers students the options of applying to the accelerated master's program in curriculum and instruction (SECC concentration). See listing for specific requirements.

This program of study is offered by the Department of Chemistry and Biochemistry in the College of Science.

**Degree Requirements**

**37 credits of chemistry**

- CHEM 211 - General Chemistry Credits: 4
- CHEM 212 - General Chemistry Credits: 4
- CHEM 313 - Organic Chemistry Credits: 3
- CHEM 314 - Organic Chemistry Credits: 3
- CHEM 315 - Organic Chemistry Lab I Credits: 2
- CHEM 318 - Organic Chemistry Lab II Credits: 2
- CHEM 321 - Elementary Quantitative Analysis Credits: 4
- CHEM 331 - Physical Chemistry I Credits: 3
- CHEM 332 - Physical Chemistry II Credits: 3
- CHEM 336 - Physical Chemistry Lab I Credits: 2
- CHEM 337 - Physical Chemistry Lab II Credits: 2
- 5 credits of electives in chemistry

**11 credits of math**

- MATH 113 - Analytic Geometry and Calculus I Credits: 4
- MATH 114 - Analytic Geometry and Calculus II Credits: 4
- MATH 213 - Analytic Geometry and Calculus III Credits: 3
8 credits of physics

- PHYS 243 - College Physics Credits: 3
- PHYS 244 - College Physics Lab Credits: 1
- PHYS 245 - College Physics Credits: 3
- PHYS 246 - College Physics Lab Credits: 1
or the alternative sequence
- PHYS 160 - University Physics I Credits: 3
- PHYS 161 - University Physics I Laboratory Credits: 1
- PHYS 260 - University Physics II Credits: 3
- PHYS 261 - University Physics II Laboratory Credits: 1

Total: 56 credits

▲ Concentration in Biochemistry (BC)

The concentration in biochemistry is designed for students interested in studying chemistry at its interface with the biological sciences. Those interested in health science careers can obtain an excellent science background through this concentration.

In addition to satisfying the university-wide general education requirements and requirements for the BA degree in COS, students majoring in chemistry with a concentration in biochemistry will complete the alternative requirements for the major plus the concentration expressed below. In doing so, majors satisfy the university-wide general education requirements in natural science and quantitative reasoning.

37 credits of chemistry

- CHEM 211 - General Chemistry Credits: 4
- CHEM 212 - General Chemistry Credits: 4
- CHEM 313 - Organic Chemistry Credits: 3
- CHEM 314 - Organic Chemistry Credits: 3
- CHEM 315 - Organic Chemistry Lab I Credits: 2
- CHEM 318 - Organic Chemistry Lab II Credits: 2
- CHEM 321 - Elementary Quantitative Analysis Credits: 4
- CHEM 331 - Physical Chemistry I Credits: 3
- CHEM 332 - Physical Chemistry II Credits: 3
- CHEM 446 - Bioinorganic Chemistry Credits: 3
- CHEM 463 - General Biochemistry I Credits: 4
- CHEM 465 - Biochemistry Lab Credits: 2

11 credits of math and statistics

- MATH 113 - Analytic Geometry and Calculus I Credits: 4
- MATH 114 - Analytic Geometry and Calculus II Credits: 4
- STAT 250 - Introductory Statistics I Credits: 3

8 credits of physics
4 credits of biology

- BIOL 213 - Cell Structure and Function Credits: 4

Total: 60 credits

Bachelor of Science

Chemistry, BS

Banner Code: SC-BS-CHEM

This program is approved by the American Chemical Society; on completion, students are certified to the society. Students planning professional careers in chemistry should choose this degree.

In addition to satisfying all requirements for bachelor’s degrees including university general education requirements, students majoring in chemistry must complete the chemistry program requirements with a minimum GPA of 2.30 and present no more than two courses with a grade of D (1.00) in CHEM coursework at graduation. Through the course work below, chemistry majors satisfy the university-wide requirements in natural science and quantitative reasoning.

CHEM 336 or CHEM 465 fulfill the writing intensive requirement for students majoring in chemistry.

This undergraduate program offers students the option of applying to the accelerated master's degree program in chemistry or curriculum and instruction (SECC concentration). See listing for specific requirements.

This program of study is offered by the Department of Chemistry and Biochemistry in the College of Science.

Degree Requirements

Students who do not select an optional concentration complete the curriculum requirements listed below.

44 credits of chemistry

- CHEM 211 - General Chemistry Credits: 4
- CHEM 212 - General Chemistry Credits: 4
- CHEM 313 - Organic Chemistry Credits: 3
- CHEM 314 - Organic Chemistry Credits: 3
- CHEM 315 - Organic Chemistry Lab I Credits: 2
- CHEM 318 - Organic Chemistry Lab II Credits: 2
- CHEM 321 - Elementary Quantitative Analysis Credits: 4
- CHEM 331 - Physical Chemistry I Credits: 3
- CHEM 332 - Physical Chemistry II Credits: 3
- CHEM 336 - Physical Chemistry Lab I Credits: 2
• CHEM 337 - Physical Chemistry Lab II Credits: 2
• CHEM 441 - Properties and Bonding of Inorganic Compounds Credits: 3
• CHEM 463 - General Biochemistry I Credits: 4
• CHEM 445 - Inorganic Preparations and Techniques Credits: 2
  or
• CHEM 465 - Biochemistry Lab Credits: 2
• and three credits of chemistry electives

6 credits of in-depth electives chosen from:

• CHEM 422 - Instrumental Analysis Credits: 3
• CHEM 427 - Aquatic Environmental Chemistry Credits: 3
• CHEM 438 - Atmospheric Chemistry Credits: 3
• CHEM 446 - Bioinorganic Chemistry Credits: 3
• CHEM 458 - Chemical Oceanography Credits: 3
• CHEM 464 - General Biochemistry II Credits: 3
• CHEM 467 - The Chemistry of Enzyme-Catalyzed Reactions Credits: 3
• CHEM 468 - Bioorganic Chemistry Credits: 3

1-3 credits from the following:

• CHEM 423 - Instrumental Analysis Laboratory Credits: 2
• CHEM 355 - Undergraduate Research Credits: 1-3
• CHEM 451 - Special Projects in Chemistry Credits: 1-3
• CHEM 452 - Special Projects in Chemistry Credits: 1-3
• CHEM 455 - Honors Research in Chemistry Credits: 3
• CHEM 456 - Honors Research in Chemistry Credits: 3

11 credits of math

• MATH 113 - Analytic Geometry and Calculus I Credits: 4
• MATH 114 - Analytic Geometry and Calculus II Credits: 4
• MATH 213 - Analytic Geometry and Calculus III Credits: 3

8 credits of physics

• PHYS 160 - University Physics I Credits: 3
• PHYS 161 - University Physics I Laboratory Credits: 1
• PHYS 260 - University Physics II Credits: 3
• PHYS 261 - University Physics II Laboratory Credits: 1

▲ Concentration in Analytical and Environmental Chemistry (AEC)

Students planning professional careers in an industry involving chemical measurements, careers with a chemistry emphasis in the environmental science, or those seeking graduate study in analytical or environmental chemistry should choose this program. This concentration meets the requirements for certification by the American Chemical Society (ACS).
In addition to satisfying university-wide general education requirements for the BS degree, students majoring in chemistry with a concentration in analytical and environmental chemistry must complete the chemistry program requirements with a minimum GPA of 2.30 and present no more than two courses with a grade of D (1.00) in CHEM coursework at graduation. Through the coursework below, chemistry majors satisfy the university-wide requirements in natural science and quantitative reasoning.

52 credits of chemistry

- CHEM 211 - General Chemistry Credits: 4
- CHEM 212 - General Chemistry Credits: 4
- CHEM 313 - Organic Chemistry Credits: 3
- CHEM 314 - Organic Chemistry Credits: 3
- CHEM 315 - Organic Chemistry Lab I Credits: 2
- CHEM 318 - Organic Chemistry Lab II Credits: 2
- CHEM 321 - Elementary Quantitative Analysis Credits: 4
- CHEM 331 - Physical Chemistry I Credits: 3
- CHEM 332 - Physical Chemistry II Credits: 3
- CHEM 336 - Physical Chemistry Lab I Credits: 2
- CHEM 337 - Physical Chemistry Lab II Credits: 2
- CHEM 422 - Instrumental Analysis Credits: 3
- CHEM 423 - Instrumental Analysis Laboratory Credits: 2
- CHEM 438 - Atmospheric Chemistry Credits: 3
- CHEM 463 - General Biochemistry I Credits: 4
- CHEM 427 - Aquatic Environmental Chemistry Credits: 3
  or
- CHEM 458 - Chemical Oceanography Credits: 3
- CHEM 441 - Properties and Bonding of Inorganic Compounds Credits: 3
  or
- CHEM 446 - Bioinorganic Chemistry Credits: 3
- CHEM 445 - Inorganic Preparations and Techniques Credits: 2
  or
- CHEM 465 - Biochemistry Lab Credits: 2

8 credits of physics

- PHYS 243 - College Physics Credits: 3
- PHYS 244 - College Physics Lab Credits: 1
- PHYS 245 - College Physics Credits: 3
- PHYS 246 - College Physics Lab Credits: 1
  or the alternative sequence
- PHYS 160 - University Physics I Credits: 3
- PHYS 161 - University Physics I Laboratory Credits: 1
- PHYS 260 - University Physics II Credits: 3
- PHYS 261 - University Physics II Laboratory Credits: 1

11 credits of math

- MATH 113 - Analytic Geometry and Calculus I Credits: 4
• MATH 114 - Analytic Geometry and Calculus II Credits: 4
• MATH 213 - Analytic Geometry and Calculus III Credits: 3

7-8 credits of supporting science electives from one of three options

Option 1:
• GEOL 101 - Introductory Geology I Credits: 4
• GEOL 309 - Introduction to Oceanography Credits: 3

Option 2:
• EVPP 110 - The Ecosphere: An Introduction to Environmental Science I Credits: 4
• EVPP 111 - The Ecosphere: An Introduction to Environmental Science II Credits: 4

Option 3:
• CHEM 341 - Fundamental Inorganic Chemistry Credits: 3
• CHEM 355 - Undergraduate Research Credits: 1-3
• CHEM 451 - Special Projects in Chemistry Credits: 1-3
• CHEM 452 - Special Projects in Chemistry Credits: 1-3
The discipline sequences may be interchanged only with approval by the program coordinator.

▲ Concentration in Biochemistry (BC)

Students planning professional careers in biochemistry, the pharmaceutical industry, medicine, biotechnology, or related fields with a chemistry emphasis should choose this program instead of the traditional BS in chemistry. This concentration provides students with a focus on biochemistry while retaining a strong chemistry foundation. Students are allowed to tailor the concentration to their interests with 9 credits of electives.

Students must fulfill all requirements for bachelor’s degrees including university general education requirements. In addition, students majoring in chemistry with a concentration in biochemistry must complete the following courses with a minimum GPA of 2.30. No more than two courses with a grade of D (1.00) in CHEM coursework may be applied to the major. Through the course work below, students satisfy the university-wide requirements in natural science and quantitative reasoning.

39 credits of chemistry courses

• CHEM 211 - General Chemistry Credits: 4
• CHEM 212 - General Chemistry Credits: 4
• CHEM 313 - Organic Chemistry Credits: 3
• CHEM 314 - Organic Chemistry Credits: 3
• CHEM 315 - Organic Chemistry Lab I Credits: 2
• CHEM 318 - Organic Chemistry Lab II Credits: 2
• CHEM 321 - Elementary Quantitative Analysis Credits: 4
• CHEM 331 - Physical Chemistry I Credits: 3
• CHEM 336 - Physical Chemistry Lab I Credits: 2
• CHEM 446 - Bioinorganic Chemistry Credits: 3
• CHEM 463 - General Biochemistry I Credits: 4
• CHEM 464 - General Biochemistry II Credits: 3
• CHEM 465 - Biochemistry Lab Credits: 2

8 credits of math
• MATH 113 - Analytic Geometry and Calculus I Credits: 4
• MATH 114 - Analytic Geometry and Calculus II Credits: 4

8 credits of physics

• PHYS 243 - College Physics Credits: 3
• PHYS 244 - College Physics Lab Credits: 1
• PHYS 245 - College Physics Credits: 3
• PHYS 246 - College Physics Lab Credits: 1
or the alternative sequence
• PHYS 160 - University Physics I Credits: 3
• PHYS 161 - University Physics I Laboratory Credits: 1
• PHYS 260 - University Physics II Credits: 3
• PHYS 261 - University Physics II Laboratory Credits: 1

8 credits of biology

• BIOL 213 - Cell Structure and Function Credits: 4
• BIOL 305 - Biology of Microorganisms Credits: 3
• BIOL 306 - Biology of Microorganisms Laboratory Credits: 1

Approved Science Electives

• 9 credits of approved science electives chosen from chemistry or biology courses at 302 or above. Courses from other disciplines may be submitted as electives, subject to approval of the coordinator.

▲ Concentration in Chemistry Education (CHME)

Those interested in teaching high school chemistry should choose this concentration. This concentration is approved by the American Chemical Society and leads to state licensure to teach in Virginia upon completion of the degree.

Students must fulfill all requirements for bachelor’s degrees including university general education requirements. In addition, students with a concentration in chemistry education must present the following:

38 credits of chemistry courses

• CHEM 211 - General Chemistry Credits: 4
• CHEM 212 - General Chemistry Credits: 4
• CHEM 313 - Organic Chemistry Credits: 3
• CHEM 314 - Organic Chemistry Credits: 3
• CHEM 315 - Organic Chemistry Lab I Credits: 2
• CHEM 321 - Elementary Quantitative Analysis Credits: 4
• CHEM 331 - Physical Chemistry I Credits: 3
• CHEM 446 - Bioinorganic Chemistry Credits: 3
• CHEM 463 - General Biochemistry I Credits: 4
• CHEM 336 - Physical Chemistry Lab I Credits: 2
or
CHEM 465 - Biochemistry Lab Credits: 2
CHEM 470 - Laboratory Instructional Methods for Chemistry Credits: 3
one 3-credit upper-level chemistry elective

11 credits of math

MATH 113 - Analytic Geometry and Calculus I Credits: 4
MATH 114 - Analytic Geometry and Calculus II Credits: 4
STAT 250 - Introductory Statistics I Credits: 3

8 credits of physics

PHYS 243 - College Physics Credits: 3
PHYS 244 - College Physics Lab Credits: 1
PHYS 245 - College Physics Credits: 3
PHYS 246 - College Physics Lab Credits: 1
or the alternative sequence
PHYS 160 - University Physics I Credits: 3
PHYS 161 - University Physics I Laboratory Credits: 1
PHYS 260 - University Physics II Credits: 3
PHYS 261 - University Physics II Laboratory Credits: 1

8 credits of other general science

GEOL 101 - Introductory Geology I Credits: 4
and
BIOL 103 - Introductory Biology I Credits: 4
or
BIOL 213 - Cell Structure and Function Credits: 4

Teacher Licensure Requirement (21 credits)

EDCI 473 - Teaching Science in the Secondary School Credits: 3
EDCI 483 - Advanced Methods of Teaching Science in Secondary School Credits: 3
EDCI 490 - Student Teaching in Education Credits: 6
EDRD 419 - Literacy in the Content Areas Credits: 3
EDUC 372 - Human Development, Learning, and Teaching Credits: 3
EDUC 422 - Foundations of Secondary Education Credits: 3

Notes:
The course work above satisfies university-wide requirements in natural science, information technology, and quantitative reasoning.

During the sophomore year, students should contact the Graduate School of Education to arrange to attend an information session and take the PRAXIS I and II exams.
Bachelor/Accelerated Master's

Chemistry, BA or BS/Curriculum and Instruction, Accelerated MEd (Secondary Education Chemistry Concentration)

Highly-qualified undergraduates may be admitted to a Bachelor's/Accelerated Master's program and obtain a BA or BS in Chemistry (degree without concentration) and an MEd in Curriculum and Instruction, Secondary Education Chemistry Concentration in an accelerated time frame after completion of 149 credits.

This program of study is offered jointly by the Department of Chemistry and Biochemistry in the College of Science and the Graduate School of Education in the College of Education and Human Development.

For policies governing all graduate degrees, see the Academic Policies section of the catalog.

Application Requirements

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in the Admissions section of the catalog. For information specific to this accelerated master's program, see Application Requirements and Deadlines on the College of Education and Human Development website.

Degree Requirements

Students complete the following courses in their senior year:

- EDCI 573 - Teaching Science in the Secondary School (to be taken in the Fall semester)
- EDUC 672 - Human Development and Learning: Secondary Education (to be taken in the Fall semester)
- EDCI 673 - Advanced Methods of Teaching Science in the Secondary School (to be taken in the Spring semester)
- EDRD 619 - Literacy in Content Areas (to be taken in the Spring semester)

While undergraduate students, accelerated master's students are able to apply two of the courses listed above to both the Bachelor's and Master's degrees. These courses are considered advanced standing for the MEd. A minimum grade of B must be earned to be eligible to count as advanced standing. The other two courses are taken as reserve graduate credit and do not apply to the undergraduate degree. Early in their final undergraduate semester, students must submit the Bachelor's/Accelerated Master's Transition Form and specify which of the four courses are to be designated as advanced standing and reserve graduate credit.

Chemistry, BS/Chemistry, Accelerated MS

A five-year bachelor’s/accelerated master’s degree program leads to a research-based MS degree following satisfactory completion of 144 credits. It allows academically strong undergraduates with a commitment to research to obtain BS and MS degrees within five academic years plus the summer of the last year. On completion of this program, students will be exceptionally well prepared for entry into a professional school or a PhD program in chemistry or a related discipline. Students are eligible to enter this program and enroll in graduate courses after successfully completing 90 credits, inclusive of prerequisites, toward the BS degree. This flexibility makes it possible for students to complete some of their graduate classes during their junior and senior years. Consult the department for details on the program.

Students admitted to the accelerated programs may use up to 6 earned credits in partial satisfaction of the requirements for the undergraduate degree. On completion of the undergraduate degree and with satisfactory performance (3.00) in the graduate
courses, students are given advanced standing in the master’s program and can complete an additional 24 credits to receive the master’s degree. All other master’s degree requirements must be met.

This program of study is offered by the Department of Chemistry and Biochemistry in the College of Science.

**Doctor of Philosophy**

**Chemistry and Biochemistry, PhD**

**Banner Code:** SC-PHD-CBCM

The Chemistry and Biochemistry doctoral program is intended to prepare students for advanced work in the chemical sciences and related areas. Graduates with the PhD degree in this field can seek employment in research and development, process control, or higher education. In addition to these traditional science career paths, graduates are also positioned to pursue careers in non-traditional areas such as the intellectual property and regulatory fields. The program is designed to provide students with a firm foundation in advanced coursework, which is followed by an independent research project completed under the guidance of a faculty advisor. The culmination of the program is a dissertation representing original research that is publishable in a peer-reviewed scientific journal. The program requires 72 total credits of coursework and dissertation.

This program of study is offered by the Department of Chemistry and Biochemistry in the College of Science.

**Admission Requirements**

The Chemistry and Biochemistry PhD program is intended for students who have completed an undergraduate program of study in chemistry, biochemistry, or a related field. Applicants are expected to have a BS degree with a minimum GPA of 3.00, and acceptable GRE and TOEFL scores (if applicable). Applicants with a BS degree in other fields of study who have at least three years of chemistry or biochemistry coursework may be accepted provisionally and may be required to successfully complete selected remedial courses, some of which may not be applicable towards PhD requirements. Interested students should submit a completed GMU Graduate Application, three letters of reference, official reports of GRE and TOEFL exam scores, and a personal/goals statement outlining their general research interests and career plans.

**Reduction of Credit**

For students entering the doctoral program with a master's degree in a related field from a regionally accredited institution, the number of required credits may be reduced up to 30 credits, subject to approval of the program faculty and the associate dean for student and academic affairs. See the College of Science graduate policies section for more information.

**Degree Requirements**

Upon acceptance into the Chemistry and Biochemistry PhD program, a student will be assigned an academic advisor. Prior to registering for classes, students are required to meet with their academic advisors who will provide guidance in selecting courses that are consistent with the student’s area of interest. Once a student has selected a research/dissertation advisor, that person then assumes the role of providing academic advisement to the student.

The program requires 72 total credits of coursework and dissertation. All students in the Chemistry and Biochemistry PhD program take a common core of two courses. By working with the Dissertation Committee, a student may choose to specialize in an emphasis area such as analytical, biochemistry, environmental, inorganic, organic, or physical chemistry, or others according to his or her particular interests.

A student may choose up to 39 credits in general elective graduate courses that can be applied towards the degree requirements with the approval of the dissertation advisor and the program director.
Doctoral Course Work (48 credits)

Core Courses (6 credits)

- CHEM 817 - Organic Structural Spectroscopy Credits: 3
- CHEM 833 - Physical Chemistry and Biochemistry Credits: 3

Seminar (3 credits)

- CHEM 790 - Graduate Seminar Credits: 1 (taken three times)

Electives (39 credits)

39 credits of approved elective courses chosen in consultation with the student's advisor

Dissertation Committee and Supervisor

By the end of their first year, students in the program are expected to have selected a dissertation/research supervisor and to have formed their dissertation committee. This committee will consist of at least 4 graduate faculty members (including the dissertation supervisor), with at least 2 members from the Department of Chemistry and Biochemistry. At least one member must be from outside the department. Qualified individuals who are not members of the graduate faculty, including faculty at other universities or government laboratories, may serve on the committee with the approval of the program director and the associate dean for graduate programs.

Candidacy Examinations

The student must successfully complete separate written and oral candidacy examinations prepared and administered by the dissertation committee.

Dissertation Proposal and Advancement to Candidacy

Prior to completing their sixth semester in the program, students are expected to have advanced to candidacy. The student's committee will determine whether a candidate is ready to begin preparation of their research proposal and approve enrollment in Doctoral Dissertation Proposal (CHEM 998) based upon their familiarity with the student's progress.

In order to advance to candidacy, students are required to fulfill the following requirements:

- Students will prepare and submit a research proposal (based on their thesis research) for approval by their dissertation committee.
- The student must pass a written qualifying exam prepared by their dissertation committee. The exam can be based on the student's research and/or completed coursework, with the composition of the exam being determined by the student's dissertation committee.
- The final stage is an oral defense of the student's research proposal. Questions at the proposal defense may also be drawn from material covered in the written qualifying exam.

Dissertation Research (24 credits)
No more than 24 combined credits from CHEM 998 and CHEM 999 may be applied toward satisfying doctoral degree requirements, with no more than 12 credits of CHEM 998.

- CHEM 998 - Doctoral Dissertation Proposal Credits: 1-12
- CHEM 999 - Doctoral Dissertation Research Credits: 1-12

**Exit Seminar**

Each PhD candidate presents his or her research in a seminar in the Department of Chemistry and Biochemistry (a departmental seminar), which takes place in the same semester as the final defense of dissertation (below). The student does not have to be registered for CHEM 790 during the semester the Exit Seminar is presented.

**Dissertation Research and Defense**

With the approval of the dissertation committee, the student will enroll in Doctoral Dissertation Proposal (CHEM 998) and Doctoral Dissertation Research (CHEM 999). The dissertation research should represent a significant contribution to the appropriate scientific field(s), and it should be deemed to represent a body of work that is publishable in a refereed scientific journal. The dissertation must be presented and defended in a public forum consisting of the dissertation committee and other interested members of the George Mason University community.

**Total: 72 credits**

**Master of Science**

**Chemistry, MS**

**Banner Code:** SC-MS-CHEM

The MS in chemistry provides advanced training for recent college graduates, professionals in teaching, and technical workers in research organizations who have an interest in chemistry or biochemistry.

An accelerated master's option is available to students in the bachelor's of science program. See Chemistry, BS/Chemistry, Accelerated MS for specific requirements.

This program of study is offered by the Department of Chemistry and Biochemistry in the College of Science.

**Admission Requirements**

To be considered for admission to degree status, students must have a bachelor’s degree in chemistry, biochemistry, or a related field from an accredited institution and must meet general admission requirements for graduate study as specified in the Admission section of this catalog. Admission is based on a departmental evaluation of the applicant’s background as evidenced by transcripts and letters of recommendation. Applicants who received a bachelor’s degree more than five years before the application date must submit a résumé.

**Degree Requirements**

To receive an MS in chemistry, students must complete 30 credits of graduate work. The thesis option is designed for students planning to pursue a doctoral degree or a career involving research in the chemical, biochemical, environmental, or pharmaceutical industries. The thesis is based on research that must be preapproved by the thesis or advisory committee, which is
appointed prior to the first semester of registration in CHEM 799. Students who select the thesis option complete 6 credits of 799 and present a seminar followed by an oral defense. Students in this option are expected to choose a laboratory advisor during their first semester in the program and begin working on their thesis project no later than the second semester.

The nonthesis option is designed for those seeking to go on to professional school, teach chemistry in secondary schools, or pursue other careers in which advanced work in chemistry is necessary or advantageous. Students selecting this option are not required to complete a laboratory-based thesis. Instead, they are required to take an additional elective in chemistry (or biochemistry) and complete a research project or gain teaching experience in undergraduate chemistry labs, as described below.

CHEM 500 and 501 may not be applied toward the MS degree. CHEM 502 through 510 may be applied toward the MS degree only with prior written approval of the department.

Core Courses (9 credits)

All students in the Chemistry MS program take 9 credits of chemistry core courses. The three courses must be selected from three different core areas as shown below. Core courses may also be taken as electives beyond the stated credit requirement for each option.

Choose a total of three courses (9 credits) from three different core areas below:

- **Analytical**
  - CHEM 624 - Principles of Chemical Separation Credits: 3

- **Biochemistry**
  - CHEM 660 - Protein Biochemistry Credits: 3
  - CHEM 662 - Modern Methods of Drug Discovery Credits: 3

- **Environmental**
  - CHEM 651 - Environmental Chemistry of Organic Substances Credits: 3

- **Inorganic**
  - CHEM 641 - Solid State Chemistry Credits: 3
  - CHEM 646 - Bioinorganic Chemistry Credits: 3

- **Organic**
  - CHEM 613 - Modern Polymer Chemistry Credits: 3
  - CHEM 614 - Physical Organic Chemistry Credits: 3

MS without Concentration (21 credits)

General Chemistry

Students who do not wish to pursue a concentration complete the following requirements for either the thesis or nonthesis option.
Thesis Option

This program is specifically designed for students who wish to pursue a doctoral degree or a career in the chemical industry.

In addition to the 9 credits of general core courses, students must complete the following requirements:

One Additional Core Course (3 credits)

- CHEM 633 - Chemical Thermodynamics and Kinetics Credits: 3

Chemistry Electives (9 credits)

- 3 credits of CHEM designated courses
- 6 credits of courses in chemistry or related fields, approved by the Graduate Committee prior to registration

Seminar/Thesis (9 credits)

- 3 credits of CHEM 790 - Graduate Seminar Credits: 1
- 6 credits of CHEM 799 - Master's Thesis Credits: 1-6

Total: 30 credits

Nonthesis Option

This program is specifically designed for students seeking to go on to professional school, teach chemistry in secondary schools, or pursue other careers in which advanced work in chemistry is necessary or advantageous.

In addition to the 9 credits of general core courses, students must complete the following requirements:

One Additional Core Course (3 credits)

- CHEM 633 - Chemical Thermodynamics and Kinetics Credits: 3

Chemistry Electives (12 credits)

- 6 credits of CHEM designated courses
- 6 credits of courses in chemistry or related fields, approved by the Graduate Committee prior to registration

Teaching/Research (3 credits)

Any combination of CHEM 670 and CHEM 796 may be used to fulfill this requirement. However, CHEM 796 may be used to fulfill this requirement only with prior written approval of the department and must be used to complete a laboratory- or library-based research project or enhance the student’s teaching skills.

- CHEM 670 - Teaching Practicum Credits: 1-2
- CHEM 796 - Directed Reading and Research Credits: 1-6

Seminar (3 credits)
• 3 credits of CHEM 790 - Graduate Seminar  Credits: 1

Total: 30 credits

MS with Concentration (21 credits)

▲ Concentration in Biochemistry (BC)

Students who wish to pursue an optional concentration in Biochemistry complete the following requirements for either the thesis or nonthesis option.

Thesis Option

This program is specifically designed for students who wish to pursue a doctoral degree or a career in the biochemical or pharmaceutical industry.

In addition to the 9 credits of general core courses, students must complete the following requirements:

One Additional Core Course (3 credits)

Students take either CHEM 531 or CHEM 633 as instructed by the Graduate Admissions Committee.

• CHEM 531 - Elements of Physical Chemistry  Credits: 3
  or
• CHEM 633 - Chemical Thermodynamics and Kinetics  Credits: 3

Biochemistry Electives (6 credits)

• 6 credits of electives in biochemistry or related fields with approval from department

Chemistry Electives (3 credits)

• 3 credits of CHEM designated courses

Seminar/Thesis (9 credits)

• 3 credits of CHEM 790 - Graduate Seminar Credits: 1
• 6 credits of CHEM 799 - Master's Thesis Credits: 1-6

Total: 30 credits

Nonthesis Option

This program is specifically designed for students seeking to go on to professional school, teach biochemistry in secondary schools, or pursue other careers in which advanced work in biochemistry is necessary or advantageous.

In addition to the 9 credits of general core courses, students must complete the following requirements:
One Additional Core Course (3 credits)

Students take either CHEM 531 or CHEM 633 as instructed by the Graduate Admissions Committee.

- CHEM 531 - Elements of Physical Chemistry Credits: 3
- CHEM 633 - Chemical Thermodynamics and Kinetics Credits: 3

Biochemistry Electives (9 credits)

- 9 credits of electives in biochemistry or related fields with approval from department

Chemistry Electives (3 credits)

- 3 credits of CHEM designated courses

Teaching/Research (3 credits)

Any combination of CHEM 670 and CHEM 796 may be used to fulfill this requirement. However, CHEM 796 may be used to fulfill this requirement only with prior written approval of the department and must be used to complete a laboratory- or library-based research project or enhance the student’s teaching skills.

- CHEM 670 - Teaching Practicum Credits: 1-2
- CHEM 796 - Directed Reading and Research Credits: 1-6

Seminar (3 credits)

- 3 credits of CHEM 790 - Graduate Seminar Credits: 1

Total: 30 credits

Non-Degree

Chemistry Minor

Banner Code: CHEM

The department offers a minor in chemistry. The program requires 16 credits of chemistry at the 300 level or above with a minimum GPA of 2.00. Eight credits of course work must be unique to the minor. For policies governing all minors, see the Academic Policies section of this catalog.

This program of study is offered by the Department of Chemistry and Biochemistry in the College of Science.

Total: 16 credits

Environmental Science and Policy
Faculty

Professors: Jones, Gillevet, Lawrey, Lovejoy, Rockwood

Associate professors: Aguirre, Ahn, Balint, Birchard, Crate, Edwards, Jonas (Chair), Macfarlane, Parsons, Torzilli, Weeks

Assistant professors: Forkner, Kennedy, Manca

Term professor: Talbot

Term associate professor: Sklarew

Term assistant professors: de Mutsert, Kim, Largen, Peters

Emeritus professors: Bradley, Ernst, Kelso, Shaffer, Skog

Other Environmental Program Faculty

Associate professors: Addleson, Beghi, Baranova, Cervone, Christensen, Curtin, deMonsabert, Fryxell, Guagnano, Harbour, Honeychuck, Jacobsen, Kozlowski, LaPorte, Mahler, McBride, Meyer, Muir, Paden, Palkovich, Rodgers, Seto, Stough, Venigalla, Weatherspoon, Wood

Assistant professors: Frankenfeld, Freeman, Gilmore, Harmon, Heineman-Piper, Rice, Robbins, Schoeny, Zolnik

Term associate professors: Nord, Verardo

Term assistant professors: Fuertes, Kysar-Mattietti, Luther, Uhen

Affiliate faculty: Bailey, Bartoldus, Bauer, Baxter, B. Brown, J. Brown, Buchanan, Buchino, Burgess, Comiskey, Creque, Croisier, Dallmeier, Hamdan, Han, Helgen, Kolowska, Leimgruber, Lucking, Marra, McShea, Megonigal, Millstein, Monfort, Nerad, Noe, Orenstein, Perrier, Reith, Rybicki, Seidensticker, Sillett, Smith, Songsasen, Vaughn, Wang, Wright, Zendehel

Course Work

This department offers all course work designated EVPP and numerous BIOL courses, listed in the Courses section of this catalog.

Other Undergraduate Programs

In addition to its own undergraduate programs, the Environmental Science and Policy department also works closely with and provides administrative input to other undergraduate programs.

The Environmental Science and Policy department also offers (jointly with the College of Humanities and Social Sciences) the BA in environmental and sustainability studies, which focuses on the theoretical and practical knowledge of three aspects of environmental and sustainability studies: people, prosperity, and planet. In addition to required core courses, students obtain
additional in-depth knowledge in their selected concentration area. This degree prepares students for employment and graduate study in fields including social justice, business and public policy, and environmental protection as they relate to the environment and sustainability. Students should consult the full set of program requirements by viewing the complete description for the Environmental and Sustainability Studies, BA. The Environmental Science and Policy department administers the following two concentrations:

- The concentration in Climate Change and Society focuses on the relationship between human action and climate evolution. Topics include global warming, pollution, and societal trends.
- The concentration in Environmental Policy and Politics focuses on the role of policy formulation in the management of the global ecosystem. Topics include resource management and sustainability.
- The concentration in Environmental Economics focuses the role of economics in environmental regulation and policy formation. Topics include valuing the environment and human health, policies for pollution control, and resource management.

In concert with the Biology Undergraduate Program, through which the BA and BS degrees in biology are offered, Environmental Science and Policy administers the environmental and conservation biology and the marine and freshwater biology concentrations.

The Concentration in Environmental and Conservation Biology (ESCB) within the BS in biology is offered to students seeking a biology degree that focuses on ecology and organisinal biology and prepares them for graduate work or employment in environmental and conservation fields, such as natural resources management, fisheries, forestry, water quality management, aquatic and wetland ecology, and conservation biology.

The Concentration in Marine and Freshwater Biology within the BS in Biology is offered to students seeking a biology degree that focuses on marine and freshwater biology and prepares them for graduate work or employment in aquatic, marine and fisheries fields.

Refer to the Biology Undergraduate Program section for more information on Biology, BS program and these two concentrations.

Environmental Science and Policy and the department of Geography and Geoinformation Sciences cooperatively offer the BS in Global and Environmental Change. This interdisciplinary undergraduate program, one of the first of its kind in the nation, distinguishes itself from the other degrees in the natural sciences in that it examines from local, regional, and global scales the dynamics of Earth’s systems and their interactions: the geosphere, the atmosphere, the ecosphere, and the sociosphere. Refer to the GGS section for more information on the Global and Environmental Change, BS program.

Other Graduate Programs

In addition to its own graduate programs, the Environmental Science and Policy department also participates in the Earth Systems Science, MS administered primarily through the Department of Geography and Geoinformation Science (GGS). Please see the GGS listing for program requirements. The Environmental Science and Policy department also offers (jointly with the Institute for Conflict Analysis and Resolution) the Environmental Conflict Resolution and Collaboration Graduate Certificate, which focuses on a systems approach to environmental conflict and how to understand its legal, regulatory, and ecological implications. Coursework addresses the strategic thinking that is required for assessing and designing appropriate environmental conflict resolution processes, as well as understanding the public interest and the intertwined questions of social justice and sustainability that make environmental conflict particularly important and challenging.

Bachelor of Science

Environmental Science, BS

Banner Code: SC-BS-EVSC

The BS in environmental science provides students with rigorous training in the fundamental science of the environment, and the application of the key scientific principles to the analysis of environmental processes and
problems and to the development of practical responses to those problems. The program covers the fundamental techniques of environmental science and engineering, protection and improvement of environmental quality, environmental policy, risk assessment and risk management, and public and private decision-making processes. Graduates of the program are prepared to undertake careers in a variety of environmental science fields, and are also qualified to pursue advanced scientific/professional education.

Students select a concentration in aquatic ecology, conservation, ecological science, environmental health, or human and ecosystem response to climate change. Through the course work below, environmental science majors satisfy the university-wide requirements in natural science, quantitative reasoning, and synthesis. Students can fulfill the writing intensive requirement for this major by taking BIOL 308.

Students must fulfill all requirements for bachelor’s degrees including university general education requirements.

For policies governing all undergraduate degrees, see the Academic Policies section of the catalog.

This has been designated a Green Leaf program. For further information, please go to Green Leaf Programs and Courses.

This program of study is offered by the Department of Environmental Science and Policy in the College of Science.

**Degree Requirements**

**Core Requirements**

**Environmental Science (36 credits)**

- EVPP 110 - The Ecosphere: An Introduction to Environmental Science I Credits: 4
- EVPP 111 - The Ecosphere: An Introduction to Environmental Science II Credits: 4
- EVPP 305 - Environmental Microbiology Essentials Credits: 3
- EVPP 306 - Environmental Microbiology Essentials Laboratory Credits: 1
- BIOL 308 - Foundations of Ecology and Evolution Credits: 5
- BIOL 214 - Biostatistics for Biology Majors Credits: 4
- EVPP 361 - Introduction to Environmental Policy Credits: 3
- EVPP 377 - Applied Ecology Credits: 3
- EVPP 430 - Fundamentals of Environmental Geographic Information Systems Credits: 3
  and one of the following two courses:
  - EVPP 336 - Human Dimensions of the Environment Credits: 3 *
  - EVPP 337 - Environmental Policy Making in Developing Countries Credits: 3
  *Students in the Human and Ecosystem Response to Climate Change concentration may not take EVPP 336 to fulfill this portion of the core. They must take EVPP 337.

- CHEM 211 - General Chemistry Credits: 4
- CHEM 212 - General Chemistry Credits: 4
Mathematics (8 credits)

- MATH 113 - Analytic Geometry and Calculus I Credits: 4
- MATH 114 - Analytic Geometry and Calculus II Credits: 4

Geology (4 credits)

- GEOL 101 - Introductory Geology I Credits: 4

Concentrations (24 credits)

Students select a concentration in aquatic ecology, conservation, ecological science, environmental health, human and ecosystem response to climate change. Students take 24 credits of course work as indicated below for the selected concentration.

▲ Concentration in Aquatic Ecology (AQEC)

Students must take a minimum of 24 credits from the following:

- EVPP 350 - Freshwater Ecosystems Credits: 4
- EVPP 421 - Marine Conservation Credits: 3
- BIOL 309 - Introduction to Oceanography Credits: 3
- BIOL 449 - Marine Ecology Credits: 3
  and at least 11 credits from the following:
- EVPP 363 - Coastal Morphology and Processes Credits: 4
- EVPP 380 - Wetlands of the World Credits: 4
- EVPP 419 - Marine Mammal Biology and Conservation Credits: 3
- EVPP 420 - Marine Mammal Biology and Conservation Field Course Credits: 1
- EVPP 536 - Ichthyology Credits: 4
- BIOL 440 - Field Biology Credits: 0-4
- GEOL 364 - Marine Geology Credits: 3
- GEOL 458 - Chemical Oceanography Credits: 3
- CLIM 412 - Physical Oceanography Credits: 3
- NCLC 318 - Exploring Virginia's Watersheds Credits: 4
- additional courses approved by the program coordinator

Total: 24 credits

▲ Concentration in Conservation (CNSV)

Students must take 24 credits from the following:

- BIOL 310 - Biodiversity Credits: 5
- EVPP 318 - Conservation Biology Credits: 3
- EVPP 378 - Ecological Sustainability Credits: 4
- EVPP 419 - Marine Mammal Biology and Conservation Credits: 3
- EVPP 420 - Marine Mammal Biology and Conservation Field Course Credits: 1
- EVPP 421 - Marine Conservation Credits: 3
• CONS 320 - Conservation in Practice Credits: 3
• CONS 401 - Conservation Theory Credits: 3
• CONS 402 - Applied Conservation Credits: 4
• CONS 403 - Ecology and Conservation Theory Credits: 3
• CONS 404 - Monitoring and Assessment of Biodiversity Credits: 4
• CONS 410 - Human Dimensions in Conservation Credits: 3
• CONS 411 - Science Communication for Conservation Credits: 3
• CONS 420 - Human-Wildlife Conflict Credits: 3
• CONS 490 - Integrated Conservation Strategies Credits: 3
• CONS 491 - Comprehensive Conservation Planning Credits: 3
• CONS 497 - Special Topics in Conservation Credits: 1-3
• CONS 498 - Internship Credits: 1-3
• CONS 499 - Independent Study/Research Credits: 1-3
• GGS 303 - Conservation of Resources and Environment Credits: 3
• NCLC 311 - The Mysteries of Migration: Consequences for Conservation Credits: 6
• PRLS 300 - People with Nature Credits: 3
• BIOL 440 - Field Biology Credits: 0-4
• PRLS 402 - Human Behavior in Natural Environments Credits: 3
• additional courses approved by the program coordinator

Total: 24 credits

▲ Concentration in Ecological Science (ECSI)

Students must take 24 credits from the following:

• EVPP 350 - Freshwater Ecosystems Credits: 4
• EVPP 355 - Ecological Engineering and Ecosystem Restoration Credits: 4
• EVPP 378 - Ecological Sustainability Credits: 4
• BIOL 309 - Introduction to Oceanography Credits: 3
• BIOL 310 - Biodiversity Credits: 5
• BIOL 345 - Plant Ecology Credits: 4
• BIOL 440 - Field Biology Credits: 0-4
• BIOL 449 - Marine Ecology Credits: 3
• BIOL 459 - Fungi and Ecosystems Credits: 3
• GEOL 305 - Environmental Geology Credits: 3
• GEOL 306 - Soil Science Credits: 3
• additional courses approved by the program coordinator

Total: 24 credits

▲ Concentration in Environmental Health (EVHL)

• EVPP 445 - Principles of Environmental Toxicology Credits: 3
• GCH 205 - International Health Credits: 3
• GCH 360 - Health and Environment Credits: 3
• GGS 302 - Global Environmental Hazards Credits: 3
• GGS 319 - Air Pollution Credits: 3
  and 9 credits from the following:
• EVPP 451 - Fungi and Ecosystems Credits: 3
• EVPP 515 - Molecular Environmental Biology I Credits: 3
• BIOL 402 - Applied and Industrial Microbiology Credits: 3
• BIOL 404 - Medical Microbiology Credits: 3
• BIOL 465 - Histology Credits: 4
• GCH 460 - Program Evaluation Credits: 3
• GCH 560 - Environmental Health Credits: 3
• GGS 304 - Populations Dimensions of Global Change Credits: 3
• GGS 455 - Environmental Impact Assessment Credits: 3
• GGS 540 - Medical Geography Credits: 3
• CEIE 555 - Principles of Environmental Engineering Credits: 3
• CHEM 505 - Hazardous Materials Waste Management Credits: 1-3
  • additional courses approved by the program coordinator

Total: 24 credits

▲ Concentration in Human and Ecosystem Response to Climate Change (HERC)

• CLIM 101 - Global Warming: Weather, Climate, and Society Credits: 3
• GGS 121 - Dynamic Atmosphere and Hydrosphere Credits: 4
• GGS 302 - Global Environmental Hazards Credits: 3
• EVPP 336 - Human Dimensions of the Environment Credits: 3
  and choose either
• GGS 309 - Meteorology and Climate Credits: 3
  or
• GGS 314 - Severe and Extreme Weather Credits: 3
  Also, select 8 credits from the following:
• BIOL 309 - Introduction to Oceanography Credits: 3
• CLIM 111 - Introduction to the Fundamentals of Atmospheric Science Credits: 3
• CLIM 112 - Introduction to the Fundamentals of Atmospheric Science Lab Credits: 1
• EVPP 355 - Ecological Engineering and Ecosystem Restoration Credits: 4
• EVPP 378 - Ecological Sustainability Credits: 4
• EVPP 436 - The Human Dimensions of Global Climate Change Credits: 3
• GGS 304 - Populations Dimensions of Global Change Credits: 3
• GGS 321 - Biogeography: Space, Time and Life Credits: 3
• GGS 322 - Issues in Global Change Credits: 3
• GGS 353 - Observations of the Earth and its Climate Credits: 3
• GGS 354 - Data Analysis and Global Change Detection Techniques Credits: 3
  • additional courses approved by the program coordinator

Total: 24 credits

Doctor of Philosophy
Environmental Science and Public Policy, PhD

Banner Code: SC-PHD-EVPP

This interdisciplinary program draws on faculty and expertise from the Environmental Science and Policy departmental core faculty, as well as faculty from across the university. This includes the Departments of Atmospheric, Oceanic and Earth Sciences; School of Systems Biology; Public and International Affairs; Chemistry and Biochemistry; Economics; Geography and Geoinformation Science; and Sociology and Anthropology; as well as the School of Public Policy, the Volgenau School of Information Technology and Engineering, and the College of Education and Human Development. Our graduates contribute to the solution of complex environmental problems, which require the development of knowledge and skills in the collection, analysis, and interpretation of scientific data, as well as in the integration of scientific understanding into the public policy process.

This program of study is offered by the Department of Environmental Science and Policy in the College of Science.

This has been designated a Green Leaf program. For further information, please go to Green Leaf Programs and Courses.

Admission Requirements

Applicants should have a bachelor’s degree with an overall GPA of at least 3.00. They should have taken at least two semesters of chemistry and three semesters of biology, including a course in ecology. The application deadline is February 15 for admission to fall semester; admission to spring semester is usually not available.

Applicants must meet the admission standards and application requirements for graduate study at Mason as specified in the Admission section of this catalog. In addition, applicants for the EVPP doctoral degree should submit the following:

- Scores on the aptitude portion of GRE
- Three letters of recommendation, with at least two from individuals with doctorates.
- Current résumé.
- Substantial statement of interest that includes a description of the specific area of proposed dissertation research, the potential focus (environmental science or environmental public policy), contacts that have been made with potential faculty advisors, and an explanation of career and research goals.

All students must obtain the consent of a faculty member willing to serve as an advisor prior to being fully admitted to the program. Admission decisions are based on the student’s qualifications and the availability of a faculty advisor. An advisor may be changed by mutual consent of student and advisor, or petition to the Graduate Program Director and the Associate Dean for Student and Academic Affairs in the College of Science. Applicants with questions should contact the ESP Graduate Services office (703-993-3187).

Science and Ecology Background

Applicants who lack college level course work in biology and chemistry will be expected to complete a two semester sequence of introductory graduate level environmental chemistry and biology courses as follows:

- EVPP 506 - Science of the Environment I Credits: 3
- EVPP 507 - Science of the Environment II Credits: 3

These introductory courses will add six credits to the degree requirements listed below but cannot be added to the graduate program of study.

Students without previous coursework in general ecology will be required to take the following introductory course, which may be included in the graduate program of study.

- EVPP 607 - Fundamentals of Ecology Credits: 3
Reduction of Credit

For students entering the doctoral program with a master's degree in a related field from a regionally accredited institution, the number of required credits may be reduced up to 30 credits, subject to approval of the program faculty and the Associate Dean for Student and Academic Affairs. See the College of Science graduate policies section for more information.

Degree Requirements

Students must satisfy all requirements for doctoral degrees expressed in the Academic Policies section of this catalog.

The doctoral program requires a minimum of 78 graduate credits beyond the bachelor’s degree. Students with a master’s degree in an appropriate field may obtain a reduction of credit for appropriate course work of up to 30 graduate credits.

Doctoral Course Work (54-66 credits)

Students are required to complete a course work proposal by the end of the second semester of residency. The coursework proposal must be approved by the student's advisor and Graduate Program Director. In keeping with the general philosophy inherent in a PhD degree, students adopt an individual program that focuses on a specific area of research. The student's course work must provide the knowledge base from which an original research projects in their specific areas of interest can be successfully completed.

To ensure that all students obtain the necessary skills and knowledge to function as environmental professionals, the program requires all students to fulfill the following four category course requirements:

Natural Sciences (12 credits)

- At least 12 credits are required in biology, chemistry, environmental science, geology, geography, or environmental engineering.

Public Policy (12 credits)

- At least 12 credits are required in public affairs, economics, sociology, and business. A course in environmental law is also required as part of this category.

Research Methods and Technology (9 credits)

- At least 9 credits are required in statistics, remote sensing, geographic information systems, analytical chemistry, molecular biology, modeling, or information technology. Students should carefully choose course work to ensure they have the necessary skills to support dissertation research.

Doctoral Seminar (4 credits):

Students must present a total of 4 graduate seminar credits, with EVPP 991 taken at least once.

- EVPP 692 - Master's Seminar in Environmental Science and Public Policy Credits: 1
- EVPP 991 - Advanced Seminar in Environmental Science Credits: 2

Course Work Focus (12 credits)
Beyond the basic 12 hour natural science/public policy requirements, a student’s program of study will emphasize either environmental science or environmental public policy. Students focusing on environmental science should take another 12 credits (for a total of 24 credits) in natural science; those focusing on environmental public policy should take another 12 credits (for a total of 24 credits) of public policy course work. Previous thesis research courses may not be applied to this degree. See advisor for further details.

Electives (5-17 credits)

If necessary, students take additional electives to bring the total number of credits to 78

Dissertation Committee

Before the end of the fourth semester of course work, in consultation with their advisor, the student forms a Dissertation Committee of at least four members. Three of the committee members must be from the George Mason graduate faculty. The fourth member may be from George Mason or may be from outside the university provided they hold a terminal degree in an appropriate field. The Dissertation Committee must be approved by the Dean of the College of Science.

Program of Study

After reviewing the student’s course work proposal, progress to date, and area of research, the committee makes final recommendations concerning course work that will be codified in the Program of Study to be signed by all committee members and the Graduate Program Director. Students are advised to work closely with their advisor and committee to develop the course work program in order to facilitate the process of course selection. During the duration of graduate study, a student must meet with the full Dissertation Committee at least once a year.

Qualifying Exams

On completion of all or nearly all course work, students may request to take the qualifying or candidacy exam. The qualifying exam has both written and oral components. The written portion consists of questions submitted by each member of the Dissertation Committee. Successful completion of the written exam should be followed by the oral portion within one month. The qualifying exam may be repeated once at the discretion of the student’s committee.

Advancement to Candidacy

Upon approval of the Program of Study, completion of all or nearly all course work, successful completion of the qualifying exam, and the approval of the Dissertation Proposal, the student is recommended for advancement to candidacy by the Graduate Program Director. Students must advance to candidacy within six years of admission to the program.

Dissertation Research (12-24 credits)

Students must complete a dissertation (12 to 24 credits). This may be accomplished by taking EVPP 999 (Doctoral Dissertation) alone, or in combination with EVPP 998 (Doctoral Dissertation Proposal). However, no more than one half the credits specified for dissertation credit on the student’s program of study may be taken as EVPP 998. Students working on dissertation research must register for a minimum of 3 credits of 999 per semester (excluding summers) until they have completed the minimum number of dissertation research credits. Then, they must register for 1 credit of 999 until the dissertation is complete and has been officially submitted to the library.

The dissertation is an original written work, demonstrating mastery of subject matter, methodologies, and conceptual foundations, on a specific problem in the general field of environmental science and public policy. The dissertation generally involves collection and analysis of original data or the substantially new analysis and reinterpretation of existing data.
- EVPP 998 - Doctoral Dissertation Proposal Credits: 1-6 (maximum of 12 credits)
- EVPP 999 - Doctoral Dissertation Research Credits: 1-12

**Dissertation Research and Defense**

Before students may enroll in dissertation research (EVPP 999), they must have advanced to candidacy and have a dissertation proposal approved by the Dissertation Committee, Graduate Program Director, Department Chairperson, and Dean of the College. Students must present the completed dissertation in a public seminar and defend the work before the dissertation committee. Awarding of the degree is contingent on approval of the dissertation by the Dissertation Committee, Graduate Program Director, Department Chairperson, and Dean. The dissertation and defense must be completed within five years of advancement to candidacy.

**Total: 78 credits**

**Graduate Certificate**

**Environmental Management Graduate Certificate**

**Banner Code: SC-CERG-EVMG**

The graduate certificate allows students to expand their knowledge of the environment and environmental management beyond their undergraduate training. It offers a professional credential to students who might not have the time or background to enroll in a graduate degree program requiring a thesis or dissertation. Students who later obtain admission to the graduate degree programs in environmental science and policy may be able to use credits earned during the certificate toward their graduate degree program.

The curriculum provides a substantive exposure to the biological, physical, and social aspects of environmental problems, and methods for their analysis and resolution.

This program of study is offered by the Department of Environmental Science and Policy in the College of Science.

This has been designated a Green Leaf program. For further information, please go to Green Leaf Programs and Courses.

**Admission**

Applicants who lack college level course work in biology and chemistry should contact the ESP graduate coordinator's office for advice. Successful completion of a two semester sequence of introductory graduate level environmental chemistry and biology courses would be sufficient background to prepare students without academic training in the natural sciences. Applicants to the program should meet the following minimum requirements:

- Undergraduate (baccalaureate) degree, preferably in biology, chemistry, geology, geography, earth systems science, resource planning, environmental studies, or a related discipline with an environmental focus.
- Two semesters of college level general chemistry with a laboratory (see note above regarding introductory graduate environmental chemistry).
- Two semesters of college level general biology with a laboratory (see note above regarding introductory graduate environmental biology).
- Undergraduate course in general ecology; students who do not meet this requirement must take EVPP 677 - Applied Ecology and Ecosystem Management. as their natural science elective.
- Three letters of reference and a statement of interest in the program.
- Aptitude portion of the Graduate Record Exam.
Certificate Requirements

The certificate is awarded after satisfactory completion of six graduate courses (a minimum of 18 credits) as specified below:

Environmental certificate core (three courses, 9 credits):

- EVPP 677 - Applied Ecology and Ecosystem Management. Credits: 3

Two of the following:

- EVPP 641 - Environmental Science and Public Policy Credits: 3
- EVPP 675 - Environmental Planning and Administration Credits: 3
- SOCI 635 - Environment and Society Credits: 3

Three electives (10-11 credits):

Choose one course from each of the following areas:

Natural Sciences:

- EVPP 550 - Waterscape Ecology and Management Credits: 3
- EVPP 577 - Biogeochemistry: A Global Perspective Credits: 3
- EVPP 607 - Fundamentals of Ecology Credits: 3
- EVPP 643 - Microbial Ecology Credits: 4
- EVPP 645 - Freshwater Ecology Credits: 3
- EVPP 646 - Wetland Ecology and Management Credits: 3
- EVPP 745 - Environmental Toxicology Credits: 3

Social Sciences:

- CONF 501 - Introduction to Conflict Analysis and Resolution Credits: 3
- EVPP 635 - Environment and Society Credits: 3
- EVPP 638 - Corporate Environmental Management and Policy Credits: 3
- EVPP 641 - Environmental Science and Public Policy Credits: 3
- EVPP 642 - Environmental Policy Credits: 3
- EVPP 670 - Environmental Law Credits: 3
- EVPP 675 - Environmental Planning and Administration Credits: 3
- PRLS 501 - Introduction to Natural Resources Law Credits: 3
- PRLS 526 - Environmental Education and Resource Interpretation Credits: 3
- PHIL 643 - Environmental Ethics Credits: 3
- PUAD 502 - Administration in Public and Nonprofit Organizations Credits: 3

Environmental Methods:

- EVPP 650 - Environmental Analysis and Modeling Credits: 4
Total: 18-19 credits

Master of Science

Environmental Science and Policy, MS

Banner Code: SC-MS-EVSP

The MS in environmental science and policy meets the increasing need for trained environmental professionals who can address the problems of land and water management, land use and urbanization, wetland loss, microbial ecology, bioremediation, conservation biology, and ecosystem preservation. These professionals will also contribute to the analysis and resolution of global problems, such as deforestation, insufficient world food supplies, acid deposition, population growth and public health, global climate change/warming, and depletion of the stratospheric ozone. Areas of specific departmental focus include ecosystems; conservation; environmental biocomplexity; molecular ecology; sustainability science; environmental policy and management and human/environmental interactions. Environmental problems are defined in the real world and do not necessarily conform to traditional academic disciplines. As such, solutions require creative combinations of diverse interests and subjects. Effective training requires rigorous, problem-focused interdisciplinary action in a setting in which research is an essential element supporting instruction. Six concentrations are available in the master’s program: aquatic ecology, environmental science and policy, conservation science and policy, environmental biocomplexity, Earth surface processes and environmental geochemistry, and environmental management. The first four concentrations, designed for students who wish to obtain a research oriented master’s degree, can serve as a training ground for students wishing to further their education by pursuing the PhD in environmental science and public policy at Mason or doctoral programs at other universities. The environmental science and policy concentration is the largest and serves as a home for a broad array of research foci. The conservation science and policy concentration is designed to be an interdisciplinary, research-oriented degree focusing on the conservation of threatened species and habitats, integrating biological sciences and the human dimensions of conservation practice. The environmental biocomplexity concentration is designed for students who wish to obtain a research-oriented master's degree in population genetics, microbial ecology, and molecular systematics. The concentration in Earth surface processes and environmental geochemistry provides a specific research focus in the Earth science area.

The environmental management concentration serves as a terminal professional master’s degree for individuals working in or aspiring to work as managers in the environmental field in government or private industry. It combines the managerial and administrative skills developed in a traditional master of public administration degree program with the scientific knowledge and understanding normally found in a master of science degree.

This program of study is offered by the Department of Environmental Science and Policy in the College of Science.

This has been designated a Green Leaf program. For further information, please go to Green Leaf Programs and Courses.

Admission Requirements

Persons interested in graduate programs at George Mason University must meet the admission standards and application requirements for graduate study, as specified in the Admission section of this catalog. Applicants must complete a standard Mason graduate application form, available from the Graduate Admissions Office or on line at admissions.gmu.edu. Applicants should hold a bachelor’s degree with a GPA of 3.00 in natural or Earth sciences, engineering, resource planning, environmental studies, or a related field with an environmental focus from an accredited institution. Applicants should have taken at least two semesters of chemistry and three semesters of biology, including a course in ecology. Applicants should submit three letters of recommendation, including at least one from a former professor or, if not available, from someone with a PhD. The aptitude portion of the GRE is required, and successful applicants usually have achieved a minimum score of 1,100 for verbal and quantitative combined. Applicants must also submit a statement of interest to the program, which should include the concentration to which they are applying, potential areas of environmental focus and research interest, a statement of interactions with potential faculty advisors, and an explanation of career goals. Prospective students must contact potential faculty advisors
appropriate to their interests during the application process. The availability of an advisor in the student’s area of interest is a prerequisite for final admission. Students will choose their research skills option at the time of application but may change this option later with their advisor’s permission. Applicants who lack the prerequisite college level course work in biology and chemistry should contact the ESP Graduate Coordinator’s office for advice. Successful completion of a two semester sequence of introductory graduate level environmental chemistry and biology courses, offered by the ESP Department, can be used to satisfy the biology and chemistry prerequisites for admission. These introductory courses would be in addition to the degree requirements listed below.

Degree Requirements

Students will complete 33-37 credits of a concentration according to requirements described below to earn the master’s degree in environmental science and policy. Students must form a supervisory committee and submit a program of study to the Graduate Coordinator for approval within the first 9 credits of course work or by the end of the second semester, whichever comes first. The supervisory committee consists of the advisor and at least two other members, chosen in consultation with the advisor and conforming to Mason policy on master’s thesis committees. Course requirements may be fulfilled by completing courses from a variety of academic units at Mason. The program requires a minimum of 33 graduate credits distributed in selected categories to provide a breadth of knowledge appropriate for addressing current environmental issues. Course selection should reflect a coherent individual program focus, which is stated and briefly described in the program of study and support the research component of the student’s degree program and should be developed in close consultation with the advisor and committee members. The advisor and thesis committee approve the course work program individually for each student.

For the concentration in environmental management, there is no supervisory committee. The Graduate Program Director serves as the advisor for students in this concentration.

▲ Aquatic Ecology Concentration (AQEC)

This concentration will provide students with a well-grounded MS in the study of aquatic environments such as lakes, streams, watersheds, and estuaries. Emphasis is placed on food webs, biogeochemical cycles, water quality, habitat characteristics, and life histories of aquatic organisms. Students will become proficient with research tools including literature review, field and laboratory methods, and analytical tools as well as applications to management issues.

Course selection should also support the research component of the student’s degree program and should be developed in close consultation with the advisor and committee members. The advisor and thesis committee approve the course work program individually for each student.

Aquatic Science (12 credits)

Required Core Courses

- EVPP 550 - Waterscape Ecology and Management Credits: 3
- EVPP 581 - Estuarine and Coastal Ecology Credits: 3
- EVPP 505 - Selected Topics in Environmental Science Credits: 0-4
- EVPP 519 - Marine Mammal Biology and Conservation Credits: 3
- EVPP 521 - Marine Conservation Credits: 3
- EVPP 536 - Ichthyology Credits: 4
- EVPP 563 - Coastal Morphology and Processes Credits: 4
- EVPP 641 - Environmental Science and Public Policy Credits: 3
- EVPP 643 - Microbial Ecology Credits: 4
- EVPP 645 - Freshwater Ecology Credits: 3
- EVPP 646 - Wetland Ecology and Management Credits: 3
• EVPP 648 - Population Ecology Credits: 3
• EVPP 652 - The Hydrosphere Credits: 3
• EVPP 741 - Advanced Topics in Environmental Science and Public Policy Credits: 0-4
• EVPP 745 - Environmental Toxicology Credits: 3

Public Policy (6 credits)

At least 6 credits are required in environmental law, human ecology, environmental ethics, environmental conflict resolution, environmental planning, or public affairs.

Aquatic Methods (6 credits)

At least 6 credits are required to include statistics, research design, multivariate data analysis (EVPP 651), geographic information systems, lab and field classes (EVPP 555, EVPP 582, EVPP 647).

Seminar (1 credit)

• EVPP 692 - Master's Seminar in Environmental Science and Public Policy Credits: 1

Research (2-6 credits)

Project Option

• At least 2 credits of EVPP 798 - Master's Research Project in Environmental Science and Public Policy Credits: 1-3

Thesis Option

• At least 3 credits of EVPP 799 - Master's Thesis in Environmental Science and Public Policy Credits: 1-6

Electives

If necessary, students can take additional electives in consultation with Graduate Program Director to bring the total to 33 credits.

Total: 33 credits

▲ Conservation Science and Policy Concentration (COSP)

This concentration is for students desiring an MS degree with an interdisciplinary approach to the conservation of species and habitats. Students may take courses offered by ESP and other departments on the Fairfax campus as well as CONS courses which are offered through the Smithsonian Mason Global Conservation Studies Program. This unique partnership with the Smithsonian Conservation Biology Institute in Front Royal, Virginia offers students hands-on education in cutting-edge conservation science and human dimensions through residential, intensive classes. SCBI is renowned for its conservation research and training of conservation practitioners around the world and instructors for these classes are drawn from SCBI's conservation scientists and other experts from around the world.

Requirements may be fulfilled by completing courses from a variety of academic units at Mason. The program requires a minimum of 33 graduate credits distributed in five categories and provides a breadth of knowledge appropriate for addressing current conservation issues. Course selection should support the research component of the student's degree program developed in close consultation with the advisor and the committee members. The advisor and thesis committee approve the course work program individually for each student.
Conservation Science (6 credits)

At least 6 credits are required from conservation science courses. Suggested courses include:

- EVPP 607 - Fundamentals of Ecology Credits: 3 (is required for those students without previous course work in ecology and can be included within the 6 credits.)
- CONS 630 - Species Monitoring & Conservation Credits: 3 (variable topics, may be taken more than once if different topic)
- EVPP 518 - Conservation Biology Credits: 3
- EVPP 519 - Marine Mammal Biology and Conservation Credits: 3
- EVPP 543 - Tropical Ecosystems Credits: 4
- EVPP 550 - Waterscape Ecology and Management Credits: 3
- EVPP 621 - Overview of Biodiversity Conservation Credits: 3

Conservation Policy and Human Dimensions of Conservation (6 credits)

At least 6 credits are required in conservation policy or social science courses. Suggested courses include:

- CONS 660 - Effective Conservation Leadership Credits: 3
- CONS 665 - Conservation Conflict Resolution Credits: 3
- EVPP 521 - Marine Conservation Credits: 3
- EVPP 622 - Management of Wild Living Resources Credits: 3
- EVPP 642 - Environmental Policy Credits: 3

Conservation Methods (6 credits)

At least 6 credits are required in relevant experimental methods, statistics or conservation techniques courses. Suggested courses include:

- CONS 620 - Spatial Ecology, Geospatial Analysis & Remote Sensing for Conservation Credits: 3
- CONS 625 - Statistics for Ecology and Conservation Biology Credits: 3
- EVPP 555 - Lab in Waterscape Ecology Credits: 1

Seminar (1 credit)

At least 1 credit on an appropriate topic is required.

- EVPP 692 - Master's Seminar in Environmental Science and Public Policy Credits: 1

Research (1-6 credits)

This requirement may be satisfied in one of two ways. Students may complete a research project (EVPP 798) or produce a formal thesis (EVPP 799). The depth and sophistication of the research differs between the two options. The thesis normally involves original research with independent acquisition and interpretation of data, with the goal of peer-reviewed publication. Projects are generally less extensive and can include a broader range of activities.

Students fulfilling the research requirement with EVPP 798 are required to take a comprehensive examination covering knowledge mastered through the program of study, administered by their supervisory committee. Students choosing to do a thesis
and completing EVPP 799 will present their results in a public seminar and defend their thesis before their supervisory committee. Students will be graded pass/no credit on the research skills component.

- EVPP 798 - Master's Research Project in Environmental Science and Public Policy Credits: 1-3
  or
- At least 3 credits of EVPP 799 - Master's Thesis in Environmental Science and Public Policy Credits: 1-6

Electives

If necessary, students take additional, relevant, elective courses, approved by the supervisory committee to bring the total to 33 credits.

Total: 33 credits

▲ Earth Surface Processes and Environmental Geochemistry Concentration (ESEG)

This concentration offers a specific research focus in the earth science area and is designed for students desiring an MS degree with an earth science geology theme.

Requirements may be fulfilled by completing courses from a variety of academic units at Mason. The program requires a minimum of 33 graduate credits distributed in the categories listed below. Course selection should support the research component of the student's degree program and be developed in close consultation with the advisor and the committee members. The advisor and thesis committee approve the course work program individually for each student.

Natural Sciences (16 credits)

- Students select at least one course (totaling 10 of the 16 required credits) from each of the following areas: soils science, hydrogeology, and geochemistry.

The remaining courses (6 credits) may be chosen from a list of applicable EVPP, CHEM, and GEOL graduate courses, including:

- GEOL 500 - Selected Topics in Modern Geology Credits: 1-3
- GEOL 501 - Selected Topics in Modern Geology Credits: 1-3
- GEOL 601 - The Lithosphere Credits: 3
- CHEM 633 - Chemical Thermodynamics and Kinetics Credits: 3
- CHEM 651 - Environmental Chemistry of Organic Substances Credits: 3
- CHEM 728 - Introduction to Solid Surfaces Credits: 3
- EVPP 503 - Field Mapping Techniques Credits: 3
- EVPP 505 - Selected Topics in Environmental Science Credits: 0-4
- EVPP 543 - Tropical Ecosystems Credits: 4
- EVPP 550 - Waterscape Ecology and Management Credits: 3
- EVPP 563 - Coastal Morphology and Processes Credits: 4
- EVPP 577 - Biogeochemistry: A Global Perspective Credits: 3
- EVPP 607 - Fundamentals of Ecology Credits: 3 (is required for those students without previous course work in ecology and can be included with the 6 credits)
- EVPP 610 - Bioremediation: Theory and Applications Credits: 3
- EVPP 643 - Microbial Ecology Credits: 4
- EVPP 745 - Environmental Toxicology Credits: 3
Public Policy (6 credits)

- At least 6 credits are required in environmental law, human dimension of global change, environmental ethics, human ecology, or planning.

Methods (6 credits)

- At least 6 credits are required in remote sensing, GIS, statistics, instrumentation, or modeling.

Seminar (1 credit)

At least 1 credit on an appropriate topic is required.

- EVPP 692 - Master's Seminar in Environmental Science and Public Policy Credits: 1

Research (3 credits)

At least 3 credits of master's thesis are required for this concentration. Students present their results in a public seminar and defend their thesis before their committee. Students will be graded satisfactory/no credit (S/NC) on the research component.

- EVPP 799 - Master's Thesis in Environmental Science and Public Policy Credits: 1-6

Electives

- If necessary, students take additional elective courses to bring the total to 33 credits.

Total: 33 credits

▲ Environmental Biocomplexity Concentration (EVBC)

The environmental biocomplexity concentration is designed for students desiring an MS degree with an environmental biocomplexity theme encompassing the disciplines of population genetics, microbial ecology, and/or molecular systematics.

Requirements may be fulfilled by completing courses from a variety of academic units at Mason. The program requires a minimum of 33 graduate credits distributed in the categories listed below. Course selection should support the research component of the student's degree program and be developed in close consultation with the advisor and the committee members. The advisor and thesis committee approve the course work program individually for each student.

Students are encouraged to complete at least 1 credit of directed studies (EVPP 693) as a laboratory rotation to enhance their mastery of experimental techniques.

Natural Sciences (6 credits)

- At least 6 credits are required in courses that can be drawn from offerings in ecology, biogeochemistry, biochemistry, population genetics, molecular biology, molecular systematics, molecular evolution, microbial ecology, microbial diversity, quantitative genetics, and population biology.
- EVPP 607 - Fundamentals of Ecology Credits: 3 (is required for those students without previous course work in ecology and can be included within the 6 credits)
Public Policy (6 credits)

- At least 6 credits are required in environmental law, human ecology, environmental ethics, patent law, or legal and ethical issues in science.

Methods and Statistics (9 credits)

- At least 9 credits are required in statistics, bioinformatics, information systems, instrumental analysis, microbiological techniques, molecular methods, or phylogenetic methods.

Seminar (1 credit)

At least 1 credit on an appropriate topic is required.

- EVPP 692 - Master's Seminar in Environmental Science and Public Policy Credits: 1

Research (1-6 credits):

This requirement may be satisfied in one of two ways. Students may complete a research project (EVPP 798) or produce a formal thesis (EVPP 799). The depth and sophistication of the research differs between the two options. The thesis normally involves original research with independent acquisition and interpretation of data, with the goal of peer-reviewed publication. Projects are generally less extensive and can include a broader range of activities. Students will be graded satisfactory/no credit (S/NC) on the research skills component.

Project Option

Students fulfilling the research requirement with EVPP 798 are required to take a comprehensive exam covering knowledge mastered through the program of study, administered by their supervisory committee.

- At least 1 credit of EVPP 798 - Master's Research Project in Environmental Science and Public Policy Credits: 1-3

Thesis Option

Students choosing to do a thesis and completing EVPP 799 will present their results in a public seminar and defend their thesis before their supervisory committee.

- At least 3 credits of EVPP 799 - Master's Thesis in Environmental Science and Public Policy Credits: 1-6

Electives

- If necessary, students take additional electives to bring the total to 33 credits.

Total: 33 credits

▲ Environmental Management Concentration (EVMG)
The environmental management concentration combines the managerial and administrative skills developed in a traditional master of public administration degree program with the scientific knowledge and understanding normally found in a master of science degree.

Students must complete 37 credits for the environmental management concentration. Students in this concentration are advised by the Graduate Program Director, will be assigned an advisor upon admission. Full-time students can complete this degree in three semesters; part-time students can take six semesters. Course work must include the following:

Core Courses (18-19 credits)

- EVPP 638 - Corporate Environmental Management and Policy Credits: 3
- EVPP 641 - Environmental Science and Public Policy Credits: 3
- EVPP 642 - Environmental Policy Credits: 3
- PUAD 502 - Administration in Public and Nonprofit Organizations Credits: 3
- PUAD 540 - Public Policy Process Credits: 3
  and one of the following methods courses:
  - PUAD 511 - Problem Solving and Data Analysis I Credits: 3
  - EVPP 650 - Environmental Analysis and Modeling Credits: 4
  - GGS 550 - Geospatial Science Fundamentals Credits: 3
  - GGS 553 - Geographic Information System Credits: 3
  - GGS 579 - Remote Sensing Credits: 3
  - SOCI 636 - Statistical Reasoning Credits: 3

Environmental Law (3 credits)

At least 3 credits are required, chosen from the following:

- EVPP 670 - Environmental Law Credits: 3
- CEIE 556 - Environmental Law Credits: 3
- PRLS 501 - Introduction to Natural Resources Law Credits: 3

Field Ecology (4 credits)

At least 4 credits are required, chosen from the following:

- EVPP 550 - Waterscape Ecology and Management Credits: 3
- EVPP 555 - Lab in Waterscape Ecology Credits: 1
  or
- EVPP 646 - Wetland Ecology and Management Credits: 3
- EVPP 647 - Wetland Ecology Lab and Field Credits: 1
  or other approved 4 credit field ecology course

Capstone (3 credits)

- EVPP 677 - Applied Ecology and Ecosystem Management. Credits: 3

Electives (9 credits)
Students may choose 9 credits (or more) to complete 37 credits from the following list of approved electives. Other courses may be used subject to approval of the Graduate Program Director.

- EVPP 607 - Fundamentals of Ecology Credits: 3 (is required for those students without previous course work in ecology)
- EVPP 524 - Introduction to Environmental and Resource Economics Credits: 3
- EVPP 525 - Economics of Human/Environment Interactions Credits: 3
- EVPP 550 - Waterscape Ecology and Management Credits: 3
- EVPP 620 - Development of U.S. Environmental Policies Credits: 3
- EVPP 621 - Overview of Biodiversity Conservation Credits: 3
- EVPP 622 - Management of Wild Living Resources Credits: 3
- EVPP 626 - Environment and Development in Asia Credits: 3
- EVPP 627 - Environmental Policy in Latin America Credits: 3
- EVPP 628 - Environment and Development in Africa Credits: 3
- EVPP 630 - Methods and Logic of Social Inquiry Credits: 3
- EVPP 635 - Environment and Society Credits: 3
- EVPP 638 - Corporate Environmental Management and Policy Credits: 3
- EVPP 646 - Wetland Ecology and Management Credits: 3
- EVPP 650 - Environmental Analysis and Modeling Credits: 4
- EVPP 675 - Environmental Planning and Administration Credits: 3
- CLIM 690 - Scientific Basis of Climate Change Credits: 3
- GGS 550 - Geospatial Science Fundamentals Credits: 3 (only if not taken as part of the core courses above)
- PUAD 509 - Justice Organizations and Processes Credits: 3
- PUAD 615 - Administrative Law Credits: 3
- PUAD 622 - Program Planning and Implementation Credits: 3
- PUAD 645 - Policy Analysis Credits: 3
- PUAD 646 - Program Evaluation Credits: 3
- PUAD 657 - Association Management Credits: 3
- PUAD 729 - Issues in Public Management Credits: 3
- MBA 623 - Marketing Management Credits: 0-3
- MBA 712 - Project Management Credits: 0-3
- MBA 724 - Marketing Communications Credits: 0-3
- MBA 725 - Leadership Credits: 0-3

Total: 37 credits

Note: In special cases, the Graduate Program Director may permit at his or her discretion, the substitution of an alternative course in place of a required one.

▲ Environmental Science and Policy Concentration (EVSP)

The environmental science and policy concentration is a home for a broad array of research foci. It encourages an independent and creative approach to the development of curricula that reside in the general field of environmental science and policy.

Requirements may be fulfilled by completing courses from a variety of academic units at Mason. The program requires a minimum of 33 graduate credits distributed in the categories below and provide a breadth of knowledge appropriate for addressing current environmental policy issues. Course selection should support the research component of the student's degree program and be developed in close consultation with the advisor and the supervisory committee members. The advisor and supervisory committee approve the course work program individually for each student. Course selection should also support the
research component of the student’s degree program and should be developed in close consultation with the advisor and committee members. The advisor and thesis committee approve the course work program individually for each student.

Natural Sciences (6 credits)

- At least 6 credits are required in biology, geology, geography, chemistry, or environmental engineering.
  EVPP 607 - Fundamentals of Ecology Credits: 3 is required for those students without previous course work in ecology and can be included within the 6 credits.

Public Policy (6 credits)

- At least 6 credits are required in environmental law, human ecology, environmental ethics, planning, or public affairs.

Methods and Statistics (9 credits)

- At least 9 credits are required in statistics, remote sensing, information systems, instrumental analysis, or modeling. A course in statistics is highly recommended.

Seminar (1 credit)

At least 1 credit on an appropriate topic is required.

- EVPP 692 - Master's Seminar in Environmental Science and Public Policy Credits: 1

Research (1-6 credits)

This requirement may be satisfied in one of two ways. Students may conduct a project (EVPP 798) or produce a formal thesis (EVPP 799). The depth and sophistication of the research differs between the two options. The thesis normally involves original research with independent acquisition and interpretation of data, with the goal of peer-reviewed publication. Projects are generally less extensive and can include a broader range of activities. Students will be graded satisfactory/no credit (S/NC) on the research skills component.

Project Option

Students fulfilling the research requirement with EVPP 798 are required to take a comprehensive exam administered by their committee.

- At least 1 credit of EVPP 798 - Master's Research Project in Environmental Science and Public Policy Credits: 1-3

Thesis Option

Students choosing to do a thesis and completing EVPP 799 will present their results in a public seminar and defend their thesis before their committee.

- At least 3 credits of EVPP 799 - Master's Thesis in Environmental Science and Public Policy Credits: 1-6

Electives
If necessary, students take additional electives to bring the total to 33 credits.

Total: 33 credits

Total: 33-37 credits

Non-Degree

Conservation Biology Minor

Banner Code: CBIO

The minor in conservation biology is intended for non-biology majors with an interest in wildlife and habitat conservation issues. The minor may particularly suite environmental science, environmental and sustainability studies, global and environmental change majors and Earth science majors, as well as New Century College students wishing to increase their understanding and qualifications in the field of conservation biology. The minor may also be of interest to non-science majors, for example, students taking leisure studies classes with an interest in ecotourism. This minor may also complement the minor in applied conservation studies which can be taken via the Smithsonian-Mason Semester.

Eight credits of course work must be unique to the minor and not counted toward the student’s major. For policies governing all minors, see the Academic Policies section of this catalog.

This program of study is offered by the Department of Environmental Science and Policy in the College of Science.

Course Work

Candidates for the minor in conservation biology must complete at least 21 credits with a minimum GPA of 2.00, distributed as follows:

Core Biology Courses (13 credits)

- BIOL 308 - Foundations of Ecology and Evolution Credits: 5 *
- BIOL 310 - Biodiversity Credits: 5 *
- and one from the following:
  - EVPP 318 - Conservation Biology Credits: 3
  - BIOL 318 - Conservation Biology Credits: 3
  - NCLC 401 - Conservation Biology Credits: 6 (3 of 6 credits count toward minor core. Remaining 3 credits may apply to minor electives)

Electives (6 credits)

At least 6 credits of electives from the following courses:

- EVPP 336 - Human Dimensions of the Environment Credits: 3
- EVPP 361 - Introduction to Environmental Policy Credits: 3
- EVPP 377 - Applied Ecology Credits: 3
- EVPP 419 - Marine Mammal Biology and Conservation Credits: 3
- EVPP 420 - Marine Mammal Biology and Conservation Field Course Credits: 1
- EVPP 421 - Marine Conservation Credits: 3
- EVPP 490 - Special Topics in Environmental Science and Policy Credits: 0-4
  Conservation Orientated Topics
- NCLC 401 - Conservation Biology Credits: 6 (3 of 6 credits count toward electives if course taken to satisfy core requirement above)
- NCLC 520 - Conservation Education Credits: 3
- NCLC 522 - Developing an Institutional In Situ Conservation Strategy Credits: 3
- TOUR 312 - Ecotourism Credits: 3

Notes:

Other conservation-oriented classes may also be applicable as electives for this minor if approved by the faculty coordinator for the minor.

* These courses may have prerequisites that need to be met. See advisor for details.

Total: 19 credits

Environmental Policy Minor

Banner Code: EVP

This program of study is offered by the Department of Environmental Science and Policy in the College of Science.

This has been designated a Green Leaf program. For further information, please go to Green Leaf Programs and Courses.

Course Work

Students must successfully complete 21 credits with a minimum 2.00 GPA. At least 8 credits of courses taken for the minor must be exclusive to the minor and not count toward the student’s major. For policies governing all minors, see the Academic Policies section of this catalog.

Core courses (12 credits):

- EVPP 336 - Human Dimensions of the Environment Credits: 3
- EVPP 361 - Introduction to Environmental Policy Credits: 3
- BIOL 377 or EVPP 377 - Applied Ecology Credits: 3
- PHIL 343 - Topics in Environmental Philosophy Credits: 3

Plus 9 credits from the following list:

(or other appropriate courses approved by the coordinator of the minor)

- ANTH 370 - Environment and Culture Credits: 3
- ANTH 399 - Issues in Anthropology Credits: 3
- BIOL 318 or EVPP 318 - Conservation Biology Credits: 3
- BIOL 543 - Tropical Ecosystems Credits: 4
Total: 21 credits

Sustainability Minor

Banner Code: SUST

The core principle of sustainability is the desire to meet the basic material needs of the current generation without compromising the ability of future generations to meet their needs. In order to achieve this goal, we must recognize and address the conflicts and trade-offs involved in balancing environmental integrity, social equity, and economic stability. Such complex work necessarily involves contributions from a wide range of disciplines, and it also requires a re-examination of the relationship between human value systems and cultural practices and the associated long-term implications for the ecosystem.

For policies governing all minors, see the Academic Policies section of this catalog.

This interdisciplinary minor is housed jointly in the Environmental Science and Policy (College of Science) and in the New Century College (College of Humanities and Social Sciences).

This has been designated a Green Leaf program. For further information, please go to Green Leaf Programs and Courses.

Course Work

Candidates for the minor in sustainability studies must complete 16 credits, eight of which must be unique to the minor, with a minimum GPA of 2.00, distributed as follows:

Core Courses (8 credits)

- NCLC 210 - Sustainable World Credits: 4
- EVPP 480 - Sustainability in Action Credits: 4

Electives (8 credits)
A maximum of two courses from a single department or program can be counted for elective credit. Preapproved courses are listed here and others may be substituted. See the program coordinator for additional information.

Choose 8 credits from the following:

- ANTH 370 - Environment and Culture Credits: 3
- CEIE 355 - Environmental Engineering and Science Credits: 3
- CEIE 450 - Environmental Engineering Systems Credits: 3
- CHEM 155 - Introduction to Environmental Chemistry I Credits: 4
- ECON 335 - Environmental Economics Credits: 3
- EVPP 110 - The Ecosphere: An Introduction to Environmental Science I Credits: 4
- EVPP 201 - Environment and You: Issues for the Twenty-First Century Credits: 3
- EVPP 335 - People, Plants, and Culture Credits: 3
- EVPP 336 - Human Dimensions of the Environment Credits: 3
- EVPP 337 - Environmental Policy Making in Developing Countries Credits: 3
- EVPP 361 - Introduction to Environmental Policy Credits: 3
- EVPP 378 - Ecological Sustainability Credits: 4
- EVPP 421 - Marine Conservation Credits: 3
- GEOL 305 - Environmental Geology Credits: 3
- NCLC 220 - Energy and Environment Credits: 3-6
- PRLS 250 - Wilderness Travel and Sustainability Credits: 2
- PRLS 300 - People with Nature Credits: 3
- PRLS 402 - Human Behavior in Natural Environments Credits: 3
- PRLS 501 - Introduction to Natural Resources Law Credits: 3
- PHIL 343 - Topics in Environmental Philosophy Credits: 3
- SOCI 320 - Social Structure and Globalization Credits: 3
- TOUR 312 - Ecotourism Credits: 3
- TOUR 340 - Sustainable Tourism Credits: 3
- USST 301 - Urban Growth in a Shrinking World Credits: 3

Total: 16 credits

**Undergraduate Certificate**

**Environmental Management Undergraduate Certificate**

**Banner Code:** SC-CERB-EVMG

This undergraduate certificate in environmental management is for students interested in environmental issues. The program consists of a minimum of 27 credits, most of which, with appropriate planning, may be counted toward fulfilling BS or BA requirements in biology, geography, earth science, urban systems engineering, and other natural and social sciences.

The curriculum provides a substantive appreciation of the biological, physical, and social aspects of environmental problems and methods for their analysis and resolution. The program should particularly interest students wishing to pursue graduate work or seeking employment in the environmental field. Inquiries should be made to the director of the environmental management certificate program.

Students receiving the certificate must hold a baccalaureate degree or be earning a baccalaureate degree from Mason at the time they receive the certificate. As an entry-level requirement, students must complete a two-semester laboratory science sequence in
environmental science, biology, chemistry, or geology. Only courses with a grade of C or better are counted toward the certificate program. The undergraduate certificate in environmental management may be pursued on a part-time or full-time basis.

Students select at least 27 credits of course work chosen in consultation with the certificate director. The courses are divided into five categories. Courses listed in more than one category can satisfy the requirements of only one. Any substitution in the following list requires permission from the certificate director.

The Environmental Management Undergraduate Certificate has been designated a Green Leaf program. For further information, please go to Green Leaf Programs and Courses.

This certificate program qualifies for Title IV Federal Financial Aid. For more information about program graduation rates, the median debt of students who completed the program, and other important information, please visit the disclosure information page at: http://irr.gmu.edu/new/N_IRRHome/HEOA/Gainful.cfm

This program of study is offered by the Department of Environmental Science and Policy in the College of Science.

Certificate Requirements

Environmental certificate core (four courses)

- EVPP 377 or BIOL 377 - Applied Ecology Credits: 3
- GGS 303 - Conservation of Resources and Environment or GGS 503 - Problems in Environmental Management Credits: 3
- one of the following statistics courses
- BIOL 214 - Biostatistics for Biology Majors Credits: 4
- BIOL 312 - Biostatistics Credits: 4
- and one of the following:
- ECON 103 - Contemporary Microeconomic Principles Credits: 3
- EVPP 361 - Introduction to Environmental Policy Credits: 3
- EVPP 336 - Human Dimensions of the Environment Credits: 3
- GOVT 351 - Administration in the Political System Credits: 3
- GOVT 357 - Urban Governance and Planning Credits: 3

Physical perspective (one or two courses)

Biology majors are required to complete two courses in physical or social perspective; geology or earth science majors are required to complete two courses in biological or social perspective. Social science majors are required to complete two courses in physical or biological perspective.

- BIOL 309 - Introduction to Oceanography Credits: 3
- BIOL 535 - Ancient Plants and their Environment Credits: 3
- EVPP 550 - Waterscape Ecology and Management Credits: 3
- EVPP 577 - Biogeochemistry: A Global Perspective Credits: 3
- GEOL 305 - Environmental Geology Credits: 3
- GEOL 306 - Soil Science Credits: 3
- GEOL 313 - Hydrogeology Credits: 3
- GEOL 317 - Geomorphology Credits: 4
- GEOL 363 - Coastal Morphology and Processes Credits: 4
- GEOL 403 - Geochemistry Credits: 3
- GEOL 405 - Advanced Seminar in Earth Resources Credits: 3
Biological perspective (one or two courses)

Biology majors are required to complete two courses in physical or social perspective; geology or earth science majors are required to complete two courses in biological or social perspective. Social science majors are required to complete two courses in physical or biological perspective.

- BIOL 309 - Introduction to Oceanography Credits: 3
- BIOL 344 - Plant Diversity and Evolution Credits: 4
- BIOL 345 - Plant Ecology Credits: 4
- BIOL 440 - Field Biology Credits: 0-4
- BIOL 446 - Environmental Physiology Credits: 3
- BIOL 449 - Marine Ecology Credits: 3
- BIOL 471 - Evolution Credits: 3
- BIOL 532 - Animal Behavior Credits: 3
- BIOL 535 - Ancient Plants and their Environment Credits: 3
- BIOL 536 - Ichthyology Credits: 4
- BIOL 537 - Ornithology Credits: 4
- BIOL 543 - Tropical Ecosystems Credits: 4
- BIOL 547 - Terrestrial Plant Ecology Credits: 4
- EVPP 318 - Conservation Biology Credits: 3
- EVPP 350 - Freshwater Ecosystems Credits: 4
- HEAL 450 - Epidemiology and Environmental Health Credits: 3
- EVPP 515 - Molecular Environmental Biology I Credits: 3
- EVPP 538 - Mammalogy Credits: 4
- EVPP 550 - Waterscape Ecology and Management Credits: 3
- EVPP 577 - Biogeochemistry: A Global Perspective Credits: 3

Social perspective (one course)

- ANTH 305 - Foraging Societies Credits: 3
- ANTH 365 - Race and Racism Credits: 3
- ANTH 370 - Environment and Culture Credits: 3
- ANTH 440 - Applied Anthropology: Seeking Solutions in the Public and Private Sectors Credits: 3
- CONF 501 - Introduction to Conflict Analysis and Resolution Credits: 3
- ECON 350 - Regional and Urban Economics Credits: 3
- ECON 360 - Economics of Developing Areas Credits: 3
- EVPP 336 - Human Dimensions of the Environment Credits: 3
- EVPP 337 - Environmental Policy Making in Developing Countries Credits: 3
- EVPP 361 - Introduction to Environmental Policy Credits: 3
- GOVT 318 - Interest Groups, Lobbying, and the Political Process Credits: 3
- GOVT 357 - Urban Governance and Planning Credits: 3
- GOVT 364 - Public Policy Making Credits: 3
- GOVT 366 - Public Policy Analysis Credits: 3
- MGMT 312 - Principles and Practices of Management Credits: 3
- PRLS 300 - People with Nature Credits: 3
- PRLS 402 - Human Behavior in Natural Environments Credits: 3
- PRLS 526 - Environmental Education and Resource Interpretation Credits: 3
Environmental methods (one of the following options)

- BIOL 312 - Biostatistics Credits: 4
- EVPP 305 - Environmental Microbiology Essentials Credits: 3 and EVPP 306 Credits: 1
- EVPP 503 - Field Mapping Techniques Credits: 3
- EVPP 550 - Waterscape Ecology and Management Credits: 3 and EVPP 555 Credits: 1
- EVPP 581 - Estuarine and Coastal Ecology Credits: 3 and EVPP 582 Credits: 1

Total: 27 credits

Other Degrees

Environmental Science Minor

Banner Code: EVSC

A minor in environmental science aids the development of an increased awareness of the major environmental issues effecting the natural world and society. The minor is intended to compliment a major in natural science but could also be taken by non-science majors. This minor cannot be taken in conjunction with the BS in Earth Science concentration in environmental geoscience, the BS in Global and Environmental Change, the BS in Environmental Science or the BA in Environmental and Sustainability Studies.

At least 8 credits of courses taken for the minor must be exclusive to the minor and not count toward the student’s major. For policies governing all minors, see the Academic Policies section of this catalog.

This program of study is offered by the Department of Environmental Science and Policy in the College of Science.

Course Work

EVPP or BIOL sequence (8-12 credits)

Choose one sequence, either

- EVPP 110 - The Ecosphere: An Introduction to Environmental Science I Credits: 4
- EVPP 111 - The Ecosphere: An Introduction to Environmental Science II Credits: 4
  or
- BIOL 103 - Introductory Biology I Credits: 4
- BIOL 104 - Introductory Biology II Credits: 4
- GEOL 101 - Introductory Geology I Credits: 4

Applied ecology course (3 credits)

- EVPP 377 - Applied Ecology Credits: 3
  or
- BIOL 377 - Applied Ecology Credits: 3
Electives (8 credits)

Students must complete a minimum of 8 credits of EVPP electives, of which 4 credits must be upper level courses.

Total: 19-23 credits

- Forensic Science Program

Phone: 703-993-5071  
Web: forensicscience.gmu.edu

Faculty

Director: Whildin

Professors: Foster, Jafri, Mushrush, Willett

Associate professors: Born, Gillevet, Honeychuck, Schreifels, Seto, Whildin

Assistant professors: Carisi, DiZinno, Gill, Prendergast, Rancourt

Adjunct faculty: Ambrozy, Christensen, Chittenden, Dyn, Morrogh, O'Neal, Rodway

The Forensic Science Program is an interdisciplinary academic collaboration between the Department of Chemistry and Biochemistry and the School of Systems Biology (SSB). In addition, the Program has its own dedicated teaching faculty. The Program is administered by the Forensic Science Program Director, and governed by an interdepartmental Forensic Science Program Committee.

Course Work

The program offers all course work designated FSRC in the Courses section of this catalog.

Undergraduate Degree Programs

The Forensic Science Program oversees the BS and the undergraduate minor in forensic science.

Graduate Degree Programs

The Forensic Science Program oversees the MS and graduate certificate programs in forensic science.

Bachelor of Science

Forensic Science, BS

Banner Code: SC-BF-FRSC

Students planning professional careers in the field of forensic science should choose this degree.
Students must fulfill all requirements for bachelor's degrees including university general education requirements. In addition, students majoring in forensic science must complete the following courses with a minimum GPA of 2.30. No more than two courses with a grade of D (1.00) may be applied to the major. Through course work below, students satisfy the university-wide requirements in natural science and quantitative reasoning.

FRSC 302 and FRSC 304 will satisfy this major's writing-intensive requirement.

This program of study is offered by the Forensic Science Program in the College of Science.

Degree Requirements

Forensic science core courses (21 credits)

- FRSC 200 - Survey of Forensic Science Credits: 3
- FRSC 201 - Introduction to Criminalistics Credits: 3
- FRSC 302 - Forensic Bio-Trace Credits: 3
- FRSC 303 - Forensic Evidence and Ethics Credits: 3
- FRSC 304 - Forensic Chemistry and Microscopy Credits: 3
- FRSC 405 - Independent Studies / Research Credits: 3
- CRIM 100 - Introduction to Criminal Justice Credits: 3

Natural science core courses (45-46 credits)

- CHEM 211 - General Chemistry Credits: 4
- CHEM 212 - General Chemistry Credits: 4
- CHEM 313 - Organic Chemistry Credits: 3
- CHEM 314 - Organic Chemistry Credits: 3
- CHEM 315 - Organic Chemistry Lab I Credits: 2
- CHEM 318 - Organic Chemistry Lab II Credits: 2
- MATH 113 - Analytic Geometry and Calculus I Credits: 4
- STAT 250 - Introductory Statistics I Credits: 3
  or
- BIOL 214 - Biostatistics for Biology Majors Credits: 4
- PHYS 243 - College Physics Credits: 3
- PHYS 244 - College Physics Lab Credits: 1
- PHYS 245 - College Physics Credits: 3
- PHYS 246 - College Physics Lab Credits: 1
- BIOL 213 - Cell Structure and Function Credits: 4
- BIOL 430 - Advanced Human Anatomy and Physiology I Credits: 4
- BIOL 431 - Advanced Human Anatomy and Physiology II Credits: 4

Additional courses (8 credits)

Select courses from:

- BIOL 305 - Biology of Microorganisms Credits: 3
- BIOL 306 - Biology of Microorganisms Laboratory Credits: 1
- BIOL 311 - General Genetics Credits: 4
• CHEM 321 - Elementary Quantitative Analysis Credits: 4
• CHEM 422 - Instrumental Analysis Credits: 3
• CHEM 423 - Instrumental Analysis Laboratory Credits: 2
• CHEM 463 - General Biochemistry I Credits: 4

Graduate Certificate

Forensics Graduate Certificate

Banner Code: SC-CERG-FORS

This interdisciplinary graduate certificate program is designed for students seeking training in forensic science, as well as for current professionals employed by the federal government, local law enforcement, and private security corporations. Forensics refers to the application of scientific methodologies to the analysis of crime scenes, the collection of evidence, and the laboratory analysis of that evidence in support of criminal investigations. Related legal aspects are also considered as part of a comprehensive approach to forensics.

Students enrolled in the forensic science concentration obtain the specific scientific skills necessary for laboratory employment in the field. Students enrolled in the general forensics concentration obtain a more general background in the field with a focus on criminal law and anthropology. At the time of completion, depending on the concentration, students will be able to understand the basic principles of forensics and perform a general crime scene analysis.

This program of study is offered by the Forensic Science Program in the College of Science.

The graduate certificate in forensics may be pursued on a part-time or full-time basis.

This certificate program qualifies for Title IV Federal Financial Aid. For more information about program graduation rates, the median debt of students who completed the program, and other important information, please visit the disclosure information page at: http://irr.gmu.edu/new/N_IRRHome/HEOA/Gainful.cfm

Admission Requirements

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in the Admission section of this catalog. Applicants to the general forensics concentration should hold a BA or BS degree from a regionally accredited university with a minimum GPA of 3.00.

To apply, prospective students should submit a completed graduate application, two copies of official transcripts from all institutions attended, and a current résumé. TOEFL scores are required of all international applicants who do not hold at least a bachelor's degree from a regionally accredited institution within the US (some exceptions apply).

Students may not pursue this certificate concurrently with any other graduate degree program or certificate program offered by COS because this certificate program will charge students at a differential (premium) tuition rate. However, students enrolled in academic programs outside COS may enroll in this certificate program concurrently.

Certificate Requirements

The certificate in forensics requires a total of 18 credits, comprising six 3-credit courses. A unique element of the program is the Forensics Capstone Course, which is shared by the three concentrations. In this class, students from the three concentrations will combine their skills as members of interdisciplinary investigation teams as they analyze a real-world crime scene. This unique course will demonstrate in practice how students with skills in the scientific/quantitative analysis or legal/anthropological areas
can combine forces to understand and interpret the nuances of the evidence presented at an actual crime scene. The curriculum requirements for each concentration are listed below.

**Forensic Core Courses (6 credits)**

- FRSC 500 - Introduction to Forensic Science Credits: 3
- FRSC 510 - Basic Crime Analysis Credits: 3

**Concentrations (12 credits)**

▲ **Crime Scene Concentration (CSCN)**

**Required Courses (12 credits)**

- FRSC 511 - Advanced Crime Scene Analysis Credits: 3
- FRSC 512 - Physical Evidence Analysis Credits: 3
- FRSC 513 - Forensic Photography Credits: 3
- FRSC 530 - Law and Forensic Science Credits: 3

▲ **Forensic Science Concentration (FRSC)**

**Required Courses (12 credits)**

- FRSC 520 - Toxicology Credits: 3
- FRSC 540 - Forensic Chemistry Credits: 3
- FRSC 560 - Forensic DNA Sciences Credits: 3
- FRSC 690 - Forensics Capstone Course Credits: 3

▲ **General Forensics Concentration (FRSG)**

**Required Courses (12 credits)**

- FRSC 530 - Law and Forensic Science Credits: 3
- FRSC 550 - Issues in Forensic Anthropology Credits: 3
- FRSC 570 - Introduction to Biochemical Forensics Credits: 3
- FRSC 690 - Forensics Capstone Course Credits: 3

**Total: 18 credits**

**Master of Science**

**Forensic Science, MS**

**Banner Code: SC-MS-FRSC**
The interdisciplinary MS program in forensic science is designed to train students in the technical and legal aspects of the field, and it is especially relevant for the many area professionals holding positions in government and private laboratories specializing in the analytical investigation of criminal and terrorist activities. Graduates will be qualified to work in high-technology forensics laboratories that analyze and interpret a wide variety of evidence and data in support of investigations and prosecutions. The demand for graduates with these skills is especially strong in the Northern Virginia region, where several new FBI and police forensics labs are being built or expanded.

Students enrolled in this professional MS program are charged at a differential (premium) tuition rate, and therefore they may not enroll concurrently in any other graduate degree program or certificate program offered by COS, with the exception of the graduate certificate program in forensics. However students enrolled in academic programs outside COS may enroll in this certificate program concurrently.

This program of study is offered by the Forensic Science Program in the College of Science.

**Admission Requirements**

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in the Admission section of this catalog. Applicants to the Forensic Science, MS program should hold a BA or BS degree in a related field from an accredited university with a minimum GPA of 3.00. Applicants should submit the a completed GMU graduate application, three letters of recommendation, two copies of official transcripts from each institution of higher learning attended, a current resume, a Virginia Domicile Classification form, and an official report of TOEFL (foreign nationals only).

**Degree Requirements**

The MS program in forensic science requires a total of 33 credit hours, comprising traditional 3-credit lecture courses (many with laboratory components), a seminar course, and a research project or thesis. The coursework is divided into forensics core courses and forensics electives. Students must complete 17 credits of core courses and 12 credits of forensic science electives, in addition to a 4 credit research project or thesis. An important element of the program is the “Forensics Capstone Course,” in which students combine their skills as members of multidisciplinary investigation teams in order to analyze “real world” crime scenes. This course will demonstrate in practice how students combine skills in the scientific/quantitative analysis and legal/anthropological areas to understand the nuances of the evidence presented at an actual crime scene. Waivers of specific course requirements will be considered for students who have taken equivalent courses elsewhere or have substantial practical experience in the subject areas covered by the particular course.

Students complete 33 credits as follows:

**Forensics Core Courses (17 credits)**

- FRSC 500 - Introduction to Forensic Science Credits: 3
- FRSC 510 - Basic Crime Analysis Credits: 3
- FRSC 530 - Law and Forensic Science Credits: 3
- FRSC 600 - Forensics Seminar Credits: 1 (taken 2 times)
- FRSC 690 - Forensics Capstone Course Credits: 3
- FRSC 540 - Forensic Chemistry Credits: 3
  or
- FRSC 570 - Introduction to Biochemical Forensics Credits: 3

**Forensics Electives (12 credits)**
12 credits selected from the following:

- FRSC 511 - Advanced Crime Scene Analysis Credits: 3
- FRSC 512 - Physical Evidence Analysis Credits: 3
- FRSC 513 - Forensic Photography Credits: 3
- FRSC 515 - Selected Topics in Forensic Science Credits: 3
- FRSC 520 - Toxicology Credits: 3
- FRSC 550 - Issues in Forensic Anthropology Credits: 3
- FRSC 560 - Forensic DNA Sciences Credits: 3
- FRSC 580 - Image Analysis in Forensic Science Credits: 3
- FRSC 790 - Internship in Forensic Science Credits: 1-3
- BIOL 510 - Forensic DNA Analysis Laboratory Credits: 1
- SOCI 607 - Criminology Credits: 3

Research Component (4 credits)

Students complete either a 4 credit research project or a 4 credit thesis.

- FRSC 610 - Forensics Research Project Credits: 1-4
- FRSC 799 - Master's Thesis Credits: 1-6

Total: 33 credits

Non-Degree

Forensic Science Minor

Banner Code: FRSC

The minor in forensic science addresses the growing national and regional interest in forensics by introducing students to the technical, psychological, and legal aspects of the field. The minor provides an attractive option for students with majors in the natural sciences, engineering, or computer science, and the curriculum structure makes it particularly suitable for students with majors in biology and chemistry. At least 8 credits must be applied only to this minor and may not be used to fulfill requirements of the student’s major, concentration, or another minor or undergraduate certificate. Students must complete at least 6 credits in their minor at Mason and achieve a minimum GPA of 2.00 in courses applied to the minor. For policies governing all minors, see the Academic Policies section of this catalog.

The minor in forensic science consists of 20 credits of course work.

This program of study is offered by the Forensic Science Program in the College of Science.

Course Work

Foundation science courses (8 credits)

Choose two courses or course/lab pairings from the following:

- CHEM 211 - General Chemistry Credits: 4
- CHEM 212 - General Chemistry Credits: 4
- BIOL 213 - Cell Structure and Function Credits: 4
- BIOL 305 - Biology of Microorganisms Credits: 3 and BIOL 306 laboratory (combined Credits: 4)
- PHYS 160 - University Physics I Credits: 3 and PHYS 161 laboratory (combined Credits: 4)
- PHYS 243 - College Physics Credits: 3 and PHYS 244 laboratory (combined Credits: 4)
- PHYS 245 - College Physics Credits: 3 and PHYS 246 laboratory (combined Credits: 4)
- PHYS 260 - University Physics II Credits: 3 and PHYS 261 laboratory (combined Credits: 4)

Forensic science courses (9 credits)

- FRSC 200 - Survey of Forensic Science Credits: 3
- FRSC 201 - Introduction to Criminalistics Credits: 3
- FRSC 302 - Forensic Bio-Trace Credits: 3

Supporting courses (3 credits)

Choose one course from the following:

- FRSC 303 - Forensic Evidence and Ethics Credits: 3
- FRSC 304 - Forensic Chemistry and Microscopy Credits: 3
- CRIM 400 - Applied Criminal Psychology Credits: 3
- PSYC 231 - Social Psychology Credits: 3

Total: 20 credits

### Geography and Geoinformation Science

Phone: 703-993-1210 or 703-993-1212  
Web: ggs.gmu.edu

**Faculty**

**Professors:** Agouris (Chair), Beach, Di, Falconer, Haack, Qu, Taylor, Waters, Wong  
**Associate professors:** Cervone, Curtin, Houser, Pfoser, Qu, Stefanidis, C. Yang, R. Yang  
**Assistant professors:** Croitoru, Leslie, Medina, Rice, Sun  
**Research or contract professors:** Hao, Kwiatkowski, Parnell, Sommers, Xu  
**Term instructors:** Boudinot, Halilden, Manca  
**Adjunct faculty:** Dillon, Grymes, Komwa, McGlone, Owen, Resmini, Self, Tryfona, Ward

**Course Work**

This department offers all courses designated GGS in the Courses section of this catalog.
Writing-Intensive Requirement

The university requires all students to complete at least one course designated as “writing intensive” in their majors at the 300 level or above. Students majoring in geography fulfill this requirement by successfully completing GGS 415. Students majoring in global and environmental change fulfill this requirement by successfully completing GGS 304.

Teacher Licensure

Students who wish to become teachers should consult the College of Education and Human Development section and attend an information session early in their undergraduate career. For more information, call 703-993-2892, e-mail gseadmit@gmu.edu, or go to gse.gmu.edu.

PhD Studies in Other Programs

The department participates in other programs that provide opportunities for geographical, environmental, and earth science research. A popular example is the Environmental Science and Public Policy, PhD Program where faculty members serve as both dissertation committee members and chairs. Geographic studies fit well with many issues related to public policy, planning, conservation, and sustainable development. Program description and degree regulations are listed under the Department of Environmental Science and Policy.

The department also participates in the Public Policy, PhD Program, along with some of the university’s leading geographers who are members of the School of Public Policy. In addition, geography and geoinformation science faculty members provide joint supervision and serve as committee members to support those pursuing research primarily geographic in nature. Program description and degree regulations can be found under the School of Public Policy listing. Several departments participate in supervisory committees providing a rich opportunity for students to expand their interdisciplinary interests with these departments.

Bachelor of Arts

Geography, BA

Banner Code: SC-BA-GEOG

Students must fulfill all requirements for bachelor’s degrees, including university general education requirements. Students majoring in geography must complete additional college requirements for the BA degree in COS. Candidates for a degree in geography must also complete 37-38 credits of approved GGS geography courses with a minimum GPA of 2.00 in addition to 18 credits of electives.

This program of study is offered by the Department of Geography and Geoinformation Science in the College of Science.

Degree Requirements

Core courses (22-23 credits)

Select one of the following three courses:

- GGS 102 - Physical Geography Credits: 3
- GGS 121 - Dynamic Atmosphere and Hydrosphere Credits: 4
- GGS 122 - Dynamic Geosphere and Ecosphere Credits: 4
Take all of the following:

- GGS 103 - Human Geography Credits: 3
- GGS 110 - Maps and Mapping Credits: 3
- GGS 300 - Quantitative Methods for Geographical Analysis Credits: 3
- GGS 310 - Introduction to Digital Cartography Credits: 4
- GGS 311 - Introduction to Geographic Information Systems Credits: 3
- GGS 415 - Seminar in Geography Credits: 3

Systematic and Regional Geography (6 credits)

Students must take one regional course and one systematic course from the list below.

**Systematic Courses** (one course must be taken from the following)

- GGS 301 - Political Geography Credits: 3
- GGS 302 - Global Environmental Hazards Credits: 3
- GGS 303 - Conservation of Resources and Environment Credits: 3
- GGS 304 - Populations Dimensions of Global Change Credits: 3
- GGS 305 - Economic Geography Credits: 3
- GGS 306 - Urban Geography Credits: 3
- GGS 307 - Sustainable Development Credits: 3
- GGS 309 - Meteorology and Climate Credits: 3
- GGS 312 - Physical Climatology Credits: 3
- GGS 314 - Severe and Extreme Weather Credits: 3
- GGS 319 - Air Pollution Credits: 3
- GGS 321 - Biogeography: Space, Time and Life Credits: 3
- GGS 322 - Issues in Global Change Credits: 3
- GGS 357 - Structures in Urban Governance and Planning Credits: 3
- GGS 455 - Environmental Impact Assessment Credits: 3
- GGS 456 - Introduction to Atmospheric Radiation Credits: 3

**Regional Courses** (one course must be taken from the following)

- GGS 315 - Geography of the United States Credits: 3
- GGS 316 - Geography of Latin America Credits: 3
- GGS 320 - Geography of Europe Credits: 3
- GGS 325 - Geography of North Africa and the Middle East Credits: 3
- GGS 330 - Geography of the Soviet Succession States Credits: 3
- GGS 333 - Issues in Regional Geography Credits: 3
- GGS 380 - Geography of Virginia Credits: 3

GGS Electives (three courses)

Two of the three courses selected must be upper-level GGS courses.

Additional Program (at least 18 credits)

- Students take 18 or more credits consisting of an approved double major, disciplinary minor, interdisciplinary minor, or certificate, or any other coherent 18-credit (minimum) package of courses approved by the advisor and the department chair. No more than 7 credits may be used to meet the 37-39 credit requirement for this major. Some of these courses may fulfill university-wide general education or college-level requirements.
Bachelor of Science

Geography, BS

Banner Code: SC-BS-GEOG

This program of study is offered by the Department of Geography and Geoinformation Science in the College of Science.

Students must fulfill all requirements for bachelor’s degrees including university general education requirements.

Degree Requirements

46 credits in geography

Candidates for a BS degree in geography must complete the following 46 credits of geography with a minimum GPA of 2.00 for this course work.

16 credits of core courses

- GGS 102 - Physical Geography Credits: 3
- GGS 103 - Human Geography Credits: 3
- GGS 300 - Quantitative Methods for Geographical Analysis Credits: 3
- GGS 310 - Introduction to Digital Cartography Credits: 4
- GGS 415 - Seminar in Geography Credits: 3

12 credits of systematic and regional courses, chosen from:

Choose four courses from the following, including at least one systematic geography and one regional geography course. Some of the regional courses fulfill the college-level, non-Western culture requirement:

**Systematic Courses** (one course from the following must be taken)
- GGS 301 - Political Geography Credits: 3
- GGS 302 - Global Environmental Hazards Credits: 3
- GGS 303 - Conservation of Resources and Environment Credits: 3
- GGS 304 - Populations Dimensions of Global Change Credits: 3
- GGS 305 - Economic Geography Credits: 3
- GGS 306 - Urban Geography Credits: 3
- GGS 307 - Sustainable Development Credits: 3
- GGS 309 - Meteorology and Climate Credits: 3
- GGS 312 - Physical Climatology Credits: 3
- GGS 314 - Severe and Extreme Weather Credits: 3
- GGS 319 - Air Pollution Credits: 3
- GGS 321 - Biogeography: Space, Time and Life Credits: 3
- GGS 322 - Issues in Global Change Credits: 3
- GGS 357 - Structures in Urban Governance and Planning Credits: 3
- GGS 455 - Environmental Impact Assessment Credits: 3
• GGS 456 - Introduction to Atmospheric Radiation Credits: 3

Regional Courses (one course from the following must be taken)
• GGS 315 - Geography of the United States Credits: 3
• GGS 316 - Geography of Latin America Credits: 3
• GGS 320 - Geography of Europe Credits: 3
• GGS 325 - Geography of North Africa and the Middle East Credits: 3
• GGS 330 - Geography of the Soviet Succession States Credits: 3
• GGS 333 - Issues in Regional Geography Credits: 3
• GGS 380 - Geography of Virginia Credits: 3

12 credits of applications courses

• GGS 311 - Introduction to Geographic Information Systems Credits: 3
• GGS 411 - Advanced Digital Cartography Credits: 3
• GGS 412 - Air Photography Interpretation Credits: 3
  and one of the following two courses:
• GGS 416 - Satellite Image Analysis Credits: 3
  or
• GGS 463 - Applied Geographic Information Systems Credits: 3

6 credits of electives

• Six additional credits of geography electives, which may also include an internship (GGS 480) approved by the program advisor before enrollment

25 or 26 credits of required science, mathematics, statistics, and computer science courses

• MATH 113 - Analytic Geometry and Calculus I Credits: 4
• MATH 114 - Analytic Geometry and Calculus II Credits: 4
• STAT 250 - Introductory Statistics I Credits: 3
  and one of the following:
• IT 103 - Introduction to Computing Credits: 3
  or
• CDS 130 - Computing for Scientists Credits: 3
  plus either a GEOL sequence:
• GEOL 101 - Introductory Geology I Credits: 4
• GEOL 102 - Introductory Geology II Credits: 4
• GEOL 317 - Geomorphology Credits: 4
  or a BIOL sequence:
• BIOL 103 - Introductory Biology I Credits: 4
• BIOL 104 - Introductory Biology II Credits: 4
• BIOL 377 - Applied Ecology Credits: 3

Global and Environmental Change, BS

Banner Code: SC-BS-GLEC
This interdisciplinary undergraduate program, one of the first of its kind in the nation, distinguishes itself from other degrees in the natural sciences in that it examines from local, regional, and global scales the dynamics of Earth’s systems and their interactions: the geosphere, the atmosphere, the ecosphere, and the sociosphere. In addition, it emphasizes the dynamic and changing Earth systems and the use of Earth observing and remote sensing and related geoinformation technologies in detecting changes. It is jointly offered with the Department of Environmental Science and Policy (esp.gmu.edu).

In meeting the requirements for this major, students choose a focus in environmental change (i.e. impacts of sea level rise on the Chesapeake Bay) or global change (i.e. global causes of sea level and detection).

Students must fulfill all requirements for bachelor’s degrees including university general education requirements. Through the course work listed below, global and environmental change majors satisfy university-wide general education requirements in natural science, quantitative reasoning, information technology, global understanding, social science, and synthesis.

This program of study is offered by the Department of Geography and Geoinformation Science in the College of Science.

Degree Requirements

Two required ecosphere core courses (8 credits)

Students take either the GGS sequence
- GGS 121 - Dynamic Atmosphere and Hydrosphere Credits: 4
- GGS 122 - Dynamic Geosphere and Ecosphere Credits: 4

or the EVPP sequence
- EVPP 110 - The Ecosphere: An Introduction to Environmental Science I Credits: 4
- EVPP 111 - The Ecosphere: An Introduction to Environmental Science II Credits: 4

Four required core courses in global and environmental change (12-13 credits)

- GGS 304 - Populations Dimensions of Global Change Credits: 3
- GGS 353 - Observations of the Earth and its Climate Credits: 3
- GGS 302 - Global Environmental Hazards Credits: 3 or GGS 305 - Economic Geography Credits: 3
- GGS 300 - Quantitative Methods for Geographical Analysis Credits: 3 or BIOL 312 - Biostatistics Credits: 4

Four required courses in geosphere and atmosphere (13-15 credits)

Students take either
- GEOL 101 - Introductory Geology I Credits: 4

or the sequence
- PHYS 243 - College Physics Credits: 3 and PHYS 244 - College Physics Lab Credits: 1

plus 3 courses from:
- GGS 309 - Meteorology and Climate Credits: 3
- GGS 312 - Physical Climatology Credits: 3
- GGS 314 - Severe and Extreme Weather Credits: 3
- GGS 319 - Air Pollution Credits: 3
- GGS 399 - Selected Topics in Geography Credits: 3
- GEOL 306 - Soil Science Credits: 3
• GEOL 309 - Introduction to Oceanography Credits: 3
• GEOL 317 - Geomorphology Credits: 4
• EVPP 490 - Special Topics in Environmental Science and Policy Credits: 0-4

Four required courses in ecosphere and sociosphere (12-13 credits)

• EVPP 377 - Applied Ecology Credits: 3 or GGS 321 - Biogeography: Space, Time and Life Credits: 3
• GGS 101 - Major World Regions Credits: 3 or GLOA 101 - Introduction to Global Affairs Credits: 3 or CEIE 100 - Environmental Engineering around the World Credits: 3
• GGS 103 - Human Geography Credits: 3 or ANTH 135 - Becoming Human: Evolution, Cognition, and Culture Credits: 3
  and one course from the following:
• BIOL 318 - Conservation Biology Credits: 3
• BIOL 345 - Plant Ecology Credits: 4
• BIOL 449 - Marine Ecology Credits: 3
• GGS 303 - Conservation of Resources and Environment Credits: 3
• GGS 307 - Sustainable Development Credits: 3
• GGS 322 - Issues in Global Change Credits: 3
• EVPP 336 - Human Dimensions of the Environment Credits: 3
• EVPP 337 - Environmental Policy Making in Developing Countries Credits: 3
• EVPP 350 - Freshwater Ecosystems Credits: 4

Two required courses in applications and techniques of detecting global change (6 credits)

Choose two from:
• GGS 311 - Introduction to Geographic Information Systems Credits: 3
• GGS 354 - Data Analysis and Global Change Detection Techniques Credits: 3
• GGS 410 - Introduction to Hyperspectral Imaging Credits: 3
• GGS 455 - Environmental Impact Assessment Credits: 3
• GGS 495 - Senior Research in Global and Environmental Change Credits: 3
• GGS 412 - Air Photography Interpretation Credits: 3
• GGS 416 - Satellite Image Analysis Credits: 3
• GGS 463 - Applied Geographic Information Systems Credits: 3
• GEOL 303 - Field Mapping Techniques Credits: 3

One supporting science sequence beyond general education requirements (8 credits)

Choose one of these 8-credit sequences:
• BIOL 103 - Introductory Biology I Credits: 4 and BIOL 104 - Introductory Biology II Credits: 4
• CHEM 211 - General Chemistry Credits: 4 and CHEM 212 - General Chemistry Credits: 4
• GEOL 101 - Introductory Geology I Credits: 4 and GEOL 102 - Introductory Geology II Credits: 4
  or
• ASTR 111 - Introductory Astronomy: The Solar System Credits: 3 plus ASTR 112 Lab (combined: 4 credits) and
• ASTR 113 - Introductory Astronomy: Stars, Galaxies, and the Universe Credits: 3 plus ASTR 114 Lab (combined: 4 credits)
or

- PHYS 243 - College Physics Credits: 3 plus PHYS 244 Lab (combined: 4 credits) and
- PHYS 245 - College Physics Credits: 3 plus PHYS 246 Lab (combined: 4 credits)

Four required supporting mathematics and IT courses (14 credits)

- MATH 113 - Analytic Geometry and Calculus I Credits: 4
- MATH 114 - Analytic Geometry and Calculus II Credits: 4
- STAT 250 - Introductory Statistics I Credits: 3
- IT 103 - Introduction to Computing Credits: 3

General electives

- Students choose 27-31 additional credits in consultation with their advisor

Doctor of Philosophy

Earth Systems and Geoinformation Sciences, PhD

Banner Code: SC-PHD-ESGS

The PhD in Earth Systems and Geoinformation Sciences program (ESGS) is based on the integration of the scientific disciplines in geosystems, geosciences, and geoinformatics. Students receive broad-based training in the geosciences and geography, as well as concentrated courses in computation and geoinformation sciences. The ESGS doctoral program represents a gateway to an academic career for some students; for others, it facilitates career advancement in the public sector or private industry. Graduates are equipped to participate in interdisciplinary research, which is the norm in today’s research arena.

This program of study is offered by the Department of Geography and Geoinformation Science in the College of Science.

Admission Requirements

This program is intended for graduates who hold a BS or BA degree in atmospheric science, climatology, meteorology, Earth science, geology, environmental science, remote sensing and Earth observing, hydrology, oceanography, geography, or a related field. Knowledge of mathematics through ordinary differential equations is preferred. Interested applicants should contact the academic coordinator or the GGS chair for more specific advice.

To apply, prospective students should complete a Mason graduate application on-line at http://admissions.gmu.edu/grad/. Official transcripts from each college and graduate institution attended, a current resume, and an expanded goals statement will be required.

Applicants will also need three letters of recommendation and an official report of scores obtained on the GRE-GEN. The GRE requirement for admission to the doctoral program may be waived if the student holds a master’s degree from an accredited U.S. institution. TOEFL scores are required of all international applicants. GRE-GEN scores are required of students wishing to be considered for a GMU Presidential Fellowship. A minimum combined math and verbal GRE score of 1200/1600 (old test) and 270/340 (new test) are needed to qualify for the Presidential Fellowship.

Reduction of Credit
For students entering the doctoral program with a master's degree in a related field from a regionally accredited institution, the number of required credits may be reduced up to 30 credits, subject to approval of the program faculty and the associate dean for student and academic affairs. See the College of Science graduate policies section for more information.

Degree Requirements

Students must satisfy all requirements for doctoral degrees expressed in the Academic Policies section of this catalog.

The curriculum consists of 72 credits: 48 credits of course work and 24 credits of dissertation research. The 48-credit requirement may be reduced by up to 30 credits for a qualified student holding a previous master’s degree. Up to 24 credits of previous, relevant graduate course work may be transferred into the program as long as those credits have not been applied toward a previous degree. All students are required to take 18 credits of courses selected from a set of three core areas: computational-quantitative, geosciences-geography, and geoinformation. Students also take 6 credits of courses in one of the four areas of emphasis listed below:

- Geosciences (GSC)
- Geography (GEOG)
- Remote Sensing and Earth Observation (RS)
- Geographic Information Systems (GIS)

Students also have the option of taking courses from two or more emphasis areas, subject to the program director’s approval. Additional requirements include a single credit of colloquium taken three times, and electives relevant to the student’s focus.

Doctoral Course Work (48 credits)

Core Courses (24 credits)

All students are required to take 24 credits of courses selected from a set of six core areas. Of the cores, students must complete at least one course in five of the cores and two courses in at least three of those five.

Quantitative Core

- GGS 560 - Quantitative Methods Credits: 3
- GGS 754 - Earth Science Data and Advanced Data Analysis Credits: 3
- GGS 791 - Advanced Spatial Statistics Credits: 3

Geoinformatics Core

- GGS 650 - Introduction to GIS Algorithms and Programming Credits: 3
- GGS 664 - Spatial Data Structures Credits: 3
- GGS 675 - Location Science Credits: 3
- GGS 787 - Scientific Data Mining for Geoinformatics Credits: 3

Geosciences and Physical Geography Core

- GGS 656 OR EVPP 652 - The Hydrosphere Credits: 3
- GGS 657 OR GEOL 601 - The Lithosphere Credits: 3
- GGS 670 - Introduction to Atmosphere and Weather Credits: 3
- GGS 721 - Biogeography Credits: 3
- PHYS 575 - Atmospheric Physics I Credits: 3

Human Geography Core

- GGS 505 - Transportation Geography Credits: 3
- GGS 525 - Economics of Human/Environment Interactions Credits: 3
- GGS 533 - Issues in Regional Geography Credits: 1-6
- GGS 540 - Medical Geography Credits: 3
- GGS 605 - Socioeconomic Applications of GIS Credits: 3
- GGS 704 - Spatial Analysis and Modeling of Population Credits: 3

Geographic Information Science Core

- GGS 553 - Geographic Information System Credits: 3
- GGS 563 - Advanced Geographic Information Systems Credits: 3
- GGS 671 - Algorithms and Modeling in GIS Credits: 3

Remote Sensing Core

- GGS 579 - Remote Sensing Credits: 3
- GGS 680 - Earth Image Processing Credits: 3
- GGS 756 - Physical Principles of Remote Sensing Credits: 3
- GGS 760 - Advanced Topics in Remote Sensing Credits: 3
- GGS 777 - Remote Sensing Natural Hazards Credits: 3

Research Synthesis (2-3 credits)

- GGS 684 - Selected Topics in Geospatial Intelligence Credits: 3
- GGS 689 - Seminar in Geographic Thought and Methodology Credits: 3
- GGS 792 - Seminar in Earth Systems Science Credits: 2
- GGS 795 - Seminar in Regional Analysis Credits: 3

Colloquium (2 credits)

- GGS 900 - Colloquium Earth Systems Sciences Credits: 1 (taken twice)

Electives (19-32 credits)

- Credits necessary to reach 72 total credits. At least half of the elective credits taken must be from GGS courses in consultation with graduate program director.

Dissertation Research (24 credits)

Students take 24 credits, with at least 12 credits in GGS 999.

- GGS 998 - Dissertation Proposal Credits: 1-12
Dissertation Committee

All students will be assigned a temporary academic advisor when they first enroll in the program. No later than the end of the second year, each student should identify a dissertation advisor and form a doctoral committee.

Candidacy Examination

After completing all required courses, each student must take a candidacy exam administered by the dissertation committee. The exam will have written and oral components. Its purpose is to determine whether the student has acquired adequate general knowledge in the selected subject area, as well as much more detailed knowledge of the specific research topic planned for the dissertation.

Dissertation Proposal and Advancement to Candidacy

After students have completed all required courses and passed the candidacy exam, they should prepare an acceptable dissertation proposal. After the dissertation proposal is approved, the student is formally advanced to doctoral candidacy.

Doctoral Dissertation

The degree will be awarded on completion of the required course work and approval of a PhD thesis that makes an original and significant contribution to the field.

Total: 72 credits

Graduate Certificate

Geographic Information Sciences Graduate Certificate

Banner Code: SC-CERG-GISC

This graduate certificate prepares students for employment in federal, state, and local government positions that require GIS skills. The certificate has been found suitable for the needs of business and industry, including those corporations that serve as contractors to governments in the United States and overseas.

The graduate certificate in Geographic Information Sciences may be pursued on a part-time or full-time basis.

This program of study is offered by the Department of Geography and Geoinformation Science in the College of Science.

Admission Requirements

To apply, prospective students should complete a Mason graduate application on-line at admissions.gmu.edu. Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for study as specified in the Graduate Admission Policies section of this catalog. In addition, applicants to this certificate program must submit a current résumé. GRE scores and letters of recommendation are not required but will strengthen an application. If available, TOEFL scores are required of all international applicants.
All applicants should have a working knowledge of, or prior education or training in, computer technology. Knowledge of GIS, remote sensing technology, and cartography are preferred. Students from any discipline are welcome to apply.

This professional certificate program charges students at a differential (premium) tuition rate. This rate applies to all students who enroll in this certificate program, regardless of in-state or out-of-state status. The differential tuition will be used to fund continuing improvements in the departmental computational facilities used to support the certificate program.

Certificate Requirements

Students must successfully complete 15 graduate credits, distributed as follows:

6 credits of required core courses

One course from this group:
- GGS 553 - Geographic Information System Credits: 3
- CEIE 510 - Geographic Information Systems in Engineering Credits: 3

and one course from this group:
- GGS 563 - Advanced Geographic Information Systems Credits: 3
- GGS 671 - Algorithms and Modeling in GIS Credits: 3

9 credits of electives chosen from:

- GGS 505 - Transportation Geography Credits: 3
- GGS 531 - Land-Use Modeling Techniques and Applications Credits: 3
- GGS 551 - Thematic Cartography Credits: 3
- GGS 560 - Quantitative Methods Credits: 3
- GGS 579 - Remote Sensing Credits: 3
- GGS 605 - Socioeconomic Applications of GIS Credits: 3
- GGS 631 - Spatial Agent-Based Models of Human-Environment Interactions Credits: 3
- GGS 650 - Introduction to GIS Algorithms and Programming Credits: 3
- GGS 653 - Geographic Information Analysis Credits: 3
- GGS 655 - Map Design Credits: 3
- GGS 658 - Terrain Mapping Credits: 3
- GGS 660 - Automated Cartography Credits: 3
- GGS 661 - Map Projections and Coordinate Systems Credits: 3
- GGS 664 - Spatial Data Structures Credits: 3
- GGS 681 - Environmental Applications of Integrated Geographic Information Technologies Credits: 3
- GGS 690 - Advanced Practicum in Geographical Applications Credits: 1-6
- GGS 772 - Distributed Geographic Information Systems Credits: 3
- GGS 773 - Interoperability of Geographic Information Systems Credits: 3
- GGS 787 - Scientific Data Mining for Geoinformatics Credits: 3
- CEIE 685 - Civil Engineering Information Management Credits: 3
- INFS 614 - Database Management Credits: 3
- INFS 755 - Data Mining Credits: 3

Note
Other courses may be used as electives with prior written approval of the department.

Total: 15 credits

Geospatial Intelligence Graduate Certificate

Banner Code: SC-CERG-GI

This graduate certificate program is for persons employed in geospatial intelligence applications (i.e., federal agency and/or corporate or association personnel) or those interested in entering this field. Our program offers fundamental knowledge on geospatial intelligence and the ability to apply this knowledge to a diverse range of constantly evolving geospatial intelligence situations.

The graduate certificate in geospatial intelligence may be pursued on a part-time or full-time basis, and qualifies for Title IV Federal Financial Aid. For more information about program graduation rates, the median debt of students who completed the program, and other important information, please visit the disclosure information page at: http://irr.gmu.edu/new/N_IIRRHome/HEOA/Gainful.cfm

This program of study is offered by the Department of Geography and Geoinformation Science in the College of Science.

Admission Requirements

Applicants to this graduate certificate program should hold a BA or BS degree in a discipline related to the certificate’s theme from an accredited university with a minimum GPA of 3.00. To apply, prospective students should complete a Mason graduate application on-line at admissions.gmu.edu. Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for study as specified in the Graduate Admission Policies section of this catalog. In addition, applicants to this certificate program must submit a current résumé. GRE scores and letters of recommendation are not required but will considerably strengthen an application, if available. TOEFL scores are required of all international applicants. Applicants should have undergraduate backgrounds that include courses in differential and integral calculus, and they should possess working knowledge of a computer programming language. Depending on the background of the individual student, the coordinator may recommend remedial or preparatory courses tailored to the student’s needs. Students may not pursue this certificate concurrent with any other graduate degree program or certificate program offered by COS because this certificate will charge students at a differential (premium) tuition rate. However, students enrolled in academic programs outside COS may enroll in this certificate program concurrently. Students may transfer no more than 3 credits into the certificate program with the approval of the academic director.

Certificate Requirements

The Geospatial Intelligence (GI) certificate requires a total of 18 credits, or 6 courses. These comprise five mandatory core courses and one elective. The mandatory core courses reflect the three key science emphases areas of this program, namely geospatial image analysis, spatial analysis, and information technology, as reflected in the following list of mandatory core courses:

- GGS 553 - Geographic Information System Credits: 3
- GGS 680 - Earth Image Processing Credits: 3
- GGS 684 - Selected Topics in Geospatial Intelligence Credits: 3
- GGS 685 - Capstone Course in Geoinformatics Credits: 3
- INFS 519 - Program Design and Data Structures Credits: 3
- one 3-credit elective selected in consultation with advisor
Remote Sensing and Earth Image Processing Graduate Certificate

Banner Code: SC-CERG-RSIP

The certificate program focuses on the skills needed to take advantage of the enormous increase in the availability and use of remotely sensed data related to the Earth. The program requires students to complete 15 credits of GGS graduate courses. Ideal candidates for this certificate are those who have a background in Earth and environmental sciences and are working in or planning to enter into the field of remote sensing, Earth observing, or image processing.

The graduate certificate in remote sensing and earth image processing may be pursued on a part-time or full-time basis.

This program of study is offered by the Department of Geography and Geoinformation Science in the College of Science.

Admission Requirements

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for study as specified in the Graduate Admission Policies section of this catalog. In addition, applicants to this certificate program must submit a current résumé. TOEFL scores are required of all international applicants who do not hold at least a bachelor's degree from a regionally accredited institution within the US (some exceptions apply). To apply, prospective students should complete a Mason graduate application on-line at admissions.gmu.edu.

Applicants should hold a BA or BS degree in a discipline related to the science and applications of remote sensing from an accredited university, with a minimum GPA of 3.00. Applicants should have some prior education or training in remote sensing or image processing. Students with a background in one of the physical sciences (physics, chemistry, atmospheric science, hydrology, or geology), geography, or environmental science will be particularly well-suited to undertake this program. Applicants should have an undergraduate background that includes courses in differential and integral calculus, and they should possess working knowledge of a computer programming language.

This professional certificate program charges students at a differential (premium) tuition rate. This rate applies to all students who enroll in this certificate program, regardless of in-state or out-of-state status. The differential tuition will be used to fund continuing improvements in the departmental computational facilities used to support the certificate program.

Certificate Requirements

Required Core Courses (9 credits)

- GGS 579 - Remote Sensing Credits: 3
- GGS 680 - Earth Image Processing Credits: 3
- GGS 740 - Hyperspectral Imaging Systems Credits: 3

Elective Courses (6 credits)

Choose two courses from the following:

- GGS 562 - Photogrammetry Credits: 3
- GGS 754 - Earth Science Data and Advanced Data Analysis Credits: 3
- GGS 756 - Physical Principles of Remote Sensing Credits: 3
Master of Science

Earth Systems Science, MS

Banner Code:  SC-MS-ESSC

This interdisciplinary master’s program is offered jointly by the Department of Geography and Geoinformation Science and the Department of Environmental Science and Policy. The program addresses the growing demand for trained professionals in Earth systems science and applications. The degree emphasizes a research-oriented, global systems approach to studying the atmosphere, hydrosphere, and lithosphere, including their interrelationships and interactions with the biosphere. Emphasis is on the observation and quantitative analysis of Earth systems. Students completing the program are qualified to pursue careers that require knowledge of the basics of Earth systems science and the requisite tools. Students are encouraged to undertake an optional master’s thesis for more in-depth studies or a research project. In the latter case, students must pass a comprehensive exam.

This program of study is offered by the Department of Geography and Geoinformation Science in the College of Science.

Admission Requirements

Applicants to all graduate programs at George Mason University must meet the admissions standards and application requirements for graduate study as specified in the Admission section of this catalog. Applicants to the Earth Systems Science, MS should have a BS degree in Earth, environmental, or physical science. Previous course work should include two semesters each of calculus, chemistry, and physics, and one semester of statistics. They should have a minimum GPA of 3.00 in their undergraduate degree.

To apply, prospective students should forward a completed Mason graduate application online at http://admissions.gmu.edu/grad/. Official transcripts from each college and graduate institution attended, a current résumé, and a goals statement will be required. Applicants will also need three letters of recommendation and an official report of scores obtained on the GRE-GEN. The GRE requirement for admission may be waived if the student holds a master’s degree from an accredited U.S. institution. TOEFL scores are required of all foreign applicants.

Degree Requirements

Candidates must successfully complete 30 credits as follows:

Earth science core (9 credits)

- CSI 655 or PHYS 575 - Atmospheric Physics I Credits: 3
- GGS 656 or EVPP 652 - The Hydrosphere Credits: 3
- GGS 657 or GEOL 601 - The Lithosphere Credits: 3

One Earth observation course (3 credits)

- GGS 760 - Advanced Topics in Remote Sensing Credits: 3
- GGS 840 - Hyperspectral Imaging Applications Credits: 3

Total: 15 credits
• GGS 579 - Remote Sensing Credits: 3

Quantitative techniques course (3 credits)

Select one course from the following:

• CSI 654 - Data and Data Systems in the Physical Sciences Credits: 3
• GGS 754 - Earth Science Data and Advanced Data Analysis Credits: 3
• GGS 560 - Quantitative Methods Credits: 3

Human and biological perspectives course (3 credits)

Select one course from the following:

• GGS 575 - Reconstructing Past Environments: Seminar in Geoarchaeology Credits: 3
• GGS 704 - Spatial Analysis and Modeling of Population Credits: 3
• GGS 721 - Biogeography Credits: 3
• EVPP 577 - Biogeochemistry: A Global Perspective Credits: 3
• EVPP 636 - Gender, Race, and the Natural World Credits: 3

Colloquium/Seminar (3 credits)

• GGS 792 - Seminar in Earth Systems Science Credits: 2
• GGS 900 - Colloquium Earth Systems Sciences Credits: 1

Research (3-6 credits)

• GGS 798 - Research Project in Earth Systems Science Credits: 1-6
  or
• GGS 799 - Thesis Credits: 1-6

General elective (3-6 credits)

Elective courses may be chosen in consultation with advisor.

Total: 30 credits

Geographic and Cartographic Sciences, MS

Banner Code: SC-MS-GECA

The focus of this program is to prepare students for careers in geography, remote sensing, and GIS and its increasing applications in diverse fields, as well as cartography, visualization, and modeling. This expertise is useful to civil and defense federal agencies, state and local government agencies, private corporations, and educational institutions. Courses concentrate on the techniques of compilation, display and analysis of spatial data, and their applications. Students are also encouraged to select internships as part of their program.
This program of study is offered by the Department of Geography and Geoinformation Science in the College of Science.

**Research Facilities**

The department’s facilities house PC and Mac workstations with multiple input and output devices to support ArcGIS, ArcMap, ArcView, IDRISI, ERDAS, and other cartography, GIS, and image-processing software packages. In addition, the department houses an extensive collection of spatial data in different formats. Enriching the program is a network of alumni, students, guest lecturers, and adjunct faculty who work in geography-related organizations in the greater Washington, D.C., area. Specialized instructional space for geographic information science is housed in Innovation Hall on the Fairfax Campus. The department also is home to the Center of Excellence in GIS.

**Admission Requirements**

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in the Graduate Admission Policies section of this catalog. Applicants should have a bachelor’s degree in geography, cartography, or equivalent. Those without an undergraduate degree in geography may be required to take one course in each of the following: physical geography, human geography, and cartography. All applicants must have a course in statistics. Credit from courses taken at other departments and other universities may be applied to the program with prior approval.

To apply, prospective students should complete a Mason graduate application on-line at http://admissions.gmu.edu/grad/. Official transcripts from each college and graduate institution attended, a current resume and a goals statement will be required.

Applicants will also need three letters of recommendation and an official report of scores obtained on the GRE-GEN. The GRE requirement may be waived if the student holds a master's degree from an accredited US institution. TOEFL scores are required of all international applicants.

**Degree Requirements**

Students must complete either 36 graduate credits (without a thesis) or 30 graduate credits (including 3–6 credits of thesis). If the nonthesis option is selected, students are required to pass a comprehensive exam.

**Core Courses (12 credits)**

- GGS 553 - Geographic Information System Credits: 3
- GGS 579 - Remote Sensing Credits: 3
- GGS 560 - Quantitative Methods Credits: 3
- GGS 689 - Seminar in Geographic Thought and Methodology Credits: 3

**Thesis Option (18 credits)**

Students selecting the thesis option must complete 3–6 credits of thesis and 12–15 credits of electives

- 3–6 credits of GGS 799 - Thesis Credits: 1-6
- 12–15 credits of electives from 500-799 GGS courses

**Nonthesis Option (24 credits)**

Students selecting the nonthesis option must pass a comprehensive exam and complete 24 credits of electives
Comprehensive exam
24 credits of electives from 500-799 GGS courses

Note:
Electives should be selected in consultation with an advisor. With departmental approval, up to 9 credits from closely related disciplines may be applied to the degree.

Total: 30 or 36 credits

Geoinformatics and Geospatial Intelligence, MS

Banner Code: SC-MS-GEOI

The MS program in geoinformatics and geospatial intelligence addresses the emerging demand for scientists trained in the collection, organization, analysis, and dissemination of information about physical features, man-made structures, moving objects, people, and events that are geo-referenced or geo-located. This program focuses primarily on the computational approaches that support the synthesis and analysis of diverse types of data, in order to identify and monitor complex events and phenomena that manifest themselves over space and time. While geospatial intelligence has a strong Department of Defense connotation, the principles behind it have a significant dual use potential, addressing the needs of a broader audience, ranging for example from intelligent navigation in urban spaces to emergency response systems for natural and man-made disasters.

This program of study is offered by the Department of Geography and Geoinformation Science in the College of Science. The MS program in geoinformatics and geospatial intelligence is designed to expose students to fundamental theoretical principles and practical applications involving:

- Geographic Information Science
- Digital image analysis as it applies to geoinformatics and geospatial intelligence
- Computational principles for geoinformatics and intelligence

The curriculum structure of the program reflects these three educational components. The GEOI MS degree requires a minimum of 33 credits, including a 3-credit MS thesis.

Admission Requirements

In addition to meeting all admission requirements for graduate study at Mason as specified in the Admission section of this catalog, applicants to the MS program in geoinformatics and geospatial intelligence should hold a BA or BS degree in a discipline related to the program’s theme from an accredited university, with a minimum GPA of 3.00, including courses in differential and integral calculus. A working knowledge of a computer programming language is a plus. When the background of an individual student does not meet the program’s requirements, remedial or preparatory courses tailored to student’s needs may be recommended. To apply, prospective students should complete a Mason graduate application on-line at http://admissions.gmu.edu/grad/. Official transcripts from each college and graduate institution attended, a current resume, and a goals statement will be required.

Applicants will also need three letters of recommendation and an official report of scores obtained on the GRE-GEN. The GRE requirement for admission may be waived if the student holds a master's degree from an accredited US institution. TOEFL scores are required of all international applicants.

Degree Requirements
The GEOI MS degree requires 33 credit hours, comprising ten courses plus a 3-credit master's thesis. The courses include seven mandatory core courses and three electives to be selected from a list of offerings (and approved by the program coordinator).

**Core Courses (21 credits)**

- GGS 550 - Geospatial Science Fundamentals Credits: 3
- GGS 553 - Geographic Information System Credits: 3
- GGS 664 - Spatial Data Structures Credits: 3
- GGS 684 - Selected Topics in Geospatial Intelligence Credits: 3
- GGS 685 - Capstone Course in Geoinformatics Credits: 3
- GGS 680 - Earth Image Processing Credits: 3
- GGS 787 - Scientific Data Mining for Geoinformatics Credits: 3

**Thesis (3 credits)**

- GGS 799 - Thesis Credits: 1-6 (3 credits)

**Electives (9 credits)**

Students select three courses from the groups below, with no more than two from a single group (i.e. courses are taken from at least two groups).

**Image Analysis**

- GGS 579 - Remote Sensing Credits: 3
- GGS 740 - Hyperspectral Imaging Systems Credits: 3
- GGS 759 - Topics in Earth Systems Science Credits: 1-6
- GGS 760 - Advanced Topics in Remote Sensing Credits: 3

**Geographic Information Science (GIS)**

- GGS 631 - Spatial Agent-Based Models of Human-Environment Interactions Credits: 3
- GGS 653 - Geographic Information Analysis Credits: 3
- GGS 671 - Algorithms and Modeling in GIS Credits: 3
- GGS 772 - Distributed Geographic Information Systems Credits: 3
- GGS 791 - Advanced Spatial Statistics Credits: 3
- GGS 795 - Seminar in Regional Analysis Credits: 3

**Computational Geoinformatics**

- GGS 650 - Introduction to GIS Algorithms and Programming Credits: 3
- GGS 754 - Earth Science Data and Advanced Data Analysis Credits: 3
- GGS 671 - Algorithms and Modeling in GIS Credits: 3
- GGS 773 - Interoperability of Geographic Information Systems Credits: 3

**Total: 33 credits**
Non-Degree

Geographic Information Systems Minor

Banner Code: GIS

This program of study is offered by the Department of Geography and Geoinformation Science in the College of Science.

For policies governing all minors, see the Academic Policies section of this catalog.

Course Work

To receive this minor, students must complete 18 or 19 credits in geography. Of those, 8 credits must be unique to the minor, with a minimum GPA of 2.00:

Four required courses (12 credits)

- GGS 110 - Maps and Mapping Credits: 3
- GGS 300 - Quantitative Methods for Geographical Analysis Credits: 3
- GGS 311 - Introduction to Geographic Information Systems Credits: 3
- GGS 463 - Applied Geographic Information Systems Credits: 3

Two elective courses (6–7 credits) chosen from:

- GGS 308 - Field Mapping Techniques Credits: 3
- GGS 310 - Introduction to Digital Cartography Credits: 4
- GGS 353 - Observations of the Earth and its Climate Credits: 3
- GGS 354 - Data Analysis and Global Change Detection Techniques Credits: 3
- GGS 410 - Introduction to Hyperspectral Imaging Credits: 3
- GGS 411 - Advanced Digital Cartography Credits: 3
- GGS 412 - Air Photography Interpretation Credits: 3
- GGS 416 - Satellite Image Analysis Credits: 3
- GGS 480 - Internship in Geography Credits: 1 to 3
- CS 112 - Introduction to Computer Programming Credits: 4

Note:

With departmental permission, one course with significant geographic information systems (GIS) content may be substituted for one of the above.

Total: 18-19 credits

Geography Minor

Banner Code: GEOG
This program of study is offered by the Department of Geography and Geoinformation Science in the College of Science.

For policies governing all minors, see the Academic Policies section of this catalog.

Course Work

To receive the minor, students must complete 18 credits in geography, 8 credits of which must be unique to the minor, with a minimum GPA of 2.00, distributed as follows:

Two core courses (6-7 credits)

- Either GGS 102 - Physical Geography Credits: 3 or GGS 121 - Dynamic Atmosphere and Hydrosphere Credits: 4
- Either GGS 101 - Major World Regions Credits: 3 or GGS 103 - Human Geography Credits: 3

Systematic and Regional Requirement (6 credits)

Students choose two courses at the 300 and 400 level: one course in systematic geography and one course in regional geography chosen from the list below.

**Systematic Geography**

- GGS 301 - Political Geography Credits: 3
- GGS 302 - Global Environmental Hazards Credits: 3
- GGS 303 - Conservation of Resources and Environment Credits: 3
- GGS 304 - Populations Dimensions of Global Change Credits: 3
- GGS 305 - Economic Geography Credits: 3
- GGS 306 - Urban Geography Credits: 3
- GGS 307 - Sustainable Development Credits: 3
- GGS 309 - Meteorology and Climate Credits: 3
- GGS 312 - Physical Climatology Credits: 3
- GGS 314 - Severe and Extreme Weather Credits: 3
- GGS 319 - Air Pollution Credits: 3
- GGS 321 - Biogeography: Space, Time and Life Credits: 3
- GGS 322 - Issues in Global Change Credits: 3
- GGS 357 - Structures in Urban Governance and Planning Credits: 3
- GGS 398 - Selected Topics in Global Change Credits: 3
- GGS 399 - Selected Topics in Geography Credits: 3
- GGS 455 - Environmental Impact Assessment Credits: 3
- GGS 456 - Introduction to Atmospheric Radiation Credits: 3

**Regional Geography**

- GGS 315 - Geography of the United States Credits: 3
- GGS 316 - Geography of Latin America Credits: 3
- GGS 320 - Geography of Europe Credits: 3
- GGS 325 - Geography of North Africa and the Middle East Credits: 3
- GGS 330 - Geography of the Soviet Succession States Credits: 3
- GGS 333 - Issues in Regional Geography Credits: 3
- GGS 380 - Geography of Virginia Credits: 3
Upper Level Electives (6-7 credits)

Students must take two upper division GGS electives chosen in consultation with minor coordinator.

Total: 18-20 credits

Mathematical Sciences

Phone: 703-993-1460
Web: math.gmu.edu

Faculty

Professors: Alligood, Anderson, Colonna, Goldin (graduate coordinator), Kulesza (undergraduate coordinator), J. Lawrence, Levy, Morris, Polyak, Sachs, Sander, Saperstone (Acting Chair), Sauer (COS distinguished scholar), Seshaiyer, Shapiro (Associate Chair), Singman, Soltan, Walnut, Wanner

Associate professors: Agnarsson, Emelianenko, Griva, Lamba, Lim, Lin, Zoltek

Assistant professors: Antil, Epstein, Manon

Admin professional: O’Brien

Term assistant professors: Fall, Fernandez, Matthews, Nelson

Term instructors: Boyette, Bulancea, Crossin, Granfield, O’Beirne, Rantou, Sausville

Affiliates: Nash

Emeritus: Cabell

The department offers undergraduate and graduate degree programs in mathematics for students with various interests and career goals. Students may pursue the standard program, or a program focused on actuarial mathematics, applied mathematics, mathematics education or mathematical statistics. Students may complement other interests by taking a double major in mathematics and a related field, such as chemistry, economics, physics, computer science, or engineering.

Graduating seniors are required to have an exit interview.

Course Work

The Mathematical Sciences Department offers all course work designated MATH in the Courses section of this catalog.

Writing-Intensive Requirement

Mason policy requires all students to complete at least one course designated as “writing intensive” in their majors at the 300 level or above. Students majoring in mathematics fulfill this requirement by successfully completing MATH 290 - Introduction to Advanced Mathematics.

Math Tutoring Center
The department manages the Math Tutoring Center, which offers free tutoring for first- and second-year math courses (math.gmu.edu/tutorcenter.htm). Tutoring is given by advanced mathematics students and available on a drop-in basis with daytime and evening hours throughout the term.

Math Learning Center

The Math Learning Center (math.gmu.edu/mathlearningcenter.htm) for a small fee offers self-paced and classroom noncredit tutorial programs for students who do not place into the math course they need. Special tutors and tutorial software are available to those enrolled in the program. Successful completion of the relevant program enables students to enroll in MATH 105, 108, 110, 111, 112, or 125.

Honors Program in Mathematics

Mathematics majors who have maintained a GPA of at least 3.50 in Mathematics courses and a GPA of 3.50 in all courses taken at George Mason University may apply to the departmental honors program upon completion of two MATH courses at the 300+ level (excluding MATH 400), at least one of which has MATH 290 as a prerequisite. Admission to the program will be monitored by the undergraduate committee. To graduate with honors in mathematics, a student is required to maintain a minimum GPA of 3.50 in mathematics courses and successfully complete MATH 405 - Honors Thesis in Mathematics I and MATH 406 - Honors Thesis in Mathematics II with an average GPA of at least 3.50 in these two courses.

Teacher Licensure

Students who wish to become high school teachers should consider a concentration in education, available in either the BA or BS degree programs. Students with an interest in education may also consult the College of Education and Human Development section and attend an information session. For more information, call 703-993-2892, e-mail gseadmit@gmu.edu, or go to gse.gmu.edu.

Certificate in College Teaching

A student enrolled in the MS or PhD program in mathematics who is primarily interested in pursuing a career in undergraduate education at the college level is encouraged to consider enrolling in the Higher Education Program’s College Teaching Graduate Certificate, offered through the College of Humanities and Social Sciences (LA-CERG-CTCH). Credit can be earned for CTCH 685 - Practicum by working one semester as a graduate teaching assistant in the Mathematics Department.

Mathematics, Bachelor’s/Accelerated Master’s Degree

Qualified undergraduates may be admitted to an accelerated master’s program and obtain both a BS and an MS in Mathematics within an accelerated time frame. Students admitted to this program may take graduate courses after completing 90 undergraduate credits, and up to 6 credits of graduate work may be used in partial satisfaction of the requirements for the undergraduate degree. If students earn at least a 3.00 in these classes, they are granted advanced standing in the master’s program and must then complete an additional 24 credits to receive the master’s degree. All other master’s degree requirements must be met, including a minimum of 18 credits taken for the master’s after the bachelor’s degree is complete.

Bachelor of Arts

Mathematics, BA

Banner Code: SC-BA-MATH
Students may select an optional concentration in mathematics education; students who do not select this concentration study traditional mathematics. Students must fulfill all requirements for bachelor's degrees. In addition to satisfying university-wide general education requirements and requirements for the BA degree in COS, students must satisfy the requirements listed below.

This undergraduate program offers students the option of applying to the accelerated master's degree program in curriculum and instruction (SECM concentration). See listing for specific requirements.

This program of study is offered by the Department of Mathematical Sciences in the College of Science.

Degree Requirements

Core Courses (26 credits)

- MATH 113 - Analytic Geometry and Calculus I Credits: 4
- MATH 114 - Analytic Geometry and Calculus II Credits: 4
- MATH 125 - Discrete Mathematics I Credits: 3
- MATH 203 - Linear Algebra Credits: 3
- MATH 213 - Analytic Geometry and Calculus III Credits: 3
  or
- MATH 215 - Analytic Geometry and Calculus III (Honors) Credits: 3
- MATH 214 - Elementary Differential Equations Credits: 3
  or
- MATH 216 - Theory of Differential Equations Credits: 3
- MATH 290 - Introduction to Advanced Mathematics Credits: 3
- MATH 302 - Foundations of Geometry Credits: 3
- MATH 315 - Advanced Calculus I Credits: 3
- MATH 321 - Abstract Algebra Credits: 3

Electives for Traditional Mathematics (12 credits)

- 12 additional credits of electives in MATH numbered above 300 (excluding MATH 400)

Concentrations

Students may select an optional concentration in education.

▲ Concentration in Mathematics Education (MTHE)

Students selecting the mathematics education concentration take the following 33 credits of coursework in place of the 12 credits of MATH electives listed above.

- EDCI 372 - Teaching Mathematics in the Secondary School Credits: 3
- EDCI 472 - Advanced Methods for Teaching Mathematics in the Secondary School Credits: 3
- EDCI 490 - Student Teaching in Education Credits: 6
- EDRD 419 - Literacy in the Content Areas Credits: 3
- EDUC 372 - Human Development, Learning, and Teaching Credits: 3
- EDUC 422 - Foundations of Secondary Education Credits: 3
- MATH 302 - Foundations of Geometry Credits: 3
- MATH 315 - Advanced Calculus I Credits: 3
- MATH 321 - Abstract Algebra Credits: 3
MATH 351 - Probability Credits: 3

Note

A maximum of 6 credits of grades below 2.00 in course work designated MATH may be applied toward the major.

Bachelor of Science

Mathematics and Statistical Science Dual-Degree MS (COS)

Banner Codes: SC-MS-MATH, VS-MS-STAT

Schools: College of Science and The Volgenau School of Engineering

Departments: Mathematical Sciences and Statistics

This program allows students to earn an MS degree in mathematics and an MS degree in statistical science by completing 48 credits of course work in both areas instead of the 60 that would be required if the degrees were sought independently.

Admission Requirements

Applicants must satisfy admission requirements for both the Mathematics, MS and the Statistical Science, MS programs. A joint faculty committee from the Mathematical Sciences and Statistics Departments make final admission decisions into the dual-degree program.

MS-MATH/STAT Dual-Degree Requirements

The dual-degree program requires a total of 48 credits as specified below:

- MATH 621 - Algebra I Credits: 3
- MATH 675 - Linear Analysis Credits: 3
- MATH 677 - Ordinary Differential Equations Credits: 3 or MATH 678 - Partial Differential Equations Credits: 3
- MATH 685 - Numerical Methods Credits: 3
- STAT 544 - Applied Probability Credits: 3
- STAT 554 - Applied Statistics Credits: 3
- STAT 652 - Statistical Inference Credits: 3
- STAT 656 - Regression Analysis Credits: 3

Elective Credits

- 12 elective credits in MATH courses numbered 610 or higher, excluding MATH 653, 654, 655 and 799. Courses must be approved in advance by the student’s mathematical sciences academic advisor and the mathematical sciences graduate coordinator.
- 12 elective credits in 500-, 600-, or 700-level STAT courses, excluding STAT 535 and 799. Courses must be approved in advance by the student’s statistics academic advisor and the statistics graduate coordinator.

Total: 48 credits
Notes:

- Students in either the BS/Accelerated MS in Mathematics program or the BS(selected)/Accelerated MS in Statistical Science program cannot get a reduction of 6 credits toward this dual degree. Students who want to proceed to a PhD degree will only be able to waive the number of credits specified in the associated PhD degree requirements, even though they will have 48 credits at the MS level.
- If a student decides not to complete the required 48 credits, a single MS degree will not be granted unless the student fulfills the requirements for either the MS in Mathematics or the MS in Statistical Science.
- Once a student receives one of the MS degrees from either department, the student will no longer be eligible for the reduction in credit (i.e., will need to complete 30 credits) if the student later decides to earn the other MS degree.

Mathematics, BS

Banner Code: SC-BS-MATH

Students may select an optional concentration in actuarial mathematics (ACTM), applied mathematics (AMT), mathematics education (MTHE) or mathematical statistics. Students who do not select a concentration study traditional mathematics.

Students must fulfill all requirements for bachelor’s degrees including university general education requirements. In addition, students majoring in mathematics must satisfy the requirements listed below. These courses satisfy the university-wide requirement in quantitative reasoning and natural sciences. A maximum of 6 credits of grades below 2.00 in course work designated MATH may be applied toward the major.

This undergraduate program offers students the option of applying to the accelerated master's degree program in mathematics or curriculum and instruction (SECM concentration). See each listing for specific requirements.

This program of study is offered by the Department of Mathematical Sciences in the College of Science.

Degree Requirements

Students should carefully read the General Comments section at the end of this program description before registering for courses.

Mathematics Core (23 credits)

- MATH 113 - Analytic Geometry and Calculus I Credits: 4
- MATH 114 - Analytic Geometry and Calculus II Credits: 4
- MATH 203 - Linear Algebra Credits: 3
- MATH 213 - Analytic Geometry and Calculus III Credits: 3 or MATH 215 - Analytic Geometry and Calculus III (Honors) Credits: 3
- MATH 214 - Elementary Differential Equations Credits: 3 or MATH 216 - Theory of Differential Equations Credits: 3
- MATH 290 - Introduction to Advanced Mathematics Credits: 3
- MATH 322 - Advanced Linear Algebra Credits: 3

Science (8 credits)

All students in the major choose a one-year sequence of a laboratory science from the following:

Chemistry sequence:
- CHEM 211 - General Chemistry Credits: 4
- CHEM 212 - General Chemistry Credits: 4

Geology sequence:
- GEOL 101 - Introductory Geology I Credits: 4
- GEOL 102 - Introductory Geology II Credits: 4

Physics sequence:
- PHYS 160 - University Physics I Credits: 3 and PHYS 161 - University Physics I Laboratory Credits: 1
- PHYS 260 - University Physics II Credits: 3 and PHYS 261 - University Physics II Laboratory Credits: 1

Computational Skills (4 or 7 credits)

- All students in the major take CS 112 - Introduction to Computer Programming Credits: 4
- In addition, students in the actuarial concentration take STAT 362 - Introduction to Computer Statistical Packages Credits: 3

Additional Coursework for Traditional Mathematics (24 credits)

- MATH 125 - Discrete Mathematics I Credits: 3
- MATH 315 - Advanced Calculus I Credits: 3
- MATH 316 - Advanced Calculus II Credits: 3
- MATH 321 - Abstract Algebra Credits: 3 or MATH 431 - Topology Credits: 3
- 12 additional credits of MATH courses numbered above MATH 300 (excluding MATH 400)

Departmental Non-mathematical Requirements

- Students selecting traditional mathematics or those undertaking either the applied mathematics concentration, mathematics education, or the mathematical statistics concentration must select a second year of science from one of the following three options: a second sequence from the choices under "Science (8 credits)" above; 6 credits from more advanced courses in chemistry, geology, or physics (but only courses acceptable for credit toward a natural science major); or the 4-credit option PHYS 262, PHYS 263.
- Students with an actuarial concentration must have 3 credits of ACCT 203 and 6 credits of economics, including ECON 103 (3 credits) and either ECON 306 or 310, or FNAN 321. (The Economics Department has agreed to waive ECON 104 as a prerequisite for ECON 306 for mathematics majors.) Students in this concentration must also take STAT 362.
- The department recommends proficiency in French, German, or Russian.

Concentrations

Students may select an optional concentration in actuarial mathematics (ACTM), applied mathematics (AMT), mathematics education (MTHE) or mathematical statistics (MTHS). Students selecting a concentration take the courses listed below instead of the 24 credits of additional mathematics taken by students without a concentration. The concentration requirements comprise 24 credits for the ACTM and AMT concentrations, 27 credits for the MTHS concentration, and 39 credits for the MTHE concentration.

▲ Concentration in Actuarial Mathematics (ACTM)

- MATH 351 - Probability Credits: 3
- MATH 352 - Statistics Credits: 3
- MATH 551 - Regression and Time Series Credits: 3
- MATH 554 - Financial Mathematics Credits: 3
- MATH 555 - Actuarial Modeling I Credits: 3
- MATH 556 - Actuarial Modeling II Credits: 3

Select two from the following three courses:
- MATH 441 - Deterministic Operations Research Credits: 3
- MATH 442 - Stochastic Operations Research Credits: 3
- MATH 446 - Numerical Analysis I Credits: 3

Total: 24 credits

▲ Concentration in Applied Mathematics (AMT)

- MATH 125 - Discrete Mathematics I Credits: 3
- MATH 315 - Advanced Calculus I Credits: 3
- MATH 351 - Probability Credits: 3
- MATH 413 - Modern Applied Mathematics I Credits: 3
- MATH 414 - Modern Applied Mathematics II Credits: 3
- MATH 446 - Numerical Analysis I Credits: 3
- 6 credits of course work above MATH 300 (excluding MATH 400)

Total: 24 credits

Concentration in Mathematical Statistics (MTHS)

- MATH 125 - Discrete Mathematics I Credits: 3
- MATH 315 - Advanced Calculus I Credits: 3
- MATH 351 - Probability Credits: 3
- MATH 352 - Statistics Credits: 3
- MATH 453 - Advanced Mathematical Statistics Credits: 3
- MATH 551 - Regression and Time Series Credits: 3
- STAT 362 - Introduction to Computer Statistical Packages Credits: 3

and two from the following four courses:
- STAT 455 - Experimental Design Credits: 3
- STAT 457 - Applied Nonparametric Statistics Credits: 3
- STAT 463 - Introduction to Exploratory Data Analysis Credits: 3
- STAT 474 - Introduction to Survey Sampling Credits: 3

Total: 27 credits

▲ Concentration in Mathematics Education (MTHE)

Note: EDCI 490 and EDUC 372 also satisfy the general education requirements for synthesis and social science, respectively.

- EDCI 372 - Teaching Mathematics in the Secondary School Credits: 3
- EDCI 472 - Advanced Methods for Teaching Mathematics in the Secondary School Credits: 3
- EDCI 490 - Student Teaching in Education Credits: 6
- EDRD 419 - Literacy in the Content Areas Credits: 3
- EDUC 372 - Human Development, Learning, and Teaching Credits: 3
- EDUC 422 - Foundations of Secondary Education Credits: 3
- MATH 125 - Discrete Mathematics I Credits: 3
- MATH 302 - Foundations of Geometry Credits: 3
- MATH 315 - Advanced Calculus I Credits: 3
- MATH 321 - Abstract Algebra Credits: 3
- MATH 351 - Probability Credits: 3
- one 3-credit MATH course numbered above MATH 300 (excluding MATH 400)

Total: 39 credits

General Comments

For math majors:

MATH 104, 105, 106, 108, 110, 111, 112, 271, and 272 cannot be used as substitutes for any requirements of the major in mathematics.

For non-math majors:

- MATH 108, 110, and 111 are designed for students in the social and behavioral sciences.
- Liberal arts majors are advised to take MATH 106, 110, or 111.
- Students in the natural sciences who plan to do graduate work are advised to add courses from MATH 313, 314, 351, 352, 382, 441, 442, 446, and 447.

For both math majors and non-math majors:

- MATH 104, 105, 108, 110, 111, 112, 113, 125 have a qualifying score on the Math Placement Test as a prerequisite. The Math Placement Test is given frequently; for the schedule, inquire at the department office or check the Math Department web site.
- The sequence MATH 123/124 is an option for students who need to MATH 113 but believe they are not prepared for that course. In these two 3-credit courses, students will learn fundamental algebra and calculus so that upon completion of the sequence, students will be prepared for MATH 114.
- Students who do not achieve the necessary test score needed to take a math course may go to the Math Learning Center (see below), or they may study and retake the test on their own. A student who does not complete the relevant program in the Learning Center or does not achieve the necessary score on the placement test, will not be able to enroll in the class. Depending on their test scores, students who do not place into MATH 113 will be advised to take MATH 104 or MATH 105 or visit the Math Learning Center to prepare for MATH 105.
- MATH 104 and MATH 105 do not fulfill the university quantitative reasoning requirement.
- Students may not receive credit for both MATH 214 and 216; both MATH 213 and 215; both MATH 351 and STAT 344; and both MATH 352 and STAT 354.
- After receiving a grade of C or better in one of the courses listed below on the left, students may not receive credit for the corresponding course on the right:
MATH 113 or 123  
MATH 351 or STAT 344  
MATH 441  
MATH 125  
MATH 105 or 108  
MATH 110  
MATH 111  
MATH 112

Bachelor/Accelerated Master's

Mathematics, BA or BS/Curriculum and Instruction, Accelerated MEd, (Secondary Education Mathematics Concentration)

Highly qualified undergraduates may be admitted to a Bachelor's/Accelerated Master's program and obtain a BA or BS in Mathematics and an MEd in Curriculum and Instruction, Secondary Education Mathematics Concentration in an accelerated time frame after satisfactory completion of 149 credits.

This program of study is offered jointly by the Department of Mathematical Sciences in the College of Science and the Graduate School of Education in the College of Education and Human Development.

For policies governing all graduate degrees, see the Academic Policies section of the catalog.

Application Requirements

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in the Admissions section of this catalog. For information specific to this accelerated master's program, see Application Requirements and Deadlines on the College of Education and Human Development web site.

Degree Requirements

Students complete the following courses in their senior year:

- EDCI 572 - Teaching Mathematics in the Secondary School (to be taken in the Fall semester)
- EDUC 672 - Human Development and Learning: Secondary Education (to be taken in the Fall semester)
- EDCI 672 - Advanced Methods of Teaching Mathematics in the Secondary School (to be taken in the Spring semester)
- EDRD 619 - Literacy in Content Areas (to be taken in the Spring semester)

While undergraduate students, accelerated master's students are able to apply two of the courses listed above to both the Bachelor's and Master's degrees. These courses are considered advanced standing for the MEd. A minimum grade of B must be earned to be eligible to count as advanced standing. The other two courses are taken as reserve graduate credit and do not apply to the undergraduate degree. Early in their final undergraduate semester, students must submit the Bachelor's/Accelerated Master's Transition Form and specify which of the four courses are to be designated as advanced standing and reserve graduate credit.

Mathematics, BS/Mathematics, Accelerated MS
This five-year degree program allows academically strong students to obtain a BS and MS by successfully completing 144 credits within five academic years and one summer. Well-prepared students are admitted to this program on completion of 90 credits, take selected graduate courses during their senior year, and are able to use up to 6 graduate credits to partially satisfy requirements for the undergraduate degree. On completion and conferral of that degree and with satisfactory graduate-level performance (3.00) in graduate courses, students are given advanced standing in the master’s program and complete an additional 24 credits to receive the master’s degree. All other master’s degree requirements must be met.

This program of study is offered by the Department of Mathematical Sciences in the College of Science.

**Doctor of Philosophy**

**Mathematics, PhD**

**Banner Code:** SC-PHD-MATH

The Department of Mathematical Sciences offers a PhD in mathematics. The program begins with graduate course work and advanced seminars and culminates in a thesis consisting of original research in mathematics. The PhD program in mathematics is designed to train students as research mathematicians for careers in academia, government, and private industry.

This program of study is offered by the Department of Mathematical Sciences in the College of Science.

**Admission Requirements**

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in the Admission section of this catalog. It is expected that all applicants have a recent bachelor’s degree in mathematics or an equivalent amount of undergraduate mathematics preparation, with a GPA of at least 3.00 in their last 60 credits of study. Students without this background who have had an upper-division course in linear algebra (equivalent to MATH 322), an upper-division course in advanced calculus (equivalent to MATH 315), and familiarity with basic group theory (such as presented in MATH 321) are encouraged to apply to the MS program in mathematics. Such students may subsequently apply to the PhD program when all background issues have been addressed. It is recommended that all applicants have some familiarity with mathematical software.

To apply, prospective students should forward a completed Mason graduate application, two copies of official transcripts from each college and graduate institution attended, three letters of recommendation, and a goals statement to the COS Fairfax Campus Graduate Admissions Processing Center. TOEFL scores are required for all international applicants. GRE scores are recommended but not required.

**Reduction of Credit**

For students entering the doctoral program with a master's degree in a related field from a regionally accredited institution, the number of required credits may be reduced up to 30 credits, subject to approval of the program faculty and the associate dean for student and academic affairs. See the College of Science graduate policies section for more information.

**Fellowships and Assistantships**

The Department of Mathematical Sciences offers a limited number of merit-based teaching assistantships. Other sources of support, such as research fellowships and assistantships, are available as funding permits. Graduate students also have the opportunity to work in the Math Tutoring Center and the Math Learning Center.

**Degree Requirements**
Students must satisfy all requirements for doctoral degrees expressed in the Academic Policies section of this catalog.

The program requires 72 credits beyond the baccalaureate degree, with a minimum of 48 credits in course work and 12–24 credits of dissertation research. For those holding master’s degrees, the 72 required credits may be reduced by up to 30 credits, depending on graduate courses completed.

Graduate mathematics courses taken elsewhere may be counted toward the degree either as transfer credit or through reduction of credit. Classes at the 500 level, MATH 600-614, and actuarial classes MATH 653, MATH 654 and MATH 655 cannot be used for credit toward a PhD in mathematics.

Students must complete the following curriculum requirements:

**Doctoral Course Work (48-60 credits)**

**Core Courses (12 credits)**

- MATH 675 - Linear Analysis Credits: 3  
  plus any three of the following:
- MATH 621 - Algebra I Credits: 3  
- MATH 631 - Topology I: Topology of Metric Spaces Credits: 3  
- MATH 677 - Ordinary Differential Equations Credits: 3  
- MATH 685 - Numerical Methods Credits: 3

**Preliminary Written Exam**

Students are required to take a preliminary written exam after completing the core courses, usually by the end of their second year. The exam is based on material presented in three of their four core courses (the student may choose which topic to exclude). These exams are offered two times a year. Students may take the exam as often as they like. A grade of "pass" on the preliminary written exam is sufficient to satisfy the creative component of the master's degree in mathematics.

**Dissertation Advisor and Examination Committee**

After passing the preliminary written exam, the student chooses a dissertation advisor and a three person examination committee. In consultation with the advisor and committee, the student chooses a major and a minor area of study (the major and minor areas are presumed to be in two different branches of mathematics).

**Seminar (6–9 credits)**

All PhD students are required to take a 1-credit seminar each semester. A student entering without a master’s degree in mathematics should expect to take a total of 8 to 9 credits of MATH 795.

- MATH 795 - Graduate Seminar Credits: 1

**Electives (27-42 credits)**

Students complete 27-42 credits of approved MATH electives. Courses not designated as MATH courses must be approved by the graduate committee.

**Qualifying Examinations**
Students are required to take a qualifying exam after passing the preliminary written exam. The qualifying exam will have oral and written components. In consultation with the advisor and committee, the student chooses a major and a minor area of study (the major and minor areas are presumed to be in two different branches of mathematics). The qualifying exam cover the equivalent of approximately four courses of material from the major area and three courses from the minor area.

**Dissertation Proposal and Advancement to Candidacy**

Approximately one semester after passing the qualifying exam, each doctoral student prepares a written dissertation proposal while taking MATH 998 (Doctoral Dissertation Proposal). The proposal must be approved by the thesis committee, which consists of the three qualifying exam committee members, plus a fourth member from outside the department. After successfully completing this requirement, the student advances to doctoral candidacy.

**Dissertation Research (12–24 credits)**

- MATH 998 - PhD Thesis Proposal Credits: 1-9
- MATH 999 - PhD Thesis Research Credits: 1-12

**Doctoral Dissertation**

After advancing to candidacy, the student will work on a doctoral dissertation while enrolled in MATH 999. The dissertation is a written piece of original mathematics that demonstrates a doctoral candidate’s mastery of the subject matter. A student is expected to produce new and original research worthy of publication in a peer-reviewed journal. After the thesis is completed, the committee will review the thesis and examine the student in a public oral thesis defense.

**Total: 72 credits**

**Graduate Certificate**

**Actuarial Sciences Graduate Certificate**

**Banner Code:** SC-CERG-ACTS

The certificate in actuarial sciences is designed to serve students and professionals in the Washington, D.C., area who are interested in pursuing careers as actuaries. The course content provides students with specific training related to the Society of Actuaries (SOA) Exam FM (formerly Course 2), SOA Exam MLC (formerly Course 3), SOA Exam C (formerly Course 4), VEE for applied statistics (formerly part of Course 4), and Exam EA-1 and EA-2A (for those pursuing EA designation from the U.S. Treasury). The courses also provide a solid foundation for the corresponding Casualty Actuary Society (CAS) exams. Preparation for the first exam is equivalent to meeting the prerequisites for the certificate courses in the area of probability and statistics. Students enrolling in the actuarial sciences certificate program must complete the six course (18 credit) curriculum requirement described below.

The graduate certificate in actuarial sciences may only be pursued on a part-time basis.

This program of study is offered by the Department of Mathematical Sciences in the College of Science.

**Admission Requirements**

In addition to fulfilling admission requirements for graduate study, applicants must submit three letters of recommendation. GRE scores are not required.
Students intending to pursue a certificate in the actuarial sciences must have three semesters of calculus, a course in linear algebra (equivalent to MATH 203), a calculus-based course in probability (equivalent to MATH 351), and statistics (equivalent to MATH 352). Completion of the SOA Exam P is also sufficient preparation for the certificate program.

Certificate Requirements

Core Courses (12 credits):

- MATH 551 - Regression and Time Series Credits: 3
- MATH 554 - Financial Mathematics Credits: 3
- MATH 555 - Actuarial Modeling I Credits: 3
- MATH 556 - Actuarial Modeling II Credits: 3

Electives (6 credits from the following):

- MATH 557 - Financial Derivatives Credits: 3
- MATH 653 - Construction and Evaluation of Actuarial Models I Credits: 3
- MATH 654 - Construction and Evaluation of Actuarial Models II Credits: 3
- MATH 655 - Pension Valuation Credits: 3 (recommended only for students who wish to pursue a career as a pension actuary)
- any other elective course approved by the Graduate Committee and chosen in consultation with advisor.

Total: 18 credits

Notes:

The graduate certificate course work provides preparation for SOA, CAS, and EA exams as follows. MATH 551 is the SOA VEE for Applied Statistics and is preparation for part of the CAS Exam 3. MATH 554 covers most of the SOA Exam FM material as well as CAS Exam 2 and much of the EA-1 exam. MATH 555 and 556 cover all of the Exam MLC material and most of the CAS Exam 3L as well as the remainder of the EA-1 exam. MATH 557 covers all of the SOA EXAM MFE material. MATH 653 and 654 covers all of the SOA Exam C material as well as CAS Exam 4. MATH 655 covers all of the EA-2A Exam material.

Counting Actuarial Courses for Other Mathematics Degrees

A student enrolled in the certificate program in actuarial sciences and another graduate degree program in mathematics can count actuarial mathematics courses toward the master's or doctoral degree according to the following rules:

- None of the actuarial mathematics courses MATH 551, 554, 555, 556, 557, 653, 654, and 655 can count toward the PhD degree in mathematics.
- None of the actuarial mathematics courses MATH 551, 554, and 655 can count toward the MS degree in mathematics.
- Up to four of the actuarial mathematics courses MATH 555, 556, 653, and 654 can count toward the MS degree in mathematics provided that all other courses counted toward that degree are MATH courses. An exception can be made if the student wishes to count only one actuarial mathematics course from the list toward the MS degree. In this case, at most one other non-MATH course can be counted toward the degree with approval of the graduate coordinator.

Counting Actuarial Courses toward the Statistical Sciences MS Degree
A student enrolled in the certificate program in actuarial sciences and in the MS program in statistical science can count MATH 555 and 556 as approved non-STAT elective courses and can count MATH 653 and 654 as STAT electives when designing a curriculum for this degree. The full curriculum should be designed in consultation with the student’s Statistics Department advisor.

**Master of Science**

**Mathematics, MS**

**Banner Code:** SC-MS-MATH

The Department of Mathematical Sciences offers courses in pure and applied mathematics leading to the master of science degree in mathematics.

An accelerated master's option is available to students in the bachelor's program. See Mathematics, BS/Mathematics, Accelerated MS for specific requirements.

This program of study is offered by the Department of Mathematical Sciences in the College of Science.

**Admission Requirements**

In addition to meeting the admission standards and application requirements for graduate study as specified in the Admission section of this catalog, applicants must submit three letters of recommendation. GRE scores are not required.

Students intending to pursue the MS degree must have taken an upper-division course in advanced calculus (equivalent to MATH 315), an abstract algebra course (equivalent to MATH 321) and an upper-division course in linear algebra (equivalent to MATH 322). Students should have some computer knowledge.

**Assistantships**

A limited number of merit-based teaching assistant ships are available for students taking at least 6 graduate credits each semester. Other sources of support, such as research assistant ships, are available as funding permits. Graduate students also have the opportunity to work in the Math Tutoring Center and Math Learning Center.

**Degree Requirements**

Candidates for the MS in mathematics must satisfy all requirements for master's degrees as expressed in the Academic Policies section of this catalog.

- MATH 675 - Linear Analysis Credits: 3
  Three courses chosen from the following:
  - MATH 621 - Algebra I Credits: 3
  - MATH 631 - Topology I: Topology of Metric Spaces Credits: 3
  - MATH 677 - Ordinary Differential Equations Credits: 3
  - MATH 685 - Numerical Methods Credits: 3
  - Four approved graduate courses (12 credits), at least two of which are MATH. All four courses must be approved by the student’s advisor. Courses not listed as MATH courses must be approved by the Graduate Committee. Different rules apply if the student wishes to count graduate actuarial courses toward his or her degree (consult the graduate coordinator).
• MATH 600 through 614 cannot be used for credit towards the MS in mathematics
• Research and creative component (6 credits; see below)

Total: 30 credits

Research and Creative Component

A student may fulfill the research and creative component of the MS degree in any one of the following three ways:

Thesis Option

In preparation for this option, the student must form a committee comprising a chair and two other faculty members. The chair and at least one other member must be from the department; one member may be from a related field. The student completes a thesis under the direction of the committee chair. The thesis work is typically completed while students are registered for 6 credits of MATH 799. A thesis proposal and thesis are submitted in accordance with university rules. The student must give an oral defense of the thesis to the committee and the Mason community at large. Students are expected to respond to questions on the thesis and related material. The committee determines whether the defense is satisfactory.

• MATH 799 - MS Thesis Credits: 1-6

Paper Presentation Option

In preparation for this option, the student must form a committee comprising a chair and two other faculty members. The chair and at least one other member must be from the department; one member may be from a related field. The student gives an oral presentation of a paper (or series of papers or book chapter) chosen in consultation with the chair of the committee and approved by the full committee. The chosen material must be distinct from work done in fulfillment of course requirements. Students choosing this option take 6 additional credits of electives. The oral presentation is given to the committee and the Mason community at large. Students are expected to respond to questions on the paper and related material. The committee determines whether the defense is satisfactory.

Preliminary Exam for the PhD

The research and creative component of the MS degree can also be fulfilled by passing the preliminary written examination for the Mathematics PhD degree.

Non-Degree

Mathematics for School of Management Students Minor

Banner Code: MSOM

This program of study is offered by the Department of Mathematical Sciences in the College of Science.

For policies governing all minors, see the Academic Policies section of this catalog.

Course Work
To receive this minor, students must complete 20 credits, 8 of which must be unique to the minor, with a minimum GPA of 2.00, including:

- MATH 113 - Analytic Geometry and Calculus I Credits: 4
- MATH 114 - Analytic Geometry and Calculus II Credits: 4
- MATH 203 - Linear Algebra Credits: 3
- MATH 213 - Analytic Geometry and Calculus III Credits: 3
- MATH 351 - Probability Credits: 3

One course chosen from:

- MATH 352 - Statistics Credits: 3
- MATH 441 - Deterministic Operations Research Credits: 3
- MATH 554 - Financial Mathematics Credits: 3

Total: 20 credits

Mathematics Minor

Banner Code: MATH

To receive a minor in mathematics, students must complete 21 credits, 8 credits of which are unique to the minor and not applied toward the major. These courses must have a minimum GPA of 2.00. For policies governing all minors, see the Academic Policies section of this catalog.

This program of study is offered by the Department of Mathematical Sciences in the College of Science.

Course Work

Five required courses (15 credits)

- MATH 125 - Discrete Mathematics I Credits: 3
- MATH 203 - Linear Algebra Credits: 3
- MATH 213 - Analytic Geometry and Calculus III Credits: 3
  or
- MATH 215 - Analytic Geometry and Calculus III (Honors) Credits: 3
- MATH 214 - Elementary Differential Equations Credits: 3
  or
- MATH 216 - Theory of Differential Equations Credits: 3
- MATH 290 - Introduction to Advanced Mathematics Credits: 3

One math elective course (3 credits) chosen from:

- MATH 315 - Advanced Calculus I Credits: 3
- MATH 321 - Abstract Algebra Credits: 3
- MATH 322 - Advanced Linear Algebra Credits: 3
One general elective course (3 credits) chosen from:

- one 3-credit math course at the 300 or 400 level (excluding MATH 400), or
- STAT 344 - Probability and Statistics for Engineers and Scientists I Credits: 3

Note:

Students must earn a 2.00 or better in MATH 290 and the courses chosen to fulfill the second requirement.

Total: 21 credits

■ Neuroscience Program

Phone: 703-993-4333
Web: gmu.edu/departments/neuroscience

Faculty

Director: Jafri

Professors: Ascoli, Blackwell, Butler, Jafri, Olds, Smith, McCabe, Parasuraman

Associate professors: Barreto, Cebral, Flinn, Fryxell, Greenwood, Houser, Kalbfleisch, Kello, Klimov, Peterson, Sander, So

Assistant professors: Cox, Dumas, Kabbani, Kozhevakov, Krueger, Peixoto, Sikdar, Thompson

Neuroscience at George Mason University is an interdisciplinary field, grounded in biology, chemistry, and psychology. Research and education in neuroscience at Mason is conducted under the auspices of the Neuroscience Advisory Council (NAC). The BS degree in neuroscience is administered by the Psychology department in the College of Humanities and Social Sciences, and the PhD program in neuroscience is administered by the College of Science. The neuroscience faculty at Mason comprise a unique blend of traditional, experimental, and theoretical scientists. They include faculty in the Psychology; Molecular Neuroscience; Molecular and Microbiology; Physics and Astronomy; Bioinformatics and Computational Biology, and Electrical Engineering departments. Research in neuroscience focuses on the broad areas of behavior, anatomy, physiology, neuropharmacology, computational modeling, and informatics. Some of the key research initiatives currently underway at Mason include studies of:

- effects of drugs and alcohol on behavioral and neurological development
- identifying and characterizing protein interactions for the dopamine and nicotinic acetylcholine receptors in the brain
- biochemical dynamics in disorders of the basal ganglia
- computational methods for simulation of complex biological systems
- description and generation of neuronal morphology
- adaptive control for stabilization of epilepsy
- role of metals in memory and Alzheimer's disease
- biochemical/metabolic simulations at the organism level
- cellular and sub-cellular models of associative learning

Course Work
The program offers all course work designated NEUR in the Courses section of this catalog.

**Doctor of Philosophy**

**Neuroscience, PhD**

**Banner Code: SC-PHD-NEUR**

The interdisciplinary doctoral program in neuroscience is offered jointly by the College of Science, the College of Humanities and Social Science, and the Krasnow Institute for Advanced Study.

The program focuses on the complexity of the brain and addresses the challenge of developing an integrative understanding of cognition and higher brain function. In response to this challenge, the rapidly developing field of neuroscience has produced an exponential increase in the amount of data available to investigators as they develop new theories of brain function and new hypotheses to test. The main objective of the program is to prepare students to participate at the cutting edge of this exciting field in academia, industry, and government. The program provides students with a rich interdisciplinary intellectual environment that fosters the development of the skills they will need to successfully pursue research careers.

Current faculty research focuses on the broad areas of behavior, anatomy, physiology, neuropharmacology, molecular biology, computational modeling, and informatics. External research collaborations exist with federal agencies, private and not-for-profit corporations, and other universities. The scope of research ranges from the subcellular and molecular level (in the context of such phenomena as drug addiction and the biological basis of schizophrenia) to the systems and behavioral level.

Current research projects include the effects of drugs and alcohol on behavioral and neurological development, plasticity mechanisms supporting development, network formation and information processing, cellular and subcellular models of associative learning, biochemical dynamics in disorders of the basal ganglia, computational methods for simulation of complex biological systems, role of metals in memory and Alzheimer’s disease, and dynamical behavior of neurons and networks of neurons, and identifying and characterizing protein interactions for the dopamine and nicotinic acetylcholine receptors in the brain.

**Admission Requirements**

Applicants should have a bachelor’s degree in a relevant field and undergraduate courses in organic chemistry, cell biology, and integral calculus. Admission requires a minimum GPA of 3.25 in undergraduate work and acceptable GRE scores. In addition, the applicant’s goals statement should relate to the research interests of at least one faculty member in the program and include the names of two faculty members who may be suitable as advisors or supervisory committee members. To apply, prospective students should forward to the COS Fairfax Campus Graduate Admissions Processing Center a completed Mason graduate application including the goals statement, and two copies of official transcripts from each college and graduate institution attended. Applicants should also include three letters of recommendation and an official report of scores obtained on the GRE-GEN. The GRE-SUB is recommended if it is given in the student’s undergraduate major. TOEFL scores are required of all international applicants.

**Reduction of Credit**

For students entering the doctoral program with a master's degree in a related field from a regionally accredited institution, the number of required credits may be reduced up to 30 credits, subject to approval of the program faculty and the associate dean for student and academic affairs. See the College of Science graduate policies section for more information.

**Degree Requirements**
Students must satisfy all requirements for doctoral degrees expressed in the Academic Policies section of this catalog.

The curriculum for the Neuroscience PhD consists of 72 credits: 48 credits of course work and 24 credits of dissertation research. The 48-credit requirement may be reduced by up to 30 credits for a qualified student holding a previous relevant master’s degree. Alternatively, up to 24 credits of previous, relevant graduate course work may be transferred into the program provided those credits have not been applied toward a previous degree. Additional requirements for graduation include a dissertation and at least one publication (in print or in press) in a refereed journal.

**Doctoral Course Work (48 credits)**

**Core Science (9 credits):**

- NEUR 604 - Ethics in Scientific Research Credits: 1-3
- NEUR 702 - Research Methods Credits: 3
  and one course chosen from the following:
  - STAT 535 - Analysis of Experimental Data Using SPSS Credits: 3
  - PSYC 611 - Advanced Statistics Credits: 4
  - STAT 544 - Applied Probability Credits: 3
  - STAT 554 - Applied Statistics Credits: 3
  - BINF 702 - Research Methods Credits: 3
  - ECE 528 - Introduction to Random Processes in Electrical and Computer Engineering Credits: 3

**Core Neuroscience (11 credits):**

- NEUR 601 - Developmental Neuroscience Credits: 2
- NEUR 602 - Cellular Neuroscience Credits: 3
- NEUR 603 - Mammalian Neuroanatomy Credits: 3
- NEUR 701 - Neurophysiology Laboratory Credits: 3

**Rotations and Readings (9 credits):**

taken three times:

- NEUR 703 - Laboratory Rotation and Readings Credits: 3

**Electives (18 credits):**

- 18 credits of electives

**Seminar (1 credit):**

- NEUR 709 - Neuroscience Seminars Credits: 1

**Doctoral Committee and Proposal**

When course work is nearing completion, the student should form a doctoral committee and start preparing their dissertation proposal. Students in consultation with their advisor identify which faculty are appropriate to be a part of their committee. The
dissertation committee administers the qualifying exam and evaluates the dissertation proposal as well as the dissertation itself. At least one of the committee members must be outside of the dissertation advisor's department.

Candidacy Examination and Advancement to Candidacy

The doctoral candidacy examination includes written and oral components. After passing the candidacy exam and receiving committee approval for the dissertation proposal, the student is advanced to doctoral candidacy.

Dissertation Research (24 credits):

Note: No more than 24 combined credits from NEUR 998 and NEUR 999 may be applied toward satisfying doctoral degree requirements, with no more than 12 credits of NEUR 998.

- NEUR 998 - Dissertation Proposal Credits: 1-6
- NEUR 999 - Doctoral Dissertation Credits: 1-12

Total: 72 credits

School of Physics, Astronomy, and Computational Sciences

Phone: 703-993-1280
Web: spacs.gmu.edu

Faculty

Professors: Becker (Associate Director), Blaisten-Barojas, Borne, Carr*, Cebral, Dworzecka, Ehrlich, Ellsworth, Gentle, Lieb, Lohner, Mishin, Papaconstantopoulos, Rubin, Satija, Satyapal, Summers (Director), T. Sauer*, Trefil, Wegman, C. Yang

Assistant professors: Camelli, Cressman, Nikolic, Rosenberg, Tian, Zhao

Term associate professor: Oerter

Term assistant professors: Geller, Jazaeri, Wyczalkowski

Term instructors: Ericson, Ewell

Emeriti: Ceperley, Evans, Mielczarek

Research faculty: Aubry, Bilitza, Boyer, Dere, Duxbury, Economou, Gliozzi, Hoang, Kim, Meier, Mut, Odstrcil, Poland, Richards, Sforza, Sha, Shabaev, Titarchuk

*Faculty holding primary appointments in other academic units.

The School of Physics, Astronomy, and Computational Sciences offers undergraduate and graduate degree programs for students with interests and career goals involving physics, computational sciences, data science, and astronomy. In addition, the School provides traditional and interdisciplinary research opportunities at the graduate and undergraduate levels, and benefits from a
very high level of external grant funding. Additional information about current faculty research activities is available on the School's website, spacs.gmu.edu.

Course Work

The School of Physics, Astronomy, and Computational Sciences offers all course work designated ASTR, CDS, CSI, and PHYS in the Courses section of this catalog.

Undergraduate Programs

The School offers bachelor's degrees in physics and in astronomy. Minors are available in astronomy, in computational and data sciences, and in physics. An interdisciplinary minor is offered in renewable energy.

Undergraduate Research Opportunities

The School offers many opportunities for undergraduate students to get involved with research. Students should consult with faculty working on research topics of interest to them, based on their exploration of the School's web site.

Bachelor’s/Accelerated Master’s Degree

Qualified undergraduates may be admitted to an accelerated master’s program and obtain both a BS and an MS in physics within an accelerated time frame. Students admitted to this program may take graduate courses after completing 90 undergraduate credits, and up to 6 credits of graduate work may be used in partial satisfaction of the requirements for the undergraduate degree. If students earn at least a 3.00 in these classes, they are granted advanced standing in the master’s program and must then complete an additional 24 credits to receive the master’s degree. All other master’s degree requirements must be met, including a minimum of 18 credits taken for the master’s after the bachelor’s degree is complete.

Honors Programs

Physics majors who have maintained an overall GPA of at least 3.50 in physics courses and a GPA of 3.50 in all courses taken at Mason may apply to the physics honors program when they complete the first semester of their junior year. To graduate with honors in physics, a student is required to maintain a minimum GPA of 3.00 in physics courses and successfully complete PHYS 405 and PHYS 406 - Honors Thesis in Physics with a GPA of at least 3.50 and a grade of at least A in PHYS 406.

Astronomy majors who have completed the prerequisites for ASTR 405 - Honors Thesis in Astronomy I Honors Thesis in Astronomy, have a GPA of at least 3.50 in ASTR and PHYS courses taken at GMU, and have a GPA of at least 3.50 in all courses taken at GMU may apply for admission to the astronomy honors program. To graduate with honors in astronomy, a student must maintain a GPA of at least 3.50 in their ASTR/PHYS courses. Students accepted into the honors program must complete ASTR 405 and 406 with a GPA of at least 3.50 and a grade of A- or better in ASTR 406 - Honors Thesis in Astronomy II. Students in ASTR 405/406 will complete a research project and write a thesis working under the supervision of a faculty member. At the end of ASTR 406, the student will write a substantial thesis paper and make a presentation of results to their honors committee.

Writing-Intensive Requirement

Mason requires all students to complete at least one course designated as “writing intensive” in their majors at the 300 level or above. Students majoring in Physics fulfill this requirement by successfully completing PHYS 407 - Senior Laboratory in Modern Physics. Astronomy majors fulfill the requirement by completing ASTR 402 - Methods of Observational Astronomy.
Teacher Licensure

Students who wish to become teachers should consult the College of Education and Human Development section and attend an information session early in their undergraduate career. For more information, call 703-993-2078, e-mail gacline2@gmu.edu, or go to gse.gmu.edu.

Physics for Nonmajors

PHYS 243, 244, 245, and 246 are recommended for biology, geology, and premedical students, and mathematics students who seek a BA degree. PHYS 101, 102, 103, and 104 are intended for nonscience majors. PHYS 160, 161, 260, 261 or PHYS 265, 262, and 263 constitute a calculus-based sequence in general physics to be taken by physics and engineering majors, and chemistry, computer science, and mathematics students who are pursuing a BS degree. Students may receive credit for only one of the following three sequences: PHYS 243, 244, 245, 246; PHYS 103, 104; or PHYS 160, 161, 260, 261, 262, 263.

Graduate Programs

The School offers master's degrees in Applied and Engineering Physics, and in Computational Science. The School also administers the Energy and Sustainability concentration in the Interdisciplinary Studies, MAIS program. A graduate certificate is available in Computational Techniques and Applications.

The School offers doctoral degrees in Computational Sciences and Informatics, and in Physics. These graduate programs are strongly supported by the extensive research activities of the School faculty, including many collaborations with scientists and engineers at regional government laboratories.

Bachelor of Science

Astronomy, BS

Banner Code: SC-BS-ASTR

The BS in astronomy prepares students for graduate school, a career in research or teaching positions, or employment in industry, business, or education fields where analytical skills and a scientific background are advantageous. Students who are considering a double major should talk to the undergraduate coordinator. Note that at least 18 credits used to fulfill an astronomy BS cannot be used to fulfill another major or minor. Some course substitutions are allowed for double majors, subject to approval from the department.

Students must fulfill all requirements for bachelor's degrees including university general education requirements. In addition, students must complete a total of 52 credits in physics and astronomy and 14 credits in mathematics with a minimum GPA of 2.00. Through the course work below, astronomy majors satisfy the university-wide requirements in natural science and quantitative reasoning. Also, by taking ASTR 402, astronomy majors satisfy the university’s writing-intensive requirement.

This program of study is offered by the School of Physics, Astronomy, and Computational Sciences in the College of Science.

Degree Requirements

Required astronomy courses (10 credits)

- ASTR 210 - Introduction to Astrophysics Credits: 3
- ASTR 328 - Stars and Interstellar Medium Credits: 3
- ASTR 402 - Methods of Observational Astronomy Credits: 4

Additional astronomy courses (6 credits)

Take two of the following:
- ASTR 403 - Planetary Sciences Credits: 3
- ASTR 404 - Galaxies and Cosmology Credits: 3
- PHYS 428 - Relativity Credits: 3

Required physics courses (21 credits)

- PHYS 160 - University Physics I Credits: 3
- PHYS 161 - University Physics I Laboratory Credits: 1
- PHYS 260 - University Physics II Credits: 3
- PHYS 261 - University Physics II Laboratory Credits: 1
- PHYS 262 - University Physics III Credits: 3
- PHYS 263 - University Physics III Laboratory Credits: 1
- PHYS 303 - Classical Mechanics Credits: 3
- PHYS 305 - Electromagnetic Theory Credits: 3
- PHYS 308 - Modern Physics with Applications Credits: 3

Required math courses (14 credits)

- MATH 113 - Analytic Geometry and Calculus I Credits: 4
- MATH 114 - Analytic Geometry and Calculus II Credits: 4
- MATH 213 - Analytic Geometry and Calculus III Credits: 3
- MATH 214 - Elementary Differential Equations Credits: 3

15 credits from the following:

(at least 12 credits must be from upper-level courses)

- ASTR 301 - Astrobiology Credits: 3
- ASTR 408 - Senior Research Credits: 3
- PHYS 306 - Wave Motion and Electromagnetic Radiation Credits: 3
- PHYS 307 - Thermal Physics Credits: 3
- PHYS 402 - Introduction to Quantum Mechanics and Atomic Physics Credits: 3
- ASTR 403, ASTR 404 or PHYS 428 if not taken as part of additional astronomy course requirement above, may be used here.
- Other ASTR or PHYS course with the permission of the department

Total: 66 credits

Sample Schedule for Astronomy BS
First Semester

- MATH 113 - Analytic Geometry and Calculus I Credits: 4
- ENGH 101 - Composition Credits: 3
- UNIV 100 - Freshman Transition Credits: 0-2
- General Education requirement
- General Education requirement

Second Semester

- MATH 114 - Analytic Geometry and Calculus II Credits: 4
- PHYS 160 - University Physics I Credits: 3
- PHYS 161 - University Physics I Laboratory Credits: 1
- General Education requirement
- General Education requirement

Third Semester

- PHYS 260 - University Physics II Credits: 3
- PHYS 261 - University Physics II Laboratory Credits: 1
- MATH 213 - Analytic Geometry and Calculus III Credits: 3
- General Education requirement
- General Education requirement
- Elective course

Fourth Semester

- PHYS 262 - University Physics III Credits: 3
- PHYS 263 - University Physics III Laboratory Credits: 1
- MATH 214 - Elementary Differential Equations Credits: 3
- ASTR 210 - Introduction to Astrophysics Credits: 3
- General Education requirement
- Elective Course

Fifth Semester

- ASTR 328 - Stars and Interstellar Medium Credits: 3
- PHYS 303 - Classical Mechanics Credits: 3
- PHYS 305 - Electromagnetic Theory Credits: 3
- ENGH 302 - Advanced Composition Credits: 3
- Elective course

Sixth Semester

- ASTR 404 - Galaxies and Cosmology Credits: 3
• PHYS 306 - Wave Motion and Electromagnetic Radiation Credits: 3
• PHYS 308 - Modern Physics with Applications Credits: 3
• Elective course
• Elective course

Seventh Semester

• ASTR 402 - Methods of Observational Astronomy Credits: 4
• ASTR 403 - Planetary Sciences Credits: 3
• ASTR 408 - Senior Research Credits: 3
• PHYS 402 - Introduction to Quantum Mechanics and Atomic Physics Credits: 3
• Elective course

Eighth Semester

• PHYS 307 - Thermal Physics Credits: 3
• PHYS 428 - Relativity Credits: 3
• Synthesis requirement
• Elective course
• Elective course

Physics, BS

Banner Code: SC-BS-PHYS

The BS in physics prepares students for graduate school and careers in education, business, or industry. Students in the fields of mathematics, science, and engineering who are considering a double major in physics should discuss this option with the undergraduate coordinator. Note that at least 18 credits used to fulfill a physics BS cannot be used to fulfill another major or minor. Some course substitutions are allowed for double majors, but these should be discussed in advance.

Students must fulfill all requirements for bachelor’s degrees including university general education requirements. In addition, students must complete a total of 45 credits in the major and 20 in mathematics, with a minimum GPA of 2.00, distributed as follows. Through the course work below, physics majors satisfy the university-wide requirements in natural science and quantitative reasoning, and the intensive writing requirement by taking PHYS 407.

This undergraduate program offers students the option of applying to the accelerated master's program in physics or curriculum and instruction (SECP concentration). See each listing for specific requirements.

This program of study is offered by the School of Physics, Astronomy, and Computational Sciences in the College of Science.

Alternative Introductory Sequence

Normally, students who intend to major in physics should take the physics introductory sequence (PHYS 160, 161, 260, 261, 262, and 263). Students who decide to major in physics after completing PHYS 243, 244, 245, and 246 may do so but only with written permission of the School. Those students are required to take 4 additional credits in approved physics courses.

Degree Requirements
Physics Core Courses (27 credits)

Note: Students double majoring in engineering and physics may substitute ECE 305 for PHYS 305, and ECE 333/334 for PHYS 407.

- PHYS 160 - University Physics I Credits: 3
- PHYS 161 - University Physics I Laboratory Credits: 1
- PHYS 260 - University Physics II Credits: 3
- PHYS 261 - University Physics II Laboratory Credits: 1
- PHYS 262 - University Physics III Credits: 3
- PHYS 263 - University Physics III Laboratory Credits: 1
- PHYS 303 - Classical Mechanics Credits: 3
- PHYS 305 - Electromagnetic Theory Credits: 3
- PHYS 308 - Modern Physics with Applications Credits: 3
- PHYS 402 - Introduction to Quantum Mechanics and Atomic Physics Credits: 3
- PHYS 407 - Senior Laboratory in Modern Physics Credits: 3

Physics Electives (6 credits)

Students take 6 credits selected from the following:

- PHYS 251 - Introduction to Computer Techniques in Physics Credits: 3
- PHYS 306 - Wave Motion and Electromagnetic Radiation Credits: 3
- PHYS 307 - Thermal Physics Credits: 3
- PHYS 405 or PHYS 406 - Honors Thesis in Physics Credits: 3
- PHYS 408 - Senior Research Credits: 2-3 or PHYS 409 - Physics Internship Credits: 3
- PHYS 416 - Special Topics in Modern Physics Credits: 1
- ASTR 328 - Stars and Interstellar Medium Credits: 3 or PHYS 428 - Relativity Credits: 3

Mathematics (20 credits)

- MATH 113 - Analytic Geometry and Calculus I Credits: 4
- MATH 114 - Analytic Geometry and Calculus II Credits: 4
- MATH 203 - Linear Algebra Credits: 3
- MATH 213 - Analytic Geometry and Calculus III Credits: 3
- MATH 214 - Elementary Differential Equations Credits: 3
- MATH 313 - Introduction to Applied Mathematics Credits: 3 or MATH 413 - Modern Applied Mathematics I Credits: 3

Additional Science Courses (12 credits)

Students may satisfy this requirement by choosing from courses show below as well as those listed in the Areas of Emphasis.

No more than 5 credits may be chosen from:

- PHYS 121 - Uses of Physics Credits: 1
- PHYS 122 - Inside Relativity Credits: 1
- PHYS 123 - Inside the Quantum World Credits: 1
- PHYS 124 - Experimental Explorations in Physics Credits: 1
• ASTR 210 - Introduction to Astrophysics Credits: 3
  Choose at least 7 credits from the following courses:
• CS 112 - Introduction to Computer Programming Credits: 4
• Additional approved upper-level physics, astronomy, chemistry, electrical engineering, or mathematics courses (for examples, see the areas of emphasis below)

Emphasis Option

In meeting all or part of the requirement for 12 credits of Additional Science Courses (above), students have the option of electing an emphasis. Students who wish to complete an emphasis should plan a program of study in consultation with their advisor.

Areas of emphasis and suggested courses for each are listed below.

Emphasis in Applied Solid State Physics

This emphasis is for students who wish to pursue a career in the semiconductor industry. To complete this emphasis, students should take 12 credits selected from the following courses:

• PHYS 512 - Solid State Physics and Applications Credits: 3
• ECE 430 - Principles of Semiconductor Devices Credits: 3
• ECE 431 - Digital Circuit Design Credits: 3
  and one from the following:
• PHYS 405 - Honors Thesis in Physics Credits: 3
• PHYS 406 - Honors Thesis in Physics Credits: 3
• PHYS 408 - Senior Research Credits: 2-3
• PHYS 409 - Physics Internship Credits: 3

Total: 12 credits

Emphasis in Astrophysics

This emphasis is for students who are planning to attend graduate school in astrophysics or pursue a career in industry. To complete this emphasis, students should take 12 credits selected from the following courses:

• PHYS 428 - Relativity Credits: 3
• ASTR 328 - Stars and Interstellar Medium Credits: 3
• ASTR 404 - Galaxies and Cosmology Credits: 3
• ASTR 535 - Space Instrumentation and Exploration Credits: 3
• MATH 446 - Numerical Analysis I Credits: 3
  Students may choose only one from the following:
• PHYS 405 - Honors Thesis in Physics Credits: 3
• PHYS 406 - Honors Thesis in Physics Credits: 3
• PHYS 408 - Senior Research Credits: 2-3
• PHYS 409 - Physics Internship Credits: 3

Total: 12 credits

Emphasis in Computational Physics
This emphasis is for students who wish to pursue a career that applies computers to the solution of physical problems and data analysis. To complete this emphasis, students should take 12 credits selected from the following courses:

- PHYS 510 - Computational Physics I Credits: 3
- MATH 446 - Numerical Analysis I Credits: 3
- MATH 447 - Numerical Analysis II Credits: 3
  and one from the following:
- PHYS 405 - Honors Thesis in Physics Credits: 3
- PHYS 406 - Honors Thesis in Physics Credits: 3
- PHYS 408 - Senior Research Credits: 2-3
- PHYS 409 - Physics Internship Credits: 3

Total: 12 credits

Emphasis in Electronics

This emphasis is for students who wish to pursue a career in industry, applying a strong background in electronics to physical problems. To complete this emphasis, students should take 12 credits selected from the following courses:

- ECE 301 - Digital Electronics Credits: 3
- ECE 333 - Linear Electronics I Credits: 3
- ECE 430 - Principles of Semiconductor Devices Credits: 3
- ECE 431 - Digital Circuit Design Credits: 3
- ECE 433 - Linear Electronics II Credits: 3
  Students may choose only one from the following:
- PHYS 405 - Honors Thesis in Physics Credits: 3
- PHYS 406 - Honors Thesis in Physics Credits: 3
- PHYS 408 - Senior Research Credits: 2-3
- PHYS 409 - Physics Internship Credits: 3

Total: 12 credits

Emphasis on Graduate School Preparation

Although any of the options listed here provide the successful student with a fully adequate background to enter graduate school, this emphasis is for students whose career goals definitely include graduate work in physics. To complete this emphasis, students should take 12 credits selected from the following courses:

- PHYS 410 - Computational Physics I Credits: 3
- PHYS 412 - Solid State Physics and Applications Credits: 3
- PHYS 440 - Nuclear and Particle Physics Credits: 3
- PHYS 405 - Honors Thesis in Physics Credits: 3
- PHYS 406 - Honors Thesis in Physics Credits: 3
- PHYS 408 - Senior Research Credits: 2-3
- PHYS 409 - Physics Internship Credits: 3

Total: 12 credits

Emphasis in Medical Physics
Physics majors generally have an excellent acceptance record in applying to medical, dental, or veterinary schools. Although there is no formal set of courses within physics that is uniquely suitable, students should meet with a physics advisor and a health sciences advisor for information about the university’s Medical Sciences Advisory Committee. For more information, call 703-993-1050.

Because schools in the health sciences vary both in their philosophies and specific requirements, it is wise for students to become aware of such information well in advance of applying for admission. Although specific requirements vary, most programs do require applicants to complete at least one year of biology. Other requirements generally include organic chemistry.

- CHEM 313 - Organic Chemistry Credits: 3
- CHEM 314 - Organic Chemistry Credits: 3
- CHEM 315 - Organic Chemistry Lab I Credits: 2
- CHEM 318 - Organic Chemistry Lab II Credits: 2
- PHYS 408 - Senior Research Credits: 2-3

Total: 12 credits

**Emphasis in Physics Education**

This emphasis is intended for students wishing to pursue a career teaching secondary school physics. The goal of the program is to allow students to receive a license to teach physics in Virginia secondary schools within 120 credits.

It is recommended that students seeking a career in physics education take PHYS 306 and 307 to fulfill the additional physics requirement (see above) for the major. In addition to the standard requirements for the physics major, students should enroll in 3 credits of directed study in physics laboratory instruction under PHYS 390.

The following courses are required to qualify for the teaching license. Students who complete EDRD 419 and either EDCI 473 or EDCI 483 fulfill 6 of the 12 credits of the Additional Science Courses requirement (see above) and should consult the physics advisor on which courses fulfill the remainder of the requirement.

- PHYS 390 - Topics in Physics Credits: 1-4 (physics laboratory instruction) for 3 credits
- EDCI 473 - Teaching Science in the Secondary School Credits: 3
- EDCI 483 - Advanced Methods of Teaching Science in Secondary School Credits: 3
- EDRD 419 - Literacy in the Content Areas Credits: 3
- EDCI 490 - Student Teaching in Education Credits: 6
- EDUC 372 - Human Development, Learning, and Teaching Credits: 3
- EDUC 422 - Foundations of Secondary Education Credits: 3
- pass the Praxis I and II exams

Total: 24 credits

**Sample Schedule for Physics BS**

(excluding general education courses)

**First Semester**

- MATH 113 - Analytic Geometry and Calculus I Credits: 4
- PHYS 122 - Inside Relativity Credits: 1
- PHYS 123 - Inside the Quantum World Credits: 1
Second Semester

- MATH 114 - Analytic Geometry and Calculus II Credits: 4
- PHYS 160 - University Physics I Credits: 3
- PHYS 161 - University Physics I Laboratory Credits: 1
- CS 112 - Introduction to Computer Programming Credits: 4

Third Semester

- PHYS 251 - Introduction to Computer Techniques in Physics Credits: 3
- PHYS 260 - University Physics II Credits: 3
- PHYS 261 - University Physics II Laboratory Credits: 1
- MATH 213 - Analytic Geometry and Calculus III Credits: 3

Fourth Semester

- PHYS 262 - University Physics III Credits: 3
- PHYS 263 - University Physics III Laboratory Credits: 1
- MATH 203 - Linear Algebra Credits: 3
- MATH 214 - Elementary Differential Equations Credits: 3

Fifth Semester

- PHYS/MATH elective
- PHYS 303 - Classical Mechanics Credits: 3
- PHYS 305 - Electromagnetic Theory Credits: 3
- MATH 313 - Introduction to Applied Mathematics Credits: 3

Sixth Semester

- PHYS 306 - Wave Motion and Electromagnetic Radiation Credits: 3
  or
- PHYS 307 - Thermal Physics Credits: 3
- PHYS 308 - Modern Physics with Applications Credits: 3

Seventh Semester

- PHYS 402 - Introduction to Quantum Mechanics and Atomic Physics Credits: 3
- PHYS 407 - Senior Laboratory in Modern Physics Credits: 3
- PHYS 410 - Computational Physics I Credits: 3
- PHYS 416 - Special Topics in Modern Physics Credits: 1

Eighth Semester

- PHYS 408 - Senior Research Credits: 2-3
Bachelor/Accelerated Master’s

Physics, BS/Applied and Engineering Physics, Accelerated MS

This program allows academically strong undergraduates with a commitment to research to obtain BS and MS degrees by successfully completing 144 credits within five academic years plus summers their last two years. On completion, students are exceptionally well-prepared for entry into a professional school or a PhD program in physics or a related discipline. Well-prepared students are encouraged to apply to this program after they complete 90 credits. Admitted students take selected graduate courses during their senior year (when they have successfully completed prerequisites) and are able to use up to 6 graduate credits in partial satisfaction of requirements for the undergraduate degree. On completion and conferral of that degree and with satisfactory performance (3.00) in the graduate courses, students are given advanced standing in the master’s program and complete an additional 24 credits to receive the master’s degree. All other master’s degree requirements must be met. Contact the Physics undergraduate or graduate academic advisor for further details.

This program of study is offered by the School of Physics, Astronomy, and Computational Sciences in the College of Science.

Physics, BS/Curriculum and Instruction, Accelerated MEd
(Secondary Education Physics Concentration)

Highly qualified undergraduates may be admitted to a Bachelor's/Accelerated Master's program and obtain both a BS in Physics and an MEd in Curriculum and Instruction, Secondary Education Physics Concentration in an accelerated time frame after satisfactory completion of 149 credits.

This program of study is offered jointly by the School of Physics, Astronomy and Computational Sciences in the College of Science and the Graduate School of Education in the College of Education and Human Development.

For policies governing all graduate degrees, see the Academic Policies section of the catalog.

Application Requirements

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in the Admissions section of the catalog. For information specific to this accelerated master's program, see Application Requirements and Deadlines on the College of Education and Human Development web site.

Degree Requirements

Students complete the following courses in their senior year:

- EDCI 573 - Teaching Science in the Secondary School (to be taken in the Fall semester)
- EDUC 672 - Human Development and Learning: Secondary Education (to be taken in the Fall semester)
- EDCI 673 - Advanced Methods of Teaching Science in the Secondary School (to be taken in the Spring semester)
- EDRD 619 - Literacy in Content Areas (to be taken in the Spring semester)

While undergraduate students, accelerated master's students are able to apply two of the courses listed above to both the Bachelor's and Master's degrees. These courses are considered advanced standing for the MEd. A minimum grade of B must be
earned to be eligible to count as advanced standing. The other two courses are taken as reserve graduate credit and do not apply to the undergraduate degree. Early in their final undergraduate semester, students must submit the Bachelor’s/Accelerated Master’s Transition Form and specify which of the four courses are to be designated as advanced standing and reserve graduate credit.

**Doctor of Philosophy**

**Computational Sciences and Informatics, PhD**

**Banner Code:** SC-PHD-CSI

Founded in 1992, the computational sciences and informatics (CSI) doctoral program addresses the role of computation in science, mathematics, and engineering, and is designed around a core of advanced computer technology courses. Computational sciences is defined as the systematic development and application of computing systems and computational solution techniques for modeling and simulation of scientific and engineering phenomena. Informatics is defined as the systematic development and application of computing systems and computational solution techniques for analyzing data obtained through experiments, modeling, database searches, and instrumentation. The resulting interdisciplinary approach often leads to understanding that, in many cases, traditional theory or experimentation alone cannot provide. The close relationship of the CSI doctoral program to the research and development activities in federal laboratories, scientific institutions, and high-technology firms affords students opportunities for continued or new employment. Scheduled courses and sequences accommodate part-time students, with most courses meeting once a week in the late afternoon or early evening. The research and teaching activities associated with the CSI program reflect the recognized role of computation as part of a triad with theory and experimentation, leading to a better understanding of nature.

This program of study is offered by the School of Physics, Astronomy, and Computational Sciences in the College of Science.

**Admission Requirements**

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in the Admission section of this catalog. Students interested in applying for admission into the CSI PhD program should have a bachelor’s degree in any natural science, mathematics, engineering, or computer science with a minimum GPA of 3.00 in their last 60 credits of study. All applicants to the PhD program should have a mathematics background up to and including differential equations. All applicants to the PhD program should also have knowledge of a computer programming language such as C, C++, FORTRAN, etc.

The GRE is required, unless the applicant holds a master’s degree from a school in the United States. A TOEFL score of 570 (paper-based test) or 230 (computer-based test), or 88 points total and a minimum of 20 points in each section (Internet-based test), is required for international students. The ETS code for GMU is 5827.

Students should submit a completed graduate application along with three letters of recommendation, an expanded goals statement, and application fee (payable to George Mason University) in addition to the items listed above.

Applications should be received by March 1 for fall semester and November 1 for spring semester. Applications requesting financial support must be received by February 1 for the fall semester. Please note that applications from local applicants may be accepted after these general deadlines.

Please send completed applications to the address below:

COS Graduate Applications Processing Center
George Mason University
4400 University Drive, MS 6A3
Fairfax, VA 22030
Reduction of Credit

For students entering the doctoral program with a master's degree in a related field from a regionally accredited institution, the number of required credits may be reduced up to 30 credits, subject to approval of the program faculty and the associate dean for student and academic affairs. See the College of Science graduate policies section for more information.

Program of Study

The list of research areas tells only part of the story because the greatest strength of the CSI doctoral program lies in its ability to foster and promote truly interdisciplinary research that crosses traditional domain boundaries. In the CSI doctoral program, each student is presented with an exciting opportunity to create a new area of interdisciplinary inquiry that would not fit into a traditional PhD program. Students in the CSI doctoral program use computationally intensive methods to solve current problems in these scientific areas.

Degree Requirements

The 72-credit doctoral program combines three intellectual elements:

- Core computational science topics
- Computational intensive courses in specific scientific areas
- Research leading to the dissertation

The doctoral program, designed to be completed in 4 to 5 years, includes the following requirements:

- 12 credits of core computational courses (scientific computing, databases, visualization)
- 33 credits of computational courses with at least 24 credits of CSI courses listed in the catalog
- 3 credits in CSI colloquium/seminar
- 24 credits in dissertation research

Students must satisfy all requirements for doctoral degrees expressed in the Academic Policies section of this catalog.

Doctoral Course Work (48 credits)

Students are required to take 33 credits of science courses with at least 24 credits of CSI courses. Lists of courses that set the foundations for each research area are provided as guideline only.

General Core Courses (12 credits)

Select from the following:

- CSI 700 - Numerical Methods Credits: 3
- CSI 701 - Foundations of Computational Science Credits: 3
- CSI 702 - High-Performance Computing Credits: 3
- CSI 703 - Scientific and Statistical Visualization Credits: 3
- CSI 710 - Scientific Databases Credits: 3

Areas of Emphasis (12-15 credits)
Students are advised to choose one of the research areas listed below. Students may also pursue interdisciplinary research that combines the areas of emphasis listed below with each other and also with quantum information science, climate dynamics, bioinformatics, and computational neuroscience.

### Computational Fluid Dynamics

- CSI 720 - Fluid Mechanics Credits: 3
- CSI 721 - Computational Fluid Dynamics I Credits: 3
- CSI 722 - Computational Fluid Dynamics II Credits: 3
- CSI 742 - The Mathematics of the Finite Element Method Credits: 3

plus one from:

- CSI 685 - Fundamentals of Materials Science Credits: 3
- CSI 729 - Topics in Continuum Systems Credits: 3
- CSI 780 - Computational Physics and Applications Credits: 3
- CSI 786 - Molecular Dynamics Modeling Credits: 3
- CSI 787 - Computational Materials Science Credits: 3
- CSI 789 - Topics in Computational Physics Credits: 3 (when topic is Mechanics of Solids)

### Computational Materials and Physical Chemistry Sciences

- CSI 685 - Fundamentals of Materials Science Credits: 3
- CSI 780 - Computational Physics and Applications Credits: 3
- CSI 782 - Statistical Mechanics for Modeling and Simulation Credits: 3
  or
- CSI 783 - Computational Quantum Mechanics Credits: 3
- CSI 787 - Computational Materials Science Credits: 3

plus one from:

- CSI 786 - Molecular Dynamics Modeling Credits: 3
- CSI 789 - Topics in Computational Physics Credits: 3 (when topic is Mechanics of Solids)
- CSI 885 - Atomistic Modeling of Materials Credits: 3

### Space Sciences and Computational Astrophysics

- PHYS 685 - Classical Electrodynamics I Credits: 3
- CSI 661 - Stellar Astrophysics Credits: 3
  or
- CSI 662 - Introduction to Space Weather Credits: 3
- CSI 781 - Plasma Science Credits: 3
  or
- CSI 764 - Computational Astrophysics Credits: 3

plus two from:

- CSI 721 - Computational Fluid Dynamics I Credits: 3
• CSI 763 - Statistical Methods in Space Sciences Credits: 3
• CSI 780 - Computational Physics and Applications Credits: 3
• CSI 782 - Statistical Mechanics for Modeling and Simulation Credits: 3
• CSI 783 - Computational Quantum Mechanics Credits: 3

Computational Mathematics

• CSI 740 - Numerical Linear Algebra Credits: 3
• CSI 742 - The Mathematics of the Finite Element Method Credits: 3
• CSI 747 - Nonlinear Optimization and Applications Credits: 3
• CSI 771 - Computational Statistics Credits: 3
• CSI 786 - Molecular Dynamics Modeling Credits: 3

Computational Physics

• CSI 780 - Computational Physics and Applications Credits: 3
• CSI 782 - Statistical Mechanics for Modeling and Simulation Credits: 3
• CSI 783 - Computational Quantum Mechanics Credits: 3

plus two from:

• CSI 781 - Plasma Science Credits: 3
• CSI 786 - Molecular Dynamics Modeling Credits: 3
• CSI 787 - Computational Materials Science Credits: 3
• CSI 788 - Simulation of Large-Scale Physical Systems Credits: 3

Computational Statistics

• CSI 771 - Computational Statistics Credits: 3
• CSI 773 - Statistical Graphics and Data Exploration Credits: 3
  or
• CSI 876 - Measure and Linear Spaces Credits: 3
  or
• CSI 971 - Probability Theory Credits: 3
• CSI 972 - Mathematical Statistics I Credits: 3
• CSI 973 - Mathematical Statistics II Credits: 3

Computational Learning

• CSI 771 - Computational Statistics Credits: 3
• CSI 772 - Statistical Learning Credits: 3
• CSI 773 - Statistical Graphics and Data Exploration Credits: 3
• CSI 777 - Principles of Knowledge Mining Credits: 3
• CSI 873 - Computational Learning and Discovery Credits: 3

Colloquium/Seminar (3 credits)
The School of Physics, Astronomy, and Computational Sciences offers several weekly colloquia and seminar series to ensure that students are exposed to the latest developments at area research institutions. Doctoral students are encouraged to participate in national and international meetings where they can present their latest findings.

Students take 3 credits from CSI 898 or CSI 991 (courses may be repeated).

- CSI 898 - Research Colloquium in Computational Sciences and Informatics Credits: 1
- CSI 991 - Seminar in Scientific Computing Credits: 1

Electives (18-21)

If necessary, students take additional electives in consultation with program director to bring the total number of credits to 72.

Interdisciplinary Studies

Students may also pursue interdisciplinary research that combines the areas of emphasis listed above with each other and also with geoinformation sciences, remote sensing, computational chemistry, climate dynamics, and bioinformatics, several of which are autonomous PhD programs within COS.

Candidacy Examination

The student must successfully complete separate written, computational, and oral candidacy examinations prepared and administered by the dissertation committee.

Dissertation Proposal and Advancement to Candidacy

Students advance to doctoral candidacy by fulfilling the following requirements:

- The student must successfully complete candidacy examinations as stated above.
- The student prepares a dissertation proposal describing in detail the planned dissertation research. The proposal must be approved by the dissertation committee.
- Following successful completion of the research proposal and candidacy exams, the committee will recommend the student for advancement to doctoral candidacy.

Doctoral Research (24 credits)

No more than 24 combined credits from CSI 998 and CSI 999 may be applied toward satisfying doctoral degree requirements, with no more than 12 credits of CSI 998.

- CSI 998 - Doctoral Dissertation Proposal Credits: 1-12
- CSI 999 - Doctoral Dissertation Credits: 1-12 (minimum 3 credits at first registration)

Dissertation Research and Defense

After advancing to candidacy, the student will work on a doctoral dissertation while enrolled in CSI 999. The dissertation is a written piece of original mathematics that demonstrates a doctoral candidate’s mastery of the subject matter. A student is expected to produce new and original research worthy of publication in a peer-reviewed journal. After the dissertation is completed, the committee will review the dissertation and examine the student in a public oral dissertation defense.
Total: 72 credits

Academic Common Market

The CSI PhD degree has been approved for access by residents of Maryland through the Academic Common Market (ACM). The ACM allows full-time students who are certified residents of Maryland to enroll in the CSI PhD program while paying the Virginia in-state tuition rate, which is about one-third of the out-of-state tuition rate that residents of Maryland would otherwise have to pay. Details regarding Maryland’s participation in the ACM may be found at www.mhec.state.md.us/index.asp. The ACM program code for the CSI Doctoral Program is 300801. Interested students should contact the Office of the University Registrar, Certifications Services, at 703-993-2448.

Physics, PhD

Banner Code: SC-PH-PHYS

All doctoral students accepted into the physics PhD program take a common core of four courses (see below). By working with the Dissertation Committee, a student may choose to specialize in an emphasis area such as astrophysics, biophysics, nonlinear physics, planetary sciences, material physics, space weather physics, or others according to his or her particular interests. By the end of their first year, all students should pair with a faculty advisor who will guide them toward doctoral candidacy.

This program of study is offered by the School of Physics, Astronomy, and Computational Sciences in the College of Science.

Admission Requirements

Those holding a baccalaureate degree in physics or astronomy from an accredited institution, who earned a GPA of 3.00 (out of 4.00) or higher in their last 60 credits, and received acceptable scores on the GRE-GEN are invited to apply for admission. Three letters of recommendation must be submitted, preferably from former professors. The GRE subject test in physics is highly recommended for all interested applicants who received their baccalaureate degrees within the past five years. A degree-seeking graduate applicant with a baccalaureate degree who has not met all admission requirements may be offered provisional admission if sufficient evidence is presented to suggest that the applicant has the ability to pursue graduate work. For more details concerning admission requirements to George Mason University please refer to the Graduate Admission Policies and Admission of International Students sections of this catalog.

Reduction of Credit

For students entering the doctoral program with a master's degree in a related field from a regionally accredited institution, the number of required credits may be reduced up to 30 credits, subject to approval of the program faculty and the associate dean for student and academic affairs. See the College of Science graduate policies section for more information.

Degree Requirements

Students must satisfy all requirements for doctoral degrees expressed in the Academic Policies section of this catalog.

All students in the Physics PhD program must earn a minimum of 72 graduate credits. Of these, 48 are required course work and preliminary research credits, and 24 are doctoral dissertation proposal and doctoral dissertation research credits. For students entering the doctoral program with a master's degree in physics or a related field, or relevant graduate course work, the 48 credit requirement may be reduced by a maximum of 30 credits.

Doctoral Course Work (48 credits)
Physics Core (12 credits)

Note: the doctoral candidacy (qualifying) examination is based on the topics covered in these four core courses.

- PHYS 684 - Quantum Mechanics I Credits: 3
- PHYS 685 - Classical Electrodynamics I Credits: 3
- PHYS 705 - Classical Mechanics Credits: 3
- PHYS 711 - Statistical Mechanics Credits: 3

Qualifying Examination

All students must successfully pass the four individual sections (quantum mechanics, electromagnetic theory, classical mechanics and statistical mechanics) of a qualifying examination. The four topics in the qualifying exam are covered in the four core courses (PHYS 684, PHYS 685, PHYS 705 and PHYS 711). All four sections of the qualifying exam will be offered twice a year typically in the week before the start of the fall and spring semesters. A student can choose to take a particular section or a combination of sections at one sitting. Grades of "pass" or "unsatisfactory" will be given individually for each of the four sections of the exam. If a student receives a grade of "unsatisfactory" in a given section of the exam, he/she is allowed to retake that section in the next cycle but a student must satisfactorily pass all sections of the exam by the end of the third year from the date of enrollment in the PhD program. Students entering the program with equivalent courses taken at another institution can satisfy the core requirement by taking the qualifying exam without taking the course.

At the beginning of each academic year, the program director will appoint members to the qualifying examination committee. This committee is responsible for creating, administering, and grading the qualifying exams offered that year. Additional information and previous qualifying exams can be found at http://complex.gmu.edu/phd/qualifier.html.

Dissertation Committee and Program of Study

Upon successful completion of the qualifying examinations, a Dissertation Committee should be formed by the student as soon as possible. This chair of this committee must be a graduate faculty member from the School of Physics, Astronomy and Computational Sciences. The committee must include at least two additional members from the graduate faculty, one of whom must be from outside SPACS. The composition of the committee must be approved by the program director. The Dissertation Committee is responsible for directing the student in their chosen field of research. The student should work closely with their committee to select specialty courses and electives that form a cohesive program of study. The student's program of study must be approved by the dean before advancement to candidacy.

Specialty Science Courses (6 credits)

Students must complete two out of the following four physics and astronomy electives

- PHYS 784 - Quantum Mechanics II Credits: 3
- PHYS 785 - Classical Electrodynamics II Credits: 3
- ASTR 680 - Physics of Interstellar Media Credits: 3
- ASTR 730 - Stellar Astrophysics Credits: 3

General Science Electives (27 credits)

27 credits of approved general electives and preliminary research credits

- PHYS 796 - Directed Reading and Research Credits: 1-12
- PHYS 798 - Research Project Credits: 3
• ASTR 796 - Directed Reading and Research Credits: 1-6
• ASTR 798 - Research Project Credits: 3

NOTE: PHYS 796/ASTR 796 may be repeated as needed. General electives may be any graduate level courses chosen from physics, astronomy and/or other related disciplines approved by the student's advisor or dissertation committee.

Seminar (3 credits)

• PHYS 703 - Seminar in Physics Credits: 1 (must be taken three times)

Advancement to Candidacy

Before a student may be advanced to doctoral candidacy, he/she needs to complete all required course work, pass the qualifying examination, have the program of study and dissertation proposal approved by the dean, and been recommended by the dissertation committee. Advancement to doctoral candidacy implies that the student has demonstrated adequate breadth and depth of knowledge in the field of study and is capable of conducting research on the boundaries of knowledge.

Dissertation Research (24 credits)

Note: no more than 24 combined credits from PHYS/ASTR 998 and PHYS/ASTR 999 may be applied toward satisfying the doctoral degree requirements, with no more than 12 credits of PHYS/ASTR 998.

• ASTR 998 - Doctoral Dissertation Proposal Credits: 1-12
• ASTR 999 - Doctoral Dissertation Credits: 1-12
• PHYS 998 - Doctoral Dissertation Proposal Credits: 1-12
• PHYS 999 - Doctoral Dissertation Credits: 1-12

Doctoral Dissertation

After advancing to doctoral candidacy, the student works with their Dissertation Committee to develop their preliminary research into a doctoral dissertation. The dissertation research should represent a significant contribution to its scientific field and should be deemed publishable in a refereed scientific journal. The dissertation must be defended in a public forum before the Dissertation Committee and other interested faculty.

Total: 72 credits

Graduate Certificate

Computational Techniques and Applications Graduate Certificate

Banner Code: SC-CERG-CTA

This certificate program focuses on mastering a variety of basic computational skills. The certificate is independent of the doctoral and master’s programs and is designed primarily for professionals in technical fields who seek to upgrade their computer expertise. This program is also available as an option for prospective or currently enrolled doctoral or master’s degree students.

The program comprises 15 credits of course work designed to provide an accelerated introduction to concepts in modern computation. Topics include operating systems, environments, languages, graphics, databases, and applications. Special course schedules may be designed depending upon the background and qualifications of the student.
Special course schedules may be designed depending upon the background and qualifications of the student. For example, some (or all) of the tool and techniques courses may be waived if the equivalent knowledge can be adequately demonstrated by the student. The waived credits are to be replaced with applications courses approved by the director of the certificate program. The recommended course sequence is tools and then applications.

The graduate certificate in computational techniques and applications may be pursued only on a part-time basis.

This program of study is offered by the School of Physics, Astronomy, and Computational Sciences in the College of Science.

**Admission Requirements**

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in the Admission section of this catalog. Applicants to the Computational Techniques and Applications Graduate Certificate should have an academic background in physical or biological sciences, engineering, mathematics, or computer science. They should have an undergraduate degree from an accredited institution, with a GPA of at least 3.00 in their last 60 credits of study. In addition, applicants should have taken at least one course in differential equations and have facility in using a high-level computer programming language.

To apply, prospective students should forward a completed Mason graduate application, two copies of official transcripts from each college and graduate institution attended, and a current résumé to the COS Fairfax Campus Graduate Admissions Processing Center. TOEFL scores are required of all international applicants.

**Certificate Requirements**

**Tools Courses (3-12 credits as needed)**

The tools courses are practical, skill-based courses covering specific software packages commonly used by scientists and engineers to solve problems. Depending on the student's background, 3-12 credit hours of tools courses are required. These courses are designed for professionals who are already familiar with other languages, packages and operating systems, but need a rapid introduction to specific software and mathematical methods used by scientists and engineers. One 3-credit tools course is required.

- Choose one to four courses from the following:
  - CSI 500 - Computational Science Tools Credits: 3
  - CSI 501 - Introduction to Scientific Programming Credits: 3
  - CSI 600 - Quantitative Foundations for Computational Sciences Credits: 3
  - CSI 700 - Numerical Methods Credits: 3

**Applications Courses (minimum 3 credits)**

The applications courses provide content from a specific scientific domain and demonstrate the utilization of techniques within the context. These courses are electives and can be selected from any CSI emphasis area. One 3-credit applications course is required.

- Choose from any CSI course listed in the catalog excluding CSI 796, 798, 799, 898, 899 996, 991, 996 and the courses used to satisfy the tools category

**Total: 15 credits**

**Master of Science**
Applied and Engineering Physics, MS

Banner Code: SC-MS-PHAE

This degree contains elements of traditional physics programs and the application of physics to a diversity of critical societal problems. The program is divided into three areas of emphasis. The standard emphasis is intended for students who may wish to pursue further graduate study in physics leading to a PhD degree in preparation for a career in basic research. The applied physics emphasis is intended for those who wish to apply the techniques and subject areas of physics to multifaceted problems encountered in the workplace, particularly in physics, engineering, computational science, and other related areas. The engineering physics emphasis allows students to select a larger number of courses from electrical engineering or nanotechnology and other areas.

Many courses are offered during late afternoon or evening hours to allow students with full-time employment to attend easily. Students employed at area high-technology organizations may take up to 6 credits (out of 30) for work done on the job under the guidance of a faculty member. This employment-related research may be conducted under an optional 3-credit research project or an optional 6-credit master's thesis. Master's students who are not employed full time may apply for financial aid or a limited number of research assistantships.

An accelerated master's option is available to students in the bachelor's program. See Physics, BS/Applied and Engineering Physics, Accelerated MS for specific requirements.

This program of study is offered by the School of Physics, Astronomy, and Computational Sciences in the College of Science.

Admission Requirements

Individuals holding a baccalaureate degree in physics or a related field from an accredited institution and who earned a GPA of 3.00 (out of 4.00) in their last 60 credits are invited to apply for admission. If the baccalaureate degree is in a field other than physics, applicants should have taken several courses beyond the introductory physics courses, such as junior-level classical mechanics, electricity and magnetism, or electronics. Applicants may be required to make up one or two deficiencies, based on a graduate physics advisor’s assessment, and be provisionally admitted into the program. Three letters of recommendation must be submitted, preferably from former professors. The general GRE and the GRE subject test in physics are recommended for applicants who received their baccalaureate degrees within the past five years.

Degree Requirements

Candidates for the degree must successfully complete 30 credits in the categories shown below:

6 credits of required core courses:

- PHYS 684 - Quantum Mechanics I Credits: 3
- PHYS 685 - Classical Electrodynamics I Credits: 3

For the applied physics emphasis and the engineering physics emphasis, students may substitute:

- PHYS 502 - Introduction to Quantum Mechanics and Atomic Physics Credits: 3 (for PHYS 684)
- PHYS 513 - Applied Electromagnetic Theory Credits: 3 (for PHYS 685)

15 credits in one of three emphases:
Standard Emphasis

Students must take:

- PHYS 705 - Classical Mechanics Credits: 3
- PHYS 711 - Statistical Mechanics Credits: 3

Plus any 9 credits from this list

- PHYS 510 - Computational Physics I Credits: 3
- PHYS 512 - Solid State Physics and Applications Credits: 3
- PHYS 533 - Modern Instrumentation Credits: 3
- PHYS 540 - Nuclear and Particle Physics Credits: 3
- PHYS 575 - Atmospheric Physics I Credits: 3
- PHYS 611 - Electro-optics Credits: 3
- PHYS 612 - Physics of Modern Imaging Credits: 3
- PHYS 613 - Computational Physics II Credits: 3
- PHYS 614 - Thermodynamics and Kinetics of Materials Credits: 3
- PHYS 615 - Fundamentals of Materials Science Credits: 3
- PHYS 620 - Continuum Mechanics Credits: 3
- PHYS 630 - Introduction to Biophysics Credits: 3
- PHYS 660 - Space Weather Credits: 3
- PHYS 676 - Atmospheric Physics Credits: 3
- PHYS 684 - Quantum Mechanics I Credits: 3
- PHYS 685 - Classical Electrodynamics I Credits: 3
- PHYS 701 - Theoretical Physics Credits: 3
- PHYS 728 - Simulation of Large-Scale Physical Systems Credits: 3
- PHYS 736 - Computational Quantum Mechanics Credits: 3
- PHYS 760 - Space Plasma Physics Credits: 3
- PHYS 780 - Advanced Selected Topics in Physics Credits: 3
- PHYS 784 - Quantum Mechanics II Credits: 3
- PHYS 785 - Classical Electrodynamics II Credits: 3
- ASTR 532 - Phys Interplanetary Med Credits: 3
- ASTR 602 - Methods of Observational Astronomy Credits: 4
- ASTR 604 - Galaxies and Cosmology Credits: 3
- ASTR 628 - Relativity Credits: 3
- ASTR 660 - Plasma Physics for Space and Astrophysics Credits: 3
- ASTR 680 - Physics of Interstellar Media Credits: 3
- ASTR 730 - Stellar Astrophysics Credits: 3
- ASTR 761 - N-Body Methods and Part Sim Credits: 3
- ASTR 764 - Computational Astrophysics Credits: 3
- ASTR 765 - High-Energy and Accretion Astrophysics Credits: 3
- CSI 720 - Fluid Mechanics Credits: 3
- CSI 721 - Computational Fluid Dynamics I Credits: 3
- CSI 722 - Computational Fluid Dynamics II Credits: 3
- CSI 786 - Molecular Dynamics Modeling Credits: 3
- CSI 787 - Computational Materials Science Credits: 3
Total: 15 credits

Engineering physics emphasis

Students should take:

- PHYS 510 - Computational Physics I Credits: 3
- PHYS 533 - Modern Instrumentation Credits: 3
- 9 credits of ECE graduate courses

Total: 15 credits

Applied physics emphasis

Students should take:

- PHYS 510 - Computational Physics I Credits: 3
- PHYS 533 - Modern Instrumentation Credits: 3

plus any 9 credits from this list:

- ASTR 535 - Space Instrumentation and Exploration Credits: 3
- BINF 731 - Protein Structure Analysis Credits: 3
- BINF 741 - Introduction to Computer Simulations of Biomolecules Credits: 3
- CLIM 710 - Introduction to Physical Climate System Credits: 3
- CLIM 711 - Introduction to Atmospheric Dynamics Credits: 3
- CLIM 712 - Physical and Dynamical Oceanography Credits: 3
- CLIM 713 - Atmosphere-Ocean Interactions Credits: 3
- CLIM 714 - Land-Climate Interactions Credits: 3
- CLIM 715 - Numerical Methods for Climate Modeling Credits: 3
- CLIM 750 - Geophysical Fluid Dynamics Credits: 3
- CSI 742 - The Mathematics of the Finite Element Method Credits: 3
- CSI 763 - Statistical Methods in Space Sciences Credits: 3
- CSI 782 - Statistical Mechanics for Modeling and Simulation Credits: 3
- CSI 783 - Computational Quantum Mechanics Credits: 3
- ECE 521 - Modern Systems Theory Credits: 3
- ECE 528 - Introduction to Random Processes in Electrical and Computer Engineering Credits: 3
- ECE 548 - Sequential Machine Theory Credits: 3
- ECE 565 - Introduction to Optical Electronics Credits: 3
- ECE 584 - Semiconductor Device Fundamentals Credits: 3
- ECE 699 - Advanced Topics in Electrical and Computer Engineering Credits: 1-6
- PHYS 581 - Topics in Renewable Energy Credits: 3
- or any course listed in the Standard Emphasis

Total: 15 credits

9 credits of electives chosen from courses in:
Physics, chemistry, mathematics, engineering, information technology, and computational sciences and informatics. No more than 6 credits may be chosen from areas outside ASTR, CSI, ECE, NANO, and PHYS. Elective credits can include a project or thesis.

- ECE 798 - Research Project Credits: 1-3
- ECE 799 - Master's Thesis Credits: 1-6
- PHYS 798 - Research Project Credits: 3
- PHYS 799 - Master's Thesis Credits: 1-6

Notes:

Students may choose to do either ECE/PHYS 798 Research Project (3 credits) or ECE/PHYS 799 Master’s Thesis (6 credits), but not both. The research project may be conducted at a student’s place of employment with the concurrence of a faculty advisor.

The thesis is a more substantial piece of work performed under the supervision of a faculty member and requires students to make an oral defense. ECE/PHYS 798 may be taken only once. No more than 6 credits of PHYS 799 may be applied to the degree.

In addition to the requirements stated above, students may also select a research focus in astrophysics, atmospheric physics, biological applications of physics, computational physics, condensed matter, instrumentation (engineering physics), or nonlinear dynamics. A focus requires that students complete 15 credits of approved courses.

Students in the master’s degree program can earn a graduate certificate in computational techniques and applications from the School of Physics, Astronomy, and Computational Sciences by choosing an approved sequence of courses.

Total 30 credits

Sample course lists for various focus areas:

Astrophysics:

- PHYS 701 - Theoretical Physics Credits: 3
- PHYS 711 - Statistical Mechanics Credits: 3
- ASTR 680 - Physics of Interstellar Media Credits: 3

Atmospheric physics:

- PHYS 510 - Computational Physics I Credits: 3
- PHYS 676 - Atmospheric Physics Credits: 3
- CLIM 710 - Introduction to Physical Climate System Credits: 3
- CLIM 713 - Atmosphere-Ocean Interactions Credits: 3

Biophysics:

- PHYS 510 - Computational Physics I Credits: 3
- PHYS 630 - Introduction to Biophysics Credits: 3
- PHYS 711 - Statistical Mechanics Credits: 3
- BINF 731 - Protein Structure Analysis Credits: 3
• NEUR 751 - Applied Dynamics in Neuroscience Credits: 3

Computational physics:

• PHYS 510 - Computational Physics I Credits: 3
• PHYS 613 - Computational Physics II Credits: 3
• PHYS 780 - Advanced Selected Topics in Physics Credits: 3
• CSI 744 - Linear and Nonlinear Modeling in the Natural Sciences Credits: 3
• CSI 764 - Computational Astrophysics Credits: 3

Instrumentation/engineering physics:

• PHYS 510 - Computational Physics I Credits: 3
• PHYS 533 - Modern Instrumentation Credits: 3
• NANO 500 - Introduction to Nanomaterials and Interactions Credits: 3
• NANO 510 - Strategies for Nanocharacterization Credits: 3
• ECE 699 - Advanced Topics in Electrical and Computer Engineering Credits: 1-6

Material physics:

• PHYS 784 - Quantum Mechanics II Credits: 3
• PHYS 785 - Classical Electrodynamics II Credits: 3
• PHYS 711 - Statistical Mechanics Credits: 3
• PHYS 512 - Solid State Physics and Applications Credits: 3
• PHYS 614 - Thermodynamics and Kinetics of Materials Credits: 3

Nonlinear dynamics:

• PHYS 510 - Computational Physics I Credits: 3
• PHYS 701 - Theoretical Physics Credits: 3
• PHYS 705 - Classical Mechanics Credits: 3
• MATH 673 - Dynamical Systems Credits: 3
• NEUR 751 - Applied Dynamics in Neuroscience Credits: 3

Physics:

• PHYS 784 - Quantum Mechanics II Credits: 3
• PHYS 785 - Classical Electrodynamics II Credits: 3
• PHYS 701 - Theoretical Physics Credits: 3
• PHYS 705 - Classical Mechanics Credits: 3
• PHYS 711 - Statistical Mechanics Credits: 3

Computational Science, MS

Banner Code: SC-MS-COMP
The master’s program in computational science addresses the growing national and regional demand for trained computational scientists. It combines a solid foundation in information technology skills with computational courses in a variety of scientific areas. All courses are offered in the late afternoon or early evening to accommodate students with full-time employment outside the university.

The 30 credit hour curriculum is centered on a strong computational component, comprising 9 credits of core courses, with the remaining 21 credits taken in a broad range of scientific areas chosen from the different concentrations in the CSI PhD curriculum. This provides students with a flexible set of options that can be used to create their own customized curriculum under the guidance of a faculty advisor. Students are encouraged to undertake an optional master’s thesis or research project that allows them to gain useful experience in the development of simulations and other aspects of computational science.

This program of study is offered by the School of Physics, Astronomy, and Computational Sciences in the College of Science.

**Admission Requirements**

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in the Admission section of this catalog. Applicants to the master's degree in computational science should have academic backgrounds in physical or biological sciences, engineering, mathematics, or computer science. They should have an undergraduate degree from an accredited institution, with a GPA of at least 3.00 in their last 60 credits of study. In addition, applicants should have taken at least one course in differential equations and have facility in using a high-level computer programming language.

To apply, prospective students should forward a completed Mason graduate application, two copies of official transcripts from each college and graduate institution attended, a current résumé, and an expanded goals statement to the COS Fairfax Campus Graduate Admissions Processing Center. Applicants should also include three letters of recommendation and an official report of scores on the GRE-GEN. The GRE-SUB is recommended if it is given in the student’s undergraduate major. The GRE requirement will be waived if the student holds a master’s degree from a U.S. institution. TOEFL scores are required of all international applicants. For more information, see the Admission of International Students section in the Admission section.

**Degree Requirements**

Candidates must successfully complete 30 credits as follows:

**Three courses (9 credits) from the computational core, chosen from:**

- CSI 700 - Numerical Methods Credits: 3
- CSI 701 - Foundations of Computational Science Credits: 3
- CSI 702 - High-Performance Computing Credits: 3
- CSI 703 - Scientific and Statistical Visualization Credits: 3
- CSI 710 - Scientific Databases Credits: 3

**Computational electives (15 credits)**

- 15 credits of CSI courses listed in the catalog *not including* CSI 796, 798, 799, 898, 899, 991 and 996.

**Scientific electives (6 credits)**

- Two 3-credit courses approved by the student's advisor.
• Students can apply 6 credits of CSI 799 - Master's Thesis Credits: 1-6 or 3 credits of CSI 798 - Research Project Credits: 3 towards the elective requirement.

Total: 30 credits

Non-Degree

Astronomy Minor

Banner Code: ASTR

The minor requires completion of 18 or 20 credits in physics and astronomy, with a minimum GPA of 2.00. Eight credits of course work must be unique to the minor. For policies governing all minors, see the Academic Policies section of this catalog.

This program of study is offered by the School of Physics, Astronomy, and Computational Sciences in the College of Science.

Course Work

Core (12 or 14 credits)

Students will take one of the following sequences listed below.

Sequence One

• PHYS 243 - College Physics Credits: 3 and PHYS 245 - College Physics Credits: 3
  or
• PHYS 160 - University Physics I Credits: 3 and PHYS 260 - University Physics II Credits: 3
  plus
• ASTR 111 - Introductory Astronomy: The Solar System Credits: 3
• ASTR 112 - Introductory Astronomy Lab: The Solar System Credits: 1
• ASTR 113 - Introductory Astronomy: Stars, Galaxies, and the Universe Credits: 3
• ASTR 114 - Introductory Astronomy Lab: Stars, Galaxies, and the Universe Credits: 1

Sequence Two

• PHYS 160 - University Physics I Credits: 3
• PHYS 260 - University Physics II Credits: 3
• PHYS 262 - University Physics III Credits: 3
• ASTR 210 - Introduction to Astrophysics Credits: 3

Astronomy Electives (6 credits chosen from the following):

• ASTR 301 - Astrobiology Credits: 3
• ASTR 302 - Foundations of Cosmological Thought Credits: 3
• ASTR 328 - Stars and Interstellar Medium Credits: 3
• ASTR 402 - Methods of Observational Astronomy Credits: 4
Computational and Data Sciences Minor

Banner Code: CDS

The minor in Computational and Data Sciences (CDS) provides an attractive option for students majoring in mathematics, science, or engineering who wish to augment their major degree program with additional courses in scientific computing. The combination of computer science, numerical methods, science, and CDS synthesis courses will significantly enhance the practical knowledge and computational skills of the students when compared with the major field alone. By absorbing the material in this curriculum, students will acquire the knowledge, skills, and techniques commonly used across scientific disciplines, which will allow them to apply their Mason education in a practical way in industrial, government, and academic settings.

At least 8 credits must be unique to this minor and may not be used to fulfill requirements of the student’s major, concentration, or another minor or undergraduate certificate. Students must complete at least 6 credits in their minor at Mason and achieve a minimum GPA of 2.00 in courses applied to the minor. For policies governing all minors, see the Academic Policies section of this catalog.

The minor in CDS consists of 15 credits of course work. For additional information, please call 703-993-8402, fax 703-993-9300, or e-mail: kborne@gmu.edu

This program of study is offered by the School of Physics, Astronomy, and Computational Sciences in the College of Science.

Course Work

Students must take one of the following two courses:
• CDS 101 - Introduction to Computational and Data Sciences Credits: 3
• CDS 130 - Computing for Scientists Credits: 3

9 credits chosen from:
• Any CDS or CSI courses

3 credits chosen from:
• Any College of Science course at the 300 level or above. Other discipline-based courses may be permitted with permission of the undergraduate program director.

Total: 15 credits

Note:
Many of the courses listed above have additional prerequisites. Nonetheless, the CDS minor is within efficient reach of most students majoring in science, mathematics, engineering, or computer science, since these students will generally have the prerequisites for the classes listed above.

**Physics Minor**

**Banner Code: PHYS**

This program of study is offered by the School of Physics, Astronomy, and Computational Sciences in the College of Science.

**Course Work**

The minor requires 18 credits with a minimum GPA of 2.00, 8 credits of which must be unique to the minor. For policies governing all minors, see the Academic Policies section of this catalog.

- PHYS 160 - University Physics I Credits: 3
- PHYS 161 - University Physics I Laboratory Credits: 1
- PHYS 260 - University Physics II Credits: 3
- PHYS 261 - University Physics II Laboratory Credits: 1
- PHYS 262 - University Physics III Credits: 3
- PHYS 263 - University Physics III Laboratory Credits: 1

Any two courses from:

- PHYS 303 - Classical Mechanics Credits: 3
- PHYS 306 - Wave Motion and Electromagnetic Radiation Credits: 3
- PHYS 307 - Thermal Physics Credits: 3
- PHYS 308 - Modern Physics with Applications Credits: 3
- PHYS 402 - Introduction to Quantum Mechanics and Atomic Physics Credits: 3
- PHYS 428 - Relativity Credits: 3
- PHYS 305 - Electromagnetic Theory Credits: 3
- PHYS 513 - Applied Electromagnetic Theory Credits: 3

**Total: 18 credits**

**Renewable Energy Interdisciplinary Minor**

**Banner Code: RNRG**

This college-wide interdisciplinary minor administered by the School of Physics, Astronomy and Computational Sciences is designed for students considering a career in the field of renewable energy, or as preparation for graduate work in a wide range of academic disciplines. Renewable energy, as normally understood, includes a variety of methods of energy generation, such as solar, wind, hydro, tidal, and geothermal, as well as energy storage methods and energy conservation. Jobs related to renewable energy lie in a wide range of areas including engineering, business, marketing, finance, installation, software, legal affairs, and research. Projections suggest that employment opportunities in the renewable energy field will increase dramatically in the near future. The renewable energy minor is therefore ideally suited for students with majors in engineering, business, and basic...
The minor in renewable energy comprises 18-20 credits of course work. Eight credits must be unique to the minor. For policies governing all minors, see the Academic Policies section of this catalog.

This program of study is offered by the School of Physics, Astronomy, and Computational Sciences in the College of Science.

Course Work

Core Courses (10 credits)

- PHYS 331 - Fundamentals of Renewable Energy Credits: 3
- PHYS 385 - Materials Science with Applications to Renewable Energy Credits: 3
- MATH 113 - Analytic Geometry and Calculus I Credits: 4

Physics (1-3 credits)

Choose one from the following:

- PHYS 245 - College Physics Credits: 3
- PHYS 262 - University Physics III Credits: 3
- PHYS 266 - Introduction to Thermodynamics Credits: 1

Chemistry (4 credits)

Choose one from the following:

- CHEM 211 - General Chemistry Credits: 4
- CHEM 212 - General Chemistry Credits: 4
- CHEM 251 - General Chemistry for Engineers Credits: 4

Internship (3 credits)

Students may choose one of the following options:

- PHYS 409 - Physics Internship Credits: 3 focused on renewable energy
- a 3-credit internship focusing on renewable energy in another natural science or engineering field

Total: 18-20 credits

School of Systems Biology

Phone: 703-993-8400
Web: ssb.gmu.edu

Faculty
Professors: Bailey (distinguished), Jafri, Kashanchi, Liotta, Petricoin, Popov, Seto, Soyfer (distinguished university professor), Vaisman (Associate Director), Willett (Acting Director), Wu

Associate professors: Baranova, Christensen, Cox, Fryxell, Grant, Kinser, Klimov

Assistant professors: Hakami, Kehn-Hall, Luchini, van Hoek

Adjunct faculty: Pitt, Solka

Affiliate faculty: Baxevanis, Bokhari, Camphausen, Carr, Cooper, Grefenstette, Ikonomi, Kim, Lipsky, Masso, Marr, Matson, Matthews, Monroe, Reck, Sobie, Van Tassell, Ward, Williams

Emeritus: Isbister, Royt

The School of Systems Biology results from the merger of the Department of Molecular and Microbiology with the Department of Bioinformatics and Computational Biology. The School offers undergraduate and graduate degree programs in bioinformatics, and graduate degree programs in biology and bioscience. The School also offers research opportunities at the graduate and undergraduate levels. For additional details about current faculty research activities, please visit the School's website, ssb.gmu.edu.

Course Work

The School offers all graduate and undergraduate course work designated BINF and BIOS in the Courses section of this catalog, as well as all BIOL graduate courses.

Other Undergraduate Programs

The School of Systems Biology works closely with and provides faculty and administrative support to the Biology Undergraduate Program, through which the BA and BS degrees in Biology are offered. Refer to the Biology Undergraduate Program section for more information on bachelor's degrees in Biology.

Policy on Using Laboratories

Only authorized experiments and exercises may be carried out in the School's research and teaching laboratories and must be done under the supervision of a university faculty or staff member. No unauthorized work is allowed in any laboratory.

Policy on Using Organisms in Classes

Direct observations of actual organisms are considered an essential part of learning biology at all levels. Direct observations of organisms may involve the use of living or preserved specimens, dissections of organisms or parts of organisms, and microscopic examination of organisms or parts of organisms. All use of live animals conforms to National Institutes of Health guidelines for the use and care of laboratory animals. Activities specified above may be a required part of a course and thus serve as a basis for grading in the course. Any questions about the administration of this policy should be directed to the course coordinator or instructor.

Biology, Bachelor's/Accelerated Master's Degree

Qualified undergraduates may be admitted to an accelerated master’s program and obtain both a BS and an MS within an accelerated time frame. This program is open only to those students who wish to pursue the master’s degree concentrations in microbiology or molecular biology. Students admitted to this program may take graduate courses after completing 90 undergraduate credits, and up to 6 credits of graduate work may be used in partial satisfaction of the requirements for the
undergraduate degree. If students earn at least a 3.00 in these classes, they are granted advanced standing in the master’s program and must then complete an additional 24 credits to receive the master’s degree. All other master’s degree requirements must be met, including a minimum of 18 credits taken for the master’s after the bachelor’s degree is completed.

Students with an overall GPA of at least 3.00 may apply for provisional acceptance to the accelerated master’s program after completing BIOL 213, 214, 308, 310 and 311 and CHEM 315 and 318; Three letters of recommendation, including one from a prospective thesis or project advisor, are required. After completing 120 credits and all requirements for the bachelor’s degree and filing the Graduation Intent Form, students are awarded a bachelor’s degree. Accelerated master’s students must then submit scores on the GRE general exam to have the provisional qualifier removed. Ordinarily, students should receive a minimum combined score of 1,100 on the verbal and quantitative portions of the exam.

**Doctor of Philosophy**

**Bioinformatics and Computational Biology, PhD**

**Banner Code:** SC-PHD-BCB

The main objective of the doctoral program in Bioinformatics and Computational Biology is to educate the next generation of computational biologists for careers in academia, industry, and government. The program provides students with interdisciplinary academic training that includes fundamental bioscience courses as well as core and advanced courses in bioinformatics. In general, course requirements may be completed within the first two years. The program is structured to be accessible for full- and part-time students.

This program of study is offered by the School of Systems Biology in the College of Science.

**Admission Requirements**

Applicants should have a bachelor’s degree in biology, computer science, or a related field, with a minimum GPA of 3.25. Admission also requires minimum GRE scores of 1,100 (verbal plus quantitative) and 4.00 (analytical writing). Applicants should have taken courses in molecular biology, cell biology, biochemistry, genetics, calculus, physical chemistry, computer programming and data structures, and probability and statistics. Students with deficiencies in one or more of these areas may be admitted provisionally and required to take additional courses, some of which may not be applicable to the 48-credit course total for the bioinformatics PhD. Students whose undergraduate record does not include basic biochemistry will be required to take a basic course prior to BINF 701 Biochemical Systematics (Biochemistry).

To apply, prospective students should forward a completed Mason graduate application, two copies of official transcripts from each college and graduate institution attended, a current résumé, and an expanded goals statement to the COS Graduate Admissions Processing Center. Applicants should also include three letters of recommendation and an official report of scores obtained on the GRE-GEN. The GRE-SUB is recommended if it is given in the student’s undergraduate major. The GRE requirement for admission to the doctoral program will be waived if the student holds a master’s degree from a U.S. institution. TOEFL scores are required of all international applicants.

**Reduction of Credit**

For students entering the doctoral program with a master's degree in a related field from a regionally accredited institution, the number of required credits may be reduced up to 30 credits, subject to approval of the program faculty and the associate dean for student and academic affairs. See the College of Science graduate policies section for more information.

**Degree Requirements**
Students must satisfy all requirements for doctoral degrees expressed in the Academic Policies section of this catalog.

The program requires 72 credits beyond the baccalaureate degree, with a minimum of 48 credits in course work and from 12 to 24 credits of dissertation. For those holding master's degrees, the 72 required credits may be reduced by up to 30 credits depending on the graduate courses completed. The curriculum includes 6 credits of fundamental biosciences courses, 13 credits of core bioinformatics courses, 3 credits of lab rotation, 3 credits of colloquium, 23-35 credits of electives or independent research, and 12-24 credits of combined dissertation proposal and research (BINF 998 and 999).

**Doctoral Course Work (48-60 credits)**

**Fundamental Bioscience Courses (6 credits)**

- BINF 701 - Biochemical Systematics (Biochemistry) Core for Doctoral Studies in Biosciences and Bioinformatics Credits: 3
- BINF 702 - Research Methods Credits: 3

**Core Bioinformatics Courses (13 credits)**

- BINF 690 - Numerical Methods for Bioinformatics Credits: 3
- BINF 705 - Research Ethics Credits: 1
- BINF 730 - Biological Sequence and Genome Analysis Credits: 3
- BINF 731 - Protein Structure Analysis Credits: 3
- BINF 740 - Introduction to Biophysics Credits: 3

**General Electives (23-35 credits)**

23-35 credits of approved general electives or independent research.

**Lab Rotation (3 credits)**

- BINF 703 - Bioinformatics Lab Rotation Credits: 1 (taken three times)

**Colloquium (3 credits)**

- BINF 704 - Colloquium in Bioinformatics Credits: 1 (taken three times)

**Doctoral Committee and Advancement to Candidacy**

By the end of the semester when course work is completed, the student must form a doctoral committee which will supervise the candidacy exam. The exam includes written and oral components. Upon passing the candidacy exam and submitting an acceptable dissertation proposal, the student is advanced to doctoral candidacy.

**Dissertation Research (12-24 credits)**

A minimum of 12 and maximum of 24 combined credits from BINF 998 and BINF 999 may be applied toward satisfying doctoral degree requirements. Students must take at least 3 credits of BINF 999.
Doctoral Dissertation

After advancing to doctoral candidacy, students work on their doctoral dissertation while enrolled in BINF 999. The dissertation should represent a significant contribution that is suitable for publication in a refereed scientific journal. The dissertation must be defended in a public forum before the dissertation committee and other interested faculty.

Total: 72 credits

Biosciences, PhD

Banner Code: SC-PHD-BIOS

The biosciences doctoral program is a research-oriented field of study that prepares students for significant contributions in academic or industrial settings. The concentration in cell and molecular biology includes microarray analysis of gene expression, sequencing and analysis of genes, gene family evolution, mechanisms of toxicology and mutagenesis, biotechnological applications, and developmental neuroscience. The concentration in microbiology and infectious disease stresses molecular mechanisms of infectious disease, genomic and proteomic analysis of pathogens, and the physiology and metabolism of pathogens.

The academic component is a three-tiered structure. The first tier provides a set of four core courses designed to advance research skills across all disciplines. The second tier comprises four or five core courses and elective courses. The first two tiers are designed to be completed in approximately two years, including the comprehensive qualifying exam. Only on completion of these requirements, the qualifying exam, and a successful dissertation proposal can the students advance to candidacy status. The third tier focuses on research and culminates in a dissertation.

This program of study is offered by the School of Systems Biology in the College of Science.

Admission Requirements

In addition to materials required of all applicants for graduate study as specified in the Admission section of this catalog, the following is also required:

- Minimum 3.25 GPA in previous course work with significant training in the biological sciences. A TOEFL score of 575 on the paper-based exam or 230 on the computer-based exam is required of international students.
- Three letters of recommendation from faculty members or individuals who have firsthand knowledge of the applicant’s academic or professional capabilities.
- Statement of purpose consistent with the research interests of at least one faculty member in the program.
- Scores on GRE general exam (required) and biology or biochemistry subject exam (recommended) taken within the past five years prior to date of application submission.

An interview may also be required. Applications should be submitted by February 1 for fall admission. Under unusual circumstances, applications may be considered for spring admission if they are received by October 1. Applications will be considered until positions are filled. Students are encouraged to meet application deadlines to be considered for scholarships and stipends. Strong candidates who lack several prerequisites may be admitted to provisional status. Removal from provisional status and continuation in the program is contingent on earning a GPA of 3.25 in the program’s fundamental courses, plus completion of missing prerequisites.

Students who have not taken a course in basic biochemistry will be required to complete one prior to BIOS 701.
Reduction of Credit

For students entering the doctoral program with a master's degree in a related field from a regionally accredited institution, the number of required credits may be reduced up to 30 credits, subject to approval of the program faculty and the associate dean for student and academic affairs. See the College of Science graduate policies section for more information.

Degree Requirements

Students must satisfy all requirements for doctoral degrees expressed in the Academic Policies section of this catalog.

Candidates for the PhD in biosciences must complete a minimum of 72 graduate credits. For students entering the doctoral program with a master’s of science degree, the number of credits required may be reduced by a maximum of 30 with approval of the advisor and the program director. Graduate credits taken previously and not used toward another degree may be transferred, subject to the approval of the advisor, the program director, and the dean.

Students in the doctoral program are required to present two research papers at a meeting or conference any time before graduation.

Doctoral Course Work (48-60 credits)

Bioscience Core (12 credits)

- BIOL 682 - Advanced Eukaryotic Cell Biology Credits: 3
- BIOS 703 - Laboratory Rotation Credits: 3 (taken twice for a total of 6 credits)
- BIOS 704 - Topics in Biosciences Credits: 1 (taken for a total of 3 credits)

Concentration (12 credits):

▲ Concentration in Cell and Molecular Biology (CMB)

This concentration prepares students for significant contributions in an academic or industrial research career. Coursework covers microarray analysis of gene expression, proteome analysis, sequencing and analysis of gene polymorphisms, gene and genome evolution, molecular studies of disease mechanisms, mechanisms of toxicology and mutagenesis, and biotechnological applications.

Students take 12 credits of coursework chosen from the following:

- BIOS 740 - Laboratory Methods in Functional Genomics and Biotechnology Credits: 3
- BIOS 741 - Genomics Credits: 3
- BIOS 742 - Biotechnology Credits: 3
- BIOS 743 - Genomics, Proteomics, and Bioinformatics Credits: 3
- BIOS 744 - Molecular Genetics Credits: 3

Total: 12 credits

▲ Concentration in Microbiology and Infectious Disease (MID)

Students in this concentration will be prepared for employment in academia, government, or industry. By stressing mechanisms of pathogenicity, physiology, metabolism, and genomics of pathogens, students will have a firm foundation for future research in
infectious disease. Students will also be introduced to advanced laboratory practices, such as animal research methodologies and biocontainment laboratory work.

Students take 12 credits of coursework chosen from the following:

- BIOL 553 - Advanced Topics in Immunology Credits: 3
- BIOL 563 - Virology Credits: 3
- BIOL 669 - Pathogenic Microbiology Credits: 3
- BIOL 715 - Microbial Physiology Credits: 3
- BIOL 718 - Techniques in Microbial Pathogenesis Credits: 3

Total: 12 credits

Elective Courses (24-36 credits)

24-36 credits chosen from the following to complete 72 credits:

- BIOL 564 - Techniques in Virology Credits: 2
- BIOL 568 - Advanced Topics in Molecular Genetics Credits: 3
- BIOL 579 - Molecular Evolution and Conservation Genetics Credits: 3
- BIOL 580 - Computer Applications for the Life Sciences Credits: 3
- BIOL 685 - Emerging Infectious Diseases Credits: 3
- BIOS 701 - Biochemical Systematics Credits: 3
- BIOS 702 - Research Methods Credits: 3
- BIOS 710 - Current Topics in Bioscience Credits: 1-3
- BIOS 740 - Laboratory Methods in Functional Genomics and Biotechnology Credits: 3
- BIOS 741 - Genomics Credits: 3
- BIOS 742 - Biotechnology Credits: 3
- BIOS 743 - Genomics, Proteomics, and Bioinformatics Credits: 3
- BIOS 744 - Molecular Genetics Credits: 3
- BIOS 760 - Seminar in Molecular Systematics Credits: 1-3
- BIOS 898 - Directed Studies in Biosciences Credits: 1-12
- BIOS 899 - Directed Research in Biosciences Credits: 1-12
- BINF 633 - Molecular Biotechnology Credits: 3
- BINF 636 - Microarray Methodology and Analysis Credits: 3
- BINF 705 - Research Ethics Credits: 1

Dissertation Committee

Upon admission to the program, each student is assigned an advisor from the bioscience faculty. The advisor may be changed by mutual consent of student and advisor, or petition to the program director and dean. With their advisor, students adopt an individual program that focuses on a specific area of research.

By the end of the fourth semester of coursework, students assemble a dissertation committee of four graduate faculty members with representation from at least two academic departments. The faculty advisor and the program director approve the program of study.

Qualifying Examination
On nearing completion of course requirements, students take a qualifying exam with a written and an oral component. At the discretion of the committee, the written qualifying exam may be retaken once if the student's performance was deemed below satisfaction.

**Advancement to Candidacy**

Upon successful completion of the qualifying exam, the majority of all course work, and an accepted thesis proposal, students will be recommended for advancement to candidacy by the committee and the program director.

The semester after advancement to candidacy, students are eligible to enroll in dissertation research (BIOS 999). Students must review their progress on the dissertation with their graduate committee on a regular basis until graduation.

**Dissertation Research (12–24 credits)**

Note: no more than 24 combined credits from BIOS 998 and BIOS 999 may be applied toward satisfying doctoral degree requirements. Students register for a minimum of 3 credits of BIOS 999 in the first semester of advancement.

- BIOS 998 - Doctoral Dissertation Proposal Credits: 1-6
- BIOS 999 - Doctoral Dissertation Research Credits: 1-12

**Doctoral Dissertation**

After advancing to doctoral candidacy, students work with their dissertation committee to develop their dissertation proposal into a completed doctoral dissertation. The dissertation research should represent a significant contribution that is publishable in a refereed scientific journal. When the dissertation is complete, students will present their results to their graduate committee and defend their dissertation in a public forum.

Total: 72 credits

**Graduate Certificate**

**Bioinformatics and Computational Biology Graduate Certificate**

Banner Code: SC-CERG-BCB

This graduate certificate program addresses the growing national and regional demand for trained computational biologists by combining a solid foundation in biotechnology with computational skills relevant to bioinformatics. With many of the courses offered in a Distance-Learning format, the flexibility of the certificate structure permits students to custom design their curriculum under an advisor’s guidance, making the certificate in bioinformatics especially relevant for students employed in today’s diverse Northern Virginia high-technology workplace. Ideal candidates for this certificate are those who have a background in biological and computer sciences, and are currently working in or planning to enter the fields of biotechnology or bioinformatics. The certificate is also highly relevant for students who are interested in advancing their career goals but may not have adequate time available to undertake a graduate degree program.

The graduate certificate in Bioinformatics and Computational Biology may be pursued on a part-time or full-time basis.

This program of study is offered by the School of Systems Biology in the College of Science.

**Admission Requirements**
Applicants should hold a BA or BS degree in a discipline related to biological or computer science from an accredited university, with a minimum GPA of 3.00. Applicants should have taken courses in molecular biology, computer science, calculus, physical chemistry, or statistics, and should also possess working knowledge of a computer programming language. To apply, prospective students should forward a completed Mason graduate application, two copies of official transcripts from each college and graduate institution attended, and a current résumé to the COS Graduate Admissions Processing Center. TOEFL scores are required of all international applicants.

The certificate program is a professional certification program that charges students at a differential (premium) tuition rate, with an additional $100 per credit added to the standard Mason graduate tuition rate for students who enroll in this certificate program, regardless of in-state or out-of-state status. The differential tuition is used to fund continuing improvements in the COS educational facilities used to support the certificate program. Students may not pursue this certificate concurrently with any other graduate degree program or certificate program offered by COS. In addition, students may not apply previous credit hours to the certificate program from another certificate, degree, or non degree program because of the differential (premium) tuition rate.

Program Requirements

The certificate in bioinformatics and computational biology requires a total of 15 credits, based on the set of core courses supporting the MS and PhD degree programs in bioinformatics and computational biology, along with a set of elective courses. Students are required to take three core courses, plus two courses selected from the list of electives indicated below.

Certificate Requirements

Required Core Courses (9 credits):

- BINF 630 - Bioinformatics Methods Credits: 3
- BINF 631 - Molecular Cell Biology for Bioinformatics Credits: 3
- BINF 634 - Bioinformatics Programming Credits: 3

Elective Courses (6 credits):

Choose two of the following or other courses approved by the coordinator.

- BINF 633 - Molecular Biotechnology Credits: 3
- BINF 636 - Microarray Methodology and Analysis Credits: 3
- BINF 639 - Introduction to Biometrics Credits: 3
- BINF 730 - Biological Sequence and Genome Analysis Credits: 3
- BINF 731 - Protein Structure Analysis Credits: 3
- BINF 732 - Genomics Credits: 3
- BINF 733 - Gene Expression Analysis Credits: 3
- BINF 734 - Advanced Bioinformatics Programming Credits: 3
- BINF 739 - Topics in Bioinformatics Credits: 3

Total: 15 credits

Master of Science

Bioinformatics and Computational Biology, MS
This degree addresses the growing national and regional demand for trained computational biologists. It combines a solid foundation in biotechnology with the computational skills required for bioinformatics. The flexibility of the degree structure permits students to custom design their curriculum under an advisor’s guidance, making the MS in bioinformatics especially relevant for students employed in today’s diverse biotechnology workplace. Students completing the program are qualified to pursue careers that require knowledge of current bioinformatics methods and the ability to develop new bioinformatics software.

Courses are generally offered in the late afternoon or early evening to accommodate students with full-time employment outside the university. Students employed at area biotechnology organizations may take up to 6 credits (out of 31) for bioinformatics work done on the job, under the guidance of a faculty member. This work-related project may be applied as either a 3-credit research project or a 6-credit master’s thesis.

This program of study is offered by the School of Systems Biology in the College of Science.

**Admission Requirements**

Applicants should have a bachelor’s degree in biology, computer science, or a related field, with a GPA of at least 3.00 in their last 60 credits of study. Applicants should have taken courses in molecular biology, computer science, calculus, physical chemistry, and statistics. Students with deficiencies in one or more of these areas may be required to take additional courses from the undergraduate curriculum. To apply, prospective students should forward a completed Mason graduate application, two copies of official transcripts from each college and graduate institution attended, a current résumé, and an expanded goals statement to the COS Graduate Admissions Processing Center. Applicants should also include three letters of recommendation and an official report of scores obtained on the GRE-GEN exam. The GRE requirement will be waived if the student holds a master’s degree from a U.S. institution. TOEFL scores are required for all international applicants.

**Degree Requirements**

Candidates must successfully complete 31 credits as follows:

**Bioinformatics core courses (12 credits):**

- BINF 630 - Bioinformatics Methods Credits: 3
- BINF 631 - Molecular Cell Biology for Bioinformatics Credits: 3
- BINF 634 - Bioinformatics Programming Credits: 3
- BINF 734 - Advanced Bioinformatics Programming Credits: 3

**Advanced bioinformatics (3 credits):**

- 3 credits of advanced bioinformatics courses numbered BIN 730 and above

**Electives (12 or 9 credits):**

- 12 credits of electives in bioinformatics and computational biology, biology and biotechnology, or computational sciences, as approved by the advisor
- Utilization of the 6-credit MS thesis option reduces the electives requirement from 12 credits to 9 credits.

**Bioinformatics seminar (1 credit):**
• BINF 704 - Colloquium in Bioinformatics Credits: 1

Research component (3 or 6 credits):

Students must complete either a 3-credit research project or a 6-credit MS thesis. Utilization of the 6-credit MS thesis option reduces the electives requirement from 12 credits to 9 credits.

• BINF 798 - Research Project Credits: 3
  or
• BINF 799 - Master's Thesis Credits: 1-6

Total: 31 credits

Bioinformatics Management, MS

Banner Code: SC-MS-BNFM

This degree addresses the regional and national need for technically trained managers who will be able to lead teams of bioinformaticians in both the public and private sectors. The degree combines a solid foundation in bioinformatics research, tools, and techniques, with the management skills needed to address the associated legal, ethical, managerial, and business issues. The MS in bioinformatics management is intended for:

• Students seeking advancement in their current bioinformatics careers that requires an advanced degree in bioinformatics combined with management expertise.
• Students with a general background in biological science or computational methods who are planning to enter the field of bioinformatics as managers and would like to strengthen their bioinformatics and managerial expertise.

This program of study is offered by the School of Systems Biology in the College of Science.

Admission Requirements

Applicants should have a bachelor’s degree in biology, computer science, or a related field, with a GPA of at least 3.00 in their last 60 credits of study. Applicants should have taken courses in molecular biology, computer science, calculus, physical chemistry, and statistics. Students with deficiencies in one or more of these areas may be required to take additional courses from the undergraduate curriculum. To apply, prospective students should forward a completed Mason graduate application, two copies of official transcripts from each college and graduate institution attended, a current résumé, and an expanded goals statement to the COS Graduate Admissions Processing Center. Applicants should also include three letters of recommendation and an official report of scores obtained on the GRE-GEN exam. The GRE requirement will be waived if the student holds a master’s degree from a U.S. institution. TOEFL scores are required of all international applicants.

Degree Requirements

Candidates must successfully complete 30 credits as follows:

Bioinformatics Core Courses (15 credits)

Foundational courses in modern biotechnology, tools and methods for bioinformatics analysis, and methods for creating customized bioinformatics tools.

• BINF 630 - Bioinformatics Methods Credits: 3
• BINF 631 - Molecular Cell Biology for Bioinformatics Credits: 3
• BINF 634 - Bioinformatics Programming Credits: 3
• BINF 730 - Biological Sequence and Genome Analysis Credits: 3

One of the following:

• BINF 633 - Molecular Biotechnology Credits: 3
• BINF 636 - Microarray Methodology and Analysis Credits: 3
• BINF 650 - Introduction to Bioinformatics Database Design Credits: 3

Management Core Courses (12 credits)

Foundational courses in management theory related directly to the management of scientific programs and personnel.

• MBA 638 - Operations Management Credits: 0-3
• MBA 712 - Project Management Credits: 0-3
• TECM 615 - Decision Making Using Accounting and Financial Data Credits: 3
• TECM 640 - Management of Consulting and Technical Professionals Credits: 1-3

Capstone research project (3 credits)

Focusing on bioinformatics management issues and techniques.

• BINF 798 - Research Project Credits: 3

Total: 30 credits

Biology, MS

Banner Code: SC-MS-BIOL

This program provides advanced training for college graduates or professionals seeking careers in the biotechnology industry or biodefense, as well as more traditional careers in biomedical research, teaching, evolutionary biology, and animal biology. Master’s level concentrations are available in bioinformatics and computational biology, microbiology and infectious disease, molecular biology, neuroscience, and systematics and evolutionary biology. Alternatively, students may choose the program in general biological sciences, which allows flexibility to specialize in additional areas.

An accelerated master's option is available to students in the bachelor's of science program. See Biology, BS/Biology, Accelerated MS for specific requirements.

This program of study is offered by the School of Systems Biology in the College of Science.

Admission Requirements

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in the Admission section of this catalog. Applicants to the MS in biology program must have a bachelor’s degree in biology or its equivalent, with the exception of those applying to the bioinformatics and computational biology (BCB) concentration. All MS concentrations require a GPA of 3.00 in biology course work or in the last 60 credits of
undergraduate study. Students must also submit three letters of recommendation and scores on the general GRE. Successful applicants usually score at least 1,100 on the verbal and quantitative sections of the GRE. Admission is contingent on acceptance by a faculty research advisor.

Students who choose the BCB concentration must have an undergraduate degree in any natural science, mathematics, engineering or computer science. It is preferred that students who choose the BCB concentration have some undergraduate course work in cell biology, molecular biology, genetics and biochemistry (two to four upper-division courses), plus some undergraduate course in computer science (two to four courses that include substantial programming projects). Students without this background may be asked to remedy their deficiencies.

Students who choose the concentration in microbiology and infectious disease (MID) must have a lecture and lab course in microbiology and a lecture course in biochemistry.

Degree Requirements

For policies governing all graduate degrees, see the Academic Policies section of the catalog.

Program of Study

An advisory committee and the student work together to develop a program of study that best fits the student’s background and interests. At least one member of the committee must be faculty in the School of Systems Biology.

The student must submit a program of study to the program director for approval within the first 12 credits of graduate work and must complete at least 30 graduate credits.

Concentration of Study Options

Candidates for the master's of science in biology focus their study in one of five approved concentrations below, or by completing course work for the program in biological sciences in an area of study chosen in consultation with the student's advisor and program director.

Master’s level concentrations in biology are available in:

- bioinformatics and computational biology (BCB)
- microbiology and infectious disease (MID)
- molecular biology (MOB)
- neuroscience (NEUR)
- systematics and evolutionary biology (SEB)

Research Options

Students have the option to complete a 3-6 credit master's thesis (BIOL 799) or a 1-3 credit research project (BIOL 798). In accordance with Mason graduate policies, the same quality of work is expected of students regardless of which option they choose.

- **Thesis**: In general, the MS thesis is most appropriate for students planning or considering a research career. Students pursuing the thesis option must write a formal thesis that meets the requirements of the graduate school and must defend their thesis and present their results in a public seminar.
- **Research Project**: The MS project is most appropriate for students who have scheduling commitments, such as a full-time job, that may preclude performing a complete series of laboratory experiments. Students pursuing the project option must successfully complete written and oral comprehensive exams.
MS without Concentration (30 credits)

Program in Biological Sciences (30 credits)

This program is for students who wish to specialize in an area not covered by the concentrations described below.

1–3 credits of research methodology

- BIOL 690 - Introduction to Graduate Studies in Biology Credits: 1-2
  or
- BIOS 702 - Research Methods Credits: 3

2 credits of seminar

- BIOL 692 - Seminar in Biology Credits: 1
  or
- BIOL 695 - Seminar in Molecular, Microbial, and Cellular Biology Credits: 1

1–6 credits of research

- either 1-3 credits of  BIOL 798 - Master's Research Project Credits: 1-3
  or 3-6 credits of  BIOL 799 - Thesis Credits: 1-6

19–26 credits of electives

- 19–26 credits of electives in BIOL, BIOS, or related areas as approved by the student’s advisor and the program director

Total: 30 credits

MS with Concentration (30 credits)

▲ Concentration in Bioinformatics and Computational Biology (BCB)

Students in the bioinformatics and computational biology concentration complete the degree as follows:

1–3 credits of research methodology

- BIOL 690 - Introduction to Graduate Studies in Biology Credits: 1-2
  or
- BIOS 702 - Research Methods Credits: 3

12 credits of core biology

- BIOL 580 - Computer Applications for the Life Sciences Credits: 3
  or
• BINF 630 - Bioinformatics Methods Credits: 3
• BINF 634 - Bioinformatics Programming Credits: 3
• BIOS 741 - Genomics Credits: 3
• BINF 730 - Biological Sequence and Genome Analysis Credits: 3
  or
• BINF 731 - Protein Structure Analysis Credits: 3

2–4 credits of molecular techniques

Students choose from courses satisfying the Molecular Techniques requirement.

• BIOL 668 - Advanced Techniques in Molecular Biology Credits: 4
• BIOS 740 - Laboratory Methods in Functional Genomics and Biotechnology Credits: 3
• Special topics courses, such as BIOL 575 or BIOL 691, may also be approved for this requirement by the program director, but only in semesters in which they are primarily a laboratory course of at least two credits with substantial content of techniques in molecular biology.

2 credits of seminar

• BIOL 695 - Seminar in Molecular, Microbial, and Cellular Biology Credits: 1

1–6 credits of research

• either 1-3 credits of  BIOL 798 - Master's Research Project Credits: 1-3
• or 3-6 credits of  BIOL 799 - Thesis Credits: 1-6

3-12 credits of electives

• 3–12 credits in BIOL, BIOS, or related areas as approved by the student’s advisor and the program director.
• A list of recommended electives is shown at the end of this program description below.

Total: 30 credits

▲ Concentration in Microbiology and Infectious Disease (MID)

Students in the microbiology and infectious disease concentration complete the degree as follows:

1–3 credits of research methodology

• BIOL 690 - Introduction to Graduate Studies in Biology Credits: 1-2
  or
• BIOS 702 - Research Methods Credits: 3

12 credits of core biology

Choose four courses from the following:

• BIOL 553 - Advanced Topics in Immunology Credits: 3
- BIOL 563 - Virology Credits: 3
- BIOL 669 - Pathogenic Microbiology Credits: 3
- BIOL 715 - Microbial Physiology Credits: 3
- BIOL 718 - Techniques in Microbial Pathogenesis Credits: 3

2 credits of seminar

- BIOL 695 - Seminar in Molecular, Microbial, and Cellular Biology Credits: 1

1–6 credits of research

- either 1-3 credits of  BIOL 798 - Master's Research Project Credits: 1-3
- or 3-6 credits of  BIOL 799 - Thesis Credits: 1-6

7-14 credits of electives to be chosen from the following:

- BIOL 564 - Techniques in Virology Credits: 2
- BIOL 553 - Advanced Topics in Immunology Credits: 3
- BIOL 682 - Advanced Eukaryotic Cell Biology Credits: 3
- BIOS 743 - Genomics, Proteomics, and Bioinformatics Credits: 3
- BIOS 710 - Current Topics in Bioscience Credits: 1-3
- or relevant graduate level course work selected in consultation with the advisor

Total: 30 credits

▲ Concentration in Molecular Biology (MOB)

Students in the molecular biology concentration complete the degree as follows:

1–3 credits of research methodology

- BIOL 690 - Introduction to Graduate Studies in Biology Credits: 1-2
- or
- BIOS 702 - Research Methods Credits: 3

13 credits of core biology

- BIOL 568 - Advanced Topics in Molecular Genetics Credits: 3
- BIOL 583 - General Biochemistry Credits: 4
- BIOL 682 - Advanced Eukaryotic Cell Biology Credits: 3
- BIOL 579 - Molecular Evolution and Conservation Genetics Credits: 3
- or
- BIOS 767 - Molecular Evolution Credits: 3

3 credits of bioinformatics

- BIOL 580 - Computer Applications for the Life Sciences Credits: 3
or
- BINF 630 - Bioinformatics Methods Credits: 3
or
- BINF 634 - Bioinformatics Programming Credits: 3

2–4 credits of molecular techniques

Students choose from courses satisfying the Molecular Techniques requirement.

- BIOL 668 - Advanced Techniques in Molecular Biology Credits: 4
- BIOS 740 - Laboratory Methods in Functional Genomics and Biotechnology Credits: 3
- Special topics courses, such as BIOL 575 or BIOL 691, may also be approved for this requirement by the program director, but only in semesters in which they are primarily a laboratory course of at least two credits with substantial content of techniques in molecular biology.

2 credits of seminar

- BIOL 695 - Seminar in Molecular, Microbial, and Cellular Biology Credits: 1

1–6 credits of research

- either 1-3 credits of BIOL 798 - Master's Research Project Credits: 1-3
- or 3-6 credits of BIOL 799 - Thesis Credits: 1-6

0-8 credits of electives

- 0-8 credits of electives in BIOL, BIOS, or related areas as approved by the student’s advisor and the program director.
- A list of recommended electives is shown at the end of this program description below.

Total: 30 credits

▲ Concentration in Neuroscience (NEUR)

Students pursuing the concentration in neuroscience take:

1-2 credits of research methodology

- BIOL 690 - Introduction to Graduate Studies in Biology Credits: 1-2

12 credits of core neuroscience

- NEUR 601 - Developmental Neuroscience Credits: 2
- NEUR 602 - Cellular Neuroscience Credits: 3
- NEUR 603 - Mammalian Neuroanatomy Credits: 3
- NEUR 709 - Neuroscience Seminars Credits: 1
- NEUR 604 - Ethics in Scientific Research Credits: 1-3
- NEUR 702 - Research Methods Credits: 3

3-4 credits of statistics chosen from the following

- PSYC 611 - Advanced Statistics Credits: 4
- STAT 535 - Analysis of Experimental Data Using SPSS Credits: 3
- STAT 544 - Applied Probability Credits: 3
- STAT 554 - Applied Statistics Credits: 3
- ECE 528 - Introduction to Random Processes in Electrical and Computer Engineering Credits: 3

5-10 credits of electives

Suggested electives include but are not limited to:

- BIOL 583 - General Biochemistry Credits: 4
- BIOL 568 - Advanced Topics in Molecular Genetics Credits: 3
- BIOL 682 - Advanced Eukaryotic Cell Biology Credits: 3
- BINF 630 - Bioinformatics Methods Credits: 3
- BIOS 741 - Genomics Credits: 3
- BIOS 742 - Biotechnology Credits: 3
- BIOS 743 - Genomics, Proteomics, and Bioinformatics Credits: 3
- BIOS 744 - Molecular Genetics Credits: 3

1-6 credits of research

- either 1-3 credits of BIOL 798 - Master's Research Project Credits: 1-3
- or 3-6 credits of BIOL 799 - Thesis Credits: 1-6

Total: 30 credits

▲ Concentration in Systematics and Evolutionary Biology (SEB)

Students pursuing the concentration in systematics and evolutionary biology take:

1–3 credits of research methodology

- BIOL 690 - Introduction to Graduate Studies in Biology Credits: 1-2
  or
- BIOS 702 - Research Methods Credits: 3

12 credits of core biology

- BIOL 574 - Population Genetics Credits: 4
  and
- BIOL 579 - Molecular Evolution and Conservation Genetics Credits: 3
  or
- BIOS 767 - Molecular Evolution Credits: 3
• plus 6 credits of organismal biology

2–4 credits of molecular techniques

• 2–4 credits of courses satisfying the Molecular Techniques requirement
• BIOL 668 - Advanced Techniques in Molecular Biology Credits: 4
• BIOS 740 - Laboratory Methods in Functional Genomics and Biotechnology Credits: 3
• Special topics courses, such as BIOL 575 or BIOL 691, may also be approved for this requirement by the program director, but only in semesters in which they are primarily a laboratory course of at least two credits with substantial content of techniques in molecular biology.

2 credits of seminar

• BIOL 692 - Seminar in Biology Credits: 1
• BIOL 695 - Seminar in Molecular, Microbial, and Cellular Biology Credits: 1

1–6 credits of research

• either 1-3 credits of  BIOL 798 - Master's Research Project Credits: 1-3
• or 3-6 credits of  BIOL 799 - Thesis Credits: 1-6

3–12 credits of electives

• 3–12 credits of electives in BIOL, BIOS, or related areas as approved by the student’s advisor and the program director

Total: 30 credits

Recommended Electives

The following list, for students in the molecular biology concentration (MOB) or the bioinformatics and computational biology concentration (BCB), is provided as a suggestion only and is not intended to be complete. Note that two courses covering substantially similar topics may not both be counted in the student’s course plan. Students should consult their faculty research advisor or the graduate program coordinator when preparing a course plan.

• BIOL 553 - Advanced Topics in Immunology Credits: 3
• BIOL 568 - Advanced Topics in Molecular Genetics Credits: 3
• BIOL 575 - Selected Topics in Genetics Credits: 1-4
• BIOL 579 - Molecular Evolution and Conservation Genetics Credits: 3
• BIOL 583 - General Biochemistry Credits: 4
• BIOL 585 - Eukaryotic Cell Biology Laboratory Credits: 1-2
• BIOL 682 - Advanced Eukaryotic Cell Biology Credits: 3
• BIOL 793 - Research in Biology Credits: 1-3
• BIOS 740 - Laboratory Methods in Functional Genomics and Biotechnology Credits: 3
• BIOS 741 - Genomics Credits: 3
• BIOS 742 - Biotechnology Credits: 3
• BIOS 743 - Genomics, Proteomics, and Bioinformatics Credits: 3
• BIOS 744 - Molecular Genetics Credits: 3
Non-Degree

Bioinformatics Minor

Banner Code: BNF

The bioinformatics minor is an interdisciplinary program consisting of required courses in biology, programming, statistics, and bioinformatics. Eight credits of course work must be unique to the minor. For policies governing all minors, see the Academic Policies section of this catalog.

This program of study is offered by the School of Systems Biology in the College of Science.

Course Work

Students must complete the following courses (either 19 or 20 credits) with a minimum GPA of 2.00, distributed as follows:

- BINF 401 - Bioinformatics and Computational Biology I Credits: 3
- BINF 402 - Bioinformatics and Computational Biology II Credits: 3
- BIOL 213 - Cell Structure and Function Credits: 4
- BIOL 482 - Introduction to Molecular Genetics Credits: 3
- STAT 250 - Introductory Statistics I Credits: 3
  or
- STAT 344 - Probability and Statistics for Engineers and Scientists I Credits: 3
- CS 112 - Introduction to Computer Programming Credits: 4
  or
- IT 306 - Program Design and Data Structures Credits: 3

Total: 19 or 20 credits
The College of Visual and Performing Arts (CVPA) creates an academic environment in which the arts are considered as individual disciplines as well as interdisciplinary forms that strengthen each other. Courses of study are designed to lead to careers as creators, performers, teachers, managers, and scholars of the arts, as well as prepare students for the challenges of a rapidly changing world. In addition to providing strong programs for arts majors and minors, CVPA strives to ensure that Mason’s entire student population has the opportunity to experience and study the arts as a key component of a well-rounded liberal arts education.

Studying the arts goes hand in hand with creation and performance. CVPA provides the theaters, studios, rehearsal spaces, computer laboratories, recital halls, and performance classrooms in which students hone their skills. Each major features strong academic preparation in the history and theory of the art form that supports discipline-based technique courses. Creative work and performance are at the core of most courses of study. The college’s faculty of practicing artist-teachers works closely with students in a variety of curricular and co-curricular creative projects. Once basic techniques are established, students are encouraged to stretch, grow, and experiment within this supportive environment. Students regularly perform, create, exhibit, and otherwise develop their art forms in a wide variety of public venues, enhancing their experience as working artists while enriching the cultural life of the campus community.

An education in the arts is deepened by regular contact with the work of distinguished visiting artists. The college is home to the Center for the Arts on the Fairfax campus and the Hylton Performing Arts Center on the Prince William campus, both of which include a variety of professional presenting and producing units that provide a diverse program of cultural experiences for the entire university community, as well as Northern Virginia and the greater Washington, D.C., area. Artists from across the country and around the world regularly perform in the Concert Hall and the Hylton Center, give master classes, work with students during extended residencies, and interact with the community in a variety of other ways. The accessibility and vitality of the Concert Hall, Hylton Center, TheaterSpace, the Art and Design Building and Johnson Center Galleries, Harris Theater, and other campus venues make the arts pervasive at Mason and in our larger community.
Undergraduate Degree Programs

The undergraduate degree consists of course work in university general education, a major area of study, and electives. To earn a bachelor’s degree, students must complete a minimum of 120 credits, of which at least 45 must be upper level courses (numbered 300 and above). At least one course at the 300 or 400 level must be designated “writing intensive.”

Graduate Degree Programs

CVPA’s graduate programs offer highly focused study designed to prepare students for professional work in the arts and education. The requirements for each graduate degree are described in the sections that follow.

Academic Policies

The requirements for each academic program offered by the college are described in the sections below. Students are ultimately responsible for their academic progress towards their degrees. All students are subject to the university’s general academic policies in addition to those specific to each academic unit. Please see the Academic Policies section of this catalog.

Questions about Academic Policies

Students with questions regarding exceptions to academic policies should contact the CVPA Academic Affairs Office (College Hall, C200; 703-993-4551).

Academic Course Load

Undergraduate students earning degrees in CVPA may register for 18 credits per fall and spring semester without the dean’s permission. Students are advised that they will be required to pay additional tuition beyond the 16-credit, university full-time academic load. Graduate students earning degrees in CVPA may register for a maximum of 13 credits per fall and spring semester. Students should be cognizant of the time commitment when they register for their courses, especially if they register for high numbers of credits. Students are urged to consult with their advisor and familiarize themselves with Mason guidelines for work and academic load. Students are reminded that employment must not take priority over course work.

Accommodations for Disabled Students

Students with documented disabilities should contact the Office of Disability Services (Student Union I, Room 222; 703-993-2474) to open a file and learn more about accommodations that may be available to them.

Advising
Students are assigned advisors and are strongly encouraged to meet with them periodically, and particularly when they achieve 75 credits or are two semesters before expected graduation. Undeclared CVPA students and undergraduate students in academic difficulty (cumulative GPA under 2.00) are required to see an advisor prior to registration for the semester following registration restriction.

**Minimum Cumulative GPA in Major**

Undergraduate students earning CVPA degrees must earn a minimum 2.00 cumulative GPA in their major, or higher, if required by their program.

**E-mail**

George Mason University uses only Mason e-mail accounts to communicate with enrolled students. Students should activate their Mason e-mail, use it to communicate with their school/department/program and other administrative units, and check it regularly for important information.

**Foreign Language Requirement**

Some degrees within CVPA require intermediate-level proficiency in one foreign language. This requirement may be fulfilled by completing a course in a foreign language numbered 202, 209, or 210 (or higher level courses taught in the language) or achieving a satisfactory score on an approved proficiency test. International students should consult the CVPA Student Academic Affairs Office about a possible waiver of this requirement.

**General Education Program**

The baccalaureate degree requires students to take a range of courses that provide a broad knowledge of the world, develop the ability to think both conceptually and critically, acquaint them with many different methods of inquiry, and provide the skills to continue intellectual growth throughout their lives. Students select from a range of courses outlined in the University General Education section. Students accepted into the Honors Program in General Education fulfill some/all of their core general education requirements with completion of that program of study. Students are strongly advised to consult the University General Education section of this catalog.

**Minors**

University policy states that students must earn 8 distinct credits that are not used for their major toward their minor. Some departments have more specific criteria for applying credits to a minor.

**Physical Education Courses**

Activity courses offered by the Health, Fitness, and Recreation Resources Department cannot be counted toward credits required for a degree in CVPA. Students may take non-activity PHED courses for elective credit for CVPA degrees.

**Prerequisites**

Undergraduate students must earn a C or better and graduate students must earn a B- or better in prerequisite courses to proceed to the next course.

**Registration**
Students are personally responsible for correctly registering for courses and paying all tuition and fees by the official university registration and payment deadlines. Instructors do not have the authority to add students to courses. All students should verify the accuracy of their enrollment before the end of the add and drop periods.

**Study Elsewhere**

Once enrolled in degree status at Mason, students with fewer than 60 hours of transfer coursework (not including registration through the Consortium of Universities of the Washington Metropolitan Area or coursework completed through the Center for Global Education) may take up to 12 hours of course work in CVPA disciplines at another institution. Students with 60 or more hours of transfer coursework are not permitted to take additional coursework in CVPA disciplines at another institution. A student may seek permission for additional hours beyond these limits for summer registration if his/her permanent residence is more than 50 miles from the George Mason University Fairfax campus. Students must obtain advance, written approval from the course dean's office (undergraduates) or the program dean (graduates). Students who enroll elsewhere without advance written permission while enrolled at Mason will not receive transfer credit for the course work taken at another institution unless they reapply for admission to Mason as transfer applicants and meet all priority deadlines. Re-admission is not guaranteed and transfer credit is awarded based upon course equivalences in effect at the time of re-admission. Freshmen and transfer students in their first semester at Mason are not permitted to study elsewhere. Courses previously attempted at Mason (including withdrawals) cannot be taken elsewhere. Students must be in good standing with a minimum cumulative GPA of 2.00 in their Mason courses. See the University Academic Policies Special Registration Procedures for additional information.

**Transfer of Credit**

Undergraduate students may transfer a maximum of 18 credits earned in nondegree status into a degree program.

Graduate credit earned prior to admission to a certificate, master’s, or doctoral program may be eligible to be transferred and applied to a CVPA graduate program, certificate or doctoral degree. Please see the Graduate Policies/Transfer of Credit portion of the catalog for more detailed information about the requirements.

**Withdrawals**

Students are responsible for all courses in which they remain officially enrolled once the drop period has ended.

Instructors do not have the authority to withdraw students from classes. Withdrawals require the approval of the academic dean and are typically allowed only for full semesters at a time (all enrolled courses) and are only permitted for non-academic reasons. No withdrawals can be approved to avoid an unsatisfactory grade. When submitting a withdrawal request, students must provide verifiable, third-party documentation for the reason for the withdrawal. Requests for withdrawals should be submitted as early in the semester as possible, and never after the last day of classes.

Undergraduates enrolled in degree programs are eligible to withdraw from three classes through the ninth week (of a fifteen week semester) without dean's approval and at the student's own discretion during their entire undergraduate career at Mason. See University Academic Policies for further details.

**Appeals Process**

**Appeals of Academic Procedures**

See Academic Policies in George Mason University's *University Catalog.*

**CVPA Procedures for Grade Appeal**
Although faculty members are generally the best judges of student performance in their classes, circumstances may cause a student to believe that a professor is unfair. Grade appeals are not accepted after the last day of classes for the following semester, as indicated in the Schedule of Classes (spring for fall grades, fall for spring and summer grades). The following are the College's steps in grade appeals:

1. The student meets with the professor to discuss the grade and class performance; this meeting should occur within two weeks of the student's written request for a meeting; if the instructor is no longer affiliated with the University, the appeal is made to the Department or Program Chair.
2. The professor (Chair) responds to the student within three days of the meeting.
3. If the student were to continue the appeal, the student must submit a written appeal to Academic Affairs Office. The Dean for Academic Affairs reviews all undergraduate appeals, and the Dean for Graduate Programs reviews all graduate appeals.

The decision of the CVPA Senior Associate Dean is final.

**CVPA Procedures for Appeal of an Academic Action**

In exceptional circumstances a student may request a meeting to review the decision of an academic action.

1. The student must state in writing the reasons for requesting further appeal of an academic action, and provide any additional or new information relevant to the appeal.
2. The Dean for Academic Affairs reviews all undergraduate appeals, and the Dean for Graduate Programs reviews all graduate appeals.
3. The dean will conduct a review of the documentation provided by the student, and may request additional information in order to make an informed decision.
4. A nonparticipating observer of the student's choice may attend the meeting with the dean, and the dean may also have a nonparticipating observer attend.
5. The student may follow University appeal procedures outlined in the *University Catalog*.

**CVPA Procedure for Non-Academic Appeals or Grievance**

A student who intends to file a non-academic appeal, or intends to file a grievance against a faculty member, another student, or administrator follows the following steps:

1. The student meets with the professor and Department Chair to discuss the non-academic appeal/grievance; this meeting should occur within two weeks of the student's written request for a meeting; if the person is no longer affiliated with the University, the request is made to the Department or Program Chair only.
2. The professor (Chair) responds to the student within three days of the meeting.
3. If the student were to continue the non-academic appeal/grievance, the student must submit a written explanation to Academic Affairs Office. The Dean for Academic Affairs reviews all non-academic appeals and grievances.

**Academic Dismissal from a Graduate Program**

The Office of the University Registrar contacts students via e-mail if they earned an academic warning, or dismissal. Students wishing to appeal should contact the CVPA Graduate Programs Office within three days of the e-mail date. A deadline for the appeal documentation is determined, normally two weeks. Students are to submit:

1. a written statement explaining the circumstances that led to the dismissal, along with supporting documentation from employers, physicians, or other sources as necessary;
2. evidence that the circumstances precipitating the unsatisfactory academic performance have been remedied;
3. statement from department and program's graduate coordinator supporting the student's continued enrollment at the University.

Upon receipt of the above,
1. The Dean for Graduate Programs reviews the appeal.
2. The final decision of the Dean is forwarded to the student and the Office of the University Registrar.
3. The student may follow University appeal procedures outlined in the University Catalog.

For these, and any other academic concerns, students are encouraged to contact George Mason University’s Ombudsman for Student Academic Affairs. The ombudsman is a neutral, independent, informal, and confidential party who provides assistance to students in resolving university-related concerns. The ombudsman is an advocate for fairness and the equitable treatment of students, operates independently of all formal grievance processes at the university, and considers all sides of an issue in an impartial and objective manner. The ombudsman has no authority to make exceptions or to grant requests but can perform informal investigations and, as a result, may recommend actions that lead to changes in processes and policies at the university. Meetings with the ombudsman are confidential. The ombudsman serves all undergraduate and graduate students at the university. (Academic Policies)

CVPA Courses

Some CVPA courses transcend individual disciplines. These courses are administered by the Dean’s Office and are designated CVPA in the Courses section of this catalog.

■ School of Art

Art and Design Building, Room 2050
Phone: 703-993-8898
Web: soa.gmu.edu

Faculty

Harold Linton, Director

Professors: Carbonneau, Frederick, Kravitz (gallery director), Linton (director), Sandell

Associate Professors: Ashcraft, Cooley, Crawford, Endress, Feerick, Frenn, Rothstein, Whit, Wrbican

Assistant Professors: Cui, Karametou, Sheridan, Winant (associate director)

Term Assistant Professors: Constantine, Del Popolo, Feuer, Stanley, Starr

Adjunct Faculty: Beach, Bisese, Bradley, Carr, Cusner, Erlich-Moss, Ferry, Goldman, Gorman, Guerrieri, Hankin, Hicks, Ho, Lauran, Morris, Petrine, Petzwinkler, Porrata, Watson

Mission

The School of Art offers students an environment in which the pursuit of a degree is a commitment to a way of life that centers on creative thought processes and the production of artworks. The curriculum and the faculty focus on cultivating students’ appreciation of and expertise in studio and digital arts. Students are encouraged to dedicate themselves to academic excellence, skilled artistry, and employing visual literacy within an atmosphere of creative freedom. The faculty’s ongoing engagement with artistic practice forms a vital part of the student-instructor relationship. By offering instruction in traditional and contemporary technologies for art making, faculty members help students develop a strong foundation to realize their personal and professional goals.

A principle that underlies the School of Art Program is its focus on fostering student understanding and experience of the interdisciplinary nature of inquiry and practice in the visual arts. This focus is important because art today crosses the boundaries of traditional disciplines and integrates traditional and technology-based media into the creation of new art forms. This
interdisciplinary focus is introduced to all AVT majors in required Foundations and Core courses and is reinforced throughout the AVT curriculum.

Course Work

The School of Art offers all course work designated AVT in the Courses section of this catalog.

Undergraduate Programs

Undergraduate studio degrees offered by the School of Art include the bachelor of arts (BA) and the bachelor of fine arts (BFA). The school also offers an undergraduate minor, an interdisciplinary minor in multimedia, and an honors program for selected AVT majors.

Neither the BA nor the BFA program satisfies all requirements for those seeking accreditation for teaching in the public schools. Undergraduate students interested in this field should contact the school’s art education advisor to learn more about teacher preparation.

All George Mason University students are welcome to enroll in course work in the School of Art. Consult the course listings for prerequisites.

Admission to School of Art Requirements

All students are admitted to School of Art programs of study separately from their admission to the University by portfolio review. All students who have applied to the University who intend to be candidates for either the BA or BFA in Art and Visual Technology must complete a portfolio review before they are accepted in the School of Art Program.

- All transfer students who intend to become candidates for a BA or BFA in Art and Visual Technology must complete a portfolio review as a part of their general application to the University.
- Students who are applying to the University as freshmen must apply to the School of Art BA or BFA program through a portfolio review upon admission to the University after submitting an application to the University.
- Portfolio reviews are scheduled through periodic Admissions Office events or through scheduled dates designated by the School of Art. Please call the main office to schedule an appointment (703-993-8898).
- Digital portfolios may be submitted by applicants who live more than 75 miles from the George Mason University Fairfax campus. However, face to face reviews are preferred.

For all candidates, consideration for admission to the BA and BFA programs are competitive and require the following:

- Portfolio of 10 to 15 original examples of current or college level work
- One-page, double-spaced essay that describes the candidate's interest in a studio art degree
- 3.00 cumulative GPA overall

In addition, for all transfer students the following are required:

- Transcripts of all college-level study

For current Mason students in the Art and Visual Technology BA program who wish to change to the BFA program or other current Mason students who wish to change their major to Art and Visual Technology, application deadlines are at the end of the sixth week of the fall and spring semesters each year.

Artsbus Requirement
All AVT majors must meet the school’s requirement of travel to galleries and museums through the Artsbus program. Students meet this requirement by enrolling in AVT 300 Artsbus Attendance. The procedure and requirements for enrollment in AVT 300 are the same as for any other class.

Freshmen who enroll as AVT majors must accumulate five AVT 300 credits during their course of study. Transfer students and students who change their majors to AVT must take AVT 300 for the equivalent of each semester they are enrolled at Mason, up to a maximum of five semesters. Semesters of enrollment in AVT 300 do not have to be consecutive. Students may take AVT 300 up to three times in a semester if they wish to accelerate their completion of the requirement although this is strongly discouraged.

All rules and requirements to AVT 300/Artsbus participation are posted on the Artsbus web site: http://artsbus.gmu.edu. Students are responsible for being familiar with and following the posted rules and requirements for Artsbus. The site also provides pertinent information for each trip regarding exhibits as well as reviews and articles for exhibitions.

**Visual Voices Requirement**

All AVT majors must fulfill three credits of Visual Voices, AVT 301, in order to graduate unless they are enrolled at Mason for fewer than three semesters. If enrolled for less than three semesters, students are required to have one AVT 301 credit per semester in which they are enrolled. Visual Voices is an intrinsic part of the major, offering students a chance to meet with and hear nationally and internationally recognized artists speak about their work. The procedure and requirements for enrollment in AVT 301 are the same as for any other class.

**Writing-Intensive Requirement**

Mason requires all students to complete at least one course designated “writing intensive” in their majors at the 300 level or above. AVT students fulfill this requirement by successfully completing AVT 395 (or AVT 494 for BFA students planning to pursue the MAT in art education).

**Upper-Level Credits**

All undergraduate students are required to complete a minimum of 45 credits of upper-division courses at the 300–499 level.

**Major GPA**

All School of Art BA and BFA majors, AVT minor, and Graphic Design minor students must earn a grade of C or better in required AVT coursework, including Studio Foundation, Critical Analysis and Contemporary Practice, Breadth and Experience, Synthesis and Concentrations. All School of Art undergraduate students must earn a minimum 2.00 cumulative GPA in their major. To graduate with a BA or BFA in Art and Visual Technology with a concentration in Graphic Design, students are required to maintain a 2.40 GPA in concentration classes. Students who fail to maintain this minimum may either retake core classes (an earned higher grade replaces the old one) or take concentration special topics classes in order to raise their average to the threshold. The effect of this change will be that very weak students will have to return to required classes to master core skills, and marginally weak students will be able to meet the requirement while expanding the breadth of their education.

**Studios**

The School of Art program is located in the Art and Design Building which houses well-equipped studios for drawing, painting, photography, printmaking, and sculpture, as well as six computer-equipped studios that cross platforms and are installed with current software applications used for two-dimensional imaging, three-dimensional modeling, animation, video production, sound editing, multimedia authoring, photography, and web publishing.
Policies, procedures, and schedules for studio use are established by the AVT studio faculty and are posted in the studios.

**School of Art Honors Program**

Students interested in the Honors Program in School of Art should contact the director of the school. Both BA and BFA students are eligible to apply for admission to the program. Honors students must complete at least 4 credits of AVT 394 Honors Seminar. They must have a cumulative GPA of at least 3.00 and at least 3.50 in AVT 394 and the AVT major.

**Graduate Programs**

The MA in Graphic Design offers students a comprehensive study and preparation for the graphic design profession. The program calls for 36 credits, which includes courses in typography, web design, image making, and brand design. The broad range of study is intended to develop professionals prepared for an ever-expanding graphic design field. This degree is the only MA in Graphic Design in the Capital region.

The Art Education Licensure Certificate is a post-baccalaureate program designed for those who currently hold a graduate degree in an art-related field along with those who want a more immediate entrance into the art teaching profession. This "licensure only" program, which results in a pre K-12 art certification in the Commonwealth of Virginia, is a 21 credit program consisting of graduate education courses, area endorsements, student teaching internships and seminar. There is a MAT Graduate Degree option with an additional 9 graduate credits.

The Master of Arts in Teaching in Art Education is a preservice degree program that prepares students with a BFA degree or equivalent for pre K-12 art licensure by the Commonwealth of Virginia. Using a studio-based approach to art education and working closely with area public school systems, the MAT degree consists of 30 credits of graduate art education, school practicum experience, studio work, and preservice teaching internship and seminar.

The MFA is a terminal degree that prepares students to become professional artists, work in technology or arts-related fields, and teach at the university level. Candidates are required to complete 60 credits, of which 45 credits are made up from both core and studio requirements. An additional 15 credits are based on comprehensive experience.

MFA students may choose an emphasis in digital arts, graphic design, painting, photography, printmaking, sculpture, or InterArts. The latter offers students the opportunity to combine art forms in interdisciplinary projects that may be installation, performance, publishing, time-based, or writing-based; and combine creative and critical approaches to their work.

While it is anticipated that students will move through the MFA as described in this catalog, individuals with extensive professional accomplishment may, upon recommendation of the SOA Graduate Committee and with prior approval of the CVPA dean, craft an individualized program that meets curricular requirements.

**Academic Policies**

Please see College of Visual and Performing Arts academic policies.

**Bachelor of Arts**

Faculty

Harold Linton, Director

Professors: Carbonneau, Frederick, Kravitz (gallery director), Linton (director), Sandell

Associate Professors: Ashcraft, Cooley, Endress, Feerick, Frenn, Rothstein, White, Wrbican

Assistant Professors: Cui, Karametou, Sheridan, Winant (associate director)

Term Assistant Professors: Constantine, Del Popolo, Feuer, Stanley, Starr

Adjunct Faculty: Beach, Bisese, Bradley, Carr, Cushner, Erlich-Moss, Ferry, Goldman, Gorman, Guerrieri, Hankin, Hicks, Ho, Lauran, Morris, Petrine, Petzwinkler, Porrata, Watson

Mission

The School of Art offers students an environment in which the pursuit of a degree is a commitment to a way of life that centers on creative thought processes and the production of artworks. The curriculum and the faculty focus on cultivating students’ appreciation of and expertise in studio and digital arts. Students are encouraged to dedicate themselves to academic excellence, skilled artistry, and employing visual literacy within an atmosphere of creative freedom. The faculty’s ongoing engagement with artistic practice forms a vital part of the student-instructor relationship. By offering instruction in traditional and contemporary technologies for art making, faculty members help students develop a strong foundation to realize their personal and professional goals.

A principle that underlies the School of Art Program is its focus on fostering student understanding and experience of the interdisciplinary nature of inquiry and practice in the visual arts. This focus is important because art today crosses the boundaries of traditional disciplines and integrates traditional and technology-based media into the creation of new art forms. This interdisciplinary focus is introduced to all AVT majors in required Foundations and Core courses and is reinforced throughout the AVT curriculum.

Course Work

The School of Art offers all course work designated AVT in the Courses section of this catalog.

Undergraduate Programs

Undergraduate studio degrees offered by the School of Art include the bachelor of arts (BA) and the bachelor of fine arts (BFA) in Art and Visual Technology. The school also offers an undergraduate minor, an interdisciplinary minor in multimedia, and an honors program for selected AVT majors.

The BA program does not satisfy all requirements for those seeking accreditation for teaching in the public schools. Undergraduate students interested in this field should contact the school’s art education advisor to learn more about teacher preparation.

Admission to School of Art Requirements
All students are admitted to School of Art programs of study separately from their admission to the University by portfolio review. All students who have applied to the University who intend to be candidates for either the BA or BFA in Art and Visual Technology must complete a portfolio review before they are accepted in the School of Art Program.

- All transfer students who intend to become candidates for a BA or BFA in Art and Visual Technology must complete a portfolio review as a part of their general application to the University.
- Students who are applying to the University as freshmen must apply to the School of Art BA or BFA program through a portfolio review upon admission to the University after submitting an application to the University.
- Portfolio reviews are scheduled through periodic Admissions Office events or through scheduled dates designated by the School of Art. Please call the main office to schedule an appointment (703-993-8898).
- Digital portfolios may be submitted by applicants who live more than 75 miles from the George Mason University Fairfax campus. However, face to face reviews are preferred.

For all candidates, consideration for admission to the BA and BFA programs are competitive and require the following:

- Portfolio of 10 to 15 original examples of current or college level work
- One-page, double-spaced essay that describes the candidate's interest in a studio art degree
- 3.00 cumulative GPA overall

In addition, for all transfer students the following are required:

- Transcripts of all college-level study

For current Mason students in the Art and Visual Technology BA program who wish to change to the BFA program or other current Mason students who wish to change their major to Art and Visual Technology, application deadlines are at the end of the sixth week of the fall and spring semesters each year.

**Artsbus Requirement**

All AVT majors must meet the school’s requirement of travel to galleries and museums through the Artsbus program. Students meet this requirement by enrolling in AVT 300 Artsbus Attendance. The procedure and requirements for enrollment in AVT 300 are the same as for any other class.

Freshmen who enroll as AVT majors must accumulate five AVT 300 credits during their course of study. Transfer students and students who change their majors to AVT must take AVT 300 for the equivalent of each semester they are enrolled at Mason, up to a maximum of five semesters. Semesters of enrollment in AVT 300 do not have to be consecutive. Students may take AVT 300 up to three times in a semester if they wish to accelerate their completion of the requirement although this is strongly discouraged.

All rules and requirements to AVT 300/Artsbus participation are posted on the Artsbus web site: http://artsbus.gmu.edu. Students are responsible for being familiar with and following the posted rules and requirements for Artsbus. The site also provides pertinent information for each trip regarding exhibits as well as reviews and articles for exhibitions.

**Visual Voices Requirement**

All AVT majors must fulfill three credits of Visual Voices, AVT 301, in order to graduate unless they are enrolled at Mason for fewer than three semesters. If enrolled for less than three semesters, students are required to have one AVT 301 credit per semester in which they are enrolled. Visual Voices is an intrinsic part of the major, offering students a chance to meet with and hear nationally and internationally recognized artists speak about their work. The procedure and requirements for enrollment in AVT 301 are the same as for any other class.

**Writing-Intensive Requirement**
Mason requires all students to complete at least one course designated “writing intensive” in their majors at the 300 level or above. AVT students fulfill this requirement by successfully completing AVT 395 (or AVT 494 for BFA students planning to pursue the MAT in art education).

**Upper-Level Credits**

All undergraduate students are required to complete a minimum of 45 credits of upper-division courses at the 300–499 level.

**Major GPA**

All School of Art undergraduate students must earn a minimum 2.00 cumulative GPA in their major. Additionally, students must earn a grade of C or better in required AVT course work, including Studio Foundation, Critical Analysis and Contemporary Practice, Breadth and Experience, Synthesis and Concentrations. To graduate with a BA or BFA in Art and Visual Technology with a concentration in Graphic Design, students are required to maintain a 2.40 GPA in concentration classes. Students who fail to maintain this minimum may either retake core classes (an earned higher grade replaces the old one) or take concentration special topics classes in order to raise their average to the threshold. The effect of this change will be that very weak students will have to return to required classes to master core skills, and marginally weak students will be able to meet the requirement while expanding the breadth of their education.

**Studios**

The School of Art program is located in the Art and Design Building which houses well-equipped studios for drawing, painting, photography, printmaking, and sculpture, as well as six computer-equipped studios that cross platforms and are installed with current software applications used for two dimensional imaging, three-dimensional modeling, animation, video production, sound editing, multimedia authoring, photography, and web publishing.

Policies, procedures, and schedules for studio use are established by the SOA studio faculty and are posted in the studios.

**School of Art Honors Program**

Students interested in the Honors Program in School of Art should contact the director of the school. Both BA and BFA students are eligible to apply for admission to the program. Honors students must complete at least 4 credits of AVT 394 Honors Seminar. They must have a cumulative GPA of at least 3.00 and at least 3.50 in AVT 394 and the AVT major.

**Academic Policies**

Please see College of Visual and Performing Arts academic policies.

**Degree Requirements**

**General Education (37 credits)**

**Foundation Requirements**

- ENGH 101 - Composition Credits: 3
- ENGH 302 - Advanced Composition Credits: 3

(Nonnative speakers of English with limited proficiency in the language may substitute ENGH 100 for ENGH 101. Students must attain a minimum grade of C in ENGH 100 or 101, as well as in 302, to fulfill degree requirements.)
• Oral communication Credits: 3
• Quantitative reasoning Credits: 3
• Information technology Credits: 3

Core Requirements

• Literature Credits: 3
• Arts Credits: 3*
• Natural science (including at least one laboratory science) Credits: 7
• Western civilization Credits: 3
• Global understanding Credits: 3**
• Social and behavioral sciences Credits: 3

Notes:

*AVT majors may not choose AVT courses to meet this requirement, and they may not double-count ARTH courses toward both the AVT major and the university general education arts requirement.

**AVT majors may not double-count ARTH courses toward both AVT major requirements and the university general education global understanding requirement.

AVT Major Requirements (60-63 credits)

Studio Foundation (17 credits)

• AVT 101 - New Majors Colloquium Credits: 1
• AVT 104 - Studio Fundamentals I Credits: 4
• AVT 105 - Studio Fundamentals II Credits: 4
• AVT 222 - Drawing I Credits: 4
• AVT 323 - Drawing II Credits: 4 or AVT 324 - Figure Drawing Credits: 4

Art History, Critical Analysis, Contemporary Practice (18 credits)

• ARTH 200 - Survey of Western Art Credits: 3 or ARTH 203 - Survey of Asian Art Credits: 3 or ARTH 204 - Survey of Latin American Art Credits: 3
• ARTH 201 - Survey of Western Art Credits: 3
• ARTH 374 - Art Now Credits: 3
• AVT 301 - Visual Voices Colloquium Credits: 1 (must be taken for a total of 3 credits or each semester, if less than 3 semesters)
• AVT 307 - Aesthetics Credits: 3
• AVT 395 - Writing for Artists Credits: 3

Breadth and Experience (9-12 credits)

Choose three of the following classes; at least one course must be a 200-level studio course (see each concentration for individual requirements):

• AVT 215 - Typography Credits: 4
• AVT 217 - Introduction to Web Design Credits: 4
• AVT 232 - Painting I Credits: 4
• AVT 243 - Printmaking I Credits: 4
• AVT 252 - Fundamentals of Photography Credits: 4
• AVT 253 - Introduction to Digital Photography Credits: 4
• AVT 254 - Photography Credits: 4
• AVT 262 - Sculpture I Credits: 4
• AVT 272 - Interdisciplinary Arts Credits: 4
• AVT 280 - Introduction to New Media Arts Credits: 4
• AVT 326 - Nontraditional Approaches to Drawing Credits: 4
• AVT 346 - Digital Printmaking Credits: 4
• AVT 374 - Sound Art I Credits: 4
• AVT 385 - EcoArt Credits: 4
• AVT 496 - Special Topics: (specific course title varies) Credits: 1-4
• Or other courses as approved by program director

Synthesis (4 credits)

• AVT 497 - Senior Project Credits: 4 or AVT 498 - Senior Design Project Credits: 4

Concentration (12 credits)

12 credits in one of the following areas: Drawing, Graphic Design, InterArts, New Media Art, Painting, Photography, Printmaking or Sculpture

▲ Drawing (DRW)

• AVT 422 - Drawing III Credits: 4
• AVT 423 - Drawing IV Credits: 4

4 credits from:

• AVT 324 - Figure Drawing Credits: 4
• AVT 326 - Nontraditional Approaches to Drawing Credits: 4
• AVT 333 - Painting II Credits: 4
• AVT 336 - Experimental Painting Credits: 4
• AVT 337 - Figurative Painting Credits: 4
• AVT 432 - Painting III Credits: 4
• AVT 433 - Painting IV Credits: 4

Note:

All AVT majors concentrating in drawing must complete AVT 232 (Painting I) under Breadth and Experience.

▲ Graphic Design (GD)

• AVT 311 - Graphic Design Methods and Principles Credits: 4
• AVT 313 - Editorial Design Credits: 4
• AVT 414 - Corporate Design and Branding Credits: 4

Graphic Design Note

All AVT majors concentrating in graphic design must complete AVT 252 Photography I or AVT 253 Introduction to Digital Photography under Breadth and Experience.

▲ InterArts (IA)

• AVT 373 - Performance Studio Credits: 4
• AVT 473 - Advanced Performance Studio Credits: 4

4 credits from:

• AVT 372 - Hip Hop Culture Credits: 3
• AVT 374 - Sound Art I Credits: 4
• AVT 376 - Live Movies Credits: 4
• AVT 378 - The African American Experience in the Performing Arts Credits: 3
• AVT 491 - Independent Study in Art and Visual Technology Credits: 1-6

▲ New Media Art (NMA)

12 credits from:

• AVT 374 - Sound Art I Credits: 4
• AVT 382 - 2D Experimental Animation Credits: 4
• AVT 383 - 3D Experimental Animation Credits: 4
• AVT 385 - EcoArt Credits: 4
• AVT 390 - Video Art Credits: 4
• AVT 482 - Advanced Image Making Credits: 4
• AVT 483 - Art and Interactivity Credits: 4
• AVT 487 - Advanced Topics: New Media Art Credits: 4

▲ Painting (PNT)

• AVT 333 - Painting II Credits: 4
• AVT 432 - Painting III Credits: 4
• AVT 433 - Painting IV Credits: 4

▲ Photography (PHO)

• AVT 353 - Traditional Photo Methods Credits: 4
• AVT 359 - About Photography: Practice and Research Credits: 3
• 1 credit of AVT 496 - Special Topics: (specific course title varies) Credits: 1-4

4 credits from:
• AVT 453 - Professional Practices Credits: 3
• AVT 454 - Alternative Photo Processes Credits: 4
• AVT 455 - Digital Printing Techniques Credits: 4
• AVT 457 - Documentary Photography Credits: 4
• AVT 458 - Advanced Studio Lighting Credits: 4
• 1 credit of AVT 496 - Special Topics: (specific course title varies) Credits: 1-4

Photography Note:

All AVT majors concentrating in photography must complete AVT 252 Photography I under Breadth and Experience.

▲ Printmaking (PM)

• AVT 343 - Printmaking II Credits: 4

8 credits from:

• AVT 345 - Paper/Print/Book as Language Credits: 4
• AVT 346 - Digital Printmaking Credits: 4
• AVT 442 - Printmaking III Credits: 4
• AVT 443 - Printmaking IV Credits: 4

▲ Sculpture (SCL)

• AVT 363 - Sculpture II Credits: 4
• AVT 462 - Sculpture III Credits: 4
• AVT 463 - Sculpture IV Credits: 4

Concentration Electives

AVT 496 - Special Topics: (specific course title varies) or AVT 491 - Independent Study in Art and Visual Technology may be taken with permission of respective Division Coordinator.

General Electives (20-23 credits)

BA students must use general electives to either complete a minor, double major or double degree outside their primary major field of study (15–20 credits) or demonstrate intermediate-level proficiency in one foreign language (0–12 credits)*. After fulfilling one of these options, the remaining general electives may be taken inside or outside of the department. All students are required to take a minimum of 45 credits of upper-division courses (300 and 400 level); most students will require at least 13 elective credits at the 300 level or above.

AVT 393 - Field Experience in the Arts and AVT 489 - Internship in Art and Visual Technology are not required courses but are highly recommended as electives for BA students.

*See beginning of CVPA section for foreign language requirement.

Mission

The School of Art offers students an environment in which the pursuit of a degree is a commitment to a way of life that centers on creative thought processes and the production of artworks. The curriculum and the faculty focus on cultivating students’ appreciation of and expertise in studio and digital arts. Students are encouraged to dedicate themselves to academic excellence, skilled artistry, and employing visual literacy within an atmosphere of creative freedom. The faculty’s ongoing engagement with artistic practice forms a vital part of the student-instructor relationship. By offering instruction in traditional and contemporary technologies for art making, faculty members help students develop a strong foundation to realize their personal and professional goals.

A principle that underlies the School of Art Program is its focus on fostering student understanding and experience of the interdisciplinary nature of inquiry and practice in the visual arts. This focus is important because art today crosses the boundaries of traditional disciplines and integrates traditional and technology-based media into the creation of new art forms. This interdisciplinary focus is introduced to all AVT majors in required Foundations and Core courses and is reinforced throughout the SOA curriculum.

Course Work

The School of Art offers all course work designated AVT in the Courses section of this catalog.

Undergraduate Program

This intensive, 120-credit studio production program emphasizes analytical, creative, and experiential aspects of studio and new media art. It is designed to prepare students professionally as visual artists or for graduate study in the fine arts. Students devote a
significant portion of their college careers to an in-depth study in one of the following concentrations: drawing, graphic design, interdisciplinary arts (InterArts), new media art, painting, photography, printmaking, or sculpture.

**Admission to School of Art Requirements**

All students are admitted to School of Art programs of study separately from their admission to the University by portfolio review. All students who have applied to the University who intend to be candidates for either the BA or BFA in Art and Visual Technology must complete a portfolio review before they are accepted in the School of Art Program.

- All transfer students who intend to become candidates for a BA or BFA in Art and Visual Technology must complete a portfolio review as a part of their general application to the University.
- Students who are applying to the University as freshmen must apply to the School of Art BA or BFA program through a portfolio review upon admission to the University after submitting an application to the University.
- Portfolio reviews are scheduled through periodic Admissions Office events or through scheduled dates designated by the School of Art. Please call the main office to schedule an appointment (703-993-8898).
- Digital portfolios may be submitted by applicants who live more than 75 miles from the George Mason University Fairfax campus. However, face to face reviews are preferred.

For all candidates, consideration for admission to the BA and BFA programs are competitive and require the following:

- Portfolio of 10 to 15 original examples of current or college level work
- One-page, double-spaced essay that describes the candidate's interest in a studio art degree
- 3.00 cumulative GPA overall

In addition, for all transfer students the following are required:

- Transcripts of all college-level study

For current Mason students in the Art and Visual Technology BA program who wish to change to the BFA program or other current Mason students who wish to change their major to Art and Visual Technology, application deadlines are at the end of the sixth week of the fall and spring semesters each year.

**Artsbus Requirement**

All AVT majors must meet the school’s requirement of travel to galleries and museums through the Artsbus program. Students meet this requirement by enrolling in AVT 300 Artsbus Attendance. The procedure and requirements for enrollment in AVT 300 are the same as for any other class.

Freshmen who enroll as AVT majors must accumulate five AVT 300 credits during their course of study. Transfer students and students who change their majors to AVT must take AVT 300 for the equivalent of each semester they are enrolled at Mason, up to a maximum of five semesters. Semesters of enrollment in AVT 300 do not have to be consecutive. Visual Voices is an intrinsic part of the major, offering students a chance to meet with and
hear nationally and internationally recognized artists speak about their work. The procedure and requirements for enrollment in AVT 301 are the same as for any other class.

**Writing-Intensive Requirement**

Mason requires all students to complete at least one course designated “writing intensive” in their majors at the 300 level or above. AVT students fulfill this requirement by successfully completing AVT 395 (or AVT 494 for BFA students planning to pursue the MAT in art education).

**Upper-Level Credits**

All undergraduate students are required to complete a minimum of 45 credits of upper-division courses at the 300–499 level.

**Major GPA**

All School of Art undergraduate students must earn a minimum 2.00 cumulative GPA in their major. Additionally, students must earn a grade of C or better in required AVT course work, including Studio Foundation, Critical Analysis and Contemporary Practice, Breadth and Experience, Synthesis and Concentrations. To graduate with a BA or BFA in Art and Visual Technology with a concentration in Graphic Design, students are required to maintain a 2.40 GPA in concentration classes. Students who fail to maintain this minimum may either retake core classes (an earned higher grade replaces the old one) or take concentration special topics classes in order to raise their average to the threshold. The effect of this change will be that very weak students will have to return to required classes to master core skills, and marginally weak students will be able to meet the requirement while expanding the breadth of their education.

**Studios**

The School of Art program is located in the Art and Design Building which houses well-equipped studios for drawing, painting, photography, printmaking, and sculpture, as well as six computer-equipped studios that cross platforms and are installed with current software applications used for two dimensional imaging, three-dimensional modeling, animation, video production, sound editing, multimedia authoring, photography, and web publishing.

Policies, procedures, and schedules for studio use are established by the AVT studio faculty and are posted in the studios.

**School of Art Honors Program**

Students interested in the Honors Program in School of Art should contact the director of the school. Both BA and BFA students are eligible to apply for admission to the program. Honors students must complete at least 4 credits of AVT 394 Honors Seminar. They must have a cumulative GPA of at least 3.00 and at least 3.50 in AVT 394 and the AVT major.

**Academic Policies**

Please see College of Visual and Performing Arts academic policies.

**MAT Degree in Art Education**

Students intending to pursue the MAT degree in Art Education after their undergraduate studies have slightly different degree requirements for the BFA. See below for full course listings.
Degree Requirements

General Education (37 credits)

Foundation Requirements

- Oral communication Credits: 3
- Quantitative reasoning Credits: 3
- Information technology Credits: 3
- ENGH 101 - Composition Credits: 3
- ENGH 302 - Advanced Composition Credits: 3

Nonnative speakers of English with limited proficiency in the language may substitute ENGH 100 for ENGH 101. Students must attain a minimum grade of C in ENGH 100 or 101, as well as in 302, to fulfill degree requirements.

Core Requirements

- Literature Credits: 3
- Arts Credits: 3*
- Natural science (including at least one laboratory science) Credits: 7
- Western civilization Credits: 3
- Global understanding Credits: 3*
- Social and behavioral sciences Credits: 3

Notes:

*AVT majors may not choose AVT courses to meet this requirement, and they may not double-count ARTH courses toward both the AVT major and the university general education arts requirement.

**AVT majors may not double-count ARTH courses toward both AVT major requirements and the university general education global understanding requirement.

AVT Major Requirements (78-82 credits)

Studio Foundation (17 credits)

- AVT 101 - New Majors Colloquium Credits: 1
- AVT 104 - Studio Fundamentals I Credits: 4
- AVT 105 - Studio Fundamentals II Credits: 4
- AVT 222 - Drawing I Credits: 4
- AVT 323 - Drawing II Credits: 4 or AVT 324 - Figure Drawing Credits: 4

Art History, Critical Analysis, Contemporary Practice (24-25 credits)

- ARTH 201 - Survey of Western Art Credits: 3
- ARTH 374 - Art Now Credits: 3
- 3* credits of AVT 301 - Visual Voices Colloquium Credits: 1
- AVT 307 - Aesthetics Credits: 3
- AVT 395 - Writing for Artists Credits: 3
- AVT 472 - Critical Theory in the Visual Arts Credits: 3
  Choose one of the following**:
  - ARTH 200 - Survey of Western Art Credits: 3
  - ARTH 203 - Survey of Asian Art Credits: 3
  - ARTH 204 - Survey of Latin American Art Credits: 3
  Choose one of the following*:
  - AVT 305 - Creative Processes Credits: 3
  - AVT 309 - Art as Social Action Credits: 3
  - AVT 371 - Visual Perception and the Arts Credits: 3
  - AVT 372 - Hip Hop Culture Credits: 3
  - AVT 374 - Sound Art I Credits: 4
  - AVT 418 - History of Graphic Design Credits: 3
  - AVT 493 - Teaching Visual Thinking Through Media, PK-12 Credits: 3
  - 3 credits of 300-400 level ARTH
    *Transfer students with less than three semesters remaining must take AVT 301 for each remaining semester.
    **Students concentrating in graphic design must take AVT 418 to meet this requirement.

**Breadth and Experience (9-12 credits)**

Any three of the following (see each concentration for individual requirements):

- AVT 215 - Typography Credits: 4
- AVT 217 - Introduction to Web Design Credits: 4
- AVT 232 - Painting I Credits: 4
- AVT 243 - Printmaking I Credits: 4
- AVT 252 - Fundamentals of Photography Credits: 4
- AVT 253 - Introduction to Digital Photography Credits: 4
- AVT 254 - Photography Credits: 4
- AVT 262 - Sculpture I Credits: 4
- AVT 272 - Interdisciplinary Arts Credits: 4
- AVT 280 - Introduction to New Media Arts Credits: 4
- AVT 326 - Nontraditional Approaches to Drawing Credits: 4
- AVT 346 - Digital Printmaking Credits: 4
- AVT 374 - Sound Art I Credits: 4
- AVT 385 - EcoArt Credits: 4
- AVT 496 - Special Topics: (specific course title varies) Credits: 1-4
- Or other courses as approved by program director

**Synthesis (4 credits)**

- AVT 497 - Senior Project Credits: 4 or AVT 498 - Senior Design Project Credits: 4

**Concentration (24 credits)**

Choose one of the following areas: Drawing, Graphic Design, InterArts, New Media Art, Painting, Photography, Printmaking, or Sculpture.
▲ Drawing (DRW)

- AVT 422 - Drawing III Credits: 4
- AVT 423 - Drawing IV Credits: 4
- 12 credits of 300-400 level AVT
  AND
  Choose one of the following:
  - AVT 324 - Figure Drawing Credits: 4
  - AVT 326 - Nontraditional Approaches to Drawing Credits: 4
  - AVT 333 - Painting II Credits: 4
  - AVT 336 - Experimental Painting Credits: 4
  - AVT 337 - Figurative Painting Credits: 4
  - AVT 432 - Painting III Credits: 4
  - AVT 433 - Painting IV Credits: 4

Note:
All AVT majors concentrating in drawing must complete AVT 232 (Painting I) under Breadth and Experience.

▲ Graphic Design (GD)

- AVT 311 - Graphic Design Methods and Principles Credits: 4
- AVT 313 - Editorial Design Credits: 4
- AVT 414 - Corporate Design and Branding Credits: 4
  12 credits chosen from:
  - AVT 411 - Motion Design Credits: 4
  - AVT 412 - Advanced Typography Credits: 4
  - AVT 413 - Professional Design Practices Credits: 4
  - AVT 415 - Web Design and Usability Credits: 4
  - AVT 416 - Advertising Design Credits: 4
  - AVT 417 - Package Design Credits: 4
  - AVT 419 - Topics in Graphic Design Credits: 1-6
  - AVT 420 - Advanced Web Design Credits: 4

Graphic Design Notes:

AVT 491 - Independent Study in Art and Visual Technology or AVT 496 - Special Topics: (specific course title varies) may be taken with permission of the Area Coordinator.

All AVT majors concentrating in graphic design must complete AVT 217 - Introduction to Web Design and AVT 252 - Fundamentals of Photography or AVT 253 - Introduction to Digital Photography under Breadth and Experience.

▲ InterArts (IA)

- AVT 373 - Performance Studio Credits: 4
- AVT 473 - Advanced Performance Studio Credits: 4
  4 credits of 300-400 level AVT
  AND
12 credits chosen from the following:
- AVT 372 - Hip Hop Culture Credits: 3
- AVT 374 - Sound Art I Credits: 4
- AVT 376 - Live Movies Credits: 4
- AVT 378 - The African American Experience in the Performing Arts Credits: 3
- AVT 491 - Independent Study in Art and Visual Technology Credits: 1-6

▲ New Media Art (NMA)

- 12 credits of 300-400 level AVT AND
- 12 credits chosen from the following:
  - AVT 374 - Sound Art I Credits: 4
  - AVT 382 - 2D Experimental Animation Credits: 4
  - AVT 383 - 3D Experimental Animation Credits: 4
  - AVT 385 - EcoArt Credits: 4
  - AVT 390 - Video Art Credits: 4
  - AVT 482 - Advanced Image Making Credits: 4
  - AVT 483 - Art and Interactivity Credits: 4
  - AVT 487 - Advanced Topics: New Media Art Credits: 4

▲ Painting (PNT)

- AVT 333 - Painting II Credits: 4
- AVT 432 - Painting III Credits: 4
- AVT 433 - Painting IV Credits: 4
- 4 credits of 300-400 level AVT AND
- 8 credits chosen from the following:
  - AVT 336 - Experimental Painting Credits: 4
  - AVT 337 - Figurative Painting Credits: 4
  - AVT 434 - Painting V Credits: 4
  - AVT 435 - Painting VI Credits: 4

▲ Photography (PHO)

- AVT 353 - Traditional Photo Methods Credits: 4
- AVT 359 - About Photography: Practice and Research Credits: 3
- 1 credit of AVT 496 - Special Topics: (specific course title varies) Credits: 1-4
- 8 credits of 300-400 level AVT AND
- 8 credits chosen from the following:
  - AVT 453 - Professional Practices Credits: 3
  - AVT 454 - Alternative Photo Processes Credits: 4
  - AVT 455 - Digital Printing Techniques Credits: 4
  - AVT 457 - Documentary Photography Credits: 4
  - AVT 458 - Advanced Studio Lighting Credits: 4
  - 1 credit of AVT 496 - Special Topics: (specific course title varies) Credits: 1-4
All AVT majors concentrating in photography must complete AVT 252 Photography I under Breadth and Experience.

▲ Printmaking (PM)

- AVT 343 - Printmaking II Credits: 4
- 12 credits of 300-400 level AVT
  AND
  8 credits chosen from the following:
  - AVT 345 - Paper/Print/Book as Language Credits: 4
  - AVT 346 - Digital Printmaking Credits: 4
  - AVT 442 - Printmaking III Credits: 4
  - AVT 443 - Printmaking IV Credits: 4

▲ Sculpture (SCL)

- AVT 363 - Sculpture II Credits: 4
- AVT 462 - Sculpture III Credits: 4
- AVT 463 - Sculpture IV Credits: 4
- 12 credits of 300-400 level AVT

General Electives (1-5 credits)

Total: 120 credits

Degree Requirements for Students Intending to Pursue the MAT Degree in Art Education

General Education (35 credits)

Foundation Requirements

- Oral Communication Credits: 3
- Quantitative reasoning Credits: 3
- Information technology Credits: 4 (AVT 180 - New Media in the Creative Arts and CS 105 - Computer Ethics and Society or PHIL 112 - Ethics and the Cybersociety)
- ENGH 101 - Composition Credits: 3
- ENGH 302 - Advanced Composition Credits: 3
  Nonnative speakers of English with limited proficiency may substitute ENGH 100 for ENGH 101. Students must attain a minimum grade of C in ENGH 100 or 101, as well as in 302, to fulfill degree requirements.

Core Requirements

- Literature Credits: 3
- Natural Science (including at least one laboratory science) Credits: 7
- Western Civilization Credits: 3
- Arts Credits (fulfilled by ARTH 200 - Survey of Western Art in the major requirements)
- Global Understanding Credits: 3 (ARTH 203 - Survey of Asian Art recommended)
- Social and Behavioral Sciences Credits: 3 (PSYC 100 - Basic Concepts in Psychology recommended)
- Synthesis options are specified and counted under AVT major requirements

**AVT Major Requirements (80 credits)**

**Studio Foundation (17 credits)**

- AVT 101 - New Majors Colloquium Credits: 1
- AVT 104 - Studio Fundamentals I Credits: 4
- AVT 105 - Studio Fundamentals II Credits: 4
- AVT 222 - Drawing I Credits: 4
- AVT 323 - Drawing II Credits: 4 or AVT 324 - Figure Drawing Credits: 4

**Art History, Critical Analysis, Contemporary Practice (24 credits)**

Credits for ARTH 200 may be counted toward the major and the arts university general education requirement only for students who complete all five of the required undergraduate art education courses (AVT 493, 494, 495, EDUC 301, 302).

- ARTH 200 - Survey of Western Art Credits: 3
- ARTH 201 - Survey of Western Art Credits: 3
- ARTH 374 - Art Now Credits: 3
- 3* credits of  AVT 301 - Visual Voices Colloquium Credits: 1
- AVT 307 - Aesthetics Credits: 3
- AVT 472 - Critical Theory in the Visual Arts Credits: 3
- AVT 493 - Teaching Visual Thinking Through Media, PK-12 Credits: 3
- AVT 494 - Teaching Critical Response to Art, PK-12 Credits: 3 (meets the writing-intensive requirement)

*Transfer students with less than three semesters remaining must take AVT 301 for each remaining semester.

**Breadth and Experience (11 credits)**

- AVT 262 - Sculpture I Credits: 4 or another three dimensional-focused course
- AVT 495 - Introduction to Art Teaching and Learning Credits: 3
  AND
  Choose 4 credits from the following (see each concentration for individual requirements):
  - AVT 215 - Typography Credits: 4
  - AVT 217 - Introduction to Web Design Credits: 4
  - AVT 232 - Painting I Credits: 4
  - AVT 243 - Printmaking I Credits: 4
  - AVT 252 - Fundamentals of Photography Credits: 4
  - AVT 253 - Introduction to Digital Photography Credits: 4
  - AVT 254 - Photography Credits: 4
  - AVT 272 - Interdisciplinary Arts Credits: 4
  - AVT 280 - Introduction to New Media Arts Credits: 4
  - AVT 326 - Nontraditional Approaches to Drawing Credits: 4
• AVT 346 - Digital Printmaking Credits: 4
• AVT 374 - Sound Art I Credits: 4
• AVT 385 - EcoArt Credits: 4
• AVT 496 - Special Topics: (specific course title varies) Credits: 1-4
• Or other courses as approved by program director

Synthesis (4 credits)

• AVT 497 - Senior Project Credits: 4 or AVT 498 - Senior Design Project Credits: 4

Concentration (24 credits)

Choose one of the following areas: Drawing, Graphic Design, InterArts, New Media Art, Painting, Photography, Printmaking, or Sculpture.

▲Drawing (DRW)

• AVT 422 - Drawing III Credits: 4
• AVT 423 - Drawing IV Credits: 4
• 12 credits of 300-400 level AVT
  AND
  Choose one of the following:
  • AVT 324 - Figure Drawing Credits: 4
  • AVT 326 - Nontraditional Approaches to Drawing Credits: 4
  • AVT 333 - Painting II Credits: 4
  • AVT 336 - Experimental Painting Credits: 4
  • AVT 337 - Figurative Painting Credits: 4
  • AVT 432 - Painting III Credits: 4
  • AVT 433 - Painting IV Credits: 4

Note:

All AVT majors concentrating in drawing must complete AVT 232 Painting I under Breadth and Experience.

▲Graphic Design (GD)

• AVT 311 - Graphic Design Methods and Principles Credits: 4
• AVT 313 - Editorial Design Credits: 4
• AVT 414 - Corporate Design and Branding Credits: 4
  AND
  Choose 12 credits from the following:
  • AVT 411 - Motion Design Credits: 4
  • AVT 412 - Advanced Typography Credits: 4
  • AVT 413 - Professional Design Practices Credits: 4
  • AVT 415 - Web Design and Usability Credits: 4
  • AVT 416 - Advertising Design Credits: 4
  • AVT 417 - Package Design Credits: 4
• AVT 419 - Topics in Graphic Design Credits: 1-6
• AVT 420 - Advanced Web Design Credits: 4

Graphic Design Notes:

AVT 491 - Independent Study in Art and Visual Technology or AVT 496 - Special Topics: (specific course title varies) may be taken with permission of Area Coordinator.

All AVT majors concentrating in graphic design must complete AVT 217 - Introduction to Web Design under Breadth and Experience.

▲ InterArts (IA)

• AVT 373 - Performance Studio Credits: 4
• AVT 473 - Advanced Performance Studio Credits: 4
• 4 credits of 300-400 level AVT AND
  12 credits chosen from the following:
• AVT 372 - Hip Hop Culture Credits: 3
• AVT 374 - Sound Art I Credits: 4
• AVT 376 - Live Movies Credits: 4
• AVT 378 - The African American Experience in the Performing Arts Credits: 3
• AVT 491 - Independent Study in Art and Visual Technology Credits: 1-6

▲ New Media Art (NMA)

• 12 credits of 300-400 level AVT AND
  12 credits chosen from the following:
• AVT 374 - Sound Art I Credits: 4
• AVT 382 - 2D Experimental Animation Credits: 4
• AVT 383 - 3D Experimental Animation Credits: 4
• AVT 385 - EcoArt Credits: 4
• AVT 390 - Video Art Credits: 4
• AVT 482 - Advanced Image Making Credits: 4
• AVT 483 - Art and Interactivity Credits: 4
• AVT 487 - Advanced Topics: New Media Art Credits: 4

▲ Painting (PNT)

• AVT 333 - Painting II Credits: 4
• AVT 432 - Painting III Credits: 4
• AVT 433 - Painting IV Credits: 4
• 4 credits of 300-400 level AVT AND
  8 credits chosen from the following:
• AVT 336 - Experimental Painting Credits: 4
• AVT 337 - Figurative Painting Credits: 4
- AVT 434 - Painting V Credits: 4
- AVT 435 - Painting VI Credits: 4

▲Photography (PHO)

- AVT 353 - Traditional Photo Methods Credits: 4
- AVT 359 - About Photography: Practice and Research Credits: 3
- 1 credit of AVT 496 - Special Topics: (specific course title varies) Credits: 1-4
- 8 credits of 300-400 level AVT
  AND
  8 credits chosen from the following:
  - AVT 453 - Professional Practices Credits: 3
  - AVT 454 - Alternative Photo Processes Credits: 4
  - AVT 455 - Digital Printing Techniques Credits: 4
  - AVT 457 - Documentary Photography Credits: 4
  - AVT 458 - Advanced Studio Lighting Credits: 4
  - 1 credit of AVT 496 - Special Topics: (specific course title varies) Credits: 1-4

Photography Note:

All AVT majors concentrating in photography must complete AVT 252 Photography I under Breadth and Experience.

▲Printmaking (PMT)

- AVT 343 - Printmaking II Credits: 4
- 12 credits of 300-400 level AVT
  AND
  8 credits from the following:
  - AVT 345 - Paper/Print/Book as Language Credits: 4
  - AVT 346 - Digital Printmaking Credits: 4
  - AVT 442 - Printmaking III Credits: 4
  - AVT 443 - Printmaking IV Credits: 4

▲Sculpture (SCL)

- AVT 363 - Sculpture II Credits: 4
- AVT 462 - Sculpture III Credits: 4
- AVT 463 - Sculpture IV Credits: 4
- 12 credits of 300-400 level AVT

General Electives (5 credits)

Total: 120 credits

Note:
Following this curriculum does not guarantee entry into the MAT Program. Prospective MAT students must meet all MAT admissions requirements as described in the catalog.

**Graduate Certificate**

**Art Education Licensure Certificate**

Banner Code: AR-CERG-ARTL

Following this curriculum does not guarantee entry into the Master of Art Teaching (MAT) Program. Prospective MAT students must meet all MAT admissions requirements as described in the catalog.

**Admission Requirements**

In addition to meeting the general university admission requirements, admission to the licensure program is contingent on completion of a BFA, BA in art or approved equivalent along with a minimum 3.00 cumulative undergraduate GPA. Eligibility for the Art Education Licensure Certificate program may demand additional course work to establish proficiency in visual arts. Students will be required to satisfy the required state endorsement courses prior to student teaching.

Applications will be accepted for fall and spring semesters. The deadline for receipt of application materials is October 1 for Spring and April 1 for Fall. Each applicant must provide the following materials:

- Completed application form
- Certified copies of all undergraduate transcripts and any graduate transcripts
- Statement of intent and professional goals for entering the field
- Three letters of reference from faculty members or individuals who have firsthand knowledge of the applicant's academic or professional capabilities
- Official passing score on Praxis I or SAT equivalent
- TOEFL score, if required by Mason policies
- Portfolio of 15-20 images that reflect artistic breadth and depth, including drawing skills of the applicant's art. The work should be in Power Point format on a Mac-compatible CD. All portfolios must include a written image sheet with the corresponding number, title, date, medium, and size of each work. Incomplete portfolios will not be considered. Applicants' portfolio items are considered part of the application for admission and, thus, cannot be returned. Please do not send original materials.

The portfolio and all other application materials should be submitted to the Office of Graduate Admissions. Qualified applicants will be invited to an on-campus interview, portfolio review of original art works, and in-person writing sample.

Diversity among students is another consideration for acceptance into the program. Applicants with degrees in areas other than art are welcome, although they may be required to complete undergraduate core, and studio and art history courses.

The Art Education Licensure Certificate is a post-baccalaureate program designed for those who currently hold a graduate degree in an art-related field along with those who want a more immediate entrance into the art teaching profession. This "licensure only" program, which results in a pre K-12 art certification in the Commonwealth of Virginia, is a 21 credit program consisting of graduate education courses, art endorsements, student teaching internships and seminar. There is a MAT Graduate Degree option with an additional 9 graduate credits.

International students may be required to undergo an additional audit of their undergraduate transcripts. This certificate may be earned either on a part time or full time basis.

**Certificate Requirements**
• AVT 595 - Introduction to Art Teaching and Learning Credits: 3
• AVT 691 - Elementary Art Education Credits: 3
• AVT 692 - Secondary Art Education Credits: 3
• EDRD 501 - Literacy and Curriculum Integration, PK-12 Credits: 3
• EDUC 539 - Human Development and Learning PK-12 Credits: 3
  Prior to internship, student must pass: Praxis II, VCLA, technology and child abuse standards to receive placement for student teaching.
• AVT 695 - Internship in Art Education (Student Teaching) Credits: 5
• AVT 696 - Internship for Student Teachers Credits: 1

Total: 21 credits

All Licensure Certificate students will receive ongoing evaluations by the art education faculty to determine their readiness for student teaching.

In addition, applicants who did not take equivalent undergraduate courses will be required to take AVT 180 - New Media in the Creative Arts, art education endorsements plus any additional studio or art history course work to meet Virginia licensure requirements.

Master of Arts

Graphic Design, MA

Banner Code: AR-MA-GD

Art and Design Building, Room 2050
Phone: 703-993-8898
Web: soa.gmu.edu/

Faculty

Harold Linton, Director

Professors: Carbonneau, Frederick, Kravitz (gallery director), Linton (director), Sandell

Associate Professors: Ashcraft, Cooley, Crawford, Endress, Feerick, Frenn, Rothstein, White, Wrbican

Assistant Professors: Cui, Karametou, Sheridan, Winant (associate director)

Term Assistant Professors: Constantine, Del Popolo, Feuer, Stanley, Starr

Adjunct Faculty: Beach, Bisese, Bradley, Carr, Cashner, Erlich-Moss, Ferry, Goldman, Gorman, Guerrieri, Hankin, Hicks, Ho, Lauran, Morris, Petrine, Petzwinkler, Porrata, Watson

Graduate Program

The MA in Graphic Design offers students a comprehensive study and preparation for the graphic design profession. The program calls for 36 credits, which includes courses in typography, web design, image making, and brand design. The broad range of study is intended to develop professionals prepared for an ever-expanding graphic design field.
Admission Requirements

Application deadlines are as published by the University. Applicants should have an earned BA or BFA degree in Graphic Design from an accredited college or university, with a GPA of 3.00 in art courses. However, applicants with a BA or BS in another discipline, and work experience in the field may also apply for admission. Student should schedule an interview with design faculty prior to admission.

In addition to meeting the general university requirements for admission for graduate study, applicants must submit three letters of recommendation from faculty members, or those who can evaluate the applicant's academic potential; a sample of academic writing about art or graphic design, such as a paper from an art or design history course; and a CD or DVD with 20 examples of design works in PDF, jpeg, or a format that will play in a standard web browser.

Portfolio Guidelines

The applicant’s portfolio is a major selection criterion for graduate admission and should represent the applicant’s most accomplished work.

Applicants’ portfolio items are considered part of the application for admission and, thus, cannot be returned. Please do not send original materials. The portfolio and all other application materials should be submitted to the Office of Graduate Admissions. For more information, contact the School of Art at 703-993-8898.

Studios

The School of Art is located in the Art and Design Building which houses well equipped studios for drawing, painting, photography, printmaking, and sculpture, as well as six computer-equipped studios that cross platforms and are installed with current software applications used for two dimensional imaging, three-dimensional modeling, animation, video production, sound editing, multimedia authoring, photography, and web publishing.

Policies, procedures, and schedules for studio use are established by the AVT studio faculty and are posted in the studios.

Academic Policies

Please see College of Visual and Performing Arts for college academic policies.

Degree Requirements

Core Courses (19 credits)

- 8 Credits of Graduate Studio Elective (students choose from Digital Arts, Drawing, Painting, Photography, Printmaking, or Sculpture 500+ level)
- AVT 611 - Graduate Design Seminar Credits: 1 (Must be taken for a total of 3 credits)
- AVT 612 - Independent Project Research Credits: 1
- AVT 613 - Graphic Design History Credits: 3
- AVT 617 - Advanced Typography Credits: 4

Elective Courses (13 credits)

- AVT 614 - Brand Identity Design Credits: 4
Final Project (4 credits)

The final steps for completion of the MA in Graphic Design are a substantial final project that calls upon all the skills of a working designer.

- AVT 794 - Independent Design Project Credits: 4

Total: 36 credits

Master of Arts in Teaching

Art Education, MAT

Banner Code: AR-MAT-ARTE

Phone: 703-993-8562

Web: artofvisualarts.gmu.edu

Graduate Program

The School of Art offers a Master of Arts in Teaching in Art Education for BFA students as well as a concentration for licensed art teachers.

The Master of Arts in Teaching in Art Education is a preservice degree program that prepares students with a BFA degree or equivalent for PreK-12 art licensure by the Commonwealth of Virginia. Using a studio-based approach to art education and working closely with area public school systems, the MAT degree consists of 30 credits of graduate art education, school practicum experience, studio work, and preservice teaching internship and seminar.

The concentration for licensed art teachers is designed for PreK-12 licensed art teachers who currently hold an undergraduate degree in art education and are interested in obtaining a graduate art education degree for further professional development. Students take graduate art education courses, approved AVT 500 level graduate studio art courses, education courses, and a capstone project.

Admission Requirements

In addition to meeting the general university admission requirements for graduate study, admission to this program is contingent on completion of a BFA in visual art or approved equivalent. Also, candidates must have a minimum 3.00 cumulative undergraduate GPA. Eligibility for the MAT in Art Education Program may demand additional course work to establish proficiency in visual arts. Students lacking a strong background in the visual arts or pedagogy will be required to satisfy prerequisite courses prior to the required graduate courses.

Students interested in pursuing the degree with the concentration for licensed art teachers must meet the above with the following exceptions: admission is contingent upon the completion of a BFA or BA in art or art education with a minimum 3.00 cumulative undergraduate GPA, maintaining a current PreK-12 license to teach art education with at least one or more years of art teaching experience.
experience and official passing scores on Praxis I (or SAT equivalent) and Praxis II. (Exceptions to the Praxis scores will be determined on a case-by-case basis.)

Applications will be accepted for fall and spring semesters. The deadline for receipt of application materials is October 1 and March 1. Each applicant must provide the following materials:

- Completed application form
- Certified copies of all undergraduate transcripts and any graduate transcripts
- Statement of intent and professional goals for entering the field
- Three letters of reference from faculty members or individuals who have firsthand knowledge of the applicant’s academic or professional capabilities
- Official score on Praxis I or SAT equivalent (and Praxis II for those who apply to pursue the concentration for licensed art teachers)
- TOEFL score, if required by Mason policies
- Portfolio Requirement*:  
  o MAT (for BFA students) portfolio must include 15 to 20 images that reflect artistic breadth and depth, including drawing skills of the applicant’s art.
  o MAT with concentration for licensed art teachers portfolio must include 10 images of the applicant’s personal art that reflect artistic breadth and depth, including drawing skills, along with 10 student art works displaying a variety of 2-D and 3-D media. Student artwork is to be accompanied by a brief description of the lesson content.

*These works must be presented in Power Point format on a Mac-compatible CD. All portfolios must include a written image sheet with the corresponding number, title, date, medium, and size of each work. Incomplete portfolios will not be considered. Applicants’ CD portfolios are considered part of the application for admission and, thus, cannot be returned. Please do not send original materials.

The portfolio and all other application materials should be submitted to the Office of Graduate Admissions. Qualified applicants will be invited to an on-campus interview. Portfolio review of original art works, and in-person writing sample are required for MAT (BFA student) applicants.

Diversity among students is another consideration for acceptance into the program. Applicants with degrees in areas other than art are welcome, although they may be required to complete undergraduate core, studio, and art history courses.

MAT matriculates who earned a BFA at an institution other than Mason may be required to take additional undergraduate credits as post baccalaureate core requirements before acceptance into the program. Without equivalent courses, they will be required to take two BFA foundational courses in art education and education: AVT 493 and 494.

In addition, applicants who did not take equivalent undergraduate courses must also take AVT 180 Computers in the Creative Arts, plus any additional studio or art history course work to meet Virginia licensure requirements.

Academic Policies

Please see College of Visual and Performing Arts academic policies.

Degree Requirements

Required Core Courses (9 credits)

- AVT 605 - Issues and Research in Art Education Credits: 3
- AVT 667 - Two-Dimensional Art Making: Form, Theme, and Context Credits: 3
- AVT 668 - Three-Dimensional Art Making Across Cultures Credits: 3
MAT (for BFA students) Required Courses (21 credits)

Course work meets licensure and Master's degree requirements. The listing below follows the recommended sequencing for licensure.

- AVT 595 - Introduction to Art Teaching and Learning Credits: 3
- EDUC 539 - Human Development and Learning PK-12 Credits: 3
- EDRD 501 - Literacy and Curriculum Integration, PK-12 Credits: 3
- AVT 691 - Elementary Art Education Credits: 3
- AVT 692 - Secondary Art Education Credits: 3

Prior to Internship, must pass: Praxis II, VCLA, technology & child abuse standards

- AVT 695 - Internship in Art Education (Student Teaching) Credits: 5
- AVT 696 - Internship for Student Teachers Credits: 1

Professional Teaching Portfolio

The comprehensive experience for the MAT (for BFA students) includes the following: (1) a group exhibition, “The Art of Teaching Art Showcase,” in which MAT candidates display and formally present works of PreK–12 student art completed during the internship, along with exemplars of the MAT candidate’s own artwork, and (2) a culminating review of the intern’s competencies as reflected in a professional teaching portfolio, accomplished during the internship seminar course that accompanies student teaching. All process folios, lesson plans, explanations of projects, visual images, and other relevant materials must be made available for the project committee to review. Artworks and all materials should be exhibited in a manner that reveals the student’s aesthetic accomplishments. This exhibition and review will assess the MAT candidate’s final professional teaching portfolio that may be used at interviews for employment. These requirements will be accomplished during the internship seminar course that accompanies student teaching. A committee of MAT faculty will determine whether the student has mastered the field of study. Students who are unable to successfully complete the full student teaching internship in art education and seminar for student teachers will be terminated from the MAT in Art Education Program.

Teacher Endorsement

Students for the MAT (for BFA students) must complete ALL endorsements, including Praxis I, PLUS art education foundational courses AVT 493 - Teaching Visual Thinking Through Media, PK-12 and AVT 494 - Teaching Critical Response to Art, PK-12, totaling 6 credit hours. (NOTE: these courses may be taken concurrently with other MAT courses.) Students must have a studio major in the Visual Arts and meet Virginia Department of Education's required semester credit hours in the following specific areas: 12 hours of two-dimensional media, 12 hours of three-dimensional media, 9 hours of cultural context and art history, judgment and criticism, aesthetics, and 3 hours of related areas of the fine arts.

Notes:

MAT (for BFA students) will receive ongoing evaluation reviews by the MAT faculty to determine whether they have achieved satisfactory progress toward their degree.

▲Licensed Art Teachers Concentration (LAT) Required Courses (21 credits)

- AVT 500+ Approved Graduate AVT Studio Credits: 4
- AVT 599 - Special Topics in Art and Visual Technology Credits: 1-6 (Topic: Prints/Paper/Books as Language Credits: 4)
- AVT 606 - Creativity and Cognition in the Arts and Media Credits: 3
- AVT 615 - Technology for Art Teachers Credits: 3
• 1 credit of AVT 698 - Ind. Study/Directed Readings Credits: 1-3
• EDUC 500+ Approved graduate Education classes Credits: 3
• EDUC 537 - Foundations of Multicultural Education Credits: 3

Notes:

MAT for Licensed Art Teachers Concentration students must complete a Capstone Project. Under the guidance of a faculty advisor, students will select a topic in a personal area of interest in art education pedagogy, carry out in-depth research, and prepare a capstone final project in the form of a written report and visual presentation.

Total: 30 credits

Notes:

All MAT students must pass Praxis II and Virginia Communication and Language Assessment (VCLA) to receive placement for student teaching in the final semester.

Graduate Program

The MFA is a terminal degree that prepares students to become professional artists, work in technology or arts-related fields, and teach at the university level. Candidates are required to complete 60 credits, of which 45 credits are made up from both core and studio requirements. An additional 15 credits are based on comprehensive experience.
MFA students may choose an emphasis in graphic design, new media art, painting, photography, printmaking, sculpture, or InterArts. The latter offers students the opportunity to combine art forms in interdisciplinary projects that may be installation, performance, publishing, time-based, or writing-based; and combine creative and critical approaches in their work.

While it is anticipated that students will move through the MFA as described in this catalog, individuals with extensive professional accomplishment may, upon recommendation of the SOA Graduate Committee and with prior approval of the CVPA dean, craft an individualized program that meets curricular requirements.

**Admission Requirements**

In addition to meeting the general university requirements for admission for graduate study, candidates for the MFA must hold a BA or BFA degree. Upon applying, they must submit a portfolio, statement of intent and professional goals, and three letters of reference. Graphic design emphasis applicants must also submit a critical or historical essay or academic paper on a design (preferred) or art-related topic. Applications will be accepted for the fall semester only. The deadline for receipt of application materials is January 15.

Diversity among students accepted for study is another consideration. Applicants with degrees in areas other than art are welcome, although they may be required to complete undergraduate core courses.

**Portfolio Guidelines**

The applicant’s portfolio is a major selection criterion for graduate admission and should represent the applicant’s most accomplished work.

The portfolio and all other application materials should be submitted to the Office of Graduate Admissions. For more information, contact the School of Art office at 703-993-8898.

Portfolio requirements are different for each graduate area of emphasis and are listed below. Incomplete portfolios will not be considered.

Applicants’ portfolio items are considered part of the application for admission and, thus, cannot be returned. Please do not send original materials.

**Portfolio requirements by area of emphasis:**

Graphic Design: 20 samples of design work on a Mac (Apple Macintosh platform) compatible CD. Samples may include pdf's, high-resolution tiff or jpeg files, html's and samples of motion design. Samples must be numbered on the CD and correspond to an accompanying written descriptive list. List should include: name of artist, title and date. Videos and Flash files (no more than four minutes for each section) must be playable from a Mac-compatible CD or DVD. In the case of collaborative work, the applicant's role should be clearly stated.

New Media: 20 images on a Mac (Apple Macintosh platform) compatible CD. CD images must be numbered on the CD and correspond to an accompanying written descriptive list. List should include: name of artist, title, date, medium, and size of each work. Videos (no more than four minutes for each selection) must be playable from a Mac-compatible CD or DVD. Only the relevant parts of the video should be marked for viewing, with the applicant’s role clearly stated. New Media applicants should not submit slides.

Painting: 20 images on a Mac-compatible CD or slides. All images must be numbered and correspond to an accompanying written descriptive list. List should correspond in number and include: name of artist, title, medium, size, and date of each work.

Photography: 20 images on a Mac-compatible CD or slides. All images must be numbered and correspond to an accompanying written descriptive list. List should correspond in number and include: name of artist, title, medium, size, and date of each work.
Printmaking: 20 images on a Mac-compatible CD or slides. All images must be numbered and correspond to an accompanying written descriptive list. List should correspond in number and include: name of artist, title, medium, size, and date of each work.

Sculpture: 20 images on a Mac-compatible CD, slides or DVD. All images must be numbered and correspond to an accompanying written descriptive list. List should correspond in number and include: name of artist, title, medium, size, and date of each work.

InterArts: 20 images on a Mac-compatible CD, slides, videos, or writing-based materials. All images on the CD must be numbered and correspond to an accompanying written descriptive list. List should correspond in number and include: name of artist, title, medium, size, and date of each work. If videos are included, they must contain no more than four minutes for each selection. Only the relevant parts of the video should be marked for viewing, with the applicant’s role clearly stated. If writing-based materials are submitted, they should be submitted in printed form.

Supplementary material for all applicants, but not specifically requested by the review committee, such as CDs (Mac-compatible only), videos (DVD, VHS in NTSC format), film, web addresses, press clippings, or reviews of exhibitions may be submitted but will be reviewed only at the discretion of the AVT graduate application reviewers.

**Studios**

The School of Art is located in the Art and Design Building which houses well-equipped studios for drawing, painting, photography, printmaking, and sculpture, as well as six computer-equipped studios that cross platforms and are installed with current software applications used for two dimensional imaging, three-dimensional modeling, animation, video production, sound editing, multimedia authoring, photography, and web publishing.

Policies, procedures, and schedules for studio use are established by the AVT studio faculty and are posted in the studios.

**Academic Policies**

Please see College of Visual and Performing Arts for college academic policies.

**Degree Requirements**

**Core Requirements for all Areas of Emphasis except Graphic Design (33 credits)**

- 8 credits of AVT 500+ Art and Visual Technology Course Work
- AVT 599 - Special Topics in Art and Visual Technology Credits: 1-6 (Must be taken for a total of 4 credits)
- AVT 600 - Research Methodologies Credits: 3
- AVT 610 - Graduate Seminar Credits: 2 (Must be taken for a total of 8 credits)
- AVT 620 - Theory, Criticism, and the Visual Arts Credits: 3
- AVT 621 - Art Writing Seminar Credits: 3
- AVT 670 - Teaching Practicum Credits: 2 (Must be taken for a total of 4 credits)

**Core Requirements for Graphic Design Area of Emphasis (30 credits)**

- AVT 500+ Graphic Design Course Work Credits: 8-16
- AVT 500+ Art and Visual Technology Course Work Credits: 0-8
- AVT 611 - Graduate Design Seminar Credits: 1 (Must be taken for a total of 5 credits)
- AVT 613 - Graphic Design History Credits: 3
- AVT 617 - Advanced Typography Credits: 4
- AVT 618 - Visual Communication Theories Credits: 2
- AVT 670 - Teaching Practicum Credits: 2 (0-4 credits)
Studio Emphases (16 credits)

MFA students must complete 16 credits in their area of emphasis.

Graphic Design Emphasis

- AVT 641 - Graduate Graphic Design I Credits: 4
- AVT 646 - Graduate Graphic Design II Credits: 4
- AVT 647 - Advanced Graduate Graphic Design I Credits: 4
- AVT 648 - Advanced Graphic Design II Credits: 4

InterArts Emphasis

Any four graduate studio courses as approved by the division director of InterArts, for a total of 16 credits. InterArts graduate students may combine courses from the studio areas of emphasis and work with faculty to design an interdisciplinary thesis project.

New Media Art Emphasis

Any four of the following courses:

- AVT 616 - Advanced Art and Interactivity Credits: 5
- AVT 676 - Graduate Sound Art Credits: 4
- AVT 682 - Experimental 2D Animation Credits: 4
- AVT 684 - Advanced Image Making Credits: 4
- AVT 685 - Video Art Credits: 4
- AVT 686 - Experimental 3D Animation Credits: 4
- AVT 687 - Advanced Topics: New Media Credits: 4
- AVT 688 - Hybrid Animation Credits: 4

Painting Emphasis

- AVT 632 - Graduate Painting I Credits: 4
- AVT 633 - Graduate Painting II Credits: 4
- AVT 634 - Advanced Graduate Painting I Credits: 4
- AVT 635 - Advanced Graduate Painting II Credits: 4

Photography Emphasis

- AVT 652 - Graduate Photography I Credits: 4
- AVT 653 - Graduate Photography II Credits: 4
- AVT 654 - Advanced Graduate Photography I Credits: 4
- AVT 655 - Advanced Graduate Photography II Credits: 4

Printmaking Emphasis

- AVT 642 - Graduate Printmaking I Credits: 4
AVT 643 - Graduate Printmaking II Credits: 4
AVT 644 - Advanced Graduate Printmaking I Credits: 4
AVT 645 - Advanced Graduate Printmaking II Credits: 4

Sculpture Emphasis

AVT 662 - Graduate Sculpture I Credits: 4
AVT 663 - Graduate Sculpture II Credits: 4
AVT 664 - Advanced Graduate Sculpture I Credits: 4
AVT 665 - Advanced Graduate Sculpture II Credits: 4

MFA Comprehensive Experience (11-14 credits)

Candidates must complete all of the above core and studio requirements as well as the following:

- AVT 796 - Directed Reading Credits: 1 (Graphic Design emphasis must be taken for 2 credits)
- AVT 798 - Directed Project and Exhibition Credits: 1-7 (Graphic Design area of emphasis must take for a total of 9 credits and all other areas of emphasis must take for a total of 7 credits)
- AVT 799 - Thesis Credits: 1-3 (Must be taken for a total of 3 credits)

Note:

The comprehensive experience involves a study of the historical basis for a studio project; an independent creative production suitable for public viewing; and a written thesis documenting the evolution of the creative problem and exploring the intention, purpose, and relative success of the finished project.

Total: 60 credits

Non-Degree

Art and Visual Technology Minor

Banner Code: AVT

Art and Design Building, Room 2050
Phone: 703-993-8898
Web: soa.gmu.edu/

The minor in AVT requires 20 credits and offers a core of foundational studies with the opportunity for further study in the following areas: drawing, graphic design, InterArts, new media arts, painting, photography, printmaking, or sculpture.

Students must earn a grade of a C or better in required AVT coursework.

University policy states that students must earn 8 distinct credits that are not used for their major toward their minor.

Course Work

- AVT 104 - Studio Fundamentals I Credits: 4 or AVT 105 - Studio Fundamentals II Credits: 4
Graphic Design Undergraduate Certificate

Banner Code: AR-CERB-GD

Art and Design Building, Room 2050

Faculty

Harold Linton, Director

Professors: Carbonneau, Frederick, Kravitz (gallery director), Linton (director), Sandell

Associate Professors: Ashcraft, Cooley, Endress, Feerick, Frenn, Rothstein, White, Wrbican

Assistant Professors: Cui, Karametou, Sheridan, Winant (associate director)

Term Assistant Professors: Constantine, Del Popolo, Feuer, Stanley, Starr

Adjunct Faculty: Beach, Bisese, Bradley, Carr, Cushner, Erlich-Moss, Ferry, Goldman, Gorman, Guerrieri, Hankin, Hicks, Ho, Lauran, Morris, Petrine, Petzwinkler, Porrata, Watson

The Graphic Design Undergraduate Certificate is for working adults with a 4-year baccalaureate undergraduate degree from an accredited institution who seek to gain the skills and competency to advance into a career in graphic design. It encompasses a specific body of knowledge and practice that prepares candidates for rewarding positions in the design field.

To translate design concepts into effective communication solutions, one must understand the principles and conventions of graphic design and be familiar with the digital technology used to create a finished product. This certificate program focuses on pragmatic problem-solving concepts while emphasizing the design process. Students learn layout, typography and semiotics in a project-based learning environment that asks them to create posters, brochures, publications and identity systems. Throughout the program, the portfolio development process is emphasized as students prepare for careers as graphic designers, project managers and art directors.

Students entering the program must be able to demonstrate basic skills in visual language and should have working knowledge of professional graphic design software, or must take AVT 180 - New Media in the Creative Arts Credits: 3 in addition to the other required courses.

Students have four years to complete certificate requirements. Such students who are given permission to re-enroll following an absence from Mason may not count the four-year time limit as beginning on the date of re-enrollment. International students attending in F-1 or J-1 status have a more restrictive time limit; contact the Office of International Programs and Services for information. Students who will not meet the published time limit because of circumstances beyond their control may petition their dean for an extension. Failure to meet the time limit or to secure approval of an extension request may result in termination from the program.
A completed undergraduate certificate may be posted to the transcript only after completion of a bachelor's degree. Note that these are university minimum requirements.

The certificate may be completed under part or full time basis.

Certificate Requirements

Foundation Courses (12 credits)

- AVT 215 - Typography Credits: 4
- AVT 311 - Graphic Design Methods and Principles Credits: 4
- AVT 217 - Introduction to Web Design Credits: 4 or AVT 253 - Introduction to Digital Photography Credits: 4

Design Specialties Courses (8 credits)

- AVT 313 - Editorial Design Credits: 4
- AVT 414 - Corporate Design and Branding Credits: 4

Capstone (4 credits)

- AVT 413 - Professional Design Practices Credits: 4

Total: 24 credits

Other Degrees

Graphic Design Minor

**Course Work**

The Arts Management Program offers all course work designated AMGT in the Courses section of this catalog.

**Undergraduate Program**

**Arts Management Minor**

The field of visual and performing arts offers many career paths that rely on a strong foundation in one or more art forms and require specific knowledge and skills in administration and management. The minor in arts management is open to all CVPA majors as well as art history majors. All other students must complete 9 credits of arts-related course work to be eligible for this minor.

**Graduate Certificate**

**Arts Management**

The Arts Management certificate is intended for those who know the specific expertise they desire to acquire to either enter into or advance arts management or related careers. Students successfully complete fifteen (15) credits in an area of emphasis including Marketing and Public Relations in the Arts, Entrepreneurship in the Arts, Programming and Project Management in the Arts, and Fundraising and Development in the Arts.
Completed applications must be received by March 1 for fall and October 15 for spring. International applicants: Completed applications must be received by February 15 for fall and September 15 for spring.

MA in Arts Management

The MA in arts management responds to a growing demand for graduates who can manage and coordinate the arts, bridging the world of performing and visual arts with applied managerial skills. The Washington, D.C., region is home to one of the nation’s largest concentrations of performing and visual arts organizations. The demand for arts managers with skills in financial and budgetary management, strategic management and entrepreneurship, and public relations, including marketing and advertising, has arguably never been more acute. The need for arts managers with skills in philanthropy, fund raising, and ongoing relationship-building management among the private and public arts sectors also continues to grow at a fast pace.

The MA is a 36-credit program of study that provides a core curriculum in the fundamentals of arts management. Students complete a 24-credit core and then select 6 credits of approved elective courses. Students also take internal and external internships. The internal internship affords an in-depth opportunity to work with professionals in residence at Mason’s Center for the Arts. The external internship provides the opportunity to work at more than 60 different visual and performing arts venues in the Washington, D.C. metropolitan area.

Admissions Requirements

The program is geared toward those with a passion for the arts. Diversity among applicants is anticipated and sought, and candidates are evaluated on a case-by-case basis. Work experience is strongly preferred. It is anticipated that applicants will come from the arts community, with experience and training in music, dance, theater, and visual and technical arts and wish to add the skills of marketing, finance, strategy, entrepreneurship, and management to their repertoire. It is also expected that students will enter with more developed skills in the business side of the arts and wish to unite these skills with prior experiences in the arts. Completed applications must be received by March 1 for fall and October 15 for spring. International applicants: Completed applications must be received by February 15 for fall and September 15 for spring.

In addition to meeting general requirements for university admission for graduate study, applicants must submit the following items:

- Official undergraduate transcripts listing a four-year bachelor’s degree from an accredited institution with a minimum GPA of 3.00
- Two letters of recommendation from faculty members or individuals who have first-hand knowledge of the applicant’s academic or professional capabilities
- A two-page (maximum) statement of intent and goals
- Portfolio that demonstrates work experience (optional)
- Applicants shall be interviewed by at least one member of the program faculty or Admissions Committee

Academic Policies

Please see College of Visual and Performing Arts for college academic policies.

Admission Requirements

- Official undergraduate transcripts listing a four-year bachelor's degree from an accredited institution with a minimum GPA of 3.00
- Two letters of recommendation from faculty members or individuals who have first-hand knowledge of the applicant's academic or professional capabilities.
- A two-page (maximum) statement of intent and goals
- Applicants shall be interviewed by at least one member of the program faculty or Admissions Committee. In addition, applicants may submit a portfolio that demonstrates work experience.

This graduate certificate may be pursued on a part time or full time basis.

Certificate Requirements

Applicants must complete course work in one of the following areas:

Entrepreneurship in the Arts

- AMGT 525 - Introduction to Technology for PR and Marketing in the Arts Credits: 1
- AMGT 603 - Arts and Society Credits: 3
- AMGT 704 - Finance and Budgeting for Arts I Credits: 3
- AMGT 705 - Finance and Budgeting for Arts II Credits: 2
- AMGT 750 - Arts Entrepreneurship I Credits: 3
- AMGT 751 - Arts Entrepreneurship II Credits: 3

Fundraising and Development in the Arts

- AMGT 555 - Introduction to Technology for Fundraising and Development in the Arts Credits: 1
- AMGT 556 - Applied Technology Projects for Fundraising and Development in the Arts Credits: 1
- AMGT 557 - Selected Readings for Fundraising and Development in the Arts Credits: 1
• AMGT 601 - Fund Raising/Development I Credits: 3
• AMGT 607 - Fund Raising/Development II Credits: 3
• AMGT 650 - Major Gifts and Capital Campaigns Credits: 3
• AMGT 712 - Grant Writing in the Arts Credits: 3

Marketing and PR in the Arts

• AMGT 525 - Introduction to Technology for PR and Marketing in the Arts Credits: 1
• AMGT 526 - Applied Technology Projects for PR and Marketing in the Arts Credits: 1
• AMGT 527 - Selected Readings for PR and Marketing in the Arts Credits: 1
• AMGT 604 - Public Relations and Marketing Strategies for the Arts I Credits: 3
• AMGT 608 - Public Relations and Marketing Strategies for the Arts II Credits: 3
• AMGT 630 - Viral Marketing and Social Media for the Arts Credits: 3
• AMGT 620 - Legal Aspects in Arts Management Credits: 3

Programming and Project Management in the Arts

• AMGT 545 - Introduction to Technology for Programming and Project Management in the Arts Credits: 1
• AMGT 546 - Applied Technology Projects for Programming and Project Management in the Arts Credits: 1
• AMGT 547 - Selected Readings for Programming and Project Management in the Arts Credits: 1
• AMGT 601 - Fund Raising/Development I Credits: 3 or AMGT 604 - Public Relations and Marketing Strategies for the Arts I Credits: 3
• AMGT 609 - Facilities Management Credits: 3
• AMGT 640 - Programming and Project Management in the Arts Credits: 3
• AMGT 706 - Festivals and Special Events Credits: 3

Total: 15 credits

Degree Requirements

Core Requirements (24 credits)

Elective courses at the 600 or higher course level may be taken only after a candidate has completed and/or registered for at least 12 core course credits. Students are required to successfully complete AMGT 602 - Seminar in Arts Management within their first 12 credits.

- AMGT 601 - Fund Raising/Development I Credits: 3
- AMGT 602 - Seminar in Arts Management Credits: 3
- AMGT 603 - Arts and Society Credits: 3
- AMGT 604 - Public Relations and Marketing Strategies for the Arts I Credits: 3
- AMGT 606 - Board of Directors Management Credits: 3
- AMGT 704 - Finance and Budgeting for Arts I Credits: 3
- AMGT 705 - Finance and Budgeting for Arts II Credits: 2
- AMGT 710 - Arts Policy Credits: 3
- AMGT 795 - Capstone in Arts Management Credits: 1

Internships (6 credits)

- AMGT 740 - Internal Internship Credits: 2
  (Or 2 credits of approved electives for those students who have a minimum of 2000 hours of previous work in an arts management or related field)
- AMGT 790 - External Internship Credits: 1-4 (Students must take a total of 4 credits)

Electives (6 credits)

Arts Management MA candidates who are also Arts Management certificate candidates may apply only 3 credits of these electives to an Arts Management certificate. Arts Management joint MA/certificate candidates in Marketing and Public Relations in the Arts, Fundraising and Development in the Arts, and Program and Project Management in the Arts areas of emphasis must complete a minimum of 45 credits, 9 of which are unique to the certificate. Arts Management joint MA/certificate candidates in the Entrepreneurship in the Arts emphasis must complete a minimum of 45 credits, 7 of which are unique to the certificate.

Select 6 credits from the following:

- AMGT 504 - Professional Development Arts Management Credits: 1
- AMGT 505 - Academic Writing in Arts Management Credits: 1
- AMGT 511 - Introduction to Grant Writing Credits: 1
- AMGT 525 - Introduction to Technology for PR and Marketing in the Arts Credits: 1
- AMGT 526 - Applied Technology Projects for PR and Marketing in the Arts Credits: 1
- AMGT 527 - Selected Readings for PR and Marketing in the Arts Credits: 1
- AMGT 545 - Introduction to Technology for Programming and Project Management in the Arts Credits: 1
- AMGT 546 - Applied Technology Projects for Programming and Project Management in the Arts Credits: 1
The field of visual and performing arts offers many career paths that rely on a strong foundation in one or more art forms and require specific knowledge and skills in administration and management. The minor in arts management is open to all CVPA majors as well as art history majors. All other students must complete 9 credits of arts-related course work to be eligible for this minor.

University policy states that students must earn 8 distinct credits that are not used toward their major toward their minor.

**Course Work**

- MUSI 393 - Music Administration and Management Credits: 2
- MUSI 401 - Impact of the Arts on Civilization Credits: 3
- ARTH 374 - Art Now Credits: 3
- ARTH 394 - The Museum Credits: 3
• COMM 300 - Foundations of Public Communication Credits: 3
  Note: the above courses may have prerequisites that must be met; see individual course descriptions for details.

Total: 18 credits

Computer Game Design

Art and Design Building, Room 2020
Phone: 703-993-5734
Web: game.gmu.edu

Faculty

Scott Martin, Program Director

Associate Professor: Martin (director), Willis

Term Assistant Professors: Grimsby, Totten, Wien

Administrative Faculty (Instructional): Hudson (assistant director), Nolan (technical director)

Undergraduate Program

The 120 credit Computer Game Design program enables students to focus on the artistic components of computer game design while providing them with the technical skills prerequisite to the field. Required courses include computer science, art and visual technology, music, the humanities, and computer game design. The required internship provides students with practical experience that enhances their employability post-graduation.

Portfolio Requirement

Effective Fall 2011 students who wish to apply for the Computer Game Design BFA program must attend one of the program's Open House events (see game.gmu.edu for more details). A portfolio must be submitted and reviewed by the faculty before admission to the Computer Game Design Program.

The Open House will allow students to have their online portfolios reviewed and/or receive guidance creating and improving their portfolios. Examples may include drawing, painting, sculpture, 2 or 3D digital art, prints, animation, models, characters, music, websites (URLs), or game levels. Applicants may include game design documents, scripts and stories, or game code (Script, C++, JAVA). Call 703-993-5734 to schedule a portfolio review.

Course Work

The Computer Game Design Program offers all course work designated GAME in the Courses section of this catalog.

Writing-Intensive Requirement

The university requires all students to complete at least one course designated "writing intensive" in their majors at the 300 level or above. Students in the BFA in computer game design fulfill this requirement by successfully completing GAME 332 (RS).
Upper-Level Credits

All undergraduate students are required to complete a minimum of 45 credits of upper-division courses at the 300-499 level. Fulfilling degree requirements does not guarantee this requirement will be met.

Major GPA

All GAME undergraduate students must earn a minimum 2.00 cumulative GPA in their major.

All GAME courses except GAME 101, GAME 250 and GAME 367 must be passed with a grade of C or better.

Academic Policies

Please see College of Visual and Performing Arts for college academic policies.

Degree Requirements

General Education (40 credits)

- ENGH 101 - Composition Credits: 3
- ENGH 302 - Advanced Composition Credits: 3
  Nonnative speakers of English with limited proficiency in the language may substitute ENGH 100 for ENGH 101. Students must attain a minimum grade of C in ENGH 100 or 101, as well as 302, to fulfill degree requirements.
- AVT 180 - New Media in the Creative Arts Credits: 3
- CS 105 - Computer Ethics and Society Credits: 1
- MATH 113 - Analytic Geometry and Calculus I Credits: 4
- PHYS 103 - Physics and Everyday Phenomena I Credits: 4 or PHYS 160 - University Physics I Credits: 3 and PHYS 161 - University Physics I Laboratory Credit: 1 or another laboratory science course approved by advisor (total Credits: 4)
- PSYC 100 - Basic Concepts in Psychology Credits: 3

Non-Specific General Education Requirements

- Oral Communication Credits: 3
- Fine Arts Credits: 3
Literature Credits: 3
Natural Science (including laboratory) Credits: 4
Western Civilization Credits: 3
Global Understanding Credits: 3

Approved courses may be found under the University General Education section of this catalog.

Major Core (53-54 credits)

- AVT 104 - Studio Fundamentals I Credits: 4
- CS 112 - Introduction to Computer Programming Credits: 4
- GAME 210 - Basic Game Design Credits: 3
- GAME 230 - History of Computer Game Design Credits: 3
- GAME 231 - Computer Animation for Games Credits: 3
- GAME 232 - Online and Mobile Gaming Credits: 3
- GAME 250 - Music for Film and Video Credits: 3
- GAME 300 - Portfolio Preparation Credits: 1
- GAME 310 - Game Design Studio Credits: 3
- GAME 330 - Computer Game Platform Analysis Credits: 3
- GAME 331 - Consumer Gaming Platform Analysis Lab Credits: 1
- GAME 332 - Story Design for Computer Games Credits: 3
- GAME 367 - Writing and Editing Music and Sound Credits: 3
- GAME 398 - Advanced Game Design Animation Credits: 3
- GAME 410 - Advanced Game Design Studio Credits: 3
- GAME 489 - Pre-Internship Seminar Credits: 1
- GAME 490 - Senior Project Credits: 2-6 (Must be taken for 6 credits. Fulfills synthesis requirement.)
- GAME 491 - Internship Credits: 3-4

Digital Media Electives (at least 13 credits)

Complete at least 13 credits of the following (or another course approved by your advisor):

- AVT 280 - Introduction to New Media Arts Credits: 4
- AVT 354 - Digital Photo Techniques Credits: 4
- AVT 382 - 2D Experimental Animation Credits: 4
- AVT 383 - 3D Experimental Animation Credits: 4
- AVT 390 - Video Art Credits: 4
- AVT 482 - Advanced Image Making Credits: 4
- AVT 487 - Advanced Topics: New Media Art Credits: 4
- COMM 355 - Video Principles and Practices Credits: 3
- ENGH 372 - Introduction to Film Credits: 3
- FAVS 399 - Special Topics in Film and Video Studies Credits: 1-3
- GAME 399 - Special Topics Credits: 1-4

Visual Arts Electives (8 credits)

Select two courses from the following (or another course approved by your advisor):
• AVT 215 - Typography Credits: 4  
• AVT 217 - Introduction to Web Design Credits: 4  
• AVT 222 - Drawing I Credits: 4  
• AVT 232 - Painting I Credits: 4  
• AVT 243 - Printmaking I Credits: 4  
• AVT 252 - Fundamentals of Photography Credits: 4  
• AVT 262 - Sculpture I Credits: 4  
• AVT 311 - Graphic Design Methods and Principles Credits: 4  
• AVT 323 - Drawing II Credits: 4  
• AVT 324 - Figure Drawing Credits: 4  
• AVT 333 - Painting II Credits: 4  
• AVT 337 - Figurative Painting Credits: 4  
• AVT 343 - Printmaking II Credits: 4  
• AVT 353 - Traditional Photo Methods Credits: 4  
• AVT 363 - Sculpture II Credits: 4  

General Electives (5-6 credits)

Total: 120 credits

Non-Degree

Computer Game Design Minor

Banner Code: GAME

Art and Design Building, Room 2020  
Phone: 703-993-5734  
Web: game.gmu.edu

The minor (18-19 credits) embodies the core components discovered in the larger game design field. It offers a core of foundational studies with intermediate and advanced course options in game animation, game sound and music, or game design and development. Students pursuing the minor will be able to participate in game program events, special activities, game design competitions, and in most projects hosted in the Computer Game Design Research Studio.

University policy states that students must earn 8 distinct credits that are not used for their major toward their minor. This minor is not intended for game design majors.

Course Work

The minor requires at least 18 credits, including:

• GAME 101 - Introduction to Game Design Credits: 3  
• GAME 210 - Basic Game Design Credits: 3  
• GAME 230 - History of Computer Game Design Credits: 3  
• GAME 400 - Game Design Practicum Credits: 3  

and a two or three-course sequence from the following:
● GAME 231 - Computer Animation for Games Credits: 3 and GAME 398 - Advanced Game Design Animation Credits: 3
OR
● GAME 232 - Online and Mobile Gaming Credits: 3 and GAME 330 - Computer Game Platform Analysis Credits: 3 and GAME 331 - Consumer Gaming Platform Analysis Lab Credits: 1
OR
● GAME 250 - Music for Film and Video Credits: 3 and GAME 367 - Writing and Editing Music and Sound Credits: 3

Total: 18-19 credits

School of Dance

Performing Arts Building, Room A300
Phone: 703-993-1114
Web: dance.gmu.edu

Faculty

Elizabeth Price, Director

Professors: Lepore, Miller, Shields

Associate Professors: Joyce, Price (director), Studd

Assistant Professor: d'Amboise (Heritage Professor)

Term Assistant Professors: Reedy, Torres-Ortiz

Adjunct Faculty: Clancy, Cronmiller, Dinapoli, Goodson, Haynes, Lee, Nuamah, Summerall, Urgelles, Windom

Course Work

The School of Dance offers all course work designated DANC in the Courses section of this catalog.

Undergraduate Programs

The School of Dance offers a BFA and a BA. Entrance to either program is by audition. Information about the audition process, including dates and audition application, can be found on the school web page, dance.gmu.edu, or by calling the dance office at 703-993-1114. Admission to the university is determined by the Admissions Office.

Writing-Intensive Requirement

The university requires all students to complete at least one course designated “writing intensive” in their major at the 300-level or above. Students in the BFA and BA in dance fulfill this requirement by successfully completing DANC 390 or 391.

Certification to Teach
This program is approved by the Virginia State Department of Education and administered through the College of Education and Human Development, which is accredited by the National Council for the Accreditation of Teacher Education (NCATE). To be considered for licensure in dance education, a student must successfully complete requirements for a BA or BFA in dance. In addition, students must meet the following requirements:

- Be formally accepted into the program by the Dance Education Committee. Before requesting an interview with the committee, students must complete 45 to 60 credits with a GPA of 2.80 or higher, and submit passing scores for the Praxis I tests (Reading, Writing, Mathematics). **It is strongly recommended that students take the Praxis I tests as soon as they have completed ENGH 302, a course in literature, and a course in mathematics.**

- Earn no grade lower than a C in dance (see major curriculum) and in professional education courses (EDUC 301, 302; EDRD 300; DANC 453, DANC 454).

- Maintain an overall GPA of 2.80 or higher in all dance course work at Mason and at all other institutions of higher learning combined.

- As dance elective options, complete DANC 118 - World Dance, DANC 453 - Teaching Creative Movement, and DANC 131 - Beginning Jazz Technique or DANC 231 - Intermediate Jazz Technique.

- With committee approval, register for and complete EDUC 301 and EDUC 302 and EDRD 300.

- After completing all required course work and with committee approval, submit passing scores on the VLCA and complete a full-time 15-week student teaching internship (DANC 455) that includes experiences at both elementary and middle or secondary levels.

This course of study will require a post-baccalaureate semester.

**Graduate Program**

The MFA in dance is a highly selective 60-credit program of study grounded in the modern dance genre that emphasizes mastery in performance, choreography, and teaching in higher education. Applicants must have significant (5 years or more) professional performance experience in modern or ballet at the national or international level. They must also demonstrate professional competence in choreography as exemplified by a significant body of work and have experience teaching technique at the advanced level.

**Admission Requirements**

In addition to fulfilling the admission requirements for graduate study, the applicant must submit directly to the School of Dance a résumé, artistic statement including artistic goals, and a 15-minute video of original choreography.

All candidates must satisfy the following prerequisites: advanced dance technique, improvisation, dance composition, history, anatomy/kinesiology, and dance production. Prerequisite courses are usually fulfilled if the applicant has earned a BA or BFA in dance.

**Academic Policies**

Please see College of Visual and Performing Arts for college academic policies.

**Bachelor of Arts**

**Dance, BA**

**Banner Code: AR-BA-DANC**
Faculty

Elizabeth Price, Director

This course of study will require a post-baccalaureate semester.

**Degree Requirements**

**General Education (49-58 credits)**

**Foundation**

**Written Communication:**

Nonnative speakers of English with limited proficiency in the language may substitute ENGH 100 for ENGH 101. Students must attain a minimum grade of C in ENGH 100 or 101, as well as in 302, to fulfill degree requirements.

- ENGH 101 - Composition Credits: 3
- ENGH 302 - Advanced Composition Credits: 3

**Foundation Requirements:**

- Oral communication Credits: 3
- Quantitative reasoning Credits: 3
- Information technology Credits: 3

**Core Requirements**

- Literature Credits: 3
- Natural science (must include a laboratory science) Credits: 7
- Western civilization Credits: 3
- Global understanding Credits: 3
- Social science Credits: 3
- Philosophy or religion Credits: 3
- Arts Credits: 9
  - AVT/ARTH Credits: 3
  - THR 210 - Acting I Credits: 3
  - Choose one of the following Credits: 3
    - MUSI 101 - Introduction to Classical Music
    - MUSI 102 - Popular Music in America
    - MUSI 103 - Musics of the World
    - MUSI 104 - Introduction to Twentieth-Century Music
- MUSI 105 - Music in the United States

**Synthesis**

- DANC 490 - Senior Dance Seminar Credits: 3

**Foreign Language (0-9 credits)**

- Elementary (6)
- Intermediate (3–6)

**Dance Major Core (47 credits)**

- DANC 114 - Rhythmic Analysis and Music Resources for Dance Credits: 3
- DANC 150 - Dance Improvisation Credits: 3
- DANC 170 - Orientation to Dance Production Credits: 1
- DANC 190 - First Year Seminar Credits: 1
- DANC 210 - Dynamic Alignment Credits: 3
- DANC 251 - Dance Composition I Credits: 3
- DANC 252 - Dance Composition II Credits: 3
- DANC 270 - Dance Production Lab Credits: 1
- DANC 370 - Dance Performance Credits: 0-1 (must be taken for 2 credits)
- DANC 390 - Dance History I Credits: 3
- DANC 391 - Dance History II Credits: 3
- DANC 454 - Methods of Teaching Dance Credits: 3
- DANC 410 - Introduction to Contemporary Movement Theories Credits: 3 or DANC 480 - Introduction to Laban Movement Analysis Credits: 3

**Choose 6 credits from the following:**

- DANC 325 - Intermediate Modern Dance Credits: 1-3
- DANC 425 - Advanced Modern Dance Credits: 1-3

**Choose 3 credits from the following:**

- DANC 345 - Intermediate Ballet Credits: 1-3
- DANC 445 - Advanced Ballet Credits: 1-3

**Dance Electives (6 credits)**

Choose from the following:

- DANC 118 - World Dance Credits: 3
- DANC 119 - Dance in Popular Culture: Afro-Latino Dance Credits: 3
- DANC 120 - Special Topics in Dance Credits: 1-3
- DANC 131 - Beginning Jazz Technique Credits: 3
- DANC 161 - Beginning Tap Dance Credits: 3
- DANC 225 - Beginning Intermediate Modern Dance Credits: 3
- DANC 231 - Intermediate Jazz Technique Credits: 3
- DANC 245 - Beginning Intermediate Ballet Credits: 3
- DANC 318 - Global Perspectives: World Dance Forms Credits: 3
• DANC 324 - Introduction to Dance Conditioning Credits: 1-3
• DANC 325 - Intermediate Modern Dance Credits: 1-3
• DANC 326 - Dance Performance Practicum Credits: 0-1
• DANC 331 - Advanced Jazz Dance Credits: 3
• DANC 345 - Intermediate Ballet Credits: 1-3
• DANC 362 - Directed Choreography Credits: 1
• DANC 370 - Dance Performance Credits: 0-1
• DANC 371 - Residency Workshop Credits: 0-1
• DANC 399 - Independent Study Credits: 1-3
• DANC 410 - Introduction to Contemporary Movement Theories Credits: 3
• DANC 418 - Global Dance Intensive Credits: 3
• DANC 420 - Special Topics in Dance Credits: 1-3
• DANC 425 - Advanced Modern Dance Credits: 1-3
• DANC 445 - Advanced Ballet Credits: 1-3
• DANC 453 - Teaching Creative Movement Credits: 3
• DANC 455 - Teaching Practicum Credits: 1-6

Note:

Additional technique and performance credits beyond those required in the major core may be applied to dance electives

Elective Credits (15-24)

Total: 120 credits

Bachelor of Fine Arts

Dance, BFA

Banner Code: AR-BFA-DANC

Assistant Professor: d’Amboise (Heritage Professor)

Term Assistant Professors: Reedy, Torres-Ortiz

Adjunct Faculty: Clancy, Cronmiller, Dinapoli, Goodson, Haynes, Lee, Nuamah, Summerall, Urgelles, Windom
Undergraduate Program

The BFA in dance is a performance-oriented contemporary dance program designed to prepare students professionally as performers, choreographers, and teachers, as well as prepare them for graduate study. Students in this program demonstrate significant technical mastery and devote a large portion of their college study to an intensive and comprehensive dance curriculum.

Daily technical training in modern dance and ballet, and opportunities to study jazz and world dance forms develops a versatile dancer. Student progress in the BFA program is assessed annually. Because of the professional nature of the BFA degree, the program requires completion of 126 credits of course work.

Entrance to the program is by audition. Information about the audition process, including dates and audition application, can be found on the school web page, dance.gmu.edu, or by calling the dance office at 703-993-1114. Admission to the university is determined by the Admissions Office.

Course Work

The School of Dance offers all course work designated DANC in the Courses section of this catalog.

Writing-Intensive Requirement

The university requires all students to complete at least one course designated “writing intensive” in their major at the 300-level or above. Students in the BFA and BA in dance fulfill this requirement by successfully completing DANC 390 or 391.

Academic Policies

Please see College of Visual and Performing Arts for college academic policies.

Certification to Teach

This program is approved by the Virginia State Department of Education and administered through the College of Education and Human Development, which is accredited by the National Council for the Accreditation of Teacher Education (NCATE). To be considered for licensure in dance education, a dance major at George Mason must successfully complete requirements for a BA or BFA in dance. In addition, students must meet the following requirements:

- Be formally accepted into the program by the Dance Education Committee. Before requesting an interview with the committee, students must complete 45 to 60 credits with a GPA of 2.80 or higher, and submit passing scores for the Praxis I tests (Reading, Writing, Mathematics). **It is strongly recommended that students take the Praxis I tests as soon as they have completed ENGH 302, a course in literature, and a course in mathematics.**
- Earn no grade lower than a C in dance (see major curriculum) and in professional education courses (EDUC 301, 302; EDRD 300; DANC 453, 454).
- Maintain an overall GPA of 2.80 or higher in all dance course work at Mason and at all other institutions of higher learning combined.
- As dance elective options, complete DANC 118 World Dance, DANC 453 Teaching Creative Movement, and DANC 131 Beginning Jazz Technique or 231 Intermediate Jazz Technique.
- With committee approval, register for and complete EDUC 301 and 302 and EDRD 300.
- After completing all required course work and with committee approval, submit passing scores on the VLCA and complete a full-time 15-week student teaching internship (DANC 455) that includes experiences at both elementary and middle or secondary levels.
This course of study will require a post-baccalaureate semester.

Graduate Program

The MFA in dance is a highly selective 60 credit program of study grounded in the modern dance genre that emphasizes mastery in performance, choreography, and teaching in higher education. Applicants must have significant (5 years or more) professional performance experience in modern or ballet at the national or international level. They must also demonstrate professional competence in choreography as exemplified by a significant body of work, and have experience teaching technique at the advanced level.

Admission Requirements

In addition to fulfilling the admission requirements for graduate study, the applicant must submit directly to the School of Dance a résumé, artistic statement including artistic goals, and a 15-minute video of original choreography.
All candidates must satisfy the following prerequisites: advanced dance technique, improvisation, dance composition, history, anatomy/kinesiology, and dance production. Prerequisite courses are usually fulfilled if the applicant has earned a BA or BFA in dance.

Academic Policies

Please see College of Visual and Performing Arts for college academic policies.

Degree Requirements

- 3 credits of DANC 501 - Graduate Dance Seminar Credits: 1-3
- DANC 510 - Contemporary Movement Theories Credits: 3 or DANC 580 - Laban Movement Analysis Credits: 3
- 6 credits of DANC 560 - Advanced Choreography Credits: 3
- DANC 562 - Directed Choreography Credits: 3
- 3 credits of DANC 570 - Advanced Dance Performance Credits: 1-3
- DANC 571 - Residency Workshop Credits: 3
- DANC 615 - Contemporary Trends Credits: 3
- DANC 627 - Advanced Teaching Seminar Credits: 3
- DANC 672 - Dance Production Credits: 3
- 3 credits of DANC 790 - Internship Credits: 1-3
- 6 credits of DANC 799 - Thesis Credits: 1-6

Choose 15 credits from the following:
- 9-12 credits of DANC 525 - Advanced Modern Dance Credits: 1-3
- 3-6 credits of DANC 545 - Advanced Ballet Credits: 1-3

Electives (6 credits)

Total: 60 credits

Note:

Mason does not guarantee the availability of these courses every semester; some are offered in alternate years.

Non-Degree

Dance Appreciation Minor

Banner Code: DNCA

Performing Arts Building, Room A300
Phone: 703-993-1114
Web: dance.gmu.edu

The minor (21 credits) offers students an opportunity to study a variety of movement styles and understand dance in its historical and cultural context. A maximum of 4 transfer credits may be applied to the dance minor.

University policy states that students must earn 8 distinct credits that are not used for their major toward their minor.
Course Work

To earn the minor, students must complete the following courses:

Core (6 credits):

- DANC 101 - Dance Appreciation Credits: 3
- DANC 118 - World Dance Credits: 3

Students must complete three of the following courses (9 credits):

- DANC 125 - Beginning Modern Dance Credits: 3
- DANC 145 - Beginning Ballet Credits: 3
- DANC 225 - Beginning Intermediate Modern Dance Credits: 3
- DANC 245 - Beginning Intermediate Ballet Credits: 3

Note:

Students with prior experience in ballet and/or modern dance may, with permission of instructor, take all 9 credits of technique courses at the 200 level.

All students pursuing the minor must demonstrate a basic level of training in both modern dance and ballet, and therefore, complete 9 credits of modern and ballet technique.

Students must choose two or more courses from the following (6 credits):

- DANC 118 - World Dance Credits: 3 *
- DANC 119 - Dance in Popular Culture: Afro-Latino Dance Credits: 3
- DANC 120 - Special Topics in Dance Credits: 1-3
- DANC 125 - Beginning Modern Dance Credits: 3
- DANC 131 - Beginning Jazz Technique Credits: 3
- DANC 145 - Beginning Ballet Credits: 3
- DANC 161 - Beginning Tap Dance Credits: 3
- DANC 225 - Beginning Intermediate Modern Dance Credits: 3
- DANC 231 - Intermediate Jazz Technique Credits: 3
- DANC 245 - Beginning Intermediate Ballet Credits: 3
- DANC 301 - What is Dance? Credits: 3
- DANC 318 - Global Perspectives: World Dance Forms Credits: 3
- DANC 331 - Advanced Jazz Dance Credits: 3
- DANC 418 - Global Dance Intensive Credits: 3
- DANC 420 - Special Topics in Dance Credits: 1-3

Total: 21 credits

Notes:
Substitutions may be proposed to department faculty for approval.

* DANC 118 fulfills the global understanding requirement. Students who choose to take this course twice for the minor must select two different world cultures.

## Film and Video Studies

Performing Arts Building, Room A407  
Phone: 703-993-5158  
Web: favs.gmu.edu

### Faculty

Clayton Austin, Theater; Thomas Britt, Film and Video Studies; Jiyoung Cha, Film and Video Studies; Julie Christensen, Modern and Classical Languages; Mark Cooley, Art and Visual Technology; Lynne Constantine, Art and Visual Technology; Ken Elston, Theater; Edgar Endress, Art and Visual Technology; Peggy Feerrick, Art and Visual Technology; Cynthia Fuchs, English; Edward Gero, Theater; Timothy Gibson, Communication; Carma Hinton, Robinson Professor; Seth Hudson, Computer Game Design; Richard Kamenitzer, Arts Management; Howard Kurtz, Theater; Alison Landsberg, History and Art History; Carla Marcantonio, English; Scott Martin, Computer Game Design; Heather McDonald, Theater; David Miller, Communication; Kristina Olsen, Modern and Classical Languages; Paula Petrik, History and Art History; Janine Ricouart, Modern and Classical Languages; Mark Sample, English; Jessica Scarlata, English; Benjamin Steger, Film and Video Studies; Gail Scott White, Art and Visual Technology; Martin Winkler, Modern and Classical Languages; Sue Wrbican, Art and Visual Technology

### Course Work

The Film and Video Studies Program offers all course work designated FAVS in the Courses section of this catalog.

### Undergraduate Program

The Film and Video Studies Program offers a 120-credit multidisciplinary BA degree, which spans many units including Art and Visual Technology, Communication, Computer Game Design, English, History and Art History, Modern and Classical Languages, New Century College, and Theater. Students study film and video production, theory, criticism, ethics, screenwriting, and business.

The vocabulary of film (broadly defined) pervades the intellectual, cultural, political, and social landscape. The tools the filmmaker wields apply to an ever-widening range of tasks across the fields of human endeavor, from traditional narrative and documentary productions to academic research and pedagogical applications to projects of personal expression. Emerging technology makes the means of production available to anyone with access to a moderate level of computing power. This combination of factors makes film an important subject for academic inquiry and training.

### Portfolio Requirement

All students are admitted to the Film and Video Studies (FAVS) program of study separately from their admission to the university and only by portfolio review. Admission to the university is determined by the Admissions Office.

New students at Mason may apply to the BA program upon admission to the university through a portfolio review. Information about the portfolio process, including dates and portfolio requirements, can be found on the FAVS web page, http://cvpa.gmu.edu/favs or by calling 703-993-5158. The portfolio must be submitted to favs@gmu.edu for assessment prior to scheduling an appointment for the portfolio review.
Writing-Intensive Requirement

The university requires all students to complete at least one course designated “writing intensive” in their majors at the 300 level or above. Students seeking a BA in film and video studies fulfill this requirement by completing FAVS 470 or THR 482.

Upper-Level Credits

All undergraduate students are required to complete a minimum of 45 credits of upper-division courses at the 300-499 level.

Graduate Program affiliated with Film and Video Studies

The Master of Arts in Interdisciplinary Studies (MAIS) with a concentration in Film and Video Studies (MAIS in Film and Video Studies) in the College of Humanities and Social Sciences is designed for students who seek a degree that integrates knowledge from several disciplines in the area of film and video. This MAIS program addresses a rapidly evolving demand for specialized and individualized graduate study.

The degree requires course work with FAVS program and faculty and selected courses from other disciplines including Art and Visual Technology, Communication, Educational Instructional Technology, English, and History. Students complete their degree with a project or thesis. For additional information, please refer to the MAIS in Film and Video Studies in the catalog.

Academic Policies

Please see College of Visual and Performing Arts for college academic policies.

Academic Policies

Please see College of Visual and Performing Arts for college academic policies.

Degree Requirements

General Education (37 credits)

Foundation Requirements

- Oral communication Credits: 3
- Information technology Credits: 3
- Quantitative reasoning Credits: 3
• ENGH 101 - Composition Credits: 3
• ENGH 302 - Advanced Composition Credits: 3
Nonnative speakers of English with limited proficiency in the language may substitute ENGH 100 for ENGH 101. Students must attain a minimum grade of C in ENGH 100 or 101, as well as 302, to fulfill degree requirements.

Core Requirements

• Literature Credits: 3
• Arts Credits: 3
• Natural science (including one laboratory science) Credits: 7
• Western civilization Credits: 3
• Global understanding Credits: 3
• Social and behavioral sciences Credits: 3
• Foreign language, minor, double major or double degree (see College of Visual and Performing Arts for foreign language requirements)

Notes:

FAVS majors may not double-count courses toward both the FAVS major and university general education requirements with the exception of the synthesis requirement, listed below as part of the FAVS core requirements.

Major (50 credits)

Film and Video Studies Core Requirements (29 credits)

Students must earn a minimum grade of C in all core courses.

• AVT 204 - Visual Thinking Credits: 3
• COMM 355 - Video Principles and Practices Credits: 3
• COMM 454 - Free Speech and Ethics Credits: 3 or FAVS 352 - Ethics of Film and Video Credits: 3 (either course also satisfies the university general education synthesis requirement)
• ENGH 319 - Popular Culture Credits: 3 (Film and Video Forms section only)
• FAVS 100 - Film and Video Studies Colloquium Credits: 1 (Must be taken for a total of 2 credits)
• FAVS 355 - Film Business Practices Credits: 3
• FAVS 450 - Internship in Film and Video Studies Credits: 3
• FAVS 498 - Creative Producing and Development Credits: 3
• FAVS 499 - Senior Project Credits: 3
• FAVS 470 - Film and Video Screenwriting Credits: 3 or THR 482 - Advanced Screenplay Workshop Credits: 3

Analysis, History, Theory (6 credits)

Take 6 credits from the following:

• CHIN 320 - Contemporary Chinese Film Credits: 3
• COMM 365 - Gender, Race, and Class in the Media Credits: 3
• COMM 380 - Media Criticism Credits: 3
• COMM 399 - Special Topics in Communication Credits: 1-3 (Must be approved by Program Director)
• ENGH 202 - Texts and Contexts Credits: 3 (Must be approved by Program Director. Cannot also be used for general education.)
• ENGH 319 - Popular Culture Credits: 3 (Cannot be the same topic as required FAVS core course)
• ENGH 370 - Introduction to Documentary Credits: 3
• ENGH 372 - Introduction to Film Credits: 3
• ENGH 470 - Topics in Film/Media History Credits: 3
• ENGH 472 - Topics in Film/Media Theory Credits: 3
• ENGH 474 - Topics in Film/Media Studies Credits: 3
• FAVS 225 - The History of World Cinema Credits: 3
• FAVS 399 - Special Topics in Film and Video Studies Credits: 1-3 (Must be approved by Program Director)
• FREN 470 - French and Francophone Cinema Credits: 3
• HIST 389 - Topics in U.S. History Credits: 3 (Must be approved by Program Director)
• HIST 393 - Topics in Film and History Credits: 3
• JAPA 320 - Japanese Cinema Credits: 3
• MUSI 301 - Music in Motion Pictures Credits: 3
• NCLC 347 - Gender Representation in Popular Culture Credits: 3-6
• RUSS 470 - Topics in (Post) Soviet Film Credits: 3
• WMST 300 - Current Issues in Women and Gender Studies Credits: 1-6
• Or other courses as approved by Program Director

Concentration (15 credits)

Students choose one of the following concentrations:

• Business
• Screenwriting
• Video Production

▲ Concentration in Business (BUS)

The following three required courses:
• AMGT 405 - Seminar in Arts Management Credits: 3
• COMM 375 - Mass Communication Advertising and Promotions Credits: 3
• FAVS 356 - Film Marketing Credits: 3

and 6 credits of electives chosen from the following:
• AMGT 471 - Introduction to Grant Writing Credits: 1
• COMM 320 - Business and Professional Communication Credits: 3
• COMM 330 - Principles of Public Relations Credits: 3
• COMM 359 - Media Management Credits: 3
• FAVS 399 - Special Topics in Film and Video Studies Credits: 1-3 (Topic focus in business)
• GAME 399 - Special Topics Credits: 1-4 (Topic: Focus in Business)
• MSOM 300 - Managing Financial Resources Credits: 3
• MSOM 301 - Managing People and Organizations Credits: 3
• MSOM 302 - Managing Information in a Global Environment Credits: 3
• MSOM 303 - Marketing in a Global Economy Credits: 3
• MSOM 304 - Entrepreneurship: Starting and Managing a New Enterprise Credits: 3
• MSOM 305 - Managing in a Global Economy Credits: 3
• MSOM 306 - Managing Projects and Operations Credits: 3
• Or other courses as approved by Program Director

Note:

MSOM electives in concentration area may not also be used for MSOM minor.

▲ Concentration in Screenwriting (SCWR)

The following three required courses:

• ENGH 396 - Introduction to Creative Writing Credits: 3
• FAVS 483 - Feature-Length Scriptwriting Credits: 3
• GAME 332 - Story Design for Computer Games Credits: 3

and 6 credits of electives chosen from the following:

• COMM 303 - Writing across the Media Credits: 3
• ENGH 377 - Digital Creative Writing Credits: 3
• ENGH 386 - Editing for Audience, Style, and Voice Credits: 3
• ENGH 398 - Fiction Writing Credits: 3
• ENGH 399 - Creative Nonfiction Writing Credits: 3
• ENGH 492 - Advanced Fiction Writing Workshop Credits: 3
• ENGH 497 - Topics in Creative Writing Credits: 3
• FAVS 399 - Special Topics in Film and Video Studies Credits: 1-3 (Topic focus in screenwriting/scriptwriting)
• GAME 399 - Special Topics Credits: 1-4 (Topic focus in screenwriting/scriptwriting)
• THR 380 - Playwriting I Credits: 3
• THR 381 - Playwriting II Credits: 3
• THR 382 - Screenplay Workshop Credits: 3
• THR 480 - Advanced Playwriting Credits: 3
• Or other courses as approved by Program Director

▲ Concentration in Video Production (VPRO)

The following three required courses:

• COMM 360 - Video Editing Credits: 3
• FAVS 335 - Sound and Lighting for Film and Video Credits: 3
• FAVS 365 - Documentary Filmmaking I Credits: 3 or FAVS 375 - Fiction Film Directing Credits: 3

and 6 credits of electives chosen from the following:

• AVT 354 - Digital Photo Techniques Credits: 4
• AVT 356 - Photo Studio Techniques Credits: 4
• AVT 374 - Sound Art I Credits: 4
• AVT 382 - 2D Experimental Animation Credits: 4
• AVT 383 - 3D Experimental Animation Credits: 4
• AVT 390 - Video Art Credits: 4
• AVT 482 - Advanced Image Making Credits: 4
• AVT 487 - Advanced Topics: New Media Art Credits: 4
• COMM 358 - Video Producing and Directing Credits: 3
• COMM 364 - Videography Credits: 3
• COMM 366 - Visual Communication Credits: 3
• COMM 399 - Special Topics in Communication Credits: 1-3 (Topic focus in production)
• FAVS 365 - Documentary Filmmaking I Credits: 3 (Cannot be taken if used as required concentration course)
• FAVS 399 - Special Topics in Film and Video Studies Credits: 1-3 (Topic focus in production)
• FAVS 460 - Advanced Video Editing Credits: 3
• THR 423 - Audition Techniques: Stage and Camera Credits: 3
• Or other courses as approved by Program Director

General Electives (33)

Students must use general electives to complete a minor, double major or second degree outside the major field of study, or demonstrate intermediate-level proficiency in one foreign language.

Total: 120 credits

■ School of Music

Performing Arts Building, Room A417
Phone: 703-993-1380
Web: music.gmu.edu

Faculty

Dennis Layendecker, Heritage Chair, Director

Associate Professors: Aler, R. Bergman, Billingham, T. Owens

Term Associate Professor: Wuttke

Assistant Professors: Guessford, Nickens, Robinson

Term Assistant Professors: Kilkenny

Course Work

The School of Music offers all course work designated MUSI in the Courses section of this catalog.

Undergraduate Programs

The two undergraduate degree programs offered through the School of Music, the bachelor of art (BA) in music and the bachelor of music (BM), prepare students for graduate work in music and music literature; research and professional work in musical
activities; and state licensure, or certification, to teach vocal and choral or instrumental music at the elementary and secondary school levels.

Through its strategic plan, Music Outreach and the Teaching Professions, the School of Music enables students to pursue worthwhile vocational goals as teachers, performers, conductors, and composers. The School of Music also seeks to educate its students to reflect a concern for cultural and humanistic values as future ambassadors and advocates of music and other arts. Through innovative learning experiences, the School of Music provides all students in the BA and BM programs with opportunities to become effective musicians, teachers, and advocates of music. Teaching music is the principal area in which students can find employment in private studios, public and private schools, academies, and higher education within the ever-changing workplace. Because of this, all music majors at Mason receive some training in the teaching of music.

The School of Music also recognizes the critical outreach role it provides in serving students from all majors, as well as members of the community who significantly benefit from the values and experiences of an education in music. The School of Music seeks to provide unique educational opportunities through its various course offerings, workshops, presentations, and performances for those seeking music enrichment.

Entrance to all music degree programs is by audition. Arrangements for an audition must be made in advance by contacting the School of Music before the scheduled audition date. Auditions are held approximately once per month. Audition dates and audition application forms are available through the School of Music web site: music.gmu.edu.

A fundamentals of music test is given during the first week of classes to all students enrolled in MUSI 115 - Theory I. Call the School of Music at 703-993-1380 for additional information.

Competency placement tests are required of all transfer students who wish to present transfer credit in any of the following areas: aural skills and keyboard skills.

Students must earn a minimum 2.00 cumulative GPA in their major or higher, if required by their program.

**Writing-Intensive Requirement**

Mason requires all students to complete at least one course designated “writing intensive” in their major at the 300 level or above. Students majoring in music may fulfill this requirement by successfully completing MUSI 332 - Music History in Society II. Students who transfer this course into Mason may be required to repeat it or enroll in some other suitable course to fulfill the writing intensive requirement.

**Teacher Licensure**

Undergraduate students seeking certification to teach vocal and choral or instrumental music at the elementary and secondary levels must earn the BM degree as specified under Concentration in Music Education section in this section. Students who have earned a baccalaureate degree and are seeking state licensure to teach music must also complete this sequence of courses, which constitute a state-approved program for teacher education in music.

**Graduate Certificates**

**Instrumental Performance Artist Graduate Certificate**

The certificate is a specialized, graduate-level program for advanced musicians who desire to further develop and refine their performance art. The certificate program is a two-year course of study requiring at least two consecutive semesters of residence. A total of 32 credits is required. Advisor's approval is required for each semester's enrollment.

**Piano Performance Artist Certificate**
The certificate is a specialized, graduate-level program for advanced musicians who desire to further develop and refine their performance art. The certificate program is a two-year course of study requiring at least two consecutive semesters of residence. A total of 32 credits is required. Advisor's approval is required for each semester's enrollment.

**Vocal Performance Artist Graduate Certificate**

The certificate is a specialized, graduate-level program for advanced musicians who desire to further develop and refine their performance art. The certificate program is a two-year course of study requiring at least two consecutive semesters of residence. A total of 32 credits is required. Advisor's approval is required for each semester's enrollment.

**Graduate Programs**

The PhD in music education and the doctor of musical arts degree require 60 credits beyond the master’s degree in music.

**Music, MM**

The expansion of professional education in the arts is paramount for the growth and development of a rich and vital cultural community and a supporting network of individual artists. The dynamics of contemporary society suggest that the influence of the arts on public life will continue to expand well into the 21st century. Each year, opportunities increase for creative work by performers, composers, sculptors, painters, dancers, actors, historians, theoreticians, and musicologists.

The MM degree is offered as an educational channel to meet the intellectual and career needs of qualified students. It is a comprehensive and advanced program of study with a choice of concentrations in performance, music education, composition, conducting, jazz studies, and pedagogy. The MM with a concentration in music education does not provide licensure to teach music in public or private schools.

**PhD in Music Education**

The PhD in music education, a research-intensive degree, focuses on the gathering, processing, and interpretation of information. Students in the PhD program take seminars and topics courses in music education, as well as research courses through the College of Education and Human Development. PhD graduates are expected to demonstrate the ability to communicate significant concepts of music education.

**Doctor of Music Arts**

The doctor of musical arts concentrations are composition, conducting, and performance. While these concentrations share some of the required course work, each is also distinct in course requirements. Professional musicians earn the DMA to enhance and extend their knowledge and practice within their area of specialization. The DMA student focuses on the profession of music performance, as well as the theory and practice of the discipline.

**Academic Policies**

Please see College of Visual and Performing Arts academic policies.

**Artist Certificate**

Advisor’s approval is required for each semester’s enrollment.

This certificate may be earned on a full time or part time basis.

Admission Requirements

- An artist certificate application and current résumé
- A bachelor’s degree in music or equivalent (as evaluated by the School of Music Admissions Committee)
- Transcripts from previous educational institutions
- One-page written statement of student’s goals and interest in the program
- Two letters of recommendation
- A CD (preferred), audiocassette, or videotape of a live performance of solo works from the standard repertory.

Applicants must perform an audition recital and be interviewed on the Mason Campus. Applicants will be notified of the date and time of the audition and interview.

Certificate Requirements

Studies in Performance (17 credits)

- MUSI 72X Graduate Applied Music (over four semesters) Credits: 12
- 2 credits of MUSI 592 - Topics in Music Credits: 1-6
• 3 credits of  MUSI 790 - Graduate Recital Credits: 1 (two semesters of solo recitals and one semester of chamber recital)

Support Studies in Literature and Pedagogy (8 credits)

• MUSI 630 - Topics in Music History and Literature Credits: 3 or MUSI 730 - Advanced Topics in Music History Credits: 3
• MUSI 551 - Keyboard Pedagogy I Credits: 3 or MUSI 553 - Instrumental Pedagogy and Literature Credits: 3
• MUSI 695 - Teaching Internship Credits: 2

Support Studies in Accompanying or Ensemble plus Electives (7 credits)

(choose A or B)

A

• MUSI 571 - Techniques of Accompanying I Credits: 1
• MUSI 685 - Graduate Chamber Ensemble Credits: 1
• 5 credits of electives

B

• MUSI 682 - Wind Symphony Credits: 1
• MUSI 683 - Symphonic Band Credits: 1
• MUSI 685 - Graduate Chamber Ensemble Credits: 1
• MUSI 687 - Symphony Orchestra Credits: 1
• MUSI 689 - Jazz Ensemble Credits: 1
• 1 credit of electives

Note:

One of MUSI 682, MUSI 683, MUSI 685, MUSI 687 or MUSI 689 must be taken twice.

Total: 32 credits

- MUSI 685 - Graduate Chamber Ensemble Credits: 1
- MUSI 687 - Symphony Orchestra Credits: 1
- MUSI 689 - Jazz Ensemble Credits: 1
- 1 credit of electives

Note:

One of MUSI 682, MUSI 683, MUSI 685, MUSI 687 or MUSI 689 must be taken twice.

Total: 32 credits

Vocal Performance Artist Graduate Certificate

Banner Code: AR-CERG-ACVP

Performing Arts Building, Room A417
Phone: 703-993-1380
Web: music.gmu.edu

Faculty

Dennis Layendecker, Heritage Chair, Director

Professors: Camphouse, Carroll, Engebretson, Layendecker (director), Maiello, Miller, Monson (associate director), Smith

Term Professors: Balakerskaia, Hearden, Rendler

Associate Professors: Aler, R. Bergman, Billingham, T. Owens

Term Associate Professor: Wuttke

Assistant Professors: Guessford, Nickens, Robinson

Term Assistant Professor: Kilkenny

The certificate is a specialized, graduate-level program for advanced musicians who desire to further develop and refine their performance art. The certificate program is a two-year course of study requiring at least two consecutive semesters of residence. A total of 32 credits is required. Advisor’s approval is required for each semester’s enrollment.

This certificate may be earned on a full time or part time basis.

Admission Requirements

- An artist certificate application and current résumé
- A bachelor’s degree in music or equivalent (as evaluated by the School of Music Admissions Committee)
- Transcripts from previous educational institutions
- One-page written statement of student’s goals and interest in the program
- Two letters of recommendation
- A CD (preferred), audiocassette, or videotape of a live performance of solo works from the standard repertory.

Applicants must perform an audition recital and be interviewed on the Mason Campus. Applicants will be notified of the date and time of the audition and interview.

Certificate Requirements

Studies in Performance (20 credits)

- 12 credits of MUSI 723 - Applied Music in Voice Credits: 2-3
- 4 credits of MUSI 592 - Topics in Music Credits: 1-6
- MUSI 526 - Performance Seminar and Vocal Literature for Singers and Accompanists II Credits: 2
- MUSI 541 - Diction for Singers I: Italian Diction and English Diction Credits: 2 or MUSI 542 - Diction for Singers II: German Diction and French Diction Credits: 2

Support Studies in Ensemble Performance plus Electives (12 credits)

- 9 credits of MUSI 685 - Graduate Chamber Ensemble Credits: 1 AND MUSI 688 - Opera and Musical Theater Ensemble Credits: 3
- 1 credit of MUSI 690 - Graduate Lecture Recital Credits: 1-3
- MUSI 790 - Graduate Recital Credits: 1
- 1 credit of electives

Total: 32 credits

Bachelor of Arts
Music, BA

Banner Code: AR-BA-MUSI

Performing Arts Building, Room A417
Phone: 703-993-1380
Web: music.gmu.edu

Faculty

Dennis Layendecker, Heritage Chair, Director

Professors: Camphouse, Carroll, Engebretson, Layendecker (director), Maiello, Miller, Monson (associate director), Smith

Term Professors: Balakerskaia, Hearden, Rendler

Associate Professors: Aler, R. Bergman, Billingham, T. Owens

Term Associate Professor: Wuttke

Assistant Professors: Guessford, Nickens, Robinson

Term Assistant Professors: Kilkenny

The bachelor of art (BA) in music prepares students for graduate work in music and music literature as well as research and professional work in musical activities.

Entrance to all music degree programs is by audition. Arrangements for an audition must be made in advance by contacting the School of Music before the scheduled audition date. Auditions are held approximately once per month. Audition dates and audition application forms are available through the School of Music web site: music.gmu.edu.

A fundamentals of music test is given during the first week of classes to all students enrolled in MUSI 115 Theory I. Call the School of Music at 703-993-1380 for additional information.

Competency placement tests are required of all transfer students who wish to present transfer credit in any of the following areas: aural skills and keyboard skills.

Students must earn a minimum 2.00 cumulative GPA in their major or higher, if required by their program.

Students pursuing a BA must complete the general education program outlined below. This distribution enables students to develop a breadth of knowledge, as well as the necessary skills to make the in-depth study of a major truly meaningful. In addition to general education requirements, students must also demonstrate intermediate-level proficiency in one foreign language or complete a minor program. A minimum of 57 credits in music course work is required for the music major. A total of 120 credits is required.

Writing-Intensive Requirement
Mason requires all students to complete at least one course designated “writing intensive” in their major at the 300 level or above. Students majoring in music may fulfill this requirement by successfully completing MUSI 332. Students who transfer this course into Mason may be required to repeat it or enroll in some other suitable course to fulfill the writing intensive requirement.

**Academic Policies**

Please see College of Visual and Performing Arts for college academic policies.

**Degree Requirements**

**General Education (25-46 credits)**

**Foundation Requirements**

- Quantitative reasoning (mathematics) Credits: 3
- ENGH 101 - Composition Credits: 3 *
- ENGH 302 - Advanced Composition Credits: 3
*Nonnative speakers of English with limited proficiency may substitute ENGH 100 for ENGH 101. Students must attain a minimum grade of C in ENGH 100 or 101, as well as in 302, to fulfill degree requirements.

**Core Requirements**

- Literature Credits: 3*
- Natural science (two classes; one must contain a lab) Credits: 7*
- Western civilization Credits: 3
- Social or behavioral science Credits: 3*

**Notes:**

* Also have significant elective choices as per general education listing.

Remaining general education requirements are fulfilled with major course work.

**Other (0-21 credits)**

- Intermediate-level language proficiency*, or an academic minor, double major or double degree outside the major field of study

**Note:**

* See beginning of the CVPA section for foreign language requirement.

**Music Major (57-58 credits)**

**Musicianship (19 credits)**

- MUSI 115 - Theory I Credits: 3
- MUSI 116 - Theory II Credits: 3
- MUSI 215 - Theory III Credits: 3
- MUSI 216 - Theory IV Credits: 3
- MUSI 113 - Aural Skills I Credits: 1
- MUSI 114 - Aural Skills II Credits: 1-2 (must be taken for 1 credit)
- MUSI 213 - Aural Skills III Credits: 2
- MUSI 171 - Keyboard Skills I Credits: 1 (Pianists substitute MUSI 371 for MUSI 171)
- MUSI 172 - Keyboard Skills II Credits: 1 (Pianists substitute MUSI 372 for MUSI 172)
- MUSI 273 - Keyboard Skills III Credits: 1

Music History Courses (12 credits)

Required for Music Technology concentration students:
- MUSI 338 - Music History in Society A Credits: 3
- MUSI 431 - Music History in Society III Credits: 3 (Meets general education global understanding requirement)
- MUSI 438 - Music History in Society B Credits: 3
- MUSI 439 - Music History in Society C Credits: 3
  Required for all other students:
- MUSI 331 - Music History in Society I Credits: 3
- MUSI 332 - Music History in Society II Credits: 3
- MUSI 431 - Music History in Society III Credits: 3 (Meets general education global understanding requirement)
- MUSI 432 - Music History in Society IV Credits: 3

Performance and Music Electives (24-26 credits)

- Applied music Credits: 8
- Large ensemble Credits: 4 (Transfer students must earn at least 2 credits at Mason)
- Additional ensembles Credits: 3 (Large or small; meets general education arts requirement)
- MUSI 251 - The Art of Teaching Music Credits: 3 (meets general education communication requirement)
- MUSI 300 - Recital Attendance Credits: 0 (five semesters)
- MUSI 490 - Musical Communication in Context Credits: 3 (meets general education synthesis requirement)
  And one of the following (meets general education information technology requirement):
- Music Technology concentration students only: CS 112 - Introduction to Computer Programming Credits: 4 and PHIL 112 - Ethics and the Cybersociety Credits: 1
  OR
- All other students: MUSI 415 - Music in Computer Technology Credits: 3

Pedagogy (0-3 credits)

This requirement is waived for students concentrating in Music Technology. All other students must register for an instrumental pedagogy and literature class appropriate to their major instrument or teaching internship.

- 2 credits of MUSI 395 - Teaching Internship Credits: 1-4
  OR one of the following: Required for keyboard students:
  - MUSI 351 - Keyboard Pedagogy Credits: 3
  Required for vocal students:
  - MUSI 352 - Vocal Pedagogy and Lab Credits: 3
Required for strings and guitar students; recommended for wind, brass, or percussion students:

- MUSI 353 - Instrumental Pedagogy and Literature Credits: 3
  (Topic varies; students must register for the topic corresponding with their major instrument.)

*Students registering for MUSI 395: Wind, Brass, and Percussion have the option to sign up for 4 credits, to be divided over 2 semesters.

▲ Concentration in Music Technology (MTEC) (15 credits)

Students who wish to complete a concentration in music technology must also complete the following:

- MUSI 252 - Popular Music Arranging Credits: 3
- MUSI 254 - Music and Technology Credits: 3
- MUSI 354 - Electronic Composition Credits: 3
- MUSI 355 - Recording Techniques Credits: 3
- MUSI 359 - Topics in Music Technology Credits: 3

Note:

Students pursuing this concentration may not also pursue the Music and Technology minor.

General Electives (2-38 credits)

Can include additional music courses.

Total: 120 credits

Bachelor of Music

Music, BM

Banner Code: AR-BM-MUSI

Performing Arts Building, Room A417
Phone: 703-993-1380
Web: music.gmu.edu

Faculty

Dennis Layendecker, Heritage Chair, Director

Professors: Camphouse, Carroll, Engebretson, Layendecker (director), Maiello, Miller, Monson (associate director), Smith

Term Professors: Balakerskaia, Hearden, Rendler

Associate Professors: Aler, R. Bergman, Billingham, T. Owens

Term Associate Professor: Wuttke
Assistant Professors: Guessford, Nickens, Robinson

Term Assistant Professors: Kilkenny

The bachelor of music (BM) prepares students for graduate work in music and music literature; research and professional work in musical activities; and state licensure, or certification, to teach vocal and choral or instrumental music at the elementary and secondary school levels.

**Entrance to all music degree programs is by audition. Arrangements for an audition must be made in advance by contacting the School of Music before the scheduled audition date.**

Auditions are held approximately once per month. Audition dates and audition application forms are available through the School of Music web site: music.gmu.edu

A fundamentals of music test is given during the first week of classes to all students enrolled in MUSI 115 Theory I. Call the School of Music at 703-993-1380 for additional information.

Competency placement tests are required of all transfer students who wish to present transfer credit in any of the following areas: aural skills and keyboard skills.

120 credits are required for the BM degree. Four concentrations are offered: composition, jazz, music education, and performance. Students are required to complete core courses in one of the concentrations plus courses listed below in one of the points of emphasis relative to the concentration. Eligibility to continue in upper-level courses will be assessed during the sophomore year of study.

Students must earn a minimum 2.00 cumulative GPA in their major or higher, if required by their program.

**Writing-Intensive Requirement**

Mason requires all students to complete at least one course designated “writing intensive” in their major at the 300 level or above. Students majoring in music may fulfill this requirement by successfully completing MUSI 332. Students who transfer this course into Mason may be required to repeat it or enroll in some other suitable course to fulfill the writing intensive requirement.

**Teacher Licensure**

Undergraduate students seeking certification to teach vocal and choral or instrumental music at the elementary and secondary levels must earn the BM degree as specified under Concentration in Music Education section in this section. Students who have earned a baccalaureate degree and are seeking state licensure to teach music must also complete this sequence of courses, which constitute a state-approved program for teacher education in music.

**Academic Policies**

Please see College of Visual and Performing Arts for college academic policies.

**Degree Requirements**
General Education (21 credits)

Coursework within the major and concentration fulfills the information technology, global understanding, oral communications, fine arts, and synthesis general education requirements. Students should consult the university general education guidelines for course options that fulfill the requirements remaining in the following areas:

- 3 credits of quantitative reasoning
- 6 credits of written communication
- 3 credits of literature
- 3 credits of non-lab natural science
- 3 credits of western civilization
- 3 credits of social or behavioral science

Concentrations

Students may choose from one of the following concentrations:

- Composition
- Jazz
- Music Education
- Performance

Core Courses Required for All Concentrations (37 Credits)

- MUSI 113 - Aural Skills I Credits: 1
- MUSI 114 - Aural Skills II Credits: 1-2 (must be taken for 1 credit)
- MUSI 115 - Theory I Credits: 3
- MUSI 116 - Theory II Credits: 3
- MUSI 213 - Aural Skills III Credits: 2
- MUSI 214 - Aural Skills IV Credits: 2
- MUSI 215 - Theory III Credits: 3
- MUSI 216 - Theory IV Credits: 3
- MUSI 251 - The Art of Teaching Music Credits: 3 (general education oral communication)
- MUSI 273 - Keyboard Skills III Credits: 1
- MUSI 300 - Recital Attendance Credits: 0 (To be repeated five times)
- MUSI 319 - Class Composition and Arranging Credits: 3
- MUSI 331 - Music History in Society I Credits: 3
- MUSI 332 - Music History in Society II Credits: 3
- MUSI 415 - Music in Computer Technology Credits: 3 (general education information technology)
- MUSI 431 - Music History in Society III Credits: 3 (general education global understanding)

▲ Concentration in Composition (CPO):

Students must complete all concentration requirements as well as requirements for one of the following emphases:

- Brass
- Guitar
- Keyboard
- Percussion
- String
- Voice
- Woodwind

Courses Required for All Emphases (53 credits)

- 8 credits of MUSI 24X (see music advisor for permission and course options)
- MUSI 324 - Junior Recital Credits: 1
- MUSI 361 - Class Strings: Violin, Viola, Cello, and Bass Credits: 1
- MUSI 363 - Class Woodwinds: Flute, Clarinet, Saxophone Credits: 1 or MUSI 364 - Class Woodwinds: Oboe and Bassoon Credits: 1
- MUSI 365 - Class Brass: Trumpet and French Horn Credits: 1 or MUSI 369 - Class Brass: Trombone, Euphonium, and Tuba Credits: 1
- MUSI 366 - Class Percussion Credits: 1
- MUSI 379 - Introduction to Jazz Improvisation Credits: 1
- MUSI 391 - Conducting I Credits: 2
- MUSI 396 - Conducting II Credits: 2
- MUSI 419 - Orchestration Credits: 3
- MUSI 424 - Senior Recital Credits: 1
- 12 credits of MUSI 44X (see music advisor for permission and course options)
- 3 credits of MUSI 454 - Jazz Arranging Credits: 3 or MUSI 485 - Chamber Ensembles Credits: 1
- 4 credits of MUSI 485 - Chamber Ensembles Credits: 1 (M3E or Healing Arts Ensemble only)
- MUSI 491 - Musical Communication in Performance Credits: 1 (general education synthesis)
- MUSI 438 - Music History in Society B Credits: 3
- MUSI 439 - Music History in Society C Credits: 3
- 5 credits of general MUSI electives

Emphasis Requirement (9 credits)

Composition: Brass emphasis

- MUSI 171 - Keyboard Skills I Credits: 1
- MUSI 172 - Keyboard Skills II Credits: 1
- MUSI 353 - Instrumental Pedagogy and Literature Credits: 3

Choose 4 credits from the following:

- MUSI 380 - Wind Symphony Credits: 1
- MUSI 383 - Symphonic Band Credits: 1
- MUSI 387 - Symphony Orchestra Credits: 1
- MUSI 389 - Jazz Ensemble Credits: 1

Composition: Guitar emphasis

- MUSI 171 - Keyboard Skills I Credits: 1
- MUSI 172 - Keyboard Skills II Credits: 1
- MUSI 353 - Instrumental Pedagogy and Literature Credits: 3

Choose 4 credits from the following:
• MUSI 381 - University Chorale Credits: 1
• MUSI 384 - Symphonic Chorus Credits: 1
• MUSI 385 - Chamber Singers Credits: 1
• MUSI 389 - Jazz Ensemble Credits: 1

Composition: Keyboard emphasis

• MUSI 351 - Keyboard Pedagogy Credits: 3
• MUSI 371 - Techniques of Accompanying I Credits: 1
• MUSI 372 - Techniques of Accompanying II Credits: 1
  Choose 4 credits from the following:
  • MUSI 381 - University Chorale Credits: 1
  • MUSI 384 - Symphonic Chorus Credits: 1
  • MUSI 385 - Chamber Singers Credits: 1

Composition: Percussion emphasis

• MUSI 171 - Keyboard Skills I Credits: 1
• MUSI 172 - Keyboard Skills II Credits: 1
• MUSI 353 - Instrumental Pedagogy and Literature Credits: 3
  Choose 4 credits from the following:
  • MUSI 380 - Wind Symphony Credits: 1
  • MUSI 383 - Symphonic Band Credits: 1
  • MUSI 387 - Symphony Orchestra Credits: 1
  • MUSI 389 - Jazz Ensemble Credits: 1

Composition: String emphasis

• MUSI 171 - Keyboard Skills I Credits: 1
• MUSI 172 - Keyboard Skills II Credits: 1
• MUSI 353 - Instrumental Pedagogy and Literature Credits: 3
  • 4 credits of MUSI 387 - Symphony Orchestra Credits: 1

Composition: Voice emphasis

• MUSI 171 - Keyboard Skills I Credits: 1
• MUSI 172 - Keyboard Skills II Credits: 1
• MUSI 352 - Vocal Pedagogy and Lab Credits: 3
  Choose 4 credits from the following:
  • MUSI 381 - University Chorale Credits: 1
  • MUSI 384 - Symphonic Chorus Credits: 1
  • MUSI 385 - Chamber Singers Credits: 1

Composition: Woodwind emphasis
- MUSI 171 - Keyboard Skills I Credits: 1
- MUSI 172 - Keyboard Skills II Credits: 1
- MUSI 353 - Instrumental Pedagogy and Literature Credits: 3

Choose 4 credits from the following:
- MUSI 380 - Wind Symphony Credits: 1
- MUSI 383 - Symphonic Band Credits: 1
- MUSI 387 - Symphony Orchestra Credits: 1
- MUSI 389 - Jazz Ensemble Credits: 1

Total: 120 credits

▲ Concentration in Jazz (JAZC):

Students must complete all concentration requirements as well as requirements for one of the following emphases:

- Brass
- Guitar
- Keyboard
- Percussion
- Woodwind

Courses Required for All Emphases (52 credits)

- MUSI 107 - The Development of Jazz Credits: 3
- 8 credits of MUSI 24X (see music advisor for permission and course options)
- MUSI 311 - Jazz Studies Credits: 3
- MUSI 324 - Junior Recital Credits: 1
- MUSI 379 - Introduction to Jazz Improvisation Credits: 1
- MUSI 391 - Conducting I Credits: 2
- MUSI 424 - Senior Recital Credits: 1
- 12 credits of MUSI 44X (see music advisor for permission and course options)
- MUSI 432 - Music History in Society IV Credits: 3
- MUSI 450 - Jazz Improvisation I Credits: 2
- MUSI 452 - Jazz Improvisation II Credits: 2
- MUSI 454 - Jazz Arranging Credits: 3
- 6 credits of MUSI 485 - Chamber Ensembles Credits: 1 (Jazz Chamber Ensembles only)
- MUSI 491 - Musical Communication in Performance Credits: 1 (general education synthesis)
- 3 credits of MUSI 492 - Selected Topics in Music Credits: 1-3 (Topics in Jazz Studies only)
- 1 credit of general MUSI electives

Emphasis Requirement (10 credits)

Jazz: Brass emphasis

- MUSI 171 - Keyboard Skills I Credits: 1
- MUSI 172 - Keyboard Skills II Credits: 1

Choose 8 credits from the following:
- MUSI 380 - Wind Symphony Credits: 1
- MUSI 381 - University Chorale Credits: 1
- MUSI 383 - Symphonic Band Credits: 1
- MUSI 384 - Symphonic Chorus Credits: 1
- MUSI 385 - Chamber Singers Credits: 1
- MUSI 387 - Symphony Orchestra Credits: 1
- MUSI 389 - Jazz Ensemble Credits: 1

Jazz: Guitar emphasis

- MUSI 171 - Keyboard Skills I Credits: 1
- MUSI 172 - Keyboard Skills II Credits: 1
  Choose 8 credits from the following:
  - MUSI 380 - Wind Symphony Credits: 1
  - MUSI 381 - University Chorale Credits: 1
  - MUSI 383 - Symphonic Band Credits: 1
  - MUSI 384 - Symphonic Chorus Credits: 1
  - MUSI 385 - Chamber Singers Credits: 1
  - MUSI 387 - Symphony Orchestra Credits: 1
  - MUSI 389 - Jazz Ensemble Credits: 1

Jazz: Keyboard emphasis

- MUSI 371 - Techniques of Accompanying I Credits: 1
- MUSI 372 - Techniques of Accompanying II Credits: 1
  Choose 8 credits from the following:
  - MUSI 380 - Wind Symphony Credits: 1
  - MUSI 381 - University Chorale Credits: 1
  - MUSI 383 - Symphonic Band Credits: 1
  - MUSI 384 - Symphonic Chorus Credits: 1
  - MUSI 385 - Chamber Singers Credits: 1
  - MUSI 387 - Symphony Orchestra Credits: 1
  - MUSI 389 - Jazz Ensemble Credits: 1

Jazz: Percussion emphasis

- MUSI 171 - Keyboard Skills I Credits: 1
- MUSI 172 - Keyboard Skills II Credits: 1
  Choose 8 credits from the following:
  - MUSI 380 - Wind Symphony Credits: 1
  - MUSI 381 - University Chorale Credits: 1
  - MUSI 383 - Symphonic Band Credits: 1
  - MUSI 384 - Symphonic Chorus Credits: 1
  - MUSI 385 - Chamber Singers Credits: 1
  - MUSI 387 - Symphony Orchestra Credits: 1
  - MUSI 389 - Jazz Ensemble Credits: 1
Jazz: Woodwind emphasis

- MUSI 171 - Keyboard Skills I Credits: 1
- MUSI 172 - Keyboard Skills II Credits: 1

Choose 8 credits from the following:

- MUSI 380 - Wind Symphony Credits: 1
- MUSI 381 - University Chorale Credits: 1
- MUSI 383 - Symphonic Band Credits: 1
- MUSI 384 - Symphonic Chorus Credits: 1
- MUSI 385 - Chamber Singers Credits: 1
- MUSI 387 - Symphony Orchestra Credits: 1
- MUSI 389 - Jazz Ensemble Credits: 1

Total: 120 credits

▲ Concentration in Music Education (MUE):

Certification to Teach

The music education concentration is approved by the Virginia State Department of Education and administered through the College of Education and Human Development, which is accredited by the National Council for the Accreditation of Teacher Education (NCATE). Minimum scores on the Praxis I and II and VCLA tests must be achieved before state licensure is granted.

Students normally are accepted into the music education concentration by the school’s Music Teacher Education Committee during the fourth semester of study, via interview and evaluation of academic transcript. They must have earned 45 to 60 credits and completed Aural Skills III, Keyboard Skills III, and Theory III with a grade of C or higher. Other requirements are as follows:

- Submit scores for the Praxis I (Reading, Writing, and Mathematics) tests to the committee. It is strongly recommended that students take the Praxis I tests as soon as they have completed ENGH 302, a course in literature, and a course in mathematics.
- Maintain an overall GPA of 2.80 in all course work completed at Mason and in course work at all institutions of higher learning combined.
- Earn no grade lower than a C in music and professional education courses needed for graduation.
- Successfully pass aural skills, keyboard, and conducting proficiency exams during the first music methods course (MUSI 461, 463, 464, 466, or 467). Students in the voice emphasis must also pass a voice proficiency exam, and students in the instrumental emphasis must pass a musical instrument fingering proficiency exam during the first music methods course.
- Complete all course work in the program sequence.

On fulfilling the above requirements, students must complete 15 weeks of a full-time student teaching internship. Applications for placement, subject to approval of the committee, are submitted to the Office of Teacher Education at the beginning of the previous semester. In addition, students must pass the VCLA before student teaching and the Praxis II (Music: Content Knowledge) test during the internship semester.

Students must complete all concentration requirements as well as requirements for one of the following emphases:

- Brass
- Guitar
- Keyboard
- Percussion
Courses Required for All Emphases (37 credits)

- 8 credits of MUSI 24X (see music advisor for permission and course options)
- MUSI 323 - Music Education Recital Credits: 0
- MUSI 361 - Class Strings: Violin, Viola, Cello, and Bass Credits: 1
- MUSI 366 - Class Percussion Credits: 1
- MUSI 367 - Class Guitar Credits: 1
- MUSI 393 - Music Administration and Management Credits: 2
- MUSI 432 - Music History in Society IV Credits: 3
- 6 credits of MUSI 44X (see music advisor for permission and course options)
- 6 credits of MUSI 495 - Internship in Music Education: Student Teaching Credits: 6-12 (general education synthesis)
- EDRD 300 - Literacy and Curriculum Integration Credits: 3
- EDUC 301 - Educationally Diverse Populations: Handicapped, Gifted, Multicultural Credits: 3
- EDUC 302 - Human Growth and Development Credits: 3 or EDUC 539 - Human Development and Learning PK-12 Credits: 3

Emphasis Requirement (25 credits)

Music Education: Brass emphasis

- MUSI 171 - Keyboard Skills I Credits: 1
- MUSI 172 - Keyboard Skills II Credits: 1
- MUSI 363 - Class Woodwinds: Flute, Clarinet, Saxophone Credits: 1
- MUSI 364 - Class Woodwinds: Oboe and Bassoon Credits: 1
- MUSI 365 - Class Brass: Trumpet and French Horn Credits: 1
- MUSI 368 - Class Voice Credits: 1
- MUSI 369 - Class Brass: Trombone, Euphonium, and Tuba Credits: 1
- MUSI 391 - Conducting I Credits: 2
- MUSI 396 - Conducting II Credits: 2
- MUSI 464 - Instrumental Music Methods I Credits: 3
- MUSI 466 - Instrumental Music Methods II Credits: 3
- 1 credit of general MUSI electives
  
  Choose 7 credits from the following:

- MUSI 380 - Wind Symphony Credits: 1
- MUSI 383 - Symphonic Band Credits: 1
- MUSI 387 - Symphony Orchestra Credits: 1
- MUSI 389 - Jazz Ensemble Credits: 1

Music Education: Guitar emphasis

- MUSI 171 - Keyboard Skills I Credits: 1
- MUSI 172 - Keyboard Skills II Credits: 1
- MUSI 363 - Class Woodwinds: Flute, Clarinet, Saxophone Credits: 1
• MUSI 364 - Class Woodwinds: Oboe and Bassoon Credits: 1
• MUSI 365 - Class Brass: Trumpet and French Horn Credits: 1
• MUSI 368 - Class Voice Credits: 1
• MUSI 369 - Class Brass: Trombone, Euphonium, and Tuba Credits: 1
• MUSI 391 - Conducting I Credits: 2
• MUSI 396 - Conducting II Credits: 2
• MUSI 464 - Instrumental Music Methods I Credits: 3 or MUSI 467 - Instrumental Music Methods I: Orchestra Credits: 3
• 1 credit of general MUSI electives Credits: 1
• MUSI 466 - Instrumental Music Methods II Credits: 3
Choose 7 credits from the following:
• MUSI 381 - University Chorale Credits: 1
• MUSI 384 - Symphonic Chorus Credits: 1
• MUSI 385 - Chamber Singers Credits: 1
• MUSI 389 - Jazz Ensemble Credits: 1

Music Education: Keyboard emphasis

2 credits of  MUSI 223 - Applied Music in Voice Credits: 1
• MUSI 352 - Vocal Pedagogy and Lab Credits: 3
• MUSI 371 - Techniques of Accompanying I Credits: 1
• MUSI 372 - Techniques of Accompanying II Credits: 1
• MUSI 391 - Conducting I Credits: 2
• MUSI 396 - Conducting II Credits: 2
• MUSI 461 - The Teaching of General Music in the Elementary and Middle School Credits: 3
• MUSI 463 - The Teaching of Vocal Music in the Secondary School Credits: 3
Choose 1 credit from the following:
• MUSI 363 - Class Woodwinds: Flute, Clarinet, Saxophone Credits: 1
• MUSI 364 - Class Woodwinds: Oboe and Bassoon Credits: 1
• MUSI 365 - Class Brass: Trumpet and French Horn Credits: 1
• MUSI 369 - Class Brass: Trombone, Euphonium, and Tuba Credits: 1
Choose 7 credits from the following:
• MUSI 381 - University Chorale Credits: 1
• MUSI 384 - Symphonic Chorus Credits: 1
• MUSI 385 - Chamber Singers Credits: 1

Music Education: Percussion emphasis

• MUSI 171 - Keyboard Skills I Credits: 1
• MUSI 172 - Keyboard Skills II Credits: 1
• MUSI 363 - Class Woodwinds: Flute, Clarinet, Saxophone Credits: 1
• MUSI 364 - Class Woodwinds: Oboe and Bassoon Credits: 1
• MUSI 365 - Class Brass: Trumpet and French Horn Credits: 1
• MUSI 368 - Class Voice Credits: 1
• MUSI 369 - Class Brass: Trombone, Euphonium, and Tuba Credits: 1
• MUSI 391 - Conducting I Credits: 2
• MUSI 396 - Conducting II Credits: 2
• MUSI 464 - Instrumental Music Methods I Credits: 3
● MUSI 466 - Instrumental Music Methods II Credits: 3
● 1 credit of general MUSI electives

Choose 7 credits from the following:
● MUSI 380 - Wind Symphony Credits: 1
● MUSI 383 - Symphonic Band Credits: 1
● MUSI 387 - Symphony Orchestra Credits: 1
● MUSI 389 - Jazz Ensemble Credits: 1

Music Education: String emphasis

● MUSI 171 - Keyboard Skills I Credits: 1
● MUSI 172 - Keyboard Skills II Credits: 1
● MUSI 363 - Class Woodwinds: Flute, Clarinet, Saxophone Credits: 1
● MUSI 364 - Class Woodwinds: Oboe and Bassoon Credits: 1
● MUSI 365 - Class Brass: Trumpet and French Horn Credits: 1
● MUSI 368 - Class Voice Credits: 1
● MUSI 369 - Class Brass: Trombone, Euphonium, and Tuba Credits: 1
● 7 credits of MUSI 387 - Symphony Orchestra Credits: 1

Total: 120 credits

▲ Concentration in Performance (PFM):

Students must complete all concentration requirements as well as requirements for one of the following emphases:

• Brass
• Guitar
• Keyboard
• Percussion
• String
• Voice
• Woodwind

Courses Required for All Emphases (26 credits)

• 8 credits of MUSI 24X (see music advisor for permission and course options)
• MUSI 324 - Junior Recital Credits: 1
• MUSI 424 - Senior Recital Credits: 1
• 12 credits of MUSI 44X (see music advisor for permission and course options)
• MUSI 432 - Music History in Society IV Credits: 3
• MUSI 491 - Musical Communication in Performance Credits: 1 (general education synthesis)

Emphasis Requirement (36 credits)

Performance: Brass emphasis

• MUSI 171 - Keyboard Skills I Credits: 1
• MUSI 172 - Keyboard Skills II Credits: 1
• MUSI 353 - Instrumental Pedagogy and Literature Credits: 3
• MUSI 379 - Introduction to Jazz Improvisation Credits: 1
• MUSI 391 - Conducting I Credits: 2
• 4 credits of MUSI 395 - Teaching Internship Credits: 1-4
• MUSI 396 - Conducting II Credits: 2
• MUSI 419 - Orchestration Credits: 3 or MUSI 493 - Topics in Music Theory Credits: 3
• 11 credits of general MUSI electives

Choose 8 credits from the following:
• MUSI 380 - Wind Symphony Credits: 1
• MUSI 383 - Symphonic Band Credits: 1
• MUSI 387 - Symphony Orchestra Credits: 1
• MUSI 389 - Jazz Ensemble Credits: 1

Performance: Guitar emphasis

• MUSI 171 - Keyboard Skills I Credits: 1
• MUSI 172 - Keyboard Skills II Credits: 1
• MUSI 353 - Instrumental Pedagogy and Literature Credits: 3
• MUSI 379 - Introduction to Jazz Improvisation Credits: 1
• MUSI 391 - Conducting I Credits: 2
• 4 credits of MUSI 395 - Teaching Internship Credits: 1-4
• MUSI 396 - Conducting II Credits: 2
• MUSI 419 - Orchestration Credits: 3 or MUSI 493 - Topics in Music Theory Credits: 3
• 11 credits of general MUSI electives

Choose 8 credits from the following:
• MUSI 381 - University Chorale Credits: 1
• MUSI 384 - Symphonic Chorus Credits: 1
• MUSI 385 - Chamber Singers Credits: 1
• MUSI 389 - Jazz Ensemble Credits: 1

Performance: Keyboard emphasis

• MUSI 351 - Keyboard Pedagogy Credits: 3
• MUSI 371 - Techniques of Accompanying I Credits: 1
• MUSI 372 - Techniques of Accompanying II Credits: 1
• MUSI 373 - Advanced Accompanying and Musicianship Skills Credits: 3
• MUSI 379 - Introduction to Jazz Improvisation Credits: 1
• MUSI 382 - Piano Ensemble Credits: 1 or MUSI 485 - Chamber Ensembles Credits: 1
• MUSI 391 - Conducting I Credits: 2
• 2 credits of MUSI 395 - Teaching Internship Credits: 1-4
• 3 credits of MUSI 492 - Selected Topics in Music Credits: 1-3
• 11 credits of general MUSI electives

Choose 8 credits from the following:
• MUSI 381 - University Chorale Credits: 1
• MUSI 384 - Symphonic Chorus Credits: 1
• MUSI 385 - Chamber Singers Credits: 1
Performance: Percussion emphasis

- MUSI 171 - Keyboard Skills I Credits: 1
- MUSI 172 - Keyboard Skills II Credits: 1
- MUSI 353 - Instrumental Pedagogy and Literature Credits: 3
- MUSI 379 - Introduction to Jazz Improvisation Credits: 1
- MUSI 391 - Conducting I Credits: 2
- 4 credits of MUSI 395 - Teaching Internship Credits: 1-4
- MUSI 396 - Conducting II Credits: 2
- MUSI 419 - Orchestration Credits: 3 or MUSI 493 - Topics in Music Theory Credits: 3
- 11 credits of general MUSI electives

Choose 8 credits from the following:

- MUSI 380 - Wind Symphony Credits: 1
- MUSI 383 - Symphonic Band Credits: 1
- MUSI 387 - Symphony Orchestra Credits: 1
- MUSI 389 - Jazz Ensemble Credits: 1

Performance: String emphasis

- MUSI 171 - Keyboard Skills I Credits: 1
- MUSI 172 - Keyboard Skills II Credits: 1
- MUSI 353 - Instrumental Pedagogy and Literature Credits: 3
- MUSI 379 - Introduction to Jazz Improvisation Credits: 1
- 8 credits of MUSI 387 - Symphony Orchestra Credits: 1
- MUSI 391 - Conducting I Credits: 2
- 4 credits of MUSI 395 - Teaching Internship Credits: 1-4
- MUSI 396 - Conducting II Credits: 2
- MUSI 419 - Orchestration Credits: 3 or MUSI 493 - Topics in Music Theory Credits: 3
- 11 credits of general MUSI electives

Performance: Voice emphasis

- MUSI 171 - Keyboard Skills I Credits: 1
- MUSI 172 - Keyboard Skills II Credits: 1
- MUSI 325 - Performance Seminar and Vocal Literature for Singers and Accompanists I Credits: 2
- MUSI 326 - Performance Seminar and Vocal Literature for Singers and Accompanists II Credits: 2
- MUSI 341 - Diction for Singers I: Italian Diction and English Diction Credits: 2
- MUSI 342 - Diction for Singers II: German Diction and French Diction Credits: 2
- MUSI 352 - Vocal Pedagogy and Lab Credits: 3
- MUSI 388 - Fundamental Techniques of Stagecraft for Opera and Music Theater Credits: 2
- MUSI 391 - Conducting I Credits: 2
- MUSI 396 - Conducting II Credits: 2
- 9 credits of foreign language (French, German, and/or Italian)

Choose 8 credits from the following:

- MUSI 381 - University Chorale Credits: 1
- MUSI 384 - Symphonic Chorus Credits: 1
- MUSI 385 - Chamber Singers Credits: 1
Performance: Woodwind emphasis

- MUSI 171 - Keyboard Skills I Credits: 1
- MUSI 172 - Keyboard Skills II Credits: 1
- MUSI 353 - Instrumental Pedagogy and Literature Credits: 3
- MUSI 379 - Introduction to Jazz Improvisation Credits: 1
- MUSI 391 - Conducting I Credits: 2
- 4 credits of MUSI 395 - Teaching Internship Credits: 1-4
- MUSI 396 - Conducting II Credits: 2
- MUSI 419 - Orchestration Credits: 3 or MUSI 493 - Topics in Music Theory Credits: 3
- 11 credits of general MUSI electives
  Choose 8 credits from the following:
  - MUSI 380 - Wind Symphony Credits: 1
  - MUSI 383 - Symphonic Band Credits: 1
  - MUSI 387 - Symphony Orchestra Credits: 1
  - MUSI 389 - Jazz Ensemble Credits: 1

Total: 120 credits

Doctor of Musical Arts

Musical Arts, DMA

Banner Code: AR-DMA-MUAR

Performing Arts Building, Room A417
Phone: 703-993-1380
Web: music.gmu.edu

Faculty

Dennis Layendecker, Heritage Chair, Director

Professors: Camphouse, Carroll, Engebretson, Layendecker (director), Maiello, Miller, Monson (associate director), Smith

Term Professors: Balakerskaia, Hearden, Rendler

Associate Professors: Aler, R. Bergman, Billingham, T. Owens

Term Associate Professor: Wuttke

Assistant Professors: Guessford, Nickens, Robinson

Term Assistant Professor: Kilkenny

The doctor of musical arts requires 90 credits, 60 credits beyond the Master's degree in music. The doctor of musical arts concentrations are composition, conducting, and performance. While these concentrations share some of the required course work, each is also distinct in course requirements. Professional musicians earn the DMA to enhance and extend their knowledge and practice within their area of specialization. The DMA student focuses on the profession of music performance, as well as the theory and practice of the discipline.

**Admission Requirements**

In addition to meeting all admission requirements for graduate study, applicants should submit the following:

- Master’s degree in music from an accredited university
- GPA of 3.00 in master’s-level music course work; 3.50 in courses related to the prospective area of doctoral study (performance, composition, or conducting)
- Three recommendations
- Satisfactory scores on GRE
- A sample of academic writing such as a graduate-level paper from a musicology or music history course taken during MM studies
- Students in performance and conducting must audition. Specific details of those requirements are available from the advisors.
- Composition students must present a portfolio of recent compositions and recordings of performances.
- There is no “provisional” admission. Students must meet appropriate standards prior to commencing doctoral studies.

**Reduction of Credit**

Students must have a master's degree before being admitted to the Doctor of Musical Arts Program. Most students receive a reduction of study of 30 credits based on their previous master's degree.

**Academic Policies**

Please see College of Visual and Performing Arts for college academic policies.

**Degree Requirements**

The following degree plan is based on a student who receives a full 30 credit reduction. Students who do not receive a full credit reduction should choose additional credits in consultation with their advisor.

**Placement Examinations**

Prior to the beginning of the first semester of doctoral studies, the student must complete placement examinations in music theory, music history, and musicianship (including aural skills and keyboard skills). Positive scores on the placement exams may reduce or eliminate prerequisites for courses in music history and music theory. Recitals can be scheduled only after completion of any necessary prerequisites in music theory, music history, and musicianship.

**Doctoral Course Work (47 credits)**

The doctoral student must maintain a minimum of 3.00 GPA in courses presented on the degree plan, which may include no more than 6 credits with a grade of C. The GPA calculation excludes all transfer courses and Mason extended studies or non degree credits not formally approved for the degree.
Students must complete the following required courses as well as those in their chosen concentration:

- History or Theory elective (600 level or above) Credits: 3
- MUSI 830 - Doctoral Seminar in Music History Credits: 3
- 2 credits of MUSI 890 - Doctoral Recital Credits: 1

▲ Concentration in Composition (CPO)

- 1 credit of approved electives*
- MUSI 610 - Topics in Music Theory Credits: 3 or MUSI 710 - Advanced Topics in Music Theory Credits: 3
- MUSI 614 - Music Theory Pedagogy Credits: 3
- 4 credits of MUSI 685 - Graduate Chamber Ensemble Credits: 1
- 6 credits of MUSI 810 - Doctoral Seminar in Analysis Credits: 3
- 15 credits of MUSI 828 - Doctoral Applied Music in Composition Credits: 2-3
- MUSI 880 - Doctoral Major Ensemble Credits: 1

Choose 6 credits from the following:

- MUSI 630 - Topics in Music History and Literature Credits: 3
- MUSI 640 - Topics in World Musics Credits: 3
- MUSI 730 - Advanced Topics in Music History Credits: 3

▲ Concentration in Conducting (CDC)

- 5 credits of approved electives*
- 6 credits of MUSI 630 - Topics in Music History and Literature Credits: 3 and/or MUSI 730 - Advanced Topics in Music History Credits: 3
- MUSI 770 - Advanced Topics in Pedagogy Credits: 3
- MUSI 810 - Doctoral Seminar in Analysis Credits: 3
- 15 credits of MUSI 829 - Doctoral Applied Music in Conducting Credits: 2-3
- 4 credits of MUSI 880 - Doctoral Major Ensemble Credits: 1

Choose 3 credits from the following:

- MUSI 610 - Topics in Music Theory Credits: 3
- MUSI 710 - Advanced Topics in Music Theory Credits: 3
- MUSI 712 - Composition for Conductors and Performers Credits: 3

▲ Concentration in Performance (PFM)

- MUSI 82X Doctoral Applied Music Credits: 15
- 3 credits of approved electives*
- 6 credits of MUSI 630 - Topics in Music History and Literature Credits: 3 and/or MUSI 730 - Advanced Topics in Music History Credits: 3
- 2 credits of MUSI 685 - Graduate Chamber Ensemble Credits: 1 or MUSI 720 - Advanced Topics in Applied Music Credits: 3
- MUSI 770 - Advanced Topics in Pedagogy Credits: 3
- MUSI 810 - Doctoral Seminar in Analysis Credits: 3
- 4 credits of MUSI 880 - Doctoral Major Ensemble Credits: 1 and/or MUSI 720 - Advanced Topics in Applied Music Credits: 3

Choose 3 credits from the following:

- MUSI 610 - Topics in Music Theory Credits: 3
- MUSI 710 - Advanced Topics in Music Theory Credits: 3
- MUSI 712 - Composition for Conductors and Performers Credits: 3

Note:

*Approved electives could be from music history, music literature, world music, music theory, conducting, music education, secondary Applied Music, ensemble (including chamber music), or relevant nonmusic courses.

Residency

More than half of all credits (minimum 72) must be taken in doctoral degree status, after admission to the degree program. One year (fall and spring) of consecutive full-time study (9 credits per semester; 18 credits per year) is recommended. Or, the academic residency requirement may be fulfilled by earning 21 credits within 12 months (fall and spring semesters and summer term). Academic residency should be completed during the first year of study. Any necessary prerequisite courses at the 500 level can be included to meet the residency requirement. Language courses at the undergraduate level may not. Note: The academic residency does not imply meeting the standards of Virginia residency for tuition purposes.

Language Requirements

Reading proficiency is required in a language appropriate to the student’s major area of study. Normally, this will be German, French, or Italian. The DGS and the student’s Faculty Committee will determine the appropriate area of study. Reading proficiency may be accomplished by completing a reading examination provided by the music faculty. The reading examination provided by the faculty will normally consist of translation (with dictionary) of appropriate technical passages relevant to the student’s area of study within a two-hour period. The language reading proficiency should be completed prior to earning 12 credits of courses at the 600 level or above.

Graduate Committee

The Graduate Committee will evaluate the progress of the student annually. Continuation in the program is subject to the endorsement of this group.

Comprehensive Exams

After the completion of required courses (excluding dissertation credits) or during the semester when completion of those courses is anticipated, the student will take comprehensive examinations. The written exams will be followed by a one-hour oral exam to clarify issues included in the written exams.

Doctoral Research (13 credits)

- 3 credits of MUSI 998 - Dissertation Proposal Credits: 1-3
- 10 credits of MUSI 999 - Dissertation Credits: 1-12

Advancement to Candidacy

Before doctoral students may be advanced to candidacy by the dean of the College of Visual and Performing Arts, they must complete all course work required by the program faculty, be certified in all relevant doctoral research skills, pass the comprehensive exams, and be recommended by the Graduate Committee, the dean of graduate studies, and the chair of the
School of Music. Students advanced to candidacy after the add period for a given semester must wait until the following semester to register for MUSI 999 Dissertation.

Dissertation Committee

The dissertation is the capstone experience of doctoral study. The dissertation will be guided by the Dissertation Committee consisting of at least three members of the music faculty. The student's major professor will chair the committee. The director of graduate studies of the School of Music may be part of the committee; if not, he or she will serve ex officio. All Dissertation Committee members will be appointed by the dean of the College of Visual and Performing Arts and have graduate faculty status, as approved by the university provost. Performance and composition recitals are also subject to the approval of the Dissertation Committee.

Final Defense and Graduation

When all degree requirements have been satisfied, including completion of the doctoral dissertation, the doctoral candidate may request a doctoral defense. Approval for the defense must be obtained from the Dissertation Committee, the director of graduate studies and the director of the School of Music, and the dean of the College of Visual and Performing Arts. Notice of a defense must be circulated to the university community two weeks before the defense date.

All relevant rules regarding schedule, fees, and other matters as described in the catalog must be followed. All copies of the dissertation materials and fees must be paid before the doctoral degree is awarded.

Total: 90 credits

Doctor of Philosophy

Music Education, PhD

Banner Code: AR-PHD-MUE

Performing Arts Building, Room A417
Phone: 703-993-1380
Web: music.gmu.edu

Faculty

Dennis Layendecker, Heritage Chair, Director

Professors: Camphouse, Carroll, Engebretson, Layendecker (director), Maiello, Miller, Monson (associate director), Smith

Term Professors: Balakerskaia, Hearden, Rendler

Associate Professors: Aler, R. Bergman,Billingham, T. Owens

Term Associate Professor: Wuttke

Assistant Professors: Guessford, Nickens, Robinson

Term Assistant Professor: Kilkenny

The PhD in music education and the doctor of musical arts degree require 90 credits, 60 beyond the master’s degree in music.

The PhD in music education, a research-intensive degree, focuses on the gathering, processing, and interpretation of information. Students in the PhD program take seminars and topics courses in music education, as well as research courses through the College of Education and Human Development. PhD graduates are expected to demonstrate the ability to communicate significant concepts of music education.

Admission Requirements

In addition to meeting all admission requirements for graduate study, applicants should submit the following:

- Master’s degree in music from an accredited university
- GPA of 3.00 in master’s-level music course work; 3.50 in courses related to the prospective area of doctoral study (music education, performance, composition, or conducting)
- Three recommendations
- Satisfactory scores on GRE
- A sample of academic writing such as a graduate-level paper from a musicology or music history course taken during MM studies
- Students in performance and conducting must audition. Specific details of those requirements are available from the advisors.
- Composition students must present a portfolio of recent compositions and recordings of performances.
- Music education majors must present a dossier of their teaching experience and activities, and they must schedule an interview with music faculty including the director of graduate studies (DGS) prior to admission.
- There is no “provisional” admission. Students must meet appropriate standards prior to commencing doctoral studies.

Reduction of Credit

Students must have a master's degree before being admitted to the Doctor of Musical Arts Program. Most students receive a reduction of study of 30 credits based on their previous master's degree.

Academic Policies

Please see College of Visual and Performing Arts for college academic policies.

Degree Requirements

The following degree plan is based on a student who receives a full 30 credit reduction. Students who do not receive a full credit reduction should choose additional credits in consultation with their advisor.

Placement Examinations

Prior to the beginning of the first semester of doctoral studies, the student must complete placement examinations in music theory, music history, and musicianship (including aural skills and keyboard skills). Positive scores on the placement exams may
reduce or eliminate prerequisites for courses in music history and music theory. Recitals can be scheduled only after completion of any necessary prerequisites in music theory, music history, and musicianship.

**Doctoral Course Work (48 credits)**

The doctoral student must maintain a minimum of 3.00 GPA in courses presented on the degree plan, which may include no more than 6 credits with a grade of C. The GPA calculation excludes all transfer courses and Mason extended studies or nondegree credits not formally approved for the degree.

- Research Courses (advisor-approved CEHD) Credits: 9
- 6 credits of MUSI 610 - Topics in Music Theory Credits: 3 or MUSI 710 - Advanced Topics in Music Theory Credits: 3
- MUSI 630 - Topics in Music History and Literature Credits: 3 or MUSI 730 - Advanced Topics in Music History Credits: 3
- MUSI 640 - Topics in World Musics Credits: 3
- 3 credits of MUSI 660 - Topics in Music Education Credits: 1-6
- MUSI 810 - Doctoral Seminar in Analysis Credits: 3 or MUSI 830 - Doctoral Seminar in Music History Credits: 3
- 12 credits of MUSI 860 - Doctoral Seminar in Music Education Credits: 3
- 3 credits of MUSI 880 - Doctoral Major Ensemble Credits: 1
- 6 credits of approved electives*

**Note:**

*Approved electives could be from music history, music literature, world music, music theory, conducting, music education, secondary Applied Music, ensemble (including chamber music), or relevant nonmusic courses.

**Residency**

More than half of all credits (minimum 72) must be taken in doctoral degree status, after admission to the degree program. One year (fall and spring) of consecutive full-time study (9 credits per semester) is recommended (18 total credits). Or, the academic residency requirement may be fulfilled by earning 21 credits within 12 months (fall and spring semesters and summer term). Academic residency should be completed during the first year of study. Any necessary prerequisite courses at the 500 level can be included to meet the residency requirement. Language courses at the undergraduate level may not be included. Note: The academic residency does not imply meeting the standards of Virginia residency for tuition purposes.

Web: music.gmu.edu
Faculty

Dennis Layendecker, Heritage Chair, Director

Professors: Camphouse, Carroll, Engebretson, Layendecker (director), Maiello, Miller, Monson (associate director), Smith

Term Professors: Balakerskaia, Hearden, Rendler

Associate Professors: Aler, R. Bergman, Billingham, T. Owens

Term Associate Professor: Wuttke

Assistant Professors: Guessford, Nickens, Robinson

Term Assistant Professor: Kilkenny

The expansion of professional education in the arts is paramount for the growth and development of a rich and vital cultural community and a supporting network of individual artists. The dynamics of contemporary society suggest that the influence of the arts on public life will continue to expand well into the 21st century. Each year, opportunities increase for creative work by performers, composers, sculptors, painters, dancers, actors, historians, theoreticians, and musicologists.

The MM degree is offered as an educational channel to meet the intellectual and career needs of qualified students. It is a comprehensive and advanced program of study with a choice of concentrations in performance, music education, composition, conducting, jazz studies, and pedagogy. The MM with a concentration in music education does not provide licensure to teach music in public or private schools.

Admission Requirements

In addition to fulfilling admission requirements for graduate study, applicants are expected to hold a baccalaureate degree in music or another discipline, with courses equaling the music requirements (minus the 7- to 8-credit teaching sequence) for the BA in music offered at Mason.

The following admission requirements must also be met:

- Performance: audition
- Conducting: audition
- Composition: submission of a portfolio of compositions
- Music education: interview with music faculty and submission of a two- to three-page paper on the applicant’s philosophy of music education
- Pedagogy: audition in the primary applied teaching area is required. Applicants are expected to have large and small ensemble experience on the major instrument and should have presented a full solo recital or equivalent. All music teaching experience should be summarized.
- Jazz Studies: Submit a CD of at least five jazz tunes in contrasting styles, as well as a complete repertoire list of all jazz tunes studied/perform. Submit all jazz materials to the Director of Jazz Studies at the School of Music and schedule audition.
Diagnostic Entrance Exam

All students are required to complete placement examinations in music theory, aural skills, and basic keyboard skills. These examinations must be taken prior to the beginning of the first semester of graduate study. A sufficient placement score can reduce or eliminate prerequisites for some of the 600-level and above courses in music theory and history. The exam is offered during a three-hour period prior to the beginning of classes of the fall and spring semesters. For the summer schedule, see the director of graduate studies.

Foreign Language Exams (Vocal Performance Emphasis)

Students in the MM degree program (emphasis in vocal performance) must take proficiency exams in French, German, Italian, and English to demonstrate diction competency. Students may be required to take MUSI 525, 526 Performance Seminar for Singers and Accompanists I, II.

Comprehensive Exit Exam

All students are required to pass a comprehensive exit exam administered during the graduation semester or, in the case of students selecting the thesis option in the music education concentration, on completion of 24 credits of course work and immediately before beginning work on the thesis. August graduates must take this exam during the preceding spring term. This exam is usually a three-hour written test, with questions based primarily on course work the student has taken toward the degree at Mason.

Academic Policies

Please see College of Visual and Performing Arts for college academic policies.

Degree Requirements

A student must successfully complete the appropriate 30 credits in graduate music courses. With approval of the graduate advisor, 3 nonmusic graduate credits may be taken.

The student is admitted as concentrating in one of six areas: performance, music education, composition, conducting, jazz studies, or pedagogy. All students are required to complete the 11 credits described below as General Requirements plus 19 credits in one of the six areas identified below as Additional Requirements. There are some limited possibilities for double concentrations. For details, see the director of graduate studies.

General Requirements for all concentrations (11 credits):

- Ensemble Credits: 2
- MUSI 611 - Analytical Techniques Credits: 3
- MUSI 630 - Topics in Music History and Literature Credits: 3
- MUSI 662 - Introduction to Research in Music Credits: 3

Concentration Requirements (19 credits)

Choose at least one concentration from the following:

- Composition
• Conducting
• Jazz Studies
• Music Education
• Performance
• Pedagogy

▲ Concentration in Composition (CPO):

• 9 credits of MUSI 728 - Applied Music in Composition Credits: 2-3
• MUSI 613 - Graduate Orchestration Credits: 3
• MUSI 630 - Topics in Music History and Literature Credits: 3
• MUSI 790 - Graduate Recital Credits: 1
• 3 credits of electives

▲ Concentration in Conducting (CDC):

• 9 credits of MUSI 729 - Applied Music in Conducting Credits: 2-3
• MUSI 613 - Graduate Orchestration Credits: 3
• MUSI 790 - Graduate Recital Credits: 1
• 3 credits of electives
  and 3 credits chosen from the following:
• MUSI 601 - Topics in Music Theory Credits: 3
• MUSI 630 - Topics in Music History and Literature Credits: 3
• MUSI 712 - Composition for Conductors and Performers Credits: 3

Note:

The number of students accepted in the graduate conducting concentration is limited by the extent to which it is possible to provide students with practical experience.

▲ Concentration in Jazz Studies (JAZZ)

• MUSI 615 - Advanced Jazz Improvisation Credits: 3
• MUSI 650 - Topics in Jazz Studies Credits: 3
• 9 credits of MUSI 72X Graduate Applied Music
• MUSI 790 - Graduate Recital Credits: 1
• 3 credits of electives

▲ Concentration in Music Education (MUE):

Two required courses:

• MUSI 661 - Psychology of Music Teaching and Learning Credits: 3
• MUSI 663 - Aesthetics of Music Education Credits: 3

Choose one of the three pathways: elementary-level teaching, secondary-level teaching, or thesis
Orff Schulwerk Pathway
- MUSI 563 - Orff Schulwerk I Credits: 3
- MUSI 564 - Orff Schulwerk II Credits: 3
- MUSI 565 - Orff Schulwerk III Credits: 3
- 4 credits general MUSI electives

Secondary Pathway
- 4 credits of electives
  9 advisor-approved credits chosen from:
  - MUSI 630 - Topics in Music History and Literature Credits: 3
  - MUSI 640 - Topics in World Musics Credits: 3
  - MUSI 654 - Graduate Conducting Credits: 3
  - MUSI 660 - Topics in Music Education Credits: 1-6 (for 3 credits)

Thesis Option
- 6 credits of MUSI 799 - Thesis Credits: 1-6
- 7 credits general MUSI electives

▲ Concentration in Performance (PFM):
- MUSI 610 - Topics in Music Theory Credits: 3
- MUSI 630 - Topics in Music History and Literature Credits: 3
- 9 credits of MUSI 72X Graduate Applied Music
- MUSI 790 - Graduate Recital Credits: 1
- 3 credits of electives

▲ Concentration in Pedagogy (PDGY):
- MUSI 573 - Accompanying and Musicianship III Credits: 3 (piano pedagogy only; all other areas take 3 elective credits)
- 3 credits of MUSI 660 - Topics in Music Education Credits: 1-6
- MUSI 695 - Teaching Internship Credits: 2
- 1 credit of MUSI 690 - Graduate Lecture Recital Credits: 1-3
- 6 credits of MUSI 72X Graduate Applied Music
- MUSI 790 - Graduate Recital Credits: 1
  and 3 credits chosen from the following:
- MUSI 551 - Keyboard Pedagogy I Credits: 3
- MUSI 552 - Vocal Pedagogy and Lab Credits: 3
- MUSI 553 - Instrumental Pedagogy and Literature Credits: 3

Total: 30 credits

Non-Degree

Jazz Studies Minor

Banner Code: JAZZ
This minor is open to music and non music majors who wish to explore America’s unique art form. It is open to all instrumentalists and vocalists, including students who perform on instruments not normally associated with jazz. No prior experience in jazz is needed, but candidates must pass a music audition. Students in the keyboard area use the Keyboard Skills I credit as a music elective.

University policy states that students must earn 8 distinct credits that are not used for their major toward their minor.

Course Work

- 2 credits of Applied Music
- MUSI 107 - The Development of Jazz Credits: 3
- MUSI 113 - Aural Skills I Credits: 1
- MUSI 115 - Theory I Credits: 3
- MUSI 116 - Theory II Credits: 3
- MUSI 171 - Keyboard Skills I Credits: 1
- MUSI 300 - Recital Attendance Credits: 0 (two semesters)*
- MUSI 311 - Jazz Studies Credits: 3
- 3 credits of MUSI 485 - Chamber Ensembles Credits: 1 (Jazz Chamber Ensembles)
- MUSI 379 - Introduction to Jazz Improvisation Credits: 1

Note:

*All students who enroll as music minors and jazz studies minors must take MUSI 300 for two semesters. A grade of S (satisfactory) must be earned each semester.

Total: 20 credits

Music and Technology Minor

Banner Code: MUTC

This minor is open to majors from throughout the university who seek to expand their knowledge and skill in this area of study.

University policy states that students must earn 8 distinct credits that are not used for their major toward their minor.

Course Work (18 credits)

Required (12 credits)

- MUSI 100 - Fundamentals of Music Credits: 3 or MUSI 115 - Theory I Credits: 3
• MUSI 300 - Recital Attendance Credits: 0 (2 semesters)
• MUSI 254 - Music and Technology Credits: 3
• MUSI 354 - Electronic Composition Credits: 3
• MUSI 355 - Recording Techniques Credits: 3

Applied Music and Ensemble (3 credits)

• Applied Music or Class Voice, Guitar, or Keyboard (1-2 credits)
• MUSI 38X or 485 (Ensemble) (1-2 credits)

Choose one of the following (3 credits):

• MUSI 102 - Popular Music in America Credits: 3
• MUSI 103 - Musics of the World Credits: 3
• MUSI 104 - Introduction to Twentieth-Century Music Credits: 3
• MUSI 105 - Music in the United States Credits: 3
• MUSI 107 - The Development of Jazz Credits: 3

Note:

Entrance requirements: MUSI 100 or 115 with a grade of B or higher. A music audition and interview with music technology faculty is required.

Total: 18 credits

Music Minor

Banner Code: MUSI

Performing Arts Building, Room A417
Phone: 703-993-1380
Web: music.gmu.edu

All students pursuing a music minor must pass a music audition. Students in the keyboard area use the Keyboard Skills I credit as a music elective.

University policy states that students must earn 8 distinct credits that are not used for their major toward their degree.

Course Work

• 6 credits of Applied Music
• 3 credits of Ensemble
• MUSI 101 - Introduction to Classical Music Credits: 3
• MUSI 113 - Aural Skills I Credits: 1
• MUSI 115 - Theory I Credits: 3
• MUSI 116 - Theory II Credits: 3
• MUSI 171 - Keyboard Skills I Credits: 1
• MUSI 114 - Aural Skills II Credits: 1 or MUSI 172 - Keyboard Skills II Credits: 1
• MUSI 300 - Recital Attendance Credits: 0 (two semesters)*

Note:

*All students who enroll as music minors and jazz studies minors must take MUSI 300 for two semesters. A grade of S (satisfactory) must be earned each semester.

Total: 21 credits

World Music Minor

Banner Code: WMUS

Performing Arts Building, Room A417
Phone: 703-993-1380
Web: music.gmu.edu

Faculty

Carroll, Lepore, J. McCarthy, Owens, Robinson (coordinator)

Requirements

Students must complete 16 to 18 credits, with a 10-credit core and opportunities to take electives in several departments at Mason.

Prerequisite

Students must first demonstrate to the World Music coordinator a basic level of knowledge and training in some area of Western or non-Western music, or earn a grade of B or higher in MUSI 103 or 431. Prerequisites for specific courses are indicated below.

University policy states that students must earn 8 distinct credits that are not used for their major toward their minor.

Course Work

The minor is designed for those who wish to widen their scope of knowledge about music while deepening their understanding of the world’s peoples. Students learn in the classroom, as well as experientially, in the form of applied studies and exercises in field work how music making functions within cultural contexts, conveying varied meanings in bodily action and musical sound worldwide. Students gain skills that will serve them in many fields of endeavor, from developing specific musical expertise to acquiring proficiency with technological and anthropological aspects of ethnographic enquiry.

Core (10 credits)

• MUSI 103 - Musics of the World Credits: 3
• ANTH 114 - Introduction to Cultural Anthropology Credits: 3
• MUSI 497 - Independent Study Credits: 1-3 (must complete 3 credits)
One of the following courses (1 credit):

Selection must be approved by minor coordinator.

- Applied Music
  
or
- Ensembles

Electives (6-8 credits)

Electives must be approved by the minor coordinator and should be selected from the following:

- Applied Music (1-3)
- MUSI 485 - Chamber Ensembles Credits: 1
- MUSI 102 - Popular Music in America Credits: 3
- MUSI 107 - The Development of Jazz Credits: 3
- MUSI 379 - Introduction to Jazz Improvisation Credits: 1
- DANC 118 - World Dance Credits: 3
- DANC 119 - Dance in Popular Culture: Afro-Latino Dance Credits: 3
- COMM 157 - Video Workshop Credits: 1
- COMM 305 - Foundations of Intercultural Communication Credits: 3
- ENGH 315 - Folklore and Folklife Credits: 3
- AFAM 200 - Introduction to African American Studies Credits: 3
- AFAM 390 - Special Topics in African and African American Studies Credits: 3
- AVT 378 - The African American Experience in the Performing Arts Credits: 3
- ANTH 302 - Peoples and Cultures of Latin America Credits: 3
- ANTH 306 - Peoples and Cultures of Island Asia Credits: 3
- ANTH 309 - Peoples and Cultures of India Credits: 3

Note:

Additional electives may include summer travel courses, as appropriate, and must be approved by the minor coordinator.

Total: 16-18 credits

Undergraduate Certificate

Musical Theater Undergraduate Certificate: Music

Banner Code: AR-CERB-MTHR

Performing Arts Building, Room A417
Phone: 703-993-1380
Web: music.gmu.edu

Faculty
Students pursuing a Musical Theater Certificate: Music Concentration must satisfy all requirements for a BA or BM in the School of Music. Students fulfilling the Musical Theater Certificate: Theater Concentration (Musical Theater Undergraduate Certificate: Theater) must satisfy all requirements for a BA or BFA in the School of Theater with a concentration in performance. Some credits required for this certificate may simultaneously fulfill learning requirements of the certificate in Musical Theater and university general education requirements. Some courses require placement. Depending on electives and other learning experiences, this certificate requires up to 30 credits beyond the requirements to complete a major in the School of Music. A minimum of 15 credits must be unique to the certificate and may not count toward the major, concentration, minor, another certificate or general education requirements. At least 15 credits of the certification must be earned at Mason. Students receiving the certificate must hold a baccalaureate degree or be earning a baccalaureate degree from Mason at the time they receive the certificate. Students with a previous bachelor's degree, who are admitted to this certificate alone, have four years to complete the certificate requirements. (See Academic Policies for more information.) This program of study is coordinated between units within the College of Visual and Performing Arts. Students will register for the following courses. Only courses with a grade of C or better are counted toward the certificate.

The certificate may be completed under part or full time basis.

## Certificate Requirements

### Musical Theater Dance Courses (12 credits)

Courses in DANC are selected from the following courses open to all non-dance majors. Courses may not be repeated in the certificate. At least 6 credits must be 200 level or above.

- DANC 125 - Beginning Modern Dance Credits: 3
- DANC 131 - Beginning Jazz Technique Credits: 3
- DANC 145 - Beginning Ballet Credits: 3
- DANC 161 - Beginning Tap Dance Credits: 3
- DANC 225 - Beginning Intermediate Modern Dance Credits: 3
- DANC 231 - Intermediate Jazz Technique Credits: 3
- DANC 245 - Beginning Intermediate Ballet Credits: 3
- DANC 331 - Advanced Jazz Dance Credits: 3
▲Concentration for Music Students (MUSS) (18 credits)

Theater Courses

- THR 300 - Voice and Speech I Credits: 3 or THR 301 - Advanced Study in Voice Credits: 3
- THR 310 - Acting II Credits: 3
- THR 427 - Musical Theater Workshop Credits: 3 (must be taken for a total of 6 credits)

Movement and Character Courses

Choose one of the following:

- THR 304 - Advanced Movement for Actors Credits: 3
- THR 305 - Stage Combat Credits: 3
- THR 365 - Characterization Credits: 3
- THR 405 - Advanced Stage Combat Credits: 3
- THR 421 - One-Person Show Credits: 3

Advanced Acting Courses

Choose one of the following:

- THR 320 - Performance Studio Credits: 3
- THR 321 - Acting Shakespeare Credits: 3
- THR 340 - Advanced Studies in Directing Credits: 3
- THR 410 - Acting for the Camera Credits: 3
- THR 420 - Advanced Performance Studio Credits: 3

Total: 30 credits

■ School of Theater

Performing Arts Building, Room A407
Phone: 703-993-1120
Web: theater.gmu.edu

Faculty

Ken Elston, Director

Professors: D'Andrea (Robinson Professor), Davis, McDonald

Heritage Professor: Keach

Associate Professors: Austin, Elston (director), Gero, Johnsen-Neshati, Kurtz

Term Associate Professor: Chew
Administrative Faculty (Instructional): Lechter, Murray

Adjunct Faculty: Cadby, Dunayer, Gaines, Gardner, Hurt, Lee, Maier, Nanni-Messegee, Wallace, Wilson

Course Work

The School of Theater offers all course work designated THR in the Courses section of this catalog.

Undergraduate Programs

The School of Theater offers BA and BFA degrees, both requiring completion of 120 credits of course work. Entrance into either program is by interview and audition or portfolio review. Information about the audition, portfolio review and interview process, including dates, can be found on the School of Theater web page, theater.gmu.edu/academics/admissions.html or by calling the School of Theater office at 703-993-1120. Admission to the University is determined by the Admissions Office.

The School of Theater aims to prepare students for graduate study or entry into the profession through rigorous, concentrated, and individualized training; however, students are encouraged to maintain wide-ranging interests within the department and throughout the university’s extensive offerings.

Students seeking to earn a BA or BFA as a second bachelor’s degree, either concurrently or sequentially, must complete all theater degree requirements. Students must earn a minimum 2.00 cumulative GPA in their major. A student must earn a minimum cumulative GPA of 2.5 to complete a BA with a concentration or a BFA.

Admission Requirements

Admission to George Mason University requires application through Mason’s Admissions Office. Admission to the theater major requires an interview and audition or portfolio review with the School of Theater as described below. Please note that these are two separate processes. The Theater admission process is a give-and-take experience in which students are encouraged to discuss their education and career goals in addition to demonstrating their artistic ability. The Theater minor does not require an interview. Applicants are encouraged to seek admission to the university prior to their interview with the School of Theater. For information regarding admission to George Mason University, financial aid, and campus tours, please visit the George Mason University website (www.gmu.edu). Admission to the university is determined by the Admissions Office.

Interviews will be conducted by appointment and candidates must prepare an appropriate resume.

Actors will also audition for a panel of Theater faculty with two pieces, either two contrasting monologues or a monologue and 16 bars of a song (to be sung unaccompanied), not to exceed three minutes total. Actors will likely be asked to make adjustments and repeat portions of their work.

Designers, technicians and stage managers will have their portfolios and resumes reviewed by representatives of the design faculty. Students are responsible for assembling and presenting examples of their work.

Playwrights, dramaturgs and generalists must submit a writing sample to theater@gmu.edu prior to interviewing.

Theater Education candidates must submit a written Teaching Philosophy Statement prior to interviewing, and will also audition for a panel of theater Faculty with one monologue.

Under special circumstances that preclude an in-person audition, interview, or portfolio review, student applicants may qualify for alternate arrangements. Contact the School of Theater for details.

Applicants will be notified of a School of Theater decision within two weeks. Applicants who are denied acceptance to the Theater major must wait one year before reapplying and must meet with the Director of the School of Theater or his/her designee one semester prior to reapplying.
Please contact the School of Theater at theater@gmu.edu or (703) 993-1120 to schedule your interview. Students who audition or present a portfolio at theater conferences (i.e. Virginia Theatre Association, Southeastern Theater Conference, etc.) before or after applying to Mason are required to attend a separate interview on campus.

**Theater BA**

Theater majors organize their advanced work within the major to include classes in areas of emphasis including performance, design and technical Theater, and other theater studies.

**Theater BA Concentrations**

Theater majors may choose to complete their Bachelor of Arts degree with a concentration in one of the following areas: Design and Technical Theater, Performance (Acting and Directing), Playwriting and Dramaturgy, or Theater Education for Theater Arts PK-12. Students must earn a minimum 2.5 cumulative GPA to complete a BA with a concentration. There is no further audition requirement or portfolio review for theater majors electing to complete a concentration. Students may also complete the traditional Bachelor of Arts without a concentration.

**Theater BFA Concentrations**

In addition to the general education requirements for the Bachelor of Arts degree, Theater Bachelor of Fine Arts majors must complete a minimum of 73 credits in the major: 49 credits of required core courses and 24 credits in a concentration. Concentrations are: Design for Stage and Screen, Performance for Stage and Screen (Acting and Directing), Writing and Dramaturgy for Stage and Screen. All students pursuing a BFA in Theater must earn a minimum 2.5 cumulative GPA for graduation.

**Writing-Intensive Requirement**

The university requires all students to complete at least one course designated writing-intensive in their major at the 300 level or above. Students seeking a BA or BFA in theater fulfill this requirement by successfully completing THR 350 or THR 482.

**Certification for Theater Education for Theater Arts PK-12**

The Theater Education for Theater Arts PK-12 concentration is approved by the Virginia State Department of Education and administered through the College of Education and Human Development, which is accredited by the National Council for the Accreditation of Teacher Education (NCATE). Upon degree conferral and completion of all requirements, students may be eligible to apply for Virginia State Licensure. Minimum scores on the Praxis I and VCLA tests must be achieved before state licensure is granted.

Students must be formally accepted into the Theater Education for Theater Arts PK-12 concentration. See Theater Education for Theater Arts PK-12 concentration for a complete list of requirements.

**Certification in Musical Theater**

Students pursuing a certification in Musical Theater must satisfy all requirements for a BA or BFA in the Theater Department, with a concentration in performance, or a BA or BM in the School of Music, as reflected in the university catalog. Some credits required for the certificate may simultaneously fulfill the learning requirements of the certificate in Musical Theater and fulfill university general education requirements. Some courses require placement. Thus, depending on electives and other learning experiences, this certification requires up to 30 credits beyond the requirements to complete a major in the Theater Department.
Students receiving the certificate must hold a baccalaureate degree or be earning a baccalaureate degree from Mason at the time they receive the certificate. This program of study is coordinated between units within the College of Visual and Performing Arts. See Musical Theater Certificate section for specific requirements.

Production Opportunities

Participation in Theater at Mason productions is expected of all declared majors. Students must have a minimum 2.5 cumulative GPA to participate in Theater at Mason productions.

Students must also earn four (4) practicum credits, one (1) credit for satisfactory completion (a minimum of 30 hours) of each of four (4) performance and production assignments in the major, including faculty or guest-directed Mason Players Mainstage, and student-directed Studio productions.

All freshmen, first year transfer, and new Theater majors must register for one (1) THR 198 credit and one (1) THR 199 credit during their first academic year.

Assignments for THR 196 and THR 197 will include a presentation of portfolio documents demonstrating a practical analysis of the role, design, or support position to subject area mentors.

- THR 196 assignments including actor, designer, assistant designer, stage manager, and assistant stage manager.
- THR 197 assignments include director, assistant director, dramaturg, master electrician, technical director, playwright, house management, and publicity.
- THR 198 assignments include scenery construction and painting, costume construction, electrician, and props.
- THR 199 assignments include stage crew, light board operator, sound board operator, wardrobe, and fly crew.

Unless registered for a Theater course approved as directly connected to production (i.e. THR 196 -199, 492 or 495) all students (including non-Theater majors) electing to participate in a Theater at Mason production must register for THR 200 concurrent with participation.

Theater Honors Program

Highly qualified students who have completed 75 credits may pursue advanced work leading to graduation with honors in the major. Students apply for Honors in Theater by submitting to the Director (by November 15 or April 15) a two-page written statement outlining their reasons for pursuing advanced coursework and specific professional goals, along with the names of two Mason theater faculty members who have agreed to serve as references.

Students satisfy the honors course sequence by taking three Honors specific courses from their chosen concentration. They must also maintain an overall GPA of 3.50 and a GPA of 3.75 within the major.

Academic Policies

Please see College of Visual and Performing Arts academic policies.

Bachelor of Arts

Theater, BA

Banner Code: AR-BA-THR
Faculty

Ken Elston, Director

Professors: D’Andrea (Robinson Professor), Davis, McDonald

Heritage Professor: Keach

Associate Professors: Austin, Elston (director), Gero, Johnsen-Neshati, Kurtz

Term Associate Professor: Chew

Administrative Faculty (Instructional): Lechter, Murray

Adjunct Faculty: Cadby, Dunayer, Gaines, Gardner, Hurt, Lee, Maier, Nanni-Messegee, Wallace, Wilson

Program

The BA degree stresses the breadth of a liberal arts education in the belief that such study, combined with serious practical training and experience, offers the best preparation for a life in theater and screen. Entrance into the program is by interview and audition or portfolio review. Information about the audition, portfolio review and interview process, including dates, can be found on the School of Theater web page, theater.gmu.edu/admissions or by calling the School of Theater office at 703-993-1120. Admission to the University is determined by the Admissions Office.

Students electing to major in theater complete the theater core, which is a group of courses providing a broad introduction to the various theater arts and striving to create a shared body of knowledge within the department’s student population.

To organize their advanced work within the major, students select 24 credits of 300-400-level courses, chosen from any area of emphasis in Theater or students elect a course of study from four concentrations: Performance (Acting and Directing), Design and Technical Theater, Playwriting and Dramaturgy, or Theater Education for Theater Arts PK-12. The department aims to prepare students for graduate study or entry into the profession through rigorous, concentrated, and individualized training; however, students are encouraged to maintain wide-ranging interests within the department and throughout the university’s extensive offerings.

Students seeking to earn a BA as a second bachelor’s degree, either concurrently or sequentially, must complete all theater degree requirements. Students must earn a minimum 2.00 cumulative GPA in their major.

This undergraduate program offers students the option of applying to the accelerated master’s program in arts management. See Theater, BA/Arts Management, Accelerated MA for specific requirements.

Theater BA Concentrations

Theater majors may choose to complete their degree with 12 directed credits as a concentration in one or more of the following areas: Design and Technical Theater, Performance (Acting and Directing), Playwriting and Dramaturgy, or Theater Education for Theater Arts PK-12. Students must earn a minimum 2.5 cumulative GPA to complete a BA with a concentration.
Certification for Theater Education for Theater Theatre Arts PK-12

The Theater Education for Theater Arts PK-12 concentration is approved by the Virginia State Department of Education and administered through the College of Education and Human Development, which is accredited by the National Council for the Accreditation of Teacher Education (NCATE). Upon successful completion of all concentration requirements, degree conferral, achieving the minimum scores on the Praxis I and VCLA tests students may be eligible to apply for Virginia State Licensure.

Students must be formally accepted into the Teaching Theatre Arts PK-12 concentration. See Teaching Theatre Arts PK-12 concentration for a complete list of requirements.

Writing-Intensive Requirement

The university requires all students to complete at least one designated writing-intensive course in their major at the 300 level or above. Students seeking a BA in theater fulfill this requirement by successfully completing THR 350 or THR 482.

Course Work

The School of Theater offers all course work designated THR in the Courses section of this catalog.

Production Opportunities

Participation in Theater at Mason productions is expected of all declared majors.

All Theater majors must enroll in THR 191 four times during their course of study. It is a zero (0) credit class, graded S/NC, that is successfully completed by attending productions, guest lectures, workshops; participation in production load-in; and participation in production strike. Course is repeatable up two times in one semester.

Students must also earn four (4) practicum credits, one (1) credit for satisfactory completion (a minimum of 30 hours) of each of four (4) performance and production assignments in the major, including faculty or guest-directed Mason Players Mainstage and student-directed Studio productions.

All freshmen, first year transfer, and all new Theater majors will be assigned one (1) THR 198 credit and one (1) THR 199 credit during their first academic year.

Assignments for THR 196 and THR 197 will include a presentation of portfolio documents demonstrating a practical analysis of the role, design, or support position to subject area mentors.

- THR 196 assignments including actor, designer, assistant designer, stage manager, and assistant stage manager.
- THR 197 assignments include director, assistant director, dramaturg, master electrician, technical director, playwright, house management, and publicity.
- THR 198 assignments include scenery construction and painting, costume construction, electrician, and props.
- THR 199 assignments include stage crew, light board operator, sound board operator, wardrobe, and fly crew.

Unless registered for a Theater course approved as directly connected to production (i.e. THR 196-199, 492 or 495) all students (including non-Theater majors) electing to participate in a Theater at Mason production must register for THR 200 concurrent with participation.

Theater Honors Program

Highly qualified students who have completed 75 credits may pursue advanced work leading to graduation with honors in the major. Students apply for Honors in Theater by submitting to the Director (by November 15 or April 15) a two-page written
statement outlining their reasons for pursuing advanced coursework and specific professional goals, along with the names of two Mason theater faculty members who have agreed to serve as references.

Students satisfy the honors course sequence by taking three Honors specific courses from their chosen concentration. They must also maintain an overall GPA of 3.5 and a GPA of 3.75 within the major.

**Academic Policies**

Please see College of Visual and Performing Arts academic policies.

**Degree Requirements**

**General Education (40 credits)**

**Foundation Requirements**

- Oral communication Credits: 3
- Information technology Credits: 3
- Quantitative reasoning Credits: 3
- ENGH 101 - Composition Credits: 3
- ENGH 302 - Advanced Composition Credits: 3

Nonnative speakers of English with limited proficiency in the language may substitute ENGH 100 for ENGH 101. Students must attain a minimum grade of C in ENGH 100 or 101, as well as in 302, to fulfill degree requirements.

**Core Requirements**

- Literature Credits: 3
- Arts (outside the major) (students earning a concentration in Design and Technical Theater must take ARTH 101, 102, 200 or 201) Credits: 3
- Natural science (including one laboratory science) Credits: 7
- Western civilization Credits: 3
- Global understanding Credits: 3
- Social and behavioral sciences Credits: 3
- Synthesis requirement (see concentration for specific requirement) Credits: 3

**Major (64-80 credits)**

**Foreign Language, Minor, Double Major or Double Degree (0–16 credits)**

See beginning of CVPA section for foreign language requirement.

Students may complete an academic minor, double major or double degree in lieu of the foreign language requirement.

**Theater Core Requirements (43 credits)**

- THR 150 - Drama, Stage, and Society I Credits: 3
- THR 151 - Drama, Stage, and Society II Credits: 3
• THR 191 - Practical Theater Seminar Credits: 0 (Must be taken four times during course of study)
• THR 196 - Performance and Design Practicum Credits: 1
• THR 197 - Management/Literary Practicum Credits: 1
• THR 198 - Theatrical Construction Practicum Credits: 1
• THR 199 - Production Run Crew Practicum Credits: 1
• THR 201 - Stage Management Credits: 3
• THR 210 - Acting I Credits: 3
• THR 230 - Fundamentals of Production Credits: 3
• THR 300 - Voice and Speech I Credits: 3
• THR 303 - Movement for Actors Credits: 3
• THR 329 - Directing I Credits: 3
• THR 339 - Principles of Design Credits: 3
• THR 350 - Script Analysis Credits: 3
• THR 380 - Playwriting I Credits: 3 or THR 382 - Screenplay Workshop Credits: 3 or THR 482 - Advanced Screenplay Workshop Credits: 3
• THR 411 - Directing on Screen Credits: 3 or THR 412 - Performance on Screen Credits: 3

One upper-level dramatic literature course (3 credits)

• THR 351 - Dramatic Theory and Criticism Credits: 3 (May fulfill either dramatic literature requirement or PWD concentration requirement but not both)
• THR 352 - Dramatic Literature Seminar Credits: 3 (May fulfill either dramatic literature requirement or PWD concentration requirement but not both)
• THR 355 - Moral Vision in American Theater Credits: 3
• THR 359 - World Stages Credits: 3 (May fulfill either global understanding or dramatic literature requirement but not both)
• THR 395 - Theater as the Life of the Mind Credits: 3
• THR 424 - Contemporary Women Playwrights Credits: 3

Upper-Level Electives (21-24 credits)

• 21-24 credits chosen from THR 300-499

Students electing to complete a concentration will fulfill part of this requirement with concentration-specific courses.

Theater Education for Theater Arts PK-12 concentration students must take the following to fulfill part of this requirement:

• THR 449 - Elementary Theater Education Credits: 3
• THR 450 - Secondary Theater Education Credits: 3
• THR 451 - Theater Pedagogy Credits: 2

Theater Concentrations (12-16 credits)

Theater majors may apply to complete their degree with a concentration in one of the following:

• Design and Technical Theater
• Performance
• Playwriting and Dramaturgy
• Theater Education for Theater Arts PK-12

Note that theater majors are not required to complete a concentration to graduate with a Theater BA.
▲ Concentration in Design and Technical Theater (DTT)

Provides a foundation of knowledge, technique, and experience in one or more areas of theater design and technology in preparation for advanced study and professional work in the field.

Synthesis fulfilled by THR 440 - Advanced Studies in Directing/Dramaturgy Credits: 3 or THR 496 - Text in Production Credits: 3.

Required Core Course:

- 3 credits of  THR 497 - Independent Study Credits: 1-6

Two courses from:

- THR 235 - Costume Crafts Credits: 3
- THR 313 - Event Technology Credits: 3
- THR 314 - Lighting Stagecraft Credits: 3
- THR 315 - Sound Engineering Credits: 3
- THR 330 - Seminar in Technical Theater Credits: 3
- THR 331 - Drafting and Model Making Credits: 3
- THR 332 - Costume for Stage and Screen Credits: 3
- THR 343 - Costume Pattern Drafting Credits: 3

One course from:

- THR 333 - Stage Design Credits: 3
- THR 334 - Lighting Design Credits: 3
- THR 335 - Costume Design Credits: 3
- THR 337 - Sound Design Credits: 3
- THR 342 - Makeup Design Credits: 3
- THR 434 - Advanced Lighting Design Credits: 3

▲ Concentration in Performance (PFM)

Designed for the serious student of acting and directing with professional aspirations. Solid grounding in the fundamentals of performance analysis and basic training of the actor's instrument are complemented by a rigorous, sequential instruction in the various facets of the actor's craft.

At its core, the Performance Concentration is a blend of Modern and Classical actor training using a Stanislavski-grounded approach balanced with techniques for understanding texts written two hundred years before "motivation" and "characterization" entered the critical vocabulary. Rounding out the curriculum is specialized study in vocal production and movement technique. Matriculation in this program expresses a profound commitment to a rigorous intellectual, physical and emotional investigation of the discipline of performance over a two-year period. Professional development is enhanced with ongoing student progress reviews, support and advising from Performance Concentration faculty.

Synthesis fulfilled by THR 440 - Advanced Studies in Directing/Dramaturgy Credits: 3 or THR 496 - Text in Production Credits: 3.

Required Core Courses:

- THR 301 - Advanced Study in Voice Credits: 3
• THR 310 - Acting II Credits: 3

One course from:

• THR 320 - Performance Studio Credits: 3
• THR 321 - Acting Shakespeare Credits: 3
• THR 340 - Advanced Studies in Directing Credits: 3
• THR 410 - Acting for the Camera Credits: 3
• THR 420 - Advanced Performance Studio Credits: 3

One course from:

• THR 304 - Advanced Movement for Actors Credits: 3
• THR 305 - Stage Combat Credits: 3
• THR 365 - Characterization Credits: 3
• THR 405 - Advanced Stage Combat Credits: 3
• THR 421 - One-Person Show Credits: 3

▲ Concentration in Playwriting and Dramaturgy (PWD)

Acknowledges a creative and practical connection between the work of the playwright and dramaturg. Students choosing this area of specialization will focus on the literary aspects of theater, such as playwriting, dramaturgy, screenwriting, translation, adaptation, season planning, and theater criticism. Students seeking specialized experience as a playwright or dramaturg will choose from a selection of required and recommended courses designed to expose students to a broad range of contemporary and classical texts, deepen their understanding of dramatic structure, encourage collaboration, and foster opportunities for new play development. Students are encouraged to consult their advisors on complementary courses of interest outside the major, such as in the visual and performing arts, Film and Video Studies, English and Foreign Language. This concentration gives students access to a variety of hands-on opportunities within the School of Theater and the professional world.

Synthesis fulfilled by THR 440 - Advanced Studies in Directing/Dramaturgy Credits: 3

**Required Core Course:**

• THR 380 - Playwriting I Credits: 3

One course from:

• THR 352 - Dramatic Literature Seminar Credits: 3
• THR 355 - Moral Vision in American Theater Credits: 3
• THR 395 - Theater as the Life of the Mind Credits: 3

One course from:

• THR 381 - Playwriting II Credits: 3
• THR 382 - Screenplay Workshop Credits: 3
• THR 480 - Advanced Playwriting Credits: 3
• THR 482 - Advanced Screenplay Workshop Credits: 3

One course from:
- THR 351 - Dramatic Theory and Criticism Credits: 3 (May fulfill concentration requirement or dramatic literature requirement but not both)
- THR 484 - Translation & Adaptation for Stage & Screen Credits: 3

▲ Concentration in Theater Education for Theater Arts PK-12 (THRA)

Designed for students interested in pursuing theater education. In addition to transcript review and the submission of an essay detailing goals for the concentration, students must:

- Have earned 45 to 60 credits.
- Submit scores for the Praxis I (Reading, Writing, and Mathematics) tests to the committee. (It is strongly recommended that students take the Praxis I tests as soon as ENGH 302, a course in literature, and a course in mathematics have been completed.)
- Maintain an overall GPA of 2.80 in all course work completed at Mason and in course work at all institutions of higher learning combined.
- Earn no grade lower than a C in theater and professional education courses needed for graduation.

Upon fulfilling THR 448, 449, 450, 451, EDRD 300, EDUC 301, and EDUC 302 students must complete 15 weeks of a full-time student teaching internship (THR 455). Applications for placement, subject to approval of the unit, are submitted to the Field Placement Specialist in the College of Education and Human Development at the beginning of the previous semester. In addition, students must pass the VCLA before student teaching.

Synthesis is fulfilled by THR 440 - Advanced Studies in Directing/Dramaturgy Credits: 3 or THR 496 - Text in Production Credits: 3.

Required Core Courses:

- THR 448 - Foundations of Theater Education Credits: 3 or EDUC 422 - Foundations of Secondary Education Credits: 3
- EDRD 300 - Literacy and Curriculum Integration Credits: 3
- EDUC 301 - Educationally Diverse Populations: Handicapped, Gifted, Multicultural Credits: 3
- EDUC 302 - Human Growth and Development Credits: 3
- THR 455 - Practical Teaching Experience Credits: 4-12 (must be taken for 4 credits)

Electives (0-16 credits)

Total: 120 credits

Bachelor of Fine Arts

Theater, BFA

Banner Code: AR-BFA-THR

Performing Arts Building, Room A407
Phone: 703-993-1120
Web: theater.gmu.edu

Faculty

Ken Elston, Director
Professors: D’Andrea (Robinson Professor), Davis, McDonald

Heritage Professor: Keach

Associate Professors: Austin, Elston (director), Gero, Johnsen-Neshati, Kurtz

Term Associate Professor: Chew

Administrative Faculty: Lechter, Murray

Adjunct Faculty: Cadby, Dunayer, Gaines, Hurt, Lee, Maier, Nanni-Messegee, Wallace, Wilson

Program

Entrance into the BFA program is by interview and audition or portfolio review. Information about the audition, portfolio review and interview process; including dates; can be found on the School of Theater web page, theater.gmu.edu/admissions, or by calling the School of Theater office at 703-993-1120. Admission to the University is determined by the Admissions Office.

In addition to the general education requirements for the Bachelor of Arts degree, Theater Bachelor of Fine Arts majors must complete a minimum of 73 credits in the major: 49 credits of required Theater core courses plus 24 credits in the concentration. Concentrations are: Design for Stage and Screen, Performance for Stage and Screen (Acting and Directing), Writing and Dramaturgy for Stage and Screen.

Theater majors are expected to participate in Theater at Mason productions and will be required to demonstrate growing proficiency in their chosen concentration prior to the confirmation of the BFA degree.

Students must earn a minimum 2.5 cumulative GPA to complete a BFA in Theater.

Writing-Intensive Requirement

The university requires all students to complete at least one course designated writing-intensive in their majors at the 300 level or above. Students seeking a BFA in theater fulfill this requirement by successfully completing THR 350 or THR 482.

Course Work

The School of Theater offers all course work designated THR in the Courses section of this catalog.

Production Opportunities

Participation in Theater at Mason productions is expected of all declared majors.

All Theater majors must enroll in THR 191 four times during their course of study. It is a zero (0) credit class, graded S/NC, that is successfully completed by attending productions, guest lectures, and/or workshops; participation in production load-in; and participation in production strike. Course is repeatable up to two times in one semester.

Students must also earn four (4) practicum credits: one (1) credit for satisfactory completion (a minimum of 30 hours) of each of four (4) performance and production assignments in the major, including faculty or guest-directed Mason Players Mainstage and student-directed Studio productions.

All freshmen, first year transfer, and all new Theater majors will be assigned one (1) THR 198 credit and one (1) THR 199 credit during their first academic year.
Assignments for THR 196 and THR 197 will include a presentation of portfolio documents demonstrating a practical analysis of the role, design, or support position to subject area mentors.

- THR 196 assignments including actor, designer, assistant designer, stage manager, and assistant stage manager.
- THR 197 assignments include director, assistant director, dramaturg, master electrician, technical director, playwright, house management, and publicity.
- THR 198 assignments include scenery construction and painting, costume construction, electrician, and props.
- THR 199 assignments include stage crew, light board operator, sound board operator, wardrobe, and fly crew.

Unless registered for a Theater course approved as directly connected to production (i.e. THR 196-199, 492 or 495) all students (including non-Theater majors) electing to participate in a Theater at Mason production must register for THR 200 concurrent with participation.

**Theater Honors Program**

Highly qualified students who have completed 75 credits may pursue advanced work leading to graduation with honors in the major. Students apply for Honors in Theater by submitting to the Director (by November 15 or April 15) a two-page written statement outlining their reasons for pursuing advanced coursework and specific professional goals, along with the names of two Mason theater faculty members who have agreed to serve as references.

Students satisfy the honors course sequence by taking three Honors specific courses from their chosen concentration. They must also maintain an overall GPA of 3.5 and a GPA of 3.75 within the major.

**Academic Policies**

Please see College of Visual and Performing Arts academic policies.

**Degree Requirements**

**General Education (40 credits)**

**Foundation Requirements**

- Oral communication Credits: 3
- Information Technology Credits: 3
- Quantitative Reasoning Credits: 3
- ENGH 101 - Composition Credits: 3
- ENGH 302 - Advanced Composition Credits: 3
  Nonnative speakers of English with limited proficiency in the language may substitute ENGH 100 for ENGH 101. Students must attain a minimum grade of C in ENGH 100 or 101, as well as 302, to fulfill degree requirements.

**Core Requirements**

- Literature Credits: 3
- Arts Credits: 3
- Natural science (including one laboratory science) Credits: 7
- Western civilization Credits: 3
- Global Understanding Credits: 3
- Social and behavioral sciences Credits: 3
Synthesis fulfilled by THR 440 - Advanced Studies in Directing/Dramaturgy Credits: 3 or THR 496 - Text in Production Credits: 3 (Writing and Dramaturgy for Stage and Screen Concentration requires THR 440)

Major (73 credits)

Theater Core Requirements (49 credits)

- THR 150 - Drama, Stage, and Society I Credits: 3
- THR 151 - Drama, Stage, and Society II Credits: 3
- THR 191 - Practical Theater Seminar Credits: 0 (Must be taken four times during course of study)
- THR 196 - Performance and Design Practicum Credits: 1
- THR 197 - Management/Literary Practicum Credits: 1
- THR 198 - Theatrical Construction Practicum Credits: 1
- THR 199 - Production Run Crew Practicum Credits: 1
- THR 201 - Stage Management Credits: 3
- THR 210 - Acting I Credits: 3
- THR 230 - Fundamentals of Production Credits: 3
- THR 300 - Voice and Speech I Credits: 3
- THR 303 - Movement for Actors Credits: 3
- THR 329 - Directing I Credits: 3
- THR 339 - Principles of Design Credits: 3
- THR 350 - Script Analysis Credits: 3
- THR 380 - Playwriting I Credits: 3 or THR 382 - Screenplay Workshop Credits: 3 or THR 482 - Advanced Screenplay Workshop Credits: 3
- THR 411 - Directing on Screen Credits: 3 or THR 412 - Performance on Screen Credits: 3

One upper-level dramatic literature course (3 credits)

- THR 351 - Dramatic Theory and Criticism Credits: 3
- THR 352 - Dramatic Literature Seminar Credits: 3 (May fulfill dramatic literature or WDSS concentration requirement but not both)
- THR 355 - Moral Vision in American Theater Credits: 3
- THR 359 - World Stages Credits: 3 (May fulfill global understanding or upper level dramatic literature requirement but not both)
- THR 395 - Theater as the Life of the Mind Credits: 3
- THR 424 - Contemporary Women Playwrights Credits: 3

Upper Division Electives (6 Credits)

- 6 credits chosen from THR 300-499

Theater BFA Concentrations (24 credits)

Theater majors earning a BFA in Theater must select one of the following concentrations:

- Design for Stage and Screen
- Performance for Stage and Screen (Acting and Directing)
• Writing and Dramaturgy for Stage and Screen

▲ Design for Stage and Screen Concentration (DSS)

Required Core Courses

• 3 credits of THR 497 - Independent Study Credits: 1-6

4 courses from:

• THR 235 - Costume Crafts Credits: 3
• THR 313 - Event Technology Credits: 3
• THR 314 - Lighting Stagecraft Credits: 3
• THR 315 - Sound Engineering Credits: 3
• THR 330 - Seminar in Technical Theater Credits: 3
• THR 331 - Drafting and Model Making Credits: 3
• THR 332 - Costume for Stage and Screen Credits: 3
• THR 343 - Costume Pattern Drafting Credits: 3

3 courses from:

• THR 333 - Stage Design Credits: 3
• THR 334 - Lighting Design Credits: 3
• THR 335 - Costume Design Credits: 3
• THR 337 - Sound Design Credits: 3
• THR 434 - Advanced Lighting Design Credits: 3

▲ Performance for Stage and Screen (Acting and Directing) Concentration (PSS)

Required Core Courses

• THR 301 - Advanced Study in Voice Credits: 3
• THR 310 - Acting II Credits: 3
• THR 365 - Characterization Credits: 3 or THR 421 - One-Person Show Credits: 3
• THR 410 - Acting for the Camera Credits: 3

3 courses from:

• THR 320 - Performance Studio Credits: 3
• THR 321 - Acting Shakespeare Credits: 3
• THR 340 - Advanced Studies in Directing Credits: 3
• THR 420 - Advanced Performance Studio Credits: 3

1 course from:

• THR 304 - Advanced Movement for Actors Credits: 3
• THR 305 - Stage Combat Credits: 3
• THR 405 - Advanced Stage Combat Credits: 3
• THR 427 - Musical Theater Workshop Credits: 3

▲ Writing and Dramaturgy for Stage and Screen Concentration (WDSS)

Required Core Course

• THR 380 - Playwriting I Credits: 3

2 courses from:

• THR 381 - Playwriting II Credits: 3
• THR 382 - Screenplay Workshop Credits: 3
• THR 480 - Advanced Playwriting Credits: 3
• THR 482 - Advanced Screenplay Workshop Credits: 3
• THR 484 - Translation & Adaptation for Stage & Screen Credits: 3

1 course from:

• THR 352 - Dramatic Literature Seminar Credits: 3 (May fulfill concentration requirement or dramatic literature major requirement but not both)
• THR 355 - Moral Vision in American Theater Credits: 3
• THR 395 - Theater as the Life of the Mind Credits: 3

1 course from:

• THR 310 - Acting II Credits: 3
• THR 340 - Advanced Studies in Directing Credits: 3
• THR 365 - Characterization Credits: 3
• THR 421 - One-Person Show Credits: 3

2 courses from:

• CHIN 320 - Contemporary Chinese Film Credits: 3
• ENGH 372 - Introduction to Film Credits: 3
• FAVS 225 - The History of World Cinema Credits: 3
• FREN 470 - French and Francophone Cinema Credits: 3
• JAPA 320 - Japanese Cinema Credits: 3
• RUSS 470 - Topics in (Post) Soviet Film Credits: 3
• Other foreign film options as approved by advisor

1 course concentration electives:

• ENGH 370 - Introduction to Documentary Credits: 3
• FAVS 352 - Ethics of Film and Video Credits: 3
• FAVS 399 - Special Topics in Film and Video Studies Credits: 1-3
• FAVS 483 - Feature-Length Scriptwriting Credits: 3
• THR 410 - Acting for the Camera Credits: 3
• THR 411 - Directing on Screen Credits: 3
• THR 412 - Performance on Screen Credits: 3
• Other THR courses as approved by advisor

General Electives (7 credits)

Total: 120 credits

Bachelor/Accelerated Master's

Theater, BA/Arts Management, Accelerated MA

Performing Arts Building, Room A407
Phone: 703-993-1120
Web: theater.gmu.edu

Faculty

Ken Elston, Director

Professors: D’Andrea (Robinson Professor), Davis, McDonald

Heritage Professor: Keach

Associate Professors: Austin, Elston (director), Gero, Johnsen-Neshati, Kurtz

Term Associate Professor: Chew

Adjunct Faculty: Cadby, Dunayer, Gaines, Lechter, Lee, Maier, McManus, Mountain, Murray, Nanni-Messegee, Wallace

Program

Undergraduates in Theater may apply to the accelerated master's degree in Arts Management. If accepted, students will be able to earn a BA in Theater and an MA in Arts Management after satisfactory completion of 150 credits. The regular designed timeframe would be a start in the Fall and the completion in the Summer five years later, but longer time frames would also be available.

This program of study is offered through joint cooperation between the School of Theater and the Arts Management Program.

For policies governing all graduate degrees, see the Academic Policies section of the catalog.

Admission Requirements

Applicants to accelerated master's programs must have completed at least 75 credits that apply to their undergraduate degree (with at least 24 credits at Mason) and no more than 90 credits. Applicants should submit an Accelerated Master's Program Application, available from the College of Visual and Performing Arts (CVPA) Graduate Studies. It includes the proposed conferral date for the undergraduate degree and the two graduate courses that are to be applied to the undergraduate degree.
Interested students should contact the Arts Management Program Office for more details about the application process.

**Degree Requirements**

As an undergraduate, the accelerated master's student is to complete the two graduate courses indicated on their Accelerated Master's Program application with a minimum grade of 3.00 in each course. Students must maintain a minimum GPA of 3.00 in all coursework and in coursework applied to their major. On completion and conferral of the undergraduate degree in the semester indicated in the application, they submit the Bachelor's/Accelerated Master's Transition Form (which shall incorporate all of the Graduate Admission requirements of the University) and are admitted to graduate status.

As graduate students, accelerated master's students have an advanced standing. They must meet all master's degree requirements except for the two courses (6 credits) they completed as undergraduates. The Internal Internship (AMGT 740) will be within Theater at Mason (generally with the School of Theater). Students will begin their master's program in the semester immediately following conferral of the undergraduate degree, and they may also begin in the summer term.

**Reserve Graduate Credit**

Students may take up to 6 additional graduate credits as reserve graduate credit. These credits do not apply to the undergraduate degree. The ability to take courses for reserve graduate credit is available to all high achieving undergraduates with permission of the School of Theater. Permission to take a graduate course for reserve graduate credit is normally granted only to Mason seniors within 15 hours of graduation and must be approved by the Dean's Office.

To apply these credits to the master's degree, students must request that the credits be moved from the undergraduate degree to the graduate degree using the Bachelor's/Accelerated Master's Transition Form.

**Graduate Certificate**

**Teaching Theatre PK-12 Graduate Certificate**

**Banner Code:** AR-CERG-THRP

Performing Arts Building, Room A407
Phone: 703-993-1120
Web: theater.gmu.edu

**Faculty**

Ken Elston, Director

**Professors:** D’Andrea (Robinson Professor), Davis, McDonald

**Heritage Professor:** Keach

**Associate Professors:** Austin, Elston (director), Gero, Johnsen-Neshati, Kurtz

**Term Associate Professor:** Chew

**Adjunct Faculty:** Cadby, Dunayer, Gaines, Lechter, Lee, Maier, McManus, Mountain, Murray, Nanni-Messegee, Wallace

**Program**
The School of Theater offers a graduate certificate program for Teaching Theatre PK-12. To apply to the program, candidates must meet the following prerequisites:

Completed a major in theater or 33 semester hours distributed among the following areas:

- Directing: 6 semester hours
- Technical theater: 9 semester hours
- Cultural context and theater history: 3 semester hours
- Performance: 6 semester hours
- Dramatic literature: 9 semester hours

Students who have completed ALL endorsements, including Praxis I, are eligible for enrollment into the Graduate Certificate Program for Teaching Theatre PK-12. This certificate can be earned on a full time or part time basis. All Virginia requirements must be met to achieve licensure.

Licensure Program Requirements

- THR 548 - Advanced Foundations of Theater Education Credits: 3 or EDUC 521 - Foundations of Education, PK-12 Credits: 3
- EDRD 501 - Literacy and Curriculum Integration, PK-12 Credits: 3
- EDUC 539 - Human Development and Learning PK-12 Credits: 3
- THR 549 - Advanced Elementary Theater Ed Credits: 3
- THR 550 - Advanced Secondary Education Credits: 3
- 6 credits of THR 555 - Practical Teaching Experience Credits: 4-12 (prior to internship, must pass: VCLA, technology & child abuse standards)

Total: 21 credits

Non-Degree

Theater Minor

Banner Code: THR

Performing Arts Building, Room A407
Phone: 703-993-1120
Web: theater.gmu.edu

University policy states that students must earn 8 distinct credits that are not used for their major toward their degree.

Course Work

- THR 230 - Fundamentals of Production Credits: 3
- THR 310 - Acting II Credits: 3
- THR 350 - Script Analysis Credits: 3
- THR 150 - Drama, Stage, and Society I Credits: 3 or THR 151 - Drama, Stage, and Society II Credits: 3 or
  THR 380 - Playwriting I Credits: 3
- 6 credits chosen from THR 100-399
Total: 18 credits

Undergraduate Certificate

Musical Theater Undergraduate Certificate: Theater

Banner Code: AR-CERB-MTHR

Performing Arts Building, Room A407
Phone: 703-993-1120

Faculty

Ken Elston, Director

Professors: D’Andrea (Robinson Professor), Davis, McDonald

Heritage Professor: Keach

Associate Professors: Austin, Elston (director), Gero, Johnsen-Neshati, Kurtz

Term Associate Professor: Chew

Administrative Faculty (Instructional): Lechter, Murray

Adjunct Faculty: Cadby, Dunayer, Gaines, Gardner, Hurt, Lee, Maier, Nanni-Messegee, Wallace, Wilson

Students pursuing a certificate in Musical Theater must satisfy all requirements for a BA or BFA in the School of Theater with a concentration in performance. Students fulfilling the Musical Theater Certificate: Music Concentration must satisfy all requirements for a BA or BM in the School of Music (Musical Theater Undergraduate Certificate: Music). Some credits required for this certificate may simultaneously fulfill learning requirements of the certificate in Musical Theater and university general education requirements. Some courses require placement. Depending on electives and other learning experiences, this certificate requires up to 30 credits beyond the requirements to complete a major in the School of Theater. A minimum of 15 credits must be unique to the certificate and may not count toward the major, concentration, minor, another certificate or general education requirements. At least 15 credits of the certificate must be earned at Mason. Students receiving the certificate must hold a baccalaureate degree or be earning a baccalaureate degree from Mason at the time they receive the certificate. Students with a previous bachelor's degree, who are admitted to this certificate alone, have four years to complete the certificate requirements. This program of study is coordinated between units within the College of Visual and Performing Arts. Students will register for the following courses. Only courses with a grade of C or better are counted toward the certificate.

This certificate may be completed under a part or full time basis. See Academic Policies for more information.

Certificate Requirements

Musical Theater Dance Courses (12 credits)

Courses in DANC are selected from the following courses open to all non-dance majors. Courses may not be repeated in the certificate. At least 6 credits must be 200 level or above.
• DANC 125 - Beginning Modern Dance Credits: 3
• DANC 131 - Beginning Jazz Technique Credits: 3
• DANC 145 - Beginning Ballet Credits: 3
• DANC 161 - Beginning Tap Dance Credits: 3
• DANC 225 - Beginning Intermediate Modern Dance Credits: 3
• DANC 231 - Intermediate Jazz Technique Credits: 3
• DANC 245 - Beginning Intermediate Ballet Credits: 3
• DANC 331 - Advanced Jazz Dance Credits: 3

▲ Concentration for Theater Students (THRS) (18 credits)

• MUSI 113 - Aural Skills I Credits: 1
• MUSI 114 - Aural Skills II Credits: 1-2 (must be taken for 1 credit)
• MUSI 115 - Theory I Credits: 3
• MUSI 171 - Keyboard Skills I Credits: 1
• MUSI 243 - Applied Music in Voice Credits: 2 (must be taken for a total of 6 credits)
• MUSI 301 - Music in Motion Pictures Credits: 3
• MUSI 381 - University Chorale Credits: 1 or MUSI 385 - Chamber Singers Credit: 1
• MUSI 485 - Chamber Ensembles Credits: 1 (must be taken for a total of 2 credits)

Total: 30 credits

Course Work

KIAS offers all course work designated CSS in the Courses section of this catalog.

The Institute

The Krasnow Institute for Advanced Study seeks to expand the understanding of mind, brain, and intelligence by conducting research at the intersection of the separate fields of cognitive psychology, neurobiology, and the computer-driven study of artificial intelligence and complex adaptive systems, including social systems. These separate disciplines increasingly overlap and promise progressively deeper insight into human thought processes. The institute also examines how new insights from cognitive science research can be applied for human benefit in the areas of mental health, neurological disease, education, computer design, and social system analysis.

The Krasnow Institute for Advanced Study was chartered in 1990 as a private nonprofit Virginia corporation and merged with Mason in 2002, becoming a chartered institute under the Office of the Provost. The Center for Social Complexity joined the Krasnow Institute in 2005. In 2008, the institute became an academic unit housing the Molecular Neuroscience Department and the Computational Social Science Department. With an annual budget of $5.8 million, the institute is home to a scientific staff of over 100. Cognitive research at the institute spans from molecules to the mind to social systems. Krasnow scientists have published extensively in the most prestigious scholarly journals and collectively have brought in more than $45 million in sponsored research from federal agencies such as the National Institutes of Health and private sources such as the Sir John Templeton Foundation.

Academic Policies
Students should become familiar with the university's general academic policies in addition to those specific to each academic unit. Please see the Academic Policies section of this catalog.

■ Computational Social Science

Phone: 703-993-9298  
Email: cssgrad@gmu.edu  
Web: www.css.gmu.edu

Computational Social Science is the interdisciplinary science of complex social systems and their investigation through computational models and related tools. The field is at the intersection of social science and computer science and spans anthropology, economics, political science, sociology, and social psychology—the classical social sciences—as well as allied disciplines such as geography, history, organization theory, regional science, communication, and linguistics. Computational approaches include agent-based social simulation models (multi-agent systems), social network analysis, mathematical analysis based on complexity theory, social geospatial modeling methods, and automated information and content analysis methods.

The department offers a PhD degree, sponsors the computational social science concentration in the Master of Arts in Interdisciplinary Studies (MAIS) program, and offers a graduate level certificate.

Master's Level Certificate(s)

Computational Social Science Graduate Certificate

Banner Code: KR-CERG-CSS

This 15-credit program is designed for students who seek training in computer simulation and related computational methods for analyzing social systems and processes. The program is open to all students with graduate standing at Mason and all students who hold a bachelor’s degree from an accredited university. The CSS certificate allows students with social science or computational backgrounds to acquire new knowledge and modeling skills to improve their qualifications and attractiveness to employers in government, academia, or industry. The core courses provide a common foundation; additional elective courses allow for a variety of student interests across diverse social domains.

Admission Requirements

Applicants should have an undergraduate degree from an accredited institution, with a GPA of at least 3.00. To apply, prospective students should forward a completed Mason graduate application, two copies of official transcripts from each college and graduate institution attended, and a current résumé to the CSS Academic Programs Office. TOEFL scores are required of all international applicants. Applicants should read the full description of university-wide graduate admissions requirements in the Admission section of this catalog, including information regarding admission of international students.

CSS Academic Programs Office  
Rm 382 Research Hall  
4400 University Drive, MS 6B2  
Fairfax, VA 22030

Students intending to obtain the CSS certificate must apply to the CSS certificate program before beginning any CSS course work intended to satisfy requirements. They must also have their course work plan approved by the director.

The graduate certificate in CSS may be pursued on a part-time or full-time basis.
Certificate Requirements

Two required core courses (6 credits)

- CSS 600 - Introduction to Computational Social Science Credits: 3
- CSS 610 - Computational Analysis of Social Complexity Credits: 3

Elective courses (minimum 9 credits)

An elective course may be any Mason master’s-level course in computational social science, social science, computer science, statistics, and other quantitative methods such as data visualization, information technology, and geographic information science. These courses should be selected in conjunction with, and approved by, the student’s advisor. CSS recommended courses include:

- CSS 605 - Object-Oriented Modeling in Social Science Credits: 3
- CSS 620 - Origins of Social Complexity Credits: 3
- CSS 692 - Social Network Analysis Credits: 3

Note: Students may include a maximum of 3 credits of programming courses to meet the elective requirements. Procedural, object-oriented languages, or other approved programming approaches may be used with permission of the director. Some courses on computational techniques, modeling, or statistics, such as visualization, graphics, and statistical and database packages may also be used to meet the requirements with prior approval of the director.

Total: 15 credits

Doctoral Degree(s)

Computational Social Science, PhD

Banner Code: KR-PHD-CSS

The core objective of the computational social science (CSS) PhD program is to train graduate students to be professional computational social scientists in academia, government, or business. The program offers a unique and innovative interdisciplinary academic environment for systematically exploring, discovering, and developing skills to successfully follow careers in one of the areas of computational social science.

For policies governing all graduate degrees, see the Academic Policies section of the catalog.

Admission Requirements
Applicants should have a bachelor’s degree in one of the social sciences; computer science, engineering, or a relevant discipline; and undergraduate courses in these and related areas. Bachelor’s degrees in the physical or biological sciences are also eligible, but applicants may be advised to take additional courses in social science or computer science as prerequisites to admission. Minimal requirements also include one undergraduate course in calculus and knowledge of a computer programming language, preferably object-based.

Applicants should have an undergraduate degree from an accredited institution, with a GPA of at least 3.25. To apply, prospective students should send to the CSS Academic Programs Office a completed Mason graduate application, two copies of official transcripts from each college and graduate institution attended, a current résumé, an expanded goals statement not to exceed 2,000 words, and the names of two Mason faculty members who may be suitable advisors. Applicants should also include three letters of recommendation from faculty members or individuals with direct knowledge of the student’s academic or professional capabilities. The letters must arrive directly from the senders. Applicants should also submit an official report of scores obtained on the GRE-GEN. TOEFL scores are required for all international applicants.

CSS Academic Programs Office
Rm 373 Research Hall
4400 University Drive, MS 6B2
Fairfax, VA 22030

Students should also review the university-wide graduate admissions standards and procedures discussed in the Admission section of this catalog.

**Reduction of Credit and Transfer of Credit**

Students entering the doctoral program with a master’s degree in a related discipline may request that the required credits for the doctoral degree be reduced by a maximum of 30 credits with approval of the director of graduate studies and dean and in accordance with university policy. Students who have prior graduate course work that has not been applied to another degree may request to have a maximum of 24 of these graduate credits transferred, with approval of the director of graduate studies and dean and in accord with university policy.

**Degree Requirements**

The program requires a total of 72 credits beyond the baccalaureate degree, with a minimum of 48 credits in course work, and 24 credits of dissertation research. The 72 credits have the functional distribution and learning objectives indicated below.

During the first year, each student will form a graduate studies committee, called the first-year committee, consisting of the student’s advisor plus two or three appropriately qualified individuals. The committee assists the student in designing a specific plan of study and evaluating the student’s progress by the end of the first year. During the second year, the student forms a doctoral committee, with membership approved by the CSS Program director. The committee will advise the student on preparing for the doctoral candidacy exams and preparing, developing, and defending the doctoral dissertation.

**12 credits of required core CSS courses:**

- CSS 600 - Introduction to Computational Social Science Credits: 3
- CSS 605 - Object-Oriented Modeling in Social Science Credits: 3
- CSS 610 - Computational Analysis of Social Complexity Credits: 3
- CSS 620 - Origins of Social Complexity Credits: 3

**6 credits of extended core CSS courses taken from the following:**
• CSS 625 - Complexity Theory in the Social Sciences Credits: 3
• CSS 645 - Spatial Agent-Based Models of Human-Environment Interactions Credits: 3
• CSS 692 - Social Network Analysis Credits: 3

15 credits of discipline-based courses

15 credits of discipline-based social science courses in a specific area such as anthropology, economics, geography, history, linguistics, political science, or sociology, as approved by the student’s advisor, to provide domain-specific knowledge.

15 credits of elective courses

15 credits of elective courses or independent research, as approved by the student’s advisor, to provide further substantive or methodological specialization as needed. (Students with a strong background in computing, for example, a prior MS in computer science, but weaker social science training will be required to use all or most of these electives in a substantive social science. Conversely, students with a strong background in social science, for example, a BS in economics, will be required to use most or all of these electives in computing courses.)

Candidacy Examination

The candidacy exam is taken after students have completed all core requirements and a majority of additional course work (18 plus 15 credits), which typically corresponds to the fifth semester in the program. The purpose of the candidacy exam is to assess the student’s substantive and methodological knowledge in CSS as a whole and in the chosen focus area; the ability to integrate materials from different courses; and the potential for a successful dissertation. The exam consists of written and oral parts.

Dissertation Proposal

Upon passing the Candidacy Examination each student shall prepare and within a year defend a Dissertation Proposal, written in the form of an extramural research grant proposal. The student shall develop the Dissertation Proposal in consultation with the Dissertation Committee. With successful defense of the proposal, a student becomes a Ph.D. candidate.

24 credits of dissertation research

24 credits of dissertation research to demonstrate doctoral level originality and research excellence taken from:

• CSS 998 - Doctoral Dissertation Proposal Credits: 1-12
• CSS 999 - Doctoral Dissertation Credits: 1-12

Example dissertation areas

Areas for dissertation research include, but are not limited to, the following:

• Agent-based computational economics: trade, finance, decision making under risk
• Computational political economy: voting, institutions, norms, inequality
• Computational linguistics: generative grammars, parsing, classifiers, inference
• Social network analysis: connectivity, structure, evolution of the Internet, social media, cyber warfare
• Computational anthropology: emergence of hierarchy, settlement patterns
• Computational political science: systems of government, conflict and war, cooperation
Doctoral Dissertation Defense

The PhD dissertation is the detailed written report of an original and significant research contribution to computational social science. It is defended before the Dissertation Committee in a forum open to fellow students and interested faculty and staff. The Dissertation Committee recommends that the graduate faculty of George Mason University accept the student candidate for the PhD degree upon a successful defense and completion of any final revisions.

Total: 72 credits

Molecular Neuroscience

Phone: 703-993-4333
Web: neuroscience.gmu.edu

The Krasnow Institute’s Department of Molecular Neuroscience, together with the College of Science (COS) and the College of Humanities and Social Sciences (CHSS), oversees the campus-wide Neuroscience Advisory Council in developing the Neuroscience PhD curriculum.

Neuroscience PhD courses are listed under NEUR in the Courses section of this catalog. Neuroscience PhD admissions and program requirements are listed under Neuroscience, PhD in the College of Science section of this catalog.
School for Conflict Analysis and Resolution

Phone: 703-993-1300  
Web: scar.gmu.edu  
College Code: CA

Administration

Andrea Bartoli, Dean  
Julie Shedd, Associate Dean for Administration  
Sandra Cheldelin, PHD Program Director  
Daniel Rothbart, MS Program Director  
Mara Schoeny, Graduate Certificate Program Director  
Solon Simmons, Undergraduate Program Director

Faculty

Professors: Avruch, Bartoli, Cheldelin, Cobb, Gopin, Hirsch, Jeong, Rothbart, Rubenstein, Sandole, Sluzki

Associate professors: Goodale, Korostelina, Lyons, Paczynska, Simmons

Assistant professors: Dwyer, Flores, Maulden, Nan, Romano, Schoeny

Research professors: Price, Sluzki

Emeritus faculty: Mitchell

Course Work

The School for Conflict Analysis and Resolution (S-CAR) offers all course work designated CONF in the Courses section of this catalog.

Undergraduate Programs

Phone: 703-993-4165  
E-mail: ugradcar@gmu.edu  
Location: Fairfax Campus

Solon Simmons, Undergraduate Program Director.

Conflict Analysis and Resolution (CAR) offers students a BA, a BS, or a minor in a growing interdisciplinary social science field with practical applications. Conflict analysis and resolution is committed to analyzing the sources and dynamics of conflict and the means for resolution toward lasting peace. All CAR students take a series of core courses that provide a background in conflict theory, analysis, and conflict resolution skills. Required bridge courses cover conflict analysis and resolution at three levels: interpersonal conflict, community and organizational conflict, and international conflict. After selecting a level of conflict...
as a concentration, students choose courses from units throughout the university that relate to the concentration and their areas of interest, such as anthropology, communication, government, philosophy, psychology, management, sociology, and New Century College. The major also requires 3 credits of field experience in the form of an internship, a service-learning opportunity, or study abroad.

Graduate Programs

Phone: 703-993-1300
E-mail: scarinfo@gmu.edu
Location: Arlington Campus

PhD Program

Sandra Cheldelin, PHD Program Director

The PhD program in Conflict Analysis and Resolution, the first of its kind in the United States, provides advanced study for students in the fields of conflict and conflict resolution. Students are prepared for careers as researchers, theoreticians, and teachers in higher education, and as policy administrators, analysts, and consultants in the public and the private sectors. The program stresses a close link between knowledge of theory and process in the resolution of conflict. For this, training in the methods of research and analysis is emphasized. In addition, students are expected to obtain a background in a substantive area of conflict, usually related to the topic of the dissertation.

MS Program

Daniel Rothbart, MS Program Director

The MS in Conflict Analysis and Resolution is a professional program that prepares students for practice and further academic work by integrating conflict analysis and resolution theory, research, and practical techniques. Participants study the theory, methods, and ethical perspectives of the field, and apply this knowledge in laboratory simulations and workshops, internships, and field practice. Graduates work in a variety of settings where conflict resolution is useful and interest groups are in conflict with current and emergent public policy. Examples are businesses, unions, government agencies, religious groups, court systems, educational institutions, community centers, international relief and development organizations, and consulting firms.

Graduate Certificates

Phone: 703-993-1300
E-mail: icarcert@gmu.edu
Location: Arlington Campus

Mara Schoeny, Certificate Program Director

Five graduate certificate programs are administered by S-CAR. Each of these one-year, 15-credit programs is specifically tailored to provide students with practical knowledge of conflict analysis and resolution relevant to their focused areas of work. Designed for mid-career professionals studying in a cohort environment, the certificate programs integrate conflict analysis and resolution theory, research, and practical technique. These programs use intensive course sessions, lecture, seminar, and applied mentored learning in real and simulated situations to prepare students to use conflict analysis and resolution approaches in their work in a variety of fields.

Academic Policies
Students should become familiar with the university's general academic policies in addition to those specific to each academic unit. Please see the Academic Policies section of this catalog.

Transfer Students

Admitted and enrolled transfer students who have completed an AA, AS, or AA&S degree from the Virginia Community College System (VCCS) and have been offered admission to Mason by the Office of Admissions may be eligible for a waiver of all George Mason University's lower level general education requirements in accordance with the Guaranteed Admission Agreement. Students eligible for this waiver are still required by the university to complete ENGH 302 - Advanced Composition and a synthesis course.

Transfer students who have been offered admission under the terms of the Guaranteed Admission Agreement and are pursuing a BA are considered to have met all school requirements except for proficiency in a foreign language. Transfer students who have been offered admission under the terms of the Guaranteed Admission Agreement and are pursuing a BS are considered to have met the school requirement of Non-Western Culture; the additional requirements for the BS will be met only if the student transfers in a direct equivalent course.

Students with a bachelor's degree from an accredited institution who are pursuing a BA in this school are considered to have met all school requirements except for proficiency in a foreign language. Students with a bachelor's degree from an accredited institution who are pursuing a BS in this school are considered to have met the school requirement of Non-Western Culture; the additional requirements for the BS will be met only if the student transfers in a direct equivalent course.

Appeal of Decisions

The policies of the School for Conflict Analysis and Resolution are designed to be consistent, equitable, and transparent. Our office strives to be thorough, timely, and open to answer any questions students may have regarding our decisions and/or the process through which they were reached. Students seeking clarification and explanation of the decision should request an appointment with the S-CAR Program Director to discuss their concerns.

Students have the right to appeal decisions regarding requests for academic actions. This step can only be taken after a request to meet with the Program Director. Students who wish to pursue an appeal after this meeting should do so only if they can provide sufficient and compelling reasons for their initial claim to be reconsidered. Such reasons include newly available documentation, proof of an irregularity in procedures, proof of inequity or inconsistency, or consequences so serious that further review is warranted. A student's dissatisfaction or disagreement with the decision does not constitute sufficient reason for a decision to be changed. Appeals are first reviewed by the Program Director. If denied, the appeal is forwarded to the S-CAR Dean. The decision of the S-CAR Dean is the final decision of the School.

If the appeal is a case involving a school-level policy, the Dean serves as the final point of appeal. If the appeal involves university level policies, students must first complete the school-level appeal process before appealing to the Provost's Office.

Bachelor of Arts

Conflict Analysis and Resolution, BA

Banner Code: CA-BA-CONF

Students must fulfill all requirements for bachelor's degrees as stated in Academic Policies including all University General Education requirements. Students majoring in S-CAR must also complete the college-level requirements for philosophy or religious studies, foreign language proficiency, social sciences, and non-Western culture as well as 42 major requirement credits for the BA degree.
Students pursuing a double major/degree with a program outside of the S-CAR undergraduate program will be expected to fulfill all of the university general education and college requirements necessary to complete the second major. Please check with the second major department concerning additional requirements.

This undergraduate program offers students the option of applying to the accelerated master's degree program. See Conflict Analysis and Resolution, BA or BS/Conflict Analysis and Resolution, Accelerated MS for specific requirements.

**Writing-Intensive Requirement**

All Mason students are required to complete at least one course designated as “writing intensive” in their major at the 300-level or above. CONF 302 has been designated “writing intensive.”

**Advising**

S-CAR advisors help students create interdisciplinary programs that meet their interests and career goals. All majors and minors are strongly encouraged to meet regularly with an S-CAR academic advisor who will help students develop and follow a coherent plan of study and complete the degree in a timely manner.

**Physical Education Courses**

PHED courses offered by the School of Recreation, Health, and Tourism that are activity courses cannot be counted toward credits required for a degree in S-CAR. Students may use nonactivity PHED courses for elective credit for S-CAR degrees.

**Degree Requirements**

**Required core courses (18 credits)**

- CONF 101 - Conflict and Our World Credits: 3
- CONF 210 - Theories of Conflict Analysis and Resolution Credits: 3
- CONF 300 - Conflict Resolution Techniques and Practice Credits: 3
- CONF 301 - Research and Inquiry in Conflict Resolution Credits: 3
- CONF 302 - Culture, Identity, and Conflict Credits: 3
- CONF 490 - Integration Credits: 3

**Required bridge courses (9 credits)**

- CONF 320 - Interpersonal Conflict Analysis and Resolution Credits: 3
- CONF 330 - Community, Group, and Organizational Conflict Analysis and Resolution Credits: 3
- CONF 340 - Global Conflict Analysis and Resolution Credits: 3

**Field experience (3 credits)**

Students can choose to fulfill this requirement through an internship, service learning, or study abroad. Please contact an S-CAR advisor for information on the opportunities/procedures for field experience credit. Students interested in study abroad should consult the Center for Global Education. More information can be found at globaled.gmu.edu. Prior approval by the major advisor is required for all field experience options. Other options may be available. Please check with the S-CAR advising office with questions.
Internship/Service Learning

- CONF 370 - Internship Field Experience Credits: 1-9
- CONF 375 - Special Programs Field Experience Credits: 1-6

Study Abroad

- CONF 385 - International Field Experience Credits: 3

Concentration courses (12 credits):

Students choose courses from one of three levels of conflict: interpersonal (micro level), community and organizational (mezzo level), and international (macro level). Students should choose classes that pertain to their concentration and are listed as approved. Students are encouraged to check special topics courses each semester and think creatively about the applicability of courses that support learning in their chosen concentration. Independent study approved by the advisor is also an option. The S-CAR director will consider student requests for approval of courses not listed below.

▲ Concentration in Community and Organizational Conflict (MEZZ)

Students choose four courses from the following areas:

- ANTH 301 - Native North Americans Credits: 3
- ANTH 310 - Social Organization and Kinship Credits: 3
- ANTH 340 - Comparative Perspectives on Immigration Credits: 3
- ANTH 365 - Race and Racism Credits: 3
- ANTH 488 - Gender, Sexuality, and Culture Credits: 3
- COMM 305 - Foundations of Intercultural Communication Credits: 3
- COMM 326 - Rhetoric of Social Movements and Political Controversy Credits: 3
- COMM 335 - Organizational Communication Credits: 3
- COMM 350 - Mass Communication and Public Policy Credits: 3
- COMM 432 - Political Communication Credits: 3
- COMM 434 - Interviewing Credits: 3
- CONF 310 - Special Topics in Research Credits: 1-6
- CONF 315 - Discovering Organizations and Actors in the Conflict Field Credits: 3
- CONF 325 - Dialogue and Difference Credits: 3
- CONF 345 - Social Dynamics of Terrorism, Security, and Justice Credits: 3
- CONF 393 - Philosophy, Conflict Theory, and Violence Credits: 3
- CONF 397 - Study Abroad Special Topics Credits: 1-9
- CONF 398 - Special Topics in Advanced Techniques and Practices Credits: 3
- CONF 399 - Special Topics in Conflict Analysis and Resolution Credits: 3
- CRIM 302 - Delinquency Credits: 3
- CRIM 306 - Criminal Justice Ethics Credits: 3
- CRIM 406 - Family Law and the Justice System Credits: 3
- CRIM 407 - Advanced Topics in Law and Society Credits: 3
- CRIM 423 - Constitutional Law: Civil Rights and Liberties Credits: 3
- ECON 309 - Economic Problems and Public Policies Credits: 3
- ECON 320 - Labor Problems Credits: 3
• GGS 306 - Urban Geography Credits: 3
• GOVT 301 - Public Law and the Judicial Process Credits: 3
• GOVT 309 - Government and Politics of Metropolitan Areas Credits: 3
• GOVT 337 - Ethnic Politics in Western Europe and North America Credits: 3
• GOVT 355 - Public Personnel Administration Credits: 3
• GOVT 365 - State and Regional Public Policy Credits: 3
• GOVT 414 - Politics of Race and Gender Credits: 3
• GOVT 460 - Surveillance and Privacy in Contemporary Society Credits: 3
• HIST 350 - U.S. Women's History Credits: 3
• MSOM 301 - Managing People and Organizations Credits: 3
• NCLC 304 - Social Movements and Community Activism Credits: 4
• NCLC 310 - Violence and Gender Credits: 3-6
• NCLC 314 - Conflict, Trauma and Healing Credits: 6
• NCLC 320 - Construction of Differences: Race, Class, and Gender Credits: 6
• NCLC 334 - Environmental Justice Credits: 4
• NCLC 335 - Ethics, Communication, and Freedom Credits: 3-6
• NCLC 346 - Art as Social Action Credits: 4
• NCLC 361 - Neighborhood, Community, and Identity Credits: 3-6
• NCLC 378 - Medicine, Justice, and Public Policy Credits: 3
• NCLC 381 - When Cultural Worlds Collide Credits: 6
• NCLC 435 - Leadership in a Changing Environment Credits: 4
• PHIL 309 - Bioethics Credits: 3
• PHIL 343 - Topics in Environmental Philosophy Credits: 3
• PHIL 355 - Theories of Ethics Credits: 3
• PROV 342 - The George Mason Debates in Current Affairs Credits: 3
• PSYC 231 - Social Psychology Credits: 3
• PSYC 327 - Psychology in the Community Credits: 3
• PSYC 333 - Industrial and Organizational Psychology Credits: 3
• RELI 359 - Muslims in the United States Credits: 3
• RELI 360 - Religion and Politics Credits: 3
• SOCI 300 - Social Control and Freedom Credits: 3
• SOCI 301 - Criminology Credits: 3
• SOCI 302 - Sociology of Delinquency Credits: 3
• SOCI 307 - Social Movements and Political Protest Credits: 3
• SOCI 308 - Race and Ethnicity in a Changing World Credits: 3
• SOCI 315 - Women and Men in Society Credits: 3
• SOCI 326 - Armed Conflict and Conflict Resolution Credits: 3
• SOCI 332 - The Urban World Credits: 3
• SOCI 340 - Power, Politics, and Society Credits: 3
• SOCI 352 - Social Problems Credits: 3
• SOCI 355 - Social Inequality Credits: 3
• SOCI 360 - Youth Culture and Society Credits: 3
• SOCI 373 - The Community Credits: 3
• SOCI 382 - Education in Contemporary Society Credits: 3
• SOCI 385 - Sociology of Religion Credits: 3
• SOCI 421 - Field Work in Social Change Credits: 3
• SOCI 492 - Sociology of Organizations Credits: 3
• SOCW 340 - Human Behavior within Macro Systems Credits: 3
• SOCW 351 - Social Policy and Social Justice Credits: 3
• SOCW 415 - Child and Family Welfare Credits: 3
• SOCW 425 - Planning and Organizing for Community Change Credits: 3
• WMST 301 - Sex and Gender in Contemporary Society Credits: 3
• WMST 302 - Cultural Constructions of Sexualities Credits: 3

▲ Concentration in International Conflict (MACR)

Students choose four courses from:

• ANTH 302 - Peoples and Cultures of Latin America Credits: 3
• ANTH 308 - Peoples and Cultures of the Middle East Credits: 3
• ANTH 309 - Peoples and Cultures of India Credits: 3
• ANTH 312 - Political Anthropology Credits: 3
• ANTH 324 - Warfare, Violence, and Sacrifice in Antiquity Credits: 3
• ANTH 331 - Refugees Credits: 3
• ANTH 332 - Cross-Cultural Perspectives on Globalization Credits: 3
• ANTH 365 - Race and Racism Credits: 3
• ANTH 370 - Environment and Culture Credits: 3
• ANTH 385 - Gender, Class, and Ethnicity in Latin America Credits: 3
• BIOL 301 - Biology and Society Credits: 3
• COMM 305 - Foundations of Intercultural Communication Credits: 3
• CONF 310 - Special Topics in Research Credits: 1-6
• CONF 315 - Discovering Organizations and Actors in the Conflict Field Credits: 3
• CONF 345 - Social Dynamics of Terrorism, Security, and Justice Credits: 3
• CONF 393 - Philosophy, Conflict Theory, and Violence Credits: 3
• CONF 394 - Human Rights and Inequality Credits: 3
• CONF 397 - Study Abroad Special Topics Credits: 1-9
• CONF 398 - Special Topics in Advanced Techniques and Practices Credits: 3
• CRIM 308 - Human Rights and Justice Credits: 3
• CRIM 405 - Law and Justice around the World Credits: 3
• CRIM 475 - Theory and Politics of Terrorism Credits: 3
• CULT 320 - Globalization and Culture Credits: 3
• ECON 360 - Economics of Developing Areas Credits: 3
• ECON 361 - Economic Development of Latin America Credits: 3
• ECON 362 - African Economic Development Credits: 3
• ECON 385 - International Economic Policy Credits: 3
• ECON 390 - International Economics Credits: 3
• EVPP 337 - Environmental Policy Making in Developing Countries Credits: 3
• GGS 301 - Political Geography Credits: 3
• GGS 303 - Conservation of Resources and Environment Credits: 3
• GGS 304 - Populations Dimensions of Global Change Credits: 3
• GGS 305 - Economic Geography Credits: 3
• GGS 316 - Geography of Latin America Credits: 3
• GGS 325 - Geography of North Africa and the Middle East Credits: 3
• GOVT 322 - International Relations Theory Credits: 3

- PHIL 309 - Bioethics Credits: 3
- PHIL 355 - Theories of Ethics Credits: 3
- PSYC 231 - Social Psychology Credits: 3
- PSYC 313 - Child Development Credits: 3
- PSYC 314 - Adolescent Development Credits: 3
- PSYC 321 - Counseling Psychology Credits: 3
- PSYC 324 - Personality Theory Credits: 3
- PSYC 379 - Applied Cross-Cultural Psychology Credits: 3
- PSYC 466 - Psychology of Intimate Relationships Credits: 3
- PSYC 467 - The Psychology of Working in Groups and Teams Credits: 3
- RELI 360 - Religion and Politics Credits: 3
- SOCI 300 - Social Control and Freedom Credits: 3
- SOCI 302 - Sociology of Delinquency Credits: 3
• SOCI 309 - Marriage, Families, and Intimate Life Credits: 3
• SOCW 301 - Laboratory in Interpersonal Communication Credits: 4
• SOCW 323 - Human Behavior and the Life Course Credits: 3
• WMST 301 - Sex and Gender in Contemporary Society Credits: 3

▲ Individualized Concentration (IND)

Students interested in creating their own concentration can work with an advisor to decide upon a curriculum that will fulfill the requirements of the BA in Conflict Analysis and Resolution.

Additional Courses in Practice

Students may choose to take additional practice courses from the following:

• CONF 331 - Simulation in Community and Organizational Conflict Resolution Credits: 1
• CONF 341 - Global Conflict Resolution Practice Credits: 1

Total: 120 credits

Bachelor of Science

Conflict Analysis and Resolution, BS

Banner Code: CA-BS-CONF

Students must fulfill all requirements for bachelor's degrees including University General Education requirements and the Non-Western Culture requirement. S-CAR majors must also complete 54 major requirement credits for the BS degree.

Students pursuing a double major/degree with a program outside of the S-CAR undergraduate program will be expected to fulfill all of the university general education and college requirements necessary to complete the second major. Please check with the second major department concerning additional requirements.

This undergraduate program offers students the option of applying to the accelerated master's degree program. See Conflict Analysis and Resolution, BA or BS/Conflict Analysis and Resolution, Accelerated MS for specific requirements.

Writing-Intensive Requirement

All Mason students are required to complete at least one course designated as “writing intensive” in their major at the 300-level or above. CONF 302 has been designated “writing intensive.”

Advising

S-CAR advisors help students create interdisciplinary programs that meet their interests and career goals. All majors and minors are strongly encouraged to meet regularly with an S-CAR academic advisor who will help students develop and follow a coherent plan of study and complete the degree in a timely manner.

Physical Education Courses
PHED courses offered by the School of Recreation, Health, and Tourism that are activity courses cannot be counted toward credits required for a degree in S-CAR. Students may use nonactivity PHED courses for elective credit for S-CAR degrees.

Degree Requirements

Required core courses (18 credits)

- CONF 101 - Conflict and Our World Credits: 3
- CONF 210 - Theories of Conflict Analysis and Resolution Credits: 3
- CONF 300 - Conflict Resolution Techniques and Practice Credits: 3
- CONF 301 - Research and Inquiry in Conflict Resolution Credits: 3
- CONF 302 - Culture, Identity, and Conflict Credits: 3
- CONF 490 - Integration Credits: 3

Required bridge courses (9 credits)

- CONF 320 - Interpersonal Conflict Analysis and Resolution Credits: 3
- CONF 330 - Community, Group, and Organizational Conflict Analysis and Resolution Credits: 3
- CONF 340 - Global Conflict Analysis and Resolution Credits: 3

Research methods (6 credits)

- STAT 250 - Introductory Statistics I Credits: 3

Choose an additional course (minimum 3 credits) from the following:

- ANTH 380 - Language and Culture Credits: 3
- ANTH 450 - Qualitative Methods: Nonstatistical Approaches in Culture and Social Research Credits: 3
- CRIM 315 - Research Methods and Analysis in Criminology Credits: 3
- ENGH 318 - Introduction to Cultural Studies Credits: 3
- GOVT 300 - Research Methods and Analysis Credits: 4
- GOVT 366 - Public Policy Analysis Credits: 3
- HIST 300 - Introduction to Historical Method Credits: 3
- HIST 390 - The Digital Past Credits: 3
- PHIL 357 - Philosophy of the Social Sciences Credits: 3
- SOCI 599 - Issues in Sociology Credits: 1-3
- PSYC 300 - Statistics in Psychology Credits: 4
- PSYC 301 - Research Methods in Psychology Credits: 3
- SOCI 303 - Sociological Research Methodology Credits: 4
- SOCI 313 - Statistics for the Behavioral Sciences Credits: 4
- SOCI 410 - Social Surveys and Attitude and Opinion Measurements Credits: 3
- STAT 362 - Introduction to Computer Statistical Packages Credits: 3
- STAT 474 - Introduction to Survey Sampling Credits: 3

Field experience (3 credits)

Students can choose to fulfill this requirement through an internship, service learning, or study abroad. Please contact an S-CAR advisor for information on the opportunities/procedures for field experience credit. Students interested in study abroad should register through the Center for Global Education. More information can be found at globaled.gmu.edu. Prior approval by
the major advisor is required for all field experience options. Other options may be available. Please check with S-CAR advising office with questions.

Internship/Service Learning

- CONF 370 - Internship Field Experience Credits: 1-9
- CONF 375 - Special Programs Field Experience Credits: 1-6

Study Abroad

- CONF 385 - International Field Experience Credits: 3

Concentration courses (12 credits)

Students choose courses from one of three levels of conflict: interpersonal (micro level), community and organizational (mezzo level), and international (macro level). Students should choose classes that pertain to their concentration and are listed as approved. Students are encouraged to check special topics courses each semester and think creatively about the applicability of courses that support learning in their chosen concentration. Independent study approved by the advisor is also an option. The S-CAR director will consider student requests for approval of courses not listed below.

▲ Concentration in Community and Organizational Conflict (MEZZ)

Students choose four courses from:

- ANTH 301 - Native North Americans Credits: 3
- ANTH 310 - Social Organization and Kinship Credits: 3
- ANTH 340 - Comparative Perspectives on Immigration Credits: 3
- ANTH 365 - Race and Racism Credits: 3
- ANTH 488 - Gender, Sexuality, and Culture Credits: 3
- COMM 305 - Foundations of Intercultural Communication Credits: 3
- COMM 326 - Rhetoric of Social Movements and Political Controversy Credits: 3
- COMM 335 - Organizational Communication Credits: 3
- COMM 350 - Mass Communication and Public Policy Credits: 3
- COMM 432 - Political Communication Credits: 3
- COMM 434 - Interviewing Credits: 3
- CONF 310 - Special Topics in Research Credits: 1-6
- CONF 315 - Discovering Organizations and Actors in the Conflict Field Credits: 3
- CONF 325 - Dialogue and Difference Credits: 3
- CONF 345 - Social Dynamics of Terrorism, Security, and Justice Credits: 3
- CONF 393 - Philosophy, Conflict Theory, and Violence Credits: 3
- CONF 397 - Study Abroad Special Topics Credits: 1-9
- CONF 398 - Special Topics in Advanced Techniques and Practices Credits: 3
- CONF 399 - Special Topics in Conflict Analysis and Resolution Credits: 3
- CRIM 302 - Delinquency Credits: 3
- CRIM 306 - Criminal Justice Ethics Credits: 3
- CRIM 406 - Family Law and the Justice System Credits: 3
- CRIM 407 - Advanced Topics in Law and Society Credits: 3
- CRIM 423 - Constitutional Law: Civil Rights and Liberties Credits: 3
• ECON 309 - Economic Problems and Public Policies Credits: 3
• ECON 320 - Labor Problems Credits: 3
• GGS 306 - Urban Geography Credits: 3
• GOVT 301 - Public Law and the Judicial Process Credits: 3
• GOVT 309 - Government and Politics of Metropolitan Areas Credits: 3
• GOVT 337 - Ethnic Politics in Western Europe and North America Credits: 3
• GOVT 355 - Public Personnel Administration Credits: 3
• GOVT 365 - State and Regional Public Policy Credits: 3
• GOVT 414 - Politics of Race and Gender Credits: 3
• GOVT 460 - Surveillance and Privacy in Contemporary Society Credits: 3
• HIST 350 - U.S. Women's History Credits: 3
• MSOM 301 - Managing People and Organizations Credits: 3
• NCLC 304 - Social Movements and Community Activism Credits: 4
• NCLC 310 - Violence and Gender Credits: 3-6
• NCLC 314 - Conflict, Trauma and Healing Credits: 6
• NCLC 320 - Construction of Differences: Race, Class, and Gender Credits: 6
• NCLC 334 - Environmental Justice Credits: 4
• NCLC 335 - Ethics, Communication, and Freedom Credits: 3-6
• NCLC 346 - Art as Social Action Credits: 4
• NCLC 361 - Neighborhood, Community, and Identity Credits: 3-6
• NCLC 378 - Medicine, Justice, and Public Policy Credits: 3
• NCLC 381 - When Cultural Worlds Collide Credits: 6
• NCLC 435 - Leadership in a Changing Environment Credits: 4
• PHIL 309 - Bioethics Credits: 3
• PHIL 343 - Topics in Environmental Philosophy Credits: 3
• PHIL 355 - Theories of Ethics Credits: 3
• PROV 342 - The George Mason Debates in Current Affairs Credits: 3
• PSYC 231 - Social Psychology Credits: 3
• PSYC 327 - Psychology in the Community Credits: 3
• PSYC 333 - Industrial and Organizational Psychology Credits: 3
• RELI 359 - Muslims in the United States Credits: 3
• RELI 360 - Religion and Politics Credits: 3
• SOCI 300 - Social Control and Freedom Credits: 3
• SOCI 301 - Criminology Credits: 3
• SOCI 302 - Sociology of Delinquency Credits: 3
• SOCI 307 - Social Movements and Political Protest Credits: 3
• SOCI 308 - Race and Ethnicity in a Changing World Credits: 3
• SOCI 315 - Women and Men in Society Credits: 3
• SOCI 326 - Armed Conflict and Conflict Resolution Credits: 3
• SOCI 332 - The Urban World Credits: 3
• SOCI 340 - Power, Politics, and Society Credits: 3
• SOCI 352 - Social Problems Credits: 3
• SOCI 355 - Social Inequality Credits: 3
• SOCI 373 - The Community Credits: 3
• SOCI 382 - Education in Contemporary Society Credits: 3
• SOCI 385 - Sociology of Religion Credits: 3
• SOCI 421 - Field Work in Social Change Credits: 3
- SOCI 492 - Sociology of Organizations Credits: 3
- SOCW 340 - Human Behavior within Macro Systems Credits: 3
- SOCW 351 - Social Policy and Social Justice Credits: 3
- SOCW 415 - Child and Family Welfare Credits: 3
- SOCW 425 - Planning and Organizing for Community Change Credits: 3
- WMST 301 - Sex and Gender in Contemporary Society Credits: 3
- WMST 302 - Cultural Constructions of Sexualities Credits: 3

▲ Concentration in International Conflict (MACR)

Students choose four courses from:

- ANTH 302 - Peoples and Cultures of Latin America Credits: 3
- ANTH 308 - Peoples and Cultures of the Middle East Credits: 3
- ANTH 309 - Peoples and Cultures of India Credits: 3
- ANTH 312 - Political Anthropology Credits: 3
- ANTH 324 - Warfare, Violence, and Sacrifice in Antiquity Credits: 3
- ANTH 331 - Refugees Credits: 3
- ANTH 332 - Cross-Cultural Perspectives on Globalization Credits: 3
- ANTH 365 - Race and Racism Credits: 3
- ANTH 370 - Environment and Culture Credits: 3
- ANTH 385 - Gender, Class, and Ethnicity in Latin America Credits: 3
- BIOL 301 - Biology and Society Credits: 3
- COMM 305 - Foundations of Intercultural Communication Credits: 3
- CONF 310 - Special Topics in Research Credits: 1-6
- CONF 315 - Discovering Organizations and Actors in the Conflict Field Credits: 3
- CONF 345 - Social Dynamics of Terrorism, Security, and Justice Credits: 3
- CONF 393 - Philosophy, Conflict Theory, and Violence Credits: 3
- CONF 394 - Human Rights and Inequality Credits: 3
- CONF 397 - Study Abroad Special Topics Credits: 1-9
- CONF 398 - Special Topics in Advanced Techniques and Practices Credits: 3
- CONF 399 - Special Topics in Conflict Analysis and Resolution Credits: 3
- CRIM 308 - Human Rights and Justice Credits: 3
- CRIM 405 - Law and Justice around the World Credits: 3
- CRIM 475 - Theory and Politics of Terrorism Credits: 3
- CULT 320 - Globalization and Culture Credits: 3
- ECON 360 - Economics of Developing Areas Credits: 3
- ECON 361 - Economic Development of Latin America Credits: 3
- ECON 362 - African Economic Development Credits: 3
- ECON 385 - International Economic Policy Credits: 3
- ECON 390 - International Economics Credits: 3
- EVPP 337 - Environmental Policy Making in Developing Countries Credits: 3
- GGS 301 - Political Geography Credits: 3
- GGS 303 - Conservation of Resources and Environment Credits: 3
- GGS 304 - Populations Dimensions of Global Change Credits: 3
- GGS 305 - Economic Geography Credits: 3
- GGS 316 - Geography of Latin America Credits: 3
- GGS 325 - Geography of North Africa and the Middle East Credits: 3
• GOVT 322 - International Relations Theory Credits: 3
• GOVT 331 - Government and Politics of Latin America Credits: 3
• GOVT 332 - Government and Politics of the Middle East and North Africa Credits: 3
• GOVT 333 - Government and Politics of Asia Credits: 3
• GOVT 334 - Government and Politics of Europe Credits: 3
• GOVT 336 - Political Development and Change Credits: 3
• GOVT 337 - Ethnic Politics in Western Europe and North America Credits: 3
• GOVT 338 - Government and Politics of Russia Credits: 3
• GOVT 340 - Central Asian Politics Credits: 3
• GOVT 342 - Diplomacy Credits: 3
• GOVT 343 - International Political Economy Credits: 3
• GOVT 344 - American Foreign Policy Credits: 3
• GOVT 345 - Political Islam Credits: 3
• GOVT 421 - Contemporary Political Ideologies Credits: 3
• GOVT 432 - Political Change and Social Development in Sub-Saharan Africa Credits: 3
• GOVT 443 - Law and Ethics of War Credits: 3
• GOVT 446 - International Law and Organization Credits: 3
• GOVT 447 - Revolution and International Politics Credits: 3
• GOVT 448 - Ethics and International Politics Credits: 3
• HIST 353 - History of Traditional China Credits: 3
• HIST 354 - Modern China Credits: 3
• HIST 356 - Modern Japan Credits: 3
• HIST 360 - History of South Africa Credits: 3
• HIST 364 - Revolution and Radical Politics in Latin America Credits: 3
• HIST 366 - Comparative Slavery Credits: 3
• HIST 370 - War and American Society Credits: 3
• HIST 460 - Modern Iran Credits: 3
• HIST 461 - Arab-Israeli Conflict Credits: 3
• HIST 462 - Women in Islamic Society Credits: 3
• HIST 466 - Origins of Conflict in Southern Africa Credits: 3
• MSOM 305 - Managing in a Global Economy Credits: 3
• NCLC 314 - Conflict, Trauma and Healing Credits: 6
• NCLC 334 - Environmental Justice Credits: 4
• NCLC 381 - When Cultural Worlds Collide Credits: 6
• NCLC 416 - Refugee and Internal Displacement Credits: 3
• NCLC 423 - Management in the Global Marketplace Credits: 6
• PHIL 327 - Contemporary Western Political Theory Credits: 3
• PHIL 355 - Theories of Ethics Credits: 3
• RELI 360 - Religion and Politics Credits: 3
• RELI 405 - Religion, Values, and Globalization Credits: 3
• RELI 407 - Women in the World's Religions Credits: 3
• RELI 490 - Comparative Study of Religions Credits: 3
• SOCI 307 - Social Movements and Political Protest Credits: 3
• SOCI 320 - Social Structure and Globalization Credits: 3
• SOCI 326 - Armed Conflict and Conflict Resolution Credits: 3
• SOCI 340 - Power, Politics, and Society Credits: 3
• SOCI 385 - Sociology of Religion Credits: 3
▲ Concentration in Interpersonal Conflict (MICR)

Students choose four courses from:

- ANTH 315 - Socialization Processes: Family, Childhood, Personality in Cross-Cultural Perspective Credits: 3
- ANTH 365 - Race and Racism Credits: 3
- ANTH 371 - Psychological Anthropology Credits: 3
- COMM 301 - Foundations of Interpersonal Communication Credits: 3
- COMM 305 - Foundations of Intercultural Communication Credits: 3
- COMM 401 - Interpersonal Communication in the Workplace Credits: 3
- COMM 434 - Interviewing Credits: 3
- COMM 465 - Topics in Communication and Gender Credits: 3
- CONF 310 - Special Topics in Research Credits: 1-6
- CONF 315 - Discovering Organizations and Actors in the Conflict Field Credits: 3
- CONF 325 - Dialogue and Difference Credits: 3
- CONF 393 - Philosophy, Conflict Theory, and Violence Credits: 3
- CONF 397 - Study Abroad Special Topics Credits: 1-9
- CONF 398 - Special Topics in Advanced Techniques and Practices Credits: 3
- CONF 399 - Special Topics in Conflict Analysis and Resolution Credits: 3
- CRIM 302 - Delinquency Credits: 3
- CRIM 307 - Social Inequality, Crime, and Justice Credits: 3
- CRIM 404 - Crime Victims and Victimization Credits: 3
- CRIM 406 - Family Law and the Justice System Credits: 3
- FRLN 380 - Topics in the Sociopolitics of Language Credits: 3
- FRLN 385 - Multilingualism, Identity, and Power Credits: 3
- GOVT 355 - Public Personnel Administration Credits: 3
- NCLC 305 - Conflict Resolution and Transformation Credits: 6
- NCLC 310 - Violence and Gender Credits: 3-6
- NCLC 314 - Conflict, Trauma and Healing Credits: 6
- NCLC 315 - Spirituality and Conflict Transformation Credits: 6
- NCLC 317 - Issues in Family Relationships Credits: 4
- NCLC 320 - Construction of Differences: Race, Class, and Gender Credits: 6
- NCLC 331 - The Nonprofit Sector Credits: 4
- NCLC 334 - Environmental Justice Credits: 4
- NCLC 335 - Ethics, Communication, and Freedom Credits: 3-6
- PHIL 309 - Bioethics Credits: 3
- PHIL 355 - Theories of Ethics Credits: 3
- PSYC 231 - Social Psychology Credits: 3
- PSYC 313 - Child Development Credits: 3
- PSYC 314 - Adolescent Development Credits: 3
- PSYC 321 - Counseling Psychology Credits: 3
- PSYC 324 - Personality Theory Credits: 3
- PSYC 379 - Applied Cross-Cultural Psychology Credits: 3
- PSYC 466 - Psychology of Intimate Relationships Credits: 3
- PSYC 467 - The Psychology of Working in Groups and Teams Credits: 3
- RELI 360 - Religion and Politics Credits: 3
- SOCI 300 - Social Control and Freedom Credits: 3
- SOCI 302 - Sociology of Delinquency Credits: 3
• SOCI 309 - Marriage, Families, and Intimate Life Credits: 3
• SOCW 301 - Laboratory in Interpersonal Communication Credits: 4
• SOCW 323 - Human Behavior and the Life Course Credits: 3
• WMST 301 - Sex and Gender in Contemporary Society Credits: 3

▲Individualized Concentration (IND)

Students interested in creating their own concentration can work with an advisor to decide upon a curriculum that will fulfill the requirements of the BS in Conflict Analysis and Resolution.

Major electives (6 credits)

Elective courses can be chosen from the approved concentration course list at any level but may not count for both concentration and elective credit. Independent study approved by the advisor is also an option.

Additional Courses in Practice

Students may choose to take additional practice courses from the following:

• CONF 331 - Simulation in Community and Organizational Conflict Resolution Credits: 1
• CONF 341 - Global Conflict Resolution Practice Credits: 1

Total: 120 credits

Bachelor/Accelerated Master's

Conflict Analysis and Resolution, BA or BS/Conflict Analysis and Resolution, Accelerated MS

Web: scar.gmu.edu

Highly qualified undergraduates with the major of Conflict Analysis and Resolution may apply to the accelerated master's degree program in Conflict Analysis and Resolution. If accepted, students will be able to earn an undergraduate and the Conflict Analysis and Resolution, MS after satisfactory completion of 155 credits, sometimes within five years.

This program of study is offered by the School for Conflict Analysis and Resolution.

For policies governing all graduate degrees, see the Academic Policies section of the catalog.

Application Requirements

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in the Admission section of this catalog. For information specific to the accelerated MS in Conflict Analysis and Resolution, see Application Requirements and Deadlines on the departmental web site.

Degree Requirements
While undergraduate students, accelerated master's students complete the two graduate courses indicated on their Accelerated Master's Program Application with a minimum grade of B in each course. They must maintain a minimum GPA of 3.00 in all coursework and in coursework applied to their major. At the beginning of the last semester of undergraduate study, the Bachelor's/Accelerated Master's Transition Form must be submitted to the Office of the University Registrar. Upon completion and conferral of the undergraduate degree they are admitted to graduate status.

As graduate students, accelerated master's students have an advanced standing. They must meet all master's degree requirements except for the two courses they completed as undergraduates. Students must begin their master's program the semester immediately following conferral of the undergraduate degree.

**Reserve Graduate Credit**

Students may take up to 6 additional graduate credits as reserve graduate credit. These credits do not apply to the undergraduate degree. The ability to take courses for reserve graduate credit is available to all high achieving undergraduates with the permission of the department. Permission to take a graduate course for reserve credit is normally granted only to Mason seniors within 15 hours of graduation.

To apply these credits to the master's degree, students must request that the credits be moved from the undergraduate degree to the graduate degree using the Bachelor's/Accelerated Master's Transition Form.

**Doctor of Philosophy**

**Conflict Analysis and Resolution, PhD**

*Banner Code: CA-PHID-CONF*

The doctoral program, the first of its kind in the United States, provides advanced study for students in the field of conflict analysis and conflict resolution. Students are prepared for careers as researchers, theoreticians, and teachers in higher education, and as policy administrators, analysts, and consultants in the public and private sectors.

The program stresses a close link between knowledge of theory and process in the resolution of conflict. For this, training in the methods of research and analysis is emphasized. In addition, students are expected to obtain a background in a substantive area of conflict, usually related to the topic of the dissertation.

**Admission**

A master's or equivalent degree is required for admission to the PhD program. In addition to meeting all admission requirements for graduate study, applicants must submit all undergraduate and graduate transcripts; three letters of recommendation, one of which should be from a faculty member in the applicant's undergraduate or graduate major field; a 750 to 1,000 word essay on goals and reasons for seeking admission to the program; a written sample of work that shows the applicant’s potential for completing dissertation research in a doctoral program; and a resume or curriculum vitae. The Graduate Record Exam (GRE) or other standardized test scores are not required but may be submitted. The Test of English as a Foreign Language (TOEFL) is required of international students. For more information, see the Admission of International Students section in the Admission section of this catalog. Although students may enroll on a full- or part-time basis, entry into the program is in the fall semester only.

**Reduction of Credit**

Since a master's degree or equivalent is required for admission, students will automatically receive a 15 credit reduction of the number of credits required.
Students may have the required number of credits reduced by up to 15 additional credits based on relevant previous coursework. The actual number of applied credits is determined in consultation with the student’s advisor and the program director after a review of courses taken, subsequent to a student's admission to the program.

**Transfer of Non-Degree Credit**

A maximum of 12 credits of S-CAR graduate courses taken at George Mason as a non-degree graduate student, or as part of S-CAR's graduate certificate program may be transferred into the PhD program. How credit will be counted will be determined in consultation with the student's advisor. A maximum of 6 credits of non-S-CAR courses taken as non-degree credit can be counted toward the PhD program. Courses counted toward another degree cannot be transferred.

**Adding an S-CAR Certificate Program**

Students may elect to complete an S-CAR graduate certificate in addition to the PhD program. Graduate certificates are opportunities for students to further tailor their academic program and specialize in a specific area of Conflict Resolution practice. Certain graduate certificate courses can be used to fulfill PhD program requirements. Students should consult with the Certificate Program Director and Doctoral Program Director for policies on counting certificate courses toward the PhD degree.

**Degree Requirements**

The PhD in conflict analysis and resolution requires completion of 72 credits. Since a master's degree or equivalent is required for admission, students will automatically receive a 15 credit reduction of the number of credits required, decreasing the required credits to 57. In addition, students may have the required number of credits reduced by an additional 15 credits based on relevant previous coursework. Students must satisfactorily complete their coursework, comprehensive paper, and advancement to candidacy within six years of their official admission date.

All doctoral students should meet with their faculty advisor before starting classes to develop a plan of study. This plan should show the sequence of courses anticipated. It should be based on a discussion between the student and the advisor about the student’s interest and goals. The plan should ensure that the student completes coursework efficiently and is able to build toward candidacy. The student and the advisor should then meet at least once each semester thereafter to review and amend the plan. The Program Director should receive a copy of each new or revised plan of study.

**Foreign Language Requirement**

At the point of application to fulfill the comprehensive paper, students will indicate to the PhD Program Director the membership of their dissertation committee. This committee will determine, based on the scope and nature of the student’s research, the specific language requirement a student must meet. This will be conveyed to the PhD Program Director. This language requirement must be completed prior to graduation.

**Doctoral Course Work (45 credits)**

Two courses are required for all students. Students take 15 credits of foundation coursework in the areas of theory, research and practice. Students also take 9 credits of specialization courses approved by the Program Director. Elective courses will allow students to complete the coursework credit requirement.

**Two required courses (6 credits)**

- CONF 801 - Introduction to Conflict Analysis and Resolution Credits: 3 Should be taken in the first semester of coursework.
CONF 900 - Integrating Theory, Practice, and Method in Conflict Analysis Credits: 3 Should be taken in the last semester of coursework.

Foundation courses (15 credits)

Students complete 15 credits of foundation courses distributed as follows:

Theoretical foundations

Choose two courses (6 credits) from the following:

- CONF 802 - Theories of the Person Credits: 3
- CONF 803 - Structural Theories Credits: 3
- CONF 804 - Alternate Theoretical Foundations Credits: 3

Research foundations

Choose two courses (6 credits) from the following:

- CONF 811 - Quantitative Foundations Credits: 3
- CONF 812 - Qualitative Foundations: Social Sciences Credits: 3
- CONF 813 - Qualitative Foundations: Humanities Credits: 3

Practice foundations

Choose one course (3 credits) from the following:

- CONF 820 - Reflective Practice in Interpersonal-Multiparty Conflicts Credits: 3
- CONF 890 - Practicum in Conflict Analysis and Resolution Credits: 3

Specialization courses (9 credits)

Students will take three courses (9 credits) of specialization courses evenly distributed across the areas of theory, research, and practice. The Doctoral Program Director must approve courses.

Elective Courses (15 credits)

Electives are any 500-, 600-, and 700-level CONF courses that are not required. With the advisor’s approval, each student may include a maximum of 6 credits of electives from outside the S-CAR Program, including courses in other Mason departments, consortium courses, and transfer courses from other universities. The intent is to allow students to have maximum flexibility in selecting courses to build skills and knowledge needed in dissertation work. CONF 897 - Directed Reading may be taken to meet the requirement. Only two directed readings classes (6 credits) can be applied toward doctoral elective requirements.

Reduction of Credit (15 credits)

A 15-credit reduction is awarded to all students upon admission based on their prior master's degree. Reduction of up to 15 additional credits may be permitted with approval of the student's advisor and program director after admission.
Comprehensive Examination

Students are eligible to complete the comprehensive paper when they have completed all the requirements of course work in the doctoral program with the exception of CONF 998 and 999 and the language requirement.

Upon completion of all coursework, doctoral students are eligible to complete the comprehensive paper. A student is advanced to candidacy upon completion of the examination. Papers can be submitted for evaluation twice each year, in January and in August. Students who do not pass initially should form a plan of study with their advisor and the Doctoral Director that will prepare them to resubmit. The comprehensive paper may be resubmitted two times for a total of three attempts. If, after three unsuccessful attempts, the student should consult with the Doctoral and Master’s Directors about the possibility of transferring to the MS program.

Advancement to Candidacy

Upon successfully completing course work (except dissertation) listed on the Plan of Study and passing the comprehensive paper, students will be advanced to candidacy and will be personally notified of this by the Dean of S-CAR. Students have one year to complete the proposal, with signatures from all committee members. The student then has a maximum of four years to complete and defend the dissertation.

Dissertation Research (12 credits)

Students are required to complete 12 combined credits of CONF 998 (Doctoral Dissertation Proposal) and CONF 999 (Doctoral Dissertation Research), including at least 3 credits of CONF 999. Students must have a signed dissertation proposal in order to register for CONF 999.

- CONF 998 - Doctoral Dissertation Proposal Credits: 1-6 (All CONF 998 courses are graded In Progress until completion of the proposal. At that time, a grade of Satisfactory is issued.)
- CONF 999 - Doctoral Dissertation Research Credits: 1-12 (All CONF 999 courses are graded In Progress until the dissertation defense is successfully completed. At that time, a grade of Satisfactory is issued.)

Dissertation Committee

Prior to sitting of the comprehensive examination paper, students should form their dissertation committee and submit the names to the Doctoral Program Director. The Dissertation Committee must include a chairperson from among S-CAR graduate faculty and at least two other members of the graduate faculty, one of whom must be a non-S-CAR Mason faculty member. The candidate should notify the Dean and Doctoral Director when a tentative committee has been formed. The membership of the committee must be approved by the Doctoral Director and the Dean of the School before the Dean formally appoints the dissertation committee. The Dean will inform the student, committee members, and Doctoral Director when the committee has been appointed.

Dissertation Proposal

The first job of the committee is to approve the candidate’s dissertation proposal. The proposal is the candidate’s description (in some detail) of his/her dissertation project, reflecting the successful work of the comprehensive examination paper. It will include an argument about the hypothesis/theory question being tackled and the specific methods of research to be used. It should be prepared in consultation with the chair of the committee, and approved by all committee members. After receiving permission from the full committee, the candidate makes an oral presentation of the dissertation proposal before the committee and the Doctoral Director that is also open to other S-CAR faculty, fellow students, and other scholars. In scheduling the defense, it is the student’s responsibility to ensure that all members of the committee are available and will be present for the defense.
A signed cover page from that proposal must be filed with the Doctoral Director. Failure to complete the formation of a committee and an approved proposal by the end of the 12-month period will result in the candidate’s dismissal from the doctoral program. (Candidates may appeal to the Dean a further extension of this dissertation preparation period, but such appeals will be allowed only on grounds of documented illness, family emergency, or military deployment). Candidates should consult thesis.gmu.edu/ to ensure the proposal is in the correct format and has been submitted to all the appropriate offices.

Writing the Dissertation and its Defense

The chair of the dissertation committee usually takes most of the responsibility for guiding the overall project and the writing of the dissertation, although all members (and other useful persons) should be consulted as appropriate. It is their collective responsibility to ensure a quality piece of work. When advanced to candidacy, the Guide for Preparing Graduate Thesis, Dissertation and Projects tells exactly how to prepare an acceptable dissertation. Please visit thesis.gmu.edu/ to ensure formatting guidelines are met and submission procedures followed.

It is essential that doctoral committee members have sufficient time to read and evaluate dissertation drafts with care prior to the dissertation defense date. The committee may require no more than one month to read the final draft and provide feedback. It is also essential that students have sufficient time after the defense to do final revisions, editing and formatting. If the University determines the deadlines for final library submission deadline is May 1, for example, the defense must take place prior to April 1 and the full draft dissertation must be delivered to the full committee before March 1.

The dissertation is to be orally defended in public, minimally with the entire committee present. The S-CAR faculty and students must receive public notice of the defense at least two weeks prior. Students are welcome to invite family and friends. The University may also send a representative. The public defense helps ensure that the University’s standards are met, and offers an opportunity to learn from the students’ research. After a successful defense, the cover page is signed by the members of the Dissertation Committee. PhD Program Director and Dean, and the dissertation is filed with the University. An additional signed copy should be delivered to the S-CAR Burton Library.

Dissertations must be presented to the library in the proper format or they will not be accepted. Please visit the University Dissertation & Thesis Services web site at thesis.gmu.edu/ for dissertation formatting requirements and submission deadlines. Mason’s Dissertation and Thesis Coordinator may be reached at udts@gmu.edu or 703-993-2222.

Total: 72 credits

Graduate Certificate

Advanced Skills Graduate Certificate

Banner Code: CA-CERG-CARA

This 15-credit program is specifically tailored to provide students with practical knowledge of conflict analysis and resolution relevant to their focused areas of work. Designed for midcareer professionals studying in a cohort environment, the certificate programs integrate conflict analysis and resolution theory, research, and practical technique. These programs use intensive course sessions, lecture, seminar, and applied mentored learning in real and simulated situations to prepare students to use conflict analysis and resolution approaches in their work in a variety of fields. The Advanced Skills Certificate covers conflict resolution skills in challenging conflicts and considers innovative and emerging practices.

Admission Requirements

In addition to meeting all admission requirements for graduate study, applicants must submit an undergraduate transcript showing completion of an undergraduate degree or equivalent, a cover letter specifying interest in the program, two letters of recommendation and a curriculum vitae or résumé indicating relevant work experience.
In addition, prior work experience in areas related to the chosen graduate certificate is desirable. GRE or other standardized test scores are not required but may be submitted. The TOEFL is required of international students. For more information, see Admission of International Students in the Admission section of this catalog. Although students may enter the program in either the fall or spring semester, they are strongly encouraged to participate fully in the cohort learning experience by enrolling for the fall semester, taking two courses in the fall and two in the spring, and completing their certificate with the final course in the summer. The capstone course is only offered in the summer; students admitted for the spring term should expect their certificate program to take at least 18 months.

Please note that classes for this graduate certificate are offered only in Saturday and Sunday sessions. Please check the Schedule of Classes for each term to identify course meeting dates, and specific add/drop dates for these partial semester courses.

The Advanced Skills Graduate Certificate may only be pursued on a part-time basis, unless a student is concurrently enrolled in another degree program or takes additional courses over those required for the certificate program.

Certificate Requirements

Required Courses (12 credits)

- CONF 502 - Intensive Introduction to Conflict Analysis and Resolution Credits: 3 (fall and spring)
- CONF 650 - Conflict Analysis and Resolution Advanced Skills Credits: 3 (fall)
- CONF 660 - Conflict Assessment and Program Evaluation Credits: 3 (spring)
- CONF 668 - Applied Integration for Graduate Certificates Credits: 3 (summer)

Elective Course (3 credits)

Students may choose from the following:

- CONF 657 - Facilitation Skills Credits: 3 (spring)
- CONF 658 - Diversity and Difference in Conflict Analysis and Resolution Credits: 3 (spring)
- CONF 659 - Leadership in Conflict Analysis and Resolution Credits: 3 (spring)
- CONF 665 - Special Topics in Conflict Analysis and Resolution Credits: 3

Note:

Application of any other course toward fulfillment of the elective requirement must be approved by the Certificate Program Director.

Total: 15 credits

Collaborative Leadership in Community Planning Graduate Certificate

Banner Code: CA-CERG-CARC

This 15-credit program is specifically tailored to provide students with practical knowledge of conflict analysis and resolution relevant to their focused areas of work. Designed for midcareer professionals studying in a cohort environment, the certificate programs integrate conflict analysis and resolution theory, research, and practical technique. These programs use intensive course sessions, lecture, seminar, and applied mentored learning in real and simulated situations to prepare students to use conflict
analysis and resolution approaches in their work in a variety of fields. The Collaborative Leadership in Community Planning Certificate covers designing collaborative processes to work with diverse stakeholders to build meaningful and lasting shared agreements in land use, development or other community planning contexts.

**Admission Requirements**

In addition to meeting all admission requirements for graduate study, applicants must submit an undergraduate transcript showing completion of an undergraduate degree or equivalent, a cover letter specifying interest in the program, two letters of recommendation, and a curriculum vitae or résumé indicating relevant work experience.

In addition, prior work experience in areas related to the chosen graduate certificate is desirable. GRE or other standardized test scores are not required but may be submitted. The TOEFL is required of international students. For more information, see Admission of International Students in the Admissions section of this catalog. Although students may enter the program in either the fall or spring semester, they are strongly encouraged to participate fully in the cohort learning experience by enrolling for the fall semester, taking two courses in the fall and two in the spring, and completing their certificate with the final course in the summer. The capstone course is only offered in the summer, students admitted for the spring term should expect their certificate program to take at least 18 months.

Please note that courses for this graduate certificate are offered only in Saturday and Sunday sessions. Please check the Schedule of Classes for each term to identify course meeting dates, and specific add/drop dates for these partial semester courses.

The Collaborative Leadership in Community Planning Graduate Certificate may only be pursued on a part-time basis, unless a student is concurrently enrolled in another degree program or takes additional courses over those required for the certificate program.

**Certificate Requirements**

**Required Courses (12 Credits)**

- CONF 502 - Intensive Introduction to Conflict Analysis and Resolution Credits: 3 (fall and spring)
- CONF 651 - Conflict Analysis and Resolution for Collaborative Leadership in Community Planning Credits: 3 (fall)
- CONF 660 - Conflict Assessment and Program Evaluation Credits: 3 (spring)
- CONF 668 - Applied Integration for Graduate Certificates Credits: 3 (summer)

**Elective Courses (3 Credits)**

Students may choose from the following:

- CONF 657 - Facilitation Skills Credits: 3 (spring)
- CONF 658 - Diversity and Difference in Conflict Analysis and Resolution Credits: 3 (spring)
- CONF 659 - Leadership in Conflict Analysis and Resolution Credits: 3 (spring)
- CONF 665 - Special Topics in Conflict Analysis and Resolution Credits: 3

**Note:**

**Total: 15 credits**
Environmental Conflict Resolution and Collaboration Graduate Certificate

Banner Code: CA-CERG-ECR

The School for Conflict Analysis and Resolution (S-CAR) and the Department of Environmental Science and Policy (ESP) jointly offer a 15-credit graduate certificate in environmental conflict resolution and collaboration. This certificate is intended for mid-career professionals working in federal, state and local government as well as others whose positions involve negotiating environmental conflicts.

The Conflict Resolution and Collaboration Graduate Certificate focuses on a systems approach to environmental conflict to understand how it is embedded within formal legal, regulatory, and ecological systems as well as informal networks of governance. Coursework focuses on the strategic thinking that is required for assessing and designing appropriate ECR processes; as well as understanding the public interest and questions of social justice and sustainability that make environmental conflict particularly important and challenging.

This has been designated a Green Leaf program. For further information, please go to Green Leaf Programs and Courses.

Admissions Procedures and Requirements

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in the Admission section of this catalog. Applicants to this graduate certificate program should hold a BA or BS (or equivalent) in a discipline related to the certificate’s theme from an accredited university, with a minimum GPA of 3.00 and related work experience.

Applicants must submit a completed Mason graduate application, along with official transcripts, resume, VA domicile classification form, and TOEFL scores if they are foreign nationals. GRE scores and letters of recommendation are not required, but will considerably strengthen an application, if available. Questions and application materials should be directed to the S-CAR Graduate Admissions office. Depending on the background of the individual student, the certificate director may recommend remedial or preparatory courses tailored to student’s needs. Students may transfer no more than 3 credit hours into the certificate program with the approval of the academic director.

The Environmental Conflict Resolution and Collaboration Graduate Certificate may only be pursued on a part-time basis, unless a student is concurrently enrolled in another degree program or takes additional courses over those required for the certificate program.

Certificate Requirements

Core Courses (9 credits)

The core courses listed below are crosslisted with EVPP courses. Students may register for either using the CONF course number or equivalent EVPP course number.

- CONF 682 or EVPP 682 - Principles of Environmental Conflict: 3 (fall)
- CONF 684 or EVPP 684 - Environmental Conflict Resolution and Collaboration: Leadership Practicum/Capstone: 3 (spring)

Skills and Competencies Courses (3 - 6 credits)
This requirement is fulfilled through the following courses, depending upon the student’s academic background. Students without prior background in either conflict resolution or environmental science should take both EVPP 607 and CONF 501 or 502, and none of the elective courses listed below. Students without an environmental background should take EVPP 607. Students without a conflict resolution background should take either CONF 501 or CONF 502.

Students with both prior environmental and conflict background may choose among a set of for-credit “short courses” using CONF 795 - Professional Development Seminars that require approval of the Certificate Director to satisfy this requirement.

- EVPP 607 - Fundamentals of Ecology Credits: 3 for students without a prior environmental background
- CONF 501 - Introduction to Conflict Analysis and Resolution Credits: 3 for students without a prior conflict resolution background
  OR
- CONF 502 - Intensive Introduction to Conflict Analysis and Resolution Credits: 3 for students without a prior conflict resolution background

Elective Course (0-3 credits)

Students may choose from the following courses. Application of any other course toward fulfillment of the elective requirement must be approved by the Director of the Certificate Program.

- CONF 695 - Selected Topics Credits: 3 topic must be approved by Certificate Program Director
- EVPP 623 - Translating Environmental Policy into Action Credits: 3
- EVPP 505 - Selected Topics in Environmental Science Credits: 0-4
- EVPP 521 - Marine Conservation Credits: 3
- EVPP 620 - Development of U.S. Environmental Policies Credits: 3
- EVPP 626 - Environment and Development in Asia Credits: 3
- EVPP 635 - Environment and Society Credits: 3
- EVPP 638 - Corporate Environmental Management and Policy Credits: 3
- EVPP 641 - Environmental Science and Public Policy Credits: 3
- EVPP 642 - Environmental Policy Credits: 3
- EVPP 677 - Applied Ecology and Ecosystem Management. Credits: 3
- EVPP 741 - Advanced Topics in Environmental Science and Public Policy Credits: 0-4 topic must be approved by Certificate Program Director

Total: 15 credits

**Prevention, Reconstruction, and Stabilization Contexts Graduate Certificate**

**Banner Code: CA-CERG-CARP**

This 15-credit program is specifically tailored to provide students with practical knowledge of conflict analysis and resolution relevant to their focused areas of work. Designed for midcareer professionals studying in a cohort environment, the certificate programs integrate conflict analysis and resolution theory, research, and practical technique. These programs use intensive course sessions, lecture, seminar, and applied mentored learning in real and simulated situations to prepare students to use conflict analysis and resolution approaches in their work in a variety of fields. The Prevention, Reconstruction, and Stabilization Contexts Graduate Certificate augments development, defense, security, or humanitarian aid work experience with the theories and skills of conflict analysis and resolution for designing, implementing, and evaluating conflict-sensitive initiatives.
internationally in areas of potential violence and post-conflict reconstruction and stabilization. Considers cross-sectoral approaches to long-term violence prevention and constructive conflict resolution.

**Admission Requirements**

Applicants to all graduate programs at George Mason University must meet the admission requirements for graduate study and application requirements as specified in the Admission section of this catalog. Applicants to this certificate must submit an undergraduate transcript showing completion of an undergraduate degree or equivalent, a cover letter specifying interest in the program, two letters of recommendation, and a curriculum vitae or résumé indicating relevant work experience.

In addition, prior work experience in areas related to the chosen graduate certificate is desirable. GRE or other standardized test scores are not required but may be submitted. The TOEFL is required of international students. For more information, see the Admission of International Students section in the Admission section of this catalog.

Although students may enter the program in either the fall or spring semester, they are strongly encouraged to participate fully in the cohort learning experience by enrolling for the fall semester, taking two courses in the fall and two in the spring, and completing their certificate with the final course in the summer. The capstone course is only offered in the summer, students admitted for the spring term should expect their certificate program to take at least 18 months.

Please note that the classes for this graduate certificate are offered only in Saturday and Sunday sessions. Please check the Schedule of Classes for each term to identify course meeting dates, and specific add/drop dates for these partial semester courses.

The graduate certificate in prevention, reconstruction and stabilization contexts may only be pursued on a part-time basis, unless a student is concurrently enrolled in another degree program or takes additional courses over those required for the certificate program.

**Certificate Requirements**

**Required Courses (12 Credits)**

- CONF 502 - Intensive Introduction to Conflict Analysis and Resolution Credits: 3 (fall and spring)
- CONF 652 - Conflict Analysis and Resolution for Prevention, Reconstruction, and Stabilization Contexts Credits: 3 (fall)
- CONF 660 - Conflict Assessment and Program Evaluation Credits: 3 (spring)
- CONF 668 - Applied Integration for Graduate Certificates Credits: 3 (summer)

**Elective Courses (3 Credits)**

Total: 15 credits

**World Religions, Diplomacy, and Conflict Resolution Graduate Certificate**

*Banner Code: CA-CERG-CARW*

This 15-credit program is specifically tailored to provide students with practical knowledge of conflict analysis and resolution relevant to their focused areas of work. Designed for midcareer professionals studying in a cohort environment, the certificate programs integrate conflict analysis and resolution theory, research, and practical technique. These programs use intensive course sessions, lecture, seminar, and applied mentored learning in real and simulated situations to prepare students to use conflict analysis and resolution approaches in their work in a variety of fields. The World Religions, Diplomacy and Conflict Resolution Certificate considers strategies to reduce global violence and terrorism by incorporating the best moral practices of religious communities into policy planning, diplomacy, civil society building and democratization. Covers strategies to elicit moderate moral religious expression in conflict regions to strengthen civil society and democracy.

**Admission Requirements**

Applicants to all graduate programs at George Mason University must meet all application and admission requirements for graduate study as specified in the Admission section of this catalog. Applicants must submit an undergraduate transcript showing completion of an undergraduate degree or equivalent, a cover letter specifying interest in the program, two letters of recommendation, and a curriculum vitae or résumé indicating relevant work experience.

In addition, prior work experience in areas related to the chosen graduate certificate is desirable. GRE or other standardized test scores are not required but may be submitted. The TOEFL is required of international students. For more information, see the Admission of International Students section in the Admissions section of this catalog. Although students may enter the program in either the fall or spring semester, they are strongly encouraged to participate fully in the cohort learning experience by enrolling for the fall semester, taking two courses in the fall and two in the spring, and completing their certificate with the final course in the summer. The capstone course is only offered in the summer, students admitted for the spring term should expect their certificate program to take at least 18 months.

Please note that classes for this graduate certificate program are offered only in Saturday and Sunday sessions. Please check the Schedule of Classes for each term to identify course meeting dates, and specific add/drop dates for these partial semester courses.

The graduate certificate in world religions, diplomacy, and conflict resolution may only be pursued on a part-time basis, unless a student is concurrently enrolled in another degree program or takes additional courses over those required for the certificate program.

**Certificate Requirements**

- CONF 665 - Special Topics in Conflict Analysis and Resolution Credits: 3

Note:

Application of any other course toward fulfillment of the elective requirement must be approved by the Certificate Program Director.

Total: 15 credits

Master of Science

Conflict Analysis and Resolution, MS

Banner Code: CA-MS-CONF

This 41-credit, two-year professional program prepares students for practice and further academic work by integrating conflict analysis and resolution theory, research, and practical techniques. Participants study the theory, methods, and ethical perspectives of the field, and apply this knowledge in laboratory simulations and workshops, internships, and field practice. Graduates work in a variety of settings where conflict resolution is useful and interest groups are in conflict with current and emergent public policy. Examples are businesses, unions, government agencies, religious groups, court systems, educational institutions, community centers, international relief and development organizations, and consulting firms.

An accelerated master's option is available to students in the bachelor's program. See Conflict Analysis and Resolution, BA or BS/Conflict Analysis and Resolution, Accelerated MS for specific requirements.

Admission Requirements

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in the Admission section of this catalog. In addition, applicants must submit all undergraduate and graduate transcripts; three letters of recommendation, one of which should be from a faculty member in the applicant’s undergraduate or graduate major field; a resume or curriculum vitae; and a 750- to 1,000-word essay on goals and reasons for seeking admission to the program. GRE or other standardized test scores are not required but may be submitted. The TOEFL is required of international students. For more information, see Admission of International Students sections in the Admission section. Students can be admitted to the MS program for both the Fall and Spring semesters.

Background courses in social sciences, as well as prior work experience, are desirable. Prior graduate academic work is evaluated on an individual basis for possible transfer credit and fulfillment of program requirements; however, Mason usually does not reduce the total credits required for the degree. Students may enroll on a full- or part-time basis.

Transfer of Non-Degree Credit

A maximum of 12 credits of S-CAR graduate courses taken at George Mason as a non-degree graduate student, or as part of S-CAR's graduate certificate program may be transferred into the MS program. How credit will be counted will be determined in
consultation with the admitted student's advisor. A maximum of 6 credits of non-S-CAR courses taken as non-degree credit can be counted toward the MS program. Courses counted toward another degree cannot be transferred.

Adding an S-CAR Certificate Program

Students may elect to complete an S-CAR Graduate Certificate in addition to the MS program. Graduate certificates are opportunities for students to further tailor their academic program and specialize in a specific area of conflict resolution practice. Certain graduate certificate courses can be used to fulfill MS program requirements. Students should consult with the Certificate Program Director and the Master's Program Director for policies on counting certificate courses toward the MS degree.

Peace Corps Master's International

The Master's International, a joint program of Mason and the Peace Corps enables participants to prepare for Peace Corps volunteer services while earning an MS in Conflict Analysis and Resolution. Students apply separately to the Peace Corps and to Mason. The 41 credit curriculum provides students with skills and tools to prepare them for work as community development leaders during their Peace Corps Service. An accelerated pathway is provided to allow Peace Corps volunteers to complete 29 credits prior to overseas service (including a summer term), students then receive 6 credits of CONF 694 internship for overseas Peace Corps service. Mason will provide tuition support for the 6 credits of CONF 694 earned overseas. Students then return to Mason for a semester to complete the final 6 credits. Students accepted into the academic program but waiting for notification of acceptance from the Peace Corps may begin their Master's program but will not be eligible for tuition support until they are accepted into the Peace Corps. More information on Master's International Program can be found at www.peacecorps.gov/index.cfm

Dual Degree Program with the University of Malta

Students have the opportunity to pursue a MS in Conflict Analysis and Resolution from George Mason University and a MA in Conflict Resolution and Mediterranean Security from the University of Malta through an innovative Dual Degree Program. This 14 month program is offered only on site at the University of Malta. Students interested in pursuing the dual degree should apply through University of Malta at www.um.edu.mt/imp.

Degree Requirements

Students must complete 41 credits as shown below. Mason requires all students to complete the master’s degree within six years of their official admission date.

Because the choice of electives can vary significantly according to individual goals or needs, each student should develop a plan of study that should be discussed once each semester with the advisor and updated as appropriate.

Please check the S-CAR student handbook for information on registration procedures.

Required courses (15 credits)

- CONF 501 - Introduction to Conflict Analysis and Resolution Credits: 3 CONF 501 should be taken in the first semester of a student's coursework.
- CONF 601 - Theories of Conflict and Conflict Resolution Credits: 3
- CONF 610 - Philosophy and Methods of Conflict Research Credits: 3
- CONF 620 - Reflective Practice in Interpersonal-Multiparty Conflicts Credits: 3
- CONF 642 - Integration of Theory and Practice Credits: 3 CONF 642 should be taken in the last semester of a student's M.S. coursework.
Elective courses (20 Credits)

Electives are any 500, 600, or 700 level CONF courses, except required courses. With the advisor's approval, each student is eligible to include a maximum of six credits of electives from outside the S-CAR program, including courses in other Mason departments, consortium courses, and transfer courses from other universities.

Integrative courses (6 credits)

Students choose one of the following options:

Applied Practice and Theory

The Applied Practice and Theory (APT) Program is a 6-credit course that runs yearlong. It is designed to take the concepts presented in class and practiced in labs into real situations with conflict and consequences. Students work in teams integrating research and practice with theory development and applied ethics.

- CONF 690 - Practicum in Conflict Analysis and Resolution Credits: 3 (taken twice over two semesters)

Internship

The internship program provides students with opportunities to use and develop conflict resolution skills, integrate theory and practice of conflict analysis and resolution, and network with professionals in the field to enhance employment opportunities. Experience does not necessarily have to be explicitly hands on. CONF 694 requires at least 160 hours of supervised work on a project toward the analysis or resolution of conflict. Such work must be spelled out in a memorandum of agreement to be signed by the student, the site supervisor, and the internship coordinator before the internship begins.

Students may either take six credits of CONF 694 or three credits of CONF 694 and three of CONF 795.

- CONF 694 - Internship Credits: 1-6 (take 3-6 credits)
- CONF 795 - Professional Development Seminars Credits: 1-2 (for 3 credits)

Thesis

Students wishing to complete a Master's Thesis are strongly encouraged to take CONF 797 (Proposal Development) the semester before beginning the thesis project. Before registering, students must have identified a Master's thesis committee chair to supervise the project. Students should contact S-CAR student services to receive the CRN to register for thesis.

- CONF 797 - Proposal Development Credits: 1
- CONF 799 - Master's Thesis Credits: 1-6

Directed Readings

Only two directed readings (CONF 697) may be applied toward requirements for the master’s degree (maximum 6 credits).

- CONF 697 - Directed Reading Credits: 1-3

Total: 41 credits
Master of Social Work/Master of Science

Conflict Analysis and Resolution, MS and Social Work, MSW Dual Degree (S-CAR)

Banner Codes: HH-MSW-SOCW and CA-MS-CONF

The Department of Social Work and the School for Conflict Analysis and Resolution have joined forces to offer a three year dual-degree program. Students can earn both an MSW and an MS in conflict analysis and resolution while taking advantage of the diversity of the Washington, D.C., metropolitan area and the university’s proximity to the nation’s capital. This is the only dual-degree program of its kind.

MSW-MS Common Requirements

Admission Requirements

Applicants must meet the admission standards and application requirements specified in the Admissions section of the catalog and apply using the online Application for Graduate Admission. The application process is competitive, and applications are considered for the fall semester only.

Students interested in the 3-year dual degree program submit one online Application for Graduate Admission, select the MSW in Social Work as a primary program, and submit all application support materials, including the MSW Application Materials to the Office of Graduate Admission in the College of Health and Human Services. Applicants should communicate their interest in completing the dual degree program in their essays, and recommendations should address the dual program interest. Students must be admitted to both programs in the same semester (fall only) to be admitted to the dual degree program.

For application deadlines and detailed application requirements please refer to the CHHS Admissions website. Interested students should consult the MSW program website and the MSW program director for additional information prior to applying.

Transfer of Credit

Transfer credit is governed by university transfer of graduate credit policy and the university requirements for master’s degrees, and transfer credits must be approved by the program director and the dean. Students who enroll initially through non-degree studies should seek course advising through the department prior to taking a course and plan to submit their application to the dual degree program as soon as possible.

Please refer to the Transfer of Credit policy for the MSW in Social Work or departmental transfer policy for graduate Social Work courses taken at another institution and for the maximum number of credits allowed to be transferred from Nondegree Studies.

MSW-MS Degree Requirements

To graduate with the dual degree, students must successfully complete the following:

Social Work Courses (51 credits)

- SOCW 623 - Human Behavior and Social Systems I Credits: 3
- SOCW 624 - Human Behavior and Social Systems II Credits: 3
• SOCW 651 - Social Policies, Programs, and Services Credits: 3
• SOCW 652 - Influencing Social Policy Credits: 3
• SOCW 657 - Direct Social Work Practice I Credits: 3
• SOCW 658 - Direct Social Work Practice II Credits: 3
• SOCW 670 - Communication and Technology for Social Work Practice Credits: 3
• SOCW 672 - Foundation Field Practicum and Seminar I Credits: 3
• SOCW 673 - Foundation Field Practicum and Seminar II Credits: 3
• SOCW 684 - Social Work and the Law Credits: 3
• SOCW 685 - Organizational Leadership for Social Workers Credits: 3
• SOCW 687 - Empowering Communities for Change Credits: 3
• SOCW 688 - Advanced Research in Social Work Credits: 3
• SOCW 694 - Social Change Practicum I Credits: 3
• SOCW 695 - Social Change Practicum II Credits: 3

Choose two from the following courses (6 credits)

At least one of the two courses must be an Advanced Policy course.

**Advanced Policy (at least 3 credits)**
• SOCW 653 - Immigration Policy Credits: 3
• SOCW 654 - Social Policy for Children and Youth Credits: 3
• SOCW 655 - Aging Programs and Policies Credits: 3

**Additional Course Options**
• SOCW 630 - Forensic Social Work Practice Credits: 3
• SOCW 674 - Psychopathology Credits: 3
• SOCW 675 - Selected Topics in Clinical Practice Credits: 3
• SOCW 676 - Selected Topics in Social Work and Social Change Credits: 3
• SOCW 677 - Family Therapy Credits: 3
• SOCW 678 - Trauma and Recovery Credits: 3
• SOCW 679 - Military Social Work Credits: 3
• SOCW 682 - Substance Abuse Interventions Credits: 3
• SOCW 689 - Clinical Practice with Older Adults Credits: 3
• SOCW 697 - Thesis Project Seminar Credits: 3

**Conflict Analysis and Resolution Courses (35 credits)**

• CONF 501 - Introduction to Conflict Analysis and Resolution Credits: 3
• CONF 601 - Theories of Conflict and Conflict Resolution Credits: 3
• CONF 610 - Philosophy and Methods of Conflict Research Credits: 3
• CONF 620 - Reflective Practice in Interpersonal-Multiparty Conflicts Credits: 3
• CONF 642 - Integration of Theory and Practice Credits: 3
• CONF 694 - Internship Credits: 1-6

**Professional Development Seminars (5 credits)**

• CONF 795 - Professional Development Seminars Credits: 1-2
Electives (12 credits)

- 12 credits of CONF Electives, selected with approval from S-CAR

Total: 86 credits

Non-Degree

Conflict Analysis and Resolution Minor

Banner Code: CONF

Students pursuing a minor complete 18 credits. At least nine credits of the minor must be applied only to the S-CAR minor and may not be used to fulfill requirements of the student's major, major concentration, or another minor.

Advising

S-CAR advisors help students create interdisciplinary programs that meet their interests and career goals. All majors and minors are strongly encouraged to meet regularly with an S-CAR academic advisor who will help students develop and follow a coherent plan of study and complete the degree in a timely manner.

Course Work

Students pursuing a minor complete 18 credits distributed as follows:

Required core courses (9 credits)

- CONF 101 - Conflict and Our World Credits: 3
- CONF 210 - Theories of Conflict Analysis and Resolution Credits: 3
- CONF 300 - Conflict Resolution Techniques and Practice Credits: 3

One of three bridge courses (3 credits)

Take one course chosen from the following:

- CONF 320 - Interpersonal Conflict Analysis and Resolution Credits: 3
- CONF 330 - Community, Group, and Organizational Conflict Analysis and Resolution Credits: 3
- CONF 340 - Global Conflict Analysis and Resolution Credits: 3

Emphasis courses (6 credits)

Students choose courses from any of three levels of conflict: interpersonal (micro level), community and organizational (mezzo level), and international (macro level). With permission of the advisor, students may use other CONF designated courses to fulfill emphasis requirements. The S-CAR director will consider student requests for approval of courses not listed below.

Emphasis in Interpersonal Conflict
Emphasis in Community and Organizational Conflict
- ANTH 301 - Native North Americans Credits: 3
- ANTH 310 - Social Organization and Kinship Credits: 3
- ANTH 340 - Comparative Perspectives on Immigration Credits: 3
- ANTH 365 - Race and Racism Credits: 3
- ANTH 488 - Gender, Sexuality, and Culture Credits: 3
- COMM 305 - Foundations of Intercultural Communication Credits: 3
- COMM 326 - Rhetoric of Social Movements and Political Controversy Credits: 3
- COMM 335 - Organizational Communication Credits: 3
- COMM 350 - Mass Communication and Public Policy Credits: 3
- COMM 432 - Political Communication Credits: 3
- COMM 434 - Interviewing Credits: 3
- CONF 315 - Discovering Organizations and Actors in the Conflict Field Credits: 3
- CONF 325 - Dialogue and Difference Credits: 3
- CONF 345 - Social Dynamics of Terrorism, Security, and Justice Credits: 3
- CONF 393 - Philosophy, Conflict Theory, and Violence Credits: 3
- CONF 399 - Special Topics in Conflict Analysis and Resolution Credits: 3
- CRIM 302 - Delinquency Credits: 3
- CRIM 306 - Criminal Justice Ethics Credits: 3
- CRIM 406 - Family Law and the Justice System Credits: 3
- CRIM 407 - Advanced Topics in Law and Society Credits: 3
- CRIM 423 - Constitutional Law: Civil Rights and Liberties Credits: 3
- ECON 309 - Economic Problems and Public Policies Credits: 3
- ECON 320 - Labor Problems Credits: 3
- GGS 306 - Urban Geography Credits: 3
- GOVT 301 - Public Law and the Judicial Process Credits: 3
- GOVT 309 - Government and Politics of Metropolitan Areas Credits: 3
- GOVT 337 - Ethnic Politics in Western Europe and North America Credits: 3
- GOVT 355 - Public Personnel Administration Credits: 3
- GOVT 365 - State and Regional Public Policy Credits: 3
- GOVT 414 - Politics of Race and Gender Credits: 3
- GOVT 460 - Surveillance and Privacy in Contemporary Society Credits: 3
- HIST 350 - U.S. Women's History Credits: 3
- MSOM 301 - Managing People and Organizations Credits: 3
- NCLC 304 - Social Movements and Community Activism Credits: 4
- NCLC 310 - Violence and Gender Credits: 3-6
- NCLC 314 - Conflict, Trauma and Healing Credits: 6
- NCLC 320 - Construction of Differences: Race, Class, and Gender Credits: 6
- NCLC 334 - Environmental Justice Credits: 4
- NCLC 335 - Ethics, Communication, and Freedom Credits: 3-6
- NCLC 346 - Art as Social Action Credits: 4
- NCLC 361 - Neighborhood, Community, and Identity Credits: 3-6
- NCLC 378 - Medicine, Justice, and Public Policy Credits: 3
- NCLC 381 - When Cultural Worlds Collide Credits: 6
- NCLC 435 - Leadership in a Changing Environment Credits: 4
- PHIL 309 - Bioethics Credits: 3
- PHIL 343 - Topics in Environmental Philosophy Credits: 3
- PHIL 355 - Theories of Ethics Credits: 3
• PROV 342 - The George Mason Debates in Current Affairs Credits: 3
• PSYC 231 - Social Psychology Credits: 3
• PSYC 327 - Psychology in the Community Credits: 3
• PSYC 333 - Industrial and Organizational Psychology Credits: 3
• RELI 359 - Muslims in the United States Credits: 3
• RELI 360 - Religion and Politics Credits: 3
• SOCI 300 - Social Control and Freedom Credits: 3

• CONF 341 - Global Conflict Resolution Practice Credits: 1

Total: 18 credits
School of Management

Enterprise Hall
Phone: 703-993-1880
Web: som.gmu.edu
College Code: BU

Dedicated to excellence in both teaching and research, the School of Management (SOM) educates future business leaders through world-class teaching, innovative academic programs and strategic business partnerships. With a curriculum rooted in entrepreneurship, corporate governance and global business education the school prepares undergraduate and graduate students for increased globalization through a range of academic programs and international alliances. SOM faculty are deeply engaged in the regional, national and international business communities and their academic expertise combined with real world experience provides a bridge in the classroom from academic theory to business practice.

Business leaders and organizations are actively involved with the School of Management through executive education programs, speaker engagements, classroom lectures, case competitions, internships, and career placement. SOM also maintains close connections to the business community through its advisory board and advisory councils to academic programs. More than 125 business leaders representing 75 different companies serve as advisory board or council members.

SOM enrolls more than 3,500 undergraduate students and more than 450 graduate students in its programs. The School of Management’s programs offer students a variety of opportunities to enhance their professional endeavors.

- Our innovative curriculum meets the demands of the marketplace, focused on business fundamentals, strategic thinking and teamwork.
- Our highly respected distinguished faculty are cross-disciplinary collaborators and innovative practitioners that are passionate about education. They bring both theoretical and applied expertise to the classroom.
- Our outstanding career management professionals are dedicated to providing tailored support to promote our students’ professional advancement and leverage their degree over the short- and long-term.
- Our diverse student population offers unique opportunities to network and learn from your fellow classmates. Students at Mason represent over 130 different countries and all 50 states.

Courses and Programs
SOM offers all course work designated ACCT, BMGT, BULE, EMBA, FNAN, GSOM, MBA, MGMT, MIS, MKTG, MSEC, MSOM, OM, REAL, SOM, and TECM in the Courses section of this catalog.

Undergraduate
The programs in management education culminate in a BS degree with a major from one of five areas: accounting, finance, information systems and operations management, management, or marketing.

Graduate
SOM offers an MBA, Executive MBA, MS in Accounting, MS in Real Estate Development, MS in Technology Management, MS in Management of Secure Information Systems and MA in Business Management (pending SCHEV approval).

Centers
SOM houses three research centers. The Center for Global Business Innovation and Transformation advances research, curriculum, and outreach activities focused on global business. The Center for Real Estate Entrepreneurship focuses on real estate research and education in real estate development and finance. The Investor Protection & Corporate Fraud Research Center strives to provide thought leadership on investor protection and fraud risk by sponsoring, conducting, and disseminating research in these areas.

**Academic Policies**

Students should become familiar with the university's general academic policies in addition to those specific to each academic unit. Please see the Academic Policies section of this catalog.

**Study Elsewhere Policy**

A student who has matriculated at Mason may transfer a limited number of hours (9 for undergraduates, 6 for graduates) of coursework in School of Management disciplines from another institution (not including registration through the Consortium of Universities of the Washington Metropolitan Area or coursework completed through the Center for Global Education). Any course attempted elsewhere must take place more than 50 miles from the George Mason University Fairfax campus.

Special instructions for School of Management students: courses that are attempted at a two-year institution may not be used to fulfill upper-level requirements. Any course that a student wished to transfer to fulfill major or graduate-level course requirements in the School of Management must be attempted at an institution accredited by the Association to Advance Collegiate Schools of Business (AACSB).

For additional information, see the George Mason University Permission to Study Elsewhere Policy in the Academic Policies section of this catalog.

**Appeals Process**

The School of Management strives to maintain policies and procedures that are consistent with those of the University, as well as in the best interest of our students. If you have any questions concerning a particular policy or procedure, please contact the Office of Academic and Career Services, Room 008 of Enterprise Hall (703-993-1880) or visit som.gmu.edu.

**Bachelor of Science**

**Accounting, BS**

**Banner Code:** BU-BS-ACCT

Associate Dean for Undergraduate Programs  
Phone: 703-993-1880  
Web: som.gmu.edu

The BS in accounting (ACCT) prepares students for professional careers in the private and public sectors. The accounting major is designed to produce accounting professionals who can both generate and apply financial information to solve business problems. Our students learn principles of business and accounting as well as the specific skills and specialized technical knowledge necessary for success in the dynamic field of accounting. Our program emphasizes ethics, critical thinking, written and verbal communication, and effective use and understanding of technology. Our graduates are employed by the assurance, tax advisory, and consulting groups of the top accounting firms as well as Fortune 100 companies. Our proximity to the nations' capitol provides unique opportunities for our graduates to work in government and in the federal practices of public accounting firms. The accounting degree program is separately accredited by AACSB International.
Students interested in CPA certification can apply to the MSA degree to meet the 150 hour requirement for CPA certification in most states. The MSA offers a graduate degree in accounting that allows students to meet the 150 hour requirement for CPA certification in most states in only nine months.

This undergraduate program offers students the option of applying to the accelerated master's degree program. See Accounting, BS/Accounting, Accelerated MS for specific requirements.

**Entering the School of Management**

Application to the School of Management's (SOM) bachelor of science degree programs is in addition to the George Mason University's admissions process. After acceptance to Mason, students who wish to pursue a major in accounting (ACCT), information systems and operations management (ISOM), finance (FNAN), management (MGMT), or marketing (MKTG) must submit a separate application to the School of Management. Students entering the School of Management are initially designated as "bachelor-pre" (BPRE) until they have successfully completed the SOM application requirements and obtained bachelor of science (BS) degree status.

Acceptance to the SOM bachelor of science program is competitive based on applicants' cumulative GPAs from all institutions attended.

**SOM Application Requirements**

Students are responsible for the application requirements in effect at the time of application to SOM and should check som.gmu.edu for changes to the requirements. The following requirements are for the academic year 2013-14:

1. Successfully complete at least 48 credits with at least 9 credits earned at Mason prior to the semester of admission.
2. Successful completion of the following courses with a grade of C or better:
   - ACCT 203 - Survey of Accounting Credits: 3 or ACCT 204 - Honors Survey of Accounting credits: 3
   - OM 210 - Statistical Analysis for Management Credits: 4 or OM 211 - Honors Statistical Analysis for Management credits: 4
   - SOM 301 - Business Models: A Communication Approach Credits: 3
   - MATH 108 - Introductory Calculus with Business Applications Credits: 3 or MATH 113 - Analytic Geometry and Calculus I Credits: 4

**Deadlines for Application to BS Degree Status**

Students should submit their formal application to the School of Management before the deadline of the semester they are completing the requirements listed above. The deadlines are:

- November 1 for acceptance the following spring semester;
- July 1 for acceptance the following fall semester.

For more information about the application process, contact the Office of Academic and Career Services, 703-993-1880, or visit som.gmu.edu.

**Academic Advising**

Academic planning for undergraduate students is available in the SOM Office of Academic and Career Services, Enterprise Hall, Room 008. Students are encouraged to consult with an advisor regularly. Any student who wishes to change to a major in SOM must consult a SOM academic advisor for degree requirements. For more information about walk-in advising hours or scheduling an appointment, call 703-993-1880, or go to som.gmu.edu.
BU-BS Degree Requirements

SOM students pursuing a BS degree must complete a minimum of 120 credits, including the University General Education requirements, SOM general education, SOM core courses, and major requirements. In addition, the following requirements must be met:

- A minimum of 45 credits at the 300- or 400-level.
- A minimum of 30 credits of SOM core and major courses at Mason.
- At least 9 credits required for the specific major and SOM 498 taken at Mason.
- A grade of C or higher earned in the SOM core and major requirements.

Students should carefully examine prerequisites for SOM courses. Students may be removed from a course if they enroll without having fulfilled the prerequisites.

General Education Requirements (31-32 credits)

SOM students must complete the University General Education requirements, plus 1 additional credit of natural science (the SOM natural science requirement must be fulfilled by completing two 4-credit laboratory sciences).

SOM General Education (15-16 credits)

- ECON 103 - Contemporary Microeconomic Principles Credits: 3 *
- ECON 104 - Contemporary Macroeconomic Principles Credits: 3 *
- 3 credits of SOM 100 or an ANTH, PSYC, or SOCI course (Satisfies the University General Education social and behavioral science requirement.)
- 3 credits of Upper-Level (300-400) ECON (Excludes ECON 385)
  And select one of the following:
  - MATH 108 - Introductory Calculus with Business Applications Credits: 3 *
  - MATH 113 - Analytic Geometry and Calculus I Credits: 4 *
  - MATH 114 - Analytic Geometry and Calculus II Credits: 4 *
  - HNRT 125 - A Liberal Arts Approach to Calculus Credits: 3 *
  - HNRT 225 - Applied Calculus Credits: 3 *
  (MATH 108, MATH 113, or HNRT 125 satisfy the University General Education quantitative reasoning requirement.)
  * With a grade of C or higher

SOM Core Courses (35 Credits)

A grade of C or higher is required in each of the School of Management core courses listed below. Students will not be permitted to make more than three attempts to achieve a C or higher in the following School of Management core courses: ACCT 301, BULE 302, FNAN 301, MGMT 301, MIS 301, MKTG 301, OM 301, and SOM 301. Those who do not successfully complete these core courses within three attempts will be terminated from their major and will not be eligible to receive a degree from the School of Management. For more information about this, see the "Termination from the Major" section under Academic Policies.

- ACCT 203 - Survey of Accounting Credits: 3 or ACCT 204 - Honors Survey of Accounting credits: 3
- ACCT 301 - Financial Accounting and Managerial Decision Making Credits: 3
- BULE 302 - Legal Environment of Business Credits: 3
- FNAN 301 - Financial Management Credits: 3
- MGMT 301 - People and Organizations Credits: 3
- MIS 102 - Spreadsheet Applications for Business Credits: 1
- MIS 301 - Introduction to Business Information Systems Credits: 3
- MKTG 301 - Principles of Marketing Credits: 3
- OM 210 - Statistical Analysis for Management Credits: 4 or OM 211 - Honors Statistical Analysis for Management credits: 4
- OM 301 - Operations Management Credits: 3
- SOM 301 - Business Models: A Communication Approach Credits: 3 (Satisfies the University General Education writing intensive requirement.)
- SOM 498 - Capstone Course: Advanced Business Models Credits: 3 (Satisfies the University General Education synthesis requirement.) *
  * Students must complete all other core courses to be eligible to enroll in SOM 498.

General Electives (20 credits)

General electives may be selected from any University or SOM course, except courses designated for the Business minor (MSOM).

Major Requirements in Accounting

Required Courses (18 Credits)

Note: Completion of ACCT 301 with a grade of B- or higher is required for ACCT 311, 331 and 361.

A grade of C or higher is required in each of the upper-level Accounting major courses listed below. Students will not be permitted to make more than three attempts to achieve a C or higher in the following required Accounting courses: ACCT 311, ACCT 331, ACCT 332, ACCT 351, ACCT 361, and ACCT 461. Those who do not successfully complete these required courses within three attempts will not be eligible to receive a degree in Accounting from the School of Management.

- ACCT 311 - Managerial and Cost Accounting Credits: 3
- ACCT 331 - Intermediate Financial Accounting I Credits: 3
- ACCT 332 - Intermediate Financial Accounting II Credits: 3
- ACCT 351 - Taxation and Managerial Decision Making Credits: 3
- ACCT 361 - Accounting Information Systems Credits: 3
- ACCT 461 - Assurance and Audit Services Credits: 3

Electives

The following courses are available if students wish to take more than the 18 required accounting credits. Materials are available in the Office of Academic and Career Services to provide guidance regarding recommended electives. Students who anticipate taking the CPA, CMA, CIA, or other professional exam should consult the applicable regulations and meet with their advisor. State regulations regarding professional examinations may dictate course selections.

- ACCT 372 - Financial Statement Analysis Credits: 3
- ACCT 411 - Advanced Managerial Accounting Credits: 3
- ACCT 433 - Advanced Financial Accounting Credits: 3
- ACCT 451 - Advanced Federal Taxation Credits: 3
- ACCT 462 - Honors Seminar in Accounting Credits: 3
- ACCT 472 - Government and Not-for-Profit Accounting Credits: 3
- ACCT 491 - Seminar in Accounting Credits: 3
Honors in Accounting

The School of Management Accounting Honors Program provides highly motivated students majoring in accounting with an enriched academic experience integrating curricular, co-curricular and extra-curricular development. Admission to the Honors Program is by invitation only. Students who have been found responsible for an Honor Code violation are not eligible for the program.

Admission Requirements

- ACCT 301 with a grade of A- or better
- Minimum 3.5 cumulative GPA or GPA in the top 10 percent in the accounting major
- Submission of a personal statement/essay
- Two academic/professional references

Curricular Requirements

- Maintain a 3.5 or better GPA in all upper-level accounting courses with no grade less than a B- in any upper-level accounting course
- An overall Mason GPA of 3.0 or better
- ACCT 204 (or ACCT 203 or equivalent) with a minimum A-grade
- OM 211 (or OM 210 or equivalent) with a minimum A-grade
- SOM 301 with a minimum A-grade
- A grade of A- or better in TWO of the following courses: BULE 302, FNAN 301, MGMT 301, MIS 301, MKTG 301, OM 301
- ACCT 462 Honors seminar

Co-Curricular Requirements

The student must complete ONE of the following in addition to the curriculum requirements (for at least 3 credits):

- Study abroad
- Internship
- Research paper/Thesis as an independent study (ACCT 499) course.

Extra-Curricular Requirements

- Participation in at least 3 honors events per semester
- High ethical standards are evidenced by the absence of Honor Code violations. Students are required to immediately report to the Accounting Program Director any Honor Code violation for which they are held responsible.

Total: 120 credits

Finance, BS
The BS in finance (FNAN) prepares students for professional careers by providing a solid foundation in the financial principles necessary to make operating decisions for an organization and in financial market analysis.

Entering the School of Management

Application to the School of Management's (SOM) bachelor of science degree programs is in addition to the George Mason University's admissions process. After acceptance to Mason, students who wish to pursue a major in accounting (ACCT), information systems and operations management (ISOM), finance (FNAN), management (MGMT), or marketing (MKTG) must submit a separate application to the School of Management. Students entering the School of Management are initially designated as "bachelor-pre" (BPRE) until they have successfully completed the SOM application requirements and obtained bachelor of science (BS) degree status.

Acceptance to the SOM bachelor of science program is competitive based on applicants' cumulative GPAs from all institutions attended.

SOM Application Requirements

Students are responsible for the application requirements in effect at the time of application to SOM and should check som.gmu.edu for changes to the requirements. The following requirements are for the academic year 2013-14:

1. Successfully complete at least 48 credits with at least 9 credits earned at Mason prior to the semester of admission.
2. Successful completion of the following courses with a grade of C or better:
   - ACCT 203 - Survey of Accounting Credits: 3 or ACCT 204 - Honors Survey of Accounting credits: 3
   - OM 210 - Statistical Analysis for Management Credits: 4 or OM 211 - Honors Statistical Analysis for Management credits: 4
   - SOM 301 - Business Models: A Communication Approach Credits: 3
   - MATH 108 - Introductory Calculus with Business Applications Credits: 3 or MATH 113 - Analytic Geometry and Calculus I Credits: 4

Deadlines for Application to BS Degree Status

Students should submit their formal application to the School of Management before the deadline of the semester they are completing the requirements listed above. The deadlines are:

- November 1 for acceptance the following spring semester;
- July 1 for acceptance the following fall semester.

For more information about the application process, contact the Office of Academic and Career Services, 703-993-1880, or visit som.gmu.edu.

Academic Advising

Academic planning for undergraduate students is available in the SOM Office of Academic and Career Services, Enterprise Hall, Room 008. Students are encouraged to consult with an advisor regularly. Any student who wishes to change to a major in SOM must consult a SOM academic advisor for degree requirements. For more information about walk-in advising hours or scheduling an appointment, call 703-993-1880, or go to som.gmu.edu.
BU-BS Degree Requirements

SOM students pursuing a BS degree must complete a minimum of 120 credits, including the University General Education requirements, SOM general education, SOM core courses, and major requirements. In addition, the following requirements must be met:

- A minimum of 45 credits at the 300- or 400-level.
- A minimum of 30 credits of SOM core and major courses at Mason.
- At least 9 credits required for the specific major and SOM 498 taken at Mason.
- A grade of C or higher earned in the SOM core and major requirements.

Students should carefully examine prerequisites for SOM courses. Students may be removed from a course if they enroll without having fulfilled the prerequisites.

General Education Requirements (31-32 credits)

SOM students must complete the University General Education requirements, plus 1 additional credit of natural science (the SOM natural science requirement must be fulfilled by completing two 4-credit laboratory sciences).

SOM General Education (15-16 credits)

- ECON 103 - Contemporary Microeconomic Principles Credits: 3 *
- ECON 104 - Contemporary Macroeconomic Principles Credits: 3 *
- 3 credits of SOM 100 or an ANTH, PSYC, or SOCI course (Satisfies the University General Education social and behavioral science requirement.)
- 3 credits of Upper-Level (300-400) ECON (Excludes ECON 385) And select one of the following:
  - MATH 108 - Introductory Calculus with Business Applications Credits: 3 *
  - MATH 113 - Analytic Geometry and Calculus I Credits: 4 *
  - MATH 114 - Analytic Geometry and Calculus II Credits: 4 *
  - HNRT 125 - A Liberal Arts Approach to Calculus Credits: 3 *
  - HNRT 225 - Applied Calculus Credits: 3 *

(MATH 108, MATH 113, or HNRT 125 satisfy the University General Education quantitative reasoning requirement.)

* With a grade of C or higher

SOM Core Courses (35 Credits)

A grade of C or higher is required in each of the School of Management core courses listed below. Students will not be permitted to make more than three attempts to achieve a C or higher in the following School of Management core courses: ACCT 301, BULE 302, FNAN 301, MKTG 301, MIS 301, MKTG 301, OM 301, and SOM 301. Those who do not successfully complete these core courses within three attempts will be terminated from their major and will not be eligible to receive a degree from the School of Management. For more information about this, see the "Termination from the Major" section under Academic Policies.

- ACCT 203 - Survey of Accounting Credits: 3 or ACCT 204 - Honors Survey of Accounting credits: 3
- ACCT 301 - Financial Accounting and Managerial Decision Making Credits: 3
- BULE 302 - Legal Environment of Business Credits: 3
- FNAN 301 - Financial Management Credits: 3
- MGMT 301 - People and Organizations Credits: 3
- MIS 102 - Spreadsheet Applications for Business Credits: 1
- MIS 301 - Introduction to Business Information Systems Credits: 3
- MKTG 301 - Principles of Marketing Credits: 3
- OM 210 - Statistical Analysis for Management Credits: 4 or OM 211 - Honors Statistical Analysis for Management credits: 4
- OM 301 - Operations Management Credits: 3
- SOM 301 - Business Models: A Communication Approach Credits: 3 (Satisfies the University General Education writing intensive requirement.)
- SOM 498 - Capstone Course: Advanced Business Models Credits: 3 (Satisfies the University General Education synthesis requirement.) *
  * Students must complete all other core courses to be eligible to enroll in SOM 498.

**General Electives (20 credits)**

General electives may be selected from any University or SOM course, except courses designated for the Business minor (MSOM).

**Major Requirements in Finance (18 Credits)**

**Required Courses (choose three):**

Note: completion of FNAN 301 with a grade of B- or higher is a required prerequisite for FNAN 302, 311, 321, and 401.

- FNAN 302 - Financial Analysis, Forecasting, and Valuation Credits: 3
- FNAN 311 - Principles of Investment Credits: 3
- FNAN 321 - Financial Institutions Credits: 3
- FNAN 401 - Advanced Financial Management Credits: 3

**Electives (choose three):**

Students may select any 300-400 level FNAN courses (except FNAN 301) to fulfill the elective requirement, including, but not limited to, courses from the following list:

- FNAN 302 - Financial Analysis, Forecasting, and Valuation Credits: 3 (If not taken as a required course.)
- FNAN 311 - Principles of Investment Credits: 3 (If not taken as a required course.)
- FNAN 321 - Financial Institutions Credits: 3 (If not taken as a required course.)
- FNAN 351 - Principles of Real Estate Credits: 3
- FNAN 401 - Advanced Financial Management Credits: 3 (If not taken as a required course.)
- FNAN 411 - Investment Analysis and Portfolio Management Credits: 3
- FNAN 412 - Futures and Options Markets Credits: 3
- FNAN 421 - Money and Capital Markets Credits: 3
- FNAN 430 - Empirical Methods in Finance Credits: 3
- FNAN 432 - Fixed-Income Securities Credits: 3
- FNAN 440 - International Financial Management Credits: 3
- FNAN 451 - Real Estate Finance Credits: 3
- FNAN 454 - Real Estate Development Credits: 3
- FNAN 462 - Honors Seminar in Finance Credits: 3
- FNAN 491 - Special Topics in Finance Credits: 3
Total: 120 credits

Information Systems and Operations Management, BS

Banner Code: BU-BS-ISOM

Associate Dean for Undergraduate Programs
Phone: 703-993-1880
Web: som.gmu.edu

The BS in information systems and operations management (ISOM) prepares students for a range of career options by instilling skills that add value to organizations. Graduates will apply their knowledge of technology and business functions to design and improve existing operational and core business processes. They will integrate different business functions into seamless IT-enabled processes and collaborate with business users in defining requirements, identifying new IT-driven business opportunities, building prototypes to validate operations, and managing complex technology projects. The content of the ISOM major is at the intersection of technology, processes, and people.

Entering the School of Management

Application to the School of Management's (SOM) bachelor of science degree programs is in addition to the George Mason University's admissions process. After acceptance to Mason, students who wish to pursue a major in accounting (ACCT), information systems and operations management (ISOM), finance (FNAN), management (MGMT), or marketing (MKTG) must submit a separate application to the School of Management. Students entering the School of Management are initially designated as "bachelor-pre" (BPRE) until they have successfully completed the SOM application requirements and obtained bachelor of science (BS) degree status.

Acceptance to the SOM bachelor of science program is competitive based on applicants’ cumulative GPAs from all institutions attended.

SOM Application Requirements

Students are responsible for the application requirements in effect at the time of application to SOM and should check som.gmu.edu for changes to the requirements. The following requirements are for the academic year 2013-14:

1. Successfully complete at least 48 credits with at least 9 credits earned at Mason prior to the semester of admission.
2. Successful completion of the following courses with a grade of C or better:
   • ACCT 203 - Survey of Accounting Credits: 3 or ACCT 204 - Honors Survey of Accounting credits: 3
   • OM 210 - Statistical Analysis for Management Credits: 4 or OM 211 - Honors Statistical Analysis for Management credits: 4
   • SOM 301 - Business Models: A Communication Approach Credits: 3
   • MATH 108 - Introductory Calculus with Business Applications Credits: 3 or MATH 113 - Analytic Geometry and Calculus 1 Credits: 4

Deadlines for Application to BS Degree Status

Students should submit their formal application to the School of Management before the deadline of the semester they are completing the requirements listed above. The deadlines are:
November 1 for acceptance the following spring semester; 
July 1 for acceptance the following fall semester.
For more information about the application process, contact the Office of Academic and Career Services, 703-993-1880, or visit som.gmu.edu.

Academic Advising

Academic planning for undergraduate students is available in the SOM Office of Academic and Career Services, Enterprise Hall, Room 008. Students are encouraged to consult with an advisor regularly. Any student who wishes to change to a major in SOM must consult a SOM academic advisor for degree requirements. For more information about walk-in advising hours or scheduling an appointment, call 703-993-1880, or go to som.gmu.edu.

BU-BS Degree Requirements

SOM students pursuing a BS degree must complete a minimum of 120 credits, including the University General Education requirements, SOM general education, SOM core courses, and major requirements. In addition, the following requirements must be met:

- A minimum of 45 credits at the 300- or 400-level.
- A minimum of 30 credits of SOM core and major courses at Mason.
- At least 9 credits required for the specific major and SOM 498 taken at Mason.
- A grade of C or higher earned in the SOM core and major requirements.

Students should carefully examine prerequisites for SOM courses. Students may be removed from a course if they enroll without having fulfilled the prerequisites.

General Education Requirements (31-32 credits)

SOM students must complete the University General Education requirements, plus 1 additional credit of natural science (the SOM natural science requirement must be fulfilled by completing two 4-credit laboratory sciences).

SOM General Education (15-16 credits)

- ECON 103 - Contemporary Microeconomic Principles Credits: 3 *
- ECON 104 - Contemporary Macroeconomic Principles Credits: 3 *
- 3 credits of SOM 100 or an ANTH, PSYC, or SOCI course (Satisfies the University General Education social and behavioral science requirement.)
- 3 credits of Upper-Level (300-400) ECON (Excludes ECON 385)
  And select one of the following:
- MATH 108 - Introductory Calculus with Business Applications Credits: 3 *
- MATH 113 - Analytic Geometry and Calculus I Credits: 4 *
- MATH 114 - Analytic Geometry and Calculus II Credits: 4 *
- HNRT 125 - A Liberal Arts Approach to Calculus Credits: 3 *
- HNRT 225 - Applied Calculus Credits: 3 *
  (MATH 108, MATH 113, or HNRT 125 satisfy the University General Education quantitative reasoning requirement.)
* With a grade of C or higher

SOM Core Courses (35 Credits)
A grade of C or higher is required in each of the School of Management core courses listed below. Students will not be permitted to make more than three attempts to achieve a C or higher in the following School of Management core courses: ACCT 301, BULE 302, FNAN 301, MGMT 301, MKTG 301, OM 301, and SOM 301. Those who do not successfully complete these core courses within three attempts will be terminated from their major and will not be eligible to receive a degree from the School of Management. For more information about this, see the "Termination from the Major" section under Academic Policies.

- ACCT 203 - Survey of Accounting Credits: 3 or ACCT 204 - Honors Survey of Accounting credits: 3
- ACCT 301 - Financial Accounting and Managerial Decision Making Credits: 3
- BULE 302 - Legal Environment of Business Credits: 3
- FNAN 301 - Financial Management Credits: 3
- MGMT 301 - People and Organizations Credits: 3
- MIS 102 - Spreadsheet Applications for Business Credits: 1
- MIS 301 - Introduction to Business Information Systems Credits: 3
- MKTG 301 - Principles of Marketing Credits: 3
- OM 210 - Statistical Analysis for Management Credits: 4 or OM 211 - Honors Statistical Analysis for Management credits: 4
- OM 301 - Operations Management Credits: 3
- SOM 301 - Business Models: A Communication Approach Credits: 3 (Satisfies the University General Education writing intensive requirement.)
- SOM 498 - Capstone Course: Advanced Business Models Credits: 3 (Satisfies the University General Education synthesis requirement.) *
  * Students must complete all other core courses to be eligible to enroll in SOM 498.

General Electives (20 credits)

General electives may be selected from any University or SOM course, except courses designated for the Business minor (MSOM).

Major Requirements in Information Systems and Operations Management (18 Credits)

Required Courses:

- MIS 310 - Database Management Systems Credits: 3
- MIS 330 - Systems Analysis and Design Credits: 3
- OM 493 - Management of Technology Projects Credits: 3

Electives (choose three):

Students have considerable flexibility in their choice of electives and may choose from two tracks of study: one in management information systems, which prepares students for a career in the IT industry; and the other in management of business operations, which develops expertise in areas such as quality, project, and supply chain management and business process analysis. Students are strongly urged to discuss their choice of electives and programs of study with their academic advisor or an ISOM faculty member. It is also strongly recommended that students planning to major in ISOM take MIS 302 as part of their program.

Students may select any 300-400 level MIS or OM courses (except MIS 301 and OM 301) to fulfill the elective requirement, including, but not limited to, courses from the following list:
MIS 302 - Introduction to Programming for Business Applications Credits: 3
MIS 320 - Networks and Security Credits: 3
MIS 411 - Management and Control of Information Systems Credits: 3
MIS 412 - E-Business Systems Development Credits: 3
MIS 430 - Data Warehousing and Data Mining Credits: 3
MIS 435 - Knowledge Management Credits: 3
MIS 440 - E-Commerce Business Models and Applications Credits: 3
MIS 462 - Honors Seminar in Management Information Systems Credits: 3
MIS 491 - Seminar in Management Information Systems Credits: 3
MIS 499 - Independent Study in Management Information Systems Credits: 1-3
OM 320 - Supply Chain Management and E-Business Credits: 3
OM 352 - Methods and Models of Management Science Credits: 3
OM 435 - Business Process Analysis and Simulation Credits: 3
OM 452 - Business Forecasting Credits: 3
OM 456 - Quality Management Credits: 3
OM 462 - Honors Seminar in Operations Management Credits: 3
OM 499 - Independent Study in Operations Management Credits: 1-3

Honors in Information Systems and Operations Management

The School of Management Information Systems and Operations Management Honors Program provides highly motivated students majoring in ISOM with an enriched academic experience integrating curricular, co-curricular and extra-curricular development. Admission to the Honors Program is by invitation only. Students who have been found responsible for an Honor Code violation are not eligible for the program.

Admission Requirements

- Minimum 3.5 cumulative GPA or GPA in the top 10 percent of the ISOM major
- Submission of a personal statement/essay
- Two academic/professional references

Curricular Requirements:

- Maintain a 3.5 or better cumulative GPA or GPA in the top 10 percent of the ISOM major
- ACCT 204 (or ACCT 203 or equivalent) with a minimum A- grade
- OM 211 (or OM 210 or equivalent) with a minimum A- grade
- MIS 301 with a minimum A- grade
- OM 301 with a minimum A- grade
- SOM 301 with a minimum A- grade
- A grade of A- or better in TWO of the following courses: ACCT 301, FNAN 301, MGMT 301, MKTG 301
- One of the two ISOM Honors seminars: MIS 462 or OM 462

Co-Curricular Requirements:

The student must complete ONE of the following in addition to the curriculum requirements (for at least 3 credits):

- Study abroad
• Internship
• Research paper/Thesis as an independent study course

Extra-Curricular Requirements:

• Must show a high degree of engagement in MISOMA or another SOM student org, preferably in a leadership role
• High ethical standards are evidenced by the absence of Honor Code violations. Students are required to immediately report to the ISOM Program Director any Honor Code violation for which they are held responsible.

Total hours: 120

Management, BS

Banner Code: BU-BS-MGMT

Associate Dean for Undergraduate Programs
Phone: 703-993-1880
Web: som.gmu.edu

The BS in management prepares students to take leadership, management, and entrepreneurial roles in the public and private sectors. Students learn such skills as strategic thinking, motivating and managing nationally and internationally diverse workforces, building and leading team efforts, negotiating successfully, and instituting planned change in organizations.

Entering the School of Management

Application to the School of Management's (SOM) bachelor of science degree programs is in addition to the George Mason University's admissions process. After acceptance to Mason, students who wish to pursue a major in accounting (ACCT), information systems and operations management (ISOM), finance (FNAN), management (MGMT), or marketing (MKTG) must submit a separate application to the School of Management. Students entering the School of Management are initially designated as 'bachelor-pre' (BPRE) until they have successfully completed the SOM application requirements and obtained bachelor of science (BS) degree status.

Acceptance to the SOM bachelor of science program is competitive based on applicants' cumulative GPAs from all institutions attended.

SOM Application Requirements

Students are responsible for the application requirements in effect at the time of application to SOM and should check som.gmu.edu for changes to the requirements. The following requirements are for the academic year 2013-14:

1. Successfully complete at least 48 credits with at least 9 credits earned at Mason prior to the semester of admission.
2. Successful completion of the following courses with a grade of C or better:
   • ACCT 203 - Survey of Accounting Credits: 3 or ACCT 204 - Honors Survey of Accounting credits: 3
   • OM 210 - Statistical Analysis for Management Credits: 4 or OM 211 - Honors Statistical Analysis for Management credits: 4
   • SOM 301 - Business Models: A Communication Approach Credits: 3
   • MATH 108 - Introductory Calculus with Business Applications Credits: 3 or MATH 113 - Analytic Geometry and Calculus I Credits: 4
Deadlines for Application to BS Degree Status

Students should submit their formal application to the School of Management before the deadline of the semester they are completing the requirements listed above. The deadlines are:

- November 1 for acceptance the following spring semester;
- July 1 for acceptance the following fall semester.

For more information about the application process, contact the Office of Academic and Career Services, 703-993-1880, or visit som.gmu.edu.

Academic Advising

Academic planning for undergraduate students is available in the SOM Office of Academic and Career Services, Enterprise Hall, Room 008. Students are encouraged to consult with an advisor regularly. Any student who wishes to change to a major in SOM must consult a SOM academic advisor for degree requirements. For more information about walk-in advising hours or scheduling an appointment, call 703-993-1880, or go to som.gmu.edu.

BU-BS Degree Requirements

SOM students pursuing a BS degree must complete a minimum of 120 credits, including the University General Education requirements, SOM general education, SOM core courses, and major requirements. In addition, the following requirements must be met:

- A minimum of 45 credits at the 300- or 400-level.
- A minimum of 30 credits of SOM core and major courses at Mason.
- At least 9 credits required for the specific major and SOM 498 taken at Mason.
- A grade of C or higher earned in the SOM core and major requirements.

Students should carefully examine prerequisites for SOM courses. Students may be removed from a course if they enroll without having fulfilled the prerequisites.

General Education Requirements (31-32 credits)

SOM students must complete the University General Education requirements, plus 1 additional credit of natural science (the SOM natural science requirement must be fulfilled by completing two 4-credit laboratory sciences).

SOM General Education (15-16 credits)

- ECON 103 - Contemporary Microeconomic Principles Credits: 3 *
- ECON 104 - Contemporary Macroeconomic Principles Credits: 3 *
- 3 credits of SOM 100 or an ANTH, PSYC, or SOCI course (Satisfies the University General Education social and behavioral science requirement.)
- 3 credits of Upper-Level (300-400) ECON (Excludes ECON 385)
- And select one of the following:
  - MATH 108 - Introductory Calculus with Business Applications Credits: 3 *
  - MATH 113 - Analytic Geometry and Calculus I Credits: 4 *
  - MATH 114 - Analytic Geometry and Calculus II Credits: 4 *
  - HNRT 125 - A Liberal Arts Approach to Calculus Credits: 3 *
  - HNRT 225 - Applied Calculus Credits: 3 *
(MATH 108, MATH 113, or HNRT 125 satisfy the University General Education quantitative reasoning requirement.)  
* With a grade of C or higher

SOM Core Courses (35 Credits)

A grade of C or higher is required in each of the School of Management core courses listed below. Students will not be permitted to make more than three attempts to achieve a C or higher in the following School of Management core courses: ACCT 301, BULE 302, FNAN 301, MGMT 301, MIS 301, MKTG 301, OM 301, and SOM 301. Those who do not successfully complete these core courses within three attempts will be terminated from their major and will not be eligible to receive a degree from the School of Management. For more information about this, see the “Termination from the Major” section under Academic Policies.

- ACCT 203 - Survey of Accounting Credits: 3 or ACCT 204 - Honors Survey of Accounting credits: 3
- ACCT 301 - Financial Accounting and Managerial Decision Making Credits: 3
- BULE 302 - Legal Environment of Business Credits: 3
- FNAN 301 - Financial Management Credits: 3
- MGMT 301 - People and Organizations Credits: 3
- MIS 102 - Spreadsheet Applications for Business Credits: 1
- MIS 301 - Introduction to Business Information Systems Credits: 3
- MKTG 301 - Principles of Marketing Credits: 3
- OM 210 - Statistical Analysis for Management Credits: 4 or OM 211 - Honors Statistical Analysis for Management credits: 4
- OM 301 - Operations Management Credits: 3
- SOM 301 - Business Models: A Communication Approach Credits: 3 (Satisfies the University General Education writing intensive requirement.)
- SOM 498 - Capstone Course: Advanced Business Models Credits: 3 (Satisfies the University General Education synthesis requirement.) *

* Students must complete all other core courses to be eligible to enroll in SOM 498.

General Electives (20 credits)

General electives may be selected from any University or SOM course, except courses designated for the Business minor (MSOM).

Major Requirements in Management (18 Credits)

Required Courses:

- MGMT 312 - Principles and Practices of Management Credits: 3 OR
- MGMT 321 - Introduction to Human Resource Management Credits: 3

Electives (choose five):

Students may select any 300-400 level MGMT courses (except MGMT 301) to fulfill the elective requirement, including, but not limited to, courses from the following list:

- MGMT 412 - Diversity in Organizations Credits: 3
Notes:

Management majors may focus their careers in several areas. In selecting four elective courses, students may want to consider a likely career path. Recommended courses for three possible careers are provided below.

Human Resource Management

- MGMT 421 - Advanced Human Resource Management Credits: 3
- MGMT 431 - The Legal Environment for Employee and Labor Relations Credits: 3

Front-Line Manager or Management Trainee

- MGMT 412 - Diversity in Organizations Credits: 3
- MGMT 463 - Negotiations in Organizations Credits: 3
- MGMT 464 - Teamwork and Interpersonal Skills Credits: 3

Entrepreneur

- MGMT 451 - New Venture Creation Credits: 3
- MGMT 471 - Competitive Strategy Credits: 3
- BULE 402 - Commercial Law Credits: 3

Honors Seminar:

Students with a GPA of at least 3.00 are offered the opportunity to further distinguish their record by participating in MGMT 462 - Honors Seminar in Management, which addresses a key contemporary management issue in an intensive small group format.

To be eligible for enrollment in MGMT 462, students must be accepted into SOM with a management major, have a cumulative GPA of at least 3.00 with a minimum of 75 semester hours of course work, have a minimum GPA of 3.00 in course work completed for the management major, and be recommended by faculty. The class size of the Honors Seminar will be kept small. If the number of interested and qualified students exceeds the number of available spots, management area faculty will select the most qualified students to participate.

Honors in Management
The Management Honors Program in the School of Management provides highly motivated students majoring in management with an enriched academic experience integrating curricular, co-curricular and extra-curricular development. Admission to the Honors Program is by invitation only. Students who have been found responsible for an Honor Code violation are not eligible for the program.

Admission Requirements

- MGMT 301 with a grade of A or better or faculty recommendation
- MGMT major with at least 2 regular semesters (i.e., a Fall and Spring semester) of coursework to complete prior to graduation
- Minimum 3.5 cumulative GPA or GPA in the top 10 percent in the management major
- Submission of a personal statement
- Two academic/professional references

Curricular Requirements:

- Maintain a 3.5 or better GPA in all upper-level SOM courses with no grade less than a B in any upper-level SOM course
- An overall Mason GPA of 3.0 or better
- ACCT 204 (or ACCT 203 or equivalent) with a minimum A-grade
- OM 211 (or OM 210 or equivalent) with a minimum A-grade
- SOM 301 with a minimum A-grade
- A grade of A- or better in TWO of the following courses: ACCT 301, BULE 302, FNAN 301, MKTG 301, MIS 301, OM 301
- MGMT 462 Honors seminar with a grade of B or better

Co-Curricular Requirements:

The student must complete ONE of the following in addition to the curriculum requirements (for at least 3 credits):

- Study abroad
- Internship
- Research paper/Thesis as an independent study (MGMT 499) course

Extra-Curricular Requirements:

- Must show a high degree of engagement in a SOM student organization, preferably in a leadership role
- High ethical standards are evidenced by the absence of Honor Code violations. Students are required to immediately report to the Management Program Director any Honor Code violation for which they are held responsible.

Total hours: 120

Marketing, BS

Banner Code: BU-BS-MKTG
The BS in marketing prepares students for a broad range of global and domestic career options in market and consumer research, brand management, advertising, customer relationship management, new market and business development, and marketing strategy. Marketing opportunities are increasing in the new economy as firms, government agencies, and nonprofit organizations adopt a market orientation.

A marketing major provides students with a solid background in marketing concepts and practices, with emphasis on market analysis and planning, research, and consumer behavior. Because marketing draws on a variety of disciplines for its foundation and is practiced globally, marketing majors are encouraged to take electives in related fields such as psychology, sociology, economics, public policy, international studies, computer science, and foreign languages.

Entering the School of Management

Application to the School of Management's (SOM) bachelor of science degree programs is in addition to the George Mason University's admissions process. After acceptance to Mason, students who wish to pursue a major in accounting (ACCT), information systems and operations management (ISOM), finance (FNAN), management (MGMT), or marketing (MKTG) must submit a separate application to the School of Management. Students entering the School of Management are initially designated as "bachelor-pre" (BPRE) until they have successfully completed the SOM application requirements and obtained bachelor of science (BS) degree status.

Acceptance to the SOM bachelor of science program is competitive based on applicants’ cumulative GPAs from all institutions attended.

SOM Application Requirements

Students are responsible for the application requirements in effect at the time of application to SOM and should check som.gmu.edu for changes to the requirements. The following requirements are for the academic year 2013-14:

1. Successfully complete at least 48 credits with at least 9 credits earned at Mason prior to the semester of admission.
2. Successful completion of the following courses with a grade of C or better:
   - ACCT 203 - Survey of Accounting Credits: 3 or ACCT 204 - Honors Survey of Accounting credits: 3
   - OM 210 - Statistical Analysis for Management Credits: 4 or OM 211 - Honors Statistical Analysis for Management credits: 4
   - SOM 301 - Business Models: A Communication Approach Credits: 3
   - MATH 108 - Introductory Calculus with Business Applications Credits: 3 or MATH 113 - Analytic Geometry and Calculus I Credits: 4

Deadlines for Application to BS Degree Status

Students should submit their formal application to the School of Management before the deadline of the semester they are completing the requirements listed above. The deadlines are:

- November 1 for acceptance the following spring semester;
- July 1 for acceptance the following fall semester.

For more information about the application process, contact the Office of Academic and Career Services, 703-993-1880, or visit som.gmu.edu.

Academic Advising
Academic planning for undergraduate students is available in the SOM Office of Academic and Career Services, Enterprise Hall, Room 008. Students are encouraged to consult with an advisor regularly. Any student who wishes to change to a major in SOM must consult a SOM academic advisor for degree requirements. For more information about walk-in advising hours or scheduling an appointment, call 703-993-1880, or go to som.gmu.edu.

BU-BS Degree Requirements

SOM students pursuing a BS degree must complete a minimum of 120 credits, including the University General Education requirements, SOM general education, SOM core courses, and major requirements. In addition, the following requirements must be met:
A minimum of 45 credits at the 300- or 400-level.

- A minimum of 30 credits of SOM core and major courses at Mason.
- At least 9 credits required for the specific major and SOM 498 taken at Mason.
- A grade of C or higher earned in the SOM core and major requirements.

Students should carefully examine prerequisites for SOM courses. Students may be removed from a course if they enroll without having fulfilled the prerequisites.

General Education Requirements (31-32 credits)

SOM students must complete the University General Education requirements, plus 1 additional credit of natural science (the SOM natural science requirement must be fulfilled by completing two 4-credit laboratory sciences).

SOM General Education (15-16 credits)

- ECON 103 - Contemporary Microeconomic Principles Credits: 3 *
- ECON 104 - Contemporary Macroeconomic Principles Credits: 3 *
- 3 credits of SOM 100 or an ANTH, PSYC, or SOCI course (Satisfies the University General Education social and behavioral science requirement.)
- 3 credits of Upper-Level (300-400) ECON (Excludes ECON 385) And select one of the following:
  - MATH 108 - Introductory Calculus with Business Applications Credits: 3 *
  - MATH 113 - Analytic Geometry and Calculus I Credits: 4 *
  - MATH 114 - Analytic Geometry and Calculus II Credits: 4 *
  - HNRT 125 - A Liberal Arts Approach to Calculus Credits: 3 *
  - HNRT 225 - Applied Calculus Credits: 3 *

(MATH 108, MATH 113, or HNRT 125 satisfy the University General Education quantitative reasoning requirement.)

* With a grade of C or higher

SOM Core Courses (35 Credits)

A grade of C or higher is required in each of the School of Management core courses listed below. Students will not be permitted to make more than three attempts to achieve a C or higher in the following School of Management core courses: ACCT 301, BULE 302, FNAN 301, MGMT 301, MIS 301, MKTG 301, OM 301, and SOM 301. Those who do not successfully complete these core courses within three attempts will be terminated from their major and will not be eligible to receive a degree from the School of Management. For more information about this, see the "Termination from the Major" section under Academic Policies.
• ACCT 203 - Survey of Accounting Credits: 3 or ACCT 204 - Honors Survey of Accounting credits: 3  
• ACCT 301 - Financial Accounting and Managerial Decision Making Credits: 3  
• BULE 302 - Legal Environment of Business Credits: 3  
• FNAN 301 - Financial Management Credits: 3  
• MGMT 301 - People and Organizations Credits: 3  
• MIS 102 - Spreadsheet Applications for Business Credits: 1  
• MIS 301 - Introduction to Business Information Systems Credits: 3  
• MKTG 301 - Principles of Marketing Credits: 3  
• OM 210 - Statistical Analysis for Management Credits: 4 or OM 211 - Honors Statistical Analysis for Management credits: 4  
• OM 301 - Operations Management Credits: 3  
• SOM 301 - Business Models: A Communication Approach Credits: 3 (Satisfies the University General Education writing intensive requirement.)  
• SOM 498 - Capstone Course: Advanced Business Models Credits: 3 (Satisfies the University General Education synthesis requirement.) *  

* Students must complete all other core courses to be eligible to enroll in SOM 498.

General Electives (20 credits)

General electives may be selected from any University or SOM course, except courses designated for the Business minor (MSOM).

Major Requirements in Marketing (18 Credits)

Required Courses:

• MKTG 312 - Consumer Behavior Credits: 3  
• MKTG 351 - Marketing Research Techniques and Applications Credits: 3  
• MKTG 471 - Marketing Management Credits: 3

Electives (choose three):

Students may select any 300-400 level MKTG courses (except MKTG 301) to fulfill the elective requirement, including, but not limited to, courses from the following list:

• MKTG 311 - Sales Management Credits: 3  
• MKTG 313 - Integrated Marketing Communications Credits: 3  
• MKTG 315 - Internet Marketing Credits: 3  
• MKTG 332 - Retailing and E-Commerce Management Credits: 3  
• MKTG 333 - Business to Business Marketing Credits: 3  
• MKTG 407 - International Marketing Credits: 3  
• MKTG 451 - Competitive Intelligence and Information Security Credits: 3  
• MKTG 455 - Ethnic and Multicultural Marketing Credits: 3  
• MKTG 462 - Honors Seminar in Marketing Credits: 3  
• MKTG 481 - Marketing in the Nonprofit Sector Credits: 3  
• MKTG 491 - Special Topics in Marketing Credits: 3  
• MKTG 499 - Independent Study Credits: 1-3
Notes:

Marketing also offers a specialization in Internet Marketing Resiliency (IMR) within the marketing major. This specialization prepares students to enhance and protect the electronic marketing efforts of their firms. In selecting four courses for the IMR specialization, students should consider those provided below.

Required Course for IMR

For the IMR specialization, students must complete:

- MKTG 451 - Competitive Intelligence and Information Security Credits: 3

Courses for IMR

- MIS 320 - Networks and Security Credits: 3
- MKTG 315 - Internet Marketing Credits: 3
- MKTG 351 - Marketing Research Techniques and Applications Credits: 3 (required for major)
- MKTG 471 - Marketing Management Credits: 3 (required for major)
- MKTG 491 - Special Topics in Marketing Credits: 3

Total hours: 120

Bachelor of Science/Accelerated Master of Science

Accounting, BS/Accounting, Accelerated MS

Return to: School of Management

Phone: 703-993-1880

E-mail: msa@gmu.edu

Web: http://som.gmu.edu/msa

Highly-qualified Mason Accounting majors may apply to the accelerated master's degree program and obtain both bachelor's and master's degrees in accounting after satisfactory completion of a total of 144 credits. Graduates will be exceptionally well-prepared for professional school or a PhD program in accounting or a related discipline.

In the accelerated program, six credits of ACCT 600 level courses can be used to meet both bachelor's and master's degree requirements. These six credits will replace six credits of general electives in the student's undergraduate program. ACCT 600 level courses that can be selected for the accelerated program include ACCT 611, ACCT 651, ACCT 672, and ACCT 692.

This program of study is offered by the Accounting Area within the School of Management.

Application Requirements

Applicants to accelerated master's programs must have completed at least 75 credits that apply to their undergraduate degree (with at least 24 credits earned at Mason).
Students submit an application to the MSA program director with any other supplementary application materials requested by the program. The application includes the proposed conferral date for the undergraduate degree and the two graduate courses that are to be applied to the undergraduate degree.

Admission requirements are as follows: 1) A minimum GPA of 3.00 in at least four accounting courses (e.g., ACCT 203, ACCT 301, ACCT 331 and ACCT 332) with no grade less than a B- in those accounting courses 2) Two recommendation letters from full-time Mason accounting faculty 3) Review and approval by the MSA program director. GMAT is not required.

Interested students should contact the MSA program office for more details about the application process.

Degree Requirements

Students are responsible for familiarization and compliance with the university's Academic Policies contained in this catalog.

On completion and conferral of the undergraduate degree in the semester indicated in the application, the student submits the Bachelor's/Accelerated Master's Transition Form and is admitted to graduate standing. As graduate students, accelerated master's students have an advanced standing. They must meet all master's degree requirements except for the two courses (6 credits) they completed as undergraduates. Students must begin their master's program the semester immediately following conferral of the undergraduate degree.

Reserve Graduate Credit

Students may take up to 6 additional graduate credits as reserve graduate credit. These credits do not apply to the undergraduate degree. The ability to take courses for reserve graduate credit is available to all high achieving undergraduates with the permission of the program director. Permission to take a graduate course for reserve graduate credit is normally granted only to Mason seniors within 15 hours of graduation. To apply these credits to the master's degree, students must request that the credits be moved from the undergraduate degree to the graduate degree using the Bachelor's/Accelerated Master's Transition Form.

Graduate Certificate

Forensic Accounting Graduate Certificate

Banner Code: BU-CERG-FACC

Phone: 703-993-1880

Email: msa@gmu.edu

The 15-credit Graduate Certificate in Forensic Accounting program provides an opportunity for students to acquire education in the emerging field of forensic accounting. Students with a bachelor's degree in accounting can also use the certificate program as a means of obtaining the necessary 150 hours of academic credit to qualify for a CPA license.

The Forensic Accounting Graduate Certificate may be pursued on a part-time basis. Maintaining full-time status is not guaranteed.

Admissions Requirements

In order to apply for the Graduate Certificate in Forensic Accounting program applicants are required to have, at a minimum, a U.S. equivalent bachelor's degree from an accredited college or university. Applicants must hold a bachelor's degree with a preferred GPA of 3.0 or higher on a 4.0 scale. The program is open to individuals holding degrees in any major although degrees
in accounting are preferred. All students registering in SOM graduate courses must have graduate standing. Nondegree student status is not available.

Admission requirements include:

- Application form and application fee.
- Bachelor's degree from an accredited college or university.
- Current resume.
- Official copy of transcripts from all colleges and universities attended in the United States and abroad. International students must also submit a translation of all international transcripts into English, if applicable.
- English proficiency standards as required of all Mason graduate students. International students are required to take an English proficiency examination and meet minimum scores set by Mason in order to be considered for admission. The TOEFL exam can be used to meet this requirement. The minimum TOEFL scores are: 570 on paper-based exams; 230 on the computer-based exam; or 88 with a minimum of 20 on each of the subsections on the Internet-based exam.

Certificate Requirements

Students are responsible for familiarization and compliance with the university's Graduate Policies contained in this catalog. A maximum of 3 graduate credits taken at another institution can be transferred to the graduate certificate. The time limit for completion is four years from the date of admission to the graduate certificate. Students must have a minimum GPA of 3.0 to complete the certificate.

Required Courses (15 credits)

- ACCT 737 - Fraud and the Law Credits: 3
- ACCT 738 - Advanced Topics in Fraud Credits: 3
- ACCT 744 - Fraud Deterrence and Detection Credits: 3 or CFRS 770 - Fraud and Forensics in Accounting Credits: 3
- CFRS 500 - Introduction to Forensic Technology and Analysis Credits: 3
- CFRS 661 - Digital Media Forensics Credits: 3 or CFRS 660 - Network Forensics Credits: 3

Note:

Students in the MS in Accounting (MSA) program are required to take ACCT 744 and can take ACCT 737 and ACCT 738 as electives. These students need only complete two courses (CFRS 500 and CFRS 661 or CFRS 660) outside of the MSA program to obtain the Forensic Accounting Graduate Certificate.

Students in the MS in Computer Forensics program are required to take CFRS 500 and CFRS 660/661 and can take CFRS 770 as an elective. These students need only complete two courses (ACCT 737 and ACCT 738) outside of their master's program to obtain the Forensic Accounting Graduate Certificate.

Total: 15 credits

Master of Arts

Business Management, MA (pending SCHEV approval)

Banner Code: BU-MA-BMGT
Note: As of catalog publication in April, the program described below has been approved by the Board of Visitors and sent to the State Council for Higher Education in Virginia for consideration as a new degree program. The university cannot accept applications or enroll students in this program until SCHEV approval has been granted. Check the college/school web site for current program status.

Phone: 703-993-1880
Email: mamgt@gmu.edu

The Master of Arts in Business Management prepares recent graduates of non-business majors for success in business fields. The program offers the fundamentals of business management in a global environment and is composed of the core discipline areas common to all business graduate programs that are accredited by the Association to Advance Collegiate Schools of Business (AACSB). The MA in Business Management is a full time program. Students will enter as a cohort and complete all degree requirements within 12 months.

Admissions Requirements

All students registering for SOM graduate courses must have graduate standing. Non degree student status is not available. Admission to the Master of Arts in Business Management is highly competitive. Applicants must have completed an undergraduate degree program within 24 months of when they would enroll in the program.

Applicant requirements include:

- Application form and application fee
- Bachelor's degree from an accredited college or university
- Overall GPA of at least 3.2 (on a 4.0 scale) for all undergraduate courses taken at an accredited college or university
- Two official copies of transcripts from all colleges and universities attended in the United States and abroad.
- Two letters of recommendation, one of which must be from a professor in the applicant's major department
- Goal statement indicating how applicant will benefit from the program
- English proficiency standards as required of all Mason graduate students. In particular, applicants who have earned a bachelors, masters, or doctoral degree from a regionally accredited university in the United States, Canada (excluding the province of Quebec), United Kingdom, Ireland, Australia, and New Zealand are considered to have met that standard. All other applicants are required to take an English proficiency examination and meet minimum scores set by Mason in order to be considered for admission. The TOEFL or IELTS exams can be used to meet this requirement. The minimum scores are: TOEFL: IBT (88 total with 20 points minimum in each section); CBT (230); and PBT(570); IELTS - Academic: 6.5 total band score.
- GMAT (recommended score: 550) or GRE (recommended score: 303)
- A current resume

Degree Requirements

Students are responsible for familiarization and compliance with the Graduate Policies contained in this catalog.

Required Courses: 30 credits

Prerequisite: SOM 301 or approved equivalent

- BMGT 603 - Economics for Successful Firm Management Credits: 3
- BMGT 612 - Performance Evaluation Through Cost Management Credits: 1.5
- BMGT 613 - Financial Reporting and Firm Analysis Credits: 3
- BMGT 623 - Marketing and Firm Performance Credits: 3
Total: 30 credits

Master of Business Administration

Business Administration, MBA

Banner Code: BU-MBA-BUAD

Phone: 703-993-1880
E-mail: mba@gmu.edu

The Mason MBA Program provides a high-level professional education in business administration. It is offered in both part- and full-time formats. The curriculum integrates functional areas with an emphasis on group work, information technology, and the global business environment.

Admissions Requirements

All students registering for SOM graduate courses must have graduate standing. Non degree student status is not available. Admission is highly competitive and available to all qualified candidates without regard to prior academic major. No previous course work in business administration is required, but a four-year undergraduate degree and a college-level calculus course must be successfully completed before matriculation. Admission is based on a combination of academic, professional, and leadership factors. No portion of the portfolio is considered more important than another; careful consideration is given to every part of the application packet to ensure that the Admission Committee has an accurate profile of a candidate’s professional and academic qualifications. For information on the GMAT, go to www.mba.com. A minimum of two years of professional work experience is recommended before entering the program.

The part-time MBA format commences fall semesters. Priority is given to applicants submitting their application by March 15 for the following fall semester. Applications for admission received after March 15 will be considered on a space-available basis. The full-time MBA format begins in the fall and has an application deadline of January 15. International students have an application deadline of January 15.

Applicant requirements include:

- Application form and application fee.
- Bachelor's degree from an accredited college or university.
- Overall GPA of at least 3.2 (on a 4.0 scale) for all undergraduate courses taken at an accredited college or university.
- Two official copies of transcripts from all colleges and universities attended in the United States and abroad.
- Two professional letters of recommendation.
- Goal statement indicating how applicant will benefit from the program.
- A current resume.
• English proficiency standards as required of all Mason graduate students. In particular, applicants who have earned a bachelors, masters, or doctoral degree from a regionally accredited university in the United States, Canada (excluding the province of Quebec), United Kingdom, Ireland, Australia, and New Zealand are considered to have met that standard. All other applicants are required to take an English proficiency examination and meet minimum scores set by Mason in order to be considered for admission. The TOEFL or IELTS exams can be used to meet this requirement. The minimum scores are: TOEFL: IBT (88 total with 20 points minimum in each section); CBT (230); and PBT(570); IELTS- Academic: 6.5 total band score.
• GMAT (recommended score: 550) or GRE (recommended score: 303).
• Two years work experience.

Degree Requirements

Students are responsible for familiarization and compliance with the Graduate Policies contained in this catalog.

Program Information

The MBA core curriculum effectively integrates functional areas with the use of IT, oral and written communication, and teamwork. The MBA program requires 48 credits: 33 credits of core courses and 15 credits of elective courses. Students complete the degree program in two years. Because of the cohort structure, part time students commit to attending classes a minimum of two times per week and full-time students attend classes during the day four days each week. Part-time students are required to enroll in classes during the summer session to complete their degrees in a timely basis.

Core Courses: 33 credits

33 credits of core courses are completed prior to enrollment in electives. Part-time students enroll in at least 6 credits per semester and at least 3 credits each summer. Full-time students enroll in 12 credits per semester, with no expectation for enrollment in the summer session. All MBA students complete the following core courses:

• 3 credits of MBA 603 - Managerial Economics and Decisions of the Firm Credits: 0-3
• MBA 612 - Managing Costs and Evaluating Performance Credits: 1.5
• 3 credits of MBA 613 - Financial Reporting and Decision Making Credits: 0-3
• 3 credits of MBA 623 - Marketing Management Credits: 0-3
• 3 credits of MBA 633 - Statistics for Business Decision Making Credits: 0-3
• 3 credits of MBA 638 - Operations Management Credits: 0-3
• 3 credits of MBA 643 - Managerial Finance Credits: 0-3
• 3 credits of MBA 653 - Organizational Behavior Credits: 0-3
• MBA 662 - Management of Information Technology Credits: 1.5
• MBA 673 - Legal Environment for Management Credits: 1.5
• MBA 674 - Ethical and Social Environment of Business in the 21st Century Credits: 1.5
• 3 credits of MBA 678 - Strategy and Organizational Leadership Credits: 0-3
• 3 credits of MBA 795 - Global Business Perspectives Credits: 0-3
Travel outside the United States is required. Most travel costs are included in the MBA program tuition and fees.

Elective Courses: 15 credits

After completing the core courses, students must complete 15 credits of market-driven elective courses (MBA 700-level). A limited number of courses from outside the MBA Program or through the Consortium of Universities of the Washington Metropolitan Area may be taken as electives with the permission of the program director.
Students may use all or some of their elective credits to fulfill a concentration or a specialization as follows:

**Concentrations: 12-15 credits**

MBA students may use electives to complete courses leading to a concentration in accounting, entrepreneurship, financial management, information systems management, marketing, or project management.

▲ Accounting (ACCT)

**Required courses**

- MBA 741 or ACCT 741 - Information Technology Auditing Credits: 3
- MBA 742 or ACCT 742 - Corporate Governance and Ethics Credits: 3
- MBA 743 or ACCT 743 - Corporate Financial Reporting Credits: 3
- MBA 744 or ACCT 744 - Fraud Deterrence and Detection Credits: 3

One course from the following:

All variable credit courses (0-3) will be offered at 3 credits.

- MBA 701 - Business Analysis and Valuation Credits: 0-3
- MBA 702 - Corporate Financial Policy Credits: 0-3
- MBA 703 - Financial Markets Credits: 0-3
- MBA 706 - Investment Analysis Credits: 0-3
- MBA 708 - Taxes and Business Credits: 0-3
- MBA 717 - International Finance Credits: 0-3

Total: 15 credits

▲ Entrepreneurship (ENTR)

Four courses from the following list. All variable credit courses (0-3) will be offered at 3 credits.

- MBA 705 - Venture Capital and Private Finance Credits: 0-3
- MBA 711 - Entrepreneurship Credits: 0-3
- MBA 714 - Managing Growth of Small Businesses Credits: 0-3
- MBA 719 - Entrepreneurship Laboratory Credits: 1.5 (may be taken twice)
- MBA 752 - Turning Ideas into Successful Companies Credits: 0-3

Total: 12 credits

▲ Financial Management (FM)

Five courses from the following list. All variable credit courses (0-3) will be offered at 3 credits.

- MBA 701 - Business Analysis and Valuation Credits: 0-3
- MBA 702 - Corporate Financial Policy Credits: 0-3
- MBA 703 - Financial Markets Credits: 0-3
- MBA 704 - Risk Management and Financial Innovation Credits: 0-3
- MBA 705 - Venture Capital and Private Finance Credits: 0-3
- MBA 706 - Investment Analysis Credits: 0-3
- MBA 717 - International Finance Credits: 0-3
- MBA 746 - Real Estate Analysis and Valuation Credits: 0-3
- MBA 747 - Real Estate Finance Credits: 0-3
- MBA 748 - Real Estate Investment Credits: 0-3

Total: 15 credits

▲ Information Systems Management (ISM)

Four courses from the following list. All variable credit courses (0-3) will be offered at 3 credits:

- MBA 731 - Business Application and Life Cycle Management Credits: 0-3
- MBA 732 - Knowledge Management Credits: 0-3
- MBA 734 - Electronic Commerce and E-Business Credits: 0-3
- MBA 735 - Systems Thinking for Business Performance Credits: 0-3
- MBA 737 - Information Technology Governance and Policy Credits: 0-3
- MBA 738 - Business Intelligence and Data Mining Credits: 0-3

Total: 12 credits

▲ Marketing (MKTG)

All variable credit courses (0-3) will be offered at 3 credits.

- MBA 718 - International Marketing Credits: 0-3
- MBA 721 - Marketing Decision Systems Credits: 0-3
- MBA 722 - Consumer Behavior Credits: 0-3
- MBA 724 - Marketing Communications Credits: 0-3

Total: 12 credits

▲ Project Management (PMGT)

All variable credit courses (0-3) will be offered at 3 credits.

Required courses

- MBA 712 - Project Management Credits: 0-3
- MBA 715 - Advanced Project and Program Management Credits: 0-3

Two courses from the following:

- MBA 725 - Leadership Credits: 0-3
- MBA 726 - Negotiations Credits: 0-3
- MBA 731 - Business Application and Life Cycle Management Credits: 0-3
• MBA 737 - Information Technology Governance and Policy Credits: 0-3

Total: 12 credits

Specializations: 9-15 credits

MBA students may use electives to complete courses leading to a specialization. Specializations are not formally declared and are not recognized on a student's transcript.

International Business

Choose any three courses from the following list to complete 9 credits.

• MBA 716 - International Business Strategy Credits: 0-3
• MBA 717 - International Finance Credits: 0-3
• MBA 718 - International Marketing Credits: 0-3
• MBA 723 - Supply Chain Management Credits: 0-3
• MBA 734 - Electronic Commerce and E-Business Credits: 0-3
• MBA 745 - International Financial Reporting Credits: 0-3

Tourism and Events Management

The Tourism and Events Management specialization consists of 12 hours of required courses and 3 hours of elective.

Required courses

• MBA 721 - Marketing Decision Systems Credits: 0-3 or MBA 722 - Consumer Behavior Credits: 3
• TOUR 710 - Advanced Administrative Practices in Tourism and Events Credits: 3
• TOUR 712 - Marketing Tourism and Event Planning Services Credits: 3
• TOUR 720 - Major Events and Convention Management Credits: 3

One course from the following:

• MBA 711 - Entrepreneurship Credits: 0-3
• MBA 712 - Project Management Credits: 0-3
• MBA 713 - Human Resource Management Credits: 0-3
• MBA 714 - Managing Growth of Small Businesses Credits: 0-3
• MBA 718 - International Marketing Credits: 0-3
• MBA 724 - Marketing Communications Credits: 0-3
• MBA 725 - Leadership Credits: 0-3
• MBA 726 - Negotiations Credits: 0-3

Total: 48 credits

Executive MBA

Banner Code: BU-MBA-BUEX
Participants

The Executive MBA is designed for those with a minimum of 7 to 10 years of significant business and professional experience. Participants must have the support of their organizations to attend Friday classes every other week and participate in global and domestic residencies. Sponsoring organizations have included ATPCO, AMS, Apple Federal Credit Union, Blue Cross/Blue Shield, Booz Allen Hamilton, Case New Holland, the Center for Naval Analyses, Cisco, CSC, DISA, Department of Defense, Department of Homeland Security, EDS, Ernst & Young, Exxon-Mobil, Fannie Mae, Freddie Mac, GE Healthcare Financial Services, General Dynamics, HP, IBM, KPMG, Level (3) Communications, Lockheed Martin, ManTech International, Marriott, Nextel, Northrop Grumman, OPM, Orbital Sciences, PamAmSat, Pinkerton Computer Consultants, Raytheon, SAIC, SRA, Sunrise Senior Living, USA Today, the U.S. Army, the U.S. Marine Corps, the U.S. Navy, the U.S. Postal Service, Verizon, World Bank, WR Systems, and Xerox, among others.

Diversity in Learning

Students encounter multiple approaches to learning in the Executive MBA Program. Classroom discussions, team projects, individual reading, team presentations, team problem solving, business simulations, business case analyses, coaching, and domestic and international residencies all contribute to the creative learning environment delivered by the Mason Executive MBA Program.

Cohorts

There are two courses of study a student may take in the Executive MBA Program: the Global Executive MBA Cohort and the National Defense Executive MBA Cohort. Information on cohort courses and schedules may be obtained from the EMBA program office.

Global Executive MBA

The Global Executive MBA cohort completes the program in 18 months, including a summer break between the first and second year. Students attend classes one day per week, on alternating Fridays and Saturdays for four semesters. The program’s focus is management decision making, strategic management of business resources, and leadership. Dedicated faculty, an innovative and relevant curriculum, a global focus, a student-centered program team, and great colleagues contribute to the learning experience of a lifetime. The program is carefully designed to help students master a broad range of executive-level competencies while cultivating expert business-related knowledge of the global economy.

Global EMBA Residencies

Five residency sessions complete the Global EMBA experience:

- **Opening Residency:** The Leader’s View—Focuses on developing a broad understanding of the economic environment of business and the development of high-performing teams.
- **Global Residency:** Global Business Strategies—Encompasses a trip to selected international locations. Professors from local universities provide an introduction to the business environment of each country visited and help prepare students for company visits and meetings with executives from local and multinational firms. Company presentations are delivered by directors and top managers. Housing is provided in business-class hotels, and time is provided for cultural excursions and other activities.
Mid Program Residency: Professional Advancement and Organization Performance—Provides a comprehensive integrated learning experience designed to draw from the first year’s courses and prepare the student for the second year. The residency includes a workshop that pertains to career planning and development.

New York Residency: Financial Markets—Encompasses a trip to New York which concludes EMBA 703 Financial Markets. During this residency, students hear from top managers of financial institutions and visit a number of those institutions to develop a comprehensive understanding of worldwide financial markets.

Oxford Residency: Understanding the European Union—Encompasses a trip to Oxford, England. Includes faculty presentations on the European Union and the variety of European cultures and approaches to doing business worldwide. Site visits to local companies in London are also organized with presentations from senior managers and directors.

National Defense Executive MBA

The National Defense Executive MBA cohort completes the program in 17 months starting in the fall semester in the first year, continuing with a compressed summer session the following year and through December of the second year. Students attend classes one day per week, on alternating Fridays and Saturdays for the first year of the program, taking all courses with the Global EMBA students. The second year courses are tailored to the needs of defense industry professionals and meet Fridays and Saturdays every other week. Dedicated faculty from the Mason School of Management and adjunct faculty working in specialty areas of the defense sector; as well as accomplished government, military, and corporate guest speakers, technical experts, and GMU alumni employed in the defense industry; are a part of the National Defense EMBA. The dynamic learning environment brings contemporary challenges of the defense industry right into the classroom.

National Defense EMBA Residencies

Three residency sessions complete the National Defense EMBA experience:

- **Opening Residency**: The Leader’s View—Focuses on developing a broad understanding of the economic environment of business and the development of high-performing teams.
- **Interim Session Residency**: Strategic Negotiation Workshop and Site Visits and Seminars related to “Congress and the Government Budgeting Process”
- **Leader One Workshop**: Final Leadership Residency & Capstone Project Presentations
- **Global Residency**: Global Business Strategies—Encompasses a trip to selected international locations. Professors from local universities provide an introduction to the business environment of each country visited and help prepare students for company visits and meetings with executives from local and multinational firms. Company presentations are delivered by directors and top managers. Housing is provided in business-class hotels, and time is provided for cultural excursions and other activities.

Degree Requirements

The EMBA program requires successful completion of 48 credit hours of coursework including for-credit residencies. Students are responsible for familiarization and compliance with the university's Graduate Policies contained in this catalog.

Eight Modules

During each seven-week module, students complete two to three courses in an applications-oriented sequence that takes them from developing core management skills through the understanding and application of the tools of business performance to the talents of leadership.

**Module 1 and 2:**
The Economic and Analytical Foundations of Management
Module 3:
Managing Resources for Performance

Module 4:
The Global Perspective

Modules 5 and 6:
Sustainable Business Performance

Modules 7 and 8:
Leadership and Strategy

Required Courses

- EMBA 603 - Managerial Economics Credits: 3
- EMBA 612 - Cost Accounting Credits: 1-3 (must take 3 credits)
- EMBA 613 - Financial Accounting Credits: 3
- EMBA 623 - Marketing Credits: 3
- EMBA 633 - Applied Business Decision Models Credits: 3
- EMBA 638 - Services and Operations Management Credits: 3
- EMBA 643 - Managerial Finance Credits: 3
- EMBA 653 - Organizational Behavior and Teams Credits: 3
- EMBA 660 - Management of Information Technology Credits: 3
- EMBA 673 - Legal Environment for Executives Credits: 1.5
- EMBA 674 - Business Ethics Credits: 1-3 (must take 1.5 credits)
- EMBA 678 - Business Strategy Credits: 3
- EMBA 703 - Financial Markets Credits: 0-3 (must take 3 credits)
- EMBA 710 - Global Macro Economics Credits: 1.5
- EMBA 718 - Leadership and Change Management Credits: 3
- EMBA 735 - Systems Thinking and Dynamics Credits: 1-3 (must take 1.5 credits)
- EMBA 751 - Corporate Global Strategy and Capstone Credits: 1.5-3 (must take 3 credits)
- EMBA 795 - Global Residency Credits: 0-3 (must take 3 credits)

Total: 48 credits

Master of Science

Accounting, MS

Banner Code: BU-MS-ACCT

Phone: 703-993-1880
E-mail: msa@gmu.edu

The MS in accounting (MSA) is designed to meet the special needs of new professionals entering the accounting profession. The program allows students to earn a state-of-the-art graduate degree in accounting and also meet requirements to take the Uniform CPA Examination in Virginia and in most other states. The program integrates fundamental business skills and specialized knowledge and skills required by the accounting profession. The MSA program is pursued on a full-time only basis.
An accelerated master's option is available to students in the bachelor's program. See Accounting, BS/Accounting, Accelerated MS for requirements.

**Admission Requirements**

All students registering for SOM graduate courses must have graduate standing. Nondegree student status is not available. Admission is highly competitive and available to qualified candidates holding a baccalaureate degree in accounting from an AACSB-accredited business school. Applicants are evaluated primarily on their undergraduate record and GMAT performance. For information on the GMAT, go to [www.mba.com](http://www.mba.com). Professional work experience is not required. Students begin the program in the fall or spring semester. The priority deadline for application is March 15 for the fall semester and October 15 for the spring semester.

Applicant requirements include:

- Application form and application fee
- Bachelor's degree in Accounting from an accredited college or university
- Overall GPA of at least 3.2 (on a 4.0 scale) for all undergraduate courses taken at an accredited college or university
- Two official copies of transcripts from all college and universities attended in the United States and abroad
- Two letters of recommendation
- Goal statement indicating how applicant will benefit from the program
- English proficiency standards as required of all Mason graduate students. In particular, applicants who have earned a bachelors, masters, or doctoral degree from a regionally accredited university in the United States, Canada (excluding the province of Quebec), United Kingdom, Ireland, Australia, and New Zealand are considered to have met that standard. All other applicants are required to take an English proficiency examination and meet minimum scores set by Mason in order to be considered for admission. The TOEFL or IELTS exams can be used to meet this requirement. The minimum scores are: TOEFL: IBT (88 total with 20 points minimum in each section); CBT (230); and PBT(570); IELTS- Academic: 6.5 total band score.
- GMAT (recommended score: 550) or GRE (recommended score: 303)
- Current resume

**Degree Requirements**

Students are responsible for familiarization and compliance with the university's Graduate Policies contained in this catalog.

**Required Courses (15 credits)**

- ACCT 633 - Identifying and Resolving Advanced Issues in Financial Accounting Credits: 3
- ACCT 651 - Identifying and Resolving Advanced Issues in Taxation Credits: 3
- ACCT 690 - Professional Accounting Colloquium Credits: 3
- ACCT 744 - Fraud Deterrence and Detection Credits: 3
- ACCT 795 - Global Accounting Environment Credits: 3

**Electives Courses (15 credits)**

Select 15 credits from the following. A maximum of six credits may be from the listed MBA & ISA courses.

- Any 600- or 700-level ACCT course that does not duplicate coursework taken as an undergraduate.
- MBA 638 - Operations Management Credits: 0-3
- MBA 643 - Managerial Finance Credits: 0-3
- MBA 703 - Financial Markets Credits: 0-3
- MBA 706 - Investment Analysis Credits: 0-3
- MBA 717 - International Finance Credits: 0-3
- ISA 652 - Security Audit and Compliance Testing Credits: 3

Total: 30 credits

Management of Secure Information Systems, MS (SOM)

Banner Code: BU-MS-MSIS

Phone: 703-993-1880
Email: cyber@gmu.edu

The Executive Management of Secure Information Systems MS, an interdisciplinary program offered by the Volgenau School of Engineering, the School of Management, and the School of Public Policy; prepares professionals for the challenges of modern computerized information systems that have become increasingly complex and vulnerable to cyber attacks, resulting in a significant number of government regulations. Consequently, those responsible for the safe, secure, and efficient operation of such systems need to grasp their technical aspects and be familiar with both the principles of management and the public policy impact of regulatory and organizational decisions.

The program is run as a cohort with no electives. The entire program has a duration of 16 months including about seven days of study abroad, which is included in the tuition. Applicants to the program are expected to have at least three years of full-time relevant work experience.

Admission Requirements

Applicant requirements include:

- Application form and application fee.
- A bachelor’s degree from a recognized university or an approved institution, recognized qualifications equivalent to a degree.
- Official copy of transcripts from all colleges and universities attended in the United States and abroad.
- Two professional letters of recommendation.
- Goals statement (statement of how and why applicants would benefit from the program).
- A current resume.
- English proficiency standards as required of all Mason graduate students. In particular, applicants who have earned a bachelors, masters, or doctoral degree from a regionally accredited university in the United States, Canada (excluding province of Quebec), United Kingdom, Ireland, Australia, and New Zealand are considered to have met that standard. All other applicants are required to take an English proficiency examination and meet minimum scores set by Mason in order to be considered for admission. The TOEFL or IELTS exams can be used to meet this requirement. The minimum scores are: TOEFL: IBT (88 total with 20 points minimum in each section); CBT (230); and PBT (570); IELTS – Academic: 6.5 total band score.
- GMAT (recommended score: the mean GMAT scores of an entering class should meet or exceed 550 with an individual minimum of 500) or GRE (recommended score: 1200). The GMAT or GRE may be waived if the applicant’s record demonstrates the ability to succeed in a competitive and quantitative program.
- A minimum of three years of significant full-time work experience is required.

MS-MSIS Degree Requirements
Students are responsible for familiarization and compliance with the Academic Policies in this catalog.

Required Courses (36 credits)

- MSEC 510 - Foundations of Cyber Security Credits: 2
- MSEC 511 - Security Practices in the Enterprise Credits: 2
- MSEC 520 - Networking Principles Credits: 1
- MSEC 620 - Networking Security Credits: 2
- MSEC 630 - Secure Information System Governance, Regulation, and Compliance Credits: 2
- MSEC 640 - Privacy and Ethics in an Interconnected World Credits: 2
- MSEC 641 - Enterprise Security Threats Credits: 1
- MSEC 642 - Enterprise Security Technologies Credits: 2
- MSEC 650 - Seminar: Enterprise Security Case Studies Credits: 1
- PUBP 610 - Organizations, Management, and Work: Theory and Practice Credits: 2
- PUBP 611 - Critical Infrastructure Protection in Theory, Policy and Practice Credits: 2
- TECM 610 - Communications and Leadership Credits: 2
- TECM 615 - Decision Making Using Accounting and Financial Data Credits: 3
- TECM 620 - Economics of Technology Management Credits: 2-3
- TECM 640 - Management of Consulting and Technical Professionals Credits: 1-3
- TECM 703 - Technology Assessment, Evaluation, and Investment Credits: 3
- TECM 735 - Technology Management Capstone Project Credits: 1-4 or MSEC 720 - Capstone Project in Management of Secure Information Systems Credits: 1-3
- TECM 750 - Global IT Management Credits: 1-4 or MSEC 710 - Global Residency Credits: 1-4

Real Estate Development, MS

Banner Code: BU-MS-REAL

703-993-1880
mred@gmu.edu The MS in Real Estate Development program is designed to provide real estate professionals with the knowledge essential to assume increasingly responsible leadership roles within the development industry. Areas of emphasis include real estate finance, investment analysis, project management, sustainability and economic development. The distinctiveness of the Master's program in Real Estate Development offered by Mason lies in its multi-disciplinary curriculum, which incorporates coursework from the domains of business, engineering and public policy. Created in consultation with leading real estate development companies, the curriculum has been designed to strengthen the employment potential and upward mobility of industry professionals working in the areas of development, architecture, engineering, public planning, construction management, real estate finance, mortgage lending, property management, real estate law and related fields.

Admission Requirements

Applicants must hold a baccalaureate degree from an accredited institution and have earned a GPA of 3.00 or higher. In addition, the real estate graduate program requires students to have a basic understanding of real estate development earned through industry experience and/or relevant undergraduate coursework.

Degree Requirements

The 36 hour curriculum includes 18 hours of required courses and 18 hours of electives. Students are responsible for familiarization and compliance with the university's AP.6 Graduate Policies contained in this catalog.
Required Courses (18 credits)

- REAL 500 - Real Estate Development Fundamentals Credits: 3
- REAL 502 - Real Estate Client Leadership and Project Management Credits: 3
- REAL 630 - Innovative Land Use, Approvals and Real Estate Development Credits: 3
- REAL 750 - MSRED Capstone Credits: 3
- GSOM 746 - Real Estate Analysis and Valuation Credits: 3
- GSOM 747 - Real Estate Finance Credits: 3

Elective Courses (18 credits)

Electives may be selected from other REAL courses (see below) and available offerings in appropriate areas including the School of Public Policy; the School of Management; the Sid and Reva Dewberry Department of Civil, Environmental, and Infrastructure Engineering; the Department of Geography and Geoinformation Science; and the Department of Environmental Science and Policy.

Students wishing to choose a field for emphasis may select, with the approval of a faculty advisor, 3 elective courses within the field that together constitute an emphasis area. With prior approval of an advisor, students may design their own emphasis. The following are examples of fields for emphasis and courses within each field which may be selected.

Real Estate Development Emphasis

Choose the following 3 courses:

- GGS 550 - Geospatial Science Fundamentals Credits: 3
- GSOM 748 - Real Estate Investment Credits: 3
- PUBP 602 - Regional Economic Development: Strategies and Applications Credits: 3
  Note: Students choosing a field for emphasis will take 3 courses outside the selected emphasis for a total of 9 credits.

Real Estate Finance Emphasis

Choose 3 courses from among the following:

- GGS 550 - Geospatial Science Fundamentals Credits: 3
- GSOM 748 - Real Estate Investment Credits: 3
- MBA 603 - Managerial Economics and Decisions of the Firm Credits: 0-3
- PUBP 721 - Transportation Economics Credits: 3
- PUBP 781 - Entrepreneurship and Economic Development Credits: 3
  Note: Students choosing a field for emphasis will take 3 courses outside the selected emphasis for a total of 9 credits.

Environment and Sustainability Emphasis

Choose 3 courses from among the following:

- CEIE 501 - Sustainable Development Credits: 3
- CEIE 550 - Environmental Engineering Systems Credits: 3
- CEIE 555 - Principles of Environmental Engineering Credits: 3
- CEIE 556 - Environmental Law Credits: 3
- EVPP 638 - Corporate Environmental Management and Policy Credits: 3
Electives Continued

The following courses may be included as electives by all students:

- REAL 610 - Management of Real Estate Design and Development Credits: 3
- REAL 615 - Real Estate Market Analysis and Research Credits: 3
- REAL 690 - Topics in Real Estate Development Credits: 1-6
- REAL 750 - MSRED Capstone Credits: 3
- REAL 796 - Directed Reading Credits: 1-6

Total: 36 credits

Technology Management, MS

Banner Code: BU-MS-TECM

Phone: 703-993-1880
Email: techman@gmu.edu

The MS in technology management is designed to provide students with a graduate management education that will help them further their leadership careers in technology and technology-oriented businesses and organizations. With technology innovation and commercialization occurring at an increasing pace and industries becoming more networked and global, business success depends on the successful management of technology. Companies are succeeding with rapid innovation, insightful technology integration, creation of focused technology organizations, and skillful management of complexity. The program addresses how to succeed in this marketplace and emphasizes leadership and management; special considerations of technology innovation, commercialization, introduction, and integration; and methods and approaches of systems thinking.

Students are from the major firms and organizations in the Washington, D.C., region. They average 15 years of work experience, and almost 25 percent of the students already have graduate degrees. Approximately three-quarters of the students work for the private sector, while the remainder works for federal government agencies or departments.

Program graduates receive chief information officer (CIO) certification, in partnership with the federal CIO Council, in addition to their MS degree. The program satisfies the requirements for federal government CIOs that were developed in response to the passage of the Information Technology Management Reform Act. Mason is one of only six institutions certified to offer this qualification and was one of the founding university partners with CIO University.

The program, designed for working professionals, starts in January and lasts for 16 months. Classes are held on the Fairfax Campus on Saturdays from 8 a.m. to 5 p.m. The program is 36 credits and includes a capstone project and an international residency. The international residency is approximately 8 days abroad focusing on global topics in technology management. Previous residency locations included: Taiwan, Japan, Thailand, India, Sweden, England, Germany, Singapore and Korea. Residency cost is included in the tuition.

Admission Requirements

Students must have a bachelor’s degree from an accredited institution, a minimum of three years professional work experience, two professional references, and a GMAT/GRE score or other evidence that they can perform graduate-level work.

Degree Requirements
Students are responsible for familiarization and compliance with the university's Graduate Policies contained in this catalog.

Courses with variable credits (1-2) are established for each entering class to comply with the total hour requirement of 36 credit hours.

- TECM 601 - HiTech Business Models Credits: 1
- TECM 602 - Emerging Technologies and the New CIO Credits: 1
- TECM 611 - Leadership and Change Management Credits: 2
- TECM 614 - Financial and Cost Accounting Credits: 2
- TECM 620 - Economics of Technology Management Credits: 2-3
- TECM 635 - Decision Models for Technology Management Credits: 2-3
- TECM 641 - Negotiation and Conflict Management for Technology Professionals Credits: 2
- TECM 643 - Managerial Finance Credits: 2
- TECM 702 - Building High Performance Teams Credits: 2
- TECM 704 - Management of Technology Projects and Portfolios Credits: 2
- TECM 711 - Deriving Strategic Value from IT Investments Credits: 2
- TECM 720 - Competitive Strategy in Technology Industries Credits: 2
- TECM 735 - Technology Management Capstone Project Credits: 1-4
- TECM 741 - Marketing of Innovations and Technology Products / Services Credits: 2
- TECM 745 - Leading and Managing IT Operations Credits: 2
- TECM 746 - Enterprise Architecture and IT Governance Credits: 2
- TECM 747 - Information Assurance and Security Management Credits: 2
- TECM 748 - Systemic Approach to IT Management Credits: 2
- TECM 752 - Global Tech Management Credits: 2

Total: 36 credits

**Non-Degree**

**Business Minor**

**Banner Code: BUS**

The business minor provides an introduction to the skills needed for success in the rapidly changing and evolving world of business. Because it is designed for non-business students who seek to learn business essentials to enhance their own area of expertise, the minor provides broad exposure to business concepts and theories. The minor also presents and integrates the major functional areas in business to solve management problems through the use of IT. Strong written and oral communication skills are expected. Prior to beginning the minor, students must have sophomore standing.

The minor consists of the following MSOM courses. Students must complete five courses for a total of 15 credits. At least eight credits of the minor courses must be unique to the Business Minor and not applied toward any other major, minor, or concentration. *Students must achieve a grade of C or better in each course that is applied toward the minor.*

For policies governing all minors, see the Academic Policies section of this catalog. The School of Management residency requirement for this minor supersedes the university requirement: at least nine credits must be earned at Mason.

**Course Work**
Required Courses (12 credits):

- MSOM 300 - Managing Financial Resources Credits: 3
- MSOM 301 - Managing People and Organizations Credits: 3
- MSOM 302 - Managing Information in a Global Environment Credits: 3
- MSOM 303 - Marketing in a Global Economy Credits: 3

Electives (3 credits)

Choose one course from the following:

- MSOM 304 - Entrepreneurship: Starting and Managing a New Enterprise Credits: 3
- MSOM 305 - Managing in a Global Economy Credits: 3
- MSOM 306 - Managing Projects and Operations Credits: 3
- MSOM 491 - Special Topics: Business Minor Credits: 3

Notes

These courses may not be taken for credit by SOM majors, except for MSOM 305, which may be used to fulfill the University General Education global understanding requirement.

Students who have already taken and received credit for MGMT 301, MIS 301, MKTG 301, or OM 301 shall substitute courses as follows: MGMT 301 for MSOM 301, MIS 301 for MSOM 302, MKTG 301 for MSOM 303, and OM 301 for MSOM 306. Both courses cannot be taken for credit. Students who have taken and received credit for both ACCT 203 and FNAN 301 shall substitute the combination for MSOM 300. All three courses cannot be taken for credit. Transfer students may transfer a maximum of six credits toward the business minor.

Total: 15 credits

Entrepreneurship Practice Minor

Banner Code: ENPR

The minor in entrepreneurship practice provides an introduction to the business skills needed to participate in an entrepreneurial business venture. Because it is designed for students who wish to learn the skills essential for successful practice of entrepreneurship, the minor draws on the School of Management's minor in business core courses to provide knowledge of business concepts, while offering exposure to entrepreneurship studies within other disciplines. Students must have completed 30 hours (sophomore standing) to declare the Minor in Entrepreneurship Practice and take the minor courses.

Students must complete five courses for a total of 15 credits. At least eight credits of the minor courses must be unique to the Entrepreneurship Practice Minor and not applied toward any other major, minor, or concentration. Students must achieve a grade of C or better in each course that is applied toward the minor.

For policies governing all minors, see the Academic Policies section of this catalog. The School of Management residency requirement for this minor supersedes the university requirement: at least nine credits must be earned at Mason.

Course Work
Required Courses (9 credits)

- MSOM 300 - Managing Financial Resources Credits: 3
- IT 495 - Turning Ideas into Successful Companies Credits: 3
  And one of the following:
  - MSOM 304 - Entrepreneurship: Starting and Managing a New Enterprise Credits: 3
  - IT 492 - Senior Design Project I Credits: 3

Electives Courses (6 credits)

Select two courses from the following:

- MSOM 301 - Managing People and Organizations Credits: 3
- MSOM 302 - Managing Information in a Global Environment Credits: 3
- MSOM 303 - Marketing in a Global Economy Credits: 3

Notes:

These courses may not be taken for credit by SOM majors.

Students who have already taken and received credit for MGMT 301, MIS 301, MKTG 301, or OM 301 shall substitute courses as follows: MGMT 301 for MSOM 301, MIS 301 for MSOM 302, MKTG 301 for MSOM 303. Both courses cannot be taken for credit. Students who have taken and received credit for both ACCT 203 and FNAN 301 shall substitute the combination for MSOM 300. All three courses cannot be taken for credit. Transfer students may transfer a maximum of six credits toward the entrepreneurship practice minor.

Total: 15 credits

Undergraduate Certificate

Accounting Undergraduate Certificate

Banner Code: BU-CERB-ACCT

Associate Dean for Undergraduate Programs
Phone: 703-993-1880
Web: som.gmu.edu

This program provides an opportunity for nondegree-seeking students to earn the academic credit necessary to sit for the Uniform CPA Examination in Virginia. The requirement for enrollment is a bachelor’s degree or higher from an accredited college or university.

Students are required to complete a minimum of 30 credits of accounting courses. At least 16 required credits must be taken at GMU after acceptance to the certificate program. Students have four years to complete certificate requirements. Students who are given permission to re-enroll following an absence from Mason may not count the four-year time limit as beginning on the date of re-enrollment. Successful completion of the certificate program requires a grade of C or better in accounting courses and a GPA of at least 2.00 in all courses. All students who wish to sit for the Uniform CPA Examination in Virginia are required to have completed 150 college-level credits, including at least 30 credits of accounting with courses in financial accounting.
auditing, taxation, and management accounting; and at least 24 credits of non-accounting business courses. To receive the Mason accounting certificate, individuals must have completed the following required accounting courses or their equivalents.

The Accounting Undergraduate Certificate may be pursued on a part-time basis. Maintaining full-time status is not guaranteed.

This certificate program qualifies for Title IV Federal Financial Aid. For more information about program graduation rates, the median debt of students who completed the program, and other important information, please visit the disclosure information page at: http://irr.gmu.edu/new/N_IRRHome/HEOA/Gainful.cfm

Certificate Requirements

Required Courses (24 credits)

Note: Completion of ACCT 301 with a grade of B- or higher is required for ACCT 311, 331, and 361.

- ACCT 203 - Survey of Accounting Credits: 3
- ACCT 301 - Financial Accounting and Managerial Decision Making Credits: 3
- ACCT 311 - Managerial and Cost Accounting Credits: 3
- ACCT 331 - Intermediate Financial Accounting I Credits: 3
- ACCT 332 - Intermediate Financial Accounting II Credits: 3
- ACCT 351 - Taxation and Managerial Decision Making Credits: 3
- ACCT 361 - Accounting Information Systems Credits: 3
- ACCT 461 - Assurance and Audit Services Credits: 3

Electives (6 credits)

- ACCT 372 - Financial Statement Analysis Credits: 3
- ACCT 411 - Advanced Managerial Accounting Credits: 3
- ACCT 433 - Advanced Financial Accounting Credits: 3
- ACCT 451 - Advanced Federal Taxation Credits: 3
- ACCT 462 - Honors Seminar in Accounting Credits: 3
- ACCT 472 - Government and Not-for-Profit Accounting Credits: 3
- ACCT 491 - Seminar in Accounting Credits: 3
- ACCT 499 - Independent Study Credits: 1-3

Note: If a student has a previous degree in business or accounting, the faculty recommends that students take SOM courses above the 301 level to complete the 16 Mason credits needed after acceptance to the certificate program.

If a student has not previously studied business, the following courses are recommended:

- BULE 302 - Legal Environment of Business Credits: 3
- BULE 402 - Commercial Law Credits: 3
- FNAN 301 - Financial Management Credits: 3
- FNAN 302 - Financial Analysis, Forecasting, and Valuation Credits: 3
- MIS 301 - Introduction to Business Information Systems Credits: 3
- OM 210 - Statistical Analysis for Management Credits: 4

Total credits: 30
School of Public Policy

The transformations of local, regional, national and global institutions pose critical challenges for an increasingly complex society. Solving those challenges requires an interdisciplinary approach to policy making. The School of Public Policy (SPP) is committed to transcending traditional boundaries in policy formation while integrating real-world experience and problem-solving into public policy education. With an emphasis on applied knowledge, SPP teaches the methodological and communication skills graduates need to design and promote effective policies.

The School’s programs focus on the interplay among economic, political, social and cultural forces that shape policy outcomes. As such, the School’s faculty members have diverse backgrounds, ranging from economics to political science, anthropology and law. They are experts in diverse topic areas, including transportation, economic development, national security, ethics, health care, global trade, education, governance, and technology.

Administration

Edward Rhodes, Dean
Ann C. Baker, Senior Associate Dean
Jonathan L. Gifford, Associate Dean for Research and Development
Matthys van Schaik, Associate Dean for Academic Affairs
Elizabeth C. Eck, Assistant Dean for Graduate Program Management
Jill V. Emerson, Assistant Dean for Student Affairs

Faculty

Associate Faculty

Avruch, Conlan, Guagnano, Heclo, Mahler, Paden, Regan, Scimecca

Research and Term Faculty

Davis, Deitz, Finkelstein, Habayeb, Hayden, Kauzlarich, LaPorte, Malur, Nicogossian, Pommerening, Robb, Sturtevant, van Schaik, Versel, Yalowitz

Adjunct Faculty

Clendenin, DiGiulian, Gordon, Miller, Muhlhausen, Pasurka, Stabile, Sullivan, Thompson
Faculty Emeritus

Armor, Hill, Kash

Course Work

SPP offers courses designated PUBP, ITRN, ODKM and TELE in the Courses section of this catalog.

Law and Public Policy, Joint Degree Program

The School of Public Policy and the School of Law offer a joint JD/MPP degree program in law and public policy studies. For more information, go to www.law.gmu.edu/academics/llm.html.

Academic Policies

Students should become familiar with the university's general academic policies in addition to those specific to each academic unit. Please see the Academic Policies section of the catalog.

Student Appeal and Grievance Procedures

The School of Public Policy has student appeal and grievance procedures laid out in its bylaws. These are based on George Mason University's honor system. Students are responsible for understanding the provisions of the code that are described in detail in this catalog.

Students may appeal decisions concerning academic actions (excluding termination or dismissal) in writing to the Assistant Dean of Student Affairs, who will consider the merit of these appeals in consultation with the relevant program director. Decisions of the Assistant Dean of Student Affairs may be appealed to the Associate Dean of Academic Affairs, whose decision is final.

Grade appeals are made to the Dean. Students should contact the Associate Dean for Academic Affairs in writing to initiate the process. The Dean's decision is final.

There is no right to appeal an automatic termination/dismissal itself. However, a student may be entitled to appeal the grade that leads to the automatic termination/dismissal, or a reconsideration of the grade that led to this situation, either of which may result in not going forward with the termination/dismissal.

A student who is dismissed from the program for any other reason may appeal the decision to the Dean. This appeal must be in writing and must be received within 30 calendar days of the date on the notice of dismissal or termination. The Dean will appoint a committee to review the appeal. This committee will make a recommendation to the Dean concerning the appeal. The Dean will make a final determination. This determination may not be appealed.

Students with grievances should direct them in writing to the Assistant Dean for Student Affairs, who will provide guidance on how to resolve their concerns in accordance with established university procedures.

Research Centers

Center For Emerging Market Policies

Co-Directors: Andrew Hughes-Hallett, DPhil and Sonia Ketkar, PhD
This center aims to be a premier research and teaching hub on international commerce, economics and public policy issues relating to emerging markets. It leverages Mason's and the School of Public Policy's considerable expertise on and interest in emerging markets to promote pioneering applied research on emerging markets in Asia, Central and Eastern Europe, Latin America and elsewhere.

**Center For Energy Science and Policy**

**Co-Directors:** David M. Hart, PhD and Allison McFarlane, PhD

This center, a joint initiative of the College of Science and School of Public Policy, provides objective analysis of key issues in the energy field that is grounded in original research. It serves as a center of gravity for the many researchers at George Mason whose work engages them with these issues and connects them with decision-makers in the economy, society, and government.

**Center for Entrepreneurship and Public Policy**

**Director:** Zoltan Acs, PhD

Economic development policy has shifted dramatically from a business and industry attraction strategy to a more entrepreneurial approach. The Center for Entrepreneurship and Public Policy focuses on entrepreneurship policy research and program delivery, offering programs in research, collaboration, and analysis.

**Center for Global Policy**

**Director:** Jack Goldstone, PhD

This center conducts research on a wide range of global policy issues, including foreign trade, democratization and statebuilding, and transnational networks. It also analyzes specific policy issues for a variety of government agencies, and develops and serves as the home to several major cross-national databases for global policy.

**Center for Regional Analysis**

**Director:** Stephen Fuller, PhD

Focusing on economic development in technologically intensive regions, the Center for Regional Analysis (CRA) maintains a corporate technology database for the national capital region. The CRA provides economic forecasting services to government agencies at all levels around the world.

**Center for Science and Technology Policy**

**Director:** David M. Hart, PhD

This center helps facilitate the exchange of information and ideas among the worldwide science, foreign affairs, trade, and technology communities. Areas of emphasis include international trade and science and technology.

**Center for the Study of International Medical Policies and Practices**

**Director:** Arnauld Nicogossian, MD

This center provides leadership and focus on global medical and public health policies and processes, working collaboratively with health, science, and medical organizations in the public and private sectors, and academic organizations to address pressing global policy concerns.
Center For Transportation Policy, Operations and Logistics

Director: Kenneth J. Button, PhD

This center works with federal and state authorities to find better ways to manage existing transport networks from surface to air to space. The center is active in the areas of intelligent transportation systems and aviation policy.

International Center for Applied Studies in Information Technology

Director: Stephen Ruth, PhD

The International Center for Applied Studies in Information Technology (ICASIT) is a consulting group dedicated to delivering the power of the Internet to businesses, underserved markets, and developing countries. ICASIT has contracts in more than 20 countries.

State Economic Development Center

Director: Kingsley E. Haynes, PhD

This center’s focus is on providing education, training, and research support for state-level economic development policy and programs. While the primary goal is to provide assistance to agencies and organizations in Virginia, the center also works with other government organizations in the United States as well as abroad. Methods employed by the center include roundtable discussions, formal focus groups, survey research, statistical analysis, and mathematical models.

Terrorism, Transnational Crime and Corruption Center

Director: Louise I. Shelley, PhD

The Terrorism, Transnational Crime and Corruption Center (TraCCC) is the first center in the United States devoted to understanding the links among terrorism, transnational crime and corruption. The center teaches, researches and formulates policy on these critical issues. TraCCC accomplishes its mission through international research partnerships engaging in fundamental and applied research projects. Research addresses such diverse concerns as national security, economic development and human rights.

Transportation and Economic Development Research Center

Director: Jonathan L. Gifford, PhD

The Transportation and Economic Development Research Center is a University Transportation Center, funded by the Research and Innovative Technology Administration of the U.S. Department of Transportation. The Center conducts research in transportation finance, transportation and land use, and entrepreneurship and innovation in transportation.

Doctor of Philosophy

Public Policy, PhD

Banner Code: PP-PHDPUBP

Phone: 703-993-2280
This program is distinctive in its heavy emphasis on the combined influence of technology, culture, and institutions on public policy. Students investigate the increasing tensions created by technologically driven organizational change.

To investigate the policy issues associated with substantive policy areas, students develop in-depth understanding of American institutions, values, and culture; competence in research methods and advanced analytical methodologies; and a comparative, international perspective. At the time of admission, each student is assigned a faculty advisor who assists in the design and development of the student’s program.

**Admission**

The program seeks students with exceptional potential for accumulating, sorting, analyzing, and communicating information and findings effectively. Public policy is inherently complex and value laden. In the end, high-quality policy analysis requires thoughtful and judicious management of complex and incommensurate information, both quantitative and qualitative. Potential students must be able to manage and integrate both kinds of information and produce persuasive, well-organized, written syntheses and analytical insight.

The ideal applicant has demonstrated capabilities in research and writing, basic mathematical skills roughly equal to the first semester of calculus, competence in statistics, some background in economics, and a theoretical and working knowledge of public policy processes. Applicants with strong records who are lacking in one or more of these areas may be admitted to the program and will receive assistance in making up deficiencies.

Applicants must hold a master’s degree from a regionally accredited institution and have a GPA of 3.00 or higher. Prospective students are encouraged to attend an information session.

Please see the Graduate Admission Policies section in this catalog for general information on graduate admission to George Mason University. Please see the School of Public Policy admissions web site for application requirements and deadlines for the PhD in Public Policy. Students are considered for admission for the Fall term only.

**Degree Requirements**

Students are required to complete a minimum of 82 credits of course work, of which no more than 12 may be dissertation credits. Specific course work requirements include four foundational core courses, one semester of participation in the research colloquium (public policy seminar), two advanced methodology courses, three courses in an area of program specialization, and three advanced courses tailored to the student’s research needs and interests. Courses are determined in collaboration with the student’s advisor and are drawn widely not only from SPP, but also from other programs at Mason.

As detailed below, at the completion of core skills course work (Stage One), students must pass a qualifying exam that evaluates mastery of the first year’s material, as well as the ability to integrate that material when addressing important and complex public policy problems and issues. Students must then develop their research areas through specialized course work, and pass a field exam structured around their specific field of proposed doctoral research (Stages Two and Three). Other requirements include the successful preparation and defense of a doctoral research proposal and the ensuing dissertation (Stage Four).

A complete description of the program policies, procedures, and requirements is in the SPP student and faculty handbook, which is published annually.

**Reduction of Credit (up to 30 credits)**

Students must have a master's degree before being admitted to the PhD in public policy. Up to 30 credits from a prior master's degree may be applied toward the doctoral requirements at the program director's discretion. The program director determines whether the credits are eligible for reduction of credit and the number of credits to be reduced. Students who receive less than a 30 credit reduction may take additional specialized elective credit in Stage Two.
Prerequisites: Methodological and Substantive Foundations (0 credit)

PhD students are required to have competence in the following three areas, either by taking these courses or by proving competence through a placement exam and/or evidence of previous relevant course work.

Prerequisite courses will not count as part of the 82 credit requirement.

- PUBP 704 - Statistical Methods in Policy Analysis Credits: 3
- PUBP 720 - Managerial Economics and Policy Analysis Credits: 3
- PUBP 730 - US National Policy Systems and Theory Credits: 3

Doctoral Course Work and Requirements (minimum 41 credits)

Stage One - Core Skills (16 credits)

- PUBP 800 - Culture and Public Policy Credits: 1-4 (4 credits)
- PUBP 801 - Research Design for Public Policy Credits: 1-4 (4 credits)
- PUBP 804 - Multivariate Statistical Analysis in Public Policy Credits: 4
- PUBP 805 - Foundations of Social Science for Public Policy Credits: 4
- Pass the comprehensive Qualifying Exam

Stage Two - Policy Fields and Skills (13 credits)

After passing the qualifying exam, students assemble a Field Research Committee. By the end of their third semester, full time students (fourth semester for part-time) must choose a chair for their Field Committee.

By the start of their fourth semester, full time students (fifth semester for part-time) must submit to the chair of their Field Committee a plan for their Field of Study. The Field of Study Plan will describe a proposed research area, including citations relevant to current research in that Field. The Plan must be approved by both the student's Field Committee Chair and the Director of the PhD program.

Course work taken in Stage Two includes:

- Three courses in an area of program specialization, chosen in collaboration with advisor
- One advanced methods course
- PUBP 850 - Seminar in Public Policy Credits: 1

Stage Three - Research Foundations (minimum 13 credits)

In Stage Three, students take course work approved on the Field of Study Plan. Courses in the Field of Study Plan are intended to be taken concurrently with work on the Field Statement and Field Exam. Students may not present a dissertation proposal for approval until they have passed the Field Exam.

Students may choose one of the established fields of study or work with a faculty committee to create their own field of study. The established fields in the doctoral program are: regional development and transportation; technology, science and innovation; entrepreneurship, growth and public policy; U.S. governance; culture and society; organizational and information technology; and global and international systems.

Students must complete all of the following:
• Three substantive Field of Study courses (10-12 credits) that will serve as a foundation for their Field. Courses must include at least one 800 level course offered in SPP and no more than one substantive graduate course from outside SPP.
• One Advanced Methods course (3-4 credits) Course must be chosen from the approved list for the SPP PhD program, or approved in writing by the Field Committee Chair and Director of the PhD program.
• Field Statement
• Field Exam
Note: Where appropriate courses are not available from SPP, students may petition the Director of the PhD program for substitute courses to count for their Field of Study Plan.

Dissertation Research (12 credits)

Qualifying Exams

Students must pass both a qualifying exam which is taken after the core courses are completed and a field examination.

When students have completed all coursework, have passed both the qualifying and field exams, have an approved dissertation committee and presented and successfully defended a dissertation proposal, they advance to candidacy.

Stage Four - Dissertation

• PUBP 998 - Research/Proposal for Dissertation Credits: 1-9
• Proposal Oral Defense
• PUBP 999 - Dissertation Credits: 1-9 (998 + 999, 12 credits total, at least 6 credits from 999)
• Dissertation Oral Defense

Total: minimum 82 Credits

Graduate Certificate

Culture and Values in Social Policy Graduate Certificate

Banner Code: PP-CERG-CVSP

Phone: 703-993-2280

Web: policy.gmu.edu

The School of Public Policy offers certificate programs in conjunction with its master's programs. This certificate requires the completion of at least 16 credits of course work, including a required core course and electives approved in consultation with a faculty advisor. Students already pursuing a master's degree in SPP may, after admission to a certificate program, earn an additional 9 credits (three courses) in SPP to receive a certificate in addition to the master's degree. Applicants to all graduate programs must meet the admission standards and application requirements for graduate study as specified in the Graduate Admission Policies section of this catalog. Participants must be admitted to a certificate program. Admission requirements are the same as those for the master's programs.
Students admitted to an SPP program will be terminated from SPP upon receiving one grade of F and are no longer eligible to take courses in SPP. Per university regulation students are dismissed from the university after accumulating grades of F in two courses or 9 credits of unsatisfactory grades in graduate courses. See the Academic Policies section of the catalog for additional policies pertaining to graduate students.

The graduate certificate may be pursued on a part-time or full-time basis.

**Certificate Requirements**

**Required Core (4 credits)**

- PUBP 700 - Theory and Practice in Public Policy Credits: 1-4 (4 credits)

**Electives (12 credits)**

One of the four electives taken must have an international focus. Electives may be drawn from the following courses as well as any other PUBP or ITRN course approved by the academic advisor.

- PUBP 650 - Peace Operations I Credits: 3
- PUBP 710 - Topics in Public Policy Credits: 1-3 (3 credits)
- PUBP 753 - Ethics in Public Policy Credits: 3
- PUBP 761 - Social Entrepreneurship and Public Policy Credits: 3
- PUBP 762 - Social Institutions and Public Policy Credits: 3
- PUBP 768 - Education and Public Policy Credits: 3
- ITRN 701 - Special Topics in International Commerce and Policy Credits: 1-3 (3 credits)

**Total: 16 credits**

**Global Medical Policy Graduate Certificate**

**Banner Code: PP-CERG-GMP**

**Phone:** 703-993-2280

**Web:** policy.gmu.edu

The graduate certificate in global medical policy requires a total of 18 credits (6 courses). The two elective courses are decided in conjunction with an advisor.

Applicants to all graduate programs must meet the admission standards and application requirements for graduate study as specified in the Graduate Admission Policies section of this catalog. Participants must be admitted to a certificate program. Admission requirements are the same as those for the master’s programs.

Students admitted to an SPP program will be terminated from SPP upon receiving one grade of F and are no longer eligible to take courses in SPP. Per university regulation students are dismissed from the university after accumulating grades of F in two courses or 9 credits of unsatisfactory grades in graduate courses. See the Academic Policies section of the catalog for additional policies pertaining to graduate students.

The graduate certificate may be pursued on a part-time or full-time basis.
Certificate Requirements

Required Core (12 Credits)

- PUBP 757 - Public Policy in Global Health and Medical Practice Credits: 3
  or
- GCH 543 - Global Health Credits: 3
- PUBP 758 - Global Threats and Medical Policies Credits: 3
- HAP 609 - Comparative International Health Systems Credits: 3
- PUBP 704 - Statistical Methods in Policy Analysis Credits: 3
  or
- HAP 765 - Methods for Health Policy Analysis Credits: 3

Elective Courses (6 credits)

Choose two courses for a minimum of 6 credits from the following:

School of Public Policy Electives

- PUBP 501 - Policy and Organizational Analysis Credits: 4
- PUBP 502 - Governance and Policy Processes Credits: 1-4 (4 credits)
- PUBP 503 - Culture, Organization, and Technology Credits: 1-4 (4 credits)
- PUBP 710 - Topics in Public Policy Credits: 1-3 (3 credits)
- PUBP 713 - Policy and Program Evaluation Credits: 3
- PUBP 720 - Managerial Economics and Policy Analysis Credits: 3
- ITRN 500 - Global Political Economy Credits: 1-4 (4 credits)
- ITRN 501 - Methods of Analysis for International Commerce and Policy Credits: 4
- ITRN 602 - International Financial Institutions and Globalization Credits: 3
- ITRN 603 - International Trade Relations Credits: 3

College of Health and Human Services electives

- GCH 560 - Environmental Health Credits: 3
- GCH 602 - Global Health Issues Related to Violence Credits: 3
- GCH 605 - Social Epidemiology Credits: 3
- GCH 680 - International Research Ethics and Methods Credits: 3
- GCH 712 - Introduction to Epidemiology Credits: 3
- GCH 722 - Infectious Disease Epidemiology Credits: 3
- GCH 732 - Chronic Disease Epidemiology Credits: 3
- HAP 540 - Introduction to Emergency Preparedness/Disaster Recovery for Health Care Professionals Credits: 3
- HAP 715 - Health Economics Credits: 3
- HAP 727 - Program Evaluations in Health Care Credits: 3
- HAP 730 - Health Care Decision Analysis Credits: 3
- HAP 735 - Fundamentals of Patient Safety and Risk Management Credits: 3
- HAP 762 - Cost-Effectiveness for Health Care Management and Policy Decisions Credits: 3
Institute for Conflict Analysis and Resolution Electives

- CONF 501 - Introduction to Conflict Analysis and Resolution Credits: 3

Total: 18 credits

Global Trade Management Graduate Certificate

Banner Code: PP-CERG-GTM

Phone: 703-993-2280

Web: policy.gmu.edu

SPP offers certificate programs in conjunction with its master's programs. The certificate in global trade management requires the completion of at least 16 credits (five courses) of work, including a required core course and electives approved in consultation with a faculty advisor. Students already pursuing a master’s degree in the School of Public Policy may, after admission to a certificate program, earn an additional 9 credits (three courses) in SPP to receive a certificate in addition to the master’s degree. Applicants to all graduate programs must meet the admission standards and application requirements for graduate study as specified in the Graduate Admission Policies section of this catalog. Participants must be admitted to a certificate program. Admission requirements are the same as those for the master’s programs.

Students admitted to an SPP program will be terminated from SPP upon receiving one grade of F and are no longer eligible to take courses in SPP. Per university regulation students are dismissed from the university after accumulating grades of F in two courses or 9 credits of unsatisfactory grades in graduate courses. The catalog contains additional information on university graduate academic policies.

The graduate certificate may be pursued on a part-time or full-time basis.

Certificate Requirements

Required Core (4 credits)

- ITRN 500 - Global Political Economy Credits: 1-4

Electives (12 credits)

Electives may be drawn from the following courses as well as any other PUBP or ITRN course approved by the academic advisor.

- ITRN 602 - International Financial Institutions and Globalization Credits: 3
- ITRN 603 - International Trade Relations Credits: 3
- ITRN 604 - International Trade and Technology Credits: 3
- ITRN 701 - Special Topics in International Commerce and Policy Credits: 1-3
- ITRN 702 - Special Topics in International Commerce and Policy: Study Abroad Credits: 3-6
- ITRN 711 - United States Law and Global Trade Credits: 3
- ITRN 712 - World Trade Organization and Global Trade Credits: 3
- ITRN 740 - ABCs of Exporting and Importing Credits: 3
ITRN 769 - International Entrepreneurship Credits: 3
ITRN 770 - International Contract Negotiation Credits: 3
ITRN 773 - International Strategic Management Credits: 3
PUBP 710 - Topics in Public Policy Credits: 1-3

Total: 16 credits

National Security and Public Policy Graduate Certificate

Electives may be drawn from the following courses as well as any other PUBP or ITRN course approved by the academic advisor.

- PUBP 710 - Topics in Public Policy Credits: 1-3
- PUBP 714 - Topics in Transportation Policy, Operations, and Logistics Credits: 1-3
- PUBP 716 - Transportation Operations and Logistics Credits: 3
- PUBP 718 - Transportation Planning and Policy Credits: 3
- PUBP 721 - Transportation Economics Credits: 3
- PUBP 722 - Practicum in Transportation Policy, Operations, and Logistics Credits: 3
- PUBP 723 - Metropolitan Transportation Policy Credits: 3
Total: 15 credits

**Master of Arts**

**International Commerce and Policy, MA**

**Banner Code:** PP-MA-ICP  
Phone: 703-993-2280  
Web: policy.gmu.edu

The International Commerce and Policy, MA program (ICP) is an interdisciplinary course of study to help students from around the world prepare for jobs in the new economy. Unlike traditional international affairs programs, the degree is focused on such international economic issues as global trade and investment. The MA in international commerce and policy differs from an MBA program by providing training in the political, social, and technological aspects of the global economy. In today’s world, it is critical for all participants in global markets to understand the multifaceted environment in which they work.

The core faculty is augmented by adjunct faculty members who bring a wealth of practical knowledge and experience, as well as strong academic qualifications to the program. Adjuncts are drawn from the U.S. Commerce and State Departments, the Office of the U.S. Trade Representative, and the International Trade Commission, among other government agencies, as well as from the private sector, the think tank community, and trade associations.

Courses are offered primarily in the late afternoon and evening to fit the schedules of busy professionals. In addition to classroom study, the program emphasizes experiential learning by supporting student internships, cooperative education, and research activities with private- and public-sector employers, and sponsoring a variety of study-abroad experiences.

**Admission Requirements**

Please see the Graduate Admission Policies section in this catalog for general information on graduate admission to George Mason University. Specific information on application requirements and deadlines for the ICP program may be found on the School of Public Policy admissions web site.

Students from all academic backgrounds are welcome to apply; however, some knowledge of economics, preferably through at least two undergraduate economics courses, is encouraged. While many students may have prior educational and work-related training in business and economics, others see the ICP Program as a bridge from government, education, and other non-business occupations to careers in the global economy.

Completed applications for fall and spring semesters are reviewed on a rolling basis, with late applications considered on a space-available basis. Students may be admitted for non degree study and apply a limited number of credits toward the master’s degree should they choose to apply to the degree program later, in accordance with university policy.

**Academic Policies**

Students admitted to an SPP program will be terminated from SPP upon receiving one grade of F and are no longer eligible to take courses in SPP. Per university regulation students are dismissed from the university after accumulating grades of F in two courses or 9 credits of unsatisfactory grades in graduate courses. The catalog contains additional information on university graduate academic policies.
Degree Requirements

The ICP Program requires 41 credits of course work. All degree candidates must take 26 credits of work in the required courses, as described below. The remaining 15 credits consist of electives that may include internships, independent studies, and study abroad. Students new to the program complete core courses first to prepare for higher-level course work.

SPP Common Core (4 credits)

- PUBP 503 - Culture, Organization, and Technology Credits: 1-4 (4 credits)

ICP Core Courses (22 credits)

- ITRN 500 - Global Political Economy Credits: 1-4 (4 credits)
- ITRN 501 - Methods of Analysis for International Commerce and Policy Credits: 4
- ITRN 503 - Investment and Macroeconomics Credits: 1-4 (4 credits)
- ITRN 504 - Trade and Microeconomics for International Commerce Credits: 1-4 (4 credits)
- ITRN 602 - International Financial Institutions and Globalization Credits: 3
- ITRN 603 - International Trade Relations Credits: 3

Electives (15 credits)

Students have the option to declare a substantive area of emphasis and focus their electives accordingly. The following areas are offered:

- Global Development
- Global Financial Policy
- Global Governance
- Global Business and Policy
- Global Trade Policy

Total: 41 credits

Telecommunications Policy, MA

Banner Code: PP-MA-TCMP

Phone: 703-993-2280

Web: policy.gmu.edu

The telecommunications policy program explores the way language, culture, and technology intersect with management, regulation, and commerce to shape public policies at all levels of government and industry. The program cuts across traditional academic lines to seek best practices for dealing with a number of issues, such as which products should be taxed, whether or not controlled monopolies should be dismantled in favor of free enterprise, and how instantaneous communications are changing the fabric of society at large. Students enrolled in this program will develop a solid theoretical foundation while at the same time explore practical applications of their studies.
Admission Requirements

Please see the Graduate Admission Policies section in this catalog for general information on graduate admission to George Mason University. Specific information on application requirements and deadlines for the MA in Telecommunications Policy program may be found on the School of Public Policy admissions web site.

Completed applications for fall and spring semesters are reviewed on a rolling basis, with late applications considered on a space-available basis. Students may be admitted for nondegree study and apply a limited number of credits toward the master’s degree should they choose to apply to the degree program later, in accordance with university policy.

Academic Policies

Students admitted to an SPP program will be terminated from SPP upon receiving one grade of F and are no longer eligible to take courses in SPP. Per university regulation students are dismissed from the university after accumulating grades of F in two courses or 9 credits of unsatisfactory grades in graduate courses. The catalog contains additional information on university graduate academic policies.

Degree Requirements

The Telecommunications Policy program requires 35 credit hours of coursework. Students should consult with their academic advisor on appropriate course sequencing:

SPP Common Core (8 credits)

- PUBP 502 - Governance and Policy Processes Credits: 1-4
- PUBP 503 - Culture, Organization, and Technology Credits: 1-4

Telecommunications Policy Core Courses (15 credits)

- PUBP 700 - Theory and Practice in Public Policy Credits: 1-4
- PUBP 726 - Telecommunications Policy Credits: 3
- PUBP 710 - Topics in Public Policy Credits: 1-3
  This special topics course will be crosslisted with LAW 181 Telecommunications Law and Regulation
- TELE 750 - Coordinating Seminar Credits: 3
- one of the following:
  - PUBP 704 - Statistical Methods in Policy Analysis Credits: 3
  or
  - PUBP 720 - Managerial Economics and Policy Analysis Credits: 3

Electives (12 credits)

After completion of twelve credit hours of core coursework, electives may be selected from one of the two following emphasis areas:

- Telecommunications Policy
- International Telecommunications

Total: 35 credits
Transportation Policy, Operations, and Logistics, MA

Banner Code: PP-MA-TPOL

Phone: 703-993-2280

Web: policy.gmu.edu

The MA in transportation policy, operations, and logistics (TPOL) program is designed for students and practicing professionals engaged in planning, regulating, managing, and operating transportation facilities and services. Students obtain a working knowledge of the theory, policy, law, research, and practices required to effectively and efficiently supply and operate transportation facilities and services. They also learn to think critically and analytically about the problems and challenges in this field and communicate their analyses clearly and effectively through written and oral presentations.

Admission Requirements

Please see the Graduate Admission Policies section in this catalog for general information on graduate admission to George Mason University. Specific information on application requirements and deadlines for the MA program in Transportation Policy, Operations and Logistics may be found on the School of Public Policy admissions web site.

Completed applications for fall and spring semesters are reviewed on a rolling basis, with late applications considered on a space-available basis. Students may be admitted for nondegree study and apply a limited number of credits toward the master’s degree should they choose to apply to the degree program later, in accordance with university policy.

Academic Policies

Students admitted to an SPP program will be terminated from SPP upon receiving one grade of F and are no longer eligible to take courses in SPP. Per university regulation students are dismissed from the university after accumulating grades of F in two courses or 9 credits of unsatisfactory grades in graduate courses. The catalog contains additional information on university graduate academic policies.

Degree Requirements

The degree requires completion of 36 credits as follows:

SPP Common Core (8 credits)

- PUBP 502 - Governance and Policy Processes Credits: 1-4 (4 credits)
- PUBP 503 - Culture, Organization, and Technology Credits: 1-4 (4 credits)

TPOL Core Courses (19 credits)

- PUBP 715 - Introduction to Transportation Systems Credits: 3
- PUBP 716 - Transportation Operations and Logistics Credits: 3
- PUBP 717 - Analysis for Transportation Managers Credits: 4
- PUBP 718 - Transportation Planning and Policy Credits: 3
- PUBP 721 - Transportation Economics Credits: 3
Electives (9 credits)

Electives must be approved by the program director or advisor.

Total: 36 credits

Master of Public Policy

Public Policy, MPP

Banner Code: PP-MPP-PUBP

Phone: 703-993-2280

Web: policy.gmu.edu

The master’s program in public policy leads to a degree for aspiring or experienced professionals who seek career advancement through cutting-edge education and training in policy analysis and development in increasingly technical and global environments. The program prepares students to be reflective practitioners who develop, implement, manage, analyze, evaluate, and effect innovative change in the public and private sectors through a course of study that emphasizes the fundamentals of policy development; the role of technology, analytic assessment, and modeling for policy evaluation; and the implications of international and global perspectives on policy formation.

The MPP without concentration affords students the opportunity to tailor their program towards one or more substantive policy area(s). The freedom to choose an emphasis area provides students with some flexibility in selecting a focus for their program. In addition to the MPP without concentration, the school offers an MPP with a concentration in international security. This concentration takes a “policy-in-execution” approach to security studies where students learn to integrate all resources of the state and tools of government to achieve policy objectives.

Courses are offered primarily in late afternoon and evening to fit the schedules of busy professionals.

Admission Requirements

Please see the Graduate Admission Policies section in this catalog for general information on graduate admission to George Mason University. Specific information on application requirements and deadlines for the Master in Public Policy program may be found on the School of Public Policy admissions web site.

Completed applications for fall and spring semesters are reviewed on a rolling basis, with late applications considered on a space-available basis. Students may be admitted for nondegree study and apply a limited number of credits toward the master’s degree should they choose to apply to the degree program later, in accordance with university policy.

Academic Policies

Students admitted to an SPP program will be terminated from SPP upon receiving one grade of F and are no longer eligible to take courses in SPP. Per university regulation students are dismissed from the university after accumulating grades of F in two courses or 9 credits of unsatisfactory grades in graduate courses. The catalog contains additional information on university graduate academic policies.
Degree Requirements

Students must complete 39 to 42 credits of course work through a combination of core courses, electives, and a professional experience requirement. Appropriate professional experience can be demonstrated through previous employment or a supervised internship. Students will also be exposed to the global nature of public policy activity through the core requirement of international comparative policy assessment. The plan of study includes the following:

MPP without Concentration

SPP Common Core (4 credits)

- PUBP 503 - Culture, Organization, and Technology Credits: 1-4 (4 credits)

Required Public Policy Courses (20 credits)

- PUBP 700 - Theory and Practice in Public Policy Credits: 1-4 (4 credits)
- PUBP 704 - Statistical Methods in Policy Analysis Credits: 3
- PUBP 720 - Managerial Economics and Policy Analysis Credits: 3
- PUBP 741 - U.S. Financial Policy Processes and Procedures Credits: 3
- ITRN 503 - Investment and Macroeconomics Credits: 1-4 (4 credits)
  and one of the following, or approved substitution:
- PUBP 705 - Advanced Statistical Methods in Policy Analysis Credits: 3
- PUBP 713 - Policy and Program Evaluation Credits: 3
- PUBP 754 - Geographic Information Systems and Spatial Analysis for Public Policy Credits: 3

Electives (15 credits)

Electives are chosen from one of the following policy emphasis areas. One of the courses in the emphasis sequence should have an international focus.

- Global Medical and Health Policy
- International Governance and Institutions
- National Security and Public Policy
- Public Finance and Budgeting
- Regional Economic Development
- Science and Technology Policy
- Social Policy
- Terrorism, Transnational Crime and Corruption
- Transportation Policy
- Urban Policy and Development
- US Government Institutions and Policy Management

Professional Experience Requirement (0-3 credits)

Certification that the student has experience in the public policy process outside the classroom and is ready to take leadership responsibilities must be exhibited by one of two ways: relevant professional experience, approved by the program director, or an approved internship.
PUBP 794 - Internship Credits: 1-6

Total: 39-42 credits

MPP with Concentration

▲ International Security Concentration

The SPP international security concentration takes a grand strategic approach to the training of both civilian and military professionals. Grand strategy is “policy in execution.” It is the highest and most complex level of strategy, involving all the resources of the state (political, cultural, military, economic, etc.), and integrating all the tools of government (diplomacy, economic ties, development aid, public diplomacy, trade, military force, etc.) to achieve the objectives of policy. The curriculum is designed for security professionals who wish to work in many areas of global security, from charitable NGOs and private companies to international organizations and the American military and intelligence agencies.

The plan of study includes the following:

SPP Common Core (4 credits)

- PUBP 503 - Culture, Organization, and Technology Credits: 1-4 (4 credits)

Required Public Policy Courses (20 credits)

Individual sections of some core courses may be designated for students in the international security concentration.

- PUBP 700 - Theory and Practice in Public Policy Credits: 1-4 (4 credits)
- PUBP 704 - Statistical Methods in Policy Analysis Credits: 3
- PUBP 720 - Managerial Economics and Policy Analysis Credits: 3
- PUBP 741 - U.S. Financial Policy Processes and Procedures Credits: 3
- ITRN 503 - Investment and Macroeconomics Credits: 1-4 (4 credits)
  and one of the following, or approved substitution:
- PUBP 705 - Advanced Statistical Methods in Policy Analysis Credits: 3
- PUBP 713 - Policy and Program Evaluation Credits: 3
- PUBP 754 - Geographic Information Systems and Spatial Analysis for Public Policy Credits: 3

Electives (15 credits)

Elective coursework for the international security concentration focuses on such areas as non-traditional security threats, human trafficking, the intelligence community, terrorism, illicit trade, political violence, and national security management. Courses are selected with the assistance of and should be approved by the program advisor.

Professional Experience Requirement (0-3 credits)

Certification that the student has experience in the public policy process outside the classroom and is ready to take leadership responsibilities must be exhibited by one of two ways: relevant professional experience, approved by the program director, or an approved internship.

- PUBP 794 - Internship Credits: 1-6
Total: 39-42 credits

**Master of Science**

**Health and Medical Policy, MS (SPP)**

**Banner Code:** PP-MS-HMP

**Phone:** 703-993-2280

**Web:** policy.gmu.edu

The master's program in health and medical policy is offered jointly by the School of Public Policy and the College of Health and Human Services. It prepares students to become health and medical systems policy analysts, consultants, and public health advocates in the US and internationally. It provides students with the knowledge, skills and abilities needed to develop improved national/international health and systems planning, decision-making and to support policy formulation for health and medical professionals, health systems development, resource allocation, and advocacy for national/international public health. Students applying to the program will be admitted to one of two concentrations: Global Medical Policy or Health Policy.

The Global Medical Policy Concentration is geared towards students interested in global medical policy formulation. The concentration is designed to prepare students with the background knowledge, analytic skills, and strategic thinking necessary to identify medical practice and international health organizations/systems impacted by globalization.

**Admission Requirements**

*The following requirements are for students applying to the Global Medical Policy concentration (selected at the time of application):*

Please see the Graduate Admission Policies section in this catalog for general information on graduate admission to George Mason University. Specific information on application requirements and deadlines for the Master of Science in Health and Medical Policy program may be found on the School of Public Policy admissions web site.

Completed applications for fall and spring semesters are reviewed on a rolling basis, with late applications considered on a space-available basis.

**Academic Policies**

Students admitted to an SPP program will be terminated from SPP upon receiving one grade of F and are no longer eligible to take courses in SPP. Per university regulation students are dismissed from the university after accumulating grades of F in two courses or 9 credits of unsatisfactory grades in graduate courses. The catalog contains additional information on university graduate academic policies.

**MS-HMP Common Degree Requirements**

**Core Courses (21 Credits)**

**Health and Medical Systems (6 credits)**
• HAP 609 - Comparative International Health Systems Credits: 3 or equivalent
• HAP 715 - Health Economics Credits: 3 or equivalent

Public Policy Process (6 credits)
• PUBP 700 - Theory and Practice in Public Policy Credits: 1-4 or equivalent
• PUBP 730 - US National Policy Systems and Theory Credits: 3 or equivalent

Policy Analysis (9 credits)
• HAP 710 - Inferential Statistics in Health Services Research and Management Credits: 3 or PUBP 704 - Statistical Methods in Policy Analysis
• HAP 730 - Health Care Decision Analysis Credits: 3 or PUBP 713 - Policy and Program Evaluation
• HAP 645 - Introduction to Health Services Research Credits: 3 or PUBP 756 - Global Medical Systems Policy Analysis

▲ Global Medical Policy Concentration (GMP)

Administered by School of Public Policy

Required Courses (14-15 credits)
• PUBP 757 - Public Policy in Global Health and Medical Practice Credits: 3
• PUBP 758 - Global Threats and Medical Policies Credits: 3
• PUBP 767 - Global Comparative Medical Practices, Ethics and Law Credits: 3
• PUBP 770 - Global Health and Medical Policy Analysis Credits: 3
• PUBP 795 - Final Project Credits: 1-3

Electives (6 credits)

Electives may be drawn from PUBP, CONF, GCH and HAP courses, approved by the academic advisor.

Total: 42 credits

Organization Development and Knowledge Management, MS

Banner Code: PP-MS-ODKM

Phone: 703-993-2280
Web: policy.gmu.edu

The MS in organization development and knowledge management (ODKM) Program is an integrated program taught in executive format and designed for professionals who have several years of work experience. Providing conceptual tools and practical guidance to foster organizational change, the program focuses on three related areas: creating and leveraging knowledge through networks of people who communicate and collaborate; understanding and managing change by integrating the diverse roles of people, processes, and technology; and enhancing and facilitating collaboration by building...
effective relationships in technology-rich environments. A feature of this program is the group-oriented approach to learning supported by the use of web-based collaborative computer technologies. Students develop the competencies to apply these technologies to make organizations more effective.

The cohort usually completes the program on a part-time basis. Full-time study is also possible by arrangement with the program director.

**Admission Requirements**

Students are considered for admission for the fall term only.

Please see the Graduate Admission Policies section in this catalog for general information on graduate admission to George Mason University. Specific information on application requirements and deadlines for the MS program in Organization Development and Knowledge Management may be found on the School of Public Policy admissions web site.

**Academic Policies**

Students admitted to an SPP program will be terminated from SPP upon receiving one grade of F and are no longer eligible to take courses in SPP. Per university regulation students are dismissed from the university after accumulating grades of F in two courses or 9 credits of unsatisfactory grades in graduate courses. The catalog contains additional information on university graduate academic policies.

**Degree Requirements**

ODKM is a 36- to 39-credit executive format program. Students work in teams and complete most of the courses in sequence. The second academic year includes an action learning component, in which participants undertake projects in organizations and apply research methods. Overall, the process and methods of evaluation stress the cumulative development of competencies and the capacity to apply the insights gained. Students are expected to have easy access to a computer and the Internet. Minimum computer specifications can be obtained from the program office. Successful completion of the following courses is necessary to fulfill the course requirements of the program.

**SPP Common Core (8 credits)**

- PUBP 502 - Governance and Policy Processes Credits: 1-4 (4 credits)
- PUBP 503 - Culture, Organization, and Technology Credits: 1-4 (4 credits)

**Core Courses (13 credits)**

- ODKM 700 - Organizations, Management and Work: Theory and Practice Credits: 3
- ODKM 710 - Social and Organizational Inquiry Credits: 4
- ODKM 715 - Creating Learning Organizations Credits: 3
- ODKM 720 - Collaborative Technologies for Knowledge Sharing Credits: 3

**Additional Requirements (12 credits)**

- ODKM 705 - Group Dynamics and Team Learning Credits: 3
- ODKM 725 - Strategic Knowledge Management Credits: 3
- ODKM 735 - Organizational Development Practices Credits: 3
Electives (3 credits)

The elective must be approved by the program director or advisor.

Experiential Requirement (0-3 credits)

A 3-credit internship is required. For students with appropriate work experience, this requirement can be waived with the approval of the program director or dean.

- PUBP 794 - Internship Credits: 1-6

Total: 36-39 credits

Peace Operations, MS

Banner Code: PP-MS-PO

Phone: 703-993-2280

Web: policy.gmu.edu

This program is designed for students and practicing professionals engaged in the planning, regulation, management, and conduct of peace operations. Students obtain a working knowledge of the theory, policy, law, research, and practices required to effectively and efficiently participate in or conduct a peace operation. Students also learn to think critically and analytically about the problems and challenges in this field and communicate their analyses clearly and effectively through written and oral presentations.

Admission Requirements

Please see the Graduate Admission Policies section in this catalog for general information on graduate admission to George Mason University. Specific information on application requirements and deadlines for the MS in peace operations program may be found on the School of Public Policy admissions web site.

Completed applications for fall and spring semesters are reviewed on a rolling basis, with late applications considered on a space-available basis.

Academic Policies

Students admitted to an SPP program will be terminated from SPP upon receiving one grade of F and are no longer eligible to take courses in SPP. Per university regulation students are dismissed from the university after accumulating grades of F in two courses or 9 credits of unsatisfactory grades in graduate courses. The catalog contains additional information on university graduate academic policies.

Degree Requirements

Students must complete 39 credits as follows:
SPP Common Core (8 credits)

- PUBP 502 - Governance and Policy Processes Credits: 1-4 (4 credits)
- PUBP 503 - Culture, Organization, and Technology Credits: 1-4 (4 credits)

Peace Operations Core Courses (16 credits)

- PUBP 650 - Peace Operations I Credits: 3
- PUBP 651 - Peace Operations II Credits: 3
- PUBP 652 - Experiential Applications Credits: 4
- PUBP 653 - The Interagency Process Credits: 3
- PUBP 654 - Analysis for Peace Operations Credits: 3

Electives (15 credits)

Electives may be drawn from PUBP and ITRN courses and must be approved by the program director or advisor.

Total: 39 credits

Master

Public Policy, EMPP

Banner Code: PP-EMPP-PUBP

Phone: 703-993-2280

Web: policy.gmu.edu

The executive master’s in public policy program offers a custom-designed degree for a select group of mid-career persons with a significant level of experience and professional promise in the field of public policy. Cohorts meet in executive format to allow for accelerated progress toward degree completion. Classes meet at the Arlington campus on a special schedule to accommodate the working professional.

Admission Requirements

Only applicants who are already successful in public policy or a related field are eligible for admission. Five years of experience and a 3.0 undergraduate GPA are the minimum requirements for consideration. Specific information on application requirements and deadlines for the Executive Master in Public Policy program may be found on the School of Public Policy admissions web site.

Academic Policies

Students admitted to an SPP program will be terminated from SPP upon receiving one grade of F and are no longer eligible to take courses in SPP. Per university regulation students are dismissed from the university after accumulating grades of F in two
courses or 9 credits of unsatisfactory grades in graduate courses. The catalog contains additional information on university graduate academic policies.

Degree Requirements

Students must complete 30 credits of course work through a combination of core and approved special topics courses.

Required Core Courses (24 credits)

- PUBP 502 - Governance and Policy Processes Credits: 1-4
- PUBP 503 - Culture, Organization, and Technology Credits: 1-4
- PUBP 700 - Theory and Practice in Public Policy Credits: 1-4
- PUBP 704 - Statistical Methods in Policy Analysis Credits: 3
- PUBP 713 - Policy and Program Evaluation Credits: 3
- PUBP 720 - Managerial Economics and Policy Analysis Credits: 3
- PUBP 741 - U.S. Financial Policy Processes and Procedures Credits: 3
- ITRN 503 - Investment and Macroeconomics Credits: 1-4

Electives (6 credits)

Students take two approved special topics courses to fulfill this requirement.

Total: 30 credits
Volgenau School of Engineering

Graduate Admissions: 703-993-1512

Student Services

Graduate: 703-993-1505
Undergraduate: 703-993-1511

Web: volgenau.gmu.edu
College Code: VS

Administrative Units

- Applied Information Technology
- Bioengineering
- Sid and Reva Dewberry Department of Civil, Environmental, and Infrastructure Engineering
- Computer Science
- Electrical and Computer Engineering
- Statistics
- Systems Engineering and Operations Research
- Interdisciplinary Programs (VS)

The mission of the Volgenau School of Engineering (VSE) is to provide our students with a high-quality education that emphasizes the importance of ethical behavior, integrity, and entrepreneurship. In addition, the School seeks to develop and disseminate leading-edge research that significantly advances the field of knowledge.

The School focuses on study areas that involve integrating the information basis for modern engineering with the more conventional physical and materials science approach. The careful integration of these areas results in a unique academic experience for highly motivated students.

Our degree programs concentrate on important contemporary technological issues and needs. Bachelor’s degree programs are offered in the areas of applied computer science, applied information technology, bioengineering, civil and infrastructure engineering, computer engineering, computer science, electrical engineering, and systems engineering. Undergraduate degree programs prepare students to enter directly into professional employment or continue studies at the graduate level. The requirements for the bachelor's degrees include required and elective courses in mathematics, humanities, and general education, and specialty courses applicable to the major. Each program strongly emphasizes English composition and communication. Minors are available in aviation flight training and management, computer science, data analysis, information technology, mechanical engineering, software engineering, and systems engineering and operations research.

Master’s degree programs are available in the following areas: applied information technology, biostatistics, civil and infrastructure engineering, computer engineering, computer forensics, computer science, electrical engineering, geotechnical construction and structural engineering, information security and assurance, information systems, operations research, software engineering, statistical science, systems engineering, telecommunications and an interdisciplinary program in management of secure information systems.

Doctoral degree programs are available in the following areas: civil and infrastructure engineering, computer science, electrical and computer engineering, systems engineering and operations research, and statistical science, and a cross-disciplinary program
in information technology. In addition, the engineer degree in information technology provides post-master’s training in an application area.

Administration

Kenneth S. Ball, Dean
Stephen G. Nash, Senior Associate Dean
Sharon A. Caraballo, Associate Dean for Undergraduate Programs
Jennifer C. Lamb, Associate Dean for Development
Melinda N. Barnhart, Executive Director, Finance and Administration
Peter Farrell, Director, Alumni Relations
Jonathan Goldman, Director, Computing Resources
Linda S. Kovac, Director, Corporate Relations
Terri A. Mancini, Director, Sponsored Research Administration
Lisa Nolder, Director, Graduate Student Services
Jade T. Perez, Director, Graduate Admissions and Enrollment Management

Bachelor of Science Programs

The Volgenau School offers eight Bachelor of Science programs. Policies regarding admission and degree requirements specific to these majors are provided in the department sections that follow.

Undergraduate Mission, Goals

The undergraduate mission is to provide a quality education to support the needs of Virginia and the nation. The goal is to graduate students who are technically competent; prepared for ethical professional practice and a lifetime of learning; communicate effectively and work as members or leaders of technical teams; and understand the global nature and effect of information technology and engineering.

Degree Requirements

The following general requirements must be completed by all undergraduate students:

- At least 120 credits of academic work including at least 45 credits of upper-level courses (numbered 300 or above)
At least 6 credits of English composition, 3 credits of literature, and 3 credits of oral communication (university general education courses)

At least 3 credits of arts, 3 credits of Western civilization or world history, 3 credits of social and behavioral science, and 3 credits of global understanding issues (university general education courses)

At least 24 credits of social science and humanities course work, which is normally satisfied by the 24 credits of university general education courses described above

All requirements listed in the following sections for specific Volgenau School majors, including university requirements for mathematics, natural science, information technology including ethics, and synthesis. Sample schedules that fulfill degree requirements for individual programs within the Volgenau School are provided in the sections of this catalog linked above and are available from the departments. With approval of departmental advisors, some courses may be taken out of the indicated sequences, particularly English, literature and social science courses.

Termination from the Major

No math, science, or Volgenau School of Engineering course that is required for the major may be attempted more than three times. Those students who do not successfully complete such a course within three attempts will be terminated from the major. For more information, see the "Termination from the Major" section under Academic Standing.

Sample Schedules

Sample schedules that fulfill degree requirements for individual programs within the Volgenau School are available from the departments and in the program section of this catalog.

Undeclared Students in the Volgenau School of Engineering

Freshmen who are undecided about their specific major may select Volgenau School undeclared as their major. This should be done as soon as possible after a student enrolls at Mason. These students will be assigned to one of the Volgenau School departments for advising until the student decides on a final major. These students should go to their assigned department for advising at least once each semester. The student will be advised to follow an initial semester or two of courses that could be applicable to majors that are of interest to them. This may involve taking courses that help the student better understand different engineering areas, but which may not contribute to the 120 credits needed for the major they eventually choose.

Academic Policies

Students should become familiar with the Academic Policies in the University Catalog in addition to policies specific to each academic unit. The Academic Policies section of the catalog also lists additional university requirements for minor programs and double majors.

Academic Appeal of Policies, Grades and Actions

A student's instructor, academic advisor and/or department can resolve most academic issues. If, however, the student disagrees with a decision at the department level and feels that there may be reasonable grounds for appeal, the student should contact the Volgenau School Student Services Offices at 703-993-1511 for guidance in preparing a request to the Associate Dean for Undergraduate Programs or other offices as appropriate.

Academic Progression

Students majoring in Volgenau School programs are expected to have an acceptable plan of study on file, formulated with assistance from their departmental advisor. They are expected to make reasonable progress toward their degree during each
semester in which they are enrolled. Individual Volgenau School departments may not allow students to retake certain high-demand courses in which they have already earned a grade of C or better simply to improve their GPA.

**Restricted Courses**

Students are encouraged to take advantage of the many excellent courses available to broaden their educational experience or strengthen their background; however, some credits earned may not satisfy any degree requirements. Degree requirements for Volgenau School undergraduate programs may not include credits earned in activity courses in any department. Examples include many of the courses listed under the catalog designations of art, dance, music, or theater; individual sports, physical education or team sports; and recreational activities. Exceptions in these categories are courses that meet the university general education requirements for the major, including global understanding or arts. Whenever there is uncertainty, students must consult with an academic advisor in their department. Generally, degree requirements for computer science and engineering majors may not be met by 100- to 400-level courses designated “IT” (and any associated cross-listed courses) in the Courses section of this catalog unless approved by the student’s major department. For more information, students should contact their academic advisor.

**Writing-Intensive Requirement**

The university requires all undergraduate students to successfully complete a course, or combination of courses, designated “writing-intensive” in their majors at the 300 level or above. To determine the writing-intensive course requirements for specific degrees, refer to the major program descriptions in the following department sections.

**BS/Accelerated MS Programs**

Many of the BS degree programs offered within the Volgenau School may be packaged with some of the MS degree programs in ways that reduce the total number of credits required. Details can be found in the individual department sections of this catalog.

**Master of Science Programs**

The Volgenau School offers a number of master of science programs. Policies regarding admission and degree requirements are provided in the sections of this catalog linked below.

Engineer Degree in Information Technology

The engineer degree is a post-master’s degree, but it does not confer a doctorate. Students pursuing the engineer degree can take advanced PhD courses and complete a project of an applied nature to fulfill program requirements. Details about the engineer degree can be found in the Interdisciplinary Programs section of this catalog.

Online Education Programs

In order to increase access to Volgenau School education and to meet the needs of the School’s student population, a number of individual courses and select degree programs can be completed via online education. Please contact the individual departments for details. All academic policies and procedures apply to online education programs and courses; see the appropriate sections of this catalog. Some instructors may require students to come to campus or make alternate arrangements for exams and/or other meetings. Students should contact the instructor directly to resolve any questions. For online education courses that involve live online transmission of simultaneous classroom instruction, students enrolled in the online section may also be permitted to join the campus-based section in the classroom; Patriot Web will state if this option is available for a particular online education section. For more detailed information about Online Education in the Volgenau School, please refer to the following website: http://volgenau.gmu.edu/distanceeducation/VolgenauOnline.php
Commonwealth Graduate Engineering Program (CGEP)

CGEP is a premiere provider of high-quality post-baccalaureate engineering education for practicing engineers and scientists interested in maintaining and enhancing their skills. Participating universities are: George Mason University (Mason); Old Dominion University (ODU); University of Virginia (UVA); Virginia Commonwealth University (VCU); and Virginia Tech (VT). Offerings include master's degrees, certificate programs, and non-degree, non-credit seminar programs.

Each degree program is taught by one of the five participating universities, and prospective students should apply directly to the university offering the degree of interest. Mason’s MS in Computer Science degree is available through CGEP. This program follows all policies stated in this catalog for the MS in Computer Science, with the exception that, with faculty advisor approval, up to 50% of the required credits may be completed at other CGEP institutions. Courses from the other institutions may be offered at Mason’s Fairfax or Prince William campuses.

Policies for other universities’ programs are determined by those institutions; please consult with the university offering the program of interest for details.

For more information about CGEP, go to: volgenau.gmu.edu/graduates/commonwealth_graduate_engineering.php.

Applied Information Technology

Phone: 703-993-3565
Web: ait.gmu.edu

School: Volgenau School of Engineering

Faculty

Professors: Gantz (chair), Jajodia

Associate professors: Bruno (associate chair, undergraduate studies), Caraballo, Kang, Rytkova, Sanghera, Snow (associate chair, graduate studies), Wang D.

Assistant professors: Albanese, Boicu, Bono, Rafatirad

Instructors: D’Alessandro, Farrell, Garrison, Islam, Lyons, Quinn

Applied Information Technology offers undergraduate and graduate programs to develop expertise in applying information technology to support business applications. The programs emphasize problem-solving, communication, as well as technical and leadership skills. The BS in Applied Information Technology program aims to meet the existing and emerging needs of industry by educating new IT workers in current principles and practices, and in its applications. The program focuses on equipping graduates with effective skills for interacting at the management level as well as the technical level. Graduates are hired in positions that focus on the application of IT in an increasing number of emerging sub-disciplines, including network administration and telecommunications, information security, web development and multimedia, database technology and programming and healthcare information technology. The MS in AIT emphasizes elements of productive, effective and ethical leadership of major IT projects, in both the federal and private sectors. The department also offers a certificate program for students seeking to add an AIT certification to their existing credentials. Students currently pursuing undergraduate degrees in other disciplines may choose to add a minor in AIT.
Course Work

The AIT Department offers all 100 - 400 IT courses and many 500/700 level AIT courses in the Courses section of this catalog.

Bachelor of Science

Applied Information Technology, BS

Banner Code: VS-BS-AIT

School: Volgenau School of Engineering

Department: Applied Information Technology

The BS in applied information technology prepares students to apply IT to support business processes. The degree produces graduates with strong problem-solving, writing, and communication skills who successfully compete for technical employment and are prepared for advanced study. The objectives of the Bachelor of Science in Applied Information Technology program relate to the abilities of the graduates several years after graduation. Three to five years after graduating from the program, graduates will have

1. Been employed in a position in which they have successfully used their information technology skills (including: problem solving, analytic, presentation and personal skills) as evidenced by achieving improved organizational objectives
2. Progressed through increasing levels of responsibility in the workplace
3. Demonstrated ethical, social and professional responsibility consistent with professional societies
4. Worked effectively in teams, whether as a participant or as a leader
5. Grown through self-study, continuing education and professional development relevant to their profession

This bachelor’s degree program is accredited by the Computing Accreditation Commission of ABET, http://www.abet.org.

The program can be successfully completed in eight full-time semesters with an average of 15 credits each semester, as shown in the sample schedule below. It is also possible for students to complete the degree on a part-time basis. The 120-credit degree requirement consists of Mason general education requirements, IT foundation and core courses, and courses required for the chosen AIT concentration. At least 30 credits toward the BS degree must be earned at Mason, and at least 45 credits must be at or above the 300 level. Upper division courses in the program are taught at the Prince William campus where most AIT Department faculty offices are located.

This undergraduate program offers students the option of applying to an accelerated master's degree program in applied information technology, computer forensics, information security and assurance, information systems, or telecommunications. See each listing for specific requirements.

Admission Requirements

Students who meet Mason’s general eligibility requirements may apply for admission to the AIT major. Admission is based on the appropriateness of the student’s academic objectives and the likelihood of the student benefiting from the program. Preference in admission is given to students who have four years of high school mathematics, including precalculus.

Degree Requirements

Students must fulfill all requirements for undergraduate programs. Requirements of the BS in Applied Information Technology degree include those of University General Education; of the AIT core, foundation, concentration, and capstone; and completion of a block of additional required courses.
Foundation Courses (18 credits)

- IT 101 - Introduction to Information Technology Credits: 3
- IT 103 - Introduction to Computing Credits: 3
- IT 106 - Introduction to IT Problem Solving Using Computer Programming Credits: 3
- IT 206 - Object Oriented Techniques for IT Problem Solving Credits: 3
- IT 212 - Computer Hardware Fundamentals Credits: 3
- STAT 250 - Introductory Statistics I Credits: 3

Core Courses (33 - 34 credits)

- IT 207 - Applied IT Programming Credits: 3
- IT 213 - Multimedia and Web Design Credits: 3
- IT 214 - Database Fundamentals Credits: 3
- IT 223 - Information Security Fundamentals Credits: 3
- IT 300 - Modern Telecommunications Credits: 3
- IT 341 - Data Communications and Network Principles Credits: 3
- IT 343 - IT Project Management Credits: 3
- MSOM 300 - Managing Financial Resources Credits: 3
- MSOM 301 - Managing People and Organizations Credits: 3
- SYST 469 - Human Computer Interaction Credits: 3
- IT 304 - IT in the Global Economy Credits: 3 OR BOTH CS 105 - Computer Ethics and Society Credits: 1 and CS 306 - Synthesis of Ethics and Law for the Computing Professional Credits: 3

Two-semester sequence of approved capstone design courses (7 credits)

- IT 492 - Senior Design Project I Credits: 3
- IT 493 - Senior Design Project II Credits: 4

Information Technology Concentrations (15 credits)

Students choose one of five concentrations from the list below. To fulfill the requirements for a concentration, students need 15 credits made up of four courses from their chosen concentration and a fifth course chosen from any of the five concentrations.

▲ Database Technology and Programming (DTP)

- IT 306 - Program Design and Data Structures Credits: 3
- IT 308 - Event-Driven Programming Credits: 3
- IT 314 - Database Management Credits: 3
- IT 315 - Mobile Development Credits: 3
- IT 344 - Information Storage and Management Technologies Credits: 3
- IT 414 - Database Administration Credits: 3

▲ Healthcare IT (HCIT)

- HAP 301 - Health Care Delivery in the United States Credits: 3
- HAP 360 - Introduction to Health Information Systems Credits: 3
- IT 322 - Healthcare Data Challenges Credits: 3
- IT 324 - Electronic Health Records Credits: 3
- IT 328 - Health Information Networking and Technologies Credits: 3

▲ Information Security (INFS)

- IT 353 - Information Defense Technologies Credits: 3
- IT 357 - Computer Crime, Forensics, and Auditing Credits: 3
- IT 366 - Network Security I Credits: 3
- IT 462 - Information Security Principles Credits: 3
- IT 466 - Network Security II Credits: 3
- IT 467 - Network Defense Credits: 3

▲ Network and Telecommunications (NTEL)

- ECE 301 - Digital Electronics Credits: 3
- IT 342 - Operating Systems Fundamentals Credits: 3
- IT 344 - Information Storage and Management Technologies Credits: 3
- IT 348 - Cloud Computing Credits: 3
- IT 366 - Network Security I Credits: 3
- IT 441 - Network Servers and Infrastructures Credits: 3
- IT 445 - Advanced Networking Principles Credits: 3
- IT 455 - Wireless Communications and Networking Credits: 3
- IT 471 - Applications of Digital Technologies Credits: 3
- IT 481 - Concepts of Multimedia Processing and Transmission Credits: 3
- IT 484 - Voice Communications Technologies Credits: 3
- IT 488 - Fundamentals of Satellite Communications Credits: 3

▲ Web Development and Multimedia (WDM)

- IT 315 - Mobile Development Credits: 3
- IT 331 - Web I: Web Development Credits: 3
- IT 332 - Web Site Administration Credits: 3
- IT 335 - Web Development using Content Management Systems Credits: 3
- IT 413 - Digital Media Editing Credits: 3
- IT 415 - Information Visualization Credits: 3
- IT 431 - Web II: Advanced Web Development Credits: 3
- IT 435 - Applied Knowledge Technologies for the Semantic Web Credits: 3

Other Major Requirements (17 credits)

- Natural Science: 7 credits of natural science, including at least one 4-credit course with lab. Students should choose these from the list of courses approved for University General Education (these credits can also apply toward general education requirements).
- COMM 100 - Public Speaking Credits: 3
- IT 293 - Applied IT: Junior Transition Credits: 1
• MATH 108 - Introductory Calculus with Business Applications Credits: 3
• MATH 112 - Discrete Mathematics for IT Credits: 3

Additional University General Education (21 credits)

Students must complete all University General Education requirements not fulfilled by major requirements.

• Written Communication: 6 credits
• Literature: 3 credits
• Arts: 3 credits
• Western Civilization/World History: 3 credits
• Social and Behavioral Science: 3 credits
• Global Understanding: 3 credits

Electives (8 - 9 credits)

Students must complete additional coursework to bring their total number of credits to 120.

Sample Schedule

First Semester Credits: 15

• ENGH 101 - Composition Credits: 3
• HIST 100 - History of Western Civilization Credits: 3
• IT 101 - Introduction to Information Technology Credits: 3
• IT 103 - Introduction to Computing Credits: 3
• MATH 108 - Introductory Calculus with Business Applications Credits: 3

Second Semester Credits: 15

• Literature (3)
• Non-lab Natural Science (3)
• IT 106 - Introduction to IT Problem Solving Using Computer Programming Credits: 3
• MATH 112 - Discrete Mathematics for IT Credits: 3
• COMM 100 - Public Speaking Credits: 3

Third Semester Credits: 16

• Natural Science with lab (4)
• Social/behavioral science (3)
• IT 206 - Object Oriented Techniques for IT Problem Solving Credits: 3
• IT 212 - Computer Hardware Fundamentals Credits: 3
• IT 214 - Database Fundamentals Credits: 3

Fourth Semester Credits: 16
- Arts (3)
- IT 207 - Applied IT Programming Credits: 3
- IT 213 - Multimedia and Web Design Credits: 3
- IT 223 - Information Security Fundamentals Credits: 3
- IT 293 - Applied IT: Junior Transition Credits: 1
- STAT 250 - Introductory Statistics I Credits: 3

Fifth Semester Credits: 15

- Elective (3)
- ENGH 302 - Advanced Composition Credits: 3 (Bus/Nat Sci/Tech)
- IT 341 - Data Communications and Network Principles Credits: 3
- MSOM 300 - Managing Financial Resources Credits: 3
- SYST 469 - Human Computer Interaction Credits: 3

Sixth Semester Credits: 15

- IT concentration course (3)
- IT 300 - Modern Telecommunications Credits: 3
- IT 304 - IT in the Global Economy Credits: 3
- IT 343 - IT Project Management Credits: 3
- MSOM 301 - Managing People and Organizations Credits: 3

Seventh Semester Credits: 15

- IT concentration course (3)
- IT concentration course (3)
- Global understanding (3)
- Elective (3)
- IT 492 - Senior Design Project I Credits: 3

Eighth Semester Credits: 13

- IT concentration course (3)
- IT concentration course (3)
- Elective (3)
- IT 493 - Senior Design Project II Credits: 4

Termination from the Major

No math, science, or Volgenau School of Engineering course, required for the major, may be attempted more than three times. Those students who do not successfully complete such a course within three attempts will be terminated from the major. For more information, see the "Termination from the Major" section under Academic Standing.

Writing-Intensive Requirement
The university writing-intensive requirement is satisfied by IT 343.

Grades

Students must have a C or better in any course that satisfies a prerequisite for an AIT course. To graduate with the BS in applied information technology, students must have a GPA of 2.50 or better across the IT foundation, core, capstone, and concentration courses.

Bachelor of Science/Accelerated Master of Science

Applied Information Technology, BS/Computer Forensics, Accelerated MS

School: Volgenau School of Engineering

Department: Applied Information Technology

Admission Requirements

Students in the BS Applied Information Technology program may apply for this program if they have earned 90 undergraduate credits with an overall GPA of at least 3.25. Criteria for admission are identical to criteria for admission to the MS Computer Forensics program.

Degree Requirements

Students must complete all credits that satisfy requirements for the BS and MS programs. The two overlapping courses are:

- CFRS 510 - Digital Forensics Analysis Credits: 3 (satisfies the IT 357 requirement for the INFS concentration in the BS program)
- CFRS 660 - Network Forensics Credits: 3 (satisfies as one NTEL concentration course in the BS program)

Degree Conferral

Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student’s final undergraduate semester, students must complete a Bachelor’s/Accelerated Master’s Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a master’s degree is conferred.

Applied Information Technology, BS/Information Security and Assurance, Accelerated MS

School: Volgenau School of Engineering

Department: Applied Information Technology

This program is for students interested in immediately continuing on to graduate studies in information security and assurance.
Admission Requirements

Students in the BS Applied Information Technology program may apply to this program if they have earned 90 undergraduate credits with an overall GPA of at least 3.30. Criteria for admission are identical to criteria for admission to the MS Information Security and Assurance program.

Degree Requirements

Students must complete all credits that satisfy requirements for the BS and MS programs. The two overlapping courses are:

- INFS 612 - Principles and Practices of Communication Networks Credits: 3 (satisfies IT 441 requirement in the BS program)
- ISA 562 - Information Security Theory and Practice Credits: 3 (satisfies IT 462 requirement in the BS program)

Note: Students must complete MATH 125 as their discrete math requirement and IT 342 and IT 306 as part of their concentration requirements in the BS program.

Degree Conferral

Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student’s final undergraduate semester, students must complete a Bachelor’s/Accelerated Master’s Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a master’s degree is conferred.

Applied Information Technology, BS/Information Systems, Accelerated MS

School: Volgenau School of Engineering

Department: Applied Information Technology

This program is for students interested in immediately continuing on to graduate studies in information systems.

Admission Requirements

Students in the BS Applied Information Technology program may apply if they have earned 90 undergraduate credits with an overall GPA of at least 3.30. Criteria for admission are identical to the criteria for admission to the MS Information Systems program.

Degree Requirements

Students must complete all credits that satisfy requirements for the BS and MS programs. 6 credits may overlap with the following:

- INFS 614 - Database Management Credits: 3 (satisfies IT 414 requirement in the BS program)
- INFS 622 - Information Systems Analysis and Design Credits: 3 (satisfies as one DTP concentration course in the BS program)

Note: students must complete MATH 125 as their discrete math requirement and IT 342 and IT 306 as part of their concentration requirements in the BS program.
Degree Conferral

Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student’s final undergraduate semester, students must complete a Bachelor’s/Accelerated Master’s Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a master’s degree is conferred.

Applied Information Technology, BS/Software Engineering, Accelerated MS

School: Volgenau School of Engineering

Department: Applied Information Technology

This program is for students interested in immediately continuing on to graduate studies in software engineering.

Admission Requirements

Students in the BS Applied Information Technology program may apply to this program if they have earned 90 undergraduate credits with an overall GPA of at least 3.30. Criteria for admission are identical to criteria for admission to the MS Software Engineering Program.

Degree Requirements

Students must complete all credits that satisfy requirements for the BS and MS programs. 6 credits may overlap with the following:

- INFS 614 - Database Management Credits: 3 (satisfies IT 414 requirement in the BS program)
- SWE 619 - Object-Oriented Software Specification and Construction Credits: 3 (satisfies one DTP concentration course in the BS program)

Note: students must complete MATH 125 as their discrete math requirement and IT 342 and IT 306 as part of their concentration requirements in the BS program.

Degree Conferral

Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student’s final undergraduate semester, students must complete a Bachelor’s/Accelerated Master’s Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a master’s degree is conferred.

Applied Information Technology, BS/Telecommunications, Accelerated MS

School: Volgenau School of Engineering
Admission Requirements

Students in the BS Applied Information Technology Program may apply for this program if they have earned 90 undergraduate credits with an overall GPA of at least 3.25. Criteria for admission are identical to criteria for admission to the MS Telecommunications program.

Degree Requirements

Students must complete all credits that satisfy requirements for the BS and MS programs.

Choose six credits from the following courses (the TCOM courses listed for 1.5 credits must be taken in pairs):

- TCOM 500 - Modern Telecommunications Credits: 3
  (To satisfy the IT 300 BS, AIT requirement)
- TCOM 501 - Data Communications and Local Area Networks Credits: 1.5 And
- TCOM 502 - Wide Area Networks and Internet Credits: 1.5
  (To satisfy the IT 341 BS, AIT requirement)
- TCOM 509 - Internet Protocols Credits: 1.5 And
- TCOM 529 - Advanced Internet Protocols Credits: 1.5
  (To satisfy the IT 441 BS, AIT requirement)
- TCOM 519 - Voice over IP Credits: 1.5 And
- TCOM 539 - Advanced Voice over IP Credits: 1.5
  (To satisfy the IT 484 BS, AIT requirement)

Note:

Students in the accelerated program who have passed IT 341 with a grade of B or higher will not be required to take TCOM 501, which is listed in the MS TCOM core. Alternative sections of TCOM courses to satisfy requirements in the AIT undergraduate program may be made with the approval of the undergraduate academic advisor.

Degree Conferral

Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student’s final undergraduate semester, students must complete a Bachelor’s/Accelerated Master’s Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a master’s degree is conferred.

Bachelor/Accelerated Master's

Applied Information Technology, BS/Applied Information Technology, Accelerated MS

School: The Volgenau School of Engineering

Department: Applied Information Technology
Admission Requirements

Students in the BS Applied Information Technology program may apply to this program if they have earned 90 undergraduate credits with an overall GPA of at least 3.30. Criteria for admission are identical to criteria for admission to the MS Applied Information Technology program.

Degree Requirements

Students must complete all credits that satisfy requirements for the BS and MS programs, with 6 credits overlapping with the following two courses:

- AIT 597 - Developing IT Leaders of Integrity Credits: 3 (satisfies the MSOM 301 requirement in the BS program)
- GSOM 540 - Analysis of Financial Decisions Credits: 3 (satisfies the MSOM 300 requirement in the BS program)

In addition, as undergraduates students may complete up to 6 graduate credits to be held in reserve and applied toward the MS requirements. See Graduate Course Enrollment by Undergraduates in the AP.1 Registration and Attendance and AP.3 Grading sections of this catalog.

Degree Conferral

Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student’s final undergraduate semester, students must complete a Bachelor’s/Accelerated Master’s Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a master’s degree is conferred.

Graduate Certificate

Applied Cyber Security Graduate Certificate

Banner Code: VS-CERG-ACBS

School: Volgenau School of Engineering

Department: Applied Information Technology

This certificate offers courses in four key elements of cyber security. It is designed for professionals who work for, or in support of, U.S. federal agencies and provides post-bachelor's academic preparation for students who may not wish to complete a full master's degree program as well as for master's graduates who wish the topic-specific courses the certificate provides.

The graduate certificate may be pursued on a full or part-time basis.

Admission Requirements

A bachelor's degree is required for admission to the program.

Certificate Requirements

Students must complete the following 12 credits:
• AIT 670 - Best Practices Managing Security and Privacy for Cloud Computing Credits: 3
• AIT 671 - Information System Infrastructure Lifecycle Management Credits: 3
• AIT 672 - Identity Management for Federal IT Credits: 3
• AIT 673 - Cyber Incident Handling and Response Credits: 3

Total: 12 credits

Intelligence Technologies Graduate Certificate

Banner Code: VS-CERG-NTLT

School: Volgenau School of Engineering

Department: Applied Information Technology

This graduate certificate offers courses in four key elements of intelligence analysis. Designed for professionals who work for, or in support of, intelligence community agencies, it provides additional academic preparation for post-bachelor's students who may not wish to complete a full master's program, as well as for master's graduates who wish to take the area-specific courses a certificate provides.

The graduate certificate may be pursued on a full or part-time basis.

Admission Requirements

A bachelor's degree is required for admission to the program.

Certificate Requirements

Students must complete the following 12 credits:

• AIT 675 - Overview of the National Intelligence Community Credits: 3
• AIT 676 - The Intelligence Cycle Credits: 3
• AIT 677 - Intelligence Analysis Methods Credits: 3
• AIT 678 - National Security Challenges Credits: 3

Total: 12 credits

Master of Science

Applied Information Technology, MS

Banner Code: VS-MS-AIT

School: Volgenau School of Engineering

Department: Applied Information Technology
The MS in Applied Information Technology is the very best graduate education in IT for high-potential leaders, especially those working on IT solutions that affect the federal government. Its objective is to graduate men and women of competence and character who can lead multidisciplinary teams in the design, justification, development, management, and sustainment of mega-systems from data to decision in the private and federal sectors. Faculty include professors from the Volgenau School, the School of Management, and the College of Humanities and Social Sciences, plus industry leaders with unique reputations in the subject area as adjunct professors and guest lecturers. The faculty expose students to the pragmatic issues of IT, not just the theory.

An accelerated master's option is available to students in either the applied information technology or individualized study bachelor's program. See each listing for specific requirements.

Admission Requirements

Applicants must have completed a baccalaureate degree from an accredited program with a reputation for high academic standards and an earned GPA of 3.00 or better in their 60 highest-level credits. They must be experienced in the fundamentals of IT and quantitative methods. In addition, applicants must:

- Provide three letters of recommendation, preferably from academic references or references in industry or government who are familiar with the applicant’s professional accomplishments.
- Provide a detailed statement of career goals and professional aspirations.
- If their native language is not English, students must earn a minimum TOEFL score of 575 for the paper-based exam or 230 for the computer-based exam (a minimum score of 600 for the paper-based exam or 250 for the computer-based exam is required for applicants who wish to be considered for a graduate teaching assistantship).

Degree Requirements

Core Courses (15 credits)

- AIT 597 - Developing IT Leaders of Integrity Credits: 3
- AIT 665 - Managing Information Technology Programs in the Federal Sector Credits: 3
- GSOM 540 - Analysis of Financial Decisions Credits: 3
- INFS 622 - Information Systems Analysis and Design Credits: 3
- AIT 697 - Leading Organizations Through Change Credits: 3

Concentration Areas (12 credits):

Note: Students must select either four courses from one of the following concentrations or four courses from among the courses in any of the concentrations.

▲ Emerging Technologies (ETEC)

- ECE 507 - Seminar in Emerging Technologies Credits: 3
- SYST 659 - Topics in Systems Engineering Credits: 3
- AIT 679 - Big Data, Small Details and Time Credits: 3
- AIT 701 - Cyber Security: Emerging Threats and Countermeasures Credits: 3

▲ Cyber Security (CYBR)

• AIT 671 - Information System Infrastructure Lifecycle Management Credits: 3
• AIT 672 - Identity Management for Federal IT Credits: 3
• AIT 673 - Cyber Incident Handling and Response Credits: 3

▲ Intelligence Technologies (NTLT)

• AIT 675 - Overview of the National Intelligence Community Credits: 3
• AIT 676 - The Intelligence Cycle Credits: 3
• AIT 677 - Intelligence Analysis Methods Credits: 3
• AIT 678 - National Security Challenges Credits: 3

Capstone Course (3 credits)

(To be taken during the student's final semester)

• AIT 685 - Capstone Seminar Credits: 3

Total: 30 credits

Non-Degree

Information Technology Minor

Banner Code: INFT

School: Volgenau School of Engineering

Department: Applied Information Technology

The minor is designed primarily for those non-Volgenau School majors who desire to augment the knowledge gained through their major-related courses with additional computer and IT knowledge. It also gives students the necessary skills to improve their attractiveness to employers in the high-technology community. The minor requires a minimum of 15 credits, including 9 credits of core courses. Beyond these requirements, the student is free to define a technical focus area, for example, information security. Focus areas are composed of at least two courses (6 credits). Students pursuing the IT minor should consult the list of approved Technical Focus area courses.

Minor Requirements

Core Courses (9 credits)

• IT 101 - Introduction to Information Technology Credits: 3
• IT 103 - Introduction to Computing Credits: 3
• IT 106 - Introduction to IT Problem Solving Using Computer Programming Credits: 3

Course Work

• Technical Focus Area Credits: 6
Total: 15 Credits

Undergraduate Certificate

Information Technology Undergraduate Certificate

Banner Code: VS-CERB-INFT

School: Volgenau School of Engineering

Department: Applied Information Technology

This certificate is designed primarily for those students who have earned a nontechnical bachelor’s degree. It allows students with nontechnical backgrounds to augment the knowledge gained through their major-related courses with additional computer and IT knowledge, and skills to improve their attractiveness to employers in the high-technology community. This certificate requires a minimum of 24 credits, including 15 credits of core courses. Beyond these requirements, the student is free to define a technical focus area. The focus area must be composed of at least three courses (9 credits) approved by an IT Advisor.

Students pursuing only the undergraduate certificate in applied information technology will not maintain full-time status which requires a minimum of 12 credits per semester.

Certificate Requirements

Core Courses (15 credits)

- IT 101 - Introduction to Information Technology Credits: 3
- IT 103 - Introduction to Computing Credits: 3
- IT 106 - Introduction to IT Problem Solving Using Computer Programming Credits: 3

AND select two of the following:

- IT 206 - Object Oriented Techniques for IT Problem Solving Credits: 3
- IT 207 - Applied IT Programming Credits: 3
- IT 212 - Computer Hardware Fundamentals Credits: 3
- IT 213 - Multimedia and Web Design Credits: 3
- IT 214 - Database Fundamentals Credits: 3
- IT 223 - Information Security Fundamentals Credits: 3

Course Work

- Technical Focus Area Credits: 9

Students must choose from the approved list of technical focus area courses.

Total: 24 Credits

Bioengineering
Bioengineering involves the application of tools and concepts in engineering and computation to problems in biology or medicine. The impact of engineering and computer science on biomedicine is wide-ranging, from advanced biomedical imaging technologies to novel computational models of protein dynamics. With the growing costs of healthcare and the impact of novel technology to fundamental understanding in biosciences, the demand for bioengineers is growing. This program provides students with a solid foundation in engineering or computer science while offering in depth exposure to the life sciences. Bioengineering faculty members collaborate with colleagues at George Mason and nearby institutions including INOVA Health Center and federal laboratories such as the Naval Research Laboratory, the National Institutes of Health Clinical Center, and the National Institute of Standards and Technology. Research areas include: computational biology, bioinformatics, biosensors, magnetic resonance imaging, medical ultrasound, and neuroengineering.

The BS in Bioengineering is a challenging multidisciplinary training program whose goal is to enable graduates to be competitive for an entry-level position in the biomedical industry or to continue their education in graduate school or medical school. The curriculum provides a strong background in the biological and engineering fundamentals of bioengineering as well as upper level courses in areas of biomedical measurements, biomedical systems modeling, and bioinformatics. The department currently offers one concentration - Biomedical Signals and Systems. In addition, students considering a career path as a health care professional in medicine, dentistry, veterinary medicine, can pursue Bioengineering as preparation for future studies.

With respect to graduate studies, students can conduct graduate-level bioengineering research and training under the mentorship of Bioengineering faculty while working toward an MS or PhD degree in Electrical and Computer Engineering or Computer Science.

Course Work

The Bioengineering Department offers 100 – 600 BENG courses; these can be found in the Courses section of this catalog.

Bachelor of Science

Bioengineering, BS

Banner Code: VS-BS-BIOE

School: Volgenau School of Engineering

Department: Bioengineering

Bioengineering, also referred to as biomedical engineering, is the application of engineering tools and approaches to solve problems in biology and medicine. It is a broad and growing field that draws upon rapid advances in technology and computation, as well as on unprecedented growth in basic biological understanding.
This program concentrates on making measurements and analyzing complex data. It is challenging since it will provide a solid foundation in engineering or computer science, and also give in-depth exposure to the life sciences. The impact of engineering and computer science on biomedicine is wide, ranging from improved medical diagnosis through advanced imaging technologies, to enhanced biological understanding gained by computational models of protein function. With the growing demand for better health care while also containing its costs, the need for bioengineers is expected to be high.

The multidisciplinary training in this field will make graduates competitive for a position in government or the biomedical industry. It also enables students to continue their education in graduate school or medical school.

The educational objectives of the Bioengineering undergraduate program are the following:

- Alumni electing to work after graduation (for example, in industry or government) will contribute to the development or application of new products or processes that are of benefit to society.
- Alumni electing to continue their formal education will have completed their studies, or will have made demonstrable progress toward an advanced degree in their chosen profession.
- Alumni will communicate and perform effectively as members or leaders of multi-disciplinary teams.
- Alumni will continue to enhance their skills and knowledge in a quest for further professional development.

Degree Requirements

All bioengineering students are strongly advised to see their major advisor each semester before course registration. Undeclared students considering bioengineering are encouraged to obtain up-to-date information and advice from Bioengineering faculty.

Students must complete each BENG, BIOL, ECE and ENGR course presented as part of the required 120 credits for the degree with a grade of C or better.

There is currently only one concentration: Biomedical Signals and Systems (BMSS). The BMSS concentration emphasizes the systems and methods for acquisition and analysis of biomedical signals.

The 120 credits required for the BS in Bioengineering are listed below.

Bioengineering Credits: 26

- BENG 101 - Introduction to Bioengineering Credits: 3
- BENG 220 - Physical Bases of Biomedical Systems Credits: 3
- BENG 301 - Bioengineering Measurements Credits: 3
- BENG 302 - Bioengineering Measurements Lab Credits: 1
- BENG 304 - Modeling and Control of Physiological Systems Credits: 3
- BENG 320 - Bioengineering Signals and Systems Credits: 3
- BENG 380 - Introduction to Circuits and Electronics Credits: 3
- BENG 381 - Circuits and Electronics Lab Credits: 1
- BENG 491 - Bioengineering Senior Seminar I Credits: 1
- BENG 492 - Senior Advanced Design Project I Credits: 2
- BENG 493 - Senior Advanced Design Project II Credits: 2
- BENG 495 - Bioengineering Senior Seminar II Credits: 1

Biology Credits: 7-8

- BIOL 213 - Cell Structure and Function Credits: 4
  And one of the following:
• BENG 313 - Physiology for Engineers Credits: 3  OR
• BIOL 425 - Human Physiology Credits: 3  OR
• BIOL 430 - Advanced Human Anatomy and Physiology I Credits: 4

Computer Science Credits: 4

• CS 112 - Introduction to Computer Programming Credits: 4

Mathematics and Statistics Credits: 20

• MATH 113 - Analytic Geometry and Calculus I Credits: 4
• MATH 114 - Analytic Geometry and Calculus II Credits: 4
• MATH 203 - Linear Algebra Credits: 3
• MATH 213 - Analytic Geometry and Calculus III Credits: 3
• MATH 214 - Elementary Differential Equations Credits: 3
• STAT 344 - Probability and Statistics for Engineers and Scientists I Credits: 3

Physics Credits: 8

• PHYS 160 - University Physics I Credits: 3
• PHYS 161 - University Physics I Laboratory Credits: 1
• PHYS 260 - University Physics II Credits: 3
• PHYS 261 - University Physics II Laboratory Credits: 1

Engineering Credits: 2

• ENGR 107 - Introduction to Engineering Credits: 2

Chemistry Credits: 4

• CHEM 251 - General Chemistry for Engineers Credits: 4

Communication and Economics Credits: 6

• COMM 100 - Public Speaking Credits: 3
• ECON 103 - Contemporary Microeconomic Principles Credits: 3

▲Concentration in Biomedical Signals and Systems (BMSS) (25 credits)

This concentration requires successful completion of the following courses.

Bioengineering Credits: 3

• BENG 425 - Assistive Control of Biomedical Systems Credits: 3
Bioinformatics Credits: 3

- BINF 401 - Bioinformatics and Computational Biology I Credits: 3

Computer Science Credits: 3

Choose one of the following:
- CS 211 - Object-Oriented Programming Credits: 3
- CS 222 - Computer Programming for Engineers Credits: 3

Electrical and Computer Engineering Credits: 3

- ECE 301 - Digital Electronics Credits: 3

Physics Credits: 4

- PHYS 262 - University Physics III Credits: 3
- PHYS 263 - University Physics III Laboratory Credits: 1

Technical Electives Credits: 9

Choose 9 credits from the following technical electives:

- BENG 341 - Introduction to Biomaterials Credits: 3
- BENG 392 - Engineering Design Studio Credits: 1
- BENG 395 - Mentored Research in Bioengineering Credits: 1-3
- BENG 406 - Biomechanics Credits: 3
- BENG 441 - Nanotechnology in Health Credits: 3
- BENG 499 - Special Topics in Bioengineering Credits: 0-4
- BENG 525 - Neural Engineering Credits: 3
- BENG 538 - Medical Imaging Credits: 3
- ECE 305 - Electromagnetic Theory Credits: 3
- ECE 410 - Principles of Discrete-Time Signal Processing Credits: 3
- ECE 421 - Classical Systems and Control Theory Credits: 3
- ECE 450 - Introduction to Robotics Credits: 3

**Students may choose to substitute one of the 3 credit technical electives with one of the following:**

- BIOL 305 - Biology of Microorganisms Credits: 3 AND BIOL 306 - Biology of Microorganisms Laboratory Credits: 1
- CHEM 313 - Organic Chemistry Credits: 3 AND CHEM 315 - Organic Chemistry Lab I Credits: 2
- CS 310 - Data Structures Credits: 3
- CS 444 - Introduction to Computational Biology Credits: 3
- CS 445 - Computational Methods for Genomics Credits: 3
- NEUR 327 - Cellular, Neurophysiological, and Pharmacological Neuroscience Credits: 3
- PSYC 372 - Physiological Psychology Credits: 3

Additional University General Education (18 credits)
Students must complete all University General Education requirements not fulfilled by major requirements. BENG 492 and 493 are approved to meet the Synthesis requirement.

- Written Communication: 6 credits
- Literature: 3 credits
- Fine Arts: 3 credits
- Western Civilization/World History: 3 credits
- Global Understanding: 3 credits

Sample Schedule

Sample Schedule for Concentration in Biomedical Signals and Systems (BMSS)

First Semester Credits: 16

- ENGR 107 - Introduction to Engineering Credits: 2
- CS 112 - Introduction to Computer Programming Credits: 4
- MATH 113 - Analytic Geometry and Calculus I Credits: 4
- ECON 103 - Contemporary Microeconomic Principles Credits: 3
- ENGH 101 - Composition Credits: 3

Second Semester Credits: 14

- BENG 101 - Introduction to Bioengineering Credits: 3
- MATH 114 - Analytic Geometry and Calculus II Credits: 4
- PHYS 160 - University Physics I Credits: 3
- PHYS 161 - University Physics I Laboratory Credits: 1
- Literature Elective Credits: 3

Third Semester Credits: 17

- CHEM 251 - General Chemistry for Engineers Credits: 4 *
- MATH 203 - Linear Algebra Credits: 3
- MATH 213 - Analytic Geometry and Calculus III Credits: 3
- PHYS 260 - University Physics II Credits: 3
- PHYS 261 - University Physics II Laboratory Credits: 1
- Global Understanding Elective Credits: 3

Fourth Semester Credits: 14

- BENG 220 - Physical Bases of Biomedical Systems Credits: 3
- BIOL 213 - Cell Structure and Function Credits: 4
- MATH 214 - Elementary Differential Equations Credits: 3
- PHYS 262 - University Physics III Credits: 3 *
- PHYS 263 - University Physics III Laboratory Credits: 1 *
Fifth Semester Credits: 16

- BENG 320 - Bioengineering Signals and Systems Credits: 3
- BENG 380 - Introduction to Circuits and Electronics Credits: 3
- BENG 381 - Circuits and Electronics Lab Credits: 1
- BENG 313 - Physiology for Engineers Credits: 3
- CS 211 - Object-Oriented Programming Credits: 3  OR  CS 222 - Computer Programming for Engineers Credits: 3
- Fine Arts Elective Credits: 3

Sixth Semester Credits: 16

- BENG 301 - Bioengineering Measurements Credits: 3
- BENG 302 - Bioengineering Measurements Lab Credits: 1
- BENG 304 - Modeling and Control of Physiological Systems Credits: 3
- COMM 100 - Public Speaking Credits: 3
- STAT 344 - Probability and Statistics for Engineers and Scientists I Credits: 3
- ECE 301 - Digital Electronics Credits: 3

Seventh Semester Credits: 15

- BENG 425 - Assistive Control of Biomedical Systems Credits: 3
- BENG 491 - Bioengineering Senior Seminar I Credits: 1  OR  ECE 491 - Engineering Seminar Credits: 1
- BENG 492 - Senior Advanced Design Project I Credits: 2
- BINF 401 - Bioinformatics and Computational Biology I Credits: 3
- ENGH 302 - Advanced Composition Credits: 3
- Technical Elective Credits: 3

Eighth Semester Credits: 12

- BENG 493 - Senior Advanced Design Project II Credits: 2
- BENG 495 - Bioengineering Senior Seminar II Credits: 1
- HIST 100 - History of Western Civilization Credits: 3  OR  HIST 125 - Introduction to World History Credits: 3
- Technical Elective Credits: 3
- Technical Elective Credits: 3

Notes

* Students interested in medical school may substitute CHEM 211 - General Chemistry and CHEM 212 - General Chemistry for PHYS 262 - University Physics III, PHYS 263 - University Physics III Laboratory, and CHEM 251 - General Chemistry for Engineers. These students are encouraged to meet with the university's pre-health advisor to determine any additional courses that they should consider.

Advising

All Bioengineering students are assigned to a faculty member who serves as their academic advisor. Students are required to see their advisor prior to course registration each semester. GMU students interested in Bioengineering who have not declared a major, or are considering transferring, should contact the Bioengineering Program Office.
Termination from the Major

No math, science or Volgenau School of Engineering course, required for the major, may be attempted more than three times. Those students who do not successfully complete such a course within three attempts will be terminated from the major. For more information, see the "Termination from the Major" section under Academic Standing.

Sid and Reva Dewberry Department of Civil, Environmental, and Infrastructure Engineering

Phone: 703-993-1675
Web: civil.gmu.edu

School: Volgenau School of Engineering

Faculty

Professors: Arciszewski, Bronzini (emeritus), Goodings (chair), Houck

Associate professors: deMonsabert (emeritus), Venigalla

Assistant professors: Casey, Durant (associate chair), Ferreira, Kosoglu, Tanyu, Urgessa, Zhu

Adjunct Faculty: Benton, Binning, deBoinville, Doyle, Faghri, Falke, Fry, Greene, Halkias, Hardy, Hartmann, Kennedy, Kewaisy, Kilpatrick, Krimmer, Laib, Lazarte, Liner, Loulakis, Matusik, McDonald, Moore, Nicholson, Reger, Rodriguez, Stein, Suehr, Swanson, Teitelman, Thoesen, Yang

The Sid and Reva Dewberry Department of Civil, Environmental, and Infrastructure Engineering (CEIE) offers BS, MS, MEng, and PhD degrees. These degree programs focus on the physical and organizational infrastructure essential to the functioning of an urban society. The bachelor’s program in civil and infrastructure engineering is accredited by the Engineering Accreditation Commission of ABET, http://www.abet.org

Civil and infrastructure engineering is the study of land, transportation, water resources, environmental, structural, geotechnical, and construction from a civil engineering perspective and within a complex technological, social, political, economic, and environmental context. The focus is on how these systems are successfully conceived, developed, designed, built, operated, maintained, and renewed in the built environment. This applies to major metropolitan areas in developed countries, such as Washington, D.C. and its integrated suburbs, and extends to infrastructure issues in developing nations which often involve very different issues.

An urban society thrives and prospers when adequate, appropriate, reliable, robust, secure, and cost-effective infrastructure systems are provided. The investment in existing infrastructure and other urban systems in the United States and abroad is enormous. The investment required to maintain, operate, renew, and manage the evolution of these infrastructure systems in the future is even greater. The need for highly educated and creative professionals to confront and solve these continuing vital problems is pressing. Examples of infrastructure systems include water supply and distribution; streets, roads, and highways; wastewater management; transit; storm water management; public utilities; energy supply and distribution; telecommunications; buildings, facilities, and structures; and solid waste management.

Course Work

The department offers all courses designated CEIE in the Courses section of this catalog.
Bachelor of Science

Civil and Infrastructure Engineering, BS

Banner Code: VS-BS-CEIE

School: Volgenau School of Engineering

Department: Sid and Reva Dewberry Department of Civil, Environmental and Infrastructure Engineering

The bachelor’s degree program provides essential underpinnings in the theory and design methods of civil and infrastructure engineering for engineering practice. Students benefit from exposure to practical civil, environmental, and infrastructure engineering problems and their solutions in the classroom, lab, and field. The educational objectives of the Civil and Infrastructure Engineering program describe expectations for graduates approximately three to five years after obtaining their BS CIE degree. Graduates of the program will be professionals who:

- Engage in the engineering practice of planning, designing, constructing, operating and maintaining sustainable infrastructure;
- Participate in public discussions concerning infrastructure in the urban, suburban, and exurban setting by providing professional guidance;
- Stay current through continuing education opportunities, professional conferences, graduate school, and other self-learning experiences; have the ability to obtain and maintain professional licensing.

Civil engineering students can look forward to a career in local, state, and federal government organizations, and in architectural and engineering firms that specialize in land development, transportation, water resources, environment, structures, geotechnical, construction, and other related fields. The program also prepares students for continuing graduate studies for sophisticated practice, research and teaching.

This has been designated a Green Leaf program. For further information, please go to Green Leaf Programs and Courses.

This undergraduate program offers students the option of applying to the accelerated master's degree program. See Civil and Infrastructure Engineering, BS/Civil and Infrastructure Engineering, Accelerated MS for specific requirements.

Degree Requirements

Degree requirements include 120 credits distributed in three main areas: mathematics and basic science, humanities and social sciences, and civil engineering analysis and design. Students must complete all math, science and Volgenau School of Engineering courses presented as part of the required 120 credits for the degree with a grade of C or better.

The prerequisite structure for these courses is extensive. The sample schedule below provides a listing of major and general education course requirements, as well as a guide to the progression of the courses to satisfy all prerequisites.

Students are required to see their faculty advisor at least once each year to plan their curriculum, and to develop an approved plan of study, which constitutes a learning plan for the degree program.

For the BS CIE degree, students must complete 120 credits, including all of the following:

Civil Engineering Credits: 43

- CEIE 117 - Information Technology for Engineering Credits: 3
- CEIE 203 - Geomatics and Engineering Graphics Credits: 3
- CEIE 210 - Statics and Dynamics Credits: 3
- CEIE 240 - Hydraulics Credits: 3
- CEIE 301 - Engineering and Economic Models in Civil Engineering Credits: 3
- CEIE 310 - Mechanics of Materials Credits: 3
- CEIE 311 - Structural Analysis Credits: 3
- CEIE 331 - Soil Mechanics Credits: 3
- CEIE 340 - Water Resource Engineering Credits: 3
- CEIE 355 - Environmental Engineering and Science Credits: 3
- CEIE 360 - Introduction to Transportation Engineering Credits: 3
- CEIE 370 - Construction Systems Credits: 3
- CEIE 400 - Civil Engineering Planning and Management Credits: 3
- CEIE 409 - Professional Practice and Management in Engineering Credits: 1
- CEIE 490 - Senior Design Project Credits: 3

Engineering Credits: 2

- ENGR 107 - Introduction to Engineering Credits: 2

Technical Electives Credits: 21

A total of 21 credit hours of CEIE Technical Elective courses must be selected. The first four CEIE technical core elective courses (12 credit hours) must be selected from four different specialty areas from among the six Civil Engineering specialty areas:

- construction engineering (CEIE 471 - Construction Administration or CEIE 472 - Building Information Modeling)
- environmental engineering (CEIE 450 - Environmental Engineering Systems or CEIE 453 - Water and Wastewater Treatment Processes)
- geotechnical engineering (CEIE 432 - Foundation Design or CEIE 435 - Introduction to Engineering Geology)
- structural engineering (CEIE 412 - Structural Steel Design or CEIE 413 - Reinforced Concrete Design)
- transportation engineering (CEIE 461 - Traffic Engineering or CEIE 462 - Urban Transportation Planning)
- water resources engineering (CEIE 440 - Water Supply and Distribution or CEIE 442 - Open Channel Flow).

The remaining 9 credit hours of the CEIE Technical Elective courses may be selected from any CEIE 4XX course. One 3 credit hour course of those remaining credit hours may be from related advanced science or engineering course offerings. Approval from the student's academic advisor is required before a non-CEIE course is taken to meet senior technical elective requirements for the degree.

Mathematics Credits: 14

- MATH 113 - Analytic Geometry and Calculus I Credits: 4
- MATH 114 - Analytic Geometry and Calculus II Credits: 4
- MATH 213 - Analytic Geometry and Calculus III Credits: 3
- MATH 214 - Elementary Differential Equations Credits: 3

Physics Credits: 9

- PHYS 160 - University Physics I Credits: 3
- PHYS 161 - University Physics I Laboratory Credits: 1
- PHYS 260 - University Physics II Credits: 3
- PHYS 261 - University Physics II Laboratory Credits: 1
- PHYS 266 - Introduction to Thermodynamics Credits: 1

Chemistry Credits: 4

- CHEM 251 - General Chemistry for Engineers Credits: 4  OR  CHEM 211 - General Chemistry Credits: 4

Biology Credits: 3

- BIOL 377 - Applied Ecology Credits: 3

Statistics Credits: 3

- STAT 344 - Probability and Statistics for Engineers and Scientists I Credits: 3

Communication and Economics Credits: 6

- COMM 100 - Public Speaking Credits: 3
- ECON 103 - Contemporary Microeconomic Principles Credits: 3

Additional University General Education Credits: 15

Students must complete all University General Education requirements not fulfilled by major requirements with one modification. CIE students are required to take 6 credits of written communication, 3 credits of literature, and courses in two of the following three areas: arts, global understanding, and western civilization/world history. This exemption means that CIE students meet the Volgenau School of Engineering's requirement for humanities and social science courses by taking 21 credits rather than 24. The two additional General Education areas to be satisfied must be approved by the CEIE faculty advisor with the goal of best meeting the general education needs of the student. All other University General Education requirements must be met as stated in the University General Education section of this catalog.

- Written Communication: 6 credits
- Literature: 3 credits

and courses selected from two of the following areas:

- Arts: 3 credits
- Western Civilization/world history: 3 credits
- Global Understanding: 3 credits

Writing-Intensive Requirement

The university's writing-intensive requirement for civil and infrastructure engineering majors is satisfied by the successful completion of CEIE 301 - Engineering and Economic Models in Civil Engineering.

Total: 120 credits
CEIE Honors Program

The Sid and Reva Dewberry Department of Civil, Environmental and Infrastructure Engineering offers an Honors Program in Civil and Infrastructure Engineering that creates a community of outstanding scholars in civil engineering who share a commitment to learning, service, and leadership. The Program is crafted around the civil and infrastructure curriculum, and is distinct from the University Honors Curriculum. Entry to the Honors Program is by invitation, extended to students with a high school GPA of at least 3.80, and who enter the program as freshmen in fall 2010 or after. Inclusion of high-performing transfer students is expected in 2013.

The Honors program is challenging, designed for the highly motivated student, and consists of 120 credits. Honors students must satisfy requirements in addition to those of the normal BS CIE degree, including:

- An advanced communication course COMM 320 or COMM 637.
- A minimum of 18 credits of honors courses or honors sections. A maximum of 4 credits of the 18 total may be earned by taking MATH 116 or MATH 215
- All Honors students must take CEIE 490-H, the Honors section of the Senior Design Project for three credits.
- The remaining credits must be earned by taking a combination of: CEIE 5XX/6XX level courses and designated honors sections of other CEIE courses approved by a faculty advisor.

Once admitted to the Honors Program, students must remain in good standing and maintain a minimum cumulative GPA of 3.50 and a minimum GPA of 3.20 in each semester for all courses counting toward the BS CIE degree, maintain continuous enrollment working toward the BS CIE degree, and abide by the GMU Honor Code.

Sample Schedule

First Semester Credits: 16

- ENGR 107 - Introduction to Engineering Credits: 2
- CHEM 251 - General Chemistry for Engineers Credits: 4 OR CHEM 211 - General Chemistry Credits: 4
- ENGH 101 - Composition Credits: 3
- ECON 103 - Contemporary Microeconomic Principles Credits: 3
- MATH 113 - Analytic Geometry and Calculus I Credits: 4

Second Semester Credits: 14

- CEIE 117 - Information Technology for Engineering Credits: 3
- MATH 114 - Analytic Geometry and Calculus II Credits: 4
- PHYS 160 - University Physics I Credits: 3
- PHYS 161 - University Physics I Laboratory Credits: 1
- COMM 100 - Public Speaking Credits: 3

Third Semester Credits: 16

- CEIE 203 - Geomatics and Engineering Graphics Credits: 3
- MATH 213 - Analytic Geometry and Calculus III Credits: 3
- PHYS 260 - University Physics II Credits: 3
- PHYS 261 - University Physics II Laboratory Credits: 1
- COMM 100 - Public Speaking Credits: 3
- General Education Literature Credits: 3
Fourth Semester Credits: 15

- CEIE 210 - Statics and Dynamics Credits: 3
- CEIE 240 - Hydraulics Credits: 3
- MATH 214 - Elementary Differential Equations Credits: 3
- ENGH 302 - Advanced Composition Credits: 3
- STAT 344 - Probability and Statistics for Engineers and Scientists I Credits: 3

Fifth Semester Credits: 16

- CEIE 301 - Engineering and Economic Models in Civil Engineering Credits: 3
- CEIE 304 - Jr Engineering Competency Exam Credits: 0
- CEIE 310 - Mechanics of Materials Credits: 3
- CEIE 331 - Soil Mechanics Credits: 3
- CEIE 340 - Water Resource Engineering Credits: 3
- PHYS 266 - Introduction to Thermodynamics Credits: 1
- General Education course Credits: 3

Sixth Semester Credits: 15

- CEIE 311 - Structural Analysis Credits: 3
- CEIE 355 - Environmental Engineering and Science Credits: 3
- CEIE 360 - Introduction to Transportation Engineering Credits: 3
- CEIE 370 - Construction Systems Credits: 3
- BIOL 377 - Applied Ecology Credits: 3

Seventh Semester Credits: 16

- CEIE 400 - Civil Engineering Planning and Management Credits: 3
- CEIE 404 - Sr Engineering Competency Exam Credits: 0
- CEIE 409 - Professional Practice and Management in Engineering Credits: 1
- CEIE 4XX - CEIE Technical core elective Credits: 3
- CEIE 4XX - CEIE Technical core elective Credits: 3
- CEIE 4XX - CEIE Technical core elective Credits: 3
- CEIE 4XX - CEIE Technical elective Credits: 3

Eighth Semester Credits: 12

- CEIE 490 - Senior Design Project Credits: 3
- CEIE 4XX - CEIE Technical core elective Credits: 3
- CEIE 4XX - CEIE Technical elective Credits: 3
- CEIE 4XX - CEIE Technical elective Credits: 3

Termination from the Major
No math, science, or Volgenau School of Engineering course, required for the major, may be attempted more than three times. Those students who do not successfully complete such a course within three attempts will be terminated from the major. For more information, see the “Termination from the Major” section under Academic Standing.

**Bachelor of Science/Accelerated Master of Science**

**Civil and Infrastructure Engineering, BS/Civil and Infrastructure Engineering, Accelerated MS**

*School: Volgenau School of Engineering*

*Department: Sid and Reva Dewberry Department of Civil, Environmental, and Infrastructure Engineering*

This option provides Mason students the opportunity to earn an MS in Civil and Infrastructure Engineering in less time than if they graduate from the BS program and then apply to the MS program. This program can be completed in 144 credits.

**Admission Requirements**

Mason students in the BS in Civil and Infrastructure Engineering Program may apply for the BS/accelerated MS if they have earned 90 undergraduate credits with cumulative GPA of at least 3.50. All other criteria for admission are identical to criteria for admission into the MS program.

**Degree Requirements**

Students must complete 144 credits that satisfy requirements for both the BS and MS programs. Students register for 6 credits of approved graduate level courses in place of undergraduate technical elective courses. The courses selected for this purpose must be approved by the academic advisor. Students complete all MS requirements and may apply the 6 credits of approved graduate level courses included in the BS program toward satisfaction of these requirements.

**Conferral of Degrees**

Students must apply to have the BS degree conferred the semester before they expect to complete the BS requirements. The master’s degree is granted on completion of MS requirements.

**Doctor of Philosophy**

**Civil and Infrastructure Engineering, PhD**

*Banner Code: VS-PHD-CEIE*

*School: Volgenau School of Engineering*

*Department: Sid and Reva Dewberry Department of Civil, Environmental, and Infrastructure Engineering*

The Doctor of Philosophy in Civil and Infrastructure Engineering (CIE) was created to prepare students for advanced leadership positions in research and development in the public or private sector, academics, or government. Students may elect to study in the areas of: environmental and water resources engineering, geotechnical engineering, construction engineering and management, structural engineering, or transportation engineering. Admitted students will complete both required and applicable
course work in their technical interest area based on a plan of study prepared with a doctoral advisor. They will take qualifying exams that assess student’s breadth of knowledge at the graduate level and competency to conduct research. They will form a doctoral committee, prepare, then defend a dissertation proposal leading to PhD candidacy. Finally, they will conduct original scholarly research and prepare, then defend a doctoral dissertation. Both part-time and full-time study is available.

Admission Requirements

All general George Mason University and specific Volgenau School admission requirements (including deadlines) apply. In addition, all applicants, including Mason undergraduates, must submit the following:

- Official transcript of undergraduate and graduate course work,
- For applicants whose official language is not English, official TOEFL scores which meet the minimum requirements set by the Volgenau School,
- Three letters of recommendation from individuals knowledgeable about the applicant’s professional or academic work (at least two of the letters should be from individuals with doctorates),
- Recent professional résumé,
- Substantial statement of interest that includes a description of the specific area of proposed dissertation research, contacts the student has made with potential faculty advisors, and an explanation of career and research goals,
- Official results of the GRE general test.

Admission decisions will be based on the student’s qualifications and the availability of a faculty advisor in their proposed area of research. The application materials will be reviewed by the department doctoral committee and decisions made with input from appropriate faculty members.

Financial support for outstanding applicants is available in the form of fellowships as well as research and teaching assistantships. For best consideration, applicants are encouraged to apply early and to contact potential faculty advisors to express interest in support.

Reduction of Credit

Students must complete a minimum of 72 graduate credits, which may be reduced by a maximum of 24 credits from a completed master’s degree in civil engineering or other related fields. Reduction of credit requires the approval of the program director or designee and the dean or designee of the school. They determine whether the credits are eligible for reduction of credit and applicable to the degree program and the number of credits to be reduced.

Degree Requirements

The PhD in Civil and Infrastructure Engineering requires 72 graduate credits, including 48 credits of graduate coursework and 24 credits of research. Admitted students are expected to hold a Bachelor of Science in Civil Engineering or degree in a closely-related science field.

Exceptionally-qualified students without a related bachelor’s or master’s degree may be admitted provisionally and required to take additional undergraduate- and graduate-level articulation courses prescribed by the doctoral committee, which will not count towards the PhD degree.

The following degree plan is based on a student who receives a full 24 credit reduction. Students who do not receive a full credit reduction should choose additional credits in consultation with their advisor.

Doctoral Coursework (24 credits)
A minimum GPA of 3.50 is required and no C grades are allowed for the 24 credits earned beyond the MS. A detailed plan of study will be prepared for each student upon acceptance into the program and in consultation with the faculty advisor, which outlines all course requirements to include:

**Required Courses (6 credits)**

The following must be completed while in residence in the program.

- CEIE 800 - Civil, Environmental, and Infrastructure Engineering Colloquium Credits: 1 (must be taken at least twice)
- CEIE 894 - Design and Inventive Engineering Credits: 3
- CEIE 990 - Civil and Infrastructure Dissertation Topic Presentation Credits: 1

**Courses chosen with Advisor (18 credits)**

Remaining courses, especially in the student’s technical interest area, will be chosen in consultation with his or her advisor.

- A minimum of 3 credits of statistics or a related advanced mathematics course at the 500-level or above (outside the CEIE Department) must be taken.
- No cross-listed courses may apply to the degree.

**Qualifying Exam**

Based on demand, qualifying exams will be offered twice a year prior to the start of the fall and spring semesters. The qualifying exam is intended to test the student’s breadth of knowledge in their research area. Students entering with a MS degree are required to take the qualifying exams upon completing 18 credits in the program. Students entering without a MS degree must take the qualifying exam upon completion of 30 credits. Exceptional students may be allowed to take the exams earlier based on doctoral advisor recommendation and approval of the CEIE Graduate Coordinator.

The qualifying exam consists of two written exams and one oral exam. One written exam will be in the student’s primary research area. The other written exam will be in a student-selected secondary area. The level of knowledge for the primary exam is MS-level, while the level for the secondary exam is BS-level. The available examination areas include:

- Area A: Water Resources Engineering
- Area B: Construction Engineering and Management
- Area C: Geotechnical Engineering
- Area D: Transportation Engineering
- Area E: Infrastructure Systems Engineering
- Area F: Structural Engineering
- Area G: Environmental Engineering

At least 30 days before the scheduled exam date, students are required to request exams in their primary and secondary areas from the above list. A written exam for each area will be administered to the candidate, typically on the same day. The specific requirements for each exam (reading list, allowed references, etc.) will be announced prior to the exam date. On a second date, students are required to attend an oral interview with an examining committee of at least four members of the CEIE faculty. The interview will consist of discussion of the student’s written exam results as well as questions to determine preparedness to conduct independent research. Students will receive separate pass/fail grades for the primary and secondary written exams and an overall pass/fail grade for the qualifying exam.

Students who receive an overall pass grade are allowed to form a dissertation committee and to register for CEIE 998 Dissertation Proposal Preparation. Unsuccessful students who receive an overall fail grade are allowed to repeat the exam once. The second attempt at passing the qualifying exams must be within one calendar year or the next scheduled examination date, whichever is greater. Students who do not receive an overall pass grade on the second attempt are excused from the program.
Dissertation Research (24 credits)

Students become eligible for CEIE 998 upon passing the qualifying exam (preceding section). Upon admission to candidacy, which requires satisfactory preparation and defense of a dissertation proposal, students may register for CEIE 999.

- CEIE 998 - Doctoral Dissertation Proposal Credits: 1-12 (must complete a minimum of 12 credits)
- CEIE 999 - Doctoral Dissertation Credits: 1-12 (must complete a minimum of 12 credits)

Dissertation Committee

A dissertation committee (separate from the examination committee) is formed upon successful completion of the qualifying exams. The student, in consultation with their advisor, shall select at least three full-time CEIE Department faculty members, and at least one committee member from GMU outside the CEIE department. At least three members of the committee are to be members of the Mason graduate faculty. All committee members must hold earned doctorates and possess applicable knowledge and experience in the student’s chosen topic. The CEIE Department Chair must approve the composition of the dissertation committee. Additional committee members from outside GMU (e.g., from industry, other institutions, etc.) may be appointed if approved by the majority of the CEIE faculty. The committee must be formed and approved before admission to candidacy (described in the next section) and before registering for CEIE 999 Dissertation Preparation. Substitutions to the dissertation committee are allowed with the approval of the CEIE Department chair.

Dissertation Proposal Preparation and Advancement to Candidacy

After successfully passing the qualifying exams and forming of a dissertation committee, the student may register for CEIE 998 research credits and begin preparation of the dissertation research proposal. At least 12 credits of CEIE 998 are required during which the student will consult with his or her advisor on the selection of an original scholarly topic and preparation of a formal research proposal. Students are also encouraged to register for the required CEIE 990 Civil and Infrastructure Dissertation Topic Presentation course during this time. Students must schedule a formal proposal defense (also known as the research competency exam) with all members of their chosen committee present. This cannot be done before successful completion of the qualifying exams. Committee members should receive printed copies for the final proposal not less than two weeks prior to the scheduled defense date.

The research competency exam (proposal defense) includes the written proposal and a presentation of the planned dissertation research. The dissertation proposal defense shall not include already completed research. The dissertation proposal defense is the main opportunity for the committee to provide input and for the dissertation committee members to examine the student’s knowledge in higher-level course work and familiarity with existing and emerging research related to the student’s research area. After the student’s presentation, and after private deliberation, the committee makes a pass/fail determination that is given to the student by his or her advisor.

Students who pass the research competency exam are admitted to candidacy and become PhD Candidates. Students who do not pass the exam may, in consultation with their advisor, schedule a second exam within 120 days of receiving notice of the first exam result. Students who do not re-schedule and successfully pass the research competency within this period are dismissed from the program.

Dissertation Research and Defense

On successful completion of the dissertation proposal, students are to conduct original research under the guidance of their dissertation director and dissertation committee members. Students are not to schedule their dissertation defense sooner than two semesters after a successful proposal defense. The dissertation must represent achievement in research, must be a significant contribution to the field of civil engineering, and should be deemed publishable in refereed journals. When the majority of the research has been completed, the candidate is to submit a written draft of the dissertation to the doctoral dissertation committee and schedule an oral pre-defense with the doctoral dissertation committee. The pre-defense is to be attended by the doctoral dissertation committee and the department chair.
A final, public, oral defense may be scheduled no sooner than one month after the conclusion of the pre-defense, which will allow for a minimum of two weeks to advertise it broadly. The final defense is to be attended by the doctoral dissertation committee and the department chair. On successful completion of the oral defense, students must submit a final dissertation that meets the guidelines specified by the Guide for Preparing Graduate Theses, Dissertations, and Projects. If the student fails to defend the dissertation successfully, the student may request a second defense following the same procedures as the initial defense. This request has no time limit, other than the general time limits for the doctoral degree as per Mason policy. An additional pre-defense is not required; however, the student is strongly advised to consult with the committee before scheduling the second defense. If the student fails on the second attempt to defend the dissertation, the student will be dismissed from the PhD program. Following a successful public defense and completion of the final form of the dissertation, the dissertation committee recommends the candidate for the degree of Doctor of Philosophy.

Teaching Opportunities

All PhD students are encouraged to participate in teaching activities in consultation with their major advisors. Teaching opportunities include presenting lectures, conducting recitation sessions, serving as a teaching assistant, working as a laboratory assistant, participating in teaching workshops, preparing course materials, and other related activities approved by the student’s advisor.

Total: 72 credits

Master of Science

Civil and Infrastructure Engineering, MS

Banner Code: VS-MS-CEIE

School: Volgenau School of Engineering

Department: Sid and Reva Dewberry Department of Civil, Environmental, and Infrastructure Engineering

The Master of Science (MS) degree is designed for students who have completed a bachelor's degree in civil engineering, although students with related undergraduate degrees may be considered for provisional admission. The MS educates students in the theory and practice of civil engineering science and design, with a technical concentration. The master’s degree is increasingly expected for high level practice in civil engineering, and prepares graduates to practice in civil engineering for: federal, state, or local government; engineering design firms; construction firms; public utilities; non-governmental organizations; and local and regional planning firms, among others. The MS degree serves as a foundation for subsequent study in a doctoral program in civil engineering, as well as for graduate studies in architecture, law, business, economics, finance, and public policy and administration.

Full-time students typically complete the degree in one and a half, to two years.

An accelerated master's option is available to students in the bachelor's program. See Civil and Infrastructure Engineering, BS/Civil and Infrastructure Engineering, Accelerated MS for specific requirements.

Admission Requirements

To be considered for admission to the program, a candidate must:

- Satisfy general University and Volgenau School requirements for admission to a graduate program,
- Have earned a baccalaureate degree in engineering or a related science,
• Provide three letters of reference, submitted by former professors or supervisors.
• Provide GRE score.

Acceptance to the degree program is based on an assessment of the applicant’s capacity to pursue graduate studies successfully. Consideration is given to the undergraduate record, any previous graduate work, professional work experience, and reference letters. Students with minor admission deficiencies may be provisionally admitted subject to completing an articulation program. Prescribed courses taken in the articulation program are not creditable toward the MS degree.

Degree Requirements

All MS students must develop a faculty-approved plan of study with a minimum of 30 graduate credits. These credits include two core courses (CEIE 601 and CEIE 605), specific requirements of a concentration declared by the student, and seminar requirement (CEIE 795).

Plan of Study

Students are responsible for developing and receiving advisor approval on a plan of study no later than the end of their second semester of study. Courses taken without prior approval by the faculty advisor may not be accepted for credit toward the degree. No more than three courses used for credit toward the MS may be cross-listed as undergraduate courses. None may repeat material completed as part of the student’s previous studies. Most MS courses are offered on a three-semester rotation.

Core Courses (6 credits)

All MS students must complete the following two core courses within the first 12 credit hours of their MS studies. These courses provide a common background for understanding the breadth and complexity of civil and infrastructure engineering and for analyzing and solving engineering problems.

- CEIE 601 - Infrastructure Modeling Credits: 3
- CEIE 605 - Infrastructure Systems Analysis Credits: 3

Concentration Requirements (24 credits)

Students must declare one of the five available concentration areas. These concentration areas are:

- Construction Project Management
- Environmental and Water Resources Engineering
- Geotechnical Engineering
- Structural Engineering
- Transportation Engineering

▲Concentration in Construction Project Management (CPM)

Choose at least four of the following five construction project management core courses:

- CEIE 571 - Construction Administration Credits: 3 *
- CEIE 572 - Building Information Modeling Credits: 3 *
- CEIE 573 - Legal Aspects of the Construction Process Credits: 3
- CEIE 575 - Design for Constructability Credits: 3
- CEIE 576 - Construction Cost Estimating Credits: 3

*Cross-listed as undergraduate course
Electives

The remaining elective credits depend on whether the student is pursuing research credits or not. Students choose one of the following options (also outlined in the Notes section below).

- Thesis: 6 credits of CEIE 799 and at least 6 credits of electives
- Project: 3 credits of CEIE 798 and at least 9 credits of electives
- All coursework: at least 12 credits of electives

A list of approved electives for the construction project management concentration is provided below. Note that the one remaining construction project management core course can also be selected as an elective.

- CEIE 524 - Introduction to Bridge Engineering Credits: 3
- CEIE 525 - Structural Evaluation and Rehabilitation Credits: 3
- CEIE 531 - Earth Retaining Structures and Slope Stability Credits: 3
- CEIE 532 - Foundation Design Credits: 3 *
- CEIE 580 - Risk and Reliability in Civil Engineering Practice Credits: 3
- CEIE 633 - Advanced Foundation Design and Ground Improvement Credits: 3
- CEIE 636 - Sources of Geotechnical Data Credits: 3
- GGS 553 - Geographic Information System Credits: 3

*Cross-listed as undergraduate course

▲ Concentration in Environmental and Water Resources Engineering (EWRE)

Choose at least four of the following five environmental and water resources engineering core courses:

- CEIE 641 - Water Resources Engineering I: Principles and Practice Credits: 3
- CEIE 657 - Environmental Engineering Microbiology Credits: 3
- CEIE 658 - Water Quality Credits: 3
- CEIE 742 - Water Resources Engineering II: Water Resource Systems Credits: 3
- COMM 637 - Risk Communication Credits: 3

Electives

The remaining elective credits depend on whether the student is pursuing research credits or not. Students choose one of the following options (also outlined in the Notes section below).

- Thesis: 6 credits of CEIE 799 and at least 6 credits of electives
- Project: 3 credits of CEIE 798 and at least 9 credits of electives
- All coursework: at least 12 credits of electives

A list of approved electives for the environmental and water resources engineering concentration is provided below. Note that the one remaining environmental and water resources engineering core course can also be selected as an elective.

- CEIE 540 - Water Supply and Distribution Credits: 3 *
- CEIE 542 - Open Channel Flow Credits: 3 *
- CEIE 550 - Environmental Engineering Systems Credits: 3 *
- CEIE 553 - Water and Wastewater Treatment Processes Credits: 3 *
- CEIE 634 - Groundwater and Geoenvironmental Design Credits: 3
- CEIE 659 - Hazardous Waste Credits: 3
- CEIE 664 - Transportation Engineering and the Environment Credits: 3
• CEIE 683 - Water and Wastewater Systems Security Credits: 3
• CHEM 651 - Environmental Chemistry of Organic Substances Credits: 3
• EVPP 524 - Introduction to Environmental and Resource Economics Credits: 3
• EVPP 670 - Environmental Law Credits: 3
• GGS 553 - Geographic Information System Credits: 3
  *Cross-listed as undergraduate courses

▲ Concentration in Geotechnical Engineering (GEOE)

Choose at least four of the following five geotechnical engineering core courses:

• CEIE 531 - Earth Retaining Structures and Slope Stability Credits: 3
• CEIE 633 - Advanced Foundation Design and Ground Improvement Credits: 3
• CEIE 634 - Groundwater and Geoenvironmental Design Credits: 3
• CEIE 635 - Advanced Soil Mechanics Credits: 3
• CEIE 636 - Sources of Geotechnical Data Credits: 3

Electives

The remaining elective credits depend on whether the student is pursuing research credits or not. Students choose one of the following options (also outlined in the Notes section below).

• Thesis: 6 credits of CEIE 799 and at least 6 credits of electives
• Project: 3 credits of CEIE 798 and at least 9 credits of electives
• All coursework: at least 12 credits of electives

A list of approved electives for the geotechnical engineering concentration is provided below. Note that the one remaining geotechnical engineering core course can also be selected as an elective.

• CEIE 524 - Introduction to Bridge Engineering Credits: 3
• CEIE 532 - Foundation Design Credits: 3 *
• CEIE 535 - Engineering Geology Credits: 3 *
• CEIE 573 - Legal Aspects of the Construction Process Credits: 3
• CEIE 575 - Design for Constructability Credits: 3
• CEIE 580 - Risk and Reliability in Civil Engineering Practice Credits: 3
• CEIE 621 - Applied Finite Element Methods Credits: 3
• GGS 553 - Geographic Information System Credits: 3
  *Cross-listed as undergraduate course

▲ Concentration in Structural Engineering (STRE)

Choose at least four of the following five structural engineering core courses:

• CEIE 524 - Introduction to Bridge Engineering Credits: 3
• CEIE 526 - Advanced Steel Design Credits: 3
• CEIE 527 - Pre-stressed Concrete Credits: 3
• CEIE 611 - Advanced Structural Analysis Credits: 3
• CEIE 612 - Advanced Mechanics of Materials Credits: 3

Electives
The remaining elective credits depend on whether the student is pursuing research credits or not. Students choose one of the following options (also outlined in the Notes section below).

- Thesis: 6 credits of CEIE 799 and at least 6 credits of electives
- Project: 3 credits of CEIE 798 and at least 9 credits of electives
- All coursework: at least 12 credits of electives

A list of approved electives for the structural engineering concentration is provided below. Note that the one remaining structural engineering core course can also be selected as an elective.

- CEIE 512 - Structural Steel Design Credits: 3 *
- CEIE 513 - Reinforced Concrete Design Credits: 3 *
- CEIE 525 - Structural Evaluation and Rehabilitation Credits: 3
- CEIE 532 - Foundation Design Credits: 3 *
- CEIE 575 - Design for Constructability Credits: 3
- CEIE 621 - Applied Finite Element Methods Credits: 3
- CEIE 633 - Advanced Foundation Design and Ground Improvement Credits: 3
- CEIE 894 - Design and Inventive Engineering Credits: 3
  *Cross-listed as undergraduate course

▲Concentration in Transportation Engineering (TRNE)

Choose at least four of the following five transportation engineering core courses:

- CEIE 663 - Intelligent Transportation Systems Credits: 3
- CEIE 664 - Transportation Engineering and the Environment Credits: 3
- CEIE 762 - Transportation System Planning Models Credits: 3
- CEIE 763 - Utility Theory and Transportation Economics Credits: 3
- CEIE 767 - Traffic Engineering Modeling and Analysis Credits: 3

Electives

The remaining elective credits depend on whether the student is pursuing research credits or not. Students choose one of the following options (also outlined in the Notes section below).

- Thesis: 6 credits of CEIE 799 and at least 6 credits of electives
- Project: 3 credits of CEIE 798 and at least 9 credits of electives
- All coursework: at least 12 credits of electives

A list of approved electives for the transportation engineering concentration is provided below. Note that the one remaining transportation engineering core course can also be selected as an elective.

- CEIE 560 - Public Transportation Systems Credits: 3
- CEIE 561 - Traffic Engineering Credits: 3 *
- CEIE 562 - Urban Transportation Planning Credits: 3 *
- CEIE 580 - Risk and Reliability in Civil Engineering Practice Credits: 3
- GGS 553 - Geographic Information System Credits: 3
- STAT 554 - Applied Statistics Credits: 3
  *Cross-listed as undergraduate course

Note:
Electives outside of the chosen concentration can only be taken or substituted with the approval of the faculty advisor.

**Additional Notes on MS Project and MS Thesis**

As part of the plan of study, students may elect to pursue research credits.

**MS Project**

Students complete CEIE 798, during which they prepare and present a scholarly paper. The scholarly paper is a technical report on an independent study, laboratory or computer experimentation, or literature search on a current civil and infrastructure engineering topic selected under the guidance of a faculty advisor. CEIE 798 credits count toward the 30 credit hours required for the MS degree.

- CEIE 798 - Research Project in Civil Engineering Credits: 3

**MS Thesis**

Students complete CEIE 799, which counts toward the 30 credit hours required for the MS degree. The MS thesis should reflect a significant, independent research effort that advances engineering science, and is worthy of publication. The work is conducted under the guidance of a faculty thesis advisor, and the final written thesis and oral defense are defended before a three-member faculty committee. In addition, students must make a satisfactory presentation of the thesis in the CEIE graduate seminar. The thesis is recommended for those students who wish to develop and document their research skills, or contemplate subsequent enrollment in a PhD program. Students are advised of the university’s continuous registration requirement for thesis and dissertation research credits. Upon first enrolling in CEIE 799, the student must continue registration for each fall and spring semester until the thesis is successfully completed. CEIE 799 credits count toward the 30 credit hours required for the MS degree.

- CEIE 799 - Master's Thesis Credits: 1-6 (must complete 6 credits)

**Seminar Requirement**

All degree candidates must attend a minimum of five graduate seminars approved by the CEIE Department for the degree program. Students must enroll in CEIE 795 each semester (fall and spring) for the duration of their MS studies until they receive a satisfactory (S) grade. This course is used to verify the seminar attendance requirement and is repeatable.

- CEIE 795 - Civil and Infrastructure Engineering Seminar Credits: 0

**Total: 30 credits**

**Master of Engineering**

**Geotechnical, Construction, and Structural Engineering, MEng**

**Banner Code:** VS-MENG-GCS

**School:** Volgenau School of Engineering

**Department:** Sid and Reva Dewberry Department of Civil, Environmental, and Infrastructure Engineering
The Master of Engineering (MEng) program in combined Geotechnical, Construction, and Structural Engineering (GeoConStruct) was designed in collaboration with leading engineers in practice to develop a course of study that recognizes that geotechnical engineering, construction engineering, and structural engineering are practiced together and should be taught together in an integrated manner. Its purpose is to educate engineers for practice, for excellence in design and execution now, laying the groundwork for practice demands 25 years from now. It is a program that balances theory and practice, building on the foundation of an undergraduate degree in civil engineering.

The MEng is practice-focused and entirely course-based. Students who wish to undertake a degree requiring a project or a research thesis should consider the Master of Science (MS) in Civil and Infrastructure Engineering with concentration in geotechnical or construction or structural engineering. All courses offered for the MEng program are open to MS students.

Admission Requirements

To be considered for admission to the MEng program, a candidate must:

- Satisfy general University and Volgenau School requirements for admission to a graduate program,
- Have earned a baccalaureate degree in engineering or a related science,
- Provide three letters of recommendation from individuals knowledgeable about the applicant’s academic or professional work,
- Provide a professional résumé.

Acceptance to the degree program is based on an assessment of the applicant’s capacity to pursue graduate study successfully. Students are assumed to have completed an undergraduate degree in civil engineering. Consideration is given to the undergraduate record, standardized test scores (e.g. General GRE) if provided, any previous graduate work, professional work experience, and reference letters. Students with minor admission deficiencies or with undergraduate degrees in related fields, such as geology or another branch of engineering, may be provisionally admitted subject to completing an articulation program of civil engineering undergraduate courses. Courses required for articulation are not creditable toward the MEng degree.

Research Assistantships and Fellowships are typically not awarded to students pursuing the MEng Program because it is entirely a course-based degree, rather than a research degree. Students interested in Teaching Assistantships (usually reserved for full-time graduate study) should indicate their interest on their application and also contact the Department after an admissions decision is made.

Degree Requirements

All MEng students must develop a faculty-approved plan of study with a minimum of 30 credits of graduate coursework. The coursework presented for the degree must include at least four MEng core courses (12 credits) and approved electives (18 credits). Note that the fifth core course that is not counted for the core requirement may also be selected as an elective. There is no project or thesis requirement for the MEng degree. Most MEng courses are offered once every three semesters and are scheduled to meet in the late weekday afternoons or evenings.

Core Courses:

12 Credits from the Following:

- CEIE 524 - Introduction to Bridge Engineering Credits: 3
- CEIE 525 - Structural Evaluation and Rehabilitation Credits: 3
- CEIE 531 - Earth Retaining Structures and Slope Stability Credits: 3
- CEIE 575 - Design for Constructability Credits: 3
- CEIE 580 - Risk and Reliability in Civil Engineering Practice Credits: 3
Elective Courses:

18 Credits from the Following:

- CEIE 512 - Structural Steel Design Credits: 3 *
- CEIE 513 - Reinforced Concrete Design Credits: 3 *
- CEIE 526 - Advanced Steel Design Credits: 3
- CEIE 527 - Pre-stressed Concrete Credits: 3
- CEIE 532 - Foundation Design Credits: 3 *
- CEIE 535 - Engineering Geology Credits: 3 *
- CEIE 571 - Construction Administration Credits: 3 *
- CEIE 572 - Building Information Modeling Credits: 3 *
- CEIE 573 - Legal Aspects of the Construction Process Credits: 3
- CEIE 576 - Construction Cost Estimating Credits: 3
- CEIE 611 - Advanced Structural Analysis Credits: 3
- CEIE 612 - Advanced Mechanics of Materials Credits: 3
- CEIE 621 - Applied Finite Element Methods Credits: 3
- CEIE 633 - Advanced Foundation Design and Ground Improvement Credits: 3
- CEIE 634 - Groundwater and Geoenvironmental Design Credits: 3
- CEIE 635 - Advanced Soil Mechanics Credits: 3
- CEIE 636 - Sources of Geotechnical Data Credits: 3

*Cross-listed as undergraduate courses

Total: 30 Credits

■ Computer Science

Phone: 703-993-1530
Web: cs.gmu.edu

School: Volgenau School of Engineering

Faculty

Professors: Barbara, J. Chen, DeJong, Gomaa, Kerschberg, Menascé, Motro, Offutt, Pullen, Setia (chair), Sood, Tecuci, Wechsler

Assistant professors: Allbeck, Dobolyi, Gingold, Kauffman, Li, Lien, Malek, McCoy, Rangwala, Shehu, Snyder, Srinivasan

Adjunct professors: Abdulla, Armour, Baldo, Baum, Curts, Dubey, Ellis, Foxwell, Geldon, Howard, Hwang, Kodali, M. Maddox, Martin, Nguyen, Nidiffer, Pettit, Tray, Wheeler

Emeritus faculty: Baum, Hamburger, Rine, Sibley

Introduction
Computer science is at the center of the information revolution in the 21st century. Advanced computation tools and techniques are revolutionizing and transforming the way we work, play, communicate, collaborate, and conduct business. In addition, computation is creating new scientific and engineering fields such as robotics, computational sciences, bioinformatics, and health informatics, to name a few. Computer science is a discipline concerned with the analysis, design, implementation, maintenance, and evolution of computer-based systems used in almost all walks of life.

Computer scientists must be well-grounded not only in the theory of computing, but also in its application to diverse application areas, for example, web-based applications, wireless networking, online computer game design, social networks, agent-based systems and e-commerce. Computer scientists must be capable of working closely with members of other professions associated with computing. Students who pursue this discipline will learn (1) theories of computation, analysis of algorithms, operating systems, and artificial intelligence; (2) communication and coordination via advanced computer networks; (3) storage, retrieval, and management of large databases; and (4) analysis, design, and implementation of reliable software systems.

Course Work

The Department of Computer Science (CS) offers courses designated CS, INFS, ISA and SWE in the Courses section of this catalog. The department offers undergraduate programs in computer science and applied computer science. A double major is offered in computer science and computer engineering. Students may also select a minor in computer science or software engineering. Several accelerated BS Computer Science/MS Programs are offered. Graduate programs offered are an MS in Computer Science, an MS in Information Security and Assurance, an MS in Information Systems, an MS in Software Engineering, a PhD in Computer Science, and several graduate certificate programs. The department also participates in the PhD in Information Technology program with the following concentrations: information security and assurance, information systems, and software engineering.

Bachelor of Science

Applied Computer Science, BS

Banner Code: VS-BS-ACS

School: Volgenau School of Engineering

Department: Computer Science

This program presents an innovative approach to the integration of computer science with other disciplines that require expertise in computing techniques. These disciplines do not merely use computing but create new and interesting problems for computer scientists.

Degree Requirements

For the BS ACS degree, students must complete 120 credits, including the University General Education requirements. The program requires foundation, core, and concentration courses as described below. These course requirements provide expertise in programming, computer systems, software requirements and modeling, formal methods, and analysis of algorithms.

ACS foundation courses (24 credits)

- CS 101 - Preview of Computer Science Credits: 2
- CS 105 - Computer Ethics and Society Credits: 1
- CS 112 - Introduction to Computer Programming Credits: 4
- CS 211 - Object-Oriented Programming Credits: 3
• MATH 113 - Analytic Geometry and Calculus I Credits: 4
• MATH 114 - Analytic Geometry and Calculus II Credits: 4
• MATH 125 - Discrete Mathematics I Credits: 3
• MATH 203 - Linear Algebra Credits: 3

Note:

MATH 104, 105 and 108 cannot be counted toward this degree.

ACS core (22 credits)

• ECE 301 - Digital Electronics Credits: 3
• CS 262 - Introduction to Low-Level Programming Credits: 1
• CS 310 - Data Structures Credits: 3
• CS 321 - Software Requirements and Design Modeling Credits: 3
• CS 330 - Formal Methods and Models Credits: 3
• CS 367 - Computer Systems and Programming Credits: 3
• CS 465 - Computer Systems Architecture Credits: 3
• CS 483 - Analysis of Algorithms Credits: 3

ACS elective (3 credits)

• One CS course numbered above 400.

Concentration (71 credits)

▲ Concentration in Bioinformatics (BNF)

Foundation (17 credits)

• PHYS 160 - University Physics I Credits: 3
• PHYS 161 - University Physics I Laboratory Credits: 1
• CHEM 201 - Introductory Chemistry I Credits: 3
• BIOL 213 - Cell Structure and Function Credits: 4
• CS 306 - Synthesis of Ethics and Law for the Computing Professional Credits: 3
• STAT 344 - Probability and Statistics for Engineers and Scientists I Credits: 3

Core (19 credits)

• BINF 450 - Bioinformatics for Life Sciences Credits: 4
• BIOL 482 - Introduction to Molecular Genetics Credits: 3
• BIOL 580 - Computer Applications for the Life Sciences Credits: 3
• CS 450 - Database Concepts Credits: 3
• BINF 401 - Bioinformatics and Computational Biology I Credits: 3 OR CS 444 - Introduction to Computational Biology Credits: 3
• BINF 402 - Bioinformatics and Computational Biology II Credits: 3  OR  CS 445 - Computational Methods for GenomicsCredits: 3

Two approved electives related to bioinformatics (6 credits)

A list of relevant courses can be obtained from the department office.

Additional University General Education (24 credits)

• Written Communication: 6 credits
• COMM 100 - Public Speaking Credits: 3
• Literature: 3 credits
• Arts: 3 credits
• Western Civilization/World History: 3 credits
• Social and Behavioral Science: 3 credits
• Global Understanding: 3 credits

Electives (5 credits)

▲ Concentration in Computer Game Design (CGDS)

Foundation (19 credits)

• CS 225 - Culture and Theory of Games Credits: 3
• CS 306 - Synthesis of Ethics and Law for the Computing Professional Credits: 3
• CS 325 - Introduction to Game Design Credits: 3
• CS 351 - Visual Computing Credits: 3
• AVT 104 - Studio Fundamentals I Credits: 4
• STAT 344 - Probability and Statistics for Engineers and Scientists I Credits: 3

Core (17 credits)

• CS 425 - Game Programming I Credits: 3
• CS 426 - Game Programming II Credits: 3
• CS 451 - Computer Graphics Credits: 3
• AVT 382 - 2D Experimental Animation Credits: 4
• AVT 383 - 3D Experimental Animation Credits: 4

One approved elective related to game design (3 credits)

Choose one course from the following:

• CS 332 - Object-Oriented Software Design and Implementation Credits: 3
• CS 455 - Computer Communications and Networking Credits: 3
• CS 475 - Concurrent and Distributed Systems Credits: 3
• CS 480 - Introduction to Artificial Intelligence Credits: 3
• CS 485 - Autonomous Robotics Credits: 3
- SWE 432 - Design and Implementation of Software for the Web Credits: 3
- GAME 332 - Story Design for Computer Games Credits: 3
- AVT 370 - Entrepreneurship in the Arts Credits: 4
- AVT 374 - Sound Art I Credits: 4
- AVT 487 - Advanced Topics: New Media Art Credits: 4

Natural Science (8 credits)

- PHYS 160 - University Physics I Credits: 3
- PHYS 161 - University Physics I Laboratory Credits: 1
- One additional lab science Credits: 4

Additional University General Education (21 credits)

- Written communication: 6 credits
- COMM 100 - Public Speaking Credits: 3
- Literature: 3 credits
- Western Civilization/World History: 3 credits
- Social and Behavioral Science: 3 credits
- Global Understanding: 3 credits

Electives (3 credits)

▲ Concentration in Geography (GEOG)

Foundation (21 credits)

- CS 306 - Synthesis of Ethics and Law for the Computing Professional Credits: 3
- GGS 101 - Major World Regions Credits: 3
- GGS 102 - Physical Geography Credits: 3
- GGS 103 - Human Geography Credits: 3
- GGS 110 - Maps and Mapping Credits: 3
- GGS 300 - Quantitative Methods for Geographical Analysis Credits: 3
- STAT 344 - Probability and Statistics for Engineers and Scientists I Credits: 3

Core (22 credits)

- GGS 310 - Introduction to Digital Cartography Credits: 4
- GGS 311 - Introduction to Geographic Information Systems Credits: 3
- GGS 411 - Advanced Digital Cartography Credits: 3
- GGS 412 - Air Photography Interpretation Credits: 3
- GGS 416 - Satellite Image Analysis Credits: 3
- GGS 463 - Applied Geographic Information Systems Credits: 3
- One GGS course numbered above 300 Credits: 3

Additional University General Education (22 credits)
- Written Communication: 6 credits
- COMM 100 - Public Speaking Credits: 3
- Literature: 3 credits
- Arts: 3 credits
- Western Civilization/World History: 3 credits
- Lab Science: 4 credits

Electives (6 credits)

▲ Concentration in Software Engineering (SWE)

Foundation (6 credits)

- STAT 344 - Probability and Statistics for Engineers and Scientists I Credits: 3
- CS 306 - Synthesis of Ethics and Law for the Computing Professional Credits: 3

Core (10 credits)

- SWE 205 - Software Usability Analysis and Design Credits: 3
- SWE 301 - Internship Preparation Credits: 0
- SWE 401 - Internship Reflection Credits: 1
- CS 332 - Object-Oriented Software Design and Implementation Credits: 3
- SWE 437 - Software Testing and Maintenance Credits: 3

SWE related (15 credits) chosen from:

- CS 450 - Database Concepts Credits: 3
- CS 455 - Computer Communications and Networking Credits: 3
- CS 463 - Comparative Programming Languages Credits: 3
- CS 468 - Secure Programming and Systems Credits: 3
- CS 471 - Operating Systems Credits: 3
- CS 475 - Concurrent and Distributed Systems Credits: 3
- SWE 432 - Design and Implementation of Software for the Web Credits: 3
- SWE 443 - Software Architectures Credits: 3

Cross-disciplinary (6 credits)

- ENGH 388 - Professional and Technical Writing Credits: 3
- PSYC 333 - Industrial and Organizational Psychology Credits: 3
- OR COMM 320 - Business and Professional Communication Credits: 3
- OR COMM 335 - Organizational Communication Credits: 3

Additional University General Education (31 credits)

- Written Communication: 6 credits
- COMM 100 - Public Speaking Credits: 3
- Literature: 3 credits
- Arts: 3 credits
- Western Civilization/World History: 3 credits
- Social and Behavioral Science: 3 credits
- Global Understanding: 3 credits
- Natural Science: 7 credits

Electives (3 credits)

Total: 120 credits

Sample Schedules

Students should consult the sample schedules below and ensure that course prerequisites are satisfied. Students should obtain computer-generated audits periodically to ensure that degree requirements are being met.

Students must take CS 101 within their first year at the university. Students should take CS 105 during their second semester. A grade of C or better must be earned in CS 306 for this course to satisfy the university general education synthesis requirement. MATH 104, 105 and 108 cannot be counted towards the degree.

Bioinformatics (BNF) Concentration Sample Schedule

First Semester Credits: 16

- Western civilization course Credits: 3
- CS 101 - Preview of Computer Science Credits: 2
- CS 112 - Introduction to Computer Programming Credits: 4
- ENGH 101 - Composition Credits: 3
- MATH 113 - Analytic Geometry and Calculus I Credits: 4

Second Semester Credits: 14

- CS 105 - Computer Ethics and Society Credits: 1
- CS 211 - Object-Oriented Programming Credits: 3
- MATH 114 - Analytic Geometry and Calculus II Credits: 4
- MATH 125 - Discrete Mathematics I Credits: 3
- COMM 100 - Public Speaking Credits: 3

Third Semester Credits: 14

- Elective Credits: 3
- CS 262 - Introduction to Low-Level Programming Credits: 1
- CS 310 - Data Structures Credits: 3
- ECE 301 - Digital Electronics Credits: 3
- PHYS 160 - University Physics I Credits: 3
- PHYS 161 - University Physics I Laboratory Credits: 1
Fourth Semester Credits: 15

- Literature Credits: 3
- CS 330 - Formal Methods and Models Credits: 3
- CS 367 - Computer Systems and Programming Credits: 3
- MATH 203 - Linear Algebra Credits: 3
- CHEM 201 - Introductory Chemistry I Credits: 3

Fifth Semester Credits: 15

- Social and behavioral science course Credits: 3
- Elective Credits: 2
- CS 321 - Software Requirements and Design Modeling Credits: 3
- CS 465 - Computer Systems Architecture Credits: 3
- BIOL 213 - Cell Structure and Function Credits: 4

Sixth Semester Credits: 15

- Arts course Credits: 3
- BIOL 482 - Introduction to Molecular Genetics Credits: 3
- STAT 344 - Probability and Statistics for Engineers and Scientists I Credits: 3
- ENGH 302 - Advanced Composition Credits: 3
- CS 483 - Analysis of Algorithms Credits: 3

Seventh Semester Credits: 16

- Bioinformatics related elective Credits: 3
- Global understanding course Credits: 3
- CS 306 - Synthesis of Ethics and Law for the Computing Professional Credits: 3
- CS 444 - Introduction to Computational Biology Credits: 3
- BINF 450 - Bioinformatics for Life Sciences Credits: 4

Eighth Semester Credits: 15

- Bioinformatics related elective Credits: 3
- CS Senior course Credits: 3
- BIOL 580 - Computer Applications for the Life Sciences Credits: 3
- CS 450 - Database Concepts Credits: 3
- CS 445 - Computational Methods for Genomics Credits: 3

Computer Game Design (CGDS) Concentration Sample Schedule

First Semester Credits: 16

- CS 101 - Preview of Computer Science Credits: 2
- CS 112 - Introduction to Computer Programming Credits: 4
• ENGH 101 - Composition Credits: 3
• MATH 113 - Analytic Geometry and Calculus I Credits: 4
• COMM 100 - Public Speaking Credits: 3

Second Semester Credits: 15

• AVT 104 - Studio Fundamentals I Credits: 4
• CS 105 - Computer Ethics and Society Credits: 1
• CS 211 - Object-Oriented Programming Credits: 3
• MATH 114 - Analytic Geometry and Calculus II Credits: 4
• MATH 125 - Discrete Mathematics I Credits: 3

Third Semester Credits: 16

• Social and behavioral science course Credits: 3
• CS 225 - Culture and Theory of Games Credits: 3
• CS 262 - Introduction to Low-Level Programming Credits: 1
• CS 310 - Data Structures Credits: 3
• ECE 301 - Digital Electronics Credits: 3
• MATH 203 - Linear Algebra Credits: 3

Fourth Semester Credits: 15

• Literature elective Credits: 3
• Western civilization course Credits: 3
• CS 325 - Introduction to Game Design Credits: 3
• CS 351 - Visual Computing Credits: 3
• CS 367 - Computer Systems and Programming Credits: 3

Fifth Semester Credits: 14

• PHYS 160 - University Physics I Credits: 3
• PHYS 161 - University Physics I Laboratory Credits: 1
• AVT 382 - 2D Experimental Animation Credits: 4
• CS 321 - Software Requirements and Design Modeling Credits: 3
• CS 330 - Formal Methods and Models Credits: 3

Sixth Semester Credits: 14

• Lab science Credits: 4
• AVT 383 - 3D Experimental Animation Credits: 4
• CS 451 - Computer Graphics Credits: 3
• ENGH 302 - Advanced Composition Credits: 3

Seventh Semester Credits: 15
- Global understanding course  Credits: 3
- Elective  Credits: 3
- STAT 344 - Probability and Statistics for Engineers and Scientists I Credits: 3
- CS 425 - Game Programming I Credits: 3
- CS 465 - Computer Systems Architecture Credits: 3

Eighth Semester Credits: 15

- CS Senior course  Credits: 3
- Game elective  Credits: 3
- CS 306 - Synthesis of Ethics and Law for the Computing Professional Credits: 3
- CS 426 - Game Programming II Credits: 3
- CS 483 - Analysis of Algorithms Credits: 3

Geography (GEOG) Concentration Sample Schedule

First Semester Credits: 16

- CS 101 - Preview of Computer Science Credits: 2
- CS 112 - Introduction to Computer Programming Credits: 4
- ENGH 101 - Composition Credits: 3
- GGS 102 - Physical Geography Credits: 3
- MATH 113 - Analytic Geometry and Calculus I Credits: 4

Second Semester Credits: 14

- COMM 100 - Public Speaking Credits: 3
- CS 105 - Computer Ethics and Society Credits: 1
- CS 211 - Object-Oriented Programming Credits: 3
- GGS 103 - Human Geography Credits: 3
- MATH 114 - Analytic Geometry and Calculus II Credits: 4

Third Semester Credits: 16

- Western civilization course  Credits: 3
- CS 262 - Introduction to Low-Level Programming Credits: 1
- CS 310 - Data Structures Credits: 3
- GGS 101 - Major World Regions Credits: 3
- MATH 125 - Discrete Mathematics I Credits: 3
- MATH 203 - Linear Algebra Credits: 3

Fourth Semester Credits: 16

- Arts course  Credits: 3
- Natural science course  Credits: 4
- ECE 301 - Digital Electronics Credits: 3
- GGS 110 - Maps and Mapping Credits: 3
- GGS 311 - Introduction to Geographic Information Systems Credits: 3

Fifth Semester Credits 15

- Literature course Credits: 3
- CS 330 - Formal Methods and Models Credits: 3
- CS 367 - Computer Systems and Programming Credits: 3
- GGS 300 - Quantitative Methods for Geographical Analysis Credits: 3
- GGS 412 - Air Photography Interpretation Credits: 3

Sixth Semester Credits: 16

- Elective Credits: 3
- CS 321 - Software Requirements and Design Modeling Credits: 3
- GGS 310 - Introduction to Digital Cartography Credits: 4
- GGS 416 - Satellite Image Analysis Credits: 3
- STAT 344 - Probability and Statistics for Engineers and Scientists I Credits: 3

Seventh Semester Credits: 15

- GGS Senior course Credits: 3
- CS 465 - Computer Systems Architecture Credits: 3
- CS 483 - Analysis of Algorithms Credits: 3
- ENGH 302 - Advanced Composition Credits: 3
- GGS 411 - Advanced Digital Cartography Credits: 3

Eighth Semester Credits: 12

- CS Senior course Credits: 3
- Electives Credits: 3
- CS 306 - Synthesis of Ethics and Law for the Computing Professional Credits: 3
- GGS 463 - Applied Geographic Information Systems Credits: 3

Software Engineering (SWE) Concentration Sample Schedule

First Semester Credits: 16

- Western civilization course Credits: 3
- CS 101 - Preview of Computer Science Credits: 2
- CS 112 - Introduction to Computer Programming Credits: 4
- MATH 113 - Analytic Geometry and Calculus I Credits: 4
- ENGH 101 - Composition Credits: 3

Second Semester Credits: 14
• COMM 100 - Public Speaking Credits: 3
• CS 105 - Computer Ethics and Society Credits: 1
• CS 211 - Object-Oriented Programming Credits: 3
• MATH 114 - Analytic Geometry and Calculus II Credits: 4
• MATH 125 - Discrete Mathematics I Credits: 3

Third Semester Credits: 14

• Natural science course Credits: 4
• CS 262 - Introduction to Low-Level Programming Credits: 1
• CS 310 - Data Structures Credits: 3
• ECE 301 - Digital Electronics Credits: 3
• MATH 203 - Linear Algebra Credits: 3

Fourth Semester Credits: 15

• Literature course Credits: 3
• Natural science course Credits: 3
• CS 330 - Formal Methods and Models Credits: 3
• CS 367 - Computer Systems and Programming Credits: 3
• SWE 205 - Software Usability Analysis and Design Credits: 3

Fifth Semester Credits 15

• SWE Cross disciplinary course Credits: 3
• Social and behavioral science course Credits: 3
• CS 321 - Software Requirements and Design Modeling Credits: 3
• CS 332 - Object-Oriented Software Design and Implementation Credits: 3
• ENGH 302 - Advanced Composition Credits: 3

Sixth Semester Credits: 15

• SWE related course Credits: 3
• Fine arts course Credits: 3
• Global understanding course Credits: 3
• SWE 437 - Software Testing and Maintenance Credits: 3
• STAT 344 - Probability and Statistics for Engineers and Scientists I Credits: 3
• SWE 301 - Internship Preparation Credits: 0

Seventh Semester Credits: 16

• SWE related course Credits: 3
• SWE related course Credits: 3
• Elective Credits: 3
• CS 465 - Computer Systems Architecture Credits: 3
• ENGH 388 - Professional and Technical Writing Credits: 3
- SWE 401 - Internship Reflection Credits: 1

**Eighth Semester Credits: 15**

- SWE related course Credits: 3
- SWE related course Credits: 3
- CS Senior course Credits: 3
- CS 483 - Analysis of Algorithms Credits: 3
- CS 306 - Synthesis of Ethics and Law for the Computing Professional Credits: 3

**Writing-Intensive Requirement**

Computer science majors complete the writing-intensive requirement through a sequence of projects and reports in CS 306 and CS 321. Faculty members provide feedback on students' expository writing.

**Repeating Courses**

Students may attempt an undergraduate course taught by the Volgenau School of Engineering twice. A third attempt requires approval of the department offering the course. This policy does not apply to STAT 250, which follows the normal university policy for repeating undergraduate courses.

**Termination from the Major**

No math, science, or Volgenau School of Engineering course, required for the major, may be attempted more than three times. Those students who do not successfully complete such a course within three attempts will be terminated from the major. For more information, see the "Termination from the Major" section under Academic Standing.

**Communication**

BS ACS majors must take COMM 100 - Public Speaking to satisfy the general education communication requirement.

**Change of Major**

Students requesting a change of major to computer science must have a GPA of at least 2.75 and successfully completed CS 112 or CS 211 and MATH 113, MATH 114, or MATH 125.

**Advanced Placement, Credit by Exam**

Some students may receive credit for CS 112 by passing departmentally administered exams. In addition, a score of 3 on the Advanced Placement (AP) computer science exam qualifies students for credit in CS 112. An AP score of 5, together with demonstrated competence in the programming language used in CS 211, qualifies students for credit in CS 211. A score of 4 on the International Baccalaureate (IB) computer science exam qualifies students for credits in CS 112, and a score of 5 or more qualifies students for credit in CS 211.

**Grades**
Students must earn a C or better in any course intended to satisfy a prerequisite for a computer science course. Computer science majors may not use more than one course with grade of C- or lower toward department requirements.

**Computer Science, BS**

*Banner Code: VS-BS-CS*

*School: Volgenau School of Engineering*

*Department: Computer Science*

The objectives of the BS in Computer Science Program relate to the abilities of the graduates several years after graduation. The objectives include:

- Foundation for successful careers in industry: Graduates of the program will have a broad understanding of the fundamental concepts, methodologies, tools, and applications of computer science. They will have the educational foundation that leads to successful careers in the computing industry.
- Foundation for graduate study: Graduates of the program will have the academic preparation for successful completion of rigorous graduate programs.
- Professional preparation: Graduates will have effective written and oral communication skills, and be able to work collaboratively in a professional and ethical manner.

This bachelor’s degree program is accredited by the Computing Accreditation Commission of ABET, http://www.abet.org.

Students in this program have the option of applying to an accelerated master's degree program in computer science, information security and assurance, information systems, or software engineering. See each listing for specific requirements.

**Degree Requirements**

For the BS CS degree, students must complete 120 credits, including the University General Education requirements and all of the following:

**Computer science core (35 credits)**

- CS 101 - Preview of Computer Science Credits: 2
- CS 105 - Computer Ethics and Society Credits: 1
- CS 112 - Introduction to Computer Programming Credits: 4
- CS 211 - Object-Oriented Programming Credits: 3
- CS 262 - Introduction to Low-Level Programming Credits: 1
- CS 306 - Synthesis of Ethics and Law for the Computing Professional Credits: 3
- CS 310 - Data Structures Credits: 3
- CS 321 - Software Requirements and Design Modeling Credits: 3
- CS 330 - Formal Methods and Models Credits: 3
- CS 367 - Computer Systems and Programming Credits: 3
- CS 465 - Computer Systems Architecture Credits: 3
- CS 483 - Analysis of Algorithms Credits: 3
- ECE 301 - Digital Electronics Credits: 3

**Note:**
Students must take CS 101 within their first year at the university. Students should take CS 105 during their second semester. A grade of C or better must be earned in CS 306 for this course to satisfy the university general education synthesis requirement.

**Senior computer science (15 credits)**

One of the following:

- CS 463 - Comparative Programming Languages Credits: 3
- CS 471 - Operating Systems Credits: 3
- CS 475 - Concurrent and Distributed Systems Credits: 3

And four additional courses chosen from:

- CS 425 - Game Programming I Credits: 3
- CS 440 - Language Processors and Programming Environments Credits: 3
- CS 450 - Database Concepts Credits: 3
- CS 451 - Computer Graphics Credits: 3
- CS 455 - Computer Communications and Networking Credits: 3
- CS 463 - Comparative Programming Languages Credits: 3
- CS 468 - Secure Programming and Systems Credits: 3
- CS 469 - Security Engineering Credits: 3
- CS 471 - Operating Systems Credits: 3
- CS 475 - Concurrent and Distributed Systems Credits: 3
- CS 480 - Introduction to Artificial Intelligence Credits: 3
- CS 482 - Computer Vision Credits: 3
- CS 484 - Data Mining Credits: 3
- CS 485 - Autonomous Robotics Credits: 3
- CS 490 - Design Exhibition Credits: 3
- CS 499 - Special Topics in Computer Science Credits: 3
- MATH 446 - Numerical Analysis I Credits: 3  **OR**  OR 481 - Numerical Methods in Engineering Credits: 3

**Note:**

Only three credits of CS 499 can be used toward the Senior computer science requirement.

**Mathematics (17 credits)**

- MATH 113 - Analytic Geometry and Calculus I Credits: 4
- MATH 114 - Analytic Geometry and Calculus II Credits: 4
- MATH 125 - Discrete Mathematics I Credits: 3
- MATH 203 - Linear Algebra Credits: 3
- MATH 213 - Analytic Geometry and Calculus III Credits: 3

**Note:**

MATH 104, 105 and 108 cannot be counted toward this degree.
Statistics (3 credits)

- STAT 344 - Probability and Statistics for Engineers and Scientists I Credits: 3

Computer science-related courses (6 credits)

Two courses chosen from:

- STAT 354 - Probability and Statistics for Engineers and Scientists II Credits: 3
- OR 335 - Discrete Systems Modeling and Simulation Credits: 3
- OR 441 - Deterministic Operations Research Credits: 3
- OR 442 - Stochastic Operations Research Credits: 3
- ECE 280 - Electric Circuit Analysis Credits: 5
- ECE 431 - Digital Circuit Design Credits: 3
- ECE 447 - Single-Chip Microcomputers Credits: 4
- ECE 450 - Introduction to Robotics Credits: 3
- ECE 511 - Microprocessors Credits: 3
- SWE 432 - Design and Implementation of Software for the Web Credits: 3
- SWE 437 - Software Testing and Maintenance Credits: 3
- SWE 443 - Software Architectures Credits: 3
- SYST 371 - Systems Engineering Management Credits: 3
- SYST 470 - Human Factors Engineering Credits: 3
- PHIL 371 - Philosophy of Natural Sciences Credits: 3
- PHIL 376 - Symbolic Logic Credits: 3
- ENGH 388 - Professional and Technical Writing Credits: 3
- Any MATH or CS course numbered above 300 (except MATH 351) Credits: 3

Note:

Students may need to choose electives to satisfy prerequisites for these courses. Those planning to take MATH 352 may replace STAT 344 with MATH 351.

Natural Science (12 credits)

The BS in Computer Science requires 12 credits of natural science. The courses should be intended for science and engineering students and must include a two course sequence with laboratories. Some approved combinations have a total of more than 12 hours. Approved two course sequences with laboratories are:

Astronomy:
- ASTR 111 - Introductory Astronomy: The Solar System Credits: 3 AND ASTR 112 - Introductory Astronomy Lab: The Solar System Credits: 1
- ASTR 113 - Introductory Astronomy: Stars, Galaxies, and the Universe Credits: 3 AND ASTR 114 - Introductory Astronomy Lab: Stars, Galaxies, and the Universe Credits: 1

Biology:
- BIOL 103 - Introductory Biology I Credits: 4 AND BIOL 104 - Introductory Biology II Credits: 4

Chemistry:
- CHEM 211 - General Chemistry Credits: 4 AND CHEM 212 - General Chemistry Credits: 4

Environmental Science:
• EVPP 110 - The Ecosphere: An Introduction to Environmental Science I Credits: 4  AND  EVPP 111 - The Ecosphere: An Introduction to Environmental Science II Credits: 4

Geology:
• GEOL 101 - Introductory Geology I Credits: 4  AND  GEOL 102 - Introductory Geology II Credits: 4

Physics:
• PHYS 160 - University Physics I Credits: 3  AND  PHYS 161 - University Physics I Laboratory Credits: 1
• PHYS 260 - University Physics II Credits: 3  AND  PHYS 261 - University Physics II Laboratory Credits: 1

Communication (3 credits)

• COMM 100 - Public Speaking Credits: 3
  Computer Science students must make a technical presentation. This course fulfills the general education requirement in oral communication for Volgenau School students.

Additional Humanities (3 credits)

Students must complete three additional credits of Humanities courses. This can be fulfilled by any University General Education course except those listed under Information Technology, Synthesis, Quantitative Reasoning, or Natural Science. Students wishing to substitute alternate courses for this requirement must obtain departmental approval.

Additional University General Education (21 credits)

Students must complete all University General Education requirements not fulfilled by major requirements.

• Written Communication: 6 credits
• Literature: 3 credits
• Arts: 3 credits
• Western Civilization/World History: 3 credits
• Social and Behavioral Science: 3 credits
• Global Understanding: 3 credits

Electives (5 credits)

Students must complete 5 elective credits.

Total: 120 credits

Sample Schedule

Students should consult the sample schedule below and ensure that course prerequisites are satisfied. Students should obtain computer-generated audits periodically to ensure that degree requirements are being met.

First Semester Credits: 16

• Western civilization course Credits: 3
• CS 101 - Preview of Computer Science Credits: 2
• CS 112 - Introduction to Computer Programming Credits: 4
- ENGH 101 - Composition Credits: 3
- MATH 113 - Analytic Geometry and Calculus I Credits: 4

Second Semester Credits: 14

- Arts course  Credits: 3
- Literature course  Credits: 3
- CS 105 - Computer Ethics and Society Credits: 1
- CS 211 - Object-Oriented Programming Credits: 3
- MATH 114 - Analytic Geometry and Calculus II Credits: 4

Third Semester Credits: 14

- Natural science course  Credits: 4
- Social and behavioral science course  Credits: 3
- CS 262 - Introduction to Low-Level Programming Credits: 1
- MATH 125 - Discrete Mathematics I Credits: 3
- MATH 213 - Analytic Geometry and Calculus III Credits: 3

Fourth Semester Credits: 16

- Natural science course  Credits: 4
- Elective  Credits: 3
- COMM 100 - Public Speaking Credits: 3
- CS 310 - Data Structures Credits: 3
- ECE 301 - Digital Electronics Credits: 3

Fifth Semester Credits 15

- Global understanding course  Credits: 3
- CS 330 - Formal Methods and Models Credits: 3
- CS 367 - Computer Systems and Programming Credits: 3
- ENGH 302 - Advanced Composition Credits: 3
- MATH 203 - Linear Algebra Credits: 3

Sixth Semester Credits: 16

- Humanities course  Credits: 3
- Natural science course  Credits: 4
- CS 321 - Software Requirements and Design Modeling Credits: 3
- CS 465 - Computer Systems Architecture Credits: 3
- STAT 344 - Probability and Statistics for Engineers and Scientists I Credits: 3

Seventh Semester Credits: 15
- CS 306 - Synthesis of Ethics and Law for the Computing Professional Credits: 3
- CS 483 - Analysis of Algorithms Credits: 3
- Senior computer science course Credits: 3
- Senior computer science course Credits: 3
- Computer science-related elective Credits: 3

Eighth Semester Credits: 14

- Senior computer science course Credits: 3
- Senior computer science course Credits: 3
- Senior computer science course Credits: 3
- Computer science-related elective Credits: 3
- General elective Credits: 2

Change of Major

Students requesting a change of major to computer science must have a GPA of at least 2.75 and successfully completed CS 112 or CS 211 and MATH 113, MATH 114 or MATH 125.

Repeating Courses

Students may attempt an undergraduate course taught by the Volgenau School of Engineering twice. A third attempt requires approval of the department offering the course. This policy does not apply to STAT 250, which follows the normal university policy for repeating undergraduate courses.

Termination from the Major

No math, science, or Volgenau School of Engineering course, required for the major, may be attempted more than three times. Those students who do not successfully complete such a course within three attempts will be terminated from the major. For more information, see the "Termination from the Major" section under Academic Standing.

Advanced Placement, Credit by Exam

Some students may receive credit for CS 112 by passing departmentally administered exams. In addition, a score of 3 on the Advanced Placement (AP) computer science exam qualifies the student for credit in CS 112. An AP score of 5, together with demonstrated competence in the programming language used in CS 211, qualifies students for credit in CS 211. A score of 4 on the International Baccalaureate (IB) computer science exam qualifies students for credit in CS 112, and a score of 5 or more qualifies students for credit in CS 211.

Writing-Intensive Requirement

Computer science majors complete the writing-intensive requirement through a sequence of projects and reports in CS 306 and CS 321. Faculty members provide feedback on students' expository writing.

Grades
Students must earn a C or better in any course intended to satisfy a prerequisite for a computer science course. Computer science majors may not use more than one course with grade of C- or lower toward department requirements.

Cooperative Education

Students may participate in the Mason cooperative education program or a work-study program in the Washington, D.C. area.

Computer Science, Computer Engineering Double Major

Computer science majors can earn a double major in computer science and computer engineering if they complete an additional 28 credits of courses beyond the 120 credits required for the computer science degree. The additional 28 credits must be part of an approved plan of study. For more information, visit the department web site.

Bachelor of Science/Accelerated Master of Science

Computer Science, BS/Computer Science, Accelerated MS

School: Volgenau School of Engineering

Department: Computer Science

This program is for those interested in immediately continuing on to graduate studies in computer science.

Admission Requirements

Students in a bachelor's program in computer science or a related area may apply for the BS/accelerated MS program if they have earned 90 undergraduate credits with an overall GPA of at least 3.50. Criteria for admission are identical to criteria for admission to the MS program.

Degree Requirements

Students must complete 144 credits that satisfy requirements for the BS program and the MS program, with 6 credits overlap.

Students register for 6 credits of CS 500-level basic courses in place of the corresponding CS 400-level courses required for the undergraduate degree requirements. Specifically, students must register for two of the following courses in place of the corresponding 400-level courses:

- CS 540 - Language Processors Credits: 3
- CS 550 - Database Systems Credits: 3
- CS 551 - Computer Graphics Credits: 3
- CS 555 - Computer Communications and Networking Credits: 3
- CS 571 - Operating Systems Credits: 3
- CS 580 - Introduction to Artificial Intelligence Credits: 3
- CS 583 - Analysis of Algorithms Credits: 3

Please note:
Degree Conferral

Students are permitted to take additional graduate basic courses in their undergraduate programs. In such cases, those classes cannot be counted toward requirements for the MS.

Computer Science, BS/Information Security and Assurance, Accelerated MS

School: Volgenau School of Engineering

Department: Computer Science

This program is for students interested in immediately continuing their undergraduate studies in computer science with graduate studies in information security and assurance.

Admission Requirements

Students in the BS in Computer Science program can apply for this program if they have earned 90 undergraduate credits with an overall GPA of at least 3.30. Criteria for admission are identical to criteria for admission to the MS in Information Security and Assurance Program.

Degree Requirements

Students must complete 144 credits that satisfy requirements for the BS in Computer Science program, as well as those for the MS in Information Security and Assurance Program, with 6 credits overlapping.

Students register for two of the following courses (6 credits of 500-level computer science core courses) in place of the corresponding 400-level computer science courses, as part of the undergraduate degree requirements.

- CS 540 - Language Processors Credits: 3
- CS 571 - Operating Systems Credits: 3
- CS 580 - Introduction to Artificial Intelligence Credits: 3
- CS 583 - Analysis of Algorithms Credits: 3

Please note:

Students complete all MS in Information Security and Assurance core courses and apply the two courses from the above list toward the MS in Information Security and Assurance requirements.

Degree Conferral

Students must apply to have the BS in Computer Science degree conferred the semester before they expect to complete the BS requirements. At the completion of the MS in Information Security and Assurance requirements, a master’s degree will be granted.
Computer Science, BS/Information Systems, Accelerated MS

School: Volgenau School of Engineering

Department: Computer Science

This program is for students interested in immediately continuing undergraduate studies in computer science with graduate studies in information systems.

Admission Requirements

Students in the BS in computer science program can apply to this program if they have earned 90 undergraduate credits with an overall GPA of at least 3.30. Criteria for admission are identical to the criteria for admission to the MS in Information Systems Program.

Degree Requirements

Students must complete 144 credits that satisfy requirements for the BS in Computer Science program, as well as those for the MS in Information Systems program, with 6 credits overlap.

Students register for two of the following courses (6 credits of 500-level computer science core courses) in place of the corresponding 400-level computer science courses, as part of the undergraduate degree requirements.

- CS 540 - Language Processors Credits: 3
- CS 571 - Operating Systems Credits: 3
- CS 580 - Introduction to Artificial Intelligence Credits: 3
- CS 583 - Analysis of Algorithms Credits: 3

Please note:

Students complete all MS in Information Systems core courses and apply the two courses from above toward the MS in Information Systems elective requirements.

Degree Conferral

Students must apply to have the BS in Computer Science degree conferred the semester before they expect to complete the BS requirements. At the completion of the MS in Information Systems requirements, a master’s degree is granted.

Computer Science, BS/Software Engineering, Accelerated MS

School: Volgenau School of Engineering

Department: Computer Science

This program is for students interested in immediately continuing undergraduate studies in computer science with graduate studies in software engineering.

Admission Requirements
Students in the BS in Computer Science program can apply to this program if they have earned 90 undergraduate credits with an overall GPA of at least 3.30. Criteria for admission are identical to criteria for admission to the MS in Software Engineering program.

**Degree Requirements**

Students must complete 144 credits that satisfy requirements for the BS in Computer Science Program, as well as those for the MS in Software Engineering Program, with 6 credits overlap.

Students register for two of the following courses (6 credits of 500-level computer science core courses) in place of the corresponding 400-level computer science courses, as part of the undergraduate degree requirements.

- CS 540 - Language Processors Credits: 3
- CS 571 - Operating Systems Credits: 3
- CS 580 - Introduction to Artificial Intelligence Credits: 3
- CS 583 - Analysis of Algorithms Credits: 3

**Please note:**

Students complete all MS in Software Engineering core courses and apply the two courses from the above list toward the MS in Software Engineering elective requirements.

**Degree Conferral**

Students must apply to have the BS in Computer Science degree conferred the semester before they expect to complete the BS requirements. At the completion of the MS in Software Engineering requirements, a master’s degree is granted.

**Doctor of Philosophy**

**Computer Science, PhD**

**Banner Code:** VS-PHD-CS

**School:** Volgenau School of Engineering

**Department:** Computer Science

The PhD program requires course work, qualifying and comprehensive examinations, and a doctoral dissertation that is first proposed and eventually defended. Mason’s general doctoral requirements apply to this program.

**Admission Requirements**

All applicants must have an undergraduate degree, and their prior academic work must show a strong academic background in computer science. In addition, they must have taken the GRE exams: the General Test is required from every applicant; the Subject Test in Computer Science is not required but is recommended. Finally, each applicant must provide a brief statement of career goals and personal aspirations, as well as three letters of reference. Each application receives careful consideration from the PhD Admission Committee.
**Reduction of Credit**

Students must complete a minimum of 72 graduate credits, which may be reduced by a maximum of 30 credits from an approved and completed master’s degree. Reduction of credit requires the approval of the program director or designee and the dean or designee of the school. They determine whether the credits are eligible for reduction of credit and applicable to the degree program and the number of credits to be reduced.

**Degree Requirements**

The 72 hours of required doctoral-level credits typically consist of 48 credits of regular coursework and 24 credits of dissertation research. The following degree plan is based on a student who receives a full 30 credit reduction. Students who do not receive a full credit reduction should choose additional credits in consultation with their advisor.

**Doctoral Course Work (18 Credits)**

- CS 600 - Theory of Computation Credits: 3 (must be completed with a grade of B+ or better)
- CS 700 - Quantitative Methods and Experimental Design in Computer Science Credits: 3
- CS 800 - Computer Science Colloquium Credits: 0 (must be taken for two semesters)
- CS 990 - Dissertation Topic Presentation Credits: 0
- 12 credits in advanced graduate courses from a list maintained by the Computer Science Department and chosen in consultation with the student's advisor.
  These may include at most 3 credits of CS 896 Directed Reading and Research. Students may register in CS 896 only after passing the PhD qualifying exams.

**Qualifying Exam**

Students must demonstrate breadth of knowledge in computer science by passing written qualifying exams. The exams are offered once every semester (usually in the week before the semester begins). To qualify, each student must pass exams in four areas, one of which is foundations of computer science. The other three areas are chosen from these eight areas: operating systems, networks, compilers and languages, object-oriented software specification and construction, software modeling and architectural design, artificial intelligence, database systems, and information systems security. The four exams must be attempted in the same semester, and a failed exam may be retaken once only in the next semester. A student who fails to pass the four exams in two consecutive semesters is subject to termination from the program. Each student must take a set of four exams no later than the first opportunity following the completion of 18 credits. If a student enters the program without a master’s degree in computer science or a related area, then the exams must be taken no later than the first opportunity following the completion of 30 credits.

**Dissertation Research (24 credits)**

A minimum of 24 credits of CS 998 and CS 999 must be completed, of which at least 12 must be in CS 999. Only 24 credits of CS 998 and CS 999 may be applied toward the degree. Students may enroll in CS 998 only after passing the qualifying exams, and they may enroll in CS 999 only after advancing to candidacy.

Select 24 credits from the following:

- CS 998 - Doctoral Dissertation Proposal Credits: 1-12
- CS 999 - Doctoral Dissertation Credits: 1-12

**Dissertation Committee Selection**
Each student must form a dissertation committee, comprising four or five individuals. Three members of the committee must be tenured or tenure-track faculty in the Computer Science Department. The fourth member must be from outside the department. The fifth member may be from outside the university. The chair of the dissertation committee, who must also be the dissertation director, must be tenured or tenure-track faculty in the Volgenau School. The committee must be approved by the chair of the Computer Science Department.

**Comprehensive Exam**

Students must pass an oral comprehensive exam in which they demonstrate depth of knowledge in their intended area of research and ability to perform original research in that area. The scope of the oral exam is defined by a reading list prepared by the student and the dissertation director. The list should include research papers and textbooks that adequately cover the basic tools used in the research area, the fundamentals of the research area, and state-of-the-art knowledge in the specific focus of research. The reading list must be accompanied by a one-page description of the intended research. This document must be approved by the dissertation committee at least one month prior to the exam and becomes part of the student’s record. The duration of the oral exam is typically two hours. Students who fail the exam are allowed to retake it once. Failure in the second attempt results in dismissal from the program.

**Dissertation Proposal**

Each student must prepare a written dissertation proposal. While preparing this proposal, the student enrolls in CS 998 Doctoral Dissertation Proposal. The proposal must be made available to the committee at least two weeks in advance of the presentation. The proposal must be presented to and approved by the dissertation committee. The committee determines whether the proposal has merit and can lead to significant contributions to the area and whether the student has the knowledge and skills to complete the proposed work successfully and in a timely manner. Students may present their dissertation proposal only after passing the comprehensive exam, and the presentation may not be on the same day as the comprehensive exam. If the student fails to defend the proposal, the student may present a dissertation proposal a second time at a later date. Failure in the second attempt results in dismissal from the program. On completing this requirement successfully, the student is advanced to candidacy for the PhD degree.

**Dissertation Preparation and Defense**

While preparing the dissertation, the candidate enrolls in CS 999 Doctoral Dissertation. When the work is deemed complete, the dissertation is defended. The public defense is preceded by a predefense meeting in which only the candidate, the dissertation committee members, and the director of the PhD in Computer Science Program (or his or her representative) are present. If the committee approves, the candidate may then schedule the final public defense. There should be at least one month between the predefense meeting and the defense, and the defense must be announced at least two weeks in advance. The dissertation must be made available to the committee at least two weeks in advance of the defense. The entire dissertation committee must be present at the defense, unless an exception is approved by the director of the PhD in Computer Science Program in advance of the defense. The dissertation must make significant contributions to its area and be publishable in refereed journals or conferences. If the candidate defends the dissertation successfully, the dissertation committee recommends that the final form of the dissertation be completed under the supervision of the dissertation director and the graduate faculty of Mason accept the candidate for the PhD degree. If the candidate fails to defend the dissertation, the candidate may request a second defense, following the same procedures as for the initial defense. There is no time limit for this request other than general time limits for the doctoral degree and an additional predefense is not required. A candidate who fails a second attempt to defend the dissertation is dismissed from the program.

**Total: 72 credits**

**Graduate Certificate**
Computer Networking Graduate Certificate

Banner Code: VS-CERG-CNET

School: Volgenau School of Engineering

Department: Computer Science

When brought together to form computer networks, the technologies of computing and communications exhibit a synergy that is revolutionizing our world. In-depth knowledge of the new discipline of computer networking increasingly is in demand as a basis for design and deployment of new information systems ranging from aspects of the global Internet to distributed systems in a variety of application domains. The courses for this certificate have been selected to provide a solid basis for understanding the core software and communications technologies on which today’s networks are based and how they may be combined to create effective computer networks. Courses cover mainstream and leading edge technology considerations, ensuring that students are prepared to function at the professional level in this fast moving and technologically challenging field.

The graduate certificate may only be pursued on a part-time basis.

Admission Requirements

The certificate program is open to all students who are eligible for entrance into the master’s degree program in computer science or any scientific or engineering discipline at Mason.

Certificate Requirements

Students must complete four courses with an average grade of B or higher for a total of 12 credits of graduate study.

Required courses (6 credits):

- CS 555 - Computer Communications and Networking Credits: 3
- CS 571 - Operating Systems Credits: 3

At least one of the following (3-6 credits):

- CS 755 - Advanced Computer Networks Credits: 3
- CS 756 - Performance Analysis of Computer Networks Credits: 3

Zero or one of the following electives (0 or 3 credits):

- ECE 542 - Computer Network Architectures and Protocols Credits: 3
- ECE 642 - Design and Analysis of Computer Communication Networks Credits: 3
- ECE 742 - High-Speed Networks Credits: 3
- ISA 656 - Network Security Credits: 3

Total: 12 credits
The Internet is having a significant effect on the way people interact with each other, with government, and with business. This graduate certificate program is for people who are interested in the use of Internet-based technology by people, government, and industry. We are witnessing the emergence of e-tailing, e-government, e-business, and business-to-business applications that are transforming society. The influence of electronic commerce is also being felt across international boundaries where it affects the management and administration of international business. The goal of the certificate in electronic commerce is to study the concepts, tools, policies, and underlying technology that enable Internet-based applications.

The graduate certificate may only be pursued on a part-time basis.

Admission Requirements

Applicants must hold a BS degree with a 3.00 or higher in the last 60 credits. They also must possess knowledge equivalent to the following four Mason courses, which are considered foundation courses: INFS 501 - Discrete and Logical Structures for Information Systems, INFS 515 - Computer Organization, INFS 519 - Program Design and Data Structures, and SWE 510 - Object-Oriented Programming in Java. Applicants also must possess equivalent knowledge of INFS 612 and 614; SWE 619, 620, 621; or the prerequisite courses required for the selected electives.

Applicants must submit a one- to two-page statement of educational and work experience in the computing field. Applicants also need to complete a self-assessment form. The form provides summary information concerning background and preparation for the program.

For those students not enrolled in a Mason graduate degree program, application for the certificate program is made through the Volgenau School Graduate Admissions Office. Students enrolled in a Mason graduate degree program should contact the department for admission to the certificate program. Admission to the certificate program does not guarantee admission into any MS program.

Certificate Requirements

Students must complete four courses with an average grade of B or higher for a total of 12 credits of graduate study.

Two courses (6 credits):

- INFS 640 - Introduction to Electronic Commerce Credits: 3
- INFS 770 - Knowledge Management for E-Business Credits: 3

Two additional courses (6 credits) from the following:

Electives have been organized into emphasis areas, but students may also mix and match elective courses subject to satisfying course prerequisites:

Information Security

- ISA 562 - Information Security Theory and Practice Credits: 3
- ISA 656 - Network Security Credits: 3
Database Management

- INFS 740 - Database Programming for the World Wide Web Credits: 3
- INFS 755 - Data Mining Credits: 3
- INFS 760 - Advanced Database Management Credits: 3
- INFS 772 - Intelligent Agents and the Semantic Web Credits: 3
- INFS 774 - Enterprise Architecture Credits: 3

Internet Software Engineering

- SWE 632 - User Interface Design and Development Credits: 3
- SWE 642 - Software Engineering for the World Wide Web Credits: 3
- SWE 645 - Component-Based Software Development Credits: 3

Health Medical Information Systems

- HAP 678 - Introduction to the U.S. Health System Credits: 3
- HAP 706 - Integrated Health Systems Management Credits: 3
- HAP 709 - Health Care Databases Credits: 3
- HAP 740 - Management of Health Information Systems Credits: 3

Total: 12 credits

Foundations of Information Systems Graduate Certificate

Banner Code: VS-CERG-FIS

School: Volgenau School of Engineering

Department: Computer Science

This certificate program is designed primarily for students who earned an undergraduate degree in an area other than information systems and are interested in acquiring solid foundations to pursue further education and a career in information systems, software engineering, information security and assurance, or a related discipline.

The graduate certificate may be pursued on a part-time or full-time basis.

Admission Requirements

The admission requirements for the certificate in foundations of information systems is a four-year bachelor’s degree with a GPA of 3.00 or higher. Also, the admission to the Information Systems, MS program allows automatic admission to the certificate program.

Certificate Requirements

Students must complete four courses with an average grade of B or higher for a total of 12 credits of graduate study.
Required courses (12 credits)

Take each one of the following foundation courses (no substitutions are allowed):

- INFS 501 - Discrete and Logical Structures for Information Systems Credits: 3
- INFS 515 - Computer Organization Credits: 3
- INFS 519 - Program Design and Data Structures Credits: 3
- SWE 510 - Object-Oriented Programming in Java Credits: 3

Total: 12 credits

Information Engineering Graduate Certificate

Banner Code: VS-CERG-INFE

School: Volgenau School of Engineering

Department: Computer Science

This graduate certificate program is tailored for people involved in the specification, design, implementation, and management of data- and knowledge-intensive information systems. The certificate program prepares students for research, development, and professional practice in information engineering by offering a hands-on set of courses providing theoretical knowledge and practical experience with methods and tools associated with database management systems, data modeling, knowledge acquisition, data and knowledge representation, and software engineering.

The graduate certificate may be pursued on a part-time or full-time basis.

Admission Requirements

Applicants must have a baccalaureate degree from an accredited institution and have earned a GPA of 3.00 or higher in the last 60 credits. In addition, applicants must complete a self-assessment form, which can be obtained from the Computer Science Department. This form provides summary information concerning background and preparation for the program.

Applicants must possess knowledge equivalent to that provided by the following courses: INFS 501 - Discrete and Logical Structures for Information Systems, SWE 510 - Object-Oriented Programming in Java, INFS 515 - Computer Organization, and INFS 519 - Program Design and Data Structures.

Students not enrolled in a Mason graduate degree program should apply for the information engineering certificate program through the Volgenau School Graduate Admissions Office. Students enrolled in a Mason graduate degree program should apply to the department for admission into the certificate program. Admission into the certificate program does not guarantee acceptance into any MS program.

Certificate Requirements

Students must complete four courses, with an average grade of B or better, for a total of 12 credits of graduate study. Note that students enrolled in the MS-ISYS program as well as this certificate should not take INFS 622.

To obtain the certificate, students must complete the following:

Four required courses (12 credits):
Information Security and Assurance Graduate Certificate

Banner Code: VS-CERG-ISA

School: Volgenau School of Engineering

Department: Computer Science

This graduate certificate program is for students interested in science and methods for ensuring secrecy, integrity, availability, and legitimate use of information systems. The certificate may be pursued concurrently with any of the graduate programs in the Volgenau School.

The graduate certificate may only be pursued on a part-time basis.

Admission Requirements

Applicants must hold a baccalaureate degree from an accredited institution and have earned a GPA of 3.00 or higher in the last 60 credits. In addition, applicants must complete a self-assessment form, which can be obtained from the Computer Science Department. This form provides summary information concerning background and preparation for the program.

Applicants must possess knowledge equivalent to that provided by the following courses: INFS 501 - Discrete and Logical Structures for Information Systems, SWE 510 - Object-Oriented Programming in Java, INFS 515 - Computer Organization, and INFS 519 - Program Design and Data Structures.

Students must also possess the equivalent knowledge of CS 555 and CS 571, or the prerequisite courses required for the selected electives. Students not enrolled in a graduate degree program at Mason should apply for the certificate program through the Volgenau School Graduate Admissions Office. Students enrolled in a Mason graduate degree program should apply to the department for admission into the certificate program. Admission into the certificate program does not guarantee acceptance into any MS program.

Certificate Requirements

Students must complete four courses with an average grade of B or better for a total of 12 credits of graduate study.

Two required courses (6 credits):

- ISA 562 - Information Security Theory and Practice Credits: 3
- ISA 656 - Network Security Credits: 3

Two additional courses (6 credits):

Two electives to be taken from the following, excluding ISA 697, ISA 796, ISA 797, and ISA 798.
Courses at the ISA 600 and 700 level

ISA 564 - Security Laboratory Credits: 3

Total: 12 credits

Software Architecture Graduate Certificate

Banner Code: VS-CERG-SWA

School: Volgenau School of Engineering

Department: Computer Science

This graduate certificate program provides knowledge, tools, and techniques to those who are working or planning to work in software architecture but do not want to complete the requirements for a master’s degree in the field. The certificate may be pursued concurrently with any of the graduate degree programs in the Volgenau School.

Software architecture is an essential part of a software system and can be considered the backbone for such a system. Many industrial organizations recognize the important role of software architecture and have requested specific courses and graduate certification in this area. This proposed graduate certificate program addresses this industrial need. Mason is well-positioned to address this need because the university already offers several relevant courses and has the faculty with the necessary expertise to teach them.

The graduate certificate may only be pursued on a part-time basis.

Admission Requirements

Applicants must hold a baccalaureate degree from an accredited institution and have earned a GPA of 3.00 or higher in the last 60 credits. In addition, applicants must complete a self-evaluation form, which can be obtained from the department. This form provides summary information concerning background and preparation for the program.

Applicants must possess knowledge equivalent to the following undergraduate courses: structured programming in a modern programming language, data structures, discrete mathematics, and machine organization. The level of knowledge may also be achieved by taking the following foundation courses at Mason: INFS 501 - Discrete and Logical Structures for Information Systems, INFS 515 - Computer Organization, SWE 510 - Object-Oriented Programming in Java, and INFS 519 - Program Design and Data Structures. In addition, it is desirable, but not necessary, for applicants to have at least one year of appropriate work experience in building or modifying software systems.

Applicants must submit a one- to two-page statement of educational and work experience in the computing field that includes a statement of career goals in software engineering. Students not enrolled in a Mason graduate degree program should apply for the certificate program through the Volgenau School Graduate Admissions Office. Students enrolled in a Mason graduate degree program should apply to the Computer Science office for admission into the certificate program. Admission into the certificate program does not guarantee acceptance into any MS program.

Certificate Requirements

Students must complete four courses with an average grade of B or better for a total of 12 credits of graduate study.

Required courses (3 credits):
At least two of the following courses (6 or 9 credits):

- SWE 699 - Special Topics in Software Engineering Credits: 3
- SWE 721 - Reusable Software Architectures Credits: 3
- SWE 727 - Quality of Service for Software Architectures Credits: 3
- SWE 795 - Advanced Topics in Software Engineering Credits: 3

Zero or one from the following courses:

- CS 672 - Computer System Performance Evaluation Credits: 3
- CS 673 - Multimedia Computing and Systems Credits: 3
- SWE 620 - Software Requirements Analysis and Specification Credits: 3
- SWE 622 - Distributed Software Engineering Credits: 3
- SWE 625 - Software Project Management Credits: 3
- SWE 631 - Software Design Patterns Credits: 3
- SWE 637 - Software Testing Credits: 3
- SWE 641 - Systems Architecture for Large-Scale Systems Credits: 3
- SWE 645 - Component-Based Software Development Credits: 3
- SWE 681 - Secure Software Design and Programming Credits: 3
- SWE 760 - Software Analysis and Design of Real-Time Systems Credits: 3
- SWE 823 - Software for Critical Systems Credits: 3

Total: 12 credits

Software Engineering for C4I Graduate Certificate

Banner Code: VS-CERG-SC4I

School: Volgenau School of Engineering

Department: Computer Science

This graduate certificate is aimed at students who wish to specialize in C4I but have a computer science or software engineering background, and wish to combine the certificate with a MS degree in Computer Science or Software Engineering.

The graduate certificate may be pursued on a part-time or full-time basis.

Admissions Requirements

Applicants must have a baccalaureate degree from an accredited institution, and have earned a GPA of 3.0 or higher in the last 60 credits. In addition, applicants must complete a self-assessment form, which can be obtained from the Computer Science Department. This form provides summary information concerning background and preparation for the program.

Certificate Requirements
Students must complete three required courses and one elective, with an average grade of B or better, for a total of 12 credits of graduate study.

Required Courses (9 credits)

- SYST 580 - Introduction to C4I Systems Credits: 3
- CS 555 - Computer Communications and Networking Credits: 3
- SWE 622 - Distributed Software Engineering Credits: 3

Elective Course (subject to satisfying course prerequisites):

- CS 658 - Networked Virtual Environments Credits: 3
- CS 755 - Advanced Computer Networks Credits: 3
- CS 756 - Performance Analysis of Computer Networks Credits: 3
- ISA 656 - Network Security Credits: 3
- ISA 674 - Intrusion Detection Credits: 3
- SWE 621 - Software Modeling and Architectural Design Credits: 3
- SWE 625 - Software Project Management Credits: 3
- SWE 721 - Reusable Software Architectures Credits: 3
- SWE 727 - Quality of Service for Software Architectures Credits: 3

Total: 12 credits

Software Engineering Graduate Certificate

Banner Code: VS-CERG-SWE

School: Volgenau School of Engineering

Department: Computer Science

This graduate certificate program provides knowledge, tools, and techniques to those who are working in or planning to work in software engineering but do not want to complete requirements for a master’s degree in the field. The certificate may be pursued concurrently with any of the graduate degree programs in the Volgenau School.

The graduate certificate may be pursued on a part-time or full-time basis.

Admission Requirements

Applicants must hold a baccalaureate degree from an accredited institution and have earned a GPA of 3.00 or higher in the last 60 credits. In addition, applicants must complete a self-assessment form, which can be obtained from the Computer Science Department. This form provides summary information concerning background and preparation for the program.

Applicants must possess knowledge equivalent to the following undergraduate courses: structured programming in a modern programming language, data structures, discrete mathematics, and machine organization. The level of knowledge may also be achieved by taking the following foundation courses at Mason: INFS 501 - Discrete and Logical Structures for Information Systems, SWE 510 - Object-Oriented Programming in Java, INFS 515 - Computer Organization, and INFS 519 - Program Design and Data Structures. In addition, it is desirable, but not necessary, for applicants to have at least one year of appropriate work experience in building or modifying software systems.
Applicants must submit a one- to two-page statement of educational and work experience in the computing field that includes a statement of career goals in software engineering. Students not enrolled in a Mason graduate degree program should apply for the certificate program through the Volgenau School Graduate Admissions Office. Students enrolled in a Mason graduate degree program should apply to the Computer Science Department for admission into the certificate program. Admission into the certificate program does not guarantee acceptance into any MS program.

Certificate Requirements

Students must complete four courses with an average grade of B or better for a total of 12 credits of graduate study.

Three courses (9 credits) from the following:

- SWE 619 - Object-Oriented Software Specification and Construction Credits: 3
- SWE 621 - Software Modeling and Architectural Design Credits: 3
- SWE 622 - Distributed Software Engineering Credits: 3
- SWE 637 - Software Testing Credits: 3

One additional course (3 credits) from the following:

(subject to satisfying the prerequisites)

- CS 675 - Distributed Systems Credits: 3
- CS 706 - Concurrent Software Systems Credits: 3
- CS 735 - Concurrency Credits: 3
- SWE 620 - Software Requirements Analysis and Specification Credits: 3
- SWE 622 - Distributed Software Engineering Credits: 3
- SWE 625 - Software Project Management Credits: 3
- SWE 626 - Software Project Laboratory Credits: 3
- SWE 631 - Software Design Patterns Credits: 3
- SWE 632 - User Interface Design and Development Credits: 3
- SWE 637 - Software Testing Credits: 3
- SYST 621 - Systems Architecture Design Credits: 3
- SWE 642 - Software Engineering for the World Wide Web Credits: 3
- SWE 645 - Component-Based Software Development Credits: 3
- SWE 681 - Secure Software Design and Programming Credits: 3
- SWE 699 - Special Topics in Software Engineering Credits: 3
- SWE 720 - Advanced Software Requirements Credits: 3
- SWE 721 - Reusable Software Architectures Credits: 3
- SWE 723 - Precise Modeling Credits: 3
- SWE 727 - Quality of Service for Software Architectures Credits: 3
- SWE 760 - Software Analysis and Design of Real-Time Systems Credits: 3
- SWE 763 - Software Engineering Experimentation Credits: 3
- SWE 795 - Advanced Topics in Software Engineering Credits: 3
- SWE 798 - Research Project Credits: 3

Notes:
Students enrolled in the MS in Information Systems Program must substitute SWE 620 for INFS 622 to obtain this certificate. Credit is not given for taking both INFS 622 and SWE 620; only 3 credits will be awarded.

Students enrolled in the MS in Computer Science Program may obtain a certificate in software engineering by taking any four SWE courses. If CS/SWE 706 is included, it is possible to complete the MS in Computer Science and the certificate in software engineering in 30 hours.

Total: 12 credits

Web-Based Software Engineering Graduate Certificate

Banner Code: VS-CERG-WBSE

School: Volgenau School of Engineering

Department: Computer Science

This graduate certificate program provides knowledge, tools, and techniques to those who are working in or planning to work in software engineering but do not want to complete requirements for a master’s degree in the field. The certificate may be pursued concurrently with any of the graduate degree programs in the Volgenau School.

The graduate certificate may be pursued on a part-time or full-time basis.

Admission Requirements

Applicants must hold a baccalaureate degree from an accredited institution and have earned a GPA of 3.00 or better in the last 60 credits. Applicants must complete a self-assessment form, which can be obtained from the department or the department web site. The form provides information concerning background and preparation for the program.

Applicants must possess knowledge equivalent to that provided by the following courses: INFS 501 - Discrete and Logical Structures for Information Systems, SWE 510 - Object-Oriented Programming in Java, INFS 515 - Computer Organization, and INFS 519 - Program Design and Data Structures.

Students not enrolled in a Mason graduate degree program should apply to the certificate program through the Volgenau School Graduate Admissions Office. Students enrolled in a Mason graduate degree program should contact the department for admission to the certificate program. Admission to the certificate program does not guarantee admission to any MS program.

Certificate Requirements

Students must complete four courses with an average grade of B or higher for a total of 12 credits of graduate study.

Three required courses (9 credits):

- SWE 622 - Distributed Software Engineering Credits: 3
- SWE 632 - User Interface Design and Development Credits: 3
- SWE 642 - Software Engineering for the World Wide Web Credits: 3

One of the following courses (3 credits):
• CS 675 - Distributed Systems Credits: 3
• INFS 614 - Database Management Credits: 3
• ISA 656 - Network Security Credits: 3
• SWE 619 - Object-Oriented Software Specification and Construction Credits: 3
• SWE 621 - Software Modeling and Architectural Design Credits: 3
• SWE 637 - Software Testing Credits: 3
• SWE 645 - Component-Based Software Development Credits: 3
• SWE 681 - Secure Software Design and Programming Credits: 3

Total: 12 credits

Master of Science

Computer Science, MS

Banner Code: VS-MS-CS

School: Volgenau School of Engineering

Department: Computer Science

The graduate program leading to an MS in Computer Science prepares students for research and professional practice in computer science and related technologies. The program includes both fundamentals and advanced work in the areas of artificial intelligence and databases, programming languages and software engineering, systems and networks, theoretical computer science, and visual computing. Graduate classes are divided into basic classes, which have no graduate course prerequisite, and advanced classes, which have a graduate class as a prerequisite. Graduate classes are generally offered in the late afternoon and evening. Financial aid in the form of graduate assistantships may be available for full-time degree-seeking students.

An accelerated master's option is available to students in the bachelor's program. See Computer Science, BS/Computer Science, Accelerated MS for specific requirements.

Admission Requirements

In addition to fulfilling Mason’s admission requirements for graduate study, applicants must meet the following requirements:

• Hold a baccalaureate degree that includes Data Structures and Algorithms (CS 310) Automata Theory and Formal Languages (CS 330), and Computer Architecture including Assembly Language CS 367 and CS 465). Students also must have completed Calculus I and II and a substantial course in discrete mathematics (such as MATH 125). Students with some deficiencies in preparation may be admitted provisionally pending completion of foundation courses in mathematics or computer science. Undergraduate credit earned for this purpose may not be applied toward the graduate degree.

• Earned a cumulative GPA of 3.00 for the last two years of undergraduate work, preferably with a major in a technical field such as computer science, mathematics, physical sciences, engineering, or information systems.

• Submit transcripts of all post secondary education, a self assessment form (included in the application package or available from the department), three letters of recommendation, and an official GRE score.

Degree Requirements (30 credits)

In addition to general university requirements, completion of the MS in CS requires 30 credits of graduate courses.
Courses are grouped in the following five broad areas: Artificial Intelligence and Databases, Programming Languages and Software Engineering, Systems and Networks, Theoretical Computer Science, and Visual Computing. The list of preapproved courses with their areas is provided below.

All the following requirements should be satisfied for the MS in CS degree:

- CS 583 - Analysis of Algorithms Credits: 3 (from the Theoretical Computer Science area) and two additional core courses from two other areas must be successfully completed with a grade of B- or better.
- At least five courses (15 credits) must be chosen from the advanced courses in the list of preapproved courses from at least three different areas.
- At least six courses, including two advanced courses, must be designated CS.
- At least eight courses must be taken from the list of preapproved courses. Up to two computer science-related courses that are not on the list of preapproved courses may be taken with the approval of the Computer Science Department.

**Plan of Study**

Before the end of the second semester, students must have a plan of study approved by their academic advisor. This plan should be kept up to date by regular consultation with the academic advisor. A final signed version of the plan must be included when the student submits a graduation application.

**Core Courses by Area**

The following basic courses are designated as “core” courses in their respective areas:

**Artificial Intelligence and Databases**

- CS 550 - Database Systems Credits: 3
- CS 580 - Introduction to Artificial Intelligence Credits: 3

**Programming Languages and Software Engineering**

- CS 540 - Language Processors Credits: 3
- SWE 619 - Object-Oriented Software Specification and Construction Credits: 3
- SWE 621 - Software Modeling and Architectural Design Credits: 3

**Systems and Networks**

- CS 555 - Computer Communications and Networking Credits: 3
- CS 571 - Operating Systems Credits: 3
- ISA 562 - Information Security Theory and Practice Credits: 3

**Theoretical Computer Science**

- CS 583 - Analysis of Algorithms Credits: 3

**Visual Computing**
CS 551 - Computer Graphics Credits: 3

Preapproved Basic and Advanced MS CS Courses by Area

The preapproved courses are explicitly classified as “basic” or “advanced” below.

Artificial Intelligence and Databases

Basic Courses:
- CS 550 - Database Systems Credits: 3
- CS 580 - Introduction to Artificial Intelligence Credits: 3
- INFS 623 - Web Search Engines and Recommender Systems Credits: 3

Advanced Courses:
- CS 650 - Advanced Database Management Credits: 3
- CS 659 - Theory and Applications of Data Mining Credits: 3
- CS 667 - Biometrics and Identity Management Credits: 3
- CS 680 - Natural Language Processing Credits: 3
- CS 681 - Designing Expert Systems Credits: 3
- CS 685 - Autonomous Robotics Credits: 3
- CS 687 - Advanced Artificial Intelligence Credits: 3
- CS 688 - Pattern Recognition Credits: 3
- CS 689 - Planning Motions of Robots and Molecules Credits: 3
- CS 757 - Mining Massive Datasets Credits: 3
- CS 775 - Advanced Pattern Recognition Credits: 3
- CS 780 - Data Mining on Multimedia Data Credits: 3
- CS 782 - Machine Learning Credits: 3
- CS 785 - Knowledge Acquisition and Problem Solving Credits: 3
- CS 787 - Decision Guidance Systems Credits: 3
- CS 811 - Research Topics in Machine Learning and Inference Credits: 3
- CS 880 - Research Topics in Artificial Intelligence Credits: 3
- CS 884 - Advanced Topics in Computer Vision and Robotics Credits: 3
- INFS 740 - Database Programming for the World Wide Web Credits: 3
- INFS 760 - Advanced Database Management Credits: 3
- INFS 772 - Intelligent Agents and the Semantic Web Credits: 3
- INFS 774 - Enterprise Architecture Credits: 3

Programming Languages and Software Engineering

Basic Courses:
- CS 540 - Language Processors Credits: 3
- SWE 619 - Object-Oriented Software Specification and Construction Credits: 3
- SWE 620 - Software Requirements Analysis and Specification Credits: 3
- SWE 621 - Software Modeling and Architectural Design Credits: 3
- SWE 622 - Distributed Software Engineering Credits: 3

Advanced Courses:
- CS 640 - Advanced Compilers Credits: 3
- ISA 681 - Secure Software Design Credits: 3
Systems and Networks

Basic Courses:
- CS 555 - Computer Communications and Networking Credits: 3
- CS 571 - Operating Systems Credits: 3
- ISA 562 - Information Security Theory and Practice Credits: 3
- ISA 564 - Security Laboratory Credits: 3

Advanced Courses:
- CS 635 - Foundations of Parallel Computation Credits: 3
- CS 658 - Networked Virtual Environments Credits: 3
- CS 671 - Advanced Operating Systems Credits: 3
- CS 672 - Computer System Performance Evaluation Credits: 3
- CS 673 - Multimedia Computing and Systems Credits: 3
- CS 675 - Distributed Systems Credits: 3
- CS 706 - Concurrent Software Systems Credits: 3
- CS 719 - Scaling Technologies for E-business Credits: 3
- CS 755 - Advanced Computer Networks Credits: 3
- CS 756 - Performance Analysis of Computer Networks Credits: 3
- CS 773 - Real-Time Systems Design and Development Credits: 3
- CS 779 - Topics in Resilient and Secure Computer Systems Credits: 3
- CS 788 - Autonomic Computing Credits: 3
- CS 818 - Topics in Computer Systems Credits: 3
- ISA 656 - Network Security Credits: 3
- ISA 673 - Operating Systems Security Credits: 3
- ISA 674 - Intrusion Detection Credits: 3
- ISA 697 - Topics in Information Security Credits: 1-6
- ISA 763 - Security Protocol Analysis Credits: 3
- ISA 764 - Security Experimentation Credits: 3
- ISA 785 - Research in Digital Forensics Credits: 3

Theoretical Computer Science

Basic Courses:
- CS 583 - Analysis of Algorithms Credits: 3

Advanced Courses:
- CS 600 - Theory of Computation Credits: 3
- CS 611 - Computational Methods for Genomics Credits: 3
- CS 630 - Advanced Algorithms Credits: 3
• CS 633 - Computational Geometry Credits: 3
• CS 683 - Parallel Algorithms Credits: 3
• CS 684 - Graph Algorithms Credits: 3
• CS 735 - Concurrency Credits: 3
• CS 753 - Parallel Computation Credits: 3

Visual Computing

Basic Courses:
• CS 551 - Computer Graphics Credits: 3

Advanced Courses:
• CS 662 - Computer Graphics Game Technologies Credits: 3
• CS 667 - Biometrics and Identity Management Credits: 3
• CS 682 - Computer Vision Credits: 3
• CS 686 - Image Processing and Applications Credits: 3
• CS 752 - Interactive Graphics Software Credits: 3
• CS 774 - Computational Vision Credits: 3
• CS 776 - Graphical Real-Time Simulation Credits: 3
• CS 777 - Human-Computer Intelligent Interaction Credits: 3
• CS 884 - Advanced Topics in Computer Vision and Robotics Credits: 3

Project/Thesis (optional):

Three to six credit hours of the advanced classes may be replaced by a project or thesis. The project or thesis must be guided and approved by a committee of three appropriate faculty members and presented at an appropriate forum. The thesis must meet relevant university requirements.

• 3 credits of CS 798 - Project Seminar Credits: 3
  or
• 6 credits of CS 799 - Thesis Credits: 1-6

Note:

These courses are not classified by area. Note that CS 695/CS 795 can be used to satisfy the breadth requirement if the area is listed in the syllabus for the course.

• CS 695 - Topics in Computer Science Credits: 3
• CS 697 - Independent Reading and Research Credits: 1-3
• CS 795 - Advanced Topics in CS Credits: 3
• CS 798 - Project Seminar Credits: 3
• CS 799 - Thesis Credits: 1-6
• CS 895 - Research Topics in CS Credits: 3

Total: 30 credits

Information Security and Assurance, MS
School: Volgenau School of Engineering
Department: Computer Science

The Department of Computer Science’s MS degree in Information Security and Assurance prepares graduates to fill the current and future need for information security and assurance professionals. Graduates work in a wide variety of capacities, protecting the information systems of different types of organizations and supporting the nation’s information infrastructure. The master of science in information security and assurance provides students with the general and technical knowledge and skills to understand the relationship between information security and advancing information systems technology. The program gives graduates a theoretical understanding of the science and methodologies for ensuring the secrecy and integrity of data, as well as the availability and legitimate use of data and information systems.

Students focus on the technical and management aspects of information security and examine ways to provide secure information processing systems by investigating operating systems security, distributed secure system architectures, database security, software applications security, security policies, secure e-commerce, network and distributed systems security, cryptography, and security protocols. Graduates of the program are actively recruited by federal, state, and local governments, as well as the private sector. Typical employers include Internet-based companies, software companies, banks and insurance companies, and in general any organization that depends heavily on the use of IT. All classes are scheduled in the late afternoon and early evening to accommodate employed students.

An accelerated master's option is available to students in the applied information technology or computer science bachelor's program. See each listing for specific requirements.

Admission Requirements

Applicants must hold a four-year (120-credit) baccalaureate degree from an accredited institution and have earned a GPA of 3.00 or better in the last 60 credits. Other requirements are as follows:

- Show proof of a satisfactory score on the GRE, if required. The applicable test should have been taken within five years of applying for admission. The department policy is that the GRE is required unless the applicant has an undergraduate degree in science or engineering from a U.S. university and graduated with a GPA of 3.00 or better in the last 60 hours; a graduate degree in science or engineering from a U.S. university; or been admitted as a non degree student and meets all the following requirements: an undergraduate degree from a U.S. university, an undergraduate GPA of 3.00 or better in the last 60 hours, and a B in all foundation courses taken at Mason or elsewhere.

- Submit the appropriate application forms with three letters of recommendation from people directly knowledgeable of the applicant’s professional and academic competence, a one-page goals statement, and a work résumé.

- Submit a department self-evaluation form that is essential for evaluating foundation requirements by the department faculty. This form may be obtained from the department office or the department web page.

- International students must submit their TOEFL score.

Foundation Requirements

To ensure that students have an adequate background in mathematical methods and computer science, the program requires the following four foundation courses, or their equivalents: INFS 501 - Discrete and Logical Structures for Information Systems, INFS 515 - Computer Organization, INFS 519 - Program Design and Data Structures, and SWE 510 - Object-Oriented Programming in Java.

Prospective students are asked to complete a department self evaluation form, indicating whether previously taken courses may satisfy these foundation requirements. On acceptance, students are advised of the necessary foundation courses to be satisfactorily completed to meet this requirement. Foundation courses do not earn credit toward the MS degree; however, they must be successfully completed with a grade of B or better before enrolling in the core curriculum. Students may test out to
Advising

The department holds orientation meetings each January and August to advise newly admitted and continuing students. Members of the faculty are present to answer questions and offer advice concerning programs of study. Detailed information is available on the department web site.

The department also provides an advising function to students, as outlined in the student advising form available from the department. Each student is assigned a faculty advisor with whom to confer on matters related to degree requirements. A plan of study form for the MS degree should be completed and submitted by the student soon after admission to the program. This serves as a planning guide for the student.

Degree Requirements

Completion of the degree program requires a minimum of 30 approved graduate credits (10 courses). Students may choose an emphasis area by selecting four elective courses from one of the two optional concentration areas as specified below. To continue in the program, students are required to obtain a B- or better grade in the core courses.

Required Core Courses (12 credits):

To provide the necessary background and fundamentals of information systems security and assurance, the program has four courses that are required of all students:

- ISA 562 - Information Security Theory and Practice Credits: 3
- ISA 564 - Security Laboratory Credits: 3
- ISA 656 - Network Security Credits: 3
- INFS 612 - Principles and Practices of Communication Networks Credits: 3

Security Elective Courses (12 credits):

Students select four courses from the following list of courses. Students may alternatively satisfy this requirement by completing a concentration.

- ISA 563 - Fundamentals of Systems Programming Credits: 3
- ISA 650 - Security Policy Credits: 3
- ISA 652 - Security Audit and Compliance Testing Credits: 3
- ISA 673 - Operating Systems Security Credits: 3
- ISA 674 - Intrusion Detection Credits: 3
- ISA 681 - Secure Software Design Credits: 3
- ISA 763 - Security Protocol Analysis Credits: 3
- ISA 764 - Security Experimentation Credits: 3
- ISA 785 - Research in Digital Forensics Credits: 3
- CS 667 - Biometrics and Identity Management Credits: 3
- CS 779 - Topics in Resilient and Secure Computer Systems Credits: 3
Optional Concentration Areas (12 credits):

In place of the 12 credit hours of security elective courses students may pursue a concentration by completing four courses from one of the two options below.

▲ Network and System Security Concentration (NSS)

- CS 555 - Computer Communications and Networking Credits: 3
- CS 571 - Operating Systems Credits: 3
- CS 779 - Topics in Resilient and Secure Computer Systems Credits: 3
- ISA 563 - Fundamentals of Systems Programming Credits: 3
- ISA 673 - Operating Systems Security Credits: 3
- ISA 674 - Intrusion Detection Credits: 3
- ISA 681 - Secure Software Design Credits: 3
- ISA 763 - Security Protocol Analysis Credits: 3
- ISA 764 - Security Experimentation Credits: 3

▲ Advanced Cyber Security Concentration (ACYB)

- CS 667 - Biometrics and Identity Management Credits: 3
- ISA 650 - Security Policy Credits: 3
- ISA 652 - Security Audit and Compliance Testing Credits: 3
- ISA 681 - Secure Software Design Credits: 3
- ISA 763 - Security Protocol Analysis Credits: 3
- ISA 785 - Research in Digital Forensics Credits: 3
- ISA 862 - Models for Computer Security Credits: 3
- ISA 863 - Advanced Topics in Computer Security Credits: 3

Note:

MS ISA students who want to take CS 571 but have not taken CS 367 or equivalent, are advised to take ISA 563 before CS 571.

CS 555 can be used as a substitute for INFS 612. However, CS 555 and INFS 612 cannot both be counted toward the MS ISA degree.

Two Additional Courses (6 credits):

All students must select the remaining two courses from any combination of the following:

- ISA courses at the 600 and 700 level (with the exception of ISA 685)
- CS courses at the 500, 600, and 700 level
- Courses from the list of preapproved electives provided below
  - A thesis option is available whereby a student may elect to complete a 6-credit thesis ISA 799.

Students may choose other graduate electives with the consent of their faculty advisor and the graduate coordinator.

Approved Electives
A full list of pre-approved electives is given below by program:

**Information Systems (INFS)**

- INFS 614 - Database Management Credits: 3
- INFS 623 - Web Search Engines and Recommender Systems Credits: 3
- INFS 740 - Database Programming for the World Wide Web Credits: 3
- INFS 755 - Data Mining Credits: 3
- INFS 760 - Advanced Database Management Credits: 3
- INFS 772 - Intelligent Agents and the Semantic Web Credits: 3
- INFS 774 - Enterprise Architecture Credits: 3

**Software Engineering (SWE)**

- SWE 619 - Object-Oriented Software Specification and Construction Credits: 3
- SWE 620 - Software Requirements Analysis and Specification Credits: 3
- SWE 621 - Software Modeling and Architectural Design Credits: 3
- SWE 622 - Distributed Software Engineering Credits: 3
- SWE 632 - User Interface Design and Development Credits: 3
- SWE 637 - Software Testing Credits: 3
- SWE 642 - Software Engineering for the World Wide Web Credits: 3
- SWE 645 - Component-Based Software Development Credits: 3
- SWE 720 - Advanced Software Requirements Credits: 3
- SWE 721 - Reusable Software Architectures Credits: 3
- SWE 727 - Quality of Service for Software Architectures Credits: 3

**Computer Forensics (CFRS)**

- CFRS 761 - Malware Reverse Engineering Credits: 3

**Electrical and Computer Engineering (ECE)**

- ECE 646 - Cryptography and Computer Network Security Credits: 3

**Total: 30 credits**

**Information Systems, MS**

**Banner Code:** VS-MS-ISYS

**School:** Volgenau School of Engineering

**Department:** Computer Science

This professional degree program focuses on the technical and managerial issues associated with designing, building, and maintaining information systems in organizations. Data, information, and knowledge are crucial to the modern enterprise, and the MS in Information Systems (MS-ISYS) addresses both the theoretical and engineering aspects of assessing user requirements;
designing and building databases; specifying enterprise architectures; implementing large-scale information systems; and working with users to promote their effective organizational use.

The goals of the MS-ISYS are to provide a high-quality program that allows students with diverse baccalaureate and professional backgrounds to obtain the MS degree; provide a technical body of knowledge, together with hands-on project experience, that will allow students to analyze, design, build, deploy, maintain, and manage information systems in large organizations such as industry, government, and nonprofits; and provide a course of study that allows professionals to pursue a technical or a managerial approach to information systems.

The career paths open to graduates include technical and management positions. Technical positions include systems analyst, data administrator, information architect, database administrator, systems architect, decision analyst, data warehouse administrator, database programmer, web-based information systems designer and programmer, information engineer, and knowledge engineer. Management positions include chief information officer, chief knowledge officer, chief privacy officer, project manager, and webmaster.

An accelerated master’s option is available to students in the applied information technology or computer science bachelor’s program. See each listing for specific requirements.

**Admission Requirements**

Applicants must hold a four-year (120-credit) baccalaureate degree from an accredited institution and have earned a GPA of 3.00 or better in the last 60 credits. They also must meet the following requirements:

- Show proof of a satisfactory score on the GRE, if required. The applicable test should have been taken within five years of applying for admission. The department policy is that the GRE is required unless the applicant has an undergraduate degree in science or engineering from a U.S. university and graduated with a GPA of 3.00 or better in the last 60 hours; a graduate degree in science or engineering from a U.S. university; or been admitted as a non-degree student and meets all the following requirements: an undergraduate degree from a U.S. university, an undergraduate GPA of 3.00 or better in the last 60 hours, and a B or better grade in all foundation courses taken at Mason or elsewhere.
- Submit the appropriate application forms with three letters of recommendation from people directly knowledgeable of the applicant’s professional and academic competence, a one-page goals statement, and a work résumé.
- Submit a department self-evaluation form that is essential for evaluating foundation requirements by the department faculty. This form may be obtained from the department office or the department web page.
- International students must submit their TOEFL score.

**Foundation Requirements**

To ensure students have an adequate background in mathematical methods, computer technology, and programming knowledge, the program requires the following foundation courses or their equivalents: INFS 501 Discrete and Logical Structures for Information Systems, INFS 515 Computer Organization, INFS 519 Program Design and Data Structures, SWE 510 Object-Oriented Programming in Java.

Prospective students are asked to complete a department self-evaluation form indicating whether previously taken courses may satisfy these foundation requirements. On acceptance, students are advised of the necessary foundation courses to be satisfactorily completed to meet this requirement. Foundation courses do not earn credit toward the MS degree; however, they must be successfully completed with a grade of B or better before enrolling in the core curriculum.

Students may test out to indicate they have the requisite knowledge for those foundations of SWE 510, INFS 501, 515, and 519. The exams are given before classes begin in January and August, and can only be taken once. Registration is not required; students need only be present at the date, time, and location specified, and bring some form of photographic identification. Detailed information is available on the department web site. Students failing any of the exams must take the equivalent course before enrolling in the core curriculum courses.
Advising

The department holds orientation meetings in January and August to advise newly admitted and continuing students. Members of the faculty are present to answer questions and offer advice concerning programs of study. Detailed information is available on the department web site.

The department also provides an advising function to students, as outlined in the student advising form available from the department. Each student is assigned a faculty advisor with whom to confer on matters related to degree requirements. A plan of study form for the MS degree should be completed and submitted by the student soon after admission to the program. This plan serves as a guide for the student.

Degree Requirements

Completion of the MS program requires a minimum of 30 approved graduate credits (10 courses).

Core Courses (12 credits)

To provide a common background in the fundamentals of information systems, the following core courses, which constitute the technical body of knowledge for the program, are required of all students:

- INFS 612 - Principles and Practices of Communication Networks Credits: 3
- INFS 614 - Database Management Credits: 3
- INFS 622 - Information Systems Analysis and Design Credits: 3
- ISA 562 - Information Security Theory and Practice Credits: 3

Elective Courses (18 credits)

The elective courses are organized into the following emphasis areas: database management, data mining, electronic commerce, software engineering, knowledge management, and information security and assurance.

In addition to the core courses taken as part of the MS-ISYS curriculum, students may choose an emphasis within the program by taking six courses from one of the emphasis areas listed below. Students may also choose electives spanning several emphasis areas; they may also plan their electives so as to obtain certificates offered by the department. A list of approved electives is given within emphasis areas and by graduate program. A full list is provided at the end of this section. Special courses may be used as electives with prior approval of the student’s academic advisor and the graduate coordinator.

Students, with the consent of a faculty sponsor and faculty advisor, may also elect courses in individualized study, special topics, or a 6-credit thesis, which is primarily intended for students planning to pursue a PhD in information technology with a concentration in information systems.

Listed below are the emphasis areas and the approved elective courses in each area.

Database Management

- CS 787 - Decision Guidance Systems Credits: 3
- INFS 623 - Web Search Engines and Recommender Systems Credits: 3
- INFS 740 - Database Programming for the World Wide Web Credits: 3
- INFS 760 - Advanced Database Management Credits: 3
- INFS 772 - Intelligent Agents and the Semantic Web Credits: 3
- INFS 796 - Directed Readings in Information Systems Credits: 3
Data Mining

- CS 757 - Mining Massive Datasets Credits: 3
- CS 780 - Data Mining on Multimedia Data Credits: 3
- CS 782 - Machine Learning Credits: 3
- INFS 755 - Data Mining Credits: 3
- INFS 623 - Web Search Engines and Recommender Systems Credits: 3
- INFS 796 - Directed Readings in Information Systems Credits: 3

Electronic Commerce

- INFS 640 - Introduction to Electronic Commerce Credits: 3
- INFS 770 - Knowledge Management for E-Business Credits: 3
- INFS 772 - Intelligent Agents and the Semantic Web Credits: 3
- INFS 774 - Enterprise Architecture Credits: 3
- INFS 796 - Directed Readings in Information Systems Credits: 3
- ISA 656 - Network Security Credits: 3

Software Engineering

- SWE 619 - Object-Oriented Software Specification and Construction Credits: 3
- SWE 621 - Software Modeling and Architectural Design Credits: 3
- SWE 622 - Distributed Software Engineering Credits: 3
- SWE 625 - Software Project Management Credits: 3
- SWE 631 - Software Design Patterns Credits: 3
- SWE 632 - User Interface Design and Development Credits: 3
- SWE 637 - Software Testing Credits: 3
- SWE 642 - Software Engineering for the World Wide Web Credits: 3
- SWE 721 - Reusable Software Architectures Credits: 3
- SWE 727 - Quality of Service for Software Architectures Credits: 3
- SWE 795 - Advanced Topics in Software Engineering Credits: 3

Knowledge Management

- CS 580 - Introduction to Artificial Intelligence Credits: 3
- CS 681 - Designing Expert Systems Credits: 3
- CS 785 - Knowledge Acquisition and Problem Solving Credits: 3
- INFS 623 - Web Search Engines and Recommender Systems Credits: 3
- INFS 740 - Database Programming for the World Wide Web Credits: 3
- INFS 755 - Data Mining Credits: 3
- INFS 770 - Knowledge Management for E-Business Credits: 3
- INFS 772 - Intelligent Agents and the Semantic Web Credits: 3
- INFS 774 - Enterprise Architecture Credits: 3
- INFS 796 - Directed Readings in Information Systems Credits: 3

Information Security and Assurance
• ISA 563 - Fundamentals of Systems Programming Credits: 3
• ISA 652 - Security Audit and Compliance Testing Credits: 3
• ISA 656 - Network Security Credits: 3
• ISA 673 - Operating Systems Security Credits: 3
• ISA 674 - Intrusion Detection Credits: 3
• ISA 681 - Secure Software Design Credits: 3
• ISA 763 - Security Protocol Analysis Credits: 3
• ISA 764 - Security Experimentation Credits: 3
• ISA 785 - Research in Digital Forensics Credits: 3
• ISA 796 - Directed Readings in Information Security Credits: 3

Certificates

Certificates may also be obtained in the following areas: database management, electronic commerce, information engineering, information security and assurance, intelligent agents, software architecture, software engineering, foundations of information systems, web-based software engineering, computer games technology, and computer networking. These certificates are described in the computer science certificates section of this catalog.

Approved Electives

A full list of approved electives is given below by program:

Information Systems (INFS)

• INFS 623 - Web Search Engines and Recommender Systems Credits: 3
• INFS 640 - Introduction to Electronic Commerce Credits: 3
• INFS 697 - Topics in Information Systems Credits: 1-6
• INFS 740 - Database Programming for the World Wide Web Credits: 3
• INFS 755 - Data Mining Credits: 3
• INFS 760 - Advanced Database Management Credits: 3
• INFS 770 - Knowledge Management for E-Business Credits: 3
• INFS 772 - Intelligent Agents and the Semantic Web Credits: 3
• INFS 774 - Enterprise Architecture Credits: 3
• INFS 796 - Directed Readings in Information Systems Credits: 3
• INFS 797 - Advanced Topics in Information Systems Credits: 1-6

Information Security and Assurance (ISA)

• ISA 563 - Fundamentals of Systems Programming Credits: 3
• ISA 564 - Security Laboratory Credits: 3
• ISA 650 - Security Policy Credits: 3
• ISA 652 - Security Audit and Compliance Testing Credits: 3
• ISA 656 - Network Security Credits: 3
• ISA 673 - Operating Systems Security Credits: 3
• ISA 674 - Intrusion Detection Credits: 3
• ISA 681 - Secure Software Design Credits: 3
• ISA 697 - Topics in Information Security Credits: 1-6
• ISA 763 - Security Protocol Analysis Credits: 3
• ISA 764 - Security Experimentation Credits: 3
• ISA 785 - Research in Digital Forensics Credits: 3
• ISA 797 - Advanced Topics in Information Security Credits: 3

Software Engineering (SWE)

• SWE 620 - Software Requirements Analysis and Specification Credits: 3
• SWE 625 - Software Project Management Credits: 3
• SWE 626 - Software Project Laboratory Credits: 3
• SWE 631 - Software Design Patterns Credits: 3
• SWE 632 - User Interface Design and Development Credits: 3
• SWE 641 - Systems Architecture for Large-Scale Systems Credits: 3
• SWE 642 - Software Engineering for the World Wide Web Credits: 3
• SWE 645 - Component-Based Software Development Credits: 3
• SWE 699 - Special Topics in Software Engineering Credits: 3
• SWE 720 - Advanced Software Requirements Credits: 3
• SWE 721 - Reusable Software Architectures Credits: 3
• SWE 727 - Quality of Service for Software Architectures Credits: 3
• SWE 763 - Software Engineering Experimentation Credits: 3
• SWE 795 - Advanced Topics in Software Engineering Credits: 3
• SWE 796 - Directed Readings in Software Engineering Credits: 3
• SWE 798 - Research Project Credits: 3

Computer Science (CS)

• CS 540 - Language Processors Credits: 3
• CS 580 - Introduction to Artificial Intelligence Credits: 3
• CS 583 - Analysis of Algorithms Credits: 3
• CS 631 - Object-Oriented Design Patterns Credits: 3
• CS 635 - Foundations of Parallel Computation Credits: 3
• CS 640 - Advanced Compilers Credits: 3
• CS 650 - Advanced Database Management Credits: 3
• CS 662 - Computer Graphics Game Technologies Credits: 3
• CS 671 - Advanced Operating Systems Credits: 3
• CS 672 - Computer System Performance Evaluation Credits: 3
• CS 673 - Multimedia Computing and Systems Credits: 3
• CS 680 - Natural Language Processing Credits: 3
• CS 681 - Designing Expert Systems Credits: 3
• CS 682 - Computer Vision Credits: 3
• CS 683 - Parallel Algorithms Credits: 3
• CS 684 - Graph Algorithms Credits: 3
• CS 685 - Autonomous Robotics Credits: 3
• CS 686 - Image Processing and Applications Credits: 3
• CS 687 - Advanced Artificial Intelligence Credits: 3
• CS 688 - Pattern Recognition Credits: 3
• CS 700 - Quantitative Methods and Experimental Design in Computer Science Credits: 3
• CS 706 - Concurrent Software Systems Credits: 3
• CS 735 - Concurrency Credits: 3
• CS 752 - Interactive Graphics Software Credits: 3
• CS 755 - Advanced Computer Networks Credits: 3
• CS 756 - Performance Analysis of Computer Networks Credits: 3
• CS 757 - Mining Massive Datasets Credits: 3
• CS 773 - Real-Time Systems Design and Development Credits: 3
• CS 777 - Human-Computer Intelligent Interaction Credits: 3
• CS 779 - Topics in Resilient and Secure Computer Systems Credits: 3
• CS 780 - Data Mining on Multimedia Data Credits: 3
• CS 782 - Machine Learning Credits: 3
• CS 785 - Knowledge Acquisition and Problem Solving Credits: 3
• CS 795 - Advanced Topics in CS Credits: 3

Electrical and Computer Engineering (ECE)

• ECE 511 - Microprocessors Credits: 3
• ECE 521 - Modern Systems Theory Credits: 3
• ECE 528 - Introduction to Random Processes in Electrical and Computer Engineering Credits: 3
• ECE 535 - Digital Signal Processing Credits: 3
• ECE 545 - Digital System Design with VHDL Credits: 3
• ECE 548 - Sequential Machine Theory Credits: 3
• ECE 549 - Theory and Applications of Artificial Neural Networks Credits: 3
• ECE 584 - Semiconductor Device Fundamentals Credits: 3
• ECE 586 - Digital Integrated Circuits Credits: 3
• ECE 611 - Advanced Microprocessors Credits: 3
• ECE 612 - Real-Time Embedded Systems Credits: 3
• ECE 620 - Optimal Control Theory Credits: 3
• ECE 621 - Systems Identification Credits: 3
• ECE 624 - Control Systems Credits: 3
• ECE 630 - Statistical Communication Theory Credits: 3
• ECE 633 - Coding Theory Credits: 3
• ECE 635 - Adaptive Signal Processing Credits: 3
• ECE 638 - Fast Algorithms and Architectures for Digital Signal Processing Credits: 3
• ECE 641 - Computer System Architecture Credits: 3
• ECE 642 - Design and Analysis of Computer Communication Networks Credits: 3
• ECE 643 - Network Switching and Routing Credits: 3
• ECE 644 - Architectures and Algorithms for Image Processing Credits: 3
• ECE 645 - Computer Arithmetic Credits: 3
• ECE 646 - Cryptography and Computer Network Security Credits: 3
• ECE 650 - Robotics Credits: 3
• ECE 680 - Physical VLSI Design Credits: 3
• ECE 681 - VLSI Design for ASICs Credits: 3
• ECE 732 - Mobile Communication Systems Credits: 3
• ECE 734 - Detection and Estimation Theory Credits: 3
• ECE 741 - Wireless Networks Credits: 3
• ECE 744 - Computer Vision and Expert Systems Credits: 3
• ECE 746 - Advanced Applied Cryptography Credits: 3
• ECE 749 - Neural Networks for Control Credits: 3

Operations Research (OR)

• OR 540 - Management Science Credits: 3
• OR 541 - Operations Research: Deterministic Models Credits: 3
• OR 542 - Operations Research: Stochastic Models Credits: 3
• OR 635 - Discrete System Simulation Credits: 3
• OR 640 - Global Optimization and Computational Intelligence Credits: 3
• OR 641 - Linear Programming Credits: 3
• OR 642 - Integer Programming Credits: 3
• OR 643 - Network Modeling Credits: 3
• OR 644 - Nonlinear Programming Credits: 3
• OR 645 - Stochastic Processes Credits: 3
• OR 647 - Queuing Theory Credits: 3
• OR 681 - Decision and Risk Analysis Credits: 3
• OR 690 - Optimization of Supply Chains Credits: 3

Psychology (PSYC)

• PSYC 734 - Seminar in Human Factors and Applied Cognition Credits: 3
• PSYC 737 - Psychology of Human-Technology Interaction Credits: 3

Statistics (STAT)

• STAT 544 - Applied Probability Credits: 3
• STAT 554 - Applied Statistics Credits: 3
• STAT 652 - Statistical Inference Credits: 3
• STAT 655 - Analysis of Variance Credits: 3
• STAT 656 - Regression Analysis Credits: 3
• STAT 662 - Multivariate Statistical Methods Credits: 3
• STAT 663 - Statistical Graphics and Data Exploration I Credits: 3
• STAT 664 - Bayesian Inference and Decision Theory Credits: 3
• STAT 674 - Survey Sampling II Credits: 3

Systems Engineering (SYST)

• SYST 520 - System Engineering Design Credits: 3
• SYST 530 - System Management and Evaluation Credits: 3
• SYST 542 - Decision Support Systems Engineering Credits: 3
• SYST 560 - Introduction to Air Traffic Control Credits: 3
• SYST 573 - Decision and Risk Analysis Credits: 3
• SYST 611 - System Methodology and Modeling Credits: 3
• SYST 620 - Discrete Event Systems Credits: 3
• SYST 659 - Topics in Systems Engineering Credits: 3
Software Engineering, MS

Foundation Requirements

Students entering the MS program must have course work or equivalent knowledge in the following areas: introductory programming in any language; knowledge of an object-oriented programming language such as Java, C++, or C#; data structures and algorithms; machine organization (such as those given in computer system architecture or assembly language courses); and topics in discrete mathematics, including sets, relations, functions, trees, graphs, and inductive proofs.
The level of knowledge required in these areas is equivalent to that taught in undergraduate courses and may be achieved by taking the following foundation courses from Mason: INFS 501 Discrete and Logical Structures for Information Systems, SWE 510 Object-Oriented Programming in Java, INFS 515 Computer Organization, and INFS 519 Program Design and Data Structures.

In addition, it is desirable, though not required, that entering students have at least one year of work experience in building or modifying software systems.

Prospective students are asked to complete a department self-evaluation form, indicating whether previously taken courses may satisfy these foundation requirements. On acceptance, students are advised of the necessary foundation courses to be satisfactorily completed to meet this requirement. Foundation courses do not earn credit toward the MS degree; however, they must be successfully completed with a grade of B or better before enrolling in the core curriculum.

Students may test out to indicate they have the requisite knowledge for those foundation courses. The exams are given before classes begin in January and August, and can only be taken once. Registration is not required; students need only be present at the date, time, and location specified and bring some form of photographic identification. Detailed information is available on the department web site. Students failing any one of the exams must take the equivalent course before enrolling in the core curriculum courses.

### Admission Requirements

In addition to general admission requirements of the university, each applicant to the MS program must hold a four-year (120-credit) baccalaureate degree in an appropriate discipline from an accredited institution and have earned a GPA of 3.00 or better in the last 60 credits of undergraduate study. Other requirements are as follows:

- Provide a one- to two-page statement of educational and work experience in the computing field that includes a statement of career goals in software engineering.
- Submit a department self-evaluation form, which can be obtained from the department. This form provides summary information concerning background and preparation for the program.
- Show proof of a satisfactory score on the GRE, if required. The test should have been taken within five years of applying for admission. The department policy is that the GRE is required unless the applicant has an undergraduate degree in science or engineering from a U.S. university and graduated with a GPA of 3.00 or better in the last 60 hours; a graduate degree in science or engineering from a U.S. university; or been admitted as a non-degree student and meets all the following requirements: an undergraduate degree from a U.S. university, an undergraduate GPA of 3.00 or better in the last 60 hours, and a B in all foundation courses taken at Mason or elsewhere.
- Submit the appropriate application form with three letters of recommendation from people directly knowledgeable of the applicant’s professional and academic competence.

Acceptance into the MS program is based on an overall assessment of the applicant’s ability to complete the program of study satisfactorily. Well-qualified students with minor deficiencies may be admitted to the program in provisional status, with specified course work to be completed within a specified time.

### Advising

The department holds orientation meetings each January and August to advise incoming and continuing students. Members of the faculty are present to answer questions and offer advice concerning programs of study. Detailed information is available on the department web site.

The department also provides an advising function to students, as outlined in the student advising form available from the department. Each student is assigned a faculty advisor with whom to confer on matters related to degree requirements. A plan of study form for the MS degree should be completed and submitted by the student soon after admission; this plan serves as a guide for the student.
Degree Requirements

In addition to the general requirements of the university, the MS in Software Engineering requires a minimum of 30 graduate credits. The course work is divided into three categories: a breadth requirement of 12 credits of core courses, a depth requirement of 9 credits of emphasis courses, and 9 credits of elective courses.

Four Core Courses (12 credits)

- SWE 619 - Object-Oriented Software Specification and Construction Credits: 3
- SWE 621 - Software Modeling and Architectural Design Credits: 3
- SWE 622 - Distributed Software Engineering Credits: 3
- SWE 637 - Software Testing Credits: 3

Emphasis Courses (9 credits)

Students may choose an emphasis by taking three courses from one of the emphasis areas of software design, secure software engineering, software management, and web applications design and development. With permission from the advisor, a student may choose to not take an emphasis. The emphasis area courses are:

Software Design

- SWE 626 - Software Project Laboratory Credits: 3
- SWE 632 - User Interface Design and Development Credits: 3
- SWE 681 - Secure Software Design and Programming Credits: 3
- SWE 721 - Reusable Software Architectures Credits: 3
- SWE 722 - Service Oriented Architecture Credits: 3
- SWE 727 - Quality of Service for Software Architectures Credits: 3

Secure Software Engineering

- ISA 562 - Information Security Theory and Practice Credits: 3
- SWE 642 - Software Engineering for the World Wide Web Credits: 3
- SWE 681 - Secure Software Design and Programming Credits: 3
- ISA 673 - Operating Systems Security Credits: 3

Software Management

- OR 540 - Management Science Credits: 3
- SWE 620 - Software Requirements Analysis and Specification Credits: 3
- SWE 625 - Software Project Management Credits: 3
- SWE 626 - Software Project Laboratory Credits: 3
- ISA 650 - Security Policy Credits: 3

Web Applications Design and Development

- INFS 614 - Database Management Credits: 3 or CS 550 - Database Systems Credits: 3
(Note: Credit will not be given for both INFS 614 and CS 550)

- SWE 632 - User Interface Design and Development Credits: 3
- SWE 642 - Software Engineering for the World Wide Web Credits: 3
- SWE 645 - Component-Based Software Development Credits: 3
- SWE 722 - Service Oriented Architecture Credits: 3

Elective Courses (9 credits)

Students may select the remaining courses from the list of approved elective courses, including other emphasis areas and courses from other MS programs in the department and the Volgenau School. Students may choose other graduate electives with the consent of their faculty advisor and the graduate coordinator.

Students, with the consent of a faculty sponsor and faculty advisor, may also elect courses in individualized study, special topics, or a 6-credit thesis, which is primarily intended for students planning to pursue a PhD in Information Technology with a concentration in Software Engineering. The course designations are:

- SWE 699 - Special Topics in Software Engineering Credits: 3
- SWE 795 - Advanced Topics in Software Engineering Credits: 3
- SWE 796 - Directed Readings in Software Engineering Credits: 3
- SWE 798 - Research Project Credits: 3
- SWE 799 - Thesis Credits: 1-6

Approved Electives

Below is the list of approved electives organized by academic program. Students should note that a maximum of two 500-level courses are allowed as electives. Courses not on this list may only be taken with explicit signed permission from the MS-SWE advisor.

Information Systems (INFS)

- INFS 612 - Principles and Practices of Communication Networks Credits: 3
- INFS 614 - Database Management Credits: 3
- INFS 623 - Web Search Engines and Recommender Systems Credits: 3
- INFS 640 - Introduction to Electronic Commerce Credits: 3
- INFS 697 - Topics in Information Systems Credits: 1-6
- INFS 740 - Database Programming for the World Wide Web Credits: 3
- INFS 755 - Data Mining Credits: 3
- INFS 760 - Advanced Database Management Credits: 3
- INFS 770 - Knowledge Management for E-Business Credits: 3
- INFS 772 - Intelligent Agents and the Semantic Web Credits: 3
- INFS 774 - Enterprise Architecture Credits: 3
- INFS 797 - Advanced Topics in Information Systems Credits: 1-6

Information Security and Assurance (ISA)

- ISA 562 - Information Security Theory and Practice Credits: 3
- ISA 563 - Fundamentals of Systems Programming Credits: 3
• ISA 564 - Security Laboratory Credits: 3
• ISA 650 - Security Policy Credits: 3
• ISA 652 - Security Audit and Compliance Testing Credits: 3
• ISA 656 - Network Security Credits: 3
• ISA 673 - Operating Systems Security Credits: 3
• ISA 681 - Secure Software Design Credits: 3
• ISA 697 - Topics in Information Security Credits: 1-6
• ISA 763 - Security Protocol Analysis Credits: 3
• ISA 764 - Security Experimentation Credits: 3
• ISA 785 - Research in Digital Forensics Credits: 3
• ISA 797 - Advanced Topics in Information Security Credits: 3

Software Engineering (SWE)

• SWE 620 - Software Requirements Analysis and Specification Credits: 3
• SWE 625 - Software Project Management Credits: 3
• SWE 626 - Software Project Laboratory Credits: 3
• SWE 631 - Software Design Patterns Credits: 3
• SWE 632 - User Interface Design and Development Credits: 3
• SWE 641 - Systems Architecture for Large-Scale Systems Credits: 3
• SWE 642 - Software Engineering for the World Wide Web Credits: 3
• SWE 645 - Component-Based Software Development Credits: 3
• SWE 681 - Secure Software Design and Programming Credits: 3
• SWE 699 - Special Topics in Software Engineering Credits: 3
• SWE 720 - Advanced Software Requirements Credits: 3
• SWE 721 - Reusable Software Architectures Credits: 3
• SWE 727 - Quality of Service for Software Architectures Credits: 3
• SWE 760 - Software Analysis and Design of Real-Time Systems Credits: 3
• SWE 763 - Software Engineering Experimentation Credits: 3
• SWE 795 - Advanced Topics in Software Engineering Credits: 3
• SWE 796 - Directed Readings in Software Engineering Credits: 3
• SWE 798 - Research Project Credits: 3
• SWE 799 - Thesis Credits: 1-6

Computer Science (CS)

• CS 540 - Language Processors Credits: 3
• CS 550 - Database Systems Credits: 3
• CS 555 - Computer Communications and Networking Credits: 3
• CS 571 - Operating Systems Credits: 3
• CS 580 - Introduction to Artificial Intelligence Credits: 3
• CS 583 - Analysis of Algorithms Credits: 3
• CS 611 - Computational Methods for Genomics Credits: 3
• CS 630 - Advanced Algorithms Credits: 3
• CS 635 - Foundations of Parallel Computation Credits: 3
• CS 640 - Advanced Compilers Credits: 3
• CS 650 - Advanced Database Management Credits: 3
• CS 662 - Computer Graphics Game Technologies Credits: 3
• CS 671 - Advanced Operating Systems Credits: 3
• CS 672 - Computer System Performance Evaluation Credits: 3
• CS 673 - Multimedia Computing and Systems Credits: 3
• CS 680 - Natural Language Processing Credits: 3
• CS 681 - Designing Expert Systems Credits: 3
• CS 682 - Computer Vision Credits: 3
• CS 683 - Parallel Algorithms Credits: 3
• CS 684 - Graph Algorithms Credits: 3
• CS 685 - Autonomous Robotics Credits: 3
• CS 686 - Image Processing and Applications Credits: 3
• CS 687 - Advanced Artificial Intelligence Credits: 3
• CS 688 - Pattern Recognition Credits: 3
• CS 689 - Planning Motions of Robots and Molecules Credits: 3
• CS 700 - Quantitative Methods and Experimental Design in Computer Science Credits: 3
• CS 706 - Concurrent Software Systems Credits: 3
• CS 735 - Concurrency Credits: 3
• CS 752 - Interactive Graphics Software Credits: 3
• CS 755 - Advanced Computer Networks Credits: 3
• CS 756 - Performance Analysis of Computer Networks Credits: 3
• CS 757 - Mining Massive Datasets Credits: 3
• CS 773 - Real-Time Systems Design and Development Credits: 3
• CS 777 - Human-Computer Intelligent Interaction Credits: 3
• CS 779 - Topics in Resilient and Secure Computer Systems Credits: 3
• CS 780 - Data Mining on Multimedia Data Credits: 3
• CS 782 - Machine Learning Credits: 3
• CS 785 - Knowledge Acquisition and Problem Solving Credits: 3
• CS 787 - Decision Guidance Systems Credits: 3
• CS 795 - Advanced Topics in CS Credits: 3

Electrical and Computer Engineering (ECE)

• ECE 511 - Microprocessors Credits: 3
• ECE 521 - Modern Systems Theory Credits: 3
• ECE 528 - Introduction to Random Processes in Electrical and Computer Engineering Credits: 3
• ECE 535 - Digital Signal Processing Credits: 3
• ECE 537 - Introduction to Digital Image Processing (DIP) Credits: 3
• ECE 542 - Computer Network Architectures and Protocols Credits: 3
• ECE 545 - Digital System Design with VHDL Credits: 3
• ECE 548 - Sequential Machine Theory Credits: 3
• ECE 549 - Theory and Applications of Artificial Neural Networks Credits: 3
• ECE 584 - Semiconductor Device Fundamentals Credits: 3
• ECE 586 - Digital Integrated Circuits Credits: 3
• ECE 611 - Advanced Microprocessors Credits: 3
• ECE 612 - Real-Time Embedded Systems Credits: 3
• ECE 620 - Optimal Control Theory Credits: 3
• ECE 621 - Systems Identification Credits: 3
- ECE 624 - Control Systems Credits: 3
- ECE 630 - Statistical Communication Theory Credits: 3
- ECE 633 - Coding Theory Credits: 3
- ECE 635 - Adaptive Signal Processing Credits: 3
- ECE 638 - Fast Algorithms and Architectures for Digital Signal Processing Credits: 3
- ECE 641 - Computer System Architecture Credits: 3
- ECE 642 - Design and Analysis of Computer Communication Networks Credits: 3
- ECE 643 - Network Switching and Routing Credits: 3
- ECE 644 - Architectures and Algorithms for Image Processing Credits: 3
- ECE 645 - Computer Arithmetic Credits: 3
- ECE 646 - Cryptography and Computer Network Security Credits: 3
- ECE 650 - Robotics Credits: 3
- ECE 680 - Physical VLSI Design Credits: 3
- ECE 681 - VLSI Design for ASICs Credits: 3
- ECE 732 - Mobile Communication Systems Credits: 3
- ECE 741 - Wireless Networks Credits: 3
- ECE 744 - Computer Vision and Expert Systems Credits: 3
- ECE 746 - Advanced Applied Cryptography Credits: 3
- ECE 749 - Neural Networks for Control Credits: 3

Operations Research (OR)

- OR 540 - Management Science Credits: 3
- OR 541 - Operations Research: Deterministic Models Credits: 3
- OR 542 - Operations Research: Stochastic Models Credits: 3
- OR 635 - Discrete System Simulation Credits: 3
- OR 640 - Global Optimization and Computational Intelligence Credits: 3
- OR 641 - Linear Programming Credits: 3
- OR 642 - Integer Programming Credits: 3
- OR 643 - Network Modeling Credits: 3
- OR 644 - Nonlinear Programming Credits: 3
- OR 645 - Stochastic Processes Credits: 3
- OR 647 - Queuing Theory Credits: 3
- OR 681 - Decision and Risk Analysis Credits: 3
- OR 690 - Optimization of Supply Chains Credits: 3

Psychology (PSYC)

- PSYC 734 - Seminar in Human Factors and Applied Cognition Credits: 3
- PSYC 737 - Psychology of Human-Technology Interaction Credits: 3

Statistics (STAT)

- STAT 544 - Applied Probability Credits: 3
- STAT 554 - Applied Statistics Credits: 3
- STAT 652 - Statistical Inference Credits: 3
- STAT 655 - Analysis of Variance Credits: 3
- STAT 656 - Regression Analysis Credits: 3
- STAT 662 - Multivariate Statistical Methods Credits: 3
- STAT 663 - Statistical Graphics and Data Exploration I Credits: 3
- STAT 664 - Bayesian Inference and Decision Theory Credits: 3
- STAT 674 - Survey Sampling II Credits: 3

Systems Engineering (SYST)

- SYST 520 - System Engineering Design Credits: 3
- SYST 530 - System Management and Evaluation Credits: 3
- SYST 542 - Decision Support Systems Engineering Credits: 3
- SYST 560 - Introduction to Air Traffic Control Credits: 3
- SYST 573 - Decision and Risk Analysis Credits: 3
- SYST 611 - System Methodology and Modeling Credits: 3
- SYST 620 - Discrete Event Systems Credits: 3
- SYST 659 - Topics in Systems Engineering Credits: 3
- SYST 660 - Air Transportation Systems Modeling Credits: 3
- SYST 671 - Judgment and Choice Processing and Decision Making Credits: 3
- SYST 680 - Principles of Command, Control, Communications, Computing, and Intelligence (C4I) Credits: 3
- SYST 683 - Modeling, Simulation, and Gaming Credits: 3
- SYST 684 - Sensor Data Fusion Credits: 3
- SYST 760 - Special Topics in Command, Control, Communications, Computing, and Intelligence Systems Engineering Credits: 3

Total: 30 credits

Non-Degree

Computer Science Minor

Banner Code: CS

School: Volgenau School of Engineering

Department: Computer Science

The minor in computer science requires completion of at least 17 credits. Students should pay careful attention to prerequisites when selecting courses.

For policies governing all minors, see the Academic Policies section of this catalog.

Course Work

Required Courses (10 credits)

- CS 112 - Introduction to Computer Programming Credits: 4
- CS 211 - Object-Oriented Programming Credits: 3
- CS 310 - Data Structures Credits: 3

One of the following (1-3 credits)

- CS 105 - Computer Ethics and Society Credits: 1
- CS 306 - Synthesis of Ethics and Law for the Computing Professional Credits: 3

Two additional computer science courses (6 credits) chosen from:

- CS 321 - Software Requirements and Design Modeling Credits: 3
- CS 325 - Introduction to Game Design Credits: 3
- CS 330 - Formal Methods and Models Credits: 3
- CS 332 - Object-Oriented Software Design and Implementation Credits: 3
- CS 367 - Computer Systems and Programming Credits: 3
- CS 450 - Database Concepts Credits: 3
- CS 451 - Computer Graphics Credits: 3
- CS 455 - Computer Communications and Networking Credits: 3
- CS 463 - Comparative Programming Languages Credits: 3
- CS 465 - Computer Systems Architecture Credits: 3
- CS 468 - Secure Programming and Systems Credits: 3
- CS 471 - Operating Systems Credits: 3
- CS 480 - Introduction to Artificial Intelligence Credits: 3
- CS 483 - Analysis of Algorithms Credits: 3
- CS 484 - Data Mining Credits: 3

Total: 17-19 credits

Software Engineering Minor

Banner Code: SWE

School: Volgenau School of Engineering

Department: Computer Science

For policies governing all minors, see the Academic Policies section of this catalog.

Course Work

Candidates for the minor in software engineering must complete 16 credits in software engineering with a minimum GPA of 2.00, 8 credits of which must be unique to the minor and not used for the major.

Students take:

- CS 112 - Introduction to Computer Programming Credits: 4
One of the following:

- CS 211 - Object-Oriented Programming Credits: 3
- CS 222 - Computer Programming for Engineers Credits: 3

And three from:

- SWE 205 - Software Usability Analysis and Design Credits: 3
- CS 321 - Software Requirements and Design Modeling Credits: 3
- CS 332 - Object-Oriented Software Design and Implementation Credits: 3
- SWE 432 - Design and Implementation of Software for the Web Credits: 3
- SWE 437 - Software Testing and Maintenance Credits: 3
- SWE 443 - Software Architectures Credits: 3

Total: 16 credits

**Undergraduate Certificate**

**Computer Science Undergraduate Certificate**

*Banner Code: VS-CERB-CS*

*School: Volgenau School of Engineering*

*Department: Computer Science*

This certificate targets students who are working on or possess an undergraduate degree in a technical (science or engineering) field but lack a formal credential in the computer science field. The certificate also targets students who have shown an aptitude for graduate study but do not have the academic prerequisites required for admittance into a graduate MS computer science program.

The undergraduate certificate in computer science may be pursued on a full-time basis except when limited by prerequisite constraints.

**Admissions Requirements**

Students must have programming experience at the level of CS 112, 211, and 262 and either a BS in a technical field with a 3.00 GPA or higher, or current enrollment in a technical undergraduate major.

**Certificate Requirements**

**Basic Computer Science (15 credits)**

- CS 310 - Data Structures Credits: 3
- CS 330 - Formal Methods and Models Credits: 3
- CS 367 - Computer Systems and Programming Credits: 3
- CS 465 - Computer Systems Architecture Credits: 3
• ECE 301 - Digital Electronics Credits: 3

Mathematics (3 credits)

• MATH 125 - Discrete Mathematics I Credits: 3

Completion of one of the following options (9 credits):

Option 1:

• CS 483 - Analysis of Algorithms Credits: 3

AND two of the following:

• CS 321 - Software Requirements and Design Modeling Credits: 3
• CS 440 - Language Processors and Programming Environments Credits: 3
• CS 450 - Database Concepts Credits: 3
• CS 451 - Computer Graphics Credits: 3
• CS 455 - Computer Communications and Networking Credits: 3
• CS 468 - Secure Programming and Systems Credits: 3
• CS 471 - Operating Systems Credits: 3
• CS 480 - Introduction to Artificial Intelligence Credits: 3
• CS 484 - Data Mining Credits: 3

Option 2:

• CS 583 - Analysis of Algorithms Credits: 3

AND two of the following:

• CS 540 - Language Processors Credits: 3
• CS 571 - Operating Systems Credits: 3
• CS 580 - Introduction to Artificial Intelligence Credits: 3

Total: 27 Credits

■ Electrical and Computer Engineering

Phone: 703-993-1569
Web: ece.gmu.edu

School: Volgenau School of Engineering

Faculty
Professors: Allnutt, Cook, Ephraim, Gertler, Griffiths, Ioannou, Jabbari, Levis, Manitius (chair), Mark, Mulpuri, Pancrazio

Associate professors: Berry, Chang, Gaj, Hintz, Kaps, Kurtay, Li, Nelson, Osgood, Pachowicz, Paris, Peixoto, Wage

Assistant professors: Homayoun, Ikonomidou, Lorie, Pandula, Sikdar

Research professors: Elder, Katona

Adjunct professors: Abgariah, Allen, Alper, Amos, Beatty, Bollino, Durie, Follendore, Fowler, Gong, Gross, Hall, Hassan, Herman, Hibey, Hockensmith, Hrnjez, Joseph, Lazarevich, Leaf, Maiden, McCaughey, Orebaugh, Pollak, Sabzevari, Sheppard, Storey, Sud, Tham, Tran, Van Meter, West, Williams, Wilson, Wu, Young

Emeritus faculty: Baraniecki, Beale, Black, Ceperley, Schaefer, Sutton, Tabak, Van Trees

Undergraduate Programs

The undergraduate education mission of the ECE Department is to provide a quality education for electrical engineering and computer engineering students to support the needs of Virginia and the nation.

Program Educational Objectives for the BS EE and BS CpE programs

Graduates of the Electrical Engineering and the Computer Engineering programs are expected within three to five years of graduation to have:

- Established themselves as successful and productive engineering professionals or engaged in advanced study such as a graduate degree program.
- Worked effectively in team environments and individually.
- Fulfilled their responsibilities in the areas of ethics, continuing professional development and effective communications.

Graduate Programs

Graduate programs leading to MS and PhD degrees prepare students for careers in industry, government, and academia. Graduate certificate programs provide well-defined targets for students who want to advance or update their knowledge in selected areas. The ECE Department offers the PhD in Electrical and Computer Engineering and master's degrees in computer engineering, electrical engineering, telecommunications, and computer forensics, and certificates in communications, networking, and signal processing.

The ECE Department is committed to high standards of teaching and research excellence in communications, digital systems design, computer networks, microprocessor and embedded systems, distributed computing, signal and image processing, control systems, intelligent systems, systems integration and microelectronics. Graduate students are offered a progressive environment with ample opportunities for the type of advanced research needed to confront the complex realities of the 21st century.

Courses in the department's graduate programs are offered during the evening or late afternoon hours to accommodate students who are employed full time. For those who enter the programs on a full-time basis, some financial aid may be available in various forms, such as teaching assistantships, research assistantships, and work-study and co-op agreements with local industry.

Course Work

The Electrical and Computer Engineering (ECE) Department offers all courses designated ECE, CFRS and TCOM in the Courses section of this catalog. The department also offers some ENGR courses.
Bachelor of Science

Computer Engineering, BS

Banner Code: VS-BS-CPE

School: Volgenau School of Engineering

Department: Electrical and Computer Engineering

The field of computer engineering can be described as a blend of electrical engineering and computer science. It is an amalgam of the computer hardware orientation of an electrical engineering program and the operating systems and languages of a computer science program. Computer engineers are involved in research, development, design, production, and operation of a wide variety of digital systems, from integrated circuits to computer systems and large-scale computer networks. Reflecting the industry trend to integrate hardware and software development, the computer engineering program is built around software running on advanced hardware that can simulate and assist in the design of new digital systems. Advanced software, such as VHDL, and software tools, such as logic and system design tools by Mentor Graphics and Cadence Design Systems, can be used to model hardware and hardware functionality from the system and architecture level down to the gate level and include relations to integrated circuit fabrication technology. Design and testing methodology involving these tools is taught in the program.

Career opportunities exist in engineering research and development, product design, digital system design and integration, engineering management, engineering consultancy, technical sales, and patent law, among others. The program provides a strong preparation for graduate study.

The bachelor’s program in computer engineering at Mason is accredited by the Engineering Accreditation Commission of ABET, http://www.abet.org. The computer engineering program is staffed by 27 full-time professors, including eight fellows of IEEE or other professional societies, and of several part-time professors.

The curriculum provides a strong background in the fundamentals of computer engineering. A number of technical elective specializations are offered, ranging from strongly hardware-oriented to strongly software-oriented ones. These include Computer Networks, Signal Processing, Integrated Circuits, and Robotics and Embedded Systems. The curriculum includes 9 credits of senior technical electives, and 3 credits of senior advanced design project, which may be used for specialization in one of these technical areas.

The requirements for the degree may be satisfied on a part-time or co-op basis. Cooperative education provides students the opportunity to integrate paid career-related work experience with classroom learning. Academic credit cannot be given for co-op experience. In addition to the usual financial aid available to all students through the Office of Student Financial Aid, computer engineering majors are eligible to apply through the ECE Department for several scholarships provided by professional societies and industrial organizations, including the Armed Forces Communications and Electronics Association and the Institute of Electrical and Electronics Engineers.

This undergraduate program offers students the option of applying to the accelerated master's degree program. See Computer Engineering, BS/Computer Engineering, Accelerated MS for specific requirements.

Degree Requirements

All computer engineering students are strongly encouraged to see their major faculty advisor each semester before course registration. Students interested in computer engineering who have not declared a major are also invited to obtain advising at the ECE Department office. Students are strongly encouraged to follow the sample schedule below to ensure that course prerequisites are satisfied.

Students must complete each ECE, ENGR, BENG, and CS course presented as part of the required 120 credits for the degree with a grade of C or better.
Furthermore, students must also complete any course required by the program that is a prerequisite to another course applicable to the degree with a grade of C or better.

The 120 credits required for the BS in computer engineering are the University General Education requirements and all of the following:

**Electrical and Computer Engineering Credits: 46**

- ECE 201 - Introduction to Signal Analysis Credits: 3
- ECE 220 - Signals and Systems I Credits: 3
- ECE 280 - Electric Circuit Analysis Credits: 5 *
- ECE 331 - Digital System Design Credits: 3
- ECE 332 - Digital Electronics and Logic Design Lab Credits: 1
- ECE 333 - Linear Electronics I Credits: 3
- ECE 334 - Linear Electronics Lab I Credits: 1
- ECE 445 - Computer Organization Credits: 3
- ECE 447 - Single-Chip Microcomputers Credits: 4
- ECE 448 - FPGA and ASIC Design with VHDL Credits: 4
- ECE 465 - Computer Networking Protocols Credits: 3
- ECE 491 - Engineering Seminar Credits: 1
- ECE 492 - Senior Advanced Design Project I Credits: 1 **
- ECE 493 - Senior Advanced Design Project II Credits: 2
- Technical Electives Credits: 9 (To be selected from the department's list of pre-approved technical elective specializations. Students are also encouraged to propose additional technical elective specializations to the ECE Department for approval.)

**Notes:**

*Computer engineering students with catalog years of 2013-2014 are encouraged to enroll in the 6-credit newly revived ECE 285/ECE 286 sequence of courses rather than the 5-credit ECE 280 course, although the latter would still be acceptable for the degree. Note that ECE 285/ECE 286 courses taken at GMU (or transferred to GMU) prior to fall 2013 do NOT meet the circuits analysis requirement. These students would need to either enroll in ECE 280 or take the new ECE 285/ECE 286 sequence that has been revived by the ECE Department starting fall 2013. Students choosing to take the two course sequence may exceed the 120 credits required for a bachelor's degree.

**Students who would like to complete a more challenging senior design project have the option of enrolling in ECE 392 to gain a semester head start in the design process.**

**Computer Science Credits: 14**

- CS 112 - Introduction to Computer Programming Credits: 4
- CS 211 - Object-Oriented Programming Credits: 3
- CS 262 - Introduction to Low-Level Programming Credits: 1
- CS 367 - Computer Systems and Programming Credits: 3
- CS 471 - Operating Systems Credits: 3

**Mathematics and Statistics Credits: 23**
- MATH 113 - Analytic Geometry and Calculus I Credits: 4
- MATH 114 - Analytic Geometry and Calculus II Credits: 4
- MATH 125 - Discrete Mathematics I Credits: 3
- MATH 203 - Linear Algebra Credits: 3
- MATH 213 - Analytic Geometry and Calculus III Credits: 3
- MATH 214 - Elementary Differential Equations Credits: 3
- STAT 346 - Probability for Engineers Credits: 3

Physics Credits: 11

- PHYS 160 - University Physics I Credits: 3
- PHYS 161 - University Physics I Laboratory Credits: 1
- PHYS 260 - University Physics II Credits: 3
- PHYS 261 - University Physics II Laboratory Credits: 1
- PHYS 262 - University Physics III Credits: 3

Engineering Credits: 2

- ENGR 107 - Introduction to Engineering Credits: 2

English, Communication, and Economics Credits: 9

- ENGH 302 - Advanced Composition Credits: 3 (Natural Sciences and Technology section)
- COMM 100 - Public Speaking Credits: 3
- ECON 103 - Contemporary Microeconomic Principles Credits: 3

Additional University General Education Credits: 15

Students must complete all University General Education requirements not fulfilled by major requirements. General Education courses should be selected from the department's list of approved courses. The Synthesis general education requirement is satisfied by ECE 492 plus ECE 493.

- Written Communication (lower): 3 credits
- Literature: 3 credits
- Arts: 3 credits
- Western Civilization/World History: 3 credits
- Global Understanding: 3 credits

Note:

All students must submit at least 24 credits of social science and humanities course work, which is normally satisfied by the 24 credits of university general education social science and humanities courses listed above.

Total: 120 credits

Sample Schedule
The following presents a sample schedule that undergraduate computer engineering majors would pursue to obtain a bachelor’s degree.

First Semester Credits: 16

- CS 112 - Introduction to Computer Programming Credits: 4
- ECON 103 - Contemporary Microeconomic Principles Credits: 3
- ENGH 101 - Composition Credits: 3
- ENGR 107 - Introduction to Engineering Credits: 2
- MATH 113 - Analytic Geometry and Calculus I Credits: 4

Second Semester Credits: 14

- CS 211 - Object-Oriented Programming Credits: 3
- MATH 114 - Analytic Geometry and Calculus II Credits: 4
- MATH 125 - Discrete Mathematics I Credits: 3
- PHYS 160 - University Physics I Credits: 3
- PHYS 161 - University Physics I Laboratory Credits: 1

Third Semester Credits: 16

- Literature course Credits: 3
- ECE 201 - Introduction to Signal Analysis Credits: 3
- MATH 203 - Linear Algebra Credits: 3
- MATH 213 - Analytic Geometry and Calculus III Credits: 3
- PHYS 260 - University Physics II Credits: 3
- PHYS 261 - University Physics II Laboratory Credits: 1

Fourth Semester Credits: 16

- ECE 220 - Signals and Systems I Credits: 3
- ECE 280 - Electric Circuit Analysis Credits: 5 *
- ECE 331 - Digital System Design Credits: 3
- ECE 332 - Digital Electronics and Logic Design Lab Credits: 1
- MATH 214 - Elementary Differential Equations Credits: 3
- CS 262 - Introduction to Low-Level Programming Credits: 1

Fifth Semester Credits: 16

- ECE 333 - Linear Electronics I Credits: 3
- ECE 334 - Linear Electronics Lab I Credits: 1
- ECE 445 - Computer Organization Credits: 3
- ENGH 302 - Advanced Composition Credits: 3 (Natural Sciences and Technology section)
- STAT 346 - Probability for Engineers Credits: 3
- CS 367 - Computer Systems and Programming Credits: 3
Sixth Semester Credits: 13

- COMM 100 - Public Speaking Credits: 3
- CS 471 - Operating Systems Credits: 3
- PHYS 262 - University Physics III Credits: 3
- ECE 448 - FPGA and ASIC Design with VHDL Credits: 4

Seventh Semester Credits: 15

- Technical elective Credits: 3
- Global understanding course Credits: 3
- ECE 447 - Single-Chip Microcomputers Credits: 4
- ECE 491 - Engineering Seminar Credits: 1
- ECE 492 - Senior Advanced Design Project I Credits: 1 **
- HIST 100 - History of Western Civilization Credits: 3 OR HIST 125 - Introduction to World History Credits: 3

Eighth Semester Credits: 14

- Technical elective Credits: 3
- Technical elective Credits: 3
- Arts course Credits: 3
- ECE 493 - Senior Advanced Design Project II Credits: 2
- ECE 465 - Computer Networking Protocols Credits: 3

*Note:

*Computer engineering students with catalog years of 2013-2014 are encouraged to enroll in the 6-credit newly revived ECE 285/ECE 286 sequence of courses rather than the 5-credit ECE 280 course, although ECE 280 would still be acceptable for the degree. Students should consult the undergraduate program guide on the ECE website for an alternative sample schedule with the revived ECE 285/ECE 286 sequence of courses. Note that ECE 285/ECE 286 courses taken at GMU (or transferred to GMU) prior to fall 2013 do not meet the circuit analysis requirement. These students would need to enroll in ECE 280 or take the new ECE 286/ECE 286 sequence that has been revived starting fall 2013. Students choosing to take the ECE 285/ECE 286 sequence in place of ECE 280 may exceed the 120 credits required for a bachelor's degree.

**Students who would like to complete a more challenging senior design project have the option of enrolling in ECE 392 to gain a semester head start in the design process.

Change of Major

Students who want to change their majors to computer engineering must have at least a 2.75 GPA in all math, physics, engineering, and computer science courses, and should have successfully completed MATH 114.

Writing-Intensive Requirement

Mason’s writing-intensive requirement is satisfied by the following group of three courses: ECE 333, ECE 445 and ECE 491 in which faculty provide feedback on student writing assignments. Drafts and revisions are required.
Termination from the Major

No math, science or Volgenau School of Engineering course, required for the major, may be attempted more than three times. Those students who do not successfully complete such a course within three attempts will be terminated from the major. For more information, see the “Termination from the Major” section under Academic Standing.

Double Major and Minor Programs for Computer Engineering and Electrical Engineering

Computer engineering majors and electrical engineering majors can earn degrees with double majors in a number of disciplines. Computer engineering and computer science are frequently combined. Electrical engineering has been combined with computer engineering, computer science, physics or math. Details are available in the department brochures or at the Volgenau School web site volgenau.gmu.edu. There are several minors available for students in the ECE Department including the new Mechanical Engineering minor.

Electrical Engineering, BS

Banner Code: VS-BS-ELEN

School: Volgenau School of Engineering

Department: Electrical and Computer Engineering

Electrical engineering is a major field of modern technology. Electrical engineers are involved in research, development, design, production, and operation of a wide variety of devices and systems, including integrated circuits and microwave and laser devices, communication systems, control systems, radar, robots, large telecommunication networks, and power networks.

The bachelor’s program in electrical engineering at Mason is accredited by the Engineering Accreditation Commission of ABET, http://www.abet.org. The electrical engineering program is staffed by ECE faculty composed of 27 full-time professors, including eight fellows of IEEE or other professional societies, and several part-time professors.

The curriculum provides a strong background in the fundamentals of electrical engineering and senior-level courses in the important areas of electronics, networks, communications and signal processing, computer engineering, and controls and robotics. Further, the curriculum includes 9 credits of senior technical electives, 2 credits of advanced engineering labs, and 3 credits of senior advanced design project, which may be used for further specialization in one of these areas.

Career opportunities exist in engineering research and development, system design, system integration, engineering management, engineering consultancy, technical sales, and patent law, among others. The program provides a strong preparation for graduate study.

Degree requirements may be satisfied on a part-time or co-op basis. Cooperative education provides students with the opportunity to integrate paid career-related work experience with classroom learning. Academic credit is not given for co-op experience. In addition to the usual financial aid available to all students through the Office of Student Financial Aid, electrical engineering majors are eligible to apply at the ECE Department for several scholarships provided by professional societies and industrial organizations, including the Armed Forces Communications and Electronics Association and the Institute of Electrical and Electronics Engineers.

This undergraduate program offers students the option of applying for the accelerated master's degree program in electrical engineering or telecommunications. See each listing for specific requirements.

Degree Requirements
All electrical engineering students are strongly encouraged to see their major faculty advisor before course registration each semester. Students interested in electrical engineering who have not declared a major are also invited to obtain advising from the ECE Department. Students are strongly encouraged to follow the sample schedule below to ensure that course prerequisites are satisfied.

Students must complete each ECE, ENGR, BENG and CS course presented as part of the required 120 credits for the degree with a grade of C or better.

Furthermore, students must also complete any course required by the program that is a prerequisite to another course applicable to the degree with a grade of C or better.

For the BS Electrical Engineering degree, students must complete 120 credits, including all of the following:

**Electrical and Computer Engineering Credits: 55**

- ECE 101 - Information Technology for Electrical Engineers Credits: 3
- ECE 201 - Introduction to Signal Analysis Credits: 3
- ECE 220 - Signals and Systems I Credits: 3
- ECE 280 - Electric Circuit Analysis Credits: 5 *
- ECE 305 - Electromagnetic Theory Credits: 3
- ECE 320 - Signals and Systems II Credits: 3
- ECE 331 - Digital System Design Credits: 3
- ECE 332 - Digital Electronics and Logic Design Lab Credits: 1
- ECE 333 - Linear Electronics I Credits: 3
- ECE 334 - Linear Electronics Lab I Credits: 1
- ECE 421 - Classical Systems and Control Theory Credits: 3
- ECE 433 - Linear Electronics II Credits: 3
- ECE 445 - Computer Organization Credits: 3
- ECE 460 - Communication and Information Theory Credits: 3
- ECE 491 - Engineering Seminar Credits: 1
- ECE 492 - Senior Advanced Design Project I Credits: 1 **
- ECE 493 - Senior Advanced Design Project II Credits: 2
- Advanced Engineering Labs Credits: 2
- Technical Electives Credits: 9  (To be selected from the department's list of approved technical elective courses.)

**Notes:**

*Electrical Engineering students with catalog years of 2013-2014 are encouraged to enroll in the 6-credit newly revived ECE 285/ECE 286 sequence of courses rather than the 5-credit ECE 280 course, although the latter would still be acceptable for the degree. Note that ECE 285/ECE 286 courses taken at GMU (or transferred to GMU) prior to Fall 2013 do NOT meet the circuit analysis requirement. These students would need to either enroll in ECE 280 or take the new ECE 285/ECE 286 sequence that has been revived by the ECE Department fall 2013. Students choosing to take the two course sequence may exceed the 120 credits required for a bachelor's degree.

**Students who would like to complete a more challenging senior design project have the option of enrolling in ECE 392 to gain a semester head start in the design process.

**Computer Science Credits: 7**

- CS 112 - Introduction to Computer Programming Credits: 4
• CS 222 - Computer Programming for Engineers Credits: 3

Mathematics and Statistics Credits: 20

• MATH 113 - Analytic Geometry and Calculus I Credits: 4
• MATH 114 - Analytic Geometry and Calculus II Credits: 4
• MATH 203 - Linear Algebra Credits: 3
• MATH 213 - Analytic Geometry and Calculus III Credits: 3
• MATH 214 - Elementary Differential Equations Credits: 3
• STAT 346 - Probability for Engineers Credits: 3

Physics Credits: 12

• PHYS 160 - University Physics I Credits: 3
• PHYS 161 - University Physics I Laboratory Credits: 1
• PHYS 260 - University Physics II Credits: 3
• PHYS 261 - University Physics II Laboratory Credits: 1
• PHYS 262 - University Physics III Credits: 3
• PHYS 263 - University Physics III Laboratory Credits: 1

Engineering Credits: 2

• ENGR 107 - Introduction to Engineering Credits: 2

English, Communication, and Economics Credits: 9

• ENGH 302 - Advanced Composition Credits: 3 (Natural Sciences and Technology section)
• COMM 100 - Public Speaking Credits: 3
• ECON 103 - Contemporary Microeconomic Principles Credits: 3

Additional University General Education (15 credits)

Students must complete all University General Education requirements not fulfilled by major requirements. General Education courses should be selected from the department's list of approved courses. The Synthesis general education requirement is satisfied by ECE 492 and ECE 493.

• Written Communication (lower): 3 credits
• Literature: 3 credits
• Arts: 3 credits
• Western Civilization/World History: 3 credits
• Global Understanding: 3 credits

Note:

All students must submit at least 24 credits of social science and humanities course work, which is normally satisfied by the 24 credits of university general education social science and humanities courses listed above.
Concentrations

Concentrations are available within the electrical engineering baccalaureate program. Completion of specific science courses and senior-level courses leads to one of these designations on the student’s transcript on graduation. Concentration requirements may also meet some or all of the Advanced Engineering Lab and Technical Elective requirements.

▲ Concentration in Bioengineering (BIOE)

Students must complete:

- BIOL 213 - Cell Structure and Function Credits: 4 (Technical Elective plus Advanced Engineering Lab)
- ECE 434 - Linear Electronics II Laboratory Credits: 1  OR  ECE 429 - Control Systems Lab  Credits: 1
- ECE 492 - Senior Advanced Design Project I Credits: 1
- ECE 493 - Senior Advanced Design Project II Credits: 2 (bioengineering topic only)

And two courses from:

- BENG 301 - Bioengineering Measurements Credits: 3  AND  BENG 302 - Bioengineering Measurements Lab Credits: 1
- BENG 304 - Modeling and Control of Physiological Systems Credits: 3
- BENG 525 - Neural Engineering Credits: 3
- BENG 499 - Special Topics in Bioengineering Credits: 0-4 (minimum 3 credits)
- BENG 538 - Medical Imaging Credits: 3
- BENG 590 - Selected Topics in Bioengineering Credits: 3
- BINF 401 - Bioinformatics and Computational Biology I Credits: 3
- BIOL 425 - Human Physiology Credits: 3
- ECE 499 - Special Topics in Electrical Engineering Credits: 0-4 (bioengineering topic only; minimum 3 credits)
- ECE 590 - Selected Topics in Engineering Credits: 3 (bioengineering topic only)

Note:

Students in the bioengineering concentration should make sure they will have at least 45 upper division credits by the time they graduate. Additional upper level coursework may be necessary if they fall short of this requirement.

▲ Concentration in Communications and Signal Processing (CSP)

Students must complete (with a grade of C or better):

- ECE 461 - Communication Engineering Laboratory Credits: 1
- ECE 492 - Senior Advanced Design Project I Credits: 1
- ECE 493 - Senior Advanced Design Project II Credits: 2 (communications and signal processing topic)

And three courses from:

- ECE 410 - Principles of Discrete-Time Signal Processing Credits: 3
- ECE 462 - Data and Computer Communications Credits: 3
- ECE 463 - Digital Communications Systems Credits: 3
• ECE 464 - Modern Filter Design Credits: 3
• ECE 465 - Computer Networking Protocols Credits: 3
• ECE 499 - Special Topics in Electrical Engineering Credits: 0-4 (communications and signal processing topic only - must be pre-approved by advisor; minimum 3 credits)
• ECE 528 - Introduction to Random Processes in Electrical and Computer Engineering Credits: 3
• ECE 535 - Digital Signal Processing Credits: 3
• ECE 567 - Optical Fiber Communications Credits: 3
• ECE 590 - Selected Topics in Engineering Credits: 3 (communication and signal processing topic only - must be pre-approved by advisor)
• PHYS 306 - Wave Motion and Electromagnetic Radiation Credits: 3

▲ Concentration in Computer Engineering (CPE)

Students must complete (with a grade of C or better):

• ECE 447 - Single-Chip Microcomputers Credits: 4
• ECE 492 - Senior Advanced Design Project I Credits: 1
• ECE 493 - Senior Advanced Design Project II Credits: 2 (computer engineering or digital design topic)

And two courses from:

• ECE 431 - Digital Circuit Design Credits: 3
• ECE 437 - Principles of Microelectronic Device Fabrication Credits: 3
• ECE 448 - FPGA and ASIC Design with VHDL Credits: 4
• ECE 450 - Introduction to Robotics Credits: 3
• ECE 499 - Special Topics in Electrical Engineering Credits: 0-4 (computer engineering topic only - must be pre-approved by advisor; minimum 3 credits)
• ECE 548 - Sequential Machine Theory Credits: 3
• ECE 590 - Selected Topics in Engineering Credits: 3 (computer engineering topic only - must be pre-approved by advisor)
• CS 471 - Operating Systems Credits: 3

▲ Concentration in Control Systems (CON)

Students must complete (with a grade of C or better):

• ECE 429 - Control Systems Lab Credits: 1
• ECE 492 - Senior Advanced Design Project I Credits: 1
• ECE 493 - Senior Advanced Design Project II Credits: 2 (control systems or robotics topic)

And three courses from:

• ECE 422 - Digital Control Systems Credits: 3
• ECE 447 - Single-Chip Microcomputers Credits: 4
• ECE 450 - Introduction to Robotics Credits: 3
• ECE 499 - Special Topics in Electrical Engineering Credits: 0-4 (control systems topic only - must be pre-approved by advisor; minimum 3 credits)
• ECE 511 - Microprocessors Credits: 3
• ECE 521 - Modern Systems Theory Credits: 3
• ECE 528 - Introduction to Random Processes in Electrical and Computer Engineering Credits: 3
• ECE 549 - Theory and Applications of Artificial Neural Networks Credits: 3
• ECE 590 - Selected Topics in Engineering Credits: 3 (control systems topic only - must be pre-approved by advisor)

▲ Concentration in Electronics (ELE)

Students must complete (with a grade of C or better):

• ECE 434 - Linear Electronics II Laboratory Credits: 1  OR  ECE 435 - Digital Circuit Design Laboratory Credits: 1
• ECE 492 - Senior Advanced Design Project I Credits: 1
• ECE 493 - Senior Advanced Design Project II Credits: 2 (analog or digital design or electromagnetism topic only)

And three courses from:

• ECE 430 - Principles of Semiconductor Devices Credits: 3
• ECE 431 - Digital Circuit Design Credits: 3
• ECE 437 - Principles of Microelectronic Device Fabrication Credits: 3
• ECE 447 - Single-Chip Microcomputers Credits: 4
• ECE 448 - FPGA and ASIC Design with VHDL Credits: 4
• ECE 499 - Special Topics in Electrical Engineering Credits: 0-4 (electronics topic only - must be pre-approved by advisor; minimum 3 credits)
• ECE 520 - Applications of Analog and Digital Integrated Circuits Credits: 3
• ECE 563 - Introduction to Microwave Engineering Credits: 3
• ECE 565 - Introduction to Optical Electronics Credits: 3
• ECE 567 - Optical Fiber Communications Credits: 3
• ECE 584 - Semiconductor Device Fundamentals Credits: 3
• ECE 586 - Digital Integrated Circuits Credits: 3
• ECE 587 - Design of Analog Integrated Circuits Credits: 3
• ECE 590 - Selected Topics in Engineering Credits: 3 (electronics topic only)
• PHYS 306 - Wave Motion and Electromagnetic Radiation Credits: 3
• PHYS 308 - Modern Physics with Applications Credits: 3

Total: 120 credits

Sample Schedule

The following is a sample schedule that an undergraduate electrical engineering major would follow to obtain a bachelor’s degree.

First Semester Credits: 16

• CS 112 - Introduction to Computer Programming Credits: 4
• ECON 103 - Contemporary Microeconomic Principles Credits: 3
• ENGR 107 - Introduction to Engineering Credits: 2
• ENGH 101 - Composition Credits: 3
• MATH 113 - Analytic Geometry and Calculus I Credits: 4

Second Semester Credits: 14

• CS 222 - Computer Programming for Engineers Credits: 3
• ECE 101 - Information Technology for Electrical Engineers Credits: 3
• MATH 114 - Analytic Geometry and Calculus II Credits: 4
• PHYS 160 - University Physics I Credits: 3
• PHYS 161 - University Physics I Laboratory Credits: 1

Third Semester Credits: 16

• Literature course Credits: 3
• ECE 201 - Introduction to Signal Analysis Credits: 3
• MATH 213 - Analytic Geometry and Calculus III Credits: 3
• MATH 203 - Linear Algebra Credits: 3
• PHYS 260 - University Physics II Credits: 3
• PHYS 261 - University Physics II Laboratory Credits: 1

Fourth Semester Credits 15

• ECE 280 - Electric Circuit Analysis Credits: 5 *
• ECE 220 - Signals and Systems I Credits: 3
• MATH 214 - Elementary Differential Equations Credits: 3
• PHYS 262 - University Physics III Credits: 3
• PHYS 263 - University Physics III Laboratory Credits: 1

Fifth Semester Credits: 17

• ECE 320 - Signals and Systems II Credits: 3
• ECE 331 - Digital System Design Credits: 3
• ECE 332 - Digital Electronics and Logic Design Lab Credits: 1
• ECE 333 - Linear Electronics I Credits: 3
• ECE 334 - Linear Electronics Lab I Credits: 1
• STAT 346 - Probability for Engineers Credits: 3
• ENGH 302 - Advanced Composition Credits: 3 (Natural Sciences and Technology section)

Sixth Semester Credits: 15

• COMM 100 - Public Speaking Credits: 3
• ECE 421 - Classical Systems and Control Theory Credits: 3
• ECE 433 - Linear Electronics II Credits: 3
• ECE 445 - Computer Organization Credits: 3
• ECE 460 - Communication and Information Theory Credits: 3
Seventh Semester Credits: 15

- Advanced engineering lab Credits: 1
- Technical elective Credits: 3
- Global understanding course Credits: 3
- Arts course Credits: 3
- ECE 305 - Electromagnetic Theory Credits: 3
- ECE 491 - Engineering Seminar Credits: 1
- ECE 492 - Senior Advanced Design Project I Credits: 1 **

Eighth Semester Credits: 12

- Advanced engineering lab Credits: 1
- Technical elective Credits: 3
- Technical elective Credits: 3
- ECE 493 - Senior Advanced Design Project II Credits: 2
- HIST 100 - History of Western Civilization Credits: 3 OR HIST 125 - Introduction to World History Credits: 3

Notes:

*Electrical engineering students with catalog years of 2013-2014 are encouraged to enroll in the 6-credit newly revived ECE 285/ECE 286 sequence of courses rather than the 5-credit ECE 280 course, although ECE 280 would still be acceptable for the degree. Students should consult the undergraduate program guide on the ECE website for an alternative sample schedule with the ECE 285/ECE 286 sequence of courses. Note that ECE 285/ECE 286 courses taken at GMU (or transferred to GMU) prior to fall 2013 do NOT meet the circuit analysis requirement. These students would need to enroll in ECE 280 or take the new ECE 285/ECE 286 sequence that has been revived starting Fall 2013. Students choosing to take the ECE 285/ECE 286 sequence in place of ECE 280 may exceed the 120 credits required for a bachelor's degree.

**Students who would like to complete a more challenging senior design project have the option of enrolling in ECE 392 to gain a semester head start in the design process.

Change of Major

Students who want to change their majors to electrical engineering must have at least a 2.75 GPA in all math, physics, engineering, and computer science courses, and should have successfully completed MATH 114.

Writing-Intensive Requirement

Mason’s writing-intensive requirement is satisfied by the following group of three courses: ECE 333, ECE 445 and ECE 491 in which faculty provide feedback on student writing assignments. Drafts and revisions are required.

Termination from the Major

No math, science or Volgenau School of Engineering course, required for the major, may be attempted more than three times. Those students who do not successfully complete such a course within three attempts will be terminated from the major. For more information, see the “Termination from the Major” section under Academic Standing.
Double Major and Minor Programs for Electrical Engineering and Computer Engineering

Electrical engineering majors and computer engineering majors can earn degrees with double majors in a number of disciplines. Computer engineering and computer science are frequently combined. Electrical engineering has been combined with computer engineering, computer science, physics or math. Details are available in the department brochures or at the Volgenau School web site volgenau.gmu.edu. There are several minors available for students in the ECE Department including the new Mechanical Engineering minor.

Bachelor of Science/Accelerated Master of Science

Computer Engineering, BS/Computer Engineering, Accelerated MS

School: Volgenau School of Engineering

Department: Electrical and Computer Engineering

This program is for highly capable students who are interested in immediately continuing their undergraduate academic program in computer engineering into a graduate program. It allows for the completion of both bachelor’s and master’s degrees in computer engineering in five years with 144 credits.

Admission Requirements

Students can apply for the program during the semester in which they expect to complete 90 undergraduate credits applicable toward the BS degree. An overall GPA of at least 3.50 at the time of application is required. Criteria for admission are identical to criteria for admission to the MS in Electrical Engineering Program or the MS in Computer Engineering Program. Application is made using the accelerated graduate program application forms, and all usual requirements must be met. The accelerated program application form specifies the overlapping courses and details the 3.50 undergraduate GPA.

Degree Requirements

Students must complete 144 credits that satisfy all the requirements for the BS and MS degrees, with 6 credits overlap. Students take 6 credits of 500-level courses as part of their technical electives or substitutes for required courses as part of their 120-credit undergraduate program. The specific courses that may be taken and applied to the accelerated program will be specified by the ECE Department. Students may take additional graduate-level courses as part of their BS technical electives with advisor approval. These additional graduate-level courses will not count toward the MS degree. Students admitted to the accelerated program must maintain an overall GPA of at least 3.50 during the entire BS/MS program and present a GPA of at least 3.50 for the 24 credits of graduate work submitted for the MS degree.

Degree Conferral

Students must apply to have the BS in Computer Engineering conferred the semester before they expect to complete the BS requirements. At the completion of the MS requirements, the MS degree will be awarded.

Electrical Engineering, BS/Electrical Engineering, Accelerated MS
This program is for highly capable students who are interested in immediately continuing their undergraduate academic program in electrical engineering into a graduate program. It allows for the completion of both bachelor’s and master’s degrees in electrical engineering in five years with 144 credits.

Admission Requirements

Students can apply for the program during the semester in which they expect to complete 90 undergraduate credits applicable toward the BS degree. An overall GPA of at least 3.50 at the time of application is required. Criteria for admission are identical to criteria for admission to the MS in Electrical Engineering Program or the MS in Computer Engineering Program. Application is made using the accelerated graduate program application forms, and all usual requirements must be met. Degree Conferral

Students must apply to have the BS in Electrical Engineering conferred the semester before they expect to complete the BS requirements. At the completion of the MS requirements, the MS degree will be awarded.

Electrical Engineering, BS/Telecommunications, Accelerated MS

This program is for highly capable students who are interested in immediately continuing their undergraduate academic program in electrical engineering into a graduate program. It allows for the completion of both bachelor’s and master’s degrees in electrical engineering in five years with 144 credits.

Admission Requirements

Students can apply for the program during the semester in which they expect to complete 90 undergraduate credits applicable toward the BS degree. An overall GPA of at least 3.1 at the time of application is required. Criteria for admission are identical to criteria for admission to the MS in Telecommunications Program. Application is made using the accelerated graduate program application forms, and all usual requirements must be met. The accelerated program application form specifies the overlapping courses and details the 3.1 undergraduate GPA.
Degree Requirements

Students must complete 144 credits that satisfy all the requirements for the BS and MS degrees, with 6 credits overlap. Students take 6 credits of 500-level courses as part of their technical electives or substitutes for required courses as part of their 120-credit undergraduate program. Students may take additional graduate-level courses as part of their BS technical electives with advisor approval. These additional graduate-level courses will not count toward the MS degree. Students admitted to the accelerated program must maintain an overall GPA of at least 3.0 during the MS program and present a GPA of at least 3.0 for the 24 credits of graduate work submitted for the MS degree.

Students should take 6 credits from the following:

- TCOM 509 - Internet Protocols Credits: 1.5
- TCOM 529 - Advanced Internet Protocols Credits: 1.5
- TCOM 551 - Digital Communication Systems Credits: 3
- or approved substitutions

Degree Conferral

Students must apply to have the BS in Electrical Engineering conferred the semester before they expect to complete the BS requirements. At the completion of the MS requirements, the MS degree will be awarded.

Doctor of Philosophy

Electrical and Computer Engineering, PhD

Banner Code: VS-PHD-ECE

School: Volgenau School of Engineering

Department: Electrical and Computer Engineering

The PhD program in Electrical and Computer Engineering educates students to do original research on ECE topics and to become technical leaders in their fields. It has a strong and growing reputation, as graduates from the department have become professors at other universities and researchers in various industrial and government research centers. Students may choose a research emphasis in areas such as communications, networking, computer engineering, control and robotics, signal processing, micro/nano-electronics, and bioengineering. The ECE PhD program requires course work, a qualifying exam, a teaching assignment, a dissertation proposal and research competency exam, a research seminar, dissertation research, and a dissertation defense. Mason’s general doctoral requirements apply to this program.

Admission Requirements

All general Mason and specific Volgenau School admission requirements apply. Applicants must submit official transcripts, a resume, a goals statement, three letters of recommendation and official GRE General Test results. The GRE requirement is waived for GMU ECE master’s graduates with a 3.0 or greater GPA. Applicants whose native language is not English must demonstrate proficiency by taking the TOEFL or IELTS exam. The minimum score required for admission is 575 on the TOEFL paper-based exam, 230 on the TOEFL computer-based exam, 88 on the TOEFL internet-based exam (with a
minimum of 20 in each section), or 6.5 on the IELTS exam. Application materials are reviewed by the ECE PhD committee, which makes a recommendation to the ECE department chair.

**Reduction of Credit**

Students must complete a minimum of 72 graduate credits, which may be reduced by a maximum of 30 credits from a completed master’s degree. Reduction of credit requires the approval of the program director or designee and the dean or designee of the school. They determine whether the credits are eligible for reduction of credit and applicable to the degree program and the number of credits to be reduced.

**Degree Requirements**

The 72 hours of required doctoral-level credits typically consist of 48 credits of regular coursework and 24 credits of dissertation research. More than half of the 72 credits applied to the doctoral degree must be earned at Mason. The following degree plan is based on a student who receives a full 30 credit reduction. Students who do not receive a full credit reduction should choose additional credits in consultation with their advisor.

**Doctoral Course Work (18-30 credits)**

Courses that constitute a student's plan of study will be chosen in consultation with the student's advisor and/or dissertation committee, to include:

- 3 credits at the 600-level outside the department in a subject considered foundational for the area of emphasis.  
  Typical examples are advanced mathematics or statistics courses for those pursuing an emphasis in communications, signal processing or control, physics courses for those desiring an emphasis in micro/nano-electronics, computer science courses for those pursuing the computer engineering emphasis, and biology courses for those pursuing a bioengineering emphasis. Because such courses are usually not taken for master's degrees, this requirement can rarely be satisfied with a course taken previously.

- 6 credits within the department but outside the area of emphasis.  
  This requirement may be satisfied with courses taken during previous studies, subject to approval.

- A maximum of 6 credits may be at the 500-level*

- A maximum of 6 credits of individualized reading courses at any level.  
  Note that ECE 798 Research Project is primarily a master's level course and is not intended to be part of the PhD course work.

*For courses taken elsewhere, the equivalent levels are to be determined by the PhD advisor, subject to approval by the ECE Department chair.

**Qualifying Exam**

The ECE PhD Qualifying Exam tests students' knowledge of fundamental concepts and assesses their basic research skills. The exam consists of two parts: a written technical qualifying exam and a research qualifying exam requiring a written report and a presentation.

**Technical Qualifying Exam**

The Technical Qualifying Exam (TQE) is an in-class written exam that tests knowledge of fundamental concepts in a particular technical area. Students select one of three topics for their TQE:
1. Topic 1: Signals and Systems
2. Topic 2: Digital Design and Computer Organization
3. Topic 3: Circuits, Electronics, and Devices

Students must take the Technical Qualifying Exam within the first year after they have entered the program. The TQE is typically offered in late August, prior to the start of the fall semester. Students who enter the PhD program in the spring semester may request to take the TQE in January; such a request must be filed by the end of the spring semester.

Research Qualifying Exam

The purpose of the Research Qualifying Exam (RQE) is to assess whether students can define a research problem, critically review the literature related to the problem, apply appropriate research methods to study the problem, and interpret and communicate their results. The RQE requires students to complete a short research project and to document their results in a written report and an oral presentation. The RQE topic is defined by a faculty advisor in consultation with the student. A committee of three faculty members (the advisor plus two additional members) evaluates the written report and the oral presentation. During the presentation the student is expected to answer questions about their project and about fundamental concepts related to the research.

Students who enter the program with an MS degree must take the RQE prior to completing 12 credits in the PhD program. Students who enter the program with a BS degree must take the exam prior to completing 30 credits in the program.

Evaluation

After a student has taken both the TQE and the RQE, the ECE PhD Committee reviews the exam results, the student’s transcript, and a letter of recommendation from the student’s advisor. Based on this information, the PhD Committee determines whether the student is qualified for the PhD program. If the student does not qualify on their first try, they may repeat one or both of the exams in the following year. The TQE and RQE may be repeated once. A student who fails to qualify on their second try is removed from the program.

Dissertation Research (12-24 credits)

A maximum of 24 credits of ECE 998 and ECE 999 may be applied to the degree. Students who choose to take fewer than 24 credits of ECE 998 and ECE 999 may earn the remaining credits from approved course work. Students cannot enroll in ECE 999 before they have advanced to candidacy. Students advanced to candidacy after the add period for a given semester must wait until the following semester to register for ECE 999. Students cannot advance to candidacy and defend their dissertation during the same semester. Once enrolled in ECE 999, students must maintain continuous registration in ECE 999 each semester until graduation, excluding summers. Students who defend in the summer must be registered for at least 1 credit of ECE 999 during that summer term.

- ECE 998 - Doctoral Dissertation Proposal Credits: 1-12 (must complete a minimum of 9 credits)
- ECE 999 - Doctoral Dissertation Credits: 1-12 (must complete a minimum of 3 credits)

Advisor, Dissertation Director, and Dissertation Committee

The process of finding a dissertation topic and dissertation director is governed by the university’s policies, as described in the Requirements for Doctoral Degrees in the Academic Policies section of the catalog. Upon admission to the program, each student is assigned an ECE faculty member as an academic advisor. After the student passes the qualifying exam, the student proposes and the ECE department chair appoints a dissertation director who must be a GMU graduate faculty member with a full-time appointment. The dissertation director becomes the student’s academic advisor. Normally, the dissertation director is a member of ECE department; however, a member of another department may be appointed if warranted by the dissertation research topic. A dissertation committee should be formed within a year after the student has passed the qualifying exam. The dissertation committee consists of the dissertation director who acts as chair plus three or four additional members. All
dissertation committees must include at least three members of the GMU graduate faculty, at least two of whom must be from the ECE Department. At least one member of the dissertation committee must be from outside the discipline of electrical and computer engineering. The outside member may be faculty from another GMU department or, if justified by the research topic, a qualified scientist or engineer from outside the university. All committee members must have a doctoral level degree. The dissertation committee must be approved by the ECE department chair. The dissertation director, as academic advisor, and the ECE Department chair must approve all decisions concerning a student’s course requirements and dissertation.

Dissertation Proposal, Research Competency Exam, Advancement to Candidacy

The student prepares a written dissertation proposal outlining the proposed research and submits it to the dissertation committee for approval. After completing coursework requirements and preparing a proposal, the student takes a research competency exam to demonstrate their preparation for dissertation research. The exam consists of a presentation of the dissertation proposal followed by an oral exam. The exam is administered by the student's dissertation committee. The purpose of the oral exam is to verify that the student is familiar with the relevant material related to their research. The student is advanced to candidacy when he or she passes the oral exam and the dissertation committee approves the proposal.

Dissertation Research and Defense

Students conduct dissertation research under the guidance of their dissertation director, with regular consultation with other members of the dissertation committee. During this period, students must present their research results at least once in the form of a department seminar. The dissertation must represent an achievement in research, must be a significant contribution to its field, and should be deemed publishable in refereed journals or at highly selective conferences. On completion of the dissertation the student may be asked, at the discretion of the dissertation committee, to present a predefense in the presence of the committee members. The dissertation committee and the department chair approve the student’s application for a public defense of the doctoral dissertation. A copy of the dissertation must be placed in the University Libraries four weeks prior to the public defense. After a successful public defense and completion of the final form of the dissertation, the dissertation committee recommends the candidate for the degree of doctor of philosophy.

Teaching Requirement

To acquire teaching experience, each PhD student is required to participate in the department’s teaching activity. The requirement is typically satisfied by working as a recitation instructor for one semester, presenting several lectures within a course, or performing other teaching work approved by the department.

Total: 72 credits

Graduate Certificate

Advanced Networking Protocols for Telecommunications Graduate Certificate

Banner Code: VS-CERG-ANPT

College: Volgenau School of Engineering

Department: Electrical and Computer Engineering

This certificate provides an in-depth understanding of advanced protocols used in a variety of telecommunications networks.
The graduate certificate may be pursued on a part-time or full-time basis.

Certificate Requirements

To obtain the certificate students must complete the following for a total of 15 credits:

Core Courses (9 credits)

- TCOM 609 - Interior Gateway Protocol (IGP) Routing Credits: 3
- TCOM 610 - Border Gateway Protocol (BGP) Routing Credits: 3
  and 3 credits chosen from the following:
  - TCOM 509 - Internet Protocols Credits: 1.5 and TCOM 529 - Advanced Internet Protocols Credits: 1.5
  or
  - TCOM 515 - Internet Protocol Routing: Lecture and Laboratory Course Credits: 3

Elective Courses (6 credits)

Choose from the following:

- TCOM 509 - Internet Protocols Credits: 1.5
- TCOM 529 - Advanced Internet Protocols Credits: 1.5
- TCOM 515 - Internet Protocol Routing: Lecture and Laboratory Course Credits: 3
- TCOM 519 - Voice over IP Credits: 1.5
- TCOM 539 - Advanced Voice over IP Credits: 1.5
- TCOM 611 - Multi-Protocol Label Switching (MPLS) Credits: 3
- TCOM 662 - Advanced Secure Networking Credits: 3

Note:

TCOM 509/529 and TCOM 515 cannot be taken twice. If a student takes TCOM 509 and 529 or TCOM 515 in the core element, the course(s) may not be taken again in the elective element.

Total: 15 credits

Communications and Networking Graduate Certificate

Banner Code: VS-CERG-CONE

School: Volgenau School of Engineering

Department: Electrical and Computer Engineering

This certificate provides graduate students with the opportunity to reach a demonstrated level of competence in communications and networking. Course work toward the graduate certificate may be used for credit toward the MS in electrical engineering or computer engineering; however, the certificate’s primary purpose is to provide a well-defined body of knowledge for students who want to advance their understanding of modern communications but do not necessarily want to complete requirements for the MS degree. The certificate may be pursued concurrently with any of the graduate degree programs in the Volgenau School.
The graduate certificate may only be pursued on a part-time basis.

**Admission Requirements**

The certificate program in communications and networking is open to all students who hold BS degrees in scientific and engineering disciplines from accredited universities.

**Certificate Requirements**

The certificate is awarded on completion of five graduate courses (15 credits) in communications and networking. A cumulative GPA of 3.00 is required and one course with a grade of C at most may be applied toward the certificate. The certificate courses comprise two required foundation courses and three elective courses.

**Foundation courses (6 credits):**

- ECE 528 - Introduction to Random Processes in Electrical and Computer Engineering Credits: 3
- ECE 542 - Computer Network Architectures and Protocols Credits: 3

**Elective courses (9 credits):**

After completing the foundation courses, students choose electives by taking three courses from the following:

- ECE 535 - Digital Signal Processing Credits: 3
- ECE 565 - Introduction to Optical Electronics Credits: 3
- ECE 567 - Optical Fiber Communications Credits: 3
- ECE 630 - Statistical Communication Theory Credits: 3
- ECE 633 - Coding Theory Credits: 3
- ECE 635 - Adaptive Signal Processing Credits: 3
- ECE 642 - Design and Analysis of Computer Communication Networks Credits: 3
- ECE 643 - Network Switching and Routing Credits: 3
- ECE 646 - Cryptography and Computer Network Security Credits: 3
- ECE 665 - Fourier Optics and Holography Credits: 3
- ECE 731 - Digital Communications Credits: 3
- ECE 732 - Mobile Communication Systems Credits: 3
- ECE 734 - Detection and Estimation Theory Credits: 3
- ECE 737 - Spread Spectrum Communications Credits: 3
- ECE 738 - Advanced Digital Signal Processing Credits: 3
- ECE 741 - Wireless Networks Credits: 3
- ECE 742 - High-Speed Networks Credits: 3
- OR 635 - Discrete System Simulation Credits: 3
- OR 643 - Network Modeling Credits: 3
- OR 647 - Queuing Theory Credits: 3

**Total: 15 credits**

**Network Technologies and Applications Graduate Certificate**
The certificate provides a broad understanding of the technologies used in telecommunications networks and the various applications of telecommunications networks.

The graduate certificate may be pursued on a part-time or full-time basis.

To obtain the certificate, students must complete the following, for a total of 15 credits:

**Certificate Requirements**

Choose 9 credits from the following:

- TCOM 504 - Asynchronous Transfer Mode Networks Credits: 1.5
- TCOM 505 - Networked Multicomputer Systems Credits: 1.5
- TCOM 509 - Internet Protocols Credits: 1.5
- TCOM 510 - Internet Protocols Credits: 1.5
- TCOM 519 - Voice over IP Credits: 1.5
- TCOM 529 - Advanced Internet Protocols Credits: 1.5
- TCOM 539 - Advanced Voice over IP Credits: 1.5
- TCOM 555 - Network Management Foundations and Applications Credits: 3

**Elective Requirements (6 credits)**

Six credits are required. Students may elect to take any additional 6 credits from the Telecommunications, MS emphasis areas 1, 2, and 3, including those in the mandatory course list that are not part of the 9 credits of core courses for the certificate.

**Total: 15 credits**

**Networks, System Integration and Testing Graduate Certificate**

**Banner Code:** VS-CERG-NSIT

**School:** Volgenau School of Engineering

**Department:** Electrical and Computer Engineering

This certificate provides graduate students with the opportunity to reach a demonstrated level of competence in computer networks, system integration, and software testing. Course work toward the graduate certificate may be used for credit toward the MS in Electrical Engineering or Computer Engineering degrees; however, the certificate’s primary purpose is to provide a well-defined program for students who want to advance their knowledge of modern networks, systems integration and testing, but do not necessarily want to complete requirements for the MS degree. The certificate may be pursued concurrently with any of the graduate degree programs in the Volgenau School.

The graduate certificate may only be pursued on a part-time basis.
Admissions Requirements

The networks, system integration, and testing certificate program is open to all students who hold BS degrees in scientific and engineering disciplines from accredited universities, with a GPA minimum established by The Volgenau School for all MS programs.

Certificate Requirements

The certificate is awarded on successful completion of five graduate courses (15 credits) from the list of courses given below. A cumulative GPA of 3.00 is required, at most one course with a grade of C may be applied toward the certificate, and no more than one, 3-credit graduate course in the appropriate discipline may be transferred into the certificate from an appropriately accredited program at another institute of higher learning.

The certificate in networks, systems integration, and testing consists of the following five, 3-credit courses:

- ECE 542 - Computer Network Architectures and Protocols Credits: 3
- ECE 673 - Discrete Event Systems Credits: 3
- ECE 674 - Systems Architecture Design Credits: 3
- ECE 675 - System Integration and Architecture Evaluation Credits: 3 or ECE 525 - Hardware/Software Integration Credits: 3
- SWE 637 - Software Testing Credits: 3

Total: 15 credits

Signal Processing Graduate Certificate

Banner Code: VS-CERG-SIGP

School: Volgenau School of Engineering

Department: Electrical and Computer Engineering

The Department of Electrical and Computer Engineering, in conjunction with the Department of Statistics, offers the certificate in signal processing, which provides graduate students with an opportunity to reach a demonstrated level of competence in signal processing. Course work for the graduate certificate can be used for credit toward the MS in Statistical Science as well as the MS in Electrical or Computer Engineering. However, the certificate’s primary purpose is to provide a well-defined body of information for students who want to advance or update their knowledge in this fast-moving field, but who do not necessarily wish to complete requirements for the MS degree. The certificate may be pursued concurrently with any of the graduate degree programs in the Volgenau School.

The graduate certificate may only be pursued on a part-time basis.

Admission Requirements

The program is open to all students who hold BS degrees in scientific and engineering disciplines from accredited universities and hold graduate status (either degree or non-degree) in the Volgenau School.

Certificate Requirements
The certificate is awarded on completion of five graduate courses (15 credits) in signal processing. A cumulative GPA of 3.00 is required, and one course with a grade of C at most may be applied toward the certificate. The certificate courses comprise two foundation courses taken by all students and three elective courses.

Foundation courses (6 credits):

- ECE 528 - Introduction to Random Processes in Electrical and Computer Engineering Credits: 3 or
  STAT 544 - Applied Probability Credits: 3
- ECE 535 - Digital Signal Processing Credits: 3

Elective courses (9 credits):

After completing the two foundation courses, students choose electives by taking three courses from the following list:

- ECE 537 - Introduction to Digital Image Processing (DIP) Credits: 3
- ECE 621 - Systems Identification Credits: 3
- ECE 630 - Statistical Communication Theory Credits: 3
- ECE 635 - Adaptive Signal Processing Credits: 3
- ECE 638 - Fast Algorithms and Architectures for Digital Signal Processing Credits: 3 or ECE 644 - Architectures and Algorithms for Image Processing Credits: 3
- ECE 722 - Kalman Filtering with Applications Credits: 3 or ECE 728 - Random Processes in Electrical and Computer Engineering Credits: 3
- ECE 734 - Detection and Estimation Theory Credits: 3 or ECE 738 - Advanced Digital Signal Processing Credits: 3
- CSI 978 - Statistical Analysis of Signals Credits: 3
- CSI 672 or STAT 652 - Statistical Inference Credits: 3
- CSI 678 or STAT 658 - Time Series Analysis and Forecasting Credits: 3
  Any one of the following:
- ECE 751 - Information Theory Credits: 3
- ECE 752 - Spectral Estimation Credits: 3
- ECE 754 - Optimum Array Processing I Credits: 3
- ECE 755 - Optimum Array Processing II Credits: 3
- ECE 749 - Neural Networks for Control Credits: 3
- CS 775 - Advanced Pattern Recognition Credits: 3

Total: 15 credits

Telecommunications Forensics and Security Graduate Certificate

Banner Code: VS-CERG-TFAS

School: Volgenau School of Engineering

Department: Electrical and Computer Engineering

The objective of this certificate is to provide an in-depth understanding of security and forensics as they apply to networks and digital storage media.

The graduate certificate may be pursued on a part-time or full-time basis.
Certificate Requirements

Students must complete the following for a total of 15 credits:

Core Courses

Choose 9 credits from the following:

- TCOM 562 - Network Security Fundamentals Credits: 3
- ISA 562 - Information Security Theory and Practice Credits: 3
  One of the following:
- TCOM 548 - Security and Privacy Issues in Telecommunications Credits: 1.5
- TCOM 556 - Cryptography and Network Security Credits: 1.5
  or
- TCOM 515 - Internet Protocol Routing: Lecture and Laboratory Course Credits: 3
  One of the following:
- TCOM 660 - Network Forensics Credits: 3
- TCOM 661 - Digital Media Forensics Credits: 3
- TCOM 662 - Advanced Secure Networking Credits: 3
- TCOM 663 - Operations of Intrusion Detection and Forensics Credits: 3
- TCOM 664 - Incident Response Forensics Credits: 3

Elective Courses

Choose 6 credits from the following:

- ISA 562 - Information Security Theory and Practice Credits: 3 (formerly ISA 662, and prior to that INFS 762)
- TCOM 660 - Network Forensics Credits: 3
- TCOM 661 - Digital Media Forensics Credits: 3
- TCOM 662 - Advanced Secure Networking Credits: 3
- TCOM 663 - Operations of Intrusion Detection and Forensics Credits: 3
- TCOM 664 - Incident Response Forensics Credits: 3

Note:

TCOM 660, 661, 663, and 664 cannot be taken twice for credit. If any of these courses is taken in the core element, it cannot be taken again in the elective element.

Total: 15 credits

Wireless Communications Graduate Certificate

Banner Code: VS-CERG-WIRE

School: Volgenau School of Engineering

Department: Electrical and Computer Engineering
This certificate provides a broad understanding of the technologies, applications, and systems used in all forms of wireless communications.

The graduate certificate may be pursued on a part-time or full-time basis.

Certificate Requirements

Students must complete the following, for a total of 15 credits:

Core Courses

Choose 9 credits from the following:

- TCOM 516 - Global Positioning System (GPS) Credits: 1.5
- TCOM 526 - Advanced Global Positioning System (GPS) Credits: 1.5
- TCOM 551 - Digital Communication Systems Credits: 3
- TCOM 552 - Introduction to Mobile Communications Systems Credits: 3
- TCOM 606 - Advanced Mobile Communications Systems Credits: 3
- TCOM 707 - Satellite Communications Credits: 3
- TCOM 607 - Satellite Communications Credits: 3

Elective Courses

- Six credits are required. Students may earn the credits from the Telecommunications, MS emphasis areas 1, 2, and 3, including those in the mandatory course list that are not part of the 9 credits of core courses for the certificate.

Total: 15 credits

Master of Science

Computer Engineering, MS

Banner Code: VS-MS-CPE

School: Volgenau School of Engineering

Department: Electrical and Computer Engineering

The computer engineering field is at the interface of the computer science and electrical engineering disciplines because it involves knowledge of hardware and software development. A major distinction between computer engineering and computer science is that the computer engineer is more concerned with the physical implementation of computing devices, the interaction between hardware and software, and the methodologies for designing digital systems. Another major distinction between computer engineering and electrical engineering is that the computer engineer is more concerned with the computational aspects of electrical engineering problems and the implementation of these solutions in digital devices. The computer engineering program offers the following specialization areas: digital systems design, computer networks, distributed computing systems, microprocessor and embedded systems, and network and system security.

Admission is very competitive. The department’s policy is to admit only those students who have demonstrated a potential for outstanding performance in their graduate work.
An accelerated master's option is available to students in the bachelor's program. See Computer Engineering, BS/Computer Engineering, Accelerated MS for specific requirements.

Common Requirements for CPE or ELEN Master's Program

Admission

Categories of Admission

Each student may be admitted into one of the following categories: degree, provisional, or nondegree. Provisional admission is for anyone whose past performance provides reasonable, but not strong, evidence of ability to pursue graduate work. To advance to degree status, a provisional student must achieve a 3.00 GPA after 12 credits, remove all undergraduate deficiencies by completing the corresponding courses with grades of B or better, and receive a B or better in two core courses specific to the student’s selected program and specialization. The nondegree category is used primarily by students who want to take courses but not necessarily pursue a degree. Nondegree students seeking to enter degree programs must formally apply for admission.

Requirements

To be considered for admission to the master’s program, applicants should have a baccalaureate degree in electrical engineering, computer engineering, or a closely-related discipline from an accredited program with a reputation for high academic standards, and have earned a GPA of B or better during the last 60 credits. Other requirements are as follows:

- Three letters of recommendation, preferably from academic references or references in industry or government who hold advanced degrees and are familiar with the applicant’s professional accomplishments
- Detailed statement of career goals and aspirations
- For students who have not earned a bachelor’s degree from a U.S. university, satisfactory performance on the GRE
- For students whose native language is not English, a minimum TOEFL score of 575 for the paper-based exam or 230 for the computer-based exam. A minimum score of 600 for the paper-based exam or 250 for the computer-based exam is required for applicants who wish to be considered for a graduate teaching assistantship.

Non-ECE Students

Students with BS or MS degrees in ECE-related disciplines (for example, computer science, mathematics, mechanical engineering, physics, or electrical engineering technology) are encouraged to apply for admission. They may initially be admitted into the provisional category and advance to degree status by satisfying requirements described in the Admissions Categories section. Such students may also be advised to take some courses from the undergraduate electrical or computer engineering curriculum, according to their intended specialization and specific backgrounds.

Student Advising

Newly-admitted graduate students must consult with the ECE graduate coordinator before they register for classes. Students should make an appointment by calling the ECE office. Students are expected to select a specialization from those available in each MS degree program. Students then are assigned an academic advisor from that specialization.

GPA Requirements

A maximum of 6 credits of courses with grades of C or B- may be applied toward the degree. The student must present a GPA of at least 3.00 for all courses submitted for the degree.
Degree Requirements

Students must complete a minimum of 30 graduate credits beyond the bachelor’s degree. This work must represent a cohesive set of courses leading to comprehensive knowledge in one specialized area of computer engineering; it cannot be a set of disjointed courses.

Plan of Study

Before the end of the second semester, each student must submit to the graduate coordinator's office a plan of study that has been approved by the academic advisor. This plan should be kept up to date by regular consultation with the academic advisor. A final, signed version of the plan must be turned in when the student submits a graduation application.

Two core courses (with B or better in each) from the following (6 credits):

- CS 571 - Operating Systems Credits: 3
- ECE 511 - Microprocessors Credits: 3
- ECE 542 - Computer Network Architectures and Protocols Credits: 3
- ECE 545 - Digital System Design with VHDL Credits: 3
- ECE 548 - Sequential Machine Theory Credits: 3

Minimum of 3 ECE or CS courses:

With a grade of B or better in each, at the 600 level and above (not including ECE 798 or 799), including doctoral courses (800 and 900 levels).

Electives

Elective courses should be chosen either from the list of pre-approved electives strongly suggested for a given specialization area or from the list of elective courses common for all specialization areas. Elective courses from the latter list must be approved by the student's advisor prior to the registration for a given course.

The plan of study usually has no fewer than 15 credits of courses designated ECE.

Elective courses should be chosen either from the list of pre-approved electives strongly suggested for a given specialization area or from the list of elective courses common for all specialization areas. Elective courses from the latter list must be approved by the student's advisor prior to the registration for a given course.

The plan of study usually has no fewer than 15 credits of courses designated ECE.

Lists of courses appropriate for specialization areas, such as digital systems design, computer networks, network and system security, and microprocessor and embedded systems, are available from the department office. A self-defined specialization may be created when appropriate, with the approval of the computer engineering graduate program coordinator. This specialization must include components of hardware and software development and the corresponding plan of study should comprise courses from ECE and the Computer Science Departments.

Seminar Requirement

All degree candidates must attend a minimum of 10 graduate seminars approved for the given degree program.

Thesis/Scholarly Paper Option for CPE/ELEN Master's Program

To complete the program, students may select one of the following options:

Thesis Option
Students who select this option must complete ECE 799 - Master's Thesis (6 credits) and 24 credits of course work. The thesis is particularly recommended for those students who wish to develop and document their research skills or contemplate subsequent enrollment in a PhD program. The thesis involves a research effort, which is conducted under the guidance of a faculty advisor. In some cases, permission may be granted to complete a portion of the work at the student’s place of employment. The final written thesis and oral defense are approved by the student’s advisory committee.

For the electrical engineering program, this committee consists of at least three full-time faculty members, including two from the student’s major specialization, and one from outside the specialization. For the Computer Engineering Program, this committee consists of at least three full-time faculty members, including two affiliated with the MS in Computer Engineering Program, one of whom must be from the ECE Department. Thesis students may not register for ECE 798 - Research Project. Students must register for at least 3 credits of thesis for their first thesis semester. Following their first thesis semester, they must register for at least 1 credit of thesis each fall and spring semester until graduation.

**Scholarly Paper Option**

Students who select this option must complete 30 credits of course work or 27 credits of course work plus ECE 798 - Research Project, and must present a scholarly paper. The scholarly paper, with the theme selected under the guidance of a faculty advisor, can be a technical report on an independent study or laboratory or computer experimentation; a literature search on a current scientific or technological topic, such as a survey of new technologies or new methodologies; or a case study of new applications. Students must demonstrate knowledge of the topic and make a satisfactory technical presentation of the paper in the graduate seminar. The scholarly paper and final presentation must be approved by the student’s advisory committee. When a student elects to submit an ECE 798 final report as a scholarly paper, it is expected that the 3 credits of effort in ECE 798 will result in a much more substantial paper than a scholarly paper submitted in addition to 30 credits of regular course work.

**Total: 30 credits**

**Computer Forensics, MS**

**Banner Code: VS-MS-CFRS**

**School: Volgenau School of Engineering**

**Department: Electrical and Computer Engineering**

Computer forensics is a discipline addressing the collection, processing, and analysis of digital information so that this information can be admitted as evidence in a court of law. It is interdisciplinary in its nature with the inclusion of computer engineering, computer science, information technology, law, and ethics. Computer forensics is a key component in criminal, civil, intelligence, and counter-terrorism matters. In the last several years, with a proliferation of digital storage, transmission, and processing of sensitive information there has been an increase in the aberrant use of computers. This aberrant behavior includes but is not limited to: economic espionage, child exploitation, cybercrime, fraud, terrorism, and identity theft. In response to this, computer forensics has become an important profession serving both public and private sectors. The MS in Computer Forensics will prepare graduates for careers in law enforcement, various other branches of government, and in the corporate sector such as banking and finance by combining academic education with real world practical techniques and by offering advanced training in analyzing digital evidence, in intrusion forensics, and in legal and ethical issues.

An accelerated master’s option is available to students in the applied information technology bachelor's program. See Applied Information Technology, BS/Computer Forensics, Accelerated MS for specific requirements.

**Admission Requirements**
Students who hold a bachelor’s degree from an accredited college or university in engineering, math, science, computer science, business (with a quantitative background), economics, or other analytical disciplines; or students who have equivalent work experience indicating analytical aptitude; may apply to the MS in Computer Forensics. Depending on their background, some applicants may be required to complete 3 to 12 credits of preliminary course work before they are allowed to enroll in any of the core courses or specialty courses in the program. A minimum undergraduate GPA of 3.00 is required for acceptance.

Degree Requirements

Students must complete a minimum of 30 graduate credits beyond the bachelor’s degree with a GPA of 3.00 or higher, with no more than 6 credit hours of C grades. The plan of study includes an 18-credit required Core component which includes a mandatory capstone course and a 12-credit elective component as shown below:

Core Courses (18 credits):

Choose one of the following:
- CFRS 500 - Introduction to Forensic Technology and Analysis Credits: 3
- ISA 562 - Information Security Theory and Practice Credits: 3
and complete the following:
- CFRS 660 - Network Forensics Credits: 3
- CFRS 661 - Digital Media Forensics Credits: 3
- CFRS 663 - Operations of Intrusion Detection for Forensics Credits: 3 or CFRS 664 - Incident Response Forensics Credits: 3
- CFRS 760 - Legal and Ethical Issues in IT Credits: 3 or CFRS 770 - Fraud and Forensics in Accounting Credits: 3
- CFRS 790 - Advanced Computer Forensics Credits: 3

Elective courses (12 credits) chosen from:

- CFRS 510 - Digital Forensics Analysis Credits: 3
- CFRS 698 - Independent Reading and Research Credits: 1-3
- CFRS 760 - Legal and Ethical Issues in IT Credits: 3
- CFRS 761 - Malware Reverse Engineering Credits: 3
- CFRS 762 - Mobile Device Forensics Credits: 3
- CFRS 763 - Registry Forensics - Windows Credits: 3
- CFRS 764 - Mac Forensics Credits: 3
- CFRS 767 - Penetration Testing in Computer Forensics Credits: 3
- CFRS 770 - Fraud and Forensics in Accounting Credits: 3
- CFRS 780 - Advanced Topics in Computer Forensics Credits: 3
- ECE 511 - Microprocessors Credits: 3
- ECE 746 - Advanced Applied Cryptography Credits: 3
- ISA 522 - Information Security Essentials Credits: 3
- ISA 562 - Information Security Theory and Practice Credits: 3
- ISA 650 - Security Policy Credits: 3
- ISA 652 - Security Audit and Compliance Testing Credits: 3
- ISA 656 - Network Security Credits: 3
- ISA 674 - Intrusion Detection Credits: 3
- ISA 785 - Research in Digital Forensics Credits: 3
- TCOM 662 - Advanced Secure Networking Credits: 3
- FRSC 510 - Basic Crime Analysis Credits: 3
Please note:

*Both CFRS 760 and CFRS 770 may be taken but only one may be used in the core component.

Other courses may be appropriate as elective courses in the degree program, but they must be approved prior to registration.

Total: 30 credits

Electrical Engineering, MS

Banner Code: VS-MS-ELEN

School: Volgenau School of Engineering

Department: Electrical and Computer Engineering

The electrical engineering program offers the following specializations: bioengineering, communications and networking, signal processing, control and robotics, microelectronics, and system architectures.

An accelerated master's option is available to students in the bachelor's program. See Electrical Engineering, BS/Electrical Engineering, Accelerated MS for specific requirements.

Common Requirements for CPE or ELEN Master's Program

Admission

Categories of Admission

Each student may be admitted into one of the following categories: degree, provisional, or nondegree. Provisional admission is for anyone whose past performance provides reasonable, but not strong, evidence of ability to pursue graduate work. To advance to degree status, a provisional student must achieve a 3.00 GPA after 12 credits, remove all undergraduate deficiencies by completing the corresponding courses with grades of B or better, and receive a B or better in two core courses specific to the student’s selected program and specialization. The nondegree category is used primarily by students who want to take courses but not necessarily pursue a degree. Nondegree students seeking to enter degree programs must formally apply for admission.

Requirements

To be considered for admission to the master’s program, applicants should have a baccalaureate degree in electrical engineering, computer engineering, or a closely-related discipline from an accredited program with a reputation for high academic standards, and have earned a GPA of B or better during the last 60 credits. Other requirements are as follows:

- Three letters of recommendation, preferably from academic references or references in industry or government who hold advanced degrees and are familiar with the applicant’s professional accomplishments
- Detailed statement of career goals and aspirations
- For students who have not earned a bachelor’s degree from a U.S. university, satisfactory performance on the GRE
- For students whose native language is not English, a minimum TOEFL score of 575 for the paper-based exam or 230 for the computer-based exam. A minimum score of 600 for the paper-based exam or 250 for the computer-based exam is required for applicants who wish to be considered for a graduate teaching assistantship.
Non-ECE Students

Students with BS or MS degrees in ECE-related disciplines (for example, computer science, mathematics, mechanical engineering, physics, or electrical engineering technology) are encouraged to apply for admission. They may initially be admitted into the provisional category and advance to degree status by satisfying requirements described in the Admissions Categories section. Such students may also be advised to take some courses from the undergraduate electrical or computer engineering curriculum, according to their intended specialization and specific backgrounds.

Student Advising

Newly-admitted graduate students must consult with the ECE graduate coordinator before they register for classes. Students should make an appointment by calling the ECE office. Students are expected to select an specialization from those available in each MS degree program. Students then are assigned an academic advisor from that specialization.

GPA Requirements

A maximum of 6 credits of courses with grades of C or B- may be applied toward the degree. The student must present a GPA of at least 3.00 for all courses submitted for the degree.

Degree Requirements

Students must complete a minimum of 30 graduate credits beyond the bachelor’s degree. This work must represent a cohesive set of courses leading to comprehensive knowledge in one area; it cannot be a set of disjointed courses. The plan of study for the degree must include the following:

Plan of Study

Before the end of the second semester, each student must submit to the graduate coordinator’s office a plan of study that has been approved by the academic advisor. This plan should be kept up to date by regular consultation with the academic advisor. A final, signed version of the plan must be turned in when the student submits a graduation application.

Two core courses, with a B or better in each, from the following (6 credits):

- ECE 521 - Modern Systems Theory Credits: 3
- ECE 528 - Introduction to Random Processes in Electrical and Computer Engineering Credits: 3
- ECE 548 - Sequential Machine Theory Credits: 3 or ECE 511 - Microprocessors Credits: 3
- ECE 584 - Semiconductor Device Fundamentals Credits: 3 or ECE 565 - Introduction to Optical Electronics Credits: 3

At least 3 of the following:

Minimum of three courses, with a B or better in each, at the 600 level or above (not including ECE 798 or 799) from a chosen specialization, including approved doctoral courses (800 and 900 levels). Lists of courses appropriate for specialization areas are available from the department office. A self-defined specialization may be created when appropriate, with the approval of the electrical engineering graduate program coordinator.

Note:
A maximum of 6 credits of non-ECE courses may be used, subject to prior department approval. Approved IT courses (including doctoral 800- and 900-level courses) that cover ECE topics may be taken for credit toward an MS in electrical engineering, subject to prior department approval, in addition to the 6 credits of non-ECE courses.

Seminar Requirement

All degree candidates must attend a minimum of 10 graduate seminars approved for the given degree program.

Thesis/Scholarly Paper Option for CPE/ELEN Master’s Program

To complete the program, students may select one of the following options:

Thesis Option

Students who select this option must complete ECE 799 - Master’s Thesis (6 credits) and 24 credits of course work. The thesis is particularly recommended for those students who wish to develop and document their research skills or contemplate subsequent enrollment in a PhD program. The thesis involves a research effort, which is conducted under the guidance of a faculty advisor. In some cases, permission may be granted to complete a portion of the work at the student’s place of employment. The final written thesis and oral defense are approved by the student’s advisory committee.

For the electrical engineering program, this committee consists of at least three full-time faculty members, including two from the student’s major specialization, and one from outside the specialization. For the Computer Engineering Program, this committee consists of at least three full-time faculty members, including two affiliated with the MS in Computer Engineering Program, one of whom must be from the ECE Department. Thesis students may not register for ECE 798 - Research Project. Students must register for at least 3 credits of thesis for their first thesis semester. Following their first thesis semester, they must register for at least 1 credit of thesis each fall and spring semester until graduation.

Scholarly Paper Option

Students who select this option must complete 30 credits of course work or 27 credits of course work plus ECE 798 - Research Project, and must present a scholarly paper. The scholarly paper, with the theme selected under the guidance of a faculty advisor, can be a technical report on an independent study or laboratory or computer experimentation; a literature search on a current scientific or technological topic, such as a survey of new technologies or new methodologies; or a case study of new applications. Students must demonstrate knowledge of the topic and make a satisfactory technical presentation of the paper in the graduate seminar. The scholarly paper and final presentation must be approved by the student’s advisory committee. When a student elects to submit an ECE 798 final report as a scholarly paper, it is expected that the 3 credits of effort in ECE 798 will result in a much more substantial paper than a scholarly paper submitted in addition to 30 credits of regular course work.

Total: 30 credits

Telecommunications, MS

Banner Code: VS-MS-TCOM

School: Volgenau School of Engineering

Department: Electrical and Computer Engineering
The innovative, interdisciplinary MS in Telecommunications Program provides a blend of cutting-edge engineering-oriented courses in wireless and fiber communications systems, networks, computers, and Internet protocols, combined with courses on telecommunications policy, legal, business, and international aspects. The interdisciplinary program is designed for students who wish to enter the field of telecommunications or are working in the field and want to advance their knowledge of telecommunications. It concentrates on practical applications of telecommunications rather than on a theoretical approach. It focuses on the engineering and IT aspects of telecommunications, in combination with the interdisciplinary knowledge offered by selected courses in telecommunications business and policy. More than 30 new engineering and IT courses have been designed especially for this program, including four certificate programs that may be incorporated into, and taken concurrently with, the MS in telecommunications.

A novelty of the program is its structure, which consists of four emphasis areas. The program offers a mix of 3-credit full-semester courses together with 1.5-credit half-semester courses. This structure allows students to identify more clearly the various specialties in telecommunications technology. Students enjoy considerable flexibility because they are able to design their master’s programs to fit their technical preferences, including the option of taking courses in other programs at Mason. A majority of the course material comes from the Electrical and Computer Engineering (ECE) Department and the Systems Engineering and Operations Research (SEOR) Department. Courses offered by ECE focus on network technologies, such as fiber optics, and Internet protocols; network applications, such as networked multicomputer systems, client-server architectures, and network management; and wireless communications, such as digital communications, satellite communications, mobile communications, and GPS. Unique courses in the telecommunications program, such as Border Gateway Protocols, Interior Gateway Protocols, MPLS, GPS, and Advanced Link Design, complement courses given in ECE programs. In addition to the many new telecommunications courses developed for this program, ECE already offers a number of other graduate courses in communications as part of the graduate electrical engineering and computer engineering programs. Those courses may also be taken for credit under the MS in Telecommunications Program, provided students have the prerequisite background. Courses related to systems engineering, project management, and business of telecommunications (including the design and optimization of large, complex communication networks) are offered by SEOR. Both SEOR fields, systems engineering and operations research, play significant roles in all aspects of the design, operation, and business of telecommunications, and this knowledge is important for students of telecommunications. The blend of in-depth knowledge of specific elements of telecommunications technology, combined with knowledge of broader issues in telecommunications, is increasingly necessary for people who intend to work in a management or decision-making position within the telecommunications industry, telecommunications-related businesses, or government institutions dealing with telecommunications. The MS in telecommunications provides that blend.

An accelerated master’s option is available to students in the applied information technology, electrical engineering, individualized study, or systems engineering bachelor's programs. See each listing for specific requirements.

**Program Format**

The program consists of 9 credits of mandatory engineering and technology core courses (TCOM 500, 501, 502, and 521); 6 credits of electives drawn from an interdisciplinary group of core courses (PUBP 726, TCOM 547, or TCOM 750), and a basic switching lecture and laboratory course (TCOM 514) or an Internet protocol routing lecture and laboratory course (TCOM 515); and four areas of emphasis. Students who enter the program with an undergraduate degree that shows evidence of successfully completing LAN and WAN technologies may substitute TCOM 509 and TCOM 529 for TCOM 501 and TCOM 502 in their mandatory core program, respectively.

Students must complete 30 credits of course work through a combination of core and emphasis courses. The core consists of 15 credits, with the remaining 15 credits earned in areas of emphasis. The emphases are sub-areas of telecommunications that provide necessary depth.

Students are usually expected to take courses from at least two emphasis areas. Up to 6 credits from the core program may be carried forward into the emphases, thus permitting up to 6 credits of electives to be taken inside or outside the prime emphasis area chosen by the student. TCOM 501/502 may be carried forward into emphasis area 1, 2, or 3; TCOM 521 may be carried forward into emphasis area 4. Double counting is not permitted, but the courses carried forward into a given emphasis may permit that area’s credit requirement to be satisfied, thus allowing elective courses to be taken outside that area. Usually, a minimum of 6 credits is needed to satisfy one emphasis area. Credit for each emphasis can be obtained by taking an appropriate
combination of full-semester courses (3 credits) and half-semester courses (1.5 credits). In many cases, a pair of coordinated, half-semester courses (for example, TCOM 503/513 on fiber optic communications and networks) permits students to take a half-semester course to get an introduction to the field or the equivalent of a full-semester course for a more complete knowledge of that topic.

Admission Requirements

Courses are open to students who hold a BS or BA degree from an accredited college or university in engineering, math, science, computer science, business (with a quantitative background), economics, or other analytical disciplines, and students who have equivalent work experience indicating analytical aptitude. Depending on their background, some applicants may be required to complete 3 to 6 credits of preliminary course work before they are allowed to enroll in any of the core courses or emphasis courses in the program. Applicants who have not studied mathematics beyond the equivalent of algebra II/trigonometry at high school or introductory calculus classes (such as those offered in business or database management programs) will be required to take TCOM 575, the foundation course that prepares students for TCOM 500, prior to being allowed to take TCOM 500. A minimum undergraduate GPA of 3.00 is usually required.

Students may be admitted to the MS program as degree seeking students, or they may be admitted for nondegree study within the program, which allows them to take individual courses. Students in the nondegree program may apply to the degree program, provided their GPA within the MS in Telecommunications Program is 3.00 or above. Up to 12 credits earned in nondegree study may be transferred into the degree program, provided each of the courses to be transferred in was passed with a grade of B or above.

Degree Requirements

Students must complete a minimum of 30 graduate credits with a GPA of 3.00 or higher. Students must earn a B (3.00) or above in core courses TCOM 500, 501, 502, and 521. Up to 6 credits of a combination of C grades may be carried within the program from the remaining core courses or from the emphasis courses, provided the overall GPA is 3.00 or higher.

The plan of study includes the following:

15 credits of core courses, subject to the following constraints:

Required Courses (9 credits)

- TCOM 500 - Modern Telecommunications Credits: 3
- TCOM 501 - Data Communications and Local Area Networks Credits: 1.5 or TCOM 509 - Internet Protocols Credits: 1.5 *
- TCOM 502 - Wide Area Networks and Internet Credits: 1.5 or TCOM 529 - Advanced Internet Protocols Credits: 1.5 *
- TCOM 521 - Systems Engineering for Telecommunications Management Credits: 3

Note:

*Students must receive prior permission to substitute TCOM 509 for TCOM 501 or TCOM 529 for TCOM 502.

Elective core courses (6 credits selected from the following):

- PUBP 726 - Telecommunications Policy Credits: 3
- TCOM 514 - Basic Switching: Lecture and Laboratory Course Credits: 3 *
  or
- TCOM 515 - Internet Protocol Routing: Lecture and Laboratory Course Credits: 3 *
- TCOM 547 - Project Management in Telecommunications Credits: 3
- TCOM 750 - Coordinating Seminar Credits: 3

Note:

*Both TCOM 514 and TCOM 515 may be taken for credit, but only one may be used to satisfy a core elective requirement.

**Students must take a minimum of 15 credits of courses listed under the following areas of emphasis:**

Students usually take 15 credits from at least two of the four emphasis areas, or they may elect to take all 15 credits from the systems engineering of telecommunications area (emphasis 4). Students electing to carry forward a core course (TCOM 501/502 or TCOM 521) into an appropriate emphasis area have the option of taking an elective course in that area or an alternate area to bring the total number of credits in the emphasis area to 15.

An area of emphasis can be completed by a combination of full-semester courses and half-semester courses listed under the emphasis or considered applicable to that area for a total of at least 6 credits. Some emphasis courses are in more than one area; for example, TCOM 509 Internet Protocols is in emphasis 1, network technologies, and emphasis 2, network applications. Half-semester 1.5-credit courses may only be counted in one emphasis area, even if they apply to more than one. Full-semester 3-credit courses may be counted in one emphasis area or split between two. For example, TCOM 551 Digital Communication Systems, which is in emphases 1 and 3, may be counted as 3 credits in either area, or 1.5 credits in each area.

Basic courses in each emphasis have been specially designed for the telecommunications program. These courses do not require completion of prerequisites from other MS programs in the Volgenau School. Other courses, which are marked with asterisks, are from other MS programs in the Volgenau School and represent viable options for students who have appropriate prerequisites in some technical areas. Although these courses assume certain prerequisites from their specific MS programs, advanced students who already know the prerequisite material can seek instructor permission to enroll in those courses.

Alternatives to completing each emphasis area by using appropriate combinations of courses not listed under a given module may be admissible subject to prior approval by the program director. In addition, independent study, reading, and research courses may be taken in all five areas. These courses permit students to make use of their work experiences to undertake non-classroom courses for credit within the program.

Mason has negotiated an articulation agreement with the University of Virginia that allows up to 12 credits of the Informational Systems Management Certificate Program from the University of Virginia to be transferred into emphasis area 4 of the TCOM Program. In addition, graduate students from the National Defense University (NDU) may transfer up to 9 credits from NDU’s Information Security Certificate Program.

A capstone project course, TCOM 699, is required under the systems engineering of telecommunications area (emphasis 4) should the student elect to take all 15 credits in this area. Students taking only 7.5 credits in emphasis 4 have the option of taking TCOM 699, but the course is not required unless the student takes all 15 credits in emphasis 4.

**Areas of Emphasis**

Courses listed below from other graduate programs in the Volgenau School listed can be taken for credit in this program if the student has the appropriate prerequisites. Other courses from other programs may be taken for credit, with prior approval.

**Emphasis 1, Network Technologies**

- TCOM 503 - Fiber Optic Communications Credits: 1.5
Emphasis 2, Network Applications

- TCOM 505 - Networked Multicomputer Systems Credits: 1.5
- TCOM 509 - Internet Protocols Credits: 1.5
- TCOM 510 - Client-Server Architectures and Applications Credits: 1.5
- TCOM 513 - Optical Communications Networks Credits: 1.5
- TCOM 515 - Internet Protocol Routing: Lecture and Laboratory Course Credits: 3
- TCOM 519 - Voice over IP Credits: 1.5
- TCOM 529 - Advanced Internet Protocols Credits: 1.5
- TCOM 539 - Advanced Voice over IP Credits: 1.5
- TCOM 548 - Security and Privacy Issues in Telecommunications Credits: 1.5
- TCOM 551 - Digital Communication Systems Credits: 3
- TCOM 556 - Cryptography and Network Security Credits: 1.5
- TCOM 562 - Network Security Fundamentals Credits: 3
- TCOM 609 - Interior Gateway Protocol (IGP) Routing Credits: 3
- TCOM 610 - Border Gateway Protocol (BGP) Routing Credits: 3
- TCOM 660 - Network Forensics Credits: 3
- TCOM 661 - Digital Media Forensics Credits: 3
- TCOM 663 - Operations of Intrusion Detection and Forensics Credits: 3
- TCOM 664 - Incident Response Forensics Credits: 3
- ECE 542 - Computer Network Architectures and Protocols Credits: 3
- ECE 565 - Introduction to Optical Electronics Credits: 3
- ECE 642 - Design and Analysis of Computer Communication Networks Credits: 3
- ECE 643 - Network Switching and Routing Credits: 3
- CS 571 - Operating Systems Credits: 3
- CS 756 - Performance Analysis of Computer Networks Credits: 3
- CS 756 - Performance Analysis of Computer Networks Credits: 3
- INFS 612 - Principles and Practices of Communication Networks Credits: 3
- INFS 640 - Introduction to Electronic Commerce Credits: 3

**Emphasis 3, Wireless Communications**

- TCOM 516 - Global Positioning System (GPS) Credits: 1.5
- TCOM 526 - Advanced Global Positioning System (GPS) Credits: 1.5
- TCOM 551 - Digital Communication Systems Credits: 3
- TCOM 552 - Introduction to Mobile Communications Systems Credits: 3
- TCOM 562 - Network Security Fundamentals Credits: 3
- TCOM 606 - Advanced Wireless Communications Systems Credits: 3
- TCOM 607 - Satellite Communications Credits: 3
- TCOM 660 - Network Forensics Credits: 3
- TCOM 707 - Advanced Link Design Credits: 3
- ECE 732 - Mobile Communication Systems Credits: 3
- ECE 741 - Wireless Networks Credits: 3

**Emphasis 4, Systems Engineering of Telecommunications**

This area of emphasis can be taken as one of two emphases or as one 15-credit emphasis. No more than two SYST courses can be taken within this area.

- TCOM 547 - Project Management in Telecommunications Credits: 3
- TCOM 548 - Security and Privacy Issues in Telecommunications Credits: 1.5
- TCOM 699 - Telecommunications Project Course Credits: 3
- SYST 510 - Systems Definition and Cost Modeling Credits: 3
- SYST 513 - Total Systems Engineering, Reengineering and Enterprise Integration Credits: 3
- SYST 520 - System Engineering Design Credits: 3
- SYST 542 - Decision Support Systems Engineering Credits: 3
- INFS 612 - Principles and Practices of Communication Networks Credits: 3
- INFS 614 - Database Management Credits: 3
- INFS 640 - Introduction to Electronic Commerce Credits: 3
- ITRN 772 - International Telecommunications Credits: 3

**Total: 30 credits**

**Applicable BS/Accelerated MS in Telecommunications Programs**

These degree programs may be taken as part of an accelerated MS in Telecommunications Program with three undergraduate degree programs: BS in systems engineering, information technology, and individualized studies. See respective undergraduate degree information for details.

Systems Engineering, BS/Telecommunications, Accelerated MS
Applied Information Technology, BS/Telecommunications, Accelerated MS
Individualized Study, BIS/Telecommunications, Accelerated MS
Telecommunications Certificates

Five 15-credit certificates are offered by the MS in TCOM Program. Students may pursue these certificates as stand-alone programs or as part of their degree program. For the former, they are required to submit a graduate program application indicating their desire to enroll in the appropriate graduate certificate program. For the latter, because they are already enrolled in a degree program, they need only add the appropriate graduate certificate to their graduate program status at least one semester prior to the award of the certificate. The courses within the certificates are drawn directly from the MS in TCOM Program. If a student initially signs up for only a certificate program, it is possible to transfer into the degree program later, transferring up to 12 credits into the degree program. Students must therefore ensure they have transferred into the degree program prior to starting course work beyond 12 credits in the certificate program to ensure that all credits from the certificate program may transfer into the degree program. Students who transfer from a certificate program into the degree program may earn the certificate and the degree on satisfactory completion of the respective requirements. Applicable courses may count for the certificate and the degree programs.

Students may transfer in one 3-credit course from another program or institution toward their TCOM certificate, provided the course in question was passed with a B grade or higher. Students are permitted to carry one C grade within their certificate program, provided the overall GPA is 3.00 or above.

Advanced Networking Protocols for Telecommunications Graduate Certificate
Network Technologies and Applications Graduate Certificate
Telecommunications Forensics and Security Graduate Certificate
Wireless Communications Graduate Certificate

■ Interdisciplinary Programs (VS)

School: Volgenau School of Engineering

At the undergraduate level, the Volgenau School of Engineering offers a minor in Mechanical Engineering. Mechanical Engineering is the broadest of the engineering disciplines, concerned with anything that moves or uses energy. Mechanical Engineers design, build, and analyze complex devices, systems and processes that involve the conversion of energy from one form to another, the production of work, and the transport of energy and mass from one location to another.

The Volgenau School offers two interdisciplinary post-master programs: the PhD in Information Technology and the Engineer in IT degree. The first is designed for students who seek a doctoral program in information technology and want to be able to customize it to their needs. The second is a professional degree with the flexibility to integrate knowledge from all of the disciplines offered in our School. The programs are managed by the Graduate Student Services Office under the purview of the senior associate dean.

Doctoral students may conduct their doctoral research under the supervision of any eligible faculty member of any of the school's departments. The doctoral program allows students to take a broad range of courses and research options. Students can specialize in various areas, including information systems, software engineering, and information security.

The Engineer in IT degree program allows a student to combine the advanced course work of the PhD degree in IT with an applied project. It is designed to meet the needs of working professionals seeking advanced and up-to-date training in IT areas, but who are not planning a research career.

In addition to these programs, the Volgenau School also participates in an interdisciplinary Executive Master of Science in Management of Secure Information Systems program, which is administered primarily through the School of Management (SOM) and taught jointly by faculty from the Volgenau School of Engineering, School of Management, and the School of Public Policy. This unique program prepares professionals to meet the challenges required of those responsible for the safe, secure, and efficient operation of modern computerized information systems, which have become increasingly complex and ever more vulnerable to cyber attack. Students will understand the technical aspects of these systems, become familiar with the principles of management, and gain an understanding of the public policy impacts of regulatory and organizational decisions.
Doctor of Philosophy

Information Technology, PhD

Banner Code: VS-PHD-INFT

School: Volgenau School of Engineering

Department: Interdisciplinary Programs

The term “information technology” as used in Mason’s IT doctoral program, is intended to be interpreted in a broad sense as all aspects of information technology and the branches of engineering most closely associated with information and engineering. These aspects of technology are emphasized in Northern Virginia, and the relevance of the IT doctoral program has grown with the increasing dependence of the nation’s commerce on the effective use of information. Our focus on the science, engineering, and technology of information processing complements and enhances traditional approaches to engineering that are more strongly based on the physical and material sciences. Thus, the Information Technology PhD program is broad, and not surprisingly includes several specific concentrations.

The general doctoral requirements of Mason apply to this program.

Admission Requirements

Students are selected on the basis of scholarship and potential from among applicants with appropriate degrees from institutions of high standing.

Generally, a background in an information technology-related area, such as engineering, computer science, operations research, mathematics, and physical sciences is required for admission to the doctoral program. However, in some instances, well-qualified students without a clearly related prior degree (i.e., MS in Information Technology Management, MBA) may be offered admission. Most successful applicants already have a Master’s degree, however exceptionally qualified individuals without an MS may be accepted, but will be required to take more courses.

An undergraduate GPA of 3.00 and a graduate GPA of 3.50 are basic requirements for applicants. Applicants are required to submit: application for admission, undergraduate and graduate transcripts from previous colleges and universities, GRE test results, three letters of reference (preferably from college instructors), a résumé, a personal goal statement, and a self-evaluation form to identify research areas of interest. Foreign transcripts must be translated and evaluated (course-by-course preferred) by a member of the NACES Membership. Evaluations can be also be done by George Mason University, at no extra cost to the applicant; however, this typically adds 6-8 weeks to the application processing time. Please review George Mason University’s Policy on International Transcript Submission. An applicant’s entire background is examined before an admission decision is made.

To ensure a common ground of fundamentals, students should have a background in such topics as calculus, differential equations, linear algebra, discrete structures, probability, and statistics. In addition, students entering the PhD in Information Technology Program must have a sound working knowledge in computing as demonstrated by examples of programs or applications developed and tested in at least one high level programming language environment. Because much of the coursework within this program requires computational proficiency, experience with a variety of languages and computer hardware is useful as is an understanding of computer architecture. Highly-qualified students who do not present evidence of appropriate coursework may be admitted and then required to take appropriate articulation courses.

Students who wish to be considered for Mason’s Presidential Scholarship, which provides a stipend and tuition support for three years, must be a full-time student and submit GRE scores with a score of at least 1,200 or the equivalent score with their application. One Presidential Scholarship is awarded per PhD program per year.
Reduction of Credit

Students must complete a minimum of 72 graduate credits, which may be reduced by a maximum of 30 credits from an approved and completed master’s degree. Reduction of credit requires the approval of the program director or designee and the dean or designee of the school. They determine whether the credits are eligible for reduction of credit and applicable to the degree program and the number of credits to be reduced.

Degree Requirements

Information Technology doctoral candidates must earn a minimum of 72 graduate credits. The program is made up of a breadth requirement (assessed via qualifying exams) and specialized coursework (assessed via the comprehensive exam), followed by preparation of a dissertation proposal, an original research project, and final defense. To advance to candidacy, students must complete all coursework, pass the qualifying and comprehensive examinations, and defend a dissertation proposal.

The following degree plan is based on a student who receives a full 30 credit reduction. Students who do not receive a full credit reduction should choose additional credits in consultation with their advisors.

Doctoral Coursework/Plan of Study (18 credits)

Students must include in the plan of study a well-defined set of advanced courses in a focused area. Successful completion of this requirement should enable the student to do basic or applied research in a significant contemporary area in IT.

The 18 credits of graduate-level coursework must fulfill the following requirements:

- Coursework must be independent of the courses students take to prepare for the qualifying exams. That is, if a student takes a qualifying exam related to OR 541, then OR 541 cannot be counted as 3 credits of coursework.
- Courses that cannot be included in any plan of study are any INFS 500-level courses; any AIT courses; OR 540; STAT 501, STAT 502, STAT 503, STAT 535; and SYST 500. Exceptions must be approved in advance by the senior associate dean.
- At least 12 of the 18 credits must be in courses numbered 700 or higher, and these 12 credits cannot include directed reading, project, or thesis courses.
- A cumulative GPA of 3.50 is required in courses taken in the plan of study.

Concentrations (18 credits)

In lieu of creating a personalized plan of study (above), students have the option of selecting a concentration area in information systems, information security and assurance, or software engineering. A concentration may not be appropriate for students who conduct interdisciplinary research. Students who declare a concentration will have the concentration noted on their transcript. Students seeking a concentration must satisfy all requirements for the PhD in information technology, as well as specific requirements in the concentration.

Courses required for each concentration are in addition to courses taken to prepare for the Qualifying Exam.

▲ Concentration in Information Security and Assurance (ISA)

Students must take at least 18 credit hours, with at least 12 credits as follows:

- ISA 656 - Network Security Credits: 3
- ISA 673 - Operating Systems Security Credits: 3
- ISA 674 - Intrusion Detection Credits: 3
• ISA 681 - Secure Software Design Credits: 3
• ISA 697 - Topics in Information Security Credits: 1-6
• ISA 763 - Security Protocol Analysis Credits: 3
• ISA 764 - Security Experimentation Credits: 3
• ISA 796 - Directed Readings in Information Security Credits: 3
• ISA 862 - Models for Computer Security Credits: 3
• ISA 863 - Advanced Topics in Computer Security Credits: 3
• CS 700 - Quantitative Methods and Experimental Design in Computer Science Credits: 3
• Any CS, INFS or SWE course numbered 700 or higher, subject to the approval of the student's academic advisor.

▲ Concentration in Information Systems (ISYS)

Students must take at least 18 credit hours, with at least 12 credits in INFS or ISA courses numbered 700 or higher as follows:

• INFS 623 - Web Search Engines and Recommender Systems Credits: 3
• INFS 740 - Database Programming for the World Wide Web Credits: 3
• INFS 755 - Data Mining Credits: 3
• INFS 760 - Advanced Database Management Credits: 3
• INFS 770 - Knowledge Management for E-Business Credits: 3
• INFS 772 - Intelligent Agents and the Semantic Web Credits: 3
• INFS 774 - Enterprise Architecture Credits: 3
• INFS 796 - Directed Readings in Information Systems Credits: 3
• INFS 867 - Intelligent Databases Credits: 3
• ISA 562 - Information Security Theory and Practice Credits: 3
• ISA 656 - Network Security Credits: 3
• ISA 797 - Advanced Topics in Information Security Credits: 3

The remaining 6 credits from SWE and CS courses in Software Engineering and Computer Science:

• SWE 720 - Advanced Software Requirements Credits: 3
• SWE 721 - Reusable Software Architectures Credits: 3
• SWE 763 - Software Engineering Experimentation Credits: 3
• SWE 796 - Directed Readings in Software Engineering Credits: 3
• SWE 821 - Software Engineering Seminar Credits: 3
• SWE 823 - Software for Critical Systems Credits: 3
• SWE 824 - Program Analysis for Software Testing Credits: 3
• CS 583 - Analysis of Algorithms Credits: 3
• CS 688 - Pattern Recognition Credits: 3
• CS 700 - Quantitative Methods and Experimental Design in Computer Science Credits: 3
• CS 757 - Mining Massive Datasets Credits: 3
• CS 782 - Machine Learning Credits: 3
• CS 785 - Knowledge Acquisition and Problem Solving Credits: 3
• CS 787 - Decision Guidance Systems Credits: 3
• CS 880 - Research Topics in Artificial Intelligence Credits: 3
• CS 811 - Research Topics in Machine Learning and Inference Credits: 3

Note: Students without a credit reduction should select the remaining credits from any 600 level or higher INFS, ISA, CS or SWE courses or courses approved in advance by the student's academic advisor.

▲ Concentration in Software Engineering (SWE)
Students must take at least 18 credit hours with at least 12 credits at the 700 level as follows:

- SWE 763 - Software Engineering Experimentation Credits: 3
- or
- CS 700 - Quantitative Methods and Experimental Design in Computer Science Credits: 3

9 credits from SWE 700-level and SWE 800-level courses:

- SWE 720 - Advanced Software Requirements Credits: 3
- SWE 721 - Reusable Software Architectures Credits: 3
- SWE 722 - Service Oriented Architecture Credits: 3
- SWE 727 - Quality of Service for Software Architectures Credits: 3
- SWE 760 - Software Analysis and Design of Real-Time Systems Credits: 3
- SWE 795 - Advanced Topics in Software Engineering Credits: 3
- SWE 796 - Directed Readings in Software Engineering Credits: 3
- SWE 798 - Research Project Credits: 3
- SWE 823 - Software for Critical Systems Credits: 3
- SWE 824 - Program Analysis for Software Testing Credits: 3
- SWE 825 - Special Topics in Web-Based Software Credits: 3

6 credits from the following:

- SWE 619 - Object-Oriented Software Specification and Construction Credits: 3
- SWE 620 - Software Requirements Analysis and Specification Credits: 3
- SWE 621 - Software Modeling and Architectural Design Credits: 3
- SWE 622 - Distributed Software Engineering Credits: 3
- SWE 631 - Software Design Patterns Credits: 3
- SWE 632 - User Interface Design and Development Credits: 3
- SWE 637 - Software Testing Credits: 3
- SWE 642 - Software Engineering for the World Wide Web Credits: 3
- SWE 645 - Component-Based Software Development Credits: 3
- SWE 681 - Secure Software Design and Programming Credits: 3
- CS 706 - Concurrent Software Systems Credits: 3
- INFS 740 - Database Programming for the World Wide Web Credits: 3
- INFS 755 - Data Mining Credits: 3
- INFS 760 - Advanced Database Management Credits: 3
- INFS 770 - Knowledge Management for E-Business Credits: 3
- INFS 797 - Advanced Topics in Information Systems Credits: 1-6
- INFS 867 - Intelligent Databases Credits: 3
- ISA 562 - Information Security Theory and Practice Credits: 3
- ISA 656 - Network Security Credits: 3
- ISA 763 - Security Protocol Analysis Credits: 3
- ISA 764 - Security Experimentation Credits: 3
- ISA 862 - Models for Computer Security Credits: 3

Qualifying Exams

To satisfy the breadth requirement of the PhD degree, students must pass a set of written qualifying exams designed to test fundamental knowledge. Students who have already obtained an IT-relevant Master’s degree may already be prepared for the qualifying exams. These exams correspond to a set of disciplines related to the individual Master’s programs in the Volgenau School. Each exam is based on a reading list posted on the school’s web site. The qualifying exams are not associated with specific courses, although some courses may help students prepare for these exams. The qualifying exams are offered twice a
year at specified locations on campus, typically near the beginning of the fall and the spring semesters. Each exam is allocated two hours. The exams are graded on a pass or fail basis.

Students must indicate which exams are being requested through an appropriate form signed by the student and submitted to the office of the senior associate dean.

Each student must pass a set of four different exams in two consecutive offerings of the exams. Four exams must be attempted in the first offering. The exams attempted on the second offering need not be the same as in the first. A student who fails to pass four qualifying exams in two consecutive semesters is subject to termination from the program.

**Students must attempt a set of four exams no later than the first opportunity following the completion of 18 credits, or 30 credits if the student enters the program without a Master’s degree.**

**Dissertation Research (24 credits)**

Choose 24 credits from the following:

- IT 990 - Dissertation Topic Presentation Credits: 1 (required)
- IT 998 - Doctoral Dissertation Proposal Credits: 1-12
- IT 999 - Doctoral Dissertation Credits: 1-12 (must complete a minimum of 12 credits)

**Doctoral Supervisory Committee**

On admission to the program, students are assigned a temporary academic advisor. Students are responsible for working with the temporary advisor until they choose a dissertation director and establish a doctoral supervisory committee.

The doctoral supervisory committee includes the dissertation director, who must be a member of the Mason graduate faculty, and at least three other people from the Mason graduate faculty. The dissertation director and chair of a PhD in IT dissertation committee must have at least a 50% appointment in the Volgenau School. This rule does not apply to a co-director, provided that the chair and other co-director satisfies the “at least 50% rule.” At least three committee members must be from the Volgenau School, and at least two of the departments of the Volgenau School must be represented on this committee.

In addition, industrial representatives and faculty members from departments outside the school are highly desirable, but not required, on the committee. The doctoral supervisory committee administers the comprehensive exam, dissertation proposal presentation, and the dissertation predefense and defense. Permission for the comprehensive exam and dissertation defense are requested from the Volgenau School senior associate dean on the basis of a written request and plan that has been approved by the supervisory committee.

**Comprehensive Exam**

The comprehensive exam is an oral exam taken after students have satisfactorily completed all coursework requirements in their approved plan of study. To initiate the exam process, the student meets with the dissertation advisor to prepare a permission form, which has to be approved by the entire dissertation supervisory committee one month prior to the exam, to be forwarded to the senior associate dean for final approval. The permission form should contain the following items: a) a one page description of the intended area of research; and b) a reading list on which the student will be examined. The reading list should include articles and/or books that cover the fundamentals, state-of-the-art, and tools needed to perform research in the intended area.

The objective of the comprehensive exam is to allow the dissertation supervisory committee to assess the student’s readiness to complete doctoral research in an area of concentration. The duration of the oral exam is typically two hours. Students who fail the exam are allowed to retake it once. Failure in the second attempt results in termination from the program. Students must pass the comprehensive exam and dissertation proposal defense before being advanced to candidacy. The comprehensive exam must be attempted for the first time no later than one year after completing all coursework requirements (excluding 990, 998, and 999).
Dissertation Proposal Presentation

Near the end of the coursework, doctoral students prepare a written dissertation proposal to present to the doctoral supervisory committee. The proposal must be delivered by hard copy to the doctoral supervisory committee at least two weeks before the presentation. Students should enroll in IT 998 Doctoral Dissertation Proposal to complete this effort (note: students must pass the qualifying exam before enrolling in IT 998). During the term the student expects to present the dissertation proposal to the committee, the student is required to enroll in IT 990 Dissertation Topic Presentations. The dissertation proposal presentation must be at least one week after passing the comprehensive exam. After successfully completing this requirement, the student is formally admitted as a candidate for the PhD degree. The application for candidacy is submitted to the senior associate dean on a standard form.

Dissertation and Final Defense

With the concurrence of the dissertation supervisory committee, students proceed with the doctoral research, during which time they must be continuously enrolled in IT 999 Doctoral Dissertation. When the central portions of the research have been completed to the point that students are able to describe the original contributions of the dissertation effort, they submit the written dissertation to the committee and schedule an oral predefense to the committee. The predefense is to be held no sooner than one month after members of the committee have copies of the dissertation. Once the committee believes the student is ready, a final public oral defense may be scheduled no sooner than one month after the conclusion of the predefense so that the announcement is posted for at least two weeks. The entire dissertation committee and the senior associate dean must be present at the defense, unless an exception is approved by the senior associate dean in advance of the defense.

Following satisfactory evaluation of the oral defense of the dissertation by the committee, the student must prepare, with supervision from the dissertation director, a final publishable dissertation that represents a definitive contribution to knowledge in IT. If the candidate successfully defends the dissertation, the dissertation committee recommends that the final form of the dissertation be completed and the Volgenau School faculty and the graduate faculty of Mason accept the candidate for the PhD degree.

If the student fails to successfully defend the dissertation, the student may request a second defense, following the same procedures as for the initial defense. There is no time limit for this request other than general time limits for the doctoral degree. An additional predefense is not required, but students are strongly advised to consult with the committee before scheduling a second defense. If the student fails on the second attempt to defend the dissertation, the student will be terminated from the program.

Total: 72 credits

Engineer Degree

Information Technology Engineer Degree

Banner Code: VS-ENGR-INFT

School: Volgenau School of Engineering

Department: Interdisciplinary Programs

The engineer degree is a post-master’s degree but does not confer a doctorate. Students in the engineer degree can take advanced PhD courses and complete a project of an applied nature to fulfill program requirements. It is designed to meet the needs of working professionals seeking advanced and up-to-date training in IT areas, but who are not planning a research career.
Admission Requirements

Admission requirements for the engineer degree are the same as for the Information Technology, PhD.

Degree Requirements

Course Work/Plan of Study (30 credits)

Students must include in the plan of study a well-defined set of advanced courses in a focused area. Successful completion of this requirement should enable the student to complete an applied project in a contemporary area in IT.

The 30 credits of graduate-level coursework must fulfill the following requirements:

- The following courses may not be included in any plan of study: any INFS 500-level courses; any AIT courses; OR 540; STAT 501; STAT 502; STAT 503; STAT 535; and SYST 500. Exceptions must be approved in advance by the senior associate dean.
- At least 12 of the 30 credits must be in courses numbered 700 or higher, and these 12 credits cannot include directed reading, project, or thesis courses.
- A cumulative GPA of 3.50 is required in courses taken in the plan of study.

Supervisory Committee

On admission to the program, students are assigned a temporary advisor. Students are responsible for working with the temporary advisor until they select a project director and a supervisory committee. It is recommended that a student form a supervisory committee as soon as feasible. The supervisory committee includes the project director plus at least two additional members. The committee must contain at least two graduate faculty members from The Volgenau School. It is strongly recommended that the committee include at least one person from outside the university who is knowledgeable in the subject area of the project. The supervisory committee supervises the project proposal presentation and the project defense.

Project (12 credits)

Choose 12 credits from the following:

- IT 991 - Engineer Project Presentation Credits: 1
- IT 996 - Engineer Project Proposal Credits: 1-6
- IT 997 - Engineer Project Dissertation Credits: 1-6

Project Proposal Presentation

Near completion of the course work, each student prepares a written project proposal, which is presented to the supervisory committee. Students may enroll in IT 996 - Engineer Project Proposal to complete this effort. During the term students expect to present the project proposal to the committee, they should enroll in IT 991 - Engineer Project Presentation.

Project and Final Presentation

With the concurrence of the supervisory committee, students proceed with the project research, during which time they must continuously enroll in IT 997 - Engineer Project Dissertation. Students must complete a minimum of 12 credits from among IT 991, 996, and 997, with a minimum of 6 credits of IT 997. When the central portions of the project work have been completed to
the point that students are able to describe the contributions of the project effort, they submit the written project report to the supervisory committee. Once the committee believes the student is ready, a final public oral presentation may be scheduled; the application for the presentation must be submitted to the senior associate dean at least one month in advance of the presentation so that the announcement is posted for at least two weeks.

Following a satisfactory evaluation of the presentation of the project by the supervisory committee, the student must submit, with supervision from the project director, a final project that represents a definitive contribution to applied knowledge in IT. This document must be compliant with the university's regulations for appearance and must be submitted to the library. If the candidate successfully defends the project, the supervisory committee recommends that the final form of the project be completed and Volgenau School faculty and the graduate faculty of Mason recommend the candidate for graduation.

Total: 42 credits

Applying and Completing a PhD Program

Students who are awarded an engineer degree have the option of applying to one of our PhD programs. Candidates must satisfy all applicable university requirements and all requirements established by the doctoral program faculty. Doctoral candidates must earn a minimum of 72 graduate credits, which may be reduced by a maximum of 30 credits from a related master's degree or engineer degree.

Graduate Certificate

Data Analytics Graduate Certificate

Return to: Programs by Department

Banner Code: VS-CERG-DNIC

School: Volgenau School of Engineering

Department: Interdisciplinary Programs

This certificate program provides a broad overview of the end-to-end value chain for Big Data Analytics, from the capture and management of the data, through the analytics that harness the data to create value. The program is designed to provide a framework for the methodologies for organizing and integrating disparate data, analyzing and visualizing the integrated data, and determining what decisions or actions should be taken to generate value from the data. The program is comprised of 12 credits of required coursework.

The certificate is intended for students who are interested in addressing the challenge of transforming the massive data arising in applications such as business analytics, cyber defense/forensics, energy, finance, genomics, healthcare, intelligence, law enforcement, or transportation, into meaningful information. The program is intended for graduate students in areas where applications of big data may arise.

The graduate certificate may only be pursued on a part-time basis.

Admissions Requirements

Applicants should have an undergraduate degree from an accredited institution, with a GPA of at least 3.00 in their last 60 credits of study. While no specific undergraduate degree is required, a background in engineering, business, computer science, math, or information technology is desirable; alternatively, strong work experience with data or analytics may be used.
Certificate Requirements

The following four courses (12 credits) must be completed with a grade of B or better:

- AIT 580 - Analytics: Big Data to Information Credits: 3
- CS 504 - Principles of Data Management and Mining Credits: 3
- OR 531 - Analytics and Decision Analysis Credits: 3
- STAT 515 - Applied Statistics and Visualization for Analytics Credits: 3

Total: 12 credits

Master of Science

Management of Secure Information Systems, MS (VSE)

Banner Code: BU-MS-MSIS

Phone: 703-993-1880
Email: cyber@gmu.edu

The Executive Management of Secure Information Systems MS, an interdisciplinary program offered by the Volgenau School of Engineering, the School of Management, and the School of Public Policy; prepares professionals for the challenges of modern computerized information systems that have become increasingly complex and vulnerable to cyber attacks, resulting in a significant number of government regulations. Consequently, those responsible for the safe, secure, and efficient operation of such systems need to grasp their technical aspects and be familiar with both the principles of management and the public policy impact of regulatory and organizational decisions.

The program is run as a cohort with no electives. The entire program has a duration of 16 months including about seven days of study abroad, which is included in the tuition. Applicants to the program are expected to have at least three years of full-time relevant work experience.

Admission Requirements

Applicant requirements include:

- Application form and application fee.
- A bachelor's degree from a recognized university or an approved institution, recognized qualifications equivalent to a degree.
- Official copy of transcripts of all colleges and universities attended in the United States and abroad.
- Two professional letters of recommendation.
- Goals statement (statement of how and why applicants would benefit from the program).
- A current résumé.
- English proficiency standards as required of all Mason graduate students. In particular, applicants who have earned a bachelor's, master's, or doctoral degree from a regionally accredited university in the United States, Canada (excluding province of Quebec), United Kingdom, Ireland, Australia, and New Zealand are considered to have met that standard. All other applicants are required to take an English proficiency examination and meet minimum scores set by Mason in order to be considered for admission. The TOEFL or IELTS exams can be used to meet this requirement. The
minimum scores are: TOEFL: IBT (88 total with 20 points minimum in each section); CBT (230); and PBT (570); IELTS – Academic: 6.5 total band score.

- GMAT (recommended score: the mean GMAT scores of an entering class should meet or exceed 550 with an individual minimum of 500) or GRE (recommended score: 1200). The GMAT or GRE may be waived if the applicant’s record demonstrates the ability to succeed in a competitive and quantitative program.
- A minimum of three years of significant full-time work experience is required. Successful applicants generally have between three and five years of professional experience.

### MS-MSIS Degree Requirements

Students are responsible for familiarization and compliance with the Academic Policies in this catalog.

#### Required Courses (36 credits)

- MSEC 510 - Foundations of Cyber Security Credits: 2
- MSEC 511 - Security Practices in the Enterprise Credits: 2
- MSEC 520 - Networking Principles Credits: 1
- MSEC 620 - Networking Security Credits: 2
- MSEC 630 - Secure Information System Governance, Regulation, and Compliance Credits: 2
- MSEC 640 - Privacy and Ethics in an Interconnected World Credits: 2
- MSEC 641 - Enterprise Security Threats Credits: 1
- MSEC 642 - Enterprise Security Technologies Credits: 2
- MSEC 650 - Seminar: Enterprise Security Case Studies Credits: 1
- PUBP 610 - Organizations, Management, and Work: Theory and Practice Credits: 2
- PUBP 611 - Critical Infrastructure Protection in Theory, Policy and Practice Credits: 2
- TECM 610 - Communications and Leadership Credits: 2
- TECM 615 - Decision Making Using Accounting and Financial Data Credits: 3
- TECM 620 - Economics of Technology Management Credits: 2-3
- TECM 640 - Management of Consulting and Technical Professionals Credits: 1-3
- TECM 703 - Technology Assessment, Evaluation, and Investment Credits: 3
- TECM 735 - Technology Management Capstone Project Credits: 1-4 or MSEC 720 - Capstone Project in Management of Secure Information Systems Credits: 1-3
- TECM 750 - Global IT Management Credits: 1-4 or MSEC 710 - Global Residency Credits: 1-4

### Other Degrees

#### Mechanical Engineering Minor

**Banner Code:** ME

**School:** Volgenau School of Engineering

**Department:** Interdisciplinary Programs

Mechanical Engineering is the broadest of the engineering disciplines, concerned with anything that moves or uses energy. There are two major stems in mechanical engineering: mechanical systems and thermal fluid systems. Mechanical Engineers design, build, and analyze complex devices, systems and processes that involve the conversion of energy from one form to another, the production of work, and the transport of energy and mass from one location to another. This minor provides a foundation in...
mechanical engineering, and is most appropriate for students with a strong mathematics and science background, such as a major in another engineering or science field. The program is administered by the Volgenau School Dean's office.

Admissions and Course Work

To be admitted to the minor, students must have completed MATH 214 and PHYS 260/PHYS 261 with a grade of C or better. They also must satisfy the prerequisite and co-requisite requirements of each course in the minor.

The minor in mechanical engineering consists of a minimum of 21 credit hours of course work. All students must complete 15 credit hours of core courses. They must also choose one of three 6 credit hour elective options. All courses must be passed with a grade of C or better.

Core Requirements

- ENGR 107 - Introduction to Engineering Credits: 2
- CEIE 210 - Statics and Dynamics Credits: 3
- CEIE 310 - Mechanics of Materials Credits: 3
- ENGR 307 - Engineering Thermodynamics Credits: 3
- ME 360 - Mechanical Engineering Design Credits: 3
- ME 350 - Mechanical Engineering Laboratory I Credits: 1

Elective Requirements

Option 1: Thermal Fluid Systems

- ME 320 - Fluid Mechanics Credits: 3
  (with permission from the minor coordinator CEIE 240 - Hydraulics Credits: 3 may be substituted for the above)
- ME 330 - Heat Transfer Credits: 3

Option 2: Mechanical Systems

- ME 362 - Mechanical Elements Credits: 3
- ME 368 - Manufacturing Credits: 3

Option 3: Systems Dynamics and Control

- ME 380 - System Dynamics Credits: 3
- ME 390 - Control Engineering Credits: 3
  With permission from the minor coordinator, the following may be used to satisfy Option 3:
- SYST 220 - Dynamical Systems I Credits: 3
- SYST 221 - Systems Modeling Laboratory Credits: 1
- SYST 320 - Dynamical Systems II Credits: 3

Total: 21 credits

■ Statistics
School: Volgenau School of Engineering

Faculty

Professors: Carr, Gentle, Hughes-Oliver, Rosenberger (chair), Wegman

Associate professors: Davis (associate chair), Diao, Miller, C. Sutton, Vidyashankar

Assistant professors: Tang, Zhao

Instructors: Izmirli, Sims, Strazzeri, Surina

Emeritus faculty: Bolstein

Course Work

The Statistics Department offers all courses designated STAT in the Courses section of this catalog. Statistical methods and methods for data analysis are crucial for researching and exploring the life sciences, natural sciences, social sciences, business, nursing, education, and engineering. The Statistics Department offers a variety of introductory courses and more advanced course work in specialized statistical methodology and applications. The focus of the department’s offerings is applied, computational, and theoretical, with special emphasis on biostatistics, graphics and visualization, federal and survey statistics, and data analysis.

Introductory courses are targeted for undergraduates in the College of Humanities and Social Sciences and the College of Health and Human Services, as well as in the Volgenau School. The STAT 250–350 sequence is targeted for general audiences, while the STAT 344–354 sequence is targeted for technical and scientific audiences. STAT 362 deals with computer statistical packages and is appropriate as a second or third course for students from a wide variety of backgrounds. It is strongly recommended for students who elect to minor in data analysis.

Although the department does not offer an undergraduate degree in statistics, it does offer a minor in data analysis. Also, a variety of advanced undergraduate courses are available for inclusion in other degree programs.

Bachelor of Science/Accelerated Master of Science

BS (selected)/Statistical Science, Accelerated MS

School: Volgenau School of Engineering

Department: Statistics

This degree option allows Mason students to earn an MS in Statistical Science in less time than if they had first graduated from a Volgenau School bachelor's program or the BS in Mathematics and then applied to the MS program.

Admission Requirements

Students must begin MS work within six months following completion of a BS degree in any one of the Volgenau School major areas or a BS in mathematics from the College of Science. Admission is guaranteed to any student with an overall GPA of 3.00 in courses taken after the first two undergraduate years (60 credits) with grades of B or better in the two 500-level STAT courses selected from STAT 544, 554, and 574.
Degree Requirements

The program consists of a minimum of 144 credits that satisfy the requirements for both the BS in the undergraduate major and the MS in statistical science with 6 credits of overlap. Twenty-four credits are required for the MS, provided that students have taken two of STAT 544, 554, and 574 as part of their BS course work.

Doctor of Philosophy

Statistical Science, PhD

Banner Code: VS-PHD-STAT

School: Volgenau School of Engineering

Department: Statistics

The PhD in Statistical Science represents the highest academic attainment for a statistician and, as such, requires in-depth knowledge of modern statistical theory and practice. The degree program is a hybrid of mathematical theory, computation, and data analysis; and students are expected to be proficient in all three. Current research areas of key department faculty in the program include biometric identification, biostatistics, statistical genetics, statistical graphics, data confidentiality, networking analysis, and data exploration.

Admission Requirements

Students should have a master's degree in a mathematically-intensive discipline with a minimum 3.50 GPA. Students entering with a master's degree are expected to have completed coursework equivalent to STAT 544, 554, 652, and 656 with exceptional performance. The program also requires a course in advanced calculus (MATH 315 or equivalent) with a B or better. In exceptional circumstances, talented students with a mathematically-intensive undergraduate degree may be admitted. The GRE Exam is required for admission.

Reduction of Credit

Students must complete a minimum of 72 graduate credits, which may be reduced by a maximum of 24 credits with a master's degree in statistics, mathematics, or similar discipline. Reduction of credit requires the approval of the program director or designee and the dean or designee of the school. They determine whether the credits are eligible for reduction of credit and applicable to the degree program and the number of credits to be reduced. Students with an MS from GMU must complete a minimum of 72 credits from their combined MS and PhD programs.

Degree Requirements

The 72 hours of required doctoral-level credits typically consist of 48 credits of regular coursework and 24 credits of dissertation research. The following degree plan is based on a student who receives a full 24 credit reduction. Students who do not receive a full credit reduction should choose additional credits in consultation with their advisor.

Doctoral Course Work (24 credits)

Students are required to complete 24 credits of advanced emphasis course work, including three core courses:
The following courses are required:

- STAT 876 - Measure and Linear Spaces Credits: 3 or STAT 971 - Probability Theory Credits: 3
- STAT 972 - Mathematical Statistics I Credits: 3
- STAT 973 - Mathematical Statistics II Credits: 3

The remaining five courses are selected and approved by the doctoral supervisory committee and the PhD Program Director and should be numbered 600 or above. STAT 652 and 656 do not count toward the degree.

Qualifying Exam

Written qualifying exams will be taken in the following areas:

- Applied Probability
- Applied Statistics
- Statistical Inference

Qualifying exams are offered in August and January. Students are required to take the qualifying exams within one year of admission. Students who do not pass all three exams in two consecutive exam periods are terminated from the program.

Dissertation Research (24 credits)

In order to advance to candidacy, students must complete all coursework, pass the qualifying and comprehensive examinations, and defend a dissertation proposal.

Select 24 credits from the following:

- STAT 990 - Dissertation Topic Presentation Credits: 1 (required)
- STAT 998 - Doctoral Dissertation Proposal Credits: 1-12
- STAT 999 - Doctoral Dissertation Credits: 1-12 (must complete a minimum of 12 credits)

Doctoral Committee Selection

Following successfully passing the qualifying exams, students should select a dissertation director and a doctoral studies committee. The chair of the doctoral studies committee must be a member of the graduate faculty with a regular appointment in the Department of Statistics, and will typically be the dissertation director. The doctoral studies committee consists of a chair, two members of the graduate faculty who hold regular appointments in the Department of Statistics, and an external member. The doctoral studies committee must be approved by the director of the doctoral program in statistical science.

Advancement to Candidacy

Admission to candidacy is acquired on completion of an oral comprehensive exam administered by the doctoral supervisory committee, covering the three core courses and five advanced emphasis courses, and a dissertation proposal. A student who fails the oral comprehensive exam may take it a second time, within six months. If the student fails a second time, the student is terminated from the program. A student must wait at least six weeks after passing the oral comprehensive exam before the dissertation proposal. A student who fails the dissertation proposal may take it a second time, within six months. If the student fails a second time, the student is terminated from the program.

Doctoral Defense

The dissertation defense serves as the student’s final examination and is conducted by the doctoral supervisory committee. Both the comprehensive exam and final exam are scheduled on approval of a written request to the department chair.

For more information, e-mail specific questions to statistics@gmu.edu.
Total: 72 credits

Graduate Certificate

Federal Statistics Graduate Certificate

Banner Code: VS-CERG-FSS

School: Volgenau School of Engineering

Department: Statistics

This professional program is targeted at upgrading the skills of practitioners. The federal statistical system is a complex data collection and analysis system that requires a wide variety of multidisciplinary skills for its maintenance. The federal statistics certificate is intended to respond to the need for broad training in statistics, survey methods, and data analysis, including graphics and data visualization. The program is extremely flexible and can be tailored to the needs of students within the federal statistical sector. It is also intended to be responsive to the needs of those in state and local governments, and those in the private sector involved in the collection, interpretation, or statistical analysis of federal data.

The graduate certificate may only be pursued on a part-time basis.

Admission Requirements

Potential candidates must hold a bachelor’s degree and have taken at least two courses in calculus and one course in calculus-based probability and statistics. These minimal course requirements are normally satisfied by students who have successfully completed courses equivalent to the following Mason courses: MATH 113, MATH 114, and STAT 344. Candidates must also be computer literate. Applicants typically have degrees in such fields as sociology, economics, engineering, mathematics, statistics, and business. Candidates should inquire with the department’s graduate coordinator for information on program planning. Courses are offered in late afternoon and evening and are particularly suitable for part-time students.

Certificate Requirements

The certificate program consists of 12 credits: 9 credits of certificate courses plus 3 credits of electives. Some courses may have prerequisites beyond minimal admission requirements for which students must qualify or seek a waiver from the appropriate instructor.

Certificate Courses (9 credits)

Choose from the following list. The certificate courses build the foundations of statistical analysis and survey methods. All of these certificate courses, except for STAT 535, may be used for credit toward the MS in statistical science. Credit is granted for only one of STAT 535 and 554.

- STAT 535 - Analysis of Experimental Data Using SPSS Credits: 3
- STAT 544 - Applied Probability Credits: 3
- STAT 554 - Applied Statistics Credits: 3
- STAT 560 - Biostatistical Methods Credits: 3
Elective Courses (3 credits)

Elective courses may be chosen from STAT courses numbered 500-775.

Total: 12 credits

Master of Science

Biostatistics, MS

Banner Code: VS-MS-BSTA

School: Volgenau School of Engineering

Department: Statistics

The MS in Biostatistics will allow students to specialize in the design and analysis of health-related and biological studies, while maintaining the rigor and technical training of the Statistical Science master’s program.

In this degree, students will take a statistics core and a “bio” core, involving courses in public health, biology, and clinical medicine (including ethics). It also involves a research core which allows students to solve real data problems in the biological or health area and collaborate with other scientists in an interdisciplinary team. Finally, students will choose from electives in bioinformatics, global and community health, or targeted statistics courses.

This graduate degree prepares students for analyzing difficult data specific to biology and health. The program, with its research core, will also be sufficiently rigorous for students who wish to pursue a PhD in Biostatistics.

Admission Requirements

In addition to satisfying general admission requirements for graduate study, all applicants are expected to have basic computer literacy. They also must hold a bachelor’s degree from an accredited institution in a field that includes coursework in multivariable calculus, matrix or linear algebra, statistics, and calculus-based probability. Applicants with degrees in such fields as mathematics, statistics, and some engineering programs usually meet these requirements. For applicants with degrees in other fields, these requirements are normally satisfied if students have successfully completed courses equivalent to the following Mason courses: MATH 113, 114, 213; MATH 203 or 321; STAT 250 or 344; and STAT 346 or MATH 351. Coursework taken to correct deficiencies in undergraduate preparation is not counted toward the degree.

Degree Requirements
In addition to meeting general requirements that apply to master’s degrees at Mason, all students must complete the 24-credit core requirements for the degree. A grade of “B-” or better is required in all 500-level statistics core courses. Students build on these core requirements by choosing 12 credits of electives.

Eight core courses (24 credits)

Statistics Core (9 credits):
The Statistics core provides the basic probability, statistical analysis techniques, and statistical modeling tools that all biostatisticians must know, and provides a basis for higher level elective coursework.

- STAT 544 - Applied Probability Credits: 3
- STAT 554 - Applied Statistics Credits: 3
- STAT 656 - Regression Analysis Credits: 3

Bio Core (9 credits):
The Bio core is designed to provide the biological background necessary for biostatisticians. These courses offer preparation in the areas of public health and epidemiology (GCH 712), as well as biology, including genetics and proteomics (BIOS 743). In addition, this portion of the core curriculum ensures that students are trained in the statistical techniques required for clinical medicine, and includes material on ethics in research (STAT 560).

- GCH 712 - Introduction to Epidemiology Credits: 3
- BIOS 743 - Genomics, Proteomics, and Bioinformatics Credits: 3
- STAT 560 - Biostatistical Methods Credits: 3

Research Core (6 credits):
The Research core has been designed to assist students in the development of the requisite skills for careers in consulting or research. These courses will allow students to consult directly with biologists and medical and public health scientists on real data problems and provide opportunities to write reports and give oral presentations (STAT 634). This section also includes STAT 798 which requires that a master’s project be completed under the guidance of a faculty in the Department of Statistics. It involves applications of biostatistical methodology to either the design or analysis of biostatistical data. Students will work directly with the advisor for a semester and write a master’s level report.

- STAT 634 - Case Studies in Data Analysis Credits: 3
- STAT 798 - Master’s Research Project Credits: 3

Four elective courses (12 credits)
The electives labeled STAT are specifically chosen from the Department’s master’s-level electives to include techniques that are particularly important for biostatisticians. All 700-level statistics courses require STAT 652 as a prerequisite.

- BINF 630 - Bioinformatics Methods Credits: 3
- GCH 680 - International Research Ethics and Methods Credits: 3
- GCH 806 - Advanced Multivariate Statistics and Data Analysis for Health Care Research Credits: 3
- STAT 652 - Statistical Inference Credits: 3
- STAT 655 - Analysis of Variance Credits: 3
- STAT 657 - Nonparametric Statistics Credits: 3
- STAT 662 - Multivariate Statistical Methods Credits: 3
- STAT 663 - Statistical Graphics and Data Exploration I Credits: 3
- STAT 665 - Categorical Data Analysis Credits: 3
- STAT 668 - Survival Analysis Credits: 3
- STAT 756 - Alternative Regression Methods Credits: 3
- STAT 760 - Advanced Biostatistical Methods Credits: 3
- STAT 773 - Statistical Methods for Longitudinal Data Analysis Credits: 3

Total: 36 credits

**Mathematics and Statistical Science Dual-Degree MS (VS)**

**Banner Codes:** SC-MS-MATH, VS-MS-STAT

**Schools:** Volgenau School of Engineering and College of Science

**Department:** Statistics and Mathematical Sciences

This program allows students to earn an MS degree in Mathematics and an MS degree in Statistical Science by completing 48 credits of course work in both areas instead of the 60 that would be required if the degrees were sought independently.

**Admission Requirements**

Applicants must satisfy admission requirements for both the Mathematics, MS and the Statistical Science, MS programs. A joint faculty committee from the Mathematical Sciences and Statistics Departments make final admission decisions into the dual-degree program.

**MS-MATH/STAT Dual-Degree Requirements**

The dual-degree program requires a total of 48 credits as specified below:

- MATH 621 - Algebra I Credits: 3
- MATH 675 - Linear Analysis Credits: 3
- MATH 677 - Ordinary Differential Equations Credits: 3 or MATH 678 - Partial Differential Equations Credits: 3
- MATH 685 - Numerical Methods Credits: 3
- STAT 544 - Applied Probability Credits: 3
- STAT 554 - Applied Statistics Credits: 3
- STAT 652 - Statistical Inference Credits: 3
- STAT 656 - Regression Analysis Credits: 3

**Elective Credits**

- 12 elective credits in MATH courses numbered 610 or higher, excluding MATH 653, 654, 655 and 799. Courses must be approved in advance by the student’s mathematical sciences academic advisor and the mathematical sciences graduate coordinator.
- 12 elective credits in 500-, 600-, or 700-level STAT courses, excluding STAT 535 and 799. Courses must be approved in advance by the student’s statistics academic advisor and the statistics graduate coordinator.
Total: 48 credits

Notes:

- Students in either the BS/Accelerated MS in Mathematics program or the BS(selected)/Accelerated MS in Statistical Science program cannot get a reduction of 6 credits toward this dual degree. Students who want to proceed to a PhD degree will only be able to waive the number of credits specified in the associated PhD degree requirements, even though they will have 48 credits at the MS level.
- If a student decides not to complete the required 48 credits, a single MS degree will not be granted unless the student fulfills the requirements for either the MS in Mathematics or the MS in Statistical Science.
- Once a student receives one of the MS degrees from either department, the student will no longer be eligible for the reduction in credit (i.e., will need to complete 30 credits) if the student later decides to earn the other MS degree.

Operations Research and Statistical Science Dual-Degree MS (STAT)

Banner Codes: VS-MS-OPRS, VS-MS-STAT

School: Volgenau School of Engineering

Department: Statistics

This program allows students to earn an MS in Operations Research and an MS in Statistical Science by completing 48 credits of course work in both areas instead of the 60 that would be required if the degrees were sought independently.

Admission Requirements

Applicants must satisfy admission requirements for the MS in Operations Research Program and the MS in Statistical Science Program. A joint faculty committee from the Statistics and Systems Engineering and Operations Research Departments make final admission decisions into the dual-degree program.

MS-OPRS/STAT Dual Degree Requirements

The dual degree program requires a total of 48 credits as specified below.

Required Courses (24 credits)

- OR 541 - Operations Research: Deterministic Models Credits: 3
- OR 542 - Operations Research: Stochastic Models Credits: 3
- OR 635 - Discrete System Simulation Credits: 3
- OR 699 - Masters Project Credits: 3
- STAT 544 - Applied Probability Credits: 3
- STAT 554 - Applied Statistics Credits: 3
- STAT 652 - Statistical Inference Credits: 3
- STAT 656 - Regression Analysis Credits: 3
Elective Credits in OR Courses (12 credits)

12 elective credits in OR courses at the 600 level, including at least one deterministic methods course and at least one stochastic methods course.

**Deterministic Methods Courses:**
- OR 641 - Linear Programming Credits: 3
- OR 642 - Integer Programming Credits: 3
- OR 643 - Network Modeling Credits: 3
- OR 644 - Nonlinear Programming Credits: 3

**Stochastic Methods Courses:**
- OR 645 - Stochastic Processes Credits: 3
- OR 647 - Queuing Theory Credits: 3
- OR 675 - Reliability Analysis Credits: 3
- OR 677 - Statistical Process Control Credits: 3

Elective Credits in STAT Courses (12 credits)

12 elective credits in 500-, 600-, or 700-level STAT courses, excluding 535. Courses must be approved in advance by the student's statistics academic advisor and the statistics graduate coordinator.

Notes:

- A maximum of 6 credits across the two disciplines may be in independent research (thesis). The requirements for independent research are the same as detailed for the associated MS program.
- Students in either the BS/Accelerated MS in Operations Research program or the BS/Accelerated MS in Statistics program cannot get a reduction of 6 credits toward this dual degree. Students who want to proceed to a PhD degree will only be able to waive the number of credits specified in the associated PhD degree requirements, even though they will have 48 credits at the MS level.
- If a student decides not to complete the required 48 credits, a single MS degree will not be granted unless the student fulfills the requirements for the MS in Operations Research or the MS in Statistical Science.
- Once a student receives one of the MS degrees from either department, the student will no longer be eligible for the reduction in credit (i.e., will need to complete 30 credits) if the student later decides to earn the other MS degree.

Total: 48 credits

**Statistical Science, MS**

**Banner Code:** VS-MS-STAT

**School:** Volgenau School of Engineering

**Department:** Statistics

Statistical science is regarded as one of the oldest and most successful information technology (IT) subjects. It focuses on the conversion of raw data into information. In this graduate program, students are trained in the theory and practice of statistical methodology, particularly as it relates to high-technology applications.
An accelerated master’s option is available to students in selected bachelor's of science programs. See BS (selected)/Statistical Science, Accelerated MS for specific requirements.

**Admission Requirements**

In addition to satisfying general admission requirements for graduate study, all applicants are expected to have basic computer literacy. They also must hold a bachelor’s degree from an accredited institution in a field that includes coursework in multivariable calculus, matrix or linear algebra, statistics, and calculus-based probability. Applicants with degrees in such fields as mathematics, statistics, and some engineering programs usually meet these requirements. For applicants with degrees in other fields, these requirements are normally satisfied if students have successfully completed courses equivalent to the following Mason courses: MATH 113, 114, 213; MATH 203 or 321; STAT 250 or 344; and STAT 346 or MATH 351. Coursework taken to correct deficiencies in undergraduate preparation is not counted toward the degree.

**Degree Requirements**

In addition to meeting general requirements that apply to master’s degrees at Mason, all students must complete the 12-credit core requirements for the degree. Grades of B- or better are required in two of the core courses: STAT 544 and STAT 554. Students build on these core requirements by choosing 12 credits of methodology courses and 6 credits of electives.

Students select either the professional or research option, depending on career ambitions. This choice must be made no later than the end of the semester in which 15 credits have been completed. The professional option provides MS degree qualifications to those seeking an expanded knowledge base in modern statistical theory and practice but do not wish to pursue a research career. The research option is for students planning to continue with a PhD degree, or begin/continue careers in statistical methodology research.

**Professional Option:**

The professional option focuses on completing coursework in modern statistical theory and practice. 30 credits are required for the degree: 12 credits of core courses (taken by all MS students), 12 credits of methodology courses, and 6 credits of electives. Students electing this option are encouraged to pursue a broad background in statistical science, and they may seek to concentrate on applications of statistical methodology to other disciplines.

Students who select the professional option may elect to complete a master’s research project resulting in a technical report. This report is not an original research report but a scholarly essay on a topic of current interest in the statistical science discipline. The technical report is usually about 20 to 25 pages long and demonstrates the student’s ability to read and synthesize current technical literature into a scholarly essay. The report is evaluated by the student’s adviser, taking into account the comprehensiveness of the coverage of the scientific literature, the accuracy of presentation and interpretation, and the literary style. Students are notified of their evaluations, and they may be required to revise their report to further develop their skills in preparing reports on technical subjects. The report is usually written in the context of 3 credits of STAT 798 Master’s Research Project, which count as elective credits. Students opting not to complete a research project must take 30 credits of coursework.

**Research Option:**

The research option requires 30 credits, including 6 credits that must be in independent research (thesis). Research is done under the guidance of a faculty member. Research may be carried out at Mason or, if appropriate, at nearby facilities. For example, students may pursue research at their place of employment on topics of interest to their employer, provided the research meets the standards of the university. The thesis is usually written in the context of 6 credits of STAT 799 - Master's Thesis, which count as elective credits. The remaining 24 credits include the 12 core credits and 12 methodology credits.

In addition to satisfying general university requirements for a master’s degree, candidates who select the research option must submit a thesis based on the research to the student’s thesis committee, which must give preliminary approval. The composition and appointment of this committee follows graduate program policies.
Candidates also must pass a final oral exam that concentrates on, but is not limited to, the area on which the thesis is written. The exam is administered by the student’s thesis committee, and all interested members of the graduate faculty are invited to attend and participate in the questioning. The thesis committee makes the final decision on whether the candidate passes or fails.

Core Courses (12 credits)

The core coursework covers the basic elements of statistics at the graduate level. STAT 544 covers the major mathematical framework for statistical theory and practice. STAT 652 provides basic statistical theory. After completing this course, students have the theoretical basis from which statistical methods are derived.

STAT 554 is a survey of statistical methods that have become the backbone of statistical practice. Focus in this course is on techniques that quantify random behavior. The final core course is STAT 656, which focuses on the theory and application of linear regression analysis.

- STAT 544 - Applied Probability Credits: 3
- STAT 554 - Applied Statistics Credits: 3
- STAT 652 - Statistical Inference Credits: 3
- STAT 656 - Regression Analysis Credits: 3

Methodology Courses (12 credits)

Methodology courses may be chosen from any STAT courses numbered 540-775.

Elective Courses (6 credits)

Elective courses may be chosen from any STAT courses numbered 500-519, 540-799. Students opting to complete either a Master’s Research Project (STAT 798) or Master’s Thesis (STAT 799) must notify the department’s graduate coordinator in writing no later than the end of the semester in which 15 credits have been completed. Certain courses from other departments may be used as elective courses within a customized plan of study. A customized plan of study requires prior written approval by the department’s graduate coordinator; it must be submitted for approval no later than the end of the semester in which 15 credits have been completed and must include a written justification for the proposed plan. Any changes to a customized plan of study must be approved in writing.

Total: 30 credits

Note:

A student concurrently enrolled in the Actuarial Sciences Graduate Certificate and the MS in Statistical Science may count MATH 555 and 556 as approved elective courses and may count MATH 653 and 654 as methodology courses when designing a curriculum for the MS in Statistical Science. Credit toward the MS in Statistical Science will not be given for both MATH 654 and STAT 668. The full curriculum should be designed with the approval of the student’s statistics academic advisor and the statistics graduate coordinator. The Graduate Certificate in Actuarial Sciences must be completed prior to or concurrently with the MS in Statistical Science. Otherwise, at most two of MATH 555, 556, 653, and 654 can be counted toward the MS in Statistical Science as elective courses; none can be applied as methodology courses.

Course Lists

Following are course lists by area of interest. Students do not have to select all of their courses from any one of these lists; they are provided only as a guide.
Applied Statistics:

- STAT 560 - Biostatistical Methods Credits: 3
- STAT 574 - Survey Sampling I Credits: 3
- STAT 655 - Analysis of Variance Credits: 3
- STAT 657 - Nonparametric Statistics Credits: 3
- STAT 662 - Multivariate Statistical Methods Credits: 3
- STAT 663 - Statistical Graphics and Data Exploration I Credits: 3
- STAT 665 - Categorical Data Analysis Credits: 3
- STAT 674 - Survey Sampling II Credits: 3

Biostatistics:

- STAT 560 - Biostatistical Methods Credits: 3
- STAT 665 - Categorical Data Analysis Credits: 3
- STAT 668 - Survival Analysis Credits: 3
- STAT 760 - Advanced Biostatistical Methods Credits: 3
- STAT 773 - Statistical Methods for Longitudinal Data Analysis Credits: 3

Computational Statistics:

- STAT 657 - Nonparametric Statistics Credits: 3
- STAT 663 - Statistical Graphics and Data Exploration I Credits: 3
- STAT 751 - Computational Statistics Credits: 3
- STAT 763 - Statistical Graphics and Data Exploration II Credits: 3

Engineering Statistics:

- STAT 645 - Stochastic Processes Credits: 3
- STAT 655 - Analysis of Variance Credits: 3
- STAT 658 - Time Series Analysis and Forecasting Credits: 3
- STAT 662 - Multivariate Statistical Methods Credits: 3
- STAT 719 - Graphical Models for Inference and Decision Making Credits: 3
- STAT 758 - Advanced Time Series Analysis Credits: 3

Non-Degree

Data Analysis Minor

Banner Code: DATA

School: Volgenau School of Engineering

Department: Statistics
The minor provides students with a background in data analysis and statistical methodology. It is intended to complement undergraduate degree programs in the Volgenau School and the College of Science, especially computer science, economics, environmental engineering, geography, mathematics, nursing, psychology, public administration, sociology, and systems engineering.

Course Work

The minor requires 15 credits: a core sequence of 6 credits, plus 9 credits of electives. Grades of C or better are required in all courses. At least 9 of the 15 credits must be in STAT courses. At least 8 credits must be in courses not required by the student’s major.

Core Sequence (6 credits)

To satisfy the core requirement, students must complete one of these sequences.

- STAT 250 - Introductory Statistics I Credits: 3
- STAT 350 - Introductory Statistics II Credits: 3
  OR
- STAT 344 - Probability and Statistics for Engineers and Scientists I Credits: 3
- STAT 354 - Probability and Statistics for Engineers and Scientists II Credits: 3
  OR Provided the 9 elective credits are all STAT courses, mathematics majors may substitute:
- MATH 351 - Probability Credits: 3
- MATH 352 - Statistics Credits: 3

Elective Courses (9 credits)

The 9 elective credits must be chosen from a list of courses approved by the department's undergraduate coordinator. Courses currently approved for the minor are the following:

- STAT 362 - Introduction to Computer Statistical Packages Credits: 3
- STAT 435 - Analysis of Experimental Data Using SPSS Credits: 3
- STAT 455 - Experimental Design Credits: 3
- STAT 474 - Introduction to Survey Sampling Credits: 3
- STAT 499 - Special Topics in Statistics Credits: 3
- STAT 410 - Probability and Statistics for Engineers and Scientists I Credits: 3
- STAT 454 - Probability and Statistics for Engineers and Scientists II Credits: 3
  OR Provided the 9 elective credits are all STAT courses, mathematics majors may substitute:
- MATH 351 - Probability Credits: 3
- MATH 352 - Statistics Credits: 3

- BINF 401 - Bioinformatics and Computational Biology I Credits: 3
- CD 010 - Scientific Data Mining Credits: 3
- CEIE 410 - Geographic Information Systems in Engineering Credits: 3
- CS 450 - Database Concepts Credits: 3
- CS 484 - Data Mining Credits: 3
- ECON 345 - Introduction to Econometrics Credits: 3
- ECON 445 - Design and Analysis of Experiments Credits: 3
- GCH 460 - Program Evaluation Credits: 3
- GOVT 300 - Research Methods and Analysis Credits: 4
- GGS 300 - Quantitative Methods for Geographical Analysis Credits: 3
- GGS 354 - Data Analysis and Global Change Detection Techniques Credits: 3
- OR 335 - Discrete Systems Modeling and Simulation Credits: 3 (or crosslisted course SYST 335)
• OR 441 - Deterministic Operations Research Credits: 3
• OR 442 - Stochastic Operations Research Credits: 3
• PSYC 300 - Statistics in Psychology Credits: 4
• SOCI 313 - Statistics for the Behavioral Sciences Credits: 4
• SOCI 405 - Analysis of Social Data Credits: 4
• SYST 469 - Human Computer Interaction Credits: 3
• SYST 473 - Decision and Risk Analysis Credits: 3

Total: 15 credits

■ Systems Engineering and Operations Research

Phone: 703-993-1670
Web: seor.gmu.edu

School: Volgenau School of Engineering

Faculty

Professors: Adelman, Chang, Chen, Hoffman, Laskey, Nash, Polyak, Sage, Schum, Sofer (chair), Zaidi

Associate professors: Brouse, Ganesan, Loerch, Sherry, Shortle

Assistant professors: Berg, Costa, Huang, Xu

Research and affiliate professors: Wagner, Wolman

Adjunct professors: Alexander, Bailey, Barry, Camp, Carley, Charboneau, Clemons, Ferreiro, Humphrey, Killam, Laveson, Morris, Mulhearn, Rothwell, Soller, Stephenson, Wagner, Wieland, Yost

Emeritus faculty: Donohue, Palmer

The Systems Engineering and Operations Research (SEOR) Department offers a bachelor’s degree in systems engineering, a minor in systems engineering and operations research, a minor in aviation flight training and management, a master’s degree in systems engineering, a master’s degree in operations research, and a doctoral degree in systems engineering and operations research. In addition, the department offers seven certificate programs at the master’s level: architecture-based systems integration; command, control, communications, computing, and intelligence (C4I); discovery, design and innovation; military operations research; computational modeling; systems engineering analysis and architecture; and systems engineering of software-intensive systems. The Department also offers a dual degree MS in Operations Research and Statistical Science jointly with the Statistics Department.

Systems engineers determine the most effective ways to use all of a system’s components: people, machines, materials, information, and energy. The engineers plan, design, implement, and manage integrated systems, working to ensure performance, safety, reliability, and maintainability. They also work to ensure that systems are delivered on time at a reasonable cost. Examples of systems are computer networks, the national airspace system, automobiles, intelligent robots, the electric grid, the Metro, and Mason. Whereas other engineering disciplines concentrate on individual aspects of a system, such as electronics, ergonomics, or software, systems engineers focus on the system as a whole. Systems engineering, perhaps more than any other engineering discipline, is involved with the human and organizational aspects of developing the desired system. Systems engineering is the people-oriented engineering profession. Systems engineering was rated as the number one job in 2009 by Money and PayScale.com, the top among top 100 careers with great pay and superior growth prospects.
Operations research is the professional field that uses analytical methods in engineering to support management decision making, often focusing on how best to allocate limited resources. Operations researchers do for organizations what physicists do for the physical world: they try to find order in apparent chaos by identifying the structure in complex situations and understanding how the components of organizations interact. The goal is to explain and predict the effects of actions taken on these systems. Much of this work is developing and manipulating mathematical and computer models of organizational systems composed of people, machines, information, and procedures. The overall purpose is to provide a rational basis for decision-making.

Mason's program in operations research focuses on quantitative modeling and analysis of complex-systems operating under uncertain conditions.

There is much overlap between systems engineering and operations research. The department encourages students of either discipline to elect courses in the other. For more information, go to seor.gmu.edu.

Course Work

The department offers all courses designated SEOR, SYST and OR in the Courses section of this catalog.

Bachelor of Science

Systems Engineering, BS

Banner Code: VS-BS-SYST

School: Volgenau School of Engineering

Department: Systems Engineering and Operations Research

The program leading to the BS in systems engineering prepares students for a professional career in systems engineering. The educational program reflects the systems engineer’s unique perspective, which considers all aspects of a system throughout its lifetime. Mason’s systems engineering program is interdisciplinary, drawing from engineering, computer science, operations research, psychology, and economics. The core systems engineering courses tie these diverse threads to provide a global understanding of how individual engineering disciplines fit into the development of complex, large-scale systems. Students gain depth in a technical area by selecting a sequence of technical electives that constitute an emphasis. Students choose their own emphasis with the help of their advisor. A year-long senior design project provides hands-on experience in applying various systems engineering methods and tools.

The mission of the undergraduate program is to equip students with the ability to participate productively in the many professional activities associated with engineering a trustworthy system that satisfies client needs. The term “system” is interpreted broadly to include information, telecommunication, defense, health delivery, transportation, energy and manufacturing systems, as well as corporate processes.

The objectives of the Bachelor of Science in Systems Engineering Program at George Mason University are to produce graduates who are able to:

1. Apply critical thinking, quantitative methods, systems thinking, and principles of engineering to the engineering of contemporary and future systems.
2. Apply systems engineering methods, processes, models and tools to the engineering of contemporary and future systems.
3. Work successfully, professionally, and ethically as members and leaders of multi-disciplinary teams.

This program is accredited by the Engineering Accreditation Commission of ABET, http://www.abet.org. The requirements for the degree may be satisfied through part-time enrollment.
The undergraduate program offers students the option of applying to the accelerated master's degree program in telecommunications. See Systems Engineering, BS/Telecommunications, Accelerated MS for specific requirements.

Degree Requirements

In addition to Mason’s general education requirements, students must meet specific requirements for this degree. In the first two years, students obtain a basic foundation in mathematics, the natural sciences, computing, writing, humanities, arts, and social sciences. The systems engineering program builds on this foundation, teaching theoretical knowledge, practical skills, and the ability to apply systems thinking to problems. Teamwork, collaborative learning, analytical skills, practical problem solving, and oral and written communication are strongly stressed.

Degree requirements for the systems engineering major include 120 credits. Students must complete the following:

Mathematics and Statistics Credits: 23

- MATH 113 - Analytic Geometry and Calculus I Credits: 4
- MATH 114 - Analytic Geometry and Calculus II Credits: 4
- MATH 203 - Linear Algebra Credits: 3
- MATH 213 - Analytic Geometry and Calculus III Credits: 3
- MATH 214 - Elementary Differential Equations Credits: 3
- STAT 344 - Probability and Statistics for Engineers and Scientists I Credits: 3
- STAT 354 - Probability and Statistics for Engineers and Scientists II Credits: 3

Natural Sciences Credits: 12

- PHYS 160 - University Physics I Credits: 3
- PHYS 161 - University Physics I Laboratory Credits: 1
- PHYS 260 - University Physics II Credits: 3
- PHYS 261 - University Physics II Laboratory Credits: 1
- CHEM 251 - General Chemistry for Engineers Credits: 4 OR CHEM 211 - General Chemistry Credits: 4

Computer Science Credits: 7

- CS 112 - Introduction to Computer Programming Credits: 4
- CS 211 - Object-Oriented Programming Credits: 3

Communication and Economics Credits: 6

- COMM 100 - Public Speaking Credits: 3
- ECON 103 - Contemporary Microeconomic Principles Credits: 3

Engineering Credits: 2

- ENGR 107 - Introduction to Engineering Credits: 2

Systems Engineering Credits: 52
Students must complete each of these courses with a grade of C or better.

- SYST 101 - Understanding Systems Engineering Credits: 3
- SYST 210 - Systems Design Credits: 3
- SYST 220 - Dynamical Systems I Credits: 3
- SYST 221 - Systems Modeling Laboratory Credits: 1
- SYST 320 - Dynamical Systems II Credits: 3
- SYST 330 - Systems Methods Credits: 3
- SYST 335 - Discrete Systems Modeling and Simulation Credits: 3
- SYST 371 - Systems Engineering Management Credits: 3
- SYST 470 - Human Factors Engineering Credits: 3
- SYST 473 - Decision and Risk Analysis Credits: 3
- SYST 489 - Senior Seminar Credits: 3
- SYST 490 - Senior Design Project I Credits: 3
- SYST 495 - Senior Design Project II Credits: 3
- OR 441 - Deterministic Operations Research Credits: 3
- OR 442 - Stochastic Operations Research Credits: 3
- 3 approved technical electives selected from one of the Technical Emphasis Areas below. Credits: 9

Additional University General Education Credits: 18

Students must complete all University General Education requirements not fulfilled by major requirements.

- ENGH 101 - Composition Credits: 3
- ENGH 302 - Advanced Composition Credits: 3 (must complete a natural sciences and technology section)
- Literature: 3 credits
- Arts: 3 credits
- Western Civilization/World History: 3 credits
- Global Understanding: 3 credits

Advising and Plan of Study

All systems engineering students are assigned a faculty advisor. With the advisor’s help and approval, each student is required to complete a plan of study. This plan of study, contained in the detailed pamphlet available from the SEOR office, constitutes a learning plan for the degree program. The plan of study must be signed by the student's advisor and the Department Chair. The plan of study must be updated and signed by the advisor at least once a year.

Technical Emphasis Areas

The systems engineering program requires 9 credits of technical electives. Students must select one of the following technical emphases, each containing three courses.

Aviation Systems

- SYST 420 - Network Analysis Credits: 3
- SYST 460 - Introduction to Air Traffic Control Credits: 3
- SYST 461 - Air Transportation System Engineering Credits: 3
Control Systems

- ECE 201 - Introduction to Signal Analysis Credits: 3
- ECE 220 - Signals and Systems I Credits: 3
- SYST 421 - Classical Systems and Control Theory Credits: 3

Computer Network Systems

- SYST 420 - Network Analysis Credits: 3
- ECE 465 - Computer Networking Protocols Credits: 3
- TCOM 500 - Modern Telecommunications Credits: 3

Engineering Systems

- CEIE 210 - Statics and Dynamics Credits: 3
- CEIE 240 - Hydraulics Credits: 3
- CEIE 310 - Mechanics of Materials Credits: 3

Operations Research

- OR 481 - Numerical Methods in Engineering Credits: 3
- SYST 420 - Network Analysis Credits: 3
- SYST 465 - Pricing in Optimization and Game Theory Credits: 3

Software-Intensive Systems

- CS 310 - Data Structures Credits: 3
- CS 321 - Software Requirements and Design Modeling Credits: 3
- CS 332 - Object-Oriented Software Design and Implementation Credits: 3

Synthesis Requirement

Mason’s synthesis requirement for systems engineering majors is satisfied by successful completion of SYST 495 - Senior Design Project II.

Writing-Intensive Requirement

Mason’s writing-intensive requirement for systems engineering majors is satisfied by successful completion of SYST 489 - Senior Seminar.

Total: 120 credits

Sample Schedule

The following sample schedule details the required and elective courses in the program. Students are strongly encouraged to follow this sample schedule to ensure that prerequisites are satisfied. For students who do not place into MATH 113 by taking the
math placement exam, an alternative schedule is available. The position of the technical elective courses within the schedule will vary depending on the emphasis, and the position of some general education classes may vary as well. Please consult with your advisor to plan the correct sequence.

First Semester Credits: 15

- COMM 100 - Public Speaking Credits: 3
- ECON 103 - Contemporary Microeconomic Principles Credits: 3
- ENGH 101 - Composition Credits: 3
- ENGR 107 - Introduction to Engineering Credits: 2
- MATH 113 - Analytic Geometry and Calculus I Credits: 4

Second Semester Credits: 15

- CS 112 - Introduction to Computer Programming Credits: 4
- MATH 114 - Analytic Geometry and Calculus II Credits: 4
- PHYS 160 - University Physics I Credits: 3
- PHYS 161 - University Physics I Laboratory Credits: 1
- SYST 101 - Understanding Systems Engineering Credits: 3

Third Semester Credits: 16

- CS 211 - Object-Oriented Programming Credits: 3
- MATH 213 - Analytic Geometry and Calculus III Credits: 3
- PHYS 260 - University Physics II Credits: 3
- PHYS 261 - University Physics II Laboratory Credits: 1
- SYST 210 - Systems Design Credits: 3
- Literature course Credits: 3

Fourth Semester Credits: 14

- CHEM 251 - General Chemistry for Engineers Credits: 4 OR CHEM 211 - General Chemistry Credits: 4
- MATH 203 - Linear Algebra Credits: 3
- MATH 214 - Elementary Differential Equations Credits: 3
- SYST 220 - Dynamical Systems I Credits: 3
- SYST 221 - Systems Modeling Laboratory Credits: 1

Fifth Semester Credits: 15

- ENGH 302 - Advanced Composition Credits: 3 (for natural sciences and technology)
- OR 441 - Deterministic Operations Research Credits: 3
- SYST 320 - Dynamical Systems II Credits: 3
- STAT 344 - Probability and Statistics for Engineers and Scientists I Credits: 3
- Arts course Credits: 3

Sixth Semester Credits: 15
• STAT 354 - Probability and Statistics for Engineers and Scientists II Credits: 3
• SYST 330 - Systems Methods Credits: 3
• SYST 335 - Discrete Systems Modeling and Simulation Credits: 3
• SYST 371 - Systems Engineering Management Credits: 3
• Technical elective Credits: 3

Seventh Semester Credits: 15

• SYST 470 - Human Factors Engineering Credits: 3
• SYST 489 - Senior Seminar Credits: 3
• SYST 490 - Senior Design Project I Credits: 3
• SYST 473 - Decision and Risk Analysis Credits: 3
• Technical elective Credits: 3

Eighth Semester Credits: 15

• OR 442 - Stochastic Operations Research Credits: 3
• SYST 495 - Senior Design Project II Credits: 3
• Technical elective Credits: 3
• Global understanding course Credits: 3
• Western civilization or world history course (HIST 100 or HIST 125) Credits: 3

Termination from the Major

No math, science, or Volgenau School of Engineering course, required for the major, may be attempted more than three times. Those students who do not successfully complete such a course within three attempts will be terminated from the major. For more information, see the “Termination from the Major” section under Academic Standing.

Change of Major

Students who want to change their major to systems engineering must have a GPA of at least 2.75 in all math, physics, engineering, and computer science courses taken to fulfill requirements for the systems engineering degree and should have completed MATH 114 with a grade of B or better.

Interdisciplinary Minor Programs

By taking appropriate sequences of technical electives and, in some cases, a few courses in addition to the 120 credits required for graduation, students in the systems engineering program can obtain a minor in an interdisciplinary program. Minors of particular interest to systems engineering students include data analysis, mathematics, computer science, and business. Students should see their advisor and the departments offering the minors for specific requirements.

Bachelor of Science/Accelerated Master of Science

BS (selected)/Operations Research, Accelerated MS

School: Volgenau School of Engineering
Qualified undergraduate students may apply to this five-year program leading to a bachelor's degree in an engineering discipline and a master's degree in operations research. The program can be completed in 144 credits. Applicants must be Mason undergraduate students majoring in systems engineering, computer science, computer engineering, electrical engineering, or civil and infrastructure engineering. Students may apply for the program after they have completed at least 90 credits applicable to the BS degree. Students must have an overall GPA of at least 3.30 on courses applicable to the BS degree and must have completed all MATH and PHYS requirements. Criteria for admission are identical to criteria for admission into the MS program, with the exception that students do not need to have completed an undergraduate degree before admission.

Students must complete all requirements for the BS in their chosen major. Students must apply to have the BS degree from the appropriate Volgenau School program conferred the semester before they expect to complete BS requirements. The MS degree is granted on completion of remaining courses.

Up to two courses (6 credits) of approved master’s level courses taken as part of the undergraduate degree may be applied to the graduate degree. These two courses may be chosen from the graduate courses in the following table. For BS candidates, these graduate courses replace the corresponding undergraduate courses. The undergraduate version of these courses may not be applied to the MS degree.

<table>
<thead>
<tr>
<th>Undergraduate</th>
<th>Graduate</th>
<th>Credit may not be received for both courses.</th>

Any other 500-level course may be applied to both the undergraduate and graduate degrees with approval of the advisor and SEOR department chair.

BS (selected)/Systems Engineering, Accelerated MS

School: Volgenau School of Engineering

Department: Systems Engineering and Operations Research

Qualified undergraduate students may apply to this five-year program, which leads to a bachelor's degree in an engineering discipline and a master's degree in systems engineering. The program can be completed in 144 credits. Applicants must be Mason undergraduate students majoring in systems engineering, computer science, computer engineering, electrical engineering, or civil and infrastructure engineering. Students may apply after they have completed at least 90 credits applicable to the BS degree.

Students must have an overall GPA of at least 3.30 in courses applicable to the BS degree and must have successfully completed all MATH and PHYS requirements. Students must complete all requirements for the BS in their chosen major. Students in the accelerated program must apply to have the BS degree from the appropriate Volgenau School program conferred the semester before they expect to complete BS requirements. The MS degree is granted on completion of remaining courses.

Up to two courses (6 credits) of approved master’s level courses taken as part of the undergraduate degree may be applied to the graduate degree. These two courses may be chosen from the graduate courses in the following table. For BS candidates, these graduate courses replace the corresponding undergraduate courses listed. The undergraduate version of these courses may not be applied toward the MS degree.
Systems Engineering, BS/Telecommunications, Accelerated MS

School: Volgenau School of Engineering

Department: Systems Engineering and Operations Research

Students in the BS in Systems Engineering Program may elect to enter an accelerated MS in Telecommunications Program while they are undergraduate students. The program is designed for qualified undergraduate students in the systems engineering program who would like to proceed directly into the MS program, completing the two degrees with 144 credits. Students must satisfy requirements for the BS (120 credits) and the MS (30 credits), with 6 credits of overlap permitted. The MS is on an accelerated track, with 6 credits taken as an undergraduate and 24 credits completed as a graduate student. The 6 graduate credits that will count toward both degrees must be selected from those given in the listing that follows.

Applicants must be Mason undergraduate students who preferably have chosen to take the systems engineering of telecommunications elective sequence. Other students will be considered on their individual merit. Students may apply to the accelerated program during a semester after which they will have completed 90 or more credits applicable toward the BS in systems engineering. Students must have an overall GPA of at least 3.25 to apply for the program. Students who have not yet finished 90 credits may be accepted provisionally subject to satisfactory completion of 90 credits. Criteria for admission are identical to criteria for admission to the MS in Telecommunications Program, except that students do not need to have completed an undergraduate degree prior to admission into the accelerated program.

Accepted students must maintain a minimum 3.25 GPA in the undergraduate segment of the accelerated program and a 3.00 GPA in the graduate segment. That is, students who have been accepted into the program must maintain a 3.25 average until they have satisfied all requirements for the BS in systems engineering. They must then maintain a minimum 3.00 GPA in the graduate segment.

Students must complete all requirements for the BS in systems engineering. Students in the accelerated program must apply to have the BS degree conferred the semester before they expect to complete the BS requirements. The MS in telecommunications is granted on completion of all requirements for the accelerated degree.

Degree Requirements

Telecommunications courses

A systems engineering undergraduate student may choose from the following courses for their 6 credit overlap as part of the accelerated program:

- TCOM 500 - Modern Telecommunications Credits: 3
- TCOM 501 - Data Communications and Local Area Networks Credits: 1.5
The doctoral program in Systems Engineering and Operations Research offers a unique integration of systems engineering and operations research. This integration gives students a strong analytical and computational capability on the one hand and an overarching systems perspective that is well-grounded in application on the other. No other department in the nation offers a PhD degree program that covers systems engineering and operations research in this integrated manner. The program prepares students for leadership positions in research and development in government, industry, research organization, and academia.

The program includes: course requirements; a qualifying exam that tests fundamental concepts in systems engineering and operations research; a comprehensive exam that tests the research competency of the student; dissertation proposal defense; dissertation research; and dissertation predefense and defense. All general Mason and specific Volgenau School requirements apply to this program.

PhD dissertations are extremely time intensive, and successful completion requires full time focus. It is expected that students who have reached candidacy (that is, successfully presented their dissertation proposal) will spend full time on their research for at least one academic year and will attend the majority of the SEOR departmental seminars throughout that period.

Admission

All general Mason and specific Volgenau School admissions requirements apply. Candidates for the PhD program typically must hold an MS degree from an accredited institution of higher education in systems engineering, operations research or related areas in engineering, mathematics, and computer science with a minimum graduate GPA of 3.50 and a minimum undergraduate GPA of 3.00. In addition, well-qualified candidates holding a BS degree in these areas may apply directly to the PhD program.

All applicants should have a strong background in engineering mathematics, which includes three semesters of calculus, differential equations, linear algebra, and probability. In addition, students entering the doctoral program must have a sound working knowledge in computing.

The admission process involves submitting the application for admission, undergraduate and graduate transcripts from previous colleges and universities attended, GRE test results, three letters of reference, a résumé and a statement of career goals and aspirations, and a self-assessment of past background. Translations of international credentials must be provided, if they are not in English; in some cases, applicants will be required to have documents evaluated by an external agency. A satisfactory score on the TOEFL examination is required for non-native English speakers. All of an applicant’s background is examined before an admission decision is made.
The doctoral program is a 72 credit hour program; however, students entering with a Master's degree in a related discipline will be given a reduction of credit up to 24 hours. Reduction of credit requires the approval of the program director or designee and the dean or designee of the school. They determine whether the credits are eligible for reduction of credit and applicable to the degree program and the number of credits to be reduced.

Degree Requirements

The 72 hours of required doctoral-level credits typically consist of 48 credits of coursework and 24 credits of dissertation research. Students who receive a reduction of credit will complete a minimum of 48 credits as follows; students entering without an MS will need at least 24 additional credits of coursework.

All decisions concerning the student’s course requirements and plan of study must be approved by the dissertation committee chair, as well as by the department’s doctoral coordinator.

Doctoral Coursework (24 credits)

A GPA of 3.50 is required, and no grade of C is allowed in these 24 credits.

Students lacking prerequisites for their courses or lacking the coursework to complete the qualifying exams or their dissertation may be required to take additional courses.

- STAT 554 - Applied Statistics Credits: 3
- SYST 763 - Research Methods in Systems Engineering and Information Technology Credits: 3
- 12 credits of 700-level SEOR approved courses: a list of approved courses is available from the department
- 6 credits in SYST or OR courses numbered 600 or higher, excluding SYST 699 Master's Project and OR 699 Master's Project
  No more than 3 credits are allowed for a directed reading course.
  All courses and course substitutions must be approved by the student's dissertation committee chair and the SEOR doctoral coordinator.

Additional Coursework Requirements (24 credits)

Students entering without a Master's degree are required to complete an additional 24 credits of Master's level courses, including the following:

- SYST 510 - Systems Definition and Cost Modeling Credits: 3
- SYST 520 - System Engineering Design Credits: 3
- OR 541 - Operations Research: Deterministic Models Credits: 3
- OR 542 - Operations Research: Stochastic Models Credits: 3
- 12 additional credits from one of two alternatives (systems engineering or operations research). Consult the SEOR Department for the list of allowable courses.
  With appropriate selection of courses, students may obtain the MS degree in Systems Engineering or Operations Research by completing 6 additional credits, including 3 approved credits from the advanced emphasis courses (which may also apply towards the PhD degree advanced emphasis requirements) and 3 credits of either SYST 699 or OR 699. Consult the SEOR Department for further detail. Credits taken in the courses SYST 699 or OR 699 may not be applied towards the PhD degree program requirements.

Qualifying Exams
The exams are primarily for testing the students’ familiarity with fundamental concepts. Each student must take the following four exams within two years of enrolling in the program:

1. Systems Definition and Cost Modeling
2. Systems Engineering Design
3. Deterministic Models
4. Stochastic Models

A student who passes three of the four exams in the first attempt must retake and pass the failed exam within one year. A student who passes fewer than three exams in the first attempt must retake and pass an entire set of four exams within one year. After two unsuccessful attempts, a student is dismissed from the PhD program.

Dissertation Research (24 credits)

Choose 24 credits from the following:

- SEOR 998 - Doctoral Dissertation Proposal Credits: 1-12
- SEOR 999 - Doctoral Dissertation Credits: 1-12 (must complete a minimum of 12 credits)

Doctoral Supervisory Committee

Students should select a dissertation director and a doctoral supervisory committee as soon as possible. It is recommended that the committee be formed by the end of the second or third semester of study. The dissertation director must be a member of the SEOR graduate faculty or a member of the Mason graduate faculty with approval from the SEOR department chair. The doctoral supervisory committee must include at least three members from the SEOR department-approved graduate faculty, and at least one non-SEOR member from the Mason graduate faculty. The composition of the doctoral supervisory committee is to be approved by the doctoral coordinator. At least four members of the committee must be members of the Mason graduate faculty.

Comprehensive Exam

The comprehensive exam is taken after the student has satisfactorily completed all the advanced emphasis course work requirements in the approved plan of study filed by the student. The examiners will include the supervisory committee plus any outside examiners considered appropriate. However, the supervisory committee determines whether the student passes or not. The comprehensive exam consists of a written examination of 8 hours in length and an oral examination. The committee will determine if the student has a mastery of the advanced emphasis coursework. If a student fails the comprehensive exam, the student may request a re-examination within 60 days of receiving notice of the exam result. The request should be made in writing to the doctoral coordinator. If the student fails the re-examination or does not request a re-examination within 60 days, the student will be dismissed from the PhD program. In such a case, with recommendation of the supervisory committee and approval of the SEOR Chair, the student may apply his/her coursework towards a Master's degree.

Dissertation Proposal

After passing the comprehensive exam, each doctoral student prepares a written dissertation proposal, which is presented to the doctoral supervisory committee. After successfully completing this requirement, the student is formally admitted as a candidate for the PhD degree.

Dissertation Defense

When the central portions of the research have been completed to the point where the student is able to describe the original contributions of the dissertation effort, a candidate submits the written dissertation to the supervisory committee and schedules an oral predefense with the committee. The predefense is attended by the supervisory committee. The supervisory committee must approve the work or the student must schedule a second predefense.
Once the committee believes the student is ready, a final public oral defense may be scheduled no sooner than one month after the conclusion of the predefense, with an announcement posted for at least two weeks. The defense must be attended by the supervisory committee and the department’s doctoral coordinator, unless an exception has been approved in advance by the doctoral coordinator. Following a satisfactory evaluation of the oral defense of the dissertation by the supervisory committee, the student must prepare, with supervision from the dissertation director, a final publishable dissertation that represents a definitive contribution to knowledge in systems engineering and operations research. This document must meet format guidelines specified by the Guide for Preparing Graduate Theses, Dissertations, and Projects. If the student fails to successfully defend the dissertation, the student may request a second defense, following the same procedures as for the initial defense. There is no time limit for this request, other than the general time limits for the doctoral degree. An additional predefense is not required, but the student is strongly advised to consult with the committee before scheduling a second defense. If the student fails on the second attempt to defend the dissertation, the student will be dismissed from the PhD program.

Total: 72 credits

Graduate Certificate

Architecture-Based Systems Integration Graduate Certificate

Banner Code: VS-CERG-ABSI

School: Volgenau School of Engineering

Department: Systems Engineering and Operations Research

This program is available to students who hold bachelor’s degrees in engineering and scientific disciplines or have graduate status in such programs. Admission requirements are identical to those for the master’s degree in systems engineering.

The graduate certificate may only be pursued on a part-time basis.

Certificate Requirements

The following four courses (12 credits) must be completed with a grade of B or better:

- SYST 520 - System Engineering Design Credits: 3
- SYST 619 - Introduction to Architecture Based Systems Engineering Credits: 3
- SYST 620 - Discrete Event Systems Credits: 3
- SYST 621 - Systems Architecture Design Credits: 3

Total: 12 credits

Completing the ABSI Certificate within the Systems Engineering Master’s Program

In addition to the ABSI Certificate courses students must take six courses (18 credits) including:

- SYST 510 - Systems Definition and Cost Modeling Credits: 3
- SYST 530 - System Management and Evaluation Credits: 3
- SYST 611 - System Methodology and Modeling Credits: 3
- SYST 699 - Masters Project Credits: 3
Two approved electives from the ABSI Emphasis. Credits: 6

Command, Control, Communications, Computing, and Intelligence
Graduate Certificate

Banner Code: VS-CERG-C4I

School: Volgenau School of Engineering

Department: Systems Engineering and Operations Research

C4I systems are concerned with gathering, retrieving, analyzing, and disseminating time-sensitive information to achieve mission-critical objectives. These systems support military operations across the spectrum of conflict, intelligence operations, transportation monitoring, emergency response, drug interdiction, and law enforcement, among others. C4I systems include the equipment, people, and procedures necessary to accomplish the mission. The equipment may include a variety of sensors, communications systems, and information processing and decision-support systems.

The C4I certificate program focuses on the analysis, design, development, and management of C4I systems. Topics addressed include C4I architectures and software, communications, decision support, modeling and simulation, and sensor data fusion.

The program is available to students who hold bachelor’s degrees in engineering and scientific disciplines or are in graduate status in such programs. Admission requirements are identical to those for the master’s degree in systems engineering.

The graduate certificate may only be pursued on a part-time basis.

Certificate Requirements

The certificate requires 15 credits (5 courses). Students must complete the following with an average grade of B or better:

- SYST 680 - Principles of Command, Control, Communications, Computing, and Intelligence (C4I) Credits: 3
- OR 542 - Operations Research: Stochastic Models (3 credits) or ECE 528 - Introduction to Random Processes in Electrical and Computer Engineering Credits: 3
- SYST 664 - Bayesian Inference and Decision Theory Credits: 3
- SYST 683 - Modeling, Simulation, and Gaming Credits: 3
- SYST 684 - Sensor Data Fusion Credits: 3
- SYST 760 - Special Topics in Command, Control, Communications, Computing, and Intelligence Systems Engineering Credits: 3
- OR 635 - Discrete System Simulation Credits: 3
- OR 651 - Military Operations Research I: Cost Analysis Credits: 3
- OR 652 - Military Operations Research Modeling II: Effectiveness Analysis Credits: 3
- ECE 542 - Computer Network Architectures and Protocols Credits: 3
- ECE 630 - Statistical Communication Theory Credits: 3
- ECE 642 - Design and Analysis of Computer Communication Networks Credits: 3

Total: 15 credits

Completing the C4I Certificate within the Systems Engineering Master's Program

George Mason University 2013-2014 Official University Catalog
In addition to the five certificate courses above, students must complete the following five courses:

- SYST 510 - Systems Definition and Cost Modeling Credits: 3
- SYST 520 - System Engineering Design Credits: 3
- SYST 530 - System Management and Evaluation Credits: 3
- SYST 611 - System Methodology and Modeling Credits: 3
- SYST 699 - Masters Project Credits: 3

**Computational Modeling Graduate Certificate**

**Banner Code:** VS-CERG-CCM

**School:** Volgenau School of Engineering

**Department:** Systems Engineering and Operations Research

This certificate program provides knowledge, tools, and techniques to those who work or plan to work in the field of computational modeling. Courses taken for this certificate program can count toward a master’s degree in operations research or statistics or a PhD in Computational Sciences and Informatics. One must be concurrently enrolled in the program for courses to count toward the certificate and the other degree.

For admission into the certificate program, applicants must meet minimum entrance requirements for the MS in Operations Research, the MS in Statistical Science, or the PhD in Computational Sciences and Informatics.

The graduate certificate may only be pursued on a part-time basis.

**Certificate Requirements**

**Required Courses (9 credits)**

- OR 541 - Operations Research: Deterministic Models Credits: 3
- OR 635 - Discrete System Simulation Credits: 3
  and 3 credits chosen from the following:
- OR 682 - Computational Methods in Engineering and Statistics Credits: 3
- MATH 685 - Numerical Methods Credits: 3
- CSI 700 - Numerical Methods Credits: 3

**Electives (3 credits)**

Choose one of the following:

- CSI 744 - Linear and Nonlinear Modeling in the Natural Sciences Credits: 3
- OR 542 - Operations Research: Stochastic Models Credits: 3
- SYST 611 - System Methodology and Modeling Credits: 3
- SYST 683 - Modeling, Simulation, and Gaming Credits: 3
- ECE 521 - Modern Systems Theory Credits: 3
- MATH 673 - Dynamical Systems Credits: 3

**Total: 12 credits**
Discovery, Design, and Innovation Graduate Certificate

**Banner Code:** VS-CERG-DDI

**School:** Volgenau School of Engineering

**Department:** Systems Engineering and Operations Research

This program responds to the growing need for professional knowledge in innovation. It provides a balanced understanding of the entire process: discovery of knowledge, use in inventive problem solving, development of inventions, and familiarity with using various inventive design methods and tools. The program is available to students who hold master’s degrees in engineering and scientific disciplines or who are in such graduate programs. Students may pursue the certificate concurrently with any of the graduate programs in the Volgenau School; however, the certificate is not awarded until all requirements have been completed.

The graduate certificate may only be pursued on a part-time basis.

**Certificate Requirements**

Certificate candidates must complete at least 15 credits with an average grade of B or better.

To obtain the certificate, students must take:

- SYST 520 - System Engineering Design Credits: 3
- SYST 944 or OR 944 - The Process of Discovery and Its Enhancement in Engineering Applications Credits: 3
- CEIE 894 - Design and Inventive Engineering Credits: 3

and two of the following:

- CEIE 601 - Infrastructure Modeling Credits: 3
- SYST 573 - Decision and Risk Analysis Credits: 3 (recommended if going on for MS in Civil and Infrastructure Engineering)
- SYST 664 or STAT 664 - Bayesian Inference and Decision Theory Credits: 3
- SYST 781 - Data Mining and Knowledge Discovery Credits: 3
- STAT 652 - Statistical Inference Credits: 3
- SYST 671 or OR 671 - Judgment and Choice Processing and Decision Making Credits: 3

**Total:** 15 credits

Military Operations Research Graduate Certificate

**Banner Code:** VS-CERG-MOR

**School:** Volgenau School of Engineering

**Department:** Systems Engineering and Operations Research

This program provides knowledge, tools, and techniques to those who work or plan to work in the field of military operations research. It is appropriate for students who cannot complete requirements for a master’s degree in operations research, but who
want a concentrated study of military modeling. Admissions requirements are identical to those for the master’s degree in operations research.

Certificate candidates must complete five courses, with an average grade of B or better, for a total of 15 graduate credits.

The graduate certificate may only be pursued on a part-time basis.

Certificate Requirements

To obtain the certificate, a student needs to complete the following:

- OR 541 - Operations Research: Deterministic Models Credits: 3
- OR 635 - Discrete System Simulation Credits: 3
- OR 651 - Military Operations Research I: Cost Analysis Credits: 3
- OR 652 - Military Operations Research Modeling II: Effectiveness Analysis Credits: 3
- SYST 683 - Modeling, Simulation, and Gaming Credits: 3

Total: 15 credits

Systems Engineering Analysis and Architecture Graduate Certificate

Banner Code: VS-CERG-SEAA

School: The Volgenau School of Information Technology and Engineering

Department: Systems Engineering and Operations Research

The graduate certificate in Systems Engineering Analysis and Architecture (SEAA) is intended for students who want to advance their knowledge in systems engineering analysis, design and architecture. Students get an understanding of the theory and/or tools of the systems life cycle, systems requirements and cost modeling, systems design, architecture-based systems engineering, the design of systems of systems, and a selection of other techniques applicable to systems engineering analysis.

The SEAA certificate program will be open to all students who hold a BS degree in scientific and engineering disciplines from an accredited university program, with a GPA minimum established by VSE for all MS programs. Students who are already enrolled in a master's program must submit an application form to enroll in this certificate program; all others must apply for graduate admission to this certificate program.

The graduate certificate may only be pursued on a part-time basis.

Certificate Requirements

To be eligible for a certificate in Systems Engineering Analysis and Architecture, students must complete three required courses (9 credits) plus one elective course (3 credits) with an average grade of B or better. The three required courses are as follows:

- SYST 510 - Systems Definition and Cost Modeling Credits: 3
- SYST 520 - System Engineering Design Credits: 3
- SYST 619 - Introduction to Architecture Based Systems Engineering Credits: 3
Elective Requirement

Choose one course from the following:

- OR 635 - Discrete System Simulation Credits: 3
- SYST 542 - Decision Support Systems Engineering Credits: 3
- SYST 563 - Research Methods in Systems Engineering and Information Technology Credits: 3
- SYST 571 - Systems Engineering Management Credits: 3
- SYST 573 - Decision and Risk Analysis Credits: 3
- SYST 683 - Modeling, Simulation, and Gaming Credits: 3
- SYST 620 - Discrete Event Systems Credits: 3
- SYST 621 - Systems Architecture Design Credits: 3

Total: 12 credits

Systems Engineering of Software-Intensive Systems Graduate Certificate

Banner Code: VS-CERG-SIS

School: Volgenau School of Engineering

Department: Systems Engineering and Operations Research

This certificate is available to any student who holds a bachelor’s degree in an engineering or scientific discipline or has graduate status in such a program. Admission requirements are identical to those for the master’s degree in systems engineering, except that the math requirements include only MATH 113, MATH 114, and a probability and statistics course. Note: Some certificate electives may require stronger math requirements.

The graduate certificate may only be pursued on a part-time basis.

Certificate Requirements

To be eligible for a certificate in Systems Engineering for Software-Intensive Systems, students must complete two required courses (6 credits) plus two elective courses (6 credits) with an average grade of B or better.

Required Courses (6 credits)

- SYST 510 - Systems Definition and Cost Modeling Credits: 3
- SYST 542 - Decision Support Systems Engineering Credits: 3

Electives (6 credits)

The two elective courses must be selected from the following:

- SYST 520 - System Engineering Design Credits: 3
- SYST 619 or ECE 672 - Introduction to Architecture-Based Systems Engineering Credits: 3
• CS 555 - Computer Communications and Networking Credits: 3
• SWE 619 - Object-Oriented Software Specification and Construction Credits: 3
• ECE 542 - Computer Network Architectures and Protocols Credits: 3
• INFS 612 - Principles and Practices of Communication Networks Credits: 3
Note: Only one of CS 555, ECE 542 and INFS 612 may be taken.

Total: 12 credits

Master of Science

Operations Research and Statistical Science Dual-Degree MS (OPRS)

Banner Codes: VS-MS-OPRS, VS-MS-STAT

School: Volgenau School of Engineering

Department: Systems Engineering and Operations Research

This program allows students to earn an MS in Operations Research and an MS in Statistical Science by completing 48 credits of course work in both areas instead of the 60 that would be required if the degrees were sought independently.

Admission Requirements

Applicants must satisfy admission requirements for the MS in Operations Research Program and the MS in Statistical Science Program. A joint faculty committee from the Statistics and Systems Engineering and Operations Research Departments make final admission decisions into the dual-degree program.

MS-OPRS/STAT Dual Degree Requirements

The dual degree program requires a total of 48 credits as specified below.

Required Courses (24 credits)

• OR 541 - Operations Research: Deterministic Models Credits: 3
• OR 542 - Operations Research: Stochastic Models Credits: 3
• OR 635 - Discrete System Simulation Credits: 3
• OR 699 - Masters Project Credits: 3
• STAT 544 - Applied Probability Credits: 3
• STAT 554 - Applied Statistics Credits: 3
• STAT 652 - Statistical Inference Credits: 3
• STAT 656 - Regression Analysis Credits: 3

Elective Credits in OR Courses (12 credits)
12 elective credits in OR courses at the 600 level, including at least one deterministic methods course and at least one stochastic methods course.

**Deterministic Methods Courses:**
- OR 641 - Linear Programming Credits: 3
- OR 642 - Integer Programming Credits: 3
- OR 643 - Network Modeling Credits: 3
- OR 644 - Nonlinear Programming Credits: 3

**Stochastic Methods Courses:**
- OR 645 - Stochastic Processes Credits: 3
- OR 647 - Queuing Theory Credits: 3
- OR 675 - Reliability Analysis Credits: 3
- OR 677 - Statistical Process Control Credits: 3

**Elective Credits in STAT Courses (12 credits)**

12 elective credits in 500-, 600-, or 700-level STAT courses, excluding 535. Courses must be approved in advance by the student's statistics academic advisor and the statistics graduate coordinator.

**Notes:**
- A maximum of 6 credits across the two disciplines may be in independent research (thesis). The requirements for independent research are the same as detailed for the associated MS program.
- Students in either the BS/Accelerated MS in Operations Research program or the BS/Accelerated MS in Statistics program cannot get a reduction of 6 credits toward this dual degree. Students who want to proceed to a PhD degree will only be able to waive the number of credits specified in the associated PhD degree requirements, even though they will have 48 credits at the MS level.
- If a student decides not to complete the required 48 credits, a single MS degree will not be granted unless the student fulfills the requirements for the MS in Operations Research or the MS in Statistical Science.
- Once a student receives one of the MS degrees from either department, the student will no longer be eligible for the reduction in credit (i.e., will need to complete 30 credits) if the student later decides to earn the other MS degree.

**Total: 48 credits**

**Operations Research, MS**

**Banner Code:** VS-MS-OPRS

**School:** Volgenau School of Engineering

**Department:** Systems Engineering and Operations Research

This program prepares students for research and professional practice associated with the formulation and analysis of mathematical models for decision making and their computer implementation. Major components include optimization, queuing and network modeling, computer simulation and modeling, applied and computational probability, and application of these components to realistic and relevant operational analysis problems. Students are expected to become proficient in these areas, as well as in supporting areas of information technology necessary to implement operations research methods.

The program includes core courses and electives selected by the student with the aid of a faculty advisor. To obtain the MS degree, students complete an approved plan of study that contains a minimum of 30 graduate credits. Students may take courses
through the Commonwealth Graduate Engineering Program. Appropriate courses may be transferred, with advisor approval, into this Mason degree program.

An accelerated master's option is available to students in selected bachelor's of science programs. See BS (selected)/Operations Research, Accelerated MS for specific requirements.

Admission Requirements

To be admitted to the program, students must hold a baccalaureate degree from an accredited institution in engineering, mathematics, computer science, physical sciences, economics, or a related field. They also must have completed courses in calculus (MATH 113, 114, and 213), matrix algebra (MATH 203), differential equations (MATH 214), applied probability and statistics (STAT 346), and a scientific programming language (CS 112).

Other requirements are as follows:

- Provide evidence of satisfactory educational achievement in at least one of the following forms: a GPA of at least 3.00 as an undergraduate or an acceptable GPA in graduate courses. International students must also achieve satisfactory scores on the GRE. Nonnative English speakers must have a satisfactory score on the TOEFL.
- Provide three letters of recommendation submitted by former professors or supervisors.

The department offers SYST 500 as an intensive review of undergraduate engineering mathematics, including matrix algebra, transforms, differential equations, probability, and statistics. On acceptance, students will be required to take a foundation qualification test a week or two before school starts, unless waived by the department chair or graduate coordinator. Students who fail the test will be required to take SYST 500. A sample test is available from the department.

Students with minor deficiencies in preparation may be accepted conditionally pending removal of the deficiencies. Courses taken to remove admission deficiencies (including SYST 500) extend minimum requirements for the degree. Students whose undergraduate training was in the quantitative social sciences or quantitatively oriented business administration may be allowed to complete a portion of the mathematics prerequisite by taking SYST 500.

Degree Requirements

The program consists of 30 credits. Students must complete four core courses and the project (15 credits). The remaining 15 credits are electives subject to the requirements below, and can be taken in one of five concentration areas or in an individual plan approved by the student's advisor.

Required Core Courses (12 credits):

- OR 541 - Operations Research: Deterministic Models Credits: 3
- OR 542 - Operations Research: Stochastic Models Credits: 3
- OR 635 - Discrete System Simulation Credits: 3
- STAT 544 - Applied Probability Credits: 3

Project (3 credits):

- OR 699 - Masters Project Credits: 3

Methods Courses (6 credits):

Students should take at least one deterministic methods and one stochastic methods course.
Deterministic methods courses:

- OR 640 - Global Optimization and Computational Intelligence Credits: 3
- OR 641 - Linear Programming Credits: 3
- OR 642 - Integer Programming Credits: 3
- OR 643 - Network Modeling Credits: 3
- OR 644 - Nonlinear Programming Credits: 3

Stochastic methods courses:

- OR 645 - Stochastic Processes Credits: 3
- OR 647 - Queuing Theory Credits: 3
- OR 675 - Reliability Analysis Credits: 3
- OR 674 - Dynamic Programming Credits: 3
- OR 677 - Statistical Process Control Credits: 3

Additional Electives (9 credits):

Up to three additional elective courses may be chosen with written concurrence of the advisor, one of which must be OR 600-level or higher. These courses should be taken in an area appropriate to the student’s interests, such as operations research, statistics, computer science, information systems, systems engineering, electrical and computer engineering, economics, mathematics or supply chain management. At least one of these electives must be taken from SEOR’s course offerings.

Concentrations

Students may construct concentration areas by choosing electives from among special groupings. The five concentrations available are decision analysis, financial engineering, military operations research, optimization, and stochastic modeling. In addition to the required core courses (12 credits) and project course (3 credits), the remaining 15 credit hours consist of methods and elective courses associated with the concentration areas as outlined below. Students can also devise their own grouping of electives subject to prior approval of their advisor.

▲ Concentration in Decision Analysis (DA)

Students concentrating in decision analysis must complete the following.

- OR 671 - Judgment and Choice Processing and Decision Making Credits: 3
- OR 681 - Decision and Risk Analysis Credits: 3
- SYST 664 - Bayesian Inference and Decision Theory Credits: 3
- one deterministic methods course
- one stochastic methods course

▲ Concentration in Financial Engineering (FNNE)

Students concentrating in financial engineering must complete the following:

- OR 588 - Financial Systems Engineering I: Introduction to Options, Futures, and Derivatives Credits: 3
- OR 688 - Financial Systems Engineering II: Derivative Products and Risk Management Credits: 3
  and one course from the following list:
- OR 645 - Stochastic Processes Credits: 3
- OR 671 - Judgment and Choice Processing and Decision Making Credits: 3
- OR 681 - Decision and Risk Analysis Credits: 3
- OR 682 - Computational Methods in Engineering and Statistics Credits: 3
Students must also complete the following:

- one deterministic course
- one stochastics methods course (if the student has already taken OR 645 this can be substituted for an elective course with written concurrence of the student's advisor)

▲ Concentration in Military Operations Research (MOR)

Students concentrating in military operations research must complete the following.

- OR 651 - Military Operations Research I: Cost Analysis Credits: 3
- OR 652 - Military Operations Research Modeling II: Effectiveness Analysis Credits: 3
- SYST 683 - Modeling, Simulation, and Gaming Credits: 3
- one deterministic methods course
- one stochastics methods course

▲ Concentration in Optimization (OPT)

Students concentrating in optimization must complete three courses from the following.

- OR 640 - Global Optimization and Computational Intelligence Credits: 3
- OR 641 - Linear Programming Credits: 3
- OR 642 - Integer Programming Credits: 3
- OR 643 - Network Modeling Credits: 3
- OR 644 - Nonlinear Programming Credits: 3
- OR 682 - Computational Methods in Engineering and Statistics Credits: 3
- OR 741 - Advanced Linear Programming Credits: 3
  Students must also complete the following:
  - one stochastics methods course
  - one elective course with written concurrence of the student's advisor

▲ Concentration in Stochastic Modeling (STM)

Students concentrating in stochastic modeling must complete two courses from the following:

- OR 645 - Stochastic Processes Credits: 3
- OR 647 - Queuing Theory Credits: 3
- OR 674 - Dynamic Programming Credits: 3
- OR 677 - Statistical Process Control Credits: 3
- OR 719 - Graphical Models for Inference and Decision Making Credits: 3
- SYST 664 - Bayesian Inference and Decision Theory Credits: 3
  Students must also complete the following:
  - one deterministic course
  - one statistics course numbered 634 or above
  - one elective course with written concurrence of the student's advisor

Total: 30 credits

Dual-Degree MS in Operations Research and Statistical Science
The program allows students to earn an MS in operations research and an MS in statistical science by completing 48 credits of course work in both areas instead of the 60 that would be required if the degrees were sought independently. See the corresponding catalog entry.

**Systems Engineering, MS**

**Banner Code: VS-MS-SYST**

**School: Volgenau School of Engineering**

**Department: Systems Engineering and Operations Research**

Mason's educational and research program in systems engineering addresses a broad range of issues relevant to the design, implementation, analysis and management of systems. Specialization areas include Architecture-Based Systems Integration; Air Transportation; Systems Engineering Analysis; Systems Management; Command, Control, Communications, Computing, and Intelligence; and Systems Engineering of Software-Intensive Systems. Research activities include both fundamental and applied research. GMU's graduate program in Systems Engineering recognizes the importance of balancing an education in quantitative models and engineering tools with a proper understanding of the systems “perspective.”

The program prepares students for a professional career in systems design, development, and management, associated with problem formulation, issue analysis, and evaluation of alternative courses of action. The program emphasizes both analytical and practical aspects of engineering complex systems. Students are expected to demonstrate proficiency in several quantitative modeling disciplines. Students are also expected to master issues relevant to practical aspects of systems design, engineering, and management. The program prepares students for careers in research and development, and the pursuit of advanced graduate study leading to the PhD in information technology.

Each student is assigned a faculty advisor with whom to work to complete an approved plan of study. This plan of study must include three core courses, two methods courses, three to four electives in an emphasis area, and a thesis or systems engineering project. The plan of study must include 30 graduate credits including a capstone project (3 credits). Matriculation requirements for candidates needing additional work in mathematics or engineering also may be included in the plan of study.

An accelerated master's option is available for students in selected bachelor's of science programs. See BS (selected)/Systems Engineering, Accelerated MS for specific requirements.

**Foundation and Admission Requirements**

Applicants should have a baccalaureate degree from an accredited institution in engineering, mathematics, computer science, physical sciences, economics, or a related field. They also should have completed courses in calculus (MATH 113, 114, and 213), matrix algebra (MATH 203), differential equations (MATH 214), applied probability (STAT 346), and a scientific programming language (CS 112).

Other requirements are as follows:

- Evidence of satisfactory educational achievement in at least one of the following forms: a GPA of at least 3.00 as an undergraduate or an acceptable GPA in graduate courses. International students must also achieve satisfactory scores on the GRE. Nonnative English speakers must have achieved a satisfactory score on the TOEFL exam.
- Three letters of recommendation submitted by former professors or supervisors
- Working background in engineering mathematics and computer systems. Students with minor deficiencies in preparation may apply for admission to the program, but they will be required to take one or more foundation courses. The department offers SYST 500 as an intensive review of undergraduate engineering mathematics, including matrix algebra, transforms, differential equations, probability, and statistics.

Students who have not completed a basic engineering undergraduate mathematics sequence will be required to complete courses in engineering calculus and matrix algebra prior to acceptance. On acceptance, students will be required to take a foundation
qualification test a week or two before school starts, unless waived by the department chair or graduate coordinator. Students who fail the test will be required to take SYST 500 or other foundation courses. A sample test is available from the department.

Familiarity with analytical modeling software, such as spreadsheets or math packages, is also expected. Students should acquaint themselves with these software packages before beginning classes.

Degree Requirements

Core Courses (12 credits):

- SYST 510 - Systems Definition and Cost Modeling Credits: 3
- SYST 520 - System Engineering Design Credits: 3
- SYST 530 - System Management and Evaluation Credits: 3
- SYST 611 - System Methodology and Modeling Credits: 3

Concentrations (15 credits):

Students may construct concentration areas by choosing electives from among special groupings. The seven concentrations available are systems engineering analysis, systems management, architecture-based systems integration, command, control, communications, computing, and intelligence (C4I), systems engineering of software-intensive systems, advanced transportation systems, and financial systems engineering. Students can also devise their own grouping of electives subject to prior approval of their advisor.

Basic Methods Courses

Students must complete 3 credits of a basic methods course. The choice of basic methods course may depend on the student's concentration.

List of Basic Methods Courses:

- SYST 563 - Research Methods in Systems Engineering and Information Technology Credits: 3
- SYST 573 - Decision and Risk Analysis Credits: 3
- SYST 620 - Discrete Event Systems Credits: 3
- SYST 664 - Bayesian Inference and Decision Theory Credits: 3
- OR 541 - Operations Research: Deterministic Models Credits: 3
- OR 542 - Operations Research: Stochastic Models Credits: 3
- OR 635 - Discrete System Simulation Credits: 3
- ECE 528 - Introduction to Random Processes in Electrical and Computer Engineering Credits: 3

▲ Concentration in Advanced Transportation Systems (ATS)

The air transportation system is among the most complex networked systems. This concentration is designed to provide students with the skills to address the next generation of challenges of the air transportation system. Topics addressed include congestion and safety of the national air space, economic and human factors, impact of technology innovation, and public policy. The program emphasizes design, modeling, and analysis to support decision making for government and the aviation industry.

Basic methods course:
• One course from the list of basic methods courses above.

Concentration-specific courses:

Students must complete the following:

• SYST 560 - Introduction to Air Traffic Control Credits: 3
• SYST 660 - Air Transportation Systems Modeling Credits: 3
  The remaining two courses are electives taken from the list below with the approval of the advisor. Courses designated as basic methods courses may also be used as an elective.
• SYST 571 - Systems Engineering Management Credits: 3
• SYST 619 - Introduction to Architecture Based Systems Engineering Credits: 3
• SYST 671 - Judgment and Choice Processing and Decision Making Credits: 3
• CSS 610 - Computational Analysis of Social Complexity Credits: 3
• OR 647 - Queuing Theory Credits: 3

▲Concentration in Architecture-Based Systems Integration (ABSI)

There is much interest today in the engineering of systems that comprise other component systems, where each of the component systems serves organizational and human purposes. These systems families are often categorized as systems of systems, federations of systems, or coalitions of systems. The design of architectures is a major ingredient in the design of systems families. Furthermore, it provides the conceptual basis for achieving system integration. This concentration covers the formulation of the system integration problem, definition of architecture frameworks, use of structured analysis and object-oriented methodologies for the design of architectures, modeling and simulation for the evaluation of architectures, and approaches to integration. Both defense and industrial applications are considered.

With careful planning, students who complete this concentration might be able to complete the Architecture-Based Systems Integration Graduate Certificate simultaneously with their MS.

Basic methods course:

• SYST 620 - Discrete Event Systems Credits: 3

Concentration-specific courses:

Students must complete the following courses:

• SYST 619 - Introduction to Architecture Based Systems Engineering Credits: 3
• SYST 621 - Systems Architecture Design Credits: 3
  The remaining two courses are electives taken from the list below with approval of the advisor. Courses designated as basic methods courses may also be used as an elective.
• SYST 513 - Total Systems Engineering, Reengineering and Enterprise Integration Credits: 3
• SYST 542 - Decision Support Systems Engineering Credits: 3
• SYST 571 - Systems Engineering Management Credits: 3
• SYST 622 - System Integration and Architecture Evaluation. Credits: 3
• SYST 683 - Modeling, Simulation, and Gaming Credits: 3

▲Concentration in Command, Control, Communications, Computing, and Intelligence (C4I)
C4I systems are concerned with gathering, retrieving, analyzing, and disseminating time-sensitive information to achieve mission-critical objectives. These systems support military operations across the spectrum of conflict, intelligence operations, transportation monitoring, emergency response, drug interdiction, and law enforcement, among others. C4I systems include the equipment, people, and procedures necessary to accomplish the mission. The equipment may include a variety of sensors, communications systems, and information processing and decision-support systems.

The program focuses on the analysis, design, development, and management of C4I systems. Topics addressed include C4I architectures and software, communications, decision support, modeling and simulation, and sensor data fusion.

With careful planning, students who complete this concentration might be able to complete the Command, Control, Communications, Computing, and Intelligence Graduate Certificate simultaneously with their MS.

**Basic methods course:**

- OR 542 - Operations Research: Stochastic Models Credits: 3
  
  or

- ECE 528 - Introduction to Random Processes in Electrical and Computer Engineering Credits: 3

**Concentration-specific courses:**

Students must take the following:

- SYST 680 - Principles of Command, Control, Communications, Computing, and Intelligence (C4I) Credits: 3 or ECE 670 - Principles of C4I Credits: 3
- SYST 683 - Modeling, Simulation, and Gaming Credits: 3
  
  The remaining two courses are electives taken from the list below with the approval of the advisor. Courses designated as basic methods courses may also be used as an elective.
- SYST 671 - Judgment and Choice Processing and Decision Making Credits: 3
- SYST 684 - Sensor Data Fusion Credits: 3
- SYST 760 - Special Topics in Command, Control, Communications, Computing, and Intelligence Systems Engineering Credits: 3
- OR 651 - Military Operations Research I: Cost Analysis Credits: 3
- OR 652 - Military Operations Research Modeling II: Effectiveness Analysis Credits: 3
- ECE 542 - Computer Network Architectures and Protocols Credits: 3
- ECE 630 - Statistical Communication Theory Credits: 3
- ECE 642 - Design and Analysis of Computer Communication Networks Credits: 3

▲ Concentration in Financial Systems Engineering (FNSE)

Financial engineering is a cross-disciplinary field which relies on mathematical finance, numerical methods, and computer simulations to make trading, hedging, and investment decisions, as well as facilitating the risk management of those decisions. While mathematics is indispensable in financial engineering, the concentration will try best to focus on the concepts and ideas of finance, while limiting the math within a scope acceptable to most students in engineering.

**Basic methods course:**

- One course from the list of basic methods courses above.

**Concentration-specific courses:**
Students must complete the following:

- SYST 588 - Financial Systems Engineering I: Introduction to Options, Futures, and Derivatives Credits: 3
- SYST 688 - Financial Systems Engineering II: Derivative Products and Risk Management Credits: 3

The remaining two courses are electives taken from the list below with approval of the advisor. Courses designated as basic methods courses may also be used as an elective.

- SYST 573 - Decision and Risk Analysis Credits: 3
- SYST 664 - Bayesian Inference and Decision Theory Credits: 3
- SYST 671 - Judgment and Choice Processing and Decision Making Credits: 3
- OR 635 - Discrete System Simulation Credits: 3
- OR 645 - Stochastic Processes Credits: 3
- OR 682 - Computational Methods in Engineering and Statistics Credits: 3
- OR 719 - Graphical Models for Inference and Decision Making Credits: 3
- MBA 705 - Venture Capital and Private Finance Credits: 0-3
- MBA 706 - Investment Analysis Credits: 0-3
- MBA 717 - International Finance Credits: 0-3
- MBA 747 - Real Estate Finance Credits: 0-3

▲ Concentration in Systems Engineering Analysis (SEA)

Systems engineers must address a broad range of issues relevant to the design, implementation, analysis, and management of systems. This concentration provides methodological tools that can be applied to the systems engineering process. Areas of focus include decision support systems, distributed intelligent systems, knowledge-based planning systems, network systems, probabilistic reasoning systems, sensor fusion systems, and optimization methods.

With careful planning, students who complete this concentration might be able to complete the Systems Engineering Analysis and Architecture Graduate Certificate simultaneously with their MS.

Basic methods course:

- One course from the list of basic methods courses above.

Concentration-specific courses:

Students must complete the following course:

- SYST 542 - Decision Support Systems Engineering Credits: 3

The remaining three courses are electives taken from the list below with the approval of the advisor. Courses designated as basic methods courses may also be used as an elective.

- SYST 619 - Introduction to Architecture Based Systems Engineering Credits: 3
- SYST 621 - Systems Architecture Design Credits: 3
- SYST 671 - Judgment and Choice Processing and Decision Making Credits: 3
- SYST 683 - Modeling, Simulation, and Gaming Credits: 3
- OR 641 - Linear Programming Credits: 3
- OR 642 - Integer Programming Credits: 3
- OR 643 - Network Modeling Credits: 3
- OR 644 - Nonlinear Programming Credits: 3

▲ Concentration in Systems Engineering of Software-Intensive Systems (SESI)
This concentration addresses the software component of the systems engineering life cycle. It specifically covers the allocation of system requirements to software. Practitioners are concerned with the theoretical and practical aspects of technology, cost, and the social effect of computer systems that are reliable, maintainable, secure, efficient, and cost effective. The program emphasizes the integration of hardware, software, and firmware, and the management of these complex computer systems over their lifecycle through systems engineering methods, tools, and processes.

With careful planning, students who complete this concentration might be able to complete the Systems Engineering of Software-Intensive Systems Graduate Certificate simultaneously with their MS.

Basic methods course:

- One course from the list of basic methods courses above.

Concentration-specific courses:

Students must take the following:

- SYST 513 - Total Systems Engineering, Reengineering and Enterprise Integration Credits: 3
- SYST 619 - Introduction to Architecture Based Systems Engineering Credits: 3
  The remaining two courses are electives taken from the list below with the approval of the advisor. Courses designated as basic methods courses may also be used as an elective.
- CS 571 - Operating Systems Credits: 3
- CS 631 - Object-Oriented Design Patterns Credits: 3
- INF 622 - Information Systems Analysis and Design Credits: 3
- SWE 619 - Object-Oriented Software Specification and Construction Credits: 3
- SYST 540 - Analysis for Systems Management Credits: 3
- SYST 542 - Decision Support Systems Engineering Credits: 3
- SYST 571 - Systems Engineering Management Credits: 3
  and/or one only of the following:
- CS 555 - Computer Communications and Networking Credits: 3
- ECE 542 - Computer Network Architectures and Protocols Credits: 3
- INF 612 - Principles and Practices of Communication Networks Credits: 3

▲Concentration in Systems Management (SMG)

The management aspect of systems engineering involves tracking and control of system development through the major phases of the system lifecycle, identifying and resolving problems to minimize their effect on cost, schedule, or performance, and iteratively improving product and process. This concentration emphasizes the theory and practice of systems management and prepares students for careers in managing the development of complex systems.

Basic methods course:

- One course from the list of basic methods courses above.

Concentration-specific courses:

Students must take the following:

- SYST 571 - Systems Engineering Management Credits: 3
- SYST 619 - Introduction to Architecture Based Systems Engineering Credits: 3
  The remaining two courses are electives taken from the list below with the approval of the advisor. Courses designated as basic methods courses may also be used as an elective.
- SYST 513 - Total Systems Engineering, Reengineering and Enterprise Integration Credits: 3
- SYST 540 - Analysis for Systems Management Credits: 3
- SYST 542 - Decision Support Systems Engineering Credits: 3
- SYST 621 - Systems Architecture Design Credits: 3
- SYST 622 - System Integration and Architecture Evaluation. Credits: 3
- SYST 671 or OR 671 - Judgment and Choice Processing and Decision Making Credits: 3
- SYST 677 or OR 677 - Statistical Process Control Credits: 3

**Project (3 credits) or Thesis (6 credits)**

Students must complete a capstone project (3 credit hours) or thesis (6 credit hours) under the direction of a Systems Engineering faculty member.

Under the project option, the student completes three credit hours of SYST 699. Students in these courses work in teams on an approved applied project. A project report is submitted at the end of the semester, and a final project presentation is made to the entire faculty of the SEOR Department.

Under the thesis option, the student completes six credit hours of SYST 799. The master's thesis should reflect a significant independent research effort. The work is conducted under the guidance of a faculty thesis advisor, and the final written thesis and oral defense are approved by a three-member faculty committee and submitted to the library. The thesis work is expected to be completed while taking six semester hours of SYST 799. Although a student is required to maintain continuous enrollment by registering for SYST 799 each semester until the thesis is completed, only six hours will be applied to the degree. The thesis option requires approval by the department chair and approval is only given in rare circumstances.

- SYST 699 - Masters Project Credits: 3
  or
- SYST 799 - Master's Thesis Credits: 1-6

**Total: 30 credits**

**Non-Degree**

**Systems Engineering and Operations Research Minor**

**Banner Code: SEOR**

**School:** Volgenau School of Engineering

**Department:** Systems Engineering and Operations Research

The minor in Systems Engineering and Operations Research consists of 15 credit hours of coursework. The specific requirements are as follows:

**Course Work**

For policies governing all minors, see the Academic Policies section of this catalog.
Two required SEOR courses:

- SYST 101 - Understanding Systems Engineering Credits: 3 or SYST 210 - Systems Design Credits: 3
- SYST 473 - Decision and Risk Analysis Credits: 3

Three additional courses from the following:

- SYST 371 - Systems Engineering Management Credits: 3
- SYST 460 - Introduction to Air Traffic Control Credits: 3
- SYST 461 - Air Transportation System Engineering Credits: 3
- SYST 469 - Human Computer Interaction Credits: 3 or SYST 470 - Human Factors Engineering Credits: 3
- OR 335 - Discrete Systems Modeling and Simulation Credits: 3
- OR 441 - Deterministic Operations Research Credits: 3 or MATH 441 - Deterministic Operations Research Credits: 3
- OR 442 - Stochastic Operations Research Credits: 3 or MATH 442 - Stochastic Operations Research Credits: 3
- OR 481 - Numerical Methods in Engineering Credits: 3 or MATH 446 - Numerical Analysis I Credits: 3

Prerequisites:

Some of the courses listed above have additional prerequisites. Students should pay careful attention to prerequisites when selecting courses.

Total: 15 credits

Other Degrees

Aviation Flight Training and Management Minor

Banner Code: AVIM

School: Volgenau School of Engineering

Department: Systems Engineering and Operations Research

Students completing the Aviation Flight Training and Management minor will take classes for Pilot Ground school and Flight Training leading up to a solo flight. In addition, students will study aspects of aviation from systems engineering of air traffic control, design of airports, human factors and psychology, and financial planning and management. Students will be trained for required government licensing exams such as the Federal Aviation Administration (FAA) Knowledge Test and FAA Flight tests. Special fees will apply. For policies governing all minors, see the Academic Policies section of this catalog.

Course Work

The minor in Aviation Flight Training and Management consists of 15 credit hours of course work. The specific requirements are as follows:

Three required SEOR courses:

- SYST 460 - Introduction to Air Traffic Control Credits: 3
- SYST 462 - Flight Training Lab I Credits: 3  (Lab fees to cover flight training costs apply.)
- SYST 463 - Flight Training Lab II Credits: 3  (Lab fees to cover flight training costs apply.)

One additional course from the following:

- SYST 371 - Systems Engineering Management Credits: 3
- SYST 461 - Air Transportation System Engineering Credits: 3
- MIS 301 - Introduction to Business Information Systems Credits: 3
- MSOM 301 - Managing People and Organizations Credits: 3
- MSOM 305 - Managing in a Global Economy Credits: 3

One additional course from the following:

- SYST 469 - Human Computer Interaction Credits: 3
- SYST 470 - Human Factors Engineering Credits: 3
- PSYC 317 - Cognitive Psychology Credits: 3
- PSYC 333 - Industrial and Organizational Psychology Credits: 3

Prerequisites:

Some of the courses listed above have additional prerequisites. Students should pay careful attention to prerequisites when selecting courses.

Total: 15 credits
VS-AIT Technical Focus Courses

Students must satisfy all prerequisites and other requirements in order to take any of the courses listed below. Courses chosen for the technical focus must be chosen with a coordinator in the AIT department. Not all courses are offered each semester.

CEIE 301 - Engineering and Economic Models in Civil Engineering Credits: 3
ECE 201 - Introduction to Signal Analysis Credits: 3
ECE 301 - Digital Electronics Credits: 3
ECE 303 - Digital Design/Intro Assembly Language Credits: 4
GGS 300 - Quantitative Methods for Geographical Analysis Credits: 3
GGS 311 - Introduction to Geographic Information Systems Credits: 3
IT 206 - Object Oriented Techniques for IT Problem Solving Credits: 3
IT 207 - Applied IT Programming Credits: 3
IT 212 - Computer Hardware Fundamentals Credits: 3
IT 213 - Multimedia and Web Design Credits: 3
IT 214 - Database Fundamentals Credits: 3
IT 223 - Information Security Fundamentals Credits: 3
IT 300 - Modern Telecommunications Credits: 3
IT 304 - IT in the Global Economy Credits: 3
IT 306 - Program Design and Data Structures Credits: 3
IT 308 - Event-Driven Programming Credits: 3
IT 314 - Database Management Credits: 3
IT 331 - Web I: Web Development Credits: 3
IT 341 - Data Communications and Network Principles Credits: 3
IT 348 - Cloud Computing Credits: 3
IT 353 - Information Defense Technologies Credits: 3
IT 357 - Computer Crime, Forensics, and Auditing Credits: 3
IT 366 - Network Security I Credits: 3
IT 413 - Digital Media Editing Credits: 3
IT 414 - Database Administration Credits: 3
IT 462 - Information Security Principles Credits: 3
MATH 112 - Discrete Mathematics for IT Credits: 3
MUSI 415 - Music in Computer Technology Credits: 3
NCLC 249 - Digital Literacy Credits: 4
NCLC 345 - Introduction to Multimedia Credits: 5
NCLC 445 - Multimedia Design Credits: 5
OM 301 - Operations Management Credits: 3
OR 441 - Deterministic Operations Research Credits: 3
SOCI 313 - Statistics for the Behavioral Sciences Credits: 4
STAT 250 - Introductory Statistics I Credits: 3
STAT 350 - Introductory Statistics II Credits: 3
STAT 362 - Introduction to Computer Statistical Packages Credits: 3
SYST 101 - Understanding Systems Engineering Credits: 3
SYST 210 - Systems Design Credits: 3
SYST 470 - Human Factors Engineering Credits: 3
Applied Science, BAS

Applied Science, BAS

Banner Code: UN-BAS-APLS

Administration

Academic Director: Janette Kenner Muir, Associate Provost for Undergraduate Education

The bachelor of applied science (BAS) is an undergraduate liberal arts degree program. It is designed primarily to deepen student knowledge in an academic area and foster critical thinking, analytic reasoning, and an ability to synthesize information.

The BAS articulates well with specialized applied associate degree programs, providing a streamlined path to completion of traditional academic requirements leading to the baccalaureate degree. It meets students’ professional and personal goals while developing a depth of knowledge and proficiency of skill that translates well to the workplace. However, it is not organized in the same way as a traditional baccalaureate degree. Students planning graduate study should consult with an academic advisor prior to undertaking this degree program.

Admission

As a prerequisite to enrollment in the BAS, students must be at least 7 years out of high school and have received an Associate of Applied Science (AAS) degree from an accredited two-year institution in an approved area of specialization. The AAS degree will normally fulfill some, but not all, of Mason’s university general education requirements.

Degree Requirements

BAS students must fulfill all requirements for bachelor's degrees including university general education requirements, to include 45 credits of upper-level course work. All university general education requirements must be met with either George Mason courses or transferrable equivalents.

The minimum credit requirement for a bachelor's degree is 120 credits; however, while there is some variation between concentration areas, fulfilling all university requirements for general education and an academic concentration or specialization is likely to require most BAS students to complete at least 63-66 credits at George Mason, with a total of at least 123 credits in order to receive the degree.

Admitted BAS students will be academically advised by the BAS Program Advisor to plan their course of study including completion of university general education, the BAS concentration or specialization, and any remaining requirements. See bas.gmu.edu for more information.

The following degree plan is based on a student who transfers in a minimum of 30 credits from a completed AAS degree. Some of these credits may count only towards the elective requirement within the BAS degree.

Concentrations or Area of Specialization
Concentrations are intended to provide focus for the BAS curriculum in an area relevant to the student’s AAS degree while allowing for the breadth of study associated with a liberal arts baccalaureate degree. Please note that determination of current transfer work for these concentrations may impact course requirements.

In addition to satisfying all university general education requirements, students must satisfy the requirements for one of the three concentrations listed below:

- Applied Conflict Analysis and Resolution
- Human Development and Family Science
- Technology and Innovation

Students who do not wish to pursue a concentration may seek permission to plan a course of study in a specialization outside the concentration areas in collaboration with the program advisor.

▲ Concentration in Applied Conflict Analysis and Resolution (ACAR)

This concentration is in collaboration with the School for Conflict Analysis and Resolution.

Core Requirement (3 credits)

- BAS 300 - Building Professional Competencies Credits: 3

Concentration Requirements (39 credits)

- CONF 101 - Conflict and Our World Credits: 3
- CONF 210 - Theories of Conflict Analysis and Resolution Credits: 3
- CONF 302 - Culture, Identity, and Conflict Credits: 3
- CONF 490 - Integration Credits: 3

One course (3 credits) from the following:

- CONF 300 - Conflict Resolution Techniques and Practice Credits: 3
- CONF 301 - Research and Inquiry in Conflict Resolution Credits: 3

Two courses (6 credits) from the following:

- CONF 320 - Interpersonal Conflict Analysis and Resolution Credits: 3
- CONF 330 - Community, Group, and Organizational Conflict Analysis and Resolution Credits: 3
- CONF 340 - Global Conflict Analysis and Resolution Credits: 3
Remaining coursework (18 credits)

In consultation with their advisor, students are required to take an additional 18 credits of coursework to complete the concentration. At least 9 credits must be from the CONF department. Please see scar.gmu.edu/undergraduate/10300#Concentration for the most recent list of approved courses.

Electives (51 credits)

▲ Human Development and Family Science Concentration (HDFS)

This concentration is in collaboration with College of Humanities and Social Sciences and College of Education and Human Development.

Core Requirement (3 credits)

- HDFS 200 - Individual and Family Development Credits: 3

Concentration Requirements (21-26 credits)

Adult Development and Aging (3 credits)

Choose one course from:

- PSYC 415 - Psychological Factors in Aging Credits: 3
- SOCI 441 - The Sociology of Aging Credits: 3

Family Processes (3-4 credits)

Choose one course from:

- ECED 404 - Families, Communities and Schools Credits: 3
- NCLC 317 - Issues in Family Relationships Credits: 4
- PSYC 466 - Psychology of Intimate Relationships Credits: 3
• SOCI 309 - Marriage, Families, and Intimate Life Credits: 3

Diversity (3-6 credits)

Choose one course from:

• ANTH 315 - Socialization Processes: Family, Childhood, Personality in Cross-Cultural Perspective Credits: 3
• ATEP 205 - Cultural Competence Credits: 3
• EDUC 203 - Human Disabilities in American Culture Credits: 3
• HEAL 350 - Interventions for Populations and Communities at Risk Credits: 3
• NCLC 320 - Construction of Differences: Race, Class, and Gender Credits: 6
• NCLC 336 - Poverty, Wealth and Inequality in the US Credits: 3
• PSYC 379 - Applied Cross-Cultural Psychology Credits: 3
• SOCI 355 - Social Inequality Credits: 3

Applied Research Methods (3-4 credits)

Choose one course from:

• PRLS 450 - Research Methods Credits: 3
• PSYC 301 - Research Methods in Psychology Credits: 3
• SOCI 303 - Sociological Research Methodology Credits: 4

Human Service Delivery (3 credits)

• HDFS 300 - Individual and Family Services Delivery Credits: 3 (fulfills synthesis and writing intensive requirement)

Internship (6 credits)

• HDFS 498 - Internship and Analysis in Human Development and Family Science Credits: 3
• HDFS 499 - Advanced Internship & Analysis in Human Development and Family Science Credits: 3

Electives (64-69 credits)

▲ Technology and Innovation Concentration (TCNV)

This concentration is in collaboration with School of Management and Volgenau School of Engineering.

Core Requirements (11 credits)
• BAS 300 - Building Professional Competencies Credits: 3
• CS 306 - Synthesis of Ethics and Law for the Computing Professional Credits: 3
• EDIT 201 - Strategies for Online Learning Success Credits: 1
• BIS 490 - Senior Project Credits: 3
• BIS 491 - Senior Project Presentation Credits: 1

Concentration Requirements (36 credits)

All courses for this concentration are available in an online format with most offered as asynchronous delivery.

• IT 106 - Introduction to IT Problem Solving Using Computer Programming Credits: 3
• IT 206 - Object Oriented Techniques for IT Problem Solving Credits: 3
• IT 207 - Applied IT Programming Credits: 3
• IT 213 - Multimedia and Web Design Credits: 3
• IT 214 - Database Fundamentals Credits: 3
• IT 223 - Information Security Fundamentals Credits: 3
• IT 300 - Modern Telecommunications Credits: 3
• MGMT 301 - People and Organizations Credits: 3
• MKTG 301 - Principles of Marketing Credits: 3
• MSOM 300 - Managing Financial Resources Credits: 3
• MSOM 302 - Managing Information in a Global Environment Credits: 3
• MSOM 305 - Managing in a Global Economy Credits: 3

Electives (46 credits)

Total: minimum 123 credits
Courses

This section lists George Mason University’s undergraduate and graduate courses that are available for credit.

For more detailed information on courses, please go to the AP.2 Course Information section.

Accounting (ACCT)

Offered by the School of Management.

If a student takes noncore, upper-level business courses before admission to SOM, those courses will not count on an undergraduate degree application for any major in the school, except as general elective credit. A grade of C or higher must be presented on the graduation application for each upper-level course in the major. Course prerequisites are strictly enforced. Degree status is defined as formal admission to BS degree status in SOM.

ACCT 203 - Survey of Accounting

Credits: 3 (NR)
Introduction to accounting from the viewpoint of those who prepare and use financial information. Topics include using accounting information; creating financial statements; an overview of the firm's operating, financing, and investing activities; and an introduction to product costing, operating budgets, and capital investment decisions. Lecture, recitation format; requires attendance in weekly lecture and weekly recitation.

Equivalent to ACCT 204

Prerequisite(s): Grade of C or higher in ECON 103. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring, Summer

ACCT 204 - Honors Survey of Accounting

Credits: 3 (NR)

Examines the fundamental concepts and principles of financial and managerial accounting from the viewpoint of the users of financial information, with an emphasis on the operating, financing, and investing management decisions that maximize firm value in a global economy. Students may not receive credit for both ACCT 203 and ACCT 204.

Equivalent to ACCT 203

Prerequisite(s): Cum GPA of 3.5 or higher; ECON 103 with a grade of B or higher. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
ACCT 301 - Financial Accounting and Managerial Decision Making

Credits: 3 (NR)

Examines financial accounting from the viewpoint of both users and preparers of financial statements, emphasizing use of financial statement information to make financing, operating, and investing decisions. International Financial Reporting Standards (IFRS) are introduced. School of Management students will not be permitted to make more than three attempts to achieve a C or higher in ACCT 301. Those who do not successfully complete this course within three attempts will be terminated from their major and will not be eligible to receive a degree from the School of Management. For more information about this, see the "Termination from the Major" section under Academic Policies.

Prerequisite(s): Grade of C or higher in ACCT 203 or ACCT 204; sophomore standing. Prerequisite enforced by registration system.

Notes: Mid-term and final exams may be scheduled on Saturdays for this class. The number of class sessions will be modified to compensate for mid-term examination time. Accommodations will be made for religious conflicts, Saturday classes, and certain official university activities.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring, Summer

ACCT 311 - Managerial and Cost Accounting

Credits: 3 (NR)

Develops skills in identifying business processes, transforming data into useful information, and making managerial decisions. Designed for students in all areas of management, especially those whose career aims include cost management. Topics include analyzing and managing costs, developing cost systems that facilitate decision making, identifying opportunities for improving business process, creating financial and operating budgets for planning and control, and developing measures to assess performance.

Prerequisite(s): Degree status, grade of B minus or higher in ACCT 301. Prerequisite enforced by registration system.

Notes: Mid-term and final exams may be scheduled on Saturdays for this class. The number of class sessions will be modified to compensate for mid-term examination time. Accommodations will be made for religious conflicts, Saturday classes, and certain official university activities.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

ACCT 331 - Intermediate Financial Accounting I
Deals with the accounting process used to measure and report economic events. The primary goals are to understand the role financial reporting plays in providing decision-useful information; understand the economics underlying business transactions and learn the generally accepted accounting principles (GAAP) that set the reporting and disclosure requirements for those transactions; evaluate the efficacy of GAAP; and understand the motivations that lead managers to select one accounting principle over another. Topics include the accounting process and the conceptual framework, financial statements, and accounting for current and noncurrent assets and liabilities. International Financial Reporting Standards (IFRS) are discussed.

**Prerequisite(s):** Degree status, grade of B minus or higher in ACCT 301. Prerequisite enforced by registration system.

**Notes:** Mid-term and final exams may be scheduled on Saturdays for this class. The number of class sessions will be modified to compensate for mid-term examination time. Accommodations will be made for religious conflicts, Saturday classes, and certain official university activities.

**ACCT 332 - Intermediate Financial Accounting II**

Credits: 3 (NR)
Study of the accounting process used to measure and report economic events. The primary goals are to understand the role financial reporting plays in providing decision useful information; understand the economics underlying business transactions and learn the generally accepted accounting principles (GAAP) that set the reporting and disclosure requirements for those transactions; evaluate the efficacy of GAAP; and understand the motivations that lead managers to select one accounting principle over another. Topics include bonds, owners' equity, cash flows, accounting changes, and accounting for investments, income taxes, leases, and pensions. International Financial Reporting Standards (IFRS) are discussed.

**Prerequisite(s):** Degree status, grades of C or higher in ACCT 331 and FNAN 301. Prerequisite enforced by registration system.

**Notes:** This course is a continuation of ACCT 331.

Mid-term and final exams may be scheduled on Saturdays for this class. The number of class sessions will be modified to compensate for mid-term examination time. Accommodations will be made for religious conflicts, Saturday classes, and certain official university activities.

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0
**When Offered:** Fall, Spring

**ACCT 351 - Taxation and Managerial Decision Making**

Credits: 3 (NR)
Introduction to fundamental topics in taxation using a business-entities approach. Specific topics include gross income, deductions, losses, and property transactions. The course emphasizes the identification of planning and compliance issues and the application of tax law to resolve those issues. Both tax and non-tax factors affecting decision making are considered.

**Prerequisite(s):** Degree status, grade of C or higher in ACCT 331. Prerequisite enforced by registration system.
Notes: Mid-term and final exams may be scheduled on Saturdays for this class. The number of class sessions will be modified to compensate for mid-term examination time. Accommodations will be made for religious conflicts, Saturday classes, and certain official university activities.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

ACCT 361 - Accounting Information Systems

Credits: 3 (NR)
Introduction to accounting information systems, focusing on a conceptual basis for transaction processing. Handling and processing of transactions in revenue, expenditure, and payroll cycles serves as platform for developing and manipulating accounting information within a computerized transaction-processing and electronic data environment.

Prerequisite(s): Degree status, grade of B minus or higher in ACCT 301. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

ACCT 372 - Financial Statement Analysis

Credits: 3 (NR)
Detailed overview of financial statement analysis by users of financial statements. Students learn about common features of mandatory and voluntary accounting disclosures, behaviors and interactions among different users of financial statement information. Primary focus is analysis of financial statement information in body of financial statements and footnotes, and implications of those disclosures for firm valuation, fraud prediction, taxation, and governance.

Prerequisite(s): Degree Status, grade of "C" or higher in ACCT 331 or FNAN 302. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

ACCT 411 - Advanced Managerial Accounting

Credits: 3 (NR)
Managerial uses of accounting information in planning, controlling, motivating, and decision making. Emphasizes quantitative and behavioral aspects of managerial accounting.

Prerequisite(s): Degree status, grade of C or higher in ACCT 311. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring
ACCT 433 - Advanced Financial Accounting

Credits: 3 (NR)

Prerequisite(s): C or higher in ACCT 332, degree status. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

ACCT 451 - Advanced Federal Taxation

Credits: 3 (NR)
Federal taxation of corporations, partnerships, fiduciaries, and gratuitous transfers.

Prerequisite(s): Degree status, grade of C or higher in ACCT 351. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

ACCT 461 - Assurance and Audit Services

Credits: 3 (NR)
Introduction to audit and other assurance services' objectives, theory, and practices. Focuses on developing skills for interpreting business strategies and identifying related business risks, describing internal control solutions to those risks, identifying evidential sources, providing assurance about those risks and controls, and designing strategies to provide assurance services about the reliability of business information.

Prerequisite(s): Degree status, grades of C or higher in ACCT 331 and 361. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

ACCT 462 - Honors Seminar in Accounting

Credits: 3 (NR)
An in-depth study and analysis of contemporary developments and topics of interest in accounting.
Prerequisite(s): Accounting major, senior standing, permission of the instructor.

Notes: The topics and format will vary. Enrollment in this course is limited and competitive.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

ACCT 472 - Government and Not-for-Profit Accounting

Credits: 3 (NR)
Introduction to accounting for nonbusiness organizations. Emphasizes accounting issues unique to these entities, including non-exchange transactions and lack of ownership interest. Includes accounting and reporting for state and local governments, charitable organizations, and the federal government.

Prerequisite(s): Degree status, grade of C or higher in ACCT 331. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

ACCT 491 - Seminar in Accounting

Credits: 3 (NR)
Advanced study of accounting concepts and selected topics.

Prerequisite(s): Degree status, ‘C’ or higher in ACCT 331. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

ACCT 492 - Field Experience in Accounting

Credits: 3 (NR)
Opportunity to gain practical and professional experience in conjunction with academic development.

Prerequisite(s): Degree Status.

Notes: Crosslisted with SOM 492 and is intended for accounting students. May be used as elective credit, but may not be repeated.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring, Summer
ACCT 499 - Independent Study

Credits: 1-3 (RT)
Research and analysis of selected problems or topics in accounting.

Prerequisite(s): 9 credits in upper-level accounting courses, degree status.

Notes: Must be arranged with an instructor, and students must receive written approval from the associate dean for undergraduate programs before registration. Written report required. May be repeated for maximum 6 credits if topics vary.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0

ACCT 611 - Advanced Managerial Accounting

Credits: 3 (NR)
Examines the firm's planning and control decisions that require a more sophisticated approach than the rule-of-thumb procedures advocated for traditional cost accounting problems. Students will work with real-world issues and problems and apply the appropriate analytical model to develop relevant management accounting treatments.

Prerequisite(s): Admission to the MSA program or permission of the program director. ACCT 311 or equivalent.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring

ACCT 633 - Identifying and Resolving Advanced Issues in Financial Accounting

Credits: 3 (NR)
Students will gain knowledge and skills used in the interpretation of complex corporate financial accounting issues and in the preparation of complex financial statements. Topics include acquisitions, consolidations, derivatives, segment reporting, partnerships, and SEC reporting. Students also will learn to conduct research using the FASB Accounting Standards Codification to resolve ambiguous reporting issues.

Prerequisite(s): Enrollment in MSA program or permission of MSA Director.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ACCT 651 - Identifying and Resolving Advanced Issues in Taxation

Credits: 3 (NR)
Examines the application of the federal income tax law to C-corporations, S-corporations, and partnerships. Topics will include the formation, operations, and dissolutions of such entities. Students will read and apply primary tax authorities to client fact patterns and engage in significant professional research and writing.
Prerequisite(s): Admission to the MSA program or permission of the program director. ACCT 351 or equivalent.

Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0  
When Offered: Fall

ACCT 672 - Governmental and Nonprofit Accounting

Credits: 3 (NR)  
Accounting and Reporting for non-business organizations. Emphasizes accounting issues unique to these entities, including non-exchange transactions and lack of ownership interest. Includes accounting and reporting for state and local governments, nongovernment organizations, and the federal government.

Prerequisite(s): Admission to the MSA program or permission of the program director.

Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0  
When Offered: Fall

ACCT 690 - Professional Accounting Colloquium

Credits: 3 (NR)  
Study of contemporary accounting issues currently facing the profession through presentations and workshops given by professionals of the day including academic researchers, regulators, executives.

Prerequisite(s): Admission to the MSA program or permission of the program director.

Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0  
Grading: Graduate Special.  
When Offered: Fall, Spring

ACCT 692 - Seminar in Accounting

Credits: 3 (NR)  
Provides selective analysis of important issues in contemporary accounting practice.

Prerequisite(s): Admission to the MS Accounting program or permission of the program director.

Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0  
When Offered: Fall, Spring

ACCT 701 - Business Valuation
Credits: 3 (NR)
Provides hands-on-experience in financial statement analysis and valuation. Takes an accounting-based valuation perspective and offers a comprehensive framework for analyzing financial statements consisting of (a) Business Strategy, (b) Accounting Analysis, (c) Financial Analysis, and (d) Prospective Analysis and Valuation.

Equivalent to MBA 701

Prerequisite(s): Admission to the MSA program or permission of instructor. "B" or better in MBA 613.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ACCT 708 - Taxes and Business Strategy

Credits: 3 (NR)
Provides a framework for making managerial decisions in a global tax environment. Examines business decisions such as location of facilities, employee compensation, mergers and acquisitions, capital and asset structure, and business form. Focuses on tax planning concepts and the effect of taxes on business decisions.

Equivalent to MBA 708.

Prerequisite(s): Admission to the MSA program or permission of instructor. Completion of MBA core requirements.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ACCT 737 - Fraud and the Law

Credits: 3 (NR)
Provides an overview of US legal system including law-making process, structure of court system, and how frauds are brought to trial, prosecuted and resolved. Explores common fraud statutes used to penalize wrongdoers. Course will examine evidentiary rules including types of evidence, hearsay, impeachment and privileges. Highlight the legal requirements for serving as an expert witness and testifying in court.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ACCT 738 - Advanced Topics in Fraud

Credits: 3 (NR)
Course will cover advanced topics in forensic accounting. The focus will be on contemporary issues in fraud. Examples of topics include litigation support, money laundering, consumer fraud, bankruptcy, divorce and tax fraud, fraud in e-commerce, insurance fraud and mortgage fraud. The course will provide a comprehensive look at fraud investigation.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
ACCT 741 - Information Technology Auditing

Credits: 3 (NR)
Introduces methodologies to assess security and control issues concerning accounting and other information systems. Key feature of course is applying computer-assisted audit tools and techniques to test effectiveness of application controls.

Equivalent to MBA 741

Prerequisite(s): Admission to MSA or MBA program, or permission of program director.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

ACCT 742 - Corporate Governance and Ethics

Credits: 3 (NR)
Focuses on developing understanding of corporate governance issues and ethical decision making. Topics include examination of internal and external international governance issues, and ethical analysis in current business environment.

Equivalent to MBA 742

Prerequisite(s): Admission to MSA or MBA program, or permission of program director.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring

ACCT 743 - Corporate Financial Reporting

Credits: 3 (NR)
Addresses contemporary issues in corporate financial reporting. Focuses on role of financial reporting in providing decision-useful information to participants of capital market, and theoretical and empirical assessments of its performance.

Equivalent to MBA 743

Prerequisite(s): Admission to MSA or MBA program, or permission of program director.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Summer

ACCT 744 - Fraud Deterrence and Detection
Introduces strategies and techniques for fraud prevention and detection. Focuses on financial fraud such as bribery, contract rigging and kickbacks, embezzlement, fraudulent financial reporting, payroll fraud, and misappropriation of inventory and other assets.

Equivalent to MBA 744

**Prerequisite(s):** Admission to MSA or MBA program, or permission of program director.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall

---

**ACCT 745 - International Financial Reporting**

Credits: 3 (NR)  
Examines accounting from an international perspective, including the study of various functional areas of accounting across countries and the reporting requirements encountered by companies engaged in international trade and making foreign direct investments.

Equivalent to MBA 745

**Prerequisite(s):** Completion of MBA or MSA core requirements, or permission of program director.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**ACCT 792 - Seminar in Accounting**

Credits: 3 (RT)  
Selective analysis of topics addressing important issues in contemporary accounting practice. Discussion of two or three major topics.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**ACCT 795 - Global Accounting Environment**

Credits: 3 (NR)  
Examines the activities of accounting firms competing in the global business environment. Students will observe these activities in residency and study the decision-making processes of international accounting firms to develop an understanding of the regulatory environment of global accounting.

**Prerequisite(s):** Admission to the MSA program or permission of the program director.

**Hours of Lecture or Seminar per week:** 3
ACCT 796 - Independent Studies/Directed Readings

Credits: 1-3 (NR)
Research and analysis of selected problems or topics in accounting not otherwise available in curriculum.

Prerequisite(s): Permission of Program Director.

Notes: Approval of faculty member and program director required. May be repeated for up to 3 credits.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0

Adult Education (EDAL)
Offered by the College of Education and Human Development

EDAL 542 - Arranging Conditions for Adult Learning

Credits: 6 (NR)
Focuses on linking adult learners to resources and establishing the environment for learning. Covers program development processes, teaching and learning strategies for adults, technology and adult learning, workplace learning, and learning organizations.

Hours of Lecture or Seminar per week: 6
Hours of Lab or Studio per week: 0

African and African American Studies (AFAM)
Offered by the College of Humanities and Social Sciences

AFAM 200 - Introduction to African American Studies

Credits: 3 (NR)
Interdisciplinary introduction to the field of African American studies. Includes comparative analysis of approaches, methodologies, and key concepts related to the study of people of African descent in the United States, continental Africa, and throughout the African diaspora. Lectures and discussion integrate attention to such issues as diversity and multiculturalism from national and global perspectives.

Fulfills general education requirement in social and behavioral science.
AFAM 390 - Special Topics in African and African American Studies

Credits: 3 (RT)
Study of selected topics related to the study of people of African descent in Africa, the United States, the Caribbean, Latin Americas and throughout the African Diaspora.

Notes: May be repeated for a maximum of 12 credits when topic is different.

AFAM 490 - Internship

Credits: 2-6 (NR)
Approved work-study program in cooperation with specific organizations including area museums; NGOs; and local, state, and federal agencies. Students should arrange for an internship in the semester before they wish to enroll. Requires approval of department.

Prerequisite(s): AFAM 200 and 60 credits.

Notes: Credit to be determined by the African American Studies Program.

AFAM 499 - Independent Study

Credits: 1-3 (NR)
Investigation of an area related to African American studies according to individual interest, with emphasis on research.

Prerequisite(s): Permission required from program director, Dr. Wendi Manuel-Scott.

Anthropology (ANTH)

Offered by the College of Humanities and Social Sciences

ANTH 114 - Introduction to Cultural Anthropology
Overview of major ideas and approaches to the study of cultures around the world. Surveys kinship, social organization, political economy, religious beliefs, language and other aspects of non-Western cultures.

Fulfills general education requirement in social and behavioral science.

Notes: Fulfills the college requirement in non-Western culture.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ANTH 120 - Unearthing the Past: Prehistory, Culture and Evolution

Credits: 3 (NR)
Introduction to archeology and bioanthropology. Explore issues and debates in human biological evolution, prehistory and social change, as well as lab and field methods for understanding archaeological remains.

Fulfills general education requirement in social and behavioral science.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring, Summer

ANTH 135 - Becoming Human: Evolution, Cognition, and Culture

Credits: 3 (NR)
Examines fossil evidence for human evolution, the origins of human cognition, and human culture. Explores contemporary issues and debates in human biological and social evolution.

Fulfills general education requirement in social and behavioral science.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ANTH 299 - Independent Study

Credits: 1-3 (NR)
Individual study in anthropology on topic organized in advance by student and instructor.

Prerequisite(s): ANTH 114, or permission of instructor.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0

ANTH 300 - Civilizations
Cross-cultural and transtemporal examination of complex societies and civilizations. Explores developmental schema for rise, articulation, spread, and decline of historic and contemporary civilizations.

Notes: Fulfills the college requirement in non-Western culture.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**ANTH 301 - Native North Americans**

Credits: 3 (NR)
Exploration of native North American cultures and selected aspects of Indian-white historical relations. Emphasizes cultural persistence as well as change.

Notes: Fulfills the college requirement in non-Western culture.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**ANTH 302 - Peoples and Cultures of Latin America**

Credits: 3 (NR)
Examines Latin American cultures and selected aspects of historical record.

Fulfills general education requirement in global understanding.

Prerequisite(s): ANTH 114, 60 credits, or permission of instructor.

Notes: Fulfills the college requirement in non-Western culture.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**ANTH 304 - Peoples and Cultures of the Pacific**

Credits: 3 (NR)
Survey of 20th-century Melanesian, Polynesian, and Micronesian cultures. Case studies of interplay between cultural systems and island ecology.

Fulfills general education requirement in global understanding.

Notes: Fulfills the college requirement in non-Western culture.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
ANTH 305 - Foraging Societies

Credits: 3 (NR)
Examines early human societies with emphasis on environmental, technological, and cultural aspects of hunting and gathering as a successful means of adaptation.

Notes: Fulfills the college requirement in non-Western culture.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ANTH 306 - Peoples and Cultures of Island Asia

Credits: 3 (NR)
Examines cultures of the Island Asia culture region, focusing on native cultures of Indonesia, Borneo, and the Philippines.

Fulfills general education requirement in global understanding.

Notes: Fulfills the college requirement in non-Western culture.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ANTH 307 - Ancient Mesoamerica

Credits: 3 (NR)
Examines the peoples and cultures of ancient Mesoamerica, including Olmec, Maya, Teotihuacan, and Aztec societies. Major topics include the rise of civilization, the development of the Mesoamerican cultural tradition, the growth of cities, trade, exchange, writing systems, political organization, religion, conflict, and the archaeological study of this indigenous heritage.

Fulfills general education requirement in global understanding.

Prerequisite(s): ANTH 120, 60 credits, or permission of instructor.

Notes: Fulfills the college requirement in non-Western culture.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ANTH 308 - Peoples and Cultures of the Middle East

Credits: 3 (NR)
Examines the anthropological literature on peoples and cultures of the Middle East, with particular attention to political and social change over the course of the 20th century.
ANTH 309 - Peoples and Cultures of India

Credits: 3 (NR)
Examination of South Asia, with emphasis on India. Includes general overview of prehistory and history; impact of colonialism; contemporary Indian culture, including the changing relations of caste and class, family organization, and the roles of women, religion, and ideology; and current trends in economic development and socioeconomic differences in different parts of the country.

Fulfills general education requirement in global understanding.

Notes: Fulfills the college requirement in non-Western culture.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ANTH 310 - Social Organization and Kinship

Credits: 3 (NR)
Examines social organization, kinship, descent, and kinship terminologies in mainly non-Western cultures, emphasizing the meaning of specific cultural systems and cross-cultural similarities and differences.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ANTH 311 - Peoples and Cultures of Mainland Southeast Asia

Credits: 3 (NR)
Survey of societies of mainland Southeast Asia, with emphasis on successive waves of outside cultural influences and relations between contrasting ethnic groups in modern states. Focuses on Thailand and Malaysia.

Fulfills general education requirement in global understanding.

Notes: Fulfills the college requirement in non-Western culture.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
ANTH 312 - Political Anthropology

Credits: 3 (NR)
Examines cultural and ecological contexts of political structures and competition for power in selected societies; and cross-cultural and comparative approaches to study of political conflict, leadership, values, and symbolism.

Fulfills general education requirement in global understanding.

Prerequisite(s): ANTH 114, 60 credits, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ANTH 313 - Myth, Magic, and Mind

Credits: 3 (NR)
Examines religion as a cultural system. Topics include mythology, ritual, symbolism, and dogma. Emphasizes cross-cultural and predominantly non-Western material.

Fulfills general education requirement in global understanding.

Notes: Fulfills the college requirement in non-Western culture.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ANTH 314 - Zombies

Credits: 3 (NR)
Explores how human beings across cultures have historically expressed social anxieties through references to the one particular manifestation of the undead: zombies, figures representing a state in which human beings are animate and affective in the world around them, but lack consciousness or free will.

Notes: Fulfills the college requirement in non-Western culture.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ANTH 315 - Socialization Processes: Family, Childhood, Personality in Cross-Cultural Perspective

Credits: 3 (NR)
Examines aspects of the cultural transmission process in specific local cultures selected from various world culture regions, with emphasis on transmission of cultures.

Prerequisite(s): ANTH 114, 60 credits, or permission of instructor.
ANTH 316 - Peoples and Cultures of the Caribbean

Credits: 3 (NR)
Examines the social, cultural, and political history of the Caribbean Sea islands and coastal Central and South American lowlands that collectively constitute the geographic and cultural region known as the Caribbean. Emphasizes the central role this region has historically played in creating a sense of global interconnectedness among diverse regions of the world.

Fulfills general education requirement in global understanding.

ANTH 322 - Pirates, Conquest, and Death: Archaeology and Globalism since 1500

Credits: 3 (NR)
Examines materials, theories, and methods of archaeology derived from and applied to historical sites, as they complement archival records.

Prerequisite(s): ANTH 120, 60 credits, or permission of instructor.

ANTH 323 - Digging and Dealing in the Dead: Ethics in Archaeology

Credits: 3 (NR)
Survey of the ethical and legal dimensions of conducting archaeological research. Examines historical and contemporary debates about the responsibilities archaeologists have to the communities they study. Explores appropriate methods of artifact preservation, excavation, and the interpretation of data.

Notes: Fulfills the college requirement in non-Western culture.

ANTH 324 - Warfare, Violence, and Sacrifice in Antiquity

Credits: 3 (NR)
Examines origin and nature of conflict in human society with an emphasis on the ancient past. Major topics include the possible role of violence in human evolution, cross-cultural studies of conflict in indigenous society, warfare in early states, and sacrifice
as a ritual practice.

**Prerequisite(s):** ANTH 120, 60 credits, or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**ANTH 325 - Field Techniques in Archaeology**

Credits: 3-6 (RT)  
Intensive study of archaeological field techniques by directed group projects in site survey, site testing, recording techniques, and  
stratigraphy through discussions, demonstrations, and hands-on experience.

**Prerequisite(s):** ANTH 120, 60 credits, or permission of instructor.

**Notes:** May be repeated for a maximum 6 credits.

**Hours of Lecture or Seminar per week:** 1-3  
**Hours of Lab or Studio per week:** 0

**ANTH 330 - Peoples and Cultures of Selected Regions: Non-Western**

Credits: 3 (NR)  
Examines cultures of a specific region such as Africa and the Middle East. Focuses primarily on non-Western cultures.

**Prerequisite(s):** ANTH 114, 60 credits, or permission of instructor.

**Notes:** Fulfills the college requirement in non-Western culture.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**ANTH 331 - Refugees**

Credits: 3 (NR)  
Introduction to causes and consequences of forced dislocation as a global issue. Covers formally recognized refugees, as well as  
people such as internally displaced persons and asylum seekers who are in refugee-like circumstances. Focuses on understanding  
the personal experiences of refugees and examining efforts on their behalf at national and international levels.

Fulfills general education requirement in global understanding.

**Prerequisite(s):** ANTH 114, 60 credits, or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0
ANTH 332 - Cross-Cultural Perspectives on Globalization

Credits: 3 (NR)
Examines the varieties of cultural experience. Several cultures are studied in depth; with attention to local histories, global contexts, and shifting perspectives on the practice of ethnography.

Fulfills general education requirement in global understanding.

Notes: May be used for credit toward the BA in sociology. Fulfills the college requirement in non-Western culture.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ANTH 340 - Comparative Perspectives on Immigration

Credits: 3 (NR)
Considers the dimensions and meanings of the immigrant experience in the United States, with a focus on the diversity of immigrants and refugees who have arrived during the past 30 years. Emphasis on the social context in which immigration occurs and on the bearing of institutional and cultural influences on patterns of adaptation, assimilation, and exclusion from the host society.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ANTH 360 - Evolution, Sex, and Society

Credits: 3 (NR)
Inquiry into the biological dimensions of humans as culture-bearing animals. Topics include altruism, aggression, primate social organization, morphology, comparative ethnology, and microevolutionary genetic differentiation.

Prerequisite(s): ANTH 135, 60 credits, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ANTH 365 - Race and Racism

Credits: 3 (NR)
Examines biological dimensions of human variation and the beginnings of race as a concept. Discusses evolution of human biodiversity in culturally distinct human groups related to environment, physiology, genetics, nutrition, and disease. Explores use of scientific analyses of human biodiversity.

Prerequisite(s): ANTH 135, 60 credits, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
ANTH 370 - Environment and Culture

Credits: 3 (NR)

Examines relationships among environment, culture, and human behavior with an emphasis on cultural ecological explanations in mainly non-Western contexts. Designated a Green Leaf Course.

Prerequisite(s): ANTH 114, 60 credits, or permission of instructor

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ANTH 371 - Psychological Anthropology

Credits: 3 (NR)
Survey of issues in the study of relationships between cultural and psychological variables. Major topics viewed cross-culturally include personality, mental illness, projective systems, cognition, and learning.

Prerequisite(s): ANTH 114, 60 credits, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ANTH 375 - Culture, Power, History

Credits: 3 (NR)
Use of ethnographic, archaeological, linguistic, and documentary data, in light of anthropological theory, to interpret the past and processes of change among indigenous peoples throughout the world.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ANTH 380 - Language and Culture

Credits: 3 (NR)
Anthropological analyses of language behavior, origins, and change. Emphasizes the interplay of language, culture, anthropology, and linguistics.

Prerequisite(s): ANTH 114, 60 credits, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
ANTH 381 - Medical Anthropology

Credits: 3 (NR)
Surveys the discipline of medical anthropology, focusing on traditional medical beliefs and the diverse responses to modern scientific medicine in developing countries and among cultural minorities in the United States.

Prerequisite(s): ANTH 114, 60 credits, or permission of instructor.

Notes: Fulfills the college requirement in non-Western culture.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ANTH 382 - Urban Anthropology

Credits: 3 (NR)
Uses tools and resources of social and cultural anthropology to study life in cities, including urban poverty, migration, urban planning, and discrimination. Case studies draw from different urban environments around the world, including Washington, D.C., and New York City.

Prerequisite(s): ANTH 114 and 60 credits, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ANTH 385 - Gender, Class, and Ethnicity in Latin America

Credits: 3 (NR)
Examines the bases for gender differences and similarities across a variety of societies and cultures in Latin America. Examines interrelationships among constructions of gender, class, and ethnicity.

Fulfills general education requirement in global understanding.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ANTH 390 - Theories, Methods, and Issues I

Credits: 3 (NR)
First of a two-course sequence that reviews the major theoretical traditions and schools of thought in anthropology.

Prerequisite(s): ANTH 114 and 60 credits, or permission of instructor.

Notes: Required for anthropology majors.
ANTH 395 - Work, Technology, and Society: An IT Perspective

Credits: 3 (NR)
Introduction to the anthropology of work, technology, and society, with emphasis on information technology. Covers general conceptual issues of information technology and also involves specific practical exercises with computers, their operating systems, the logic of automated production, databases, and web-based communication. Attention also directed to social and ethical issues raised by contemporary information technology.

Fulfills general education requirement in information technology (all).

Prerequisite(s): ANTH 114, 60 credits, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ANTH 396 - Issues in Anthropology: Social Sciences

Credits: 3 (RT)
Topic of contemporary interest in anthropology, focusing on social science topics of interest.

Fulfills general education requirement in social and behavioral science.

Notes: May be repeated for a maximum of 18 credits when topic is different. Fulfills the college requirement in non-Western culture.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring, Summer

ANTH 398 - Study Abroad

Credits: 1-6 (RD)
Field project or study abroad experience leading to the production of a written report

Notes: May be repeated with permission of department for a maximum of 6 credits.

Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring, Summer

ANTH 399 - Issues in Anthropology
Credits: 3 (RT)
Topic of contemporary interest in anthropology, changing from semester to semester, and focusing on topics such as sex roles, anthropology and ethics, and primate social organization.

Prerequisite(s): ANTH 114 and 60 credits, or permission of instructor.

Notes: May be repeated for credit when topic is different.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ANTH 400 - Engaging the World: Anthropological Perspectives

Credits: 3 (RT)
Examines selected topics with emphasis on the integration of different kinds of knowledge and the balancing of alternative ways of assessing meaning and relevance. Topics usually drawn from issues of global economic processes, civic rights and responsibilities, ethics, museums, public policy, the environment, and migration.

Fulfills general education requirement in synthesis.

Prerequisite(s): ANTH 114, 60 credits, completion of all general education requirements, or permission of instructor.

Notes: May be repeated for a maximum of 9 credits when topic is different.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ANTH 410 - Research Design and Methods in Bioanthropology

Credits: 3 (NR)
Research design in bioanthropology and archaeology. Topics include critique of case studies, framing problems, field strategies, measuring variables, sampling, analysis, and interpretation of results.

Prerequisite(s): 60 credits and 6 credits of anthropology, including ANTH 120 or 135; or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ANTH 420 - Interpretation in Archaeology

Credits: 3 (NR)
Explores theoretical and methodological issues in archaeology. Considers patterns and contexts of archaeological remains, analytic problems, and interpretation of material culture.

Prerequisite(s): 6 credits of anthropology including ANTH 120, or permission of instructor.
ANTH 425 - Public Archaeology

Credits: 3 (NR)
Considers public significance of archaeology and anthropological contributions to public concerns such as antiquities legislation and cultural resource management.

Prerequisite(s): 6 credits of anthropology including ANTH 120, or permission of instructor.

ANTH 427 - Historic Cemetery Survey

Credits: 4 (NR)
Explores demographic, stylistic, and religious aspects of historic cemeteries. Students learn to survey, record, and analyze gravestone data through field projects.

Prerequisite(s): ANTH 120, or permission of instructor.

ANTH 428 - Patterns in Prehistory

Credits: 3 (NR)
Explores diversity of prehistoric cultures in light of major cultural development: hunting-gathering, agriculture, pastoralism, and complex societies.

Prerequisite(s): 60 credits, or permission of instructor.

ANTH 430 - Research Methods in Archaeology

Credits: 3 (NR)
Studies archaeological research process through discussions of current archaeological methodologies and student participation in designing and critiquing research projects.

Prerequisite(s): ANTH 120, 60 credits, or permission of instructor.
ANTH 435 - Special Projects: Archaeology and Biological Anthropology

Credits: 1-3 (NR)
Lab or field project leading to a written report of the research.

Prerequisite(s): ANTH 120 or 135, 60 credits, and permission of instructor.

Notes: Research and paper completed under instructor's guidance.

Hours of Lecture or Seminar per week: 1-12
Hours of Lab or Studio per week: 0

ANTH 436 - Special Projects: Archaeology and Biological Anthropology

Credits: 1-3 (NR)
Lab or field project leading to a written report of the research.

Prerequisite(s): ANTH 120 or 135, 60 credits, and permission of instructor.

Notes: Research and paper completed under instructor's guidance.

Hours of Lecture or Seminar per week: 3-6
Hours of Lab or Studio per week: 0

ANTH 440 - Applied Anthropology: Seeking Solutions in the Public and Private Sectors

Credits: 3 (NR)
Focuses on anthropologists' contributions to major policy issues in development agencies in the United States and abroad. Covers techniques that lead to prevention or management of social and cultural conflict.

Prerequisite(s): ANTH 114, 60 credits, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ANTH 450 - Qualitative Methods: Nonstatistical Approaches in Culture and Social Research

Credits: 3 (NR)
Explores some of the most useful nonquantitative research techniques in social sciences and offers practice in their application.
Prerequisite(s): 60 credits and 6 credits of anthropology including ANTH 114, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**ANTH 488 - Gender, Sexuality, and Culture**

Credits: 3 (NR)
Examines how gender, sexuality, race, and class come together as analytically distinct, yet practically intertwined, systems of meaning and practice. Examples highlight questions of political economy and history while focusing on specific ethnographic or historical readings.

Prerequisite(s): 60 hours and ANTH 340 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**ANTH 490 - Theories, Methods, and Issues II**

Credits: 3 (NR)
Second of a two-course sequence that reviews major theoretical traditions and schools of thought in anthropology.

Fulfills writing intensive requirement in the major.

Prerequisite(s): 60 hours and 9 hours of ANTH, including ANTH 390, or permission of instructor.

Notes: Required for anthropology majors and usually taken as a senior seminar.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**ANTH 492 - Contemporary Controversies in Anthropology**

Credits: 3 (NR)
Examines recent important works, issues, and controversies in anthropology.

Prerequisite(s): 60 credits and 9 credits of anthropology including ANTH 390, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**ANTH 495 - Internship**
Supervised project in applying anthropology in relevant settings including public and historical archaeology, developmental anthropology, museums, non-profit organizations, advocacy, communications, or consulting organizations.

Prerequisite(s): 60 credits or permission of instructor.

Notes: May be repeated for a maximum of 6 credits. Students must complete 45 hours of work at the internship site for each credit.

Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 0

ANTH 496 - On Evolution

Credits: 4 (NR)
Considers evolution as a biological as well as cultural concept. Parallels and contrasts among conceptual approaches allow a critique of the potential of evolution as a unifying biosocial theory.

Prerequisite(s): 60 credits and 9 credits of anthropology, or permission of instructor.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 2

ANTH 499 - Independent Research

Credits: 1-12 (RT)
Individual research on a topic to be organized in advance by student and instructor.

Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 0

ANTH 535 - Anthropology and the Human Condition: Seminar I

Credits: 3 (NR)
Examines some of the major theorists of 19th- and early 20th-century cultural theory. Marx, Freud, Durkheim, and Weber are surveyed as foundational thinkers for reading the works of such 20th-century theorists as Boas, Malinowski, Benedict, and Sapir.

Prerequisite(s): Graduate standing or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ANTH 536 - Anthropology and the Human Condition: Seminar II
Credits: 3 (NR)
Examines contemporary theorists of anthropology, covering ongoing debates over epistemology and the multiple strands that inform anthropological theory and practice.

Prerequisite(s): ANTH 535.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**ANTH 555 - Policy and Culture**

Credits: 3 (NR)
Examines the relevance of cultural processes to policymaking and the culture of policymaking organizations. Topics include development, welfare policy, environmental and energy policy, regulation and risk; health care and immigration policy; and the war on drugs.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**ANTH 568 - Human Origins**

Credits: 3 (NR)
Detailed survey of the genetic, morphological, and behavioral origins of hominids. Discusses current interpretations and debates.

Prerequisite(s): Graduate standing, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**ANTH 576 - American Cultures**

Credits: 3 (NR)
Examines U.S. cultures and explores concept of an American culture. Course readings and discussions explore underpinnings of the American experience, document broad historical shifts, and detail the experience of diverse groups of Americans, thus forming the basis for a critical, analytical, and comparative discussion of American life and life in America.

Prerequisite(s): Graduate standing, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**ANTH 580 - Environmental Anthropology**
Covers major theoretical trends and ethnographic works in environmental anthropology, focusing on the frameworks developed and used by environmental anthropologists, including cultural ecology, ecological anthropology, environmentalism, political ecology, new ecology, and science and technology studies. Explores how environmental anthropologists have contributed to broader debates about modernity, globalization, power, kinship, science and technology, and human-environmental relations.

**Prerequisite(s):** Graduate standing, or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

### ANTH 600 - Anthropology and Museums

Credits: 3 (NR)  
Explores the changing relations between culture, indigenous groups, representation and knowledge by examining how meaning is created and conveyed in museums and exhibits.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall, Spring, Summer

### ANTH 610 - Social Organization

Credits: 3 (NR)  
Detailed examination and re-evaluation of the basic concepts of kinship and social organization in light of contemporary anthropological concerns. Several classical and contemporary texts develop key issues of social organization. Review of traditional concepts of classical anthropology introduces discussion of the nature of the broad epistemological shift that occurred in the last quarter of the 20th century.

**Prerequisite(s):** Graduate standing, or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

### ANTH 614 - Ethnopsychology: Self, Subject, and Culture

Credits: 3 (NR)  
The emerging field of ethnopsychology, in Catherine Lutz's words, is "concerned with the way in which people conceptualize, monitor, and discuss their own and other's mental and/or behavioral processes." Course examines roots of the ethnopsychological enterprise, reviews several recent approaches to the description and analysis of folk psychological material, and investigates the relationship between folk psychology and other aspects of social life.

**Prerequisite(s):** Graduate standing, or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 3
ANTH 615 - Ritual and Power in Social Life

Credits: 3 (NR)
Domains of religion and politics are conjoined by questions of power: its deployment, distribution, and forms of resistance it engenders. Course investigates connections among religious thought, ritual practice, and political action by drawing on a variety of theoretical orientations in the social sciences including structuralism, semiotics, psychoanalysis, and performance theory.

Prerequisite(s): Graduate standing, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ANTH 616 - Anthropology of the City

Credits: 3 (NR)
Examines classic and contemporary works in urban theory, in light of broader scholarly discussions of modernity and globalization. Uses a case-study approach to analyze topics such as: public and private space, citizenship and governance, architecture and design, housing, transportation, formal and informal settlements, and the contest over space and environmental resources in cities around the world.

Notes: Course may be offered fall or spring.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

ANTH 617 - Political Economy

Credits: 3 (NR)
Human societies have always engaged in complex political relations and economic exchanges. The cultural meanings people create are shaped by, and in turn shape, systems of power. Political economy is the attempt to understand the relationship between politics and economics, at the juncture of local meanings and global histories. Course reviews major works and models of political economy, especially as they relate to social and cultural analysis.

Prerequisite(s): Graduate standing, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ANTH 620 - Theory: Archaeology and Biological Anthropology

Credits: 3 (NR)
Examines theoretical approaches in archaeology, paleoanthropology, and biological anthropology.
Prerequisite(s): Course in archaeology, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ANTH 625 - Research Design and Methods in Archaeology and Biological Anthropology

Credits: 3 (NR)
Examines research strategies and methods in archaeology, paleoanthropology, and biological anthropology.

Prerequisite(s): Course in archaeology, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ANTH 631 - Refugees in the Contemporary World

Credits: 3 (NR)
Explores major refugee flows since the mid-20th century, emphasizing mechanisms for providing assistance, asylum, and resettlement.

Prerequisite(s): Graduate standing.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ANTH 632 - International Migration in Comparative Perspective

Credits: 3 (NR)
International migration in the contemporary world, focusing on the full range of economic, political, and social reasons for migration and the effects of different national policies on that process.

Prerequisite(s): Graduate standing or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ANTH 635 - Regional Ethnography

Credits: 3 (RD)
In-depth study of peoples and cultures of a specific world region (Latin America, East Asia, the Pacific, or United States). Content may include cultures defined by diaspora, migration, and other global forces and processes.

Prerequisite(s): Graduate standing, or permission of instructor.
Notes: May be repeated for a maximum of 6 credits when topic is different.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ANTH 640 - Applied Anthropology

Credits: 3 (NR)
Explores the application of contemporary anthropological ideas, theories, and methods to find solutions to practical problems as defined by various organizations and institutions including business, government, nongovernmental organizations, and various institutions.

Prerequisite(s): Graduate standing, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ANTH 645 - Ethnography and Literature

Credits: 3 (NR)
Explores relations between ethnography and literature. Most anthropological knowledge is transmitted in written form through texts known as "ethnographies." Ethnographic techniques can be used in novels, travel literature, biography, and autobiography. Course explores these uses, alongside anthropological ethnographies, to arrive at a better understanding of ethnography: what constitutes it and how it is defined and practiced.

Prerequisite(s): Graduate standing, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ANTH 650 - Ethnographic Methods and Research Design

Credits: 3 (NR)
Reviews and examines major research methods commonly employed in cultural anthropological field study, with emphasis on ethnographic research design and the use of standard ethnographic techniques. Includes practice in designing ethnographic research project and using ethnographic methods and techniques in a field setting.

Prerequisite(s): Graduate standing, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ANTH 655 - Nationalism, Transnationalism, and States: Local and Global Perspectives
Explores different approaches to understanding the interaction of nationalism, transnationalism, and states given the apparently simultaneous dissolution of demographic, economic and cultural borders, and modernist social science paradigms.

Prerequisite(s): Graduate standing, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ANTH 660 - Social Science and Critical Theory

Credits: 3 (NR)
Surveys key ideas of the Frankfurt School and its legacies today, including the critique of ideology; aesthetic theory; instrumental rationality; and analyses of the state, culture, and society. Writings by members of the Frankfurt School draw on many philosophical and methodological strands: radical humanism, Marxist analysis, cultural criticism, psychoanalysis, and political sociology.

Prerequisite(s): Graduate standing, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ANTH 670 - Regional Studies in Archaeology

Credits: 3 (NR)
Regional survey of specific culture area in archaeology to be chosen by student and instructor.

Prerequisite(s): Permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ANTH 675 - Laboratory Techniques

Credits: 4 (NR)
Covers techniques of data collection, analysis, and management in archaeology and biological anthropology.

Prerequisite(s): Course in archaeology, and permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 3

ANTH 677 - Anthropology and History
Credits: 3 (NR)
Considers anthropological approaches to the study of history, the ways in which people construct their histories, and social historians' effort to incorporate anthropological and ethnographic orientations into their accounts. Attention to tensions between culture and power in the constitution of historiography and to methodological challenges of interpreting qualitative and quantitative data.

Prerequisite(s): Graduate standing, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ANTH 680 - Readings in Archaeology

Credits: 3 (NR)
Directed readings and research on a specific topic in archaeology to be chosen by student and instructor.

Prerequisite(s): Permission of instructor.

Notes: May be repeated for maximum 6 credits.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ANTH 682 - Readings in Biological Anthropology

Credits: 3 (NR)
Directed readings and research on a specific topic in biological anthropology chosen by student and instructor.

Prerequisite(s): Permission of instructor.

Notes: May be repeated for maximum 6 credits.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ANTH 684 - Independent Study in Sociocultural Anthropology

Credits: 1-6 (RD)
Directed reading and research on a specific topic, agreed on by student and faculty member, resulting in a written project.

Notes: May be repeated for maximum of 6 credits.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
Grading: Graduate Special
ANTH 685 - Language and Culture

Credits: 3 (NR)
Survey of research on the relationship between language and culture, and the many ways the study of language has enhanced understanding of the nature of culture. Course material drawn from anthropology's four traditional subdisciplines (cultural, linguistic, prehistoric archaeology, and physical), as well as neighboring fields such as sociolinguistics, psycholinguistics, literary theory, and ethnology.

Prerequisite(s): Graduate standing or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ANTH 687 - Medical Anthropology

Credits: 3 (NR)
Explores the wide variety of cultural interpretations of health, illness, and curing. Examines a number of different curing systems, both traditional and modern, and compares them with cosmopolitan biomedicine. Several book-length case studies cover a wide variety of cultural groups, health topics, and theoretical orientations.

Prerequisite(s): Graduate standing, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ANTH 690 - Internship

Credits: 3-6 (RT)
All internships must be approved by faculty advisor to ensure suitability to the student's course of study. Introduction to applied anthropology through approved work and study at a museum, institute, agency, or other approved site.

Prerequisite(s): Graduate standing in anthropology with 3 credits of methods and 12 credits in program, or with permission of primary advisor.

Notes: May be repeated for maximum 6 credits.

Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 0
Grading: Graduate Special

ANTH 699 - Contemporary Issues in Sociocultural Anthropology

Credits: 3 (RT)
Explores current issues and debates in sociocultural anthropology.

Prerequisite(s): Graduate standing, or permission of instructor.
Notes: May be repeated for a maximum of 6 credits when topic is different.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**ANTH 710 - Contemporary Issues in Archaeology and Biological Anthropology**

Credits: 3 (NR)
Contemporary research developments and the ways in which various scientific disciplines and theoretical approaches are integrated in the study of biocultural evolution, adaptation, and diversity.

Prerequisite(s): ANTH 620 and 625, completion of 24 graduate credits, and approval of graduate advisor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**ANTH 721 - Culture, Power, and Conflict**

Credits: 3 (NR)
Explores power and social conflict through the lens of cultural analysis. Special attention to the role of cultural differences in the structuring of conflict and the deployment of cultural theory in formulating a practice of conflict resolution.

Prerequisite(s): Graduate standing, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**ANTH 750 - Ethnographic Genres**

Credits: 3 (NR)
"Genre" refers to kind, sort, or type. Course surveys the various modes of representation anthropologists use in elaborating participant-observation field work, as well as how these styles refer to and construct ethnographic "others." Explores a set of central philosophical and methodological issues in social-cultural anthropology such as framing, perspective, authority, reflexivity, and politics of style.

Prerequisite(s): Graduate standing, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**ANTH 769 - Gender, Sexuality, and Culture**
Credits: 3 (NR)
Utilizes interdisciplinary material within an overall anthropological perspective on body meanings and practices. Readings highlight questions of political economy and history, focusing on specific ethnographic or historical contexts, to develop an understanding of how gender, sexuality, race, and class become analytically distinct yet intertwined systems of meaning and practice.

Prerequisite(s): Graduate standing, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ANTH 796 - Master's Research Project

Credits: 1-6 (RD)
Capstone research project conducted under the supervision of a faculty project director and project evaluation committee. Project should be a substantial contribution to anthropological knowledge and is in lieu of a thesis.

Prerequisite(s): Approval of project proposal.

Notes: Students must initially enroll for a minimum of 3 credits of ANTH 796 and maintain continuous enrollment in 796 until project is submitted. A maximum of 6 credits of ANTH 796 may be applied to the degree.

Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 0
Grading: Satisfactory/No Credit only

ANTH 797 - Anthropology Colloquium/Workshop

Credits: 0 (RD)
Public forum for the presentation and discussion of contemporary anthropological research.

Prerequisite(s): Admission to graduate program in anthropology or permission of graduate director.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0

ANTH 798 - Thesis or Project Proposal

Credits: 3 (RD)
Work on research proposal that forms basis for master's thesis or project.

Prerequisite(s): Completion of 15 credits, including all other core courses.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
Grading: Satisfactory/No credit only
When Offered: Fall, Spring, Summer
**ANTH 799 - Master's Thesis**

Credits: 1-6 (RD)
Master's thesis research and writing under direction of thesis committee.

Prerequisite(s): Approval of thesis proposal.

Notes: Students must register for a minimum of three credit hours in their first semester of 799 and maintain continuous enrollment in 799 while writing and submitting a thesis. A maximum of 6 credits of 799 may be applied to the degree.

**Applied Information Technology (AIT)**

Offered by the Volgenau School of Engineering

**AIT 500 - Quantitative Foundations for Information Systems Analysis**

Credits: 3 (NR)
Provides common background in basic quantitative areas focused on decision making, information processing, and telecommunications. Topics include review of precalculus, introduction to matrix algebra, problems in optimization, and introduction to probability and statistics.

Prerequisite(s): MATH 108 or equivalent

Notes: Does not fulfill any VSITE graduate degree requirement.

**Hours of Lecture or Seminar per week: 3**
**Hours of Lab or Studio per week: 0**

**AIT 504 - Issues of Cyberspace**

Credits: 3 (NR)
Student panels explore, report on, and make recommendations regarding major and novel problems presented by the explosive and intrusive growth of 'cyberspace.' Legal, ethical, financial, security, utility and value to users and organizations, feasibility, and desirability aspects are considered. Each semester features a major topic area.

**Hours of Lecture or Seminar per week: 3**
**Hours of Lab or Studio per week: 0**

**When Offered:** Fall, Spring
AI5 21 - Software Engineering Essentials

Credits: 3 (NR)
Provides an overview of essential topics in software engineering, including problem solving with computers, requirements, software design, software development, testing, verification, validation, usability, and management. Discuss concepts related to building software, including data structures, object-oriented programming, event handling in GUIs, and web application technologies and how these concepts are handled in various languages, but without requiring the students to program.

Equivalent to SWE 521

Prerequisite(s): Graduate standing.

Notes: This course does not count towards MS programs offered in the Computer Science Department and cannot be used to satisfy course requirements for PhD IT students.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring

AI5 24 - Database Management Essentials

Credits: 3 (NR)
Relational database management systems. Covers logical and physical database design; query languages and database programming; and examines commercial systems. Computing lab.

Equivalent to INFS 524

Prerequisite(s): Graduate Standing in MS, AIT program or permission of instructor.

Notes: This course does not count towards MS programs offered in the Computer Science Department and cannot be used to satisfy course requirements for PhD IT students.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring

AI5 80 - Analytics: Big Data to Information

Credits: 3 (NR)
Course provides an overview of Big Data and its use in commercial, scientific, governmental and other applications. Topics include technical and non-technical disciplines required to collect, process and use enormous amounts of data available from numerous sources. Lectures cover system acquisition, law and policy, and ethical issues. It includes brief discussions of technologies involved in collecting, mining, analyzing and using results.

Prerequisite(s): Graduate Standing.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring
AIT 581 - Problem Formation and Solving in Big Data

Credits: 3 (NR)
The course explores challenges facing analysts exploiting Big Data or Bespoke Data in combination with Big Data, and looks at solutions, mindful of the fact that our intellectual and practical practices are based entirely on the 5000 year old Bespoke Data paradigm, and considering that Big Data practices are too recent to lead to comparable Big Data tools and practices.

Prerequisite(s): Graduate standing.

Notes: Course may be used in other certificate and degree programs.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

AIT 582 - Applications of Metadata in Complex Big Data Problems

Credits: 3 (NR)
The course explores technical and analytical issues, solutions and gaps in processing large volumes of data by leveraging metadata. The goal is to find "facts of interest" (Intelligence) that represent threats to, or even opportunities for, a given industry or domain (e.g., healthcare, finance or national intelligence/national defense) where there is limited time.

Prerequisite(s): Graduate standing.

Notes: Course may be used in other Certificate or Degree programs.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

AIT 590 - Topics in Applied Information Technology

Credits: 3 (RT)
Topics in the application of information technology. Students are expected to participate actively through class dialogues and the crafting of IT solutions to specific problem areas. Course cannot be used to satisfy course requirements for PhD IT students.

Prerequisite(s): Graduate standing and permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring, Summer

AIT 597 - Developing IT Leaders of Integrity
Credits: 3 (NR)
Considers the cultural and organizational influences and focuses on leadership's ethical dimensions. Students identify their core values, study the attributes of effective and toxic leaders, and examine the difference between managing and leading through selected readings, discussions, team projects, in-class activities and guest presentations. Students practice and receive in-class coaching to hone their leadership skills.

Prerequisite(s): Registered student in MS, Applied IT or by instructor's permission.

Notes: Course cannot be used to satisfy course requirements for PhD IT students.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

**AIT 665 - Managing Information Technology Programs in the Federal Sector**

Credits: 3 (NR)
This case study-grounded seminar introduces student team members to the unique complexities of the Federal Sector, including Congressional and Executive Branch oversight, reporting, justifying and sustaining annually very large IT programs. Course cannot be used to satisfy course requirements for PhD IT students.

Prerequisite(s): Permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

Credits: 3 (NR)
Offers a survey of security and privacy issues in Cloud Computing systems, along with an overview of current solutions and available technologies. Examines cloud computing models and threat model and security issues related to data and computation outsourcing, and explores practical applications of secure Cloud Computing.

Prerequisite(s): Restricted to MS, Applied IT program majors or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring.

**AIT 671 - Information System Infrastructure Lifecycle Management**

Credits: 3 (NR)
Examines information system infrastructure lifecycle management including the audit process, IT governance and best practices, system and infrastructure control, IT service delivery and support, protection of information assets, physical security, business and disaster recovery.
Prerequisite(s): Registration in MS, Applied IT program or permission of Instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring.

AIT 672 - Identity Management for Federal IT

Credits: 3 (NR)
Provides a hands-on in-depth description of the principles, concepts, and technology of Identity Management. Topics include digital identity, credentials, authentication, authentication protocols, trust frameworks, cryptography and digital signatures, identity tokens (smart cards), and smart card-based identity verification and authorization applications.

Prerequisite(s): Admission into MS AIT program or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

AIT 673 - Cyber Incident Handling and Response

Credits: 3 (NR)
Examines Computer Emergency Response Team (CERT), including Incident Response, Vulnerability Assessment, Incident Analysis, Malcode Analysis, Forensics and Investigations. Includes exercises in CERT operations and a final Incident Handling project.

Prerequisite(s): AIT 670 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

AIT 675 - Overview of the National Intelligence Community

Credits: 3 (NR)
Introduces structure and basic operations of the U.S. national intelligence community (IC). Students learn general information about organization, structure and missions of the IC and about the tools and techniques employed by intelligence agencies of the U.S. and other intelligence services. Surveys the range of intelligence problems and challenges, types of data and data collectors employed, and how information is processed, analyzed, and disseminated.

Prerequisite(s): Admission into the MS-AIT degree program or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring
AIT 676 - The Intelligence Cycle

Credits: 3 (NR)
Presents the necessary cycle of intelligence activities, to include requirements definition, tasking of assets, collection and the methods to do so, processing, analysis, exploitation, and ultimate dissemination to policy makers and military users. Discusses technologies from the standpoint of what is required to accomplish the necessary activities of the cycle.

Prerequisite(s): Admission into the MS-AIT degree program or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

AIT 677 - Intelligence Analysis Methods

Credits: 3 (NR)
Presents various intelligence analysis methods addressing basic topics: substance-blind analysis of evidence and its credentials, chain of custody analysis, combination of evidence, divide and conquer paradigm for analysis, sources of uncertainty, competing hypotheses and analyses. Discusses case studies in various domains following a hands-on approach using educational analysis tools.

Prerequisite(s): Admission into the MS-AIT degree program or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

AIT 678 - National Security Challenges

Credits: 3 (NR)
Presents the process by which decision makers identify and prioritize intelligence problems and allocate collection and analysis resources to their solutions. Discusses nation-state issues such as Russia, China, and Iran, and transnational issues such as terrorism, weapons proliferation, narcotics and smuggling, and cyber conflict and the intelligence shortcomings and needs in regard to these problems.

Prerequisite(s): Admission into the MS-AIT degree program or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

AIT 679 - Big Data, Small Details and Time

Credits: 3 (NR)
Explore leadership, management, technical and analytical issues, solutions and gaps in processing large volumes of data (Big Data) by leveraging meta-tags and metadata (Small Details). The goal is to find “facts of interest” (Intelligence) that represent
threats to, or even opportunities for, a given industry or domain (e.g., healthcare, finance or national security) where there is limited time (Time).

**Prerequisite(s):** Admission to the MS, AIT program or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall, Summer

### AIT 685 - Capstone Seminar

Credits: 3 (NR)  
Student team-based experience grounded on a solid understanding of the coursework mastered in each of the program's three areas of study. Teams analyze business cases, facilitated by area faculty, of systems of system programs ("mega-systems") of the 20th century. Course cannot be used to satisfy course requirements for PhD IT students.

**Prerequisite(s):** Second Year standing in the MS, Applied IT Program; Permission of Instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Spring

### AIT 690 - Advanced Topics in Applied Information Technology

Credits: 3 (RT)  
Students participate actively through class dialogues and the crafting of IT solutions to specific problem areas. Course cannot be used to satisfy course requirements for PhD IT students.

**Prerequisite(s):** Graduate standing & permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall, Spring, Summer

### AIT 697 - Leading Organizations Through Change

Credits: 3 (NR)  
Introduces students to the critical tools for leading organizations through sustainable change. Through selected readings, discussions, team projects, in-class activities and guest appearances, students learn how to prepare the organization, plan the details, execute a change process across an organization and measure the plan’s effectiveness and the change it brings to achieve continuous improvement. Students practice and receive in-class coaching to hone their leadership skills.

**Prerequisite(s):** Graduate Standing in MS, AIT program or permission of instructor.

**Hours of Lecture or Seminar per week:** 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

**AIT 701 - Cyber Security: Emerging Threats and Countermeasures**

Credits: 3 (NR)
Covers security issues and current best practices in several applicative domains, ranging from the enterprise to the military. Discusses emerging security threats and available countermeasures with respect to the most recent network and computing technologies, including wireless networks, computer-controlled physical systems, and social networks. Concludes by presenting current trends and open problems.

**Prerequisite(s):** Registration in MS, Applied IT program or permission of instructor.

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0
**When Offered:** Fall, Spring.

**Arabic (ARAB)**

Offered by the College of Humanities and Social Sciences

**ARAB 101 - Introduction to the Arabic Language**

Credits: 3 (NR)
Introduction to Arabic language, dialects, countries, and culture. Beginning modern standard and classical Arabic, with emphasis on the written language, script and phonology. Basic grammar covering gender, numbers, cases, prepositions, nominal sentences, and basic conversation and greetings.

**Notes:** Students may not receive credit for ARAB 101 and ARAB 110.

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0

**ARAB 102 - Introduction to the Arabic Language**

Credits: 3 (NR)
Introduction to developing reading skills in formal settings. Emphasizes modern standard Arabic in oral communication. Beginning grammar level focuses on verbal sentences, present tenses, questions, and compound nouns.

**Prerequisite(s):** ARAB 101.

**Notes:** Students may not receive credit for ARAB 102 and ARAB 110.
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**ARAB 110 - Elementary Arabic**

Credits: 6 (NR)
Introduces elements of grammar, vocabulary, oral skills, listening comprehension, and reading.

Notes: Students may not receive credit for ARAB 110 and ARAB 101 or ARAB 102.

Hours of Lecture or Seminar per week: 6
Hours of Lab or Studio per week: 0

**ARAB 201 - Intermediate Arabic I**

Credits: 3 (NR)
Further development of listening, speaking, reading, and writing skills. Advanced level of vocabulary. Grammar covers past tenses, subordinated conjunctions, and introduction to passive voice.

Prerequisite(s): ARAB 101, 102.

Notes: Also introduces Arabic dictionary. Students may not receive credit for ARAB 201 and ARAB 210.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**ARAB 202 - Intermediate Arabic II**

Credits: 3 (NR)
Emphasis on application of language skills to reading, composition, and discussion. Focuses on language structure, format of developing vocabulary from verbs, covering different derivations, and language patterns. Leads to learning the use of Arabic dictionary in depth. Grammar covers passive voice and verbal nouns.

Prerequisite(s): ARAB 201

Notes: Students may not receive credit for ARAB 202 and ARAB 210.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**ARAB 210 - Intermediate Arabic**
Credits: 3 (NR)
Continuation of the development of basic components of the language, with focus on listening, speaking, reading, and writing skills. Introduces students to the cultures and histories of Arabic-speaking regions.

Prerequisite(s): ARAB 110 or appropriate placement score.

Notes: Students may not receive credit for ARAB 210 and ARAB 201 or ARAB 202.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ARAB 250 - Gateway to Advanced Arabic

Credits: 3 (NR)
Integration of advanced intermediate-level Arabic reading, writing, listening, and speaking skills and the development of critical thinking and understanding authentic texts from the Arabic world.

Prerequisite(s): ARAB 210, appropriate placement score, or permission of department.

Notes: Taught in Arabic.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ARAB 325 - Major Arab Writers/Stories

Credits: 3 (RD)
Studies works of major Arab writers or collections such as *The Arabian Nights.*

Fulfills general education requirement in literature.

Prerequisite(s): ENGL 101/ENGH 101 or permission of instructor

Notes: Taught in English. Knowledge of Arabic helpful but not required. May be repeated for a maximum of 6 credits when topic is different with permission of department.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ARAB 330 - Reading and Conversation I

Credits: 3 (NR)
Development of conversational fluency and reading skills in modern standard Arabic through class discussion, reports, and presentations. Includes readings from newspapers, journals, magazines, web sites, literary works, and other sources.

Prerequisite(s): ARAB 250, appropriate placement score, or permission of instructor.
Notes: Taught in Arabic. ARAB 330 and 331 must be taken in sequence.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ARAB 331 - Reading and Conversation II

Credits: 3 (NR)
Continuation of ARAB 330.

Prerequisite(s): ARAB 250 (or equivalent), appropriate placement score, or permission of instructor.

Notes: Taught in Arabic.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ARAB 350 - Media Arabic I (Written Media)

Credits: 3 (NR)
Develops advanced reading skills through work with current written media in Arabic.

Prerequisite(s): ARAB 330 and 331 or appropriate placement score or permission of instructor.

Notes: Taught in Arabic.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ARAB 351 - Media Arabic II (Spoken Media)

Credits: 3 (NR)
Develops advanced listening and speaking skills through work with current broadcasts in Arabic TV and Radio.

Prerequisite(s): ARAB 350 or permission of instructor.

Notes: Taught in Arabic.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ARAB 380 - Arabic Dialects
Credits: 3 (RT)
Study of the structure of one Arabic dialect with comparison to Modern Standard Arabic and the classical Fus-ha. Includes study of literature, proverbs, and culture associated with that dialect.

Prerequisite(s): ARAB 250 or appropriate placement score.

Notes: Taught in Arabic. May be repeated for a maximum of 6 credits when dialect covered is different.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ARAB 390 - Translation Methods: Arabic to English

Credits: 3 (NR)
Provides students with essential tools and techniques to translate Arabic texts to English. Includes practice applying these techniques to a variety of documents including literary, media, and legal texts.

Prerequisite(s): ARAB 330 and 331 or appropriate placement score or permission of instructor.

Notes: Taught in Arabic.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ARAB 420 - Survey of Arabic Literature

Credits: 3 (NR)
A survey of Arabic literature from its genesis to the present day.

Prerequisite(s): Six credits of 300 level courses taught in Arabic or permission of instructor.

Notes: Taught in Arabic. Fulfills the college requirement in non-Western culture.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ARAB 430 - Advanced Arabic Grammar

Credits: 3 (NR)
Introduction to traditional Arabic grammar. Covers parts of speech, sentence structure, case marking, and verb structure. Combines traditional with modern approaches to Arabic grammar and includes practical drills.

Prerequisite(s): Six credits of 300 level courses taught in Arabic or permission of instructor.

Notes: Taught in Arabic.
ARAB 440 - Topics in Arabic Religious Thought and Texts

Credits: 3 (RD)
Survey of the religious and intellectual heritage of the Arab world.

Prerequisite(s): Six credits of 300 level Arabic or permission of instructor.

Notes: Taught in Arabic. May be repeated for a maximum of 9 credits when topic and texts are different. Fulfills the college requirement in non-Western culture.

Art History (ARTH)

Offered by the College of Humanities and Social Sciences

Students taking ARTH courses should expect to participate in field trips or assignments outside the classroom at area museums.

At least one 400- or 500-level course is offered each semester; each topic area is generally offered every two years.

ARTH 101 - Introduction to the Visual Arts

Credits: 3 (NR)
Introduction to the content and principles of the visual arts. Approach varies with instructor.

Fulfills general education requirement in arts.

ARTH 102 - Symbols and Stories in Art

Credits: 3 (NR)
Themes and imagery in art from early Greece to the modern era.

Fulfills general education requirement in arts.
**ARTH 103 - Introduction to Architecture**

Credits: 3 (NR)
Introduces study, principle, and understanding of art of architecture. Approach varies with instructor; may be historical, geographical, technical, or thematic.

Fulfills general education requirement in arts.

Notes: Field trips required.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**ARTH 150 - Freshman Seminar**

Credits: 3 (NR)
Focuses on skills and methods of learning as well as subject matter as a way of introducing the discipline of art history.

Notes: Topics vary.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**ARTH 200 - Survey of Western Art**

Credits: 3 (NR)
Major periods, monuments, and themes of Western art and architecture. Introduces Washington, D.C., museum collections and a historical framework for further study in art history. Covers prehistory, the ancient world, and the Middle Ages.

Fulfills general education requirement in arts.

Notes: Designed as a two-course sequence, but each part may be taken independently without prerequisite.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**ARTH 201 - Survey of Western Art**

Credits: 3 (NR)
Major periods, monuments, and themes of Western art and architecture. Introduces Washington, D.C., museum collections and a historical framework for further study in art history. Covers the art of the Renaissance, the baroque period, and modern Europe and the Americas.

Fulfills general education requirement in arts.

Notes: Designed as a two-course sequence, but each part may be taken independently without prerequisite.
ARTH 203 - Survey of Asian Art

Credits: 3 (NR)
Introduces the arts of South, Southeast, and East Asia. Examines aspects of the culture and history of Asia. Discusses monuments and artifacts in a variety of media and their relation to social and historical contexts.

Fulfills general education requirement in arts.

Notes: Fulfills the college requirement in non-Western culture.

ARTH 204 - Survey of Latin American Art

Credits: 3 (NR)
Introduces arts of Latin America from pre-Columbian to modern era. Discusses important examples of painting, sculpture, and architecture in relation to culture and history of region.

Fulfills general education requirement in arts.

Notes: Fulfills the college requirement in non-Western culture.

ARTH 303 - National Traditions

Credits: 1-3 (RT)
Studies traditions of art and architecture within a single selected country or historical region.

Prerequisite(s): 24 credits or permission of instructor.

Notes: May be repeated for a maximum of 6 credits when topic is different.

ARTH 311 - Design of Cities
Credits: 3 (RD)
Explores problems in urban design in a particular geographical region or historical period. Approach varies with instructor and may involve archaeological or theoretical approaches appropriate to the specific context.

**Prerequisite(s):** 24 credits.

**Notes:** May be repeated for a maximum of 6 credits when topic if different.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**ARTH 315 - Modern Architecture**

Credits: 3 (NR)
Studies in modern architecture from the Beaux Arts movement to the present; an investigation of stylistic, structural, or theoretical innovations.

**Prerequisite(s):** 24 credits.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**ARTH 319 - Art and Archaeology of the Ancient Near East**

Credits: 3 (NR)
Aspects of the art, archaeology, and culture of ancient Near East and Bronze Age Mediterranean. Approach varies depending on instructor; emphasis may be on Mesopotamia, Iran, Egypt, Anatolia, the Levant, or the Aegean.

Fulfills general education requirement in global understanding.

**Prerequisite(s):** 24 credits.

**Notes:** Fulfills the college requirement in non-Western culture.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**ARTH 320 - Art of the Islamic World**

Credits: 3 (NR)
Introduction to Islamic art, from the time of Muhammad to present. Cultural and regional approach, utilizing local museum collections.

Fulfills general education requirement in global understanding.

**Prerequisite(s):** 24 credits.
Notes: Fulfills the college requirement in non-Western culture.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**ARTH 321 - Greek Art and Archaeology**

Credits: 3 (NR)
History of ancient Greek architecture, sculpture, and painting.

Fulfills general education requirement in arts.

Prerequisite(s): Completion of 24 credits.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**ARTH 322 - Roman Art and Archaeology**

Credits: 3 (NR)
History of Roman architecture, sculpture, and painting.

Fulfills general education requirement in arts.

Prerequisite(s): 24 credits.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**ARTH 324 - From Alexander the Great to Cleopatra: The Hellenistic World**

Credits: 3 (NR)
Arts of the Hellenistic age within the context of history and culture of the period. Explores the powerful dynasties ruling wealthy empires; achievements in learning and literature housed in the Great Library at Alexandria; baroque sculpture adorning the Altar of Zeus at Pergamon; and Roman collectors of Greek art and antiques.

Fulfills general education requirement in arts.

Prerequisite(s): 24 credits.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**ARTH 333 - Early Christian and Byzantine Art**
Aspects of medieval art and culture in eastern Mediterranean world. Topics may include late antiquity, early Christianity, and the Byzantine empire and its neighbors. Designed to take advantage of unique local museum resources.

Fulfills general education requirement in arts.

**Prerequisite(s):** 24 credits.

**Notes:** Specific focus varies with instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**ARTH 334 - Western Medieval Art**

Credits: 3 (NR)  
Aspects of art and architecture in medieval Europe, from the fall of the Roman Empire through the Gothic period.

Fulfills general education requirement in arts.

**Prerequisite(s):** 24 credits.

**Notes:** May be repeated for a maximum of 6 credits when topic is different.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**ARTH 335 - Arts of Medieval England**

Credits: 3 (NR)  
Explores aspects of the art, architecture, and archeology of medieval England. Special emphasis may be placed on Cultural contexts and literary sources.

Fulfills general education requirement in arts.

**Prerequisite(s):** 24 credits.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**ARTH 340 - Early Renaissance Art in Italy, 1300-1500**

Credits: 3 (NR)  
Studies in architecture, sculpture, and painting in the age of Giotto, Ghiberti, Masaccio, and Botticelli.

Fulfills general education requirement in arts.
Prerequisite(s): 24 credits.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ARTH 341 - Northern Renaissance Art

Credits: 3 (NR)
Studies in the art of France, Germany, and the Netherlands in the age of Van Eyck and Dürer.

Fulfills general education requirement in arts.

Prerequisite(s): 24 credits

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ARTH 342 - High Renaissance Art in Italy, 1480–1570

Credits: 3 (NR)
Studies in architecture, sculpture, and painting in the age of Leonardo, Michelangelo, Raphael, and Titian.

Fulfills general education requirement in arts.

Prerequisite(s): 24 credits

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ARTH 344 - Baroque Art in Italy, France, and Spain, 1600–1750

Credits: 3 (NR)
Studies in architecture, sculpture, and painting in the age of Caravaggio, Bernini, Velazquez, and Poussin.

Fulfills general education requirement in arts.

Prerequisite(s): 24 credits

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ARTH 345 - Northern Baroque Art, 1600-1750
Credits: 3 (NR)
Studies in architecture, sculpture, and painting in the age of Rubens, Van Dyck, Rembrandt, and Vermeer.

Fulfills general education requirement in arts.

Prerequisite(s): 24 credits.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ARTH 350 - History of Photography

Credits: 3 (NR)
Development of photography from origins in France in the 19th century to the present.

Prerequisite(s): 24 credits.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ARTH 359 - Art of the 18th and 19th Centuries

Credits: 3 (RD)
Introduction to the art and architecture of the 18th and 19th centuries. Topics focus on specific art forms, media, geographic regions, or the thematic categories.

Prerequisite(s): 24 credits.

Notes: May be repeated for a maximum of 6 credits when topic is different.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ARTH 360 - Nineteenth-Century European Art

Credits: 3 (NR)
Movements from neoclassicism to symbolism discussed in relation to social, cultural, political, and technological changes in Europe.

Fulfills general education requirement in arts.

Prerequisite(s): 24 credits.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
ARTH 362 - Twentieth-Century European Art

Credits: 3 (NR)
Study of major movements (fauvism, cubism, futurism, constructivism, surrealism, and expressionism) and important artists in 20th-century painting and sculpture.

Fulfills general education requirement in arts.

Notes: Focus may vary.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ARTH 371 - American Architecture and Material Culture

Credits: 3 (NR)
Studies in the history of American architecture or decorative arts in cultural context. Topics range from 17th century to 20th century, depending on instructor.

Prerequisite(s): 24 credits.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ARTH 372 - Studies in 18th- and 19th-Century Art of the United States

Credits: 3 (RD)
Developments in visual culture and the changing status of art practitioners throughout these periods. Focus is either chronological (Colonial Period, Gilded Age) or thematic (19th-century genre scenes, the American landscape and national identity).

Fulfills general education requirement in arts.

Prerequisite(s): 24 credits.

Notes: May be repeated for a maximum of 6 credits when topic is different.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ARTH 373 - Studies in 20th-Century Art of the United States

Credits: 3 (RD)
Developments in 20th-century American visual culture across all media.

Fulfills general education requirement in arts.
Prerequisite(s): 24 credits

Notes: May be repeated for a maximum of 6 credits when topic is different.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ARTH 374 - Art Now

Credits: 3 (NR)
Explores visual art production since 1980, drawing on regional resources. Examines social, institutional, and political issues in recent art and its markets.

Prerequisite(s): Any course in art history or art studio, or permission of instructor.

Notes: Requires students to work collaboratively and make several field trips, including one Saturday bus trip to New York. Specific topics and assignments vary with the changing art season and instructor. Lecture, discussion.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ARTH 376 - Twentieth-Century Latin American Art

Credits: 3 (NR)
Major movements and important artists in 20th-century Latin American art discussed in relation to social, cultural, and political conditions in the region.

Fulfills general education requirement in arts.

Prerequisite(s): 24 credits.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ARTH 380 - African Art

Credits: 3 (NR)
Focuses on sub-Saharan African art in terms of styles and aesthetics; materials and techniques; and geographical, social, cultural, and religious contexts. Specific focus of course may vary with instructor.

Fulfills general education requirement in global understanding.

Prerequisite(s): 24 credits.

Notes: Fulfills the college requirement in non-Western culture.
**ARTH 382 - Arts of India**

Credits: 3 (NR)
History, culture, and arts of south Asia from earliest civilizations along the Indus River to onset of Western colonialism. Emphasizes role of material evidence in the creation of the South Asian history and how political, social, and religious developments affected the arts. Discusses monuments and artifacts in a variety of media in relation to historical contexts.

Fulfills general education requirement in global understanding.

**Prerequisite(s):** 24 credits.

**Notes:** Fulfills the college requirement in non-Western culture.

**ARTH 383 - Arts of Southeast Asia**

Credits: 3 (NR)
Examines various cultural and artistic traditions of ancient Southeast Asia, from the earliest archaeological evidence to onset of colonialism. Lectures and discussions focus on material culture of the great civilizations that arose within borders of modern Thailand, Cambodia, Indonesia, Burma (Myanmar), Vietnam, Laos, and Malaysia.

Fulfills general education requirement in global understanding.

**Prerequisite(s):** 24 credits.

**Notes:** Fulfills the college requirement in non-Western culture.

**ARTH 384 - Arts of China**

Credits: 3 (NR)
Explores the complex and dynamic history of China by examining ways in which social, religious, and political shifts have given rise to new and variant forms of material culture.

Fulfills general education requirement in global understanding.

**Notes:** Fulfills the college requirement in non-Western culture.
ARTH 385 - Arts of Japan

Credits: 3 (NR)
Art and architecture of Japan, with particular attention to the ways political changes, religious movements, and social developments influenced and shaped those creations. Discusses monuments and artifacts in a variety of media in relation to social and historical contexts.

Fulfills general education requirement in global understanding.

Prerequisite(s): 24 credits.

Notes: Fulfills the college requirement in non-Western culture.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ARTH 386 - The Silk Road

Credits: 3 (NR)
Explores luxury arts and material culture of Eurasian trade routes between Mediterranean and China in historical, religious, and social contexts. Emphasizes cultural interactions in medieval Central Asia.

Fulfills general education requirement in global understanding.

Prerequisite(s): 24 credits.

Notes: Fulfills the college requirement in non-Western culture.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ARTH 393 - Art History Internships

Credits: 3-6 (RD)
Internship with a professional arts institution, organization, or individual in the Washington, D.C., area. Project to be arranged by student in consultation with faculty instructor and field supervisor.

Prerequisite(s): Art history major or minor, and permission of instructor.

Notes: Strongly recommended for advanced art history students seeking exposure to professional work in visual arts. May be taken for 3 to 6 credits, or repeated for up to 6 credits.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0
**ARTH 394 - The Museum**

Credits: 3 (NR)
Examines history, theory, practice, ethics, and current problems of collecting and displaying art and artifacts to the public. Emphasizes issues central to museums in Washington, D.C., or museums in other locations; focus varies with instructor.

Fulfills general education requirement in synthesis.

**Prerequisite(s):** 6 credits in art history at the 300-level, and completion or concurrent enrollment in all other required general education courses.

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0

**ARTH 398 - Study Abroad in the History of Art**

Credits: 1-6 (RT)
Study abroad. Course topics, content, and locations vary.

**Notes:** A maximum of 6 credits may be applied to the major or minor with permission of the program.

**Hours of Lecture or Seminar per week:** 1-6
**Hours of Lab or Studio per week:** 1-12

**ARTH 399 - Special Topics in the History of Art**

Credits: 3 (RT)
Topics vary.

**Notes:** May be repeated when topic is different.

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0

**ARTH 400 - Historiography and Methods of Research in Art History**

Credits: 3 (NR)
Historical investigation of theories, methods, and critiques involved in the discipline of art history. Approach or focus may vary with instructor.

Fulfills writing intensive requirement in the major.

**Prerequisite(s):** ENGL 302/ENGH 302, and 6 credits in art history at the 300 level; or permission of instructor.

**Notes:** May be repeated for credit.
**ARTH 420 - Advanced Studies in Ancient Art**

Credits: 3 (RT)
Studies a particular area of ancient art of the Mediterranean, Near East, or Middle East. Topics may be art form or medium, geographical area, theme, function, or context.

Fulfills writing intensive requirement in the major.

**Prerequisite(s):** ENGL 302/ENGH 302 and 6 credits in Art History at the 300 level, or permission of instructor.

**Notes:** May be repeated for credit when topic is different.

**ARTH 430 - Advanced Studies in Medieval or Islamic Art**

Credits: 3 (RT)
Studies a single topic in medieval or Islamic art. May focus on a particular period, region, or medium, or may explore cultural interconnections within medieval Eurasian world.

Fulfills writing intensive requirement in the major.

**Prerequisite(s):** ENGL 302/ENGH 302, and a 300-level course in medieval or Islamic art; or permission of instructor.

**Notes:** May be repeated for a maximum of 12 credits when topic is different.

**ARTH 440 - Advanced Studies in Renaissance and Baroque Art**

Credits: 3 (RT)
Studies a particular aspect of Renaissance or baroque art. Topics may be monographic, thematic, or concentrated on the art of a smaller time period or a particular area.

Fulfills writing intensive requirement in the major.

**Prerequisite(s):** ENGL 302/ENGH 302 and 6 credits in Art History at the 300 level, or permission of instructor.

**Notes:** May be repeated for credit when topic is different.
ARTH 460 - Advanced Studies in 20th-Century European Art

Credits: 3 (RT)
Study of a particular topic in 20th century European art. Course may focus on a specific period, region, movement, medium, or theoretical issue, or explore cultural connections and transfer between regions.

Fulfills writing intensive requirement in the major.

Prerequisite(s): ENGL 302/ENGH 302 and 300-level course in the art of 19th- or 20th-century Europe or the Americas; or permission of instructor.

Notes: May be repeated for a maximum of 9 credits when topic is different.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ARTH 471 - Advanced Studies in Art of the United States

Credits: 3 (NR)
Studies a particular area of American art, focusing on a form, such as landscape or genre painting; theme, such as nationalism, regionalism, or iconography of the family; or movement, such as American modernism.

Fulfills writing intensive requirement in the major.

Prerequisite(s): ENGL 302/ENGH 302 and 300-level course in American art

Notes: May be repeated for credit.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ARTH 472 - Advanced Studies in 20th-Century Latin American Art

Credits: 3 (RD)
Study of a particular topic in 20th-century Latin American art. Course may focus on a specific period, region, movement, medium, or theoretical issue, or explore cultural connections and transfer between regions.

Fulfills writing intensive requirement in the major.

Designated as a research and scholarship intensive course.

Prerequisite(s): ENGL 302/ENGH 302 and 300 level course in 19th- or 20th-century art of Europe or the Americas, or permission of the instructor.

Notes: May be repeated for a maximum of 6 credits when topic is different.
**ARTH 474 - Advanced Studies in Contemporary Art**

Credits: 3 (RD)
Study of a topic in contemporary art in a research seminar setting. Focus on particular theme, region, artist, or medium, or take a comparative approach.

Fulfills writing intensive requirement in the major.

**Prerequisite(s):** ENGL 302/ENGH 302 and 300-level course work in modern or contemporary art, or permission of the instructor

**Notes:** May be repeated for a maximum of 6 credits when topic is different.

**ARTH 482 - Advanced Studies in Asian Art**

Credits: 3 (RT)
Seminar-style discussions on a specific topic in Asian art. May focus on the art of a particular period, movement, reign, or region, as well as theoretical issues or works in a particular medium.

Fulfills writing intensive requirement in the major.

**Prerequisite(s):** ENGL 302/ENGH 302, and 300-level course in any area of Asian art; or permission of instructor.

**Notes:** May be repeated for a maximum of 6 credits when topic is different. Fulfills the college requirement in non-Western culture.

**ARTH 490 - Independent Study in Art History**

Credits: 3 (NR)
Intensive study of a particular artist, period, or theoretical problem to be conducted by an individual student in consultation with instructor.

Fulfills writing intensive requirement in the major.

**Prerequisite(s):** 60 credits, ENGH 302, permission of instructor and chair, plus 9 credits in art history beyond ARTH 200, 201. Study proposal submitted prior to registration.
ARTH 491 - Independent Study in Art History

Credits: 3 (NR)
Intensive study of a particular artist, period, or theoretical problem to be conducted by an individual student in consultation with instructor.

Fulfills writing intensive requirement in the major.

Prerequisite(s): 60 credits, ENGH 302, permission of instructor and chair, plus 9 credits in art history beyond ARTH 200, 201. Study proposal submitted prior to registration.

ARTH 492 - Honors Directed Readings, Honors Directed Research

Credits: 3 (NR)
Linked individualized courses, usually given by same instructor. Involves directed readings.

Fulfills writing intensive requirement in the major.

Prerequisite(s): Admission to Art History Honors Program, ENGH 302, permission of instructor and chair, departmental approval of Honors Proposal submitted term prior to registration.

Notes: Students must have completed at least one course in the field, or with the professor, chosen for these honors courses. The 3 credits of readings should be taken before the 3 research credits, or they may be taken concurrently.

ARTH 493 - Honors Directed Readings, Honors Directed Research

Credits: 3 (NR)
Linked individualized courses, usually given by same instructor. Culminates in research paper related to subject of readings.

Fulfills writing intensive requirement in the major.

Prerequisite(s): Admission to Art History Honors Program, ENGH 302, permission of instructor and chair.

Notes: Students must have completed at least one course in the field, or with the professor, chosen for these honors courses. The 3 credits of readings should be taken before the 3 research credits, or they may be taken concurrently.
ARTH 495 - Objects and Archives in Art History

Credits: 3 (NR)
Conduct hands-on research with objects and primary and secondary sources. Select particular artifacts, works of art, or group of objects and undertake original research, and bring objects from storage to publication to exhibition. Develops skills in material analysis, critical reading, and academic writing. Focuses on VA/DC/MD libraries, archives, and storerooms.

Designated as a research and scholarship intensive course.

Prerequisite(s): 6 credits of 300-level courses in the College of Humanities and Social Sciences and ENGH 302.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ARTH 499 - Advanced Studies in Art History

Credits: 3 (RD)
Seminar-style discussion on specific subjects in art history.

Fulfills writing intensive requirement in the major.

Prerequisite(s): ENGL 302/ENGH 302 and 300-level course, or permission of instructor.

Notes: May be repeated for a maximum of 6 credits when topic is different.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ARTH 570 - Proseminar in History of Decorative Arts

Credits: 3 (NR)
A writing-intensive course designed to equip students with the skills required for professional scholarship in the history of decorative arts. Examines a variety of theories and methods for analyzing objects. Teaches visual and contextual analysis skills as well as critical thinking about and documentation of primary and secondary sources.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ARTH 571 - Survey of Decorative Arts I

Credits: 3 (NR)
Overview of European decorative arts from fifteenth to eighteenth centuries, with focus on objects from Italy, France, and England. Examines the role of decorative arts in the formation of identity of the elite in Renaissance Italy as well as Renaissance France and England. Also concentrates on European decorative arts from seventeenth and eighteenth centuries, with emphasis on
Paris and London.

**ARTH 572 - Survey of Decorative Arts II**

Credits: 3 (NR)
This writing-intensive course is designed to equip students with the skills required for professional scholarship in the history of decorative arts. Students will examine a variety of theories and methods for analyzing objects through assigned readings, class discussions, and short writing assignments.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**ARTH 593 - Internship in Art History and the Decorative Arts**

Credits: 3-6 (NR)
Internship with a professional arts institution, organization, or individual in the Washington, D.C., area. Project to be arranged by student in consultation with faculty instructor and field supervisor.

**Prerequisite(s):** BA or equivalent or permission of instructor.

**Notes:** Recommended for advanced art history students seeking exposure to professional work in visual arts. May be taken for 3 to 6 credits, or repeated for up to 6 credits.

**Hours of Lecture or Seminar per week:** 1-6  
**Hours of Lab or Studio per week:** 0

**ARTH 594 - The Museum**

Credits: 3 (NR)
Examines history, theory, practice, ethics, and current problems of collecting and displaying art and artifacts to the public. Emphasizes issues central to museums in Washington, D.C., or museums in other locations.

**Prerequisite(s):** Baccalaureate degree or permission of instructor.

**Notes:** Specific focus may vary with instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**ARTH 596 - Independent Study**
Credits: 1-3 (RT)
Independent reading and research on specific project under direction of department member.

Prerequisite(s): Baccalaureate degree or permission of instructor.

Notes: Written report is required. May be repeated for credit.

Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 0

ARTH 599 - Special Topics in Art History and the Decorative Arts

Credits: 1-6 (RT)
Topics vary.

Prerequisite(s): Baccalaureate degree or permission of instructor.

Notes: May be repeated for credit when topic is different.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ARTH 600 - Methods and Research in Art History

Credits: 3 (NR)
Investigates theories, methods, and research strategies in discipline of art history. Designed for first-semester students in art history MA program; foundation for further graduate-level work in the program.

Prerequisite(s): Admission to the art history MA program.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ARTH 601 - Colloquium in Art History

Credits: 3 (NR)
Offers graduate-level survey in academic art history led by an instructor of record, with input from full Art History faculty. Participants review the current field through lectures, focused readings and group discussions with relevant faculty member. Participants may read in more depth in areas of special interest. Provides preparation for MA exams and professional preparation for teaching.

Prerequisite(s): Admission to the MA Program in Art History.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
**ARTH 610 - Theory of Decorative Arts**

Credits: 3 (NR)
Covers the analysis of objects and design from a number of different perspectives: cultural studies, art history, Marxism, the Frankfurt School, and feminism among others. Offers different tools and viewpoints for each approach to analyze and understand decorative arts.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**ARTH 620 - Topics in Individual Decorative Arts**

Credits: 3 (RT)
Survey of a single decorative art including media and methods of production. Covers connoisseurship issues such as identifying materials and techniques, fakes, forgeries, repairs, reproductions.

Notes: May be repeated for credit when topic is different.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**ARTH 630 - Material Culture Studies**

Credits: 3 (RT)
Introduction to traditions that have contributed to the field of material culture study. Examines a broad range of the material world from the past to the present. Surveys the field’s historical roots and examines approaches to material culture scholarship.

Notes: May be repeated for credit when topic is different.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**ARTH 640 - European Decorative Arts**

Credits: 3 (RT)
Examines one or more European decorative arts from periods from the Renaissance to the early 20th century. Arts may include tapestries, pottery and ceramics, silver, furnishing, jewelry and metalwork, glass as well as distinctive stylistic periods.

Notes: May be repeated for credit when topic is different.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**ARTH 650 - Global Decorative Arts**
Credits: 3 (RT)
Examines specific key media, moments, or locations in the global decorative arts beyond the Western tradition.

Notes: May be repeated for credit with topic is different.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**ARTH 660 - Museum Studies**

Credits: 3 (RT)
Explores the role of museums, through presentations by key museum personnel and discussion of required readings. Administrators, curators, conservators, educators, editors, among others, work with students to expand their knowledge of how museums function.

Notes: May be repeated for credit when topic is different.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**ARTH 670 - Design and Design History**

Credits: 3 (RT)
Examination of key moments in design history. Through focus on the chosen topic, discusses the nature of design. Covers history of interiors, furniture and architecture, and theories of design and design composition.

Notes: May be repeated for credit with topic is different.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**ARTH 696 - Independent Directed Readings**

Credits: 3 (NR)
Designed to prepare students for comprehensive exams by integrating past work and filling gaps in expected knowledge before the exam.

Prerequisite(s): Admission to art history MA program, and permission of instructor.

Notes: Taken in final semester of art history MA.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0

**ARTH 699 - Topics in Art History**
Credits: 3 (RT)
Research seminar on aspects of art history. Topics vary, but course entails extensive critical readings and discussion, development of bibliographies, and advanced-level research papers.

Prerequisite(s): Graduate standing.

Notes: May be repeated for a maximum of 15 credits when topic is different.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**ARTH 797 - Thesis Writing Workshop**

Credits: 0 (NR)
**Grading:** Satisfactory/No Credit

**ARTH 799 - Master's Thesis**

Credits: 1-3 (RD)
Research and writing on approved thesis topic under direction of thesis committee.

Prerequisite(s): Completion of 24 credits (for art history) or 45 credits (for history of decorative arts) and approval of thesis proposal by the faculty and program director.

Notes: Students must register for a minimum of three credits in their first semester of 799 and maintain continuous enrollment in 799 while writing and submitting a thesis. A maximum of 3 credits of 799 may be applied to the MA in art history and a maximum of 6 credits to the MA in the history of decorative arts.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 1-6
**Grading:** Satisfactory/No Credit only

**Art and Visual Technology (AVT)**

Offered by the College of Visual and Performing Arts

**AVT 101 - New Majors Colloquium**

Credits: 1 (NR)
Provides a common core experience of contemporary perspectives on the broad range of professional career options open to studio art majors. Lectures address practical concerns but emphasize social, ethical, and philosophical aspects of visual arts professions.

Notes: Required of all AVT majors. May be taken prior to declaring the major or during the first semester as a declared AVT major.
Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0

AVT 103 - Introduction to the Artist's Studio

Credits: 3 (NR)
Through projects, readings, class critiques, visuals, and field trips, students explore materials, techniques, concepts, and processes essential to understanding the language of visual arts and the artist's role. Develops imaginative thinking and sensitivity to visual environment.

Fulfills general education requirement in arts.

Notes: For non-majors only.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 2

AVT 104 - Studio Fundamentals I

Credits: 4 (NR)
Explores elements and principles of two-dimensional design, establishment of visual vocabulary, and critical analysis that supports conceptual development. Studio projects build fundamental knowledge, skills, understanding of precedents, and contemporary practices in visual arts.

Fulfills general education requirement in arts.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 4

AVT 105 - Studio Fundamentals II

Credits: 4 (NR)
Explores elements and principles of three-dimensional design, establishment of visual vocabulary, and critical analysis that supports conceptual development. Studio projects explore form and composition, time-based media, materials, precedents, and contemporary practices in visual arts.

Prerequisite(s): AVT 104 or permission of instructor.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 4

AVT 180 - New Media in the Creative Arts
Credits: 3 (NR)
Introduces computing from artist’s perspective. Emphasizes computer use for artistic creation and research. Overview of image making and time-based media within the broad context of contemporary art, new media art, and mediated culture.

Fulfills general education requirement in information technology (all except ethics).

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 2
When Offered: Fall, Spring, Summer

AVT 204 - Visual Thinking

Credits: 3 (NR)
Explores the ways contemporary artists use principles of design and perception to challenge how we see our world physiologically, psychologically, or socially. Examples drawn from film, photography, new media art, and other contemporary artistic media.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

AVT 206 - Color

Credits: 4 (NR)
Color theory and principles of color interaction, including additive, subtractive, and partitive color experience; study of harmony, contrast, focus, space, opacity, transparency, temperature and value in both wet and dry media; and related applications of color technology.

Prerequisite(s): AVT 104 or permission of instructor.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 4

AVT 215 - Typography

Credits: 4 (NR)
Introduction to history and use of type. Reading and projects develop awareness of type as a linguistic and visual communication tool. Introduces typographic design elements, including color, hierarchy, integration with imagery, structure, and content.

Fulfills general education requirement in arts.

Prerequisite(s): AVT 104 and 180, or permission of instructor. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 4
AVT 217 - Introduction to Web Design

Credits: 4 (NR)
An introduction to contemporary web design, in particular to standards, as a successful tool in design communication. Students gain hands-on experience on design issues specific to Web-based presentations, learn web page layout, effective navigation and delve into the design process.

Prerequisite(s): AVT 180. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 4
Hours of Lab or Studio per week: 1-12

AVT 222 - Drawing I

Credits: 4 (NR)
Introduction and exploration of the fundamentals of drawing methods and materials, with emphasis on observational study and critical analysis of the effective and expressive use of line, mass, value, perspective, and formal composition. Emphasis on problems involved in representational and abstract visual interpretations of forms.

Fulfills general education requirement in arts.

Notes: AVT majors encouraged to take AVT 222 with AVT 104.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 4

AVT 232 - Painting I

Credits: 4 (NR)
Introduction to the basic methods and principles of painting with a focus on observation, paint application, formal composition, color mixing, and the articulation of form. Students develop a visual awareness as they become familiar with the language of image making, construction, analysis, and awareness. Students prepare portfolios for collaborative and reflective critique.

Fulfills general education requirement in arts.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 4

AVT 243 - Printmaking I

Credits: 4 (NR)
Introduction to basics of hand printing. Emphasis on translation and transferral of images, tools, equipment, and technical skills for making a well-defined print. Students explore drawing, synthesis, and multiplicity in this interactive and collaborative course. Presentations and field trips focus on aesthetic and cultural concerns of making multiple images.

Fulfills general education requirement in arts.
AVT 252 - Fundamentals of Photography

Credits: 4 (NR)
Introduces basic principles and aesthetics of photography, 35-mm camera operation, and darkroom practices, including film processing and print development.

Fulfills general education requirement in arts.

AVT 253 - Introduction to Digital Photography

Credits: 4 (NR)
Introduction to the digital camera as a tool for electronic photographic image making. Students will be introduced to principles and exploration of the aesthetics of digital photography and also learn basic image-editing skills in a computer environment.

Fulfills general education requirement in arts.

AVT 254 - Photography

Credits: 4 (NR)
Introduces photographic study and investigation of the fundamental practices and techniques of both film and digital forms with attention to its history and contemporary practices. Class discussions, field trips and critiques enhance visual and verbal vocabularies.

Prerequisite(s): Restricted to AVT majors and AVT minors.

AVT 262 - Sculpture I

Credits: 4 (NR)
Projects in sculpture that emphasizes contemporary theory and issues, the development of individual concepts, and creative solutions. Explores the application of materials, tools, and imaginative processes. Faculty demonstrations, lectures, gallery and museum visits, and regular student work critiques.
Fulfills general education requirement in arts.

**Hours of Lecture or Seminar per week:** 2  
**Hours of Lab or Studio per week:** 4

**AVT 272 - Interdisciplinary Arts**

Credits: 4 (NR)
Introduces contemporary interdisciplinary art practice through readings and studio projects in performance and installation. Provides students with opportunities to deepen understanding of conceptual art, nontraditional media practices, and collaborative practice in visual arts.

Fulfills general education requirement in arts.

**Hours of Lecture or Seminar per week:** 4  
**Hours of Lab or Studio per week:** 2

**AVT 280 - Introduction to New Media Arts**

Credits: 4 (NR)
Investigates ways in which contemporary artists employ tools in response to social, political and cultural conditions. Students create meaningful works of art that demonstrate conceptual and contextual awareness plus technical ability.

**Prerequisite(s):** AVT 104, or permission of instructor.

**Hours of Lecture or Seminar per week:** 2  
**Hours of Lab or Studio per week:** 4  
**When Offered:** Fall, Spring, Summer

**AVT 300 - Artsbus Attendance**

Credits: 0 (RT)
Students travel to New York or other destinations aboard the AVT Artsbus to attend faculty-selected exhibitions.

**Notes:** AVT majors must satisfactorily complete course once for each semester they are enrolled as majors, up to five times. Repeatable up to three times per semester.

**Hours of Lecture or Seminar per week:** 1  
**Hours of Lab or Studio per week:** 0  
**Grading:** S/NC

**AVT 301 - Visual Voices Colloquium**
Credits: 1 (RD)
Students attend AVT Visual Voices lecture series during the semester and complete assignments related to the topics covered.

Notes: AVT majors must accumulate at least 3 credits in this colloquium to graduate. May be repeated each semester up to a total of 8 credits.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0

AVT 305 - Creative Processes

Credits: 3 (NR)
Study of the creative process in general, with emphasis on the inspiration, working methods, and final creations of various artists. Students explore their own creative processes through journal keeping, collaborative exercises, and projects.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

AVT 307 - Aesthetics

Credits: 3 (NR)
Interdisciplinary course examines broad range of contemporary art and culture to engage an expansive conception of aesthetic experience. Students engage with historical and contemporary aesthetic theories, build heightened aesthetic sensibility, and explore their personal aesthetic.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

AVT 309 - Art as Social Action

Credits: 3 (NR)
Interdisciplinary exploration of work by citizen-artists whose art-making engages the social world. Students learn about the history of socially engaged art-making and experiment with individual and collaborative projects addressing social issues.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

AVT 311 - Graphic Design Methods and Principles

Credits: 4 (NR)
Emphasis on developing design solutions requiring demographic, historical, and/or cultural research. Course strengthens design and typography skills, introduces conceptual problem solving, audience considerations, and broad-based tools designers use to develop effective visual communication solutions.
Prerequisite(s): AVT 215 or permission of instructor. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 4

AVT 313 - Editorial Design

Credits: 4 (NR)
Development and production of long-form design projects (magazines, newspapers, catalogs, and other serial and/or multipage publications). Emphasis on narrative, consistency, structure, clarity. Addresses information design issues and reinforces conceptual skills and integration of imagery and text.

Prerequisite(s): AVT 311 or permission of instructor. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 4

AVT 323 - Drawing II

Credits: 4 (NR)
Students develop observational, sketching, and rendering skills. Introduction to a range of materials, methods, formal concepts, drawing in series, and critique vocabulary.

Prerequisite(s): AVT 222 or permission of instructor.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 4

AVT 324 - Figure Drawing

Credits: 4 (NR)
Drawing with an emphasis on the observational study of the human body. Human anatomy and proportion are examined through a series of methodological approaches, including gesture, contour, mass, and modeling.

Prerequisite(s): AVT 222 or permission of the instructor.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 4

AVT 326 - Nontraditional Approaches to Drawing

Credits: 4 (NR)
Encourages students to challenge some traditional approaches to drawing by creating innovative works that combine familiar drawing techniques with a variety of materials, approaches, and unusual formats.
**Prerequisite(s):** AVT 222 or permission of instructor.

**Hours of Lecture or Seminar per week:** 2  
**Hours of Lab or Studio per week:** 4

**AVT 328 - Mixed Media**

Credits: 4 (NR)  
Students investigate the contemporary innovations and disciplinary cross-pollination which have revolutionized and expanded the boundaries of traditional fine arts. Projects incorporate text, sound, computer generated imagery, collaboration and installation.

**Prerequisite(s):** AVT 104.

**Hours of Lecture or Seminar per week:** 2  
**Hours of Lab or Studio per week:** 4  
**When Offered:** Fall, Spring

**AVT 333 - Painting II**

Credits: 4 (NR)  
Focuses on the development of formal and technical skills, with an emphasis on paint application, color interaction, and support building and preparation. Introduces concepts, methodologies, and approaches relevant to contemporary painting.

**Prerequisite(s):** AVT 232 or permission of instructor.

**Hours of Lecture or Seminar per week:** 2  
**Hours of Lab or Studio per week:** 4

**AVT 336 - Experimental Painting**

Credits: 4 (NR)  
Using contemporary painting practices as starting place, students explore a variety of experimental and conceptual approaches to painting.

**Prerequisite(s):** AVT 232 or permission of instructor.

**Hours of Lecture or Seminar per week:** 2  
**Hours of Lab or Studio per week:** 4

**AVT 337 - Figurative Painting**

Credits: 4 (NR)  
Working primarily with live models, students explore the human form as the main subject for a variety of visual and expressive
inquiries.

Prerequisite(s): AVT 232 or permission of instructor.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 4

AVT 343 - Printmaking II

Credits: 4 (NR)
An introduction to relief, screenprint, and intaglio printing; including the study of historical antecedents and their relevancy to contemporary printmaking. Students learn reductive and additive techniques in preparing printing surfaces.

Prerequisite(s): AVT 243 or permission of instructor.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 4

AVT 345 - Paper/Print/Book as Language

Credits: 4 (NR)
Introduces the artist's book as both physical structure and creative association of words and images. Students learn techniques of bookmaking, binding, and traditional and digital printmaking to produce an artist-made book with narrative and sequential elements.

Prerequisite(s): AVT 180 or permission of instructor.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 4

AVT 346 - Digital Printmaking

Credits: 4 (NR)
A beginning course in hand printing digitally processed images. Projects focus on electronic means of creating and manipulating imagery. Students achieve skills in multiple steps and incremental development required in making prints.

Prerequisite(s): AVT 180 or permission of the instructor.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 4

AVT 353 - Traditional Photo Methods
Credits: 4 (NR)
Continuation of Fundamentals of Photography with further investigation into the aesthetics of photography through experimentation with new camera formats, films, papers, developers and development of a photographic portfolio.

Prerequisite(s): AVT 252 or AVT 254, or permission of instructor.

Notes: Continuation of Photography I.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 4

AVT 354 - Digital Photo Techniques

Credits: 4 (NR)
A computer-intensive class in which students create digital images from the viewpoint of a photographic artist. Emphasis on digital photo techniques, including making digital negatives, concept development, and visual aesthetics.

Prerequisite(s): AVT 253 and 180, or permission of the instructor.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 4

AVT 355 - Color Photo Methods

Credits: 4 (NR)
Introduces basic concepts, theories, histories, contemporary materials, and processes of color photography with focus on creative photographic expression and technique. Combines lecture, studio, and darkroom time to expand students' photographic repertoire through work with both film and digital materials.

Prerequisite(s): AVT 353 or 356 or permission of the instructor.

Hours of Lecture or Seminar per week: 4
Hours of Lab or Studio per week: 1-12
When Offered: Fall

AVT 356 - Photo Studio Techniques

Credits: 4 (NR)
Introduces Theory, concepts and applications of photographic studio lighting. Emphasis on the ability to control and manipulate light in a photographic lighting studio environment using large format film cameras.

Prerequisite(s): AVT 353 or AVT 354 or permission of instructor.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 4
AVT 359 - About Photography: Practice and Research

Credits: 3 (NR)
A combined studio and lecture course investigating photography's history, critical theory, philosophy, and practice. Lectures, discussions, readings, and projects focus on a medium that has enormously influenced art and culture.

Equivalent to AVT 459 (2010-2011 Catalog)

Prerequisite(s): AVT 252 or 253 or AVT 254, and AVT 353 or 354.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

AVT 363 - Sculpture II

Credits: 4 (NR)
Expands on the principles and processes introduced in Sculpture I, developing a higher level of technical competence and critical sophistication.

Prerequisite(s): AVT 262 or permission of instructor.

Notes: Lectures, independent student research, and gallery and museum visits required. Vigorous critiques.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 4

AVT 370 - Entrepreneurship in the Arts

Credits: 4 (NR)
Combined lecture and studio course in developing entrepreneurial skills in arts. Special focus on developing communication skills and planning strategies, as well as on nurturing skills that enable students to creatively solve problems and think about opportunities.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 4

AVT 371 - Visual Perception and the Arts

Credits: 3 (NR)
Review of major approaches to the study of visual perception. Topics include analysis of picture perception, visual thinking, the relationship between symbolic and non-symbolic thinking and representation, and how pathologies of vision affect art production.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
AVT 372 - Hip Hop Culture

Credits: 3 (NR)
Examines hip hop as an art form within a continuum of cultural expression. Explores multilayered social, political, and aesthetic aspects of hip hop, historical causes and precedents, and contemporary derivatives and implications.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

AVT 373 - Performance Studio

Credits: 4 (NR)
Studio course focused on theory and practice of collaborative performance art. Detailed analysis of creation and production processes from interdisciplinary perspective in conjunction with practical training in multimedia technologies, body sculpture, and theater of images.

Prerequisite(s): AVT 272 or permission of instructor.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 4

AVT 374 - Sound Art I

Credits: 4 (NR)
Introduction to the physics, phenomenology, and production of sound as an expressive medium. Using analog and digital tools, students will explore constructing with sound.

Prerequisite(s): AVT 180 or 280, or permission of instructor.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 2
When Offered: Fall, Spring.

AVT 376 - Live Movies

Credits: 4 (NR)
Advanced performance studio emphasizing cinematic forms and multimedia technologies. Also covers sound design, scenic design and materials, production planning, and interdisciplinary approaches to narrative and content in performance.

Prerequisite(s): AVT 272 or permission of instructor.

Notes: Students collaborate on production projects.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 4
AVT 377 - Cyberpunk

Credits: 4 (NR)
Traces the ways that cinema, music, fiction, cultural theory, visual art, television, theater, and performance have embraced and been shaped by cyberpunk and cyberculture. Includes readings, writings, discussion, screenings, guest speakers, and research projects.

Hours of Lecture or Seminar per week: 6
Hours of Lab or Studio per week: 0

AVT 378 - The African American Experience in the Performing Arts

Credits: 3 (NR)
Through lectures, slides, audio recordings, videos, and films, students examine African American contributions to cultural fabric of American forms and institutions. Artistic contributions examined in aesthetic, political, historical, and social contexts.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

AVT 382 - 2D Experimental Animation

Credits: 4 (NR)
Introduces conceptual, contextual, technical, and aesthetic practices of two-dimensional experimental animation. Students learn to animate hand-drawn and computer-generated images. Students work to create an imaginative and meaningful short animation with sound.

Prerequisite(s): AVT 280 or permission of instructor.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 4
When Offered: Fall, Spring

AVT 383 - 3D Experimental Animation

Credits: 4 (NR)
Students create socially relevant 3D scenes with scaled objects, surface textures, lights, and shadows. These scenes serve as environments for short, thought-provoking animations. Emphasis on idea development, critical examination of animation practices, and visual aesthetics.

Prerequisite(s): AVT 280 or permission of instructor.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 4
When Offered: Fall, Spring
AVT 385 - EcoArt

Credits: 4 (RD)

Develop collaborative projects that explore art and visual culture, the environment, and sustainability. Students are given access to the School of Art Permaculture Studio as a "green" work space for developing course projects.
Designated a Green Leaf Course.

Fulfills general education requirement in synthesis.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 4
When Offered: Fall, Spring

AVT 390 - Video Art

Credits: 4 (NR)

Integrates study of contemporary art theory, montage theory, and artistic practices with application to new media and technology. Special focus on visual culture and video art, sound design, and the sociopolitical implications of media.

Prerequisite(s): AVT 280 or permission of the instructor.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 4
When Offered: Fall, Spring

AVT 392 - Gallery Practices

Credits: 4 (NR)

Introduction to practices of the contemporary art gallery including curatorship, exhibition planning and installation, care and proper handling of artwork, technology in the gallery, collaborating with outside curators, documentation, budget, publicity, and educational and docent activities.

Prerequisite(s): 3 credits of AVT or ARTH, junior standing, or permission of instructor.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 4

AVT 393 - Field Experience in the Arts

Credits: 1-6 (RD)

Introductory working and learning experience with an organization or individual in the arts or as a teaching assistant.

Prerequisite(s): Junior standing and permission of instructor and academic advisor.

Notes: Placement documentation to include 45 hours of work per credit. May be repeated for credit for maximum 6 credits.
AVT 394 - Honors Seminar

Credits: 1 (RD)
Offers highly motivated students opportunities to interact with art world professionals through field trips, research, critiques, and creative assignments.

Prerequisite(s): By invitation to qualified honors students.

Notes: Students accrue credits toward graduation with AVT honors. Repeatable for up to 8 credits.

AVT 395 - Writing for Artists

Credits: 3 (NR)
Practical writing seminar in which students practice typical writing needs of creative professionals; including artist's statements, grant proposals, and reviews; while also exploring ways in which artists have used writing, books, and language in art making.

Fulfills writing intensive requirement in the major.

Prerequisite(s): ENGL 302/ENGH 302 or permission of instructor.

AVT 407 - Advanced Aesthetics

Credits: 3 (NR)
Advanced examination of aesthetic concepts and theories, focusing on issues pertinent to artmaking.

Prerequisite(s): AVT 307 or permission of instructor.

AVT 411 - Motion Design
Motion Design introduces the theories, techniques and practices of motion design and the integration of design, image, sound, video and animation.

Prerequisite(s): Admission to AVT BFA Graphic Design concentration, AVT 217 and 311 or permission of instructor. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 4
When Offered: Fall, Spring

AVT 412 - Advanced Typography

Credits: 4 (NR)
An advanced exploration of type, design and the graphic organization of visual information. Emphasis is on the aesthetic and technical execution of typographic hierarchy in visual communications.

Prerequisite(s): Admitted AVT BFA Graphic Design concentration, AVT 313 or permission of instructor. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 4
When Offered: Fall, Spring.

AVT 413 - Professional Design Practices

Credits: 4 (NR)
Addresses the nature of the professional graphic designer in terms of career development and self-marketing, visual presentations of design work, preparation of written materials and interview techniques. Special emphasis will be given to the development of a design business, as well as freelance and pro-bono design work.

Prerequisite(s): Admitted AVT BFA Graphic Design concentration, AVT 313 and 414 or permission of instructor. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 4
When Offered: Fall, Spring.

AVT 414 - Corporate Design and Branding

Credits: 4 (NR)
Fundamentals of branding and identity design. Topics include logo development, product packaging, marketing and advertising collaterals, web branding, and broadcast advertising development. Special attention is given to the creation of a graphics standards guide.

Prerequisite(s): AVT 252 or 253, AVT 311, and AVT 395 or permission of instructor. Prerequisite enforced by registration system.
AVT 415 - Web Design and Usability

Credits: 4 (NR)
Introduces students to web design, usability, and the use of popular applications for static, interactive, and motion-based web development.

Prerequisite(s): Admitted to AVT BFA Graphic Design concentration, AVT 217 and 311, AVT 313 or 414 or permission of instructor. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 4
When Offered: Fall, Spring.

AVT 416 - Advertising Design

Credits: 4 (NR)
Provides insight and practice in the creative design process behind effective and memorable advertising. Emphasis on the design and presentation of a series of portfolio-ready advertising campaigns for actual client use.

Prerequisite(s): Admitted AVT BFA Graphic Design concentration, AVT 414 or permission of instructor. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 4
When Offered: Fall, Spring.

AVT 417 - Package Design

Credits: 4 (NR)
Provides a focused studio experience to conceptualize and design multiple applications for contemporary package design.

Prerequisite(s): Admitted AVT BFA Graphic Design concentration, AVT 414 or permission of instructor. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 4
When Offered: Fall, Spring.

AVT 418 - History of Graphic Design
Survey of design history. Looks at print and web design as both a reaction to and shaper of the broader culture (including other fine and applied arts) through the study of major movements and designers.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall, Spring

**AVT 419 - Topics in Graphic Design**

Credits: 1-6 (RT)  
Rotating subjects give students a deep look into and appreciation of a specific topic in design practice.

**Prerequisite(s):** AVT 311 and either AVT 313 or 414. Prerequisite enforced by registration system.

**Notes:** Topics and credit vary with instructor. May be repeated when taken under different topics.

**Hours of Lecture or Seminar per week:** 1-6  
**Hours of Lab or Studio per week:** 0-6

**AVT 420 - Advanced Web Design**

Credits: 4 (NR)  
Building on the principles and skills gained in AVT 415, this course delves deeper into web-related concepts and techniques. Students will gain advanced knowledge in evolving web technology, preparing them for professional entry into the web design field.

**Prerequisite(s):** Admission to AVT BFA Graphic Design concentration, AVT 415 or permission of instructor. Prerequisite enforced by registration system.

**Hours of Lecture or Seminar per week:** 4  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall, Spring.

**AVT 422 - Drawing III**

Credits: 4 (NR)  
Builds on intermediate drawing skills, emphasizing individual exploration and expressive techniques. Along with rigorous observational study, students work from a variety of sources to develop a broad understanding of visual solutions within contemporary art practice.

**Prerequisite(s):** AVT 323 or permission of instructor.

**Hours of Lecture or Seminar per week:** 2  
**Hours of Lab or Studio per week:** 4
AVT 423 - Drawing IV

Credits: 4 (NR)
Students learn and practice advanced drawing skills and techniques in a variety of media and formats. Emphasis on development of content, personal sources, techniques, presentation strategies, and methods of analysis through critique.

Prerequisite(s): AVT 422 or permission of instructor.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 4

AVT 432 - Painting III

Credits: 4 (NR)
Intermediate course with an emphasis on developing personal content, concepts, painting strategies, and a practical understanding of contemporary ideas in painting.

Prerequisite(s): AVT 333 or permission of instructor.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 4

AVT 433 - Painting IV

Credits: 4 (NR)
Students engage in a self-directed studio practice through the development of content, personal sources, techniques, presentation strategies, and methods of analysis through critique.

Prerequisite(s): AVT 432 or permission of instructor.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 4

AVT 434 - Painting V

Credits: 4 (NR)
Students work rigorously and independently, advancing individual studio practice through in-depth dialogue with faculty and formal group critiques. Emphasis on individual decision making, personal initiative, and critical vocabularies.

Prerequisite(s): AVT 433 or permission of instructor.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 4
AVT 435 - Painting VI

Credits: 4 (NR)
Advanced directed research in painting. Employing rigorous concepts, presentation strategies, and in-depth critique, students develop independent projects into a cohesive body of work.

Prerequisite(s): AVT 434 or permission of instructor.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 4

AVT 442 - Printmaking III

Credits: 4 (NR)
An intermediate print media course with an emphasis on a wider variety of tools and concepts that investigate photo-based imagery and advance personal narrative.

Prerequisite(s): AVT 343 or permission of the instructor.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 4

AVT 443 - Printmaking IV

Credits: 4 (NR)
An advanced print media course that uses hand-drawn, digital, and photo-based imagery. Students explore traditional and new printmaking techniques in a series of related prints and explore their relevancy to contemporary printmaking.

Prerequisite(s): AVT 442 or permission of the instructor.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 4

AVT 444 - Printmaking V

Credits: 4 (NR)
Advanced print media course incorporating three-dimensional applications of hand printmaking. Students develop concepts in digital printmaking, book making, sculptural prints, and installation works. Explores issues in contemporary printmaking through critical discussions, reading, and writing assignments.

Prerequisite(s): AVT 443 or permission of the instructor.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 4
AVT 445 - Printmaking VI

Credits: 4 (NR)
Students produce a body of print media work reflecting their interests, including the broader context of social, cultural, and contemporary issues. Students engage in collaborative studio practices and independent projects to integrate multiple visual technologies.

Prerequisite(s): AVT 444 or permission of the instructor.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 4

AVT 453 - Professional Practices

Credits: 3 (NR)
Investigates portfolio development and introduces photography students to a range of professional career options. Emphasis is on portfolio development, internships and developing promotional materials such as websites and resumes. Includes studio, gallery and/or museum visits and guest speaker(s).

Prerequisite(s): AVT 353 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

AVT 454 - Alternative Photo Processes

Credits: 4 (NR)
Introduction to 19th century and nontraditional photographic processes including cyanotype, van dyke, gum bichromate, liquid emulsion, and image transfer. Exploration and discussion of photography's influences, application, and use in other mediums.

Prerequisite(s): AVT 353 or permission of instructor.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 4

AVT 455 - Digital Printing Techniques

Credits: 4 (NR)
Continuation of 354 Digital Photo Methods with further examination into digital techniques, personal expression and digital printing. Course emphasis is on the fine art and craft of the digital print and portfolio development.

Prerequisite(s): AVT 354 or permission of instructor.

Notes: Continuation of AVT 354
AVT 457 - Documentary Photography

Credits: 4 (NR)
Introduces documentary photography: techniques, history, choices, and ideas necessary to create meaningful photo essays that incorporate a personal, committed, in-depth approach to seeing and depicting lives and situations.

Prerequisite(s): AVT 452 or permission of instructor.

AVT 458 - Advanced Studio Lighting

Credits: 4 (NR)
The advanced study of photographic studio lighting concepts using electronic strobes and power packs with emphasis placed on constructing studio materials, metering techniques, staging complex sets, and on-location photography.

Prerequisite(s): AVT 356 or permission of instructor.

AVT 462 - Sculpture III

Credits: 4 (NR)
Advanced studio course for continued individual, conceptual, and critical development in sculpture. Biweekly seminar, independent research, museum and gallery visits, vigorous individual and group critiques, required documentation, and portfolio preparation supporting studio projects.

Prerequisite(s): AVT 363 or permission of instructor.

AVT 463 - Sculpture IV

Credits: 4 (NR)
Intensive studio course for advanced sculpture students to further individual, conceptual, and critical development. Students produce a body of work based on technical exploration, critical discussion, reading, and writing.

Prerequisite(s): AVT 462 or permission of instructor.
AVT 464 - Sculpture V

Credits: 4 (NR)
Advanced studio course for rigorous and independent production of sculpture. Weekly topical seminar, vigorous critiques, museum and gallery visits, professional documentation, and research resulting in a body of work to be exhibited.

Prerequisite(s): AVT 463 or permission of instructor.

AVT 465 - Sculpture VI

Credits: 4 (NR)
Students work rigorously and independently, gaining insights into personal process and direction through one-on-one critical dialogue with faculty and formal group critiques. Emphasizes individual decision making and personal initiative.

Prerequisite(s): AVT 464 or permission of instructor.

Notes: Continuation of advanced work in AVT 465.

AVT 472 - Critical Theory in the Visual Arts

Credits: 3 (NR)
Examination of currents in theory and criticism that inform contemporary practice and critical analysis in the visual arts.

Prerequisite(s): ARTH 374 or permission of instructor.

AVT 473 - Advanced Performance Studio

Credits: 4 (NR)
Prerequisite(s): AVT 373 or permission of instructor.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 4

AVT 474 - Sound Art II

Credits: 4 (NR)
Extends a working knowledge of the materiality of sound into an in-depth exploration of creation in the sonic realm. May include synthesis, circuit-bending, use of field recordings and other samples, and live performance.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 4
When Offered: Fall, Spring.

AVT 482 - Advanced Image Making

Credits: 4 (NR)
In-depth look at the processes and mechanisms used to generate, reconstruct, and/or create new media images. Students are required to create a series of contextually related images and to further develop their critical analysis abilities.

Prerequisite(s): AVT 280 or permission of instructor.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 4

AVT 483 - Art and Interactivity

Credits: 4 (NR)
Provides a context for art making as an interactive and participatory experience while critically examining the ways in which technologies may aid and also inhibit engagement with the social and political world.

Prerequisite(s): AVT 280 plus one 300-level New Media Arts course, or permission of instructor.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 4

AVT 487 - Advanced Topics: New Media Art

Credits: 4 (NR)
Provides a context for exploring current developments in new media art practice in and outside the studio. Specific course content adapts and responds to ongoing movements in new media art and contemporary culture.

Prerequisite(s): AVT 280 plus one 300-level New Art Course, or permission of instructor.
**AVT 489 - Internship in Art and Visual Technology**

Credits: 1-6 (RD)
Unpaid professional-level work experience in a professional organization or with an individual artist, related to the student's concentration and career plans.

**Prerequisite(s):** Senior standing, completion of 12 concentration credits, and permission of instructor.

**Notes:** Placement documentation to include 45 hours of work per credit. May be repeated for credit for maximum 12 credits.

**Hours of Lecture or Seminar per week:** 1-12  
**Hours of Lab or Studio per week:** 0

**AVT 491 - Independent Study in Art and Visual Technology**

Credits: 1-6 (RT)
Opportunity for development of advanced skills and concepts in a field of interest. Study proposal must be approved by instructor prior to registration.

**Prerequisite(s):** Senior standing, completion of 12 concentration credits, and permission of instructor.

**Notes:** Project documentation to include 45 hours of work per credit. May be repeated for credit for maximum 24 credits.

**Hours of Lecture or Seminar per week:** 1-6  
**Hours of Lab or Studio per week:** 0

**AVT 493 - Teaching Visual Thinking Through Media, PK-12**

Credits: 3 (NR)
Investigates range and appropriateness of media and materials that encourage creative expression in the art classroom for PK-12 students, and expands the artist-teacher's visual repertoire. Incorporates art history, criticism, and aesthetics, as well as language arts and other content areas that challenge students' artistic growth and human development.

**Prerequisite(s):** AVT 495 or permission of art education director.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**AVT 494 - Teaching Critical Response to Art, PK-12**
Develops visual literacy and critical-thinking skills for application to the PK-12 classroom by examining diverse theoretical models and applying strategies to expand knowledge about art and artifacts. Includes intensive writing, readings, discussions, museum work, research and Internet skills, and studio work.

**Prerequisite(s):** AVT 495 or permission of art education director.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**AVT 495 - Introduction to Art Teaching and Learning**

Credits: 3 (NR)  
Explores art-teaching profession through readings, discussion, hands-on activities, and visits to diverse area public schools. Students discover a variety of ways that art is taught and evaluated to meet multiple educational needs of today's PK-12 students.

**Prerequisite(s):** Junior standing, completion of ENGL 302/ENGH 302, and completion of at least 20 credits of AVT coursework (including AVT 307); or permission of art education director.

**Notes:** Prior to enrollment, students must complete art education inquiry form.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**AVT 496 - Special Topics: (specific course title varies)**

Credits: 1-4 (RD)  
Explores topical studies in AVT including theoretical and critical aspects of art or studio production.

**Notes:** Topics and credit vary with instructor. May be repeated when taken under different topics.

**Hours of Lecture or Seminar per week:** 1-4  
**Hours of Lab or Studio per week:** 0-4

**AVT 497 - Senior Project**

Credits: 4 (NR)  
Capstone course in which students develop and present a cohesive body of work along with written materials and documentation. Students participate in critiques with visiting artists or AVT faculty and in workshops supporting professional goals.

Fulfills general education requirement in synthesis.

**Prerequisite(s):** Senior art and visual technology major, completion of 12 concentration credits, and completion of or concurrent enrollment in all required general education courses.

**Hours of Lecture or Seminar per week:** 2  
**Hours of Lab or Studio per week:** 4
AVT 498 - Senior Design Project

Credits: 4 (NR)
Capstone course in which students develop and present a design project exploring the possibilities of personal or professional expression. Students participate in critiques with visiting artists or AVT faculty and in workshops supporting professional goals.

Fulfills general education requirement in synthesis.

Prerequisite(s): Senior art and visual technology major, completion of AVT 311, 313, and 414, and completion of or concurrent enrollment in all required general education courses. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 4

AVT 507 - Advanced Aesthetics

Credits: 3 (NR)
Graduate seminar in aesthetic concepts and theories, focusing on issues pertinent to artmaking.

Prerequisite(s): Admission to the MFA program or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring.

AVT 522 - Drawing V

Credits: 4 (NR)
Drawing on an advanced level, emphasizing individual decision-making and personal initiative.

Prerequisite(s): Admission to the AVT graduate program or permission of instructor.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 4

AVT 523 - Drawing VI

Credits: 4 (NR)
Drawing on an advanced level, emphasizing individual decision-making and personal initiative.

Prerequisite(s): Admission to the AVT graduate program, AVT 522, or permission of instructor.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 4
AVT 595 - Introduction to Art Teaching and Learning

Credits: 3 (NR)
Explores art-teaching profession through readings, discussion, hands-on activities, visits to diverse area public schools and action research. Students analyze ways that art is taught and evaluated to meet multiple educational needs of today's PK-12 students.

Prerequisite(s): Admission to MAT Program or permission by the art education advisor or director

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

AVT 596 - Independent Study

Credits: 1-6 (RT)
Independent reading and research on specific project under department faculty member's direction.

Prerequisite(s): Admission to AVT graduate program or permission of instructor.

Notes: Written reports required. May be repeated for credit.

Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 0

AVT 599 - Special Topics in Art and Visual Technology

Credits: 1-6 (RT)
Exploration of topical studies in AVT, including theoretical and critical aspects of art or studio production.

Prerequisite(s): Admission to AVT graduate program or permission of instructor.

Notes: Topics and credit vary with instructor. May be repeated when taken under different topics.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0-6

AVT 600 - Research Methodologies

Credits: 3 (NR)
Graduate seminar focusing on development of independent research project in student's area of emphasis. Explores principal methods of researching and documenting art and arts practice. Along with traditional methods of library research, emphasizes new processes of examination and investigation through the use of computer-aided research systems.

Prerequisite(s): Admission to AVT graduate program or permission of instructor.
AVT 605 - Issues and Research in Art Education

Credits: 3 (NR)
Readings and projects explore historical and contemporary ideas, issues, philosophies, pedagogy, and research in art education. Investigates teachers’ use of research-oriented questions and data to explore classroom issues and improve teaching and learning.

Prerequisite(s): Admission to the MAT program and permission of instructor.

AVT 606 - Creativity and Cognition in the Arts and Media

Credits: 3 (NR)
Focuses on research on cognition, development, learning, and creativity in the visual arts and media in formal and informal educational settings.

Equivalent to EDEP 601

AVT 610 - Graduate Seminar

Credits: 2 (RD)
Students present their work or the work of contemporary artists for discussion and peer and faculty critiques. Special focus on developing public communication and presentation skills on contemporary issues in the arts.

Prerequisite(s): Admission to AVT graduate program or permission of instructor.

Notes: Seminar course required of all AVT graduate students four times during course of study. Repeatable for 8 credits.

AVT 611 - Graduate Design Seminar

Credits: 1 (RD)
A laboratory for the exploration of contemporary design theory and practice through writing and design making, this class will have rotating topical content.
AVT 612 - Independent Project Research

Credits: 1 (RD)
Provides the development and research phase in preparation for AVT 794: Independent Design Project, the capstone course in the Graphic Design masters program. Students will prepare their written final project proposal for presentation to the AVT GD Graduate Faculty Committee.

Prerequisite(s): Admission to AVT MA Graphic Design program and completion of 30 graduate credits.

Notes: To be completed prior to enrolling in AVT 794: Independent Design Project.

AVT 613 - Graphic Design History

Credits: 3 (NR)
A survey of design history, examining print and web design as both a reaction to and shaper of the broader culture (including other fine and applied arts) through the study of major movements and designers.

Prerequisite(s): Admission to AVT graduate program or permission of instructor

AVT 614 - Brand Identity Design

Credits: 4 (NR)
This is an advanced design course with an emphasis on brand identity development. Topics include logo development, product packaging, marketing and advertising collaterals, web branding, and broadcast advertising development. Special attention is given to the creation of a graphic standards guide.

Prerequisite(s): Admission to the AVT graduate program or permission of instructor.

AVT 615 - Technology for Art Teachers
AVT 616 - Advanced Art and Interactivity

Credits: 5 (NR)
Studio, lecture course investigating art as networked activity. Particular attention focused on Internet as context for creation, distribution, and patronage of art.

Prerequisite(s): Admission to AVT graduate program.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 6

AVT 617 - Advanced Typography

Credits: 4 (NR)
Students will produce a body of work exploring the opportunities and limitations of typographical design.

Prerequisite(s): Admission to graphic design MA (or MFA) program, or permission of the instructor.

Corequisite(s): Admission to the AVT graduate program or permission of instructor.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 4

AVT 618 - Visual Communication Theories

Credits: 2 (NR)
Advanced graduate seminar focusing on key theories and themes that have informed 20th and 21st century design practice. Explores theory and criticism in a variety of contexts, from popular to scholarly, and considers the role of designers as thinkers and writers.

Prerequisite(s): Admission to MFA program, or permission of instructor.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring.
AVT 619 - Advanced Web Design

Credits: 4 (NR)
Develops skills for the application of information, interaction, usability, and visual design for web site developments. Students gain in-depth knowledge of user behaviors and broader context of social, cultural, and contemporary issues in web communication. Students learn professional design processes and integrate multiple web developing technologies.

Prerequisite(s): Admission to Graphic Design MA program or permission of instructor.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 4

AVT 620 - Theory, Criticism, and the Visual Arts

Credits: 3 (NR)
Cross-disciplinary graduate seminar focusing on key theories and themes that have informed 20th- and 21st-century arts practice. Explores theory and criticism in a variety of contexts, from popular to scholarly, and considers the role of artists as thinkers and writers.

Prerequisite(s): Admission to AVT graduate program or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

AVT 621 - Art Writing Seminar

Credits: 3 (NR)
Includes criticism, the artist statement, manifestos, and language as visual art.

Prerequisite(s): Admission to the MFA program.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring.

AVT 622 - Advanced Drawing

Credits: 4 (NR)
Advanced directed research in drawing with continued development of individual aesthetic. Study of historical and philosophical precedents integral.

Prerequisite(s): Admission to AVT graduate program or permission of instructor.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 4
AVT 632 - Graduate Painting I

Credits: 4 (NR)
Entering students are expected to be competent painters, with technical proficiency, a disciplined process, and a directed personal vision. Students work rigorously and independently toward the understanding and mastery of techniques, methods, and concepts relevant to formal expression of personal content. Students expected to participate in critical discourse with supervising faculty. Achievement measured by faculty review board at mid-semester and term's end.

Prerequisite(s): Admission to AVT graduate program or permission of instructor.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 4

AVT 633 - Graduate Painting II

Credits: 4 (NR)
Building on research and practices established in Graduate Painting I, students continue to develop strategies for the expression of personal vision and style. Progress tracked and assessed through periodic one-on-one critical discussions with supervising faculty. Achievement measured by faculty review board at mid-semester and term's end.

Prerequisite(s): AVT 632, or permission of instructor.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 4

AVT 634 - Advanced Graduate Painting I

Credits: 4 (NR)
Working independently on a cohesive body of work, students must demonstrate a thorough understanding and mastery of techniques, methods, and concepts relevant to their own practices, and be able to discuss their work within the context of historical and contemporary art practices. Progress tracked and assessed through periodic one-on-one critical discussions with supervising faculty. Achievement measured by faculty review board at mid-semester and term's end.

Prerequisite(s): AVT 633, or permission of instructor.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 4

AVT 635 - Advanced Graduate Painting II

Credits: 4 (NR)
Advanced independent studio production. Progress tracked and assessed through periodic critical discussions with supervising faculty. Achievement measured by faculty review board at mid-semester and end of term.

Prerequisite(s): AVT 634, or permission of instructor.
AVT 641 - Graduate Graphic Design I

Credits: 4 (NR)
Working independently on a cohesive body of work, students must demonstrate a thorough understanding and mastery of techniques, methods, and concepts relevant to their own practices, and be able to discuss their work within the context of historical and contemporary design practices. Progress tracked and assessed through periodic one-on-one critical discussions with supervising faculty. Achievement measured by faculty review board at term’s end.

Prerequisite(s): Admission to MFA program.

AVT 642 - Graduate Printmaking I

Credits: 4 (NR)
Directed research and practice in printmaking focuses on individualized development of content and technique. Explores intellectual and expressive aspects of printmaking process.

Prerequisite(s): Admission to AVT graduate program or permission of instructor.

AVT 643 - Graduate Printmaking II

Credits: 4 (NR)
Directed research and practice in printmaking focuses on individualized development of content and technique. Explores intellectual and expressive aspects of printmaking process.

Prerequisite(s): AVT 642 or permission of instructor.

AVT 644 - Advanced Graduate Printmaking I

Credits: 4 (NR)
Intensive course of creative exploration in print media that furthers students' independence through production of individualized
body of work reflecting interests within the broader contexts of contemporary social, technological, and cultural issues. Students also engage in collaborative studio practices to integrate visual technologies in their work. These may include digital imaging, drawing, graphic design, painting, performance, photography, and sculpture.

**Prerequisite(s):** Admission to the AVT graduate program, AVT 643, or permission of instructor.

**Hours of Lecture or Seminar per week:** 2  
**Hours of Lab or Studio per week:** 6

**AVT 645 - Advanced Graduate Printmaking II**

Credits: 4 (NR)  
Intensive studio course that furthers student independence through production of a body of work reflecting a broad context of social, cultural and contemporary issues.

**Prerequisite(s):** Admission to MFA program, and AVT 644.

**Hours of Lecture or Seminar per week:** 0  
**Hours of Lab or Studio per week:** 4  
**When Offered:** Fall, Spring.

**AVT 646 - Graduate Graphic Design II**

Credits: 4 (NR)  
Continuing to work independently on a cohesive body of work, students must demonstrate a thorough understanding and mastery of techniques, methods, and concepts relevant to their own practices, and be able to discuss their work within the context of historical and contemporary art and design practices. Progress tracked and assessed through periodic one-on-one critical discussions with supervising faculty. Achievement measured by faculty review board at term’s end. (This is the second course in a two-course sequence.)

**Prerequisite(s):** Admission to MFA program.

**Hours of Lecture or Seminar per week:** 0  
**Hours of Lab or Studio per week:** 4  
**When Offered:** Fall, Spring.

**AVT 647 - Advanced Graduate Graphic Design I**

Credits: 4 (NR)  
Working independently on a cohesive body of work, students must demonstrate a thorough understanding and mastery of techniques, methods, and concepts relevant to their own practices, and be able to discuss their work within the context of historical and contemporary design practices. Progress tracked and assessed through periodic one-on-one critical discussions with supervising faculty. Achievement measured by faculty review board at term’s end.

**Prerequisite(s):** Admission to MFA program, and AVT 646

**Hours of Lecture or Seminar per week:** 0
AVT 648 - Advanced Graphic Design II

Credits: 4 (NR)
Continuing to work independently on a cohesive body of work, students must demonstrate a thorough understanding and mastery of techniques, methods, and concepts relevant to their own practices, and be able to discuss their work within the context of historical and contemporary art and design practices. Progress tracked and assessed through periodic one-on-one critical discussions with supervising faculty. Achievement measured by faculty review board at term’s end. (This is the second course in a two course sequence.)

Prerequisite(s): Admission to MFA program, and AVT 647.

AVT 652 - Graduate Photography I

Credits: 4 (NR)
Critical theory and directed practice in photography focusing on development of a personal voice and working method through intellectual activity and creative work. Emphasizes ability to explore concepts, develop skills, and evolve as a communicator of ideas and photographic artist.

Prerequisite(s): Admission to AVT graduate program or permission of instructor.

AVT 653 - Graduate Photography II

Credits: 4 (NR)
An intensive critique class concentrating on the development of creative work with emphasis on articulating responses to others' work, the cultural climate, and issues involved in one's own work as it progresses.

Prerequisite(s): Admission to AVT graduate program or permission of instructor.

Notes: Continuation of Graduate Photography I. Weekly classes share equal time with critical theory and hands-on studio work. Includes readings, visiting artists and lecturers, and field trips.
Credits: 4 (NR)
Intensive critique class concentrating on the development of creative work with emphasis on articulating responses to others' work, the cultural climate, and issues involved in one's own work as it progresses.

**Prerequisite(s):** Admission to the AVT graduate program, AVT 653, or permission of instructor.

**Notes:** Advanced graduate photography course. Weekly classes share equal time with critical theory and hands-on studio work. Includes readings, visiting artists and lecturers, and field trips.

**Hours of Lecture or Seminar per week:** 0
**Hours of Lab or Studio per week:** 4

---

**AVT 655 - Advanced Graduate Photography II**

Credits: 4 (NR)
AVT 655, Advanced Graduate Photography II, Advanced independent studio production. Progress tracked and assessed through periodic critical discussions with supervising faculty. Achievement measured by faculty review board at mid-semester and end of term.

**Prerequisite(s):** AVT 652, or permission of instructor.

**Hours of Lecture or Seminar per week:** 0
**Hours of Lab or Studio per week:** 4
**When Offered:** Fall, Spring.

---

**AVT 662 - Graduate Sculpture I**

Credits: 4 (NR)
Intensive studio course that furthers student independence through production of a body of work reflecting interests, including a broader context of social, cultural, and contemporary issues. Emphasizes self-evaluation, critical discussion, reading, and writing.

**Prerequisite(s):** Admission to AVT graduate program or permission of instructor.

**Hours of Lecture or Seminar per week:** 0
**Hours of Lab or Studio per week:** 4

---

**AVT 663 - Graduate Sculpture II**

Credits: 4 (NR)
Intensive studio course that furthers student independence through production of a body of work reflecting interests, including a broader context of social, cultural, and contemporary issues. Emphasizes self-evaluation, critical discussion, reading, and writing.

**Prerequisite(s):** Admission to the AVT graduate program, AVT 662 or permission of instructor.

**Hours of Lecture or Seminar per week:** 0
**Hours of Lab or Studio per week:** 4
AVT 664 - Advanced Graduate Sculpture I

Credits: 4 (NR)
Emphasizes individual creative production and development, with periodic exposure of student's work and ideas to the critical attention of the AVT teaching faculty and other graduate students.

Prerequisite(s): Admission to the AVT graduate program, AVT 663 or permission of instructor.

Notes: Writing and reading components.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 4

AVT 665 - Advanced Graduate Sculpture II

Credits: 4 (NR)
Advanced independent studio production. Progress tracked and assessed through periodic critical discussions with supervising faculty. Achievement measured by faculty review board at mid-semester and end of term.

Prerequisite(s): Advanced Graduate Sculpture I, or permission of the instructor.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 4
When Offered: Fall, Spring.

AVT 667 - Two-Dimensional Art Making: Form, Theme, and Context

Credits: 3 (NR)
Through studio work and research on basic and innovative drawing strategies, students explore expressive visual qualities, composition, and color. Students develop professional portfolios that incorporate meaningful themes and contexts for developing visual literacy in PK-12.

Prerequisite(s): Admission to the MAT program and permission of the instructor based on a portfolio review.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 4

AVT 668 - Three-Dimensional Art Making Across Cultures

Credits: 3 (NR)
Explores the diversity of art forms in world cultures and work of traditional and contemporary artists. Students learn basic three-dimensional art-making techniques, including ceramics and fibers, and learn to design three-dimensional art instruction for PK-12 levels.
Prerequisite(s): Admission to the MAT program or Art Education Concentration ASTL; or permission of the art education director.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 4

AVT 669 - Four Dimensional Art Making: Technology and New Media

Credits: 4 (NR)
Develops teacher skills for the application of advanced technology for the PK-12 art program and examines the changing nature and uses of technology for expanding visual literacy through pedagogical strategies.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 4

AVT 670 - Teaching Practicum

Credits: 2 (RD)
Supervised classroom teaching practicum in Mason's undergraduate program or community college program.

Prerequisite(s): Admission to AVT graduate program or permission of instructor.

Notes: May be repeated for total of 4 credits.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 0
Grading: Graduate Special

AVT 672 - Performance Studio I

Credits: 4 (NR)
Introductory studio course looking at performance as a visual art practice and focusing on time, space and the body. Emphasizes artist as performer. Students study the work of performance practitioners, make short performance pieces, document and exhibit their work, and go to galleries and performances locally and in New York.

Prerequisite(s): Admission to AVT graduate program or permission of instructor.

Notes: Substantial research project required.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 4

AVT 673 - Performance Studio II
Credits: 4 (NR)
In-depth studio course focusing on collaborative practice of performance art. Analyzes creation and production processes from an interdisciplinary perspective in conjunction with practical training in multimedia performance, complemented by screenings, readings, guest artists, and field trips.

Prerequisite(s): AVT 672 or permission of instructor.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 4

AVT 674 - Advanced Performance Studio

Credits: 4 (NR)
Advanced laboratory for creating and producing performance art. Emphasizes new technologies and their applications, multimedia scriptwriting and storyboarding, and the creation of audiovisual performance. Students work independently and also contribute to collaborative production.

Prerequisite(s): AVT 673 or permission of instructor.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 4

AVT 675 - Advanced InterArts Topics

Credits: 4 (NR)
Opportunity for advanced study in interdisciplinary arts topics including African American experience in the performing arts, cyberpunk, global motion, interarts figures, live movies, writing and performance.

Prerequisite(s): AVT 673 or permission of instructor

Notes: May be repeated for maximum 15 credits when taken under different topics.

Hours of Lecture or Seminar per week: 6
Hours of Lab or Studio per week: 2

AVT 676 - Graduate Sound Art

Credits: 4 (NR)
Assuming basic competency in digital audio production and within the theory of sounded experience, students will be assisted in the incorporation of sonic material into their graduate research projects.

Prerequisite(s): Admission to AVT graduate program or permission of instructor.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 2
When Offered: Fall, Spring.
AVT 678 - Interface and CD-ROM Design

Credits: 5 (NR)
Combined lecture and studio course in multimedia interface and CD-ROM design. Focuses on exporting traditional visual and aural artistic aesthetic to the computer environment within a multimedia context. Assigned class readings augmented and supported by presentations of various digital interfaces and CD-ROM examples. Discusses commercial, entertainment, and educational titles, as well as CD-ROM experimental art works. Studio time divided between AVT labs and area multimedia facilities. Students conceive, design, and develop two CD-ROM or kiosk interfaces due at midterm, and complete a dual platform CD-ROM project due at semester end.

Prerequisite(s): Admission to AVT graduate program or permission of instructor.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 6

AVT 682 - Experimental 2D Animation

Credits: 4 (NR)
Designed to broaden range of visually expressive, time-based media from cell animation and stop motion animation to rotoscoping and two-dimensional digital animation. Emphasizes idea generation, concept development, and visual aesthetics.

Prerequisite(s): Admission to AVT graduate program or permission of instructor.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 4

AVT 684 - Advanced Image Making

Credits: 4 (NR)
Overview of two-dimensional computer-imaging applications in the arts, including painting, printmaking, mixed media, illustration, video, and animation. Lectures combine technical and aesthetic material, including image processing for artists and color reproduction. Emphasis on developing advanced studio portfolio.

Prerequisite(s): Admission to AVT Graduate Program.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 4

AVT 685 - Video Art

Credits: 4 (NR)
Explores video as medium that is transforming art and is transformed by art. Emphasizes developing an approach to personal narrative, creative skills, and construction of meaning, as well as on acquiring technical skills.
Prerequisite(s): Admission to AVT graduate program or permission of instructor.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 4

AVT 686 - Experimental 3D Animation

Credits: 4 (NR)
Teaches how to create realistic, three-dimensional scenes with scaled objects, surface textures, lights, and shadows. Emphasizes idea generation, concept development, visual aesthetics, and technical abilities. Students required to render a portfolio of high-resolution images.

Prerequisite(s): Admission to AVT Graduate Program.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 4

AVT 687 - Advanced Topics: New Media

Credits: 4 (NR)
Advanced course in digital media, including layer compositing, digital video editing, rotoscoping, and cell animation. Emphasizes integrating traditional techniques with software applications; and publishing projects to CD-ROM, DV tape, DVD, and Internet.

Prerequisite(s): Admission to AVT graduate program or permission of instructor.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 6

AVT 688 - Hybrid Animation

Credits: 4 (NR)
Study of digital two-dimensional and three-dimensional animation practices. Introduces lighting, camera movement, object motion, timing, and texture mapping as students plan and produce a short animation. Emphasizes idea generation, concept development, visual aesthetics, and technical abilities.

Prerequisite(s): Admission to AVT graduate program or permission of instructor.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 4

AVT 691 - Elementary Art Education
Concepts and methods in early childhood and elementary art education.

**Prerequisite(s):** Admission to the MAT program and permission of instructor.

**Notes:** Students spend three hours per week in class and one hour per week in required field experience in public schools and other educational settings.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 1

### AVT 692 - Secondary Art Education

Credits: 3 (NR)  
Concepts and methods in secondary art education.

**Prerequisite(s):** AVT 691 or permission of instructor.

**Notes:** Students spend three hours per week in class, and one hour per week in required field experience in the public schools and other educational settings.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 1

### AVT 693 - Apprenticeship

Credits: 3 - 6 (RT)  
Apprenticeship at a local business conforming to students' interests in visual information technologies.

**Prerequisite(s):** Admission to AVT graduate program or permission of instructor.

**Notes:** May be repeated for total 6 credits.

**Hours of Lecture or Seminar per week:** 3 or 6  
**Hours of Lab or Studio per week:** 0

### AVT 694 - Advanced Studies in Teaching Critical Response to Art, PK-12

Credits: 3 (NR)  
Develops visual literacy and critical thinking skills by examining diverse theoretical models and applying strategies to expand knowledge about art and artifacts in the PK-12 classroom and museum.

**Prerequisite(s):** Admission to the Art Education concentration ASTL and/or permission of the art education director.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0
AVT 695 - Internship in Art Education (Student Teaching)

Credits: 5 (NR)
Full-time internship in which students teach in elementary and secondary schools with guidance from cooperating mentor teachers. College supervisors make periodic site visits to observe, assess, and evaluate progress.

Prerequisite(s): Completion of all other MAT program requirements.
Corequisite(s): AVT 696.

Hours of Lecture or Seminar per week: 1-2
Hours of Lab or Studio per week: 0

AVT 696 - Internship for Student Teachers

Credits: 1 (NR)
Weekly professional seminar focused on needs and concerns of student teachers. Covers issues as they emerge in practice, and concludes with an "Art of Teaching Art" exhibit of work by students of preservice teachers.

Corequisite(s): AVT 695.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 0

AVT 697 - Advanced Strategies and Curricular Innovations in the Visual Arts

Credits: 3 (NR)
Synthesizing knowledge and understandings gained in ASTL program, seminar focuses on innovative curriculum design, mastery of effective instructional strategies, and developing leadership potential for the field of visual art education.

Prerequisite(s): Completion of all ASTL art education concentration courses.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 0

AVT 698 - Ind Study/Directed Readings

Credits: 1-3 (RD)
Prerequisite(s): Admission to the MAT or Art Education Concentration,(ASTL) and permission of art education director.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 1-12
AVT 794 - Independent Design Project

Credits: 4 (NR)
The capstone course in the graphic design Master of Arts degree. Provides for the independent development, design, production and presentation of a graduate-level design project guided by faculty and design professionals.

Prerequisite(s): Admission to the AVT Graphic Design graduate program and completion of 30 graduate credits.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0
Grading: Graduate Special

AVT 796 - Directed Reading

Credits: 1 (NR)
The development of independent research into the historical precedents, theoretical underpinnings, cultural forms, and idea territories pertinent to student's individual studio practice. Individualized section under the direction of division member.

Prerequisite(s): Admission to AVT graduate program or permission of instructor.

Notes: One of three courses comprising the MFA comprehensive experience for AVT students.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0

AVT 798 - Directed Project and Exhibition

Credits: 1-7 (RD)
The construction and presentation of a professional-quality public exhibition. Course includes significant independent studio production of a comprehensive body of work, leading to the MFA Thesis Exhibition. Exhibition must demonstrate student's mastery of studio craft and concept. Individualized section under the direction of division member.

Prerequisite(s): Admission to AVT graduate program or permission of instructor.

Notes: One of three courses comprising the MFA comprehensive experience for AVT students.

Hours of Lecture or Seminar per week: 1-7
Hours of Lab or Studio per week: 0

AVT 799 - Thesis

Credits: 1-3 (RD)
The written thesis informs, documents, and enhances the MFA thesis exhibition, which is the student's primary creative research activity. The content of the written thesis may vary in accordance with artistic discipline and final exhibition. Individualized section under the direction of division member.
Prerequisite(s): Admission to AVT graduate program or permission of instructor.

Notes: One of three courses comprising the MFA comprehensive experience for AVT students.

Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 0
Grading: Satisfactory/No credit only

Arts Management (AMGT)

Offered by the College of Visual and Performing Arts

AMGT 402 - Professional Development

Credits: 1 (NR)
Seminar course that involves the development of workplace frameworks for success.

Prerequisite(s): Junior standing, admission to the arts administration minor, or permission of instructor.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0
When Offered: Fall

AMGT 405 - Seminar in Arts Management

Credits: 3 (NR)
Focuses on not-for-profit visual and performing arts organizations. Topics covered include the evolution of the field, the internal culture and structure, external influences, governance, planning, human resources, marketing, fundraising, financial management, economic impact, and other topics. Students will be introduced to a wide range of arts organizations, working arts administrators, and institutional models through field trips, guest lectures, readings, and institutional data.

Prerequisite(s): Junior standing, admission to arts administration minor, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring

AMGT 410 - Arts Advocacy and Community

Credits: 3 (NR)
This course is an overview of advocacy and community engagement as practiced by the arts manager, artist, and educator. Students will learn to identify the need for community engagement and to develop successful techniques to implement outreach. Other topics will include accessibility, diversity, volunteerism, and governance.

Prerequisite(s): Junior standing or permission of program director.
AMGT 425 - Public Relations and Marketing: Introduction to Technology

Credits: 1 (NR)
Introduces students to software packages current in Public Relations and Marketing and demonstrates their value for specific applications in Arts Management. Students will also learn about the direct costs, licensing, infrastructure, and advanced training necessary for effectively managing these resources. This course may be taken alone or with AMGT 426.

Prerequisite(s): Admission to Arts Management Minor or permission of program director.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring

AMGT 426 - Public Relations and Marketing: Applied Technical Projects

Credits: 1 (NR)
Students employ and expand their knowledge of one software package current in Public Relations and Marketing. Under the direction of faculty, each student will identify a specific application in Arts Management to test that package.

Prerequisite(s): AMGT 425 or permission of program director.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 4
When Offered: Spring

AMGT 445 - Project Management: Introduction to Technology

Credits: 1 (NR)
Introduces students to software packages current in Project Management and demonstrates their value for specific applications in Arts Management. Students also will learn about the direct costs, licensing, infrastructure, and advanced training necessary for effectively managing these resources. This course may be taken alone or with AMGT 446.

Prerequisite(s): Admission to Arts Management Minor or permission of program director.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0
When Offered: Spring

AMGT 446 - Project Management: Applied Technology Projects
Credits: 1 (NR)
Students employ and expand their knowledge of one software package current in Project Management. Under the direction of faculty, each student will identify a specific application in Arts Management to test that package.

Prerequisite(s): AMGT 445 or permission of program director.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 4
When Offered: Spring

AMGT 455 - Fundraising and Development: Introduction to Technology

Credits: 1 (NR)
Introduces students to software packages current in Fundraising and Development and demonstrates their value for specific applications in Arts Management. Students will also learn about the direct costs, licensing, infrastructure, and advanced training necessary for effectively managing these resources. This course may be taken alone or with AMGT 456.

Prerequisite(s): Admission to Arts Management Minor or permission of program director.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0
When Offered: Spring

AMGT 456 - Fundraising and Development: Applied Technology Projects

Credits: 1 (NR)
Students employ and expand their knowledge of one software package current in Fundraising and Development. Under the direction of faculty, each student will identify a specific application in Arts Management to test that package.

Prerequisite(s): AMGT 455 or permission of program director.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 4
When Offered: Spring

AMGT 470 - Academic Writing in the Arts

Credits: 1 (NR)
Prepares students for the rigors of academic writing within the arts management fields. Students learn how to analyze the rhetorical situation before writing: assignment, topic, purpose, audience, and organization. Includes principles of academic research, writing, and citation; each assignment is designed to encourage students to think critically about their own writing and to practice patterns of review, assessment, reflection, and revision.

Prerequisite(s): Junior standing, admission to the arts administration minor, or permission of the instructor.

Hours of Lecture or Seminar per week: 1
AMGT 471 - Introduction to Grant Writing

Credits: 1 (NR)
Course focuses on developing the skills necessary for successful grant applications for arts organizations. Study of relevant funding sources, awareness of available research materials, ability to construct coherent proposals, and defining fund-raising strategy for an arts organization.

Prerequisite(s): Junior standing, admission to the arts administration minor, or permission of the instructor.

AMGT 489 - Internship in Arts Management

Credits: 1-4 (RD)
Apprenticeship, internship, or project with organization or individual in the arts. Must be prearranged with the minor coordinator before enrollment.

Prerequisite(s): Junior Standing, completion of 6 credits of courses in area of residency, AMGT 305, or permission of instructor.

AMGT 504 - Professional Development Arts Management

Credits: 1 (NR)
Combines experimental facets happening within the creative community and the development of an increasing awareness of self. Professional development is not only for the manager, but also for those who work for that manager. It is collaborative, ideally incorporating an evaluative stage. Topics addressed include professional development, consultation, coaching, communities of practice, lesson study, mentoring, reflective supervision and technical assistance.

Prerequisite(s): Admission to Arts Management program or permission of program director.
AMGT 511 - Introduction to Grant Writing

Credits: 1 (NR)
Places components of the grant writing process; including research, proposal writing, terminology, oral and written techniques, and specific focus; within broader context of nonprofit management. Introduction to perspectives of grant seeker and maker. Discover resources and compelling writing skills pertaining to proposal and letters of intent.

Prerequisite(s): Admission to Arts Management program or permission of program director.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0
When Offered: Fall, Summer, Spring.

AMGT 525 - Introduction to Technology for PR and Marketing in the Arts

Credits: 1 (NR)
Introduces students to software packages current in Public Relations and Marketing and demonstrates their value for specific applications in Arts Management. Students also will learn about the direct costs, licensing, infrastructure, and advanced training necessary for effectively managing these resources. This course may be taken alone or with AMGT 526.

Prerequisite(s): Admission to Arts Management program or permission of program director.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0
When Offered: Fall, Summer, Spring.

AMGT 526 - Applied Technology Projects for PR and Marketing in the Arts

Credits: 1 (NR)
Allows students to employ and expand their knowledge of one software package current in Public Relations and Marketing. Under the direction of faculty, each student will identify a specific application in Arts Management to test that package.

Prerequisite(s): AMGT 525 or permission of program director.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 1
When Offered: Fall, Summer, Spring.
AMGT 527 - Selected Readings for PR and Marketing in the Arts

Credits: 1 (NR)
Introduces students to the intellectual foundations of the practice of PR and Marketing as well as providing an opportunity to think critically about the field as it relates specifically to the arts. Considers ethical practices and professional responsibilities of professional arts managers working in this specialty.

Prerequisite(s): Admission to Arts Management program or permission of program director.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0
When Offered: Fall, Summer, Spring.

AMGT 545 - Introduction to Technology for Programming and Project Management in the Arts

Credits: 1 (NR)
Introduces students to software packages current in Project Management and demonstrates their value for specific applications in Arts Management. Students also will learn about the direct costs, licensing, infrastructure, and advanced training necessary for effectively managing these resources. This course may be taken alone or with AMGT 546.

Prerequisite(s): Admission to Arts Management program or permission of program director.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0
When Offered: Fall, Summer, Spring.

AMGT 546 - Applied Technology Projects for Programming and Project Management in the Arts

Credits: 1 (NR)
Allows students to employ and expand their knowledge of one software package current in Project Management. Under the direction of faculty, each student will identify a specific application in Arts Management to test that package.

Prerequisite(s): AMGT 545 or permission of program director.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 1
When Offered: Fall, Summer, Spring.

AMGT 547 - Selected Readings for Programming and Project Management in the Arts

Credits: 1 (NR)
Introduces students to the intellectual foundations of the practice of Programming and Project Management and provides an
opportunity to think critically about the field as it relates specifically to the arts. Students will consider ethical practices and professional responsibilities of professional arts managers working in this specialty.

Prerequisite(s): Admission to Arts Management program or permission of program director.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0
When Offered: Fall, Summer, Spring.

AMGT 555 - Introduction to Technology for Fundraising and Development in the Arts

Credits: 1 (NR)
Introduces students to software packages current in Fundraising and Development and demonstrates their value for specific applications in Arts Management. Students also will learn about the direct costs, licensing, infrastructure, and advanced training necessary for effectively managing these resources. This course may be taken alone or with AMGT 556.

Prerequisite(s): Admission to Arts Management program or permission of program director.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0
When Offered: Fall, Summer, Spring.

AMGT 556 - Applied Technology Projects for Fundraising and Development in the Arts

Credits: 1 (NR)
Allows students to employ and expand their knowledge of one software package current in Fundraising and Development. Under the direction of faculty, each student will identify a specific application in Arts Management to test that package.

Prerequisite(s): AMGT 555 or permission of program director.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 1
When Offered: Fall, Summer, Spring.

AMGT 557 - Selected Readings for Fundraising and Development in the Arts

Credits: 1 (NR)
Introduces students to the intellectual foundations of the practice of Fundraising and Development and provides an opportunity to think critically about the field as it relates specifically to the arts. Considers ethical practices and professional responsibilities of professional arts managers working in this specialty.

Prerequisite(s): Selected Readings for Fundraising and Development in the Arts.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0
When Offered: Fall, Summer, Spring.
AMGT 599 - Special Topics in Arts Management

Credits: 1-6 (RD)
Provides opportunity to explore special and timely topics in arts management including theoretical and applied areas. Topics and credit vary; may be repeated for up to 12 credits taken under different topics.

Prerequisite(s): Admission to Arts Management program or permission of program director.

Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring, Summer

AMGT 601 - Fund Raising/Development I

Credits: 3 (NR)
Overview for students seeking general knowledge, as well as introductory course for those who will complete the fund-raising concentration. Teaches role of fund raising as management function and part of overall strategic intention of arts organizations, presenting fund raising as a multifaceted, team-based process. Analyzes tools and techniques for effective fund raising.

Prerequisite(s): Admission to Arts Management program or permission of program director.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

AMGT 602 - Seminar in Arts Management

Credits: 3 (NR)
Develops tools and techniques necessary for successful pursuit of a management career in visual and performing arts. Introduces wide range of arts organizations, working arts administrators, and institutional models through guest lectures, readings, field trips, and analysis of institutional data. Students gain understanding of organizational structures and functions, as well as models for general management.

Prerequisite(s): Admission to Arts Management program or permission of program director.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring, Summer

AMGT 603 - Arts and Society

Credits: 3 (NR)
Examines role of visual and performing arts, with emphasis on historic traditions and trends that have most directly influenced contemporary American practice. Consideration is given to the functions of art in society in addressing questions: What
constitutes good or bad art? What is the value of art? What encouragements or impediments does our society offer to the creative artist or arts institution?

Prerequisite(s): Admission to Arts Management program or permission of program director.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring, Summer

AMGT 604 - Public Relations and Marketing Strategies for the Arts I

Credits: 3 (NR)
Teaches strategic way of thinking about audience, community, and markets. Structured into four modules, beginning with fundamentals of strategic planning. Students learn about external and internal environments and the interplay among them; discuss marketing fundamentals pertaining to arts audiences; and are introduced to fundamentals of applied marketing media and advertising fundamentals.

Prerequisite(s): Admission to Arts Management program or permission of program director.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring, Summer

AMGT 606 - Board of Directors Management

Credits: 3 (NR)
Board development including oversight and management of a board, as well as understanding board functions. Board relationships, including volunteers, are essential through all of the stages of a management career.

Prerequisite(s): Admission to Arts Management program or permission of program director.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

AMGT 607 - Fund Raising/Development II

Credits: 3 (NR)
Students focus on two active arts organizations and create a development plan and various proposals specifically geared to their situations. Course focuses on practical application of development principles, writing and communications skills, and strategic thinking and planning.

Prerequisite(s): AMGT 601 or permission of program director.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring, Summer
AMGT 608 - Public Relations and Marketing Strategies for the Arts II

Credits: 3 (NR)
Conception, planning, and implementation and control of platforms to create and manage a holistic communications strategy for arts organizations. This includes management of brand, public relations, advertising and the evolving marketplace: new technologies, and theories in marketing.

Prerequisite(s): AMGT 604

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring, Summer

AMGT 609 - Facilities Management

Credits: 3 (NR)
Bridging strategic planning and marketing; audience development; financial management; and board and volunteer management with issues of scheduling, ticketing and sales, mission integration and strategic challenges of new facilities, and growth and operations of existing ones.

Prerequisite(s): Admission to Arts Management program or permission of program director.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

AMGT 610 - Gallery Management

Credits: 3 (NR)
Covers the many facets of visual art gallery management, from practical considerations of daily operations to the broader examination of gallery's role in art education, criticism, and art market. Topics such as exhibition coordination and installation, contracts, artist representation, fine art insurance, exhibition policies, budgets, and marketing are covered, along with the responsibility of educating a diverse public.

Prerequisite(s): Admission to Arts Management program or permission of program director.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

AMGT 620 - Legal Aspects in Arts Management

Credits: 3 (NR)
Overview of practical legal issues that will be encountered by arts managers of both for-profit and not-for-profit arts
organizations, including contracts, copyrights, licensing, and for-profit and non-profit incorporation.

Prerequisite(s): Admission to Arts Management program or permission of program director.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Summer, Spring.

**AMGT 630 - Viral Marketing and Social Media for the Arts**

Credits: 3 (NR)
Focuses on Internet marketing, online implementation of a marketing plan across multiple platforms, and integration between an arts organization’s online and offline marketing strategies. Covers word-of-mouth and buzz marketing; websites and blogs; and social media. Explores how to develop and implement cost effective viral marketing strategies that instill a unique branding element.

Prerequisite(s): Admission to Arts Management program or permission of program director.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Summer, Spring.

**AMGT 640 - Programming and Project Management in the Arts**

Credits: 3 (NR)
Provides both a theoretical framework for thinking about and assessing the value of various programming options and practical examples of the potential partners and resources available for program and project implementation.

Prerequisite(s): Admission to Arts Management program or permission of program director.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Summer, Spring.

**AMGT 650 - Major Gifts and Capital Campaigns**

Credits: 3 (NR)
Focuses on the art and science of identifying, cultivating, soliciting and stewarding major gift and capital campaign prospects and donors and how these efforts differ from annual fundraising. Highlights the "values exchange" model of development and fundraising.

Prerequisite(s): AMGT 601 or permission of the program director.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Summer, Spring.
AMGT 704 - Finance and Budgeting for Arts I

Credits: 3 (NR)
Introduces budget and finance as fundamentals of the budget process, specifically tailored to needs of arts organizations. Provides overview of accounting as tool to manage and control arts organizations. Involves laboratory component for teaching software application frequently encountered in fiscal operation of arts organizations.

Prerequisite(s): Admission to Arts Management program or permission of program director.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

AMGT 705 - Finance and Budgeting for Arts II

Credits: 2 (NR)
Introduces budgeting, planning, and finance as fundamentals of the strategic planning process and management control, specifically tailored to the needs of arts organizations.

Prerequisite(s): AMGT 704

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring, Summer

AMGT 706 - Festivals and Special Events

Credits: 3 (NR)
Technical aspects of events and festival management. Topics may include cultural understanding, tourism, sponsorship, fund raising and development, logistics of scheduling and contracts, and the relationship to larger venues, marketing and sales, and budgeting.

Prerequisite(s): Admission to Arts Management program or permission of program director.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring, Summer

AMGT 710 - Arts Policy

Credits: 3 (NR)
Reviews current state of the sector, familiarizing students with most common rationales for public support of the arts and respective roles of federal, state, and local governments and private policy actors. Examines dilemmas that arts organizations face in balancing need for government support and artistic integrity with push and pull of the market. Compares U.S. policies to other
developed countries.

**Prerequisite(s):** AMGT 602 and AMGT 603.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall, Spring, Summer

### AMGT 711 - Directed Readings and Project

Credits: 1-6 (RD)

Opportunity to engage in a more intensive study or project in arts management. Students partner with faculty member for intensive readings and project in strategy and planning in the arts, fundraising and development, entrepreneurial project work, arts marketing, arts policy and law, or other specialized areas pertinent to arts administration.

**Prerequisite(s):** Admission to Arts Management program or permission of program director.

**Hours of Lecture or Seminar per week:** 1-6  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall, Spring, Summer

### AMGT 712 - Grant Writing in the Arts

Credits: 3 (NR)

Places components of grant writing process within broader context of nonprofit management. Introduction to perspectives of grant seeker and maker. The grant writing process: research, proposal writing, terminology, oral and written techniques, and specific focus. Discover resources and compelling writing skills pertaining to proposal and letters of intent.

**Prerequisite(s):** Admission to Arts Management program or permission of program director.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall, Spring, Summer

### AMGT 740 - Internal Internship

Credits: 2 (NR)

Builds on apprenticeship as a core means of teaching applied concepts of arts management. Augments use of Center of the Arts and active arts environment, both performing and visual, as a learning laboratory. Builds on practical learning and provides internal training as preparation for external internship. Minimum 42 hours/credit.

**Prerequisite(s):** Admission to Arts Management program or permission of program director. 9-credit standing.

**Notes:** 9 credits taken within the master in arts management program; or permission of program director. Required for developing practical application.
AMGT 750 - Arts Entrepreneurship I

Credits: 3 (NR)
Lecture course in discovering and developing entrepreneurial skills in the artist. Includes presentations, lectures, and meetings with successful art and non-art entrepreneurs in the region. Students will conceive, develop, and present a for-profit or not-for-profit business plan strategy; which includes model(s), market overview, management structure, along with revenue streams, an acquisition strategy, and technical and information technology strategies.

Prerequisite(s): AMGT 705.

Notes: The semester concludes with a 15- to 20-minute public presentation of the business plan summary before a panel of entrepreneurs and business and nonprofit managers.

AMGT 751 - Arts Entrepreneurship II

Credits: 3 (NR)
Advanced lecture course in discovering and developing entrepreneurial skills in the artist. Special focus on developing business financial planning skills, funding strategy, and marketing and sales of the arts. Course includes presentations, lectures, and meetings with successful entrepreneurs in the region. Students will conceive, develop, and present statements and projections consistent with the development of a business plan.

Prerequisite(s): AMGT 750 or permission of program director.

AMGT 760 - Current Issues in Arts Management

Credits: 3 (NR)
Strategic decision making within the complex web of social, political, economic, personal, and ethical dimensions. Analysis of cases, using learned skills in planning, financial and strategic analysis, human resource allocation, and fundraising.

Prerequisite(s): Admission to Arts Management program, 9-credit standing; or permission of program director.
AMGT 780 - Arts Consultancy

Credits: 3 (NR)
Studies techniques, frameworks for selecting and using consultants effectively. Incorporates business development, project scope, contract and pricing, and independent contractor as opportunities in arts management field.

Prerequisite(s): Admission to Arts Management program or permission of program director.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring, Summer

AMGT 790 - External Internship

Credits: 1-4 (RD)
Designed to follow internal internship. Provides a specific work environment to build on skills developed in the classroom and integrates work experience with specific academic exercises. Students advised to pursue a three-pronged approach toward specialization: electives; internal internship in the same area as concentrated electives; and external internship consistent with specialized course work and internal internship. Minimum 42 hours/credit.

Prerequisite(s): Admission to Arts Management program, 15 credit standing; or permission of program director.

Notes: 15 credits taken within the master in arts management program; or permission of program director. Required for developing practical application.

Hours of Lecture or Seminar per week: 3-6
Hours of Lab or Studio per week: 6-12
When Offered: Fall, Spring, Summer

AMGT 795 - Capstone in Arts Management

Credits: 1 (NR)
Required in order to complete the MA AMGT degree. Provides students with the opportunity to deepen, expand, and demonstrate mastery of one area of arts management expertise. Builds on work undertaken in a completed AMGT course or internship. Faculty will provide guidance and approve capstone topics. The capstone is a required one-credit course. Students may register for the capstone after having completed all core course requirements for the MA AMGT degree.

Prerequisite(s): Students may register for the capstone after having completed all core course requirements for the MA AMGT degree.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0
Grading: Satisfactory/No Credit
When Offered: Fall, Spring.
Assistive Technology (EDAT)

EDAT 410 - Introduction to Assistive Technology

Credits: 3 (NR)
Provides an understanding of assistive technology and application in instructional programs, career tasks, and life skills for individuals with disabilities. Presentation and exploration experiences enable students to better use assistive technology in education, work, community, and home environments.

Equivalent to EDIT 410 (2012-2013 Catalog).

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Summer, Spring

EDAT 421 - Augmentative Communication

Credits: 3 (NR)
Provides an overview of augmentative and alternative communication tools for use by individuals with speech and communication disabilities. Exploration experiences enable students to locate, use and train others on the range of AAC technologies available. Field experience may be required.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Summer, Spring

EDAT 422 - Assistive Technology for Individuals with Sensory Impairments

Credits: 3 (NR)
Provides an overview of specific technology and resources available to enhance and improve the ability of individuals who are visually impaired/blind or hearing-impaired/deaf. Field experience may be required.

Equivalent to EDIT 412 (2012-2013 Catalog)

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Summer, Spring

EDAT 423 - Accessibility and Input Modifications
Credits: 3 (NR)
Provides an overview of accessibility strategies and input modifications designed for use by individuals with disabilities. Exploration experiences enable students to locate, use and train others on the range of technologies available as well as design opportunities for constructing unique devices. Field experience may be required.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Summer, Spring

**EDAT 510 - Introduction to Assistive Technology**

Credits: 3 (NR)
Provides an understanding of assistive technology and application in instructional programs, career tasks, and life skills for individuals with disabilities. Presentation and exploration experiences enable students to better use assistive technology in education, work, community, and home environments.

Equivalent to EDSE 510 (2012-2013 Catalog); EDIT 510 (2012-2013 Catalog).

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Summer, Spring

**EDAT 521 - Augmentative Communication**

Credits: 3 (NR)
Provides an overview of augmentative and alternative communication tools for use by individuals with speech and communication disabilities. Exploration experiences enable students to locate, use and train others on the range of AAC technologies available. Field experience may be required.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Summer, Spring

**EDAT 522 - Assistive Technology for Individuals with Sensory Impairments**

Credits: 3 (NR)
Provides an overview of specific technology and resources available to enhance and improve the ability of individuals who are visually impaired/blind or hearing-impaired/deaf. Field experience may be required.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Summer, Spring

**EDAT 523 - Accessibility and Input Modifications**
Provides an overview of accessibility strategies and input modifications designed for use by individuals with disabilities. Exploration experiences enable students to locate, use and train others on the range of technologies available as well as design opportunities for constructing unique devices. Field experience may be required.

EDAT 524 - Universal Design for Learning

Credits: 3 (NR)
Describes the foundations and principles of Universal Design for Learning (UDL). Focuses on teaching students with various disabilities, including those with learning disabilities from preschool to postsecondary education implementing software and other UDL strategies. Students have the opportunity to develop and implement ULD lesson plans. Field experience may be required.

EDAT 525 - Software and Mobile Applications for Individuals with Disabilities

Credits: 3 (NR)
Provides overview with software, mobile applications, and accessibility features. Identifies design features to meet individual’s special needs; provides hands-on experiences with the range of software and mobile applications that incorporate evidence-based strategies for individuals with disabilities across environments, settings and the life span. Field experience may be required.

EDAT 530 - Assistive Technology for Independent Living

Credits: 3 (NR)
Provides an overview of activities of daily living (ADLs) for individuals who have disabilities and the elderly. ADLs include but are not limited to assistive technologies that support dressing, feeding, hygiene, housework and safety. Field experience may be required.

EDAT 531 - Assistive Technology in the Workplace
Credits: 3 (NR)
Provides an overview of workplace accommodations, functional barriers commonly experienced in the workplace, assistive technology, ergonomic strategies, and universal design approaches to improve performance of work activities for individuals with disabilities, including but not limited to mobility, dexterity, sensory, communication, and cognitive impairments. Field experience may be required.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall, Summer, Spring

**EDAT 597 - Special Topics in Assistive Technology**

Credits: 1-6 (RT)
Provides advanced study on selected topic or emerging issue in assistive technology.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall, Summer, Spring

**EDAT 599 - Independent Study in Assistive Technology**

Credits: 1-6 (RT)
Studies assistive technology research, theory, or practice under direction of faculty member.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall, Summer, Spring

**EDAT 610 - Designing Adapted Environments**

Credits: 3 (NR)
Provides an overview of environmental adaptations for individuals with disabilities to increase their access to community, workplace, and school activities. Covers legal issues within the ADA for adapting environments and addresses programmatic and physical access issues. Field experience is required.

**Prerequisite(s):** EDAT 510.  
**Notes:** Field Experience required.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall, Summer, Spring

**EDAT 649 - Assistive Technology Assessment**
Credits: 3 (NR)
Provides an overview of AT consideration and assessment procedures with emphasis on generated assessment plan and written report. Review and administer existing assistive technology (AT) evaluation instruments. Field experiences required.

Prerequisite(s): EDAT 510.

Notes: Field Experience required.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Summer, Spring

Astronomy (ASTR)

Offered by the College of Science

ASTR 103 - Astronomy

Credits: 3 (NR)
Introduction to origin of life, Earth, planets and sun, stars, galaxies, quasars, nature of space radiation, and general theory of relativity.

Fulfills general education requirement in natural science (nonlab).

Notes: Not for physics majors.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ASTR 111 - Introductory Astronomy: The Solar System

Credits: 3 (NR)
Topics include history of astronomy, evolution of the solar system, properties of planets, scientific method, critical thinking, nature of light, and principles of telescope design.

Fulfills general education requirement in natural science (lab).

Notes: ASTR 111 and 112 can be used to fulfill a 4-credit lab science requirement; not for physics majors.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ASTR 112 - Introductory Astronomy Lab: The Solar System
Credits: 1 (NR)
Laboratory course associated with ASTR 111.

Fulfills general education requirement in natural science (lab).

Notes: ASTR 111 and 112 can be used to fulfill a 4-credit lab science requirement; not for physics majors.

Hours of Lecture or Seminar per week: 1-12
Hours of Lab or Studio per week: 3

ASTR 113 - Introductory Astronomy: Stars, Galaxies, and the Universe

Credits: 3 (NR)
Topics include electromagnetic radiation, stellar evolution, interstellar medium, galaxies, cosmology, scientific method, and critical thinking.

Fulfills general education requirement in natural science (lab).

Notes: ASTR 113 and 114 can be used to fulfill a 4-credit lab science requirement; not for physics majors.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ASTR 114 - Introductory Astronomy Lab: Stars, Galaxies, and the Universe

Credits: 1 (NR)
Laboratory course associated with ASTR 113.

Fulfills general education requirement in natural science (lab).

Notes: ASTR 113 and 114 can be used to fulfill a 4-credit lab science requirement; not for physics majors.

Hours of Lecture or Seminar per week: 1-12
Hours of Lab or Studio per week: 3

ASTR 115 - Finding New Worlds

Credits: 4 (NR)
Topics include the search for planets outside the solar system, and new developments in the theory of solar system formation with an emphasis on student-led investigation using public data sources.

Fulfills general education requirement in natural science (lab).

Notes: ASTR 115 can be used to fulfill a 4-credit lab science requirement; not for physics majors.

Hours of Lecture or Seminar per week: 3
ASTR 210 - Introduction to Astrophysics

Credits: 3 (NR)
Introduction to astrophysics for scientists. Topics include astronomical measurement, celestial mechanics, electromagnetic radiation, stellar structure and evolution, the interstellar medium, galaxies, and a selection of topics at the forefront of astrophysics including space physics, exoplanets, galaxies, and cosmology.

Corequisite(s): PHYS 262.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring

ASTR 301 - Astrobiology

Credits: 3 (NR)
Physical science perspective on origin and evolution of life on Earth and how life, in turn, has significantly influenced Earth's evolution. Topics include origin of Earth, mechanisms and sites for origin of life, co-evolution of life and Earth's atmosphere, habitability of planets, and the search for extraterrestrial life.

Prerequisite(s): MATH 108 or 113.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ASTR 302 - Foundations of Cosmological Thought

Credits: 3 (NR)
Examines scientific, historical, and philosophical foundations and development of cosmological thought from antiquity to the present. Emphasizes qualitative understanding of the development of cosmology concluding with the present concept of origin and evolution of universe.

Fulfills general education requirement in natural science (nonlab).

Notes: No advanced background in mathematics or natural sciences required.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ASTR 328 - Stars and Interstellar Medium
Credits: 3 (NR)
Stellar structure and evolution; radiative transfer; the interstellar medium. The course includes computational work. Previous programming experience is not required, as it will be developed in the course, but it is helpful.

Equivalent to PHYS 328.

Prerequisite(s): ASTR 210, PHYS 262.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**ASTR 390 - Topics in Astronomy**

Credits: 1-4 (RT)
Selected topics not covered in fixed-content courses.

Notes: May not be included for credit by physics majors in the 45 credits of physics courses required for BS degree, or in 31 credits of physics courses required for BA degree.

Hours of Lecture or Seminar per week: 1-4
Hours of Lab or Studio per week: 0

**ASTR 401 - Computer Simulation in Astronomy**

Credits: 3 (NR)
Techniques and methods to simulate astronomical phenomena using a computer. Examples taken from a wide variety of astronomical phenomena, including radiation transfer in astrophysical objects, self-gravitating systems, hydrodynamics, and stellar models.

Prerequisite(s): ASTR 210.

Notes: Emphasizes hands-on projects.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**ASTR 402 - Methods of Observational Astronomy**

Credits: 4 (NR)
An introduction to the observational, statistical, and computational techniques used by observational astronomers. The course covers some of the basic skills needed to pursue a career in astronomy and is designed around preparing for and executing an observational research project. Fulfills writing intensive requirement in the major.

Fulfills writing intensive requirement in the major.

Designated as a research and scholarship intensive course.
Prerequisite(s): ASTR 210.

Notes: This course meets the writing-intensive requirement.

Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 3

**ASTR 403 - Planetary Sciences**

Credits: 3 (NR)  
Introduction to the physics and chemistry of planets and their natural satellites, asteroids, and comets. Topics include history of the solar system; origin and evolution of planets, their internal structure and atmospheres; and analytical techniques used in remote and in situ study.

Prerequisite(s): ASTR 210, PHYS 262.

Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0

**ASTR 404 - Galaxies and Cosmology**

Credits: 3 (NR)  
The structure of the Milky Way as the basis for our knowledge of galaxies; the properties of galaxies from our local neighborhood out to the youngest galaxies in the far distant universe; observational and theoretical approaches to the structure and evolution of galaxies; the basics of cosmology and the formation of structure in the universe. Computational tools introduced in ASTR 328 are developed further.

Prerequisite(s): ASTR 328.

Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0

**ASTR 405 - Honors Thesis in Astronomy I**

Credits: 3 (NR)  
Project chosen and completed under the guidance of a faculty member, resulting in a written thesis. An oral progress report is required for ASTR 405.

Prerequisite(s): 21 credit hours in Physics and Astronomy and acceptance into the astronomy honors program.

Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0

**ASTR 406 - Honors Thesis in Astronomy II**
Credits: 3 (NR)
Project chosen and completed under the guidance of a faculty member, resulting in a written thesis. An oral progress report is required for ASTR 406.

**Prerequisite(s):** ASTR 405 and 21 credit hours in Physics and Astronomy and acceptance into the astronomy honors program.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

### ASTR 408 - Senior Research

Credits: 3 (RD)
Independent work under guidance of faculty member on research project in experimental, observational, or theoretical astronomy.

**Prerequisite(s):** 15 credits of ASTR courses.

**Notes:** Students may not receive more than 6 credits of ASTR 408 and 409. Written report on project required. May be taken twice with department permission.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

### ASTR 409 - Astronomy Internship

Credits: 3 (NR)
On-the-job experience for astronomy majors in industry or government laboratories, including summer research programs. Students work in observational, experimental, or theoretical astronomy, and prepare written report at end of internship.

**Prerequisite(s):** 75 credits, 15 ASTR credits, and permission of department.

**Notes:** See department for other requirements and application procedure prior to enrollment. Students may not receive more than 6 credits of ASTR 408 and 409.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

### ASTR 532 - Phys Interplanetary Med

Credits: 3 (NR)

**Prerequisite(s):** PHYS 303, 305, 308; MATH 214.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0
**ASTR 535 - Space Instrumentation and Exploration**

Credits: 3 (NR)
Survey of instruments, devices, and methods for space and planetary exploration, including remote sensing of Earth and other solar system bodies, and planned manned and unmanned missions by the United States and other countries.

Equivalent to CSI 660

Prerequisite(s): PHYS 262 and MATH 213.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**ASTR 590 - Selected Topics in Astronomy and Astrophysics**

Credits: 1-6 (RD)
Advanced topics from recent theoretical or observational developments and their applications. Satisfies needs of professional community to keep abreast of current developments.

Prerequisite(s): Permission of instructor.

Hours of Lecture or Seminar per week: 0-6
Hours of Lab or Studio per week: 0

**ASTR 602 - Methods of Observational Astronomy**

Credits: 4 (NR)
An introduction to the observational, statistical, and computational techniques used by observational astronomers. The course covers some of the basic skills needed to pursue a career in astronomy and is designed around preparing for and executing an observational research project.

Hours of Lecture or Seminar per week: 4
Hours of Lab or Studio per week: 0
When Offered: Spring

**ASTR 603 - Planetary Sciences**

Credits: 3 (NR)
Equivalent to ASTR 703 (2010-2011 Catalog)

Prerequisite(s): MATH 213 and PHYS 262

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
**ASTR 604 - Galaxies and Cosmology**

Credits: 3 (NR)
The structure of the Milky Way as the basis for our knowledge of galaxies; the properties of galaxies from our local neighborhood out to the youngest galaxies in the far distant universe; observational and theoretical approaches to the structure and evolution of galaxies; the basics of cosmology and the formation of structure in the universe.

Prerequisite(s): ASTR 328 and MATH 214.

Corequisite(s): PHYS 308.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring

**ASTR 628 - Relativity**

Credits: 3 (NR)
Equivalent to ASTR 766 (2010-2011 Catalog)

Prerequisite(s): MATH 214, PHYS 262, 303, 305.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring

**ASTR 660 - Plasma Physics for Space and Astrophysics**

Credits: 3 (NR)
Equivalent to PHYS 660

Prerequisite(s): PHYS 305

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

**ASTR 680 - Physics of Interstellar Media**

Credits: 3 (NR)
Physical processes in the interstellar media. Topics include the production and transfer of radiation, ionization and recombination, atomic and molecular excitation, dust physics, gas heating and cooling, and star formation.

Prerequisite(s): PHYS 402 or permission of instructor.
ASTR 730 - Stellar Astrophysics

Credits: 3 (NR)
Survey of contemporary astrophysics. Topics include physical concepts, stellar spectra, Hertzsprung-Russell diagram, stellar atmospheres, stellar structure, interstellar matter, stellar evolution, high-energy phenomena, hydrodynamical processes in astrophysics, accretion disk formation, and shock formation.

Equivalent to ASTR 530 (2010-2011 Catalog)

Prerequisite(s): MATH 214, PHYS 303, 305, 308.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring

ASTR 761 - N-Body Methods and Part Sim

Credits: 3 (NR)
Covers particle methods to solve variety of physical systems. Emphasizes study and development of numerical results, and visualization of these results in complex physical systems. Applications and projects include stellar and galaxy dynamics, smoothed particle hydrodynamics, plasma simulations, and semiconductor device theory algorithms on parallel and vectorized systems.

Equivalent to CSI 761

Prerequisite(s): PHYS 613 and CSI 717 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ASTR 764 - Computational Astrophysics

Credits: 3 (NR)
Covers statistical mechanics concepts important in astrophysics. Presents unified approach to particle acceleration and interaction theory based on analytical and numerical analysis of Boltzmann and Liouville equations. Discusses computational methods relevant to particle transport problems, with emphasis on Fokker-lanck and Monte Carlo solution techniques. Applications from space sciences include studies of cosmic ray acceleration, photon comptonization, particle transport in the near-Earth environment, energy transport in stellar atmospheres, and self-gravitating system dynamics.

Equivalent to CSI 764

Prerequisite(s): ASTR 530, or permission of instructor.
ASTR 765 - High-Energy and Accretion Astrophysics

Credits: 3 (NR)
Overview of the field of atomic and nuclear physics, including nuclear reactions of use to high-energy astrophysics. Discusses radiation processes in cosmic plasmas emphasizing quantum mechanical calculations; stellar evolution and nucleosynthesis; computational models of stellar evolution; binary stars and accretion disks; numerical models of the structure of accretion disks; compact stars, white dwarfs, neutron stars, and black holes; acceleration processes and cosmic rays; interstellar medium and propagation of cosmic rays; high-energy processes in the center of galaxies; and ground- and space-based techniques and observations.

Equivalent to CSI 765

Prerequisite(s): PHYS 502 and 513, and ASTR 530; or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ASTR 769 - Topics in Space Sciences

Credits: 3 (NR)
Selected topics in space sciences not covered in fixed-content space sciences courses.

Equivalent to CSI 769

Prerequisite(s): Permission of instructor.

Notes: May be repeated for credit as needed.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ASTR 790 - Advanced Topics in Astronomy and Astrophysics

Credits: 1-6 (RD)
Advanced topics from recent theoretical or observational developments and applications.

Prerequisite(s): Graduate standing and permission of instructor.

Notes: Satisfies need of professional community to keep abreast of current developments.

Hours of Lecture or Seminar per week: 0-6
Hours of Lab or Studio per week: 0
ASTR 796 - Directed Reading and Research

Credits: 1-6 (RD)
Reading and research on a specific topic in astronomy, astrophysics, or related field under direction of faculty member.

Prerequisite(s): Admission to master's program and permission of instructor.

Notes: May be repeated as needed.

Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 0

ASTR 798 - Research Project

Credits: 3 (NR)
Research project chosen and completed under guidance of graduate faculty member resulting in an acceptable technical report.

Prerequisite(s): 9 credits and permission of instructor.

Notes: May not be repeated.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0
Grading: Satisfactory/No credit only

ASTR 799 - Master's Thesis

Credits: 1-6 (RD)
Research project chosen and completed under guidance of graduate faculty member resulting in acceptable technical report and oral defense acceptable to three-faculty-member thesis committee.

Prerequisite(s): 9 credits, and permission of instructor.

Notes: May not be repeated.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0
Grading: Satisfactory/No credit only

ASTR 998 - Doctoral Dissertation Proposal

Credits: 1-12 (RD)
Covers development of a research proposal under the guidance of a dissertation director and the doctoral committee. The proposal forms the basis for the doctoral dissertation.

Prerequisite(s): Admission to physics doctoral program and permission of advisor.
ASTR 999 - Doctoral Dissertation

Credits: 1-12 (RD)
Doctoral research performed under direction of dissertation director.

Prerequisite(s): Admission to doctoral candidacy in physics doctoral program and permission of advisor.

Notes: May be repeated as needed; however, no more than 24 credits in ASTR/PHYS 998 and ASTR/PHYS 999 may be applied toward satisfying doctoral degree requirements in the physics PhD program.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0
Grading: S/IP

Athletic Training (ATEP)

Offered by the College of Education and Human Development

ATEP 150 - Introduction to Athletic Training and Preventative Care Techniques

Credits: 3 (NR)
Introduces the profession of athletic training and the basic principles of preventative care commonly used in the profession. Topics will include athletic training facility organization and procedures; protective sports equipment; construction of protective devices; and application of protective taping, braces, wrapping, and protective pads. Areas to be studied include the role of the athletic trainer in sports medicine, mechanisms of athletic injuries, tissue response to injury, blood-borne pathogens, introductory techniques of the assessment and evaluation of athletic injuries and emergency procedures.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 2

ATEP 180 - Emergency Medical Care for Physically Active Populations

Credits: 0-4 (NR)
An investigation of the scientific and philosophical foundations of pre-hospital emergency care principles pertinent to a physically active population. Students develop knowledge, critical thinking, and problem solving skills necessary to correctly apply emergency care principles and associated skills in a variety of clinical and professional settings. Upon successful
completion of this course, the student will earn Emergency Cardiac Care (ECC) and First Aid certifications.

Prerequisite(s): BIOL 124

Corequisite(s): BIOL 125

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 1

ATEP 201 - Medical and Scientific Terminology

Credits: 3 (NR)
Foundations of scientific and medical vocabulary including prefixes, suffixes and stems used to form compound words.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring, Summer

ATEP 203 - Prevention, Recognition, and Management of Athletic and Fitness Related Injuries

Credits: 3 (NR)
Provides coaches and fitness professionals with theory on the prevention, recognition, and management of injuries and conditions that occur in athletic competition and recreational fitness activities.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring, Summer

ATEP 205 - Cultural Competence

Credits: 3 (NR)
Explores cultural competence and its integration for effective professional practice. Includes communication styles, daily living practices, common sensitivities, self-awareness, and historical cultural implications in multicultural environments.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

ATEP 250 - Physical Assessment of the Lower Body

Credits: 3 (NR)
An analysis of the principles of physical assessment of the lower body.
Prerequisite(s): ATEP 150, 180; BIOL 124, 125; HEAL 110; PHED 300

Corequisite(s): Concurrently enrolled in ATEP 255, ATEP 256

Notes: Formal acceptance to the professional phase of the ATEP.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ATEP 255 - Clinical Techniques I: Physical Assessment of the Lower Body

Credits: 3 (NR)
An analysis of physical assessment clinical techniques of the lower body (including the lower extremity and abdomen).

Prerequisite(s): ATEP 150, ATEP 180, BIOL 124, BIOL 125, HEAL 110, and PHED 300

Corequisite(s): Concurrently enrolled in ATEP 250 and ATEP 256

Notes: Formal acceptance to the professional phase of the ATEP.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ATEP 256 - Practicum I: Physical Assessment of the Lower Body

Credits: 3 (NR)
A clinical practicum filed experience under the direct supervision of an Approved Clinical Instructor (ACI) with emphasis on physical assessment of the lower body.

Prerequisite(s): ATEP 150, 180; BIOL 124, 125; HEAL 110; and PHED 300

Corequisite(s): Concurrently enrolled in ATEP 250 and 255

Notes: Formal acceptance to professional phase of the ATEP; Current Emergency Cardiac Care (ECC) Certification.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ATEP 260 - Physical Assessment of the Upper Body

Credits: 3 (NR)
An analysis of the principles of physical assessment of the upper body.

Prerequisite(s): ATEP 150, 180, 250, 255, 256; BIOL 124, 125; HEAL 110; PHED 300

Corequisite(s): Concurrently enrolled in ATEP 265, ATEP 266
**ATEP 265 - Clinical Techniques II: Physical Assessment of the Upper Body**

Credits: 3 (NR)
An analysis of physical assessment clinical techniques of the upper body (including the upper extremity, head, and neck).

**Prerequisite(s):** ATEP 150, 180, 250, 255, 256; BIOL 124, 125; HEAL 110; and PHED 300

**Corequisite(s):** ATEP 260, 266

**Notes:** Formal acceptance to the professional phase of the ATEP

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**ATEP 266 - Practicum II: Physical Assessment of the Upper Body**

Credits: 3 (NR)
A clinical practicum field experience under the direct supervision of an Approved Clinical Instructor (ACI) with emphasis on physical assessment of the upper body.

**Prerequisite(s):** ATEP 150, 180, 250, 255, 256, BIOL 124, BIOL 125, HEAL 110, and PHED 300

**Corequisite(s):** ATEP 260 and 265

**Notes:** Formal acceptance to the professional phase of the ATEP; Emergency Cardiac Care (ECC) Certification

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**ATEP 270 - General Medical Conditions and Pharmacology in Physically Active Populations**

Credits: 3 (NR)
An examination of assessment and management techniques of general medical conditions and pharmacological principles in physically active populations.

**Prerequisite(s):** ATEP 150 and 180; BIOL 124 and 125; HEAL 110 and 230; PHED 300

**Notes:** Formal acceptance to the professional phase of the ATEP

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0
ATEP 300 - Functional Anatomy

Credits: 3 (NR)
Increase students' knowledge and exposure to the structural and functional components of human anatomy including musculoskeletal origins, insertions, actions and innervations.

Equivalent to KINE 300 (2012-2013 Catalog)

Prerequisite(s): BIOL 124.

Corequisite(s): BIOL 125.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 1
When Offered: Fall, Summer, Spring.

ATEP 350 - Therapeutic Interventions I

Credits: 3 (NR)
Integrates the use of therapeutic modalities and rehabilitation in the treatment of injuries and conditions including indications, contraindications, physiological effects, special programs, and resistance methods used with therapeutic modalities and prevention/rehabilitation methods.

Prerequisite(s): Formal acceptance to the professional phase of the ATEP; ATEP 150, 180, 250, 255, 256, 260, 265, 266, 270, 300; BIOL 124, 125; HEAL 110, 230; KINE 310; and, current Emergency Cardiac Care (EEC) certification.

Corequisite(s): Concurrently enrolled in ATEP 355 and 356.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

ATEP 355 - Clinical Techniques III: Therapeutic Interventions I

Credits: 3 (NR)
An examination of the scientific theory and standard operating procedures necessary for the safe application of therapeutic modalities in a physically active patient population.

Prerequisite(s): Formal acceptance to the professional phase of the ATEP; ATEP 150, 180, 250, 255, 256, 260, 265, 266, 270, 300; BIOL 124, 125; HEAL 110, 230; KINE 310; and, current Emergency Cardiac Care (EEC) certification.

Corequisite(s): ATEP 350 and 356

Notes: Formal acceptance to the professional phase of the ATEP

Hours of Lecture or Seminar per week: 3
ATEP 356 - Practicum III: Therapeutic Modalities

Credits: 3 (NR)
A clinical practicum field experience under the direct supervision of an Approved Clinical Instructor (ACI) with emphasis on therapeutic modalities.

Prerequisite(s): ATEP 150, 180, 250, 255, 256, 260, 265, 266, 270; BIOL 124, 125; HEAL 110, 230; and PHED 300

Corequisite(s): ATEP 350 and 355

Notes: Formal acceptance into the professional phase of the ATEP; Current Emergency Cardiac Care (ECC) Certification

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

ATEP 360 - Therapeutic Interventions II

Credits: 3 (NR)
Integrated approach to the use of therapeutic modalities and rehabilitation in the treatment of injuries and conditions. Special consideration to specific body regions including a focus on the development, implementation, and evaluation of treatment plans.

Prerequisite(s): Formal acceptance to the professional phase of the ATEP; successful completion of ATEP 150, 180, 250, 255, 256, 260, 265, 266, 270, 300; BIOL 124, 125; HEAL 110, 230; and, current Emergency Cardiac Care (ECC) certification.

Corequisite(s): ATEP 365 and 366.

Notes: Formal acceptance into the professional phase of the ATEP.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring

ATEP 365 - Clinical Techniques IV: Therapeutic Interventions II

Credits: 3 (NR)
Application of clinical techniques and therapeutic rehabilitation methods commonly used with a physically active population.

Prerequisite(s): Formal acceptance to the professional phase of the ATEP; ATEP 150, 180, 250, 255, 256, 260, 265, 266, 270, 300; BIOL 124, 125; HEAL 110, 230; and, current Emergency Cardiac Care (ECC) certification.

Corequisite(s): ATEP 360 and 366.

Hours of Lecture or Seminar per week: 3
ATEP 366 - Practicum IV: Therapeutic Rehabilitation

Credits: 3 (NR)
A clinical practicum field experience under the direct supervision of an Approved Clinical Instructor (ACI) with emphasis on therapeutic rehabilitation.

Prerequisite(s): ATEP 150, 180, 250, 255, 256, 260, 265, 266, 270, 350, 355, 356; BIOL 124, 125; HEAL 110, 230; PHED 300 and 450

Corequisite(s): ATEP 360 and 365

Notes: Formal acceptance into the professional phase of the ATEP; Current Emergency Cardiac Care (ECC) Certification.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ATEP 441 - Senior Seminar in Athletic Training

Credits: 3 (NR)
Capstone educational experience focusing on current topics in the Athletic Training Profession and career development issues.

Prerequisite(s): ATEP 150, ATEP 180, ATEP 250, ATEP 255, ATEP 256, ATEP 260, ATEP 265, ATEP 266, ATEP 270, ATEP 350, ATEP 355, ATEP 356, ATEP 360, ATEP 365, ATEP 366, ATEP 450, ATEP 456; BIOL 124, BIOL 125; HEAL 110, HEAL 230; PHED 300, PHED 364 and PHED 450

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

ATEP 450 - Administration and Management in Athletic Training

Credits: 3 (NR)
This lecture/seminar course will focus on the professional management and administrative issues in athletic training. Organization and administration topics will include the preparation in planning, designing, developing, organizing, implementing, directing, and evaluating an athletic training health care program and facility. Current issues in athletic training related to professional conduct and practice will also be discussed.

Prerequisite(s): ATEP 150, 180, 250, 255, 256, 260, 265, 266, 270, 350, 355, 356, 360, 365, 366; BIOL 124, 125; HEAL 110, 230; PHED 300 and 450

Corequisite(s): ATEP 456

Notes: Formal acceptance into the professional phase of the ATEP.
ATEP 456 - Practicum V: Professional Integration

Credits: 6 (NR)
A clinical practicum field experience under the direct supervision of an Approved Clinical Instructor (ACI) with emphasis on professional skill integration.

Prerequisite(s): ATEP 150, 180, 250, 255, 256, 260, 265, 266, 270, 350, 355, 356, 360, 365, 366; BIOL 124, 125; HEAL 110, 230; PHED 300, 364, and 450

Corequisite(s): ATEP 450

Notes: Formal acceptance into the professional phase of the ATEP; Current Emergency Cardiac Care (ECC) Certification.

ATEP 499 - Independent Study in Athletic Training

Credits: 1-6 (RD)
Study of a topic area in athletic training research, theory, or practice under direction of a faculty member. May be repeated, but not more than 6 total credits may be earned.

Prerequisite(s): 60 credit hours and instructor approval

BA in Applied Science (BAS)

BAS 300 - Building Professional Competencies

Credits: 3 (NR)
This course serves as an orientation to the BAS degree program. Current strengths are assessed and future planning is highlighted. Core competency areas related to personal effectiveness and academic/workplace success are stressed. Introduction to the university online learning system and other available resources useful for degree completion are also emphasized.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall
Bachelor of Individualized Study (BIS)

Offered by the College of Humanities and Social Sciences

BIS 300 - Understanding Interdisciplinary Studies

Credits: 3 (NR)
Focuses on literature and issues relevant to interdisciplinary and multidisciplinary studies and the BIS program. Students explore selected topics, develop and gather feedback on individualized concentration proposals, and review BIS program requirements.

Notes: Open only to pre-BIS students and BIS majors.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

BIS 390 - The Research Process

Credits: 3 (NR)
Focuses on skills to develop a research project, find and organize relevant information, examine and critique evidence, establish criteria, and create plan to complete senior project.

Fulfills writing intensive requirement in the major.

Prerequisite(s): BIS 300 and a grade of 2.00 or above in ENGL 302/ENGH 302.

Notes: Open only to pre-BIS students and BIS majors. Students cannot receive credit for both BIS 390 and 391.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

BIS 391 - The Research Process for Honors

Credits: 3 (NR)
Focuses on skills to develop an honors-level research project, find and organize relevant information, examine and critique evidence, establish criteria, and create plan to complete Honors Senior Research Project (BIS 490). Approved research proposal required prior to registration in BIS 490.

Prerequisite(s): Acceptance to honors in the BIS major.

Notes: Students cannot receive credit for both BIS 390 and 391.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
**BIS 399 - Special Topics**

Credits: 1-3 (RT)
Selected topics reflecting interest in specialized areas.

**Prerequisite(s):** Open only to degree students in BIS.

**Notes:** May be repeated for a maximum of 6 credits when topic is different.

**Hours of Lecture or Seminar per week:** 1-3
**Hours of Lab or Studio per week:** 0

**BIS 489 - Directed Readings and Research**

Credits: 1-3 (RD)
Readings and research on a topic directly relevant to student's core concentration.

**Notes:** Open only to pre-BIS students and BIS majors. Individualized sections by arrangement. Guided by instructor with expertise. Topics must be approved by instructor and BIS director prior to enrollment.

**Hours of Lecture or Seminar per week:** 1-3
**Hours of Lab or Studio per week:** 0

**BIS 490 - Senior Project**

Credits: 3 (NR)
Project or thesis on a topic directly relevant to student's concentration. Guided by student's faculty advisor and 490 instructor.

Fulfills general education requirement in synthesis.

Designated as a research and scholarship intensive course.

**Prerequisite(s):** BIS 390

**Corequisite(s):** BIS 491

**Notes:** Open only to BIS majors. Individualized sections for BIS honors. Capstone course in BIS core concentration. Research proposals must be approved by faculty mentor, executive committee, and BIS director prior to enrollment.

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0
**Grading:** Undergraduate Special

**BIS 491 - Senior Project Presentation**
Credits: 1 (NR)
Focuses on preparation and delivery of a formal presentation of student's BIS 490 project. Includes review of basic presentation techniques.

Prerequisite(s): BIS 390.

Corequisite(s): BIS 490.

Notes: Open only to BIS majors.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0
Grading: Undergraduate Special

BIS 495 - Career Practicum

Credits: 1-6 (RD)
Supervised experience in application of specified area.

Prerequisite(s): Permission of instructor and BIS director.

Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 0
Grading: Undergraduate Special

Biodefense (BIOD)

Offered by the College of Humanities and Social Sciences

BIOD 604 - Introduction to Biodefense I: Bacterial and Toxin Agents

Credits: 3 (NR)
Covers pathology, metabolism, and threat of bacterial agents that can be used as biological weapons.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

BIOD 605 - Introduction to Biodefense II: Viral Agents

Credits: 3 (NR)
Covers pathology, metabolism, and threat of viral agents that can be used as biological weapons.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
BIOD 607 - Introduction to Biodefense/Threat Analysis III: Toxins

Credits: 3 (NR)
Discusses the threat of toxins as biological weapons. Special focus on microbiological toxins, including botulinum toxin, and biochemical action of toxins. Comparison to chemical weapons and debate about classification as such.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

BIOD 609 - Biodefense Strategy and Policy

Credits: 3 (NR)
Introduces students to the biodefense and biosecurity strategies and policies of the United States, other nations, and international organizations. Evaluates the effectiveness of these policies in strengthening defenses, improving intelligence, increasing oversight, enhancing nonproliferation, and reinforcing norms. Examines the interaction of biodefense and biosecurity with homeland, national, and international security.

Prerequisite(s): BIOD 604 and 605 or permission of instructor.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0-6

BIOD 610 - Advanced Topics in Biodefense

Credits: 1-4 (RT)
Different topics, depending on instructor's specialty. Topics may include legal, ethical, scientific, and political aspects of biodefense, emphasizing current problems and research.

Prerequisite(s): BIOD 604 and 605 or permission of instructor.

Notes: May be repeated for a maximum of 18 credits when topic is different.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0-6

BIOD 620 - Health and Security

Credits: 3 (NR)
Explores issues emerging from the interaction of health and security that represent novel challenges to policy makers confronting a rapidly changing security landscape. Presents the major lines of discourse in the academic literature examining links between health and security. The impact of the AIDS epidemic on national and regional security, the role of health issues in post-Cold War conflict situations, and the security implications of advances in the life sciences.

Prerequisite(s): BIOD 604 and 605 or permission of instructor
BIOD 621 - Ethics and International Security

Credits: 3 (NR)
Challenges students to wrestle with dilemmas raised by the desire to behave ethically in an international system in which consensus about ethical matters is absent. Students will develop, apply, and justify their own perspective on an ethical problem related to international security using ethical theory and social science research. Ethical issues related to nuclear, biological, and chemical weapons that confront researchers, policy makers, and practitioners will be addressed.

BIOD 622 - Negotiating in the International Arena

Credits: 3 (NR)
Provides students with the concepts and tools for analyzing complex negotiation processes and introduces them to the challenges facing international negotiators. Students will read about the frameworks and perspectives that have guided the scholarly research on negotiation, as well as the latest findings from that research; analyze complex cases of actual negotiations in the security, trade, and environmental areas; and negotiate key issues on the agendas of nations and international organizations.

BIOD 705 - Intelligence: Theory and Practice

Credits: 3 (NR)
Theory and practice of intelligence, including the intelligence cycle, organization of the intelligence community, and the origins and impact of recent reforms. Examines the capabilities and limitations of the different collection disciplines, analytic methodologies and pathologies, and the relationship between intelligence and policy. Analyzes challenges posed by collecting and analyzing intelligence on weapons of mass destruction programs conducted by states and terrorists.

Prerequisite(s): BIOD 604 and 605, or permission of instructor.

BIOD 706 - Nuclear, Biological, and Chemical Weapons Policy and Security

Credits: 3 (NR)
Explores the causes, conduct, and consequences of the proliferation of nuclear, biological, and chemical weapons. Covers the historical, technological, normative, and strategic factors that have promoted and restrained the spread of these weapons.
Addresses the motives for states to develop these weapons and the debate over the security implications of nuclear, biological, and chemical weapon proliferation.

Prerequisite(s): BIOD 604 and 605, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**BIOD 709 - Nonproliferation and Arms Control**

Credits: 3 (NR)
Examines the array of national and international measures used to slow, halt, and reverse the spread of nuclear, biological, chemical, and missile weapons. Explores the theory and practice of proliferation to provide insights into the supply and demand aspects of proliferation.

Prerequisite(s): BIOD 604 and 605, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**BIOD 710 - Approaches to Bioweapon Medical Treatment and Response**

Credits: 3 (NR)
Examines research, treatment, and preparedness strategies against natural and human-made biological agents. Focuses on various strategies, including immunological, pharmaceutical, and medical treatment methodologies and designs.

Prerequisite(s): BIOD 604 and 605 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**BIOD 722 - Examining Terrorist Groups**

Credits: 3 (NR)
Introduction to terrorism including the history and evolution of terrorism, case studies of key terrorist groups, the current nature of the terrorist threat and counterterrorism strategies.

Prerequisite(s): BIOD 604 and 605, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**BIOD 723 - Legal Dimensions of Homeland Security**
Introduces the impact of legal issues on homeland security and biodefense. Topics include the origins of the Department of Homeland Security, the relationship between public health and law enforcement, the role of the military in homeland security, trade-offs between privacy and security, legal aspects of public-private cooperation in biodefense and homeland security, quarantine authority and enforcement, ensuring compliance with international treaties, and implementing biosecurity regulations.

Prerequisite(s): BIOD 604 and 605, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

BIOD 725 - Terrorism and Weapons of Mass Destruction

Credits: 3 (NR)
Examines the capabilities and intentions of terrorists to acquire and use chemical, biological, radiological, and nuclear (CBRN) weapons. The course provides an in-depth understanding of the history of CBRN terrorism, the current challenges posed by this threat, and the range of national and international policy tools available to address this threat.

Prerequisite(s): BIOD 604 and 605, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

BIOD 726 - Agroterrorism and Food Security

Credits: 3 (NR)
Analyzes the threat of agricultural terrorism, including assessments of the chemical and biological agents used to disrupt agriculture and livestock, and the national and global economic and social impacts of these disruptions. Also examines strategies for enhancing the security of the food production and supply systems.

Prerequisite(s): BIOD 604 and 605, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

BIOD 751 - Biosurveillance

Credits: 3 (NR)
Provides an understanding of the capabilities required to provide reliable early warning of disease outbreaks and identify their etiological agents. Assesses strengths and limitations of physicians, laboratories, epidemiologists, aerosol sensors, and syndromic surveillance systems. Considers challenges posed by the integration and analysis of the information collected by these sources.

Prerequisite(s): BIOD 604 and 605, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
**BIOD 752 - The Role of the Military in Homeland Security**

Credits: 3 (NR)
Analyzes the role that the armed forces play in homeland security, including historical and legal developments, the role of the National Guard, capabilities for crisis and consequence management, and case studies of military assistance to civilian authorities in response to riots, terrorist incidents, and natural disasters.

Prerequisite(s): BIOD 604 and 605, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**BIOD 760 - National Security Technology and Policy**

Credits: 3 (NR)
Introduces students to the intersection of science, technology, and policy in national security. Will examine the players in the formation of science policy; the roles they play; how the types, uncertainties, and availability of data affect science policy debates; and how science policy decisions are made. Topics to be covered include weapons of mass destruction, nonlethal weapons, nanotechnology, bioengineering, energy security, and pandemic influenza.

Prerequisite(s): BIOD 604 and 605, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**BIOD 762 - Into the Hot Zone: Working in a High Threat Environment**

Credits: 2 (NR)
Introductory course covers methodology of working in a Biosafety Level 3 or 4 environment. Special attention to responding to biowarfare or bioterrorism related event.

Prerequisite(s): BIOD 604 and 605, or permission of instructor

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 0

**BIOD 766 - Development of Vaccines and Therapeutics**

Credits: 3 (NR)
Analyzes the process of developing new medical countermeasures against biological weapons and emerging infectious diseases such as SARS and pandemic influenza. Special attention is paid to the scientific, technical, political, regulatory, and economic obstacles to developing new vaccines and therapeutics. Examines the causes and potential solutions of public and private sector failures.
Prerequisite(s): BIOD 604 and 605 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**BIOD 780 - Master's Supervised Internship**

Credits: 1-6 (RD)
Internship under supervision of qualified professional in biodefense at a government agency, consulting firm, industrial firm, or other acceptable agency.

Prerequisite(s): Permission of program director or advisor.

Hours of Lecture or Seminar per week: 1-2
Hours of Lab or Studio per week: 0
Grading: Satisfactory/No Credit.

**BIOD 790 - Biodefense Capstone**

Credits: 3 (NR)
Provides students with the opportunity to hone their research, writing, collaboration, and presentation skills through completion of a capstone project that synthesizes the theoretical and subject matter knowledge students have gained in the program.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**BIOD 793 - Directed Studies in Biodefense**

Credits: 1-3 (RD)
Individualized study of topics not otherwise available in graduate program. May involve reading assignments, tutorials, lectures, papers, presentations, or lab or field study, determined in consultation with instructor.

Prerequisite(s): Permission of the instructor and program director.

Hours of Lecture or Seminar per week: 1-4
Hours of Lab or Studio per week: 0
Grading: Graduate Special

**BIOD 810 - Advanced Seminar in Biodefense**

Credits: 3 (RT)
Explores issues of contemporary and emerging concern in biodefense and biosecurity. Topics may include legal, ethical, scientific, economic, and political aspects of biodefense and biosecurity.
Prerequisite(s): BIOD 604 and 605 or permission of adviser.

Notes: May be repeated for a maximum of 9 credits when topic is different.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**BIOD 890 - Doctoral Supervised Internship**

Credits: 1-6 (RD)
Internship under supervision of qualified biodefense professional at government agency, consulting firm, industrial firm, or other acceptable agency.

Prerequisite(s): Permission of program director or advisor.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0
Grading: Graduate Special

**BIOD 899 - Directed Research in Biodefense**

Credits: 1-12 (RD)
Research on a pertinent topic in biodefense; scope and subject determined by instructor.

Prerequisite(s): Approval of program director.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0

**BIOD 996 - Doctoral Reading and Research**

Credits: 1-9 (RD)
Independent reading and research on specific biodefense topic under faculty member's direction. Specific arrangements for designing scope and area of study to be determined in consultation with instructor. May involve literature searches and review, workshops, tutorials, or other formats.

Notes: May be repeated for credits.

Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 0
Grading: Graduate Special

**BIOD 998 - Doctoral Dissertation Proposal**
Credits: 1-12 (RD)
Development of a research proposal, which forms the basis for doctoral dissertation under guidance of dissertation director committee.

Notes: Only 12 credits may be applied to the degree.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0
Grading: S/NC

BIOD 999 - Doctoral Dissertation

Credits: 1-12 (RD)
Doctoral dissertation research under direction of dissertation chair.

Prerequisite(s): Completion of 998 and advancement to candidacy.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0
Grading: S/NC

Bioengineering (BENG)

Offered by the Volgenau School of Engineering.

Students may attempt an undergraduate course taught by the Volgenau School of Engineering twice. A third attempt requires approval of the department offering the course.

BENG 101 - Introduction to Bioengineering

Credits: 3 (NR)
Surveys the field of bioengineering and the global impact of technology innovation in solving problems in biology and medicine with an emphasis on engineering tools and concepts. Introduces mathematical modeling and analysis of bioengineering problems through the use of standard software packages for simulation. Discusses the history, ethical/social implications, and career paths in Bioengineering.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring

BENG 220 - Physical Bases of Biomedical Systems

Credits: 3 (NR)
Introduces the physical basis of biomedical systems and signals. Demonstrates basic concepts of systems and signals theory, and shows their derivation from the biophysical concepts such as mechanics, fluid mechanics, pharmacokinetics and molecular
biophysics which underlie the signals in living systems. Aims at providing the student with the mathematical and physical understanding to quantitatively describe biological systems.

**Prerequisite(s):** Grade of C or better in BENG 101, PHYS 160, and either MATH 213 or MATH 215. Prerequisite enforced by registration system.

**Corequisite(s):** MATH 214, or permission of instructor.

**Notes:** Students cannot receive credit for both BENG 220 and ECE 220.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall, Spring

### BENG 301 - Bioengineering Measurements

Credits: 3 (NR)  
Introduces the basic concepts and tools for making biomedical measurements, describes instrumentation design and analysis considerations, and discusses several practical applications.

**Prerequisite(s):** Grade of C or better in BENG 380 and BENG 320; Grade of C or better in BIOL 425 or BIOL 430 or BENG 313. Prerequisite enforced by registration system.

**Corequisite(s):** BENG 302.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Spring

### BENG 302 - Bioengineering Measurements Lab

Credits: 1 (NR)  
Provides hands-on experience with sensors and instrumentation relevant to the analysis of living systems and related processes. Biomedical measurements include electrocardiograms, electromyograms, spirometry, pulse oximetry, and glucose monitoring.

**Corequisite(s):** BENG 301

**Hours of Lecture or Seminar per week:** 0  
**Hours of Lab or Studio per week:** 3  
**When Offered:** Spring

### BENG 304 - Modeling and Control of Physiological Systems

Credits: 3 (NR)  
Introduces a systems-level understanding of biomedical systems. Emphasis on mathematical modeling of dynamic systems, including the role of feedback. Analogies between electrical and mechanical systems will be discussed. Examples covered will include multiple scales ranging from cells to organ systems.
**BENG 313 - Physiology for Engineers**

Credits: 3 (NR)
Provides a broad introduction to the subject of human physiology, focusing on learning the subject matter from an engineering viewpoint. Emphasis on organs and physiological systems where engineering has a significant role.

**Prerequisite(s):** Grade of C or better in BIOL 213 and either MATH 113 or MATH 115. Prerequisite enforced by registration system.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall

---

**BENG 320 - Bioengineering Signals and Systems**

Credits: 3 (NR)
Introduces the conversion of analog signals to digital ones and methods for using digitally processed signals in biomedical applications.

**Prerequisite(s):** Grade of C or better in BENG 101 and MATH 214. Prerequisite enforced by registration system.

**Notes:** Students cannot receive credit for both BENG 320 and ECE 320.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall

---

**BENG 341 - Introduction to Biomaterials**

Credits: 3 (NR)
To provide a fundamental understanding of current, state of the art, and future directions of biomaterials.

**Prerequisite(s):** Grade of C or better in CHEM 251 (or CHEM 211), MATH 113, and BIOL 213. Prerequisite enforced by registration system.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Summer
BENG 380 - Introduction to Circuits and Electronics

Credits: 3 (NR)
Builds on simple circuit concepts introduced in PHYS 260. Includes circuit analysis using superposition, equivalent circuits and transient analysis of RL, RC and RLC circuits; sinusoidal excitations, AC steady state analysis; frequency response; operational amplifiers; semiconductor devices such as diodes, field effect and bipolar transistors; and digital logic circuits. (Not intended for those majoring in electrical or computer engineering.)

Prerequisite(s): Grade of C or better in PHYS 260 and in MATH 214. Prerequisite enforced by registration system.

Corequisite(s): BENG 320.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

BENG 381 - Circuits and Electronics Lab

Credits: 1 (NR)
Lab associated with BENG 380. Provides laboratory experience in basic electronics emphasizing issues and considerations that are paramount for biomedical instrumentation.

Prerequisite(s): Grade of C or better in PHYS 261. Prerequisite enforced by registration system.

Corequisite(s): BENG 380

Notes: Not intended for those majoring in electrical or computer engineering.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 3
When Offered: Fall

BENG 392 - Engineering Design Studio

Credits: 1 (RD)
Identification and feasibility study of advance engineering problems. Application of path, physics and engineering methods to challenging projects. Preliminary design, modeling, simulation and prototyping of projects.

Prerequisite(s): 75 hours of completed coursework applicable to EE, CpE, or BIOE degree and permission of instructor.

Notes: This course should be taken preceding ECE/BENG 492.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0
When Offered: Fall, Summer, Spring
BENG 395 - Mentored Research in Bioengineering

Credits: 1-3 (RD)
Introduces the scientific research process through "hands on" experience: students are matched with faculty mentors who are actively involved in Bioengineering-related research. Requires no less than 60 hours per semester working with mentors.

Prerequisite(s): At least 60 credit hours applicable to the Bioengineering program.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0
When Offered: Spring

BENG 406 - Biomechanics

Credits: 3 (NR)
This course introduces the fundamental principles of musculoskeletal biomechanics, computational simulation of movement, and OpenSim simulator. Topics include functions and models of the musculoskeletal structures, mathematical description of motion, kinetics, and simulation of movement using OpenSim.

Prerequisite(s): Grade of C or better in PHYS 160 (or PHYS 243), MATH 203, MATH 214, BENG 220, and BENG 313. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring

BENG 425 - Assistive Control of Biomedical Systems

Credits: 3 (NR)
Exposes students to the engineering design process with special focus on medical and biological applications, including the development of assistive devices for individuals with disabilities. Culminates in the presentation of a group instrumentation project.

Prerequisite(s): Grade of C or better in BENG 301 and BENG 320. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

BENG 441 - Nanotechnology in Health

Credits: 3 (NR)
Introduces fundamental principles of a wide range of nanoscale biomaterials and their applications in medicine and engineering.

Prerequisite(s): Grade of C or better in BIOL 213 and PHYS 160; Grade of C or better in CHEM 251 or CHEM 212. Prerequisite enforced by registration system.
BENG 491 - Bioengineering Senior Seminar I

Credits: 1 (NR)
Covers the variety of responsibilities of bioengineers to society. Topics include ethics, regulation, research, industry, entrepreneurship, and cost issues. Professional approaches to job searching and effective technical communication will also be discussed. Speakers include faculty, invited guests from industry and government, as well as students.

Equivalent to ECE 491

Prerequisite(s): Senior standing.

Notes: Students cannot receive credit for BENG 491 and ECE 491.

BENG 492 - Senior Advanced Design Project I

Credits: 2 (NR)
Conception of senior design project in bioengineering and determination of feasibility of proposed project. Work includes developing preliminary design and implementation plan.

Fulfills general education requirement in synthesis.

Prerequisite(s): 90 credit hours applicable to the Bioengineering Program, COMM 100.

Notes: Students cannot receive credit for both BENG 492 and ECE 492.

BENG 493 - Senior Advanced Design Project II

Credits: 2 (NR)
Project includes designing and constructing hardware, writing required software, conducting experiments or studies, and testing complete system. Requires oral and written reports during project and at completion.

Fulfills general education requirement in synthesis.

Prerequisite(s): BENG 492, preferably in the preceding semester.
Notes: Implementation of project for which preliminary work was done in BENG 492.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 0

**BENG 495 - Bioengineering Senior Seminar II**

Credits: 1 (NR)
Covers a variety of responsibilities of bioengineers. Topics include dealing with biomedical ethics, regulatory requirements, global considerations, and health care costs. Speakers will include faculty as well as guests from industry, government, and academia. Students are required to explore and then present some material themselves.

Prerequisite(s): 90 credit hours applicable to the Bioengineering Program, COMM 100.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0
When Offered: Spring

**BENG 499 - Special Topics in Bioengineering**

Credits: 0-4 (RT)
Topics of special interest to undergraduates.

Notes: May be repeated for maximum 6 credits if topics substantially differ.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

**BENG 525 - Neural Engineering**

Credits: 3 (NR)
Provides an overview of topics in Neural Engineering. Topics covered range from sensory and motor prosthetic devices, stimulation of biological tissue, bioelectrodes and characterization techniques, brain-machine interfaces, and engineered devices to ameliorate neurodisorders.

Prerequisite(s): Graduate Standing or permission of instructor; background in Electrical or Computer Engineering disciplines required.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring

**BENG 538 - Medical Imaging**
Credits: 3 (NR)
Introduction to the physical, mathematical and engineering foundations of modern medical imaging systems, medical image processing and analysis methods. Introduces engineering students to clinical applications of medical imaging. Emphasis on diagnostic ultrasound and magnetic resonance imaging methods; several other modalities are also covered. Provides overview of recent developments and future trends in the field of medical imaging, discusses some of the challenges and controversies, and involves hands-on experience applying the methods learnt in class to real-world problems.

Equivalent to ECE 538

Prerequisite(s): Graduate Standing or permission of instructor; ECE 320 or equivalent; PHYS 262 or equivalent.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

BENG 590 - Selected Topics in Bioengineering

Credits: 3 (RD)
Addresses selected topics from recent developments in various Bioengineering disciplines. Content may vary each semester depending on instructor and students’ interests.

Prerequisite(s): Graduate standing or permission of department.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring.

BENG 636 - Advanced Biomedical Signal Processing

Credits: 3 (NR)
Provides an overview of advanced topics in biomedical signal processing with an emphasis on practical applications. Topics include introduction to physiological origins of biomedical signals, stochastic and adaptive signal processing, spectral estimation, signal modeling and analysis of nonstationary signals.

Prerequisite(s): Graduate Standing; ECE 535 or equivalent; ECE 528 or equivalent.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring

BENG 699 - Advanced Topics in Bioengineering

Credits: 3 (RD)
Advanced topics of current interest in bioengineering. Topics chosen so they do not duplicate other courses in department. Active participation encouraged in form of writing and presenting papers in research areas.

Prerequisite(s): Permission of instructor.
Bioinformatics (BINF)

Offered by the College of Science

**BINF 334 - Perl for Bioinformatics**

Credits: 3 (NR)
Introduction into Perl programming language. Topics include data representation, control structures, file input/output, subroutines, regular expressions, debugging, relational databases. Emphasizes bioinformatics applications including DNA sequence analysis, parsing FAST A and GenBank files, processing BLAST output files, SQL or equivalent query language.

Prerequisite(s): Knowledge of programming language or CS 112 or equivalent.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

**BINF 354 - Foundations in Mathematical Biology**

Credits: 3 (NR)
Interdisciplinary introduction to life sciences for physicists, chemists, engineers, and mathematicians. Combines knowledge from natural sciences, social and behavioral sciences, quantitative reasoning, and information technology. Covers selected topics in ecology, physiology, biochemistry, and behavior. May include biochemical reaction kinetics, Hodgkin-Huxley model for cellular electrical activity, continuous and discrete population interactions, and neural network models of learning. Techniques utilized include ordinary differential equations, difference equations, algebraic equations, and computer simulations.

Fulfills general education requirement in synthesis.

Prerequisite(s): Completion or concurrent enrollment in all other required general education courses (must include a chemistry course); MATH 114 or equivalent.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**BINF 401 - Bioinformatics and Computational Biology I**

Credits: 3 (NR)

Covers the following topics and related methodology: protein sequence, structure prediction, and modeling methods; nucleic acid
sequence and structure prediction; gene structure prediction in prokaryotes and eukaryotes; elements of system biology. Students will learn programming approaches to solve bioinformatics problems.

Prerequisite(s): BIOL 231, IT 108, IT 208, STAT 344.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**BINF 402 - Bioinformatics and Computational Biology II**

Credits: 3 (NR)
Continuation of BINF401 and studies in-depth several algorithms and methods used in bioinformatics and computational biology. Students will learn sequence alignment and assembly algorithms, hidden Markov models, classification and prediction methods, genome annotation. These techniques will then be applied to current bioinformatics problems. Programming assignments are incorporated in the course program.

Prerequisite(s): BINF 401.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**BINF 403 - Bioinformatics and Computational Biology Lab I**

Credits: 1 (NR)
Laboratories will introduce students to bioinformatics tools designed to answer research problems in the topics covered in lectures, such as sequence alignment, sequence pattern recognition, structural conformation modeling, phylogenetic analysis methods and image comparisons.

Corequisite(s): BINF 401.

Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 3

**BINF 404 - Bioinformatics and Computational Biology Lab II**

Credits: 1 (NR)
Laboratories will introduce students to research bioinformatics tools relevant to lecture topics such as: the correspondence of measured fragments to parent biomolecules, inference methods for gene and protein networks, predicting system outputs given specified inputs.

Corequisite(s): BINF 402

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 3
**BINF 450 - Bioinformatics for Life Sciences**

Credits: 4 (NR)
Teaches students how to understand the basis of and use of bioinformatics software in database searching, sequence analysis, gene identification, genomics, protein structure and phylogeny.

Prerequisite(s): BIOL 213 and either BIOL 482 or BIOL 483/Chem 463

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 3

**BINF 470 - Molecular Biophysics**

Credits: 3 (NR)
Offers a broad introduction into molecular biophysics. Demonstrates that the application of methods of physics provides a unique opportunity to tackle complex biological problems. Designed for physics or chemistry majors; also useful for biology majors interested in bioinformatics and computational biology.

Equivalent to PHYS 370

Prerequisite(s): PHYS 307 or CHEM 331 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**BINF 490 - Independent Senior Research in Bioinformatics and Computational Biology**

Credits: 3 (NR)
Course offers individual research in bioinformatics and computational biology under the guidance of faculty member. Written report required upon course completion.

Prerequisite(s): Permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring, Summer

**BINF 491 - Senior Thesis in Bioinformatics**

Credits: 1 (NR)
A project is chosen and completed under the guidance of a Bioinformatics Department faculty member.

Corequisite(s): BINF 401.

Notes: An oral progress report with a poster at the fall semester Bioinformatics Student Research Day is required.
BINF 492 - Senior Thesis in Bioinformatics

Credits: 1 (NR)
A project is chosen and completed under the guidance of a Bioinformatics Department faculty member.

Corequisite(s): BINF 402.

Notes: A written thesis in standard format is required.

BINF 630 - Bioinformatics Methods

Credits: 3 (NR)
Introduction to methods and tools for pairwise sequence comparison, multiple sequence alignment, phylogenetic analysis, protein structure prediction and comparison, database similarity searches, and discovery of conserved patterns in protein sequence and structures.

Prerequisite(s): Graduate standing, or permission of instructor.

BINF 631 - Molecular Cell Biology for Bioinformatics

Credits: 3 (NR)
Intensive review of biochemistry, molecular biology, and cell biology necessary to begin research in bioinformatics. Topics include protein biochemistry, nucleic acids biochemistry, DNA replication, transcription, and translation, recombinant DNA technology, genomics, molecular structure of genes and chromosomes, and gene expression and control.

Prerequisite(s): Undergraduate background in biochemistry or cell biology, or permission of instructor.

BINF 633 - Molecular Biotechnology

Credits: 3 (NR)
Introduction to the theory and practice of molecular biotechnology, with emphasis on the application of tools in today's society. Includes study of recombinant DNA technology, genomics, and bioinformatics as applied to commercially important products.
Lectures reflect more recent advances and applications in the commercial aspects of biology.

**Prerequisite(s):** Graduate standing or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**BINF 634 - Bioinformatics Programming**

Credits: 3 (NR)  
Data representation, control structures, file input/output, subroutines, regular expressions, debugging, introduction to relational databases. Emphasizes bioinformatics applications including DNA sequence analysis, parsing FASTA and GenBank files, processing BLAST output files, SQL, or equivalent query language.

**Prerequisite(s):** Graduate standing and computer programming experience, or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**BINF 636 - Microarray Methodology and Analysis**

Credits: 3 (NR)  
Theory and practice of genome analysis including genetics, biochemistry, and tools for analyzing global gene expression, and detection and quantification of genes and gene products.

**Prerequisite(s):** BINF 633, or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**BINF 637 - Forensic DNA Sciences**

Credits: 3 (NR)  
Intensive introduction to parameters affecting data QC and analysis, including factors arising from biochemistry, chemistry, genetics, statistics, instrumentation, and software.

Equivalent to FRSC 560

**Prerequisite(s):** Graduate standing or permission of instructor

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**BINF 639 - Introduction to Biometrics**
Credits: 3 (NR)
Introduction to methods for measuring humans. Topics include face, speaker, fingerprint, and shoeprint recognition; and handwriting analysis. Students develop computer programs to perform many of these tasks.

Prerequisite(s): CSI 603 and 604 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**BINF 650 - Introduction to Bioinformatics Database Design**

Credits: 3 (NR)
Students will acquire skills needed to exploit public biological databases and establish and maintain personal databases that support their own research; such skills include learning underlying data models and the basics of DBMS and SQL.

Prerequisite(s): BINF 634 or equivalent, or permission of the instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**BINF 690 - Numerical Methods for Bioinformatics**

Credits: 3 (NR)
Computational techniques for solving scientific problems focusing on applications in bioinformatics and computational biology. Students develop the ability to convert a quantitative problem into computer programs to solve the problem. Emphasizes efficiency and readability of code.

Prerequisite(s): CS 112, MATH 113 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**BINF 701 - Biochemical Systematics (Biochemistry) Core for Doctoral Studies in Biosciences and Bioinformatics**

Credits: 3 (NR)
Introduction to biochemical systems to investigate complex, multicomponent, dynamic functions of cellular systems. Such studies employ myriad conceptual and technical approaches in their application. Articles from current literature are basis of course offering. The cell's structure and function are the underlying questions of course.

Equivalent to BIOS 701

Prerequisite(s): Admission to PhD program in biosciences or bioinformatics, CHEM 663, or equivalent.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
BINF 702 - Research Methods

Credits: 3 (NR)
Trains students in research methodologies for life sciences. Covers the three phases of biological research projects: experimental design, data collection, and data analysis.

Equivalent to BIOS 702

Prerequisite(s): Admission to PhD program in bioinformatics or biosciences or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

BINF 703 - Bioinformatics Lab Rotation

Credits: 1 (RT)
Short-term introductory research on a specific topic in computational sciences and informatics under direction of faculty member.

Prerequisite(s): Permission of instructor.

Notes: May be repeated.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 1
Grading: Graduate Special

BINF 704 - Colloquium in Bioinformatics

Credits: 1 (RD)
Seminar presentations in a variety of areas of bioinformatics and computational biology by COS faculty, staff, advanced PhD students, and professional visitors.

Prerequisite(s): Graduate standing.

Notes: May be repeated for credit.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0

BINF 705 - Research Ethics

Credits: 1 (NR)
Examines ethical issues in scientific research, reflecting on purpose and reviewing foundational principles for evaluating ethical issues. Provides skills for survival in scientific research through training in moral reasoning and teaching of responsible conduct.
Students learn to apply critical-thinking skills to design, execution, and analysis of experiments and analysis of ethical issues in research, including use of animals and humans, standards in computer community, and research fraud. Guidelines for data ownership, manuscript preparation, and conduct of people in authority may be presented and discussed.

**Prerequisite(s):** Permission of instructor.

**Hours of Lecture or Seminar per week:** 1  
**Hours of Lab or Studio per week:** 0

---

**BINF 730 - Biological Sequence and Genome Analysis**

Credits: 3 (NR)  
Fundamental methods for analyzing nucleic acid and protein sequences, including pairwise and multiple alignment, database search methods, profile searches, and phylogenetic inference. Development of probabilistic tools, including hidden Markov models and optimization algorithms. Survey of current software tools.

**Prerequisite(s):** A course in molecular biology a course in probability and ability to program in a high-level language or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**BINF 731 - Protein Structure Analysis**

Credits: 3 (NR)  
Computational methods for analyzing, classifying, and predicting three-dimensional protein structures. Covers theoretical approaches, techniques, and computational tools for protein structure analysis.

**Prerequisite(s):** Permission of instructor, or previous courses in molecular biology, biochemistry, and computer programming.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**BINF 732 - Genomics**

Credits: 3 (NR)  
Surveys computational tools and techniques to study whole genomes, and explores biological basis of genome analysis algorithms. Topics include genome mapping, comparative genomics, and functional genomics.

Equivalent to CSI 732

**Prerequisite(s):** General biology programming experience CSI 700 or equivalent CSI 731 or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0
BINF 733 - Gene Expression Analysis

Credits: 3 (NR)
Analyzes gene expression data. Topics include cluster analysis and visualization of expression data, inference of genetic regulatory networks, and theoretical models of genetic networks.

Prerequisite(s): Permission of instructor; ability to program in a high-level language and a course in molecular biology: S-Plus or Matlab experience recommended.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

BINF 734 - Advanced Bioinformatics Programming

Credits: 3 (NR)
Topics include algorithm design, complex data structures, object oriented programming, relational databases, designing modules, and graphics and web programming. Students complete a bioinformatics programming project.

Prerequisite(s): BINF 634, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

BINF 739 - Topics in Bioinformatics

Credits: 3 (RT)
Selected topics in bioinformatics not covered in fixed-content bioinformatics courses.

Prerequisite(s): Permission of instructor.

Notes: May be repeated for credit.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

BINF 740 - Introduction to Biophysics

Credits: 3 (NR)
Introduces biophysics, focusing on physical and chemical concepts and their relation to rapidly expanding interdisciplinary interfaces among biology, chemistry, and physics. Reveals multiscale nature of biophysics, and includes exploration of macroscopic and microscopic applications.

Equivalent to PHYS 630

Prerequisite(s): Undergraduate courses in general physics, calculus, and biology.
BINF 741 - Introduction to Computer Simulations of Biomolecules

Credits: 3 (NR)
Details computational methods in biomolecular simulations, such as molecular dynamics and Monte Carlo algorithms. Special emphasis given to practical applications. Reviews most recent advances in biomolecular simulations.

Prerequisite(s): Graduate standing and good programming skills BINF 690 and 701 or permission of instructor.

BINF 751 - Biochemical and Cellular Systems Modeling

Credits: 3 (NR)
Mathematical and computational methods for analysis of cellular and subcellular processes. Topics may include ion channels, whole cell models, intracellular signaling, biochemical oscillations, pathway modeling, parameter estimation, and sensitivity analysis.

Prerequisite(s): Calculus and knowledge of a computer programming language; and BINF 690 and 701; or permission of instructor.

Notes: Course in differential equations is recommended.

BINF 760 - Machine Learning for Bioinformatics

Credits: 3 (NR)
Machine learning and data mining methods relevant to application to problems in computational biology. Methods include decision trees, random forests, rule learning methods, support vector machines, neural networks, genetic algorithms, instance-based learning, Bayesian networks, and evaluation metrics for learning systems. Applications include cancer prediction, gene finding, protein function classification, gene regulation network inference, and other recent bioinformatics applications selected from the literature.

Prerequisite(s): BINF 630, BINF 631, and BINF 634 or permission of instructor.

Notes: In addition to lectures from the instructor, students will present papers from the literature and complete a machine learning project.
**BINF 796 - Directed Reading and Research**

Credits: 1-6 (RD)
Reading and research on specific topic in computational sciences and informatics under direction of faculty member.

**Prerequisite(s):** Permission of instructor.

**Notes:** May be repeated

**Hours of Lecture or Seminar per week:** 1-3
**Hours of Lab or Studio per week:** 0

---

**BINF 798 - Research Project**

Credits: 3 (NR)
Project chosen and completed under guidance of graduate faculty member that results in acceptable technical report.

**Prerequisite(s):** 12 graduate credits and permission of instructor.

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0

**Grading:** Graduate Special

---

**BINF 799 - Master's Thesis**

Credits: 1-6 (RD)
Project chosen and completed under guidance of graduate faculty member that results in acceptable technical report (master's thesis) and oral defense.

**Prerequisite(s):** 12 graduate credits and permission of instructor.

**Hours of Lecture or Seminar per week:** 2-3
**Hours of Lab or Studio per week:** 0

**Grading:** S/IP

---

**BINF 820 - Advanced Topics in Molecular Cell Biology**

Credits: 3 (NR)
Topics may include cell structure, biomembranes and cell architecture, cell signaling, receptor activation, gene expression and control, protein targeting and trafficking, and cell cycle regulation.

**Prerequisite(s):** BINF 631 or equivalent.

**Notes:** Advanced molecular and cellular biology foundation for BINF students.
BINF 831 - Structural Genomics Project

Credits: 3 (NR)
Covers knowledge-based, large-scale protein structure analysis; classification and prediction of protein structure and function; and other current research topics in structural genomics. Projects address entire research enterprise from developing and defending proposal to peer-reviewed publication.

Prerequisite(s): BINF 731, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

BINF 841 - Research Topics in Biomolecular Simulations

Credits: 3 (NR)
Research-oriented course combining lectures and work on individual projects in biomolecular simulations. Topics include protein and peptide aggregation, binding, and unfolding and folding.

Prerequisite(s): BINF 741, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

BINF 996 - Doctoral Reading and Research

Credits: 1-6 (RD)
Reading and research on specific topic in computational sciences and informatics under direction of faculty member.

Prerequisite(s): Admission to doctoral program and permission of instructor.

Notes: May be repeated.

Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 0

BINF 998 - Doctoral Dissertation Proposal

Credits: 1-12 (RD)
Covers development of research proposal, which forms basis for doctoral dissertation, under guidance of dissertation director and doctoral committee.
Prerequisite(s): Permission of advisor.

Notes: May be repeated.

Hours of Lecture or Seminar per week: 0  
Hours of Lab or Studio per week: 0  
Grading: Satisfactory/No Credit

**BINF 999 - Doctoral Dissertation**

Credits: 1-12 (RD)  
Doctoral dissertation research under direction of dissertation director.

Prerequisite(s): Admission to doctoral candidacy.

Notes: May be repeated, but no more than 24 credits in BINF 998 and 999 may be applied to doctoral degree requirements.

Hours of Lecture or Seminar per week: 0  
Hours of Lab or Studio per week: 0  
Grading: S/IP

**Biology (BIOL)**

Offered by the College of Science

*See EVPP, Environmental Science and Public Policy, for additional related course work.*

**BIOL 103 - Introductory Biology I**

Credits: 4 (NR)  
Topics include chemistry of life, cell structure and function, Mendelian genetics, evolution, and diversity of life.

Fulfills general education requirement in natural science (lab).

Notes: Survey course suitable for any major. May not be taken after BIOL 200-level or above courses have been taken.

Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 3  
When Offered: Fall, Spring, Summer

**BIOL 104 - Introductory Biology II**

Credits: 4 (NR)  
Topics include animal (including human) structure, function, homeostatic mechanisms, organ systems, behavior, higher plant systems, and major concepts in ecology.
Fulfills general education requirement in natural science (lab).

**Notes:** Students are strongly urged to take BIOL 103 prior to BIOL 104. Survey course suitable for any major. May not be taken after BIOL 200-level or above courses have been taken.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 3  
**When Offered:** Fall, Spring, Summer

---

**BIOL 105 - Introductory Biology I Laboratory**

Credits: 1 (NR)  
The chemical basis of life, the structure and function of the cell, Mendelian and human genetics, and the major animal phyla are presented.

**Prerequisite(s):** Permission of BIOL 103/104 coordinator and department chair.

**Notes:** Not available to students who have taken BIOL 103 or the equivalent.

**Hours of Lecture or Seminar per week:** 1-6  
**Hours of Lab or Studio per week:** 3

---

**BIOL 106 - Introductory Biology II Laboratory**

Credits: 1 (NR)  
The structure and function of major organ systems of animals and an examination of the structure and function of plants, emphasizing the higher plants.

**Prerequisite(s):** Permission of BIOL 103/104 coordinator and department chair.

**Notes:** Not available to students who have taken BIOL 104 or the equivalent.

**Hours of Lecture or Seminar per week:** 1-12  
**Hours of Lab or Studio per week:** 3

---

**BIOL 124 - Human Anatomy and Physiology**

Credits: 4 (NR)  
Introduction to structure and function of body's major organ systems.

**Notes:** Should be taken in sequence. Does not satisfy natural science requirement in COS or CHSS. Not available for Biology major credit.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 3  
**When Offered:** Fall, Summer
BIOL 125 - Human Anatomy and Physiology

Credits: 4 (NR)
Introduction to structure and function of body's major organ systems.

Prerequisite(s): BIOL 124.

Notes: Does not satisfy the natural science requirement for the BA in COS or CHSS. Not available for Biology major credit.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 3
When Offered: Spring, Summer

BIOL 213 - Cell Structure and Function

Credits: 4 (NR)
For science majors and preprofessionals in life sciences. Introduction to cell chemistry, metabolism, and genetics.

Fulfills general education requirement in natural science (lab).

Corequisite(s): CHEM 211

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 3
When Offered: Fall, Spring, Summer

BIOL 214 - Biostatistics for Biology Majors

Credits: 4 (NR)
An introduction to statistics used in the life sciences.

Corequisite(s): BIOL 213

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 1
When Offered: Fall, Spring, Summer

BIOL 246 - Introductory Microbiology

Credits: 3 (NR)
Introduction to microbial cell structure, physiology, and pathogenicity. Emphasizes control of microorganisms, host-parasite interactions including immunology, and viral and bacterial pathogens.

Prerequisite(s): C or better in BIOL 124 and 125, one year of general biology, or permission of instructor.
Corequisite(s): BIOL 306.

Notes: Not available for biology major credit. Not available to students who have taken BIOL 213 or 418.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

BIOL 301 - Biology and Society

Credits: 3 (RT)
Biological problems facing society including pollution, cloning, emerging diseases, global warming, and overpopulation.

Fulfills general education requirement in synthesis.

Prerequisite(s): BIOL 103 and 60 credits, or permission of instructor.

Notes: Not available for biology major or minor elective credit. See Schedule of Classes for current topic; may be repeated if topic is different.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

BIOL 303 - Animal Biology

Credits: 4 (NR)
Emphasizes structure and function of vertebrates, but surveys all animal groups and protozoa. Also covers evolutionary theory, and evolutionary history of major animal groups.

Prerequisite(s): C or better in BIOL 213, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 3
When Offered: Fall, Spring, Summer

BIOL 304 - Plant Biology

Credits: 4 (NR)
Introduction to study of plants, their structure, development, nutrition, and ecology. Emphasizes flowering plants, but surveys all groups and their phylogenetic relationships.

Prerequisite(s): C or better in BIOL 213, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 3
When Offered: Fall, Spring, Summer
BIOL 305 - Biology of Microorganisms

Credits: 3 (NR)
Morphology, physiology, and pathogenicity of certain groups of bacteria, fungi, and viruses; stresses host-parasite interactions.

Prerequisite(s): C or better in BIOL 213, or permission of instructor. Prerequisite enforced by registration system.

Corequisite(s): BIOL 306.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring, Summer

BIOL 306 - Biology of Microorganisms Laboratory

Credits: 1 (NR)
Laboratory techniques in culturing, staining, and identifying microorganisms.

Corequisite(s): BIOL 246 or 305.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 3
When Offered: Fall, Spring, Summer

BIOL 308 - Foundations of Ecology and Evolution

Credits: 5 (NR)
An examination of the principles of ecology, evolution, and the impact of humans on the world around them. Topics will include evolutionary history, biological diversity, and analyzes of interactions among organisms and between organisms and their environment.

Equivalent to BIOL 307 (2010-2011 Catalog)

Prerequisite(s): BIOL 213 an 214 or EVPP 110 and BIOL 214 or permission of instructor. BIOL 311 recommended.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 4
When Offered: Fall, Spring, Summer

BIOL 309 - Introduction to Oceanography

Credits: 3 (NR)
Introduction to chemical, biological, and geological aspects of oceanic environment.
Equivalent to GEOL 309

Prerequisite(s): GEOL 101 or 111 and BIOL 103 or 213 or permission of instructor.

Notes: May include field trip.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

BIOL 310 - Biodiversity

Credits: 5 (NR)
Explores the fundamental principles governing organismal biology while introducing the three domains of life: the Archaea, the Bacteria, the Eukaryotes, plus viruses. Two Saturday or Sunday field trips are required.

Prerequisite(s): BIOL 213 with a C or better or EVPP 110 and 305 or permission of instructor. BIOL 214 and 311 are recommended.

Notes: BIOL 310 has replaced BIOL 303 and 304. Students who have taken BIOL 310 may not receive credit toward the major for BIOL 303 and/or BIOL 304.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 4
When Offered: Fall, Spring, Summer

BIOL 311 - General Genetics

Credits: 4 (NR)
Basic principles of heredity and modern developments in this field.

Prerequisite(s): BIOL 213 with grade of C or better, or permission of instructor. BIOL 214 is recommended.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 3
When Offered: Fall, Spring, Summer

BIOL 312 - Biostatistics

Credits: 4 (NR)
Use of probability and descriptive and inferential statistical techniques in interpreting biological data.

Prerequisite(s): BIOL 214 with a grade of C or better, or permission of the instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 2
When Offered: Fall
BIOL 313 - Human Genetics for the Social Sciences

Credits: 3 (NR)
Emphasizes topics of interest to students in social sciences, but open to any non-biology major. Topics include human genome and its inheritance; nature versus nurture; genetic disease; genetics of sex determination, intelligence, personality, and mental illness; genetic differences within and between populations; and evolution of human beings.

Prerequisite(s): One year of biology, or permission of instructor.

Notes: Not available for biology credit.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring, odd numbered years

BIOL 314 - Introduction to Research Design and Analysis

Credits: 4 (NR)
Introduction to research design in a wide range of biological disciplines. Lecture will concentrate on how to design experiments with proper controls for statistical analysis, as well as obtaining permits and approvals from appropriate agencies. In recitation students will be given data sets to analyze.

Prerequisite(s): BIOL 213, BIOL 214 or 312 or equivalent introductory statistics course, BIOL 311, CHEM 211-212
Completion of Biology core recommended. Must be enrolled in Biology Research Semester. Registration must be approved by a faculty sponsor and by the Biology Program Director.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 1
When Offered: Fall

BIOL 318 - Conservation Biology

Credits: 3 (NR)
Introduction to science used to identify species in need of conservation and techniques to manage and protect organisms.

Equivalent to EVPP 318

Prerequisite(s): BIOL 308 or BIOL 310, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

BIOL 320 - Comparative Chordate Anatomy
Credits: 4 (NR)
Compares anatomy and morphology of major chordate groups. Lab emphasizes shark, mudpuppy, cat, and rabbit.

Prerequisite(s): BIOL 308 or BIOL 310 or permission of instructor.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 6
When Offered: Alternate Fall

BIOL 322 - Developmental Biology

Credits: 4 (NR)
Principles of embryonic development and differentiation in animal species at cellular, molecular, tissue, and whole organism levels.

Prerequisite(s): BIOL 213 and BIOL 311, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 3
When Offered: Fall

BIOL 326 - Animal Physiology

Credits: 3 (NR)
General consideration of animal function emphasizing common life problems and methods for solving them. Topics include intercellular communication (nervous and endocrine), metabolism, water and solute balance, and cardiovascular and respiratory physiology.

Prerequisite(s): BIOL 213 and BIOL 311, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

BIOL 327 - Animal Physiology Laboratory

Credits: 2 (NR)
Investigation of invertebrate and vertebrate physiology. Emphasizes responses to environmental changes.

Prerequisite(s): BIOL 326

Corequisite(s): BIOL 326

Notes: Students are required to have concurrent registration in the Recitation.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 3
BIOL 328 - Recitation for Fundamentals of Ecology and Evolution

Credits: 1 (NR)
This is a writing intensive experience for transfer students who have previously taken an equivalent course to BIOL 308 that did not meet the writing intensive requirements in the biology major. This course is paired with BIOL 308.

Prerequisite(s): Permission of Biology Program Director and faculty coordinator of BIOL 308.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0
When Offered: Fall, Summer, Spring

BIOL 331 - Invertebrate Zoology

Credits: 4 (NR)
Survey of invertebrate phyla, excluding insects, showing morphology, phylogeny, and general biology of these groups.

Prerequisite(s): BIOL 308 or BIOL 310, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 3

BIOL 332 - Insect Biology

Credits: 4 (NR)
Survey of insects including taxonomy, morphology, physiology, behavior, ecology, and economic importance.

Prerequisite(s): BIOL 308 or BIOL 310, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 3

BIOL 334 - Vertebrate Paleontology

Credits: 4 (NR)
Vertebrate Paleontology explores the evolution of vertebrates from the early Paleozoic to Recent. The course will cover the systematics, anatomy, paleogeography, and ecology of extinct vertebrates. Discussions will include fishes, early tetrapods & amniotes, dinosaurs, birds and mammals. Lab portion includes paleontology techniques, analysis, and study of fossil specimens and casts. A weekend field trip is included.

Equivalent to GEOL 334

Prerequisite(s): Any two courses from the following list: GEOL 101, GEOL 102, BIOL 103, BIOL 104, BIOL 213, BIOL 303 or the permission of the instructor.
BIOL 335 - Forensic Entomology

Credits: 3 (NR)
Explores the use of insects and other arthropods in field of forensic science as it pertains to the investigations of human and animal deaths and abuse, food and other product contamination, thefts, the illegal drug trade and unethical entomological practices. The use and presentation of this information from such investigations in court room proceedings will be discussed.

Prerequisite(s): BIOL 213 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

BIOL 338 - Recitation and Lab for Fundamentals of Ecology and Evolution

Credits: 2 (NR)
This is a writing intensive experience and laboratory for transfer students who have previously taken an equivalent course to BIOL 308 that did not have a lab and did not meet the writing intensive requirements in the biology major. This course is paired with BIOL 308.

Prerequisite(s): Permission of Biology Program Director and faculty coordinator of BIOL 308.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 2
When Offered: Fall, Summer, Spring

BIOL 344 - Plant Diversity and Evolution

Credits: 4 (NR)
Investigates the diversity of vascular plants, including angiosperms, their evolutionary relationships, and the bases of their classification and identification.

Prerequisite(s): BIOL 308 or BIOL 310, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 3
When Offered: Spring

BIOL 345 - Plant Ecology
Investigates the interaction of plants with their abiotic and biotic environment, native Virginian plant communities and their causes, and global processes affecting plant distributions over geological time. 2 Saturday field trips required.

**Prerequisite(s):** BIOL 308 or BIOL 310, or permission of instructor.

**Notes:** Three Saturday or Sunday field trips required.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 3

---

**BIOL 350 - Freshwater Ecosystems**

Credits: 4 (NR)  
Studies physical, chemical, and biological processes in lakes, streams, and wetlands. Lectures, field trips, and lab exercises teach physical and chemical aspects of aquatic systems and life cycles, and adaptations of aquatic organisms.

Equivalent to EVPP 350

**Prerequisite(s):** CHEM 211/212 or CHEM 155/156 and BIOL 308.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 3

---

**BIOL 355 - Ecological Engineering and Ecosystem Restoration**

Credits: 4 (NR)  
Provides definition, classification and practice of ecological engineering and ecosystem restoration. Describes general system ecology, ecosystem restoration, and the utilization of natural processes to provide ecosystem services to society and benefits to nature. Provides students with a systems-oriented perspective on environmental studies. Students will study principles in general system ecology and ecological engineering and explore practices in sustainable ecological design by carrying out a hands-on experimental design project with field microcosms/meocosms in a newly established Wetland Mesocosm Compound on the campus. This course will involve a field trip (1-2 days).

Equivalent to EVPP 355

**Prerequisite(s):** CHEM 211, BIOL 308 and PHYS 243

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 3

---

**BIOL 374 - Biogeography: Space, Time, and Life**

Credits: 3 (NR)  
A survey of the relationship between the distribution of plants and animals on the earth surface and the physical geography and environmental characteristics.
Equivalent to GGS 321

Prerequisite(s): One of the following: BIOL 310, GGS 122, GGS 102, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring

BIOL 377 - Applied Ecology

Credits: 3 (NR)
Introduction to ecosystem concepts and their applications to natural and managed ecosystems.

Equivalent to EVPP 377

Prerequisite(s): 8 credits of biology, geology, or chemistry; 60 credits; or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

BIOL 379 - Ecological Sustainability

Credits: 4 (NR)

Introduces the concepts and applications of several important topics relating to ecological sustainability. Focuses on the role of soils in maintaining and managing environmental quality. Teaches students how to understand and interpret scientific data presented in various types of literature covering ecological sustainability.
Designated a Green Leaf Course.

Designated as a research and scholarship intensive course.

Equivalent to EVPP 378

Prerequisite(s): BIOL 308 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 3
When Offered: Spring

BIOL 382 - Introduction to Virology

Credits: 3 (NR)
An introduction to the fundamental nature of viruses, their classification, morphology, chemistry and their role in human disease.

Prerequisite(s): BIOL 305 or permission of instructor. Prerequisite enforced by registration system.
BIOL 385 - Biotechnology and Genetic Engineering

Credits: 3 (NR)
Emphasizes theory and applications, including significance and societal implications of biotechnology applied to medicine, agriculture, and environment.

Prerequisite(s): BIOL 311; CHEM 211, 212; MATH 110 or 113.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

BIOL 402 - Applied and Industrial Microbiology

Credits: 3 (NR)
Biology of microorganisms of ecological and industrial significance. Includes food production, spoilage and preservation, fermentation technology, waste disposal, water purification, biodeterioration, and decomposition.

Prerequisite(s): BIOL 213, 305, 306; CHEM 211, 212; or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

BIOL 403 - Techniques in Applied and Industrial Microbiology

Credits: 1 (NR)
Lab exercises illustrate basic and applied methodologies, including isolation of commercially useful strains. Discusses production and purification of industrial products.

Prerequisite(s): BIOL 213, 305, 306; CHEM 211, 212.

Corequisite(s): BIOL 402, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 3

BIOL 404 - Medical Microbiology

Credits: 3 (NR)
Basic principles of infectious diseases caused by bacteria and viruses. Discusses genetics and molecular mechanisms of pathogenicity.
Prerequisite(s): BIOL 305 and 306.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**BIOL 405 - Microbial Genetics**

Credits: 4 (NR)
Study of structure and function of bacterial DNA, emphasizing mechanisms of gene transfer, expression and regulation. Introduces DNA repair, mutation, and life cycles of bacteriophage.

Prerequisite(s): BIOL 305 and 306.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 3

**BIOL 406 - Microbial Physiology and Metabolism**

Credits: 4 (NR)
Study of complexity and diversity of microbial physiology and metabolism with emphasis on bacteria. Nutrition, growth, transport, and anabolic and catabolic processes are emphasized. Laboratory includes quantification of cellular macromolecules, enzyme purification and kinetics, column chromatography, and bacterial responses to environmental stimuli.

Prerequisite(s): BIOL 305 and 306.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 3

**BIOL 407 - Microbial Diversity**

Credits: 4 (NR)
Studies effect of microorganisms on ecological and medical phenomena. Stresses evolution of microbial species, biochemical cycling, and species interactions. Laboratory stresses use of cultural, biochemical, and phylogenetic methods to study microbial isolation, metabolism, and identification.

Prerequisite(s): BIOL 305 and 306.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 3

**BIOL 408 - Mushrooms, Molds and Society**
Credits: 3 (RD)
Provides a modern, comprehensive knowledge of fungal biology including classification, phylogeny, structure, physiology/metabolism, growth and development, genetics, industrial applications including biotechnology, ecological roles including pathogenic interactions with plants, animals, and man.

Prerequisite(s): BIOL 213 with a grade of C or better.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring

BIOL 409 - Medical Mycology

Credits: 3 (RD)
Provides the student with current knowledge of both the medical and microbiological aspects of fungal diseases in humans, including the etiologic agents, geographic distribution, epidemiology, transmission, determinants of pathogenicity, laboratory detection, and therapy associated with the major human mycoses.

Prerequisite(s): BIOL 213 with a grade of C or better.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Summer

BIOL 411 - Advanced General Genetics

Credits: 3 (NR)
Topics include quantitative genetics, extrachromosomal inheritance, and special techniques such as mutation screening, developmental genetics, cancer genetics, behavior genetics, evolutionary genetics, and ethics of genetic technology.

Prerequisite(s): C or better in BIOL 311 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

BIOL 417 - Selected Topics in Molecular and Cellular Biology

Credits: 1-4 (RT)
Study of current topics in molecular and cellular biology. Lecture, laboratory.

Prerequisite(s): BIOL 311 or 482, or permission of instructor.

Notes: Topics vary. May be repeated for credit.

Hours of Lecture or Seminar per week: 0-3
Hours of Lab or Studio per week: 0-6
BIOL 418 - Current Topics in Microbiology

Credits: 3 (RD)
Study of current topics in microbiology.

Prerequisite(s): BIOL 305 and 306.

Notes: Topics vary. May be repeated for credit.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

BIOL 420 - Vaccines

Credits: 3 (NR)

Prerequisite(s): BIOL 305/306.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

BIOL 421 - Genetics of Human Diseases

Credits: 3 (NR)
Emphasizes strategies used for identification of genes involved in human genetic diseases. Both monogenic and complex human genetic diseases, as well as principles of genetic screening and counseling, will be presented.

Prerequisite(s): BIOL 311.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

BIOL 422 - Stem Cell Biology and Regenerative Medicine

Credits: 3 (NR)
A broad overview of the biological principles governing stem cell populations. The functional roles stem cells play in regulating normal development and contributing to disease-state pathologies. An examination of the therapeutic potential of stem cells through "regenerative medicine."

Prerequisite(s): BIOL 311.
BIOL 425 - Human Physiology

Credits: 3 (NR)
Organ system approach to study of homeostasis, including cardiovascular, respiratory, renal, digestive, endocrine, and nervous system functions.

Prerequisite(s): BIOL 213 or permission of instructor.

BIOL 426 - Mechanisms of Aging

Credits: 3 (NR)
A course where students will demonstrate knowledge of cellular and molecular mechanisms which drive the systematic changes that result in aging, and to understand the overall biological processes involved in complex biological systems.

Prerequisite(s): BIOL 213 and BIOL 311 or equivalent; or Permission of Instructor.

BIOL 430 - Advanced Human Anatomy and Physiology I

Credits: 4 (NR)
Organ system approach to studying the structure and function of the human organism and maintenance of homeostasis. Detailed discussion of anatomical structures and their functions of the endocrine, nervous, muscular, skeletal, and integumentary systems following introduction to the cellular and tissue levels of organization. Topics also include selected pathology for each organ system; current therapeutic interventions are addressed.

Prerequisite(s): BIOL 213 and 60 credits. Prerequisite enforced by registration system.

Notes: Biology 124 is not approved for Biology Majors.

BIOL 431 - Advanced Human Anatomy and Physiology II
Continued study of the structure and function of the human organism and maintenance of homeostasis. Detailed discussion of anatomical structures and their functions of the cardiovascular, lymphatic, respiratory, urinary, digestive and reproductive organ systems. Topics also include selected disorders for each organ system to illustrate disruption of homeostasis.

**Prerequisite(s):** BIOL 430

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 3  
**When Offered:** Spring, Summer

---

**BIOL 433 - Selected Topics in Plant Biology**

Credits: 1-4 (RD)  
Lecture or field course in botany. Topic varies with instructor's specialty.

**Prerequisite(s):** BIOL 310 or permission of instructor.

**Hours of Lecture or Seminar per week:** 1-4  
**Hours of Lab or Studio per week:** 0-6

---

**BIOL 435 - Selected Topics in Biology**

Credits: 0-4 (RD)  
Topics vary with instructor's specialty. May be repeated only with permission of Biology Program Director.

**Prerequisite(s):** Permission of instructor.

**Hours of Lecture or Seminar per week:** 1-3  
**Hours of Lab or Studio per week:** 0-6  
**When Offered:** Fall, Summer, Spring

---

**BIOL 440 - Field Biology**

Credits: 0-4 (RD)  
Directed field studies emphasizing ecology and behavior. Topics vary but include design of field manipulations, data collection and analysis, and introduction to organisms of study site.

**Prerequisite(s):** BIOL 308 or 310 or permission of instructor.

**Notes:** Students bear cost of required field trips. May be repeated with permission of Biology Program. Total limit of 4 credits. This course does not satisfy requirements of the BA degree or BS degree, which state that students must complete at least one (BA degree) or two (BS degree) upper division courses that include a laboratory.

**Hours of Lecture or Seminar per week:** 0-3  
**Hours of Lab or Studio per week:** 3-9  
**When Offered:** Fall, Summer, Spring
BIOL 446 - Environmental Physiology

Credits: 3 (NR)
Physiological responses of animals to environmental factors and changes in natural environment. Topics include biorhythms and adaptation to temperature, high pressure, and altitude. Emphasis on vertebrates.

Prerequisite(s): BIOL 326 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

BIOL 449 - Marine Ecology

Credits: 3 (NR)
Plants and animals of marine environments and physical and chemical conditions that affect their existence.

Prerequisite(s): BIOL 308 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

BIOL 450 - Marine conservation

Credits: 3 (NR)
Provides an overview of threats to the marine environment, and discusses the scientific, socioeconomic, and political issues behind marine conservation. covers categories of marine pollutants (chemical, biological, and physical contaminants) and their impacts on the marine ecosystem, as well as impacts on humans (health, social, and economic), threats to key marine species (e.g., coral, sharks, turtles, and marine mammals) and initiatives and laws developed to reduce these threats. Scientific and socioeconomic problems that hinder sustainable fisheries management and the science and policy behind the global warming debate are also discussed. The course also provides an overview of marine environmental law and policy issues related to marine conservation policy.

Prerequisite(s): BIOL 309 or equivalent, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring

BIOL 452 - Immunology

Credits: 3 (NR)
Topics include structure and function of immunoglobulins, role of cell-mediated immunity, protective role of immune system, and disease and injury related to malfunctions of immune system.
Prerequisite(s): BIOL 213, 305, 306, and 311; or permission of instructor. BIOL 311 recommended. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0  
When Offered: Fall, Summer, Spring

**BIOL 453 - Immunology Laboratory**

Credits: 1 (NR)  
Techniques relevant to BIOL 452, including enzyme-linked immunoabsorbant assay, immunodiffusion, protein electrophoresis, and immune fixation.  
Fulfills writing intensive requirement in the medical technology major only.

Prerequisite(s): BIOL 452

Corequisite(s): BIOL 452

Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 3

**BIOL 454 - Marine Mammal Biology and Conservation**

Credits: 3 (NR)  
Covers the evolution, biology, ecology, and behavior of marine mammals from polar bears and sea otters to whales and dolphins. Marine mammal conservation and policy is also a major component of the course; several, lecture sessions are devoted to the issue of whaling, threats to marine mammal populations, and recent conservation issues such as marine mammals and noise pollution. The course also includes a number of guest lectures from a variety of international marine mammal experts.

Equivalent to EVPP 419

Prerequisite(s): BIOL 309 or BIOL 449 or equivalent; or permission of instructor.

Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0  
When Offered: Spring

**BIOL 455 - Marine Mammal Biology and Conservation Field Course**

Credits: 1 (NR)  
Provides laboratory, seminar sessions and field work to accompany BIOL 454-001 - marine mammal biology and conservation. Field work includes several day-long boat trips. May take place in the US or abroad.
Corequisite(s): EVPP 419 or 454.

Notes: At present the two week residential field course takes place in Scotland at the University (of London) Marine Biological Station, which is equipped with boats and laboratories. The course has been running for 11 years, 2 years with GMU as a special topics course.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 1-12
When Offered: Spring

**BIOL 457 - Reproductive Strategies**

Credits: 3 (NR)
Introduction to the research and evolutionary theory of sex and reproduction. Covers topics from the evolution of sex and gender to the evolution of complex reproductive strategies involving behaviors such as mate recognition, courtship displays, territoriality, polygamy, and offspring care. Lectures focus primarily on multi-cellular animals but also include discussions of unicellular prokaryotes and eukaryotes as well as plants.

Prerequisite(s): BIOL 308 and 60 hours.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

**BIOL 459 - Fungi and Ecosystems**

Credits: 3 (NR)
Considers impact of fungi on ecosystems in terms of biogeochemical cycling, primary and secondary production, and regulating community structure and populations of individual species through their activities as symbionts and parasites. Discusses role of fungi in ameliorating pollutants produced by anthropogenic activities.

Prerequisite(s): BIOL 308 or BIOL 310 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**BIOL 465 - Histology**

Credits: 4 (NR)
Microscopic structure of animal tissues and organs, with emphasis on vertebrates.

Prerequisite(s): BIOL 308 or 310.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 3
BIOL 468 - Vertebrate Natural History

Credits: 4 (NR)
Introduces vertebrates with emphasis on systematic, evolution, life history, behavior and ecology. Laboratory emphasis on identification, taxonomy, and natural history of local vertebrates.

Equivalent to EVPP 468

Prerequisite(s): BIOL 308 or permission of the instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 3
When Offered: Spring

BIOL 470 - Dinosaur Biology

Credits: 3 (NR)
Introduction to the evolution, diversity, and biology of the dinosaurs and their descendants. Emphasis on how current biological knowledge is used to estimate and inter the morphology, physiology and ecology of these extinct animals.

Prerequisite(s): BIOL 308 or BIOL 310 or permission of instructor.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 1

BIOL 471 - Evolution

Credits: 3 (NR)
Process of evolution emphasizing role of genetics, properties of populations, and population differentiations.

Prerequisite(s): BIOL 311, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring

BIOL 472 - Introductory Animal Behavior

Credits: 3 (NR)
Study of mechanisms, functions, and evolution of behavior.

Prerequisite(s): BIOL 308 or BIOL 310 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
BIOL 473 - Introductory Laboratory in Animal Behavior

Credits: 1 (NR)
Field or laboratory study in animal behavior with emphasis on mechanisms, functions, and evolution of behavior. Stresses experimental design and analysis of data. Writing-intensive laboratory.

Prerequisite(s): BIOL 472.

Corequisite(s): BIOL 472.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 3

BIOL 482 - Introduction to Molecular Genetics

Credits: 3 (NR)
Basic concepts of structure and function of genetic material at molecular level.

Prerequisite(s): BIOL 213, 305, and 306, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

BIOL 483 - General Biochemistry

Credits: 4 (NR)

Prerequisite(s): BIOL 213; CHEM 313, 314; or permission of instructor.

Hours of Lecture or Seminar per week: 4
Hours of Lab or Studio per week: 0

BIOL 484 - Eukaryotic Cell Biology

Credits: 3 (NR)
Structure and function of cell membranes and organelles with regard to cellular transport, sorting, compartmentalization, signaling, motility, and cell division.

Prerequisite(s): BIOL 311 and 483 or permission of instructor. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
BIOL 485 - Eukaryotic Cell Biology Laboratory

Credits: 1 (NR)
Laboratory experiments using cell biology techniques, including microscopy, spectrophotometry, centrifugation, chromatography, and electrophoresis.

Corequisite(s): BIOL 484 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 3

BIOL 486 - Molecular Biology and Biotechnology Laboratory

Credits: 2 (NR)
Introduction to theory, techniques, and practices used in modern molecular biotechnology laboratories.

Prerequisite(s): BIOL 385 or 482.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 6

BIOL 489 - Teaching Practicum

Credits: 1-3 (RD)
Student gains teaching experience in a lecture, laboratory or field environment under the supervision of a faculty member. Student responsibilities may include a lecturing component, but may also include lab preparation, design of course materials, tutoring and grading. Course may be repeated once.

Prerequisite(s): BIOL 213, 311, 60 credit hours and permission of instructor, course coordinator (where applicable) and Program Director.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0
When Offered: Fall, Summer, Spring

BIOL 492 - Senior Seminar

Credits: 1 (RD)
Weekly seminar course dealing with recent advances in biology. Topics selected from recent publications in the field. May be repeated for credit.

Prerequisite(s): BIOL 311 and 90 credit hours, or permission of instructor.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring
**BIOL 493 - Honors Research in Biology**

Credits: 1-2 (RD)
Laboratory of field investigation under guidance of faculty member.

**Prerequisite(s):** Admission to the Biology Honors Program, permission of instructor and Biology Program Director.

**Notes:** Total limit for BIOL 493, 495 and 497 is 8 credits toward the 44 credit hours required for the Biology BS degree and only 4 credits toward the 32 hours required for the BA degree. Combined 493, 495 and 497 may not exceed 4 credit hours in any one semester.

**Hours of Lecture or Seminar per week:** 1-2
**Hours of Lab or Studio per week:** 0
**When Offered:** Fall, Spring, Summer

**BIOL 494 - Honors Seminar in Biology**

Credits: 1 (RD)
Weekly seminar course dealing with recent advances in biology.

**Prerequisite(s):** Admission to biology honors program and permission of instructor.

**Notes:** Topics selected from recent publications in field. May be repeated for credit six times.

**Hours of Lecture or Seminar per week:** 1
**Hours of Lab or Studio per week:** 0
**When Offered:** Fall, Spring

**BIOL 495 - Directed Studies in Biology**

Credits: 1-3 (RD)
Study of a topic not otherwise available to student. May involve reading assignments, tutorials, lectures, papers, presentations, or field or laboratory study, determined in consultation with instructor.

**Prerequisite(s):** Permission of instructor and Biology Program Director.

**Notes:** May be taken for 1 to 3 credits and repeated once for a total of 3 credits. Total limit for combination of 495 and 497 is 6 credits toward 44 credits for BS and 4 credits toward 32 credits for BA. This course does not satisfy requirements of the BA degree or BS degree, which state that students must complete at least one (BA degree) or two (BS degree) upper division courses that include a laboratory.

**Hours of Lecture or Seminar per week:** 1-3
**Hours of Lab or Studio per week:** 0
**When Offered:** Fall, Summer, Spring.
BIOL 497 - Special Problems in Biology

Credits: 1-4 (RD)
Lab or field project leading to written report of research. Research and paper completed under instructor's guidance.

Prerequisite(s): 60 credits, and permission of instructor and department chair.

Notes: Total limit for 495 and 497 combined is 6 credits toward the 44 credits required for BS and 4 credits toward 32 credits for BA. This course does not satisfy requirements of the BA degree or BS degree, which state that students must complete at least one (BA degree) or two (BS degree) upper division courses that include a laboratory.

Hours of Lecture or Seminar per week: 1-4
Hours of Lab or Studio per week: 0
When Offered: Fall, Summer, Spring.

BIOL 498 - Research Seminar

Credits: 2 (NR)
Seminar discussing current scientific literature and literature related to research project undertaken by student as part of the research semester.

Prerequisite(s): BIOL 213, BIOL 214 or 312 or equivalent introductory statistics course, BIOL 311, CHEM 211-212 Completion of Biology core recommended. Must be enrolled in Biology Research Semester. Registration must be approved by a faculty sponsor and by the Biology Program Director.

Notes: Registration limited to students who are enrolled concurrently in BIOL 499. For students in the Biology Honors Program, this course may be used to substitute for one credit of BIOL 494: Honors Seminar in Biology.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 0
When Offered: Fall

BIOL 499 - Research in Biology

Credits: 6-9 (NR)
Laboratory or field investigation under faculty guidance. Students will earn 6-9 credits toward the BA or BS degrees in Biology.

Prerequisite(s): BIOL 213, BIOL 214 or 312 or equivalent introductory statistics course, BIOL 311, CHEM 211-212 Completion of Biology core recommended. Must be enrolled in Biology Research Semester. Registration must be approved by a faculty sponsor and by the Biology Program Director.

Notes: Registering for the Research Semester requires successful application and approval by Biology Program and faculty sponsor. Student receiving 9 credits for 499 will not be allowed to use BIOL 440, BIOL495 and/or 497 neither toward the 32 BIOL hours needed for the BA degree, nor toward the 44 BIOL hours needed for the BS degree. This course will satisfy one upper division laboratory requirement for both the BA and BS degrees in Biology.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 6-9
When Offered: Fall
BIOL 501 - Microbial Diversity: An Organismal Approach

Credits: 3 (NR)
In-depth study of nonpathogenic microbial world, emphasizing detection, enumeration, and classification of microorganisms; their physiological and evolutionary relationships; and biotechnological applications.

Prerequisite(s): Undergraduate course in microbiology, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

BIOL 504 - Va Nat Hist for Teachers

Credits: 4 (NR)
Prerequisite(s): May be applied to the M.S. in biology in the interpretive track only and then within a 6 hour maximum if combined with BIOL 605. SUMMER.

Hours of Lecture or Seminar per week: 4
Hours of Lab or Studio per week: 1-12

BIOL 506 - Selected Topics in Microbiology

Credits: 1-4 (RD)
Topic depends on instructor's specialty.

Prerequisite(s): BIOL 305, 306, or permission of instructor.

Notes: May be repeated only with permission of department chair.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0-6

BIOL 507 - Selected Topics in Ecology

Credits: 0-4 (RD)
Topic depends on instructor's specialty.

Prerequisite(s): Course in ecology and permission of instructor.

Notes: May be repeated only with permission of department chair.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0-6
BIOL 508 - Selected Topics in Animal Biology

Credits: 1-4 (RD)
Topic depends on instructor's specialty.

Prerequisite(s): BIOL 303, or permission of instructor.

Notes: May be repeated only with permission of department chair.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0-6

BIOL 509 - DNA Analysis of Biological Evidence

Credits: 3 (NR)
Historical development of DNA profiling methods, current DNA typing techniques and the ongoing development of new forensic DNA typing methods. Emphasis will be placed on various analytical techniques used in the analysis of forensic evidence.

Prerequisite(s): BIOL 311 or permission of instructor

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring

BIOL 510 - Forensic DNA Analysis Laboratory

Credits: 1 (NR)
Provides hands-on experience with the methodologies of forensic DNA analysis.

Prerequisite(s): BIOL 311

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 1-12
When Offered: Spring

BIOL 515 - Developmental Neurobiology

Credits: 3 (NR)
Introduction to developmental neurobiology with overview of embryological development of the nervous system. Topics include neural induction, patterning/cell fate specification, and neural circuit assembly together with modern molecular methods for exploring neural development.

Prerequisite(s): Completion of 60 credits, including PSYC 372; or BIOL 213 and 303.
**BIOL 516 - Mammalian Neurobiology**

Credits: 3 (NR)
Functional anatomy of mammal brains emphasizing regional and systems neuroanatomy of humans. Correlates with material from clinical neurology, where possible. Laboratory component includes brain dissections and clinical correlations.

Prerequisite(s): BIOL 515.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 3

**BIOL 518 - Conservation Biology**

Credits: 3 (NR)
Introduction to science used to identify species in need of conservation and techniques to manage and protect organisms.

Prerequisite(s): BIOL 307, 311, or equivalent.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**BIOL 520 - Systematics in Complex Angiosperm Families**

Credits: 3 (NR)
Morphology and speciation of more complex families such as Poaceae, Cyperaceae, and Asteraceae. Laboratory emphasizes identification of specimens, and acquaintance with taxonomic literature.

Prerequisite(s): BIOL 344 or 534, or permission of instructor.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 6

**BIOL 532 - Animal Behavior**

Credits: 3 (NR)
Ecological aspects of animal behavior.

Prerequisite(s): BIOL 324 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
BIOL 533 - Selected Topics in Plant Biology

Credits: 1-4 (RD)
Topic depends on instructor's specialty.

Prerequisite(s): Course in plant biology or permission of instructor.

Notes: May be repeated only with permission of department chair.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0-6
Grading: Graduate Special

BIOL 534 - Advanced Plant Taxonomy

Credits: 3 (NR)
Laboratories consist of field trips, and collection and identification of specimens.

Prerequisite(s): Course in plant taxonomy, or permission of instructor.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 6

BIOL 535 - Ancient Plants and their Environment

Credits: 3 (NR)
Study of factors involved in origin, history, and extinction of fossil plants, including adaptations, paleoecology, and major geological events.

Prerequisite(s): BIOL 304, course in paleontology, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

BIOL 536 - Ichthyology

Credits: 4 (NR)
Studies systematics, evolution, physiology, ecology, and behavior of fishes. Lab time used for field trips, practice in identifying species, and hands-on experience with lecture subjects.

Equivalent to EVPP 536

Prerequisite(s): Course in ecology, or permission of instructor.
BIOL 537 - Ornithology

Credits: 4 (NR)
Study of evolution, systematics, physiology, ecology, and behavior of birds, emphasizing field work.

Prerequisite(s): Course in ecology, or permission of instructor.

BIOL 538 - Mammology

Credits: 4 (NR)
Study of evolution, systematics, physiology, ecology, and behavior of mammals, emphasizing field work.

Equivalent to EVPP 538

Prerequisite(s): Course in ecology, or permission of instructor.

BIOL 539 - Herpetology

Credits: 4 (NR)
Study of evolution, systematics, physiology, ecology, and behavior of amphibians and reptiles, emphasizing field work.

Prerequisite(s): Course in ecology, or permission of instructor.

BIOL 543 - Tropical Ecosystems

Credits: 4 (NR)
Terrestrial, aquatic, and marine ecosystems in tropics, emphasizing plant communities, plant-animal interactions, and role of humans in the tropics.

Equivalent to EVPP 543
Notes: Field trip to tropics required as part of laboratory.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 3
When Offered: Spring, even numbered years

**BIOL 547 - Terrestrial Plant Ecology**

Credits: 4 (NR)
Considers community organization, development, productivity, and mineral cycling; interactions between plants and competitors; herbivores; and environmental factors, especially light, water, and soil. Field work and laboratory emphasize data collection and statistical analysis.

Prerequisite(s): Course in ecology.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 3

**BIOL 550 - Wtrscpe Ecology and Mgmt**

Credits: 3 (NR)
Field and laboratory approaches to freshwater ecology with emphasis on study design, sampling methods, laboratory and data analysis, and report writing.

Equivalent to EVPP 550

Prerequisite(s): General Chemistry and a course in ecology.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**BIOL 553 - Advanced Topics in Immunology**

Credits: 3 (RD)
Comprehensive study of immunologic mechanisms as they pertain to immunologic diseases and transplantation.

Prerequisite(s): BIOL 452, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**BIOL 554 - Plant Physiology**
BIOL 555 - Lab in Waterscape Ecology

Credits: 1 (NR)
Equivalent to EVPP 555

Prerequisite(s): BIOL 550 or permission of instructor.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 1-6

BIOL 556 - Advanced Topics in Microbial Physiology and Metabolism

Credits: 3 (NR)
Comprehensive study of microorganisms including growth, nutrition, transport, autotrophic and heterotrophic metabolism, regulation, and differentiation.

Prerequisite(s): BIOL 305, 306, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

BIOL 559 - Fungi and Ecosystems

Credits: 3 (NR)
Considers impact of fungi on ecosystems in terms of their effects on biogeochemical cycling, primary and secondary production, and regulating community structure and populations of individual species through their activities as symbionts and parasites. Discusses role of fungi in ameliorating pollutants produced by anthropogenic activities.

Prerequisite(s): BIOL 304 or a course in microbiology, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

BIOL 561 - Comparative Animal Physiology

Credits: 3 (NR)
Detailed study of selected physiological systems of invertebrates and vertebrates, emphasizing current research.
Prerequisite(s): BIOL 326, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**BIOL 563 - Virology**

Credits: 3 (NR)
Fundamental concepts of nature of viruses, virus classification, cultivation, and biochemistry. Emphasizes bacteriophage and animal viruses.

Prerequisite(s): BIOL 482, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

**BIOL 564 - Techniques in Virology**

Credits: 2 (NR)
Basic techniques of animal virus propagation, isolation, and quantitation.

Prerequisite(s): BIOL 563, or permission of instructor.

Corequisite(s): BIOL 563, or permission of instructor.

Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 3

**BIOL 566 - Cancer Genomics**

Credits: 3 (NR)
Review of modern concepts in cancer biology including taxonomy of human tumors, common cancer syndromes, and genome instability. Genetic and molecular studies of tumor cell proliferation, migration, invasion, and death.

Prerequisite(s): Course in genetics or biochemistry.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**BIOL 568 - Advanced Topics in Molecular Genetics**

Credits: 3 (RD)
Comprehensive study of regulatory mechanisms controlling gene expression in viruses, prokaryotes, and eukaryotes,
emphasizing current research.

Prerequisite(s): BIOL 482, or permission of instructor.

Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0

**BIOL 572 - Human Genetics**

Credits: 3 (NR)  
Inheritance of humans emphasizing current problems, including genetic control of metabolic diseases, effects of radiation and chemical agents in environment, and directed genetic change.

Prerequisite(s): BIOL 311, or permission of instructor.

Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0

**BIOL 573 - Developmental Genetics**

Credits: 3 (NR)  
Genetic approaches to problem of eukaryotic development, emphasizing current research on regulation of gene enzyme systems.

Prerequisite(s): BIOL 311, or permission of instructor.

Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0

**BIOL 574 - Population Genetics**

Credits: 4 (NR)  
Genetic structure and dynamics of populations, both real and ideal.

Prerequisite(s): BIOL 308 and 311, or permission of instructor.

Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0

**BIOL 575 - Selected Topics in Genetics**

Credits: 1-4 (RT)  
Different topics in different years, including molecular, developmental, physiological, and classical genetics, emphasizing current problems and research.
**Prerequisite(s):** BIOL 311, or permission of instructor.

**Notes:** May be repeated once with permission of department chair.

**Hours of Lecture or Seminar per week:** 1-3  
**Hours of Lab or Studio per week:** 0-6

---

**BIOL 576 - Microbial Ecology of Soils**

Credits: 3 (NR)  
Detection, identification, and physiological role of microorganisms in soils from root zone to deep subsurface. Emphasizes interactions of microorganisms, viruses through protests, and their functions in soil.

Equivalent to EVPP 576

**Prerequisite(s):** BIOL 305, 306, or permission of instructor.

---

**BIOL 577 - Biogeochemistry: A Global Perspective**

Credits: 3 (NR)  
Structure and function of ecosystems, their interactions as components of landscapes, and contributions to global environment. Emphasizes biogeochemical cycles of natural, disturbed, and managed ecosystems, and their integration at landscape and global level as related to current ecological problems such as transfer of nonpoint source pollutants, atmospheric deposition, stratospheric ozone depletion, and global change.

**Prerequisite(s):** BIOL 308, CHEM 211, 212 or permission of instructor.

---

**BIOL 578 - Mutation, DNA Repair, and Environmental Contamination**

Credits: 3 (NR)  
Overview of relationship between environmental contamination and genetic damage. Covers types of contamination that result in mutations, and molecular mechanisms of DNA damage and repair.

**Prerequisite(s):** BIOL 307 and 311.

---

**BIOL 579 - Molecular Evolution and Conservation Genetics**
Evolution of genes and gene families at molecular level, including gene duplication and divergence, positive and negative selection, genetic drift, and molecular clocks. Also includes selected applications in conservation genetics, such as molecular phylogenetics and estimates of population size.

Prerequisite(s): BIOL 311.

Corequisite(s): BIOL 471, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**BIOL 580 - Computer Applications for the Life Sciences**

Credits: 3 (NR)
Studies computer use in biological sciences. Combines lectures, supervised exercises on mainframe and microcomputers. Students present seminars on advanced application and complete project using computers to fulfill a major assignment associated with another course or employment.

Prerequisite(s): 12 credits of biology and one year of college mathematics, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**BIOL 581 - Estuarine and Coastal Ecology**

Credits: 3 (NR)
Emphasizes marine biology of estuarine and coastal habitats of Chesapeake Bay region, and factors affecting distribution and abundance of organisms.

Equivalent to EVPP 581

Prerequisite(s): Course in Ecology and permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**BIOL 582 - Estuarine and Coastal Ecology Laboratory**

Credits: 1 (NR)
Continues EVPP 546/BIOL 546 as the laboratory section focusing on the approach and methods of estuarine research, including analysis and communication of results.

Equivalent to EVPP 582

Corequisite(s): BIOL/EVPP 581
BIOL 583 - General Biochemistry

Credits: 4 (NR)
Structure and function of proteins, carbohydrates and lipids, enzymology, and metabolism and its controls. Emphasizes chemistry of nitrogen compounds.

Prerequisite(s): BIOL 213; CHEM 313, 314; or permission of instructor.

Hours of Lecture or Seminar per week: 4
Hours of Lab or Studio per week: 0

BIOL 585 - Eukaryotic Cell Biology Laboratory

Credits: 1-2 (NR)
Selected topics of laboratory procedures used in the study of eukaryotic cells.

Prerequisite(s): BIOL 484 or BIOL 682, or permission of instructor.

Notes: May be repeated one time with permission of program director.

Hours of Lecture or Seminar per week: 0-1
Hours of Lab or Studio per week: 3-6

BIOL 587 - Soil Ecology

Credits: 3 (NR)
Introduction to physical, chemical, and biological processes that govern development of soils and their ecological functions. Emphasizes central role that plants, microbes, and animals play in soil processes. Provides some training in system of soil classification and current methods to study soils.

Prerequisite(s): Course in general ecology or environmental science, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

BIOL 588 - Global Changes in Climate and Ecology

Credits: 3 (NR)
Focuses on global-level changes that influence ecology. Introduces climate system - past, present, and future - emphasizing links between ecological systems and changes in climate, land use, and element cycling. Topics include responses of forests, oceans to climate change; effects of elevated carbon dioxide on plants; effects of ultraviolet radiation on aquatic systems; salt marsh
responses to sea level rise; global eutrophication; desertification; carbon sequestration; and public policy implications of global change science.

**Prerequisite(s):** Course in ecology, environmental science or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

### BIOL 589 - Teaching Practicum

Credits: 1 (NR)  
Experience teaching biology in laboratory or in field under supervision of faculty member.

**Prerequisite(s):** Permission of instructor, chair, and course coordinator (if any).

**Notes:** Undergraduate assists instructor. May be repeated once.

**Hours of Lecture or Seminar per week:** 3-6  
**Hours of Lab or Studio per week:** 3

### BIOL 591 - Special Topics

Credits: 1-6 (RD)  
**Prerequisite(s):** Permission of instructor.

**Hours of Lecture or Seminar per week:** 1-6  
**Hours of Lab or Studio per week:** 1-21

### BIOL 607 - Fundamentals of Ecology

Credits: 3 (NR)  
Overview of concepts in physiological, population, community, and ecosystem ecology. Restricted to graduate students with little or no background in ecology.

Equivalent to EVPP 607

**Prerequisite(s):** Permission of department.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

### BIOL 608 - Topics in Biology
In-service course to strengthen and update teacher's knowledge of biology. Topics include organismal biology, cell biology, ecology, microbiology, or genetics.

**Prerequisite(s):** Employment or anticipated employment as science teacher.

**Notes:** Not available for credit toward MS in biology, or PhD in environmental science and public policy. May be repeated for credit with permission of department chair.

**Hours of Lecture or Seminar per week:** 1-4  
**Hours of Lab or Studio per week:** 0-9

### BIOL 610 - Bioremediation: Theory and Applications

Credits: 3 (NR)  
Provides basis for understanding proper application of bioremedial technologies to treatment for hazardous wastes. Includes evaluation of data to determine successful treatment.

Equivalent to EVPP 610

**Prerequisite(s):** Course in microbiology and either organic chemistry or microbial physiology or equivalent or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

### BIOL 611 - Techniques in Environmental Microbiology

Credits: 2 (NR)  
Laboratory exercises illustrate techniques to demonstrate microbial degradation, detection of microbes, isolation, and evaluation of physiological and genetic characteristics.

**Prerequisite(s):** Laboratory course in microbiology, or permission of instructor.

**Notes:** Open first to those enrolled in BIOL 610.

**Hours of Lecture or Seminar per week:** 1-6  
**Hours of Lab or Studio per week:** 4

### BIOL 622 - Methods and Principles of Animal Taxonomy

Credits: 3 (NR)  
Theoretical basis of techniques in animal classification, emphasizing practical application to laboratory problem dealing with a particular animal group.

**Prerequisite(s):** Course in evolution, or permission of instructor.
BIOL 640 - Environmental Biology

Credits: 3 (NR)
Patterns of climate and weather, tectonics, soil formation, and surface water and groundwater movements.

Prerequisite(s): Course in ecology, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

BIOL 641 - Envr Sci/Pub Policy

Credits: 3 (NR)
Prerequisite(s): Course in ecology or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

BIOL 643 - Microbial Ecology

Credits: 4 (NR)
Study of relationships between microorganisms and their natural environment, and methodology for observing their natural environment and biochemical activities in that environment.

Equivalent to EVPP 643

Prerequisite(s): Course in microbiology, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 3

BIOL 644 - Wetland Ecology and Mgmt

Credits: 4 (NR)
Prerequisite(s): CHEM 211, 212, BIOL 307, PHYS 106 and 107, or permission of instructor.

Hours of Lecture or Seminar per week: 4
Hours of Lab or Studio per week: 1-12
BIOL 645 - Freshwater Ecology

Credits: 3 (NR)
Prerequisite(s): EVPP 550 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

BIOL 648 - Population Ecology

Credits: 3 (NR)
Survey of ecological models and theory. Topics include population growth and regulation; competition; predator-prey, herbivore-plant, and parasite-host interactions; mutualism; and metapopulation ecology.

Equivalent to EVPP 648

Prerequisite(s): Course in ecology, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

BIOL 649 - Biological Resource Management

Credits: 3 (NR)
Applies modern ecological theories and methods to biological resource management in developing and developed countries. Explores problems in achieving optimum productivity of specific resources and application of systems analysis.

Prerequisite(s): Course in ecology, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

BIOL 650 - Environment Analysis and Modeling

Credits: 4 (NR)
Prerequisite(s): 8 hours of ecology or permission of instructor.

Hours of Lecture or Seminar per week: 4
Hours of Lab or Studio per week: 1-12

BIOL 665 - Environmental Hazards to Human Health

Credits: 3 (NR)
Health effects of chemical contaminants of air, water, and food resulting from industrialized society. Includes identifying,
evaluating, and controlling hazards.

**Prerequisite(s):** Courses in animal physiology and organic chemistry, or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**BIOL 666 - Human Genetics Concepts for Health Care**

Credits: 4 (NR)  
Principles of genetically determined diseases with emphasis on clinical aspects of these diseases, genetic counseling, and laboratory methods used in human genetics. Extended studies students preparing to enter medical or dental school are welcome.

**Prerequisite(s):** BS degree or enrollment in accelerated MS program.

**Notes:** Course in cell or molecular biology. Not available to students who have taken BIOL 572.

**Hours of Lecture or Seminar per week:** 4  
**Hours of Lab or Studio per week:** 0

---

**BIOL 668 - Advanced Techniques in Molecular Biology**

Credits: 4 (NR)  
Experimental studies using current methods for purification and characterization of biologically important compounds. Provides training for research in molecular biology.

**Prerequisite(s):** BIOL 568, or permission of instructor.

**Hours of Lecture or Seminar per week:** 2  
**Hours of Lab or Studio per week:** 6

---

**BIOL 669 - Pathogenic Microbiology**

Credits: 3 (NR)  
Molecular mechanisms of bacterial pathogenicity and immune response in infectious diseases.

**Prerequisite(s):** Courses in microbiology and biochemistry.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**BIOL 670 - Environmental Law for Biologists**
Study of laws and regulatory issues such as National Environmental Policy Act and Clean Water and Clean Air Acts. Emphasizes critical evaluation of alternatives to unresolved issues in environmental policies.

Prerequisite(s): Course in ecology, environmental biology, or permission of instructor.

**BIOL 675 - Aerosol Biology**

Credits: 4 (NR)
Provides students with familiarity with the state of the art aerosol equipment and techniques used in laboratory-based research pertaining to biological warfare or terrorism threats. Emphasis will be placed on biosafety procedures, techniques, and equipment used in conducting experiments with infectious organisms in a contained environment.

Prerequisite(s): Undergraduate courses in physics, math, and microbiology, and permission of the Director of the Center for Biodefense.

**BIOL 680 - Experimental Design and Analysis for the Life Sciences**

Credits: 4 (NR)
Advanced course in applying probability and statistics to research in life sciences. Examples drawn from environmental, medical, physiological, genetic, and chemical biology.

Prerequisite(s): Course in biostatistics, or permission of instructor.

**BIOL 682 - Advanced Eukaryotic Cell Biology**

Credits: 3 (NR)
Structure and function of biomembranes, cytoskeleton, and transport systems. Also discusses protein trafficking, cell cycle, and cell adhesion molecules.

Prerequisite(s): BIOL 483, CHEM 313, 314; or permission of instructor.

**BIOL 685 - Emerging Infectious Diseases**
Credits: 3 (NR)
Students will gain an understanding of the pathogenesis of emerging and/or re-emerging infectious diseases in terms of immune
response and systemic alterations. Factors contributing to emergence and virulence for each pathogen will be emphasized.
Epidemiology, disease progression, treatment strategies and/or control measures of identified emerging infectious diseases will
be discussed.

Prerequisite(s): BIOL 213 and 311, 482 or equivalent; or Permission of Instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring.

BIOL 690 - Introduction to Graduate Studies in Biology

Credits: 1-2 (NR)
Required of all new MS students in biology.

Hours of Lecture or Seminar per week: 1-2
Hours of Lab or Studio per week: 0

BIOL 691 - Current Topics in Biology

Credits: 1-4 (RT)
Study of current topics in biology as determined by instructor. Topics vary and center on emerging areas of investigation in the
biological sciences. May be repeated for credit.

Notes: May be repeated for credit.

Hours of Lecture or Seminar per week: 1-4
Hours of Lab or Studio per week: 0-6

BIOL 692 - Seminar in Biology

Credits: 1 (RD)
Topics vary.

Notes: May be repeated for credit.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0

BIOL 693 - Directed Studies in Biology
Credits: 1-8 (RD)
Study of topic not otherwise available in graduate program. May involve any combination of reading assignments, tutorials, lectures, papers, presentations, or laboratory or field study, determined in consultation with instructor.

Prerequisite(s): Permission of instructor, chair, and graduate committee.

Notes: May not be used to fulfill explicit undergraduate prerequisites for graduate work.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0
Grading: Graduate Special

BIOL 695 - Seminar in Molecular, Microbial, and Cellular Biology

Credits: 1 (RT)
Review and discussion of recent literature in specialized area. Includes student presentations.

Notes: May be repeated for credit.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0

BIOL 715 - Microbial Physiology

Credits: 3 (NR)
Comprehensive study of functioning of microbial cells, with emphasis on pathogens. Stresses growth, transport, cell-to-cell signaling, biofilm formation, antibiotic resistance, and secondary metabolites.

Prerequisite(s): Undergraduate lecture/lab course in microbiology, and course in biochemistry.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

BIOL 718 - Techniques in Microbial Pathogenesis

Credits: 3 (NR)
Laboratory-based class in which students perform current techniques in microbial pathogenesis.

Prerequisite(s): Admission to biosciences PhD or biology MS program, and permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 3

BIOL 720 - Microbial Metabolism
Discussions of catabolic and anabolic pathways of bacterial pathogens and regulation and integration of these pathways.

**Prerequisite(s):** Undergraduate lecture/lab course in microbiology, and course in biochemistry.

**BIOL 741 - Advanced Topics in Environmental Biology**

Credits: 1-4 (RT)

**Prerequisite(s):** 8 hours of ecology or permission of instructor.

**Hours of Lecture or Seminar per week:** 1-4

**Hours of Lab or Studio per week:** 1-12

**BIOL 745 - Environmental Toxicology**

Credits: 3 (NR)

Study of nature, distribution, and interaction of toxic chemicals released into the environment. Emphasizes effects on nonhuman biota, detection and fate of chemicals, and implications for government regulation.

Equivalent to EVPP 745

**Prerequisite(s):** Courses in ecology and physiology, or permission of instructor.

**Hours of Lecture or Seminar per week:** 3

**Hours of Lab or Studio per week:** 0

**BIOL 793 - Research in Biology**

Credits: 1-3 (RD)

Library, laboratory, or field investigation under supervisor's guidance.

**Prerequisite(s):** 8 graduate credits in BIOL, and permission of instructor and chair.

**Notes:** May be repeated for total 3 credits.

**Hours of Lecture or Seminar per week:** 3-9

**Hours of Lab or Studio per week:** 0

**Grading:** Graduate Special

**BIOL 798 - Master's Research Project**
Credits: 1-3 (RD)
Experimental or theoretical research project chosen and completed under guidance of graduate faculty member. Comprehensive report acceptable to student's advisory committee is required.

**Prerequisite(s):** Permission of instructor and department chair.

**Notes:** Students who take BIOL 793 may not receive more than 6 credits total for both BIOL 793 and 798.

**Hours of Lecture or Seminar per week:** 1-6  
**Hours of Lab or Studio per week:** 0  
**Grading:** S/NC

**BIOL 799 - Thesis**

Credits: 1-6 (RD)
Thesis research under direction of supervisor.

**Prerequisite(s):** 8 graduate hours in BIOL and permission of instructor.

**Notes:** Students who take BIOL 793 may not receive more than 6 credits total for both BIOL 793 and 799.

**Hours of Lecture or Seminar per week:** 1-6  
**Hours of Lab or Studio per week:** 0  
**Grading:** S/NC

**BIOL 800 - Studies for the Doctor of Philosophy in Education**

Credits: 1-6 (RD)
Program of study designed by student's discipline director and approved by student's doctoral committee. Students participate in research of discipline director and produce paper reporting original contributions. Paper presented in subsequent PhD Summer seminar.

**Prerequisite(s):** Open only to D.A.Ed. admitted to study in biology.

**Notes:** Enrollment may be repeated.

**Hours of Lecture or Seminar per week:** 1-6  
**Hours of Lab or Studio per week:** 1-12  
**Grading:** Graduate Special

**Biomedical Sciences (BMED)**

Offered by the College of Science

**BMED 601 - Cell and Molecular Physiology**
Credits: 4 (NR)
Principles of biochemistry and cell signaling and current concepts regarding physiological processes at the cellular and molecular levels.

Prerequisite(s): Admission to Advanced Biomedical Science certificate program

Hours of Lecture or Seminar per week: 4
Hours of Lab or Studio per week: 0
When Offered: Fall

BMED 602 - Biomedical Statistics

Credits: 3 (NR)
Basic principles of biostatistics and epidemiology in theoretical and practical context including: exploring and displaying data appropriately, exploring relationships between two variables, issues of gathering sample data, and understanding randomness and probability.

Prerequisite(s): Admission to Advanced Biomedical Science certificate program

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

BMED 603 - Cell Biology and Microscopic Anatomy

Credits: 3 (NR)
Examines basic histological techniques, ultrastructure of the cell, basic tissue types and histology of specific organ systems. Structure-functional and clinical correlations are described.

Prerequisite(s): Admission to Advanced Biomedical Science certificate program

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

BMED 604 - Fundamentals of Human Physiology

Credits: 5 (NR)
Essential concepts of physiology and mechanisms of body function are presented at various levels of organization, ranging from cellular and molecular to tissue and organ system levels. Emphasis is placed on understanding the integrated regulation of various body processes among the major systems.

Prerequisite(s): Admission to Advanced Biomedical Science certificate program

Hours of Lecture or Seminar per week: 5
Hours of Lab or Studio per week: 0
When Offered: Spring
BMED 605 - Introduction to Human Anatomy

Credits: 3 (NR)
Principles of anatomy as well as the pertinent anatomy associated with the thorax, abdomen, and pelvic cavities.

Prerequisite(s): Admission to Advanced Biomedical Science certificate program

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring

BMED 610 - Principles of Systems Biology

Credits: 2 (NR)
Students will build on their knowledge of cellular and molecular biology, genetics, and physiology to understand how these components combine to give rise to complex systems function found in biology.

Prerequisite(s): Admission to Biomedical Sciences MS program

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 1-3
When Offered: Fall

BMED 611 - Molecular Genetics

Credits: 2 (NR)
Students will build on their knowledge of molecular biology and genetics to understand how these components' functions are altered during the inception and course of human disease.

Prerequisite(s): Admission to Biomedical Sciences master’s degree

Hours of Lecture or Seminar per week: 4
Hours of Lab or Studio per week: 0
When Offered: Fall

BMED 612 - Principles of Gross Anatomy

Credits: 1 (NR)
Principles of anatomy as well as the pertinent anatomy associated with the thorax, abdomen, and pelvic cavities.

Prerequisite(s): Admission to Biomedical Science’s master’s program

Hours of Lecture or Seminar per week: 1-6
BMED 613 - Pathophysiology

Credits: 3 (NR)
Students build on knowledge of physiologic principles and apply the information to pathologic conditions. A higher understanding of the molecular and genetic basis of pathology will be developed as the mechanisms of disease are studied.

Prerequisite(s): Admission to Biomedical Sciences master’s program

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring

BMED 614 - Introduction to Neuroscience

Credits: 3 (NR)
Achieve specific knowledge of the developmental and evolutionary aspects of the nervous system, to introduce systems neurobiology through study of the visual system and motor system pathways.

Prerequisite(s): Admission to Biomedical Science’s master’s program

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring

BMED 651 - Physician and Society

Credits: 1 (RD)
Seminar series explores the cultural, social, economic and ethical factors that affect the practice of medicine in the 21st century.

Prerequisite(s): Admission to Advanced Biomedical Science certificate program

Notes: May be repeated for a maximum of two credits

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 0
Grading: Satisfactory/No Credit
When Offered: Fall, Spring

BMED 652 - Biomedical Career Pathways
Credits: 1 (NR)
Series of workshops, presentations and field trips. Students will learn study and interview skills to become better prepared to complete AMCAS and secondary applications to medical schools.

Prerequisite(s): Admission to Advanced Biomedical Studies certificate program.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0
When Offered: Spring

BMED 653 - Forum and Research

Credits: 3 (NR)
Bi-weekly seminar-style presentations and reading assignments, followed by short student reports, followed by a small group discussions on topics of current interest. Students will prepare a detailed research paper on a topic related to one of the forum topics.

Prerequisite(s): Admission to Biomedical Sciences master’s program

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring

BMED 660 - Molecular and Cellular Physiology

Credits: 3 (NR)
Biochemistry and physiology of the typical cell. The biochemical focus will be on the fundamentals of the forces affecting molecular interactions, the structure-function relationships of proteins and carbohydrates, kinetics and catalysis, and high-throughput analysis of proteins in clinical samples. The physiological focus will be on the structure and function of subcellular organelles, and the foundations of some specialized cells – blood and lymphoid cells, muscle cells, and nerve cells.

Prerequisite(s): Admission to Biomedical Sciences master’s program

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

BMED 661 - Metabolism, Nutrition and Endocrinology

Credits: 4 (NR)
Students will learn the pathways involved in energy metabolism, biosynthesis, and catabolism of waste products in preparation for excretion. Major emphasis will be on the coordination of metabolic pathways in the major organs and tissues through hormonal regulation.

Prerequisite(s): Admission to Biomedical Sciences master’s program
BMED 662 - Cardiopulmonary Biology

Credits: 1-5 (RD)
Anatomy, hemodynamic function, and electrophysiology of the cardiovascular and respiratory system.

Prerequisite(s): Admission to the Biomedical Sciences master’s program.

BMED 663 - Gastrointestinal Biology

Credits: 2 (NR)
Embryologic development, gross and micro-anatomy, and physiologic function of the GI tract. Emphasis will be placed on understanding the integrated regulation of GI processes.

Prerequisite(s): Admission to Biomedical Sciences master’s program

BMED 664 - Renal Biology

Credits: 2 (NR)
Structural, functional and integrative aspects of the kidney and urinary system; identify the basic physiologic mechanisms that underpin renal function; and explain the role the kidney plays in fluid and electrolyte homeostasis, including acid-base balance.

Prerequisite(s): Admission to Biomedical Sciences master’s program

BMED 665 - Sexual Development and Reproduction

Credits: 3 (NR)
Cellular and anatomical components of reproduction and early development. These components include the development of the reproductive track, development of gametes, fertilization, and formation of the germ layers and endocrinology of the system.
Prerequisite(s): Admission to the Biomedical Sciences master’s program

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring

Biosciences (BIOS)

Offered by the College of Science

BIOS 701 - Biochemical Systematics

Credits: 3 (NR)
Introduces biochemical systems to investigate complex, multicomponent, dynamic functions of cellular systems. Readings include articles from current literature in molecular biosciences. Application of molecular techniques within biosciences is now universal, and the underlying question remains "What is the structure of a cell, and how does it function?"

Equivalent to BINF 701

Prerequisite(s): General biochemistry.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

BIOS 702 - Research Methods

Credits: 3 (NR)
Trains students in research methodologies, techniques, and data analysis in life sciences. Divided into three modules that introduce separate but equally significant components of any research project: parameters required to outline and synthesize a problem, techniques of measurement and analysis used by life scientists, and approaches for data analysis and interpretations.

Prerequisite(s): Admission to PhD program in biosciences.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

BIOS 703 - Laboratory Rotation

Credits: 3 (RT)
Intensive introduction to research laboratory in biosciences. Students read background material pertinent to problem under study, learn and practice research methods of laboratory, and formulate short final project that may be proposal or actual project, demonstrating some mastery of techniques and approaches employed.

Prerequisite(s): Admission to PhD program in biosciences.
Notes: Should be repeated three times (except by permission of concentration director).

Hours of Lecture or Seminar per week: 0  
Hours of Lab or Studio per week: 3  
Grading: Graduate Special

BIOS 704 - Topics in Biosciences

Credits: 1 (RT)  
Combines invited seminars from internal and external faculty with graduate student seminars. Seminar presentation required for advancement to candidacy, generally given in last semester before candidacy. Includes discussion section led by course coordinator.

Prerequisite(s): Admission to PhD program in biosciences.

Notes: Required of all students during each semester prior to advancement to candidacy. Should be repeated three times (except by permission of concentration director).

Hours of Lecture or Seminar per week: 1  
Hours of Lab or Studio per week: 0

BIOS 710 - Current Topics in Bioscience

Credits: 1-3 (RT)  
Studies current topic in biosciences.

Prerequisite(s): Admission to biosciences PhD or biology MS program.

Notes: Topics vary. May be repeated for credit with permission of concentration director.

Hours of Lecture or Seminar per week: 1-3  
Hours of Lab or Studio per week: 0

BIOS 719 - Extremophiles

Credits: 5 (NR)  
Hours of Lecture or Seminar per week: 5  
Hours of Lab or Studio per week: 1-12

BIOS 740 - Laboratory Methods in Functional Genomics and Biotechnology

Credits: 3 (NR)  
Current laboratory techniques in molecular biology and genomics, including nucleic acid isolation, gene cloning and sequencing,
gel blot analysis, PCR, in vitro mutagenesis, and theory and practice of DNA microarray analysis of gene expression. Topics may vary from year to year depending on advances in field.

**Prerequisite(s):** Graduate standing and undergraduate courses in genetics and molecular biology.

**Hours of Lecture or Seminar per week:** 2  
**Hours of Lab or Studio per week:** 3

---

**BIOS 741 - Genomics**

Credits: 3 (NR)  
Genetic structure and function at whole genome level. Includes some sequence analysis, comparative genomics, classical genetics, and developmental genetics, as well as analysis of syntenic groups, isochores, gene families, genetic complexity, C value paradox, directed discovery of gene functions, and animal models of human disease. Readings from recent texts and primary research literature. Students expected to give one or two oral presentations of primary research papers, as well as complete midterm and final exams.

**Prerequisite(s):** At least one undergraduate course in genetics and molecular biology, or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**BIOS 742 - Biotechnology**

Credits: 3 (NR)  
Theory and applications of biotechnology. Includes promoter design, gene fusions, protein targeting, techniques of protein purification, construction of transgenic organisms, cloning of animals and plants, ethical and legal issues. This is a relatively new area of study that is rapidly changing; course strives to keep students abreast of current literature.

**Prerequisite(s):** Undergraduate course work in genetics and molecular biology.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**BIOS 743 - Genomics, Proteomics, and Bioinformatics**

Credits: 3 (NR)  
Fundamental methods for analyzing genomic and proteomic data, including nucleic acid and protein sequences, pair-wise and multiple alignment, database search methods, clustering and presentation of data, prediction modeling, and survey of available software and freeware tools.

**Prerequisite(s):** Admission to biosciences PhD or biology MS program.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0
BIOS 744 - Molecular Genetics

Credits: 3 (NR)
Develops understanding of principles of modern molecular genetics and methods of investigation of genomes of pro- and eukaryotes, including types of genetic manipulations conducted in research laboratories today.

Prerequisite(s): Undergraduate course work including BIOL 311; CHEM 313, 314, 315, and 318; equivalents; or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

BIOS 760 - Seminar in Molecular Systematics

Credits: 1-3 (RD)
Presentations and discussion by students and faculty of research papers and projects.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0

BIOS 761 - Dispersal Patterns of Biological Agents

Credits: 3 (NR)
Introduces military and terrorist methods of dispersal patterns. Covers physics of aerosols, engineering and mechanics of building ventilation systems, and mechanical dissemination including handheld, automatic, vehicle, and truck-mounted systems. Also covers viability of specific agents involved.

Prerequisite(s): Admission to biosciences PhD or biology MS program, and permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

BIOS 762 - Phylogenetic Analysis

Credits: 4 (NR)
A consideration of molecular systematics techniques in biology, especially cladistics and phenetics methods. Species concepts, biological nomenclature, and classifications will also be discussed. Laboratory will emphasize phylogenetic methods using online sources of comparative data.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 3

BIOS 765 - Molecular Systematics
Comparative evolutionary techniques applied to molecular data. Use of molecular techniques, molecular databases, and analytical techniques will be covered.

**BIOS 767 - Molecular Evolution**

Credits: 3 (NR)
A review of the diversity and organization of genomes and evolutionary processes that operate at the molecular level. Emphasis will be placed on processes of molecular evolution and techniques used to analyze these processes.

**BIOS 782 - Interdisciplinary Issues in Bioethics: Law and Policy**

Credits: 3 (NR)
Prerequisite(s): BIOS 780 and 781.

**BIOS 898 - Directed Studies in Biosciences**

Credits: 1-12 (RD)
Studies of specialized topics in biosciences. Specific arrangements for designing scope and area of study to be determined in consultation with instructor. May involve literature searches and review, workshops, or tutorials.

Prerequisite(s): Permission of research advisor.

**BIOS 899 - Directed Research in Biosciences**

Credits: 1-12 (RD)
Research on a pertinent topic in biosciences. Scope and subject of research to be determined by instructor.

Prerequisite(s): Permission of research advisor.

Grading: Graduate Special
BIOS 998 - Doctoral Dissertation Proposal

Credits: 1-6 (RD)
Research and writing of research proposal for doctoral dissertation.

Prerequisite(s): Permission of research advisor.

BIOS 999 - Doctoral Dissertation Research

Credits: 1-12 (RD)
Research in concentration pertinent to students' program of study.

Prerequisite(s): Admission to candidacy or approval by research advisor.

Notes: Maximum of 24 credits can be applied toward degree.

Business Legal Studies (BULE)

Offered by the School of Management

If a student takes noncore, upper-level business courses before admission to SOM, those courses will not count on an undergraduate degree application for any major in the school, except as general elective credit. A grade of C or higher must be presented on the graduation application for each upper-level course in the major. Course prerequisites are strictly enforced. Degree status is defined as formal admission to BS degree status in SOM.

BULE 302 - Legal Environment of Business

Credits: 3 (NR)

Survey of the legal environment of business, emphasizing legal concepts and legal reasoning to prepare students to recognize legal problems and formulate appropriate responses. Topics include the federal and state court systems, constitutional and administrative law, business torts and crimes, contracts and business ethics. Lecture, discussion, cases.
School of Management students will not be permitted to make more than three attempts to achieve a C or higher in BULE 302. Those who do not successfully complete this course within three attempts will be terminated from their major and will not be eligible to receive a degree from the School of Management. For more information about this, see the "Termination from the Major" section under Academic Policies.

Prerequisite(s): Sophomore standing.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring, Summer

BULE 402 - Commercial Law

Credits: 3 (NR)
Survey of commercial law emphasizing the Uniform Commercial Code. Lecture, discussion, cases.

Prerequisite(s): C or higher in BULE 302, degree status. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

Business Management (BMGT)

BMGT 603 - Economics for Successful Firm Management

Credits: 3 (NR)
Provides fundamental understanding of applying microeconomics concepts to managerial decision making. Explores principles of microeconomic theory, including market supply and demand, production and cost functions, industry structure, and product and resource pricing. Due to the presentation and application of course material, this course can only be taken by students enrolled in the Master of Arts in Business Management Program.

Prerequisite(s): Admission to BMGT program.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

BMGT 612 - Performance Evaluation Through Cost Management

Credits: 1.5 (NR)
Examines impact of cost and cost allocation on performance and evaluation. Due to the presentation and application of course material, this course can only be taken by students enrolled in the Master of Arts in Business Management Program.
Prerequisite(s): Admission to BMGT program.

BMGT 613 - Financial Reporting and Firm Analysis

Credits: 3 (NR)
Foundation course focusing on economics and analysis of business transactions and financial reporting issues. Topics include introduction to accounting framework in financial reporting; analysis of financial statements, economic events and impact on financial reports, and impact of accounting methods on financial reports. Due to presentation and application of course material, course only open to students enrolled in MA in Business Management Program.

Prerequisite(s): Admission to BMGT program.

BMGT 623 - Marketing and Firm Performance

Credits: 3 (NR)
Develops market-based knowledge and skills for effective marketing decision making, strategy design, implementation, and evaluation in variety of institutional and competitive situations. Addresses importance of companies being market-driven and customer-focused. Emphasis on case studies, team work, and projects. Due to the presentation and application of course material, this course is only open to students enrolled in MA in Business Management Program.

Prerequisite(s): Admission to BMGT program.

BMGT 633 - Statistical Analysis for Management

Credits: 3 (NR)
Use statistical methods as analytical tools for understanding and solving business problems and supporting business decision making. Includes descriptive statistics, sampling, inferencing and regression. Extensive use of applied business scenarios to illustrate concepts and computer software for data analysis. Due to presentation and application of course material, this course can only be taken by students in MA in Business Management Program.

Prerequisite(s): Admission to BMGT program.

BMGT 638 - Managing Business Operations in a Global Environment
Credits: 3 (NR)
Focuses on design, planning, and control activities to produce and deliver goods/services in organizations. Introduces operations management decisions; operations strategy, process analysis and design, capacity planning, supply chain management, total quality management, and project management. Uses quantitative modeling, case studies, and computer software to analyze/solve problems. Due to the presentation and application of course material, course only open to MA Business Management students.

Prerequisite(s): Admission to BMGT program.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

BMGT 643 - Financial Management in a Global Environment

Credits: 3 (NR)
