Provides an overview of accessibility strategies and input modifications designed for use by individuals with disabilities. Exploration experiences enable students to locate, use and train others on the range of technologies available as well as design opportunities for constructing unique devices. Field experience may be required.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Summer, Spring

**EDAT 524 - Universal Design for Learning**

Credits: 3 (NR)
Describes the foundations and principles of Universal Design for Learning (UDL). Focuses on teaching students with various disabilities, including those with learning disabilities from preschool to postsecondary education implementing software and other UDL strategies. Students have the opportunity to develop and implement ULD lesson plans. Field experience may be
EDAT 525 - Software and Mobile Applications for Individuals with Disabilities

Credits: 3 (NR)
Provides overview with software, mobile applications, and accessibility features. Identifies design features to meet individual’s special needs; provides hands-on experiences with the range of software and mobile applications that incorporate evidence-based strategies for individuals with disabilities across environments, settings and the life span. Field experience may be required.

EDAT 530 - Assistive Technology for Independent Living

Credits: 3 (NR)
Provides an overview of activities of daily living (ADLs) for individuals who have disabilities and the elderly. ADLs include but are not limited to assistive technologies that support dressing, feeding, hygiene, housework and safety. Field experience may be required.

EDAT 531 - Assistive Technology in the Workplace

Credits: 3 (NR)
Provides an overview of workplace accommodations, functional barriers commonly experienced in the workplace, assistive technology, ergonomic strategies, and universal design approaches to improve performance of work activities for individuals with disabilities, including but not limited to mobility, dexterity, sensory, communication, and cognitive impairments. Field experience may be required.

EDAT 597 - Special Topics in Assistive Technology

Credits: 1-6 (RT)
Provides advanced study on selected topic or emerging issue in assistive technology.
EDAT 599 - Independent Study in Assistive Technology

Credits: 1-6 (RT)
Studies assistive technology research, theory, or practice under direction of faculty member.

EDAT 610 - Designing Adapted Environments

Credits: 3 (NR)
Provides an overview of environmental adaptations for individuals with disabilities to increase their access to community, workplace, and school activities. Covers legal issues within the ADA for adapting environments and addresses programmatic and physical access issues. Field experience is required.

Prerequisite(s): EDAT 510.

Notes: Field Experience required.

EDAT 649 - Assistive Technology Assessment

Credits: 3 (NR)
Provides an overview of AT consideration and assessment procedures with emphasis on generated assessment plan and written report. Review and administer existing assistive technology (AT) evaluation instruments. Field experiences required.

Prerequisite(s): EDAT 510.

Notes: Field Experience required.

Astronomy (ASTR)
ASTR 103 - Astronomy

Credits: 3 (NR)
Introduction to origin of life, Earth, planets and sun, stars, galaxies, quasars, nature of space radiation, and general theory of relativity.

Fulfills Mason Core requirement in natural science (nonlab).

Notes: Not for physics majors.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ASTR 111 - Introductory Astronomy: The Solar System

Credits: 3 (NR)
Topics include history of astronomy, evolution of the solar system, properties of planets, scientific method, critical thinking, nature of light, and principles of telescope design.

Fulfills Mason Core requirement in natural science (lab).

Notes: ASTR 111 and 112 can be used to fulfill a 4-credit lab science requirement; not for physics majors.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ASTR 112 - Introductory Astronomy Lab: The Solar System

Credits: 1 (NR)
Laboratory course associated with ASTR 111.

Fulfills Mason Core requirement in natural science (lab).

Notes: ASTR 111 and 112 can be used to fulfill a 4-credit lab science requirement; not for physics majors.

Hours of Lecture or Seminar per week: 1-12
Hours of Lab or Studio per week: 3

ASTR 113 - Introductory Astronomy: Stars, Galaxies, and the Universe

Credits: 3 (NR)
Topics include electromagnetic radiation, stellar evolution, interstellar medium, galaxies, cosmology, scientific method, and

George Mason University
2014-2015 Official University Catalog
1682
critical thinking.

Fulfills Mason Core requirement in natural science (lab).

Notes: ASTR 113 and 114 can be used to fulfill a 4-credit lab science requirement; not for physics majors.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ASTR 114 - Introductory Astronomy Lab: Stars, Galaxies, and the Universe

Credits: 1 (NR)
Laboratory course associated with ASTR 113.

Fulfills Mason Core requirement in natural science (lab).

Notes: ASTR 113 and 114 can be used to fulfill a 4-credit lab science requirement; not for physics majors.

Hours of Lecture or Seminar per week: 1-12
Hours of Lab or Studio per week: 3

ASTR 115 - Finding New Worlds

Credits: 4 (NR)
Topics include the search for planets outside the solar system, and new developments in the theory of solar system formation with an emphasis on student-led investigation using public data sources.

Fulfills Mason Core requirement in natural science (lab).

Notes: ASTR 115 can be used to fulfill a 4-credit lab science requirement; not for physics majors.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 3
When Offered: Spring

ASTR 210 - Introduction to Astrophysics

Credits: 3 (NR)
Introduction to astrophysics for scientists. Topics include astronomical measurement, celestial mechanics, electromagnetic radiation, stellar structure and evolution, the interstellar medium, galaxies, and a selection of topics at the forefront of astrophysics including space physics, exoplanets, galaxies, and cosmology.

Corequisite(s): PHYS 262.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring
**ASTR 301 - Astrobiology**

Credits: 3 (NR)
Physical science perspective on origin and evolution of life on Earth and how life, in turn, has significantly influenced Earth's evolution. Topics include origin of Earth, mechanisms and sites for origin of life, co-evolution of life and Earth's atmosphere, habitability of planets, and the search for extraterrestrial life.

**Prerequisite(s):** MATH 108 or 113.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**ASTR 302 - Foundations of Cosmological Thought**

Credits: 3 (NR)
Examines scientific, historical, and philosophical foundations and development of cosmological thought from antiquity to the present. Emphasizes qualitative understanding of the development of cosmology concluding with the present concept of origin and evolution of universe.

Fulfills Mason Core requirement in natural science (nonlab).

**Notes:** No advanced background in mathematics or natural sciences required.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**ASTR 328 - Stars and Interstellar Medium**

Credits: 3 (NR)
Stellar structure and evolution; radiative transfer; the interstellar medium. The course includes computational work. Previous programming experience is not required, as it will be developed in the course, but it is helpful.

Equivalent to PHYS 328.

**Prerequisite(s):** ASTR 210, PHYS 262.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**ASTR 390 - Topics in Astronomy**

Credits: 1-4 (RT)
Selected topics not covered in fixed-content courses.
ASTR 401 - Computer Simulation in Astronomy

Credits: 3 (NR)
Techniques and methods to simulate astronomical phenomena using a computer. Examples taken from a wide variety of astronomical phenomena, including radiation transfer in astrophysical objects, self-gravitating systems, hydrodynamics, and stellar models.

Prerequisite(s): ASTR 210.

Notes: Emphasizes hands-on projects.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ASTR 402 - Methods of Observational Astronomy

Credits: 4 (NR)
An introduction to the observational, statistical, and computational techniques used by observational astronomers. The course covers some of the basic skills needed to pursue a career in astronomy and is designed around preparing for and executing an observational research project. Fulfills writing intensive requirement in the major.

Fulfills writing intensive requirement in the major.

Designated as a research and scholarship intensive course.

Prerequisite(s): ASTR 210.

Notes: This course meets the writing-intensive requirement.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 3

ASTR 403 - Planetary Sciences

Credits: 3 (NR)
Introduction to the physics and chemistry of planets and their natural satellites, asteroids, and comets. Topics include history of the solar system; origin and evolution of planets, their internal structure and atmospheres; and analytical techniques used in remote and in situ study.

Prerequisite(s): ASTR 210, PHYS 262.
ASTR 404 - Galaxies and Cosmology

Credits: 3 (NR)
The structure of the Milky Way as the basis for our knowledge of galaxies; the properties of galaxies from our local neighborhood out to the youngest galaxies in the far distant universe; observational and theoretical approaches to the structure and evolution of galaxies; the basics of cosmology and the formation of structure in the universe. Computational tools introduced in ASTR 328 are developed further.

Prerequisite(s): ASTR 328.

ASTR 405 - Honors Thesis in Astronomy I

Credits: 3 (NR)
Project chosen and completed under the guidance of a faculty member, resulting in a written thesis. An oral progress report is required for ASTR 405.

Prerequisite(s): 21 credit hours in Physics and Astronomy and acceptance into the astronomy honors program.

ASTR 406 - Honors Thesis in Astronomy II

Credits: 3 (NR)
Project chosen and completed under the guidance of a faculty member, resulting in a written thesis. An oral progress report is required for ASTR 406.

Prerequisite(s): ASTR 405 and 21 credit hours in Physics and Astronomy and acceptance into the astronomy honors program.

ASTR 408 - Senior Research

Credits: 3 (RD)
Independent work under guidance of faculty member on research project in experimental, observational, or theoretical astronomy.
Prerequisite(s): 15 credits of ASTR courses.

Notes: Students may not receive more than 6 credits of ASTR 408 and 409. Written report on project required. May be taken twice with department permission.

Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0

ASTR 409 - Astronomy Internship

Credits: 3 (NR)  
On-the-job experience for astronomy majors in industry or government laboratories, including summer research programs. Students work in observational, experimental, or theoretical astronomy, and prepare written report at end of internship.

Prerequisite(s): 75 credits, 15 ASTR credits, and permission of department.

Notes: See department for other requirements and application procedure prior to enrollment. Students may not receive more than 6 credits of ASTR 408 and 409.

Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0

ASTR 532 - Phys Interplanetary Med

Credits: 3 (NR)  
Prerequisite(s): PHYS 303, 305, 308; MATH 214.

Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0

ASTR 535 - Space Instrumentation and Exploration

Credits: 3 (NR)  
Survey of instruments, devices, and methods for space and planetary exploration, including remote sensing of Earth and other solar system bodies, and planned manned and unmanned missions by the United States and other countries.

Equivalent to CSI 660

Prerequisite(s): PHYS 262 and MATH 213.

Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0

ASTR 590 - Selected Topics in Astronomy and Astrophysics
Credits: 1-6 (RD)
Advanced topics from recent theoretical or observational developments and their applications. Satisfies needs of professional community to keep abreast of current developments.

Prerequisite(s): Permission of instructor.

Hours of Lecture or Seminar per week: 0-6
Hours of Lab or Studio per week: 0

ASTR 602 - Methods of Observational Astronomy

Credits: 4 (NR)
An introduction to the observational, statistical, and computational techniques used by observational astronomers. The course covers some of the basic skills needed to pursue a career in astronomy and is designed around preparing for and executing an observational research project.

Hours of Lecture or Seminar per week: 4
Hours of Lab or Studio per week: 0
When Offered: Spring

ASTR 603 - Planetary Sciences

Credits: 3 (NR)
Equivalent to ASTR 703 (2010-2011 Catalog)

Prerequisite(s): MATH 213 and PHYS 262

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ASTR 604 - Galaxies and Cosmology

Credits: 3 (NR)
The structure of the Milky Way as the basis for our knowledge of galaxies; the properties of galaxies from our local neighborhood out to the youngest galaxies in the far distant universe; observational and theoretical approaches to the structure and evolution of galaxies; the basics of cosmology and the formation of structure in the universe.

Prerequisite(s): ASTR 328 and MATH 214.

Corequisite(s): PHYS 308.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring
ASTER 628 - Relativity

Credits: 3 (NR)
Equivalent to ASTR 766 (2010-2011 Catalog)

Prerequisite(s): MATH 214, PHYS 262, 303, 305.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring

ASTER 660 - Plasma Physics for Space and Astrophysics

Credits: 3 (NR)
Equivalent to PHYS 660

Prerequisite(s): PHYS 305

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

ASTER 680 - Physics of Interstellar Media

Credits: 3 (NR)
Physical processes in the interstellar media. Topics include the production and transfer of radiation, ionization and recombination, atomic and molecular excitation, dust physics, gas heating and cooling, and star formation.

Prerequisite(s): PHYS 402 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ASTER 730 - Stellar Astrophysics

Credits: 3 (NR)
Survey of contemporary astrophysics. Topics include physical concepts, stellar spectra, Hertzsprung-Russell diagram, stellar atmospheres, stellar structure, interstellar matter, stellar evolution, high-energy phenomena, hydrodynamical processes in astrophysics, accretion disk formation, and shock formation.

Equivalent to ASTR 530 (2010-2011 Catalog)

Prerequisite(s): MATH 214, PHYS 303, 305, 308.

Hours of Lecture or Seminar per week: 3
ASTR 761 - N-Body Methods and Part Sim

Credits: 3 (NR)
Covers particle methods to solve variety of physical systems. Emphasizes study and development of numerical results, and visualization of these results in complex physical systems. Applications and projects include stellar and galaxy dynamics, smoothed particle hydrodynamics, plasma simulations, and semiconductor device theory algorithms on parallel and vectorized systems.

Equivalent to CSI 761

Prerequisite(s): PHYS 613 and CSI 717 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ASTR 764 - Computational Astrophysics

Credits: 3 (NR)
Covers statistical mechanics concepts important in astrophysics. Presents unified approach to particle acceleration and interaction theory based on analytical and numerical analysis of Boltzmann and Liouville equations. Discusses computational methods relevant to particle transport problems, with emphasis on Fokker-planck and Monte Carlo solution techniques. Applications from space sciences include studies of cosmic ray acceleration, photon comptonization, particle transport in the near-Earth environment, energy transport in stellar atmospheres, and self-gravitating system dynamics.

Equivalent to CSI 764

Prerequisite(s): ASTR 530, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ASTR 765 - High-Energy and Accretion Astrophysics

Credits: 3 (NR)
Overview of the field of atomic and nuclear physics, including nuclear reactions of use to high-energy astrophysics. Discusses radiation processes in cosmic plasmas emphasizing quantum mechanical calculations; stellar evolution and nucleosynthesis; computational models of stellar evolution; binary stars and accretion disks; numerical models of the structure of accretion disks; compact stars, white dwarfs, neutron stars, and black holes; acceleration processes and cosmic rays; interstellar medium and propagation of cosmic rays; high-energy processes in the center of galaxies; and ground- and space-based techniques and observations.

Equivalent to CSI 765

Prerequisite(s): PHYS 502 and 513, and ASTR 530; or permission of instructor.
ASTR 769 - Topics in Space Sciences

Credits: 3 (NR)
Selected topics in space sciences not covered in fixed-content space sciences courses.

Equivalent to CSI 769

Prerequisite(s): Permission of instructor.

Notes: May be repeated for credit as needed.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ASTR 790 - Advanced Topics in Astronomy and Astrophysics

Credits: 1-6 (RD)
Advanced topics from recent theoretical or observational developments and applications.

Prerequisite(s): Graduate standing and permission of instructor.

Notes: Satisfies need of professional community to keep abreast of current developments.

Hours of Lecture or Seminar per week: 0-6
Hours of Lab or Studio per week: 0

ASTR 796 - Directed Reading and Research

Credits: 1-12 (RD)
Reading and research on a specific topic in astronomy, astrophysics, or related field under direction of faculty member.

Prerequisite(s): Admission to master's program and permission of instructor.

Notes: May be repeated as needed.

Hours of Lecture or Seminar per week: 1-12
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

ASTR 798 - Research Project
Credits: 3 (NR)
Research project chosen and completed under guidance of graduate faculty member resulting in an acceptable technical report.

Prerequisite(s): 9 credits and permission of instructor.

Notes: May not be repeated.

Hours of Lecture or Seminar per week: 1-3  
Hours of Lab or Studio per week: 0  
Grading: Satisfactory/No credit only

**ASTR 799 - Master's Thesis**

Credits: 1-6 (RD)
Research project chosen and completed under guidance of graduate faculty member resulting in acceptable technical report and oral defense acceptable to three-faculty-member thesis committee.

Prerequisite(s): 9 credits, and permission of instructor.

Notes: May not be repeated.

Hours of Lecture or Seminar per week: 1-3  
Hours of Lab or Studio per week: 0  
Grading: Satisfactory/No credit only

**ASTR 998 - Doctoral Dissertation Proposal**

Credits: 1-12 (RD)
Covers development of a research proposal under the guidance of a dissertation director and the doctoral committee. The proposal forms the basis for the doctoral dissertation.

Prerequisite(s): Admission to physics doctoral program and permission of advisor.

Notes: May be repeated as needed; however, no more than 24 credits in ASTR/PHYS 998 and ASTR/PHYS 999 may be applied toward satisfying doctoral degree requirements in the physics PhD program. Out of the 24, no more than 12 credits of ASTR/PHYS 998 may be applied.

Hours of Lecture or Seminar per week: 0  
Hours of Lab or Studio per week: 0  
Grading: Satisfactory/No credit only

**ASTR 999 - Doctoral Dissertation**

Credits: 1-12 (RD)
Doctoral research performed under direction of dissertation director.

Prerequisite(s): Admission to doctoral candidacy in physics doctoral program and permission of advisor.
Notes: May be repeated as needed; however, no more than 24 credits in ASTR/PHYS 998 and ASTR/PHYS 999 may be applied toward satisfying doctoral degree requirements in the physics PhD program.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0
Grading: S/IP

Athletic Training (ATEP)

Offered by the College of Education and Human Development

ATEP 120 - First Aid and Emergency Care

Credits: 2 (RD)
Covers emergency management procedures for various injuries and sudden illnesses, including 1- and 2- person CPR, and use of an Automated External Defibrillator (AED) for cardiac emergencies and basic first aid techniques; certification in first aid and CPR.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 1
When Offered: Fall, Summer, Spring

ATEP 150 - Introduction to Athletic Training and Preventative Care Techniques

Credits: 3 (NR)
Introduces the profession of athletic training and the basic principles of preventative care commonly used in the profession. Topics will include athletic training facility organization and procedures; protective sports equipment; construction of protective devices; and application of protective taping, braces, wrapping, and protective pads. Areas to be studied include the role of the athletic trainer in sports medicine, mechanisms of athletic injuries, tissue response to injury, blood-borne pathogens, introductory techniques of the assessment and evaluation of athletic injuries and emergency procedures.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 2

ATEP 180 - Emergency Medical Care for Physically Active Populations

Credits: 0-4 (NR)
An investigation of the scientific and philosophical foundations of pre-hospital emergency care principles pertinent to a physically active population. Students develop knowledge, critical thinking, and problem solving skills necessary to correctly apply emergency care principles and associated skills in a variety of clinical and professional settings. Upon successful completion of this course, the student will earn Emergency Cardiac Care (ECC) and First Aid certifications.

Prerequisite(s): BIOL 124
Corequisite(s): BIOL 125

Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 1

**ATEP 201 - Medical and Scientific Terminology**

Credits: 3 (NR)  
Foundations of scientific and medical vocabulary including prefixes, suffixes and stems used to form compound words.

Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0  
When Offered: Fall, Spring, Summer

**ATEP 203 - Prevention, Recognition, and Management of Athletic and Fitness Related Injuries**

Credits: 3 (NR)  
Provides coaches and fitness professionals with theory on the prevention, recognition, and management of injuries and conditions that occur in athletic competition and recreational fitness activities.

Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0  
When Offered: Fall, Spring, Summer

**ATEP 205 - Cultural Competence**

Credits: 3 (NR)  
Explores cultural competence and its integration for effective professional practice. Includes communication styles, daily living practices, common sensitivities, self-awareness, and historical cultural implications in multicultural environments.

Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0  
When Offered: Fall

**ATEP 250 - Physical Assessment of the Lower Body**

Credits: 3 (NR)  
An analysis of the principles of physical assessment of the lower body.

Prerequisite(s): Grade of C or higher in ATEP 150, ATEP 180, BIOL 124, BIOL 125, HEAL 110, and ATEP 300.

Corequisite(s): ATEP 255, ATEP 256
Notes: Formal acceptance to the professional phase of the ATEP.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

ATEP 255 - Clinical Techniques I: Physical Assessment of the Lower Body

Credits: 3 (NR)
An analysis of physical assessment clinical techniques of the lower body (including the lower extremity and abdomen).

Prerequisite(s): Grade of C or higher in ATEP 150, ATEP 180, BIOL 124, BIOL 125, HEAL 110, and ATEP 300.

Corequisite(s): ATEP 250 and ATEP 256

Notes: Formal acceptance to the professional phase of the ATEP.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

ATEP 256 - Practicum I: Physical Assessment of the Lower Body

Credits: 3 (NR)
A clinical practicum field experience under the direct supervision of a preceptor with emphasis on physical assessment of the lower body.

Prerequisite(s): Grade of C of higher in ATEP 150, ATEP 180, BIOL 124, BIOL 125, HEAL 110, and ATEP 300.

Corequisite(s): ATEP 250 and 255

Notes: Formal acceptance to professional phase of the ATEP; Current Emergency Cardiac Care (ECC) Certification.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

ATEP 260 - Physical Assessment of the Upper Body

Credits: 3 (NR)
An analysis of the principles of physical assessment of the upper body.

Prerequisite(s): Grade of C or higher in ATEP 150, ATEP 180, ATEP 250, ATEP 255, ATEP 256, ATEP 300, BIOL 124, BIOL 125, HEAL 110, HEAL 230.

Corequisite(s): ATEP 265, ATEP 266.
ATEP 265 - Clinical Techniques II: Physical Assessment of the Upper Body

Credits: 3 (NR)
An analysis of physical assessment clinical techniques of the upper body (including the upper extremity, head, and neck).

Prerequisite(s): Grade of C or higher in ATEP 150, ATEP 180, ATEP 250, ATEP 255, ATEP 256, ATEP 300, BIOL 124, BIOL 125, HEAL 110, HEAL 230.

Corequisite(s): ATEP 260, 266

Notes: Formal acceptance to the professional phase of the ATEP

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring

ATEP 266 - Practicum II: Physical Assessment of the Upper Body

Credits: 3 (NR)
A clinical practicum field experience under the direct supervision of a preceptor with emphasis on physical assessment of the upper body.

Prerequisite(s): Grade of C or higher in ATEP 150, 180, 250, 255, 256, 300; BIOL 124, 125; HEAL 110, 230.

Corequisite(s): ATEP 260 and 265

Notes: Formal acceptance to the professional phase of the ATEP; Emergency Cardiac Care (ECC) Certification

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring

ATEP 270 - General Medical Conditions and Pharmacology in Physically Active Populations

Credits: 3 (NR)
An examination of assessment and management techniques of general medical conditions and pharmacological principles in physically active populations.

Prerequisite(s): Grade of C or higher in ATEP 300; BIOL 124, 125.
Notes: Formal acceptance to the professional phase of the ATEP

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**ATEP 300 - Functional Anatomy**

Credits: 3 (NR)
Increase students' knowledge and exposure to the structural and functional components of human anatomy including musculoskeletal origins, insertions, actions and innervations.

Equivalent to KINE 300 (2012-2013 Catalog)

Prerequisite(s): BIOL 124.

Corequisite(s): BIOL 125.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 1
When Offered: Fall, Summer, Spring.

**ATEP 350 - Therapeutic Interventions I**

Credits: 3 (NR)
Integrates the use of therapeutic modalities and rehabilitation in the treatment of injuries and conditions including indications, contraindications, physiological effects, special programs, and resistance methods used with therapeutic modalities and prevention/rehabilitation methods.

Prerequisite(s): Grade of C or higher in ATEP 150, 180, 250, 255, 256, 260, 265, 266, 270, 300; BIOL 124, 125; HEAL 110, 230; KINE 310.

Corequisite(s): ATEP 355 and 356.

Notes: Formal acceptance to the professional phase of the ATEP.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

**ATEP 355 - Clinical Techniques III: Therapeutic Interventions I**

Credits: 3 (NR)
An examination of the scientific theory and standard operating procedures necessary for the safe application of therapeutic modalities in a physically active patient population.

Prerequisite(s): Grade of C or higher in ATEP 150, 180, 250, 255, 256, 260, 265, 266, 270, 300; BIOL 124, 125; HEAL 110, 230; KINE 310.
Corequisite(s): ATEP 350 and 356

Notes: Formal acceptance to the professional phase of the ATEP

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

ATEP 356 - Practicum III: Therapeutic Modalities

Credits: 3 (NR)
A clinical practicum field experience under the direct supervision of a preceptor with emphasis on therapeutic modalities.

Prerequisite(s): Grade of C or higher in ATEP 150, 180, 250, 255, 256, 260, 265, 266, 270, 300 BIOL 124, 125; HEAL 110, 230; KINE 310.

Corequisite(s): ATEP 350 and 355

Notes: Formal Acceptance into the ATEP.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

ATEP 360 - Therapeutic Interventions II

Credits: 3 (NR)
Integrated approach to the use of therapeutic modalities and rehabilitation in the treatment of injuries and conditions. Special consideration to specific body regions including a focus on the development, implementation, and evaluation of treatment plans.

Prerequisite(s): Grade of C or higher in ATEP 150, 180, 250, 255, 256, 260, 265, 266, 270, 300, 350, 355, 356; BIOL 124, 125; HEAL 110, 230; KINE 310.

Corequisite(s): ATEP 365 and 366.

Notes: Formal acceptance into the professional phase of the ATEP.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring

ATEP 365 - Clinical Techniques IV: Therapeutic Interventions II

Credits: 3 (NR)
Application of clinical techniques and therapeutic rehabilitation methods commonly used with a physically active population.
Prerequisite(s): Grade of C or higher in ATEP 150, 180, 250, 255, 256, 260, 265, 266, 270, 300, 350, 355, 356; BIOL 124, 125; HEAL 110, 230; KINE 310.

Corequisite(s): ATEP 360 and 366.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring

ATEP 366 - Practicum IV: Therapeutic Rehabilitation

Credits: 3 (NR)
A clinical practicum field experience under the direct supervision of a preceptor with emphasis on therapeutic rehabilitation.

Prerequisite(s): ATEP 150, 180, 250, 255, 256, 260, 265, 266, 270, 350, 355, 356; BIOL 124, 125; HEAL 110, 230; PHED 300 and 450

Corequisite(s): ATEP 360 and 365

Notes: Formal acceptance into the professional phase of the ATEP; Current Emergency Cardiac Care (ECC) Certification.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring

ATEP 441 - Senior Seminar in Athletic Training

Credits: 3 (NR)
Capstone educational experience focusing on current topics in the Athletic Training Profession and career development issues.

Prerequisite(s): Grade of C or higher in ATEP 150, 180, 250, 255, 256, 260, 265, 266, 270, 300, 350, 355, 356, 360, 365, 366; BIOL 124, 125; HEAL 110, 230; KINE 300, 360.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

ATEP 450 - Administration and Management in Athletic Training

Credits: 3 (NR)
This lecture/seminar course will focus on the professional management and administrative issues in athletic training. Organization and administration topics will include the preparation in planning, designing, developing, organizing, implementing, directing, and evaluating an athletic training health care program and facility. Current issues in athletic training related to professional conduct and practice will also be discussed.

Prerequisite(s): Grade of C or higher in ATEP 150, 180, 250, 255, 256, 260, 265, 266, 270, 300, 350, 355, 356, 360, 365, 366, BIOL 124, 125; HEAL 110, 230, KINE 310, 360.
Corequisite(s): ATEP 456

Notes: Formal acceptance into the professional phase of the ATEP.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

**ATEP 456 - Practicum V: Professional Integration**

Credits: 6 (NR)
A clinical practicum field experience under the direct supervision of a preceptor with emphasis on professional skill integration.

Prerequisite(s): Grade of C or higher in ATEP 150, 180, 250, 255, 256, 260, 265, 266, 270, 300, 350, 355, 356, 360, 365, 366, BIOL 124, 125; HEAL 110, 230, KINE 310, 360.

Corequisite(s): ATEP 450

Notes: Formal acceptance into the professional phase of the ATEP; Current Emergency Cardiac Care (ECC) Certification.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0
When Offered: Fall

**ATEP 499 - Independent Study in Athletic Training**

Credits: 1-6 (RD)
Study of a topic area in athletic training research, theory, or practice under direction of a faculty member. May be repeated, but not more than 6 total credits may be earned.

Prerequisite(s): 60 credit hours and instructor approval

Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 0

**BA in Applied Science (BAS)**

**BAS 300 - Building Professional Competencies**

Credits: 3 (NR)
This course serves as an orientation to the BAS degree program. Current strengths are assessed and future planning is highlighted. Core competency areas related to personal effectiveness and academic/workplace success are stressed. Introduction
to the university online learning system and other available resources useful for degree completion are also emphasized.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall

---

**BAS 490 - Introduction to Research Methods**

Credits: 3 (NR)  
This course introduces students to fundamental research methods and processes. Students will explore their research interests and identify one topic as well as learn to set up research questions, review literature, and define appropriate methods for data collection. This course intends to prepare students for their practicum study in BAS 491.

**Prerequisite(s):** Student must have completed 85 credits prior to taking this course.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall, Summer, Spring

---

**BAS 491 - Applied Sciences Capstone**

Credits: 3 (NR)  
Students participate in an approved fieldwork study program and complete a research project as identified in BAS 490 Introduction to Research Methods. The Capstone project involves choosing and researching a workplace problem; designing, implementing and evaluating a specific plan of action; and formally presenting the project once completed.

**Prerequisite(s):** BAS 490.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall, Summer, Spring

---

**Bachelor of Individualized Study (BIS)**

Offered by the College of Humanities and Social Sciences

---

**BIS 300 - Understanding Interdisciplinary Studies**

Credits: 3 (NR)  
Focuses on literature and issues relevant to interdisciplinary and multidisciplinary studies and the BIS program. Students explore selected topics, develop and gather feedback on individualized concentration proposals, and review BIS program requirements.

**Notes:** Open only to pre-BIS students and BIS majors.
BIS 390 - The Research Process

Credits: 3 (NR)
Focuses on skills to develop a research project, find and organize relevant information, examine and critique evidence, establish criteria, and create plan to complete senior project.

Fulfills writing intensive requirement in the major.

Prerequisite(s): BIS 300 and a grade of 2.00 or above in ENGL 302/ENGH 302.

Notes: Open only to pre-BIS students and BIS majors. Students cannot receive credit for both BIS 390 and 391.

BIS 391 - The Research Process for Honors

Credits: 3 (NR)
Focuses on skills to develop an honors-level research project, find and organize relevant information, examine and critique evidence, establish criteria, and create plan to complete Honors Senior Research Project (BIS 490). Approved research proposal required prior to registration in BIS 490.

Prerequisite(s): Acceptance to honors in the BIS major.

Notes: Students cannot receive credit for both BIS 390 and 391.

BIS 399 - Special Topics

Credits: 1-3 (RT)
Selected topics reflecting interest in specialized areas.

Prerequisite(s): Open only to degree students in BIS.

Notes: May be repeated for a maximum of 6 credits when topic is different.

BIS 489 - Directed Readings and Research
Credits: 1-3 (RD)
Readings and research on a topic directly relevant to student's core concentration.

Notes: Open only to pre-BIS students and BIS majors. Individualized sections by arrangement. Guided by instructor with expertise. Topics must be approved by instructor and BIS director prior to enrollment.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0

BIS 490 - Senior Project

Credits: 3 (NR)
Project or thesis on a topic directly relevant to student's concentration. Guided by student's faculty advisor and 490 instructor.

Fulfills Mason Core requirement in synthesis.

Designated as a research and scholarship intensive course.

Prerequisite(s): BIS 390

Corequisite(s): BIS 491

Notes: Open only to BIS majors. Individualized sections for BIS honors. Capstone course in BIS core concentration. Research proposals must be approved by faculty mentor, executive committee, and BIS director prior to enrollment.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
Grading: Undergraduate Special

BIS 491 - Senior Project Presentation

Credits: 1 (NR)
Focuses on preparation and delivery of a formal presentation of student's BIS 490 project. Includes review of basic presentation techniques.

Prerequisite(s): BIS 390.

Corequisite(s): BIS 490.

Notes: Open only to BIS majors.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0
Grading: Undergraduate Special

BIS 495 - Career Practicum
Credits: 1-6 (RD)
Supervised experience in application of specified area.

Prerequisite(s): Permission of instructor and BIS director.

Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 0
Grading: Undergraduate Special

Biodefense (BIOD)

Offered by the College of Humanities and Social Sciences

BIOD 604 - Introduction to Biodefense I: Bacterial and Toxin Agents

Credits: 3 (NR)
Covers pathology, metabolism, and threat of bacterial agents that can be used as biological weapons.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

BIOD 605 - Introduction to Biodefense II: Viral Agents

Credits: 3 (NR)
Covers pathology, metabolism, and threat of viral agents that can be used as biological weapons.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

BIOD 607 - Introduction to Biodefense/Threat Analysis III: Toxins

Credits: 3 (NR)
Discusses the threat of toxins as biological weapons. Special focus on microbiological toxins, including botulinum toxin, and biochemical action of toxins. Comparison to chemical weapons and debate about classification as such.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

BIOD 609 - Biodefense Strategy and Policy

Credits: 3 (NR)
Introduces students to the biodefense and biosecurity strategies and policies of the United States, other nations, and international organizations. Evaluates the effectiveness of these policies in strengthening defenses, improving intelligence, increasing
oversight, enhancing nonproliferation, and reinforcing norms. Examines the interaction of biodefense and biosecurity with homeland, national, and international security.

**Prerequisite(s):** BIOD 604 and 605 or permission of instructor.

**Hours of Lecture or Seminar per week:** 1-3  
**Hours of Lab or Studio per week:** 0-6

### BIOD 610 - Advanced Topics in Biodefense

Credits: 1-4 (RT)  
Different topics, depending on instructor's specialty. Topics may include legal, ethical, scientific, and political aspects of biodefense, emphasizing current problems and research.

**Prerequisite(s):** BIOD 604 and 605 or permission of instructor.

**Notes:** May be repeated for a maximum of 18 credits when topic is different.

**Hours of Lecture or Seminar per week:** 1-3  
**Hours of Lab or Studio per week:** 0-6

### BIOD 620 - Health and Security

Credits: 3 (NR)  
Explores issues emerging from the interaction of health and security that represent novel challenges to policy makers confronting a rapidly changing security landscape. Presents the major lines of discourse in the academic literature examining links between health and security. The impact of the AIDS epidemic on national and regional security, the role of health issues in post-Cold War conflict situations, and the security implications of advances in the life sciences.

**Prerequisite(s):** BIOD 604 and 605 or permission of instructor

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

### BIOD 621 - Ethics and International Security

Credits: 3 (NR)  
Challenges students to wrestle with dilemmas raised by the desire to behave ethically in an international system in which consensus about ethical matters is absent. Students will develop, apply, and justify their own perspective on an ethical problem related to international security using ethical theory and social science research. Ethical issues related to nuclear, biological, and chemical weapons that confront researchers, policy makers, and practitioners will be addressed.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0
BIOD 622 - Negotiating in the International Arena

Credits: 3 (NR)
Provides students with the concepts and tools for analyzing complex negotiation processes and introduces them to the challenges facing international negotiators. Students will read about the frameworks and perspectives that have guided the scholarly research on negotiation, as well as the latest findings from that research; analyze complex cases of actual negotiations in the security, trade, and environmental areas; and negotiate key issues on the agendas of nations and international organizations.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

BIOD 705 - Intelligence: Theory and Practice

Credits: 3 (NR)
Theory and practice of intelligence, including the intelligence cycle, organization of the intelligence community, and the origins and impact of recent reforms. Examines the capabilities and limitations of the different collection disciplines, analytic methodologies and pathologies, and the relationship between intelligence and policy. Analyzes challenges posed by collecting and analyzing intelligence on weapons of mass destruction programs conducted by states and terrorists.

Prerequisite(s): BIOD 604 and 605, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

BIOD 706 - Nuclear, Biological, and Chemical Weapons Policy and Security

Credits: 3 (NR)
Explores the causes, conduct, and consequences of the proliferation of nuclear, biological, and chemical weapons. Covers the historical, technological, normative, and strategic factors that have promoted and restrained the spread of these weapons. Addresses the motives for states to develop these weapons and the debate over the security implications of nuclear, biological, and chemical weapon proliferation.

Prerequisite(s): BIOD 604 and 605, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

BIOD 709 - Nonproliferation and Arms Control

Credits: 3 (NR)
Examines the array of national and international measures used to slow, halt, and reverse the spread of nuclear, biological, chemical, and missile weapons. Explores the theory and practice of proliferation to provide insights into the supply and demand aspects of proliferation.

Prerequisite(s): BIOD 604 and 605, or permission of instructor.
BIOD 710 - Approaches to Bioweapon Medical Treatment and Response

Credits: 3 (NR)
Examines research, treatment, and preparedness strategies against natural and human-made biological agents. Focuses on various strategies, including immunological, pharmaceutical, and medical treatment methodologies and designs.

Prerequisite(s): BIOD 604 and 605 or permission of instructor.

BIOD 722 - Examining Terrorist Groups

Credits: 3 (NR)
Introduction to terrorism including the history and evolution of terrorism, case studies of key terrorist groups, the current nature of the terrorist threat and counterterrorism strategies.

Prerequisite(s): BIOD 604 and 605, or permission of instructor.

BIOD 723 - Legal Dimensions of Homeland Security

Credits: 3 (NR)
Introduces the impact of legal issues on homeland security and biodefense. Topics include the origins of the Department of Homeland Security, the relationship between public health and law enforcement, the role of the military in homeland security, trade-offs between privacy and security, legal aspects of public-private cooperation in biodefense and homeland security, quarantine authority and enforcement, ensuring compliance with international treaties, and implementing biosecurity regulations.

Prerequisite(s): BIOD 604 and 605, or permission of instructor.

BIOD 725 - Terrorism and Weapons of Mass Destruction

Credits: 3 (NR)
Examines the capabilities and intentions of terrorists to acquire and use chemical, biological, radiological, and nuclear (CBRN) weapons. The course provides an in-depth understanding of the history of CBRN terrorism, the current challenges posed by this threat, and the range of national and international policy tools available to address this threat.
Prerequisite(s): BIOD 604 and 605, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

BIOD 726 - Agroterrorism and Food Security

Credits: 3 (NR)
Analyzes the threat of agricultural terrorism, including assessments of the chemical and biological agents used to disrupt agriculture and livestock, and the national and global economic and social impacts of these disruptions. Also examines strategies for enhancing the security of the food production and supply systems.

Prerequisite(s): BIOD 604 and 605, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

BIOD 751 - Biosurveillance

Credits: 3 (NR)
Provides an understanding of the capabilities required to provide reliable early warning of disease outbreaks and identify their etiological agents. Assesses strengths and limitations of physicians, laboratories, epidemiologists, aerosol sensors, and syndromic surveillance systems. Considers challenges posed by the integration and analysis of the information collected by these sources.

Prerequisite(s): BIOD 604 and 605, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

BIOD 752 - The Role of the Military in Homeland Security

Credits: 3 (NR)
Analyzes the role that the armed forces play in homeland security, including historical and legal developments, the role of the National Guard, capabilities for crisis and consequence management, and case studies of military assistance to civilian authorities in response to riots, terrorist incidents, and natural disasters.

Prerequisite(s): BIOD 604 and 605, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

BIOD 760 - National Security Technology and Policy
Credits: 3 (NR)
Introduces students to the intersection of science, technology, and policy in national security. Will examine the players in the formation of science policy; the roles they play; how the types, uncertainties, and availability of data affect science policy debates; and how science policy decisions are made. Topics to be covered include weapons of mass destruction, nonlethal weapons, nanotechnology, bioengineering, energy security, and pandemic influenza.

Prerequisite(s): BIOD 604 and 605, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

BIOD 762 - Into the Hot Zone: Working in a High Threat Environment

Credits: 2 (NR)
Introductory course covers methodology of working in a Biosafety Level 3 or 4 environment. Special attention to responding to biowarfare or bioterrorism related event.

Prerequisite(s): BIOD 604 and 605, or permission of instructor

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 0

BIOD 766 - Development of Vaccines and Therapeutics

Credits: 3 (NR)
Analyses the process of developing new medical countermeasures against biological weapons and emerging infectious diseases such as SARS and pandemic influenza. Special attention is paid to the scientific, technical, political, regulatory, and economic obstacles to developing new vaccines and therapeutics. Examines the causes and potential solutions of public and private sector failures.

Prerequisite(s): BIOD 604 and 605 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

BIOD 780 - Master's Supervised Internship

Credits: 1-6 (RD)
Internship under supervision of qualified professional in biodefense at a government agency, consulting firm, industrial firm, or other acceptable agency.

Prerequisite(s): Permission of program director or advisor.

Hours of Lecture or Seminar per week: 1-2
Hours of Lab or Studio per week: 0
Grading: Satisfactory/No Credit.
BIOD 790 - Biodefense Capstone

Credits: 3 (NR)
Provides students with the opportunity to hone their research, writing, collaboration, and presentation skills through completion of a capstone project that synthesizes the theoretical and subject matter knowledge students have gained in the program.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

BIOD 793 - Directed Studies in Biodefense

Credits: 1-3 (RD)
Individualized study of topics not otherwise available in graduate program. May involve reading assignments, tutorials, lectures, papers, presentations, or lab or field study, determined in consultation with instructor.

Prerequisite(s): Permission of the instructor and program director.

Hours of Lecture or Seminar per week: 1-4
Hours of Lab or Studio per week: 0
Grading: Graduate Special

BIOD 798 - Master's Research Project in Biodefense

Credits: 3 (NR)
Research project related to student's concentration under supervision of faculty advisor. Student produces substantial and original contribution to the field of biodefense on the model of an article in a scholarly journal.

Prerequisite(s): 24 credits in BIOD and permission of project director.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
Grading: Satisfactory/No Credit

BIOD 810 - Advanced Seminar in Biodefense

Credits: 3 (RT)
Explores issues of contemporary and emerging concern in biodefense and biosecurity. Topics may include legal, ethical, scientific, economic, and political aspects of biodefense and biosecurity.

Prerequisite(s): BIOD 604 and 605 or permission of adviser.

Notes: May be repeated for a maximum of 9 credits when topic is different.
BIOD 890 - Doctoral Supervised Internship

Credits: 1-6 (RD)
Internship under supervision of qualified biodefense professional at government agency, consulting firm, industrial firm, or other acceptable agency.

Prerequisite(s): Permission of program director or advisor.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0
Grading: Graduate Special

BIOD 899 - Directed Research in Biodefense

Credits: 1-12 (RD)
Research on a pertinent topic in biodefense; scope and subject determined by instructor.

Prerequisite(s): Approval of program director.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0

BIOD 996 - Doctoral Reading and Research

Credits: 1-9 (RD)
Independent reading and research on specific biodefense topic under faculty member's direction. Specific arrangements for designing scope and area of study to be determined in consultation with instructor. May involve literature searches and review, workshops, tutorials, or other formats.

Notes: May be repeated for credits.

Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 0
Grading: Graduate Special

BIOD 998 - Doctoral Dissertation Proposal

Credits: 1-12 (RD)
Development of a research proposal, which forms the basis for doctoral dissertation under guidance of dissertation director committee.
Notes: Only 12 credits may be applied to the degree.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0
Grading: S/NC

BIOD 999 - Doctoral Dissertation

Credits: 1-12 (RD)
Doctoral dissertation research under direction of dissertation chair.

Prerequisite(s): Completion of 998 and advancement to candidacy.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0
Grading: S/NC

Bioengineering (BENG)

Offered by the Volgenau School of Engineering.

Students may attempt an undergraduate course taught by the Volgenau School of Engineering twice. A third attempt requires approval of the department offering the course.

BENG 101 - Introduction to Bioengineering

Credits: 3 (NR)
Surveys the field of bioengineering and the global impact of technology innovation in solving problems in biology and medicine with an emphasis on engineering tools and concepts. Introduces mathematical modeling and analysis of bioengineering problems through the use of standard software packages for simulation. Discusses the history, ethical/social implications, and career paths in Bioengineering.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring

BENG 220 - Physical Bases of Biomedical Systems

Credits: 3 (NR)
Introduces the physical basis of biomedical systems and signals. Demonstrates basic concepts of systems and signals theory, and shows their derivation from the biophysical concepts such as mechanics, fluid mechanics, pharmacokinetics and molecular biophysics which underlie the signals in living systems. Aims at providing the student with the mathematical and physical understanding to quantitatively describe biological systems.

Prerequisite(s): Grade of C or better in BENG 101, PHYS 160, and either MATH 213 or MATH 215. Prerequisite enforced by
registration system.

Corequisite(s): MATH 214, or permission of instructor.

Notes: Students cannot receive credit for both BENG 220 and ECE 220.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

BENG 301 - Bioengineering Measurements

Credits: 3 (NR)
Introduces the basic concepts and tools for making biomedical measurements, describes instrumentation design and analysis considerations, and discusses several practical applications.

Prerequisite(s): Grade of C or better in BENG 380 and BENG 320; Grade of C or better in BIOL 425 or BIOL 430 or BENG 313. Prerequisite enforced by registration system.

Corequisite(s): BENG 302.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring

BENG 302 - Bioengineering Measurements Lab

Credits: 1 (NR)
Provides hands-on experience with sensors and instrumentation relevant to the analysis of living systems and related processes. Biomedical measurements include electrocardiograms, electromyograms, spirometry, pulse oximetry, and glucose monitoring.

Corequisite(s): BENG 301

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 3
When Offered: Spring

BENG 304 - Modeling and Control of Physiological Systems

Credits: 3 (NR)
Introduces a systems-level understanding of biomedical systems. Emphasis on mathematical modeling of dynamic systems, including the role of feedback. Analogies between electrical and mechanical systems will be discussed. Examples covered will include multiple scales ranging from cells to organ systems.

Prerequisite(s): Grade of C or better in BENG 320 or SYST 320, MATH 214 and PHYS 260; Grade of C or better in BIOL 425 or BIOL 430 or BENG 313. Prerequisite enforced by registration system.
BENG 313 - Physiology for Engineers

Credits: 3 (NR)
Provides a broad introduction to the subject of human physiology, focusing on learning the subject matter from an engineering viewpoint. Emphasis on organs and physiological systems where engineering has a significant role.

Prerequisite(s): Grade of C or better in BENG 101 and grade of B- or better in either MATH 114 or MATH 116. Prerequisite enforced by registration system.

BENG 320 - Bioengineering Signals and Systems

Credits: 3 (NR)
Introduces the conversion of analog signals to digital ones and methods for using digitally processed signals in biomedical applications.

Prerequisite(s): Grade of C or better in BENG 101 and a grade of B- or better in MATH 214. Prerequisite enforced by registration system.

Notes: Students cannot receive credit for both BENG 320 and ECE 320.

BENG 322 - Health Data Challenges

Credits: 3 (NR)
Covers methodology and tools used to work with health data structures supporting organizations' needs for reliable data that are captured, stored, processed, integrated, and prepared for further querying, decision making, data mining and knowledge discovery for a variety of clinical and organizational purposes. Data security and privacy, data standards, data interoperability, health information exchange, and big data analytics are discussed.

Equivalent to IT 322

Prerequisite(s): IT 214, STAT 250 or STAT 344.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall
**BENG 341 - Introduction to Biomaterials**

Credits: 3 (NR)
To provide a fundamental understanding of current, state of the art, and future directions of biomaterials.

**Prerequisite(s):** Grade of C or better in CHEM 251 (or CHEM 211), MATH 113, and BIOL 213. Prerequisite enforced by registration system.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Summer

**BENG 380 - Introduction to Circuits and Electronics**

Credits: 3 (NR)
Builds on simple circuit concepts introduced in PHYS 260. Includes circuit analysis using superposition, equivalent circuits and transient analysis of RL, RC and RLC circuits; sinusoidal excitations, AC steady state analysis; frequency response; operational amplifiers; semiconductor devices such as diodes, field effect and bipolar transistors; and digital logic circuits. (Not intended for those majoring in electrical or computer engineering.)

**Prerequisite(s):** Grade of C or better in PHYS 260 and a grade of B- or better in MATH 214. Prerequisite enforced by registration system.

**Corequisite(s):** BENG 320.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall

**BENG 381 - Circuits and Electronics Lab**

Credits: 1 (NR)
Lab associated with BENG 380. Provides laboratory experience in basic electronics emphasizing issues and considerations that are paramount for biomedical instrumentation.

**Prerequisite(s):** Grade of C or better in PHYS 261. Prerequisite enforced by registration system.

**Corequisite(s):** BENG 380

**Notes:** Not intended for those majoring in electrical or computer engineering.

**Hours of Lecture or Seminar per week:** 0  
**Hours of Lab or Studio per week:** 3  
**When Offered:** Fall
**BENG 390 - Engineering Design and Fabrication**

Credits: 3 (NR)
Project based course where students will design projects containing analog and digital components as well as mechanical parts. Students will simulate, build, and test their projects.

Equivalent to ECE 390.

**Prerequisite(s):** Grade of C or better in BENG 380, or in ECE 280, or in ECE 285. Prerequisite enforced by registration system.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall

**BENG 392 - Engineering Design Studio**

Credits: 1 (RD)  
Identification and feasibility study of advance engineering problems. Application of path, physics and engineering methods to challenging projects. Preliminary design, modeling, simulation and prototyping of projects.

Equivalent to ECE 392.

**Prerequisite(s):** 75 hours of completed coursework applicable to EE, CpE, or BIOE degree and permission of instructor.

**Notes:** This course should be taken preceding ECE/BENG 492.

**Hours of Lecture or Seminar per week:** 1  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall, Summer, Spring

**BENG 395 - RS: Mentored Research in Bioengineering**

Credits: 1-3 (RD)  
Introduces the scientific research process through "hands on" experience: students are matched with faculty mentors who are actively involved in Bioengineering-related research. Requires no less than 60 hours per semester working with mentors.

Designated as a research and scholarship intensive course.

**Prerequisite(s):** At least 60 credit hours applicable to the Bioengineering program.

**Hours of Lecture or Seminar per week:** 1-3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Spring

**BENG 406 - Introduction to Biomechanics**
This course introduces the fundamental principles of musculoskeletal biomechanics, computational simulation of movement, and OpenSim simulator. Topics include functions and models of the musculoskeletal structures, mathematical description of motion, kinetics, and simulation of movement using OpenSim.

**Prerequisite(s):** Grade of C or better in PHYS 160 (or PHYS 243), MATH 203, MATH 214, BENG 220 or SYST 220 or ECE 320, and BENG 313. Prerequisite enforced by registration system.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Spring

---

**BENG 420 - Bioinformatics for Engineers**

Credits: 3 (NR)  
This course introduces the fundamental techniques and tools for analyzing biomedical data, important for many biomedical engineering problems. Topics include regression, classification, clustering, dimensionality reduction, data representation, pattern matching and algorithm performance evaluation. This innovative course will leverage hybrid learning through a combination of lectures, on-line content, and individual and group projects involving hands-on analysis.

**Prerequisite(s):** Grade C or better in BENG 320 or SYST 320 or ECE 320.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**BENG 425 - Assistive Control of Biomedical Systems**

Credits: 3 (NR)  
Exposes students to the engineering design process with special focus on medical and biological applications, including the development of assistive devices for individuals with disabilities. Culminates in the presentation of a group instrumentation project.

**Prerequisite(s):** Grade of C or better in BENG 301 and BENG 320. Prerequisite enforced by registration system.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall

---

**BENG 441 - Nanotechnology in Health**

Credits: 3 (NR)  
Introduces fundamental principles of a wide range of nanoscale biomaterials and their applications in medicine and engineering.

**Prerequisite(s):** Grade of C or better in BIOL 213 and PHYS 160; Grade of C or better in CHEM 251 or CHEM 212. Prerequisite enforced by registration system.

**Hours of Lecture or Seminar per week:** 3
BENG 451 - Translation and Entrepreneurship in Bioengineering

Credits: 3 (NR)

This course focuses on teaching the process of translational research and on creating both a medical device and a company vision. Emphasis is made on creating a robust medical device prototype based on a deep understanding of the disease. Regulatory and reimbursement processes are also addressed in detail. This course will draw upon lectures and different guest speakers.

Prerequisite(s): CHEM 251 or CHEM 212, and BIOL 213, or Instructor permission.

BENG 491 - Bioengineering Senior Seminar I

Credits: 1 (NR)

Covers the variety of responsibilities of bioengineers to society. Topics include ethics, regulation, research, industry, entrepreneurship, and cost issues. Professional approaches to job searching and effective technical communication will also be discussed. Speakers include faculty, invited guests from industry and government, as well as students.

Equivalent to ECE 491

Prerequisite(s): Senior standing.

Notes: Students cannot receive credit for BENG 491 and ECE 491.

BENG 492 - Senior Advanced Design Project I

Credits: 2 (NR)

Conception of senior design project in bioengineering and determination of feasibility of proposed project. Work includes developing preliminary design and implementation plan.

Fulfills Mason Core requirement in synthesis.

Prerequisite(s): 90 credit hours applicable to the Bioengineering Program, COMM 100.

Notes: Students cannot receive credit for both BENG 492 and ECE 492.
BENG 493 - Senior Advanced Design Project II

Credits: 2 (NR)
Project includes designing and constructing hardware, writing required software, conducting experiments or studies, and testing complete system. Requires oral and written reports during project and at completion.

Fulfills Mason Core requirement in synthesis.

Prerequisite(s): BENG 492, preferably in the preceding semester.

Notes: Implementation of project for which preliminary work was done in BENG 492.

BENG 495 - Bioengineering Senior Seminar II

Credits: 1 (NR)
Covers a variety of responsibilities of bioengineers. Topics include dealing with biomedical ethics, regulatory requirements, global considerations, and health care costs. Speakers will include faculty as well as guests from industry, government, and academia. Students are required to explore and then present some material themselves.

Prerequisite(s): 90 credit hours applicable to the Bioengineering Program, COMM 100.

BENG 499 - Special Topics in Bioengineering

Credits: 0-4 (RT)
Topics of special interest to undergraduates.

Notes: May be repeated for maximum 6 credits if topics substantially differ.

BENG 501 - Bioengineering Research Methods
Credits: 3 (NR)
Examines approaches for scientific research with emphasis on bioengineering. Topics include biophysical origins of bioengineering measures, tools and technology for bioengineering data collection, basic principles of experimental design and statistical analyses, and interpretation of scientific results. Special attention will be given to ethical issues associated with the collection, use, and dissemination of data.

Prerequisite(s): Graduate Standing.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

BENG 525 - Neural Engineering

Credits: 3 (NR)
Provides an overview of topics in Neural Engineering. Topics covered range from sensory and motor prosthetic devices, stimulation of biological tissue, bioelectrodes and characterization techniques, brain-machine interfaces, and engineered devices to ameliorate neurodisorders.

Prerequisite(s): Graduate Standing or permission of instructor; background in Electrical or Computer Engineering disciplines required.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring

BENG 538 - Medical Imaging

Credits: 3 (NR)
Introduction to the physical, mathematical and engineering foundations of modern medical imaging systems, medical image processing and analysis methods. Introduces engineering students to clinical applications of medical imaging. Emphasis on diagnostic ultrasound and magnetic resonance imaging methods; several other modalities are also covered. Provides overview of recent developments and future trends in the field of medical imaging, discusses some of the challenges and controversies, and involves hands-on experience applying the methods learnt in class to real-world problems.

Equivalent to ECE 538

Prerequisite(s): Graduate Standing or permission of instructor; ECE 320 or equivalent; PHYS 262 or equivalent.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

BENG 541 - Biomaterials

Credits: 3 (NR)
Covers the principles of biomaterials and biological interactions with materials, including an overview of biomaterials
characterization, design and testing. Specific topics include the use of polymers, ceramics and metallics in biomaterials, drug delivery applications, tissue engineering from an orthopedic and vascular perspective, biocompatibility, acute and chronic biological response to implanted material, and in vitro and in vivo testing of biomaterials.

**Prerequisite(s):** BIOL 213 (or equivalent), CHEM 251 (or equivalent).

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall

**BENG 550 - Advanced Biomechanics**

Credits: 3 (NR)  
Introduces the fundamental concepts of musculoskeletal biomechanics, and how to apply mechanical principles to quantitatively describe and analyze movement. Topics include properties, functions, and models of the musculoskeletal structures, 3D kinematics, locomotion, and instrumentation systems applied in musculoskeletal biomechanics and movement analysis.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall

**BENG 551 - Translational Bioengineering**

Credits: 3 (NR)  
Demonstrates the process for the creation of both medical device prototypes and medical device companies. Focuses on designing and building a robust medical device prototype and writing a business plan. Also addresses cost of healthcare, reimbursement, regulatory processes, intellectual property, and marketing and sales aspects. Course will feature lectures, videos, and guest speakers who are successful medical device entrepreneurs.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall

**BENG 590 - Selected Topics in Bioengineering**

Credits: 3 (RD)  
Addresses selected topics from recent developments in various Bioengineering disciplines. Content may vary each semester depending on instructor and students' interests.

**Prerequisite(s):** Graduate standing or permission of department.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall, Spring.
**BENG 636 - Advanced Biomedical Signal Processing**

Credits: 3 (NR)
Provides an overview of advanced topics in biomedical signal processing with an emphasis on practical applications. Topics include introduction to physiological origins of biomedical signals, stochastic and adaptive signal processing, spectral estimation, signal modeling and analysis of nonstationary signals.

**Prerequisite(s):** Graduate Standing; ECE 535 or equivalent; ECE 528 or equivalent.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Spring

---

**BENG 641 - Advanced Nanotechnology in Health**

Credits: 3 (NR)
Presents interdisciplinary scientific and engineering approaches to solve relevant medical problems. Contents include polymer structure, composition, and material properties, natural and synthetic polymers, and their application to design novel nanocarriers for controlled drug release, scaffolds for tissue engineering, and new vectors for vaccines. The relevance of nanotechnology to advance treatments for cancer, infectious and neurodegenerative diseases are discussed in depth.

**Prerequisite(s):** BENG 541, or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Spring

---

**BENG 699 - Advanced Topics in Bioengineering**

Credits: 3 (RD)
Advanced topics of current interest in bioengineering. Topics chosen so they do not duplicate other courses in department. Active participation encouraged in form of writing and presenting papers in research areas.

**Prerequisite(s):** Permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall, Spring.

---

**BENG 725 - Computational Motor Control**

Credits: 3 (NR)
Uses approaches from robotics, control theory, and neuroscience to understand biological motor systems. Contents include modeling muscles, reflexes and neural systems to understand how the central nervous system plans and controls movement of the eyes and limbs. The theoretical control problem is compared to known neuronal properties of the motor system and diseases of the motor system affecting movement control.
BENG 738 - Advanced Medical Image Processing

Credits: 3 (NR)
Advanced Medical Image Processing covers advanced processing techniques used in modern medical imaging. The course aims at developing an understanding of the mathematical background, principles and application of techniques such as segmentation, registration, morphometry, general linear modeling, principal and independent component analysis.

Prerequisite(s): BENG 320 (or equivalent), ECE 537 (or equivalent).

BENG 745 - Biomedical Systems and Microdevices

Credits: 3 (NR)
Bio-micro-electro-mechanical systems (BioMEMS) provide a robust approach to mimic in vivo microenvironments within controlled in vitro settings. This course introduces students to the highly interdisciplinary field of Lab-on-a-Chip technologies with emphasis on its advanced applications in biological and biomedical engineering. In addition to the microfabrication processes, a variety of analytical techniques routinely used in biomedical research will also be covered.

BENG 750 - Modeling and Simulation of Human Movement

Credits: 3 (NR)
Introduces the development and simulation of data-driven 3D neuro-musculoskeletal models to quantitatively study human movement in health and disease. Topics include reconstructing 3D models from imaging data, estimating kinematics from motion data, simulating movement incorporating multimodality data, and analyzing muscle and joint forces. Students use computational biomechanics software. The course consists of lectures, article presentations, modeling assignments and a project.

Prerequisite(s): BENG 550 or permission of instructor.

BENG 800 - Bioengineering Colloquium
Credits: 0 (RD)
Students are required to attend colloquia including talks by distinguished speakers, faculty candidates, and Mason faculty.

Prerequisite(s): Admission to PhD Bioengineering program.

Notes: May be repeated as needed. Required attendance and participation in a minimum of 3 seminars per semester.

Hours of Lecture or Seminar per week: 3-12
Hours of Lab or Studio per week: 0
Grading: Satisfactory/No Credit
When Offered: Fall, Summer, Spring

BENG 820 - Seminar in Neuroengineering

Credits: 3 (RD)
Selective analysis and discussion of topics in neuroengineering in areas of current research interest. Topics may include brain machine interfaces, advanced materials for implantable devices, computational neuroscience, neuronal biosensors and assays, and neuroprosthetics.

Prerequisite(s): Admission to PhD Bioengineering program or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Summer, Spring

BENG 830 - Seminar in Biomedical Imaging

Credits: 3 (RD)
Selective analysis and discussion of topics in biomedical imaging in areas of current research interest. Topics may include techniques and analyses for ultrasound, magnetic resonance imaging (MRI), functional MRI, nuclear imaging, computer assisted tomography, positron emission tomography, and emergent approaches to imaging for health and disease.

Prerequisite(s): Admission to PhD Bioengineering program or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Summer, Spring

BENG 840 - Seminar in Nano-scale Bioengineering

Credits: 3 (RD)
Selective analysis and discussion of topics in nano-scale bioengineering in areas of current research interest. Topics may include nanoengineered materials, nanoscale devices and systems, and novel nano-scale fabrication and modeling approaches with application to biomedicine.

Prerequisite(s): Admission to PhD Bioengineering program or permission of instructor.
BENG 850 - Seminar in Biomechanics

Credits: 3 (RD)
Selective analysis and discussion of topics in biomechanics in areas of current research interest. Topics may include computational and physiological modeling for biomechanics, multiscale representation of biomechanical systems, data fusion techniques for biomechanics, and application of quantitative biomechanics for diagnostics or medical intervention.

Prerequisite(s): Admission to PhD Bioengineering program or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Summer, Spring

BENG 998 - Doctoral Dissertation Proposal

Credits: 1-12 (RD)
Work on research proposal that forms basis for doctoral dissertation.

Notes: May be repeated as needed. No more than 24 credits of BENG 998 and 999 may be applied to doctoral degree requirements.

Grading: Graduate Special.
When Offered: Fall, Summer, Spring

BENG 999 - Doctoral Dissertation

Credits: 1-12 (RD)
Formal record of commitment to doctoral dissertation research under direction of faculty member in bioengineering.

Prerequisite(s): Admission to candidacy.

Notes: May be repeated as needed. Once enrolled in 999, students must maintain continuous registration in 999 each semester until graduation, excluding summers. Students who defend in the summer must be registered for at least 1 credit of 999 in the summer.

Grading: Graduate Special.
When Offered: Fall, Summer, Spring

Bioinformatics (BINF)

Offered by the College of Science
BINF 334 - Perl for Bioinformatics

Credits: 3 (NR)
Introduction into Perl programming language. Topics include data representation, control structures, file input/output, subroutines, regular expressions, debugging, relational databases. Emphasizes bioinformatics applications including DNA sequence analysis, parsing FASTA and GenBank files, processing BLAST output files, SQL or equivalent query language.

Prerequisite(s): Knowledge of programming language or CS 112 or equivalent.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

BINF 354 - Foundations in Mathematical Biology

Credits: 3 (NR)
Interdisciplinary introduction to life sciences for physicists, chemists, engineers, and mathematicians. Combines knowledge from natural sciences, social and behavioral sciences, quantitative reasoning, and information technology. Covers selected topics in ecology, physiology, biochemistry, and behavior. May include biochemical reaction kinetics, Hodgkin-Huxley model for cellular electrical activity, continuous and discrete population interactions, and neural network models of learning. Techniques utilized include ordinary differential equations, difference equations, algebraic equations, and computer simulations.

Fulfills Mason Core requirement in synthesis.

Prerequisite(s): Completion or concurrent enrollment in all other required Mason Core courses (must include a chemistry course); MATH 114 or equivalent.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

BINF 401 - Bioinformatics and Computational Biology I

Credits: 3 (NR)
Covers the following topics and related methodology: protein sequence, structure prediction, and modeling methods; nucleic acid sequence and structure prediction; gene structure prediction in prokaryotes and eukaryotes; elements of system biology. Students will learn programming approaches to solve bioinformatics problems.

Prerequisite(s): BIOL 231, IT 108, IT 208, STAT 344.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
BINF 402 - Bioinformatics and Computational Biology II

Credits: 3 (NR)
Continuation of BINF401 and studies in-depth several algorithms and methods used in bioinformatics and computational biology. Students will learn sequence alignment and assembly algorithms, hidden Markov models, classification and prediction methods, genome annotation. These techniques will then be applied to current bioinformatics problems. Programming assignments are incorporated in the course program.

Prerequisite(s): BINF 401.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

BINF 403 - Bioinformatics and Computational Biology Lab I

Credits: 1 (NR)
Laboratories will introduce students to bioinformatics tools designed to answer research problems in the topics covered in lectures, such as sequence alignment, sequence pattern recognition, structural conformation modeling, phylogenetic analysis methods and image comparisons.

Corequisite(s): BINF 401.

Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 3

BINF 404 - Bioinformatics and Computational Biology Lab II

Credits: 1 (NR)
Laboratories will introduce students to research bioinformatics tools relevant to lecture topics such as: the correspondence of measured fragments to parent biomolecules, inference methods for gene and protein networks, predicting system outputs given specified inputs.

Corequisite(s): BINF 402

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 3

BINF 450 - Bioinformatics for Life Sciences

Credits: 4 (NR)
Teaches students how to understand the basis of and use of bioinformatics software in database searching, sequence analysis, gene identification, genomics, protein structure and phylogeny.

Prerequisite(s): BIOL 213 and either BIOL 482 or BIOL 483/CHEM 463
**BINF 470 - Molecular Biophysics**

Credits: 3 (NR)
Offers a broad introduction into molecular biophysics. Demonstrates that the application of methods of physics provides a unique opportunity to tackle complex biological problems. Designed for physics or chemistry majors; also useful for biology majors interested in bioinformatics and computational biology.

Equivalent to PHYS 370

**Prerequisite(s):** PHYS 307 or CHEM 331 or permission of instructor.

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0

**BINF 490 - Independent Senior Research in Bioinformatics and Computational Biology**

Credits: 3 (NR)
Course offers individual research in bioinformatics and computational biology under the guidance of faculty member. Written report required upon course completion.

**Prerequisite(s):** Permission of instructor.

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0
**When Offered:** Fall, Spring, Summer

**BINF 491 - Senior Thesis in Bioinformatics**

Credits: 1 (NR)
A project is chosen and completed under the guidance of a Bioinformatics Department faculty member.

**Corequisite(s):** BINF 401.

**Notes:** An oral progress report with a poster at the fall semester Bioinformatics Student Research Day is required.

**Hours of Lecture or Seminar per week:** 1
**Hours of Lab or Studio per week:** 3

**BINF 492 - Senior Thesis in Bioinformatics**
A project is chosen and completed under the guidance of a Bioinformatics Department faculty member.

Corequisite(s): BINF 402.

Notes: A written thesis in standard format is required.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 3

**BINF 630 - Bioinformatics Methods**

Credits: 3 (NR)
Introduction to methods and tools for pairwise sequence comparison, multiple sequence alignment, phylogenetic analysis, protein structure prediction and comparison, database similarity searches, and discovery of conserved patterns in protein sequence and structures.

Prerequisite(s): Graduate standing, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**BINF 631 - Molecular Cell Biology for Bioinformatics**

Credits: 3 (NR)
Intensive review of biochemistry, molecular biology, and cell biology necessary to begin research in bioinformatics. Topics include protein biochemistry, nucleic acids biochemistry, DNA replication, transcription, and translation, recombinant DNA technology, genomics, molecular structure of genes and chromosomes, and gene expression and control.

Prerequisite(s): Undergraduate background in biochemistry or cell biology, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**BINF 633 - Molecular Biotechnology**

Credits: 3 (NR)
Introduction to the theory and practice of molecular biotechnology, with emphasis on the application of tools in today's society. Includes study of recombinant DNA technology, genomics, and bioinformatics as applied to commercially important products. Lectures reflect more recent advances and applications in the commercial aspects of biology.

Prerequisite(s): Graduate standing or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
BINF 634 - Bioinformatics Programming

Credits: 3 (NR)
Data representation, control structures, file input/output, subroutines, regular expressions, debugging, introduction to relational databases. Emphasizes bioinformatics applications including DNA sequence analysis, parsing FASTA and GenBank files, processing BLAST output files, SQL, or equivalent query language.

Prerequisite(s): Graduate standing and computer programming experience, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

BINF 636 - Microarray Methodology and Analysis

Credits: 3 (NR)
Theory and practice of genome analysis including genetics, biochemistry, and tools for analyzing global gene expression, and detection and quantification of genes and gene products.

Prerequisite(s): BINF 633, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

BINF 637 - Forensic DNA Sciences

Credits: 3 (NR)
Intensive introduction to parameters affecting data QC and analysis, including factors arising from biochemistry, chemistry, genetics, statistics, instrumentation, and software.

Equivalent to FRSC 560

Prerequisite(s): Graduate standing or permission of instructor

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

BINF 639 - Introduction to Biometrics

Credits: 3 (NR)
Introduction to methods for measuring humans. Topics include face, speaker, fingerprint, and shoeprint recognition; and handwriting analysis. Students develop computer programs to perform many of these tasks.

Prerequisite(s): CSI 603 and 604 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
BINF 641 - Biomolecular Modeling

Credits: 3 (NR)
Introduction to basic principles and practice of computational biomolecular modeling. Students learn the elements of physical chemistry and molecular biology, which constitute the foundation of molecular modeling. Practical application of biomolecular software and development of related skills are emphasized through online lectures, homework, and course project.

Prerequisite(s): Students are expected to be familiar with none basic concepts of physics, calculus, and biology on undergraduate level. Access to PC with internet connection is required.

Hours of Lecture or Seminar per week: 3
When Offered: Fall, Summer, Spring

BINF 650 - Introduction to Bioinformatics Database Design

Credits: 3 (NR)
Students will acquire skills needed to exploit public biological databases and establish and maintain personal databases that support their own research; such skills include learning underlying data models and the basics of DBMS and SQL.

Prerequisite(s): BINF 634 or equivalent, or permission of the instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

BINF 690 - Numerical Methods for Bioinformatics

Credits: 3 (NR)
Computational techniques for solving scientific problems focusing on applications in bioinformatics and computational biology. Students develop the ability to convert a quantitative problem into computer programs to solve the problem. Emphasizes efficiency and readability of code.

Prerequisite(s): CS 112, MATH 113 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

BINF 701 - Systems Biology

Credits: 3 (NR)
Systems biology seeks to understand how a complex biological system functions. This involves the use of computational methods and models to integrate information obtained about these systems through a wide range of methods that span multiple spatial and temporal scales. Current research examples will be used to motivate and demonstrate these approaches.

Equivalent to BIOS 701
Prerequisite(s): Admission to PhD program in biosciences or bioinformatics, CHEM 663, or equivalent.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

BINF 702 - Biological Data Analysis

Credits: 3 (NR)
Trains students in research methodologies for life sciences. Covers the three phases of biological research projects: experimental design, data collection and data analysis.

Equivalent to BIOS 702

Prerequisite(s): Admission to PhD program in bioinformatics or biosciences or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

BINF 703 - Bioinformatics Lab Rotation

Credits: 1 (RT)
Short-term introductory research on a specific topic in computational sciences and informatics under direction of faculty member.

Prerequisite(s): Permission of instructor.

Notes: May be repeated.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 1

Grading: Graduate Special

BINF 704 - Colloquium in Bioinformatics

Credits: 1 (RD)
Seminar presentations in a variety of areas of bioinformatics and computational biology by COS faculty, staff, advanced PhD students, and professional visitors.

Prerequisite(s): Graduate standing.

Notes: May be repeated for credit.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0
**BINF 705 - Research Ethics**

Credits: 1 (NR)
Examines ethical issues in scientific research, reflecting on purpose and reviewing foundational principles for evaluating ethical issues. Provides skills for survival in scientific research through training in moral reasoning and teaching of responsible conduct. Students learn to apply critical-thinking skills to design, execution, and analysis of experiments and analysis of ethical issues in research, including use of animals and humans, standards in computer community, and research fraud. Guidelines for data ownership, manuscript preparation, and conduct of people in authority may be presented and discussed.

Prerequisite(s): Permission of instructor.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0

**BINF 730 - Biological Sequence and Genome Analysis**

Credits: 3 (NR)
Fundamental methods for analyzing nucleic acid and protein sequences, including pairwise and multiple alignment, database search methods, profile searches, and phylogenetic inference. Development of probabilistic tools, including hidden Markov models and optimization algorithms. Survey of current software tools.

Prerequisite(s): A course in molecular biology a course in probability and ability to program in a high-level language or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**BINF 731 - Protein Structure Analysis**

Credits: 3 (NR)
Computational methods for analyzing, classifying, and predicting three-dimensional protein structures. Covers theoretical approaches, techniques, and computational tools for protein structure analysis.

Prerequisite(s): Permission of instructor, or previous courses in molecular biology, biochemistry, and computer programming.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**BINF 732 - Genomics**

Credits: 3 (NR)
Surveys computational tools and techniques to study whole genomes, and explores biological basis of genome analysis algorithms. Topics include genome mapping, comparative genomics, and functional genomics.

Equivalent to CSI 732
Prerequisite(s): General biology programming experience CSI 700 or equivalent CSI 731 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

BINF 733 - Gene Expression Analysis

Credits: 3 (NR)
Analyzes gene expression data. Topics include cluster analysis and visualization of expression data, inference of genetic regulatory networks, and theoretical models of genetic networks.

Prerequisite(s): Permission of instructor; ability to program in a high-level language and a course in molecular biology: S-Plus or Matlab experience recommended.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

BINF 734 - Advanced Bioinformatics Programming

Credits: 3 (NR)
Topics include algorithm design, complex data structures, object oriented programming, relational databases, designing modules, and graphics and web programming. Students complete a bioinformatics programming project.

Prerequisite(s): BINF 634, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

BINF 739 - Topics in Bioinformatics

Credits: 3 (RT)
Selected topics in bioinformatics not covered in fixed-content bioinformatics courses.

Prerequisite(s): Permission of instructor.

Notes: May be repeated for credit.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

BINF 740 - Introduction to Biophysics

Credits: 3 (NR)
Introduces biophysics, focusing on physical and chemical concepts and their relation to rapidly expanding interdisciplinary
interfaces among biology, chemistry, and physics. Reveals multiscale nature of biophysics, and includes exploration of macroscopic and microscopic applications.

Equivalent to PHYS 630

Prerequisite(s): Undergraduate courses in general physics, calculus, and biology.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

BINF 741 - Introduction to Computer Simulations of Biomolecules

Credits: 3 (NR)
Details computational methods in biomolecular simulations, such as molecular dynamics and Monte Carlo algorithms. Special emphasis given to practical applications. Reviews most recent advances in biomolecular simulations.

Prerequisite(s): Graduate standing and good programming skills BINF 690 and 701 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

BINF 751 - Biochemical and Cellular Systems Modeling

Credits: 3 (NR)
Mathematical and computational methods for analysis of cellular and subcellular processes. Topics may include ion channels, whole cell models, intracellular signaling, biochemical oscillations, pathway modeling, parameter estimation, and sensitivity analysis.

Prerequisite(s): Calculus and knowledge of a computer programming language; and BINF 690 and 701; or permission of instructor.

Notes: Course in differential equations is recommended.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

BINF 760 - Machine Learning for Bioinformatics

Credits: 3 (NR)
Machine learning and data mining methods relevant to application to problems in computational biology. Methods include decision trees, random forests, rule learning methods, support vector machines, neural networks, genetic algorithms, instance-based learning, Bayesian networks, and evaluation metrics for learning systems. Applications include cancer prediction, gene finding, protein function classification, gene regulation network inference, and other recent bioinformatics applications selected from the literature.

Prerequisite(s): BINF 630, BINF 631, and BINF 634 or permission of instructor.
Notes: In addition to lectures from the instructor, students will present papers from the literature and complete a machine learning project.

Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0

**BINF 796 - Directed Reading and Research**

Credits: 1-6 (RD)  
Reading and research on specific topic in computational sciences and informatics under direction of faculty member.

Prerequisite(s): Permission of instructor.

Notes: May be repeated

Hours of Lecture or Seminar per week: 1-3  
Hours of Lab or Studio per week: 0

**BINF 798 - Research Project**

Credits: 3 (NR)  
Project chosen and completed under guidance of graduate faculty member that results in acceptable technical report.

Prerequisite(s): 12 graduate credits and permission of instructor.

Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0  
Grading: Graduate Special

**BINF 799 - Master's Thesis**

Credits: 1-6 (RD)  
Project chosen and completed under guidance of graduate faculty member that results in acceptable technical report (master's thesis) and oral defense.

Prerequisite(s): 12 graduate credits and permission of instructor.

Hours of Lecture or Seminar per week: 2-3  
Hours of Lab or Studio per week: 0  
Grading: S/IP

**BINF 820 - Advanced Topics in Molecular Cell Biology**
Topics may include cell structure, biomembranes and cell architecture, cell signaling, receptor activation, gene expression and control, protein targeting and trafficking, and cell cycle regulation.

**Prerequisite(s):** BINF 631 or equivalent.

**Notes:** Advanced molecular and cellular biology foundation for BINF students.

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0

---

**BINF 831 - Structural Genomics Project**

Credits: 3 (NR)
Covers knowledge-based, large-scale protein structure analysis; classification and prediction of protein structure and function; and other current research topics in structural genomics. Projects address entire research enterprise from developing and defending proposal to peer-reviewed publication.

**Prerequisite(s):** BINF 731, or permission of instructor.

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0

---

**BINF 841 - Research Topics in Biomolecular Simulations**

Credits: 3 (NR)
Research-oriented course combining lectures and work on individual projects in biomolecular simulations. Topics include protein and peptide aggregation, binding, and unfolding and folding.

**Prerequisite(s):** BINF 741, or permission of instructor.

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0

---

**BINF 996 - Doctoral Reading and Research**

Credits: 1-6 (RD)
Reading and research on specific topic in computational sciences and informatics under direction of faculty member.

**Prerequisite(s):** Admission to doctoral program and permission of instructor.

**Notes:** May be repeated.

**Hours of Lecture or Seminar per week:** 1-6
**Hours of Lab or Studio per week:** 0
BINF 998 - Doctoral Dissertation Proposal

Credits: 1-12 (RD)
Covers development of research proposal, which forms basis for doctoral dissertation, under guidance of dissertation director and doctoral committee.

Prerequisite(s): Permission of advisor.

Notes: May be repeated.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0
Grading: Satisfactory/No Credit

BINF 999 - Doctoral Dissertation

Credits: 1-12 (RD)
Doctoral dissertation research under direction of dissertation director.

Prerequisite(s): Admission to doctoral candidacy.

Notes: May be repeated, but no more than 24 credits in BINF 998 and 999 may be applied to doctoral degree requirements.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0
Grading: S/IP

Biology (BIOL)

Offered by the College of Science

See EVPP, Environmental Science and Public Policy, for additional related course work.

BIOL 103 - Introductory Biology I

Credits: 4 (NR)
Topics include chemistry of life, cell structure and function, Mendelian genetics, evolution, and diversity of life.

Fulfills Mason Core requirement in natural science (lab).

Notes: Survey course suitable for any major. May not be taken after BIOL 200-level or above courses have been taken.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 3
When Offered: Fall, Spring, Summer
BIOL 104 - Introductory Biology II

Credits: 4 (NR)
Topics include animal (including human) structure, function, homeostatic mechanisms, organ systems, behavior, higher plant systems, and major concepts in ecology.

Fulfills Mason Core requirement in natural science (lab).

Notes: Students are strongly urged to take BIOL 103 prior to BIOL 104. Survey course suitable for any major. May not be taken after BIOL 200-level or above courses have been taken.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 3
When Offered: Fall, Spring, Summer

BIOL 105 - Introductory Biology I Laboratory

Credits: 1 (NR)
The chemical basis of life, the structure and function of the cell, Mendelian and human genetics, and the major animal phyla are presented.

Prerequisite(s): Permission of BIOL 103/104 coordinator and department chair.

Notes: Not available to students who have taken BIOL 103 or the equivalent.

Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 3

BIOL 106 - Introductory Biology II Laboratory

Credits: 1 (NR)
The structure and function of major organ systems of animals and an examination of the structure and function of plants, emphasizing the higher plants.

Prerequisite(s): Permission of BIOL 103/104 coordinator and department chair.

Notes: Not available to students who have taken BIOL 104 or the equivalent.

Hours of Lecture or Seminar per week: 1-12
Hours of Lab or Studio per week: 3

BIOL 124 - Human Anatomy and Physiology

Credits: 4 (NR)
Introduction to structure and function of body's major organ systems.
Notes: Should be taken in sequence. Does not satisfy natural science requirement in COS or CHSS. Not available for Biology major credit.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 3
When Offered: Fall, Summer

**BIOL 125 - Human Anatomy and Physiology**

Credits: 4 (NR)
Introduction to structure and function of body's major organ systems.

Prerequisite(s): BIOL 124.

Notes: Does not satisfy the natural science requirement for the BA in COS or CHSS. Not available for Biology major credit.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 3
When Offered: Spring, Summer

**BIOL 213 - Cell Structure and Function**

Credits: 4 (NR)
For science majors and preprofessionals in life sciences. Introduction to cell chemistry, metabolism, and genetics.

Fulfills Mason Core requirement in natural science (lab).

Corequisite(s): CHEM 211

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 3
When Offered: Fall, Spring, Summer

**BIOL 214 - Biostatistics for Biology Majors**

Credits: 4 (NR)
An introduction to statistics used in the life sciences.

Corequisite(s): BIOL 213

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 1
When Offered: Fall, Spring, Summer

**BIOL 246 - Introductory Microbiology**
Credits: 3 (NR)
Introduction to microbial cell structure, physiology, and pathogenicity. Emphasizes control of microorganisms, host-parasite interactions including immunology, and viral and bacterial pathogens.

Prerequisite(s): C or better in BIOL 124 and 125, one year of general biology, or permission of instructor.

Corequisite(s): BIOL 306.

Notes: Not available for biology major credit. Not available to students who have taken BIOL 213 or 418.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

BIOL 301 - Biology and Society

Credits: 3 (RT)
Biological problems facing society including pollution, cloning, emerging diseases, global warming, and overpopulation.

Fulfills Mason Core requirement in synthesis.

Prerequisite(s): BIOL 103 and 60 credits, or permission of instructor.

Notes: Not available for biology major or minor elective credit. See Schedule of Classes for current topic; may be repeated if topic is different.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

BIOL 303 - Animal Biology

Credits: 4 (NR)
Emphasizes structure and function of vertebrates, but surveys all animal groups and protozoa. Also covers evolutionary theory, and evolutionary history of major animal groups.

Prerequisite(s): C or better in BIOL 213, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 3
When Offered: Fall, Spring, Summer

BIOL 304 - Plant Biology

Credits: 4 (NR)
Introduction to study of plants, their structure, development, nutrition, and ecology. Emphasizes flowering plants, but surveys all groups and their phylogenetic relationships.
Prerequisite(s): C or better in BIOL 213, or permission of instructor.

Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 3  
When Offered: Fall, Spring, Summer

**BIOL 305 - Biology of Microorganisms**

Credits: 3 (NR)  
Morphology, physiology, and pathogenicity of certain groups of bacteria, fungi, and viruses; stresses host-parasite interactions.

Prerequisite(s): C or better in BIOL 213, or permission of instructor. Prerequisite enforced by registration system.

Corequisite(s): BIOL 306.

Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0  
When Offered: Fall, Spring, Summer

**BIOL 306 - Biology of Microorganisms Laboratory**

Credits: 1 (NR)  
Laboratory techniques in culturing, staining, and identifying microorganisms.

Corequisite(s): BIOL 246 or 305.

Hours of Lecture or Seminar per week: 1-3  
Hours of Lab or Studio per week: 3  
When Offered: Fall, Spring, Summer

**BIOL 308 - Foundations of Ecology and Evolution**

Credits: 5 (NR)  
An examination of the principles of ecology, evolution, and the impact of humans on the world around them. Topics will include evolutionary history, biological diversity, and analyzes of interactions among organisms and between organisms and their environment.

Equivalent to BIOL 307 (2010-2011 Catalog)

Prerequisite(s): BIOL 213 an 214 or EVPP 110 and BIOL 214 or permission of instructor. BIOL 311 recommended.

Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 4  
When Offered: Fall, Spring, Summer
BIOL 309 - Introduction to Oceanography

Credits: 3 (NR)
Introduction to chemical, biological, and geological aspects of oceanic environment.

Equivalent to GEOL 309

Prerequisite(s): GEOL 101 or 111 and BIOL 103 or 213 or permission of instructor.

Notes: May include field trip.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

BIOL 310 - Biodiversity

Credits: 5 (NR)
Explores the fundamental principles governing organismal biology while introducing the three domains of life: the Archaea, the Bacteria, the Eukaryotes, plus viruses. Two Saturday or Sunday field trips are required.

Prerequisite(s): BIOL 213 with a C or better or EVPP 110 and 305 or permission of instructor. BIOL 214 and 311 are recommended.

Notes: BIOL 310 has replaced BIOL 303 and 304. Students who have taken BIOL 310 may not receive credit toward the major for BIOL 303 and/or BIOL 304.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 4
When Offered: Fall, Spring, Summer

BIOL 311 - General Genetics

Credits: 4 (NR)
Basic principles of heredity and modern developments in this field.

Prerequisite(s): BIOL 213 with grade of C or better, or permission of instructor. BIOL 214 is recommended.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 3
When Offered: Fall, Spring, Summer

BIOL 312 - Biostatistics

Credits: 4 (NR)
Use of probability and descriptive and inferential statistical techniques in interpreting biological data.
Prerequisite(s): BIOL 214 with a grade of C or better, or permission of the instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 2
When Offered: Fall

**BIOL 313 - Human Genetics for the Social Sciences**

Credits: 3 (NR)
Emphasizes topics of interest to students in social sciences, but open to any non-biology major. Topics include human genome and its inheritance; nature versus nurture; genetic disease; genetics of sex determination, intelligence, personality, and mental illness; genetic differences within and between populations; and evolution of human beings.

Prerequisite(s): One year of biology, or permission of instructor.

Notes: Not available for biology credit.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring, odd numbered years

**BIOL 314 - Introduction to Research Design and Analysis**

Credits: 4 (NR)
Introduction to research design in a wide range of biological disciplines. Lecture will concentrate on how to design experiments with proper controls for statistical analysis, as well as obtaining permits and approvals from appropriate agencies. In recitation students will be given data sets to analyze.

Prerequisite(s): BIOL 213, BIOL 214 or 312 or equivalent introductory statistics course, BIOL 311, CHEM 211-212
Completion of Biology core recommended. Must be enrolled in Biology Research Semester. Registration must be approved by a faculty sponsor and by the Biology Program Director.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 1
When Offered: Fall

**BIOL 318 - Conservation Biology**

Credits: 3 (NR)
Introduction to science used to identify species in need of conservation and techniques to manage and protect organisms.

Equivalent to EVPP 318

Prerequisite(s): BIOL 308 or BIOL 310, or permission of instructor.
BIOL 320 - Comparative Chordate Anatomy

Credits: 4 (NR)
Compares anatomy and morphology of major chordate groups. Lab emphasizes shark, mudpuppy, cat, and rabbit.

Prerequisite(s): BIOL 308 or BIOL 310 or permission of instructor.

BIOL 322 - Developmental Biology

Credits: 4 (NR)
Principles of embryonic development and differentiation in animal species at cellular, molecular, tissue, and whole organism levels.

Prerequisite(s): BIOL 213 and BIOL 311, or permission of instructor.

BIOL 326 - Animal Physiology

Credits: 3 (NR)
General consideration of animal function emphasizing common life problems and methods for solving them. Topics include intercellular communication (nervous and endocrine), metabolism, water and solute balance, and cardiovascular and respiratory physiology.

Prerequisite(s): BIOL 213 and BIOL 311, or permission of instructor.

BIOL 327 - Animal Physiology Laboratory

Credits: 2 (NR)
Investigation of invertebrate and vertebrate physiology. Emphasizes responses to environmental changes.

Prerequisite(s): BIOL 326
Corequisite(s): BIOL 326

Notes: Students are required to have concurrent registration in the Recitation.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 3

**BIOL 328 - Recitation for Fundamentals of Ecology and Evolution**

Credits: 1 (NR)
This is a writing intensive experience for transfer students who have previously taken an equivalent course to BIOL 308 that did not meet the writing intensive requirements in the biology major. This course is paired with BIOL 308.

Prerequisite(s): Permission of Biology Program Director and faculty coordinator of BIOL 308.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0
When Offered: Fall, Summer, Spring

**BIOL 331 - Invertebrate Zoology**

Credits: 4 (NR)
Survey of invertebrate phyla, excluding insects, showing morphology, phylogeny, and general biology of these groups.

Prerequisite(s): BIOL 308 or BIOL 310, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 3

**BIOL 332 - Insect Biology**

Credits: 4 (NR)
Survey of insects including taxonomy, morphology, physiology, behavior, ecology, and economic importance.

Prerequisite(s): BIOL 308 or BIOL 310, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 3

**BIOL 334 - Vertebrate Paleontology**

Credits: 4 (NR)
Vertebrate Paleontology explores the evolution of vertebrates from the early Paleozoic to Recent. The course will cover the
systematics, anatomy, paleogeography, and ecology of extinct vertebrates. Discussions will include fishes, early tetrapods & amniotes, dinosaurs, birds and mammals. Lab portion includes paleontology techniques, analysis, and study of fossil specimens and casts. A weekend field trip is included.

Equivalent to GEOL 334

**Prerequisite(s):** Any two courses from the following list: GEOL 101, GEOL 102, BIOL 103, BIOL 104, BIOL 213, BIOL 303 or the permission of the instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 3  
**When Offered:** Spring

---

**BIOL 335 - Forensic Entomology**

Credits: 3 (NR)
Explores the use of insects and other arthropods in field of forensic science as it pertains to the investigations of human and animal deaths and abuse, food and other product contamination, thefts, the illegal drug trade and unethical entomological practices. The use and presentation of this information from such investigations in court room proceedings will be discussed.

**Prerequisite(s):** BIOL 213 or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall

---

**BIOL 338 - Recitation and Lab for Fundamentals of Ecology and Evolution**

Credits: 2 (NR)
This is a writing intensive experience and laboratory for transfer students who have previously taken an equivalent course to BIOL 308 that did not have a lab and did not meet the writing intensive requirements in the biology major. This course is paired with BIOL 308.

**Prerequisite(s):** Permission of Biology Program Director and faculty coordinator of BIOL 308.

**Hours of Lecture or Seminar per week:** 0  
**Hours of Lab or Studio per week:** 2  
**When Offered:** Fall, Summer, Spring

---

**BIOL 344 - Plant Diversity and Evolution**

Credits: 4 (NR)
Investigates the diversity of vascular plants, including angiosperms, their evolutionary relationships, and the bases of their classification and identification.

**Prerequisite(s):** BIOL 308 or BIOL 310, or permission of instructor.
**BIOL 345 - Plant Ecology**

Credits: 4 (NR)
Investigates the interaction of plants with their abiotic and biotic environment, native Virginian plant communities and their causes, and global processes affecting plant distributions over geological time. 2 Saturday field trips required.

**Prerequisite(s):** BIOL 308 or BIOL 310, or permission of instructor.

**Notes:** Three Saturday or Sunday field trips required.

---

**BIOL 350 - Freshwater Ecosystems**

Credits: 4 (NR)
Studies physical, chemical, and biological processes in lakes, streams, and wetlands. Lectures, field trips, and lab exercises teach physical and chemical aspects of aquatic systems and life cycles, and adaptations of aquatic organisms.

Equivalent to EVPP 350

**Prerequisite(s):** CHEM 211/212 or CHEM 155/156 and BIOL 308.

---

**BIOL 355 - Ecological Engineering and Ecosystem Restoration**

Credits: 4 (NR)
Provides definition, classification and practice of ecological engineering and ecosystem restoration. Describes general system ecology, ecosystem restoration, and the utilization of natural processes to provide ecosystem services to society and benefits to nature. Provides students with a systems-oriented perspective on environmental studies. Students will study principles in general system ecology and ecological engineering and explore practices in sustainable ecological design by carrying out a hands-on experimental design project with field microcosms/meocosms in a newly established Wetland Mesocosm Compound on the campus. This course will involve a field trip (1-2 days).

Equivalent to EVPP 355

**Prerequisite(s):** CHEM 211, BIOL 308 and PHYS 243

---
BIOL 374 - Biogeography: Space, Time, and Life

Credits: 3 (NR)
A survey of the relationship between the distribution of plants and animals on the earth surface and the physical geography and environmental characteristics.

Equivalent to GGS 321

Prerequisite(s): One of the following: BIOL 310, GGS 122, GGS 102, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring

BIOL 377 - Applied Ecology

Credits: 3 (NR)
Introduction to ecosystem concepts and their applications to natural and managed ecosystems.

Equivalent to EVPP 377

Prerequisite(s): 8 credits of biology, geology, or chemistry; 60 credits; or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

BIOL 379 - Ecological Sustainability

Credits: 4 (NR)

Introduces the concepts and applications of several important topics relating to ecological sustainability. Focuses on the role of soils in maintaining and managing environmental quality. Teaches students how to understand and interpret scientific data presented in various types of literature covering ecological sustainability. Designated a Green Leaf Course.

Designated as a research and scholarship intensive course.

Equivalent to EVPP 378

Prerequisite(s): BIOL 308 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 3
When Offered: Spring
BIOL 382 - Introduction to Virology

Credits: 3 (NR)
An introduction to the fundamental nature of viruses, their classification, morphology, chemistry and their role in human disease.

Prerequisite(s): BIOL 305 or permission of instructor. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

BIOL 385 - Biotechnology and Genetic Engineering

Credits: 3 (NR)
Emphasizes theory and applications, including significance and societal implications of biotechnology applied to medicine, agriculture, and environment.

Prerequisite(s): BIOL 311; CHEM 211, 212; MATH 110 or 113.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

BIOL 402 - Applied and Industrial Microbiology

Credits: 3 (NR)
Biology of microorganisms of ecological and industrial significance. Includes food production, spoilage and preservation, fermentation technology, waste disposal, water purification, biodeterioration, and decomposition.

Prerequisite(s): BIOL 213, 305, 306; CHEM 211, 212; or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

BIOL 403 - Techniques in Applied and Industrial Microbiology

Credits: 1 (NR)
Lab exercises illustrate basic and applied methodologies, including isolation of commercially useful strains. Discusses production and purification of industrial products.

Prerequisite(s): BIOL 213, 305, 306; CHEM 211, 212.

Corequisite(s): BIOL 402, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 3
BIOL 404 - Medical Microbiology

Credits: 3 (NR)
Basic principles of infectious diseases caused by bacteria and viruses. Discusses genetics and molecular mechanisms of pathogenicity.

Prerequisite(s): BIOL 305 and 306. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

BIOL 405 - Microbial Genetics

Credits: 4 (NR)
Study of structure and function of bacterial DNA, emphasizing mechanisms of gene transfer, expression and regulation. Introduces DNA repair, mutation, and life cycles of bacteriophage.

Prerequisite(s): BIOL 305 and 306. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 3

BIOL 406 - Microbial Physiology and Metabolism

Credits: 4 (NR)
Study of complexity and diversity of microbial physiology and metabolism with emphasis on bacteria. Nutrition, growth, transport, and anabolic and catabolic processes are emphasized. Laboratory includes quantification of cellular macromolecules, enzyme purification and kinetics, column chromatography, and bacterial responses to environmental stimuli.

Prerequisite(s): BIOL 305 and 306. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 3

BIOL 407 - Microbial Diversity

Credits: 4 (NR)
Studies effect of microorganisms on ecological and medical phenomena. Stresses evolution of microbial species, biochemical cycling, and species interactions. Laboratory stresses use of cultural, biochemical, and phylogenetic methods to study microbial isolation, metabolism, and identification.

Prerequisite(s): BIOL 305 and 306. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 3
BIOL 408 - Mushrooms, Molds and Society

Credits: 3 (RD)
Provides a modern, comprehensive knowledge of fungal biology including classification, phylogeny, structure, physiology/metabolism, growth and development, genetics, industrial applications including biotechnology, ecological roles including pathogenic interactions with plants, animals, and man.

Prerequisite(s): BIOL 213 with a grade of C or better.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring

BIOL 409 - Medical Mycology

Credits: 3 (RD)
Provides the student with current knowledge of both the medical and microbiological aspects of fungal diseases in humans, including the etiologic agents, geographic distribution, epidemiology, transmission, determinants of pathogenicity, laboratory detection, and therapy associated with the major human mycoses.

Prerequisite(s): BIOL 213 with a grade of C or better.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Summer

BIOL 411 - Advanced General Genetics

Credits: 3 (NR)
Topics include quantitative genetics, extrachromosomal inheritance, and special techniques such as mutation screening, developmental genetics, cancer genetics, behavior genetics, evolutionary genetics, and ethics of genetic technology.

Prerequisite(s): C or better in BIOL 311 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

BIOL 417 - Selected Topics in Molecular and Cellular Biology

Credits: 1-4 (RT)
Study of current topics in molecular and cellular biology. Lecture, laboratory.

Prerequisite(s): BIOL 311 or 482, or permission of instructor.

Notes: Topics vary. May be repeated for credit.
BIOL 418 - Current Topics in Microbiology

Credits: 3 (RD)
Study of current topics in microbiology.

Prerequisite(s): BIOL 305 and 306.

Notes: Topics vary. May be repeated for credit.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

BIOL 420 - Vaccines

Credits: 3 (NR)

Prerequisite(s): BIOL 305/306.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

BIOL 421 - Genetics of Human Diseases

Credits: 3 (NR)
Emphasizes strategies used for identification of genes involved in human genetic diseases. Both monogenic and complex human genetic diseases, as well as principles of genetic screening and counseling, will be presented.

Prerequisite(s): BIOL 311.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

BIOL 422 - Stem Cell Biology and Regenerative Medicine

Credits: 3 (NR)
A broad overview of the biological principles governing stem cell populations. The functional roles stem cells play in regulating normal development and contributing to disease-state pathologies. An examination of the therapeutic potential of stem cells through "regenerative medicine."
Prerequisite(s): BIOL 311.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

BIOL 423 - Biology of Obesity and Weight Loss

Credits: 3 (NR)
This course covers the causes and consequences of obesity and weight loss, including the general epidemiology and pathology of co-morbid conditions associated with obesity. The relative contributions of genetic and environmental factors influencing weight gain will be covered as well as recent trends in obesity research.

Prerequisite(s): BIOL 213 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

BIOL 425 - Human Physiology

Credits: 3 (NR)
Organ system approach to study of homeostasis, including cardiovascular, respiratory, renal, digestive, endocrine, and nervous system functions.

Prerequisite(s): BIOL 213 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

BIOL 426 - Mechanisms of Aging

Credits: 3 (NR)
A course where students will demonstrate knowledge of cellular and molecular mechanisms which drive the systematic changes that result in aging, and to understand the overall biological processes involved in complex biological systems.

Prerequisite(s): BIOL 213 and BIOL 311 or equivalent; or Permission of Instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring.

BIOL 430 - Advanced Human Anatomy and Physiology I
Credits: 4 (NR)
Organ system approach to studying the structure and function of the human organism and maintenance of homeostasis. Detailed
discussion of anatomical structures and their functions of the endocrine, nervous, muscular, skeletal, and integumentary systems
following introduction to the cellular and tissue levels of organization. Topics also include selected pathology for each organ
system; current therapeutic interventions are addressed.

Prerequisite(s): BIOL 213 and 60 credits. Prerequisite enforced by registration system.

Notes: Biology 124 is not approved for Biology Majors.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 3
When Offered: Fall, Summer

BIOL 431 - Advanced Human Anatomy and Physiology II

Credits: 4 (NR)
Continued study of the structure and function of the human organism and maintenance of homeostasis. Detailed discussion of
anatomical structures and their functions of the cardiovascular, lymphatic, respiratory, urinary, digestive and reproductive organ
systems. Topics also include selected disorders for each organ system to illustrate disruption of homeostasis.

Prerequisite(s): BIOL 430. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 3
When Offered: Spring, Summer

BIOL 433 - Selected Topics in Plant Biology

Credits: 1-4 (RD)
Lecture or field course in botany. Topic varies with instructor's specialty.

Prerequisite(s): BIOL 310 or permission of instructor.

Hours of Lecture or Seminar per week: 1-4
Hours of Lab or Studio per week: 0-6

BIOL 435 - Selected Topics in Biology

Credits: 0-4 (RD)
Topics vary with instructor's specialty. May be repeated only with permission of Biology Program Director.

Prerequisite(s): Permission of instructor.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0-6
When Offered: Fall, Summer, Spring.
BIOL 440 - Field Biology

Credits: 0-4 (RD)
Directed field studies emphasizing ecology and behavior. Topics vary but include design of field manipulations, data collection and analysis, and introduction to organisms of study site.

Equivalent to BIOL 440.

Prerequisite(s): BIOL 308 or 310 or permission of instructor.

Notes: Students bear cost of required field trips. May be repeated with permission of Biology Program. Total limit of 4 credits. This course does not satisfy requirements of the BA degree or BS degree, which state that students must complete at least one (BA degree) or two (BS degree) upper division courses that include a laboratory.

Hours of Lecture or Seminar per week: 0-3
Hours of Lab or Studio per week: 3-9
When Offered: Fall, Summer, Spring.

BIOL 446 - Environmental Physiology

Credits: 3 (NR)
Physiological responses of animals to environmental factors and changes in natural environment. Topics include biorhythms and adaptation to temperature, high pressure, and altitude. Emphasis on vertebrates.

Prerequisite(s): BIOL 326 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

BIOL 449 - Marine Ecology

Credits: 3 (NR)
Plants and animals of marine environments and physical and chemical conditions that affect their existence.

Prerequisite(s): BIOL 308 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

BIOL 450 - Marine conservation

Credits: 3 (NR)
Provides an overview of threats to the marine environment, and discusses the scientific, socioeconomic, and political issues behind marine conservation. covers categories of marine pollutants (chemical, biological, and physical contaminants) and their
impacts on the marine ecosystem, as well as impacts on humans (health, social, and economic), threats to key marine species (e.g., coral, sharks, turtles, and marine mammals) and initiatives and laws developed to reduce these threats. Scientific and socioeconomic problems that hinder sustainable fisheries management and the science and policy behind the global warming debate are also discussed. The course also provides an overview of marine environmental law and policy issues related to marine conservation policy.

**Prerequisite(s):** BIOL 309 or equivalent, or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Spring

### BIOL 452 - Immunology

Credits: 3 (NR)  
Topics include structure and function of immunoglobulins, role of cell-mediated immunity, protective role of immune system, and disease and injury related to malfunctions of immune system.

**Prerequisite(s):** BIOL 213, 305, 306, and 311; or permission of instructor. BIOL 311 recommended. Prerequisite enforced by registration system.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall, Summer, Spring

### BIOL 453 - Immunology Laboratory

Credits: 1 (NR)  
Techniques relevant to BIOL 452, including enzyme-linked immunoabsorbant assay, immunodiffusion, protein electrophoresis, and immune fixation.

Fulfills writing intensive requirement in the medical technology major only.

**Prerequisite(s):** BIOL 452  
**Corequisite(s):** BIOL 452

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 3

### BIOL 454 - Marine Mammal Biology and Conservation

Credits: 3 (NR)

Covers the evolution, biology, ecology, and behavior of marine mammals from polar bears and sea otters to whales and dolphins. Marine mammal conservation and policy is also a major component of the course; several, lecture sessions are devoted to the
issue of whaling, threats to marine mammal populations, and recent conservation issues such as marine mammals and noise pollution. The course also includes a number of guest lectures from a variety of international marine mammal experts.

Equivalent to EVPP 419

Prerequisite(s): BIOL 309 or BIOL 449 or equivalent; or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring

BIOL 455 - Marine Mammal Biology and Conservation Field Course

Credits: 1 (NR)
Provides laboratory, seminar sessions and field work to accompany BIOL 454-001 - marine mammal biology and conservation. Field work includes several day-long boat trips. May take place in the US or abroad.

Corequisite(s): EVPP 419 or 454.

Notes: At present the two week residential field course takes place in Scotland at the University (of London) Marine Biological Station, which is equipped with boats and laboratories. The course has been running for 11 years, 2 years with GMU as a special topics course.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 1-12
When Offered: Spring

BIOL 457 - Reproductive Strategies

Credits: 3 (NR)
Introduction to the research and evolutionary theory of sex and reproduction. Covers topics from the evolution of sex and gender to the evolution of complex reproductive strategies involving behaviors such as mate recognition, courtship displays, territoriality, polygamy, and offspring care. Lectures focus primarily on multi-cellular animals but also include discussions of unicellular prokaryotes and eukaryotes as well as plants.

Prerequisite(s): BIOL 308 and 60 hours.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

BIOL 459 - Fungi and Ecosystems

Credits: 3 (NR)
Considers impact of fungi on ecosystems in terms of biogeochemical cycling, primary and secondary production, and regulating community structure and populations of individual species through their activities as symbionts and parasites. Discusses role of
fungi in ameliorating pollutants produced by anthropogenic activities.

Prerequisite(s): BIOL 308 or BIOL 310 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**BIOL 465 - Histology**

Credits: 4 (NR)
Microscopic structure of animal tissues and organs, with emphasis on vertebrates.

Prerequisite(s): BIOL 308 or 310.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 3

**BIOL 468 - Vertebrate Natural History**

Credits: 4 (NR)
Introduces vertebrates with emphasis on systematic, evolution, life history, behavior and ecology. Laboratory emphasis on identification, taxonomy, and natural history of local vertebrates.

Equivalent to EVPP 468

Prerequisite(s): BIOL 308 or permission of the instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 3
When Offered: Spring

**BIOL 470 - Dinosaur Biology**

Credits: 3 (NR)
Introduction to the evolution, diversity, and biology of the dinosaurs and their descendants. Emphasis on how current biological knowledge is used to estimate and inter the morphology, physiology and ecology of these extinct animals.

Prerequisite(s): BIOL 308 or BIOL 310 or permission of instructor.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 1

**BIOL 471 - Evolution**
BIOL 472 - Introductory Animal Behavior

Credits: 3 (NR)
Study of mechanisms, functions, and evolution of behavior.

Prerequisite(s): BIOL 308 or BIOL 310 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

BIOL 473 - Introductory Laboratory in Animal Behavior

Credits: 1 (NR)
Field or laboratory study in animal behavior with emphasis on mechanisms, functions, and evolution of behavior. Stresses experimental design and analysis of data. Writing-intensive laboratory.

Prerequisite(s): BIOL 472.

Corequisite(s): BIOL 472.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 3

BIOL 480 - The Diversity of Fishes

Credits: 3 (NR)
This course delves into the biology and ecology of fishes. Subjects of this class include fish anatomy, taxonomy, evolution, habitat adaptations, community dynamics, and ecosystem interactions. The course will also touch on human impacts on fishes, and conservation.

Prerequisite(s): BIOL 309, BIOL 310, and BIOL 350/EVPP 350.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring
BIOL 482 - Introduction to Molecular Genetics

Credits: 3 (NR)
Basic concepts of structure and function of genetic material at molecular level.

Prerequisite(s): BIOL 213, 305, and 306, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

BIOL 483 - General Biochemistry

Credits: 4 (NR)

Prerequisite(s): BIOL 213; CHEM 313, 314; or permission of instructor.

Hours of Lecture or Seminar per week: 4
Hours of Lab or Studio per week: 0

BIOL 484 - Eukaryotic Cell Biology

Credits: 3 (NR)
Structure and function of cell membranes and organelles with regard to cellular transport, sorting, compartmentalization, signaling, motility, and cell division.

Prerequisite(s): BIOL 311 and 483 or permission of instructor. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

BIOL 485 - Eukaryotic Cell Biology Laboratory

Credits: 1 (NR)
Laboratory experiments using cell biology techniques, including microscopy, spectrophotometry, centrifugation, chromatography, and electrophoresis.

Corequisite(s): BIOL 484 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 3

BIOL 486 - Molecular Biology and Biotechnology Laboratory
Credits: 2 (NR)
Introduction to theory, techniques, and practices used in modern molecular biotechnology laboratories.

**Prerequisite(s):** BIOL 385 or 482.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 6

**BIOL 489 - Teaching Practicum**

Credits: 1-3 (RD)  
Student gains teaching experience in a lecture, laboratory or field environment under the supervision of a faculty member. Student responsibilities may include a lecturing component, but may also include lab preparation, design of course materials, tutoring and grading. Course may be repeated once.

**Prerequisite(s):** BIOL 213, 311, 60 credit hours and permission of instructor, course coordinator (where applicable) and Program Director.

**Hours of Lecture or Seminar per week:** 1-3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall, Summer, Spring

**BIOL 492 - Senior Seminar**

Credits: 1 (RD)  
Weekly seminar course dealing with recent advances in biology. Topics selected from recent publications in the field. May be repeated for credit.

**Prerequisite(s):** BIOL 311 and 90 credit hours, or permission of instructor.

**Hours of Lecture or Seminar per week:** 1  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall, Spring

**BIOL 493 - Honors Research in Biology**

Credits: 1-2 (RD)  
Laboratory of field investigation under guidance of faculty member.

**Prerequisite(s):** Admission to the Biology Honors Program, permission of instructor and Biology Program Director.

**Notes:** Total limit for BIOL 493, 495 and 497 is 8 credits toward the 44 credit hours required for the Biology BS degree and only 4 credits toward the 32 hours required for the BA degree. Combined 493, 495 and 497 may not exceed 4 credit hours in any one semester.

**Hours of Lecture or Seminar per week:** 1-2
**BIOL 494 - Honors Seminar in Biology**

Credits: 1 (RD)
Weekly seminar course dealing with recent advances in biology.

Prerequisite(s): Admission to biology honors program and permission of instructor.

Notes: Topics selected from recent publications in field. May be repeated for credit six times.

**Hours of Lecture or Seminar per week:** 1  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall, Spring

**BIOL 495 - Directed Studies in Biology**

Credits: 1-3 (RD)
Study of a topic not otherwise available to student. May involve reading assignments, tutorials, lectures, papers, presentations, or field or laboratory study, determined in consultation with instructor.

Prerequisite(s): Permission of instructor and Biology Program Director.

Notes: May be taken for 1 to 3 credits and repeated once for a total of 3 credits. Total limit for combination of 495 and 497 is 6 credits toward 44 credits for BS and 4 credits toward 32 credits for BA. This course does not satisfy requirements of the BA degree or BS degree, which state that students must complete at least one (BA degree) or two (BS degree) upper division courses that include a laboratory.

**Hours of Lecture or Seminar per week:** 1-3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall, Summer, Spring.

**BIOL 497 - Special Problems in Biology**

Credits: 1-4 (RD)
Lab or field project leading to written report of research. Research and paper completed under instructor's guidance.

Prerequisite(s): 60 credits, and permission of instructor and department chair.

Notes: Total limit for 495 and 497 combined is 6 credits toward the 44 credits required for BS and 4 credits toward 32 credits for BA. This course does not satisfy requirements of the BA degree or BS degree, which state that students must complete at least one (BA degree) or two (BS degree) upper division courses that include a laboratory.

**Hours of Lecture or Seminar per week:** 1-4  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall, Summer, Spring.
**BIOL 498 - Research Seminar**

Credits: 2 (NR)
Seminar discussing current scientific literature and literature related to research project undertaken by student as part of the research semester.

**Prerequisite(s):** BIOL 213, BIOL 214 or 312 or equivalent introductory statistics course, BIOL 311, CHEM 211-212 Completion of Biology core recommended. Must be enrolled in Biology Research Semester. Registration must be approved by a faculty sponsor and by the Biology Program Director.

**Notes:** Registration limited to students who are enrolled concurrently in BIOL 499. For students in the Biology Honors Program, this course may be used to substitute for one credit of BIOL 494: Honors Seminar in Biology.

**Hours of Lecture or Seminar per week:** 2  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall

---

**BIOL 499 - Research in Biology**

Credits: 6-9 (NR)  
Laboratory or field investigation under faculty guidance. Students will earn 6-9 credits toward the BA or BS degrees in Biology.

**Prerequisite(s):** BIOL 213, BIOL 214 or 312 or equivalent introductory statistics course, BIOL 311, CHEM 211-212 Completion of Biology core recommended. Must be enrolled in Biology Research Semester. Registration must be approved by a faculty sponsor and by the Biology Program Director.

**Notes:** Registering for the Research Semester requires successful application and approval by Biology Program and faculty sponsor. Student receiving 9 credits for 499 will not be allowed to use BIOL 440, BIOL495 and/or 497 neither toward the 32 BIOL hours needed for the BA degree, nor toward the 44 BIOL hours needed for the BS degree. This course will satisfy one upper division laboratory requirement for both the BA and BS degrees in Biology.

**Hours of Lecture or Seminar per week:** 0  
**Hours of Lab or Studio per week:** 6-9  
**When Offered:** Fall

---

**BIOL 501 - Microbial Diversity: An Organismal Approach**

Credits: 3 (NR)  
In-depth study of nonpathogenic microbial world, emphasizing detection, enumeration, and classification of microorganisms; their physiological and evolutionary relationships; and biotechnological applications.

**Prerequisite(s):** Undergraduate course in microbiology, or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0
BIOL 504 - Va Nat Hist for Teachers

Credits: 4 (NR)
Prerequisite(s): May be applied to the M.S. in biology in the interpretive track only and then within a 6 hour maximum if combined with BIOL 605. SUMMER.

Hours of Lecture or Seminar per week: 4
Hours of Lab or Studio per week: 1-12

BIOL 506 - Selected Topics in Microbiology

Credits: 1-4 (RD)
Topic depends on instructor's specialty.

Prerequisite(s): BIOL 305, 306, or permission of instructor.

Notes: May be repeated only with permission of department chair.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0-6

BIOL 507 - Selected Topics in Ecology

Credits: 0-4 (RD)
Topic depends on instructor's specialty.

Prerequisite(s): Course in ecology and permission of instructor.

Notes: May be repeated only with permission of department chair.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0-6

BIOL 508 - Selected Topics in Animal Biology

Credits: 1-4 (RD)
Topic depends on instructor's specialty.

Prerequisite(s): BIOL 303, or permission of instructor.

Notes: May be repeated only with permission of department chair.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0-6
BIOL 509 - DNA Analysis of Biological Evidence

Credits: 3 (NR)
Historical development of DNA profiling methods, current DNA typing techniques and the ongoing development of new forensic DNA typing methods. Emphasis will be placed on various analytical techniques used in the analysis of forensic evidence.

Prerequisite(s): BIOL 311 or permission of instructor

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring

BIOL 510 - Forensic DNA Analysis Laboratory

Credits: 1 (NR)
Provides hands-on experience with the methodologies of forensic DNA analysis.

Prerequisite(s): BIOL 311

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 1-12
When Offered: Spring

BIOL 515 - Developmental Neurobiology

Credits: 3 (NR)
Introduction to developmental neurobiology with overview of embryological development of the nervous system. Topics include neural induction, patterning/cell fate specification, and neural circuit assembly together with modern molecular methods for exploring neural development.

Prerequisite(s): Completion of 60 credits, including PSYC 372; or BIOL 213 and 303.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 0

BIOL 516 - Mammalian Neurobiology

Credits: 3 (NR)
Functional anatomy of mammal brains emphasizing regional and systems neuroanatomy of humans. Correlates with material from clinical neurology, where possible. Laboratory component includes brain dissections and clinical correlations.

Prerequisite(s): BIOL 515.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 3
**BIOL 518 - Conservation Biology**

Credits: 3 (NR)
Introduction to science used to identify species in need of conservation and techniques to manage and protect organisms.

Prerequisite(s): BIOL 307, 311, or equivalent.

Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0

---

**BIOL 520 - Systematics in Complex Angiosperm Families**

Credits: 3 (NR)
Morphology and speciation of more complex families such as Poaceae, Cyperaceae, and Asteraceae. Laboratory emphasizes identification of specimens, and acquaintance with taxonomic literature.

Prerequisite(s): BIOL 344 or 534, or permission of instructor.

Hours of Lecture or Seminar per week: 1  
Hours of Lab or Studio per week: 6

---

**BIOL 532 - Animal Behavior**

Credits: 3 (NR)
Ecological aspects of animal behavior.

Prerequisite(s): BIOL 324 or permission of instructor.

Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0

---

**BIOL 533 - Selected Topics in Plant Biology**

Credits: 1-4 (RD)
Topic depends on instructor's specialty.

Prerequisite(s): Course in plant biology or permission of instructor.

Notes: May be repeated only with permission of department chair.

Hours of Lecture or Seminar per week: 1-3  
Hours of Lab or Studio per week: 0-6  
Grading: Graduate Special
BIOL 534 - Advanced Plant Taxonomy

Credits: 3 (NR)
Laboratories consist of field trips, and collection and identification of specimens.

Prerequisite(s): Course in plant taxonomy, or permission of instructor.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 6

BIOL 535 - Ancient Plants and their Environment

Credits: 3 (NR)
Study of factors involved in origin, history, and extinction of fossil plants, including adaptations, paleoecology, and major geological events.

Prerequisite(s): BIOL 304, course in paleontology, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

BIOL 536 - Ichthyology

Credits: 4 (NR)
Studies systematics, evolution, physiology, ecology, and behavior of fishes. Lab time used for field trips, practice in identifying species, and hands-on experience with lecture subjects.

Equivalent to EVPP 536

Prerequisite(s): Course in ecology, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 3

BIOL 537 - Ornithology

Credits: 4 (NR)
Study of evolution, systematics, physiology, ecology, and behavior of birds, emphasizing field work.

Prerequisite(s): Course in ecology, or permission of instructor.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 6
When Offered: Alternate Spring
BIOL 538 - Mammology

Credits: 4 (NR)
Study of evolution, systematics, physiology, ecology, and behavior of mammals, emphasizing field work.

Equivalent to EVPP 538

Prerequisite(s): Course in ecology, or permission of instructor.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 6

BIOL 539 - Herpetology

Credits: 4 (NR)
Study of evolution, systematics, physiology, ecology, and behavior of amphibians and reptiles, emphasizing field work.

Prerequisite(s): Course in ecology, or permission of instructor.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 6

BIOL 543 - Tropical Ecosystems

Credits: 4 (NR)
Terrestrial, aquatic, and marine ecosystems in tropics, emphasizing plant communities, plant-animal interactions, and role of humans in the tropics.

Equivalent to EVPP 543

Notes: Field trip to tropics required as part of laboratory.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 3
When Offered: Spring, even numbered years

BIOL 547 - Terrestrial Plant Ecology

Credits: 4 (NR)
Considers community organization, development, productivity, and mineral cycling; interactions between plants and competitors; herbivores; and environmental factors, especially light, water, and soil. Field work and laboratory emphasize data collection and statistical analysis.

Prerequisite(s): Course in ecology.
BIOL 550 - Wtrscpe Ecology and Mgmt

Credits: 3 (NR)
Field and laboratory approaches to freshwater ecology with emphasis on study design, sampling methods, laboratory and data analysis, and report writing.

Equivalent to EVPP 550

Prerequisite(s): General Chemistry and a course in ecology.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

BIOL 553 - Advanced Topics in Immunology

Credits: 3 (RD)
Comprehensive study of immunologic mechanisms as they pertain to immunologic diseases and transplantation.

Prerequisite(s): BIOL 452, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

BIOL 554 - Plant Physiology

Credits: 3 (NR)
Prerequisite(s): BIOL 304 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

BIOL 555 - Lab in Waterscape Ecology

Credits: 1 (NR)
Equivalent to EVPP 555

Prerequisite(s): BIOL 550 or permission of instructor.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 1-6
BIOL 556 - Advanced Topics in Microbial Physiology and Metabolism

Credits: 3 (NR)
Comprehensive study of microorganisms including growth, nutrition, transport, autotrophic and heterotrophic metabolism, regulation, and differentiation.

Prerequisite(s): BIOL 305, 306, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

BIOL 559 - Fungi and Ecosystems

Credits: 3 (NR)
Considers impact of fungi on ecosystems in terms of their effects on biogeochemical cycling, primary and secondary production, and regulating community structure and populations of individual species through their activities as symbionts and parasites.
Discusses role of fungi in ameliorating pollutants produced by anthropogenic activities.

Prerequisite(s): BIOL 304 or a course in microbiology, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

BIOL 561 - Comparative Animal Physiology

Credits: 3 (NR)
Detailed study of selected physiological systems of invertebrates and vertebrates, emphasizing current research.

Prerequisite(s): BIOL 326, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

BIOL 562 - Personalized Medicine

Credits: 3 (NR)
Covers basic principles of molecular medicine, including the definition and the need for individualized diagnostics and therapeutics. Students will study the application of proteomics, genomics and bioinformatics as they relate to individualized therapy, and review the major advances in these fields which have relevance to molecular medicine of the future.

Prerequisite(s): Advanced undergraduate coursework in Genetics and Molecular Cell Biology.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring
BIOL 563 - Virology

Credits: 3 (NR)
Fundamental concepts of nature of viruses, virus classification, cultivation, and biochemistry. Emphasizes bacteriophage and animal viruses.

Prerequisite(s): BIOL 482, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

BIOL 564 - Techniques in Virology

Credits: 2 (NR)
Basic techniques of animal virus propagation, isolation, and quantitation.

Prerequisite(s): BIOL 563, or permission of instructor.
Corequisite(s): BIOL 563, or permission of instructor.

Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 3

BIOL 566 - Cancer Genomics

Credits: 3 (NR)
Review of modern concepts in cancer biology including taxonomy of human tumors, common cancer syndromes, and genome instability. Genetic and molecular studies of tumor cell proliferation, migration, invasion, and death.

Prerequisite(s): Course in genetics or biochemistry.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

BIOL 568 - Advanced Topics in Molecular Genetics

Credits: 3 (RD)
Comprehensive study of regulatory mechanisms controlling gene expression in viruses, prokaryotes, and eukaryotes, emphasizing current research.

Prerequisite(s): BIOL 482, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
BIOL 572 - Human Genetics

Credits: 3 (NR)
Inheritance of humans emphasizing current problems, including genetic control of metabolic diseases, effects of radiation and chemical agents in environment, and directed genetic change.

Prerequisite(s): BIOL 311, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

BIOL 573 - Developmental Genetics

Credits: 3 (NR)
Genetic approaches to problem of eukaryotic development, emphasizing current research on regulation of gene enzyme systems.

Prerequisite(s): BIOL 311, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

BIOL 574 - Population Genetics

Credits: 4 (NR)
Genetic structure and dynamics of populations, both real and ideal.

Prerequisite(s): BIOL 308 and 311, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

BIOL 575 - Selected Topics in Genetics

Credits: 1-4 (RT)
Different topics in different years, including molecular, developmental, physiological, and classical genetics, emphasizing current problems and research.

Prerequisite(s): BIOL 311, or permission of instructor.

Notes: May be repeated once with permission of department chair.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0-6
BIOL 576 - Microbial Ecology of Soils

Credits: 3 (NR)
Detection, identification, and physiological role of microorganisms in soils from root zone to deep subsurface. Emphasizes interactions of microorganisms, viruses through protests, and their functions in soil.

Equivalent to EVPP 576

Prerequisite(s): BIOL 305, 306, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

BIOL 577 - Biogeochemistry: A Global Perspective

Credits: 3 (NR)
Structure and function of ecosystems, their interactions as components of landscapes, and contributions to global environment. Emphasizes biogeochemical cycles of natural, disturbed, and managed ecosystems, and their integration at landscape and global level as related to current ecological problems such as transfer of nonpoint source pollutants, atmospheric deposition, stratospheric ozone depletion, and global change.

Prerequisite(s): BIOL 308, CHEM 211, 212 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

BIOL 578 - Mutation, DNA Repair, and Environmental Contamination

Credits: 3 (NR)
Overview of relationship between environmental contamination and genetic damage. Covers types of contamination that result in mutations, and molecular mechanisms of DNA damage and repair.

Prerequisite(s): BIOL 307 and 311.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

BIOL 579 - Molecular Evolution and Conservation Genetics

Credits: 3 (NR)
Evolution of genes and gene families at molecular level, including gene duplication and divergence, positive and negative selection, genetic drift, and molecular clocks. Also includes selected applications in conservation genetics, such as molecular phylogenetics and estimates of population size.

Prerequisite(s): BIOL 311.
Corequisite(s): BIOL 471, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**BIOL 580 - Computer Applications for the Life Sciences**

Credits: 3 (NR)
Studies computer use in biological sciences. Combines lectures, supervised exercises on mainframe and microcomputers. Students present seminars on advanced application and complete project using computers to fulfill a major assignment associated with another course or employment.

Prerequisite(s): 12 credits of biology and one year of college mathematics, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**BIOL 581 - Estuarine and Coastal Ecology**

Credits: 3 (NR)
Emphasizes marine biology of estuarine and coastal habitats of Chesapeake Bay region, and factors affecting distribution and abundance of organisms.

Equivalent to EVPP 581

Prerequisite(s): Course in Ecology and permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**BIOL 582 - Estuarine and Coastal Ecology Laboratory**

Credits: 1 (NR)
Continues EVPP 546/BIOL 546 as the laboratory section focusing on the approach and methods of estuarine research, including analysis and communication of results.

Equivalent to EVPP 582

Corequisite(s): BIOL/EVPP 581

Hours of Lecture or Seminar per week: 1-2
Hours of Lab or Studio per week: 3

**BIOL 583 - General Biochemistry**
Credits: 4 (NR)
Structure and function of proteins, carbohydrates and lipids, enzymology, and metabolism and its controls. Emphasizes chemistry of nitrogen compounds.

**Prerequisite(s):** BIOL 213; CHEM 313, 314; or permission of instructor.

**Hours of Lecture or Seminar per week:** 4  
**Hours of Lab or Studio per week:** 0

**BIOL 585 - Eukaryotic Cell Biology Laboratory**

Credits: 1-2 (NR)
Selected topics of laboratory procedures used in the study of eukaryotic cells.

**Prerequisite(s):** BIOL 484 or BIOL 682, or permission of instructor.

**Notes:** May be repeated one time with permission of program director.

**Hours of Lecture or Seminar per week:** 0-1  
**Hours of Lab or Studio per week:** 3-6

**BIOL 587 - Soil Ecology**

Credits: 3 (NR)
Introduction to physical, chemical, and biological processes that govern development of soils and their ecological functions. Emphasizes central role that plants, microbes, and animals play in soil processes. Provides some training in system of soil classification and current methods to study soils.

**Prerequisite(s):** Course in general ecology or environmental science, or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**BIOL 588 - Global Changes in Climate and Ecology**

Credits: 3 (NR)
Focuses on global-level changes that influence ecology. Introduces climate system - past, present, and future - emphasizing links between ecological systems and changes in climate, land use, and element cycling. Topics include responses of forests, oceans to climate change; effects of elevated carbon dioxide on plants; effects of ultraviolet radiation on aquatic systems; salt marsh responses to sea level rise; global eutrophication; desertification; carbon sequestration; and public policy implications of global change science.

**Prerequisite(s):** Course in ecology, environmental science or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0
BIOL 589 - Teaching Practicum

Credits: 1 (NR)
Experience teaching biology in laboratory or in field under supervision of faculty member.

Prerequisite(s): Permission of instructor, chair, and course coordinator (if any).

Notes: Undergraduate assists instructor. May be repeated once.

Hours of Lecture or Seminar per week: 3-6
Hours of Lab or Studio per week: 3

BIOL 591 - Special Topics

Credits: 1-6 (RD)

Prerequisite(s): Permission of instructor.

Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 1-21

BIOL 607 - Fundamentals of Ecology

Credits: 3 (NR)
Overview of concepts in physiological, population, community, and ecosystem ecology. Restricted to graduate students with little or no background in ecology.

Equivalent to EVPP 607

Prerequisite(s): Permission of department.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

BIOL 608 - Topics in Biology

Credits: 1-4 (RD)
In-service course to strengthen and update teacher's knowledge of biology. Topics include organismal biology, cell biology, ecology, microbiology, or genetics.

Prerequisite(s): Employment or anticipated employment as science teacher.

Notes: Not available for credit toward MS in biology, or PhD in environmental science and public policy. May be repeated for credit with permission of department chair.
BIOL 610 - Bioremediation: Theory and Applications

Credits: 3 (NR)
Provides basis for understanding proper application of bioremedial technologies to treatment for hazardous wastes. Includes evaluation of data to determine successful treatment.

Equivalent to EVPP 610

Prerequisite(s): Course in microbiology and either organic chemistry or microbial physiology or equivalent or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

BIOL 611 - Techniques in Environmental Microbiology

Credits: 2 (NR)
Laboratory exercises illustrate techniques to demonstrate microbial degradation, detection of microbes, isolation, and evaluation of physiological and genetic characteristics.

Prerequisite(s): Laboratory course in microbiology, or permission of instructor.

Notes: Open first to those enrolled in BIOL 610.

Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 4

BIOL 622 - Methods and Principles of Animal Taxonomy

Credits: 3 (NR)
Theoretical basis of techniques in animal classification, emphasizing practical application to laboratory problem dealing with a particular animal group.

Prerequisite(s): Course in evolution, or permission of instructor.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 6

BIOL 640 - Environmental Biology
Patterns of climate and weather, tectonics, soil formation, and surface water and groundwater movements.

**Prerequisite(s):** Course in ecology, or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**BIOL 641 - Envr Sci/Pub Policy**

Credits: 3 (NR)  
**Prerequisite(s):** Course in ecology or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**BIOL 643 - Microbial Ecology**

Credits: 4 (NR)  
Study of relationships between microorganisms and their natural environment, and methodology for observing their natural environment and biochemical activities in that environment.

Equivalent to EVPP 643  
**Prerequisite(s):** Course in microbiology, or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 3

---

**BIOL 644 - Wetland Ecology and Mgmt**

Credits: 4 (NR)  
**Prerequisite(s):** CHEM 211, 212, BIOL 307, PHYS 106 and 107, or permission of instructor.

**Hours of Lecture or Seminar per week:** 4  
**Hours of Lab or Studio per week:** 1-12

---

**BIOL 645 - Freshwater Ecology**

Credits: 3 (NR)  
**Prerequisite(s):** EVPP 550 or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0
BIOL 648 - Population Ecology

Credits: 3 (NR)
Survey of ecological models and theory. Topics include population growth and regulation; competition; predator-prey, herbivore-plant, and parasite-host interactions; mutualism; and metapopulation ecology.

Equivalent to EVPP 648

Prerequisite(s): Course in ecology, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

BIOL 649 - Biological Resource Management

Credits: 3 (NR)
Applies modern ecological theories and methods to biological resource management in developing and developed countries. Explores problems in achieving optimum productivity of specific resources and application of systems analysis.

Prerequisite(s): Course in ecology, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

BIOL 650 - Environment Analysis and Modeling

Credits: 4 (NR)
Prerequisite(s): 8 hours of ecology or permission of instructor.

Hours of Lecture or Seminar per week: 4
Hours of Lab or Studio per week: 1-12

BIOL 665 - Environmental Hazards to Human Health

Credits: 3 (NR)
Health effects of chemical contaminants of air, water, and food resulting from industrialized society. Includes identifying, evaluating, and controlling hazards.

Prerequisite(s): Courses in animal physiology and organic chemistry, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
**BIOL 666 - Human Genetics Concepts for Health Care**

Credits: 3 (NR)
Principles of genetically determined diseases with emphasis on clinical aspects of these diseases, genetic counseling, and laboratory methods used in human genetics. Extended studies students preparing to enter medical or dental school are welcome.

Prerequisite(s): BS degree or enrollment in accelerated MS program.

Notes: Course in cell or molecular biology. Not available to students who have taken BIOL 572.

Hours of Lecture or Seminar per week: 4
Hours of Lab or Studio per week: 0

**BIOL 668 - Advanced Techniques in Molecular Biology**

Credits: 4 (NR)
Experimental studies using current methods for purification and characterization of biologically important compounds. Provides training for research in molecular biology.

Prerequisite(s): BIOL 568, or permission of instructor.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 6

**BIOL 669 - Pathogenic Microbiology**

Credits: 3 (NR)
Molecular mechanisms of bacterial pathogenicity and immune response in infectious diseases.

Prerequisite(s): Courses in microbiology and biochemistry.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**BIOL 670 - Environmental Law for Biologists**

Credits: 3 (NR)
Study of laws and regulatory issues such as National Environmental Policy Act and Clean Water and Clean Air Acts. Emphasizes critical evaluation of alternatives to unresolved issues in environmental policies.

Prerequisite(s): Course in ecology, environmental biology, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
BIOL 675 - Aerosol Biology

Credits: 4 (NR)
Provides students with familiarity with the state of the art aerosol equipment and techniques used in laboratory-based research pertaining to biological warfare or terrorism threats. Emphasis will be placed on biosafety procedures, techniques, and equipment used in conducting experiments with infectious organisms in a contained environment.

Prerequisite(s): Undergraduate courses in physics, math, and microbiology, and permission of the Director of the Center for Biodefense.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 3

BIOL 678 - Cell-Based Assays

Credits: 2 (NR)
focus on 1) basics of eukaryotic cell culture; 2) various cell based assay techniques; 3) Real-Time PCR based functional analysis of the signaling pathways. Students will maintain their cell cultures for the duration of the experiments, perform at least one functional assay and analyze the resultant data. Students are expected to learn the properties and limitations of each cell based assay and should be able to explain their results regardless of the outcome. Each student will be responsible for submitting a written report summarizing the design of their experiments and its results. Each report will include the following sections: Introduction, Methods, Results and Discussion, and a special Troubleshooting section.

Prerequisite(s): Permission of Instructor, and 400-level coursework in cell or molecular biology.

Notes: A lab fee of $300 will be charged per student for lab supplies.

When Offered: Fall, Spring

BIOL 680 - Experimental Design and Analysis for the Life Sciences

Credits: 4 (NR)
Advanced course in applying probability and statistics to research in life sciences. Examples drawn from environmental, medical, physiological, genetic, and chemical biology.

Prerequisite(s): Course in biostatistics, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 3

BIOL 682 - Advanced Eukaryotic Cell Biology

Credits: 3 (NR)
Structure and function of biomembranes, cytoskeleton, and transport systems. Also discusses protein trafficking, cell cycle, and cell adhesion molecules.
Prerequisite(s): BIOL 483, CHEM 313, 314; or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

BIOL 685 - Emerging Infectious Diseases

Credits: 3 (NR)
Students will gain an understanding of the pathogenesis of emerging and/or re-emerging infectious diseases in terms of immune response and systemic alterations. Factors contributing to emergence and virulence for each pathogen will be emphasized. Epidemiology, disease progression, treatment strategies and/or control measures of identified emerging infectious diseases will be discussed.

Prerequisite(s): BIOL 213 and 311, 482 or equivalent; or Permission of Instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring.

BIOL 690 - Introduction to Graduate Studies in Biology

Credits: 1-2 (NR)
Required of all new MS students in biology.

Hours of Lecture or Seminar per week: 1-2
Hours of Lab or Studio per week: 0

BIOL 691 - Current Topics in Biology

Credits: 1-4 (RT)
Study of current topics in biology as determined by instructor. Topics vary and center on emerging areas of investigation in the biological sciences. May be repeated for credit.

Notes: May be repeated for credit.

Hours of Lecture or Seminar per week: 1-4
Hours of Lab or Studio per week: 0-6

BIOL 692 - Seminar in Biology

Credits: 1 (RD)
Topics vary.

Notes: May be repeated for credit.
BIOL 693 - Directed Studies in Biology

Credits: 1-8 (RD)
Study of topic not otherwise available in graduate program. May involve any combination of reading assignments, tutorials, lectures, papers, presentations, or laboratory or field study, determined in consultation with instructor.

Prerequisite(s): Permission of instructor, chair, and graduate committee.

Notes: May not be used to fulfill explicit undergraduate prerequisites for graduate work.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0
Grading: Graduate Special

BIOL 695 - Seminar in Molecular, Microbial, and Cellular Biology

Credits: 1 (RT)
Review and discussion of recent literature in specialized area. Includes student presentations.

Notes: May be repeated for credit.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0

BIOL 715 - Microbial Physiology

Credits: 3 (NR)
Comprehensive study of functioning of microbial cells, with emphasis on pathogens. Stresses growth, transport, cell-to-cell signaling, biofilm formation, antibiotic resistance, and secondary metabolites.

Prerequisite(s): Undergraduate lecture/lab course in microbiology, and course in biochemistry.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

BIOL 718 - Techniques in Microbial Pathogenesis

Credits: 3 (NR)
Laboratory-based class in which students perform current techniques in microbial pathogenesis.
Prerequisite(s): Admission to biosciences PhD or biology MS program, and permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 3

BIOL 720 - Microbial Metabolism

Credits: 3 (NR)
Discussions of catabolic and anabolic pathways of bacterial pathogens and regulation and integration of these pathways.

Prerequisite(s): Undergraduate lecture/lab course in microbiology, and course in biochemistry.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

BIOL 741 - Advanced Topics in Environmental Biology

Credits: 1-4 (RT)
Prerequisite(s): 8 hours of ecology or permission of instructor.

Hours of Lecture or Seminar per week: 1-4
Hours of Lab or Studio per week: 1-12

BIOL 745 - Environmental Toxicology

Credits: 3 (NR)
Study of nature, distribution, and interaction of toxic chemicals released into the environment. Emphasizes effects on nonhuman biota, detection and fate of chemicals, and implications for government regulation.

Equivalent to EVPP 745

Prerequisite(s): Courses in ecology and physiology, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

BIOL 793 - Research in Biology

Credits: 1-3 (RD)
Library, laboratory, or field investigation under supervisor's guidance.

Prerequisite(s): 8 graduate credits in BIOL, and permission of instructor and chair.

Notes: May be repeated for total 3 credits.
BIOL 798 - Master’s Research Project

Credits: 1-3 (RD)
Experimental or theoretical research project chosen and completed under guidance of graduate faculty member. Comprehensive report acceptable to student's advisory committee is required.

Prerequisite(s): Permission of instructor and department chair.

Notes: Students who take BIOL 793 may not receive more than 6 credits total for both BIOL 793 and 798.

BIOL 799 - Thesis

Credits: 1-6 (RD)
Thesis research under direction of supervisor.

Prerequisite(s): 8 graduate hours in BIOL and permission of instructor.

Notes: Students who take BIOL 793 may not receive more than 6 credits total for both BIOL 793 and 799.

BIOL 800 - Studies for the Doctor of Philosophy in Education

Credits: 1-6 (RD)
Program of study designed by student's discipline director and approved by student's doctoral committee. Students participate in research of discipline director and produce paper reporting original contributions. Paper presented in subsequent PhD Summer seminar.

Prerequisite(s): Open only to D.A.Ed. admitted to study in biology.

Notes: Enrollment may be repeated.
Biomedical Sciences (BMED)

Offered by the College of Science

BMED 601 - Cell and Molecular Physiology

Credits: 4 (NR)
Principles of biochemistry and cell signaling and current concepts regarding physiological processes at the cellular and molecular levels.

Prerequisite(s): Admission to Advanced Biomedical Science certificate program

Hours of Lecture or Seminar per week: 4
Hours of Lab or Studio per week: 0
When Offered: Fall

BMED 602 - Biomedical Statistics

Credits: 3 (NR)
Basic principles of biostatistics and epidemiology in theoretical and practical context including: exploring and displaying data appropriately, exploring relationships between two variables, issues of gathering sample data, and understanding randomness and probability.

Prerequisite(s): Admission to Advanced Biomedical Science certificate program

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

BMED 603 - Cell Biology and Microscopic Anatomy

Credits: 3 (NR)
Examines basic histological techniques, ultrastructure of the cell, basic tissue types and histology of specific organ systems. Structure-functional and clinical correlations are described.

Prerequisite(s): Admission to Advanced Biomedical Science certificate program

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

BMED 604 - Fundamentals of Human Physiology
Essential concepts of physiology and mechanisms of body function are presented at various levels of organization, ranging from cellular and molecular to tissue and organ system levels. Emphasis is placed on understanding the integrated regulation of various body processes among the major systems.

**Prerequisite(s):** Admission to Advanced Biomedical Science certificate program

**Hours of Lecture or Seminar per week:** 5  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Spring

**BMED 605 - Introduction to Human Anatomy**

Credits: 3 (NR)  
Principles of anatomy as well as the pertinent anatomy associated with the thorax, abdomen, and pelvic cavities.

**Prerequisite(s):** Admission to Advanced Biomedical Science certificate program

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Spring

**BMED 610 - Principles of Systems Biology**

Credits: 2 (NR)  
Students will build on their knowledge of cellular and molecular biology, genetics, and physiology to understand how these components combine to give rise to complex systems function found in biology.

**Prerequisite(s):** Admission to Biomedical Sciences MS program

**Hours of Lecture or Seminar per week:** 2  
**Hours of Lab or Studio per week:** 1-3  
**When Offered:** Fall

**BMED 611 - Molecular Genetics**

Credits: 2 (NR)  
Students will build on their knowledge of molecular biology and genetics to understand how these components' functions are altered during the inception and course of human disease.

**Prerequisite(s):** Admission to Biomedical Sciences master’s degree

**Hours of Lecture or Seminar per week:** 4  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall
BMED 612 - Principles of Gross Anatomy
Credits: 1 (NR)
Principles of anatomy as well as the pertinent anatomy associated with the thorax, abdomen, and pelvic cavities.

Prerequisite(s): Admission to Biomedical Science’s master’s program

Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 0
When Offered: Fall

BMED 613 - Pathophysiology
Credits: 3 (NR)
Students build on knowledge of physiologic principles and apply the information to pathologic conditions. A higher understanding of the molecular and genetic basis of pathology will be developed as the mechanisms of disease are studied.

Prerequisite(s): Admission to Biomedical Sciences master’s program

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring

BMED 614 - Introduction to Neuroscience
Credits: 3 (NR)
Achieve specific knowledge of the developmental and evolutionary aspects of the nervous system, to introduce systems neurobiology through study of the visual system and motor system pathways.

Prerequisite(s): Admission to Biomedical Science’s master’s program

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring

BMED 651 - Physician and Society
Credits: 1 (RD)
Seminar series explores the cultural, social, economic and ethical factors that affect the practice of medicine in the 21st century.

Prerequisite(s): Admission to Advanced Biomedical Science certificate program

Notes: May be repeated for a maximum of two credits

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 0
Grading: Satisfactory/No Credit
When Offered: Fall, Spring

BMED 652 - Biomedical Career Pathways

Credits: 1 (NR)
Series of workshops, presentations and field trips. Students will learn study and interview skills to become better prepared to complete AMCAS and secondary applications to medical schools.

Prerequisite(s): Admission to Advanced Biomedical Studies certificate program.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0
When Offered: Spring

BMED 653 - Forum and Research

Credits: 3 (NR)
Bi-weekly seminar-style presentations and reading assignments, followed by short student reports, followed by a small group discussions on topics of current interest. Students will prepare a detailed research paper on a topic related to one of the forum topics.

Prerequisite(s): Admission to Biomedical Sciences master’s program

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring

BMED 660 - Molecular and Cellular Physiology

Credits: 3 (NR)
Biochemistry and physiology of the typical cell. The biochemical focus will be on the fundamentals of the forces affecting molecular interactions, the structure-function relationships of proteins and carbohydrates, kinetics and catalysis, and high-throughput analysis of proteins in clinical samples. The physiological focus will be on the structure and function of subcellular organelles, and the foundations of some specialized cells – blood and lymphoid cells, muscle cells, and nerve cells.

Prerequisite(s): Admission to Biomedical Sciences master’s program

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

BMED 661 - Metabolism, Nutrition and Endocrinology
Credits: 4 (NR)
Students will learn the pathways involved in energy metabolism, biosynthesis, and catabolism of waste products in preparation for excretion. Major emphasis will be on the coordination of metabolic pathways in the major organs and tissues through hormonal regulation.

Prerequisite(s): Admission to Biomedical Sciences master’s program

Hours of Lecture or Seminar per week: 4
Hours of Lab or Studio per week: 0

BMED 662 - Cardiopulmonary Biology

Credits: 1-5 (RD)
Anatomy, hemodynamic function, and electrophysiology of the cardiovascular and respiratory system.

Prerequisite(s): Admission to the Biomedical Sciences master’s program.

Hours of Lecture or Seminar per week: 5
Hours of Lab or Studio per week: 0
Grading: Graduate Special
When Offered: Fall, Spring

BMED 663 - Gastrointestinal Biology

Credits: 2 (NR)
Embryologic development, gross and micro-anatomy, and physiologic function of the GI tract. Emphasis will be placed on understanding the integrated regulation of GI processes.

Prerequisite(s): Admission to Biomedical Sciences master’s program

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 1-12
When Offered: Spring

BMED 664 - Renal Biology

Credits: 2 (NR)
Structural, functional and integrative aspects of the kidney and urinary system; identify the basic physiologic mechanisms that underpin renal function; and explain the role the kidney plays in fluid and electrolyte homeostasis, including acid-base balance.

Prerequisite(s): Admission to Biomedical Sciences master’s program

Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 0
When Offered: Spring
BMED 665 - Sexual Development and Reproduction

Credits: 3 (NR)
Cellular and anatomical components of reproduction and early development. These components include the development of the reproductive track, development of gametes, fertilization, and formation of the germ layers and endocrinology of the system.

Prerequisite(s): Admission to the Biomedical Sciences master's program

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring

Biosciences (BIOS)

Offered by the College of Science

BIOS 701 - Biochemical Systematics

Credits: 3 (NR)
Introduces biochemical systems to investigate complex, multicomponent, dynamic functions of cellular systems. Readings include articles from current literature in molecular biosciences. Application of molecular techniques within biosciences is now universal, and the underlying question remains "What is the structure of a cell, and how does it function?"

Equivalent to BINF 701

Prerequisite(s): General biochemistry.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

BIOS 702 - Research Methods

Credits: 3 (NR)
Trains students in research methodologies, techniques, and data analysis in life sciences. Divided into three modules that introduce separate but equally significant components of any research project: parameters required to outline and synthesize a problem, techniques of measurement and analysis used by life scientists, and approaches for data analysis and interpretations.

Prerequisite(s): Admission to PhD program in biosciences.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

BIOS 703 - Laboratory Rotation
Credits: 3 (RT)
Intensive introduction to research laboratory in biosciences. Students read background material pertinent to problem under study, learn and practice research methods of laboratory, and formulate short final project that may be proposal or actual project, demonstrating some mastery of techniques and approaches employed.

Prerequisite(s): Admission to PhD program in biosciences.

Notes: Should be repeated three times (except by permission of concentration director).

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 3
Grading: Graduate Special

**BIOS 704 - Topics in Biosciences**

Credits: 1 (RT)
Combines invited seminars from internal and external faculty with graduate student seminars. Seminar presentation required for advancement to candidacy, generally given in last semester before candidacy. Includes discussion section led by course coordinator.

Prerequisite(s): Admission to PhD program in biosciences.

Notes: Required of all students during each semester prior to advancement to candidacy. Should be repeated three times (except by permission of concentration director).

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0

**BIOS 710 - Current Topics in Bioscience**

Credits: 1-3 (RT)
Studies current topic in biosciences.

Prerequisite(s): Admission to biosciences PhD or biology MS program.

Notes: Topics vary. May be repeated for credit with permission of concentration director.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0

**BIOS 719 - Extremophiles**

Credits: 5 (NR)

Hours of Lecture or Seminar per week: 5
Hours of Lab or Studio per week: 1-12
BIOS 740 - Laboratory Methods in Functional Genomics and Biotechnology

Credits: 3 (NR)
Current laboratory techniques in molecular biology and genomics, including nucleic acid isolation, gene cloning and sequencing, gel blot analysis, PCR, in vitro mutagenesis, and theory and practice of DNA microarray analysis of gene expression. Topics may vary from year to year depending on advances in field.

Prerequisite(s): Graduate standing and undergraduate courses in genetics and molecular biology.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 3

BIOS 741 - Genomics

Credits: 3 (NR)
Genetic structure and function at whole genome level. Includes some sequence analysis, comparative genomics, classical genetics, and developmental genetics, as well as analysis of syntenic groups, isochores, gene families, genetic complexity, C value paradox, directed discovery of gene functions, and animal models of human disease. Readings from recent texts and primary research literature. Students expected to give one or two oral presentations of primary research papers, as well as complete midterm and final exams.

Prerequisite(s): At least one undergraduate course in genetics and molecular biology, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

BIOS 742 - Biotechnology

Credits: 3 (NR)
Theory and applications of biotechnology. Includes promoter design, gene fusions, protein targeting, techniques of protein purification, construction of transgenic organisms, cloning of animals and plants, ethical and legal issues. This is a relatively new area of study that is rapidly changing; course strives to keep students abreast of current literature.

Prerequisite(s): Undergraduate course work in genetics and molecular biology.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

BIOS 743 - Genomics, Proteomics, and Bioinformatics

Credits: 3 (NR)
Fundamental methods for analyzing genomic and proteomic data, including nucleic acid and protein sequences, pair-wise and multiple alignment, database search methods, clustering and presentation of data, prediction modeling, and survey of available software and freeware tools.

Prerequisite(s): Admission to biosciences PhD or biology MS program.
Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0

BIOS 744 - Molecular Genetics

Credits: 3 (NR)  
Develops understanding of principles of modern molecular genetics and methods of investigation of genomes of pro- and eukaryotes, including types of genetic manipulations conducted in research laboratories today.

Prerequisite(s): Undergraduate course work including BIOL 311; CHEM 313, 314, 315, and 318; equivalents; or permission of instructor.

Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0

BIOS 760 - Seminar in Molecular Systematics

Credits: 1-3 (RD)  
Presentations and discussion by students and faculty of research papers and projects.

Hours of Lecture or Seminar per week: 1-3  
Hours of Lab or Studio per week: 0

BIOS 761 - Dispersal Patterns of Biological Agents

Credits: 3 (NR)  
Introduces military and terrorist methods of dispersal patterns. Covers physics of aerosols, engineering and mechanics of building ventilation systems, and mechanical dissemination including handheld, automatic, vehicle, and truck-mounted systems. Also covers viability of specific agents involved.

Prerequisite(s): Admission to biosciences PhD or biology MS program, and permission of instructor.

Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0

BIOS 762 - Phylogenetic Analysis

Credits: 4 (NR)  
A consideration of molecular systematics techniques in biology, especially cladistics and phenetics methods. Species concepts, biological nomenclature, and classifications will also be discussed. Laboratory will emphasize phylogenetic methods using online sources of comparative data.
BIOS 765 - Molecular Systematics

Credits: 4 (NR)
Comparative evolutionary techniques applied to molecular data. Use of molecular techniques, molecular databases, and analytical techniques will be covered.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

BIOS 767 - Molecular Evolution

Credits: 3 (NR)
A review of the diversity and organization of genomes and evolutionary processes that operate at the molecular level. Emphasis will be placed on processes of molecular evolution and techniques used to analyze these processes.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

BIOS 782 - Interdisciplinary Issues in Bioethics: Law and Policy

Credits: 3 (NR)
Prerequisite(s): BIOS 780 and 781.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

BIOS 898 - Directed Studies in Biosciences

Credits: 1-12 (RD)
Studies of specialized topics in biosciences. Specific arrangements for designing scope and area of study to be determined in consultation with instructor. May involve literature searches and review, workshops, or tutorials.

Prerequisite(s): Permission of research advisor.

Hours of Lecture or Seminar per week: 1-12
Hours of Lab or Studio per week: 0
Grading: Graduate Special

BIOS 899 - Directed Research in Biosciences
Credits: 1-12 (RD)
Research on a pertinent topic in biosciences. Scope and subject of research to be determined by instructor.

Prerequisite(s): Permission of research advisor.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0
Grading: Graduate Special

BIOS 998 - Doctoral Dissertation Proposal

Credits: 1-6 (RD)
Research and writing of research proposal for doctoral dissertation.

Prerequisite(s): Permission of research advisor.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0
Grading: S/IP

BIOS 999 - Doctoral Dissertation Research

Credits: 1-12 (RD)
Research in concentration pertinent to students' program of study.

Prerequisite(s): Admission to candidacy or approval by research advisor.

Notes: Maximum of 24 credits can be applied toward degree.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0
Grading: Satisfactory/No credit only

Business Legal Studies (BULE)

Offered by the School of Management

If a student takes noncore, upper-level business courses before admission to SOM, those courses will not count on an undergraduate degree application for any major in the school, except as general elective credit. A grade of C or higher must be presented on the graduation application for each upper-level course in the major. Course prerequisites are strictly enforced. Degree status is defined as formal admission to BS degree status in SOM.

BULE 302 - Legal Environment of Business

Credits: 3 (NR)
Survey of the legal environment of business, emphasizing legal concepts and legal reasoning to prepare students to recognize legal problems and formulate appropriate responses. Topics include the federal and state court systems, constitutional and administrative law, business torts and crimes, contracts and business ethics. Lecture, discussion, cases.
School of Management students will not be permitted to make more than three attempts to achieve a C or higher in BULE 302. Those who do not successfully complete this course within three attempts will be terminated from their major and will not be eligible to receive a degree from the School of Management. For more information about this, see the "Termination from the Major" section under Academic Policies.

Prerequisite(s): Sophomore standing.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring, Summer

BULE 402 - Commercial Law

Credits: 3 (NR)
Survey of commercial law emphasizing the Uniform Commercial Code. Lecture, discussion, cases.

Prerequisite(s): C or higher in BULE 302, degree status. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

Business Management (BMGT)

BMGT 603 - Economics for Successful Firm Management

Credits: 3 (NR)
Provides fundamental understanding of applying microeconomics concepts to managerial decision making. Explores principles of microeconomic theory, including market supply and demand, production and cost functions, industry structure, and product and resource pricing. Due to the presentation and application of course material, this course can only be taken by students enrolled in the Master of Arts in Business Management Program.

Prerequisite(s): Admission to BMGT program.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

BMGT 612 - Performance Evaluation Through Cost Management
Credits: 3 (NR)
Examines impact of cost and cost allocation on performance and evaluation. Due to the presentation and application of course material, this course can only be taken by students enrolled in the Master of Arts in Business Management Program.

Prerequisite(s): Admission to BMGT program.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

BMGT 613 - Financial Reporting and Firm Analysis

Credits: 3 (NR)
Foundation course focusing on economics and analysis of business transactions and financial reporting issues. Topics include introduction to accounting framework in financial reporting; analysis of financial statements, economic events and impact on financial reports, and impact of accounting methods on financial reports. Due to presentation and application of course material, course only open to students enrolled in MA in Business Management Program.

Prerequisite(s): Admission to BMGT program.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

BMGT 623 - Marketing and Firm Performance

Credits: 3 (NR)
Develops market-based knowledge and skills for effective marketing decision making, strategy design, implementation, and evaluation in variety of institutional and competitive situations. Addresses importance of companies being market-driven and customer-focused. Emphasis on case studies, team work, and projects. Due to the presentation and application of course material, this course is only open to students enrolled in MA in Business Management Program.

Prerequisite(s): Admission to BMGT program.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

BMGT 633 - Statistical Analysis for Management

Credits: 3 (NR)
Use statistical methods as analytical tools for understanding and solving business problems and supporting business decision making. Includes descriptive statistics, sampling, inferencing and regression. Extensive use of applied business scenarios to illustrate concepts and computer software for data analysis. Due to presentation and application of course material, this course can only be taken by students in MA in Business Management Program.

Prerequisite(s): Admission to BMGT program.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
BMGT 638 - Managing Business Operations in a Global Environment

Credits: 3 (NR)
Focuses on design, planning, and control activities to produce and deliver goods/services in organizations. Introduces operations management decisions; operations strategy, process analysis and design, capacity planning, supply chain management, total quality management, and project management. Uses quantitative modeling, case studies, and computer software to analyze/solve problems. Due to the presentation and application of course material, course only open to MA Business Management students.

Prerequisite(s): Admission to BMGT program.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

BMGT 643 - Financial Management in a Global Environment

Credits: 3 (NR)
Introduces theory and practice of finance within corporations. Topics include intertemporal choice, valuation, capital budgeting and structure, working capital management, and risk and return analysis. Due to the presentation and application of course material, this course can only be taken by students enrolled in the Master of Arts in Business Management Program.

Prerequisite(s): Admission to BMGT program.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

BMGT 653 - Fundamentals of Behavior in Organizations

Credits: 3 (NR)
Emphasizes development of conceptual tools for understanding and analyzing individual and group behavior in organizations and organizational processes. Considerable focus on developing relevant skills for working in groups and teams. Lectures, discussions, case analyses, and class exercises. Due to the presentation and application of course material, this course can only be taken by students enrolled in the M.A. in Business Management.

Prerequisite(s): Admission to BMGT program.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

BMGT 662 - Management of Information Technology

Credits: 3 (NR)
Strategic, economic and managerial aspects of managing organization's IT assets are covered. Business value of IT is understood and assessed in context of its impact on organization's structure and strategy. Includes discussion on major issues pertaining management of IT infrastructure. Due to presentation and application of course material, course is only open to students enrolled
BMGT 673 - Business Legal Environment

Credits: 1.5 (NR)
Examines the managerial impact of the law upon decision-making processes in business organizations. Lectures as well as discussions of judicial opinions and readings. Due to the presentation and application of course material, this course can only be taken by students enrolled in the Master of Arts in Business Management Program.

Prerequisite(s): Admission to BMGT program.

Hours of Lecture or Seminar per week: 1.5
Hours of Lab or Studio per week: 0

BMGT 674 - Ethics in the Global Business Environment

Credits: 1.5 (NR)
Strengthens student's ability to identify, critically analyze, appropriately respond to, and provide leadership regarding issues of ethical and socially responsible behavior which they may confront as employees and managers of people, objects and organizations. Due to the presentation and application of course material, this course can only be taken by students enrolled in the MA in Business Management Program.

Prerequisite(s): Admission to BMGT program.

Hours of Lecture or Seminar per week: 1.5
Hours of Lab or Studio per week: 0

BMGT 678 - Business Strategy and Firm Leadership

Credits: 3 (NR)
Capstone focusing on strategy development at business unit and corporate level. Cases, readings, and project format familiarize students with strategic management function and help develop analytical, organizational, and managerial skills to analyze complex business situations. Opportunities to integrate knowledge gained in prior course work. Due to presentation and application of course material, course only open to students enrolled in MA in Business Management.

Prerequisite(s): Admission to BMGT program.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
Grading: Graduate Special
BMGT 692 - Professional Development Experience for Academic Credit

Credits: 3 (NR)
Professional experience in conjunction with academic development. Hands-on experience is an important part of academic and career preparation and may be completed by an internship, consulting project, independent study or additional global experience. Must involve an average of 15 hours per week and be approved by program director.

Prerequisite(s): Admission to BMGT program and completion of 18 credit hours in BMGT program.

Grading: Special Graduate.

BMGT 695 - Global Business Perspectives

Credits: 3 (NR)
Includes a weeklong international student study tour lead by a full-time School of Management professor. Students interact with business and government leaders, participate in seminars, and visit sites of local or multinational companies. Focus on developing an increased understanding of global markets, competition, business strategy, and business opportunities in addition to the social and cultural dimensions of global business.

Prerequisite(s): Admission to BMGT program or permission of the program director.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
Grading: Special Graduate.

Business, Minor in (MSOM)

Offered by the School of Management

Prerequisite for all MSOM courses is completion of 30 credits (sophomore standing). For the Business Minor, a grade of C or higher is required in each MSOM course used for the minor.

MSOM 300 - Managing Financial Resources

Credits: 3 (NR)
Focuses on using basic concepts of accounting and financial management to make investment, credit, and operating decisions for an organization. Emphasizes financial reports to aid planning and control of organizational activities.

Prerequisite(s): Completion of 30 credits (sophomore standing)

Notes: May not be taken for credit by SOM majors. Students who have received credit for both ACCT 203 and FNAN 301 cannot also receive credit for MSOM 300.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring, Summer
MSOM 301 - Managing People and Organizations

Credits: 3 (NR)
Introduces key issues in management, organizational behavior, and human resource management. Special attention to best practices used by effective managers.

Prerequisite(s): Completion of 30 credits (sophomore standing)

Notes: May not be taken for credit by SOM majors. Students cannot receive credit for both MGMT 301 and MSOM 301.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring, Summer

MSOM 302 - Managing Information in a Global Environment

Credits: 3 (NR)
Provides overview of strategic role of information, need for information systems, organizing information, integration of information systems in management processes and decision making, and related discussions in electronic commerce.

Prerequisite(s): Completion of 30 credits (sophomore standing)

Notes: May not be taken for credit by SOM majors. Students cannot receive credit for both MIS 301 and MSOM 302.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring, Summer

MSOM 303 - Marketing in a Global Economy

Credits: 3 (NR)
Presents marketing principles, concepts, strategies, and analytical tools used by profit and nonprofit organizations to market ideas, products, and services to selected target groups. Emphasizes how to develop, promote, distribute, and price firm's offerings in dynamic economic, social, political, and global environment.

Prerequisite(s): Completion of 30 credits (sophomore standing)

Notes: May not be taken for credit by SOM majors. Students cannot receive credit for both MKTG 301 and MSOM 303.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring, Summer

MSOM 304 - Entrepreneurship: Starting and Managing a New Enterprise
Explores behaviors required to successfully launch a new business, tools to identify and evaluate opportunities, and the issues critical to a new firm. Issues include organizational structure, effective marketing strategy, operational logistics, legal issues, financial projections, financing options, and available support structures.

Prerequisite(s): Completion of 30 credits (sophomore standing)

Notes: May not be taken for credit by SOM majors

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

MSOM 305 - Managing in a Global Economy

Credits: 3 (NR)
Multidisciplinary approach to global economy from the viewpoint of managing international business. Introduces various aspects of managing business in a global economy including theories and practices of international trade, investment, and business strategies.

Fulfills Mason Core requirement in global understanding.

Prerequisite(s): Completion of 30 credits (sophomore standing)

Notes: May be taken for credit by SOM majors only if taken to satisfy the Mason Core global understanding requirement.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring, Summer

MSOM 306 - Managing Projects and Operations

Credits: 3 (NR)
Introduces project management and operations management concepts and tools including project planning, scheduling, monitoring, and control; process design, selection and improvement; supply chain management; inventory management; and quality assurance.

Prerequisite(s): Completion of 30 credits (sophomore standing)

Notes: May not be taken for credit by SOM majors. Students cannot receive credit for both OM 301 and MSOM 306.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

MSOM 307 - Marketing to the Federal Government
This course explores the government procurement process and contracting from the perspective of marketers and contractors engaged in the federal community. Students will review and analyze the procurement practices of major government contractors and seek to understand the challenges associated with conducting business with the United States government.

**Prerequisite(s):** Completion of 30 credits (sophomore standing).

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

### MSOM 491 - Special Topics: Business Minor

Credits: 3 (RD)  
Topics related to a minor in business will vary on the focus of the course and by discipline.

**Prerequisite(s):** Sophomore standing.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall, Spring

### Character Education (EDCE)

Offered by the College of Education and Human Development

### EDCE 601 - How Students Learn Values and Ethics

Credits: 3 (NR)  
Applies theories to practice to increase learning through the study of moral and ethical development theories and how students learn personal, prosocial, and civic values.

**Prerequisite(s):** Admission to Character Education Program.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

### EDCE 602 - Comprehensive Character Education Frameworks

Credits: 3 (NR)  
Analyzes comprehensive character education frameworks that have emerged from research and practice, examining framework components and their applications to character education initiatives.

**Prerequisite(s):** Admission to Character Education Program.
EDCE 603 - Global and Ethical Perspectives on Teaching Diverse Learners

Credits: 3 (NR)
Analyzes ethical and moral dimensions of classroom interactions using developmental framework and foundation of democratic principles. Evaluates school politics and policies, and provides overview of prevailing ethical points of view.

Prerequisite(s): Admission to Character Education Program.

EDCE 604 - Character Education Curriculum and Programs

Credits: 3 (NR)
Analyzes and evaluates quality of programs and curriculum materials for character education using program, implementation, and curriculum standards.

Prerequisite(s): Admission to Character Education Program.

EDCE 605 - Character Education Assessment and Evaluation

Credits: 3 (NR)
Applies assessment standards and audit tools to analyze and evaluate formative and summative assessments of programs for character education. Utilizes backward design model.

Prerequisite(s): EDCE 602, 603, and 604.

EDCE 606 - Leadership in Character Education: An Internship in Program Development, Curriculum, Instruction, or Assessment

Credits: 3 (NR)
A 150-hour, on-site internship focusing on one of the following: instructional strategies, curriculum or program development, resource use, or assessment.

Prerequisite(s): EDCE 602, 603, 604, and 605.
EDCE 607 - Educational Research for Character Educators

Credits: 3 (NR)
Studies and applies fundamental concepts and methods of educational action research. Emphasis on researching how students learn personal, prosocial, and civic values, and teacher and school effectiveness in this area.

Prerequisite(s): EDCE 600, 601, 602, 603, 604, and 605

Chemistry (CHEM)

Offered by the College of Science

CHEM 211, 212 are prerequisites to all other undergraduate CHEM courses numbered 301 or above.

CHEM 101 - Introduction to Modern Chemistry

Credits: 3 (NR)
Physical and chemical discoveries and properties of matter presented along with their application and impact on way of life. Topics include atomic and molecular structure, nuclear chemistry, and chemistry in Earth and atmosphere.

Fulfills Mason Core requirement in natural science (nonlab).

Notes: Not open to students majoring in chemistry. Credit will not be given for CHEM 101 and CHEM 103, or for both CHEM 101 and CHEM 211 or 212. No previous knowledge of chemistry required.

CHEM 102 - Introduction to Organic, Biochemical, Pharmacological, and Fuel Chemistry

Credits: 3 (NR)

Modern and historical accounts of organic chemistry, biochemistry, pharmacology, and fuel chemistry. Topics include the chemistry of carbon compounds, synthesis of polymers and their utility and use in the modern world, biomolecules, DNA and animal cloning, embryonic stem cells, the chemical structure and biological activity of drugs and medicines, and fuel chemistry including petroleum through green chemistry and the future.
Fulfills Mason Core requirement in natural science (nonlab).

**Prerequisite(s):** Not open to students majoring in chemistry.

**Notes:** Does not fulfill the requirement for a laboratory course in Chemistry. Not for Chemistry majors. No credit for both CHEM 102 and CHEM 104, or CHEM 212.

**Hours of Lecture or Seminar per week:** 1-3  
**Hours of Lab or Studio per week:** 0

**CHEM 103 - Chemical Science in a Modern Society**

Credits: 4 (NR)  
Terminal course in chemistry for nonscience and nursing majors. Principles and application of chemistry.

Fulfills Mason Core requirement in natural science (lab).

**Notes:** Not open to students majoring in chemistry. Credit will not be given for both this course and CHEM 211, 212. Topics are those described for CHEM 101 and 102 but with lab to enhance scientific experience.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 3

**CHEM 104 - Introduction to Organic, Biochemical, Pharmacological, and Fuel Chemistry**

Credits: 4 (NR)

Modern and historical accounts of organic chemistry, biochemistry, pharmacology, and fuel chemistry. Topics include the chemistry of carbon compounds, synthesis of polymers and their utility and use in the modern world, biomolecules, DNA and animal cloning, embryonic stem cells, the chemical structure and biological activity of drugs and medicines, and fuel chemistry including petroleum through green chemistry and the future. (CHEM 104 requires concomitant registration in a 104 laboratory section.)

Fulfills Mason Core requirement in natural science (lab).

**Prerequisite(s):** Not open to students majoring in chemistry.

**Notes:** Not open to students majoring in chemistry. Credit will not be given for both CHEM 104 and CHEM 212.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 3

**CHEM 105 - Introductory Chemistry Laboratory I**
Credits: 1 (NR)
Introductory laboratory course to demonstrate principles and application of chemistry.

Prerequisite(s): CHEM 101.

Notes: Not open to students majoring in chemistry. Credit will not be given for both this course and CHEM 211, 212.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 3
When Offered: Fall

CHEM 106 - Introductory Chemistry Laboratory II

Credits: 1 (NR)
1-credit laboratory course for non-science majors. Laboratory experience to demonstrate principles and application of chemistry.

Prerequisite(s): CHEM 102.

Notes: Not open to students majoring in chemistry. Credit will not be given for both this course and CHEM 211, 212.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 3
When Offered: Spring

CHEM 155 - Introduction to Environmental Chemistry I

Credits: 4 (NR)

Basic chemical principles of Earth's water, air, and soil systems; presented in the context of understanding environmental issues. Includes Saturday morning field trips to sites of past and present environmental contamination, alternating with Saturday morning laboratory activities. Designated a Green Leaf Course.

Fulfills Mason Core requirement in natural science (lab).

Notes: Credit will not be given for this course and CHEM 103, 104.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 3

CHEM 156 - Introduction to Environmental Chemistry II

Credits: 4 (NR)

Basic chemical principles of Earth's water, air, and soil systems; presented in the context of understanding environmental issues.
Includes Saturday morning field trips to sites of past and present environmental contamination, alternating with Saturday morning laboratory activities.
Designated a Green Leaf Course.

Fulfills Mason Core requirement in natural science (lab).

**Prerequisite(s):** CHEM 155.

**Notes:** Credit will not be given for this course and CHEM 103, 104.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 3

---

**CHEM 201 - Introductory Chemistry I**

Credits: 3 (NR)  
Fundamental principles of atomic and molecular structure; chemical bonding; basic concepts of chemical reactions and thermochemistry; and properties of gases, liquids, and solids.

Fulfills Mason Core requirement in natural science (nonlab).

**Notes:** Does not fulfill degree requirements for laboratory science course. Credit will not be given for this course and CHEM 211 or 103. General chemistry course for students interested in science, engineering, mathematics, or computer science who do not require a lab.

**Hours of Lecture or Seminar per week:** 1-6  
**Hours of Lab or Studio per week:** 0

---

**CHEM 202 - Introductory Chemistry II**

Credits: 3 (NR)  
Fundamentals of reaction rates and equilibrium. Topics include kinetics, properties of solutions, ionic equilibrium, chemical thermodynamics, electrochemistry, and nuclear chemistry.

Fulfills Mason Core requirement in natural science (nonlab).

**Prerequisite(s):** CHEM 201 or 211.

**Notes:** Does not fulfill degree requirements for laboratory science course. Credit will not be given for this course and CHEM 212 or 104. Second-semester general chemistry course for those interested in science, engineering, mathematics, or computer science who do not require a lab.

**Hours of Lecture or Seminar per week:** 1-3  
**Hours of Lab or Studio per week:** 0

---

**CHEM 203 - General Chemistry Laboratory I**
Credits: 1 (NR)
General Chemistry laboratory course for students majoring in science, engineering, or mathematics. Laboratory experience to
demonstrate general chemistry principles and applications.

**Prerequisite(s):** CHEM 201.

**Notes:** Credit will not be given for this course and CHEM 101 or 102 to students majoring in science, engineering, or
mathematics.

**Hours of Lecture or Seminar per week:** 0  
**Hours of Lab or Studio per week:** 3  
**When Offered:** Spring

---

**CHEM 204 - General Chemistry Laboratory II**

Credits: 1 (NR)
Second semester general chemistry laboratory course for students majoring in science, engineering, or mathematics. Laboratory
experience to demonstrate general chemistry principles and applications.

**Prerequisite(s):** CHEM 202.

**Notes:** Credit will not be given for this course and CHEM 101 or 102 to students majoring in science, engineering, or
mathematics.

**Hours of Lecture or Seminar per week:** 0  
**Hours of Lab or Studio per week:** 3  
**When Offered:** Fall, Spring

---

**CHEM 211 - General Chemistry**

Credits: 4 (NR)
Basic facts and principles of chemistry, including atomic and molecular structure, gas laws, kinetics, equilibrium,
electrochemistry, nuclear chemistry, and properties and uses of the more important elements and their compounds.

Fulfills Mason Core requirement in natural science (lab).

**Notes:** Credit will not be given for this course and CHEM 103, 104. Students majoring in science, engineering, or mathematics
should choose this course sequence.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 3

---

**CHEM 212 - General Chemistry**

Credits: 4 (NR)
Basic facts and principles of chemistry, including atomic and molecular structure, gas laws, kinetics, equilibrium,
electrochemistry, nuclear chemistry, and properties and uses of the more important elements and their compounds.
Fulfills Mason Core requirement in natural science (lab).

Prerequisite(s): CHEM 211. Prerequisite enforced by registration system.

Notes: Credit will not be given for this course and CHEM 103, 104. Students majoring in science, engineering, or mathematics should choose this course sequence.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 3

CHEM 251 - General Chemistry for Engineers

Credits: 4 (NR)
Fundamental principles of chemical structure and reactivity including atomic and molecular structure; chemical bonding; structures of ionic, covalent, and metallic lattices; oxidation reduction; electrochemistry and chemistry of metals; and introduction to organic chemistry and polymers.

Fulfills Mason Core requirement in natural science (lab).

Notes: Enrollment restricted to students intending to major in engineering. Students who need two semesters of chemistry should enroll in CHEM 211. Credit will not be given for this course and CHEM 211.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 3

CHEM 300 - Chemistry of Semiconductor Processing

Credits: 3 (NR)
Chemical aspects of the manufacture of semiconductor devices. Topics include oxidation of silicon, photoresists, plasma etching, removal of metal contaminants by acid etching, and analysis of semiconductor thin films.

Prerequisite(s): Completion of 30 credits or permission of instructor.

Notes: Does not satisfy chemistry course requirements for BS in biology. Cannot be used as a chemistry elective toward BA, BS, or minor in chemistry, and does not fulfill premedical requirements.

Hours of Lecture or Seminar per week: 1-12
Hours of Lab or Studio per week: 0

CHEM 313 - Organic Chemistry

Credits: 3 (NR)
Theoretical, synthetic, industrial, and biological aspects of the chemistry of carbon compounds.

Prerequisite(s): CHEM 211 and CHEM 212. Prerequisite enforced by registration system.
Corequisite(s): CHEM 315.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**CHEM 314 - Organic Chemistry II**

Credits: 3 (NR)
Theoretical, synthetic, industrial, and biological aspects of the chemistry of carbon compounds.

**Prerequisite(s):** CHEM 212, CHEM 313, CHEM 315. Prerequisite enforced by registration system.

Corequisite(s): CHEM 318.

Hours of Lecture or Seminar per week: 1-9
Hours of Lab or Studio per week: 0

**CHEM 315 - Organic Chemistry Lab I**

Credits: 2 (NR)
Lab techniques and reactions arranged to accompany CHEM 313.

**Prerequisite(s):** CHEM 212, CHEM 313. Prerequisite enforced by registration system.

Corequisite(s): CHEM 313.

Notes: One-hour recitation.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 3

**CHEM 318 - Organic Chemistry Lab II**

Credits: 2 (NR)
Continuation of CHEM 315, arranged to accompany CHEM 314.

**Prerequisite(s):** CHEM 313, CHEM 314, CHEM 315. Prerequisite enforced by registration system.

Corequisite(s): CHEM 314.

Notes: One-hour recitation.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 3
CHEM 321 - Elementary Quantitative Analysis

Credits: 4 (NR)
Principles of chemical analysis emphasizing ionic equilibria. Lab consists of gravimetric, volumetric, and instrumental methods illustrating principal types of quantitative determinations.

Prerequisite(s): CHEM 212, MATH 113. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 6

CHEM 331 - Physical Chemistry I

Credits: 3 (NR)
Yearlong survey covering topics including thermodynamics, equilibria, kinetics, solution properties, elementary quantum theory, electrochemistry, atomic and molecular structure, and nuclear chemistry.

Prerequisite(s): CHEM 314, CHEM 318, CHEM 321, MATH 114, PHYS 243 or PHYS 160. Prerequisite enforced by registration system.

Corequisite(s): PHYS 243 or PHYS 160.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 0

CHEM 332 - Physical Chemistry II

Credits: 3 (NR)
Yearlong survey covering topics including thermodynamics, equilibria, kinetics, solution properties, elementary quantum theory, electrochemistry, atomic and molecular structure, and nuclear chemistry.

Prerequisite(s): CHEM 331. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 0

CHEM 333 - Physical Chemistry for the Life Sciences I

Credits: 3 (NR)
Yearlong survey of principles of physical chemistry emphasizing application in biological sciences. Topics include first and second laws of thermodynamics, free energy and chemical equilibria, kinetics, transport properties, molecular interactions, molecular structure, spectroscopy, statistical thermodynamics, and x-ray diffraction.

Prerequisite(s): MATH 113

Corequisite(s): MATH 114
CHEM 334 - Physical Chemistry for the Life Sciences II

Credits: 3 (NR)
Yearlong survey of principles of physical chemistry emphasizing application in biological sciences. Topics include first and second laws of thermodynamics, free energy and chemical equilibria, kinetics, transport properties, molecular interactions, molecular structure, spectroscopy, statistical thermodynamics, and x-ray diffraction.

Prerequisite(s): CHEM 333; MATH 113, 114

Notes: Credit will not be given for both this course sequence and CHEM 331, 332.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 0

CHEM 336 - Physical Chemistry Lab I

Credits: 2 (NR)
Quantitative experimental study of physicochemical principles. CHEM 336 and 337 constitute an introduction to the practice and theory of experimental physical chemistry.

Fulfills writing intensive requirement in the major.

Prerequisite(s): CHEM 331, PHYS 243 or PHYS 160. Prerequisite enforced by registration system.

Corequisite(s): CHEM 331, PHYS 243 or PHYS 160.

Notes: One-hour recitation.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 3

CHEM 337 - Physical Chemistry Lab II

Credits: 2 (NR)
Continuation of CHEM 336.

Prerequisite(s): CHEM 331, CHEM 332, CHEM 336. Prerequisite enforced by registration system.

Corequisite(s): CHEM 332.

Notes: One-hour recitation.
CHEM 341 - Fundamental Inorganic Chemistry

Credits: 3 (NR)
Descriptive chemistry including chemical properties, reactions, and reaction mechanisms of inorganic elements and compounds. Topics include main group and transition elements, organometallic compounds, and bioinorganic chemistry.

Prerequisite(s): CHEM 212, CHEM 313, CHEM 315. Prerequisite enforced by registration system.

CHEM 350 - Computer Techniques for Chemistry

Credits: 3 (NR)
Introduction to computer software, both commercial and online, emphasizing applicability to chemistry topics. Techniques include spreadsheet programming, graphing and statistics, molecular modeling, and chemical information search and retrieval.

Fulfills Mason Core requirement in information technology (all).

Prerequisite(s): CHEM 313.

CHEM 355 - Undergraduate Research

Credits: 1-3 (RD)
Original research project. May involve lab study, computer modeling and analysis, or other original research as appropriate. Research formulated and completed under instructor's guidance. Culminates in a written and oral final report. May be repeated for a total of 6 credits.

Prerequisite(s): CHEM 313, CHEM 315, MATH 113; PHYS 243, PHYS 244. Prerequisite enforced by registration system.

CHEM 413 - Synthetic and Mechanistic Organic Chemistry

Credits: 3 (NR)
General review of synthetic pathways and applications to new topics, emphasizing fused ring aromatics, heterocyclics, natural
products, and biologically active compounds. Includes relationship of applied organic chemistry to consumer products, including
drugs and agricultural chemicals.

Prerequisite(s): CHEM 314, CHEM 318, CHEM 332, CHEM 337. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**CHEM 422 - Instrumental Analysis**

Credits: 3 (NR)
Introduces theories of analysis by instrumental methods. Basic electronics applied to chemical measurements. Topics include
introduction to theory of spectroscopy including ultraviolet, visible, and infrared, and electrochemical methods of analysis; theory
of Fourier transform techniques such as FT-IR and FT-NMR; and theory of advanced pulse techniques.

Prerequisite(s): CHEM 321, CHEM 332, CHEM 337. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 0

**CHEM 423 - Instrumental Analysis Laboratory**

Credits: 2 (NR)
Laboratory-based introduction to quantitative analysis of organic and inorganic substances by using modern analytical
instrumentation. Laboratory highlights practice of atomic and molecular spectroscopy, spectrophotometry, chromatography,
voltammetry, and potentiometry in relation to chemical experimentation.

Prerequisite(s): CHEM 422. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 6

**CHEM 427 - Aquatic Environmental Chemistry**

Credits: 3 (NR)
Thermodynamic and kinetic processes regulating the chemistry of surface and groundwater in natural and polluted environments
with particular emphasis in explaining the aqueous concentrations of chemical species and controlling geochemical factors in the
hydrosphere. Structure, sources and transformations of organic matter in the aquatic environment and interactions with aqueous
solutes will be covered as related to contemporary issues in water quality.

Prerequisite(s): CHEM 314, CHEM 318, CHEM 321, MATH 113, PHYS 243 or PHYS 160. Prerequisite enforced by
registration system.

Hours of Lecture or Seminar per week: 1-2
Hours of Lab or Studio per week: 0
CHEM 438 - Atmospheric Chemistry

Credits: 3 (NR)
The fundamental chemical processes of the Earth's atmosphere including chemical cycles, thermodynamics, reaction kinetics, photochemistry, radiative balance, ozone chemistry and environmental issues, including air pollution, acid rain and global change.

Equivalent to CLIM 438

Prerequisite(s): CHEM 332. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 1-2
Hours of Lab or Studio per week: 0

CHEM 441 - Properties and Bonding of Inorganic Compounds

Credits: 3 (NR)
Interpretation of physical and chemical properties of inorganic compounds in terms of currently used bonding concepts. Topics include molecular symmetry and applications of symmetry, structure and bonding in ionic solids; reactions and characterizations of solids; electronic and magnetic properties and applications of solids.

Prerequisite(s): CHEM 332, CHEM 337. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 1-2
Hours of Lab or Studio per week: 0

CHEM 445 - Inorganic Preparations and Techniques

Credits: 2 (NR)
Application of techniques of inorganic chemistry to preparation, purification, and spectroscopic characterization of selected substances.

Prerequisite(s): CHEM 441. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 6

CHEM 446 - Bioinorganic Chemistry

Credits: 3 (NR)
Application of inorganic coordination chemistry and physical methods in study of structure and function of metal ion sites in biomolecules. Properties of transition metal ions, ligand field theory. Topics include iron cytochromes, zinc and copper enzymes, cobalamins, iron sulfur proteins, oxygen transport, iron storage, electron transfer, inorganic model compounds, metals in medicine, and toxicity of inorganic species.

Prerequisite(s): CHEM 331, CHEM 336, CHEM 463. Prerequisite enforced by registration system.
Notes: Students may take this course concurrently with CHEM 463 or after taking CHEM 463.

Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 0

CHEM 451 - Special Projects in Chemistry

Credits: 1-3 (NR)
Introduction to chemical research or development. Includes literature search, conferences, and lab.

Prerequisite(s): CHEM 314, CHEM 318, CHEM 321, CHEM 331, CHEM 336. Prerequisite enforced by registration system.

Notes: Written and oral technical reports required.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 6

CHEM 452 - Special Projects in Chemistry

Credits: 1-3 (NR)
Introduction to chemical research or development. Includes literature search, conferences, and lab.

Prerequisite(s): CHEM 451. Prerequisite enforced by registration system.

Notes: Written and oral technical reports required.

Hours of Lecture or Seminar per week: 1-12
Hours of Lab or Studio per week: 6

CHEM 455 - Honors Research in Chemistry

Credits: 3 (NR)
Introduction to research on current problem in chemical sciences under supervision of faculty advisor. Includes literature search, laboratory or theoretical work, conferences with faculty advisor, attendance at regularly scheduled seminars, and oral and written presentations.

Prerequisite(s): CHEM 331, CHEM 332. Prerequisite enforced by registration system.

Notes: Credit will not be given for both these courses and CHEM 451, 452.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 6

CHEM 456 - Honors Research in Chemistry
Credits: 3 (NR)
Introduction to research on current problem in chemical sciences under supervision of faculty advisor. Includes literature search, laboratory or theoretical work, conferences with faculty advisor, attendance at regularly scheduled seminars, and oral and written presentations.

Prerequisite(s): CHEM 455. Prerequisite enforced by registration system.

Notes: Credit will not be given for both these courses and CHEM 451, 452.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 6

CHEM 458 - Chemical Oceanography

Credits: 3 (NR)

The world's oceans, including a variety of closed basins and estuaries, comprise a complex and dynamic system of chemical processes that interact with biological, geological, physical, and atmospheric processes to play a significant role in defining the earth's fragile environment. This course will present an overview of the origin, occurrence, and distribution of the chemical components in sea water and an introduction to the basic principals of the chemical processes taking place in the marine environment.

Designated a Green Leaf Course.

Equivalent to GEOL 458

Prerequisite(s): CHEM 314, CHEM 318, CHEM 321, MATH 114, PHYS 243 or PHYS 160. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CHEM 463 - General Biochemistry I

Credits: 4 (NR)

Brief introduction to biochemistry, followed by in-depth look at amino acids and proteins, 3-D structure, folding and dynamics, their specialized function, and primary metabolism. Emphasizes enzymes and their chemical mechanisms, and metabolism.

Prerequisite(s): CHEM 314, CHEM 318, MATH 114; PHYS 245 and PHYS 246 or PHYS 260 and BIOL 213. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 4
Hours of Lab or Studio per week: 0

CHEM 464 - General Biochemistry II
Continuation of general biochemistry, focusing on secondary metabolism, cell signaling, and processes of replication, transcription, and translation. Emphasizes important biochemistry research topics; much material drawn from current biochemical literature.

**Prerequisite(s):** CHEM 463. Prerequisite enforced by registration system.

**Hours of Lecture or Seminar per week:** 6  
**Hours of Lab or Studio per week:** 0

### CHEM 465 - Biochemistry Lab

Credits: 2 (NR)  
Introduction to modern biochemical experimental methods of studying chemical and physical properties of biological molecules. Includes separation, identification, and characterization of biomolecules.

Fulfills writing intensive requirement in the major.

**Prerequisite(s):** CHEM 463. Prerequisite enforced by registration system.

**Corequisite(s):** CHEM 463.

**Hours of Lecture or Seminar per week:** 1-12  
**Hours of Lab or Studio per week:** 6

### CHEM 467 - The Chemistry of Enzyme-Catalyzed Reactions

Credits: 3 (NR)  
Examples of enzyme mechanisms demonstrate how chemical principles are employed by living organisms. Specific enzyme mechanisms used to illustrate principles from organic, inorganic, and physical chemistry. Discusses techniques to monitor enzyme reactions.

**Prerequisite(s):** CHEM 463. Prerequisite enforced by registration system.

**Hours of Lecture or Seminar per week:** 1-6  
**Hours of Lab or Studio per week:** 0

### CHEM 468 - Bioorganic Chemistry

Credits: 3 (NR)  
Basic understanding of chemical nature of biomolecules and biomacromolecules. Introduces biomolecules such as amino acids, proteins, carbohydrates, and lipids. Lectures focus on biophysical properties and synthesis, using practical examples and visual aids.

**Prerequisite(s):** CHEM 463. Prerequisite enforced by registration system.
CHEM 470 - Laboratory Instructional Methods for Chemistry

Credits: 3 (NR)
Lecture and laboratory experience teaching chemistry in laboratory. Students work closely with faculty members and are responsible for all aspects of teaching undergraduate laboratory techniques. Students also learn techniques for acquisition and storage of chemicals and laboratory apparatus, safety, disposal of chemical waste, and literature of chemical education.

Prerequisite(s): CHEM 314.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 6

CHEM 490 - Undergraduate Seminar

Credits: 1 (RD)
Selected topics from recent chemical theory and applications, generally consisting of research presentations by invited faculty from other institutions. Attendance is required at 80% of the seminars and students must write up a one-page summary of each talk attended. This course will also be used to teach students how to give effective presentations. May be repeated for a total of 2 credits.

Prerequisite(s): CHEM 331, CHEM 336. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0

CHEM 500 - Selected Topics in Modern Chemistry

Credits: 3 (NR)
Topics of interest in analytical, biological, environmental, geological, geochemical, inorganic, organic, and physical chemistry.

Notes: May be repeated for credit with different topics. Credit not allowed toward major in chemistry.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0

CHEM 505 - Hazardous Materials Waste Management

Credits: 1-3 (NR)
Comprehensive review of subjects most frequently encountered in hazardous chemicals management.

Prerequisite(s): CHEM 313 or permission of instructor.
CHEM 513 - Synthetic and Mechanistic Organic Chemistry

Credits: 3 (NR)
General review of synthetic pathways and applications to new topics, emphasizing fused ring aromatics, heterocyclics, natural products, and biologically active compounds. Includes relationship of applied organic chemistry to consumer products, including drugs and agricultural chemicals. Organic core course.

Prerequisite(s): CHEM 313 and 314.

CHEM 521 - Theory of Analytical Processes

Credits: 3 (NR)
Theory of signal and noise, mass transport phenomena, thermodynamics, and ionics in analytical chemistry. Applications made to Fourier transform techniques such as FT-IR and FT-NMR, convolution and correlation spectroscopy, chemical sensors, chromatography, flow injection analysis, ion transport in membrane, and interpretation of analytical signals. Analytical core course.

Prerequisite(s): CHEM 422 or permission of instructor.

CHEM 529 - Instrumental Techniques of Analysis

Credits: 2 (RT)
Principles and operation of modern instrumentation, emphasizing applications to analysis of chemical, biological, and environmental samples. Methods include combined capillary column gas chromatography and mass spectrometry, high-performance liquid chromatography, optical methods, surface analysis methods, magnetic resonance spectroscopy, atomic emission and absorption spectrometry, and electroanalytical methods. With approval of research committee, students choose methods studied.

Prerequisite(s): CHEM 321 and 422 or 521, or permission of department.

CHEM 531 - Elements of Physical Chemistry
Intensive overview of concepts, techniques, and models of physical chemistry as they apply in many branches of chemistry and allied sciences. Topics include properties of gases, first and second laws of thermodynamics, phase and chemical equilibrium, chemical kinetics, atomic and molecular structure, and spectroscopy. Emphasizes developing practical skill in using tools of physical chemistry. Extensive use of spreadsheet models to investigate chemical and physical systems.

Prerequisite(s): CHEM 211, 212; CHEM 313, 314; PHYS 243, 245; MATH 113; or permission of instructor.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 0

CHEM 554 - Geochemistry of Environmental Hazards

Credits: 3 (NR)
Introduction to origins and reactions of hazardous substances in air, water, and soil environments. Covers movement of trace organic and inorganic substances in geochemical cycle, with particular reference to transport processes that influence air and water quality.

Prerequisite(s): CHEM 314 or permission of instructor.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 3

CHEM 563 - General Biochemistry I

Credits: 4 (NR)
Brief introduction to biochemistry, followed by an in-depth look at amino acids and proteins, 3-D structure, folding and dynamics, their specialized function and primary metabolism. Emphasizes enzymes and their chemical mechanisms and metabolism. Students will be assigned papers from the primary literature and be required to answer questions from these papers on exams.

Prerequisite(s): CHEM 313; BIOL 213.

Hours of Lecture or Seminar per week: 4
Hours of Lab or Studio per week: 0

CHEM 564 - General Biochemistry II

Credits: 3 (NR)
Previous course in biology recommended but not required. Important biological compounds, including proteins, carbohydrates, lipids, and nucleic acids, and their interrelations.

Prerequisite(s): CHEM 563 or equivalent.

Hours of Lecture or Seminar per week: 4
Hours of Lab or Studio per week: 0
CHEM 567 - The Chemistry of Enzyme-Catalyzed Reactions

Credits: 3 (NR)
Examples of enzyme mechanisms demonstrate how chemical principles are employed by living organisms. Specific enzyme mechanisms used to illustrate principles from organic, inorganic, and physical chemistry. Discusses techniques to monitor enzyme reactions.

Prerequisite(s): CHEM 313 and 463 or permission of instructor.

Hours of Lecture or Seminar per week: 1-10
Hours of Lab or Studio per week: 0

CHEM 568 - Bioorganic Chemistry

Credits: 3 (NR)
Basic understanding of chemical nature of biomolecules and biomacromolecules. Introduces biomolecules such as amino acids, proteins, carbohydrates, and lipids. Lectures focus on biophysical properties and synthesis, using practical examples and visual aids.

Prerequisite(s): CHEM 314 and 463, or equivalent, or permission of instructor.

Hours of Lecture or Seminar per week: 1-10
Hours of Lab or Studio per week: 0

CHEM 579 - Special Topics

Credits: 1-6 (RT)
Current topics in chemistry, depending on instructor's specialty.

Prerequisite(s): CHEM 313 and 314 or permission of instructor.

Notes: May be repeated with different topics, with department approval.

Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 0

CHEM 613 - Modern Polymer Chemistry

Credits: 3 (NR)
Synthetic and analytical chemistry of synthetic macromolecules. Topics include polymer solutions, molecular weight determination, spectroscopy, thermal analysis, x-ray crystallinity, polymerization types, and commercial and electroactive polymers. Organic core course.
CHEM 614 - Physical Organic Chemistry

Credits: 3 (NR)
Principles underlying molecular structure, reactivity, and reaction mechanisms. Topics include valence-bond and molecular-orbital theory, electronic interpretation of organic reactions, stereochemistry, conformational analysis, kinetics and thermodynamics of organic reactions, and photochemistry. Organic core course.

Prerequisite(s): CHEM 314 or permission of instructor.

CHEM 617 - Organic Structural Spectroscopy

Credits: 3 (NR)
Spectroscopic determination of organic molecular structure using 1H, 13H, 19F, and 31P nuclear magnetic resonance spectroscopy and infrared, mass, ultraviolet and visible, and Raman spectroscopy. Organic core course.

Prerequisite(s): CHEM 314 or equivalent.

CHEM 620 - Modern Instrumentation

Credits: 3 (NR)
Methods of sensing and measurement of radiation, particles, pressure, concentrations of specific elements and compounds. Topics include basic operational amplifier circuits for analog signals, digitizing devices and computerized data collection, noise and noise-reduction methods, and specialized instrumentation systems for various areas of chemistry and physics.

Equivalent to PHYS 533

Prerequisite(s): CHEM 422 or permission of instructor.

CHEM 624 - Principles of Chemical Separation

Credits: 3 (NR)
Theories and models of separation with applications to analyses of a wide range of chemical, biological, and environmental
samples. Topics include high-resolution gas and high-performance liquid chromatography. Emphasizes theory of reverse phase, normal phase, ion exchange, size exclusion, and affinity based separations. Also presents instrumentation such as detectors, pumps, and columns, and data acquisition. Analytical core course.

Prerequisite(s): CHEM 422 or 521, or permission of instructor.

Hours of Lecture or Seminar per week: 5
Hours of Lab or Studio per week: 0

CHEM 625 - Electroanalytical Chemistry

Credits: 3 (NR)
Review of basic electrochemistry. Emphasizes analysis and research for applications of modern electrochemical techniques such as chronoamperometry; cyclic, stripping, and AC voltammetry; pulse polarography; coulometry; electrochemical sensors; and instrumentation.

Prerequisite(s): CHEM 321 and 331.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0

CHEM 627 - Aquatic Environmental Chemistry

Credits: 3 (NR)
Thermodynamic and kinetic processes regulating the chemistry of surface and groundwater in natural and polluted environments with particular emphasis in explaining the aqueous concentrations of chemical species and controlling geochemical factors in the hydrosphere. Structure, sources and transformations of organic matter in the aquatic environment and interactions with aqueous solutes will be covered as related to contemporary issues in water quality. Students will be assigned papers from the primary literature and be required to answer questions from these papers on exams.

Prerequisite(s): CHEM 321 or GEOL 302 or equivalent courses or permission of the instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

CHEM 633 - Chemical Thermodynamics and Kinetics

Credits: 3 (NR)
Advanced study covering application of kinetics to the elucidation of reaction mechanisms and application of statistical thermodynamics to theory of elementary reaction rates. Physical core course.

Equivalent to CSI 711

Prerequisite(s): CHEM 331 and 332.
CHEM 641 - Solid State Chemistry

Credits: 3 (NR)
Focuses on the design and synthesis, structure and bonding of solid state compounds; physical properties and characterization of solids. Topics of current interest will also be included.

Prerequisite(s): CHEM 441 or permission of instructor.

CHEM 646 - Bioinorganic Chemistry

Credits: 3 (NR)
Applies inorganic coordination chemistry and physical methods to understand structure and function of metal ion sites in biomolecules. Biochemical roles of metal centers in oxygen transport, metalloenzymes, and electron transfer. Topics include iron cytochromes, zinc and copper enzymes, cobalamin, iron sulfur proteins, inorganic model compounds, and metals in medicine. Inorganic core course.

Prerequisite(s): CHEM 441 or permission of instructor.

CHEM 651 - Environmental Chemistry of Organic Substances

Credits: 3 (NR)

Prerequisite(s): One semester of physical chemistry, or permission of instructor.

CHEM 660 - Protein Biochemistry

Credits: 3 (NR)
Proteins play critical roles in most biological processes. Therefore, to understand these processes, it is necessary to understand proteins. This course will introduce students to proteins, their biosynthesis/biodegradation and their biophysical and biochemical
properties. Biochemistry core course.

Prerequisite(s): CHEM 463 or equivalent or permission of instructor.

Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 0

CHEM 661 - Antibiotic Chemistry and Resistance

Credits: 3 (NR)
Introduces the various classes of antibiotics. Focus on the chemistry of antibiotics and how they inhibit bacterial growth and/or cause death and the response of bacteria to these compounds.

Prerequisite(s): CHEM 463 (or equivalent), or permission of instructor.

Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 0

CHEM 662 - Modern Methods of Drug Discovery

Credits: 3 (NR)
Introduction to the process of drug discovery. Covers modern methods and strategies of target identification, lead identification, and lead optimization. Biochemistry core course.

Prerequisite(s): CHEM 463 (or equivalent), or permission of instructor.

Hours of Lecture or Seminar per week: 1-9
Hours of Lab or Studio per week: 0

CHEM 665 - Protein-Protein Interactions: Methods and Applications

Credits: 3 (NR)
Introduction to the fundamental principles of protein-protein interactions, including experimental design considerations and methods for quantification of these interactions.

Prerequisite(s): CHEM 463 (or equivalent), or permission of instructor.

Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 0

CHEM 670 - Teaching Practicum

Credits: 1-2 (NR)
Prelaboratory lecture and laboratory teaching in chemistry. Students work closely with faculty and are responsible for all aspects
of teaching undergraduate laboratory techniques.

**Prerequisite(s):** Enrollment in the graduate program and permission of Chair. Lecture and lab experience teaching chemistry in the lab.

**Hours of Lecture or Seminar per week:** 1-6  
**Hours of Lab or Studio per week:** 0  
**Grading:** Graduate Special

### CHEM 728 - Introduction to Solid Surfaces

Credits: 3 (NR)  
Introduces properties of solid surfaces. Topics include gas absorption isotherms, surface area measurement techniques, real and clean surfaces, physisorption and chemisorption, methods of gas adsorption and desorption, measurement of heats of adsorption, desorption kinetics, electron spectroscopies and surface sensitivities, instrumentation; and principles of vacuum technology.

Equivalent to CSI 712  
**Prerequisite(s):** CHEM 422 or equivalent.

**Hours of Lecture or Seminar per week:** 1-3  
**Hours of Lab or Studio per week:** 0

### CHEM 732 - Quantum Chemistry

Credits: 3 (NR)  
Illustration of fundamental concepts of quantum mechanics with applications to chemical systems, including atomic and molecular electronic structure and properties, molecular symmetry, and intermolecular forces. Physical core course.

Equivalent to CSI 713  
**Prerequisite(s):** CHEM 332 or equivalent.

**Hours of Lecture or Seminar per week:** 1-6  
**Hours of Lab or Studio per week:** 0

### CHEM 733 - Polymer Physical Chemistry

Credits: 3 (NR)  
Physical chemistry of macromolecules including molecular weight, conformation, configuration, characteristics of the glassy state, methods for studying polymer morphology (XRD, SEM, TEM, optical microscopy), electronic structure and behavior, band theory, conduction mechanisms, intrinsically conductive polymers, polarization, dielectric behavior, triboelectric behavior, piezo and pyroelectric behavior, and nonlinear optical properties.

**Prerequisite(s):** CHEM 332 or equivalent; or permission of instructor.
CHEM 735 - Astrophysical Chemistry of Planetary Bodies

Credits: 3 (NR)
In depth review of the chemistry of planets, comets and other bodies in the Solar System. Emphasis will be placed on the laboratory techniques and measurements made in order to understand and predict astronomical observations.

Prerequisite(s): CHEM 331, or ASTR 403, or permission of instructor.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0

CHEM 736 - Computational Quantum Mechanics

Credits: 3 (NR)
Study of fundamental concepts of quantum mechanics from computational point of view, review of systems with spherically symmetric potentials, electron-atom solutions to Schrodinger's equation, electron spin in many electron systems, atomic structure calculations, algebra of many electron calculations, Hartree-Fock, self-consistent field method, molecular structure calculations, scattering theory computations, and solid-state computations.

Equivalent to CSI 783/PHYS 736

Prerequisite(s): PHYS 502, 510, or permission of instructor.

Hours of Lecture or Seminar per week: 1-12
Hours of Lab or Studio per week: 0

CHEM 767 - Industrial Biochemistry

Credits: 3 (NR)
An introduction to industrial biochemistry. Includes a mechanistic examination of the biosynthesis of several industrially important secondary metabolites, the industrial scale process of obtaining commercially valuable biochemical products, and the regulations that oversee the industrial biochemical process.

Prerequisite(s): CHEM 463 or permission of instructor.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 0

CHEM 790 - Graduate Seminar
Credits: 1 (RD)
Selected topics from recent chemical theory and applications, generally consisting of research presentations by invited faculty from other institutions. Attendance is required at 80% of the seminars and students must write up a 1 page summary of each talk attended. Course also used to teach students effective presentation methods.

Prerequisite(s): Admission to a graduate program in Chemistry and Biochemistry, or permission of instructor.

Notes: Requires, in last semester, seminar presentation on student's research or another topic acceptable to department. Three credits of CHEM 790 required for MS degree; an additional 3 credits required after admission to PhD program.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0

CHEM 796 - Directed Reading and Research

Credits: 1-6 (RD)
Reading and research on a specific topic in chemistry or biochemistry under direction of a faculty member. May be repeated for a total of 12 credits.

Prerequisite(s): Admission to a graduate program in chemistry and biochemistry or affiliated programs.

Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 1-6

CHEM 798 - Research Project

Credits: 3-6 (RD)
Experimental or theoretical research project chosen and completed under guidance of graduate faculty member.

Prerequisite(s): Permission of department; 6 credits of CHEM 798 or 799, but credit will not be given for both.

Notes: Requires comprehensive report acceptable to advisory committee, and final oral exam on report.

Hours of Lecture or Seminar per week: 1-12
Hours of Lab or Studio per week: 0
Grading: Satisfactory/No credit only

CHEM 799 - Master's Thesis

Credits: 1-6 (RD)
Laboratory thesis research and writing under direction of supervisor.

Prerequisite(s): Permission of department.

Notes: Minimum of 3 credits for first two enrollment periods.

Hours of Lecture or Seminar per week: 1-12
CHEM 814 - Advanced Bioorganic Chemistry

Credits: 3 (NR)
Introduces the chemical nature of biomolecules, with a focus on their organic properties. Focuses on the chemical principals that underlie the diverse structures, properties and reactions of biomolecules. Core course in the Chemistry and Biochemistry doctoral program.

Prerequisite(s): CHEM 313, 314, and 463 or equivalent; or permission from instructor.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 0

CHEM 817 - Organic Structural Spectroscopy

Credits: 3 (NR)
Spectroscopic determination of organic molecular structure using 1H, 13H, 19F, and 31P nuclear magnetic resonance, infrared, ultraviolet, visible, and Raman spectroscopy, and mass spectrometry.

Prerequisite(s): CHEM 314 or equivalent.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

CHEM 821 - Theory of Analytical Processes

Credits: 3 (NR)
Theory and application of contemporary analytical processes and methods used in chemistry research. Emphasis on analytical signals and accompanying noise, sample preparation techniques, and quality assurance in measurements. Core course in the Chemistry and Biochemistry doctoral program.

Prerequisite(s): Admission to Chemistry and Biochemistry doctoral program.

Hours of Lecture or Seminar per week: 3-6
Hours of Lab or Studio per week: 0

CHEM 833 - Physical Chemistry and Biochemistry

Credits: 3 (NR)
The theory and practical use of thermodynamics, kinetics, spectroscopy and quantum chemistry in chemical and biochemical research. Core course in the Chemistry and Biochemistry doctoral program.
Prerequisite(s): CHEM 331 or permission of instructor.

Hours of Lecture or Seminar per week: 2-4
Hours of Lab or Studio per week: 0

**CHEM 891 - Doctoral Scientific Critique, Writing and Presentation**

Credits: 3 (NR)
Development of skills associated with scientific communication and research such as oral presentation of scientific material, analysis of scientific research and preparation of scientific proposals. In preparing scientific proposals, students will learn how to identify scientific questions of interest and how to plan a course of experiments to address these questions. Core course in the Chemistry and Biochemistry doctoral program.

Prerequisite(s): Permission of academic advisor, research advisor and/or research committee.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0

**CHEM 896 - Doctoral Directed Reading and Research**

Credits: 1-6 (RD)
Reading and research on a specific topic in Chemistry or Biochemistry under direction of a faculty member.

Prerequisite(s): Admission to the Ph.D. in Chemistry and Biochemistry or affiliated programs.

Notes: May be repeated for up to a total of 15 credits.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0
When Offered: Fall, Summer, Spring

**CHEM 998 - Doctoral Dissertation Proposal**

Credits: 1-12 (RD)
Development of a research proposal under the guidance of the research advisor and graduate committee. The resulting proposal, once approved by the student's research advisor and committee, forms the basis of the student's doctoral dissertation. May be repeated for credit, but no more than 24 combined credits from CHEM 998 and CHEM 999 may be applied toward satisfying doctoral degree requirements, with no more than 12 credits of CHEM 998.

Prerequisite(s): Permission of research advisor and/or graduate committee.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 1-12
Grading: Satisfactory/No credit only
CHEM 999 - Doctoral Dissertation Research

Credits: 1-12 (RD)  
Research in the concentration pertinent to student's program of study under the direction of their research advisor and committee. Students may enroll for credits in this course once their research proposal has been approved. May be repeated for credit, but no more than 24 combined credits from CHEM 998 and CHEM 999 may be applied toward satisfying doctoral degree requirements, with no more than 12 credits of CHEM 998.

Prerequisite(s): Admission to candidacy in Chemistry and Biochemistry Doctoral Program.

Hours of Lecture or Seminar per week: 0  
Hours of Lab or Studio per week: 1-12  
Grading: S/IP

Chinese (CHIN)

Offered by the College of Humanities and Social Sciences

CHIN 101 - Elementary Chinese

Credits: 3 (NR)  
Introduction to Mandarin, including basic grammar, oral expression, listening comprehension, reading, and writing.

Notes: Students may not receive credit for CHIN 101 and CHIN 109 or 110.

Hours of Lecture or Seminar per week: 1-2  
Hours of Lab or Studio per week: 0

CHIN 102 - Elementary Chinese

Credits: 3 (NR)  
Continuation of CHIN 101.

Prerequisite(s): CHIN 101.

Notes: Students may not receive credit for CHIN 102 and CHIN 109 or 110.

Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0

CHIN 109 - Intensive Elementary Chinese

Credits: 6 (NR)  
Recommended for students who desire training in Chinese language to an intermediate level of competence in a relatively short period of time.
Notes: Equivalent to CHIN 101 and 102 taught in single semester. Students may not receive credit for CHIN 109 and CHIN 101, 102, or 110.

Hours of Lecture or Seminar per week: 6
Hours of Lab or Studio per week: 0

CHIN 110 - Elementary Chinese

Credits: 6 (NR)
Introduces elements of grammar, vocabulary, oral skills, listening comprehension, and reading.

Notes: Lab work required. Students may not receive credit for CHIN 110 and CHIN 101, 102, or 109.

Hours of Lecture or Seminar per week: 6
Hours of Lab or Studio per week: 1

CHIN 201 - Intermediate Chinese I

Credits: 3 (NR)
Further development of skills acquired in CHIN 101 and 102, including grammar, oral expression, listening comprehension, reading, and writing.

Prerequisite(s): CHIN 101 and 102.

Notes: CHIN 201 and 202 must be taken in sequence. Students may not receive credit for CHIN 201 and CHIN 209 or 210.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CHIN 202 - Intermediate Chinese II

Credits: 3 (NR)
Continuation of CHIN 201.

Prerequisite(s): CHIN 201 or equivalent.

Notes: Students may not receive credit for CHIN 202 and CHIN 209 or 210.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CHIN 209 - Intensive Intermediate Chinese
Recommended for students who desire training in Chinese to an intermediate level of competence in a relatively short period of time.

**Prerequisite(s):** CHIN 102, 109, appropriate placement score, or permission of instructor.

**Notes:** Equivalent to CHIN 201 and 202 taught in single semester. Students may not receive credit for CHIN 209 and CHIN 201, 202, or 210.

**Hours of Lecture or Seminar per week:** 6  
**Hours of Lab or Studio per week:** 0

---

**CHIN 210 - Intermediate Chinese**

Credits: 3 (NR)  
Continuation of the development of basic components of the language, with focus on listening, speaking, reading, and writing skills. Introduces students to the cultures and histories of Chinese-speaking regions.

**Prerequisite(s):** CHIN 110 or appropriate placement score.

**Notes:** Students may not receive credit for CHIN 210 and CHIN 201, 202, or 209.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**CHIN 250 - Gateway to Advanced Chinese**

Credits: 3 (NR)  
Integration of advanced intermediate-level Chinese reading, writing, listening, and speaking skills; and the development of critical thinking about authentic texts from around the globe.

**Prerequisite(s):** CHIN 210, appropriate placement score, or permission of department.

**Notes:** Taught in Chinese.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**CHIN 300 - Reading Skills Development**

Credits: 3 (NR)  
Develops reading proficiency, emphasizing vocabulary and grammar of standard written Chinese. Introduces discourse structure, sociolinguistic and cultural knowledge, and strategies for reading Chinese at an advanced level.
Prerequisite(s): CHIN 250, appropriate placement score, or permission of instructor.

Notes: Taught in Chinese.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**CHIN 301 - Advanced Grammar and Syntax**

Credits: 3 (NR)
In-depth review of Chinese grammar and syntax. Provides extensive practice in controlled and free writing, emphasizing fundamental difficulties and points of interference between English and Chinese.

Prerequisite(s): CHIN 250 or equivalent; appropriate placement score; or permission of instructor.

Notes: Taught in Chinese.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**CHIN 305 - Chinese for the Business World**

Credits: 3 (NR)
Introduces terminology and structure of business Chinese. Emphasizes acquiring vocabulary and developing facility in Chinese business articles and correspondence.

Prerequisite(s): CHIN 250 or equivalent; appropriate placement score; or permission of instructor.

Notes: Taught in Chinese. May be repeated for credit once with permission of department when content is different.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**CHIN 310 - Survey of Chinese Literature**

Credits: 3 (RD)
Introduces outlines of Chinese literature to the 19th century, presented through literary sources arranged in roughly chronological order. Readings include poetry; fiction; personal essays; documents of philosophy, history, and religion; and transcribed oral records.

Fulfills Mason Core requirement in literature.

Prerequisite(s): ENGL 101/ENGH 101, or permission of instructor.

Notes: Taught in English. Knowledge of Chinese helpful but not required. May be repeated for a maximum of 6 credits when topic is different with approval of department.
CHIN 311 - Modern Chinese Literature in Translation

Credits: 3 (RT)
Introduction of outlines of modern Chinese literature from early 20th century to post-Mao era, presented through literary sources arranged in roughly chronological order. Readings include poetry, fiction, personal essays.

Fulfills Mason Core requirement in literature.

**Prerequisite(s):** ENGL 101/ENGH 101, or permission of instructor.

**Notes:** Taught in English. Knowledge of Chinese helpful but not required. May be repeated for a maximum of 6 credits when topic is different with approval of department.

CHIN 318 - Introduction to Classical Chinese

Credits: 3 (NR)
Introduces basic structures and vocabulary of Classical Chinese, which still has a significant influence on the formal written prose of modern newspapers and documents.

**Prerequisite(s):** CHIN 250, appropriate placement score, or permission of instructor.

**Notes:** Taught in Chinese. Fulfills the college requirement in non-Western culture.

CHIN 320 - Contemporary Chinese Film

Credits: 3 (NR)
Explores China from 1949 to present through cinematic and literary representations. Discussions focus on representations of cultural, social, and political changes in the movies. Also introduces critical readings that address issues of gender and youth, family, ethnicity, modernity and the nation, as well as visuality and memory.

**Notes:** Taught in English. Knowledge of Chinese language helpful but not required. Fulfills the college requirement in non-Western culture.
CHIN 325 - Major Chinese Writers

Credits: 3 (RD)
Studies works of major Chinese writers. Writers studied may vary.

Fulfills Mason Core requirement in literature.

Prerequisite(s): ENGL 101/ENGH 101, or permission of instructor.

Notes: Taught in English. Knowledge of Chinese helpful but not required. May be repeated for a maximum of 6 credits when topic is different with approval of department. Fulfills the college requirement in non-Western culture.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CHIN 328 - Asian American Women Writers

Credits: 3 (NR)
Introduction to selected works by female writers of Chinese, Filipino, Indian, Japanese, and Korean descent. Analyzes themes, form, style, language, and structure of a variety of works, mainly novels and short stories. Assesses role and significance of writings as part of ethnic American and women's literature by exploring questions of identity formation and disintegration, and how they are rooted in gender, social status, ethnicity, community, geography, and generational conflict.

Fulfills Mason Core requirement in literature.

Notes: Taught in English. Knowledge of Asian languages not required.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CHIN 355 - Readings in Chinese Poetry and Poetics

Credits: 3 (RD)
Close readings and discussions of primary texts covering major periods in Chinese poetry to 1949. Analyzes variety of themes, forms, and styles.

Prerequisite(s): CHIN 300 or permission of instructor.

Notes: Taught in Chinese. May be repeated for a maximum of 6 credits when readings are different with permission of department.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CHIN 365 - Readings in Chinese Fiction after Mao
Credits: 3 (RD)
Close readings and discussions of primary texts after the Cultural Revolution. Analyzes themes, subjects, language, and styles.

Prerequisite(s): CHIN 300 or permission of instructor.

Notes: Taught in Chinese. May be repeated for a maximum of 6 credits when readings are different with permission of department.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CHIN 470 - Special Topics in Chinese Studies

Credits: 3 (RD)
Covers topics on Chinese language, literature, or culture organized by theme, genre approach, or era.

Notes: Taught in Chinese. May be repeated once for a maximum of 6 credits when topic is different with permission of department.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CHIN 480 - Fourth-Year Chinese I

Credits: 3 (NR)
Advanced work in major grammatical and lexical topics of Chinese. Applies theoretical principles to guided written and oral exercises.

Prerequisite(s): CHIN 300 and 301; appropriate placement score or permission of instructor.

Notes: Taught in Chinese.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CHIN 481 - Fourth-Year Chinese II

Credits: 3 (NR)
Advanced work in major grammatical and lexical topics of Chinese. Applies theoretical principles to guided written and oral exercises.

Prerequisite(s): CHIN 300, 301, 480; and appropriate placement score or permission of instructor.

Notes: Taught in Chinese.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
**CHIN 490 - Internship in Chinese Studies**

Credits: 1-9 (RT)
Work with schools, social service programs, government agencies, interest groups, museums, or corporations locally and in Chinese-speaking regions. With a faculty supervisor, students develop an internship contract, which requires the approval of the director. For each credit, student works on site at least 45 hours.

**Prerequisite(s):** CHIN 210 or equivalent.

**Notes:** Contact the department one semester prior to enrollment. May be repeated for a maximum of 9 credits.

**Hours of Lecture or Seminar per week:** 1-9
**Hours of Lab or Studio per week:** 1-12

---

**Civil and Infrastructure Engineering (CEIE)**

Offered by the Volgenau School of Engineering.

Students may attempt an undergraduate course taught by the Volgenau School of Engineering twice. A third attempt requires approval of the department offering the course.

---

**CEIE 100 - Environmental Engineering around the World**

Credits: 3 (NR)
Introduces environmental engineering as practiced in different societies around the world. Environmental engineering is broadly defined as organizational and physical infrastructure to manage natural resources. Focuses on how different contemporary and past societies have responded to environmental challenges related to engineering opportunities. Issues include construction of large dams to manage river systems; use of forecast climate and weather data to improve agriculture, emergency response, or water supply; collection and treatment of wastewater; public health and pollution control; disposal of waste nuclear materials; and management of significantly polluted sites.

Fulfills Mason Core requirement in global understanding.

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0

---

**CEIE 203 - Geomatics and Engineering Graphics**

Credits: 3 (NR)
Introduces topographic surveying and engineering drawing for civil engineering applications. Topics include surveying, GPS, GIS, digital terrain modeling, design of horizontal and vertical curve geometry for road applications, engineering drawing concepts, and drawing with CAD-based software. Field work required on selected topics.

**Prerequisite(s):** C or better in CEIE 117 or CDS 130. Prerequisite enforced by registration system.
CEIE 210 - Statics

Credits: 3 (NR)
Covers force vectors and operations in 2D and 3D; equilibrium of a particle; moment of a force vector; equilibrium of a rigid body; truss analysis; center of gravity, centroid and moment of inertia; shear force and bending moment diagrams; dry friction; virtual work.

Equivalent to ENGR 210 (2011-2012 Catalog)

Prerequisite(s): Grade of C or better in PHYS 160 and MATH 114. Prerequisite enforced by registration system.

CEIE 240 - Hydraulics

Credits: 3 (NR)
Principles of fluids in equilibrium and motion. Topics include hydrostatic pressure; continuity, Bernoulli, and momentum equations; viscosity flow problems; pressure pipe flow and turbomachinery; measuring instruments; and applications to closed conduits and open channels.

Equivalent to CEIE 230 (2011-2012 Catalog)

Prerequisite(s): C or better in PHYS 160. Prerequisite enforced by registration system.

CEIE 301 - Engineering and Economic Models in Civil Engineering

Credits: 3 (NR)
Applies planning, analysis, control, and engineering economic models to life cycle of physical infrastructure. Introduces infrastructure design process and application of quantitative and probabilistic models. Presents applications of model building for engineering economics; decision making; forecasting; resource scheduling and allocation; estimating; work measurement and materials; and quality and process control in water, transportation, environmental, energy, and telecommunications infrastructure systems and the built environment.

Equivalent to ME 352.

Prerequisite(s): Grade of C or better in STAT 344 and ENGH 302. Prerequisite enforced by registration system.
Notes: Fulfills writing-intensive requirement for civil and infrastructure engineering major.

Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0  
When Offered: Fall, Spring

CEIE 304 - Jr Engineering Competency Exam

Credits: 0 (RT)
Assess student preparation for the Fundamentals of Engineering exam after completing engineering science requirements for a BS degree in engineering.

Prerequisite(s): C or better in MATH 114 and PHYS 260. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 0  
Hours of Lab or Studio per week: 0  
Grading: Satisfactory/No Credit  
When Offered: Fall, Spring.

CEIE 310 - Mechanics of Materials

Credits: 3 (NR)
Concepts of stress, strain, elasticity, and plasticity. Stress and strain transformation, including the use of Mohr's circle. Pure torsion. Theory of pure bending and members under transverse loading, including normal and shear stress analysis. Theory of elastic buckling. Distribution of internal forces in statically determinate systems and deflection of beams.

Equivalent to ENGR 310 (2011-2012 Catalog)

Prerequisite(s): Grade of C or better in ENGR 210 or CEIE 210. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0  
When Offered: Fall, Spring.

CEIE 311 - Structural Analysis

Credits: 3 (NR)
Basic concepts and assumptions of structural analysis, including statical and geometric redundancy. Analysis, by integration of deformation of simple structural members. Virtual work method for the analysis of deformations of simple structural systems such as articulate beams, trusses, frames, and arches. Method of forces to analyze statically indeterminate systems, method of displacements to analyze geometrically indeterminate systems, and symmetry and antisymmetry in structural analysis. Uses computer programs for structural analysis.

Prerequisite(s): Grade of C or better in CEIE 310 or ENGR 310. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
CEIE 331 - Soil Mechanics

Credits: 3 (NR)
Covers soil classification, soil properties and engineering characteristics of soils. Includes seepage effects, effective stresses, soil strength and deformation characteristics. Also, the determination of immediate and consolidation settlement, lateral earth pressures and bearing capacities. Introduces foundation design fundamentals.

Equivalent to CEIE 305 (2011-2012 Catalog)

Prerequisite(s): Grade of C or better in (CEIE 210 or ENGR 210) and in (CEIE 230 or CEIE 240). Prerequisite enforced by registration system.

CEIE 340 - Water Resource Engineering

Credits: 3 (NR)
Introduces principles and practice of water resources engineering. Topics include hydrology, governing principles, design and evaluation methods, common models, and typical applications in water resource engineering. Laboratory and field work required on selected topics.

Prerequisite(s): Grade of C or better in CEIE 240 or CEIE 230. Prerequisite enforced by registration system.

CEIE 355 - Environmental Engineering and Science

Credits: 3 (NR)
Introduces students to the concepts of water pollution, air pollution, noise, and solid waste generation and management. Relationships between human population growth and pollution are introduced. Contemporary environmental engineering topics such as sustainability and global climate change are presented. Designated a Green Leaf Course.

Prerequisite(s): Grade of C or better in (CEIE 230 or CEIE 240) and (CHEM 211 or CHEM 251). Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
CEIE 360 - Introduction to Transportation Engineering

Credits: 3 (NR)
Introduces transportation systems and the factors that influence their planning, design, and operation. Topics include fundamentals of urban travel, travel demand forecasting, and traffic flow; principles of highway design; highway capacity and level of services; introduction to traffic control; traffic signal control systems; intersection design; speed zoning and control; and introduction to Intelligent Transportation Systems and travel demand management. Requires laboratory, field work on selected topics.

Fulfills writing intensive requirement in the major.

Prerequisite(s): Grade of C or better in (ENGR 210 or CEIE 210), and (CEIE 290 or CEIE 203) and Satisfactory in CEIE 304. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

CEIE 370 - Construction Systems

Credits: 3 (NR)
Overview of the modern construction industry and principles and practices of construction management. Topics include project planning, construction administration, the contract environment, equipment operations, cost estimation and scheduling, and legal theories. Current industry trends are emphasized as are the uses of modern scheduling and cost-estimating software and online databases.

Prerequisite(s): Grade of C or better in (CEIE 290 or CEIE 203) and CEIE 301. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

CEIE 400 - Civil Engineering Planning and Management

Credits: 3 (NR)
Quantitative and qualitative analysis in planning, design, construction, and management of engineering systems and facilities. Introduces policies, programs, and regulations that influence land development, history-enabling legislation, governing and regulating bodies, control of site plan development, and approval process. Examines structure, function, and purpose of urban design systems and how they can be achieved. Discusses physical relationships among development, land use, transportation, energy, communications, and water systems. Studies public- and private-sector urban development industry. Other topics include innovation, competition, new technology, and environmental issues. Requires design projects.

Prerequisite(s): Grade of C or better in CEIE 340 and CEIE 360. Prerequisite enforced by registration system.
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

CEIE 401 - Sustainable Land Development

Credits: 3 (NR)

Introduces students to sustainable land development topics including low impact development, site resource conservation, ultra low water design, deconstruction and materials reuse, healthy building design, green house gas reduction, zero and low energy design, and other topics related to sustainable practices in facilities and infrastructure design and construction. Designated a Green Leaf Course.

Prerequisite(s): Grade of C or better in CEIE 355, CEIE 340 and CEIE 360. Prerequisite enforced by registration system.

Corequisite(s): CEIE 400

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

CEIE 402 - Highway Design and Construction

Credits: 1.5 (NR)

Provides a survey of the tools, techniques, and methods used by the various civil engineering off-campus at disciplines to design and construct highways. Combines lectures, individual readings, and hands-on exposure to the tools and processes used by planning, environment, project management, survey and mapping, preliminary design, geotechnical, pavements, hydraulics, bridge design, PS&E design, materials, and construction.

Prerequisite(s): Senior CEIE status.

Notes: Course meets off-campus at the federal Highway Administration Eastern Federal Lands Highway Division in Sterling, VA.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 2
When Offered: Fall

CEIE 403 - Experimental Methods in Civil Engineering

Credits: 1.5 (NR)

Surveys common testing and laboratory experimental methods that civil engineers encounter in their professional practice and in research settings. Students fabricate specimens of civil engineering materials and conduct experiments in the following laboratories at the Federal Highway Administration's Turner-Fairbank Highway Research Center: concrete and Steel Materials Lab, Structure Lab, Hydraulic Lab, Geotechnical Lab and Asphalt Lab.
**CEIE 404 - Sr Engineering Competency Exam**

Credits: 0 (RT)
Assess student preparation for the Fundamentals of Engineering exam after completing engineering design electives required for a BS degree in engineering.

**Prerequisite(s):** Satisfactory grade in CEIE 304. Prerequisite enforced by registration system.

**CEIE 409 - Professional Practice and Management in Engineering**

Credits: 1 (NR)
Introduces professional ethics and management principles, and prepares students for leadership roles in practice. Topics include introduction to professional and technical societies; code of ethics related to the public, clients, contractors, suppliers, employers, agreements, contracts, competitive bidding, the engineering profession, conflict of interest, legal responsibilities and case law; case studies in professional ethics; professional licensure; engineering versus engineering management; personal development; managing culture shock, time management, career versus grad school, continuing education; public policy considerations in engineering practice; practical considerations in project management; effectively communicating with employees, contractors and clients; marketing, competitive bidding and project selection; conflict resolution; and managing a small business.

Fulfills Mason Core requirement in information technology (ethics only).

Equivalent to ENGR 401 (2011-2012 Catalog)

**Prerequisite(s):** Senior standing.

**CEIE 410 - Geographic Information Systems in Engineering**

Credits: 3 (NR)
Introduces geographic information systems (GIS) and their application in environmental, transportation, land-use planning, and
other situations. Explores methods, technologies for spatial data acquisition, specification, storage, manipulation, query, thematic analysis, presentation, and application in the design process. Introduces relationships, integration of GIS with computer-aided design and global positioning system. Hands-on projects.

Prerequisite(s): Grade of C or better in CS 112, ENGR 117 or CEIE 117 and CEIE 360 and CEIE 355. Prerequisite enforced by registration system.

Notes: Credit is not given for both CEIE 410 and 510.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**CEIE 411 - Introduction to Design and Inventive Engineering**

Credits: 3 (NR)
Outlines major stages of design process. Covers conceptual versus detailed design; design evaluation. Covers applications of Artificial Intelligence (AI) in design, including evolutionary computation. Covers inventive problem-solving methods, including brainstorming, Synectics, TRIZ, and morphological analysis. Includes computer tools to support design creativity. Features collaborative design: fundamentals and group projects dealing with civil engineering problems provided by industry.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring

**CEIE 412 - Structural Steel Design**

Credits: 3 (NR)
Structural design process, steel material and shapes, steel behavior, specs and codes, LRFD/ASD, loads, gravity and lateral systems, bracings, tributary areas, tension members design; shear lag, net area, load transfer, column design; column strength curve, effective length approach, local buckling, beam design, lateral-torsional buckling, unbraced length, noncompact and compact, deflections, connections design; bolts, bearing, slip-critical, eccentric shear, welds, capacity, fillets, eccentric welds, stability, frame design; beam-column connections, base plate, bracings, optimization, computer design tools.

Prerequisite(s): Grade of C or better in CEIE 311. Prerequisite enforced by registration system.

Notes: Credit is not given for both CEIE 412 and 512.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring

**CEIE 413 - Reinforced Concrete Design**

Credits: 3 (NR)
Covers analysis and design of reinforced concrete members including beams, columns, slabs and footings; sizing of structural members for flexure, shear and torsion; determining serviceability limits including deflection, shrinkage and creep; detailing reinforcing steel bars including bond, development length and splices; design of an integrated reinforced concrete structure for
gravity loads, wind loads and seismic loads in accordance with ACI code requirements.

Prerequisite(s): Grade of C or better in CEIE 311. Prerequisite enforced by registration system.

Notes: Credit is not given for both CEIE 413 and 513.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

CEIE 432 - Foundation Design

Credits: 3 (NR)
Introduction to various principles and practices of geotechnical engineering Including estimation of soil properties using in-situ tests, laboratory tests, and correlations. Course includes study of earth pressure theories as applied to the design of retaining walls, anchored bulkheads, and excavation bracing. Additional topics include retaining wall stability, bearing capacity and settlement of shallow foundations on sands and clays and design considerations and capacity analysis of deep foundations.

Equivalent to CEIE 431 (2012-2013 Catalog).

Prerequisite(s): Grade C or better in CEIE 305 or CEIE 331. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

CEIE 435 - Introduction to Engineering Geology

Credits: 3 (NR)
Introduction to formation and occurrence of earth materials: rock and soil; weathering processes, geomorphology, structural geology, interpreting topographic and geologic maps; field investigation fundamentals, field engineering properties of soil and rock; standards and terminology; rock mass engineering classification systems; subsurface water control; rock as a construction material; special case studies in foundations, such as sinkholes, waste impoundments, dam failures, earth spillway performance.

Prerequisite(s): Grade C or better in CEIE 305 or CEIE 331. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

CEIE 440 - Water Supply and Distribution

Credits: 3 (NR)
Analysis and design of public water supplies. Topics include: water supply evaluation; water quality; demand projections; hydraulic analysis of water distribution systems including line sizing, fire protection, pumps, valves, and storage; surge analysis; water modeling; concepts in management, business, and public policy of public water supplies; and federal, state, and local government laws and regulations related to public water systems.
Prerequisite(s): Grade of C or better in CEIE 340. Prerequisite enforced by registration system.

Notes: Credit is not given for both CEIE 440 and 540.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring.

CEIE 442 - Open Channel Flow

Credits: 3 (NR)
Analysis and design of open channels. Topics include principles of open channel flow including conservation of mass, momentum and energy; flow regimes including uniform, gradually varied, rapidly varied, and unsteady flows; sediment transport; channel design; and modeling and computer applications in open channel analysis and design.

Prerequisite(s): Grade of C or better in CEIE 340. Prerequisite enforced by registration system.

Notes: Credit is not given for both CEIE 442 and 542.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring.

CEIE 450 - Environmental Engineering Systems

Credits: 3 (NR)
Introduces the concepts and applications of systems analysis in environmental engineering. Tools and methodologies of systems analysis are applied to improve the understanding and resolution of complex environmental engineering problems related to air, soil, water quality and pollution. Scientific, engineering, political, social, legal, regulatory, medical, economic, and financial impacts of environmental engineering decisions are considered.

Designated a Green Leaf Course.

Prerequisite(s): Grade of C or better in CEIE 355. Prerequisite enforced by registration system.

Notes: Credit is not given for both CEIE 450 and CEIE 550.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring

CEIE 453 - Water and Wastewater Treatment Processes
Credits: 3 (NR)
Reviews unit treatment processes used in the treatment of water and wastewater systems. Topics include water quality, regulatory requirements, physical unit processes, chemical treatment processes and an introduction to biological treatment processes as applied to a range of community sizes.

Prerequisite(s): Grade of C or better in CEIE 355. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring.

**CEIE 454 - Sustainable Water Resources Infrastructure in Developing Countries**

Credits: 3 (NR)
This course addresses the principles of infrastructure engineering and planning in developing countries, with a focus on sustainable technologies for rural and small-scale water supply and wastewater treatment. Students will design simple, reliable water supply and sanitation systems for developing countries with limited human and material resources and with regard to local customs and socio-cultural public health and economic factors.

Prerequisite(s): Grade C or better in CEIE 355. Prerequisite enforced by registration system.

When Offered: Fall, Spring

**CEIE 461 - Traffic Engineering**

Credits: 3 (NR)
Elements of traffic engineering analysis; system components of traffic operations: driver, vehicle, and roadway; traffic flow design elements including volume, density, and speed; intersection design elements including traffic control device warrants, signal timing, delay, capacity, and accident countermeasures; and terminal design elements including inflow, outflow, and circulation.

Prerequisite(s): Grade of C or better in CEIE 360. Prerequisite enforced by registration system.

Notes: Credit is not given for both CEIE 461 and 561.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

**CEIE 462 - Urban Transportation Planning**

Credits: 3 (NR)
Technical and qualitative aspects of urban transportation planning process. Topics include urban travel characteristics and data collection methods; urban transportation modeling system, including land use, trip generation, trip distribution, mode choice, and trip assignment models; site traffic impact studies; environmental impacts; project and plan evaluation; and technology options for urban transport.
Prerequisite(s): Grade of C or better in CEIE 360. Prerequisite enforced by registration system.

Notes: Credit is not given for both CEIE 462 and CEIE 562.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CEIE 471 - Construction Administration

Credits: 3 (NR)
Examines the principals of project planning and administration using modern specification and project delivery methods. The role of the project manager as facilitator, constructability advisor, and on-site administrator is emphasized. Project risk transference, market conditions, and legal requirements are explored in the construction contract environment. Other topics include green specifications, design-build delivery, job order contracting, turnkey construction, and public-private partnerships. Appropriate for students, engineering and design professionals, project managers, contract administrators, and owners interested in the planning and administration needs of construction.

Prerequisite(s): Grade of C or better in CEIE 370. Prerequisite enforced by registration system.

Notes: Credit is not given for both CEIE 471 and CEIE 571.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

CEIE 472 - Building Information Modeling

Credits: 3 (NR)
Virtual design and construction techniques are covered using modern 3D Building Information Modeling (BIM) software. Historical and technological basis for virtual building and infrastructure design are presented. Design and construction coordination are emphasized using clash detection, conflict management, constructability analysis, specification mapping, and asset management. Industry supported model component databases are used with commercial software design environments for hands-on simulated design and construction projects.

Prerequisite(s): Grade of C or better in CEIE 370. Prerequisite enforced by registration system.

Notes: Credit is not given for both CEIE 472 and CEIE 572.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring.

CEIE 490 - Senior Design Project

Credits: 3 (NR)
Capstone design experience. Integrates all design fundamentals employed by a typical civil engineering design team. Major team efforts include land use, transportation, water and sewerage, stormwater, site analysis, economic and regulatory considerations,
sectioning, grading, and siting. Students focus on teamwork, interdisciplinary interaction, and tradeoff decision making. Design team analyzes all aspects of a major urban project, develops solutions to design problems, and produces project report and oral presentation. Design effort completed and report is prepared, presented, and evaluated. Primary course goal is to produce design for contemporary civil infrastructure project.

Fulfills Mason Core requirement in synthesis.

Prerequisite(s): Senior standing. Grade C or better in CEIE 301, CEIE 311, CEIE 340, CEIE 355, CEIE 360, (CEIE 305 or CEIE 331), CEIE 370, and three 4xx level technical electives. Grade of S (Satisfactory) in CEIE 404. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

CEIE 498 - Independent Study in Civil Engineering

Credits: 1-3 (RT)
Directed self-study of special topics of current interest.

Prerequisite(s): Must have completed 60 credits of course work; permission of the Department Chair.

Notes: May be repeated for maximum 6 credits if topics are substantially different.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0

CEIE 499 - Special Topics in Civil Engineering

Credits: 1-3 (RT)
Varies with nature of topic. Topics of special interest to undergraduates.

Notes: May be repeated for maximum 6 credits if topics are substantially different.

Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 0

CEIE 501 - Sustainable Development

Credits: 3 (NR)

Introduction to sustainability concepts and terminology including the development and use of sustainability indices. Exploration of sustainability tools and frameworks such as the Leadership in Energy and Environmental Design (LEED) Green Building Rating System, American Institute of Architects Sustainable Design Resources Guide, and the Natural Step (TNS) Framework. Methods for evaluation of sustainable sites, water/energy efficiency, sustainable materials and resources, and indoor air quality are presented.
Designated a Green Leaf Course.

Prerequisite(s): Graduate standing.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**CEIE 510 - Geographic Information Systems in Engineering**

Credits: 3 (NR)
Introduces geographic information systems (GIS) and their application in environmental, transportation, land-use planning, and other engineering-related decision situations. Introduces methods and technologies for spatial data acquisition, specification, storage, manipulation, query, thematic analysis, presentation, and application in the design process. Introduces relationships, integration of GIS with computer-aided design and global positioning system. Hands-on projects.

Prerequisite(s): Knowledge of computer programming and databases or permission of instructor.

Notes: Credit is not given for both CEIE 410 and 510.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0
When Offered: Fall

**CEIE 512 - Structural Steel Design**

Credits: 3 (NR)
Structural design process, steel material and shapes, steel behavior, specs and codes, LRFD/ASD, loads, gravity and lateral systems, bracings, tributary areas, tension members design; shear lag, net area, load transfer, column design; column strength curve, effective length approach, local buckling, beam design; lateral-torsional buckling, unbraced length, noncompact and compact, deflections, connections design; bolts, bearing, slip-critical, eccentric shear, welds, capacity, fillets, eccentric welds, stability, frame design; beam-column connections, base plate, bracings, optimization, computer design tools

Prerequisite(s): CEIE 311

Notes: Credit is not given for both CEIE 412 and 512.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring

**CEIE 513 - Reinforced Concrete Design**

Credits: 3 (NR)
Covers the analysis and design of reinforced concrete members including beams, columns, slabs and footings; sizing of structural members for flexure, shear and torsion; determining serviceability limits including deflection, shrinkage and creep; detailing reinforcing steel bars including bond, development length and splices; and design of an integrated reinforced concrete structure for gravity loads, wind loads and seismic loads in accordance with the ACI code requirements.
Prerequisite(s): CEIE 311

Notes: Credit is not given for both CEIE 413 and 513.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

CEIE 524 - Introduction to Bridge Engineering

Credits: 3 (NR)
A balanced theoretical and practical insight into the art and science of bridge engineering. Various methodologies of bridge design and evaluation are investigated, including constructability reviews. Bridges of steel, reinforced concrete, and pre-stressed concrete materials are included. Short-span composites; major innovation and low cost solutions targeted at aging infrastructure.

Prerequisite(s): Graduate Standing in CEIE; CEIE 512 or CEIE 513 or equivalent.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 0
When Offered: Fall

CEIE 525 - Structural Evaluation and Rehabilitation

Credits: 3 (NR)
Structural condition survey and evaluation for strength and serviceability of existing structures including foundation elements; older building practices and materials; criteria for rehabilitation; retrofit techniques for change in function, loading, and seismic forces. Historic preservation issues. Repair, remediation, and structural strengthening methods and current trends. Carbon fiber external P.T. Material selection criteria, including mechanical and environmental factors. Cost/value feasibility analysis; estimating remedial construction costs; engineering oversight of rehabilitation work.

Prerequisite(s): Graduate Standing in CEIE.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring

CEIE 526 - Advanced Steel Design

Credits: 3 (NR)
Behavior, strength, and design of vertical steel structures using the LRFD approach; plate girders, composite beams, welded built-up columns, bolted and welded connections, beam-columns, and torsion; introduction to plastic analysis and its application to members and vertical structures; erection procedure and methods field inspection issues; unique properties of high strength steels.

Prerequisite(s): Graduate Standing in CEIE; CEIE 512 or equivalent.
CEIE 527 - Pre-stressed Concrete

Credits: 3 (NR)
Strength, behavior, analysis, and design of pre-stressed concrete members, vertical building structures, and bridges, with emphasis on pre-tensioned, precast construction, and post-tensioned construction; basics of segmental concrete bridges, cable-stayed bridges, and spliced-girder concrete bridges; continuous span theory; protection of pre- & post-tensioned systems; secondary effects. Composite Portland Cement with cast-in-place topping; precast as a stay-in-place system; connection detailing; durability issues; advantages in a marine environment.

Prerequisite(s): Graduate Standing in CEIE; CEIE 513 or equivalent.

CEIE 531 - Earth Retaining Structures and Slope Stability

Credits: 3 (NR)
Earth pressure theory and limit equilibrium theory used in the design of temporary and permanent earth retaining structures; limit equilibrium slope stability; retaining wall design and associated construction issues of gravity walls, conventional concrete retaining walls, mechanically stabilized walls, braced and tiedback excavation support systems, and soil nailing walls; guidelines for the selection of retention method for permanent and temporary conditions.

Prerequisite(s): Graduate Standing in CEIE;

CEIE 532 - Foundation Design

Credits: 3 (NR)
Introduction to various principles and practice of geotechnical engineering including estimation of soil properties using in-situ tests, laboratory tests, and correlations. Course includes the study of earth pressure theories as applied to the design of retaining walls, anchored bulkheads, and excavation bracing. Additional topics include retaining wall stability, bearing capacity and settlement of shallow foundations on sands and clays and design considerations for deep foundations.

Prerequisite(s): Graduate Standing.
CEIE 535 - Engineering Geology

Credits: 3 (NR)
Introduction to formation and occurrence of earth materials-rock and soil; weathering processes, geomorphology, structural geology, interpreting topographic and geologic maps; field investigation fundamentals, field engineering properties of soil and rock; standards and terminology; rock mass engineering classification systems; subsurface water control; rock as a construction material; special case studies in foundations, such as sinkholes, waste impoundments, dam failures, earth spillway performance.

Prerequisite(s): Graduate Standing in CEIE.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 0
When Offered: Fall

CEIE 540 - Water Supply and Distribution

Credits: 3 (NR)
Analysis and design of public water supplies. Topics include supply evaluation; water quality and quantity requirements; treatment requirements and methods; hydraulic analysis of water distribution systems including line sizing, fire protection, pumps, valves, and storage; sustainability; security; concepts in management, business, and public policy of public water systems; and federal, state, and local government laws and regulations related to public water systems. Requires laboratory, field work on selected topics.
Designated a Green Leaf Course.

Prerequisite(s): A course in hydraulics or fluid mechanics.

Notes: Credit is not given for both CEIE 440 and 540.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CEIE 542 - Open Channel Flow

Credits: 3 (NR)
Analysis and design of open channels. Topics include principles of open channel flow including conservation of mass, momentum and energy; flow regimes including uniform, gradually varied, rapidly varied, and unsteady flows; sediment transport; channel design; modeling and computer applications in open channel analysis and design.

Prerequisite(s): A course in hydraulics or fluid mechanics.

Notes: Credit is not given for both CEIE 442 and 542.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
CEIE 550 - Environmental Engineering Systems

Credits: 3 (NR)
Introduces the concepts and applications of systems analysis in environmental engineering. Tools and methodologies of systems analysis are applied to improve the understanding and resolution of complex environmental engineering problems related to air, soil, and water quality and pollution. Scientific, engineering, political, social, legal, regulatory, medical, economic, and financial impacts of environmental engineering decisions are considered.

Prerequisite(s): CEIE 455.

Notes: Credit is not given for both CEIE 450 and 550.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0
When Offered: Spring

CEIE 553 - Water and Wastewater Treatment Processes

Credits: 3 (NR)
Studies unit treatment processes used in the treatment of water and wastewater systems. Topics include water quality, regulatory requirements, physical unit processes, chemical treatment processes and an introduction to biological treatment processes as applied to a range of community sizes.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring.

CEIE 555 - Principles of Environmental Engineering

Credits: 3 (NR)
Introduces principles of environmental engineering management and design pertaining to water supply and treatment, wastewater treatment, solid waste management, air pollution control, noise pollution measurement and control, and environmental impact assessment.

Notes: Credit is not given for both CEIE 355 and 555.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0
When Offered: Fall

CEIE 556 - Environmental Law

Credits: 3 (NR)
Introductory course in the study of environmental laws as they pertain to urban systems infrastructure management. Reviews the
National Environmental Policy Act, Clean Air Act, Clean Water Act, Safe Drinking Water Act, Resource Conservation and Recovery Act, Comprehensive Environmental Response, Compensation, and Liability Act, and other environmentally related legislation. Also reviews laws for allocation of surface and groundwater supplies, and reviews environmental law databases.

Notes: Credit is not given for both CEIE 456 and 556.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0
When Offered: Spring

**CEIE 560 - Public Transportation Systems**

Credits: 3 (NR)
Analyzes public transportation systems in terms of their role in urban transportation. Topics include history of public transportation in the United States, quantitative performance attributes of different modes, analytical techniques for planning and operation, and management and administrative concepts.

Prerequisite(s): CEIE 360.

Notes: Credit is not given for both CEIE 460 and 560.

Hours of Lecture or Seminar per week: 3 - 12
Hours of Lab or Studio per week: 0
When Offered: Fall

**CEIE 561 - Traffic Engineering**

Credits: 3 (NR)
Covers elements of traffic engineering analysis; system components of traffic operations: driver, vehicle, and roadway; traffic flow design elements including volume, density, and speed; intersection design elements including traffic control device warrants, signal timing, delay, capacity, and accident countermeasures; and terminal design elements including inflow, outflow, and circulation.

Prerequisite(s): CEIE 365.

Notes: Credit is not given for both CEIE 461 and 561.

Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 0
When Offered: Fall

**CEIE 562 - Urban Transportation Planning**

Credits: 3 (NR)
Covers technical and qualitative aspects of urban transportation planning process. Topics include urban travel characteristics and data collection methods; urban transportation modeling system, including land use, trip generation and distribution, mode choice, and trip assignment models; site traffic impact studies; environmental impacts; project and plan evaluation; and technology
options for urban transport.

**Prerequisite(s):** CEIE 365.

**Notes:** Credit is not given for both CEIE 462 and 562.

**Hours of Lecture or Seminar per week:** 4  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Spring

**CEIE 565 - Design of Transport Systems**

Credits: 3 (NR)  
Covers street and highway facilities design emphasizing interaction among driver, vehicle, and geometric design elements.  
Design of interchanges and intersections; highway roadside safety and tort liability; pavement design, maintenance and safety; edge drop-off; clear zone concept; roadside barriers; guiderail treatments; traffic calming; pedestrian and bicycle and transit design challenges; and work-zone traffic control. Provides skills to understand interaction among driver, vehicle, and environment, and how to incorporate better design practices. Also introduces concepts of forgiving highway design and highway tort liability.

**Prerequisite(s):** CEIE 360.

**CEIE 571 - Construction Administration**

Credits: 3 (NR)  
Examines the principals of project planning and administration using modern specification and project delivery techniques. The role of the project manager as facilitator, constructability advisor, and on-site administrator is emphasized. Project risk transference, market conditions, and legal requirements are explored in the construction contract environment. Other topics include green specifications, design-build delivery, job order contracting, turnkey construction, and public-private partnerships. Appropriate for students, engineering and design professionals, project managers, contract administrators, and owners interested in the planning and administration needs of construction.

**Notes:** Credit is not given for both CEIE471 and 571.

**CEIE 572 - Building Information Modeling**

Credits: 3 (NR)  
Virtual design and construction techniques are covered using modern 3D Building Information Modeling (BIM) software. Historical and technological basis for virtual building and infrastructure design are presented. Design and construction coordination are emphasized using clash detection, conflict management, constructability analysis, specification mapping, and asset management. Industry-supported model component databases are used with commercial software design environments for
hands-on simulated design and construction projects.

Notes: Credit is not given for both CEIE 472 and 572.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CEIE 573 - Legal Aspects of the Construction Process

Credits: 3 (NR)
Examines the legal principles associated with the construction process. Introduces legal and project delivery concepts and review of the rights and responsibilities of construction project participants. Topics include the application of differing site conditions clauses, delay claims, termination rights, remedies for breach of contract, and dispute resolution techniques. Also includes review of industry legal issues, such as principles of risk management, LEED liability, and design-build contracts.

Prerequisite(s): Graduate Standing in CEIE.

Hours of Lecture or Seminar per week: 1-15
Hours of Lab or Studio per week: 0
When Offered: Fall

CEIE 575 - Design for Constructability

Credits: 3 (NR)
Systems design of structures to consider foundations, structures and constructability; foundation alternatives; structural design to simplify erection; prefabrication, modulation of structures; material handling on a construction site; crane selection and placement; temporary works.

Prerequisite(s): Graduate Standing in CEIE.

Hours of Lecture or Seminar per week: 5
Hours of Lab or Studio per week: 0
When Offered: Spring

CEIE 576 - Construction Cost Estimating

Credits: 3 (NR)
Overview of cost estimating and financial management in the modern construction industry. Techniques and software applications for construction take-offs, bidding, bonding, insurance, equipment ownership, material and labor costing. Additional topics include: cost recovery planning; budgeting, forecasting, acquisition, cast flow management, managerial accounting concepts, and taxes.

Prerequisite(s): Graduate Standing in CEIE.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0
When Offered: Fall
CEIE 601 - Infrastructure Modeling

Credits: 3 (NR)
Concepts of modeling for infrastructure engineering. Covers modeling, simulation, optimization, deterministic and stochastic models, and limitations of modeling approaches. Also includes multiple objective, multiple decision-maker problems, and case studies in areas such as transportation, water resources, the environment, energy, telecommunications, and construction.

Prerequisite(s): CEIE 605

Hours of Lecture or Seminar per week: 1-4
Hours of Lab or Studio per week: 0
When Offered: Spring

CEIE 605 - Risk and Uncertainty in Civil Engineering

Credits: 3 (NR)
Probability and statistics topics for analysis of infrastructure systems. Includes Bayesian decision theory, decision trees, Monte Carlo analysis, stochastic models, and economic analysis of infrastructure projects and systems.

Prerequisite(s): STAT 344.

Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 0
When Offered: Fall

CEIE 607 - Public Infrastructure Management and Finance

Credits: 3 (NR)
Current and projected outlook for managing and financing public works infrastructure including, transportation, public utilities, water and waste water facilities, energy, and public buildings; Infrastructure management including the impact of built infrastructure on the environment, tracking and improving infrastructure performance, government regulations, emerging technologies, social concerns, and the impacts of disasters; Infrastructure finance including public and private sources of capital, special financing districts, bond markets, federal and state grants, public-private partnerships, and design-build project delivery.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

CEIE 611 - Advanced Structural Analysis

Credits: 3 (NR)
Analysis of structural members and systems in terms of deformations and stress distribution; fundamentals of the Theories of Elasticity and of Elastic Plates; applications of both theories to the analysis of basic structural members, straight and curved, using Cartesian and polar coordinates; analysis of rectangular and circular plates under various loading and support conditions.
CEIE 612 - Advanced Mechanics of Materials

Credits: 3 (NR)
Three dimensional stress and strain theories; Linear constitutive relations; Unsymmetrical bending of beams; Shear center; Curved beams; Beams on elastic foundations; Material failure criteria; Elastic and inelastic buckling of columns.

CEIE 621 - Applied Finite Element Methods

Credits: 3 (NR)
Introduces the theory, applications, and software of the Finite Element (FE) method to common structural and geotechnical engineering problems. Focuses on FE modeling including 1-D, 2-D, and 3-D and other special element types, loads and boundary conditions, interpreting results, and using engineering judgment and troubleshooting to verify analysis results. Covers linear and nonlinear FE modeling and analysis of reinforced concrete structures, soil-structure interaction, and construction phases.

Prerequisite(s): Graduate Standing in CEIE.

CEIE 633 - Advanced Foundation Design and Ground Improvement

Credits: 3 (NR)
Design of foundations for civil engineering structures, including settlement and bearing capacity. Foundation types to include shallow foundations, spread footings, mats, deep foundations (driven piles, bored piles and drilled shafts subjected to axial and lateral loading) - single and group action. Machine foundations for rotating equipment. Ground improvement including grouting, deep soil mixing, stone columns, special compaction techniques, lightweight fill; wick drains.

Prerequisite(s): Graduate Standing in CEIE; CEIE 532 or equivalent.

CEIE 634 - Groundwater and Geoenvironmental Design
Equations of groundwater flow and seepage, groundwater site investigations, parameter determination, flownets, well design and aquifer testing, design of dewatering systems, seepage control. Conservative and non-conservative pollutant transport in groundwater, transport processes, modeling techniques for flow and transport. Groundwater remediation technologies, Brownfields and land revitalization.

Prerequisite(s): Graduate Standing in CEIE;

Hours of Lecture or Seminar per week: 1 - 3
Hours of Lab or Studio per week: 0
When Offered: Spring

CEIE 635 - Advanced Soil Mechanics

Credits: 3 (NR)
Consolidation of soil: primary and secondary; and rate. Soil strength in the framework of Critical State Soil Mechanics: normally consolidated, lightly and heavily overconsolidated, drained and undrained, elastic and plastic deformation.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

CEIE 636 - Sources of Geotechnical Data

Credits: 3 (NR)
Resources for conducting desk top studies; tools for field investigations; subsurface investigations (options and selection of techniques); laboratory testing of soil and rock; accepted testing procedures; typical values; empirical relationships between properties and testing techniques; risk and uncertainty; use of lab testing, insitu strength testing, and empirical methods in design; identifying slickensides.

Prerequisite(s): Graduate Standing in CEIE.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall.

CEIE 641 - Water Resources Engineering I: Principles and Practice

Credits: 3 (NR)
Introduction to the principles of hydrology and hydraulics and their application to the planning, design and management of modern water resources.

Equivalent to CEIE 631 (2010-2011 Catalog)

Prerequisite(s): Graduate standing in CEIE; CEIE 340 or equivalent.

Hours of Lecture or Seminar per week: 1-6
CEIE 644 - Groundwater Systems Modeling

Credits: 3 (NR)
Introduces groundwater hydrology and modeling, including quantity and quality aspects. Topics include characterization of subsurface regime; well hydraulics; consideration of two-dimensional steady and unsteady-state flows; exploration of modeling approaches; simulation and optimization modeling; contaminant transport; parameter estimation; and design of systems to control groundwater quantity and quality.

Equivalent to CEIE 632 (2011-2012 Catalog)

CEIE 657 - Environmental Engineering Microbiology

Credits: 3 (NR)
Addresses the fundamental aspects of microbial physiology and ecology and their application to environmental engineering processes. Specific topics include cell structure and function, energetics, metabolism, enzyme and growth kinetics, microbial/environmental interactions (e.g. interactions with organic pollutants), biogeochemical cycles, and an introduction to engineering applications including bioremediation, wastewater treatment, biosensors and microbial fuel cells.

Prerequisite(s): Graduate standing.

CEIE 658 - Water Quality

Credits: 3 (NR)
Sources of water; Materials Balances; Water Chemistry; Stoichiometry and Reaction Kinetics; Water Quality Laboratory; Hydraulic Models; Fate and Transport; Surface Water Quality; Groundwater Water Quality; Physical and Chemical Treatment Processes; Biological Treatment Processes; Bioremediation/Phytoremediation.

CEIE 659 - Hazardous Waste
Credits: 3 (NR)
Physical, chemical and biological properties of hazardous waste; abiotic and biotic transformation of hazardous wastes and their fate in the environment; design of remediation schemes including incineration, landfill, bioremediation and other physical and chemical stabilization processes; principles of risk assessment to select and optimize hazardous waste treatment; methods and strategies for hazardous waste reduction.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

CEIE 662 - Travel Demand Modeling

Credits: 3 (NR)
Covers elements of Travel Demand Modeling at considerable detail. Design and execution of travel surveys; analysis of survey data; economic and demographic data and analysis; development of classification, regression and discrete choice models for four-step and activity based travel demand models; spatial analysis of data; matrix methods; validation and calibration of models; traffic and transit assignment methods and their application; select-link analysis. Hands-on modeling assignments.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CEIE 663 - Intelligent Transportation Systems

Credits: 3 (NR)
Advanced transportation system operations and safety through the use of wireless and wireline communications; integrated transportation systems; in-vehicle technologies; industry standards; and systems architecture. Provides skills to apply advanced technologies to transportation systems to improve operational and safety performance. Provides nontraditional tools to address issues of congestion and improved safety performance.

Prerequisite(s): CEIE 561 or 562.

Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 0

CEIE 664 - Transportation Engineering and the Environment

Credits: 3 (NR)
Introduction to transportation and air quality; Clean Air Act; greenhouse gases, climate change, and modeling for greenhouse gases; travel activity; The NEPA process for transportation projects; road transportation and noise; noise abatement.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

CEIE 665 - Travel Survey Methods and Data Analysis
Credits: 3 (NR)
Covers the concept and practice of travel survey methods; national household travel survey; Census transportation survey and products; travel diary based, roadside, mail-in and web-based and GPS-based travel surveys; longitudinal vs. cross-sectional surveys; stated-preference survey; interactive and adaptive survey method; transit survey methods; special generator surveys; sampling approach and representativeness analysis; econometric data analysis; panel data; self-selection issues; other data mining methods; data security, privacy, IRB process, and ethics.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**CEIE 667 - Multi-modal Transportation Systems**

Credits: 3 (NR)
Topical coverage of freight and logistics; non-motorized transportation considerations; and public transit planning. Freight topics include demand and supply modeling concepts; freight flow data sources; and truck size and weight policies. Bicycle and pedestrian planning considering traveler response to facility and policy improvements and identifying common resources for addressing non-motorized project concerns. Public transportation planning coverage including mass transit technology typologies, corridor planning and operations concepts, and finance and public policy issues, including environmental justice.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**CEIE 668 - Transportation Economics**

Credits: 3 (NR)
Application of micro- and macro-economic theories to transportation system analysis; interaction between transportation system, land use, and regional economics; mobility, accessibility, and system reliability; market equilibrium; pricing, willingness to pay, and welfare analysis; cost benefit analysis; project finance.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**CEIE 674 - Infrastructure Finance**

Credits: 3 (NR)
Reviews key financial concepts used in the management of municipal infrastructure using a case study approach. Issues related to both public and private infrastructure entities will be covered. Provides a practical introduction to a broad spectrum of infrastructure finance issues.

Prerequisite(s): Graduate standing

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**CEIE 680 - Introduction to Infrastructure and Security Engineering**
Credits: 3 (NR)
In-depth review of present and proposed practices and issues to manage civil infrastructure, focusing on performance and security through the full life cycle, including planning, designing, and construction of new, rehabilitated, modified, and recycled or decommissioned components. Covers asset-management methods and their effectiveness in managing all types of risk. Profiles policies leading civil infrastructure industry toward adoption of such methods, and examines industry case studies. Special attention to vulnerability assessment and risk management in context of broad sampling of potential threats.

Prerequisite(s): BS in civil engineering, or permission of instructor.

Hours of Lecture or Seminar per week: 1 - 6
Hours of Lab or Studio per week: 0

CEIE 681 - Security of Structural Systems

Credits: 3 (NR)
Basic concepts of security of structural systems; analytical models of behavior of structural systems under various security threats; computer simulation of security threats, including blasts and fire; generation of terrorist scenarios and of preventive structural measures; design for security; out-of-the-box approaches to development of preventive structural measures; lessons learned; and intelligent structural security systems.

Prerequisite(s): BS in Civil Engineering or CEIE 367.

Hours of Lecture or Seminar per week: 1-9
Hours of Lab or Studio per week: 0

CEIE 683 - Water and Wastewater Systems Security

Credits: 3 (NR)
Examines overall security of water and wastewater systems. Covers theory and methods to define water and wastewater infrastructure as physical and organizational systems. Explores concepts of infrastructure systems security; identifies actors, interactions in organizational infrastructure, and threats to water and wastewater infrastructure; describes behavior of physical and organizational infrastructures under stress; examines history of threats or attacks against water and wastewater systems; and explores evolution of design, operations, and maintenance paradigms in response to changes in threats. Covers proactive responses to security threats through vulnerability assessments, and models of organizational and physical infrastructure system.

Prerequisite(s): BS in Civil Engineering or CEIE 440 and CEIE 455.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0

CEIE 685 - Civil Engineering Information Management

Credits: 3 (NR)
Advanced course covering all phases of information management life cycle from conceptual design and data collection through systems development, archiving, and disposal. Covers software engineering such as structured analysis, rapid prototyping, and object-oriented analysis as applied to urban systems infrastructure problem solving. Reviews database technology, spreadsheets, communications software, customized applications software, groupware, and graphics software including computer-aided design
and geographic information systems. Covers selection and use of appropriate software to match specific engineering problems related to the design, construction, and management of civil engineering infrastructure. Includes design and development of system for engineering application.

**Hours of Lecture or Seminar per week:** 1-9  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Spring

---

**CEIE 686 - Transportation System Security and Safety**

Credits: 3 (NR)  
Focuses on critical transportation systems infrastructure and operations, and technologies for predicting and managing damage and disruptions caused by potential threats, including natural and technological disasters and terrorist threats. Includes asset management, methodologies for assessing vulnerabilities, potential impact of damage and disruption, applying state-of-the-art technologies and R&D processes for harnessing best analysis methods, and technologies for hardening transportation infrastructure systems. Includes sensing and surveillance using satellite and aerial remote sensing imagery, application of GIS and spatial information technologies, information and communication, intelligent transportation systems, hardening systems, and making intelligent choices for implementing technology advances to transportation security and safety.

**Prerequisite(s):** BS in engineering or permission of instructor.

**Hours of Lecture or Seminar per week:** 1-3  
**Hours of Lab or Studio per week:** 0

---

**CEIE 690 - Topics in Civil Engineering**

Credits: 3 (RT)  
Topics not covered in the regular civil engineering offerings.

**Prerequisite(s):** Determined by topic.

**Notes:** Course content may vary each semester. Course may be repeated with change in topic.

**Hours of Lecture or Seminar per week:** 1-6  
**Hours of Lab or Studio per week:** 0

---

**CEIE 742 - Water Resources Engineering II: Water Resource Systems**

Credits: 3 (NR)  
Introduces concepts, applications, and tools of systems analysis for water resources planning, management, and design. Problems including river basin planning, real-time hydrosystem operations, water quality management, capacity expansion, urban drainage network design, and sanitary sewer design used to illustrate applications of systems analysis. Tools include optimization and simulation modeling and knowledge-based systems.

Equivalent to CEIE 732 (2011-2011 Catalog)

**Prerequisite(s):** Graduate Standing in CEIE; CEIE641 or equivalent.
CEIE 762 - Network Models for Transportation Planning

Credits: 3 (NR)
Covers network models for transportation systems analysis - theory, mathematical structure, and applications of equilibrium, iterative, incremental, dynamic and stochastic equilibrium models. Also covers data structures and heuristic methods for computer implementation of various algorithms such as shortest path and direction search algorithms; specialty network topics such as tracking and prohibition of turn movements, k-shortest path algorithms and select-link analysis.

Prerequisite(s): CEIE 562 or 660; CEIE 601.

CEIE 763 - Discrete Choice Analysis in Transportation

Credits: 3 (NR)
Utility theory and individual choice behavior; Binary choice model; Multinomial choice model; Characteristics of Probit and Logit models; Aggregate forecasting techniques; Travel survey and sampling; Test and choice of model structure; Correlation and nested Logit Model, Advanced models and estimation techniques; Travel, route choice and car ownership models.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

When Offered: Fall, Spring

CEIE 767 - Traffic Engineering Modeling and Analysis

Credits: 3 (NR)
Covers fundamentals of traffic flow theory; shock-wave analysis; queuing theory; macroscopic traffic flow models on freeway and arterials; fundamentals of traffic simulation; car following models; network analysis based on traffic simulation models; and developing skills to select most appropriate model for given scenarios.

Prerequisite(s): CEIE 561.

Corequisite(s): CEIE 601.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0

CEIE 795 - Civil and Infrastructure Engineering Seminar
Invited speakers, faculty, and CEIE graduate students lecture on current topics and research. Fulfills seminar requirement for MS in civil and infrastructure engineering.

**Prerequisite(s):** Graduate standing.

**Notes:** Students must enroll in CEIE 795 each semester (fall and spring) for the duration of their M.S. studies. The course is repeatable.

**Hours of Lecture or Seminar per week:** 1
**Hours of Lab or Studio per week:** 0
**Grading:** Satisfactory/No Credit.

---

**CEIE 796 - Directed Reading**

Credits: 1-3 (RD)
Reading on specific topic under direction of faculty member.

**Prerequisite(s):** Graduate standing and permission of instructor.

**Notes:** May be repeated with change in topic.

**Hours of Lecture or Seminar per week:** 1-6
**Hours of Lab or Studio per week:** 0

---

**CEIE 798 - Research Project in Civil Engineering**

Credits: 3 (NR)
Analyzes and investigates contemporary problem in civil, environmental, and infrastructure engineering. Requires prior approval by faculty member who supervises student's work.

**Prerequisite(s):** Permission of instructor

**Corequisite(s):** CEIE 795.

**Notes:** Written report also required.

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0

---

**CEIE 799 - Master's Thesis**

Credits: 1-6 (RD)
Research project chosen and completed under guidance of graduate faculty member that results in technical report acceptable to three-faculty-member committee, and an oral defense.

**Prerequisite(s):** 18 credits of graduate-level course work and permission of instructor.
CEIE 800 - Civil, Environmental, and Infrastructure Engineering Colloquium

Credits: 1 (RD)
Semester long themed series, required of Civil and Infrastructure PhD students. Features variety of speakers from universities, government, and private sectors. Topics include civil engineering technologies, research advancements, and policies. Doctoral students required to take 2 credits of CEIE 800 to fulfill degree requirements. No more than 1 credit per semester may be taken. Students eligible to register upon successful completion of qualifying exams.

Prerequisite(s): Graduate Standing.

CEIE 890 - Special Topics in Urban Transportation

Credits: 3 (RD)
Includes traffic safety analysis, simulation in transportation, intelligent transportation systems, advanced public transportation systems, congestion and travel demand management, geographic information systems and information technology, and innovative refinancing and public-private partnerships.

Prerequisite(s): CEIE 560 and 660 or equivalent; or permission of instructor.

CEIE 892 - Special Topics in Environmental and Water Resource Systems Engineering

Credits: 3 (RD)
Possible topics include studies in waste minimization; pollution prevention; hazardous waste management; wastewater management; air pollution control; solid waste management; environmental decision making; sustainability; water resource and environmental economics; wetlands management, design and construction; groundwater contamination modeling; stochastic hydrology; river basin planning and management; and water quality modeling.
Designated a Green Leaf Course.

Prerequisite(s): CEIE 601

Hours of Lecture or Seminar per week: 3
CEIE 894 - Design and Inventive Engineering

Credits: 3 (NR)
Topics include Fundamentals: successful intelligence and creative intelligence, creative class, the Medici Effect, the Renaissance Man and Da Vinci's Seven Principles, engineering creativity; Design Engineering: system designing and architecting, designing as search, evolutionary designing, constraint search, constructive induction, Axiomatic and Inferential Design Theories; Inventive Engineering: Brainstorming, Synectics, Morphological Analysis, TRIZ, Visual Thinking, Inventive Design in Practice; Project Presentations.

Prerequisite(s): Graduate Status

Notes: This is transdisciplinary course focused on creativity in engineering and science. Open to all graduate students in the Volgenau School of IT and Engineering; graduate students from other schools are encouraged to register with the instructor’s permission.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

CEIE 896 - Civil Engineering Research Topics

Credits: 3 (RD)
Reading on specific topic under direction of faculty member. May be repeated with change in topic.

Prerequisite(s): Admission into CEIE PhD program, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

CEIE 990 - Civil and Infrastructure Dissertation Topic Presentation

Credits: 1 (NR)
Opportunity for PhD students to present research proposal for critique. Covers presentation of research topic for PhD in Civil and Infrastructure Engineering. Students complete dissertation research proposal. May be repeated with change in topic, but degree credit is given only once.

Prerequisite(s): Graduate Standing; completion of all course work required for PhD in Civil and Infrastructure Engineering or permission of instructor.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring
CEIE 998 - Doctoral Dissertation Proposal

Credits: 1-12 (RD)
Work on research proposal that forms basis for doctoral dissertation. May be repeated for credit.

Notes: No more than 24 credits of CEIE 998 and 999 may be applied to doctoral degree requirements.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 1-12
Grading: Satisfactory/No credit only

CEIE 999 - Doctoral Dissertation

Credits: 1-12 (RD)
Formal record of commitment to doctoral dissertation research under direction of faculty member in civil engineering and infrastructure engineering.

Notes: May be repeated for credit.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 1-12
Grading: Satisfactory/No credit only

Classical Studies (CLAS)

Offered by the College of Humanities and Social Sciences

CLAS 240 - Greek and Latin Elements in English

Credits: 3 (NR)
Studies formation of English vocabulary derived from Greek and Latin prefixes, stems, and suffixes to increase word power in English (vocabulary, style). Special emphasis on bioscientific, medical, and legal terminology. Intended for native and non-native speakers of English. Literary texts illustrate word analyses, vocabulary uses.

Prerequisite(s): ENGL 101/ENGH 101 or equivalent, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CLAS 250 - Classical Mythology

Credits: 3 (NR)
Illustrates role of classical myths in classical and modern literature and art.
CLAS 260 - The Legacy of Greece and Rome

Credits: 3 (NR)
Introduces history, culture, and literature of Greece and Rome through close readings of central passages from classical literature dealing with some of the most important aspects of human existence. Illustrates importance of classical antiquity for the Western tradition.

Fulfills Mason Core requirement in literature.

Prerequisite(s): ENGL 101/ENGH 101 or equivalent, or permission of instructor.

Notes: Course work in English.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CLAS 340 - Greek and Roman Epic

Credits: 3 (NR)
Examines development of classical epic as genre, from beginnings with Homer to transformations in the works of later Greek and Roman authors.

Fulfills Mason Core requirement in literature.

Prerequisite(s): ENGL 101/ENGH 101 or equivalent, or permission of instructor.

Notes: Course work in English.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CLAS 350 - Greek and Roman Tragedy

Credits: 3 (NR)
Follows development of tragedy from its origins to the works of Aeschylus, Sophocles, and Euripides, and its reappearance in the Roman world in the tragedies of Seneca. Considers influence of Greek tragedy on later cultures.
CLAS 360 - Greek and Roman Comedy

Credits: 3 (NR)
Studies forms, contexts, and developments of comedy as a dramatic form in Greco-Roman world. Traces development of New Comedy in Hellenistic age and translation and adaptation of New Comedy by Roman dramatists Plautus and Terence.

Fulfills Mason Core requirement in literature.

Prerequisite(s): ENGL 101/ENGH 101 or equivalent, or permission of instructor.

Notes: Course work in English.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CLAS 370 - Greek and Roman Historians

Credits: 3 (NR)
Examines writings of major Greek and Roman historians, including Herodotus, Thucydides, Sallust, Livy, and Tacitus; their interpretations of the past; and their influence.

Prerequisite(s): ENGL 101/ENGH 101 or equivalent, or permission of instructor.

Notes: Course work in English.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CLAS 380 - Greek and Roman Novels

Credits: 3 (NR)
Examines novels written in antiquity, and influences on postclassical and modern literature. Emphasizes works of Longus, Heliodorus, Petronius, and Apuleius.

Fulfills Mason Core requirement in literature.

Prerequisite(s): ENGL 101/ENGH 101 or equivalent, or permission of instructor.
Notes: Course work in English.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**CLAS 390 - Topics in Classical Literature and Culture**

Credits: 3 (RD)
Studies forms, contexts, and developments of distinctive literary genre or cultural phenomenon in the Greco-Roman world.

**Prerequisite(s):** ENGL 101/ENGH 101 (or equivalent) or permission of instructor.

Notes: May be repeated for credit when topic is different.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**CLAS 499 - Senior Seminar in Classical Studies**

Credits: 3 (NR)
Individual research on specialized topic culminating in seminar paper. Fulfills writing-intensive requirement. Subject of seminar determined by instructor in consultation with student.

**Prerequisite(s):** Classical studies minors, 90 credits including 15 credits in classics, and permission of instructor.

Notes: Permission must be obtained in advance. Students may present no more than 3 credits for graduation.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**Climate (CLIM)**

Offered by the College of Science

**CLIM 101 - Global Warming: Weather, Climate, and Society**

Credits: 3 (NR)

Survey of the scientific and societal issues associated with weather and climate variability and change. Examines physical phenomena observed in the Earth's weather and climate, providing sufficient scientific and technical background to enable students to critically examine arguments being discussed by policymakers and the public at large. Also reviews the current debate on climate change from a scientific point of view with a focus on those aspects that have the largest potential impact on global society.
CLIM 102 - Global Climate Change: Modeling and Predicting an Uncertain Future

Credits: 4 (NR)

Class studies the use of computer models to simulate past and present climate, and predict future climate change; discusses how complex models are built, tested, and interpreted to better understand physical, chemical, and biological processes; how uncertainty is managed. Students conduct laboratory experiments through online interface and apply results to policy and planning.

Fulfills Mason Core requirement in natural science (lab).

Prerequisite(s): Basic math skills (Geometry, Algebra).

Notes: Computer models are used in the lab.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 1
When Offered: Spring

CLIM 111 - Introduction to the Fundamentals of Atmospheric Science

Credits: 3 (NR)

Overview of the Earth's atmosphere, its history, and the physical and chemical process that determine its characteristics. Focuses on key concepts from thermodynamics, radiation, chemistry, and dynamics that are essential for understanding the state, variability, and long term evolution of the atmosphere; especially in the context of comparisons with other planetary atmospheres.

Fulfills Mason Core requirement in natural science (lab).

Equivalent to PHYS 111

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CLIM 112 - Introduction to the Fundamentals of Atmospheric Science Lab
Laboratory course associated with CLIM 111. Study of the Earth's atmosphere based on concepts taken from thermodynamics, radiation transport, chemistry, and dynamics.
Designated a Green Leaf Course.
Fulfills Mason Core requirement in natural science (lab).
Equivalent to PHYS 112

**Corequisite(s):** CLIM 111

**Hours of Lecture or Seminar per week:** 1-6
**Hours of Lab or Studio per week:** 1

---

**CLIM 301 - Weather Analysis and Prediction**

Credits: 4 (NR)
Large-scale behavior of mid-latitude weather systems. Includes coupling of synoptic motion to mesoscale processes that lead to significant weather events. Introduces the observational network, numerical weather models, and prediction. Laboratory portion gives practical experience in weather analysis, prediction, and technology currently used for visualization and analysis.

**Prerequisite(s):** MATH 113 or equivalent; one of CLIM/PHYS 111/112 or EOS 121 or GGS 121.

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 1

---

**CLIM 312 - Physical Climatology**

Credits: 3 (NR)
Quantitative description of nature and theory of the climate system, dynamics of atmosphere-ocean-land surface, internal interactions and response to external forcing, description of the climate record and simple climate models.

Equivalent to GGS 312.

**Prerequisite(s):** CLIM/PHYS 111/112 OR GGS 121; and PHYS 243,244, or permission of instructor.

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0
**When Offered:** Spring

---

**CLIM 314 - Severe and Extreme Weather**

Credits: 3 (NR)
Behavior of weather events ranging from small scale (e.g., thunderstorms and tornadoes) to mesoscale (e.g., fronts and hurricanes). Introduces the dynamical and physical processes, atmospheric boundary layer processes, and coupling between different spatial scales that create and shape severe and localized weather events.

Designated a Green Leaf Course.

Equivalent to GGS 314

Prerequisite(s): MATH 113 or equivalent; CLIM/PHYS 111/112 or GGS 121.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CLIM 319 - Air Pollution

Credits: 3 (NR)

Description of major types of air pollution and introduction to how their characteristics are influenced by interaction with the atmosphere. Topics include sources and distribution of pollution from local to global scales, effects of radiation and wind on pollution, modeling of plume dispersion, and pollution effects on climate.

Designated a Green Leaf Course.

Prerequisite(s): CLIM 111 or GGS 121.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

CLIM 390 - Topics in Climate Research

Credits: 1-4 (RD)
Selected topics not covered in fixed content courses. May be included for credit by AOES majors in the 45 credits of courses required for BS degree.

Prerequisite(s): 15 credits of AOES courses within concentration.

Hours of Lecture or Seminar per week: 1-4
Hours of Lab or Studio per week: 1-6

CLIM 408 - Senior Research

Credits: 3 (RD)
Independent research under guidance of faculty member on a research project in numerical, experimental, observational, or theoretical atmospheric or climate-related research. A written report on the project is required.

Prerequisite(s): 15 credits of AOES courses within major.
Notes: May be taken twice with department permission.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**CLIM 409 - Research Internship**

Credits: 3 (RD)
On-the-job experience for AOES majors in industry or government laboratories, including summer research programs. Students work in observational, experimental, or theoretical research, and prepare a written report at the end of the internship.

Prerequisite(s): 75 credits. 15 credits of courses in major and permission of department. See department for requirements and application procedure prior to enrollment.

Notes: May be taken twice with department permission.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**CLIM 411 - Atmospheric Dynamics**

Credits: 3 (NR)
Observational bases and fundamentals of fluid dynamic principle for understanding atmospheric motions across multiple spatial and temporal scales; covers basic conservation laws of mass, momentum, and energy; concepts of circulation and vorticity; balanced atmospheric flows, e.g. geostrophic wind and shear, thermal wind; quasi-geostrophic and isentropic potential vorticity analysis for mid-latitude cyclones and fronts.

Equivalent to CLIM 311 (2013-2014 Catalog).

Prerequisite(s): CLIM 111 and MATH 213, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

**CLIM 412 - Physical Oceanography**

Credits: 3 (NR)
Reviews global patterns of temperature, salinity, currents and waves in the world's oceans and how these patterns influence marine biota, climate, and human activity. Introduces key concepts which explain physical features of the ocean ranging from microscopic turbulence to global circulation.
Designated a Green Leaf Course.

Equivalent to GEOL 412.
Prerequisite(s): MATH 113 or MATH 115, and PHYS 160 or PHYS 243, or permission of instructor

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CLIM 429 - Atmospheric Thermodynamics

Credits: 3 (NR)
Thermodynamics of the atmosphere, properties of dry and moist air, air parcel as a thermodynamic system, atmospheric stability and convection, cloud formation and stability indices.

Prerequisite(s): CLIM 111, MATH 114 and PHYS 260; or permission of Instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

CLIM 438 - Atmospheric Chemistry

Credits: 3 (NR)
Reviews fundamental chemical processes of the Earth's atmosphere including chemical cycles, thermodynamics, reaction kinetics, photochemistry, radiative balance, ozone chemistry and environmental issues, including air pollution, acid rain and global change. Includes some review of extraterrestrial atmospheric chemistry.

Equivalent to CHEM 438

Prerequisite(s): CHEM 331 and 332 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CLIM 440 - Climate Dynamics

Credits: 3 (NR)
Structure, dynamics and thermodynamics of atmospheric and oceanic circulations that maintain the climate. Role of the large scale transport of energy, moisture and angular momentum. Relationships of large scale circulation to weather and weather extremes, and implications for past and future climates.

Prerequisite(s): MATH 213, MATH 214, and CLIM 411.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring
CLIM 470 - Numerical Weather Prediction

Credits: 3 (NR)
Concepts and techniques of numerical prediction of weather, including the numerical models used and the rationale for large suites of meteorological forecasts. Sources of errors in the forecast: errors in the initial conditions and in the numerical weather prediction models. Interpretation of model output.

Prerequisite(s): MATH 213, MATH 214, and CLIM 411.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring

CLIM 690 - Scientific Basis of Climate Change

Credits: 3 (NR)
A rigorous treatment of global warming, especially with regard to anthropogenic causes, based on the IPCC 4th Assessment Report "The Physical Science Basis". Topics include 1) Overview of observed climate, 2) Variability of climate, 3) Modeling of climate response to green house gas forcing, 4) Green house gases, chemistry, and aerosols, and 5) Projections of climate change and its societal impact.

Prerequisite(s): BS or MS in a natural science or engineering, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CLIM 710 - Introduction to Physical Climate System

Credits: 3 (NR)
Provides modern understanding of ocean, atmosphere, and land based on fundamental physical laws. Describes current climate and physical processes by which climate is maintained. Covers theoretical models of general circulation of atmosphere, including time mean and transient behavior. Describes basics of ocean circulation and interactions between ocean and atmosphere. Reviews past climate change, stratosphere and its interactions with troposphere, and role of land processes in modulating climate.

Prerequisite(s): BS or MS in mathematics or a physical science, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CLIM 711 - Introduction to Atmospheric Dynamics

Credits: 3 (NR)
Covers basic conservation laws of mass, momentum, and energy and scaling analysis of equation of motion and thermodynamic equation. Discusses balanced flows in atmosphere, such as geostrophic wind and its vertical shear, and thermal wind relationship. Also explores circulation and vorticity; role of atmospheric boundary layer in mass, momentum, and energy transfer; synoptic scale motions; and role of gravity and Rossby waves in controlling general circulation of atmosphere.
Equivalent to PHYS 676

Prerequisite(s): BS or MS in mathematics or a physical science, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CLIM 712 - Physical and Dynamical Oceanography

Credits: 3 (NR)
Introduces climatology and dynamics of oceans. Covers nature of seawater, heat, and salt budgets; general circulation of the ocean, including the Gulf Stream and thermohaline circulations; dynamics of wind-driven ocean circulation; and processes influencing biological and chemical behavior.

Prerequisite(s): CSI 751 or CLIM 710 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CLIM 713 - Atmosphere-Ocean Interactions

Credits: 3 (NR)
Provides comprehensive observational and mechanistic understanding of El Niño and Southern Oscillation (ENSO) phenomena. Topics include observations and theories of seasonal and interannual changes in ocean circulation and temperature and interactions with atmosphere; equations of motion and theories of wind-driven circulation; mixed layer observations and theories; midlatitude and equatorial ocean waves; interannual variability and atmosphere-ocean coupling; and tropical oceanography and meteorology.

Prerequisite(s): CLIM 712 or 711 or equivalent, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CLIM 714 - Land-Climate Interactions

Credits: 3 (NR)
Interdisciplinary course providing detailed description of surface energy and water balance over land and radiative and turbulent transfer. Introduces numerical techniques for modeling land surface and applications in weather, climate, and hydrologic forecasting and simulation. Includes hands-on experience with land surface models in computer laboratory, including sensitivity experiments to reinforce theoretical concepts. Exposure to contemporary research through reading and reviewing seminal journal papers.

Prerequisite(s): BS or MS in mathematics or physical science, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
CLIM 715 - Numerical Methods for Climate Modeling

Credits: 3 (NR)
Foundation and theory of computational methods for atmosphere and ocean modeling, with special emphasis on finite-difference and spectral methods. Topics include accuracy, consistency, convergence and stability; time stepping schemes; nonlinear computational stability; energy and enstrophy conserving schemes for momentum equations; staggered and curvilinear grids; alternate vertical coordinate systems; implicit and split-explicit barotropic mode solution; pressure gradient errors and vorticity constraints; spectral methods for atmospheric models; and treatment of model physics.

Prerequisite(s): CLIM 712 or 711 or equivalent, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CLIM 750 - Geophysical Fluid Dynamics

Credits: 3 (NR)
Introduces geophysical fluid dynamics, the study of rotating stratified flows. Covers hydrostatics; equations of motion, gravity wave dynamics, and stratified flow; effects of rotation, midlatitude dynamics, Rossby number and quasigeostrophic expansion; beta plane approximation; and equatorial Kelvin and Rossby waves.

Prerequisite(s): CLIM 711, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CLIM 751 - Predictability of Weather and Climate

Credits: 3 (NR)
Covers fundamental aspects of weather and climate predictability. Using simple dynamical models, illustrates basic theorems on divergence of trajectories in phase space and fundamental periodicity properties of flow. Explores paradigms of turbulence, barotropic and baroclinic instability, and optimal linear growth to describe fundamental error growth mechanisms. Examines examples from real weather forecasting systems. Studies predictability of time averages with simple dynamical models and experiments using complex general circulation models and historical data analysis. Emphasizes roles of boundary conditions of sea surface temperature and soil moisture.

Prerequisite(s): CLIM 711 or equivalent, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CLIM 752 - Ocean General Circulation
Credits: 3 (NR)
Description and theory of large-scale ocean circulation and how it affects climate. Focus is on ubiquitous flow structures such as gyres, equatorial currents, and meridional overturning cells. Examines how the circulation follows from wind and thermohaline forcing, as well as physical principles. The influence of the circulation on heat transport and climate variability is also discussed. Conceptual guideposts include barotropic gyres, Ekman cells, potential vorticity, western intensification, the interplay of gravity and the Earth's rotation, advective-diffusive balance, multiple flow states, and Rossby waves.

Prerequisite(s): CLIM 712 or 711 or equivalent, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CLIM 753 - General Circulation of the Atmosphere

Credits: 3 (NR)
Overview and several theoretical perspectives of atmospheric transport of energy, moisture, and angular momentum, and how these processes fundamentally affect the climate on various time scales.

Prerequisite(s): CLIM 710 and 711.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CLIM 754 - Elements of the Tropical Climate System

Credits: 3 (NR)
Observations and dynamics of key processes of tropical weather and climate. Topics include: structure of the tropical atmosphere and ocean, convection, dynamics of tropical waves in the atmosphere and ocean, tropical intraseasonal variability, tropical the global monsoons, cyclones, and stratospheric quasi-biennial oscillation.

Prerequisite(s): CLIM 711.

Corequisite(s): CLIM 710.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring

CLIM 759 - Topics in Climate Dynamics

Credits: 3 (RT)
Covers selected topics in climate dynamics not covered in fixed-content courses.

Prerequisite(s): Permission of instructor.

Notes: May be repeated for credit when offered with different content.
CLIM 762 - Statistical Methods in Climate Research

Credits: 3 (NR)
Introduction to a core set of statistical methods that have proven useful to modern climate and predictability research. Topics include detecting and attributing climate change, describing climate variability with empirical orthogonal functions, statistical forecasting with regression and time series models, and identifying coupled patterns of variability with canonical correlation analysis.

Prerequisite(s): Undergraduate-level linear algebra and STAT 344 (or equivalent), or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CLIM 763 - Advanced Statistical Methods in Climate Research

Credits: 3 (NR)
Introduction to multivariate statistical techniques commonly used in climate science, with special emphasis on estimation in large dimensional spaces. Topics include: multivariate regression, canonical correlation analysis, predictable component analysis, field significance tests, data assimilation (especially the ensemble Kalman Filter), discriminant analysis, and multivariate detection and attribution of climate change.

Prerequisite(s): CLIM 762 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring.

CLIM 796 - Directed Reading and Research

Credits: 1-6 (RT)
Reading and research on a specific topic in climate dynamics under the direction of a faculty member.

Prerequisite(s): Admission into climate dynamics doctoral program and permission of instructor.

Notes: May be repeated as necessary.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0

CLIM 991 - Climate Dynamics Seminar
Presentations in climate dynamics field by Mason faculty and invited speakers.

**Prerequisite(s):** Graduate standing.

**Notes:** May be repeated for credit; however, a maximum of 3 credits may be applied toward the climate dynamics PhD.

**Hours of Lecture or Seminar per week:** 1  
**Hours of Lab or Studio per week:** 0

---

**CLIM 996 - Doctoral Reading and Research**

Credits: 1-6 (RT)  
Reading and research on a specific topic in climate dynamics under the direction of a faculty member.

**Prerequisite(s):** Admission into climate dynamics doctoral program and permission of instructor.

**Notes:** May be repeated as necessary.

**Hours of Lecture or Seminar per week:** 1-12  
**Hours of Lab or Studio per week:** 0  
**Grading:** Graduate Special

---

**CLIM 998 - Doctoral Dissertation Proposal**

Credits: 1-12 (RD)  
Covers development of research proposal under guidance of dissertation director and doctoral committee. Proposal forms basis for climate dynamics doctoral dissertation.

**Prerequisite(s):** Doctoral standing and permission of instructor.

**Notes:** Course may be repeated, but no more than 12 credits of CLIM 998 may be applied to doctoral degree requirements.

**Hours of Lecture or Seminar per week:** 0  
**Hours of Lab or Studio per week:** 0  
**Grading:** Satisfactory/No credit only

---

**CLIM 999 - Doctoral Dissertation**

Credits: 1-12 (RD)  
Doctoral dissertation research under direction of dissertation director.

**Prerequisite(s):** Admission to doctoral candidacy and permission of instructor.

**Notes:** May be repeated, but no more than 24 credits total in CLIM 998 and 999 may be applied to doctoral degree requirements.

**Hours of Lecture or Seminar per week:** 0
College of Humanities and Social Sciences (CHSS)

CHSS 310 - Introduction to Entrepreneurship

Credits: 1 (NR)
Introduces students to the intellectual underpinnings of entrepreneurship, entrepreneurial leadership, social innovation, intrapreneurship, and social enterprise development. Students shape an entrepreneurial learning plan for their own professional development in line with their career aspirations.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

CHSS 390 - Peer Tutoring in Writing across the Disciplines

Credits: 1 (RD)
Experiential learning course in teaching of writing across disciplines. Students receive Writing Center training in theory and techniques of tutoring writing and work a minimum of 3 hours per week in Writing Center. Focus is on practical application of writing theory and pedagogy from course readings, development of tutoring skills, and self-reflection through journals and final paper.

Prerequisite(s): Grade of A in ENGL 302/ENGH 302, 60 credits, and overall minimum GPA of 3.00 with a minimum GPA in major of 3.50.

Notes: Students must submit two faculty recommendations and a sample of recent academic writing, and complete an interview with the director of the Writing Center. May be repeated for a maximum of 3 credits.

Hours of Lecture or Seminar per week: 1-12
Hours of Lab or Studio per week: 0

College of Science (COS)

COS 120 - Introduction to Research

Credits: 1-3 (RD)
Introduction to research, involving work on a research project. May involve lab study, computer modeling and analysis,
mathematics, or other original research as appropriate. Research formulated and completed under instructor's guidance. Culminates in a written or oral final report. May be repeated for a total of 6 credits.

**Hours of Lecture or Seminar per week:** 0  
**Hours of Lab or Studio per week:** 3-9  
**When Offered:** Fall, Summer, Spring

---

**College of Visual and Performing Arts (CVPA)**

**CVPA 101 - Arts Pass**

Credits: 2 (RD)  
Introduction to appreciation of the arts through lectures and demonstrations in visual art, music, dance, and theater. Emphasizes aesthetic principles in modern society. Students attend performances and exhibitions and develop analytical skills through written journal and discussion.

**Notes:** May be repeated for total 4 credits.

**Hours of Lecture or Seminar per week:** 2  
**Hours of Lab or Studio per week:** 0

**CVPA 102 - Experiencing the Arts**

Credits: 3 (NR)  
Reserved for high school students enrolled in CVPA. Introduces collaborative and interdisciplinary arts experiences in visual art, music, dance, theater, film, and media through daily intensive immersion in the arts for two and a half weeks.

**Hours of Lecture or Seminar per week:** 1  
**Hours of Lab or Studio per week:** 2

**CVPA 105 - Special Topics in the Arts**

Credits: 1-3 (RT)  
Exploration of topical studies on the arts.

**Notes:** Subject matter varies. May be repeated for a maximum 12 credits when taken under different topics.

**Hours of Lecture or Seminar per week:** 1-3  
**Hours of Lab or Studio per week:** 0

**CVPA 308 - Cross-Cultural Arts Appreciation**
Credits: 3 (RT)
Provides cumulative arts experience by tying subject matter to major cultural production of Center for the Arts.

Notes: Subject matter varies. May be repeated for maximum 12 credits when taken under different topics.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CVPA 399 - Special Topics in the Arts

Credits: 1-6 (RT)
In-depth presentation and exploration of topical studies on the arts.

Notes: Subject matter varies. May be repeated for maximum 24 credits when taken under different topics.

Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 3

CVPA 430 - Topics in Arts and Wellness

Credits: 1-3 (RD)
In-depth presentation and exploration of topical studies in arts and wellness or related areas such as injury prevention, performance enhancement, and health and wellness training.

Prerequisite(s): Junior standing, or permission of instructor.

Notes: Topic depends on instructor. May be repeated for up to 9 credits if taken under different topics.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0

CVPA 489 - Field Experience in the Arts

Credits: 3-6 (RT)
Apprenticeship, internship, or project with organization or individual in the arts. Must be prearranged with division director before enrollment.

Prerequisite(s): Junior standing; completion of 6 credits in CVPA courses in area of residency; CVPA 305; or permission of instructor.

Notes: May be repeated for maximum 6 credits.

Hours of Lecture or Seminar per week: 1-12
Hours of Lab or Studio per week: 0
CVPA 499 - Research/Performance/Topics in the Arts

Credits: 3-6 (RD)
Advanced research, performance, or exploration of topical studies in arts.

Prerequisite(s): Permission of department chair.

Notes: May be repeated for maximum 6 credits.

Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 0

CVPA 530 - Topics in Arts and Wellness

Credits: 1-3 (RD)
In-depth presentation and exploration of topical studies in arts and wellness and/or related areas (e.g., injury prevention, performance enhancement, health and wellness training to educators and arts professionals). Topic depends on instructor.

Prerequisite(s): 90 hours or permission of the instructor.

Notes: May be repeated up to 9 credits if taken under different topics.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0

CVPA 592 - Special Topics in Interdisciplinary Arts Studies

Credits: 1-3 (RT)
Topics in interdisciplinary arts.

Prerequisite(s): Undergraduate degree or equivalent, or permission of instructor.

Notes: May be repeated for maximum 12 credits.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CVPA 599 - Independent Study

Credits: 1-6 (NR)
Independent reading, performance, or research on specific project under direction of selected faculty member. May include attendance in parallel undergraduate course.

Prerequisite(s): Undergraduate degree or equivalent, or permission of instructor.

Notes: May be repeated for total 12 credits.
CVPA 600 - CVPA Graduate ProSeminar

Credits: 0 (NR)
Introduces students into graduate studies in the arts; the course reviews graduate practices and policies, and the graduate colloquia.

Prerequisite(s): Acceptance into a CVPA Graduate Program.

Grading: Satisfactory/No Credit
When Offered: Fall, Spring

CVPA 700 - Academic Writing in the Arts

Credits: 1 (RD)
Prepares graduate students for the rigors of academic writing in the arts at the advanced level and supports students' acculturation in the academic writing skills and practices of their discourse communities.

Grading: Satisfactory/No Credit only

CVPA 701 - Thesis and Project Writing

Credits: 1 (RD)
Students will develop an expertise within the specific rhetorical context of the thesis/project genre, understand the specialized features of the final project or thesis, and apply the strategies they have learned in their disciplines to their capstone event.

Prerequisite(s): Completion of 21 graduate credits in a CVPA graduate degree.

Grading: Satisfactory/No credit only

College Teaching (CTCH)

Offered by the College of Humanities and Social Sciences

CTCH 592 - Special Topics in Education
Addresses current issues in colleges and universities, with particular attention to the multiple purposes of contemporary higher education.

Notes: May be repeated for a maximum of 6 credits when topic is different.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CTCH 601 - The Community College

Credits: 3 (NR)
Studies institutional character of the community college, including history, purpose, clientele, organization, finance, and social function. Studies issues currently faced by community colleges.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CTCH 602 - College Teaching

Credits: 3 (NR)
Describes issues that affect teaching and learning and provides basic tools to use in college classroom. Teaches how to plan course, develop syllabus, promote learning among diversity of students, and implement classroom assessment techniques.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CTCH 603 - Higher Education in the Digital Age

Credits: 3 (NR)
Studies how digital tools and resources shape, and are shaped by, higher education both inside and outside of the classroom. Content includes the complex ways in which colleges integrate changing teaching and learning, information, and communication technologies. Combining reading, writing, viewing, and hands-on learning, students examine issues through the content and lens appropriate for their discipline and goals.

Prerequisite(s): Basic familiarity with computer operations

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

When Offered: Spring

CTCH 604 - The Scholarship of Teaching and Learning
Overview of the movement in higher education in scholarship of teaching and learning. Focuses on ways students learn, how learning can be improved, and different methods of conducting research into teaching and learning.

Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0

CTCH 605 - Curriculum and Program Design and Assessment

Credits: 3 (NR)  
Prepares for designing, implementing, and assessing new courses, curricula, and programs. Examines relationships of courses and curricula to larger programs and institutional goals. Explores program planning and implementation such as documenting need, generating cost estimates, and assembling strong case for new programs.

Prerequisite(s): CTCH 601 or 602, and 603.

Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0

CTCH 606 - Diversity in Higher Education

Credits: 3 (NR)  
Explores instructional interactions and communication strategies for diverse learner populations. Includes discussion of sociological, behavioral, and cognitive theory on culture.

Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0

CTCH 621 - Higher Education in the United States

Credits: 3 (NR)  
History of higher education from colonial period to the present. Examines philosophic, political, social, and economic forces that have influenced development. Reviews today's issues and challenges.

Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0

CTCH 622 - Organization and Administration in Higher Education

Credits: 3 (NR)  
Provides concepts of organization and administration in contemporary institutions from macro to micro perspectives. Studies theory and practices of the organization as it relates to governance, structure, and management of the institution.
CTCH 624 - Finance and Fiscal Management in Higher Education

Credits: 3 (NR)
Overview of higher education finance and fiscal management.

CTCH 626 - Assessment in Higher Education

Credits: 3 (NR)
Focuses on political and historical context of assessment in higher education, and teaches strategies for classroom, program, and institutional assessment. Develops skills in survey and focus group research, and teaches how to develop and implement assessment plan.

CTCH 641 - Introduction to Helping Skills

Credits: 3 (NR)
Focuses on helping skills that assist others in reflecting on concerns, considers possible causes of problems, and contemplates options and strategies for problem solving. Introduces students to and practices basic helping skills. Explores ethical issues surrounding helping skills and determining when to refer students to professional counselors.

CTCH 643 - Multicultural Helping Skills

Credits: 3 (NR)
Sensitizes students to and promotes an understanding of multiple cultures and encourages students to examine their own attitudes toward various groups, explore their own identities, and to acquire expertise in the use of helping skills with various populations. Emphasizes the learning of approaches and the application of techniques that facilitate effective multicultural communication in higher education.

Prerequisite(s): CTCH 641.
CTCH 644 - Student Services in Higher Education

Credits: 3 (NR)
Focuses on development and organization of student personnel programs and services in institutions of higher learning. Covers philosophy, methods, and techniques.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CTCH 645 - The Contemporary College Student

Credits: 3 (NR)
Analyzes changing demographics, barriers, and developmental issues facing college students. Studies impact of college environment on student development, and interaction between students of varying subcultures and the environment. Examines technology issues and their impact.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CTCH 685 - Practicum

Credits: 3 (RD)
Serves as an essential part of the certificate and MAIS programs. Supervised on-the-job experience in approved college or university setting or public agency involved in higher education. Develops skills applicable to college-based teaching or higher education administration or policy. Approval of practicum coordinator needed one semester before registration.

Prerequisite(s): Admission to certificate, MAIS/CCT or MAIS/Higher Education program; approval of advisor and practicum coordinator; 12 credits of core requirements; and 3 additional credits.

Notes: Minimum 150 hours of work and participation in internship seminar. May be repeated for a maximum of 6 credits.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
Grading: S/NC

CTCH 701 - Higher Education Law

Credits: 3 (NR)
Introduces students to laws and legal issues that impact higher education and establishes general familiarity of higher education law. Utilizes a case study approach that allows students to be able to recognize when a legal issue presents itself in situations involving students, faculty, or administration.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
CTCH 710 - Research Designs in Higher Education

Credits: 3 (NR)
Provides an introduction to higher education research methodologies, analysis, and decision-making through introduction of basics of research design including problem identification, literature review, method selection, data collection and analysis, application, writing, and ethics.

Equivalent to EDRS 810, CTCH 801 (2013-2014 Catalog).

Prerequisite(s): Doctoral standing or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CTCH 792 - Special Topics in Higher Education

Credits: 1-3 (RT)
Covers current issues in teaching and learning in higher education.

Prerequisite(s): Admission to doctoral program or permission of instructor.

Notes: May be repeated for a maximum of 12 credits when topic is different.

Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 0

CTCH 810 - Leadership in Higher Education

Credits: 3 (NR)
Focusing on the leadership of higher education and the role leaders play in institutional transformation, this course explores the complex social and political environments and the current and future trends of higher education. This focus occurs through the foundational grounding of leadership theory and research. Students will be challenged to employ multiple perspectives of leadership in higher education.

Equivalent to CTCH 702

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CTCH 821 - History of Higher Education in the United States

Credits: 3 (NR)
Key issues and moments in the history of higher education are examined as a way to understand current structures, cultures, policies, and purposes. Historical perspective will also be used to consider the near future of higher education. Students will examine current trends and possible futures for a specific topic by doing historical research on the issue.
CTCH 826 - Advanced Institutional and Program Assessment in Higher Education

Credits: 3 (NR)
Examination of educational assessment and evaluation, practices, and methods. Students critique and design an evaluation study and an evaluation report. Reviews ethical issues and impact of assessment and evaluation for students, employees, and programs.

CTCH 830 - Ethics in Higher Education: Personal, Organizational, and Institutional Realities

Credits: 3 (NR)
Explores theories, definitions, and applications of ethics across multiple higher education settings, with particular attention to critical theory contributions. Includes an in-depth analysis of major complex ethical issues in higher education settings using ethical frameworks.

CTCH 885 - Doctoral Internship in College Teaching and Administration

Credits: 3 (RT)
Supervised internship at a community college, four-year college or university, or nonteaching higher-education setting such as a government agency or administrative office. Develops skills applicable to college teaching or higher education administration or policy. Students must complete a minimum of 180 hours of work and participate in internship seminar.

Prerequisite(s): Admission to doctoral program, approval of advisor and internship coordinator, 18 credits of graduate course work.

Notes: Students must contact the program at least one semester before enrolling. May be repeated for a maximum of 6 credits.

CTCH 897 - Directed Reading in Higher Education

Credits: 1-6 (RD)
Independent reading on topic agreed on by student and instructor.
CTCH 998 - Doctoral Dissertation Proposal

Credits: 1-3 (RD)
Contact program for permission to register. Work on research proposal that forms basis for doctoral dissertation.

Prerequisite(s): Completion of at least one internship and all other course work and qualifying exams.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0
Grading: S/NC

CTCH 999 - Doctoral Dissertation

Credits: 1-12 (RD)
Doctoral dissertation research and writing under direction of dissertation committee.

Prerequisite(s): CTCH 998, two internships, and appointed dissertation committee.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0
Grading: S/NC

Communication (COMM)

Offered by the College of Humanities and Social Sciences

COMM 100 - Public Speaking

Credits: 3 (NR)
Presents principles to develop effective presentations for public and professional settings while integrating appropriate technologies. Emphasizes analyzing audience; composing meaningful, coherent messages; conducting responsible research; developing effective arguments; and improving delivery skills to strengthen confidence and credibility.

Fulfills Mason Core requirement in oral communication.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
COMM 101 - Interpersonal and Group Interaction

Credits: 3 (NR)
Provides principles to develop appropriate and effective communication strategies in one-to-one and small group communication settings. Emphasizes analyzing and assessing communication skills to create and sustain effective communication in personal and professional relationships.

Fulfills Mason Core requirement in oral communication.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

COMM 140 - Forensics Seminar in Creative Arts

Credits: 1 (RT)
Intensive work in creative forensics events, including rhetorical criticism and informative, persuasive, extemporaneous, after-dinner, and impromptu speaking.

Prerequisite(s): Audition.

Notes: May be taken four times.

Hours of Lecture or Seminar per week: 3-6
Hours of Lab or Studio per week: 6

COMM 141 - Forensics Seminar in Recreative Arts

Credits: 1 (RT)
Intensive work in recreative forensic events, including dramatic duo, program interpretation, poetry interpretation, dramatic interpretation, and prose interpretation.

Prerequisite(s): Audition.

Notes: May be taken four times.

Hours of Lecture or Seminar per week: 3-6
Hours of Lab or Studio per week: 6

COMM 142 - Forensics Seminar in Debate: Affirmative Strategies

Credits: 1 (RT)
Work in affirmative research, case construction, and oral presentation; directed toward affirmative analysis of intercollegiate debate proposition.

Notes: May be taken four times.
COMM 143 - Forensics Seminar in Debate: Negative Strategies

Credits: 1 (RT)
Work in negative research, case attacks, and oral presentation directed toward negative analysis of intercollegiate debate proposition.

Notes: May be taken four times.

COMM 145 - Newspaper Workshop I

Credits: 1 (RT)
Practical experience in writing, editing, or business aspects of newspaper production at Broadside or other papers. Coordinated by newspaper faculty advisor.

Notes: May be repeated for total 3 credits.

COMM 148 - Radio Workshop I

Credits: 1 (RD)
Practical experience in production, news writing, promotions, advertising, public relations, programming, or newscasting for student radio station WGMU.

Prerequisite(s): 100-level COMM course, or permission of instructor.

Notes: May be taken three times.

COMM 150 - Communication Skills for International Students

Credits: 3 (NR)
Introduction to speaking, listening, and nonverbal skills required to communicate appropriately in university study.

Prerequisite(s): International student in first year of study in the United States, non-native speakers of English with some
difficulty speaking clearly and accurately, or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**COMM 157 - Video Workshop**

Credits: 1 (RD)  
Practical experience in learning production basics including camera, video, and lighting.

**Notes:** Students who have already completed or are in COMM 355 are not eligible to take this course. May be taken three times.

**Hours of Lecture or Seminar per week:** 1  
**Hours of Lab or Studio per week:** 2

**COMM 200 - Communication Theory**

Credits: 3 (NR)  
Introduces the field of communication, including perspectives on theory and research, topical areas within the discipline, basic research methodologies, and a survey of theories in those areas. Covers basic procedures for theory-building, research, and writing about communication.

**Prerequisite(s):** Declared major or minor in Communication, undeclared major, or permission of undergraduate program director.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**COMM 201 - Small Group Communication**

Credits: 3 (NR)  
Principles of communicating effectively in small group situations. Emphasizes problem-solving group communication. Practice in working cooperatively with others to complete projects using systematic approach to problem solving.

**Prerequisite(s):** COMM 101 or equivalent course.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**COMM 202 - Media and Society**

Credits: 3 (NR)  
Examines the relationship between media and society through the study of the development of various media systems in the
United States, including print media, radio, television, film, the recording industry, and new communication technologies. Introduces media effects and basic theories.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  

**COMM 203 - Introduction to Journalism**

Credits: 3 (NR)  
American journalism including history and First Amendment components; role of professional journalist; print, broadcast, and computer assisted news operations; economics of publishing; and effect of new technologies. Serves as starting point for those interested in journalism careers and as orientation for those interested in learning more about news business operations.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  

**COMM 210 - Voice and Articulation**

Credits: 3 (NR)  
Principles of voice production, with practice in effective vocal use of American English. Emphasizes student participation.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  

**COMM 230 - Case Studies in Persuasion**

Credits: 3 (NR)  
Examines common persuasive message strategies and approaches. Covers basic principles of persuasive process. Case studies include advertisements, speeches, and persuasive activities from all segments of society.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  

**COMM 249 - Communication Industry Experience**

Credits: 2 (RD)  
On-site training related to one of the five communication department concentration fields through faculty-approved field work-study programs. Related class work includes navigating in-process media workplace culture and the post-CIE progression, including refining the resume, preparing for the COMM 450 internship, and ultimately interviewing for a job.

**Prerequisite(s):** 45 credits total, 6 credits in COMM.

**Notes:** May be repeated for maximum of 4 credits.
COMM 255 - Introduction to Media Literacy

Credits: 3 (NR)
Principles and practices of media literacy. Emphasizes critical viewing, listening, and reading media skills; and media effects on consumer.

COMM 260 - Basic Debate Theory and Practice

Credits: 3 (NR)
Theory and practice of formal debate, including approaches to analytical reasoning, research, delivery, and conceptual basis for debate. Does not require tournament participation.

COMM 261 - Theories of Argumentation

Credits: 3 (NR)
Analyzes argument within communicative settings. Emphasizes deductive and inductive forms of reasoning, fallacies in reasoning, tests of evidence, and models for such analyses.

COMM 300 - Foundations of Public Communication

Credits: 3 (NR)
Theories and principles of public communication, emphasizing methods of persuasion, critical analysis, speaker-listener alignments in public setting, and measurements of effective public communication.

Fulfills writing intensive requirement in the major.

Prerequisite(s): COMM 200 with a grade of C or better. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 0
COMM 301 - Foundations of Interpersonal Communication

Credits: 3 (NR)
Theories and principles of interpersonal communication emphasizing models of communication, verbal and nonverbal message systems, and analysis of communicative relationships.

Prerequisite(s): COMM 200 with a grade of C or better. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

COMM 302 - Foundations of Mass Communication

Credits: 3 (NR)
Theories and principles of mass communication emphasizing effects, the media as institution, and role of society.

Prerequisite(s): COMM 200 with a grade of C or better. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

COMM 303 - Writing across the Media

Credits: 3 (NR)
Foundation course focusing on writing for the mass media: Internet, public relations, newspapers, broadcast (television and radio) and advertising with a strong emphasis on adherence to Associated Press Style.

Prerequisite(s): 30 credits.

Notes: Prerequisite for all communication media writing courses. Lab work required.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

COMM 304 - Foundations of Health Communication

Credits: 3 (NR)
Explores health communication research practice: the role of communication in health care delivery, health promotion and disease prevention, risk communication, and personal as well as psychological well-being. Examines interpersonal, organizational, team, family, and intercultural relationships.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
COMM 305 - Foundations of Intercultural Communication

Credits: 3 (NR)
Analyzes communication variables as they relate to intercultural encounters. Emphasizes culture's influence on communication process, particularly influence of verbal and nonverbal communication on how message is interpreted.

Fulfills Mason Core requirement in global understanding.

Prerequisite(s): 3 credits of 100 or 200-level COMM courses or 60 credits.

Notes: Communication majors are encouraged to complete COMM 200 prior to enrolling in this course.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

COMM 306 - Issues in Intercultural Communication

Credits: 3 (NR)
Applies basic principles of intercultural communication to analyze specific situations involving communication and cultural differences.

Prerequisite(s): COMM 305, or permission of instructor.

Notes: Continuation of COMM 305.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

COMM 307 - Field Study in Communication

Credits: 3 (RT)
Structured communication learning experience: one to three weeks of travel in a foreign environment involving another country or relevant U.S. co-cultures. Students must complete appropriate readings, laboratory assignments, and personal learning paper to process communication concepts and experiences.

Prerequisite(s): Permission of instructor

Notes: May be repeated for a maximum of 6 credits when field study is different.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

COMM 310 - Oral Interpretation
Credits: 3 (NR)
Principles and theories of oral interpretation. Practice in oral communication of prose, poetry, and drama.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

COMM 320 - Business and Professional Communication

Credits: 3 (NR)
Study of basic theories and skills of communication in professional contexts, including interviewing, relationship maintenance, small group teams, and public presentations. Emphasizes developing practical and critical thinking skills.

Prerequisite(s): COMM 100, 101 or 104 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

COMM 326 - Rhetoric of Social Movements and Political Controversy

Credits: 3 (NR)
Social and political forces of contemporary era from communication perspective, emphasizing political leadership, pressures for social and political change, and transformations in communicative environment.

Fulfills Mason Core requirement in synthesis.

Prerequisite(s): COMM 300.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

COMM 330 - Principles of Public Relations

Credits: 3 (NR)
Surveys nature, history, scope, and practice of public relations in business, trade associations, nonprofit organizations, and educational and government institutions. Covers principles, practice of public relations, including media relations, issues management, and public service announcements; marketing and research; planning and publicity for special events; house publications; and institutional advertising.

Prerequisite(s): 3 COMM credits and 60 credits, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

COMM 332 - Nonverbal Communication
Theory, principles, and methods to analyze nonverbal communication. Emphasizes physical behavior, facial expression, personal space and territoriality, physical appearance, vocal cues, and environment.

Prerequisite(s): 3 COMM credits.

Comm 334 - Family and Health Communication

Credits: 3 (NR)
Examines how family communication contributes to physical, psychological, and social wellness. Explores how family communication affects our experience with health transitions (e.g., coping with cancer; becoming a caregiver; losing a loved one), contributes to health outcomes (e.g., stress and anxiety; disordered eating behavior; schizophrenia; drug abuse), and is central to health promotion behavior (e.g., understanding health history and genetics).

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

Comm 335 - Organizational Communication

Credits: 3 (NR)
Theory, practice, and methods to analyze communication in organizations. Emphasizes process and structure, interaction formats, mechanisms for modification, and career paths in organizational communication.

Prerequisite(s): COMM 100, 101, or 301; or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

Comm 340 - Forensics Seminar in Creative Arts

Credits: 1 (RT)
Intensive work in various types of creative forensics events, including rhetorical criticism and informative, persuasive, extemporaneous, after-dinner, and impromptu speaking.

Prerequisite(s): Completion of 60 hours, or 4 hours of COMM 140. Audition required.

Notes: May be taken four times.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 6
COMM 341 - Forensics Seminar in Recreative Arts

Credits: 1 (RT)
Intensive work in various types of recreative forensics events, including dramatic duo, program interpretation, poetry interpretation, dramatic interpretation, and prose interpretation.

Prerequisite(s): Completion of 60 hours, or 4 hours of COMM 141. Audition required.

Notes: May be taken four times.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 6

COMM 342 - Forensics Seminar in Debate: Affirmative Strategies

Credits: 1 (RT)
Work in affirmative research, case construction, and oral presentation directed toward affirmative analysis of intercollegiate debate proposition.

Prerequisite(s): 4 credits of COMM 142, or 60 credits and audition.

Notes: May be taken four times.

Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 6

COMM 343 - Forensics Seminar in Debate: Negative Strategies

Credits: 1 (RT)
Work in negative research, case attacks, and oral presentation directed toward negative analysis of intercollegiate debate proposition.

Prerequisite(s): 4 credits of COMM 143, or 60 credits and audition.

Notes: May be taken four times.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 6

COMM 344 - Parliamentary Procedure

Credits: 1 (NR)
Procedures of parliamentary law as practiced in voluntary organizations. Practice in leading groups that conduct business according to Roberts Rules of Order, Newly Revised. Brief review of other parliamentary manuals.

Prerequisite(s): 60 credits, or permission of instructor.
COMM 345 - Newspaper Workshop II

Credits: 1 (RT)
Practical experience in writing and editing for student newspaper or other papers.

Prerequisite(s): 3 credits of COMM 145, COMM 351, or permission of instructor

Notes: May be taken three times.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 2

COMM 346 - Yearbook Workshop

Credits: 1 (RT)
Practical experience in promotion, marketing, and sales of video yearbook, or practical experience working on Senior Expressions, a print supplement to the video yearbook.

Notes: May be taken three times.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 2

COMM 347 - Cable TV Programming and Marketing

Credits: 1 (RD)
Practical experience in television programming, promotion, and marketing of a campus television cable network operation.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 2

COMM 348 - Radio Workshop II

Credits: 1 (RT)
Intense practical application of previously acquired skills in production, promotions, advertising, public relations, programming, or news writing for student radio station WGMU.

Prerequisite(s): COMM 148, or permission of instructor.

Notes: May be taken three times.
COMM 350 - Mass Communication and Public Policy

Credits: 3 (NR)
Investigates how matters of public importance are communicated via various mass communication channels. Emphasizes regulations to minimize influence of mass media on public decision-making, and media manipulation by pressure groups, politicians, and media gatekeepers.

Prerequisite(s): COMM 102, 202, or 302; or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

COMM 351 - News Writing and Reporting

Credits: 3 (NR)
Experience in actual news gathering. Students write and report for print and online outlets. Numerous in-class and out-of-class writing assignments train students in unique styles of print and online journalism.

Prerequisite(s): COMM 303. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

COMM 352 - News Editing: Print and Beyond

Credits: 3 (NR)
Copy preparation, headline writing, news judging, and layout for various forms of print and electronic formats. Introduces working on news copy desks.

Prerequisite(s): COMM 303. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

COMM 353 - Broadcast Journalism

Credits: 3 (NR)
Prerequisite(s): COMM 303. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

COMM 354 - Radio Production

Credits: 3 (NR)
Theory and practice of operational radio broadcasting. Topics include programming, production, and promotion aspects of commercial and noncommercial radio.

Prerequisite(s): COMM 302, or permission of instructor.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 4

COMM 355 - Video Principles and Practices

Credits: 3 (NR)
General introduction to video production including camera, audio, lighting, and editing. Lab work required.

Notes: Lab work required.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 2

COMM 356 - Video: Performance and Writing

Credits: 3 (NR)
Writing for video, performance skills for on-air work, interviewing.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

COMM 358 - Video Producing and Directing

Credits: 3 (NR)
Introduces techniques, theory, and practices in producing and directing including studio and field producing and directing, budget, floor plans, and production material associated with video productions.

Prerequisite(s): COMM 355 with a grade of 2.00 or portfolio assessment.
**COMM 359 - Media Management**

Credits: 3 (NR)
Principles, practices of media management from general techniques to operation of individual departments within a media organization.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**COMM 360 - Video Editing**

Credits: 3 (NR)
Focus on advanced techniques in digital editing, software associated with video editing (Final Cut Pro), theories of video editing and necessary skills associated with digital editing.

Prerequisite(s): COMM 355 with a grade of 2.00 or better or portfolio assessment.

**Hours of Lecture or Seminar per week:** 2  
**Hours of Lab or Studio per week:** 3

**COMM 361 - Online Journalism**

Credits: 3 (NR)
Focuses on online journalism, research, reporting, web page and weblog creation, and writing for Internet.

Prerequisite(s): COMM 303, or permission of instructor Prerequisite enforced by registration system.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**COMM 362 - Argument and Public Policy**

Credits: 3 (NR)
Develops argumentative skills while examining contemporary public policy. Applies methods of argumentative analysis to design, implementation of public policy. Students learn by constructing, examining, and using public argument.

Fulfills Mason Core requirement in synthesis.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0
COMM 363 - Media Career Seminar

Credits: 1 (NR)
Practicum for students with production experience; students produce a final resume in area of expertise.

Prerequisite(s): Two courses completed in area of media production focus.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 3

COMM 364 - Videography

Credits: 3 (NR)
Focus on camera techniques such as framing, editing within the camera, shot composition, storyboarding, camera angles, video levels, and continuity.

Prerequisite(s): COMM 355 with a grade of 2.00 or better or portfolio assessment.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

COMM 365 - Gender, Race, and Class in the Media

Credits: 3 (NR)
Introduces concepts of power, influence of mass media. Allows students to see themselves as products, producers of media influence, and gives sense of the roles in the media or lack thereof, of groups based on their gender, race and/or class.

Prerequisite(s): COMM 302, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

COMM 366 - Visual Communication

Credits: 3 (NR)
Teaches visual communication theories and applies them to creation of videos, web pages, multimedia production, Computer Based Training (CBT) and other technologies. Covers limits of visual communication in terms of perception, economics, and technology. Partial distance course includes viewing video modules and using electronically mediated discussion.

Prerequisite(s): COMM 355. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
COMM 370 - Feature Writing

Credits: 3 (NR)
Introduces aspiring journalists to research techniques and critical writing skills needed to produce publishable magazine or newspaper feature stories.

Prerequisite(s): COMM 303. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

COMM 371 - Sports Writing and Reporting

Credits: 3 (NR)
Experience in actual sports-related news gathering and reporting. Covers writing and reporting on sports-related subjects for print and online media. Numerous in-class and out-of-class writing assignments train students in the unique style of covering sports events, reporting breaking news, and writing feature stories.

Prerequisite(s): COMM 303 or permission of instructor. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

COMM 372 - Sports and the Media

Credits: 3 (NR)
Examines the role of mass media in constructing images of athletes, sport, and sports culture. Critical attention is given to broadcast, print, and film of sport media. Assesses sociological and cultural issues that shape sport media and culture.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

COMM 373 - Business and Economic Journalism

Credits: 3 (NR)
Writing and reporting about business and the economy with focus on understanding financial news and reporting about companies, trade, and markets for print, broadcast, and online media. Students practice through in-class and out-of-class writing assignments.

Prerequisite(s): COMM 303. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
COMM 374 - Political Journalism

Credits: 3 (NR)
Writing and reporting about politics, elections and campaigns, and the legislative and executive branches of government for print, broadcast, and online media. Students practice the style and substance of covering political news through in-class and out-of-class writing assignments. A unique collaboration with C-SPAN including video conference opportunities with political and media personalities.

Prerequisite(s): COMM 303 or permission of instructor. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

COMM 375 - Mass Communication Advertising and Promotions

Credits: 3 (NR)
History, regulation, and ratings of advertising, as well as media buying, advertising campaigns, and strengths and weaknesses of media vehicles used in advertising.

Prerequisite(s): COMM 302, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

COMM 380 - Media Criticism

Credits: 3 (NR)
Examines practical criticism of a wide variety of media texts including television programs, newspapers, articles, films, photographs, and advertisements. Introduces principles of major contemporary modes of analysis for systematically interpreting visual and verbal forms of communication.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

COMM 389 - Public Relations for Associations and Nonprofits

Credits: 3 (NR)
Principles of editing and journalism applied to publications, public relations, and advertising needs within corporate environment. Job requirements of editorial positions in public relations, publications, and information as defined by trade associations, nonprofit organizations, and large corporations.

Prerequisite(s): 60 credits, or 3 credits of lower-division COMM courses.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
COMM 390 - Issues in Public Relations

Credits: 3 (NR)
Focuses on current issues in corporate, government, and nonprofit public relations.

Prerequisite(s): COMM 330.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

COMM 391 - Writing for Public Relations

Credits: 3 (NR)
Focuses on public relations writing including news releases, client memos, broadcasting, speeches, brochures, journals, and advertisements. Includes writing styles, formats, organization, and writing research.

Prerequisite(s): COMM 303.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

COMM 392 - Public Relations Study Abroad

Credits: 3 (NR)
Concentrated survey course in public relations for business, trade associations, nonprofit organizations, and governmental institutions from the perspective of a location abroad. Emphasis placed on the global and intercultural aspects of public relations.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

COMM 397 - Special Topics in Production

Credits: 1-3 (RT)
Provides hands-on media production experience. Topics vary.

Notes: May be repeated for credit when topic is different.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0

COMM 398 - Research Practicum in Communication

Credits: 1-3 (RD)
Work individually with a faculty member on a faculty research project. Requires readings in research methods and topic area and
COMM 398 - Internship in Communication
Prerequisite(s): 60 credits including at least 9 hours of COMM credit toward the major; minimum GPA of 2.5 overall and 3.0 in the major; approval of department.
Notes: Students must submit an application for COMM 398 at least one week prior to the beginning of the semester. May be repeated for a maximum of 6 credits.
Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 1-12

COMM 399 - Special Topics in Communication
Credits: 1-3 (RT)
Topics vary; some require laboratories.
Prerequisite(s): Permission of instructor.
Notes: May be repeated for credit when topic is different.
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

COMM 400 - Research Methods in Communication
Credits: 3 (NR)
Explores applications for primary research methodologies used in communication. Research project with focus on survey, critical ethnographic, or experimental methodologies.
Prerequisite(s): COMM 200 and two of COMM 300, 301, 302, 305 each one with a minimum grade of 2.00 (C). Prerequisite enforced by registration system.
Notes: Students may not receive credit for both COMM 400 and COMM 490.
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

COMM 401 - Interpersonal Communication in the Workplace
Credits: 3 (NR)
Comprehensive study of theories and research associated with dynamics of interpersonal relationships in the workplace. Emphasizes individual motivation, interpersonal needs, communication styles, leadership, problem solving, decision making, diversity, interpersonal conflict, individual adaptation to organizational change, and influence of technology on workplace relationships.
Prerequisite(s): COMM 301, or permission of instructor.
COMM 411 - Public Relations Practicum

Credits: 3 (NR)
Helps communication majors apply their public relations education. Covers three general areas: public relations theory and applications, writing and editing, and networking/story placement. Includes public relations strategy and tactics, interviewing and analysis, writing and message delivery.

Prerequisite(s): COMM 330.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

COMM 412 - Politics and the Mass Media

Credits: 3 (NR)
Covers responsibilities; freedoms of mass media in a democracy; and media influence on citizens' opinions, elections, and decisions of public officials.

Equivalent to GOVT 412

Prerequisite(s): GOVT 103, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

COMM 420 - Senior Seminar in Theories of Communicative Interaction

Credits: 3 (NR)
Explores primary theories explaining human communicative behavior, including traditional rhetorical, contemporary social science, critical, and mass communication.

Prerequisite(s): 3 credits of 100 or 200-level COMM courses or 60 credits; grade of C or better in COMM 200.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

COMM 425 - Honors Seminar in Communication

Credits: 3 (NR)
Examines foundations, connectedness, and applications of numerous communication theories across the discipline.
COMM 430 - Persuasion

Credits: 3 (NR)
Theories of persuasive communication including traditional and contemporary attitudinal change; relationship among speaker, message, and audience; and relationship between attitudinal and behavioral change.

Prerequisite(s): COMM 230 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

COMM 431 - Information Technology and the Political Process

Credits: 3 (NR)
Studies impact of information network of wire and wireless communications and computers on political process in advanced industrial countries.

Prerequisite(s): 60 credits or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

COMM 432 - Political Communication

Credits: 3 (NR)
Studies how political communication shapes development of "political reality." Examines interactions between media and politics with respect to the ways communication functions in political settings.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

COMM 433 - Environmental Communication

Credits: 3 (NR)
Rhetoric and persuasion about environmental issues in contemporary society. Investigation of case studies in corporate, institutional, and movement attempts to mobilize and cope with ecological concerns. Critical assessment of public communication is emphasized.
**COMM 434 - Interviewing**

Credits: 3 (NR)
Theory, principles, and practical skills essential to interview process. Emphasizes information gathering, journalistic, persuasive, employment, and performance-appraisal interviews.

**Prerequisite(s):** 60 credits or permission of instructor

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0

**COMM 435 - Digital Communication**

Credits: 3 (NR)
Offers practical application, skill development, and theoretical and critical assessment of mediated communication, including digital networking and social media. Discusses and engages with digital communication in terms of culture and language, functional and dysfunctional communication, social interaction, critical perspectives and ideology, copyright, freedom, ethics and responsibility, and images of the future.

**Prerequisite(s):** 60 credits.

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0
**When Offered:** Fall, Spring

**COMM 440 - Special Occasion Speaking**

Credits: 3 (NR)
Provides students with the opportunities to develop speaking skills for a variety of contexts from eulogies to commencement speeches.

**Prerequisite(s):** 90+ hours or permission of instructor.

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0

**COMM 450 - Internship in Communication**

Credits: 3 (RD)
On-the-job training in communication through approved field work study programs. Internships arranged and supervised by Department of Communication through internship coordinator. Related class work in resume preparation and job interviewing.

**Prerequisite(s):** 75 credits, major or minor in communication, electronic journalism or sports communication, 15 credits in COMM for majors, 12 credits for non-COMM majors, and permission of department.
Notes: See department for the application process. May be repeated for a maximum of 6 credits.

**Hours of Lecture or Seminar per week:** 1  
**Hours of Lab or Studio per week:** 0  
**Grading:** Undergraduate Special

**COMM 451 - Facilitating Communication Education**

Credits: 3 (NR)  
Theory and practice in facilitating learning of communication principles and skills. Students work as instructor aides in lower-division classes under supervision of faculty member. Activities include facilitating small-group activities and individually critiquing oral performances.

**Hours of Lecture or Seminar per week:** 1  
**Hours of Lab or Studio per week:** 0

**COMM 452 - Media Production Practicum**

Credits: 3 (RD)  
Theory and practice in creation, distribution, and response to media productions. Students complete minimum 150 hours of work as assistants to engineers, producers, directors, and organizers of media production facilities on campus, under supervision of faculty members. Activities include working on telecourses, public relations videos, and multimedia projects; aiding in creating in-house productions for departments; and working as cable caster for master control campus operations.

**Prerequisite(s):** COMM 303, 348, or 355.

**Notes:** May be repeated for a maximum of 6 credits.

**Hours of Lecture or Seminar per week:** 1  
**Hours of Lab or Studio per week:** 0

**COMM 453 - Multimedia Journalism**

Credits: 3 (NR)  
Applies concepts of advanced visual storytelling within today's fluid media landscape. Students report and tell compelling stories across multiple platforms using simple, portable equipment and software essential to reporters working in the contemporary converged newsroom. Highlights a multimedia approach to journalism to include broadcast, mobile reporting skills and backpack journalism techniques.

**Prerequisite(s):** COMM 303. COMM 353 is recommended but not required.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0
**COMM 454 - Free Speech and Ethics**

Credits: 3 (NR)
Major issues surrounding roles of speech, press, and electronic media in society. Includes history of free speech and press issues in society, government role in regulating marketplace of ideas, and responsibility of individual in free society.

Fulfills Mason Core requirement in synthesis.

Prerequisite(s): COMM 300, 302; or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**COMM 455 - History of Print Journalism**

Credits: 3 (NR)
Development of print journalism, emphasizing interaction of technology, audience, and government intervention. Topics include birth of press, development of modern newspaper, and American development including Revolutionary and Civil wars, rise of independent press, and yellow journalism.

Equivalent to HIST 455

Prerequisite(s): 3 credits in COMM or HIST courses.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**COMM 456 - Comparative Mass Media**

Credits: 3 (NR)
Survey of major foreign mass media systems as they compare with American system. Focuses on broad dimensions of international mass media and describes issues facing global journalism and media systems. Provides substantive framework to critically evaluate various national media systems.

Fulfills Mason Core requirement in global understanding.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**COMM 465 - Topics in Communication and Gender**

Credits: 3 (RT)
Topics may include gender and culture, women as rhetors, male and female communication, and communication and gender roles. Examines specific interests, ideally in seminar setting.

Notes: May be repeated for credit when topic is different with permission of department.
COMM 469 - Structure of the Telecommunications Industry

Credits: 3 (NR)
Explores complex interrelationships that affect modern telecommunications and how major mergers, acquisitions, regulatory decisions, congressional initiatives, or engineering breakthroughs can profoundly affect telecommunications industry at any given time.

Prerequisite(s): 90 credits or permission of instructor.

Notes: Serves as capstone seminar in telecommunications minor.

COMM 475 - Journalism Law

Credits: 3 (NR)
Examines law as it relates to working journalist. Topics include libel, invasion of privacy, free press and fair trial, First Amendment, broadcast regulation, access to media, advertising, and effect of new technologies on these issues. Uses case approach to study leading court decisions in mass media law.

Prerequisite(s): 60 credits or permission of instructor.

Comm 480 - College to Career: Strategies for Transition

Credits: 1 (NR)
Designed to assist soon-to-be graduates in the employment transition process. Fundamental to the course are effective communication skills, creative research, and the desire to actively and aggressively seek meaningful employment.

Prerequisite(s): 90+ credits or permission of instructor.

Comm 490 - Honors Research Methods in Communication
Credits: 3 (NR)
Honors version of COMM 400.

Prerequisite(s): Admission to honors in the major.

Notes: Students may not receive credit for both COMM 400 and 490.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

COMM 491 - Honors Research Project in Communication

Credits: 3 (RT)
Completion of independent honors research project under the guidance of the student's faculty sponsor.

Prerequisite(s): Completion of COMM 490 with minimum grade of 3.0 and approval of honors project prospectus.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

COMM 499 - Independent Study in Communication

Credits: 1-3 (RT)
Study of a selected area in communication. Independent study application must be processed before start of semester in which work is to take place.

Prerequisite(s): 75 credits and permission of department.

Notes: May be repeated for credit with permission of director of undergraduate program. Communication courses at the 500 level open to post-baccalaureate students or advanced undergraduates with permission of department.

Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 0

COMM 504 - Communication and Interpersonal Conflict

Credits: 3 (NR)
Focuses on interpersonal interactions, including dyadic and small-group levels in various settings such as friendships, marriage, family, and workplace. Examines factors that generate conflicts and communication strategies and skills that help shape conflict interaction toward productive ends.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
COMM 506 - Communication in International Organizations

Credits: 3 (NR)
Analyzes communication variables as they relate to organizational and managerial functions in international organizations. Topics include developing understanding of how cultural differences influence managerial activities and learning to deal effectively with differences.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

COMM 530 - Theories of Small Group Communication

Credits: 3 (NR)
Advanced-level theory and practice of small group interaction. Examines current research with a focus on learning applications of theories to relevant settings.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

COMM 590 - Seminar in Communication

Credits: 3 (RT)
Intensive study of specific topics; content varies.

Notes: May be repeated for credit when topic is different.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

COMM 600 - Introduction to Graduate Studies

Credits: 3 (NR)
Offers a broad introduction to the field of communication in terms of communication-based theories and research.

Prerequisite(s): Admission to graduate program in communication or permission of graduate program director.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

COMM 601 - Communication in Professional Relationships
Credits: 3 (NR)
Explores theoretical perspectives and relevant research to communication strategies and skills for various professional roles and situations. Relates theoretical foundations to practice, assessing theories and applications in individual professional fields.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

COMM 602 - Theories and Research of Mass Communication

Credits: 3 (NR)
Explores theories that have guided development of mass media. Emphasizes major scientific and humanistic approaches to mass media effects.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

COMM 604 - Communication Research Practicum

Credits: 3 (NR)
Helps communication master's students determine focus for program of study, thesis, and projects. Includes readings in applied communication research and exercises in topic selection, analysis.

Prerequisite(s): COMM 634 or permission of instructor

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

COMM 605 - Intercultural Communication

Credits: 3 (NR)
Analyzes communication variables related to communication across cultures. Topics include nonverbal communication, time conceptualizations, perceptions and attitudes, values, social organization patterns, cultural norms, language, ethics, conflict across cultures, and research in intercultural communication.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

COMM 615 - Political Communication

Credits: 3 (NR)
Analyzes how political communication messages and strategies shape the development of perceptions and behavior in US presidential elections. Examines the interactions between media content and political action in election campaigns.
COMM 620 - Health Communication

Credits: 3 (NR)
Examines interpersonal communicative processes associated with health in consumer-provider, family, and health communication campaign contexts. Focus on understanding cultural differences in perceptions of communication about health and disease.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

COMM 630 - Theories of Public Relations

Credits: 3 (NR)
Provides a survey of public relations theories and major ethical issues. Examines ways theories relate to organizations, mass and international communication research, rhetoric, persuasion, and social movements.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

COMM 631 - Approaches to Group Facilitation

Credits: 3 (NR)
Introduces various theoretical and practical approaches to group facilitation with in-depth focus and practice in one approach. Students participate in group sessions, analyze videotapes of decision-making groups, and practice methodologies for facilitating group interaction.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

COMM 632 - Persuasion Theory

Credits: 3 (NR)
Introduces students to the processes and effects of persuasive communication. Covers key theories of persuasion, behavior change, information processing, message effects, as well as important frameworks that guide the practice of persuasion in applied settings. Particular attention is paid to message features that generate predictable effects and how such effects may vary across different communicative situations.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
COMM 634 - Theories of Interpersonal Communication

Credits: 3 (NR)
Analyzes contemporary theories, concepts, and approaches to improving interpersonal communication. Examines interpersonal communication research.

Prerequisite(s): COMM 301 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

COMM 635 - Organizational Communication

Credits: 3 (NR)
Analyzes communication systems, processes in public and private organizations. Topics include conflict management, group decision making, interviewing, technical presentations, and using various channels for improving internal and external communication.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

COMM 636 - Communication Consulting

Credits: 3 (NR)
Investigates theories providing foundation for communication consulting. Provides theoretical information and mechanisms for application necessary to modify communicative behavior within organizations.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

COMM 637 - Risk Communication

Credits: 3 (NR)
Research on sharing information about physical hazards such as toxic waste, radiation, disease, injury, biohazards. Topics include communication concerning workplace safety, environmental problems, risk assessments, and scientific uncertainties.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

COMM 639 - Science Communication

Credits: 3 (NR)
Reviews research on best practices in science communication for scientists and communication professionals. Explores theory on conceptualizing science communication as disseminating knowledge, promoting informed decision making, involving citizens in
scientific research (i.e., citizen science), promoting legislative and individual actions, or creating entertainment. Students practice communicating complex science and designing contexts for public engagement with scientific research.

Prerequisite(s): Graduate Standing.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**COMM 640 - Controversies in Science Communication**

Credits: 3 (RD)  
Examines the communication implications related to selected current topics of scientific controversy.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**COMM 641 - Advanced Communication Skills for STEM**

Credits: 3 (NR)  
Examines the specific oral, written, and mediated communication competencies needed by STEM professionals in modern society.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**COMM 642 - Science and the Public**

Credits: 3 (NR)  
Examines the relationship between science and society, with a particular emphasis on the role of communication in shaping public opinion on issues related to science and technology.

Prerequisite(s): Graduate standing.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**COMM 644 - Analysis and Criticism of Science Journalism**

Credits: 3 (NR)  
Examines media coverage of technically complex topics in science, social science, environment, health and medicine, and technology. Explores the influence of institutional media practices on news about science and technology.

Prerequisite(s): Graduate standing.
Comm 650 - Research Methodologies in Communication

Credits: 3 (NR)
Introduces various research methods used by communication professionals. Focus on achieving understanding and knowledge of social scientific research, qualitative and quantitative, and critical analysis through use and application.

Prerequisite(s): Admission to graduate program in communication or permission of graduate program director.

Comm 653 - Graduate Seminar in Instructional Communication

Credits: 3 (NR)
Investigates theoretical and practical implications of instructional communication. Exposes graduate students to communication principles and practices of teaching college courses at upper and lower divisions.

Comm 655 - Theory and Practice of Digital Communication

Credits: 3 (NR)
Applies visual communication theory to the production of digital media. Emphasizes theories in nonfiction digital filmmaking, sound theory for audio production, and ethical and aesthetic topics in digital storytelling. Provides a community engaged learning component allowing students to partner with community organizations to produce digital media tools that address issues of social importance.

Comm 660 - Climate Change and Sustainability Communication Campaigns

Credits: 3 (NR)
Offers practical application, skill development, and theoretical basis of communication campaigns developed in response to global warming and other threats to sustainability. Focuses on purposive campaigns to promote changes in individual behavior and public policy.

Prerequisite(s): Graduate standing.
COMM 670 - Social Marketing
Credits: 3 (NR)
Offers conceptual overview of social marketing: marketing methods designed to influence people to behave in ways that benefit society. Develops skills necessary to conduct a social marketing initiative and provides an opportunity for practical application of those skills.
Designated a Green Leaf Course.

COMM 690 - Special Topics in Communication
Credits: 3 (RT)
Explores contemporary issues in communication theory, research, and practice.

Prerequisite(s): Graduate standing.

Notes: Topics vary. May be repeated for a maximum of 15 credits when topic is different.

COMM 694 - Communication Internship
Credits: 3 (NR)
Students work in approved, professional-level communication position, meeting regularly with internship supervisor from department. Requires paper, journal, minimum 60 hours work for each credit of enrollment. Students usually enroll in internships at end of program of study.

Prerequisite(s): 18 graduate credits and permission of department.

Grading: Graduate Special

COMM 696 - Directed Readings and Research
Credits: 1-3 (RT)
Reading and research on specific topic under direction of faculty member. Written report required; oral or written exam may be
required.

**Prerequisite(s):** Permission of department.

**Notes:** May be repeated for a maximum 6 credits.

**Hours of Lecture or Seminar per week:** 1-12
**Hours of Lab or Studio per week:** 0
**Grading:** Graduate Special

**COMM 697 - Independent Production**

Credits: 1-3 (NR)
Media or creative production activities under direction of faculty member. Requires completed production; written report, oral exam may be required.

**Prerequisite(s):** Permission of department.

**Notes:** May be repeated for maximum 6 credits.

**Hours of Lecture or Seminar per week:** 1-4
**Hours of Lab or Studio per week:** 0
**Grading:** Graduate Special

**COMM 700 - Building Social Science Theory**

Credits: 3 (NR)
Explores the process of developing and testing social science theories. Emphasizes the components and mechanisms of theory - such as variables and causality - in a manner intended to inform rigorous social science inquiry using quantitative or qualitative methods.

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0

**COMM 705 - Intercultural Health and Risk Communication**

Credits: 3 (NR)
Examines intercultural health and risk communication interventions; including health communication campaigns, public relations and advertising for health organizations, and how the media and Internet present health information.

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0

**COMM 706 - Strategic Communication**
Examines commonalities of strategic communication campaigns across fields (e.g., military, diplomacy, health, politics, marketing, public relations) in order to understand strategic communication, compare fields, and emphasize strategic and evaluative research across fields.

**Prerequisite(s):** COMM 630 or permission of the instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**COMM 716 - International Public Relations**

Credits: 3 (NR)  
Provides a survey of international public relations with an emphasis in three areas: applied knowledge for actual international practice, relevant theory, and ethical issues.

Equivalent to COMM 806 (2013-2014 Catalog).

**Prerequisite(s):** COMM 706 or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**COMM 720 - Consumer-Provider Health Communication**

Credits: 3 (NR)  
Explores relational health communication research and practice. Examines the role of interpersonal communication in health care delivery, health promotion, disease prevention, risk communication, and promoting personal and psychosocial well being.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**COMM 721 - E-Health Communication**

Credits: 3 (NR)  
Explores the use of computer-mediated communication technologies in health care and health promotion, including examination of technology in health information dissemination, health education, health communication interventions, and the management of health care delivery.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**COMM 725 - Qualitative Methods**
Credits: 3 (NR)
Examines qualitative research in communication. Emphasis is placed on techniques of naturalistic inquiry such as observation, interviewing, focus group methods, and ethnography, as well as tools for analyzing and reporting qualitative data.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**COMM 735 - Crisis Communication**

Credits: 3 (NR)
Examines crisis communication contexts with a particular emphasis on the role of communication in a variety of crises and how the media and Internet present crisis information to the public.

**Prerequisite(s):** Permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**COMM 750 - Research Methods II**

Credits: 3 (NR)
Extends basic research knowledge and skills learned in COMM 650 Research Methods I. Students will be taught to analyze and synthesize literature, develop theoretical linkages, and construct measurement scales.

**Prerequisite(s):** COMM 650.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**COMM 775 - Media Content Analysis**

Credits: 3 (NR)
Introduces content analysis, a research technique for making replicable and valid inferences about text in sources such as news articles, advertisements, and television programs. Students design and conduct research using content analysis techniques.

Equivalent to COMM 675 (2012-2013 Catalog).

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**COMM 798 - Communication Studies Project**

Credits: 3 (NR)
Final research seminar for all MA in communication students. Students discuss practical and theoretical issues related to project
or thesis. Includes readings related to underlying theoretical, methodological, and ethical issues facing contemporary communication researchers and practitioners.

**Prerequisite(s):** COMM 600 and COMM 650.

**COMM 799 - Master's Thesis**

Credits: 1-6 (RD)
Original research endeavor related to student's concentration in communication under supervision of faculty committee.

**Prerequisite(s):** 24 graduate credits and approval of thesis proposal by faculty committee.

**Hours of Lecture or Seminar per week:** 1-9
**Hours of Lab or Studio per week:** 0
**Grading:** Satisfactory/No credit only

**COMM 800 - Studies for the Doctor of Philosophy in Education**

Credits: 3-6 (NR)
Program of studies designed by student's discipline director and approved by doctoral committee. Students participate in research activity of discipline director and write paper reporting original contributions.

**Notes:** May be repeated.

**Hours of Lecture or Seminar per week:** 3-6
**Hours of Lab or Studio per week:** 3-6
**Grading:** Graduate Special

**COMM 820 - Health Communication Campaigns**

Credits: 3 (NR)
Explores use of communication campaigns to promote health and reduce health risks; examines how health communication campaigns are designed, implemented, and evaluated; and describes the role of communication research throughout the campaign process.

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0

**COMM 890 - Special Topics in Communication**
Credits: 3 (RD)
Selected topics reflecting specialized areas in communication.

Prerequisite(s): PhD rank or permission of instructor.

Notes: Topics vary. May be repeated for credit when topic is different.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

COMM 896 - Independent Study

Credits: 3 (RD)
Independent reading on a topic agreed on by student and faculty member.

Prerequisite(s): PhD rank or permission of instructor.

Notes: Content varies. May be repeated.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

COMM 998 - Doctoral Dissertation Proposal

Credits: 1-6 (RD)
Development of a research proposal that constitutes the basis for a doctoral dissertation.

Prerequisite(s): Approval of program director.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0
Grading: S/NS

COMM 999 - Doctoral Dissertation Research

Credits: 1-15 (RD)
Research on an approved dissertation topic under the direction of dissertation committee.

Prerequisite(s): Completion of COMM 998.

Notes: May be repeated. No more than 18 credits of COMM 998 and 999 may be applied to doctoral degree requirements.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0
Grading: S/NC
Comparative Literature (CL)

Offered by the College of Humanities and Social Sciences

CL 300 - Introduction to Comparative Literature

Credits: 3 (NR)
Introduces methods of comparative literature through study, in translation, of selected theme or motif as it appears in various periods, genres, or national literatures. Readings drawn from English, American, or European literature; on occasion, non-Western literature featured.

Prerequisite(s): 60 credits.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CL 514 - Theories of Comparative Literature

Credits: 3 (NR)
Intensive study of major theories of comparative literature, with special emphasis on international movements and characteristic themes. Students work with texts in foreign language of their concentration; other texts studied in translation.

Prerequisite(s): CL 300 and 90 credits, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

Computational and Data Sciences (CDS)

Offered by the College of Science

CDS 101 - Introduction to Computational and Data Sciences

Credits: 3 (NR)
Introduction to the use of computers in scientific discovery through simulations and data analysis. Covers historical development and current trends in the field.

Fulfills Mason Core requirement in natural science (lab).

Prerequisite(s): Appropriate score on the math placement test.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
CDS 102 - Introduction to Computational and Data Sciences Lab

Credits: 1 (NR)
Experiments in computational and data sciences explore the connections between on-going advances in the natural sciences and the rapid advances in computing and data handling. Lab exercises demonstrate the use of computers in analyzing data, in modeling science problems, and in creating numerical simulations across the science disciplines.

Fulfills Mason Core requirement in natural science (lab).

Prerequisite(s): CDS 101

Corequisite(s): CDS 101

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 3
When Offered: Fall

CDS 130 - Computing for Scientists

Credits: 3 (NR)
Covers use of computers to solve practical scientific problems. Topics include creating effective scientific presentations, analysis of experimental data, online literature, data/information ethics, scientific modeling, and communication/collaboration tools. Designed to equip students with the knowledge and confidence they need to use future hardware and software systems both as students and throughout their scientific careers.

Fulfills Mason Core requirement in information technology (all).

Prerequisite(s): Passing score on the math placement test for MATH 110 or MATH 113.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CDS 151 - Data Ethics in an Information Society

Credits: 1 (NR)
Examination of ethical issues related to access and use of information and data in the Internet age, for the general student, with special emphasis on ethical issues that apply to the proper use and interpretation of scientific and technical information.

Fulfills Mason Core requirement in information technology (ethics only).

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0

CDS 251 - Introduction to Scientific Programming
Focuses on elements of programming using the Fortran language and selected elements of the C language with emphasis on the aspects used in the computational and data sciences. Conducted through a combination of lecture and interactive computer laboratory.

Equivalent to CDS 351 (2011-2012 Catalog)

Prerequisite(s): CDS 130.

Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0  
When Offered: Fall, Summer.

CDS 290 - Topics in Computational and Data Sciences

Credits: 1-4 (RD)  
Selected topics in Computational and Data Sciences. May be accepted for credit by CDS majors and CDS minors.

Hours of Lecture or Seminar per week: 1-4  
Hours of Lab or Studio per week: 0

CDS 301 - Scientific Information and Data Visualization

Credits: 3 (NR)  
The techniques and software used to visualize scientific simulations, complex information, and data visualization for knowledge discovery. Includes examples and exercises to help students develop their understanding of the role visualization plays in computational science and provides a foundation for applications in their careers.

Prerequisite(s): CDS 101 or CDS 130.

Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0

CDS 302 - Scientific Data and Databases

Credits: 3 (NR)  
Data and databases used by scientists. Includes basics about database organization, queries, and distributed data systems. Student exercises will include queries of existing systems, along with basic design of simple database systems.

Fulfills writing intensive requirement in the major.

Prerequisite(s): CDS 101 or CDS 130; STAT 344 or permission of instructor.

Notes: This course meets the writing-intensive requirement for the CDS Major.

Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0
CDS 401 - Scientific Data Mining

Credits: 3 (NR)
Data mining techniques from statistics, machine learning, and visualization to scientific knowledge discovery. Students will be given a set of case studies and projects to test their understanding of this field and provide a foundation for future applications in their careers.

Prerequisite(s): CDS 302.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CDS 410 - Numerical Analysis II

Credits: 3 (NR)
Numerical differentiation and integration, initial-value and boundary-value problems for ordinary differential equations, methods of solution of partial differential equations, iterative methods of solution of nonlinear systems, and approximation theory.

Equivalent to MATH 447

Prerequisite(s): MATH 214 or 216, and 446.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CDS 411 - Modeling and Simulation

Credits: 3 (NR)
Covers the application of modeling and simulation methods to various scientific applications, including fluid dynamics, solid mechanics, materials science, molecular mechanics, and astrophysics. Provides an introduction to modeling and simulation software, as well as high-performance computing.

Prerequisite(s): MATH 446, PHYS 262 or PHYS 245, and a 200- or higher-level computational methods course, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CDS 421 - Introduction to Computational Fluid Dynamics

Credits: 3 (NR)
Covers the governing equations of fluid dynamics; numerical discretization of the governing equations and popular techniques for solving flow problems; applications of CFD to some classic fluid dynamics problems; and setting up the CFD simulation using a CFD software package. Students will understand the process of developing a geometrical model of the flow, applying
appropriate boundary conditions, specifying solution parameters, and visualizing the results. Students are expected to complete several computer projects, including writing their own CFD computer program to analyze simple fluid flow problems, as well as setting up the CFD simulation using a CFD software package.

**Prerequisite(s):** MATH 446, proficiency in at least one computer programming language and computer operating system, or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

### CDS 461 - N-Body Simulation Methods

Credits: 3 (NR)  
Covers particle methods to solve variety of physical systems. Emphasizes study and development of numerical results and visualization of these results in complex physical systems. Applications and projects include stellar and galaxy dynamics, smoothed particle hydrodynamics, plasma simulations, and semiconductor device theory algorithms on parallel and vectorized systems.

**Prerequisite(s):** MATH 203 MATH 213 CS 211.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

### CDS 486 - Topics in Computational and Data Sciences

Credits: 3 (RD)  
Covers selected topics in computational and data sciences not covered in fixed content courses.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

### CDS 487 - Electronic Structure Computations

Credits: 3 (NR)  
Covers computational aspects of materials science, such as first-principles methods of electronic structure calculations of periodic solids, clusters, and molecules, as well as the use of empirical potentials. Examples will be drawn from metals, insulators, and semiconductors. Students will construct simple codes and be guided in the use of the more sophisticated available computational packages.

**Prerequisite(s):** PHYS 308 or PHYS 402.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

### CDS 490 - Directed Study and Research
Credits: 1-3 (RD)
Students work under the guidance of a faculty member on an independent study or directed research project in the computational and data sciences. May be repeated in combination with CDS 491 for a total of 6 credits between the two classes.

Prerequisite(s): Students must be CDS majors or minors in their junior or senior year and have permission of the instructor.

Hours of Lecture or Seminar per week: 1-12
Hours of Lab or Studio per week: 0

CDS 491 - Internship

Credits: 1-3 (RD)
On-the-job experience for CDS majors and minors working in industry and government laboratories, including summer programs. Supervision and approval of this course must be arranged with department before registering. May be repeated in combination with CDS 490 for a total of 6 credits between the two classes.

Prerequisite(s): Students must be CDS majors or minors in their junior or senior year and have permission of the instructor.

Hours of Lecture or Seminar per week: 1-9
Hours of Lab or Studio per week: 0

Computational Sciences and Informatics (CSI)

Offered by the College of Science

CSI 500 - Computational Science Tools

Credits: 3 (NR)
Introduces computer skills and packages commonly used in quantitative scientific research.

Prerequisite(s): 1 year of college calculus, knowledge of matrix algebra, and computer programming.

Notes: CSI 601 and CSI 602, including additional material, have merged to create CSI 500.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

CSI 501 - Introduction to Scientific Programming

Credits: 3 (NR)
Introduces and reviews programming in C and FORTRAN with emphasis on the aspects used in the computational and data sciences. Conducted through a combination of both lecture and interactive computer laboratory.

Prerequisite(s): Permission of instructor
CSI 597 - Topics in Science and Engineering Simulation

Credits: 3 (NR)
Covers selected topics in Science and Engineering simulation, not covered in fixed content computational sciences and informatics courses.

Prerequisite(s): Permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CSI 600 - Quantitative Foundations for Computational Sciences

Credits: 3 (NR)
Accelerated review of mathematical tools for scientific applications and analysis. Topics include vectors and matrices; differential and difference equations; linear systems; Fourier, Laplace, and Z-transforms; and probability theory.

Equivalent to SYST 500

Prerequisite(s): MATH 213 and 214.

Notes: Not applicable to 48-credit course total for CSI PhD.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CSI 615 - Quantum Computation

Credits: 3 (NR)
Introduces field of quantum computation. Emphasizes scientific principles involved and presentation of strengths and weaknesses of approach. Topics include basic quantum physics and quantum algorithms.

Prerequisite(s): Undergraduate course in quantum physics, and undergraduate degree in physical or computer sciences, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CSI 629 - Topics in Continuum Systems
Covers selected topics in the computational aspects of continuum systems not covered in fixed-content courses in dynamical systems. Possible topics are smooth-particle hydrodynamics, radiation hydrodynamics, algorithms for continuum systems, adaptive grids for continuum computations, spectral methods in computational fluid dynamics, algorithms for concurrent machines, formation of high energy particle jets in astrophysical applications, application to Earth atmospheric problems, and flow considerations in molten materials.

Equivalent to CSI 729 (2013-2014 Catalog).

**Prerequisite(s):** Permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**CSI 638 - The Policy Process for Scientists**

Credits: 2 (NR)  
Introduces relationship among government, science, scientists, and issues and processes that shape science policy. Emphasizes examples taken from space weather and meteorology.

**Prerequisite(s):** Graduate standing.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**CSI 639 - Ethics in Scientific Research**

Credits: 3 (NR)  
Reviews purpose of scientific research and principles for evaluating ethical issues. Teaches skills for survival through training in moral reasoning and responsible conduct. Discusses ethical issues and applying critical-thinking skills to design, execution, and analysis of experiments. Issues include using animals, humans in research; ethical standards in computer community; research fraud; and currently accepted guidelines for data ownership, manuscript preparation, and conduct of those in authority.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**CSI 654 - Data and Data Systems in the Physical Sciences**

Credits: 3 (NR)  
Introduces data issues associated with modern physical sciences. Examines data access, formats, browsing, analysis, visualization, and data information systems in federated environments. Uses examples from physical sciences, including astronomy and space sciences; Earth sciences; Earth observing and other fields of physics; and model output data and associated special issues. Introduces mathematical techniques particularly important for large databases.

**Prerequisite(s):** Competency in programming at CSI 601-607 level, or permission of instructor.
CSI 655 - Atmospheric Physics I

Credits: 3 (NR)
Introduction to basic physical and chemical processes that operate in the Earth's atmosphere. Emphasis on those concepts that provide a global description of the current atmospheric state and those processes that relate to global change and atmospheric evolution. Topics include equilibrium structure, radiative transfer models, thermodynamics of various atmospheric layers, and the various processes defining these layers.

Equivalent to PHYS 575

Prerequisite(s): PHYS 260, 262, and 305, or equivalent.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CSI 659 - Dispersal Methods of Hazardous Releases

Credits: 3 (NR)
Covers physics of aerosols; engineering, mechanics of building ventilation systems; and mechanical dissemination utilizing handheld, automatic, vehicle, and truck mounted systems. Also discusses basic concepts, theories, and models of pollutant dispersal in atmosphere, and related atmospheric systems affecting dispersal of biological agents.

Prerequisite(s): CSI 655, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CSI 660 - Space Instrumentation and Exploration

Credits: 3 (NR)
Surveys instruments, devices, and methods for space and planetary exploration. Covers remote sensing of Earth and other solar system bodies and planned manned and unmanned missions by the United States and other countries.

Equivalent to ASTR 535

Prerequisite(s): PHYS 262, MATH 213, or equivalent; or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CSI 661 - Stellar Astrophysics
Credits: 3 (NR)
Survey of contemporary astrophysics. Topics include physical concepts, stellar spectra, Hertzsprung-Russell diagram, stellar atmospheres, stellar structure, interstellar matter, stellar evolution, high-energy phenomena, hydrodynamical processes in astrophysics, accretion disk formation, and shock formation.

Equivalent to ASTR 730, ASTR 530 (2010-2011)

Prerequisite(s): PHYS 303, 305, 308; MATH 214.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CSI 662 - Introduction to Space Weather

Credits: 3 (NR)
Introduction to space weather involving systems such as the sun, the heliosphere, and the Earth's magnetosphere and ionosphere. Covers the solar magnetic field, solar flares, coronal mass ejections, particle acceleration mechanisms, the solar wind, and the Earth's magnetic field, radiation belt, geomagnetic storms, and ionospheric disturbances.

Prerequisite(s): PHYS 303, 305, 307, and MATH 213, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CSI 670 - Economic Systems Design

Credits: 3 (NR)
Introduces analytical and engineering principles used to develop exchange systems. Covers behavioral aspects of auction systems; matching, assignment, and transportation problems; and information markets. Introduces methods for testbedding systems using experimental economics.

Prerequisite(s): Course in linear and nonlinear optimization, and course in linear algebra; or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CSI 672 - Statistical Inference

Credits: 3 (NR)
Covers critical aspects of probability, random variables and distributions, characteristic functions, stochastic convergence, optimal estimation, maximum-likelihood estimation, asymptotic theory, Bayesian methods, likelihood-ratio tests, statistical decision theory, sequential methods.

Equivalent to STAT 652

Prerequisite(s): STAT 544 with grade of B- or better, and STAT 554 with grade of B- or better. Prerequisite enforced by registration system.
CSI 674 - Bayesian Inference and Decision Theory

Credits: 3 (NR)
Introduces decision theory and relationship to Bayesian statistical inference. Teaches commonalities, differences between Bayesian and frequentist approaches to statistical inference, how to approach a statistics problem from the Bayesian perspective and how to combine data with informed expert judgment in a sound way to derive useful and policy-relevant conclusions. Teaches necessary theory to develop firm understanding of when and how to apply Bayesian and frequentist methods, and practical procedures for inference, hypothesis testing, and developing statistical models for phenomena. Teaches fundamentals of Bayesian theory of inference, including probability as a representation for degrees of belief, likelihood principle, use of Bayes Rule to revise beliefs based on evidence, conjugate prior distributions for common statistical models, and methods for approximating the posterior distribution. Introduces graphical models for constructing complex probability and decision models from modular components.

Equivalent to STAT 664/SYST 664

Prerequisite(s): STAT 544 or CSI 672, or equivalent.

CSI 676 - Regression Analysis

Credits: 3 (NR)
Simple and multiple linear regression, polynomial regression, general linear models, subset selection, step-wise regression, and model selection. Also covered are multicollinearity, diagnostics, and model building. Both the theory and practice of regression analysis are covered.

Equivalent to STAT 656

Prerequisite(s): STAT 554, matrix algebra and working knowledge of SAS. Prerequisite enforced by registration system.

CSI 678 - Times Series Analysis and Forecasting

Credits: 3 (NR)
Modeling stationary and nonstationary processes; autoregressive, moving average and mixed model processes; hidden periodicity models; properties of models; autocovariance and autocorrelation functions, and partial autocorrelation function; spectral density functions; identification of models; estimation of model parameters, and forecasting techniques.

Equivalent to STAT 658
Prerequisite(s): STAT 544 or CSI 672 or permission of instructor. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CSI 685 - Fundamentals of Materials Science

Credits: 3 (NR)
Covers fundamentals of materials science with emphasis on physical topics including crystal structure and symmetry, dislocation theory, theory of interfaces, multicomponent phase diagrams, theory of phase transformations, nano-materials, metallic glasses. Includes a term project, assignments from current literature, and application of computation in materials science.

Equivalent to PHYS 615

Prerequisite(s): CDS 385/PHYS 385; or undergraduate degree in physics, chemistry, materials, electrical or mechanical engineering or related disciplines; or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CSI 687 - Solid State Physics and Applications

Credits: 3 (NR)
Covers crystal structures, binding, lattice vibrations, free electron model, metals, semiconductors and semiconductor devices, superconductivity, and magnetism.

Equivalent to PHYS 512

Prerequisite(s): PHYS 502 or equivalent.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CSI 690 - Numerical Methods

Credits: 3 (NR)
Covers computational techniques for solving science, engineering problems. Develops algorithms to treat typical problems in applications, emphasizing types of data encountered in practice. Covers theoretical development as well as implementation, efficiency, and accuracy issues in using algorithms and interpreting results. When applicable, uses computer graphical techniques to enhance interpretation.

Equivalent to MATH 685, OR 682; CSI 700 (2013-2014 Catalog).

Prerequisite(s): MATH 203 and 214 or equivalent, and some programming experience.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
CSI 695 - Scientific Databases

Credits: 3 (NR)
Study of database support for scientific data management. Covers requirements and properties of scientific databases, data models for statistical and scientific databases, semantic and object-oriented modeling of application domains, statistical database query languages and query optimization, advanced logic query languages, and case studies such as the human genome project and Earth-orbiting satellites.

Equivalent to CSI 710 (2013-2014 Catalog).

Prerequisite(s): INFS 614 or equivalent, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CSI 701 - Foundations of Computational Science

Credits: 3 (NR)
Covers mapping of mathematical models to computer software, including all aspects of developing scientific software such as architecture, data structures, advanced numerical algorithms, languages, documentation, optimization, validation, verification, and software reuse. Examples in bioinformatics, computational biology, computational physics, and global change demonstrate scientific advances enabled by computation. Class projects involve working in teams to develop software that implements mathematical models, using software to address important scientific questions, and conducting computational experiments with it.

Prerequisite(s): Competency in UNIX and programming at CSI 501 level, and CSI 690; or permission of instructor

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CSI 702 - High-Performance Computing

Credits: 3 (NR)
Hardware and software associated with high-performance scientific computing. Computer architectures, processor design, programming paradigms, parallel and vector algorithms. Emphasizes importance of software scalability in science problems.

Prerequisite(s): CSI 690 and CSI 701, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CSI 703 - Scientific and Statistical Visualization
Credits: 3 (NR)
Covers visualization methods used to provide new insights and intuition concerning measurements of natural phenomena and scientific and mathematical models. Presents case studies from myriad disciplines. Topics include human perception and cognition, introduction to graphics laboratory, elements of graphing data, representation of space-time and vector variables, representation of 3-D and higher dimensional data, dynamic graphical methods, and virtual reality. Work on a visualization project required. Emphasizes software tools on Silicon Graphics workstation, but other workstations and software may be used.

Prerequisite(s): STAT 554 or CS 551, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CSI 709 - Topics in Computational Sciences and Informatics

Credits: 3 (RT)
Covers selected topics in computational sciences and informatics not covered in fixed-content computational sciences and informatics courses.

Prerequisite(s): Admission to PhD program, and permission of instructor.

Notes: May be repeated for credit as needed.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CSI 711 - Chemical Thermodynamics and Kinetics

Credits: 3 (NR)
Advanced study of thermodynamics and kinetics. Covers application of kinetics to elucidation of reaction mechanisms and application of statistical thermodynamics to theory of elementary reaction rates.

Equivalent to CHEM 633

Prerequisite(s): CHEM 331 and 332.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CSI 712 - Introduction to Solid Surfaces

Credits: 3 (NR)
Includes gas absorption isotherms, surface-area measurement techniques, real and clean surfaces, physisorption and chemisorption, methods of gas absorption and desorption, measurement of heats of adsorption, desorption kinetics, electron spectroscopies and their surface sensitivities, instrumentation needed, and principles of vacuum technology.

Equivalent to CHEM 728
Prerequisite(s): CHEM 422 or equivalent. Introduces properties of solid surfaces.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CSI 713 - Quantum Chemistry

Credits: 3 (NR)
Illustrates fundamental concepts of quantum mechanics with applications to chemical systems, including atomic and molecular electronic structure and properties, molecular symmetry, and intermolecular forces.

Equivalent to CHEM 732

Prerequisite(s): CHEM 332.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CSI 714 - Spectroscopy and Structure

Credits: 3 (NR)
Covers quantum mechanics of the interaction of atoms and molecules with electromagnetic radiation. Also covers modern spectroscopic methods as applied to the elucidation of molecular structure and dynamics.

Prerequisite(s): CHEM 332.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CSI 715 - Quantum Complexity Theory

Credits: 3 (NR)
Discusses fundamental aspects of complexity theory and its applications from perspective of quantum physics. Explores current research in emerging field of quantum complexity theory and discusses related issues in quantum algorithms.

Prerequisite(s): CSI 615 or equivalent, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CSI 716 - Quantum Information Theory

Credits: 3 (NR)
Introduces quantum information theory and its practical applications to information processing and secure communications.
Emphasizes applications involving commercial and defense systems.

Prerequisite(s): CSI 615, and CSI 783 or 784; or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CSI 717 - Quantum Computer Programming

Credits: 3 (NR)
Covers methods for programming quantum computers. Topics include quantum computing concepts, currently known algorithms for quantum computers, denotational semantics, existing languages for quantum computers, application of logic programming to quantum computers, and programming for different types of novel computer architectures.

Prerequisite(s): CSI 615 or equivalent, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CSI 718 - Quantum Computer Realization

Credits: 3 (NR)
Introduces physical implementation of quantum computation and practical applications to developing scalable quantum computers. Special emphasis on various schemes for achieving practical quantum computers.

Prerequisite(s): CSI 615, and 784 or equivalent; or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CSI 719 - Topics in Computational Chemistry

Credits: 3 (RD)
Covers selected topics in computational chemistry not covered in fixed-content computational chemistry courses.

Prerequisite(s): Permission of instructor.

Notes: May be repeated for credit as needed.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CSI 720 - Fluid Mechanics
Covers basic and advanced fluid mechanics and continuous hypothesis to define fluids. Introduces tensor analysis; Euclidean and Lagrangian representations of fluid flow; Laplace's equation; continuity equation; Navier-Stokes equations; Bernoulli's theorem and Crocco's form of the equations; steady and unsteady flows; potential, incompressible, and compressible flows; gravity and sound waves; gas dynamics; and viscous flows.

Prerequisite(s): CSI 690 and CSI 780, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CSI 721 - Computational Fluid Dynamics I

Credits: 3 (NR)
Covers fundamentals including spatial and temporal approximation techniques for partial differential equations, solution of large systems of equations, data structures, solvers of the Laplace/ full potential equation, and simple Euler solvers. Includes two major projects: Laplace solver and 2-D Euler solver on unstructured grids. Students expected to write their own codes.

Prerequisite(s): Course in partial differential equations such as MATH 678 or equivalent; knowledge of linear algebra at level of MATH 603 or CSI 740/MATH 625; coding experience in FORTRAN or C; or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CSI 722 - Computational Fluid Dynamics II

Credits: 3 (NR)
Covers more advanced topics in computational fluid dynamics, including high-resolution schemes for hyperbolic PDEs, advanced Euler solvers, Navier-Stokes solvers, grid generation, adaptive mesh refinement, efficient use of supercomputing hardware, and future trends. Projects include topics in grid generation and adaptive refinement. Students expected to write their own codes.

Prerequisite(s): CSI 721 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CSI 723 - Fluid Mechanics II

Credits: 3 (NR)
Covers gas dynamics, shock waves, method of characteristics, boundary layer flows, instabilities, and turbulence modeling. Special topics include biological, non-Newtonian, and free surface flows; aeroelasticity; and magneto-hydrodynamics.

Prerequisite(s): CSI 720 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
CSI 739 - Topics in Bioinformatics

Credits: 3 (NR)
Selected topics in bioinformatics not covered in fixed-content bioinformatics courses.

Prerequisite(s): Permission of instructor.

Notes: May be repeated for credit as needed.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CSI 740 - Numerical Linear Algebra

Credits: 3 (NR)
Covers computational methods for matrix systems; theory and development of numerical algorithms for the solution of linear systems of equations, including direct and iterative methods; analysis of sensitivity of system to computer round off; and solution of least squares problems using orthogonal matrices. Also covers computation of eigenvalues and eigenvectors, singular value decomposition, and applications.

Equivalent to MATH 625

Prerequisite(s): MATH 203 and some programming experience.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CSI 742 - The Mathematics of the Finite Element Method

Credits: 3 (NR)
The finite element method is commonly used for developing numerical approximations to problems involving ordinary and partial differential equations. Course develops underlying mathematical foundation, examines specific types of finite elements, analyzes convergence rates and approximation properties, and uses method to solve important equations. Students develop their own codes and are expected to complete independent projects.

Prerequisite(s): MATH 446 or 685, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CSI 744 - Linear and Nonlinear Modeling in the Natural Sciences

Credits: 3 (NR)
Develops tools of mathematical modeling while carrying out numerical simulations. Considers examples from across the
sciences. Topics include basic issues such as models, simplification, linearity, and nonlinearity; dimensionless parameters; dimensional analysis; models involving differential equations; examples from population growth and chemical kinetics; models involving partial differential equations; diffusion, transport, nonlinearity and shocks; probabilistic modeling; perturbation methods; extrapolation; and introduction to stability.

**Prerequisite(s):** Permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**CSI 746 - Wavelet Theory**

Credits: 3 (NR)  
Studies theory and computational aspects of wavelets and wavelet transform. Emphasizes computational aspects of wavelets. Defines Fast Wavelet Transform in one and two dimensions and develops appropriate numerical algorithms and theory of wavelet bases on the real line. Covers multiresolution analysis, splines, time-frequency localization, and wavelet packets.

Equivalent to MATH 772

**Prerequisite(s):** Knowledge of convolution and Fourier transforms of sequences; some familiarity with Hilbert space theory helpful but not required; knowledge of scientific programming language.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**CSI 747 - Nonlinear Optimization and Applications**

Credits: 3 (NR)  
Introduction to practical aspects of nonlinear optimization. Covers applications of optimization algorithms to solving problems in science and engineering. Applications include data analysis, materials science, nanotechnology, mechanics, optical design, shape design, and trajectory optimization.

**Prerequisite(s):** MATH 213 and 216, or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**CSI 749 - Topics in Computational Mathematics**

Credits: 3 (NR)  
Selected topics in computational mathematics not covered in fixed-content computational mathematics courses.

**Prerequisite(s):** Permission of instructor.

**Notes:** May be repeated for credit as needed.
CSI 750 - Earth Systems and Global Changes

Credits: 3 (NR)
Introduces global system interactions responsible for global environmental change. Discusses natural causes of past and present global changes, and how human activities affect them; and ecological and human consequences of global changes. Topics include climate and hydrological systems, global warming, deforestation, ozone depletion, ecological system dynamics, introduction to climate and global change monitoring, satellite instrumentation and calibration, and model predictions.

Prerequisite(s): Course in ecology, environmental geology, or atmospheric physics; or permission of instructor.

CSI 754 - Earth Science Data and Advanced Data Analysis

Credits: 3 (NR)
Covers accessing and applying Earth observations and remote-sensing data for Earth system science research and applications. Major topics are data formats, analysis and visualization tools, advanced data analysis methods, and data applications. Also covers combining innovative information technology techniques and Earth science data to set up online data centers for accessing data through the web.

Prerequisite(s): GGS 579 or permission of instructor.

CSI 757 - Techniques and Algorithms in Earth Observing and Remote Sensing

Credits: 3 (NR)
Covers retrieval, analysis, and application of geophysical parameters derived from remotely sensed data for Earth system research and applications. Includes theory of visible and infrared and microwave remote sensing, heritage sensors, sensor calibration, retrieval algorithms, validation, and error estimates.

Equivalent to GGS 757

Prerequisite(s): CSI 753 or permission of instructor.

CSI 758 - Visualization and Modeling of Complex Systems
Credits: 3 (NR)
Covers elements of modeling and analysis of Earth and space sciences data and systems. Concentrates on sample projects and student-initiated projects to use visualization and graphical analysis techniques as they apply to modeling of complex data sets and systems. Uses several different analysis and visualization packages. Spacecraft data sets from the Naval Research Laboratory (NRL) Backgrounds Data Center and other NRL data sets are available for course projects; perusal of web data sets also possible. Modeling and analysis accompanied by appropriate readings from current literature.

Prerequisite(s): Permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CSI 761 - N-Body Methods and Particle Simulations

Credits: 3 (NR)
Covers particle methods to solve variety of physical systems. Emphasizes study and development of numerical results and visualization of these results in complex physical systems. Applications and projects include stellar and galaxy dynamics, smoothed particle hydrodynamics, plasma simulations, and semiconductor device theory algorithms on parallel and vectorized systems.

Equivalent to ASTR 761

Prerequisite(s): PHYS 613, CSI 780 and CSI 700 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CSI 763 - Statistical Methods in Space Sciences

Credits: 3 (NR)
Covers statistical and data analysis methods applicable to problems in space science, remote sensing, and astrophysics. Includes parametric and nonparametric hypothesis testing, parameter estimation, correlation analysis, time series analysis, spatial analysis, and image reconstruction. Emphasizes imperfect nature of actual data sets and hypothesis. Examples drawn from current space science research.

Prerequisite(s): ASTR 530 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CSI 764 - Computational Astrophysics

Credits: 3 (NR)
Covers statistical mechanics concepts important in astrophysics. Presents unified approach to particle acceleration and interaction theory based on analytical and numerical analysis of Boltzmann and Liouville equations. Discusses computational methods relevant to particle transport problems, with emphasis on Fokker-planck and Monte Carlo solution techniques. Applications from space sciences include studies of cosmic ray acceleration, photon comptonization, particle transport in the near-Earth
environment, energy transport in stellar atmospheres, and self-gravitating system dynamics.

Equivalent to ASTR 764

**Prerequisite(s):** ASTR 530.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**CSI 765 - High-Energy and Accretion Astrophysics**

Credits: 3 (NR)  
Overview of atomic and nuclear physics. Covers nuclear reactions of use to high-energy astrophysics; radiation processes in cosmic plasmas, emphasizing quantum mechanical calculations; stellar evolution and nucleosynthesis; computational models of stellar evolution; binary stars and accretion disks; numerical models of the structure of accretion disks; compact stars, white dwarfs, neutron stars, and black holes; acceleration processes and cosmic rays; interstellar medium and propagation of cosmic rays; high-energy processes in the center of galaxies; and ground- and space-based techniques and observations.

Equivalent to ASTR 765

**Prerequisite(s):** PHYS 502, ASTR 530, and PHYS 613/CSI 780 or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**CSI 766 - Relativity and Cosmology**

Credits: 3 (NR)  
Covers special relativity, four-dimensional space-time, general relativity, non-Euclidean geometries, geodesic and field equations, test of general relativity theory, black holes, cosmic background radiation, thermodynamic considerations in cosmology, and cosmological models.

Equivalent to ASTR 766

**Prerequisite(s):** ASTR 530 and MATH 314, or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**CSI 769 - Topics in Space Sciences**

Credits: 3 (RD)  
Selected topics in space sciences not covered in fixed-content space sciences courses.

Equivalent to ASTR 769

**Prerequisite(s):** Permission of instructor.
Notes: May be repeated for credit as needed.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CSI 771 - Computational Statistics

Credits: 3 (NR)
Covers basic computationally intensive statistical methods and related methods, which would not be feasible without modern computational resources. Covers nonparametric density estimation including kernel methods, orthogonal series methods and multivariate methods, recursive methods, cross-validation, nonparametric regression, penalized smoothing splines, the jackknife and bootstrapping, computational aspects of exploratory methods including the grand tour, projection pursuit, alternating conditional expectations, and inverse regression methods.

Equivalent to STAT 751

Prerequisite(s): STAT 544, 554, and 652. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CSI 772 - Statistical Learning

Credits: 3 (NR)
Focuses on statistical learning theory by introducing the statistical and optimization background essential for developing new efficient statistical learning algorithms. Also discusses applications of statistical learning algorithms to the solution of important problems in many areas of science.

Equivalent to STAT 772.

Prerequisite(s): STAT 652 / CSI 672, or permission of instructor. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring.

CSI 773 - Statistical Graphics and Data Exploration

Credits: 3 (NR)
Exploratory data analysis provides a reliable alternative to classical statistical techniques, which are designed to be the best possible when stringent assumptions apply. Topics include graphical techniques such as scatter plots, box plots, parallel coordinate plots, and other graphical devices; re-expression and transformation of data; influence and leverage; and dimensionality reduction methods such as projection pursuit.

Equivalent to STAT 663
CSI 775 - Graphical Models for Inference and Decision Making

Credits: 3 (NR)
Theory and methods for inference and decision making in environments characterized by uncertain information. Covers graphical probability and decision models. Studies approaches to representing knowledge about uncertain phenomena, and planning and acting under uncertainty. Topics include knowledge engineering, exact and approximate inference in graphical models, learning in graphical models, temporal reasoning, planning, and decision-making. Practical model-building experience provided. Students apply what they learn to a project of their own choosing.

Equivalent to OR 719/STAT 719

Prerequisite(s): STAT 652 or 664, or permission of instructor.

CSI 776 - Stochastic Differential Equations

Credits: 3 (NR)
Introduces modern theory of stochastic calculus. Covers stochastic integrals, martingales, counting processes, diffusion processes, and Ito-type processes in general. Considers applications of these methods to engineering, biology, and economics.

Prerequisite(s): STAT 652, ECE 630 or ECE 632 or permission of instructor.

CSI 777 - Principles of Knowledge Mining

Credits: 3 (NR)
Principles and methods for synthesizing task-oriented knowledge from computer data and prior knowledge and presenting it in human-oriented forms such as symbolic descriptions, natural language-like representations, and graphical forms. Topics include fundamental concepts of knowledge mining; methods for target data generation and optimization; statistical and symbolic approaches; knowledge representation and visualization; and new developments such as inductive databases, knowledge generation languages, and knowledge scouts.

Prerequisite(s): INFS 614 or equivalent, or permission of instructor.
CSI 779 - Topics in Computational Statistics

Credits: 3 (RT)
Selected topics in computational statistics not covered in fixed-content computational statistics courses.

Prerequisite(s): Permission of instructor.

Notes: May be repeated for credit as needed.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CSI 780 - Computational Physics and Applications

Credits: 3 (NR)
Applies numerical methods to study of variety of physical systems, with emphasis on modeling and simulation. Develops numerical algorithms and simulation codes to gain understanding of mechanisms, processes in physical systems. Includes several projects drawn from such areas as atomic and molecular interactions, molecular dynamics, lattice dynamics, quantum systems, chaos, percolation, random walks, aggregation mechanisms of soft solids, nanomaterials, and nonlinear dynamics.

Equivalent to PHYS 613

Prerequisite(s): PHYS 502; FORTRAN, C, or C++ programming; or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CSI 781 - Plasma Science

Credits: 3 (NR)
Study of ionized matter, theory, and some computation with application to astrophysics, industrial plasma processing, magnetosphere, and ionosphere problems. Vlasov and fluid equations derived and applied in plasma science, including study of plasmas with and without magnetic fields.

Prerequisite(s): PHYS 513 or PHYS 722/CSI 785; PHYS 711/CSI 782/CHEM 730 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CSI 782 - Statistical Mechanics for Modeling and Simulation

Credits: 3 (NR)
Studies microcanonical, canonical, and grand canonical ensembles and fluctuations, as well as Fermi-Dirac and Bose-Einstein statistics. Modeling of ideal, dilute, and diatomic gases, liquids, and crystals. Also covers Liouville equation and simulation in classical statistical mechanics. Introduces Brownian motion, kinetic theory, and transport processes.
Prerequisite(s): CSI 690, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CSI 783 - Computational Quantum Mechanics

Credits: 3 (NR)
Studies fundamental concepts of quantum mechanics from computational point of view, review of systems with spherically symmetric potentials, many electron atom solutions to Schrodinger's equation, electron spin in many-electron systems, atomic structure calculations, algebra of many-electron calculations, Hartree-Fock self-consistent field method, molecular structure calculations, scattering theory computations, and solid-state computations.
Equivalent to PHYS 736/CHEM 736

Prerequisite(s): PHYS 502 and PHYS 613/ CSI 780, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CSI 786 - Molecular Dynamics Modeling

Credits: 3 (NR)
Introduces simulation methods in physical chemistry sciences. Covers computational approaches to modeling molecular and condensed matter systems, including interatomic and molecular potentials, molecular dynamics, time averages, ensemble distributions, numerical sampling, thermodynamic functions, response theory, transport coefficients, and dynamic structure. Includes stochastic simulations such as Brownian motion, Langevin dynamics, Monte Carlo methods and random walks, and introduction to cellular automata.

Prerequisite(s): CSI 690 or equivalent, CSI 780 or CHEM 633/CSI 711, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CSI 787 - Computational Materials Science

Credits: 3 (NR)
Covers selected topics in computational aspects of condensed matter, such as methods of electronic structure calculations, surface science, molecular clusters, lattice dynamics, nanomaterials, semiconductors, superconductivity, magnetism, Hubbard model, mesoscopic systems, and liquids.

Prerequisite(s): PHYS 512/CSI 687 and PHYS 736/CSI 783, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
CSI 788 - Simulation of Large-Scale Physical Systems

Credits: 3 (NR)
Study of diverse, large-scale physical systems with emphasis on modeling and simulation. Students will undertake several projects which will draw from such areas as many-body dynamics, atmospheric structure and dynamics, high-temperature plasmas, stellar structure, hydro dynamical systems, galactic structure and interactions, and cosmology.

Equivalent to PHYS 728

Prerequisite(s): PHYS 613/CSI 780 and CSI 700 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CSI 789 - Topics in Computational Physics

Credits: 3 (NR)
Selected topics in computational physics not covered in fixed-content computational physics courses.

Equivalent to PHYS 780

Prerequisite(s): Permission of instructor.

Notes: May be repeated for credit as needed.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CSI 796 - Directed Reading and Research

Credits: 1-6 (RD)
Reading and research on specific topic in computational sciences and informatics under direction of faculty member. May be repeated for a total of 6 credits.

Prerequisite(s): Permission of instructor.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0

CSI 798 - Research Project

Credits: 3 (NR)
Project chosen and completed under guidance of graduate faculty member, resulting in acceptable technical report.
Prerequisite(s): 12 graduate credits, and permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CSI 799 - Master's Thesis

Credits: 1-6 (RD)
Project chosen and completed under guidance of graduate faculty member, resulting in acceptable technical report (master's thesis) and oral defense.

Prerequisite(s): 12 graduate credits, and permission of instructor.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0
Grading: Satisfactory/No credit only

CSI 819 - Quantum Information Science Topics

Credits: 3 (RD)
Selected topics in quantum information science not covered in fixed-content computational sciences courses.

Prerequisite(s): Permission of instructor.

Notes: Course may be repeated for credit as needed.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CSI 854 - Hyperspectral Imaging Applications

Credits: 3 (NR)
Includes advanced hyperspectral concepts, multisystems tradeoffs, data collection and processing systems, imaging radar systems, laser systems, data fusion, calibration and data compression techniques, remote sensing and U.S. national policy. Applications include environmental, homeland security, medical, military, disaster mitigation, agricultural, and transportation topics.

Equivalent to GGS 840

Prerequisite(s): CSI 753 or equivalent or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
CSI 873 - Computational Learning and Discovery

Credits: 3 (NR)
Presents modern ideas, theories, and methods for computational learning and discovery, along with relevant applications including medical diagnosis, Earth science data analysis, and neuronal modeling. Includes background elucidation of fundamental concepts in computational learning, addressing discovery of equations, theory of causality, and comparison with biological and cognitive models. Students make presentations on topics of their research interest and work on projects involving state-of-the-art systems.

Prerequisite(s): CS 580 or equivalent, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CSI 876 - Measure and Linear Spaces

Credits: 3 (NR)
Covers measure theory and integration, convergence theorems, and the theory of linear spaces and functional analysis, including normed linear spaces, inner product spaces, Banach and Hilbert spaces, Sobolev spaces, and reproducing kernels. Topics include wavelets, applications to stochastic processes, and nonparametric functional inference.

Equivalent to STAT 876

Prerequisite(s): IT 776 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CSI 877 - Geometric Methods in Statistics

Credits: 3 (NR)
Develops foundations of geometric methods for statistics. Topics include n-dimension Euclidian geometry; projective geometry; differential geometry, including curves, surfaces, and n-dimensional differentiable manifolds; and computational geometry, including computation of convex hulls, tessellations of two-, three-, and n-dimensional spaces, and finite element grid generation. Examples include applications to scientific visualization.

Equivalent to STAT 877

Prerequisite(s): STAT 751 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CSI 885 - Atomistic Modeling of Materials
Advanced course focusing on utilization of atomistic modeling and computer simulation techniques to analyze structure of crystalline materials. Introduces modern methodology of largescale atomistic simulations and provides hands-on experience through numerous examples and homework assignments based on simulation packages. Provides background knowledge on theory of lattice defects (point defects, interfaces, dislocations) and thermal and mechanical properties of solid materials (plastic deformation, fracture).

**Prerequisite(s):** CSI 685, 700, and 786; or permission of instructor.

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0

---

**CSI 888 - Topics in Quantum Systems**

Credits: 3 (NR)
Selected topics in quantum systems in physics and chemistry not covered in fixed-content courses in quantum mechanics. Possible topics are new spectroscopic methods, density functional theory, energy transfer and fluorescence, nuclear magnetic resonance, Mossbauer spectroscopy, advanced computational considerations in atomic or molecular structure, nuclear scattering theory, quantum considerations in condensed matter problems, and quantum gravity.

**Prerequisite(s):** PHYS 736/CSI 783 or PHYS 732/CSI 784; or permission of instructor.

**Notes:** May be repeated for credit as needed.

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0

---

**CSI 898 - Research Colloquium in Computational Sciences and Informatics**

Credits: 1 (RT)
Presentations in specific research areas in computational sciences and informatics by faculty and staff members and professional visitors.

**Notes:** May be repeated for credit, but maximum 3 credits of CSI 898, 899, and 991 may be applied to PhD.

**Hours of Lecture or Seminar per week:** 1
**Hours of Lab or Studio per week:** 0
**Grading:** S/NC

---

**CSI 899 - Colloquium in Computational Sciences and Informatics**

Credits: 1 (RT)
Presentations in specific research areas in computational sciences and informatics by faculty and staff members and professional visitors.

**Notes:** May be repeated for credit, but maximum 3 credits of CSI 898, 899, and 991 may be applied to PhD.
CSI 909 - Advanced Topics in Computational Sciences and Informatics

Credits: 3 (NR)
Covers selected topics in computational sciences and informatics not covered in fixed-content courses.

Prerequisite(s): Permission of instructor.

Notes: May be repeated for credit as necessary.

CSI 971 - Probability Theory

Credits: 3 (NR)
A rigorous measure-theoretic treatment of probability. Includes expectation, distributions, laws of large numbers and central limit theorems for independent random variables, characteristic function convergence, and Markov chains.

Equivalent to STAT 971

Prerequisite(s): STAT 544 and MATH 315 Prerequisite enforced by registration system.

CSI 972 - Mathematical Statistics I

Credits: 3 (NR)
Focuses on theory of estimation, exploring method of moments, least squares, maximum likelihood, and maximum entropy methods. Details methods of minimum variance unbiased estimation. Other topics include sufficiency and completeness of statistics, Fisher information, Cramer-Rao bounds, Bhattacharyya bounds, asymptotic consistency and distributions, statistical decision theory, minimax and Bayesian decision rules, and applications to engineering and scientific problems.

Equivalent to STAT 972

Prerequisite(s): CSI 672/STAT 652 or equivalent and either CSI 876/ IT 876/STAT 876 or IT 971/STAT 971. Prerequisite enforced by registration system.
CSI 973 - Mathematical Statistics II

Credits: 3 (NR)
Concentrates on theory of hypothesis testing. Topics include characterizing the decision process; simple versus simple hypothesis tests; Neyman Pearson Lemma; and uniformly most powerful, unbiasedness, invariance, randomized, and sequential tests. Applies testing principles to situations in normal distribution family and other families of distributions.

Equivalent to STAT 973

Prerequisite(s): CSI 972. Prerequisite enforced by registration system.

Notes: Continuation of CSI 972.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CSI 976 - Statistical Inference for Stochastic Processes

Credits: 3 (NR)
Covers modern theory of parameter estimation and hypothesis testing for stochastic processes, counting processes with random intensities, and solutions to stochastic differential equations driven by martingales. Considers applications to engineering, biology, and economics.

Equivalent to IT 976

Prerequisite(s): CSI 776 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CSI 978 - Statistical Analysis of Signals

Credits: 3 (NR)
Advanced course in analysis of discrete- and continuous-time signals using methods of stochastic differential equation and time series. Presumes familiarity with methods of harmonic analysis and times series modeling. Topics include state-space modeling and eigenvalue processing, nonlinear modeling of signals, non-Gaussian stochastic process structure, detection and estimation of vector-valued signals, robust signal detection, and array processing and target tracking.

Equivalent to IT 978

Prerequisite(s): STAT 544 and 658, or equivalent.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CSI 979 - Advanced Topics in Computational Statistics
CSI 986 - Advanced Topics in Large-Scale Physical Simulation

Credits: 3 (RD)
Covers simulation of physical systems not covered in fixed-content physical simulation courses.

Prerequisite(s): Permission of instructor.

Notes: May be repeated for credit as needed.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CSI 991 - Seminar in Scientific Computing

Credits: 1 (RT)
Considers selected topics in specific area of computational sciences and informatics not covered in fixed-content courses or as extension of fixed-content courses. Format for presentation is seminar with student participation.

Notes: May be repeated for credit, but maximum 3 credits of CSI 898, 899, and 991 may be applied to PhD.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0
Grading: S/NC

CSI 996 - Doctoral Reading and Research

Credits: 1-6 (RD)
Reading and research on specific topic in computational sciences and informatics under direction of faculty member. May be repeated for a total of 6 credits.

Prerequisite(s): Admission to doctoral program, and permission of instructor.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0
CSI 998 - Doctoral Dissertation Proposal

Credits: 1-12 (RT)

Prerequisite(s): Permission of advisor.

Notes: Course may be repeated as needed, but no more than 12 credits of CSI 998 may be applied to doctoral degree.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0
Grading: Satisfactory/No Credit.

CSI 999 - Doctoral Dissertation

Credits: 1-12 (RD)
Involves doctoral dissertation research under direction of dissertation director.

Prerequisite(s): Admission to doctoral candidacy.

Notes: May be repeated as needed, but no more than 24 credits in CSI 998 and 999 may be applied to doctoral degree.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0
Grading: Satisfactory/No Credit

Computational Social Science (CSS)

Offered by the Krasnow Institute for Advanced Study

CSS 600 - Introduction to Computational Social Science

Credits: 3 (NR)
Graduate-level introduction to computational concepts, principles, and modeling approaches in social sciences, emphasizing simulations and elements of complexity theory as they apply to social phenomena. Survey includes systems dynamics, cellular automata, and agent-based models.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CSS 605 - Object-Oriented Modeling in Social Science

Credits: 3 (NR)
Presents and applies concepts and principles from object-based modeling paradigm. Emphasizes Unified Modeling Language.
(UML) to render structure and operation of complex social systems and processes.

**CSS 610 - Computational Analysis of Social Complexity**

Credits: 3 (NR)
Provides hands-on examination of agent-based models in social sciences by examining and experimenting with variety of social-simulation projects conducted in modeling environments such as Swarm, Repast, Ascape, and MASON (Multi-Agent Simulator of Networks and Neighborhoods).

**Prerequisite(s):** CSS 600, or permission of instructor

**Corequisite(s):** CSS 600, or permission of instructor

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**CSS 620 - Origins of Social Complexity**

Credits: 3 (NR)
Examines when, where, and how social complexity emerged in human societies, emphasizing long-term analysis and comparative information processing in four civilizations of the ancient world: West Asia, East Asia, Andean Peru, and Mesoamerica.

**Prerequisite(s):** CSS 600 or permission of instructor

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**CSS 625 - Complexity Theory in the Social Sciences**

Credits: 3 (NR)
Examines social phenomena including language, terrorism, the Internet, warfare, and wealth based on power laws and far-from equilibrium nonlinear dynamics. Emphasizes data analysis, and modeling and interpreting complexity-theoretic dynamics.

**Prerequisite(s):** CSS 600

**Corequisite(s):** CSS 600

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0
CSS 630 - Comparative Computational Social Science

Credits: 3 (NR)
Applies comparative method for analyzing different types of computational models in the social sciences. Strong crossdomain and interdisciplinary emphasis akin to comparative economic systems, government, or linguistics.

Prerequisite(s): CSS 600, or permission of instructor

Corequisite(s): CSS 600, or permission of instructor

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CSS 635 - Cognitive Foundations of Computational Social Science

Credits: 3 (NR)
Examines cognitive foundations and information processing in computational social agents and compares to human cognitive phenomena, including emotions, trust, and reciprocity. Emphasizes modeling project.

Prerequisite(s): CSS 600 and 610, or permission of instructor

Corequisite(s): CSS 600 and 610, or permission of instructor

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CSS 640 - Human and Social Evolutionary Complexity

Credits: 3 (NR)
Examines long-term evolution of human and societal complexity from global and cross-cultural perspective with emphasis on computational aspects leading to today's globalization. Global history from the computational social science perspective.

Prerequisite(s): CSS 600, 620; and permission of instructor

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CSS 643 - Land-Use Modeling Techniques and Applications

Credits: 3 (NR)
Survey of literature on spatially explicit empirical models of land-use change. Hands-on experience developing and running simple models. Techniques include statistical models, mathematical programming models, cellular automata, agent-based models, and integrated models.
Prerequisite(s): CSS 600 or permission of instructor

Corequisite(s): CSS 600 or permission of instructor

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CSS 645 - Spatial Agent-Based Models of Human-Environment Interactions

Credits: 3 (NR)
Discusses key challenges in spatial modeling of human-environment interactions. Reviews agent-based modeling applications in urban and rural interactions, agriculture, forestry, and other areas. Hand-on development of simple ABM models. Investigates linkages between GIS and ABM.

Prerequisite(s): GGS 631 or CSS 600, or permission of instructor

Corequisite(s): GGS 631 or CSS 600, or permission of instructor

Notes: CSS 600 may be taken concurrently.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CSS 650 - Physics Methods for Analyzing Social Complexity

Credits: 3 (NR)
Surveys complexity theoretic tools including strange attractors, Ising models, correlation functions, ergodic theory, power spectra, meanfield theory, and renormalization group. Emphasizes application to social, economic, or political systems.

Prerequisite(s): CSS 600, and permission of instructor

Corequisite(s): CSS 600, and permission of instructor

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CSS 655 - Social Systems Dynamics

Credits: 3 (NR)
Introduces systems dynamics modeling of social systems governed by levels/rates or stocks/flows processes, with applications to global modeling, terrorism, urban dynamics, organizations, and social and international conflict.

Prerequisite(s): CSS 600

Corequisite(s): CSS 600
Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0

**CSS 660 - Computational Social Science of Spacefaring Civilization**

Credits: 3 (NR)  
Focuses on goals, resources, history, and modeling issues concerning human and social dimensions of space program using CSS. Design and development of socially viable human communities in extreme environments.

Prerequisite(s): CSS 600 and 610, and permission of instructor  
Corequisite(s): CSS 600 and 610, and permission of instructor

Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0

**CSS 665 - Complex Adaptive Systems in Public Policy**

Credits: 3 (NR)  
Students learn (i) basic concepts of complex adaptive systems (CAS) and how they can be applied to policy analysis, and (ii) how to use agent-based modeling as a tool for policy analysis. Address modeling issues on representing a system, agent decision making, validation, experiment design and analysis, as well as incorporating empirical data and methods to inform agent-based modeling.

Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0  
When Offered: Fall

**CSS 692 - Social Network Analysis**

Credits: 3 (NR)  
Methods and applications that examine complex social systems based on relations, structures, connectivity, matrix representations, location, roles, interactions, and other network properties. Applications to terrorism, cognition, organizations, and other social phenomena.

Prerequisite(s): CSS 600  
Corequisite(s): CSS 600

Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0

**CSS 739 - Topics in Computational Social Science**
Selected topics in computational social science not covered in fixed-content computational social science courses.

**Prerequisite(s):** Permission of instructor.

**Notes:** May be repeated for credit for up to 6 credits.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**CSS 796 - Directed Reading and Research**

Credits: 3 (RD)  
Reading and research on specific topic in computational social science under direction of a faculty member.

**Prerequisite(s):** Permission of instructor.

**Notes:** May be repeated as necessary.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**CSS 798 - Research Project**

Credits: 3 (RD)  
Project chosen and completed under guidance of graduate faculty member, resulting in acceptable technical report.

**Prerequisite(s):** 12 graduate credits from core requirements, and permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**Grading:** Graduate Special

---

**CSS 898 - Research Colloquium in Computational Social Science**

Credits: 1 (RD)  
Presentations in specific research areas in computational social science by Center for Social Complexity-associated faculty and professional visitors.

**Notes:** May be repeated for credit, but maximum 3 credits of CSS 898 and 899 may be applied toward PhD.

**Hours of Lecture or Seminar per week:** 1  
**Hours of Lab or Studio per week:** 0  
**Grading:** Satisfactory/No credit only
CSS 899 - Colloquium in Computational Social Science

Credits: 1 (RD)
Presentations in variety of areas of computational social science by Center for Social Complexity-associated faculty and professional visitors.

Notes: May be repeated for credit, but maximum 3 credits of CSS 898 and 899 may be applied toward PhD.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0

CSS 909 - Advanced Topics in Computational Social Science

Credits: 3 (RD)
Covers selected topics in computational social science and socioinformatics not covered in fixed-content courses.

Prerequisite(s): Permission of instructor.

Notes: May be repeated for credit as necessary.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CSS 996 - Doctoral Reading and Research

Credits: 1-12 (RD)
Reading and research on specific topic in computational social science under direction of faculty member.

Prerequisite(s): Admission to doctoral program, and permission of instructor.

Notes: May be repeated as necessary.

Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 0

CSS 998 - Doctoral Dissertation Proposal

Credits: 1-12 (RD)
Covers development of research proposal, which forms basis for doctoral dissertation, under guidance of dissertation director and doctoral committee.

Prerequisite(s): Permission of advisor.

Notes: Candidates must complete a combined minimum of 12 credits of doctoral proposal (CSS 998) and doctoral dissertation research (CSS 999), of which at least three credits must be of CSS 999. A combined maximum of 24 credits of CSS 998 and CSS 999 may be applied to the degree.
CSS 999 - Doctoral Dissertation

Credits: 1-12 (RD)
Doctoral dissertation research under direction of dissertation director.

Prerequisite(s): Approval of dissertation proposal.

Notes: Candidates must complete a combined minimum of 12 credits of doctoral proposal (CSS 998) and doctoral dissertation research (CSS 999), of which at least three credits must be of CSS 999. A combined maximum of 24 credits of CSS 998 and CSS 999 may be applied to the degree.

Computer Forensics (CFRS)

Offered by the Volgenau School of Engineering

CFRS 500 - Introduction to Forensic Technology and Analysis

Credits: 3 (NR)
Presents an overview of technologies of interest to forensics examiners. It will provide an introduction to, software, hardware, analysis, and other aspects required for forensic examinations.

Prerequisite(s): Graduate standing.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

CFRS 510 - Digital Forensics Analysis

Credits: 3 (NR)
Explains computer forensics crime scene procedures, beginning with initial walk-through and evaluation; identification and collection of potential evidence; preparation of intrusion investigation; aspects of working with investigators and attorneys; reverse engineering with file identification and profiling; application of critical thinking in determination of significance of artifacts; and analysis and reporting of evidence.
Prerequisite(s): Graduate standing or permission of instructor

Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring, Summer

CFRS 590 - Special Topics in Computer Forensics

Credits: 3 (RD)

Presents selected topics from recent developments and applications in various computer forensics disciplines. Helps the professional computer forensics community keep abreast of current developments, and provides an applications-oriented introduction to emerging areas of computer forensics.

Prerequisite(s): Graduate standing or permission from department.

Notes: Repeatable for credit within the degree.

Hours of Lecture or Seminar per week: 1-12
Hours of Lab or Studio per week: 0

CFRS 660 - Network Forensics

Credits: 3 (NR)

Deals with the collection, preservation, and analysis of network-generated digital evidence such that the evidence can be successfully presented in a court of law (both civil and criminal). The relevant federal laws will be examined as well as private sector applications. The capture/intercept of digital evidence, the analysis of audit trails, the recording of running processes, and the reporting of such information will be examined.

Equivalent to TCOM 660

Prerequisite(s): TCOM 509 and TCOM 529 and a working knowledge of computer programming.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CFRS 661 - Digital Media Forensics

Credits: 3 (NR)

Covers the collection, preservation, and analysis of digital media such that the evidence can be successfully presented in a court of law (both civil and criminal). The relevant federal laws and private sector applications will be examined, as well as the seizure, preservation, and analysis of digital media.

Equivalent to TCOM 661

Prerequisite(s): CFRS 500 and a working knowledge of computer operating systems (e.g. CS 471, IT 342, or equivalent).
CFRS 663 - Operations of Intrusion Detection for Forensics

Credits: 3 (NR)
Introduces students to network and computer intrusion detection and its relation to forensics. Addresses intrusion detection architecture, system types, packet analysis, and products. Presents advanced intrusion detection topics such as intrusion prevention and active response, decoy systems, alert correlation, data mining, and proactive forensics.

Equivalent to TCOM 663

Prerequisite(s): TCOM 509 and TCOM 529 and a working knowledge of computer programming.

CFRS 664 - Incident Response Forensics

Credits: 3 (NR)
Addresses incident detection, response, and those aspects of computer forensics pertinent to the investigation of trade secret theft, economic espionage, copyright infringement, piracy, and fraud. Procedures for gathering, preserving, and analyzing forensic evidence are discussed in detail and are applied to both computer and network incident response forensics.

Equivalent to TCOM 664

Prerequisite(s): TCOM 509 and TCOM 529.

CFRS 698 - Independent Reading and Research

Credits: 1-3 (RD)
Studies selected area in computer forensics under the supervision of a faculty member. A written report is required.

Prerequisite(s): Graduate standing; completion of at least two core courses in the CFRS program; and permission of instructor

Notes: No more than a total of six credits may be taken from a combination of CFRS 698 and CFRS 798 for credit within the CFRS program.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring, Summer
CFRS 730 - Forensic Deep Packet Inspection

Credits: 3 (NR)
Presents tools, techniques, and methodologies used to conduct deep packet forensic analysis. Application of industry best practices to both the collection and subsequent analysis of network packets with an emphasis on hands-on exercises using various digital analytical tools.

Prerequisite(s): CFRS 660.

Notes: Course will consist of exercises conducted in a lab environment with concurrent lectures (combined total of 3 credits for lab and lecture exercises).

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

CFRS 760 - Legal and Ethical Issues in IT

Credits: 3 (NR)
Presents legal and ethics topics in the context of computer forensics. Includes legal principles, types of crimes, witness testimony, and forensics report writing.

Prerequisite(s): CFRS 500

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CFRS 761 - Malware Reverse Engineering

Credits: 3 (NR)
Reviews disassembled code for potentially malicious binary, or piece of malware, in order to gain a better understanding of how a binary functions when executed. Analyzes behavioral aspects as they are executed in a controlled environment. Environment changes (file, system, network, process, etc.), network communications, communications with remote devices, and so on, are closely observed for actionable information.

Prerequisite(s): CFRS 500 or ISA 564.

Notes: Course will consist of exercises conducted in a lab environment with concurrent lectures (combined total of 3 credits for lab and lecture exercises).

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

CFRS 762 - Mobile Device Forensics
Reviews forensic evidence contained within mobile devices, including address books, call logs, text messages, video files, audio files, and Internet history. Discusses procedures and technologies associated with mobile devices and how such procedures differ from traditional computer forensics. Analyzes collected data and correlates information with data from carriers. Hands-on exercises included.

Prerequisite(s): CFRS 500, CFRS 661.

Notes: Course will consist of exercises conducted in a lab environment with concurrent lectures (combined total of 3 credits for lab and lecture exercises).

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring.

CFRS 763 - Registry Forensics - Windows

Credits: 3 (NR)

Presents the concepts, tools, and techniques used for forensic collection, identification, and analysis of the Windows registry; review the structure and layout of the Windows registry and be introduced to the types of artifacts that can be found within; evaluate and interpret data from the Windows registry with emphasis on hand-on exercises.

Prerequisite(s): CFRS 500, CFRS 661.

Notes: Course will consist of exercises conducted in a lab environment with concurrent lectures (combined total of 3 credits for lab and lecture exercises).

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

CFRS 764 - Mac Forensics

Credits: 3 (NR)

Presents the basic tools and techniques used to conduct a Mac and iOS forensic analysis. Application of industry best practices to both the collection and subsequent analysis of Mac iOS systems with an emphasis on hands-on exercises using currently available open-source and commercial tools.

Prerequisite(s): CFRS 500, CFRS 661.

Notes: Course will consist of exercises conducted in a lab environment with concurrent lectures (combined total of 3 credits for lab and lecture exercises).

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring
CFRS 767 - Penetration Testing in Computer Forensics

Credits: 3 (NR)
Presents the concepts, tools, and techniques used for penetration testing, vulnerability exploitation, assessment, reporting, and forensics; teaches multiple attack vectors as well as the defensive measures protecting against such attacks; focuses heavily on post attack forensics allowing for a complete picture of the attack process.

Prerequisite(s): CFRS 660, CFRS 663.

Notes: Course will consist of exercises conducted in a lab environment with concurrent lectures (combined total of 3 credits for lab and lecture exercises).

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

CFRS 768 - Digital Warfare

Credits: 3 (NR)
Presents concepts of forensic attribution, context, and motivations behind computer attacks including those tied to cyber warfare and cyber terrorism activities. Tactics, techniques, and procedures of current cyber attacks will be addressed.

Prerequisite(s): CFRS 500, CFRS 660.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

CFRS 769 - Anti-Forensics

Credits: 3 (NR)
Presents concepts of anti-forensics and obfuscation used in order to inhibit, frustrate, and mislead computer forensics examiners. Techniques, attempts, and actions used to negatively impact the existence, volume, or amount of evidence from digital repositories will be examined with goal of understanding and detecting anti-forensics.

Prerequisite(s): CFRS 500, CFRS 660.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

CFRS 770 - Fraud and Forensics in Accounting

Credits: 3 (NR)
Prepares students to undertake forensic accounting, a specialty practice area of accounting, in order to develop the necessary expertise to be prepared to give expert evidence in any resultant trial.
**CFRS 771 - Digital Forensic Profiling**

Credits: 3 (NR)
Presents the application of criminal profiling to digital forensic evidence and cybercrime. Covers typologies of cyber criminals and reviews how the results of digital forensics can be used to profile individuals to better facilitate investigative interviews and prosecutions. Applies digital profiling to the identification of criminal behavior for insider threats and fraud.

Prerequisite(s): CFRS 500, CFRS 661.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall, Spring

---

**CFRS 772 - Forensic Artifact Extraction**

Credits: 3 (NR)
Presents tools and techniques for the extraction and processing of digital artifacts from various media and formats. Foundations are presented and examples are developed for Windows, Linux, Mac, and media filesystems, files, RAM, Windows Registry, solid state devices, network traffic, and mobile devices. Emphasis on applications and hands-on exercises.

Prerequisite(s): CFRS 500, CFRS 661.

Notes: Course will consist of exercises conducted in a lab environment with concurrent lectures (combined total of 3 credits for lab and lecture).

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall, Spring

---

**CFRS 773 - Mobile Application Forensics and Analysis**

Credits: 3 (NR)
Presents mobile applications forensics and analysis. Analyze mobile applications on both the android and iPhone platforms in a lab environment in order to understand the weaknesses, pitfalls, and forensic challenges that exist or potentially exist when developing mobile client side software as well as identify forensic artifacts left behind from applications.

Prerequisite(s): CFRS 762.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall, Spring
CFRS 780 - Advanced Topics in Computer Forensics

Credits: 3 (RT)
Teaches advanced topics from recent developments and applications in various areas of computer forensics. Enhances the professional engineering community's understanding of breakthrough developments in specific areas of computer forensics. Active participation of the students is encouraged in the form of writing and presenting papers in various research areas of the advanced topic.

Prerequisite(s): Permission of instructor

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CFRS 790 - Advanced Computer Forensics

Credits: 3 (NR)
Capstone course for the MS in computer forensics program. Students will be exposed to case studies and be required to conduct computer forensic investigations of digital media, intercepted packet switched data, and multisource log information to successfully complete each case study.

Prerequisite(s): CFRS 660, CFRS 661, and CFRS 663; minimum of 18 credits completed in the MS in Computer Forensics Program prior to registration.

Notes: To be taken in the last year prior to the completion of degree requirement.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CFRS 798 - Research Project

Credits: 1-3 (RD)
Conduct a research project to be chosen and completed under guidance of a graduate faculty member that results in an acceptable technical report.

Prerequisite(s): Graduate standing; completion of at least two core courses and a minimum of 12 credits in the CFRS program; permission of instructor.

Notes: No more than a total of six credits may be taken from a combination of CFRS 698 and CFRS 798 for credit within the CFRS program.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring, Summer

Computer Game Design (GAME)
GAME 101 - Introduction to Game Design

Credits: 3 (NR)
Introductory overview of the game development process with an emphasis on game design. Through detailed study of historical and current games, students will learn the language and structure needed to develop their own game ideas. Students will learn the many aspects of a game development team and how each of these roles contributes to a game's overall design.

Fulfills Mason Core requirement in arts.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

GAME 210 - Basic Game Design

Credits: 3 (NR)
Introduction to computer game design and development including a brief history of the field and current industry practice and production. Current major game design software, hardware, and associated tools are explored through simple game design projects.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GAME 230 - History of Computer Game Design

Credits: 3 (NR)
History of computer game design including games as a new medium for education, entertainment, and communications. Aspects of the business of computer game publishing, game criticism, storytelling, interactive fiction, violence, and virtual communities will be explored.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GAME 231 - Computer Animation for Games

Credits: 3 (NR)
2D and 3D modeling, character design, and animation projects are constructed using commercial and proprietary software and game design tool kits and engines. Simple texturing and models rigging for game animation will be discussed.

Prerequisite(s): GAME 210 and GAME 230.
GAME 232 - Online and Mobile Gaming

Credits: 3 (NR)
Class covers the history, practice, and design of online and mobile games. Class will discuss the current state of the smartphone applications and study the best practices to be successful in the applications market. Students will learn the development process for smartphone applications and develop original and innovative applications in a team-based environment.

Prerequisite(s): GAME 210 and GAME 230.

GAME 250 - Music for Film and Video

Credits: 3 (NR)
Selection, editing, processing, and integration of sounds and music (post-production) for film, video, and animation. Time, frequency, and amplitude domain digital post-production techniques will be studied.

GAME 300 - Portfolio Preparation

Credits: 1 (NR)
Student creates and refines a web portfolio to utilize throughout the course of study in presenting projects to aid in internship application and professional development.

Notes: Must have passed GAME 231 and GAME 232 with a C or better.

GAME 310 - Game Design Studio

Credits: 3 (NR)
Studio course that focuses on team-based game design. In collaboration with undergraduate students from VSITE’s CS game design concentration, student teams design and develop complete computer-based and online serious and/or entertainment games.

Prerequisite(s): GAME 231 and GAME 232.
GAME 330 - Computer Game Platform Analysis

Credits: 3 (NR)
Current and prototype consumer gaming platforms and consoles. Analysis will include conversion, transposition, and porting game media among most commercially produced platforms for analysis and comparisons.

Prerequisite(s): GAME 310 and CS 112.

Corequisite(s): GAME 331.

GAME 331 - Consumer Gaming Platform Analysis Lab

Credits: 1 (NR)
Current and prototype consumer gaming platforms and consoles. Analysis will include conversion, transposition, and porting game media among most commercially produced platforms for analysis and comparisons.

Prerequisite(s): GAME 310 and CS 112.

Corequisite(s): GAME 330.

GAME 332 - Story Design for Computer Games

Credits: 3 (NR)
Use of narrative structure and new media for designing computer game scenarios and stories. Traditional narrative techniques (text stories, novels, films) will be examined, as well as translations of the traditional to interactive, non-linear modes of communications. Analysis of current computer game story design theories, philosophies, and techniques will be covered.

Fulfills writing intensive requirement in the major.

Designated as a research and scholarship intensive course.

Prerequisite(s): Completion of 30 credits within major or permission of the instructor.
GAME 367 - Writing and Editing Music and Sound

Credits: 3 (NR)
Composition, editing, processing, and integration of voice, environmental sounds and music into non-linear computer game environments. Special emphasis will be placed on HD sound and music post-production and mixing (3 & 5 transducer point listening spaces), sequential composition and sample-splicing techniques, and the study of competing compression algorithms for sound and music.

Prerequisite(s): GAME 250 Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GAME 398 - Advanced Game Design Animation

Credits: 3 (NR)
Advanced 2D and 3D animation projects for interactive game scenes and scenarios are built using commercial and proprietary software and game design tool kits. Advanced texturing, rigging, lighting, and perspective manipulation will be covered.

Prerequisite(s): GAME 231 Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GAME 399 - Special Topics

Credits: 1-4 (RT)
In-depth presentation and exploration of topical studies in computer game design. Subject matter varies.

Notes: May be repeated for a maximum of 12 credits when taken under different topics.

Hours of Lecture or Seminar per week: 1-4
Hours of Lab or Studio per week: 0

GAME 400 - Game Design Practicum

Credits: 3 (NR)
Studio/lecture course focuses on the design strengths and weaknesses inherent in current entertainment and serious games. UI design, level design and map structure, scoring stratum, on-line support, game ecologies, gaming communities, and designing/writing documentation and specifications will be studied.

Prerequisite(s): GAME 330, 367 or 398. Must be a Computer Game Design minor.

Hours of Lecture or Seminar per week: 3
GAME 410 - Advanced Game Design Studio

Credits: 3 (NR)
In collaboration with undergraduate students from VSITE's CS game design concentration, student teams design and develop complete computer-based and online serious and entertainment games.

Prerequisite(s): GAME 310, GAME 330 and GAME 331.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GAME 489 - Pre-Internship Seminar

Credits: 1 (NR)
Student prepares for interview and application processes associated with securing an internship, finishing the course with a professional resume and portfolio ready for submission to potential employers.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0
When Offered: Fall, Summer, Spring.

GAME 490 - Senior Project

Credits: 2-6 (RD)
Student develops a case study of a publicly or commercially published computer game exploring the technical, economic, ethical, social and political ramifications on its intended target market. A public lecture of the case study is required.

Fulfills Mason Core requirement in synthesis.

Prerequisite(s): Completion of 60 credits in major. Students must be granted permission by the program director to take the course.

Notes: Restricted to GAME majors. Students must be granted permission by the program director to take the course. Students are required to complete 6 credits for the degree program.

Hours of Lecture or Seminar per week: 2-6
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring, Summer

GAME 491 - Internship
Credits: 3-4 (RD)
Placement in an appropriate internship within a program approved by a federal, state or commercial game design/publishing agency or firm.

Prerequisite(s): GAME 489 and completion of 60 credits in major.

Notes: 135 hours of internship on-site work must be completed for 3 credits.
180 hours of internship on-site work must be complete for 4 credits.

Hours of Lecture or Seminar per week: 3-4
Hours of Lab or Studio per week: 0

GAME 492 - Independent Study

Credits: 1-6 (RD)
Advanced research, computer game design, or exploration of topical studies in computer game design.

Notes: May be repeated for a maximum of 12 credits

Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 0

GAME 600 - Research Methodologies in Game Design

Credits: 3 (NR)
Graduate seminar focusing on development of independent research project in student’s area of emphasis. Explores principal methods of researching and documenting game design and game practice. Along with traditional methods of library research, emphasizes new processes of examination and investigation through the use of computer-aided research clouds and systems. Students will research and write a publishable paper following standard scientific research practice.

Prerequisite(s): Admittance to MA Game Design Program or instructor permission.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

GAME 605 - Game Design Graduate Seminar

Credits: 1 (RD)
Students present their own research and projects, or the work of contemporary game designers for discussion and peer and faculty critiques. Special focus on developing professional public communication and presentation skills about contemporary issues in the game design and production fields.

Prerequisite(s): Admittance to MA Game Design Program or instructor permission.

Hours of Lecture or Seminar per week: 1
GAME 610 - Game Production

Credits: 3 (RD)
Studio and lecture course in the history, practice and design and production of computer games with an emphasis on serious games development. Students will research, design and develop a fully functioning game, for desktop, console, and/or mobile platforms in this two-semester course. This course will also support the thesis research and project development.

Prerequisite(s): Admittance to the MA Game Design Program or permission of instructor.

GAME 617 - Teaching Practicum

Credits: 3 (NR)
Supervised classroom teaching in Mason’s Computer Game Design undergraduate program, or summer Game-focused Potomac Academy Program.

Prerequisite(s): GAME 605 and 3 credits of GAME 610.

GAME 626 - Game Business, Entrepreneurship and Practice

Credits: 3 (NR)
Combined lecture and studio course in discovering and developing entrepreneurial skill sets in the game design, production and publishing industry. Special focus will be given to developing communication skills, planning strategies, and nurturing the aptitude and attitudes that enable students to creatively solve problems, identify opportunities, and execute those opportunities in the game design and production industry.

Prerequisite(s): GAME 605 and GAME 610.

GAME 628 - Advanced Game Art
Credits: 3 (NR)
Studio and Lecture course in advanced computer game modeling processes and techniques. Advanced topics in modeling interactive characters and environments will be covered, including texture painting, photosourcing, and both low and high-polygon modeling. A broad variety of art styles and game production pipelines will be explored.

Prerequisite(s): Admittance to the MA Game Design Program or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

GAME 630 - Advanced Game Animation

Credits: 3 (NR)
Combined Studio and Lecture course in creating advanced animations for interactive games, with an emphasis on realtime characters. Non-bipedal motions, rotoscoping, rigging, and other advanced topics in animation will also be explored.

Prerequisite(s): Admittance to the MA Game Design Program or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring

GAME 635 - Issues in Interactive Entertainment

Credits: 3 (NR)
Studio and lecture course in advanced design concepts for interactive game and entertainment platforms and systems. Microsoft’s Kinect, Nintendo’s Wii U, and Apple’s AirPlay Mirroring will be studied.

Prerequisite(s): GAME 600, GAME 605 and 3 credits of GAME 610.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

GAME 638 - Game Studio Management

Credits: 3 (NR)
Lecture Courses in managerial responsibilities and issues concerning successfully managing a small to mid-size game design studio in today’s game industry marketplace.
Human resources and personnel management, investor relations and board management, contract negotiations and development analysis, game design and production team oversight, research and development, budget management and realistic financial projections will be covered.

Prerequisite(s): GAME 610 and GAME 626.

Hours of Lecture or Seminar per week: 3
GAME 650 - Advanced Music and Sound for Games

Credits: 3 (NR)
Combined studio and lecture course that will focus on the composition, editing, processing, mixing, and integration of sound assets, such as sfx, narration, and music into computer games. Time, frequency, and amplitude domain digital production and post-production techniques will be reviewed. Standard 2-channel, and 5.1 channel post-production/mixing, as well as contemporary middleware sound management applications will be studied.

Prerequisite(s): Admittance to the MA Game Design Program or permission of instructor.

GAME 658 - Interactive Game Systems Design

Credits: 3 (NR)
Studio and lecture course in advanced interactive games and simulations. A variety of entertainment platforms, systems, and their unique input devices will be explored, including augmented reality, social networks, and motion controllers. Games developed will use the latest online, mobile, and console platforms, as well as non-commercial prototype platforms.

Prerequisite(s): GAME 635.

GAME 710 - Graduate Internship

Credits: 3 (NR)
This course prepares students to succeed in the game design industry by assisting their placement in an appropriate internship within a program approved public or commercial game design/publishing agency or firm. A total of 180 hours of internship on-site work must be earned within the semester of registration. Each student is assigned a program internship coordinator, and an on-site internship supervisor.

Prerequisite(s): GAME 610 and GAME 617 and permission of Program Director.
GAME 796 - Directed Reading

Credits: 1 (RD)
Directed Reading must be taken in the fall of year two. Prior to the end of the first year, each student must identify a faculty member, based on interest and chosen topic that will serve as the student’s faculty mentor for the thesis research and writing, or project development process. Students should also plan to devote the summer between the two academic years of study to focused preliminary reading and research for the thesis paper or project.

Prerequisite(s): GAME 600 and GAME 605.

Notes: Directed Reading is overseen by the chosen faculty mentor, and will be tailored to each student’s original thesis research paper or project.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

GAME 797 - Proposal Writing

Credits: 1 (RD)
Proposal Writing is overseen by the chosen faculty mentor, and will be tailored to each student's original thesis research paper or project. Prior to the end of the first year, each student must identify a faculty member, based on interest and chosen topic that will serve as the student's faculty mentor for the Proposal Writing course to prepare for the thesis writing, or project development process.

Prerequisite(s): GAME 796.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0
Grading: Satisfactory/No credit.
When Offered: Fall, Spring

GAME 798 - Project and Applied Research

Credits: 3 (RD)
The research project and supporting written document must reflect original research, development, and production of a complete serious game for graduate level work.
The graduate project will involve a study of historical practice, and suitable for a public viewing experience and presentation. The written component will support the evolution of the creative process, the historical context of the work, the intended purpose and intent, all supported with scholarly citations and references. Faculty mentors will guide the project development process.

Prerequisite(s): Permission of Graduate Faculty Mentor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
Grading: Satisfactory/No Credit
When Offered: Fall, Spring
**GAME 799 - Thesis**

Credits: 4 (NR)
The thesis project and or written document must reflect original research, analysis, and writing appropriate for graduate level work. The thesis written document should be between 85-100 pages in length, following university library standards of format for graduate thesis. If a thesis project is chosen, the project should compose a complete game design document, a completed and QA tested functional game using a commercially available engine, and a public presentation. Faculty mentors will guide the thesis development process for each student.

Prerequisite(s): Permission of Graduate Faculty Mentor.

Hours of Lecture or Seminar per week: 4
Hours of Lab or Studio per week: 0
Grading: Satisfactory/No Credit
When Offered: Spring

**Computer Science (CS)**

Offered by the Volgenau School of Engineering.

Students may attempt an undergraduate course taught by the Volgenau School of Engineering twice. A third attempt requires approval of the department offering the course.

**CS 100 - Principles of Computing**

Credits: 3 (NR)
This course is intended to help students learn to think in the manner necessary to fully grasp the nature and power of the digital world around us. The early era of the Internet and the personal computer led to the need for "computer literacy." Now, the changing nature of our global society requires that students learn new ways to think about problems and how to solve them, regardless of students' specific fields of endeavor. Through this course, students will explore major issues related to the "big ideas" of computational thinking (namely, (i) Creativity, (ii) Abstraction, (iii) Data, (iv) Algorithms, (v) Programming, (vi) Internet, and (vii) Societal Impact), as well as how these issues will impact their future lives.

Fulfills Mason Core requirement in information technology (all).

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**CS 101 - Preview of Computer Science**

Credits: 2 (NR)
Offers a broad overview of computer science designed to provide students with an introduction to the field of computer science and an orientation to the Computer Science department and the computing environment at the university. Includes a project to introduce problem solving using computers.

Corequisite(s): CS 112.
Notes: All computer science majors are required to take this course within their first year.

CS 105 - Computer Ethics and Society

Credits: 1 (NR)
Intensive introduction to legal, social, and ethical issues surrounding software development and computer use. Stresses professional conduct, social responsibility, and rigorous standards for software testing and reliability. Examines issues such as liability, ownership of information, and computer crime.

Fulfills Mason Core requirement in information technology (ethics only).

CS 112 - Introduction to Computer Programming

Credits: 4 (NR)
Rigorous introduction to problem solving through development of computer programs. Focuses on identifying algorithmic patterns in problems, describing problem solutions in high-level pseudocode, then implementing in a procedural programming language. Basic programming concepts are covered in detail including expressions, control structures, simple data types, and input/output. Program testing and debugging are discussed to verify that problems are solved correctly.

Fulfills Mason Core requirement in information technology (all except ethics).

Prerequisites: C or better in MATH 104 or MATH 105 or specified score on math placement test, or MATH 113 with a C or better. Prerequisite enforced by registration system.

CS 123 - Computing: From the Abacus to the Web

Credits: 3 (NR)
Discusses the underlying computer science concepts behind existing and emerging technologies (such as e-mail, the Internet, search engines, blogs, computer games, and robotics). Historical, social, and technical issues related to each topic will be discussed.

Notes: Students may not take this course for credit once they have successfully completed CS 211. Intended for nonmajors.
CS 211 - Object-Oriented Programming

Credits: 3 (NR)
Thorough treatment of programming according to object-oriented principles. Introduces classes, interfaces, inheritance, polymorphism, and single dispatch as means to decompose problems. Covers intermediate programming techniques including error handling through exceptions, arrangement of source code into packages, and simple data structures. Intermediate debugging techniques and unit testing are covered.

Prerequisite(s): Grade of C or better in CS 112. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 1

CS 222 - Computer Programming for Engineers

Credits: 3 (NR)
Introduces object-oriented programming and elementary data structures. Emphasis on problems and language features relevant to engineers.

Prerequisite(s): Grade of C or better in CS 112. Prerequisite enforced by registration system.

Notes: Intended as terminal course in computer programming.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CS 225 - Culture and Theory of Games

Credits: 3 (NR)
Explores the theory, history, culture, and lore of games with particular emphasis on the varieties of computer game environments.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CS 261 - Introduction to a Second Language

Credits: 1 (NR)
Advanced programming using Java programming language. Other languages may be offered at times.

Prerequisite(s): Grade of C or better in CS 211.

Notes: Not available for credit for CS majors.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0
CS 262 - Introduction to Low-Level Programming

Credits: 2 (NR)
Introduction to the language C, as well as operating system concepts, in UNIX, to prepare students for topics in systems programming.

Prerequisite(s): Grade of C or better in CS 211 or CS 222. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 0

CS 306 - Synthesis of Ethics and Law for the Computing Professional

Credits: 3 (NR)
Practical course to become effective computer professional. Examines legal and ethical issues surrounding computer technology and its use, as well as the foundation building that is necessary to deal with those challenges. Applies philosophical bases for ethical decision making to modern concerns raised by computers and technology. Addresses topics covered by CS 105 in a more intensive manner and focuses on the emerging legal and ethical issues involved in e-commerce and widespread use of the Internet.

Fulfills Mason Core requirement in synthesis.

Fulfills writing intensive requirement in the major.

Prerequisite(s): CS 105, junior standing (at least 60 credit hours). Prerequisite enforced by registration system.

Corequisite(s): All required Mason Core courses.

Notes: Computer science majors may use this course to satisfy the Mason Core synthesis requirement, so long as they have not previously taken CS 305 for credit.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CS 310 - Data Structures

Credits: 3 (NR)
Focuses on object-oriented programming with an emphasis on tools and techniques for developing moderate to large programs. Topics include use and implementation of linear and nonlinear data structures and the design and analysis of elementary algorithms.

Prerequisite(s): Grade of C or better in CS 211 and MATH 113. Prerequisite enforced by registration system.

Corequisite(s): CS 105.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
CS 321 - Software Requirements and Design Modeling

Credits: 3 (NR)
An introduction to concepts, methods, and tools for the creation of large-scale software systems. Methods, tools, notations, and validation techniques to analyze, specify, prototype, and maintain software requirements. Introduction to object-oriented requirements modeling, including use of case modeling, static modeling, and dynamic modeling using the Unified Modeling Language (UML) notation. Concepts and methods for the design of large-scale software systems. Fundamental design concepts and design notations are introduced. A study of object-oriented analysis and design modeling using the UML notation. Students participate in a group project on software requirements, specification, and object-oriented software design.

Fulfills writing intensive requirement in the major.

Equivalent to SWE 321 (2011-2012 Catalog); CS 421 (2010-2011 Catalog)

Prerequisite(s): Grade of C or better in CS 211. Students who have received credit for CS 421 or SWE 421 may not take CS 321. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CS 325 - Introduction to Game Design

Credits: 3 (NR)
Game design, in various electronic entertainment technologies, involves a diverse set of skills and backgrounds from narrative and art to computer programming. Surveys the technical aspects of the field, with an emphasis on programming.

Prerequisite(s): Grade of C or better in CS 211. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CS 330 - Formal Methods and Models

Credits: 3 (NR)
Abstract concepts that underlie much advanced work in computer science, with major emphasis on formal languages, models of computation, logic, and proof strategies.

Prerequisite(s): Grade of C or better in CS 211 and MATH 125. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CS 332 - Object-Oriented Software Design and Implementation

Credits: 3 (NR)
In-depth study of software design and implementation using a modern, object-oriented language with support for graphical user
interfaces and complex data structures. Topics covered will be specifications; design patterns; and abstraction techniques; including typing, access control, inheritance, and polymorphism. Students will learn the proper engineering use of techniques such as information hiding, classes, objects, inheritance, exception handling, event-based systems, and concurrency.

Equivalent to SWE 332

Prerequisite(s): Grade of C or better in CS 211. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CS 351 - Visual Computing

Credits: 3 (NR)
Focuses on programming essential mathematical and geometric concepts underlying computer graphics. Covers fundamental topics in computational geometry, 3D modeling, graphics algorithms, and graphical user interfaces using both 2D and 3D implementations. Reinforces object-oriented programming practices.

Prerequisite(s): C or better in CS 262 and CS 310. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CS 367 - Computer Systems and Programming

Credits: 3 (NR)
Introduces students to computer systems from a programmer's perspective. Topics include data representation, assembly and machine-level representation of high-level language programs, the memory hierarchy, linking, exceptions, interrupts, processes and signals, virtual memory, and system-level I/O. Foundation for courses on compilers; networks; operating systems; and computer architecture, where a deeper understanding of systems-level issues is required.

Prerequisite(s): Grade of C or better in CS 262 or 222 and ECE 301 or 331. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CS 390 - Research and Project Design Principles in Computing

Credits: 3 (NR)
This course introduces students to the research and project design process within the computing field. Students will learn about the tools of the trade, work through design principles beginning with the articulation of a question, reviewing methods of exploration, gathering evidence, communicating results, and assessing and evaluating research or project outcomes.

Prerequisite(s): C or better in CS 262; CS 310 and CS 321 highly recommended. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
CS 391 - Advanced Programming Lab

Credits: 1 (RD)
Programming-intensive lab course. Students refine problem-solving and programming skills while gaining experience in teamwork. Focuses on data structures, recursion, backtracking, dynamic programming, and debugging. Central focus is applying familiar and new algorithms and data structures to novel circumstances.

Corequisite(s): Grade of C or better in CS 310 and permission of instructor.

Hours of Lecture or Seminar per week: 1-4
Hours of Lab or Studio per week: 1

CS 425 - Game Programming I

Credits: 3 (NR)
Introduction to technologies and techniques used in modern computer games. Teams will explore the various facets of a complete design using sophisticated tools. Includes a project in which a game is prototyped; this prototype and initial design will serve as the starting point for the project in CS 426.

Prerequisite(s): Grade of C or better in CS 310, CS 325 and CS 351. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CS 426 - Game Programming II

Credits: 3 (NR)
Project-orientated continuation of CS 425 with an emphasis on the implementation of a complete game.

Prerequisite(s): Grade of C or better in CS 425. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CS 440 - Language Processors and Programming Environments

Credits: 3 (NR)
Survey of basic programming language processors and software development tools such as assemblers, interpreters, and compilers. Topics include design and construction of language processors, formal syntactic definition methods, parsing techniques, and code-generation techniques.

Prerequisite(s): Grade of C or better in CS 310, 330, and 367. Prerequisite enforced by registration system.
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CS 444 - Introduction to Computational Biology

Credits: 3 (NR)
Introduces computational methods in molecular biology. Covers a broad array of topics in bioinformatics and computational biology. Organized as 3 four-week modules intended to capture the current classification of bioinformatics and computational biology methods, thereby providing students with a broad view of the field.

Prerequisite(s): C or better in CS 310.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CS 445 - Computational Methods for Genomics

Credits: 3 (NR)
Fundamental principles and techniques for implementing computational algorithms to solve problems in biology arising from the need to process large volumes of genomic information. Topics include sequence analysis, alignment, and assembly, gene prediction, and knowledge-based protein structure prediction. Projects involve designing and programming basic alignment and prediction methods.

Prerequisite(s): C or better in CS 310 and STAT 344.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CS 450 - Database Concepts

Credits: 3 (NR)
Covers basics to intermediate knowledge for the design, implementation, and use of relational database systems. Topics include the Entity-Relationship (ER) and Entity-Enhanced Relationship (EER) models for database design, Relational Algebra (RA), Structured Query Language (SQL), SQL programming techniques, functional dependencies and normalization, object and object-relational databases, and security. Students will practice to design, develop, and implement a relational ORACLE database and use the database for queries, transaction processing, and report generation.

Prerequisite(s): Grade of C or better in CS 310 and 330. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CS 451 - Computer Graphics
CS 455 - Computer Communications and Networking

Credits: 3 (NR)
Data communications and networking protocols, with study organized to follow layers of Internet Protocol Suite (TCP/IP family of protocols). Topics include role of various media and software components, local and wide area network protocols, network performance, and emerging advanced commercial technologies.

Prerequisite(s): Grade of C or better in CS 310 and 367, and STAT 344. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CS 463 - Comparative Programming Languages

Credits: 3 (NR)
Key programming mechanisms described independently of particular machines or languages, including control, binding, procedural abstraction, types, and concurrency. Includes basic programming competence in several different types of programming languages, including a language that provides concurrency.

Equivalent to CS 363 (2013-2014 Catalog).

Prerequisite(s): C or better in CS 330 and CS 367. Prerequisite enforced by registration system.

Notes: Students who have taken CS 363 may not receive credit for CS 463.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CS 465 - Computer Systems Architecture

Credits: 3 (NR)
Computer subsystems and instruction set architectures. Single-cycle, multiple-cycle, and pipeline architectures. Memory hierarchy, cache, and virtual memory input-output processing.

Prerequisite(s): Grade of C or better in CS 367. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
CS 468 - Secure Programming and Systems

Credits: 3 (NR)
Fundamental principles and techniques for implementing secure computer systems. Topics include security and cryptography basics, vulnerability analysis, secure software development, and distributed system security. Projects involve designing and programming basic security tools, secure programs, and distributed systems.

Prerequisite(s): Grade of C or better in CS 310 and CS 367. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CS 469 - Security Engineering

Credits: 3 (NR)
Covers the software subsystems that are involved in defending computer systems. Studies threats and architecting solutions against them, including but not limited to access control and identity management, network and system security, intrusion detection and recovery systems, monitoring and forensic systems.

Prerequisite(s): C or better in CS 330, CS 367, and STAT 344. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CS 471 - Operating Systems

Credits: 3 (NR)
Issues in multiprogramming. Covers concurrent processes and synchronization mechanisms; processor scheduling; memory, file, I/O, and deadlock management; performance of operating systems; and projects dealing with synchronization in multiprogrammed OS and virtual memory management.

Prerequisite(s): Grade of C or better in CS 310 and 367. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CS 475 - Concurrent and Distributed Systems

Credits: 3 (NR)
Practical issues in designing and implementing concurrent and distributed software. Topics include concurrent programming, synchronization, multithreading, local and wide-area network protocols, distributed computation, systems integration, and techniques for expressing coarsegrained parallelism at the application level. Projects involve network programming at application level.
Prerequisite(s): Grade of C or better in CS 310 and 367. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CS 477 - Mobile Application Development

Credits: 3 (NR)
This project based course will teach fundamental principles of software development for the mobile device environment, emphasizing the application of numerous academic concepts and the new design and programming paradigms that stem from the use of mobile devices. Topics include user interfaces, event-based programming, interprocess communications, networking, mobile-specific capabilities and performance in a resource restricted environment.

Prerequisite(s): C or better in CS 310 and CS 367. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CS 480 - Introduction to Artificial Intelligence

Credits: 3 (NR)
Principles and methods for knowledge representation, reasoning, learning, problem solving, planning, heuristic search, and natural language processing and their application to building intelligent systems in a variety of domains. Uses LISP, PROLOG, or expert system programming language.

Prerequisite(s): Grade of C or better in CS 310 and 330. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CS 482 - Computer Vision

Credits: 3 (NR)
Basic principles of visual perception and their implementation on computer systems. Topics include early visual processing, edge detection, segmentation, intrinsic images, image modeling, representation of visual knowledge, and image understanding. Students complete projects involving real images.

Prerequisite(s): Grade of C or better in CS 310, MATH 203 and STAT 344 Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CS 483 - Analysis of Algorithms
Analyzes computational resources for important problem types by alternative algorithms and their associated data structures, using mathematically rigorous techniques. Specific algorithms analyzed and improved.

Prerequisite(s): Grade of C or better in CS 310, CS 330 and MATH 125. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CS 484 - Data Mining

Credits: 3 (NR)
Basic principles and methods for data analysis and knowledge discovery. Emphasizes developing basic skills for modeling and prediction and performance evaluation. Topics include system design; data quality, preprocessing, and association; event classification; clustering; biometrics; business intelligence; and mining complex types of data.

Prerequisite(s): Grade of C or better in CS 310 and STAT 344. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CS 485 - Autonomous Robotics

Credits: 3 (NR)
Covers various basic software topics in autonomous robotics, including autonomous architectures, elementary kinematics and controls, simulation, localization and mapping, reasoning, and multiagent environments. Includes several projects involving physical robots.

Prerequisite(s): CS 262, CS 310, MATH 203 or permission of the instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CS 490 - Design Exhibition

Credits: 3 (RD)
Capstone course focusing on design and successful implementation of major software project, encompassing broad spectrum of knowledge and skills, developed by team of students. Requires final exhibition to faculty-industry panel.

Prerequisite(s): Grade of C or better in CS 321, CS 483; two other CS 400-level courses; and senior standing. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
CS 498 - Independent Study in Computer Science

Credits: 1-3 (RT)
Research and analysis of selected problems or topics in computer science. Topic must be arranged with instructor and approved by department chair before registering.

Prerequisite(s): 60 credits, major in computer science, and permission of instructor.

Notes: May be repeated for maximum 6 credits if topics substantially different.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0

CS 499 - Special Topics in Computer Science

Credits: 3 (RT)
Topics of special interest to undergraduates.

Prerequisite(s): 60 credits and permission of instructor; specific prerequisites vary with nature of topic.

Notes: May be repeated for maximum 6 credits if topics substantially different.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CS 504 - Principles of Data Management and Mining

Credits: 3 (NR)

Prerequisite(s): Graduate Standing.

Notes: This course cannot be taken for credit by students of the MS CS, MS ISA, MS SWE, MS IS, CS PhD or IT PhD programs.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CS 540 - Language Processors

Credits: 3 (NR)
Basic programming language processors such as assemblers, interpreters, and compilers. Topics include design and construction of language processors, formal syntactic definition methods, parsing techniques, and code generation techniques. Lab includes
construction of language processors and experience with programming environments.

**Prerequisite(s):** MATH 125 and CS 310 and CS 330 and CS 465.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**CS 550 - Database Systems**

Credits: 3 (NR)  
An introduction to database management with focus on architecting databases and using them in applications. Topics to be covered include: data modeling with the Entity-Relationship model, the relational data model and its formal languages, SQL, the theory of database design, object databases, XML and Web data.

**Prerequisite(s):** (CS 310 and CS 330) or (INFS 501 and INFS 515 and INFS 519 and SWE 510).

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**CS 551 - Computer Graphics**

Credits: 3 (NR)  
Graphics principles and programming. Topics include graphics hardware, antialiasing, transformations, viewing, illumination, blending, texture mapping, color models, curves, surfaces, and animation.

Equivalent to CS 652 (2011-2012 Catalog)

**Prerequisite(s):** CS 310 and CS 367.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall, Spring

---

**CS 555 - Computer Communications and Networking**

Credits: 3 (NR)  
Techniques and systems for communication of data between computational devices and layers of Internet Protocol Suite. Topics include role of various media and software components, local and wide area network protocols, network design, performance and cost considerations, and emerging advanced commercial technologies. Emphasizes TCP/IP family of protocols.

**Prerequisite(s):** CS 310 and CS 367 and STAT 344.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0
CS 571 - Operating Systems

Credits: 3 (NR)
Models of operating systems. Major functions including processes, memory management, I/O, interprocess communication, files, directories, shells, distributed systems, performance, and user interface.

Prerequisite(s): CS 310 and CS 367 and CS 465.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CS 580 - Introduction to Artificial Intelligence

Credits: 3 (NR)
Principles and methods for knowledge representation, reasoning, learning, problem solving, planning, heuristic search, and natural language processing and their application to building intelligent systems in a variety of domains. LISP, PROLOG, or expert system programming language.

Prerequisite(s): CS 310 and CS 330.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CS 583 - Analysis of Algorithms

Credits: 3 (NR)
Topics include analyzing sequential and parallel algorithmic strategies such as greedy methods, divide and conquer strategies, dynamic programming, search and traversal techniques, and approximation algorithms; and analyzing specific algorithms falling into these classes, NP-Hard and NP-Complete problems.

Prerequisite(s): CS 310 and CS 330 and MATH 125.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CS 600 - Theory of Computation

Credits: 3 (NR)
Introduction to logic and proof techniques, formal languages, automata theory, and computational complexity. Specific topics include regular and context-free languages, Turing machines, NP-completeness, and undecidability.

Prerequisite(s): CS 583. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
CS 611 - Computational Methods for Genomics

Credits: 3 (NR)
Covers fundamental principles and techniques for implementing computational algorithms to solve problems in biology arising from the need to process large volumes of genomic information. Topics include sequence analysis, alignments, sequence assembly, gene prediction, and protein structure prediction.

Prerequisite(s): CS 583. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CS 630 - Advanced Algorithms

Credits: 3 (NR)
Provides an overview of advanced algorithm design and analysis techniques. Topics include algorithms for hash tables, matrix operations, number theory, string matching, computational geometry, combinatorial optimization, and linear programming; also the areas of NP-completeness and approximation algorithms.

Prerequisite(s): CS 583. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CS 633 - Computational Geometry

Credits: 3 (NR)
Basic principles and methods for computing in field of geometric modeling. Emphasizes data structures used to represent geometric objects and algorithms for manipulating those data structures. Topics include range searching, polygon triangulation, convex hulls, motion-planning, visibility, and mesh generation.

Prerequisite(s): CS 583. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CS 635 - Foundations of Parallel Computation

Credits: 3 (NR)
Covers three major parallel computing paradigms: MIMD computation, SIMD computation, and data flow computation. Emphasizes interfaces between algorithm design and implementation, architecture, and software. Examines parallel algorithms and parallel programming languages relative to architecture of particular parallel computers.

Prerequisite(s): CS 583 and CS 571 and proficiency in C programming language. Prerequisite enforced by registration system.
CS 640 - Advanced Compilers

Credits: 3 (NR)
Examines advanced compiler techniques such as code optimizations for sequential and parallel machines; compilers for logical, functional, or object-oriented languages; and other topics in current literature.

Prerequisite(s): CS 540 and CS 583. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CS 650 - Advanced Database Management

Credits: 3 (NR)
Study of the internal architecture of database systems. Topics include: physical data organization and indexing, query processing and optimization, transaction processing, database system architectures, Web services and Web data security.

Prerequisite(s): CS 550 or INFS 614. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CS 658 - Networked Virtual Environments

Credits: 3 (NR)
Topics covered in lecture are: networked virtual environment overview, networking technology, network multimedia concepts, virtual simulation concepts, efficiency/performance issues, and online conferencing/virtual classrooms. The project consists of four segments, each covering one aspect of networked virtual environments, plus a final session where one- or two-person teams create a minimally functional networked virtual environment over the Internet using overlay multicast software. The course consists of 31 50-minute sessions plus a major Java programming project which will be presented and discussed in class and two 90-minute examinations. Lectures are recorded in Network EducationWare (NEW) format and are available for playback on a flexible schedule, which is necessary since the course is shared among institutions having different academic calendars.

Prerequisite(s): CS 555 Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CS 659 - Theory and Applications of Data Mining
Concepts and techniques in data mining and multidisciplinary applications. Topics include databases; data cleaning and transformation; concept description; association and correlation rules; data classification and predictive modeling; performance analysis and scalability; data mining in advanced database systems, including text, audio, and images; and emerging themes and future challenges.

Equivalent to CS 750 (2011-2012 Catalog)

Prerequisite(s): CS 580 or STAT 515. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CS 662 - Computer Graphics Game Technologies

Credits: 3 (NR)

Addresses some graphics game techniques including collision detection, levels of detail, physics-based simulations, textures, maps, and shadows.

Prerequisite(s): CS 551. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CS 667 - Biometrics and Identity Management

Credits: 3 (NR)

Basic principles and methods for automatic authentication of individuals. Technologies include face, fingerprint, and iris recognition; and speaker verification. Additional topics cover multimodal biometrics, system design, performance evaluation, and privacy concerns. Term project required.

Prerequisite(s): CS 580. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CS 671 - Advanced Operating Systems

Credits: 3 (NR)

Advanced topics in design and implementation of microkernel-based, object-oriented, and distributed operating systems. Specific topics include support for interprocess communication, interaction between computer architecture and operating systems, distributed file systems, transactions, and distributed shared memory.

Prerequisite(s): CS 571. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
CS 672 - Computer System Performance Evaluation

Credits: 3 (NR)
Theory and practice of analytical models of computer systems. Topics include open and closed multiclass queuing networks, single and multiple class Mean Value Analysis, Markov Chains, performance and availability models of Internet data centers, software performance engineering, and e-commerce performance.

Prerequisite(s): CS 571. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CS 673 - Multimedia Computing and Systems

Credits: 3 (NR)
Focuses on technological and development environments in developing multimedia applications. Projects involve experience with multimedia authoring tools and simulations to assess performance.

Prerequisite(s): CS 571. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CS 675 - Distributed Systems

Credits: 3 (NR)
Issues in design and implementation of distributed systems and applications. Topics include distributed communication paradigms, middleware, coordination and synchronization, distributed transactions, consistency and replication, fault-tolerance and reliability, and peer-to-peer systems.

Prerequisite(s): CS 571. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CS 680 - Natural Language Processing

Credits: 3 (NR)
Explores principles of designing computer programs that respond appropriately to questions, commands, and statements expressed in human language, particularly English. Role of knowledge representation and linguistic theory. Students become familiar with current literature to implement a limited natural language processor.

Prerequisite(s): CS 540 and CS 580. Prerequisite enforced by registration system.
CS 681 - Designing Expert Systems

Credits: 3 (NR)
Design, construction, and evaluation of software systems that solve problems generally deemed to require human expertise. Focuses on study and use of relevant languages, environments, mathematics, and logic. Case studies of successful systems. Programming projects include development of tools or small-scale systems.

Prerequisite(s): CS 580. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CS 682 - Computer Vision

Credits: 3 (NR)
Study of computational models of visual perception and their implementation in computer systems. Topics include early visual processing, edge detection, segmentation, intrinsic images, image modeling, representation of visual knowledge, and image understanding.

Prerequisite(s): CS 580 and CS 583. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CS 683 - Parallel Algorithms

Credits: 3 (NR)
Examines design and analysis of parallel algorithms. Material focuses on algorithms for both theoretical and practical models of parallel computation. Considers algorithm design and analysis for PRAM and existing SIMD and MIMD type architectures. Topics include sorting, graph algorithms, numerical algorithms, and computational complexity.

Prerequisite(s): CS 583. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CS 684 - Graph Algorithms

Credits: 3 (NR)
Data structures and analytical techniques to study graph algorithms. Data structures include disjoint sets, heaps, and dynamic trees. Algorithms include minimum spanning trees, shortest path, maximum flow, and graph planarity.
Prerequisite(s): CS 583. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CS 685 - Autonomous Robotics

Credits: 3 (NR)
Reviews developments in intelligent autonomous systems. Studies applications of artificial intelligence, computer vision, and machine learning to robotics. Topics include analysis and design of algorithms and architectures for planning, navigation, sensory data understanding, sensor fusion, spatial reasoning, motion control, knowledge acquisition, learning concepts and procedures, self-organization, and adaptation to environment.

Prerequisite(s): CS 580. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CS 686 - Image Processing and Applications

Credits: 3 (NR)
Concepts and techniques in image processing. Discusses methods for image capture, transformation, enhancement, restoration, and encoding. Students complete projects involving naturally occurring images.

Prerequisite(s): CS 583. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CS 687 - Advanced Artificial Intelligence

Credits: 3 (NR)
Explores foundational issues of artificial intelligence, such as roles of knowledge and search, formalization of knowledge and inference, and symbolic versus emergent approaches to intelligence. Studies advanced programming techniques for artificial intelligence, relationship to foundational issues, and important application areas for artificial intelligence.

Prerequisite(s): CS 580. Prerequisite enforced by registration system.

Notes: Major programming project required.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CS 688 - Pattern Recognition
Credits: 3 (NR)
Explores statistical pattern recognition and neural networks. Pattern recognition topics include Bayesian classification and decision theory, density (parametric and nonparametric) estimation, linear and nonlinear discriminant analysis, dimensionality reduction, feature extraction and selection, mixture models and EM, and vector quantization and clustering. Neural networks topics include feed-forward networks and back-propagation, self-organization feature maps, and radial basis functions. Emphasizes experimental design, applications, and performance evaluation.

Prerequisite(s): CS 580. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CS 689 - Planning Motions of Robots and Molecules

Credits: 3 (NR)
Covers topics from artificial intelligence, algorithms and databases. Presents algorithms that model and simulate physical and biological systems and focuses on motion-planning algorithms for robotic systems in the presence of obstacles. Simple deterministic and sampling-based approaches to motion planning will be covered, as well as advanced planning methods including planning with kinematics and dynamic constraints. Selected topics include sensor-based motion planning, manipulation planning, assembly planning, planning under uncertainty and robotics-inspired methods to compute functionally-relevant motions of molecular chains.

Prerequisite(s): CS 583. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CS 695 - Topics in Computer Science

Credits: 3 (RT)
Special topics in computer science not occurring in regular computer science sequence.

Prerequisite(s): Completion of two core courses, and permission of instructor.

Notes: May be repeated for credit when subject distinctly different.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CS 697 - Independent Reading and Research

Credits: 1-3 (NR)
Students may undertake a course of study under supervision of consenting faculty member. Students usually submit written statement of course content and tentative reading list as part of request for approval. Literature review, project report, or other written product usually required.

Prerequisite(s): Graduate standing; completion of at least two core courses, and permission of the instructor.
CS 700 - Quantitative Methods and Experimental Design in Computer Science

Credits: 3 (NR)
Integrated treatment of models and practices in experimental computer science. Topics include scientific methods applied to computing, workload characterization, forecasting of performance and quality metrics of systems, uses of analytic and simulation models, design of experiments, interpretation and presentation of experimental results, hypothesis testing, and statistical analyses of data. Involves one or more large-scale projects.

Prerequisite(s): Admission to PhD program in Computer Science or Information Technology, and at least two 600-level courses offered by the Computer Science Department.

CS 706 - Concurrent Software Systems

Credits: 3 (NR)
Topics include concurrent programming languages and constructs, and specification, design, verification, and validation of concurrent programs. Students required to solve concurrent programming problems and check solutions by using verification, testing, and debugging tools.

Prerequisite(s): CS 571. Prerequisite enforced by registration system.

CS 719 - Scalable Internet Services

Credits: 3 (NR)
Discusses, from quantitative point of view, characteristics of most important technologies used to support implementation of e-business sites. Includes topics such as hardware and software architectures of e-business sites, authentication, payment services, understanding customer behavior, workload characterization, scalability analysis, and performance prediction.

Prerequisite(s): CS 555 and CS 571. Prerequisite enforced by registration system.

Notes: Term paper and project required.

CS 752 - Interactive Graphics Software
Advanced graphics methods and tools. Topics include visualization, modeling, rendering, animation, simulation, virtual reality, graphics software tools, and current research topics.

Prerequisite(s): CS 551 and CS 583.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CS 755 - Advanced Computer Networks

Credits: 3 (NR)
Current and emerging issues in advanced computer networks and applications. Topics include software systems associated with packet and cell-switched networking architectures and protocols, high-performance LANs, scheduling and congestion control, mobile networking, multimedia applications, and next generation of Internet.

Prerequisite(s): CS 555. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CS 756 - Performance Analysis of Computer Networks

Credits: 3 (NR)
Analytical and simulation techniques for modeling and analyzing computer networks. Examines elementary queuing analysis; networks of queues; routing and flow controls; and applications to local and wide area networks, Internet, and emerging networking technologies.

Prerequisite(s): CS 555. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CS 757 - Mining Massive Datasets with MapReduce

Credits: 3 (NR)
Covers the techniques to mine large datasets, including Distributed File Systems and Map-Reduce, similarity search, and data stream processing. Covers classic problems in data mining, such as clustering, association rule mining, and others from the point of view of scalability. Includes a final project to exercise concepts covered in class.

Prerequisite(s): CS 659. Prerequisite enforced by registration system.
CS 773 - Real-Time Systems Design and Development

Credits: 3 (NR)
Real-time systems and principles supporting design and implementation. Emphasizes fundamental results from real-time scheduling theory and relevance to computer system design. Topics include system design issues for real-time applications involving operating systems, communication networks, databases, and multimedia

Prerequisite(s): CS 571. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CS 774 - Computational Vision

Credits: 3 (NR)
Studies recent advances in development of machine vision algorithms and knowledge-based vision systems. Topics include scalespace; Gabor and wavelet processing; distributed and hierarchical processing using neural networks; motion analysis; active, functional, and selective perception; object and target recognition; expert systems; data fusion; and machine learning. Emphasizes system integration in terms of perception, control, action, and adaptation. Presents applications to robotics, intelligent highways, inspection, forensic, and data compression.

Prerequisite(s): CS 682 and CS 686. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CS 775 - Advanced Pattern Recognition

Credits: 3 (NR)
Covers statistical pattern recognition, neural network, and statistical learning theory approaches. Topics include decision theory and Bayes' theorem, density (parametric and nonparametric) estimation, linear and nonlinear discriminant analysis, SVM and kernel methods, SRM and model selection, performance evaluation, mixture of experts (AdaBoost), dimensionality reduction, feature selection and extraction, and clustering. Emphasizes experimental design, applications, and performance evaluation.

Prerequisite(s): CS 688. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CS 777 - Human-Computer Intelligent Interaction

Credits: 3 (NR)
Current and emerging issues in human-computer intelligent interaction, and human-centered systems and their applications. Topics include video processing, visualization, virtual environments, adaptation and tutoring, image and scene modeling, analysis and synthesis, face and gesture recognition, and speech and natural language processing.
**Prerequisite(s):** CS 580 and CS 551 or CS 682. Prerequisite enforced by registration system.

**Notes:** Term project and topical review required.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

### CS 779 - Topics in Resilient and Secure Computer Systems

Credits: 3 (NR)  
Covers study of alternate computer security, including how these methods can be combined in a layered defense and factors that affect the selection of the architectures. Reviews recent papers and reports.

**Prerequisite(s):** CS 571 and ISA 562. Prerequisite enforced by registration system.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

### CS 780 - Data Mining on Multimedia Data

Credits: 3 (NR)  
Covers advanced techniques for managing, searching, and mining of various types of data such as text, web links, images, time series, video, and audio. Issues related to handling such data will be discussed, including feature selection, high dimensional indexing, interactive search and information retrieval, pattern discovery, and scalability.

**Prerequisite(s):** CS 659. Prerequisite enforced by registration system.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

### CS 782 - Machine Learning

Credits: 3 (NR)  
Surveys machine learning concerning development of intelligent adaptive systems that are able to improve through learning from input data or from their own problem-solving experience. Topics provide broad coverage of developments in machine learning, including basic learning strategies and multistrategy learning.

**Prerequisite(s):** CS 681 or CS 687 or CS 688. Prerequisite enforced by registration system.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

### CS 785 - Knowledge Acquisition and Problem Solving
Principles and major methods of basic stages of knowledge acquisition such as systematic elicitation of expert knowledge, knowledge base refinement, and knowledge base optimization in the context of general problem-solving methods. Includes case studies of successful knowledge acquisition and problem-solving systems and projects involving development or application of knowledge acquisition tools for knowledge-based systems.

**Prerequisite(s):** CS 681 or CS 687. Prerequisite enforced by registration system.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**CS 787 - Decision Guidance Systems**

Credits: 3 (NR)  
Decision-guidance systems support an iterative process of giving actionable recommendations to and extracting feedbacks from human decision-makers, with the goal of arriving at the best possible course of action. Focuses on models, languages, algorithms and applications of Decision-Guidance Management Systems, used for fast development of decision-guidance applications.

**Prerequisite(s):** INFS 614 or CS 550. Prerequisite enforced by registration system.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**CS 788 - Autonomic Computing**

Credits: 3 (NR)  
Studies self-managing, self-optimizing, self-configuring, self-tuning, self-healing, and self-protecting computing systems. This course analyzes many examples of autonomic systems as well as various techniques to design and build such systems. This is a doctoral seminar based on reading and analysis of current papers.

**Prerequisite(s):** CS 555 or CS 571 or ISA 562. Prerequisite enforced by registration system.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**CS 795 - Advanced Topics in CS**

Credits: 3 (RT)  
Advanced topics not occurring in regular sequence.

**Prerequisite(s):** Admission into computer science PhD program.

**Notes:** May be repeated for credit when subject differs. Satisfies MS breadth requirement only if explicitly stated in syllabus in given section. Only one such course should be used for breadth requirements.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0
CS 798 - Project Seminar

Credits: 3 (NR)
Master's degree candidates undertake a project using knowledge gained in MS program.

Prerequisite(s): 18 credits applicable toward MS in computer science.

Notes: Topics chosen in consultation with advisor. Meets project or thesis requirement for MS in computer science.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
Grading: Graduate Special

CS 799 - Thesis

Credits: 1-6 (RD)
Original or expository work evaluated by committee of three faculty members.

Prerequisite(s): 18 credits applicable toward MS in computer science.

Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 0
Grading: Satisfactory/No Credit

CS 800 - Computer Science Colloquium

Credits: 0 (RD)
Students are required to attend colloquia including talks by distinguished speakers, faculty candidates, and Mason faculty.

Prerequisite(s): Admission to CS PhD program.

Notes: This course introduces PhD students to research topics in computer science. This course can be taken twice for credit.

Hours of Lecture or Seminar per week: 3-12
Hours of Lab or Studio per week: 0
Grading: Students will receive a grade of satisfactory (S) or no credit (NC).

CS 811 - Research Topics in Machine Learning and Inference

Credits: 3 (NR)
Presents unifying principles that underlie diverse methods, paradigms, and approaches to machine learning and inference. Reviews most known learning and inference systems, discusses strengths and limitations, and suggests most appropriate areas of application. Hands-on experience by experimenting with state-of-the-art learning and inference systems and working on projects tailored to research interests.
Prerequisite(s): CS 681 or CS 687 or CS 688. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CS 818 - Topics in Computer Systems

Credits: 3 (NR)
Discussion of current research topics in computer systems. Topics vary according to faculty interest. Possible topics include peer-to-peer computing, high-performance distributed computing, sensor and ad hoc networks, autonomic computing, virtualization, and web services and middleware.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CS 880 - Research Topics in Artificial Intelligence

Credits: 3 (RD)
Special topics in artificial intelligence not occurring in regular computer science sequence.

Notes: Requires substantial student participation. Subject matter may include continuation of existing 600- or 700-level courses in artificial intelligence or other topics. May be repeated for credit when subject matter differs.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CS 884 - Advanced Topics in Computer Vision and Robotics

Credits: 3 (RD)
Covers recent developments. Topics motivated by applications to autonomous robotic systems, mobile robot navigation, multirobot systems, human-computer-environment interaction, image/video search and analysis, content discovery, and visual surveillance. Topics include 3D structure and motion recovery, motion understanding, map building and localization, object detection and recognition, and target tracking. Projects and experimental evaluation emphasized.

Prerequisite(s): CS 682 or CS 685. Prerequisite enforced by registration system.

Notes: Course may be repeated with change of topic.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CS 895 - Research Topics in CS
Advanced topics not occurring in regular sequence.

Prerequisite(s): Doctoral status.

Notes: May be repeated for credit when subject differs. Only one such course should be used for breadth requirements.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CS 896 - Directed Reading and Research

Credits: 1-6 (RD)
Reading and research on a specific topic under the direction of a faculty member.

Prerequisite(s): Permission of Instructor.

Notes: May be repeated up to a total of 9 credits. Students can sign up for this class only after passing the CS PhD qualifying exams.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0

CS 990 - Dissertation Topic Presentation

Credits: 0 (NR)
Students put together a professional presentation of a research proposal and present it for critique to fellow students and interested faculty.

Equivalent to IT 990, STAT 990.

Prerequisite(s): Student must have passed the PhD qualifying examinations.

Notes: Must be completed before the presentation of a dissertation research proposal.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 1-12

CS 998 - Doctoral Dissertation Proposal

Credits: 1-12 (RD)
Work on a research proposal that forms the basis for a doctoral dissertation.

Prerequisite(s): Student must have passed the PhD qualifying examinations and must have a dissertation advisor.

Notes: No more than 24 credits of CS 998 and 999 may be applied to the doctoral degree requirements.
**CS 999 - Doctoral Dissertation**

Credits: 1-12 (RD)
Dissertation research under the supervision of the dissertation director.

**Prerequisite(s):** Admission to candidacy.

**Notes:** No more than 24 credits of CS 998 and 999 may be applied to the doctoral degree requirements.

**Conflict Analysis and Resolution (CONF)**

Offered by the School of Conflict Analysis and Resolution

**CONF 101 - Conflict and Our World**

Credits: 3 (NR)
Brief history of field, survey of key conflict resolution themes and theories, and intervention methods. Overview includes general factors of conflict and its resolution; and nature of conflict in interpersonal, group, organizational, and international situations.

Fulfills Mason Core requirement in social and behavioral science.

**CONF 190 - Advising Seminar for Conflict Majors**

Credits: 1 (NR)
Examines issues and opportunities relevant to CONF majors to enhance their overall success in the program. Topics may include academic planning, field experience processes, critical thinking in coursework, career exploration and readiness, and co-curricular opportunities.

**Corequisite(s):** CONF 101.

**When Offered:** Fall, Spring
CONF 210 - Theories of Conflict Analysis and Resolution

Credits: 3 (NR)
Students will utilize critical thinking and analytical skills to begin an in-depth examination of the major theories of conflict analysis and resolution. Theories and case studies will include root causes and dynamics of conflict and methods of conflict analysis and resolution.

Prerequisite(s): CONF 101.

Notes: Required course for all CONF majors (BA and BS) beginning Fall 2011.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

CONF 300 - Conflict Resolution Techniques and Practice

Credits: 3 (NR)
Advanced consideration of CONF 101 topics, introduction of core notion of reflective practice, conflict resolution techniques, practice, third party roles, and ethics.

Corequisite(s): CONF 101 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CONF 301 - Research and Inquiry in Conflict Resolution

Credits: 3 (NR)
Introduces social science research methods at undergraduate level. Covers basic epistemology of social research, including quantitative and qualitative methods, emphasizing participatory action research, and evaluation and assessment work.

Prerequisite(s): CONF 101 and 210 and 45 credits, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CONF 302 - Culture, Identity, and Conflict

Credits: 3 (NR)
Covers deeply rooted, intractable, or protracted social conflicts around core issues of identity, including race, ethnicity, religion, and nationalism. Explores cultural, symbolic, and discursive approaches to identity conflict.

Fulfills writing intensive requirement in the major.
Prerequisite(s): CONF 101.

CONF 310 - Special Topics in Research

Credits: 1-6 (RT)
Examines selected topics related to research in the field of conflict analysis and resolution. Seminar format is intended to assist students conducting individual research projects. Topics vary, but will address practical skills and knowledge base necessary to conduct social science research.

Notes: May be repeated for up to 6 credits if topics vary.

CONF 315 - Discovering Organizations and Actors in the Conflict Field

Credits: 3 (NR)
Designed to give students the opportunity to discover the range of actors and organizations in the field of conflict resolution and to reflect on the possibilities and constraints that shape professional engagement in real world conflicts. In this seminar based course, students will also be encouraged to think about themselves as actors and build upon their knowledge, skills, and abilities.

Prerequisite(s): CONF 101.

CONF 320 - Interpersonal Conflict Analysis and Resolution

Credits: 3 (NR)
Covers conflict at micro level, introducing theories drawn from various disciplines including psychology, anthropology, and conflict resolution. Uses readings, case studies, and role plays to develop ability to analyze and intervene in interpersonal conflicts. Also prepares for further course work for interpersonal conflict concentration.

Prerequisite(s): CONF 101 and 210 or permission of instructor.
CONF 325 - Dialogue and Difference

Credits: 3 (NR)
Covers challenges of communicating across differences of age, gender, language, culture, political orientation, and contextual situations. Students will engage in preparing and analyzing communication strategies in conflict situations and will participate in a dialogue over the term that explores the meaning and experience of difference on the Mason campus.

Equivalent to CONF 202 (2010-2011 Catalog)

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring

CONF 330 - Community, Group, and Organizational Conflict Analysis and Resolution

Credits: 3 (NR)
Covers conflict at mezzo level, introducing theories of social harmony and conflict, drawing on sociology, social psychology, community psychology, organizational psychology, administration of justice, philosophy, and conflict resolution. Uses case studies, class presentations, and group projects to develop ability to analyze conflict and make recommendations for change. Also prepares for further course work for community and organizational conflict concentration.

Prerequisite(s): CONF 101 and 210 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CONF 331 - Simulation in Community and Organizational Conflict Resolution

Credits: 1 (NR)
Builds on the theories and concepts presented in CONF 330 to focus on the practice of group and community conflict. Through intensive simulations using conflict cases, students will have the opportunity to practice conflict resolution skills such as dialogue, problem solving, mediation and negotiation and gain a practical understanding of third party roles and intervention strategies in community, group, and organizational settings.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 1-12
When Offered: Fall, Spring

CONF 340 - Global Conflict Analysis and Resolution

Credits: 3 (NR)
Covers conflict at macro level, introducing theories of international and global violence and conflict, drawing from disciplines of international relations, political science, intercultural communication, and conflict resolution. Covers impact of globalization and structural causes of conflict. Uses class discussions, case studies, and final paper to develop analytical skills to help in analysis of conflict. Prepares for further course work for international conflict concentration.
**Prerequisite(s):** CONF 101.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**CONF 341 - Global Conflict Resolution Practice**

Credits: 1 (NR)  
Focuses primarily on global conflict resolution practice. Using the methodologies of dialogue, problem-solving, and intensive simulation, students will increase their theoretical and practical understanding of peace making, peace building, and transformation processes within a specific international case.

**Corequisite(s):** CONF 340 or permission of instructor

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**CONF 345 - Social Dynamics of Terrorism, Security, and Justice**

Credits: 3 (NR)  
Presents students with analytical frameworks to account for terrorist acts and organizations and explore social dynamics underlying the development of, and response to, terrorism. Topics may include recruitment into violent groups, counterterrorism and human rights concerns, role of religious and political ideologies in terrorism and counterterrorism, media coverage of terrorism, and effects of terrorism on social structures and processes.

Equivalent to CONF 240 (2010-2011 Catalog)

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall, Spring

---

**CONF 370 - Internship Field Experience**

Credits: 1-9 (RD)  
Internships will provide an opportunity for students to gain practical experience, reflect on those experiences, and apply academic theories outside of the normal classroom environment. Students will apply academic theories learned in the classroom to situations that arise in the work environment. Students must obtain approval and complete an internship proposal application in order to be registered for the course.

**Prerequisite(s):** CONF 101, CONF 300. Permission of instructor. 

**Notes:** Course does not have a regular meeting time; students submit work via blog and e-mail; some meetings with instructor.

**Hours of Lecture or Seminar per week:** 1-9  
**Hours of Lab or Studio per week:** 1-12  
**When Offered:** Fall, Spring, Summer
CONF 375 - Special Programs Field Experience

Credits: 1-6 (RD)
Learning experience in the application of conflict analysis and resolution (CAR) skills in special program settings. Provides supervised practice in CAR techniques, leadership, program implementation, and strategies to facilitate conflict resolution in educational institutions or community settings.

Prerequisite(s): Permission of instructor and director, controlled enrollment form required.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 0

CONF 385 - International Field Experience

Credits: 3 (RD)
Investigates conflict theory through international field experience including participation in formally organized course offered by Center for Global Education or another form of international field experience approved by program director.

Prerequisite(s): CONF 101 and permission of advisor.

Notes: May be repeated for up to 6 credits.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CONF 393 - Philosophy, Conflict Theory, and Violence

Credits: 3 (NR)
Examines causes, sources, and origins of group violence with particular attention to group violence of ethnicity conflict. Explores alternative proposals that explain why violence becomes primary, or at least viable, form of revolving conflict in some societies.

Prerequisite(s): CONF 101 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CONF 394 - Human Rights and Inequality

Credits: 3 (NR)
Examines inequality, social justice, and human rights in an age of globalization. Topics may include international law and order, welfare-and social policy, regionalism and multilateralism, environmental protection, gender equality, terrorist and transnational criminal networks, human trafficking, modern slavery, world poverty, corporate military firms, governance of global financial institutions, security, and transnational social movements.
CONF 397 - Study Abroad Special Topics

Credits: 1-9 (RT)
Transfer credit for relevant coursework taken during direct exchange study abroad trips.

Prerequisite(s): CONF 101.

CONF 398 - Special Topics in Advanced Techniques and Practices

Credits: 3 (RT)
Examines selected topics relating to conflict resolution techniques and practices. Topics vary but may include mediation, negotiation, reflective practice, and facilitation.

Prerequisite(s): CONF 101, CONF 300.

Notes: May be repeated for up to 9 credits if topics vary.

CONF 399 - Special Topics in Conflict Analysis and Resolution

Credits: 3 (RT)
Examines selected topics relating to analysis or resolution of conflict. Topics vary but may include historical examination of conflict, social issues stemming from conflict, ethical issues in intervention, globalization, human rights, sources of conflict, or relationship of particular identity domains to conflict.

Notes: May be repeated for up to 9 credits if topics vary.

CONF 485 - Service Learning Intensive
Credits: 1-9 (RT)
Provides students with real-world setting to link conflict theory to resolution practice. Students will engage with grassroots organizations in conflict assessment, resolution process designs, trainings, and project implementation in domestic and international settings.

Prerequisite(s): CONF 101 and CONF 300.

Notes: May be repeated for up to 12 credits. May require additional fees.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Summer, Spring

CONF 490 - RS: Integration

Credits: 3 (NR)
Capstone course in which students reflect on what they have learned, integrating knowledge from course work and synthesizing it to cogent body of knowledge. Includes class discussion and final project that demonstrates understanding of conflict theory and reflective practice.

Fulfills Mason Core requirement in synthesis.

Designated as a research and scholarship intensive course.

Prerequisite(s): 300-level CONF course.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CONF 499 - Independent Research in Conflict Analysis and Resolution

Credits: 1-6 (RD)
Readings and research conducted on individual basis in consultation with instructor.

Prerequisite(s): CONF 101, CONF 300, CONF 301, and permission of program director.

Notes: Student may not present more than 3 credits for graduation credit.

Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 0

CONF 501 - Introduction to Conflict Analysis and Resolution

Credits: 3 (NR)
Prerequisite or corequisite for all MS CONF majors. Introduces field of conflict analysis and resolution. Examines definitions of conflict and diverse views of its "resolution." Explores thinking about human behavior, and social systems as they relate to origins of conflict and role of conflict in violent and peaceful social change. Considers appropriate responses to conflict at
interpersonal, intergroup, industrial, communal, and international levels.

**Prerequisite(s):** CONF 501

**Notes:** Permission of instructor not required for this course.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**CONF 502 - Intensive Introduction to Conflict Analysis and Resolution**

Credits: 3 (NR)  
Introduces field of conflict analysis and resolution. Examines the origins of social conflict, the practices and strategies for responding to conflict, and frameworks for constructive intervention. Considers interpersonal, community, and large-scale intergroup conflict.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**CONF 595 - Selected Topics**

Credits: 1-3 (RT)  
Topics vary each semester and are announced each academic year.

**Prerequisite(s):** CONF 501.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**CONF 601 - Theories of Conflict and Conflict Resolution**

Credits: 3 (NR)  
Examines major theories of conflict causation and motivation. Emphasizes need for theories to inform processes of conflict resolution. Weaves together ideas from conventional disciplines with new approaches, especially with regard to causes and methods of resolving deep-rooted conflict.

**Prerequisite(s):** CONF 501 or 801

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**CONF 610 - Philosophy and Methods of Conflict Research**
Introduces students to the philosophies behind social science research and the methods for conducting research in the field of conflict resolution. Focuses on the identification of research problems associated with particular conflict situations, selection of appropriate research methods, and the design of effective research projects.

**Prerequisite(s):** CONF 501 or 801

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  

**CONF 611 - MS Research II**

Credits: 3 (NR)  
Guides students through design, execution, interpretation, analysis, presentation, and evaluation of field research in conflict and resolution.

**Prerequisite(s):** CONF 501 and 610

**Notes:** Builds on CONF 610.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  

**CONF 620 - Reflective Practice in Interpersonal-Multiparty Conflicts**

Credits: 3 (NR)  
Introductory skill-building course integrating conflict theory and practice using reflective practitioner model. Students learn necessary skills for third-party facilitation and mediation, including active listening, empathy, paraphrasing, reframing, and negotiation, in addition to analytical skills of problem solving and creation of transformational processes. Cases for practice focus on interpersonal and intergroup conflict.

Equivalent to CONF 713 (2011-2012 Catalog)

**Corequisite(s):** CONF 501.

**Hours of Lecture or Seminar per week:** 0  
**Hours of Lab or Studio per week:** 3  
**When Offered:** Fall, Spring

**CONF 621 - Reflective Practice in Organizational or Community Conflict**

Credits: 3 (NR)  
Moves from conflicts that are simply described to those with multilevel components, such as community and organizational conflicts. Expands skills acquired in CONF 620 by adding recording chronology, identifying roles played by various participants, observing turning points in process, and precisely stating agreed-on solution.

**Corequisite(s):** CONF 501 and CONF 620.
CONF 622 - Reflective Practice in International Conflict and Civil Strife

Credits: 3 (NR)
Continues study of resolution processes as applied to highly complex systems, especially where one party denies legitimacy of existing political authority. Considers third-party options for intervention in revolutionary and international conflicts, building communication and trust among parties, and implementing agreements.

Corequisite(s): CONF 501 and CONF 620.

CONF 642 - Integration of Theory and Practice

Credits: 3 (NR)
Taken in last semester of master's student course work. Assists in developing students' own theories of conflict and conflict resolution by reviewing and integrating prior course work. Students expected to demonstrate holistic comprehension by writing major essay of publishable quality.

Prerequisite(s): CONF 501, 601, 610, 713

Corequisite(s): CONF 501, 601, 610, 713

CONF 643 - Pract: Conf Anly/Resolut

Credits: 3 (NR)

CONF 650 - Conflict Analysis and Resolution Advanced Skills

Credits: 3 (NR)
Introduces innovative practices and provides structure to reflect on and improve ability to work within conflict settings. Considers the intersection of theory and practice, with special attention to the challenges of translation, adaptation, and transfer of
skills and models.

Prerequisite(s): CONF 501 or 502

Corequisite(s): CONF 501 or 502

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CONF 651 - Collaborative Community Planning

Credits: 3 (NR)

Covers designing collaborative processes to work with diverse stakeholders to build meaningful and lasting shared agreements. Considers applications in land use, development, or other community planning contexts. Designated a Green Leaf Course.

Prerequisite(s): CONF 501 or 502.

Corequisite(s): CONF 501 or 502.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CONF 652 - Conflict Analysis and Resolution for Prevention, Reconstruction, and Stabilization Contexts

Credits: 3 (NR)

Considers conflict analysis and resolution approaches to designing, implementing, and evaluating holistic cross-sectoral, conflict-sensitive initiatives in areas of potential violence and postconflict reconstruction and stabilization contexts.

Prerequisite(s): CONF 501 or 502

Corequisite(s): CONF 501 or 502

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CONF 653 - World Religions, Diplomacy, and Conflict Resolution

Credits: 3 (NR)

Analyzes ways world religions play role in conflicts, war, diplomacy, peace making, and conflict resolution.

Prerequisite(s): CONF 501 or 502

Corequisite(s): CONF 501 or 502
CONF 656 - Integrating Complementary Approaches in Conflict Analysis and Resolution

Credits: 3 (NR)
Considers designs and methods for conflict analysis and resolution that integrate multiple approaches, stakeholders, and methods. Applies to social conflicts in local and international contexts.

Prerequisite(s): CONF 501 or 502

Corequisite(s): CONF 501 or 502

CONF 657 - Facilitation Skills

Credits: 3 (NR)
Covers range of skills in group facilitation processes, with emphasis on conflict analysis and resolution approaches to improve group communication. Includes skill-building exercises.

Prerequisite(s): CONF 501 or 502

Corequisite(s): CONF 501 or 502

CONF 658 - Diversity and Difference in Conflict Analysis and Resolution

Credits: 3 (NR)
Covers elements of cultural diversity, understanding, and awareness, as well as creative ways of approaching issues of diversity, identity, worldviews, and territory. Considers individuals, organizations, communities and nations.

Prerequisite(s): CONF 501 or 502

Corequisite(s): CONF 501 or 502

CONF 659 - Leadership in Conflict Analysis and Resolution
Credits: 3 (NR)
Covers roles and styles of leadership in interpersonal, organizational, community, group, and international conflicts. Considers cultural roles of leaders as insider-partials, negotiators, facilitators, and mediators.

Prerequisite(s): CONF 501 or 502

Corequisite(s): CONF 501 or 502

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CONF 660 - Conflict Assessment and Program Evaluation

Credits: 3 (NR)
Covers assessment methods appropriate to conflict contexts and related evaluation approaches and techniques for use in areas of peace building, community processes, or interpersonal conflict.

Prerequisite(s): CONF 501 or 502

Corequisite(s): CONF 501 or 502

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CONF 665 - Special Topics in Conflict Analysis and Resolution

Credits: 3 (RD)
In-depth study of contemporary areas of conflict resolution practice.

Prerequisite(s): CONF 502 or permission of the instructor

Notes: Fulfills elective requirement for certificate program. Topics vary.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CONF 668 - Applied Integration for Graduate Certificates

Credits: 3 (NR)
Capstone course facilitating integration of learning in the graduate certificate programs and appropriate mentored application and experiential learning.

Prerequisite(s): CONF 501 or 502; CONF 660; and CONF 650,651,652 or 653

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
CONF 682 - Principles of Environmental Conflict Resolution

Credits: 3 (NR)

Explores the nature and characteristics of environmental conflict and efforts to manage, resolve or transform it. Students will develop a capacity to assess the strengths and weaknesses of environmental conflict resolution processes while learning about best practices for preventing, preparing for, and addressing environmental conflict. Designated a Green Leaf Course.

Equivalent to EVPP 682

Prerequisite(s): CONF 501, 502, EVPP 607 or permission of instructor

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CONF 683 - Environmental Conflict Resolution and Collaboration: Situation Assessment, Process Design and Best Practices

Credits: 3 (NR)

Explores best practices for managing, resolving, and transforming environmental conflict using environmental conflict resolution (ECR) processes. Nature and dynamics of environmental disputes, methods for assessing conflict situations, and methods for conducting various forms of ECR processes will be covered in the context of selected case studies with emphasis on student involvement. Designated a Green Leaf Course.

Equivalent to EVPP 683

Prerequisite(s): CONF 682/EVPP 682 or permission of instructor

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CONF 684 - Environmental Conflict Resolution and Collaboration: Leadership Practicum/Capstone

Credits: 3 (NR)

Capstone course for the Graduate Certificate in Environmental Conflict Resolution and Collaboration. Under supervision of the instructor, students will undertake an assessment of an active environmental conflict and recommend a range of processes that promote identified goals for preferred conflict outcomes.

Equivalent to EVPP 684

Prerequisite(s): CONF 682/EVPP 682, CONF 683/EVPP 683
CONF 690 - Practicum in Conflict Analysis and Resolution

Credits: 3 (RD)
In-depth field study of ongoing conflict situations, and design and delivery of intervention processes to manage or resolve conflicts.

Prerequisite(s): CONF 501 or 801, and 713

Notes: Two semesters, 3 credits per semester.

CONF 694 - Internship

Credits: 1-6 (RT)
Students are expected to mesh theory and practice through observation and experience. Includes comprehensive report analyzing experiences. For 3 credits of internship students must complete 160 hours of work on site. Students must receive permission of the Internship Coordinator prior to registering.

Prerequisite(s): 21 credits, including CONF 620.

Notes: Under direction of internship coordinator, students spend at least 160 hours on project involving study, resolution of conflict for each 3-credit internship.

CONF 695 - Selected Topics

Credits: 3 (RT)
Topics vary; announced each academic year.

CONF 697 - Directed Reading
Independent reading at master's level on specific topic related to conflict analysis and resolution, as agreed to by student and faculty member.

**Notes:** May be repeated up to 6 credits.

- **Hours of Lecture or Seminar per week:** 1-6
- **Hours of Lab or Studio per week:** 1-3

**CONF 702 - Peace Studies**

Credits: 3 (NR)

Examines diverse meanings of peace, conflict, and violence, and then reviews different issues relevant to understanding peace and conflict, including the sources of war, poverty and economic disparities, and ecological degradation. Other topics to be covered are peace keeping, peace building, sustainable development, ecological preservation, nonviolence, and peace movements.

Designated a Green Leaf Course.

- **Hours of Lecture or Seminar per week:** 3
- **Hours of Lab or Studio per week:** 0

**CONF 704 - Narrative Approaches to Conflict Analysis**

Credits: 3 (NR)

This course provides participants with the analytic tools needed to conduct their own research on conflict and conflict resolution, using a narrative perspective. This course enables students to a) review the key narrative research in the field of conflict resolution; b) design a narrative analysis of conflict; c) conduct a narrative analysis of conflicts.

**Corequisite(s):** CONF 501, 801, or permission by instructor.

- **Hours of Lecture or Seminar per week:** 3
- **Hours of Lab or Studio per week:** 0

**CONF 705 - Conflict and Discourse Analysis**

Credits: 3 (NR)

The study of discourse, culture, narratives and public interpretations are becoming ever more important to the field of Conflict Analysis and Resolution. In this class we explore these concepts as they have been used in cutting edge approaches to the analysis and resolution of conflict.

**Corequisite(s):** CONF 501, 801, or permission by instructor.

- **Hours of Lecture or Seminar per week:** 3
- **Hours of Lab or Studio per week:** 0
CONF 706 - Ethics and Conflict

Credits: 3 (NR)
Students explore issues and controversies in our field about what is just and unjust, morally right and wrong, and good and bad. Such issues are relevant to analysis and practice before, during, after the occurrence of conflict; The major topics include: validity of pacifism, the notions of a just war, the challenges of genocide prevention, non-violent resistance, humanitarian interventions, and human rights activism.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Summer

CONF 707 - Gender and Violence

Credits: 3 (NR)
This course will address gendered dimensions of violent conflict and its transformation. Key themes to be explored include gender and post-conflict justice and reconciliation; the gendered politics of memory, speech and representation; militarism and masculinity; sexual violence and discourses of trauma, victimization and agency; and the ethics and politics of analytic and practice approaches. Case studies will include the partition of India/Pakistan; wartime sexual assault in Bosnia/the DRC; and domestic violence in the U.S. and South Asia.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Summer

CONF 708 - Identity and Conflict

Credits: 1-3 (NR)
Explores complex interrelations of social identity and postmodern conflicts in society. Emphasizes the role of identity in processes of conflict resolution and transformation. Critical rethinking of ethnic, national, and religious identities as both generators and outcomes of conflict are an important part of the course. Extends knowledge on structure and dynamics of identity-based conflicts and develops a framework for their resolution. Course includes lectures, simulations, and case studies.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CONF 709 - War, Violence, and Conflict Resolution

Credits: 3 (NR)
Considers various theories, causes, and conditions of violence, and applies them to variety of cases: family abuse, religious and ethnic violence, terrorism, revolution, and warfare. Applies insights from study of initiation, escalation, management, resolution, and prevention of violence to theories about resolving deep rooted conflicts.

Prerequisite(s): CONF 501 or 801
CONF 720 - Ethnic and Cultural Factors in Conflict Resolution

Credits: 1-3 (NR)
Examines the role culture plays in genesis, structuring, and resolution of processes of conflict within and between groups. Special attention to ethnicity and other subcultural markers of identity in complex social systems as generators and outcomes of conflict. Explores relevance of variables to success or failure of conflict resolution.

Prerequisite(s): CONF 501 or 801

CONF 721 - Conflict and Race

Credits: 3 (NR)
Addresses historic analyses of racial and ethnic identity conflicts and their resolution.

Equivalent to SOCI 523

Prerequisite(s): CONF 501 or 801

CONF 722 - Conflict and Religion

Credits: 3 (NR)
Explores role of religious ideas, practices, and organizations in conflict, war, peace making, and conflict resolution.

Prerequisite(s): CONF 501 or 801

CONF 723 - Conflict and Gender

Credits: 3 (NR)
Examines constructs of gender and conflict as they relate to critical analysis of theory and practice. Reviews feminist theories for contributions to social and conflict theories. Uses narratives to explore how gender, power dynamics interact in conflict.
CONF 724 - Conflict and 'Isms'

Credits: 3 (NR)
Prerequisite(s): CONF 501 or 801; 720 recommended.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CONF 725 - Conflict and Spirituality

Credits: 3 (NR)
Prerequisite(s): CONF 501 or 801.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CONF 726 - Moral and Philosophical Foundations of Conflict

Credits: 3 (NR)
Explores major historical and contemporary positions on the intellectual, moral, and religious foundations for analyzing and resolving conflict. Enhances critical abilities in metacritique, dialectics, and intellectual self-appropriation.

Prerequisite(s): CONF 501 or 801

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CONF 728 - Human Rights Theory and Practice in Comparative Perspective

Credits: 3 (NR)
Introduces major controversies and debates surrounding use of human rights theory and practice cross-culturally. After basic study of human rights philosophy, uses case studies from around the world to examine problems and potential of human rights in today's globalized world.

Prerequisite(s): CONF 501 or 801, or permission of instructor

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
CONF 729 - Approaches to Violence

Credits: 3 (NR)
Explores violence from variety of intellectual and political perspectives. Readings are wide-ranging and interdisciplinary, addressing levels of analysis from biological to nation-state and transnational processes.

Prerequisite(s): CONF 501 or 801

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CONF 730 - Structural Sources of Conflict

Credits: 3 (NR)
Examines how structures and institutions affect behavior and give rise to conflictual relationships at all social levels, from interpersonal to the international. Explores role of conflict resolution as political process providing opportunities for nonviolent system change.

Prerequisite(s): CONF 501 or 801, and 601 for MS; or 803 for PhD

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CONF 731 - Conflict in Organizations

Credits: 3 (NR)
Explores intersection and dynamics of organizational behavior and dimensions of conflict. Involves theoretical perspectives and cases examining conflict analysis and resolution. Practices strategies for prevention and intervention. Field research in greater metropolitan area integrates course content.

Prerequisite(s): CONF 501 or 801

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CONF 732 - Conflict in Development

Credits: 3 (NR)
Examines the relationship between processes of political and economic change and conflict; the relationship between democratization and conflict; the relationship between structural adjustment policies and conflict; and the challenges of postconflict reconstruction.

Prerequisite(s): CONF 501 or 801

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
CONF 733 - Law and Justice from a Conflict Perspective

Credits: 1-3 (NR)
Contrasts legal processes and institutions with alternative approaches to dispute resolution. Defines and distinguishes among law, "alternative dispute resolution," and problem-solving analysis as methods for resolving rather than controlling conflict. Examines to what extent legal procedures are truly applicable to resolving deep-rooted conflict.

Prerequisite(s): CONF 501 or 801

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CONF 734 - Conflict and Crime

Credits: 3 (NR)
Prerequisite(s): CONF 501 or 801 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CONF 735 - Global Context of Conflict

Credits: 3 (NR)
Advances skills and knowledge base in critical analysis and creative problem-solving. Examines root causes of conflict in global context in terms of gender inequality, cultural differences, unequal North and South relations, militarism, economic oppression, genocide, maldevelopment, religious and ethnic struggles, and environmental scarcity. Students develop their own conceptual tool boxes to analyze conflicts in different parts of the world.

Prerequisite(s): CONF 501 or 801

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CONF 736 - Globalization and International Conflict

Credits: 3 (NR)
Explores economic, political, social, and cultural meanings of globalization; how they affect conflict processes at international level; and when and under what conditions globalization promotes cooperation or conflict.

Prerequisite(s): CONF 501 or 801.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
CONF 737 - Societies/Globalizatn/Conflict

Credits: 3 (NR)
Prerequisite(s): CONF 501 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CONF 739 - Collective Action, Social Movements, and Globalization

Credits: 3 (NR)
Explores how people translate underlying grievances into collective action. Examines how groups organize, frame, and develop strategies and tactics to pursue agendas, and how processes of globalization have influenced social movement dynamics.

Prerequisite(s): CONF 501 or 801.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CONF 740 - Conflict Roles, Resources, and Ethics

Credits: 3 (NR)
Analyzes and critiques nature and roles in conflicts. Uses theoretical perspectives, case histories to understand how settings affect roles. Includes ethical assessment of interventions in variety of conflict settings.

Prerequisite(s): CONF 501 or 801, 713

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CONF 741 - Negotiations

Credits: 3 (NR)
Uses negotiating experiences to construct framework for thinking about and analyzing negotiation processes. Framework then used to organize review of research literature on rhythms and patterns of negotiation and to analyze actual cases. Interweaves exercises, class projects with state-of-the-art concepts and findings.

Prerequisite(s): CONF 501 or 801 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
CONF 742 - Environment and Policy

Credits: 3 (NR)
Prerequisite(s): CONF 501 or 801 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CONF 743 - Dynamics of Conflict Termination

Credits: 3 (NR)
Investigates a number of themes relating to war termination with an emphasis on contemporary civil wars. Considers the nature of civil war, focuses attention on a number of contemporary cases, raises questions relating to settlement and series of themes relating to peace implementation and peace building.

Prerequisite(s): CONF 501 or 801

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CONF 744 - Peace Keeping

Credits: 3 (NR)
Prerequisite(s): CONF 501 or 801.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CONF 745 - Leadership Roles in Conflict and Conflict Resolution

Credits: 3 (NR)
Leadership responses to conflict are affected by several variables, including race, ethnicity, and gender. Explores roles of leadership decision-making styles as agents of conflict across range of conflict scenarios at interpersonal, community, organizational, and international levels.

Prerequisite(s): CONF 501 or 801

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CONF 746 - Peace Building

Credits: 3 (NR)
Building on initiatives of United Nations and other multilateral organizations, explores dynamics of post-conflict peace building.
Prepares students of conflict resolution to play innovative roles in reconstruction of civil societies.

Prerequisite(s): CONF 501 or 801

**CONF 747 - Reconciliation**

Credits: 3 (NR)
Explores processes of acknowledgment, reconciliation, forgiveness, and restitution. Reviews literature, case studies, and other research to assess applicability and impact of these efforts.

Prerequisite(s): CONF 501 or 801

**CONF 748 - Comparative Peace Processes**

Credits: 3 (NR)
Compares case studies drawn from actual peace processes, both successful and unsuccessful, to illuminate principles and complexities.

Prerequisite(s): CONF 501 or 801, and 601 or 803.

**CONF 749 - World Religions, Violence, and Conflict Resolution**

Credits: 1-3 (NR)
Examines how world religions play a role in conflict and conflict resolution. Investigates how values, world view, and hermeneutics influence strategies for successful conflict interventions.

Prerequisite(s): CONF 501 or 801

**CONF 750 - Evaluation of Conflict Resolution Initiatives**

Credits: 3 (NR)
Examination of models and methodologies for evaluation of conflict resolution initiatives. Evaluation approaches taught will
include action evaluation, program evaluation, formative evaluation, and summative evaluation. Students will be expected to complete an evaluation design for an actual conflict resolution-related initiative as the major course requirement and participate in the class evaluation project.

**Prerequisite(s):** CONF 501 or 801.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**CONF 751 - Political Economy of Civil War and Peacebuilding I**

Credits: 3-6 (NR)  
The course will cover the latest research, theories, and case analysis on civil wars and peacebuilding, including topics such as: The social, economic, and political institutional origins of conflict; The roles of resources, institutions, and social formations in shaping dynamics of civil war and other related forms of contentious politics; War termination and comparative peace processes; Components and dynamics of peacebuilding and the relationships among peacebuilding, democratization, and state-building; Roles of third parties in promoting negotiations, peace implementation and sustainable peacebuilding and reconciliation. Case studies of contemporary civil wars will be used to illustrate and test these conceptual frameworks. This course is the first in a year-long seminar. Students are required to take the second course in the seminar CONF 752.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall

---

**CONF 752 - Political Economy of Civil War and Peacebuilding II**

Credits: 3-6 (NR)  
The course will cover the latest research, theories, and case analysis on civil wars and peacebuilding, including topics such as: The social, economic, and political institutional origins of conflict; The roles of resources, institutions, and social formations in shaping dynamics of civil war and other related forms of contentious politics; War termination and comparative peace processes; Components and dynamics of peacebuilding and the relationships among peacebuilding, democratization, and state-building; Roles of third parties in promoting negotiations, peace implementation and sustainable peacebuilding and reconciliation. Case studies of contemporary civil wars will be used to illustrate and test these conceptual frameworks. This course is the second in a year-long seminar. Students are required to have taken CONF 751 in the previous semester.

**Prerequisite(s):** CONF 751.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall

---

**CONF 753 - Post-Conflict Contexts: Between Global and Local**

Credits: 3 (NR)  
Focuses on the aftermath of violent conflict, attending to issues of structural inequality, memory, narrative, gender, trauma, culture and identity. Critically evaluates theories and practices of transitional justice and post-conflict peacebuilding, including justice, reparation, truth-telling, reconciliation, memorialization and psychosocial repair. Considers forms of social change and
governance that emerge through post-conflict interventions, and explores dynamic frictions between globalizing models and local concerns.

**CONF 754 - Micro-theories of Conflict**

Credits: 3 (NR)
The goal of this course is to explore theoretical approaches to psychological processes, personality, in-group and intergroup dynamics, and social processes in the society as a whole with the emphasis on their role in the processes of conflict resolution and transformation. Critical understanding of psychological and socio-psychological phenomena as both generators and outcomes of conflict will be an important part of the course. This course has three main parts: psychological processes, approaches to person, and group processes and society.

Corequisite(s): CONF 501.

**CONF 755 - Transforming Conflict through Insight**

Credits: 3 (NR)
The Insight approach is best understood as an applied human science. Like other applied sciences, it requires students to master an explanatory framework that enables them to frame their questions, formulate their hypotheses, verify their findings, and plan their actions. Thus, the course is designed follow an activity-based, problem-solving approach to learning and using the Insight approach. The objective is to enable students to master the Insight approach by putting it to work, with course meetings build around analytical exercises and activities designed to illuminate assigned readings.

Corequisite(s): CONF 501.

**CONF 756 - Addressing Intractable Conflict**

Credits: 3 (NR)
This course is about the biggest problems facing our communities, our nation, and our world today. Our communities, our nations (the US and others), and the world have proven remarkably unable to "solve" any of these problems. Why? We assert it is because they are all underlain by a more fundamental problem — the inability to constructively deal with difficult and intractable conflicts. These conflicts prevent us as individuals, organizations, and governments (at all levels) from making wise decisions or taking effective action that will address any of these pressing problems.
CONF 757 - Conflict and Literature

Credits: 3 (NR)
The purpose of this course is to teach students to read/interpret written and oral texts; explore what imaginative literature can teach us about the causes, motives, dynamics, and possibilities of resolving violent social conflicts; deepen our understanding of the human dimensions of conflicts involving mass movements for social transformation; and practice creating imaginative works of our own.

Corequisite(s): CONF 501.

CONF 795 - Professional Development Seminars

Credits: 1-2 (RT)
These 1- and 2-credit courses are scheduled non-conventionally using weekends, concentrated presentations, and intersession periods to develop advanced professional skills. Possible topics include marketing conflict resolution services, academic course design, training design, mediation, facilitation, family practice, fundraising, writing for publication, advanced field research techniques, and grassroots applications of conflict resolution.

Prerequisite(s): CONF 501 or 801, or permission of instructor.

Notes: May be repeated.

CONF 797 - Proposal Development

Credits: 1 (NR)
Covers development of research proposal for master’s thesis, including framing a question, literature review, and designing appropriate methodology. Students form master’s thesis committee and review Human Subjects Review Board’s guidelines and procedures.

Corequisite(s): CONF 501 and 610
Grading: Satisfactory/No Credit only
When Offered: Fall, Spring

CONF 799 - Master's Thesis

Credits: 1-6 (RT)
Two semesters, usually taken as 3 credits per semester. Original research or analysis under direction of thesis committee.

Prerequisite(s): CONF 501, 713, 610.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 1-6
Grading: Satisfactory/No Credit

CONF 801 - Introduction to Conflict Analysis and Resolution

Credits: 3 (NR)
Introduces field of conflict analysis and resolution for doctoral students. Examines definitions of conflict and diverse views of resolution. Explores thinking about human behavior and social systems as they relate to origins and role of conflict in violent and peaceful social change. Considers appropriate responses to conflict at interpersonal, intergroup, industrial, communal, and international levels.

Notes: Prerequisite or corequisite for all PhD CONF students

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CONF 802 - Theories of the Person

Credits: 3 (NR)
Understanding human conflict requires knowledge of human behavior, motivation, and perception. Reviews and critically analyzes several psychological theories for application to conflict analysis and resolution theory and practice.

Prerequisite(s): CONF 801

Corequisite(s): CONF 801

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CONF 803 - Structural Theories

Credits: 3 (NR)
Understanding social conflict and potential for conflict resolution requires that both conflict and cooperation be perceived in
relation to patterns of social change. Reviews and critiques significant theories of social change to establish a basis for creative conflict analysis and resolution.

Prerequisite(s): CONF 801.

CONF 804 - Alternate Theoretical Foundations

Credits: 3 (NR)
Familiarizes students with the ideas generated by the Frankfurt School of social theorists and others who have extended or altered these ideas. Students will use these insights to deepen an understanding of serious social conflicts and to explore the implications of critical theories for conflict resolution processes.

Corequisite(s): CONF 801

CONF 811 - Quantitative Foundations

Credits: 3 (NR)
Building on logic of inquiry, introduces steps in research process to prepare dissertation and implement published research. Covers wide array of quantitative research approaches in social sciences, with emphasis on conflict analysis.

Prerequisite(s): CONF 801.

CONF 812 - Qualitative Foundations: Social Sciences

Credits: 3 (NR)
Continuation of steps in research process to prepare dissertation and implement published research. Builds on CONF 811 by examining qualitative research approaches used in social sciences, with emphasis on conflict analysis.

Prerequisite(s): CONF 801.

CONF 813 - Qualitative Foundations: Humanities
Conf 820 - Reflective Practice in Interpersonal-Multiparty Conflicts

Credits: 3 (NR)
Introductory skill-building course integrating conflict theory and practice using reflective practitioner model. Students learn necessary skills for third-party facilitation and mediation, including active listening, empathy, paraphrasing, reframing, and negotiation, in addition to analytical skills of problem solving and creation of transformational processes. Cases for practice focus on interpersonal and intergroup conflict.

Equivalent to CONF 713 (2011-2012 Catalog)

Corequisite(s): CONF 801.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 3
When Offered: Fall, Spring.

Conf 821 - Reflective Practice in Organizational or Community Conflict

Credits: 3 (NR)
Moves from conflicts that are simply described to those with multilevel components, such as community and organizational conflicts. Expands skills acquired in CONF 820 by adding recording chronology, identifying roles played by various participants, observing turning points in process, and precisely stating agreed-on solution.

Corequisite(s): CONF 801 and CONF 820.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 3
When Offered: Fall, Spring.

Conf 822 - Reflective Practice in International Conflict and Civil Strife

Credits: 3 (NR)
Continues study of resolution processes as applied to highly complex systems, especially where one party denies legitimacy of existing political authority. Considers third-party options for intervention in revolutionary and international conflicts, building communication and trust among parties, and implementing agreements.
Corequisite(s): CONF 801 and CONF 820.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 3
When Offered: Fall, Spring.

CONF 890 - Practicum in Conflict Analysis and Resolution

Credits: 3 (RD)
In-depth field study of ongoing conflict situations. Design and delivery of intervention processes to manage or resolve conflicts.

Prerequisite(s): CONF 801 and 713.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 5
Grading: Graduate Special

CONF 897 - Directed Reading

Credits: 1-3 (RD)
Independent reading at doctoral level on a specific topic related to conflict and conflict resolution as agreed to by student and faculty member.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CONF 900 - Integrating Theory, Practice, and Method in Conflict Analysis

Credits: 3 (NR)
Analyzes theoretical basis undergirding methods of research in conflict resolution. Explores how theory is built through reciprocal influence of research and practice. Assists students to fill in gaps in their knowledge and prepare for comprehensive examinations. Prepares students to write integrated research proposals.

Prerequisite(s): CONF 801 and 802, and at least 9 additional credits of required doctoral courses

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CONF 901 - Theory Development

Credits: 3 (NR)
Prerequisite(s): CONF 801, 802, or permission of instructor.
CONF 998 - Doctoral Dissertation Proposal

Credits: 1-6 (RD)
Work on research proposal that forms basis for doctoral dissertation.

Prerequisite(s): Successful completion of all course work and doctoral qualifying exams

Notes: May be repeated.

CONF 999 - Doctoral Dissertation Research

Credits: 1-12 (RD)
Research on approved dissertation topic under direction of committee. Student's dissertation proposal must be approved before registering for 999.

Notes: At least 12 credits of 998 and 999 must be accumulated toward degree.

Conservation Studies (CONS)

Offered by the University

CONS 100 - Introduction to Field Conservation Ecology

Credits: 2 (NR)
In this immersive I-week experience, students will acquire firsthand exposure to fieldwork in conservation and how conservation professionals contribute to survival of species in natural habitats. Through a combination of lectures, discussions, fieldwork and outdoor adventure students will be introduced to major concepts of ecology (including diversity, succession, species interactions, communities, populations and ecosystems) in the context of species and habitat conservation.

Prerequisite(s): Participation in the Washington Youth Summit on the Environment.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 0
CONS 320 - Conservation in Practice

Credits: 3 (NR)
Work with a conservation mentor in a practicum experience. Create a portfolio documenting professional development.

Prerequisite(s): 60 credits and college level coursework in the biological or environmental sciences.

Notes: Must be taken concurrently with CONS 401, CONS 402, CONS 410, and CONS 490 or CONS 403, CONS 404, CONS 411, and CONS 491. Only offered through the Smithsonian-Mason Semester.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CONS 401 - Conservation Theory

Credits: 3 (NR)

Introduces the field of conservation biology and science-based management of threatened wildlife, habitats, and human landscapes. Provides theoretical background for understanding the importance of biodiversity conservation and sustainability. Designated a Green Leaf Course.

Prerequisite(s): 60 credits and college level coursework in the biological or environmental sciences.

Notes: Must be taken concurrently with CONS 320, CONS 402, CONS 410, and CONS 490. Only offered through the Smithsonian-Mason Semester. Students cannot get credit for this course and Biology 318 or NCLC 401.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 1

CONS 402 - Applied Conservation

Credits: 4 (NR)

A practical scientific approach to the nature of biodiversity and species loss. Students participate in field conservation exercises in a variety of settings, as well as endocrine and reproductive technology labs. Students apply field and laboratory experiences to understanding science's connection to management decision-making for conservation. Designated a Green Leaf Course.

Prerequisite(s): 60 credits and college level coursework in the biological or environmental sciences.

Notes: Must be taken concurrently with CONS 320, CONS 401, CONS 410, and CONS 490. Only offered through the Smithsonian-Mason Semester.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 2
CONS 403 - Ecology and Conservation Theory

Credits: 3 (NR)

Students learn ecological theories that underlie successful conservation practice. Content includes an in-depth examination of factors that influence the distribution and abundance of organisms within landscapes across temporal and spatial scales. In individual and group activities, students review conservation case studies, interpret scientific data, and apply their analysis to conservation scenarios at many scales.

Designated a Green Leaf Course.

Prerequisite(s): Admission into the Smithsonian-Mason Monitoring Semester.

Corequisite(s): Enrollment in the Smithsonian-Mason Monitoring Semester.

Hours of Lecture or Seminar per week: 0-3
Hours of Lab or Studio per week: 0-3

CONS 404 - Monitoring and Assessment of Biodiversity

Credits: 4 (NR)

In lab and field experiences, students learn practical techniques for the assessment, monitoring and conservation of species and habitats. Students practice sampling species and learn to evaluate the effectiveness of those techniques. Through individual and group projects, students collect, analyze data across a variety of temporal and spatial scales.

Designated a Green Leaf Course.

Prerequisite(s): Admission into the Smithsonian-Mason Monitoring Semester.

Corequisite(s): Enrollment in the Smithsonian-Mason Monitoring Semester.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 3

CONS 410 - Human Dimensions in Conservation

Credits: 3 (NR)

Provides sociological, local and global perspectives on conservation issues including adaptive management, conflict resolution, environmental economics, sustainability, public policy, environmental values and public opinion, and conservation ethics.

Designated a Green Leaf Course.

Fulfills Mason Core requirement in social and behavioral science.

Prerequisite(s): 60 credits and college level coursework in the biological or environmental sciences.
Notes: Must be taken concurrently with CONS 320, CONS 401, CONS 402, and CONS 490. Only offered through the Smithsonian-Mason Semester.

**CONS 411 - Science Communication for Conservation**

Credits: 3 (NR)

Addresses the need for clear, direct and proactive communication of scientific processes. Students design communication strategies for diverse audiences and learn skills to engage stakeholders in dialogue related to specific conservation issues. Through individual and group activities that emphasize written, visual and oral communications techniques, students learn how the messages can affect people.

Designated a Green Leaf Course.

**Prerequisite(s):** Admission into the Smithsonian-Mason Monitoring Semester.

**Corequisite(s):** Enrollment in the Smithsonian-Mason Monitoring Semester.

**CONS 420 - Human-Wildlife Conflict**

Credits: 3 (NR)

Covers the impact of human-wildlife conflict on conservation efforts and human health and well being.

**CONS 490 - Integrated Conservation Strategies**

Credits: 3 (NR)

Integrates the course work of the Smithsonian-Mason Semester through study of current conservation issues. Students incorporate interdisciplinary aspects of conservation into a summative group case study on a chosen conservation issue and present formally before a faculty panel.

Designated a Green Leaf Course.

Fulfills Mason Core requirement in synthesis.

**Prerequisite(s):** Junior standing and a college level biological or environmental science course
Notes: Must be taken concurrently with CONS 320, CONS 401, CONS 402, and CONS 410. Only offered through the Smithsonian-Mason Semester.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CONS 491 - Comprehensive Conservation Planning

Credits: 3 (NR)

Students construct a synthesis project integrating the conservation theory, application, and communications techniques presented throughout the semester. With a mentor, students develop a monitoring and assessment plan for a species or habitat of conservation concern, working individually and in teams. This plan includes background, measurable objectives, sampling strategies, proposed data analysis and a communications and media plan.
Designated a Green Leaf Course.

Prerequisite(s): Admission into the Smithsonian-Mason Monitoring Semester.

Corequisite(s): Enrollment in the Smithsonian-Mason Monitoring Semester.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CONS 497 - Special Topics in Conservation

Credits: 1-3 (RD)

Topics of current relevance to the field of conservation.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0

CONS 498 - Internship

Credits: 1-3 (RD)

Directed readings and final reflective paper or project in conjunction with an internship subject to instructor approval. Permission to enroll must be obtained from the Mason Center for Conservation Studies at least two weeks prior to the start of the semester.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 1-6
CONS 499 - Independent Study/Research

Credits: 1-3 (RD)
An independent project or directed exploration into an area of conservation not covered by other courses.

Prerequisite(s): Permission of instructor.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 1-12

CONS 620 - Spatial Ecology, Geospatial Analysis & Remote Sensing for Conservation

Credits: 3 (NR)
Teaches students to use spatial ecology, geospatial analysis, and remote sensing tools to assess and model species distribution and habitat use in dynamic landscapes. Includes computer and field labs with examples using data from Smithsonian research.

Notes: Offered through the Mason Center for Conservation Studies in cooperation with the Smithsonian Conservation Biology Institute on site in Front Royal, VA. This course is not available to students pursuing a degree at George Mason without prior written approval of the graduate director of the student’s program.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CONS 625 - Statistics for Ecology and Conservation Biology

Credits: 3 (NR)
Provides an overview of experimental design and analysis techniques used in cutting-edge ecological research and conservation. Focuses on increasing knowledge of statistical tests, interpretation of results, and ability to disseminate and clearly explain these results. Students gain an overview of applied monitoring and analysis techniques such as distance sampling, genetic analysis, niche and species distribution modeling, and spatial analysis.

Prerequisite(s): Basic statistics course

Notes: Offered through the Mason Center for Conservation Studies in cooperation with the Smithsonian Conservation Biology Institute on site in Front Royal, VA. This course is not available to students pursuing a degree at George Mason without prior written approval of the graduate director of the student’s program.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CONS 630 - Species Monitoring & Conservation

Credits: 3 (RD)
Explores monitoring and conservation research methods and approaches for specific taxa through lectures, case studies, lab
exercises, and field work. Focuses on conservation science and conservation outreach techniques.

**Prerequisite(s):** A general biology (or relevant species-related) course and a statistics course, or permission of instructor. Prior coursework in environmental science, zoology, and ecology recommended.

**Notes:** May be repeated for credit with approval of the Mason Center for Conservation Studies. A maximum of 6 credits may be applied to the Applied Conservation Science Certificate.

Offered through the Mason Center for Conservation Studies in cooperation with the Smithsonian Conservation Biology Institute on site in Front Royal, VA. This course is not available to students pursuing a degree at George Mason without prior written approval of the graduate director of the student’s program.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**CONS 635 - Non-Invasive Genetic Techniques in Wildlife Conservation**

Credits: 2 (NR)  
Introduces the benefits, drawbacks and applications of non-invasive genetic techniques to wildlife conservation; focuses on answering questions in animal behavior, population biology, and population management, particularly for vertebrate populations; provides hands-on experience relating to all stages of a research project utilizing modern noninvasive methods from sample collection to data analysis and interpretation.

**Prerequisite(s):** College-level Genetics Course AND College-level Ecology/Evolution Course.

**Notes:** This course is taught as an intensive, mixed-format (lectures, discussions, lab and computer exercises) offering, in a residential, full-day, 1-week session held at the Smithsonian Conservation Biology Institute in Front Royal, VA. Students also complete pre-course reading assignments, and prepare and submit final projects after the intensive onsite session has concluded.

**Hours of Lecture or Seminar per week:** 0-2  
**Hours of Lab or Studio per week:** 0-2

---

**CONS 640 - Adaptive Management for Conservation Success**

Credits: 3 (NR)  
Sound training in adaptive management is essential for conservationists dealing with the challenges of a changing planet. In groups, students develop a management plan for a real-world conservation project using the adaptive management framework of the *Open Standards for the Practice of Conservation*. Students can extend the techniques to their own work after the course.

**Notes:** This Smithsonian-Mason Conservation Studies Program course is an intensive 2-week fulltime residential session, incorporating lectures, discussions, and student exercises on group projects. This course will be held at the Smithsonian Conservation Biology Institute’s 3,200 acre facility in Front Royal, VA, USA

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**CONS 660 - Effective Conservation Leadership**
Credits: 3 (NR)
Teaches effective leadership and management through individual assignments and group exercises. Explores international environmental and conservation case studies, offers hands-on experience to help students develop their own leadership styles.

Prerequisite(s): None; students should have a basic background in conservation, ecology, environmental sciences, or similar field.

Notes: Offered through the Mason Center for Conservation Studies in cooperation with the Smithsonian Conservation Biology Institute on site in Front Royal, VA. This course is not available to students pursuing a degree at George Mason without prior written approval of the graduate director of the student’s program.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**CONS 665 - Conservation Conflict Resolution**

Credits: 3 (NR)

Focuses on approaches to cultivating sustainable conservation solutions, including determining root causes of complex conflict dynamics, designing decision-making processes to address conflict, and building mutual respect and trust among stakeholders. Employing principles and strategies developed by the Human-Wildlife Conflict Collaboration (HWCC), students learn how to resolve current conservation conflicts, anticipate arising ones, and reconcile old conflicts that impede new progress. Designated a Green Leaf Course.

Notes: Offered through the Mason Center for Conservation Studies in cooperation with the Smithsonian Conservation Biology Institute on site in Front Royal, VA. This course is not available to students pursuing a degree at George Mason without prior written approval of the graduate director of the student’s program.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**CONS 697 - Special Topics in Conservation**

Credits: 1-3 (RD)
Topics of current relevance to the field of conservation.

Prerequisite(s): Vary with topic.

Notes: May be repeated for credit with approval of the Mason Center for Conservation Studies. A maximum of 6 credits may be applied to the Applied Conservation Science Certificate.

Offered through the Mason Center for Conservation Studies in cooperation with the Smithsonian Conservation Biology Institute on site in Front Royal, VA. This course is not available to students pursuing a degree at George Mason without prior written approval of the graduate director of the student’s program.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0
Counseling and Development (EDCD)

Offered by the College of Education and Human Development

EDCD 525 - Advanced Human Growth and Development

Credits: 3 (NR)
Covers human development throughout the life span, including emotional, physical, and cognitive development; and emphasizes personal adjustment and achievement.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDCD 601 - Introduction to Research in Counseling

Credits: 3 (NR)
Enhances knowledge of and involvement in counseling research by introducing techniques and principles to design, implement, and evaluate research projects and program development in community and school settings.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDCD 602 - Foundations in Counseling

Credits: 3 (NR)
Provides students with an introduction to the field of professional counseling. Provides graduate students in counseling with knowledge about the history and foundations of counseling, the professional identity and multifaceted role of the counselor, program mission statement and its relationship to counseling.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDCD 603 - Counseling Theories and Practice

Credits: 3 (NR)
Covers major theoretical approaches to counseling from a multicultural perspective and provides supervised introduction to basic skills.

Prerequisite(s): Admission to CNDV program; EDCD 602 (course may be taken concurrently).

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
EDCD 604 - Assessment and Appraisal in Counseling

Credits: 3 (NR)
Prepares students to become informed about psychological and educational tests and assessment procedures that are used and applied in a counseling context.

Prerequisite(s): Admissions to CNDV; EDCD601.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDCD 606 - Counseling Children and Adolescents

Credits: 4 (NR)
Presents theories, techniques, and counseling issues relevant to children and adolescents. Counseling lab provides practice with an emphasis on process and culturally competent counseling strategies.

Prerequisite(s): Admission to CNDV program, EDCD 525 and EDCD 603

Hours of Lecture or Seminar per week: 4
Hours of Lab or Studio per week: 0

EDCD 608 - Group Processes and Analyses

Credits: 4 (NR)
Presents theories appropriate to various types of groups and descriptions of group practices, methods, dynamics, and facilitative skills. Focuses on applying theory to practice. Includes lab.

Prerequisite(s): Admission to CNDV program, EDCD 603; and EDCD 606 or EDCD 609

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 1

EDCD 609 - Advanced Counseling Skills and Strategies

Credits: 4 (NR)
Covers counseling skills, process and strategies associated with major counseling theories. Provides intensive practice in both technical and conceptual skills with emphasis on self-awareness, case conceptualization, racial-cultural considerations, and supervised practice in a community setting.

Prerequisite(s): Admission to CNDV program, EDCD 525 and EDCD 603

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 1
EDCD 610 - Career and Educational Counseling

Credits: 3 (NR)
Presents theories and counseling issues relevant to career counseling in schools and community agencies.

Prerequisite(s): Admission to CNDV program; EDCD 603, 606 or 609.

Corequisite(s): EDCD 604.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDCD 611 - Introduction to Ethical and Legal Issues in School Counseling

Credits: 2 (NR)
Introduces principles, practices, and application of ethical and legal issues in school counseling.

Prerequisite(s): Admission to counseling and development program and EDCD 626

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 0

EDCD 626 - Principles and Practices of School Counseling

Credits: 3 (NR)
Introduces school counseling program development at K-12 levels. Presents philosophy, principles, and practices of effective school counseling.

Prerequisite(s): Admission to CNDV program, EDCD 602 (course may be taken concurrently).

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDCD 628 - Counseling and Social Justice

Credits: 3 (NR)
Discusses the Counseling and Development program's mission statement of Social Justice, Multiculturalism, Internationalism, Advocacy and Leadership. Provides an overview of theories and models of social justice, advocacy, and leadership. Examines theories and models from a multicultural perspective and discusses within the context of counseling in school and community settings. Examines the role of counselors as change agents, leaders, and advocates.

Prerequisite(s): Admission to CNDV program, EDCD 603, and 626 or 654.

Corequisite(s): EDCD 660.
EDCD 652 - Introduction to Substance Abuse Counseling

Credits: 3 (NR)
Introduces substance abuse counseling. Covers addiction issues, diagnosis and treatment planning, and individual and group counseling strategies with diverse populations.

Prerequisite(s): Admission to the Counseling and Development program and EDCD 603 or concurrent.

Corequisite(s): EDCD 603

EDCD 654 - Counseling, Ethics, and Consultation in Community Agencies

Credits: 3 (NR)
Provides a foundation for engaging in counseling, consultation, and ethical decision making within agency settings. Examines the role of the community agency counselor, with attention to multicultural and social justice perspectives.

Prerequisite(s): Admission to counseling and development program and EDCD 603

Corequisite(s): EDCD 603

EDCD 656 - Diagnosis and Treatment Planning for Mental Health Professionals

Credits: 3 (NR)
Introduces students to fundamental concepts in the classification of psychopathology as well as the clinical interviewing skills necessary to apply DSM-5 diagnoses to clients in a sound and ethical manner. Incorporates an explicit focus on the role of race and culture in diagnosis and treatment.

Prerequisite(s): Admission to CNDV program, EDCD 603 (course may be taken concurrently).

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring

EDCD 658 - Couples and Family Counseling
Introduces major approaches to counseling couples and families. Uses case studies and simulations to facilitate transition from theory to practice.

**Prerequisite(s):** Admission to CNDV program; EDCD 609 (may be taken concurrently).

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**EDCD 660 - Multicultural Counseling**

Credits: 3 (NR)  
Examines multicultural issues in counseling and explores the complexities of culture and its influence on the client/counselor relationship. Promotes awareness and understanding of cultural differences and their effect on the counseling relationship. Investigates variables that interact with culture that may interfere with the counseling relationship, such as historical, political, socioeconomic, psychosocial adjustment, racism, prejudice, discrimination, and oppression.

**Prerequisite(s):** Admission to CNDV program, EDCD 608.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**EDCD 754 - Practicum in Counseling and Development**

Credits: 3-6 (NR)  
Provides supervised practice in counseling setting similar to setting in which student may work. Weekly graduate class emphasizes site processing.

**Prerequisite(s):** Completion of CNDV program except for practicum and internship; permission of advisor; overall GPA of 3.00; no grade of C in skills courses EDCD 605, 607, 608, and 610; and no more than two grades of C in any other graduate course work required by counseling and development program.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 3

**EDCD 755 - Practicum in Counseling**

Credits: 3 (NR)  
Provides supervised practice in a counseling setting similar to the setting in which the student may work with an emphasis on the counseling process.

**Prerequisite(s):** Completion of CNDV program course work except for EDCD 610 or electives (total credits cannot exceed 3 credits); overall GPA of 3.00; no grade lower than B in skills courses EDCD 603, 606/609 and 608; no more than two grades of C in any other graduate course work required by CNDV program; permission of advisor.

**Notes:** Weekly graduate class emphasizes site processing.
EDCD 790 - Internship in Counseling and Development

Credits: 3-6 (NR)
Provides supervised practice in counseling setting similar to setting in which student may work. Skills and practice build on previous practicum experiences. Weekly graduate class emphasizes site processing.

Prerequisite(s): Completion of CNDV program except for internship; permission of advisor; overall GPA of 3.00; no grade of C in any skills courses EDCD 605, 607, 608, 610, and 754; no more than two grades of C in any other graduate course work required by CNDV program.

EDCD 791 - Internship in Counseling

Credits: 3 (NR)
Provides supervised practice in a counseling setting similar to the setting in which the student may work with an emphasis on the counseling process. Builds on previous practicum experiences.

Prerequisite(s): Completion of CNDV program course work except for electives; overall GPA of 3.00; no grade lower than B in skills courses EDCD 603, 606/609, 608 and 755; no more than two grades of C in any other graduate course work required by CNDV program; permission of advisor.

EDCD 797 - Advanced Topics in Education

Credits: 1-6 (RT)
See EDUC 797.

Prerequisite(s): Admission to CNDV program, EDCD 603.

EDCD 894 - Advanced Family and Systems Counseling
Develops advanced level skills and competencies in the practice of family and systems counseling. Multiple theoretical models for practice in a multicultural society will be explored, as will the applications of those models in multiple professional settings.

**Prerequisite(s):** Admission to PhD in Counseling and Development Program.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall, Spring

---

**EDCD 895 - Emerging Issues in Counseling and Development**

Credits: 3 (NR)  
Examines issues in counseling profession, including counseling theory and methodology, development of client groups, new roles and settings for counselors, emerging assessment procedures, new understanding of diagnosis; and impact of societal changes on counseling profession.

**Prerequisite(s):** Admission to PhD program, or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**EDCD 896 - Advanced Multicultural Counseling**

Credits: 3 (NR)  
Focuses on advanced issues in multicultural counseling, including multicultural counseling theories, skills, assessment, supervision, research, and ethics.

**Prerequisite(s):** Master's degree in counseling or related counseling field from accredited institution of higher education, EDCD 660 or equivalent, EDCD 895, and admission to counseling and development PhD specialization; or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**EDCD 897 - Advanced Group Counseling**

Credits: 3 (NR)  
For doctoral students who have had experience and training in group work. Provides greater understanding and advanced skill application in group dynamics, group process, and group leadership.

**Prerequisite(s):** Master's degree in counseling or related counseling field from accredited institution of higher education, EDCD 608 or equivalent, EDCD 895, and admission to counseling and development PhD specialization; or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0
EDCD 898 - Grant Writing and Publishing

Credits: 3 (NR)
Focuses on grant writing and publishing in counseling and psychology.

Prerequisite(s): Master's degree in counseling or related counseling field from accredited institution of higher education, EDCD 895, and admission to counseling and development PhD specialization; or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDCD 899 - The Theory and Practice of Counseling Supervision

Credits: 4 (NR)
Explores counseling supervision theory from a multicultural and social justice perspective. Students will apply these theories by supervising Master's level community agency and school counseling practicum students under the supervision of the instructor.

Prerequisite(s): Admission to PhD in Counseling and Development Program; Master's degree in Counseling or related field, or permission of the instructor.

Hours of Lecture or Seminar per week: 4
Hours of Lab or Studio per week: 0

EDCD 900 - Leadership and Advocacy in the Counseling Profession

Credits: 4 (NR)
Introduces students to broad theoretical concepts, strategies, and skills related to leadership and advocacy within the counseling profession, and will help students integrate leadership and advocacy into their professional identity.

Prerequisite(s): Admission to PhD in Counseling and Development Program.

Hours of Lecture or Seminar per week: 4
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

EDCD 990 - Advanced Internship in Counseling Leadership

Credits: 3 (NR)
Provides supervised practice in counseling leadership setting or position. Emphasizes counseling leadership in practice.

Prerequisite(s): Admission to the Ph.D. in Education program, Counseling and Development specialization; EDCD 628 or equivalent; EDCD 895.

Notes: Biweekly class emphasizes site processing, leadership skills, and topical seminars.
EDCD 991 - Advanced Internship in Counseling

Credits: 6 (NR)
Provides an intensive multicultural social justice oriented field based supervised experience. Emphasizes intensive use of multicultural competencies in practice, supervision, and program development and evaluation in order to address social justice issues for clients in school or community settings.

Prerequisite(s): Admission to counseling and development PhD specialization; and EDCD 895, 896, and 628 or equivalent.

EDCD 992 - Advanced Internship in Social Justice

Credits: 3 (NR)
Provides opportunities to implement programs and strategies to affect social justice for clients in school or community settings.

Prerequisite(s): Admission to counseling and development PhD specialization, EDCD 628 or equivalent, and EDCD 895.

Notes: Biweekly class emphasizes topical seminars and supervision.

Criminology (CRIM)

Offered by the College of Humanities and Social Sciences

CRIM 100 - Introduction to Criminal Justice

Credits: 3 (NR)
Overview of the American system of criminal justice, covering theories of justice, criminal law, policing, courts and associated pre and post-trial legal processes, punishment and corrections, and juvenile justice. Required for all criminology majors and minors.

Fulfills Mason Core requirement in social and behavioral science.

Equivalent to ADJ 100 (2009-2010 Catalog)
CRIM 210 - Introduction to Criminology

Credits: 3 (NR)
Explores and evaluates how crime is defined and measured, and examines crime patterns and trends. Provides an overview and critical assessment of the major theories of crime causation.

Prerequisite(s): CRIM 100.

Notes: CRIM majors who are concentrating in criminal justice are strongly encouraged to take this course before or during the first semester of taking upper-level courses in the concentration.

CRIM 220 - Introduction to Law and Society

Credits: 3 (NR)
Introduces the relationship between law and society. Discusses theoretical perspectives from a number of social science disciplines. Promotes a foundational understanding of the concept of law and the origins, development, and role of law in society, particularly outside of formal legal institutions. Topics covered may include legal mobilization, law and social change, social movements, law and inequality, and law's relationship to social control.

Prerequisite(s): CRIM 100.

Notes: CRIM majors who are concentrating in Law and Society are strongly encouraged to take this course before or during the first semester of taking upper-level courses in the concentration.

CRIM 230 - Introduction to Homeland Security

Credits: 3 (NR)
Introduces fundamental concepts of homeland security. Examines governmental actions designed to prevent, prepare for, respond to, and recover from man-made and natural disasters. Focuses on efforts to align preparedness, incident management, and emergency response plans from various agencies (federal, state, local, tribal, private sector, and non-governmental).

Equivalent to CRIM 461 (2010-2011 Catalog); ADJ 461 (2009-2010 Catalog).

Prerequisite(s): CRIM 100

Notes: CRIM majors who are concentrating in homeland security and justice are strongly encouraged to take this course before or during the first semester of taking upper-level courses in the concentration.
CRIM 301 - Public Law and the Judicial Process

Credits: 3 (NR)
Covers American judicial organization and operation, role of the Supreme Court in policy formation, and selected constitutional principles.

Equivalent to ADJ 301 (2009-2010 Catalog) and GOVT 301

Prerequisite(s): CRIM 100

CRIM 302 - Delinquency

Credits: 3 (NR)
Presents theories of juvenile delinquency and societal reactions to it, gender differences in rates and types, historical overview, development of juvenile justice system, and critical assessment of juvenile justice and its alternative.

Equivalent to ADJ 302 (2009-2010 Catalog)

Prerequisite(s): CRIM 100

CRIM 304 - Computer Crime, Forensics, and Auditing

Credits: 3 (NR)
Covers computer crime, relevant laws, agencies, standards, auditing, logging, forensics, and related software. Explores legal principles such as chain of evidence, electronic document discovery, eavesdropping, and entrapment. Hands-on experience with forensics tools.

Equivalent to IT 357; ADJ 304 (2009-2010 Catalog)

Prerequisite(s): IT 103 and 223.

CRIM 305 - Crime and Crime Policy
CRIM 306 - Criminal Justice Ethics

Credits: 3 (NR)
Analyzes ethical principles relevant for those working in criminal justice. Required for all criminology majors.

Equivalent to ADJ 306 (2009-2010 Catalog)

Prerequisite(s): CRIM 100.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CRIM 307 - Social Inequality, Crime, and Justice

Credits: 3 (NR)
Explores the significance of social inequality (especially race and gender inequality) for several crime and criminal justice issues. Examines the effect of gender and race on rates of criminal offending and victimization and explanations for the variation in offending and victimization.

Equivalent to ADJ 307 (2009-2010 Catalog)

Prerequisite(s): CRIM 100.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CRIM 308 - Human Rights and Justice

Credits: 3 (NR)
Studies the norms, laws, and systems for the promotion and protection of human rights. Provides a foundation for understanding historical, legal, political, economic, and ethical aspects of human rights. Examines ideological and cultural perspectives, sources of violations, the United Nations, regional and national mechanisms, special issues (e.g., women, torture, children, minorities), and the role of nongovernmental organizations.

Equivalent to ADJ 308 (2009-2010 Catalog)
Prerequisite(s): CRIM 100

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CRIM 310 - Introduction to the Intelligence Community

Credits: 3 (NR)
Introduces students to the structure, function, and process of the intelligence community including the basic skills in writing, research, and presentation used in intelligence analysis. Required for all intelligence analysis minors.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CRIM 312 - Intelligence Analysis Techniques

Credits: 3 (NR)
Introduces the key analytical techniques used by entry-level analysts in the Intelligence community.

Prerequisite(s): CRIM 310. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CRIM 315 - Research Methods and Analysis in Criminology

Credits: 3 (NR)
Provides an introduction to research design, methods, and analysis in the field of criminology. Students learn to understand, interpret, and critique quantitative and qualitative research approaches, and become intelligent consumers of research.

Equivalent to CRIM 300 (2011-2012 Catalog); ADJ 300 (2009-2010 Catalog)

Prerequisite(s): CRIM 100.

Notes: This course does not meet the College's IT requirements.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CRIM 320 - Crime and Place

Credits: 3 (NR)
Focuses on the analysis of locations that attract and repel crime, displacement of crime, and identifying and measuring crime concentrations.
Prerequisite(s): CRIM 100.

CRIM 400 - Applied Criminal Psychology

Credits: 3 (NR)
Uses overview of psychological and criminological theories to apply behavioral science theory to practical application in forensic settings. Focuses on analysis of various crime scenes and characteristics of offenders.

Equivalent to ADJ 400 (2009-2010 Catalog)

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CRIM 401 - Policing in America

Credits: 3 (NR)
Fundamental issues relevant to contemporary public policing in America: role and history of police; impact on crime, disorder, and other social problems; discretion and its control; moral hazards; police legitimacy and public support; police culture and the police organization; and community policing.

Equivalent to ADJ 401 (2009-2010 Catalog)

Prerequisite(s): CRIM 100

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CRIM 402 - Punishment and Corrections

Credits: 3 (NR)
Covers theories on forms of punishment systems; punishment and corrections as a product of historical, cultural, and political changes; differences by race and gender in punishment and corrections; problems of social control and violence in prisons; alternative rehabilitation; and community prevention strategies.

Equivalent to ADJ 402 (2009-2010 Catalog)

Prerequisite(s): CRIM 100

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
CRIM 403 - Community Corrections

Credits: 3 (NR)
Studies the purposes and goals of community-based corrections and its various components, including pretrial diversion, probation, parole, and emerging alternatives to traditional incarceration. Addresses issues related to offenders returning to the community and critical issues facing jails, community corrections, and the management of offenders in community settings. Examines the role of community corrections within the broader correctional system.

Equivalent to ADJ 403 (2009-2010 Catalog)

Prerequisite(s): CRIM 100

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CRIM 404 - Crime Victims and Victimization

Credits: 3 (NR)
Explores experiences of crime victims, distribution of the risks of victimization, and causes and consequences of victimization. Also considers nature and influence of victim’s rights advocates.

Equivalent to ADJ 404 (2009-2010 Catalog)

Prerequisite(s): CRIM 100

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CRIM 405 - Law and Justice around the World

Credits: 3 (NR)
Comparative inquiry into the models of legal and justice systems around the world. Considers how social and legal norms are created, and how different societies exercise powers of social control. Evaluates justice models in action, including law and courts, policing, corrections, and juvenile justice.

Fulfills Mason Core requirement in global understanding.

Equivalent to ADJ 405 (2009-2010 Catalog)

Prerequisite(s): CRIM 100

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CRIM 406 - Family Law and the Justice System
Credits: 3 (NR)
Introduction to the elements of family law, and exploration of its influence on American social life and contemporary notions of justice. Topics include marriage and parenting, divorce, custody and support, nontraditional families, and domestic violence.

Equivalent to ADJ 406 (2009-2010 Catalog)

Prerequisite(s): CRIM 100

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CRIM 407 - Advanced Topics in Law and Society

Credits: 3 (NR)
Provides an in-depth examination of the law's role in social life to deepen students' appreciation of the law in action. Focuses on scholarly research that describes and explains how legal actors, processes, and institutions operate in the world. Topics include: theories of legal change, law's relationship to class, gender, and race, and law, culture, and identity.

Equivalent to ADJ 407 (2009-2010 Catalog)

Prerequisite(s): CRIM 100 or GOVT 301

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CRIM 408 - Criminal Courts

Credits: 3 (NR)
Studies the workings, advantages, and frailties of criminal courts, and explores whether the system works effectively and efficiently.

Equivalent to ADJ 408 (2009-2010 Catalog)

Prerequisite(s): CRIM 100 or GOVT 301

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CRIM 409 - Community Policing

Credits: 3 (NR)
Study of community policing, particularly in the United States. Covers history and development of community policing, community relations, problem solving, and issues of organizational change.

Equivalent to ADJ 409 (2009-2010 Catalog)

Prerequisite(s): CRIM 100
CRIM 410 - Criminal Investigations

Credits: 3 (NR)
Focuses on criminal investigations and the role of the criminal investigator in the criminal justice system.

Prerequisite(s): CRIM 100.

CRIM 422 - Controversial Legal Issues

Credits: 3 (NR)
Focuses on the study of law as an institution that continuously interacts with other social institutions at the individual, community, state, and federal levels. Examines how constitutional and statutory laws are interpreted by the courts to determine and define the law through contemporary, controversial, legal issues. Explores how the courts, using the law, resolve today's most controversial issues.

Equivalent to ADJ 422 (2009-2010 Catalog)

Prerequisite(s): CRIM 100

CRIM 423 - Constitutional Law: Civil Rights and Liberties

Credits: 3 (NR)
Studies First Amendment freedoms of speech, press, assembly, association, and religion; the right to privacy; and Fourteenth Amendment right to equal protection.

Equivalent to ADJ 423 (2009-2010 Catalog) and GOVT 423

Prerequisite(s): CRIM 100

CRIM 424 - Constitutional Law: Criminal Process and Rights
Credits: 3 (NR)
Studies constitutional law pertaining to the rights of the criminally accused from investigation and evidence through attorney, trial, and punishment stages at federal and state levels. Required for all criminology majors.

Equivalent to ADJ 424 (2009-2010 Catalog); GOVT 424 (2013-2014 Catalog).

Prerequisite(s): CRIM 100

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CRIM 425 - Criminal Justice Management

Credits: 3 (NR)
Explains the management function for current and future criminal justice managers. Emphasizes communication, leadership skills, and organizational development.

Equivalent to ADJ 425 (2009-2010 Catalog)

Prerequisite(s): CRIM 100

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CRIM 460 - Surveillance and Privacy in Contemporary Society

Credits: 3 (NR)
Philosophical perspectives, historical context, technological developments, and institutional changes that surround controversies about privacy and surveillance in contemporary society. Explores public and private institutions conducting surveillance, how they calculate and manage risk, and legal constraints on surveillance activities.

Equivalent to ADJ 460 (2009-2010 Catalog)

Prerequisite(s): CRIM 100

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CRIM 462 - Law Enforcement and Homeland Security

Credits: 3 (NR)
Examines the effect of 9/11 on law enforcement organizations in the United States and explores the evolving relationship between the military, federal, state, and local law enforcement agencies in the post-9/11 era. Emphasis on understanding the entire framework of homeland security in the United States and the unique issues faced by local law enforcement.

Equivalent to ADJ 462 (2009-2010 Catalog)
**Prerequisite(s):** CRIM 100

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**CRIM 471 - Prevention and Deterrence of Crime**

Credits: 3 (NR)  
Theoretical and practical strategies for crime prevention and deterrence. Discusses social, environmental, and mechanical developments, police courts, and correctional elements of law enforcement in terms of current effectiveness and future potential for crime prevention.

Equivalent to ADJ 471 (2009-2010 Catalog)

**Prerequisite(s):** CRIM 100

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**CRIM 475 - Theory and Politics of Terrorism**

Credits: 3 (NR)  
Explores origins of terrorism, tracing development from early states to a modern mode of conflict. Presents national, regional, and global perspectives.

Equivalent to ADJ 475 (2009-2010 Catalog)

**Prerequisite(s):** CRIM 100

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**CRIM 479 - Preparation for Internship**

Credits: 3 (NR)  
Preparation for internship in a justice organization or justice-related work activity. Students develop a relationship with a prospective internship sponsor and develop a plan for the internship and the research to be reported.

Equivalent to ADJ 479 (2009-2010 Catalog)

**Prerequisite(s):** CRIM 100.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0
**CRIM 480 - Internship**

Credits: 6-12 (RD)
Application of classroom learning to an applied justice setting. Students maintain daily journals, conduct research, and deliver written and oral reports.

Designated as a research and scholarship intensive course.

Equivalent to ADJ 480 (2009-2010 Catalog)

**Prerequisite(s):** CRIM 100, 306, 315, 479, and approval of department.

**Notes:** Before enrolling, students must have a plan approved by the instructor. Seminars are held three times during the semester for discussion and oral presentation. Minimum of 45 hours of on-the-job work time required for each credit. May be repeated for a maximum of 12 credits.

**Hours of Lecture or Seminar per week:** 6-12  
**Hours of Lab or Studio per week:** 0

**CRIM 490 - Special Topics**

Credits: 1-3 (RT)  
Recent developments in the field.

Equivalent to ADJ 490 (2009-2010 Catalog)

**Prerequisite(s):** CRIM 100

**Notes:** Topics vary. May be used to fulfill requirements for different concentrations in the BS in criminology, law, and society depending on the topic. May be repeated for a maximum of 15 credits when topic is different.

**Hours of Lecture or Seminar per week:** 1-3  
**Hours of Lab or Studio per week:** 0

**CRIM 491 - Honors Seminar I**

Credits: 3 (RD)  
Course includes readings, individual or group projects, and discussion of seminar papers.

Equivalent to ADJ 491 (2009-2010 Catalog)

**Prerequisite(s):** Acceptance to pursue honors in the major.

**Notes:** First of a two-course sequence; subject varies. May be repeated for a maximum of 6 credits when topic varies.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0
**CRIM 492 - Honors Seminar II**

Credits: 3 (RD)
Course includes readings and discussion of seminar papers, leading to a research project under the direction of a faculty member.

Designated as a research and scholarship intensive course.

Equivalent to ADJ 492 (2009-2010 Catalog)

**Prerequisite(s):** CRIM 491

**Notes:** Second of a two-course sequence. Subject varies. Oral exam on the research and report may be required. May be repeated for a maximum of 6 credits when topic varies.

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0

**CRIM 495 - Capstone in Criminology, Law and Society**

Credits: 3 (NR)
Provides an in-depth examination of a historical and contemporary issues facing criminology and law and society scholars. Focuses on the philosophies, practices, and procedures used by individuals and organizations and uses a variety of materials, experiences and resources.

Fulfills Mason Core requirement in Synthesis.

Designated as a research and scholarship intensive course.

**Prerequisite(s):** CRIM 100; ENGL 101/ENGH 101; ENGL 302/ENGH 302; COMM 100, or 104; 60 credits.

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0

**CRIM 498 - Research Practicum**

Credits: 1-3 (RT)
Supervised research experience with a professor in a non-classroom setting. Offers students an opportunity to gain valuable research experience and training in research. Students are required to work 45 hours (across the semester) per credit.

**Prerequisite(s):** CRIM 100 and CRIM 315.

**Notes:** Open to majors in CRIM with 60 credits and permission of instructor and department. May be repeated for a maximum of 6 credits.

**Hours of Lecture or Seminar per week:** 1-3
**Hours of Lab or Studio per week:** 0

George Mason University 2014-2015 Official University Catalog
CRIM 499 - Independent Study

Credits: 1-3 (RT)
Reading and research on a specific topic under the direction of a faculty member.

Equivalent to ADJ 499 (2009-2010 Catalog)

Prerequisite(s): CRIM 100 and 90 credits.

Notes: Open to majors in CRIM with 90 credits and permission of instructor and department. Written report is required; an oral exam or report may also be required. Degree requirements to be fulfilled by a particular independent study determined by student’s advisor. May be repeated for a maximum of 9 credits.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0

CRIM 509 - Justice Organizations and Processes

Credits: 3 (NR)
Examines structures, practices, and performance of organizations involved in administration of justice: law enforcement, courts and legal agencies, corrections, regulatory and related agencies, and private organizations.

Equivalent to PUAD 509; JLCP 509 (2009-2010 Catalog)

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CRIM 510 - Policing in a Democratic Society

Credits: 3 (NR)
Fundamental issues in policing a democratic society: police mission, subculture, performance measurement, moral hazards, discretion, impact on crime and disorder, legitimacy, community policing, and other reforms.

Equivalent to JLCP 510 (2009-2010 Catalog)

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CRIM 691 - Justice Program Planning and Implementation

Credits: 3 (NR)
Examines challenges of adapting to, planning, and implementing change in justice organizations. Provides hands-on experience in conducting, planning, and implementing project.

Equivalent to PUAD 691; JLCP 691 (2009-2010 Catalog)
Prerequisite(s): CRIM 700 or PUAD 502, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CRIM 700 - Theories of Justice

Credits: 3 (NR)
Overview of ancient and modern theories of justice with application to contemporary issues involving justice system, and other social and political institutions.

Equivalent to GOVT 726; JLCP 700 (2009-2010 Catalog)

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CRIM 702 - Comparative Justice

Credits: 3 (NR)
Survey of justice systems and their environments in different lands and cultures. Identifies commonalities and differences among justice systems, evaluates them, and considers policy implications.

Equivalent to JLCP 702 (2009-2010 Catalog)

Prerequisite(s): CRIM 700/GOVT 726, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CRIM 703 - Restorative Justice

Credits: 3 (NR)
Covers origins of restorative justice, its principles, implications for different justice organizations and processes, and application to a variety of problems, such as family violence, human rights, and reconciliation following mass victimizations.

Equivalent to GOVT 727; JLCP 703 (2009-2010 Catalog)

Prerequisite(s): CRIM 700 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CRIM 720 - Behavior of Law
Credits: 3 (NR)
Examines development of law and law’s effect on human behavior. Reviews theories of law’s meaning and aims. Examines construction of law and investigates consequences of law and legal decisions.

Equivalent to GOVT 728; JLCP 720 (2009-2010 Catalog)

**CRIM 721 - The Constitution, Criminal Procedure, and Security**

Credits: 3 (NR)
Focuses on understanding legal doctrines that form basis of U.S. constitutional procedural rights and how doctrines develop, why courts rule as they do, and evaluating strengths, weaknesses of rights.

Equivalent to GOVT 713; JLCP 721 (2009-2010 Catalog)

**Prerequisite(s):** CRIM 720/GOVT 728 or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**CRIM 722 - Civil Justice**

Credits: 3 (NR)
Covers understanding civil justice system, rules that govern civil justice, origins and effects, strengths and weaknesses of civil law doctrines, and processes to understand power of law to order social behavior.

Equivalent to JLCP 722 (2009-2010 Catalog)

**Prerequisite(s):** CRIM 720/GOVT 728 or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**CRIM 723 - Law and Social Control**

Credits: 3 (NR)
Competing conceptions of law, political systems, and social control. Intellectual traditions behind social control, its definitions, and mechanisms for regulating public and private behavior, by both individuals and organizations in society.

Equivalent to JLCP 723 (2009-2010 Catalog)

**Prerequisite(s):** CRIM 720/GOVT 728 or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0
CRIM 730 - Courts and Constitutional Law

Credits: 3 (NR)
Role, influence, and effects of U.S. courts in creating constitutional norms and interpreting them. Special attention to First and Fourteenth Amendments, Commerce Clause. Analyzes leading court cases.

Equivalent to JLCP 730 (2009-2010 Catalog)

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CRIM 740 - Justice Organization and Administration

Credits: 3 (NR)
Examines organization and administration of justice and security organizations. Covers organization theory and behavior as applied to justice and security organizations.

Equivalent to PUAD 790; JLCP 740 (2009-2010 Catalog)

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CRIM 741 - Conduct of Justice Organizations at the Street Level

Credits: 3 (NR)
How justice organizations behave at lowest levels, where service is delivered and discretion is greatest (suspects, victims, witnesses, police officers, prison guards, parole officers, attorneys, and others who interact with the justice system).

Equivalent to PUAD 793; JLCP 741 (2009-2010 Catalog)

Prerequisite(s): CRIM 740/PUAD 790 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CRIM 742 - Leadership in Justice and Security Organizations

Credits: 3 (NR)
Examines leadership theories, and explores fundamental questions about leadership in justice and security organizations today.

Equivalent to JLCP 742 (2009-2010 Catalog)

Prerequisite(s): CRIM 740/GOVT 790 or permission of instructor.
CRIM 743 - Changing Justice and Security Organizations

Credits: 3 (NR)
Examines challenges of changing justice organizations, how changes have been successfully and unsuccessfully implemented in the past, and what change strategies appear to be the most effective.

Equivalent to PUAD 797; JLCP 743 (2009-2010 Catalog)

Prerequisite(s): CRIM 740/PUAD790 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CRIM 744 - Corrections

Credits: 3 (NR)
Covers the social institutions and processes involved in punishment, control, and behavior change. Reviews the consequences of different policies and organizational approaches.

Prerequisite(s): CRIM 740.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

CRIM 749 - Issues in Justice Administration

Credits: 1-3 (RT)
Explores issues in justice administration, taking into diverse perspectives. Emphasizes using theory and evidence to evaluate different viewpoints. Course topics vary, focusing on controversial matters.

Equivalent to JLCP 749 (2009-2010 Catalog)

Prerequisite(s): CRIM 509/PUAD 509 or CRIM 700/GOVT 726, or permission of instructor.

Notes: May be repeated for a maximum of 9 credits when topic is different.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CRIM 760 - Crime and Crime Policy
CRIM 760 - Crime Policy and Empirical Evidence

Credits: 3 (NR)
Explores relationship between crime policy and empirical evidence about etiology of crime. Includes crime measurement and trends in crime over time, effectiveness of various policy interventions.

Equivalent to JLCP 760 (2009-2010 Catalog)

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CRIM 761 - Politics of Crime Policy

Credits: 3 (NR)
Explores political context of crime policy. Examines influence of public opinion, interest groups, scientific community, and other political forces. In-depth, case-study comparison of several crime policies.

Equivalent to JLCP 761 (2009-2010 Catalog)

Prerequisite(s): CRIM 760/GOVT 792 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CRIM 762 - Crime and Place

Credits: 3 (NR)
Examines the concentration of crime at places, including geographic, environmental, and sociological features that attract or repel crime. Discusses theoretical explanations, crime prevention strategies, and the measurement of crime concentrations.

Prerequisite(s): CRIM 760.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

CRIM 764 - Sentencing

Credits: 3 (NR)
Explores theories of punishment and sentencing practices. Examines political, sociological, criminological, and organizational influences on sentencing processes and decisions.

Prerequisite(s): CRIM 760.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring
CRIM 780 - Research Methods

Credits: 3 (NR)
Introduces logic and methods of scientific inquiry in justice, law, and crime policy. Includes conceptualization of research questions, observation, measurement, research design, and principles of causality. Evaluation of extant research according to scientific principles.

Equivalent to JLCP 780 (2009-2010 Catalog)

Prerequisite(s): Undergraduate course in social science research methods or statistics, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CRIM 781 - Justice Program Evaluation

Credits: 3 (NR)
Practical exploration of assessment techniques used in evaluating need for and consequences of justice programs and policies. Design and measurement, interpreting and presenting results.

Equivalent to PUAD 791; JLCP 781 (2009-2010 Catalog)

Prerequisite(s): PUAD 511/612 CRIM 780 or two graduate-level statistics courses; or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CRIM 782 - Statistics I

Credits: 3 (NR)
Focuses on descriptive and inferential statistical methods and theory with application to problems within the justice field. Explores the logic of inferential statistical methods in general and null hypothesis significance testing in particular. Covers widely used statistical procedures within the applied social sciences.

Equivalent to JLCP 782 (2009-2010 Catalog)

Prerequisite(s): An undergraduate social science research methods course or an undergraduate statistics course.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CRIM 783 - Statistics II

Credits: 3 (NR)
Focuses on the theory and application of multivariate regression methods as applied within the justice field. Topics include tests for and consequences of violating assumptions of the generalized linear model, dummy coding of categorical variables, testing of
interaction effects, logistic regression, ordered and multinominal logit, and missing data analysis.

Equivalent to JLCP 783 (2009-2010 Catalog)

Prerequisite(s): CRIM 782 or a comparable course.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CRIM 784 - Experimental Criminology

Credits: 3 (NR)
Discusses the methodological, statistical, ethical, and practical concerns associated with experimental research designs in criminology.

Prerequisite(s): CRIM 780.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

CRIM 790 - Capstone in Policy and Practice

Credits: 3 (NR)
Student-initiated research project supervised by instructor. Students must work with a justice organization to conduct useful research and produce a policy-oriented white paper.

Equivalent to JLCP 790 (2009-2010 Catalog)

Prerequisite(s): CRIM 780 or permission of instructor.

Notes: May be repeated for a maximum of 6 credits.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring

CRIM 795 - Special Topics

Credits: 3 (RT)
Recent developments in field, or topics not covered by regularly listed courses.

Equivalent to JLCP 795 (2009-2010 Catalog)

Prerequisite(s): To be determined by instructor.

Notes: Topics vary. May be repeated for a maximum of 15 credits when topic is different.
CRIM 796 - Directed Reading

Credits: 1-3 (RT)
Independent reading at doctoral level on specific topic related to justice, law, or crime policy as agreed to by student and faculty member and approved by coordinator of CRIM program.

Equivalent to JLCP 796 (2009-2010 Catalog)

Prerequisite(s): Successful completion of 12 graduate level CRIM credits.

Notes: Repeatable.

CRIM 797 - Professionalization Seminar

Credits: 0 (NR)
Introduces doctoral students to research, scholarship and teaching practices in the field to promote their professional development.

Notes: Required for Ph.D. students.

CRIM 799 - Master’s Thesis

Credits: 1-6 (RD)
Research on approved master’s thesis topic under direction of thesis committee with approval of chair.

Equivalent to JLCP 799 (2009-2010 Catalog)

Prerequisite(s): Submission and approval of thesis proposal.

Notes: Repeatable. Minimum 3, maximum 6 credits for doctorate. Maximum of 6 credits of CRIM 799 applicable to masters degree requirements.

Hours of Lecture or Seminar per week: 1-6
CRIM 998 - Doctoral Dissertation Proposal

Credits: 1-6 (RD)
Work on a research proposal forming basis for doctoral dissertation.

Equivalent to JLCP 998 (2009-2010 Catalog)

Prerequisite(s): Students must complete all core and analytical course degree requirements.

Notes: Repeatable. Minimum 3, maximum 6 credits for doctorate. Maximum of 27 credits of CRIM 998/999 applicable to doctoral degree requirements.

CRIM 999 - Doctoral Dissertation Research

Credits: 1-21 (RD)
Doctoral dissertation research and writing under direction of student’s dissertation committee.

Equivalent to CRIM 999 (Catalog 2009-2010)

Prerequisite(s): Advancement to doctoral Candidacy

Notes: Repeatable. Minimum 12, maximum 21 credits for doctorate. Maximum of 27 credits of CRIM 998/999 applicable to doctoral degree requirements.

Cultural Studies (CULT)

Offered by the College of Humanities and Social Sciences

CULT 320 - Globalization and Culture

Credits: 3 (NR)
Examines cultures in globalization, with special attention to the role of technologies and new media. Provides historical and contemporary contexts for understanding the relationships among circuits of production and consumption; population flows;
social inequalities and collective identities; globalizations from "above" and "below;" built and natural environments.

**Prerequisite(s):** 30 credits; GLOA 101 or SOCI 120.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**CULT 390 - Topics in Cultural Studies**

Credits: 1-3 (RT)  
Topics of current interest in interdisciplinary cultural studies, covering such fields as media, popular culture, political economy, social identities, or regions in globalization.

**Notes:** May be repeated for a maximum of 9 credits when topic is different.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**CULT 802 - Histories of Cultural Studies**

Credits: 3 (NR)  
Historical survey of principal works and theories in the development of cultural studies.

**Prerequisite(s):** Admission to doctoral program, related master's degree, or permission of instructor.

**Notes:** This course is designed for PhD level students. Students in a related MA program may take this course as the capstone to their MA as they are about to matriculate into the PhD in cultural studies.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall

**CULT 804 - Histories of Cultural Studies II**

Credits: 3 (NR)  
Continues the historical survey of cultural studies up to the present and assesses possibilities for future development.

**Prerequisite(s):** Admission to a PhD program and CULT 802 or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall

**CULT 806 - Research Seminar in Cultural Studies**
CULT 808 - Student/Faculty Colloquium in Cultural Studies

Credits: 1 (RD)
Forum for presentation of original and current research in cultural studies.

Prerequisite(s): Admission to doctoral program.

Notes: Students register for 1 credit per semester over a three-semester period. May be repeated for a maximum of 4 credits.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0
Grading: Satisfactory/No Credit

CULT 810 - Culture and Political Economy

Credits: 3 (NR)
Surveys social science and humanities classics that relate cultural production and consumption to underlying political economic conditions. Includes Marx, Lukacs, Frankfurt School, semiotic neo-Marxism, productivist theories of power indebted to Foucault, Baudrillard, Bourdieu, Harvey, Jameson, Mauss, Mill, Polanyi, Sahlins, A. Smith, and Weber.

Prerequisite(s): Admission to a doctoral program, or permission of instructor.

Notes: This course is designed for the PhD student. Those students not admitted to a PhD program are required to contact the instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

CULT 812 - Visual Culture

Credits: 3 (NR)
Examines theories, production, consumption, and reception of visual culture. Covers film, video, visual arts, music, display, ritual, performance, performativity, and theories of the aesthetic. Includes key readings from theorists such as Adorno, Artaud, Benjamin, Brecht, Bryson, Doane, Fiske, Heath, Marcuse, Merleau-Ponty, and Sartre.
Prerequisite(s): Admission to a doctoral program, or permission of instructor.

Notes: This course is designed for the PhD student. Those students not admitted to a PhD program are required to contact the instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CULT 814 - Gender and Sexuality

Credits: 3 (NR)
Investigates notion of gender functions in maintaining and analyzing issues of social and cultural power. Examines conflicting notions of sexuality and their role in cultural signification. Seeks to explicate relationship of sexuality, gender.

Prerequisite(s): Admission to a doctoral program, or permission of instructor

Notes: This course is designed for the PhD student. Those students not admitted to a PhD program are required to contact the instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

CULT 816 - Science/Technology

Credits: 3 (NR)
Considers theories and major debates on culture of science, social construction of nature, and effects of technology on modern cultural forms. Includes readings from theorists such as Nietzsche, Heidegger, Horkheimer, Feyerabend, Bahro, Haraway, and Latour.

Prerequisite(s): Admission to a doctoral program, or permission of instructor.

Notes: This course is designed for the PhD student. Those students not admitted to a PhD program are required to contact the instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

CULT 818 - Social Institutions

Credits: 3 (NR)
Considers theories of institutional practice and social structures, from Max Weber to Michel Foucault. Covers prisons, bureaucracies, museums, schools, political parties, and social movements.

Prerequisite(s): Admission to a doctoral program, or permission of instructor.
CULT 820 - After Colonialism

Credits: 3 (NR)
Surveys racial, ethnic, caste, and national identities in colonial contexts; scientific racism in periphery and core sites; subsequent history of race, ethnic, national identities and conflicts; classical and contemporary texts by authors such as DuBois, Fanon, Gilroy, and Spivak; and particular place of issues of national, racial, and ethnic identities in contemporary cultural studies.

Prerequisite(s): Admission to a doctoral program, or permission of instructor.

Notes: This course is designed for the PhD student. Those students not admitted to a PhD program are required to contact the instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

CULT 860 - Special Topics in Cultural Studies

Credits: 3 (RT)
Specialized interdisciplinary topics in cultural theory and analysis.

Prerequisite(s): Admission to a doctoral program, or permission of instructor.

Notes: These courses are designed for the PhD student. Those students not admitted to a PhD program are required to contact the instructor. Topics vary. May be repeated for credit when topic is different.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

CULT 870 - Independent Study

Credits: 1-3 (RT)
Reading and research on a specific topic guided by advisors, supporting the development of a Field Concentration.

Prerequisite(s): Admission to a PhD program, successful completion of all core courses, or permission of director.

Notes: May be repeated.

Hours of Lecture or Seminar per week: 1-6
CULT 880 - Field Concentration

Credits: 3 (RT)
Intensive research course, resulting in a Field Statement and oral defense.

Prerequisite(s): Admission to cultural studies doctoral program successful completion of core courses and an additional 18 credits.

Notes: Requires permission of field advisor. May be repeated for a maximum of 6 credits.

CULT 998 - Doctoral Dissertation Proposal

Credits: 1-6 (RD)
Develop research proposal that forms basis for doctoral dissertation.

Prerequisite(s): Advancement to candidacy.

Notes: May be repeated for credit. A maximum of 6 credits may be applied to the degree. Subject to continuous registration requirement.

CULT 999 - Doctoral Dissertation

Credits: 1-12 (RD)
Doctoral dissertation research and writing under direction of dissertation committee.

Prerequisite(s): Completion of CULT 998, and public presentation of dissertation proposal.

Cyber Security Engineering (CYSE)
Offered by the Volgenau School of Engineering.

Students may attempt an undergraduate course taught by the Volgenau School of Engineering twice. A third attempt requires approval of the department offering the course.

**CYSE 101 - Introduction to Cyber Security Engineering**

Credits: 3 (NR)
Provides comprehensive introduction to the principles, applications, and practice of cyber security engineering. Students learn the basic concepts and terminology of cyber security and how cyber security is commonly addressed after the design and implementation phases. Students are introduced to the systems engineering and design processes and learn to integrate and apply cyber security tools and techniques in these processes.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 2
When Offered: Summer

**CYSE 205 - Systems Engineering Principles**

Credits: 3 (NR)
Introduction to systems engineering with a focus on cyber security engineering. Emphasize development of analytical, technical, management, and teamwork skills through exercises in planning, documentation, presentation, and the creative process of IT engineering design. Analyze case studies involving systems engineering role in cyber security.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

**CYSE 211 - Operating Systems and Lab**

Credits: 3 (NR)
Addresses basic issues such as virtual memory, kernel and user mode, system calls, threads, context switches, interrupts, interprocess communication, coordination of concurrent activities. May also address: concurrency, processes and multi-threading, context switching, synchronization, scheduling, and deadlock. Memory management, dynamic memory allocation, address translation. Management of file systems, storage devices, directories, protection, scheduling and crash recovery.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring

**CYSE 220 - Systems Modeling**

Credits: 3 (NR)
Introduces modeling of dynamical systems. Formulation of mathematical models from system descriptions, including computer, economic, transportation, electrical power and mechanical systems. Analytical and numerical methods for solving models and
studying their behavior. Discrete-time and continuous time systems. Linear and nonlinear systems. Introduction to computer modeling using MATLAB.

**Prerequisite(s):** MATH 203 and PHYS 160. Prerequisite enforced by registration system.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 3  
**When Offered:** Spring

### CYSE 230 - Computer Networking

Credits: 3 (NR)  
Introduces network concepts; OSI reference model and layering; data coding; analog/digital communications review; physical layer and data link control; Data Link Layer Control protocols; flow control; error control; link management; common link protocols. LAN and WAN; connection-oriented and connectionless packet switching; circuit-switched networks and control signaling; congestion control and traffic management; transport layer client-server model; domain name systems, routing methods.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 2  
**When Offered:** Spring

### CYSE 301 - Digital Systems

Credits: 3 (NR)  
Introduces digital circuits, systems and computers. Topics include binary systems and codes, digital logic gates and circuits, microelectronics and integrated circuits, coding and multiplexing, multi-vibrators, shift registers, counters, analog-to-digital converters, and elementary computer architecture.

Equivalent to ECE 301.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 2  
**When Offered:** Fall

### CYSE 325 - Discrete Events Systems Modeling

Credits: 3 (NR)  
Introduces basic modeling of the dynamics of discrete event systems. Both analytical and simulation techniques for the modeling and analysis of such systems are considered. Relevant concepts from discrete mathematics are included and appropriate software tools are used to examine different engineering applications.

**Prerequisite(s):** STAT 344. Prerequisite enforced by registration system.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 3  
**When Offered:** Fall
CYSE 330 - Introduction to Network Security

Credits: 3 (NR)
Introduces cryptography and its applications in networks. Reviews basic firewalls architectures and VPNs. Overview of current network security protocols, security of routing protocols, the DNS, and e-mail security. Discuss threat of attacks that use viruses, worms, rootkits, botnets and countermeasures; distributed denial of service attacks and spam countermeasures. Introduces basic concepts of security of wireless networks.

Prerequisite(s): CYSE 101, CS 222, CYSE 230. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

CYSE 411 - Secure Software Engineering

Credits: 3 (NR)
This course provides a foundation for building secure software by applying security principles to the software development lifecycle. Topics covered include: security in requirements engineering, secure designs, risk analysis, threat modeling, deploying cryptographic algorithms, defensive coding, penetration testing, fuzzing, static analysis, and security assessment. Students will learn the practical skills for developing and testing secure software.

Prerequisite(s): CS 222. Prerequisite enforced by registration system.

Notes: This course may be of interest to students specializing in software aspects of cyber security engineering.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring

CYSE 421 - Industrial Control Systems Security

Credits: 3 (NR)
Provides an introduction to industrial control systems (ICS). Covers fundamental concepts of control loop and its main components. Human-Machine Interface (HMI) and displays. Remote measurements through networks or through telemetry.

Prerequisite(s): CYSE 220, CYSE 230, CYSE 301 Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring
CYSE 424 - Embedded and Real Time Systems

Credits: 3 (NR)
Presents design methodology, principles and practice for the development of real-time embedded systems and their application to robotics, mechatronics, sensing, signal processing, and control. They include automated sensors, switches and PLCs. Topics include system decomposition, multi-tasking, task communication and synchronization, system modeling, time analysis, principles of filter and controller implementation, 'fuzzy' engineering, and multimicrocontroller systems.

Prerequisite(s): CYSE 301. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

CYSE 425 - Secure RF Communications

Credits: 3 (NR)

Prerequisite(s): CYSE 230. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

CYSE 430 - Critical Infrastructure Protection

Credits: 3 (NR)
Consists of a four week lecture course followed by ten weekly seminars presented by students. The lecture part provides a description of US Designated Critical Infrastructure Sectors and a corresponding list of federal sector specific agencies (SSAs). Each student selects a sector, develops and presents a seminar talk on critical cyber security issues involved in a given sector.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring

CYSE 445 - System Security and Resilience

Credits: 3 (NR)
Focuses on modeling and evaluation of the engineering systems that are expected to operate in a contested cyber environment. Covers architectures and modeling, uses a variety of techniques, establishing measures of performance that are relevant to the domain of operation, evaluating the security or vulnerability of the system to cyber exploits, and then assessing its resilience.
Prerequisite(s): CYSE 325, CYSE 330. Prerequisite enforced by registration system.

Corequisite(s): CYSE 450.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

**CYSE 450 - Cyber Vulnerability Lab**

Credits: 1 (NR)
Lab for CYSE 445. Provides hands-on experience in security issues of network systems. Issues in ethical hacking, penetration testing, forensics and incident handling and response will be discussed.

Corequisite(s): CYSE 445.

Notes: This is a hands-on lab course, with short lecture introductions.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 3
When Offered: Fall

**CYSE 460 - Power Systems and Smart Grid**

Credits: 3 (NR)
Covers fundamentals of power systems; basics of electricity, electricity generation, economics of supply and demand, and electricity market operations in regulated and deregulated environment. The other part of the course will cover Smart Grid and its impact on the energy industry. Also includes Energy policy modeling and analysis.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

**CYSE 461 - Power Grid Security**

Credits: 3 (NR)
Overview of integrating smart grid into the current system. Includes the seven domains (bulk generation, transmission, distribution, customer, operations, markets, and service providers) as well as the electrical and communication interfaces that connect the layers and domains. Focuses on monitoring equipment in the smart grid. Provides an overview of security principles and approaches for applying them to the smart grid.

Prerequisite(s): CYSE 460. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall
CYSE 462 - Mobile Devices and Network Security

Credits: 3 (NR)
Embedded security features of hand-held wireless devices. Data link layer encryption and authentication protocols applied in mobile devices. Security factors in the decisions on configuring wireless mobile devices and network infrastructure. Robust cryptography that is needed to attain the highest levels of integrity, authentication, and confidentiality.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

CYSE 465 - Transportation Systems Design

Credits: 3 (NR)
Discusses common elements and differences among problems that occur securing road, rail, air and sea transportation systems. Covers threats to control systems. Introduces control measures. Discusses past, present and future of in-vehicle and on-road safety systems, and cyber threats to emerging autonomous cars. Analyzes cyber threats to aviation and sea transportation security and available countermeasures.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

CYSE 467 - GPS Security

Credits: 3 (NR)
Provides background in long-range navigation developments; early global systems; space based systems; GPS and GLONASS systems; system architecture; spacecraft and earth station characteristics; design concepts of the CA and P GPS signal modes; frequencies, modulation, and other design aspects; clock issues; range and accuracy calculations and limitations; advanced concepts. Explains advanced concepts in global navigation satellite systems.

Prerequisite(s): CYSE 425. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

CYSE 470 - Human Factors and Cyber Security Engineering

Credits: 3 (NR)
This course explores the human factor in cyber security engineering. The focus is on understanding human performance characteristics and limitations, and the various research, design, and evaluation methods needed to address them when engineering secure systems. Topics include, for example, perception, cognition, memory, situation awareness, decision making, stress, automation, and human-computer display and interaction design principles.
**Prerequisite(s):** CYSE 205, STAT 344. Prerequisite enforced by registration system.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Spring

**CYSE 475 - Cyber Physical Systems**

Credits: 3 (NR)  
Introduces cyber physical systems as an integration of physical processes, computation, and networking. Discusses modeling and simulation of cyber physical systems, system design and implementation. Analyze such systems based on abstractions for modeling physical systems and abstractions for modeling data transformations. Covers security issues in cyber physical systems and applications selected from infrastructure, energy, transportation, robotics, manufacturing, and communications domains.

**Prerequisite(s):** CYSE 330, CYSE 421, CYSE 450. Prerequisite enforced by registration system.

**Notes:** This course integrates the core material about physical systems and cyber systems and builds on the application domains in the required courses and the technical electives. This is a new course not usually offered in other programs at the undergraduate level. The dual track of physical and cyber systems in the core curriculum enables the offering of such a course. Developed jointly by CS and ECE faculty.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Spring

**CYSE 476 - Cryptography and Computer Network Security**

Credits: 3 (NR)  
Covers basic concepts of cryptology, types of cryptosystems, implementation of security services, key management, public key certificates, public key infrastructure, e-mail and web security. Discusses modern secret-key ciphers, modes of operation, hash functions, message authentication codes, public key cryptography, and digital signature schemes. Covers cryptographic standards and secure internet protocols. Introduces educational and public domain software implementing modern cryptographic algorithms.

**Prerequisite(s):** CYSE 101, CYSE 330. Prerequisite enforced by registration system.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall

**CYSE 477 - Intrusion Detection**

Credits: 3 (NR)  
The objective of this course is to provide an in depth introduction to the science and art of intrusion detection. The course covers methodologies, techniques, and tools for monitoring events in computer systems or networks, with the objective of preventing and detecting unwanted process activity and recovering from malicious behavior.
**CYSE 478 - Cyber Security Audit and Compliance**

Credits: 3 (NR)
Fundamental concepts of the Cyber Security Compliance and Testing process. This will revolve around defining a control framework, the attendant control objectives and the reporting system for an organization. Covers the process of creating a control structure with goals and objectives, audit a given cyber infrastructure against it, and if found inadequate, establish a systematic remediation procedure.

**Prerequisite(s):** CYSE 421. Prerequisite enforced by registration system.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall

**CYSE 479 - Methods of User Authentication**

Credits: 3 (NR)
Discusses limitations of passwords and PINs and introduces alternatives. Covers user authentication based on security tokens and smart cards. Introduces basics of biometric systems, based on information such as fingerprints, facial features, iris, and voice. Discusses the use and security of electronic ID cards and passports. Covers methods of distinguishing human from internet bots over the network, such as CAPTCHA's.

**Prerequisite(s):** CYSE 211, 301, and 330. Prerequisite enforced by registration system.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall

**CYSE 480 - Malicious Software and Hardware**

Credits: 3 (NR)
Introduces various types of malicious software (malware). Discusses malware analysis using virtual machines, sandboxes, process monitors, packet sniffers, de-obfuscation, etc. Introduces hardware Trojans and other forms of malicious hardware. Discusses prevention techniques at the design, fabrication, and post-fabrication level. Introduces various countermeasures against malicious software and hardware. The course has a lab with Windows and Android operating systems.

**Prerequisite(s):** CYSE 211, CYSE 301. Prerequisite enforced by registration system.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 1  
**When Offered:** Fall
CYSE 491 - Engineering Senior Seminar

Credits: 2 (NR)
This course covers a variety of responsibilities of cyber security engineers including: engineering ethics, government policies, laws and regulations affecting cyber security engineering, industry practices, entrepreneurship. Effective technical communications. Incorporates global implications of cyber security engineering. Speakers include faculty, invited guests from industry and government, as well as students.

Corequisite(s): CYSE 492.

Notes: Meets ABET requirements in writing, presentations, ethics and global understanding. Also will be Writing Across the Curriculum (WAC) of the university.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 0
When Offered: Fall

CYSE 492 - Senior Advanced Design Project I

Credits: 2 (NR)
First semester of a two semester capstone course in the Cyber Security Engineering program. Development of a design project by a team of students. Conception of the project and determination of its feasibility. Work includes developing preliminary design and implementation plan. Projects will aim at the integration of the technical material learned in several courses and incorporation of industry input.

Corequisite(s): CYSE 491.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 0
When Offered: Fall

CYSE 493 - Senior Advanced Design Project II

Credits: 3 (NR)
Second semester of a two semester capstone course in the Cyber Security Engineering program. Project includes designing a cyber-physical security system, writing required software, assembling hardware if needed, conducting experiments or studies, and testing the complete system. Requires oral and written reports during project and at completion.

Prerequisite(s): CYSE 492. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring

Dance (DANC)
DANC 101 - Dance Appreciation

Credits: 3 (NR)
Introduces dance as universal human activity, expression of cultural identity, and art form. Survey of global dance includes folk, ceremonial and ritual, trance, court, classical, and theatrical.

Fulfills Mason Core requirement in arts.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

DANC 114 - Rhythmic Analysis and Music Resources for Dance

Credits: 3 (NR)
Introduces rhythmic structure, notation, and basic forms of music.

Prerequisite(s): Admission to the dance major. Prerequisite enforced by registration system.

Notes: Lecture, studio.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 2

DANC 118 - World Dance

Credits: 3 (RT)
Performance of a world dance form through presentation of fundamental techniques, music and culture. Area of concentration may vary to include an array of world dance forms.

Fulfills Mason Core requirement in global understanding.

Notes: May be repeated for total 6 credits. Fulfills non-Western requirement for CHSS and COS students.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 2

DANC 119 - Dance in Popular Culture: Afro-Latino Dance

Credits: 3 (RD)
Performance of a popular dance form through presentation of fundamental techniques, music, and culture. Area of concentration may vary to include an array of popular dance forms.
Fulfills Mason Core requirement in arts.

Notes: May be repeated for total 6 credits.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 3

DANC 120 - Special Topics in Dance

Credits: 1-3 (RT)
Rotating topic. Introduction and exploration of topical studies in dance or related study areas; topic depends on instructor.

Notes: May be repeated for total 9 credits if course content differs.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 1-3

DANC 125 - Modern/Contemporary Dance I

Credits: 3 (RD)
Introduces fundamentals of modern dance technique. Emphasizes improving anatomical awareness and alignment, increasing strength and flexibility, and developing rhythmic sensitivity.

Fulfills Mason Core requirement in arts.

Notes: May be repeated for total 6 credits.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 3

DANC 131 - Beginning Jazz Technique

Credits: 3 (RD)
Introduces fundamentals of jazz dance technique, explores the musical and cultural traditions of jazz dance, and its historical context. Emphasizes improving anatomical awareness and alignment, increasing strength and flexibility, and developing rhythmic sensitivity. Also introduces jazz improvisation and choreography.

Fulfills Mason Core requirement in arts.

Notes: May be repeated for 6 credits.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 3

DANC 145 - Ballet I
Credits: 3 (RD)
Introduces fundamental elements of ballet technique and vocabulary. Stresses learning vocabulary and movement characteristics of this highly stylized art form. Emphasizes improving anatomical awareness and alignment, increasing strength and flexibility, and developing musicality.

Fulfills Mason Core requirement in arts.

Notes: May be repeated for total 6 credits.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 3

**DANC 150 - Dance Improvisation**

Credits: 3 (NR)
Explores movement invention and discovery. Movement explored in relation to other art forms such as literature, painting, sculpture, and architecture; enhancing kinesthetic awareness; sensitivity to others; and the environment. Prerequisite for dance composition and choreography series.

Prerequisite(s): Admission to the dance major. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 3

**DANC 161 - Beginning Tap Dance**

Credits: 3 (RD)
Introductory exploration of rhythms and steps basic to the art form of tap dancing including its musical and cultural traditions. Emphasizes improving anatomical awareness and alignment, increasing strength and flexibility and developing rhythmic sensitivity.

Fulfills Mason Core requirement in arts.

Notes: May be repeated for total 6 credits.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 3

**DANC 170 - Orientation to Dance Production**

Credits: 1 (NR)
Introduces sound, lighting, and stage management elements and terminology as related to dance performance. Intensive workshop setting emphasizes laboratory experience.

Prerequisite(s): Admission to the dance major. Prerequisite enforced by registration system.
DANC 190 - First Year Seminar

Credits: 0-1 (NR)
Introduction to School of Dance, CVPA, and university resources available to dance majors. Weekly meetings focus on learning about opportunities for involvement in dance, the community, and adjusting academically. Each class addresses a topic to assist dance majors to effectively transition to college life.

Prerequisite(s): Admission to the dance major. Prerequisite enforced by registration system.

DANC 210 - Anatomy and Kinesiology for Dance

Credits: 3 (NR)
Covers aspects of anatomy and kinesiology that directly apply to correct development of dance technique. Emphasizes exercise correctives and imagery to correct insufficient muscle pattern and reduce stress on the body.

Prerequisite(s): Admission to the dance major. Prerequisite enforced by registration system.

DANC 225 - Modern/Contemporary Dance II

Credits: 3 (RD)
Further develops knowledge, skills, and appreciation of modern dance through continued exploration of techniques, aesthetics, and creativity. Continuing the development of anatomical awareness and alignment, technical clarity, and rhythmic sensitivity.

Fulfills Mason Core requirement in arts.

Prerequisite(s): DANC 125 or permission of instructor.

Notes: May be repeated for total 9 credits.

DANC 231 - Intermediate Jazz Technique
Further study of the concepts of jazz dance technique, and in-depth study of 21st century jazz dance forms. Emphasizes furthering anatomical awareness and alignment, developing technical clarity, rhythm and syncopation. Continues exploration of jazz improvisation and choreography.

Fulfills Mason Core requirement in arts.

Prerequisite(s): DANC 131 or permission of instructor.

Notes: May be repeated for 12 credits.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 3

DANC 245 - Ballet II

Further develops fundamental elements of ballet technique and vocabulary. Stresses increasing vocabulary and movement characteristics of this highly stylized art form. Continuing emphasis on improving anatomical awareness and alignment, increasing strength and flexibility, and developing musically.

Fulfills Mason Core requirement in arts.

Prerequisite(s): DANC 145 or permission of instructor.

Notes: May be repeated for total 9 credits.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 3

DANC 251 - Dance Composition I

Introduces basic principles for composing dance movement. Focuses on simple compositional forms as they apply to solo performer, discussion, analysis, and evaluation of artistic choices. Students maintain video and written journals to document their artistic process.

Prerequisite(s): DANC 150. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 3

DANC 252 - Dance Composition II
Credits: 3 (NR)
Explores compositional elements in dance as they apply to group forms. Offers continued experience in developing and manipulating movement phrases using a variety of compositional forms. Introduces conducting rehearsals and selecting music. Students discuss, analyze, and evaluate artistic choices in composition using appropriate dance arts vocabulary and terminology, and maintain video and written journals to document artistic process.

Prerequisite(s): DANC 150 and DANC 251. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 3

DANC 270 - Dance Production Lab

Credits: 1 (RT)
Practical experience in stage crew, sound, or lighting of dance productions through rehearsal to public performance for university dance concerts or guest artist programs.

Prerequisite(s): DANC 170. Prerequisite enforced by registration system.

Notes: May be repeated for total 6 credits.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 1

DANC 301 - What is Dance?

Credits: 3 (NR)
Explores connections among literature, music, theater, and visual art within aesthetic framework of dance. Examines development and ideals of Western theatrical dance, and historical and social context in which they were created. Method of instruction includes lecture, discussion, and studio experiences.

Fulfills Mason Core requirement in arts.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 1

DANC 318 - Global Perspectives: World Dance Forms

Credits: 3 (RD)
Continued in-depth study of world dance form including technique, music, and culture. Texts, video, performances, music, participatory events, and guest artist presentations. Lecture, studio. Area of concentration varies to include as many cultures as possible.

Fulfills Mason Core requirement in global understanding.

Prerequisite(s): DANC 118 or DANC 119; or permission of instructor. Prerequisite enforced by registration system.
Notes: May be repeated for total 6 credits.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 2

DANC 324 - Introduction to Dance Conditioning

Credits: 1-3 (RT)
Course involves intensive rehabilitation and conditioning exercises and realignment training geared for the individual dancer. In-depth understanding of injury prevention and neuromuscular re-education are applied to ballet and modern technique classes.

Prerequisite(s): Admission to the dance major and permission of director; prerequisites enforced by registration system.

Notes: May be repeated for a total of 12 credits

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 1-3

DANC 325 - Modern/Contemporary Dance III

Credits: 1-3 (RT)
Explores intermediate level of modern dance technique. Emphasizes improving anatomical awareness, increasing strength and flexibility, expanding modern dance vocabulary, and developing flow and dynamic range.

Fulfills Mason Core requirement in arts.

Prerequisite(s): Admission to the dance major. Prerequisite enforced by registration system.

Notes: May be repeated for total 24 credits.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 1-3

DANC 326 - Dance Performance Practicum

Credits: 0-1 (RT)
Practical experience in dance performance through rehearsal process of university dance concerts.

Prerequisite(s): Audition.

Notes: May be repeated for total 8 credits.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0-1
DANC 331 - Advanced Jazz Dance

Credits: 3 (RD)
In-depth studio study of 21st century jazz dance forms. Continues concepts and vocabulary introduced in DANC 231, and further emphasizes alignment, technical clarity and virtuosity. Emphasizes mastery of rhythm and syncopation.

Fulfills Mason Core requirement in arts.

Prerequisite(s): DANC 231.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 3

DANC 345 - Ballet III

Credits: 1-3 (RT)
Provides continued ballet training for intermediate-level dancer. Emphasizes increasing technical proficiency, improving anatomical awareness, and developing deeper understanding of skills and principles of ballet technique and how they provide foundation to teach and perform.

Fulfills Mason Core requirement in arts.

Prerequisite(s): Admission to the dance major. Prerequisite enforced by registration system.

Notes: May be repeated for 24 credits.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 1-3

DANC 360 - Choreography

Credits: 3 (NR)
Continued choreographic exploration and research, culminating in bringing completed works to production.

Prerequisite(s): DANC 150, DANC 251 and DANC 252. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 3

DANC 362 - RS: Directed Choreography

Credits: 1 (RT)
Faculty-guided, individual learning experience where students learn to choreograph a dance work by auditioning dancers, costuming, staging, lighting, selecting musical accompaniment, and composing original movement material.
Designated as a research and scholarship intensive course.

**Prerequisite(s):** DANC 150, DANC 251, DANC 252 and DANC 360. Prerequisite enforced by registration system.

**Notes:** May be repeated for total 6 credits.

**Hours of Lecture or Seminar per week:** 0  
**Hours of Lab or Studio per week:** 1

**DANC 370 - Dance Performance**

Credits: 0-1 (RT)  
Practical experience in performance, repertory, and choreography through rehearsal and public performance of university dance concerts or guest artist programs.

**Prerequisite(s):** Audition and admission to the dance major. Prerequisite enforced by registration system.

**Notes:** May be repeated for total 12 credits.

**Hours of Lecture or Seminar per week:** 0  
**Hours of Lab or Studio per week:** 0-1

**DANC 371 - Residency Workshop**

Credits: 0-1 (RT)  
Rehearsal and performance of new or restaged dance by guest choreographer in intensive rehearsal setting.

**Prerequisite(s):** Audition and admission to the dance major. Prerequisite enforced by registration system.

**Notes:** May be repeated for total 6 credits.

**Hours of Lecture or Seminar per week:** 0  
**Hours of Lab or Studio per week:** 0-1

**DANC 372 - Advanced Dance Production**

Credits: 1 (NR)  
Methodology and practice of costume and lighting design, as dictated by specific needs of dance performance.

**Prerequisite(s):** DANC 170 and DANC 270. Prerequisite enforced by registration system.

**Notes:** Taught in series of workshop settings.

**Hours of Lecture or Seminar per week:** 1  
**Hours of Lab or Studio per week:** 1
DANC 390 - Dance History I

Credits: 3 (NR)
Examines dance as it developed as Western theatrical form from its beginnings in social and folk dance through evolution into ballet. Emphasizes romantic and classical ballet. Also studies American dance forms as they evolved in spectacles, burlesques, minstrelsy, and social dance. All forms of dance placed in social, political, cultural, aesthetic, and historical contexts.

Fulfills Mason Core requirement in arts.
Fulfills writing intensive requirement in the major.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

DANC 391 - Dance History II

Credits: 3 (NR)
Examines revolutions in transformation of 20th-century Western dance into forms and institutions that radically departed from predecessors. Development of contemporary dance carried with it reflections of the influence of technology and media as well as concept of global culture. Renewed interest in traditional dance forms acknowledges power of dance to serve as carrier of cultural and societal values. Dance forms placed in social, political, cultural, aesthetic, and historical contexts.

Fulfills Mason Core requirement in arts.
Fulfills writing intensive requirement in the major.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

DANC 399 - Independent Study

Credits: 1-3 (RT)
Individual research or creative project supervised by faculty member.

Prerequisite(s): Permission of director of School of Dance.

Notes: May be repeated for total 6 credits.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 1-3

DANC 410 - Introduction to Contemporary Movement Theories
Credits: 3 (NR)
Introduction to movement theories combining somatic theory with practical application to dance training. Focus on ways somatic practices can deepen perceptual processes and influence movement aesthetics. Theories studied may include: Alexander Technique, Feldenkrais Method, Body-Mind Centering, and Ideokinesis.

Prerequisite(s): DANC 210. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

DANC 418 - Global Dance Intensive

Credits: 3 (RD)
Intensive investigation of selected dance idiom within cultural and artistic contexts. Course work supplemented by participation in and observation of ambient culture. Analyzes similarities, differences, and common antecedents between selected culture and North American dance idioms.

Fulfills Mason Core requirement in Global Understanding.

Notes: May be repeated for total 6 credits.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

DANC 420 - Special Topics in Dance

Credits: 1-3 (RT)
In-depth presentation and exploration of topical studies in dance or related study areas.

Prerequisite(s): 9 credits of dance courses, or permission of instructor.

Notes: Topic depends on instructor. May be repeated for total 9 credits.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 1-3

DANC 425 - Modern/Contemporary Dance IV

Credits: 1-3 (RT)

Advanced-level exploration of modern dance technique. Emphasizes refining alignment, developing ability to self-correct, and replicating sophisticated movement sequences. Preparation to enter professional field of dance.

Fulfills Mason Core requirement in arts.
Prerequisite(s): Admission to the dance major. Prerequisite enforced by registration system.

Notes: May be repeated for 18 credits.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 1-3

**DANC 445 - Ballet IV**

Credits: 1-3 (RT)
Provides preprofessional ballet training for advanced-level dancer. Emphasizes attainment of high-quality technical and performance skills, application of anatomical principles, and mastery of sophisticated classical movement sequences.

Fulfills Mason Core requirement in arts.

Prerequisite(s): Admission to the dance major. Prerequisite enforced by registration system.

Notes: May be repeated for 18 credits.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 1-3

**DANC 453 - Teaching Creative Movement**

Credits: 3 (NR)
Provides theory, methodology, and practicum experience in preparation for teaching creative movement to children K-12, with some application to special populations.

Prerequisite(s): Admission to the dance major. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**DANC 454 - Methods of Teaching Dance**

Credits: 3 (NR)
Examines dance pedagogy, focusing on principles needed for teaching sound technique. Students learn skills, methods, and instructional procedures for classroom. Emphasizes curriculum development, proper course sequencing, implementation of teaching strategies, and classroom management techniques. Students study teaching methods appropriate for K-12, gifted and talented, and special-needs students. Intensive practice in implementing these skills includes lab, field-teaching experiences.

Prerequisite(s): Admission to the dance major; senior standing; prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
DANC 455 - Teaching Practicum

Credits: 1-6 (RT)
Full semester of supervised teaching experience in approved school or studio dance program. Credits based on number of teaching contact hours per week.

Prerequisite(s): Admission to the dance major; completion of all coursework required for teaching licensure; prerequisite enforced by registration system.

Notes: May be repeated for total 12 credits.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

DANC 480 - Introduction to Laban Movement Analysis

Credits: 3 (NR)
Introduces components of laban movement analysis: body, shape, effort, and space. Includes motif writing for recording and analyzing movement.

Prerequisite(s): DANC 210. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

DANC 490 - Senior Dance Seminar

Credits: 3 (NR)
Culminating seminar devoted to analyzing and synthesizing knowledge and skills gained through undergraduate course work as it applies to dance, arts education, and professional development. Students develop senior project including written and oral presentation in public forum.

Fulfills Mason Core requirement in synthesis.

Prerequisite(s): Admission to the dance major; senior standing; prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

DANC 501 - Graduate Dance Seminar

Credits: 1-3 (RD)
Presentation and discussion of current issues in dance specific to education, research, and professional development in the field.

Prerequisite(s): Admission to MFA in dance program.
DANC 510 - Contemporary Movement Theories

Credits: 3 (RD)
In-depth study of movement theories combining somatic theory with practical application to dance training. Focus is on ways somatic practices can deepen perceptual processes and influence movement aesthetics.

Prerequisite(s): Admission to Dance MFA program.

DANC 520 - Special Topics in Dance

Credits: 1-3 (RT)
In-depth presentation and exploration of topical studies in dance and/or related study areas.

Prerequisite(s): Admission to Dance MFA program.

Notes: Topic depends on instructor. May be repeated for total 9 credits.

DANC 525 - Advanced Modern Dance

Credits: 1-3 (RT)
Advanced study of modern technique, emphasizing sophisticated technical ability and performance skills, includes comparison of pedagogical perspectives.

Prerequisite(s): Admission to Dance MFA program.

Notes: May be repeated for total 18 credits.

DANC 545 - Advanced Ballet

Credits: 1-3 (RT)
Advanced study of ballet technique with an emphasis on high technical ability, performance skills and ballet vocabulary, includes comparison of pedagogical perspectives.
Prerequisite(s): Admission to Dance MFA program.

Notes: May be repeated for total 18 credits.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 1-3

DANC 560 - Advanced Choreography

Credits: 3 (RT)
Intensive study and exploration of choreographic forms.

Prerequisite(s): Admission to Dance MFA program.

Notes: May be repeated for 12 credits.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 3

DANC 562 - Directed Choreography

Credits: 3 (RD)
Creation of original work including conception and development through rehearsal process, culminating in public presentation.

Prerequisite(s): Admission to Dance MFA program.

Notes: May be repeated for 9 credits.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 3
When Offered: Fall, Spring

DANC 570 - Advanced Dance Performance

Credits: 1-3 (RD)
Public performance/presentations in university or professional productions.

Prerequisite(s): Admission to Dance MFA program.

Notes: May be repeated for total 12 credits.

Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 3-9
DANC 571 - Residency Workshop

Credits: 3 (RD)
Rehearsal direction of a new or restaged work by a guest choreographer in an intensive rehearsal process.

Prerequisite(s): Admission to Dance MFA program.

Notes: May be repeated for 9 credits.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 3

DANC 580 - Laban Movement Analysis

Credits: 3 (NR)
Introduction to the components of Laban Movement Analysis: body, shape, effort and space.

Prerequisite(s): Admission to Dance MFA program.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 3

DANC 598 - Philosophy and Aesthetics of Dance

Credits: 3 (NR)
Study of philosophical theories and aesthetic principles of dance as a performing art.

Prerequisite(s): DANC 390 and 391, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

DANC 599 - Independent Study

Credits: 3 (RT)
Individual research or creative project.

Prerequisite(s): Admission to Dance MFA program.

Notes: May be repeated for total 6 credits.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
Grading: Graduate Special
DANC 615 - Contemporary Trends

Credits: 3 (NR)
Study of contemporary art and artists and their philosophical theories, aesthetics and practices as they relate to the creation of new work.

Prerequisite(s): Admission to Dance MFA program.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

DANC 627 - Advanced Teaching Seminar

Credits: 3 (NR)
Discussion and readings from varied pedagogical theories examining diverse approaches to teaching technique and theory culminating in development of a teaching portfolio.

Prerequisite(s): Admission to Dance MFA program.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

DANC 672 - Dance Production

Credits: 3 (RD)
Artistic Direction of university or professional performance including mentoring of choreographers, adjudication of work, coordination with lighting designer, costumer, sound technician and managing director.

Prerequisite(s): Admission to Dance MFA program.

Notes: May be repeated for 6 credits.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

DANC 680 - Dance Management

Credits: 3 (NR)
Exploration of the technical, financial and economical aspects of dance management including areas of marketing, fundraising, publicity, incorporation, booking non-profit vs. profit making organizations and issues relating to current practices in the performing arts industry.

Prerequisite(s): Admission to Dance MFA program.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
DANC 790 - Internship

Credits: 1-3 (RD)
In depth study in selected subject area of interest.

Prerequisite(s): Admission to Dance MFA program.

Notes: May be repeated for total 9 credits.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0

DANC 799 - Thesis

Credits: 1-6 (RD)
Creation and documentation of original research including planning, performance, recording and written reflecting under direction of thesis committee.

Prerequisite(s): Admission to Dance MFA program.

Notes: May be repeated for total 6 credits.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0
Grading: Satisfactory/No credit only

Data Analytics Engineering (DAEN)

DAEN 690 - Data Analytics Project

Credits: 3 (NR)
Capstone project course for MS in Data Analytics program. Key activity is completion of a major applied team project resulting in an acceptable technical report and oral briefing. Student should plan to take this course in the last semester of studies.

Prerequisite(s): Completion of twelve credit hours of coursework in MS Data Analytics program.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

Early Childhood Education (ECED)
ECED 401 - Developmental Pathways of Diverse Learners, Birth-Adolescence

Credits: 3 (NR)
Examines child and adolescent development from diverse perspectives. Addresses typical and atypical physical, social, and emotional, language, and intellectual development. Explores role of individual differences and culture in understanding and interpreting child and adolescent development.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring, Summer

ECED 402 - Foundations of Language and Literacy for Diverse Young Learners

Credits: 3 (NR)
Examines complexity of language acquisition and literacy development. Focuses on typical and atypical language development, connections between language and literacy, and diversity of communication styles in families and cultures. Emphasizes first and second language acquisition.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Summer, Spring

ECED 403 - Inclusive Curriculum for Young Learners: Planning Instruction and Guidance

Credits: 3 (NR)

Notes: Field experience required.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

ECED 404 - Engaging Families of Diverse Young Learners

Credits: 3 (NR)
Focuses on strategies for developing culturally appropriate family professional partnerships to benefit children, including children from diverse cultural and linguistic backgrounds and children with special needs. Explores theories and research supporting a family-centered approach, including family and professional rights and responsibilities, especially in the special education process.
ECED 405 - Introduction to Early Childhood Special Education

Credits: 3 (NR)
Surveys current knowledge about young children with disabilities within the context of human growth and development and learning expectations in the preschool years. Includes historical factors and legislation affecting service delivery.

Notes: Field experience required.

ECED 406 - Medical Aspects of Physical and Sensory Disabilities of Diverse Young Learners

Credits: 3 (NR)

ECED 422 - Developing Language, Literacy, and Communication of Diverse Young Learners

Credits: 3 (NR)
Examines strategies to develop language, literacy, and communication in young children with varying abilities. Explores the importance of adult-child interaction and the effect of bilingualism, cultural diversity, cognitive ability, and language disorders.

Notes: Field experience required.

ECED 423 - Early Intervention for Infants and Toddlers with Disabilities: Collaborative and Consultative Approaches
Credit: 3 (NR)
Covers methods of service delivery for infants and toddlers with disabilities and their families. Explores key aspects of consultation, interdisciplinary collaboration, service coordination, and family-centered services. Focuses on culturally responsive practices.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

ECED 497 - Special Topics in Early Childhood Education

Credits: 1-3 (RT)
Provides study on selected topic or emerging issue in Early Childhood Education.

Notes: May be repeated for credit with ECE program permission.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring, Summer

ECED 501 - Developmental Pathways of Diverse Learners, Birth-Adolescence

Credits: 3 (NR)
Examines child and adolescent development from diverse perspectives. Addresses typical and atypical physical, social, and emotional, language, and intellectual development. Explores role of individual differences and culture in understanding and interpreting child and adolescent development.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring, Summer

ECED 502 - Foundations of Language and Literacy for Diverse Young Learners

Credits: 3 (NR)
Examines complexity of language acquisition and literacy development. Focuses on typical and atypical language development, connections between language and literacy, and diversity of communication styles in families and cultures. Emphasizes first and second language acquisition.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring, Summer

ECED 503 - Inclusive Curriculum for Young Learners: Planning Instruction and Guidance
Credits: 3 (NR)
Explores principles of learning, curriculum development, and relationship between assessment and instruction. Examines role of play and active exploration in learning. Addresses guiding children's behavior and the role of families and culture in children's learning

Notes: Field experience required

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

ECED 504 - Engaging Families of Diverse Young Learners

Credits: 3 (NR)
Focuses on strategies for developing culturally appropriate family professional partnerships to benefit children, including children from diverse cultural and linguistic backgrounds and children with special needs. Explores theories and research supporting a family centered approach, including family and professional rights and responsibilities, especially in the special education process.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring, Summer

ECED 505 - Introduction to Early Childhood Special Education

Credits: 3 (NR)
Surveys current knowledge about young children with disabilities within the context of human growth and development and learning expectations in the preschool years. Includes historical factors and legislation affecting service delivery.

Notes: Field experience required.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring, Summer

ECED 506 - Medical Aspects of Physical and Sensory Disabilities of Diverse Young Learners

Credits: 3 (NR)

Equivalent to EDSE 558 (2011-2012 Catalog)

Hours of Lecture or Seminar per week: 3
ECED 511 - Assessment of Diverse Young Learners

Credits: 3 (NR)
Examines types of assessment, including family-centered child assessment, for planning and implementing effective programs for culturally, linguistically, and ability diverse children, birth through third grade. Addresses selection, administration, analysis, and interpretation of formal and informal assessments.

Prerequisite(s): Admission to the Early Childhood Education program or approval of course instructor.

Notes: Field Experience Required.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

ECED 512 - Language and Literacy Assessment and Instruction for Diverse Young Learners

Credits: 3 (NR)
Examines ways to assess and develop reading, writing, listening, and speaking in preschool through third-grade classrooms. Addresses instructional strategies and practices that promote language and literacy development in culturally, linguistically, and ability diverse children.

Prerequisite(s): Admission to the Early Childhood Education program or approval of course instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

ECED 513 - Curriculum Across the Content Areas for Diverse Young Learners

Credits: 3 (NR)
Explores assessment, curriculum development, planning, and instructional practices across content areas. Examines strategies for guiding children's behavior, integrating instruction across content areas, and planning and implementing community of learners inclusive of children with diverse disabilities.

Prerequisite(s): ECED 503.

Corequisite(s): ECED 795.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring
ECED 514 - Mathematics and Science for Diverse Young Learners

Credits: 3 (NR)
Examines ways to foster development of mathematics and science in preschool to third-grade children. Covers construction of math and science lessons and hands-on experiences that address the needs of culturally, linguistically, and ability diverse children.

Prerequisite(s): Admission to the Early Childhood Education program or approval of course instructor.

Notes: Field experience required.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

ECED 521 - Family-Centered Assessment of Diverse Young Learners

Credits: 3 (NR)
Examines types of assessment, including family-centered assessment, used for planning and implementing effective programs for children from diverse cultures and with varied learning needs. Addresses selection, administration, and interpretation of formal and informal assessments.

Equivalent to EDSE 656 (2011-2012 Catalog); EDUT 522 (2010-2011 Catalog)

Prerequisite(s): Admission to the Early Childhood Education program or approval of course instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

ECED 522 - Developing Language, Literacy, and Communication of Diverse Young Learners

Credits: 3 (NR)
Examines strategies to develop language, literacy, and communication in young children with varying abilities. Explores the importance of adult-child interaction and the effect of bilingualism, cultural diversity, cognitive ability, and language disorders.

Equivalent to EDSE 556 (2011-2012 Catalog)

Prerequisite(s): Admission to the Early Childhood Education program or approval of course instructor

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall
ECED 523 - Early Intervention for Infants and Toddlers with Disabilities: Collaborative and Consultative Approaches

Credits: 3 (NR)
Covers methods of service delivery for infants and toddlers with disabilities and their families. Explores key aspects of consultation, interdisciplinary collaboration, service coordination, and family-centered services. Focuses on culturally responsive practices.

Prerequisite(s): Admission to the Early Childhood Education program or approval of course instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

ECED 524 - Families of Children with Special Needs

Credits: 3 (NR)
Focuses on strategies for developing culturally appropriate family-professional partnerships to benefit children with special needs. Explores theories and research supporting a family-centered approach. Includes family and professional rights and responsibilities in the special education process.

Equivalent to EDSE 615 (2011-2012 Catalog)

Prerequisite(s): Admission to the Early Childhood Education program or approval of course instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring, Summer

ECED 585 - Research in Early Childhood Education

Credits: 3 (NR)
Develops fundamental concepts, principles, and methods of research in early childhood education, with emphasis on interpreting and applying research results. Critiques research and uses findings in educational settings.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

ECED 591 - Policy Perspectives in Early Childhood Education

Credits: 3 (NR)
Explores historical and current trends and issues involving legislation and policy in early childhood education, multilingual education, early childhood special education, and multicultural education. Focuses on historical role of social advocacy, development of advocacy skills, and collaboration and consultation with other professionals and staff in early childhood education. Provides understanding of continuum of services and context of service delivery.
Prerequisite(s): Admission to the Early Childhood Education program or approval of course instructor.

Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0  
When Offered: Spring, Summer

**ECED 597 - Special Topics in Early Childhood Education**

Credits: 1-3 (RT)  
Provides study on selected topic or emerging issue in Early Childhood Education.

Notes: May be repeated for credit with ECE program permission.

Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0  
When Offered: Fall, Spring, Summer

**ECED 601 - Frameworks for Early Childhood Education**

Credits: 3 (NR)  
Analyzes foundational frameworks for developing perspectives for working with culturally, linguistically, and ability diverse young learners, birth to age 8, and their families. Examines foundational work from fields of early childhood education, early childhood special education, multicultural education, and second language acquisition and bilingual education.

Prerequisite(s): Must be taken with or after final course of program.

Notes: Must be taken as final course or with final courses of the program.

Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0  
When Offered: Fall, Spring, Summer

**ECED 790 - Internship with Diverse Preschool Children**

Credits: 3 (RD)  
Enables students to participate full time in an internship with diverse preschool children. Links university course work to real world of working with diverse young learners and their families.

Prerequisite(s): Admission to the Early Childhood Education Prekindergarten - Third Grade Licensure Graduate Certificate Program. All endorsement and standardized test requirements (Praxis Core Academics Skills for Educators or qualifying substitution, Praxis II, and Virginia Communication and Literacy Assessment) must be met the semester prior to the internship.

Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0  
Grading: Satisfactory/No Credit  
When Offered: Fall, Spring
ECED 791 - Internship with Diverse Infants and Toddlers

Credits: 3 (RD)
Enables students to participate full time in an internship with diverse infants/toddlers. Links university course work to real world of working with diverse young learners and their families.

Prerequisite(s): Admission to the Early Childhood Special Education Licensure Graduate Certificate Program. All standardized test requirements (Praxis Core Academic Skills for Educators or qualifying substitution and Virginia Communication and Literacy Assessment) must be met the semester prior to the internship.

Notes: Students enroll in both infant/toddler (3 credits) and preschool (3 credits) internships.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
Grading: Satisfactory/No Credit
When Offered: Fall, Summer, Spring

ECED 792 - Internship in Early Childhood Education-TFA

Credits: 1-6 (RD)
Enables students to participate full time in an internship in early childhood education. Links university course work to real world of working with diverse young learners and their families.

Prerequisite(s): Admission to the Early Childhood Education program or approval of course instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
Grading: Satisfactory/No Credit
When Offered: Fall, Spring

ECED 793 - Internship in Preschool Early Childhood Special Education

Credits: 3 (RD)
Enables students to participate full time in an internship in preschool early childhood special education. Links university course work to real world of working with diverse young learners and their families.

Prerequisite(s): Admission to the Early Childhood Special Education Licensure Graduate Certificate Program. All standardized test requirements (Praxis Core Academic Skills for Educators or qualifying substitution and Virginia Communication and Literacy Assessment) must be met the semester prior to the internship.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
Grading: Satisfactory/No Credit
When Offered: Fall, Spring
ECED 795 - Internship in Kindergarten - Third Grade

Credits: 3 (RD)
Enables students to participate full time in an internship in early childhood education in kindergarten through third grade. Links university course work to real world of working with diverse young learners and their families.

Prerequisite(s): ECED 501, ECED 502, ECED 503, ECED 504, ECED 790 and Admission to the Early Childhood Education Prekindergarten - Third Grade Licensure Graduate Certificate Program. All endorsement and standardized test requirements (Praxis Core Academics Skills for Educators or qualifying substitution, Praxis II, Virginia Communication and Literacy Assessment, and Reading for Virginia Educators) must be met the semester prior to the internship.

Corequisite(s): ECED 513.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
Grading: Satisfactory/No Credit
When Offered: Fall, Spring

ECED 801 - Current Research and Trends in Early Childhood Education

Credits: 3 (RT)
Examines research and trends in the early education of children. Explores issues that influence the education of young children with special education needs and children from culturally, linguistically, and economically diverse backgrounds. Examines practices appropriate for diverse young learners.

Prerequisite(s): Admission to the PhD in Education program or post-master's status and approval of course instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

ECED 802 - Cognition, Language, and Literacy for Diverse Young Learners

Credits: 3 (RT)
Examines research and practice related to cognition, language, and literacy in the early education of diverse learners, including special education and multicultural/multilingual education.

Prerequisite(s): Admission to the PhD in Education program or post-master's status and approval of course instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring

ECED 803 - Teacher Preparation and Professional Development
ECED 804 - Family Research and Practice in Early Childhood Education

Credits: 3 (NR)
Explores the relationship between families and professionals in providing appropriate early care and education, birth through grade 3, including children with special education needs and those from culturally, linguistically, and economically diverse backgrounds. Includes in-depth study, analysis, and discussion of original research as well as syntheses of findings.

Prerequisite(s): Admission to the PhD in Education program or post-master's status and approval of course instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring

Economics (ECON)

Offered by the College of Humanities and Social Sciences

Individual courses taken for credit under their former numbers may not be repeated for credit under their present numbers. A grade of C or better in ECON 103 and 104 is prerequisite to upper-division economics courses.

ECON 100 - Economics for the Citizen

Credits: 3 (NR)
Not available to economics majors. Broad introduction to economic concepts and how they can contribute to a better understanding of the world around us. Applies and develops concepts to current economic and social problems and issues. Less formal modeling than in the 103-104 sequence.

Fulfills Mason Core requirement in social and behavioral science.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ECON 103 - Contemporary Microeconomic Principles
Credits: 3 (NR)  
Introduces microeconomics in the context of current problems. Explores how market mechanism allocates scarce resources among competing uses; uses supply, demand, production, and distribution theory to analyze problems.  

Fulfills Mason Core requirement in social and behavioral science.  

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  

**ECON 104 - Contemporary Macroeconomic Principles**  

Credits: 3 (NR)  
Introduces macroeconomics in the context of current problems. National income analysis, money and banking, economic growth and stability, unemployment, inflation, and role of government.  

Fulfills Mason Core requirement in social and behavioral science.  

**Prerequisite(s):** ECON 103.  

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  

**ECON 105 - Environmental Economics for the Citizen**  

Credits: 3 (NR)  

Introduction to economic concepts and how they can be applied to environmental policy issues such as air and water pollution, climate change, natural resource use, and sustainability. Focus is on concepts, policy, and case studies rather than formal modeling exercises.  
Designated a Green Leaf Course.  

Fulfills Mason Core requirement in social and behavioral science.  

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  

**ECON 110 - Introduction to Economic Science**  

Credits: 2 (NR)  
Introduces economics as an observational science, covering personal vs. impersonal exchange, strategic interdependence and game theory, group decision making, and market design.  

Fulfills Mason Core requirement in social and behavioral science (ECON 110 and 111 must be taken in sequence).  

**Notes:** Registration is controlled; contact instructor for guidelines.
ECON 111 - Laboratory Methods in Economics

Credits: 1 (NR)
Enables participation in experimental economics research by recruiting subjects, writing experiment instructions, and monitoring sessions.

Fulfills Mason Core requirement in social and behavioral science (ECON 110 and 111 must be taken in sequence).

Notes: Registration is controlled; contact instructor for guidelines.

ECON 306 - Intermediate Microeconomics

Credits: 3 (NR)
Basic factors of price and distribution theory: analysis of demand, costs of production and supply relationships, and price and output determination under various market structures.

Prerequisite(s): ECON 103 and 104, and MATH 108 or 113.

ECON 308 - Managerial Economics and Strategy

Credits: 3 (NR)
Analysis of major strategic business situations including pricing strategy, incentives and contracts, game theory, and vertical and horizontal integration.

Prerequisite(s): ECON 306.

ECON 309 - Economic Problems and Public Policies

Credits: 3 (NR)
Economic problems in light of current and proposed public policies. Topics include environmental issues, international trade policies, and regulatory issues and their historical roots.
Fulfills Mason Core requirement in synthesis.

Prerequisite(s): ECON 100 or 103 and 104 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ECON 310 - Money and Banking

Credits: 3 (NR)
Monetary, commercial, and central banking systems, with particular emphasis on their relationship with American government programs, fiscal policies, and controls.

Prerequisite(s): ECON 103 and 104, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ECON 311 - Intermediate Macroeconomics

Credits: 3 (NR)
Aggregate economic accounts, including measuring national income; determinants of levels of income and output; and causes and solutions for problems of unemployment, inflation, and economic growth.

Prerequisite(s): ECON 103 and 104, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ECON 320 - Labor Problems

Credits: 3 (NR)
Explores American labor unions and their effect on society, including causes of and proposed solutions to selected problems.

Prerequisite(s): ECON 103 and 104, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ECON 321 - Economics of Labor

Credits: 3 (NR)
Defines factors that determine levels of wages and employment, and economic consequences. Emphasizes recent developments in unionism, collective bargaining, and industrial technology.
Prerequisite(s): ECON 306.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**ECON 330 - Public Finance**

Credits: 3 (NR)
Covers intergovernmental financial relationships; types, incidences, and consequences of taxation; other sources of governmental income; governmental expenditures and their effect; public economic enterprises; public borrowing; and debt management and its economic effect.

Prerequisite(s): ECON 306 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**ECON 335 - Environmental Economics**

Credits: 3 (NR)
Microeconomic analysis of environmental problems. Topics include externalities and market failure, alternative solutions and policies, problems in monitoring and enforcement, economic analysis of development of legislation and regulation, and applications to current policy issues.
Designated a Green Leaf Course.

Prerequisite(s): ECON 103 and 104

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**ECON 340 - Introduction to Mathematical Economics**

Credits: 3 (NR)
Mathematical treatment of theory of firm and household behavior, stabilization policy, growth theory, input-output analysis, and linear programming.

Prerequisite(s): ECON 306 and 311, and MATH 113; or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**ECON 345 - Introduction to Econometrics**
Modern statistical techniques in estimating economic relations.

Fulfills writing intensive requirement in the major.

**Prerequisite(s):** ECON 306, ECON 311, and STAT 250 and STAT 350 or STAT 344 and STAT 354.

**ECON 350 - Regional and Urban Economics**

Credits: 3 (NR)
Regional development and metropolitan growth, including locational decisions of households and firms, and problems associated with high-density urban economic activity.

**Prerequisite(s):** ECON 306 or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**ECON 355 - The Political Economy of Nonprofit Institutions**

Credits: 3 (NR)
Applies the basic principles of economics to teach students to think critically about nonprofit institutions. Examines the economics of nonprofit institutions, how incentives influence the evolution of charities, and current issues in nonprofit organizations.

Fulfills writing intensive requirement in the major.

**Prerequisite(s):** ECON 103 and ECON 104 or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**ECON 360 - Economics of Developing Areas**

Credits: 3 (NR)
Economic growth characteristic of developing countries. Economic development, obstacles to development, policies, and planning.

Fulfills Mason Core requirement in global understanding.

**Prerequisite(s):** ECON 103 and 104, or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0
ECON 361 - Economic Development of Latin America

Credits: 3 (NR)
Economic development, institutions, and problems of Latin America.

Fulfills Mason Core requirement in global understanding.

Prerequisite(s): ECON 103 and 104, or permission of instructor.

Notes: Fulfills the college requirement in non-Western culture.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

---

ECON 362 - African Economic Development

Credits: 3 (NR)
Issues of economic development as applied to Africa. Includes overview of early economic history in Africa and post-independence development, and contemporary development problems.

Fulfills Mason Core requirement in global understanding.

Prerequisite(s): ECON 103 and 104.

Notes: Fulfills the college requirement in non-Western culture.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

---

ECON 365 - Topics in Economic History

Credits: 3 (RT)
Possible topics include ancient, medieval, modern European, and American economic history, using econometric analysis as necessary.

Fulfills writing intensive requirement in the major.

Prerequisite(s): ECON 103 and 104.

Notes: May be repeated for a maximum of 6 credits when topic is different.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
**ECON 370 - Economics of Industrial Organization**

Credits: 3 (NR)
Factors influencing industrial structure, and industrial conduct and performance.

Prerequisite(s): ECON 306, or permission of instructor.

Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0

**ECON 374 - Health Economics**

Credits: 3 (NR)
Microeconomic analysis of health and medicine. Topics include the determinants of health, health externalities, health insurance, the health effects of medicine, the supply and demand of medicine, medical quality and regulation, and information asymmetries.

Prerequisite(s): ECON 306 or permission of instructor.

Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0

**ECON 380 - Economies in Transition**

Credits: 3 (NR)
Examines problems and achievements of formerly communist and socialist countries including China, Eastern European countries, and Russia and other countries of the former Soviet Union as they transition to more market-oriented economies. Includes market economics and central planning.

Fulfills Mason Core requirement in global understanding.

Prerequisite(s): ECON 103 and 104, or permission of instructor.

Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0

**ECON 385 - International Economic Policy**

Credits: 3 (NR)
Introduces economic way of thinking on trade and international finance. Presents historical and current information on consequences of trade and protectionism.

Notes: May not be applied toward the elective course requirement needed for a major or minor in economics.

Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0
ECON 390 - International Economics

Credits: 3 (NR)
Foreign exchange market, balance of payment, foreign trade policies, and theories of international trade.

Fulfills Mason Core requirement in global understanding.

Prerequisite(s): ECON 306 and 311, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ECON 403 - Austrian Economics

Credits: 3 (NR)
Microeconomic and macroeconomic models and misallocation of resources.

Prerequisite(s): ECON 306 and 311.

Notes: Alternative economic tools from noted Austrian economists.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ECON 410 - Public Choice

Credits: 3 (NR)
Applies economic theory, methodology to study nonmarket decision making.

Prerequisite(s): ECON 306.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ECON 412 - Game Theory and Economics of Institutions

Credits: 3 (NR)
Introduces game theory and its relevance for analyzing framework of rules and institutions within which economic processes occur. Applies game theoretical concepts to comparative analysis of causes and effects of alternative institutional arrangements.

Prerequisite(s): ECON 306 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
**ECON 415 - Law and Economics**

Credits: 3 (NR)
Economic analysis of the law. Topics include introduction to legal institutions and legal analysis; application of economic concepts to the law of property, contracts and torts, criminal and constitutional law; economic efficiency of common law; and public choice perspective on the evolution of the law.

Prerequisite(s): ECON 306 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**ECON 420 - International Money and Finance**

Credits: 3 (NR)
Examines models of balance of payments, exchange rate behavior, and open economy macroeconomics. Includes international financial system and issues such as globalization and international financial instability.

Prerequisite(s): ECON 306 and 311, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**ECON 435 - Economics of Energy**

Credits: 3 (NR)
Examines various issues in the energy industry using tools from microeconomic theory, law and economics and public choice. Topics include issues related to oil, historical and current energy regulation, and environmental issues associated with energy.

Fulfills writing intensive requirement in the major.

Prerequisite(s): Econ 306.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring

**ECON 440 - Economic Systems Design: Principles and Experiments**

Credits: 3 (NR)
Introduces design principles to develop systems to allocate resources. Students must participate in experiment demonstrations of different allocation mechanisms. They also are exposed to experimental methods in economics and market design.

Equivalent to SYST 480

Prerequisite(s): MATH 213.
ECON 441 - Economic Systems Design: Case Studies and Analysis

Credits: 3 (NR)
Requires students to design and develop mechanism to specific allocation problem. Students develop analytical and working engineering models of their mechanism.

Prerequisite(s): ECON 440.

ECON 442 - Economic Systems Design: Implementation

Credits: 3 (NR)
Involves students in developing experimental design to test proposed allocation solution. Design process includes construction of experimental parameters, treatments, and initial test in laboratory setting.

Prerequisite(s): ECON 441.

ECON 445 - Design and Analysis of Experiments

Credits: 3 (NR)
Topics include comparing two or more treatments, and computing and interpreting analysis of variance. Discusses randomized block, Latin square, and factorial designs; and applications to economics experiments.

Prerequisite(s): STAT 250, 344; and MATH 351 or IT 250; or permission of the instructor.

ECON 460 - Senior Seminar in Philosophy, Politics, and Economics

Credits: 3 (NR)
Covers issues in the philosophy, economics, and political science of institutions, information, and collective action. Through case studies of existing legal and political institutions, applies the insights to problems in politics, policy making, social-choice theory, and social, moral, and political philosophy. (Specific content varies).
Equivalent to PHIL 460, GOVT 469.

**Prerequisite(s):** PHIL 358 and ECON 412 or permission of instructor.

**Notes:** Serves as the capstone course for the PPE program.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**ECON 470 - Economics of regulation**

Credits: 3 (NR)  
Examines various issues surrounding concepts of regulation using tools from microeconomic theory and public choice. Topics include antitrust, rate regulation, policy rationales for regulation, and issues of current interest.

Fulfills writing intensive requirement in the major.

**Prerequisite(s):** Econ 306.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall

---

**ECON 481 - The Development of Economic Thought**

Credits: 3 (NR)  
Developments in economic thought from 1500 to the present. Emphasizes historical origins, impact on contemporary economics, and theoretical validity.

**Prerequisite(s):** ECON 306 and 311, or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**ECON 490 - Senior Seminar on Problems in Economics**

Credits: 3 (NR)  
Applies economic tools to investigate problems in economics.

**Prerequisite(s):** ECON 306 and 311, OM 210, and 90 credits; economics majors only.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**ECON 492 - Study Abroad**
Study abroad under supervision of George Mason faculty. Course topics, content, and locations vary.

Notes: May be repeated for a maximum of 12 credits with permission of department.

Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring, Summer

ECON 494 - Honors Thesis Writing Seminar

Credits: 3 (NR)
Develops skills in finding and evaluating sources, oral presentation, and academic writing.

Prerequisite(s): ECON 306 and 311, an overall GPA of 3.5, and permission from the instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Summer

ECON 495 - RS: Honors Thesis in Economics

Credits: 3-6 (RD)
Honors-level research on a self-selected topic in economics culminating in a substantial research paper and an oral presentation.

Designated as a research and scholarship intensive course.

Prerequisite(s): ECON 494 with minimum grade of B or permission from the instructor with an approved research proposal.

Notes: Requirements for departmental honors in the major are in addition to the coursework required for the major. ECON 495 credit may not be applied toward the elective course requirement needed for a major or minor in economics.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ECON 496 - Special Topics in Economics

Credits: 3 (RT)
Subject matter varies.

Prerequisite(s): Varies with topic.

Notes: May be repeated for credit when topic is different.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
ECON 498 - Internship

Credits: 3-6 (NR)
Students find economics-related internship with assistance from Career Services. Pre-internship proposal and final reflections paper required.

Prerequisite(s): 6 upper-level credits of economics, junior standing, and permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
Grading: Satisfactory/No Credit

ECON 499 - Independent Study

Credits: 1-4 (RT)
Individual study of selected area of economics.

Prerequisite(s): Economics majors with 90 credits, and permission of both department and instructor.

Notes: Directed research paper required. May be repeated for a maximum of 6 credits.

Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 0

ECON 535 - Survey of Applied Econometrics

Credits: 3 (NR)
Applied introduction to estimating economic relationships. Includes simple equation and simultaneous equation system estimation.

Prerequisite(s): Admission to master’s program in economics, or OM 210 or STAT 250 and 350, and ECON 306 and 311, and MATH 113; or permission of instructor.

Notes: Contact Graduate Coordinator at econgrad@gmu.edu for permission to register and CRN. Students who take ECON 535 may not take ECON 637 for credit. Non-Degree students are permitted to enroll based on space availability determined one week before the first day of classes AND on meeting the prerequisites AND with permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ECON 600 - Economics for Educators

Credits: 3 (NR)
Introduces current and prospective K-12 teachers to the fundamentals of economics. Prepares teachers to instruct students in the
economics and personal finance course now required by the Virginia Department of Education. Supports teachers in successfully teaching the economics content of the Virginia SOLs in history and social sciences.

**Prerequisite(s):** Undergraduate degree.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**ECON 611 - Microeconomic Theory**

Credits: 3 (NR)  
Covers theory of behavior of consumers, firms, and resource suppliers; theories of choice under risk and uncertainty; partial equilibrium analysis of competitive and noncompetitive markets; general equilibrium analysis; and welfare economics. Introduces capital theory.

**Prerequisite(s):** Admission to master's program in economics or ECON 306 and 311, and MATH 113; or permission of instructor.

**Notes:** Contact Graduate Coordinator at econgrad@gmu.edu for permission to register and CRN. Non-Degree students are permitted to enroll based on space availability determined one week before the first day of classes AND on meeting the prerequisites AND with permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**ECON 612 - Microeconomic Theory II**

Credits: 3 (NR)  
Nature of the firm; theory of supply; and production functions, factor pricing, and supplies. Introduces microeconomic foundations of theories of public finance and public choice.

**Prerequisite(s):** ECON 611.

**Notes:** Contact Graduate Coordinator at econgrad@gmu.edu for permission to register and CRN. Non-Degree students are permitted to enroll based on space availability determined one week before the first day of classes AND on meeting the prerequisites AND with permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**ECON 615 - Macroeconomic Theory**

Credits: 3 (NR)  
Survey course covering monetary theory, theories of consumption and saving, budget deficits, economic growth, international finance, and monetary and fiscal policies.

**Prerequisite(s):** Admission to master's program in economics, or ECON 306 and 311, and MATH 113; or permission of
instructor.

Notes: Contact Graduate Coordinator at econgrad@gmu.edu for permission to register and CRN. Non-Degree students are permitted to enroll based on space availability determined one week before the first day of classes AND on meeting the prerequisites AND with permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ECON 623 - American Economic History

Credits: 3 (NR)
Explores development of American economy and evolution of economic institutions.

Prerequisite(s): ECON 611 and 615, or ECON 715 and 811, taken concurrently; or permission of instructor.

Notes: ECON 637 recommended.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ECON 630 - Mathematical Economics I

Credits: 3 (NR)
Includes set theory, function, differential calculus, integration, series, and matrix algebra, with special emphasis on economic applications.

Prerequisite(s): Admission to master’s program in economics, or ECON 306 and 311, and MATH 113, or permission of instructor.

Notes: Contact Graduate Coordinator at econgrad@gmu.edu for permission to register and CRN. Non-Degree students are permitted to enroll on space availability determined one week before the first day of classes AND on meeting the prerequisites AND with permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ECON 632 - Economic Systems Design Principles and Experiments

Credits: 3 (NR)
Introduces analytical and engineering principles to develop exchange systems. Students must become familiar with literature on applied mechanism design; and understand behavioral aspects of auction systems, matching, assignment and transportation problems, and information markets. Also introduces methods for testbedding systems using experimental economics and statistical design.

Prerequisite(s): Courses in linear and nonlinear optimization, and linear algebra.
ECON 633 - Economic Systems Design Case Studies and Analysis

Credits: 3 (NR)
Students begin process of doing research in design economic exchange system. Design process includes electronic instructions, and design of information structures. Students responsible for research into economic issues, and practical design issues.

Prerequisite(s): ECON 632.

ECON 634 - Economic Systems Design Implementation

Credits: 3 (NR)
Students do original research in economic systems design by constructing engineering model of solution to allocation problem. Research includes experimental and statistical design, and complete description of hypothesis related to construction of experimental parameters and treatments to test mechanism. Requires initial test of mechanism in laboratory setting.

Prerequisite(s): ECON 633.

ECON 637 - Econometrics I

Credits: 3 (NR)
Techniques of estimating relationships between economic variables. Introduces multiple regression and problems associated with single equation model-autocorrelation, multicollinearity, and heteroscedasticity.

Prerequisite(s): Acceptance to PhD program in economics, or permission of instructor.

Notes: Contact Graduate Coordinator at econgrad@gmu.edu for permission to register and CRN. Non-Degree students are permitted to enroll based on space availability determined one week before the first day of classes AND on meeting the prerequisites AND with permission of instructor.

ECON 676 - Comparative Economic Systems
Credits: 3 (NR)
Capitalism, socialism, and corporatism historical perspective. Includes examination of economies of representative contemporary countries.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ECON 695 - Special Topics in Economics

Credits: 3 (RT)
Topics vary according to interests of instructor. Emphasizes new areas of discipline.

Notes: May be repeated for a maximum of 9 credits when topic is different.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

ECON 715 - Macroeconomic Theory I

Credits: 3 (NR)
Covers classical, neoclassical, Keynesian, and post-Keynesian theories of income and employment determination; theories of inflation and growth; and demand for money and implications for effectiveness of monetary vs. fiscal policy.

Prerequisite(s): Admission to doctoral program in economics, or permission of instructor.

Notes: Contact Graduate Coordinator at econgrad@gmu.edu for permission to register and CRN. Non-Degree students are permitted to enroll based on space availability determined one week before the first day of classes AND on meeting the prerequisites AND with permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ECON 799 - Master's Thesis

Credits: 1-6 (RD)
Research on approved thesis topic under direction of thesis committee.

Prerequisite(s): Admission to MA economics program and permission of thesis advisor.

Notes: Students must register for a minimum of three credit hours in their first semester of 799 and maintain continuous enrollment in 799 while writing and submitting a thesis. A maximum of 6 credits of 799 may be applied to the degree.

Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 1-12
Grading: Satisfactory/No credit only
ECON 811 - Microeconomic Theory I

Credits: 3 (NR)
Theory and applications of behavior of consumers, firms, and resource suppliers. Partial equilibrium analysis of various market structures and introduction to intertemporal choice and capital theory. Review and analysis of classic works in microeconomic theory.

Prerequisite(s): Admission to doctoral program in economics, or permission of instructor.

Notes: Contact Graduate Coordinator at econgrad@gmu.edu for permission to register and CRN. Non-Degree students are permitted to enroll based on space availability determined one week before the first day of classes AND on meeting the prerequisites AND with permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ECON 812 - Microeconomic Theory II

Credits: 3 (NR)
Examines nature of firm; theory of supply; and production functions, factor pricing, and supplies. Introduces microeconomic foundations of theories of public finance and public choice.

Prerequisite(s): ECON 811.

Notes: Contact Graduate Coordinator at econgrad@gmu.edu for permission to register and CRN. Non-Degree students are permitted to enroll based on space availability determined one week before the first day of classes AND on meeting the prerequisites AND with permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ECON 816 - Macroeconomic Theory II

Credits: 3 (NR)
Aggregate economic activity and price levels with emphasis on dynamic models.

Prerequisite(s): ECON 715 and 811, or permission of instructor.

Notes: Contact Graduate Coordinator at econgrad@gmu.edu for permission to register and CRN. Non-Degree students are permitted to enroll based on space availability determined one week before the first day of classes AND on meeting the prerequisites AND with permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**ECON 817 - Monetary Theory and Policy**

Credits: 3 (NR)
Theory of mechanisms through which central banking affects economic activity and prices. Analyzes demand for money and its relationship to economic activity. Develops monetary theory with emphasis on current theories and controversies in the field.

Prerequisite(s): ECON 615 or 715, and 535 or 637, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**ECON 820 - History of Economic Thought**

Credits: 3 (NR)
Explores major figures in history of economic thought and tools of analysis they created. Emphasizes classical, neoclassical, and Keynesian theories.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**ECON 821 - History of Economic Thought II**

Credits: 3 (NR)
Covers development of economic analysis from marginal revolution of 1877 to present. Emphasizes development of neoclassical economic theory.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**ECON 823 - Topics in Economic History**

Credits: 3 (NR)
Offers economic analysis of various historical epochs including Industrial Revolution, evolution of political reform, rise of unions, and growth of government.

Prerequisite(s): ECON 611 and 615, or ECON 715 and 811; or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**ECON 825 - Political Economy and Public Policy I**

Credits: 3 (NR)
Covers economic process of public policy formulation and implementation; and economic behavior of principals in policy
making and execution.

**Prerequisite(s):** ECON 611 and 811, or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**ECON 826 - Political Economy and Public Policy II**

Credits: 3 (NR)  
Specific issues related to political economy of public policy, including privatization, political economy of deficit spending, regulation and deregulation, and economics of rent seeking.

**Prerequisite(s):** ECON 611 or 811; or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**ECON 827 - Economic Philosophy**

Credits: 3 (NR)  
Analyzes philosophical organization, including interrelations between economics and legal and political institutions; philosophical presuppositions of capitalist economy under constitutional democracy; alternative presuppositions for non-capitalist economies; and critical evaluation of history of ideas in social and moral philosophy.

**Prerequisite(s):** ECON 611 or 811 or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**ECON 828 - Constitutional Economics**

Credits: 3 (NR)  
Analyzes existing and proposed elements of economic constitution. Emphasizes fiscal, monetary, transfer, and regulatory powers of government and constitutional limits on such powers, especially in the United States. Includes analysis of proposed changes in limits.

**Prerequisite(s):** ECON 611 or 811 or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**ECON 829 - Economics of Institutions**
Credits: 3 (NR)
Analyzes framework of rules and institutions for economic activities and transactions. Includes emergence and working properties of different institutions, and classical and contemporary approaches to economic theory of institutions.

Prerequisite(s): ECON 611 or 811 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ECON 830 - Mathematical Economics I

Credits: 3 (NR)
Includes set theory, function, differential calculus, integration, series, and matrix algebra, with special emphasis on economic applications.

Prerequisite(s): Admission to doctoral program in economics, or ECON 306 and 311, and MATH 113; or permission of instructor.

Notes: Contact Graduate Coordinator at econgrad@gmu.edu for permission to register and CRN. Non-degree students are permitted to enroll on space availability determined one week before the first day of classes AND on meeting the prerequisites AND with permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

When Offered: Fall

ECON 831 - Mathematical Economics II

Credits: 3 (NR)
Covers mathematical treatment of economic theories. Includes static and dynamic analysis of macromodels; input-output analysis; and optimization techniques such as Lagrangian multipliers, linear programming, nonlinear programming, and game theory.

Prerequisite(s): ECON 630 or 830; or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ECON 838 - Econometrics II

Credits: 3 (NR)
Explores econometric models and simultaneous equation systems. Includes identifying parameters and least squares bias, alternative estimation methods, and block recursive systems.

Prerequisite(s): ECON 637 or permission of instructor.

**ECON 839 - Constitutional Economics II**

Credits: 3 (NR)
Uses economic analysis and methods to explore more deeply than in Constitutional Economics I specific issues in Constitutional Economics.

Prerequisite(s): ECON 828

**ECON 840 - Law and Economics I**

Credits: 3 (NR)
Uses economics to analyze U.S. Common-law system, evaluating efficiency and logic of evolution.

Prerequisite(s): ECON 611 or 811; or permission of instructor.

Notes: No prior knowledge of law required.

**ECON 841 - Law and Economics II**

Credits: 3 (NR)
Explores empirical analyses of law of property, torts, crime, and family. Also looks at law's effects on freedom and economic growth.

Prerequisite(s): ECON 611 or 811, and ECON 535 or 637; or permission of instructor.

**ECON 842 - Labor Economics**

Credits: 3 (NR)
Formal models of labor demand, supply, utilization, and wage determination; determination of factor shares in open economy; theory of collective bargaining, and impact of trade unions on wage rates and resource allocation; measurement, types, and causes of unemployment; and cost-benefit analysis of labor training and development projects.
Prerequisite(s): ECON 611 and 615, or 715 and 811, or permission of instructor.

Notes: ECON 637 recommended.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ECON 844 - Industrial Organization and Public Policy I

Credits: 3 (NR)
Structure of American industry and underlying determinants. Includes structure and conduct on industrial performance in light of theory and empirical evidence; and rational antitrust policy and analysis of impact on structure and performance.

Prerequisite(s): ECON 611 or 811 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ECON 846 - Industrial Organization and Public Policy II

Credits: 3 (NR)
Covers relationship of law, economics, and theories of social control of property rights. Includes theories of market structure and industrial performance.

Prerequisite(s): ECON 844, and ECON 535 or 637; or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ECON 849 - Public Finance

Credits: 3 (NR)
Theoretical and institutional analysis of government expenditure, taxation, debt management, and intergovernmental fiscal relations. Includes allocative and distributional effects of alternative tax and subsidy techniques, principles of benefit cost, and cost-effectiveness analysis for government decisions.

Prerequisite(s): ECON 611 or 811 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ECON 852 - Public Choice I
Credits: 3 (NR)
Applies economic theory and methodology to study of nonmarket decision making.

Prerequisite(s): ECON 611 or 811 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**ECON 854 - Public Choice II**

Credits: 3 (NR)
Applies public choice approach to study such topics as causes and consequences of governmental growth, behavior of public bureaucracies, and economic reasoning behind constitutional limitations on size and growth of government.

Prerequisite(s): ECON 852 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**ECON 861 - Economics of the Environment**

Credits: 3 (NR)
Analyzes economic models of ecosystems and pollutant discharges into environment. Includes methods of improving economic efficiency and review of public policies.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**ECON 866 - Economic Development**

Credits: 3 (NR)
Explores forces contributing to or retarding economic progress in developing countries. Includes role of foreign trade, economic integration, foreign investment, multinational corporations, and technological transfers.

Prerequisite(s): ECON 611 and 615, or 715 and 811, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**ECON 869 - International Trade and Policy**

Credits: 3 (NR)
Studies classical, neoclassical, and modern theories of international trade; theory and practice of world trade models such as project LINK; foreign investment and economic growth, tariffs and nontariff barriers, and economic integration; and recent
developments, with emphasis on natural resources.

Prerequisite(s): ECON 611 or 811 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ECON 871 - International Monetary Economics

Credits: 3 (NR)
Examines international adjustment mechanism, price and income effects, controls, and monetarist approach; development of international monetary system; demand for international reserves; capital movements; and role of International Monetary Fund.

Prerequisite(s): ECON 615 or 715 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ECON 880 - Theory of the Market Process I

Credits: 3 (NR)
Examines theory developed by Menger, Mises, Hayek, and others of the Austrian School; and compares with other popular theories.

Prerequisite(s): ECON 611 or 811 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ECON 881 - Theory of Market Process II

Credits: 3 (NR)
Continuation of ECON 880. Topics vary and include market-process approach to analyzing capital accumulation and growth; money and credit institutions; inflation and unemployment; and industrial fluctuations.

Prerequisite(s): ECON 880, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ECON 885 - Experimental Economics

Credits: 3 (NR)
Designed for graduate students to learn how experimental methods can be used to inform economic research and practice.
Students expected to have working understanding of basic economic concepts and multivariate calculus.

**Prerequisite(s):** ECON 611 or 811 or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

### ECON 886 - Experimental Economics II

Credits: 3 (NR)  
Research in experimental design. Topics represent basic tools to build, test, and implement exchange mechanisms in an applied setting.

**Prerequisite(s):** ECON 885 or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

### ECON 895 - Special Topics in Economics

Credits: 3 (RT)  
Topics vary according to interests of instructor. Emphasizes new areas of discipline.

**Notes:** May be repeated for credit when topic is different.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

### ECON 896 - Directed Reading and Research

Credits: 1-9 (RT)  
Independent reading and research paper on a topic agreed on by student and faculty member.

**Hours of Lecture or Seminar per week:** 1-6  
**Hours of Lab or Studio per week:** 0

### ECON 918 - Seminar in Monetary Theory and Policy

Credits: 3 (NR)  
Selected topics of current interest.

**Prerequisite(s):** ECON 817.
ECON 950 - Seminar in Public Finance

Credits: 3 (NR)
Important public finance issues treated in seminar format.

Prerequisite(s): ECON 849 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ECON 985 - Workshop in Experimental Economics

Credits: 3 (RD)
Designed for graduate students who have taken Experimental Economics and Economic Systems Design and are applying experimental methods to their own or collaborative research projects.

Prerequisite(s): ECON 886.

Notes: May be repeated for a maximum of 6 credits.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ECON 998 - Doctoral Dissertation Proposal Research.

Credits: 1-9 (RD)
Research on prospective dissertation topic.

Prerequisite(s): Admission to PhD economics program, and completed at least 48 credits of coursework, and passed required doctoral exams, and permission of dissertation advisor.

Notes: For students who have completed course work but have not yet advanced to candidacy.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 1-9
Grading: S/NC

ECON 999 - Doctoral Dissertation Research

Credits: 1-15 (RD)
Research on approved dissertation topic under direction of dissertation committee.
Prerequisite(s): Admission to PhD economics program, and advancement to candidacy, and permission of dissertation advisor.

Notes: May be repeated; 24 credits may be applied to doctoral degree requirement.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 1-15
Grading: S/NC

Education (EDUC)

Offered by the College of Education and Human Development

EDUC 203 - Human Disabilities in American Culture

Credits: 3 (NR)
Provides a perspective in human disabilities in American culture through awareness, historical and political implications, and technological applications. Demonstrations, discussions, and explorations of this culture by age groups, professions, and life domains will be included.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDUC 300 - Introduction to Teaching

Credits: 3 (NR)
Introduction to educational issues; not applicable in graduate-level teacher education programs. Examines roles of teacher, nature of American schools, and potential contributions of students.

Notes: Requires school-based field experience during course.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDUC 301 - Educationally Diverse Populations: Handicapped, Gifted, Multicultural

Credits: 3 (NR)
Introduction to educational issues; not applicable in graduate-level teacher education programs. Introduces psychological, sociological, educational, and physical aspects of diverse populations in today's schools for early and middle education. Emphasizes litigation and legislation pertaining to education of diverse populations.

Notes: Requires school-based field experience during course.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
EDUC 302 - Human Growth and Development

Credits: 3 (NR)
Introduction to educational issues; not applicable in graduate-level teacher education programs. Examines human development through life span with special emphasis on cognitive, language, physical, social, and emotional development of children. Emphasizes contemporary theories of human development and their relevance to educational practice.

Notes: Requires school-based field experience during course.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDUC 303 - Politics of American Education

Credits: 3 (NR)
Focus on the study of the American political system. Designed for students studying the American political system and students interested in careers in education. Explores how interactions between various levels and branches of government affect education.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDUC 372 - Human Development, Learning, and Teaching

Credits: 3 (NR)
Explores processes that influence intellectual, social, emotional, moral, ethical, and physical development of middle and high school students. Examines research and theories for understanding learning process.

Fulfills Mason Core requirement in social and behavioral science.

Notes: School-based field experience required.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDUC 400 - In-Service Educational Development

Credits: 1-6 (RT)
Offered at request of school division or other educational agency.

Notes: Content varies; may be repeated for credit.

Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 0
EDUC 415 - Student Teaching in Physical Education

Credits: 12 (NR)
See PHED 415.

Prerequisite(s): Concurrent enrollment in PHED 472, completion of all courses in the approved program, and admission to and good standing in the Teacher Education Program.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 12

EDUC 422 - Foundations of Secondary Education

Credits: 3 (NR)
Analyzes philosophical assumptions, curriculum issues, learning theories, and history associated with current teaching styles. Emphasizes applications to all disciplines taught in secondary schools. Examines educational trends and issues.

Prerequisite(s): Admission to the secondary Education Program.

Notes: 15 hours school-based field experience required.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDUC 511 - Introduction to Education in International Schools

Credits: 3 (NR)
Explores structure and variations of international schools. Includes analysis of human growth and development, overview of educational psychology, and introduction to using technology across curriculum.

Prerequisite(s): Admission to FAST TRAIN or Permission of Instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
Grading: Graduate Special

EDUC 512 - Teaching Elementary Social Studies in International Schools

Credits: 3 (NR)
Focuses on translation of knowledge and data-gathering processes from social sciences into appropriate and meaningful K-8 social studies experiences. Develops understanding of aims and methodologies of history, geography, government and political science, sociology, anthropology, and psychology.

Prerequisite(s): Admission to FAST TRAIN or Permission of Instructor.
EDUC 513 - Teaching Elementary Math in International Schools

Credits: 3 (NR)
Presents topics in school mathematics with particular emphasis on developing common K-8 strands for application in international schools. Focuses on exploring, verifying, and explaining concepts using concrete materials.

Prerequisite(s): Admission to FAST TRAIN or Permission of Instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
Grading: Graduate Special

EDUC 514 - Teaching Elementary Science in International Schools

Credits: 3 (NR)
Covers theory and practices of effective teaching of K-8 science in international schools. Uses laboratory and discovery techniques to design essential science components and integrate them with other disciplines. Introduces design and implementation of activities for developing concepts, solving problems, and strengthening thinking skills in K-8 science.

Prerequisite(s): Admission to FAST TRAIN or Permission of Instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
Grading: Graduate Special

EDUC 516 - Language Across the Elementary International School Curriculum

Credits: 3 (NR)
Introduces current methods of teaching integrated language arts in elementary and middle school settings (K-8). Includes language and literacy development, second language acquisition, reading and writing in content areas, and children's literature. International focus considers needs of second-language learners in regular classroom settings.

Prerequisite(s): Admission to FAST TRAIN or Permission of Instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
Grading: Graduate Special

EDUC 520 - Elementary Curriculum, Instruction, and Assessment in International Schools
Credits: 3 (NR)
Addresses interrelationship of instruction, curriculum, and assessment in international schools. Includes review of research and effective practice.

Prerequisite(s): Admission to FAST TRAIN or Permission of Instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
Grading: Graduate Special

EDUC 521 - Foundations of Education, PK-12

Credits: 3 (NR)
Introduces various ways of educating and socialization processes in American educational institutions. Analyzes current education practices in terms of history, philosophy, psychology, and sociocultural factors of formal and informal learning. Emphasizes trends, issues, and alternative futures.

Notes: School-based field experience required. Course fulfills the Virginia Department of Education requirement for provisionally licensed teachers.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDUC 522 - Foundations of Secondary Education

Credits: 3 (NR)
Analyzes philosophical assumptions, curriculum issues, learning theories, and history associated with current teaching styles. Emphasizes applications to all disciplines taught in secondary schools. Examines current educational trends and issues in relation to sociology of secondary school settings.

Notes: 15 hours school-based field experience required.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDUC 537 - Foundations of Multicultural Education

Credits: 3 (NR)
Examines multicultural education through historical, sociological, and philosophical foundations. Emphasizes role of ethnicity in development of nation and education system. Includes overview of multicultural and multilingual curricula, and culturally and linguistically responsive instructional and assessment techniques.

Notes: Requires field experience.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
EDUC 539 - Human Development and Learning PK-12

Credits: 3 (NR)
Provides practicing teachers with foundations of psychological theory, research, and professional practice relating to development and learning in inclusive PK-12 classroom settings.

Notes: School-based field experience required.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDUC 542 - Foundations of Education

Credits: 3 (NR)
Examines the historical, philosophical, and sociological foundations of education as they relate to elementary schools, with a particular emphasis on teaching a culturally diverse population. Students will develop an understanding of the relationship between society and education.

Prerequisite(s): Admission to the Elementary Education licensure program. School-based field experience required.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDUC 543 - Children, Family, Culture, and Schools, 4-12 Year Olds

Credits: 3 (NR)
Examines child and family development and ways children, families, schools, and communities interrelate. Links children's developing physical, social, emotional, and cognitive abilities to planning curriculum and developing instructional strategies.

Prerequisite(s): Admission to elementary education licensure program.

Notes: Requires school-based field experience.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDUC 547 - Scientific Inquiry and the Nature of Science

Credits: 3 (NR)
Incorporates understanding about scientific knowledge in K-12 classrooms. Builds fundamental knowledge of scientific inquiry and the nature of scientific knowledge and skills to weave this knowledge explicitly in curriculum. Focuses on developing inquiry-based lessons for students to investigate science and assessing student understanding of science and the nature of science.

Hours of Lecture or Seminar per week: 3
EDUC 592 - Effective Collaboration for Teaching Diverse Learners in Secondary Social Studies

Credits: 3 (NR)
Provides history-social studies candidates in secondary education with knowledge and skills necessary to meet the needs of diverse learners in the history-social studies classroom. Emphasizes teacher collaboration between general and special education teachers as an authentic model of practice.

Notes: Taught concurrently and in close proximity with special education faculty teaching EDSE 662 to emphasize collaboration between special education and general education teachers.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Summer, Spring

EDUC 597 - Special Topics in Education

Credits: 1-6 (RT)
Provides advanced study on selected topic or emerging issue in American or international education.

Prerequisite(s): Admission to program in Graduate School of Education.

Notes: May be repeated for credit with GSED permission.

Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 0

EDUC 598 - Directed Reading, Research, and Individual Projects

Credits: 1-6 (RT)
Presents various subjects and projects, principally by directed study, discussion, research, and participation under supervision of graduate faculty member.

Prerequisite(s): Admission to degree program, and permission of dean.

Notes: May be repeated for up to 12 credits.

Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 0

EDUC 606 - Education and Culture
Credits: 3 (RD)
Uses cultural inquiry process (CIP) and web site to acquire cultural, social, and language-related perspectives on educational processes; and teaches skills to analyze educational settings and expand strategies to address puzzlements in students' own practice.

Prerequisite(s): Admission to the ASTL Program; EDUC 612, EDUC 613, and EDUC 614.

Corequisite(s): EDUC 615.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
Grading: Graduate Special

EDUC 611 - Cultural Issues in Second Language Acquisition

Credits: 3 (RD)
Explores impact of linguistic and cultural diversity among students in teaching of second language across curriculum. Draws on theoretical foundations in second language acquisition, cross-cultural communication, socio- and psycholinguistics, and educational anthropology.

Prerequisite(s): Admission to TESL or bilingual or multicultural education program, doctoral status, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDUC 612 - Inquiry into Practice

Credits: 2 (RD)
Provides experience using research skills to foster systematic and thoughtful inquiry into classroom practice. Explores relevant classroom practice issues through critical writing, action, and research. Emphasizes cultural diversity and gender issues in research.

Prerequisite(s): Admission to the ASTL Program.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 0
Grading: Graduate Special

EDUC 613 - How Students Learn

Credits: 3 (RD)
Advanced course in study of learning based on research and theory from different disciplines. Focuses on increasing students' learning through study of different learning systems, and understanding each learner in context of learning process itself.

Prerequisite(s): Admission to the ASTL Program; EDUC 612.

Hours of Lecture or Seminar per week: 3
EDUC 614 - Designing and Assessing Teaching and Learning

Credits: 2 (RD)
Explores design and development of curricular, pedagogical, and assessment strategies responsive to needs and interests of students. Investigates factors that affect teaching and learning, and examines multiple ways of knowing that teachers bring to classrooms.

Prerequisite(s): Admission to the ASTL Program; EDUC 612.

EDUC 615 - Educational Change

Credits: 2 (NR)
Explores influences on educational change at classroom, school, community, state, and national levels. Investigates implications of factors and influences that affect educational change. Analyzes influences and factors, and involves students in reflecting on their own experiences.

Prerequisite(s): Admission to the ASTL Program; completion of EDUC 612, EDUC 613, EDUC 614.

Corequisite(s): EDUC 606.

EDUC 621 - Teaching and Learning in the International Baccalaureate Primary Years Program

Credits: 3 (NR)
Focuses on principles and practices of Primary Years Program (PYP) of the International Baccalaureate (IBO), organized around four areas of inquiry: curriculum processes, teaching and learning, assessment, and professional learning. Final course in preparation for IBO Practitioner Award.

Prerequisite(s): Admission to GSE, enrollment in FAST TRAIN initial licensure program or permission of instructor.
EDUC 622 - Curriculum Development across IB Programs

Credits: 3 (NR)
Explores the development of practical knowledge about the design and structure of the IB programs' curricula. Provides a foundation for understanding how the programs are implemented and how student learning developed within them is assessed.

Prerequisite(s): Admission to GSE, enrollment in FAST TRAIN IB certificate program, and completion of EDUC 621, or permission of the instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
Grading: Graduate Special

EDUC 623 - Models and Strategies for Teaching and Learning in IB Schools

Credits: 3 (NR)
Focuses on the development of the capacity of teachers in IB schools to adopt appropriate teaching strategies and techniques instrumental in ensuring program learning outcomes are achieved. Furthermore, participants develop a deep understanding of the critical relationship between teaching and learning.

Prerequisite(s): Admission to GSE, enrollment in FAST TRAIN IB certificate program, and completion of EDUC 621, or permission of the instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
Grading: Graduate Special

EDUC 624 - Assessment and Learning in IB Schools

Credits: 3 (NR)
Explores the essential role of assessment in teaching IB learners. Addresses formative and summative assessment practices as an integral part of the IB curriculum as well as the use of assessment for differentiation and planning.

Prerequisite(s): Admission to GSE, enrollment in FAST TRAIN IB certificate program, and completion of EDUC 621, or permission of the instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
Grading: Graduate Special

EDUC 626 - Inquiry into Action: IB Teachers, Learners, and Schools

Credits: 3 (NR)
Uses the action research and qualitative process to help educational practitioners plan and complete an action research study related to IB learners, teachers, or schools. Furthermore, the course examines the social, cultural, and ethical issues of conducting research with students.
Prerequisite(s): Admission to GSE, enrollment in FAST TRAIN IB certificate program, and completion of EDUC 621, or permission of the instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
Grading: Graduate Special

EDUC 627 - Contemporary Issues and Trends in IB

Credits: 3 (NR)
Focuses on current IB research, trends, and issues as well as international, national, and state/provincial legislation concerning schools and the potential impact on IB schools. Participants are prepared as leaders and advocates for IB programs and their students.

Prerequisite(s): Admission to GSE, enrollment in FAST TRAIN IB certificate program, and completion of EDUC 621, or permission of the instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDUC 634 - The Role of the School Library Media Specialist

Credits: 3 (NR)
Introduces basic concepts of library science, and professional responsibilities and ethical standards of library media specialist. Addresses this role as instructional partner and resource for students and staff.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDUC 640 - Selection and Utilization of Library Media Materials and Equipment, Including Technology

Credits: 3 (NR)
Introduces prospective library media specialists to various uses of technology in library setting, and elements involved in media collection development.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDUC 641 - Reference and Bibliography

Credits: 3 (NR)
Covers library reference process, and bibliographic tools to meet needs of library patrons seeking information.
EDUC 642 - Organization and Technical Processing of Materials

Credits: 3 (NR)
Emphasizes application of basic cataloging principles in bibliographic description of print and nonprint materials. Students develop procedures for organizing, cataloguing, and maintaining media collection using technological support.

EDUC 643 - Organization Administration and Evaluation of the School Library Media Center

Credits: 3 (NR)
Develops skills to implement effective school library media program. Focuses on management principles, interpersonal skills, and lifelong learning skills in relation to evaluating services, collection development, and public relations for school libraries.

EDUC 644 - Production of Media and Instructional Materials

Credits: 3 (NR)
Provides guidance and practice with available audiovisual and computer-based technology to plan, produce, and present instructional materials.

EDUC 645 - Literature for Young Adults

Credits: 3 (NR)
Provides in-depth knowledge of young adult literature, and ability to relate that knowledge to library programs.

Notes: Requires extensive reading of young adult literature.
EDUC 646 - Literature for Children

Credits: 3 (NR)
Develop critical abilities to select and use literature for children. Focuses on selecting materials to support curriculum and promote reading.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDUC 647 - Critical Reflective Practice

Credits: 1.5 (NR)
Engages students in a learning community of teachers to develop skills of critical reflection on professional practice.

Prerequisite(s): Admission into the MEd Curriculum and Instruction concentration in Teacher Inquiry, Development and Empowerment for Social Justice program (TIDES) cohort.

Hours of Lecture or Seminar per week: 1.5
Hours of Lab or Studio per week: 0
When Offered: Summer

EDUC 649 - Critical Dialogue in Education

Credits: 1.5 (NR)
Offers opportunity to develop critical dialogue and peer feedback skills focused on professional practice.

Prerequisite(s): Admission into the MEd Curriculum and Instruction concentration in Teacher Inquiry, Development and Empowerment for Social Justice program (TIDES) cohort.

Hours of Lecture or Seminar per week: 1.5
Hours of Lab or Studio per week: 0
When Offered: Summer

EDUC 651 - Critical Theories and Pedagogies

Credits: 3 (NR)
Explores critical theories and pedagogies experientially, including alternative assessments that address educational equity and access, power, and approaches for deepening our practice as citizens in a democracy.

Prerequisite(s): Admission into the MEd Curriculum and Instruction concentration in Teacher Inquiry, Development and Empowerment for Social Justice program (TIDES) cohort. Completion of the EDUC 647.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall
EDUC 653 - Technology and Learning

Credits: 3 (NR)
Develops technological knowledge and skills to support teaching and learning and to sustain and enhance learning communities. Teachers explore and critique the possibilities and concerns of using technology in learning environments.

Prerequisite(s): Admission into the MEd Curriculum and Instruction concentration in Teacher Inquiry, Development and Empowerment for Social Justice program (TIDES) cohort. Completion of the EDUC 647.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

EDUC 655 - Teacher Research Methods

Credits: 3 (NR)
Introduces teacher research methods and situates them in relation to other research approaches. Emphasizes the understanding and use of various research methods as innovative approaches to teaching and learning.

Prerequisite(s): Admission into the MEd Curriculum and Instruction concentration in Teacher Inquiry, Development and Empowerment for Social Justice program (TIDES) cohort. Completion of the EDUC 651 and the EDUC 653.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring

EDUC 657 - Teaching for Democracy and Social Justice

Credits: 3 (NR)
Focuses on the research that supports teachers to create democratic classroom practices and to support PK-12 students in exercising civic rights.

Prerequisite(s): Admission into the MEd Curriculum and Instruction concentration in Teacher Inquiry, Development and Empowerment for Social Justice program (TIDES) cohort. Completion of the EDUC 651 and the EDUC 653.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring

EDUC 659 - Teacher Leadership

Credits: 1.5 (NR)
Engages learners in data gathering exercises toward articulating a leadership agenda in the context of PK-12 educational environments.

Prerequisite(s): Admission into the MEd Curriculum and Instruction concentration in Teacher Inquiry, Development and
Empowerment for Social Justice program (TIDES) cohort. Completion of the EDUC 655 and the EDUC 657.

**Hours of Lecture or Seminar per week:** 1.5  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Summer

### EDUC 661 - Teacher Empowerment and Policy

Credits: 1.5 (NR)  
Provides advanced study on a selected topic or emerging issue in American or international education with particular attention to developing policy solutions.

**Prerequisite(s):** Admission into the MEd Curriculum and Instruction concentration in Teacher Inquiry, Development and Empowerment for Social Justice program (TIDES) cohort. Completion of the EDUC 655 and the EDUC 657.

**Hours of Lecture or Seminar per week:** 1.5  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Summer

### EDUC 663 - Culturally Relevant Pedagogy

Credits: 3 (NR)  
Offers opportunity to view how language and culture shape realities, including perceptions of children as learners. Explores cultural constraints and transformative possibilities embedded within cultures.

**Prerequisite(s):** Admission into the MEd Curriculum and Instruction concentration in Teacher Inquiry, Development and Empowerment for Social Justice program (TIDES) cohort. Completion of the EDUC 659 Teacher Leadership Course.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall

### EDUC 665 - Teacher Inquiry in Practice I

Credits: 3 (NR)  
Builds further understanding of teacher research as teachers form and frame salient questions, examine the existing literature related to their questions, and take actions to improve teaching and learning.

**Prerequisite(s):** Admission into the MEd Curriculum and Instruction concentration in Teacher Inquiry, Development and Empowerment for Social Justice program (TIDES) cohort. Completion of the EDUC 659 Teacher Leadership Course.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall
EDUC 667 - Teacher Inquiry in Practice II

Credits: 3 (NR)
Builds on the teacher research project begun in Teacher Inquiry in Practice I as teachers continue to address their pedagogical questions, take actions to improve teaching and learning, gather, analyze and interpret multiple forms of data, and share their experience in communities of practice.

Prerequisite(s): Admission into the MEd Curriculum and Instruction concentration in Teacher Inquiry, Development and Empowerment for Social Justice program (TIDES) cohort. Completion of the EDUC 663 Culturally Relevant Pedagogy course and the EDUC 665 Teacher Inquiry in Practice Course.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring

EDUC 669 - Teaching and Learning in Practice

Credits: 3 (NR)
Provides a structured opportunity to transform curricula, design assessments and demonstrate the cumulative knowledge and practices of the entire TIDES program, with an emphasis on policy applications and sustainability.

Prerequisite(s): Admission into the MEd Curriculum and Instruction concentration in Teacher Inquiry, Development and Empowerment for Social Justice program (TIDES) cohort. Completion of the EDUC 663 Culturally Relevant Pedagogy course and the EDUC 665 Teacher Inquiry in Practice Course.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring

EDUC 670 - The Culture of Teaching

Credits: 3 (NR)
Explores roles, responsibilities, and realities of teaching in secondary schools. Examines teaching in context of contemporary educational issues, legal matters, diverse and exceptional learners, classroom management, and professional practices.

Prerequisite(s): Admission to secondary education program

Corequisite(s): Initial methods course.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDUC 671 - Schools and Culture in the Future

Credits: 3 (NR)
Focuses on relationship between schools and communities from the past to the future. Research-based education reform, ideas
from futurists, and ISTE technology standards influence teacher planning for students in the 21st century.

**Prerequisite(s):** EDUC 522 and EDUC 670

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**EDUC 672 - Human Development and Learning: Secondary Education**

Credits: 3 (NR)  
Explores developmental issues associated with middle and high school students, and theories that provide basis for understanding learning process. Addresses implications for designing instruction and curriculum.

**Prerequisite(s):** EDUC 522.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**EDUC 674 - Assessing Learning and Teaching in the Secondary School Classroom**

Credits: 3 (NR)  
Supports beginning teachers' development and design of assessment practices for promoting student learning. Focuses on individual differences and classroom, teacher, school, and cultural factors that impact assessment; different types and purposes of assessment; and relationship of assessment to national and state standards.

**Prerequisite(s):** EDUC 522 and first and advanced methods course must be completed prior to taking this class.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**EDUC 675 - Research in Secondary Education**

Credits: 3 (NR)  
The portfolio is submitted during the semester the candidate is enrolled in EDUC 675. Helps beginning teachers become more effective by critiquing various research paradigms, reviewing the research literature, and systematically collecting and interpreting evidence to improve practice. Emphasizes linking evidence of student learning to make informed instructional decisions.

**Notes:** This capstone class of the MEd program should be taken last.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**EDUC 695 - Northern Virginia Writing Project-Service Program**
Credits: 1-3 (RT)
Offered at request of school division or other educational agency.

Equivalent to ENGH 695

Notes: Content varies. May be repeated with permission of department, but no more than 6 credits in EDUC 695, 695, or 699 may be applied toward master's degree.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0

EDUC 697 - Theory of Composition

Credits: 3 (NR)
Acquaints classroom teachers with current theory relating to writing and teaching composition. Focuses on making explicit participants' theories, reading works of leading theorists, and developing statement describing implications of theoretical consistency in teaching writing.

Equivalent to ENGH 697

Prerequisite(s): ENGL 615/ENGH 615 and ENGL 695/ENGH 695, or equivalent.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDUC 751 - Mentoring/Supervising Intern Teachers and Mentor Teacher Career Development

Credits: 3 (NR)
Examines multiple roles of teachers as they mentor and supervise intern teachers in schools. Covers career development, leadership, and instructional roles and strategies. Designed to assist intern teachers in their first year, and provide quality career and staff development to their mentors.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDUC 795 - Seminar in Brain-Compatible Teaching and Learning in Multicultural Settings

Credits: 3 (NR)
Course examines brain-compatible learning styles theories and their impact on today’s classrooms comprised of culturally, linguistically, and cognitively diverse (CLCD) learners. Situates current pedagogy and its efficacy at reaching all learners. Issues examined are those involving perception, attention, consciousness, memory and emotion. Focus is particularly placed on responsive teaching methods highlighting situated cognition, brain-based learning principles and authentic learning principles.

Prerequisite(s): Admission to the PhD in Education program or permission of instructor.
EDUC 797 - Advanced Topics in Education

Credits: 1-6 (RT)
Advanced study of selected topics in education for students preparing for doctoral studies or who have been admitted to the PhD program in education.

Notes: May be repeated for credit with GSED approval.

EDUC 800 - Ways of Knowing

Credits: 3 (NR)
Provides understanding of characteristic ways of knowing in various liberal arts disciplines while examining subject matter, scope, key concepts, principles, methods, and theories. Analyzes philosophical traditions underlying educational practice and research.

Prerequisite(s): Admission to PhD program.

Notes: Required course during first spring semester of study in the program.

EDUC 802 - Leadership Seminar

Credits: 3 (NR)
Intensive study of leadership, emphasizing decision and change processes, and assessment and development of leadership skills.

Prerequisite(s): Admission to PhD program.

Notes: Required course during first semester of study in the program.

EDUC 805 - Research and Scholarship in Education
Credits: 2 (NR)
Provides an intellectual framework for research and scholarship in education, including consideration of specific scholarship of CEHD faculty as representative of the range of educational scholarship that make up the educational research community.

Prerequisite(s): Admission to PhD in Education Program

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 0

EDUC 815 - Research Inquiries in International Education

Credits: 3 (NR)
Focuses on the intersection of international education and research methodologies in educational settings. Students will delve into the construction, implementation, and impact of research in international settings or with an internationally-minded perspective. Through critical inquiry into practice, the course offers students the opportunity to develop more sophisticated understandings of the research process in international education settings.

Prerequisite(s): EDUC 880 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

EDUC 845 - Multilingual Learners With Diverse Educational Needs

Credits: 3 (NR)
Examines examine issues surrounding identification, assessment, and instruction of multilingual learners with diverse educational needs.

Prerequisite(s): Admission to the PhD Program in Education or Permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

EDUC 850 - The Study of Teaching

Credits: 3 (NR)
Explores the history and development of the search for teaching effectiveness. The course will trace the various definitions of effectiveness and the methods created to assess effectiveness.

Prerequisite(s): EDRS 810.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
EDUC 851 - Research on Teacher Education

Credits: 3 (NR)
Explores the history and development of the search for effectiveness in the preparation of preservice teachers and the continuing professional development of practicing teachers. The students will examine the substance and gaps in the study of the education of educators.

Prerequisite(s): EDRS 810.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDUC 853 - World Perspectives of Teacher Education

Credits: 3 (NR)
Focuses on the cross-cultural analysis of current U.S. and internationally based teacher preparation and continuing professional development pedagogical models, policy reforms, and their historical contexts.

Prerequisite(s): Admission to the doctoral program.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDUC 870 - Education Policy: Process, Context, and Politics

Credits: 3 (NR)
Examines public policy decision-making in education at local, state, and national levels, and its impact on education institutions, students, and public. Focuses on government entities' authority over education decision-making, and resolution of competing policy arguments in political arena.

Prerequisite(s): Admission to PhD in education program, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDUC 871 - Advanced Policy Issues in Education

Credits: 3 (NR)
In-depth analysis of selected education policy issues. Focuses on issue interactions and education-related policy actions by different levels of government.

Prerequisite(s): EDUC 870 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
EDUC 872 - Social Science Research and Education Policy

Credits: 3 (NR)
Focuses on research base used to support education policy actions. Focuses on analyzing strength of this research.

Prerequisite(s): EDRS 810, 811, and 812 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDUC 873 - Education Policy: Comparative and International Perspectives

Credits: 3 (NR)
Using interdisciplinary approach, addresses education policy issues that transcend national boundaries and have implications for educators in fostering social justice and global awareness.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDUC 874 - The Achievement Gap

Credits: 3 (NR)
Focuses on achievement gap in schools. Students research and analyze gaps in student achievement related to race and ethnicity, limited English proficiency, family background, gender, poverty, and ableism, and practices designed to close the gap.

Prerequisite(s): Admission to PhD program or permission of instructor

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDUC 875 - Contemporary and Emerging Issues in Education Policy

Credits: 3 (NR)
Focuses on identifying and analyzing factors that promote new initiatives in education policy agenda. Attention given to nontraditional sources of education policy initiatives.

Prerequisite(s): EDUC 870

Corequisite(s): EDUC 870

Notes: Must be admitted to PhD program.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
EDUC 876 - Teacher Development and Education Policy

Credits: 3 (NR)
Focuses on the impact of policy actions at the local, state, and national levels on teacher preparation and continuing professional development.

Prerequisite(s): EDUC 870 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDUC 877 - Teacher Policy in Historic Perspective

Credits: 3 (NR)
Examines the history of policies pertaining to public school teachers in the United States. Evaluate and engage current policy debates by putting the past and present into conversation.

Prerequisite(s): Admission to The PhD in Education program, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Summer, Spring

EDUC 878 - Intercultural Competence: Theory and Research Application to International Education

Credits: 3 (NR)
Explores and examines intercultural competence theory and research as a teaching and learning framework in international education. Emphasizes the comparison of alternative models of intercultural competence development, research paradigms using intercultural competence theory in international education, and empirical studies that examine and explore the use of intercultural competence theory in education.

Prerequisite(s): EDUC 880.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring

EDUC 879 - Language and Second Language Acquisition Research in International Education

Credits: 3 (NR)
Examines the theoretical and historical role of language in international education, with special emphasis on the foundations and variables of second language acquisition. Focuses the role of language in cross-cultural and international contexts, the application of language acquisition theories and empirical studies globally.
Prerequisite(s): EDUC 880.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring

EDUC 880 - Introduction to International Education

Credits: 3 (NR)
Using interdisciplinary approach, addresses education policy issues that transcend national boundaries and have implications for educators in fostering social justice and global awareness.

Prerequisite(s): Admission to PhD in education program or permission of instructor

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDUC 881 - Seminar in Bilingual Education: Policy

Credits: 3 (NR)
Examines historical development of education for language minority students in United States, including federal and state legislation and court decisions. Explores policy issues regarding administrative program models, instructional approaches, curricular reform, and assessment policies for language minority students developed in response to legal mandates, legislative decisions, and school reform movement.

Prerequisite(s): Admission to PhD program.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDUC 882 - Second Language Acquisition: Theory, Research, and Practice

Credits: 3 (NR)
Examines the theoretical foundations of second language acquisition with focus on linguistic, anthropological, sociological, psychological, and educational research through theory and practice.

Prerequisite(s): Admission to PhD program, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

EDUC 883 - Seminar in Sociocultural Theory
Explores and analyzes the theoretical contributions of sociocultural theory. Focuses on the growing body of contemporary research on literacy, equity in education and emancipatory teaching for diverse students.

**Prerequisite(s):** Admission to PhD program in Education or permission of instructor

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**EDUC 890 - Doctoral Internship in Education**

Credits: 1-6 (NR)  
Interns work with appropriate staff member in cooperating school, school system, or other educational institution, agency, or setting.

**Prerequisite(s):** Admission to PhD program, and prior approval of advisor and PhD director.

**Notes:** Requires 100 hours of on-site internship completed over at least a five-week period. Up to 6 credits of EDUC 890 may be applied toward PhD degree requirements.

**Hours of Lecture or Seminar per week:** 1-6  
**Hours of Lab or Studio per week:** 0

**Grading:** Graduate Special

---

**EDUC 892 - Social Justice and Equity in International Education**

Credits: 3 (NR)  
Examines ideological, cultural, and systemic structural inequities in various educational settings at national and international levels. Focuses on educational practices that promote equity and social change throughout the world.

**Prerequisite(s):** EDUC 880.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**EDUC 893 - Seminar in Educational Anthropology**

Credits: 3 (NR)  
Examines theories and research from educational anthropology and educational sociology to clarify and address contemporary educational issues and concerns. Focuses on U.S. public schools, with comparative materials from other educational settings and societies.

**Prerequisite(s):** Admission to PhD program, or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0
EDUC 894 - Seminar in Multicultural Education

Credits: 3 (NR)
Examines knowledge base, policy issues, and curricular and instructional features of multicultural education in United States and other countries.

Prerequisite(s): Admission to the Ph.D. in Education program or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDUC 895 - Seminar in Emerging Issues of Education

Credits: 3 (RT)
Study of selected emerging issues or problems in education. Students engage in research, study, discussion, and writing.

Notes: May be repeated for credit. Up to 6 hours of 895 course work may be applied to PhD requirements.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDUC 897 - Independent Study for the Doctor of Philosophy in Education

Credits: 1-6 (RT)
Structured learning experience to extend and develop skills and knowledge relative to field of professional expertise.

Prerequisite(s): Admission to PhD program and prior approval of advisor and PhD director.

Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 0
Grading: Graduate Special

EDUC 994 - Advanced Internship in Education

Credits: 3 (NR)
Internship in setting related to student's major area of study. Requires minimum of 100 hours completed over at least a five-week period. Each intern works with appropriate staff member in cooperating school, school system, or other educational institution or agency.

Prerequisite(s): admission to PhD program, and prior approval of advisor and PhD director.

Notes: Internship must be in setting that differs from regular employment.

Hours of Lecture or Seminar per week: 3
EDUC 998 - Doctoral Dissertation Proposal

Credits: 1-6 (NR)
Prerequisite(s): Admission to candidacy in PhD program; successful completion of doctoral qualifying exam; and EDRS 810, 811, and 812 or their equivalents.

EDUC 999 - Doctoral Dissertation Research

Credits: 1-9 (RD)
Provides continued faculty assistance on individual basis to complete dissertation planned in EDUC 998 and initiate new projects.

Notes: Requires successful completion of EDUC 998 and faculty approval of proposal.

Education Leadership (EDLE)

Offered by the College of Education and Human Development

EDLE 412 - Schools and the Law

Credits: 3 (NR)
Provides an extensive overview of legal and ethical issues in schools. In the course, students will review and analyze key legal and ethical principles, read court decisions, and examine federal and state statutes.

Prerequisite(s): EDUC 300. Prerequisite enforced by registration system.

EDLE 420 - Organization and Management of Schools
Credits: 3 (NR)
Studies basic issues in leadership, organization, and governance of schools. Explores theories and models of leadership how leaders conceptualize school organization, with an emphasis on distributed leadership in professional environments, systems thinking, and organizational change.

Prerequisite(s): EDUC 300 Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDLE 597 - Special Topics in Education

Credits: 1-6 (RD)
Provides advanced study on selected topic or emerging issue in American or international education.

Prerequisite(s): Admission to program in GSE.

Notes: May be repeated for credit with GSE permission.

Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 0

EDLE 610 - Leading Schools and Communities

Credits: 3 (NR)
Examines critical functions of leadership and organizational management, complex decision making responsibilities of school executives, and constructive relationships between schools and communities. Incorporates historical, ethical, philosophical, and sociological foundations of American education and the impact of organizational structure on reform and student achievement. Practical and academic emphasis on leadership skill development and dispositions.

Prerequisite(s): EDLE 620 or EDSE 743; EDLE 690; EDLE 791; EDLE 612; EDLE 614 or EDSE 702; EDLE 616 or EDSE 626, and EDLE 618. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDLE 612 - Education Law

Credits: 3 (NR)
Provides legal foundations of U.S. public schools. Examines general principles of statutory and case law, and applies judicial decisions to educational environments. Focuses on legal responsibilities, constraints, and opportunities of public school officials. Includes component of Special Education law.

Prerequisite(s): EDLE 620 or EDSE 743; EDLE 690 and EDLE 791. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
EDLE 614 - Managing Financial and Human Resources

Credits: 3 (NR)
Explores basic functions in financial and human resource management. Examines legalities, ethics, and politics of resource procurement and allocation. Provides experiences to help students better understand tasks typically performed by school leaders.

Prerequisite(s): EDLE 620, EDLE 690, and EDLE 791. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDLE 616 - Curriculum Development and Evaluation

Credits: 3 (NR)
Examines the relationship of the written, taught, and tested curriculum and identifies critical leadership decisions that can positively impact student achievement. Identifies components of effective curriculum guides. Mini-document for personal use is constructed.

Prerequisite(s): EDLE 620, EDLE 690, and EDLE 791 Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDLE 618 - Supervision and Evaluation of Instruction

Credits: 3 (NR)
Provides a theoretical and practical overview of the supervision and evaluation of instruction. Introduces the domains of supervision and inquiry into current issues and best practices in supervision. Uses a variety of interactive exercises to assist in the development of practical skills for using the clinical process and developmental approach to supervision.

Prerequisite(s): EDLE 620 or EDSE 743; EDLE 690, and EDLE 791 Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDLE 620 - Organizational Theory and Leadership

Credits: 3 (NR)
Studies basic organizational theories and models of leadership and management. Emphasizes shared leadership in professional environments, communication skills, systems thinking, and personal and organizational change. Bridges theory to practical applications in educational settings.

Corequisite(s): Application to the Education Leadership Program.
EDLE 634 - Contemporary Issues in Education Leadership

Credits: 3 (NR)
Examines current and emerging issues and trends impacting education. Includes demographic shifts; globalization; technology; data-based decision making; inclusion of diverse learners in American schools; and recent research on student achievement when influenced by race, gender, and poverty.

Prerequisite(s): Admission to program.

EDLE 636 - Adult Motivation and Conflict Management in Education Settings: A Case Study Approach

Credits: 3 (NR)
Uses case studies and simulations to examine conflict mediation and resolution skills, and safety and security issues. Focuses on character and ethics education in schools, coaching and mentoring, and adult motivation to support positive behaviors in work settings.

Prerequisite(s): Admission to program.

EDLE 690 - Using Research to Lead School Improvement

Credits: 3 (NR)
Develops skills, insights, and understanding of how leaders use research to improve schools, with emphasis on the use of assessment and research data to identify school improvement needs and to design school improvement projects. Designated a Green Leaf Course.

Prerequisite(s): EDLE 620 or 743 (may be taken concurrently if application has been submitted to the MEd in Education Leadership program or the MEd in EDLE with a Concentration in Special Education Leadership program) Prerequisite enforced by registration system.

EDLE 770 - Introduction to Education Leadership
Credits: 3 (NR)
Introduces the study of education leadership, theoretical traditions in leadership studies, and scholarship on leadership and organizational change.

Prerequisite(s): Admission to Ph.D. in Education Program.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Summer, Spring.

EDLE 791 - Internship in Educational Leadership

Credits: 3 (NR)
Offers wide range of practical experiences and professional challenges in authentic educational settings. Activities emphasize strategic, instructional, organizational, political, and community leadership.

Prerequisite(s): Admission to the MEd in Education Leadership (EDLE) program or MEd in EDLE with a concentration in Special Education Leadership; EDLE 620 or 743 (may be taken concurrently)

Notes: Course must be taken in second term of program.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
Grading: Satisfactory/No Credit

EDLE 797 - Advanced Topics in Education

Credits: 1-9 (RT)
Advanced study of selected topics in education for students preparing for doctoral studies or who have been admitted to the PhD program in education.

Notes: May be repeated for credit with CEHD approval.

Hours of Lecture or Seminar per week: 1-9
Hours of Lab or Studio per week: 0
Grading: Graduate Special

EDLE 801 - Contemporary Organization Theory

Credits: 3 (NR)
Engages students in the study of major organization theories that inform educational leadership research. Students use theory to help inform their own research interests. Students begin work on analytical literature review.

Prerequisite(s): Admission to PhD in education program.

Corequisite(s): EDLE 802.
EDLE 802 - Leadership and Decision Making

Credits: 3 (NR)
Engages students in the study of major leadership and decision theories that inform educational leadership research. Students use theory to help inform their own research interests. Students begin work on analytical literature review.

Prerequisite(s): EDLE 801.

Notes: May be taken as corequisite with EDLE 802. First in three-course sequence.

EDLE 803 - Foundations of Education Leadership: Economics and Leadership

Credits: 3 (NR)
Emphasizes economic foundations of U.S. education, and evolution of school, district, and state leadership. Students complete work on analytical literature review.

Prerequisite(s): EDLE 801 and 802.

Notes: Third in a three-course sequence.

EDLE 813 - Social and Political Forces in Education Leadership

Credits: 3 (NR)
Examines the social and political forces that shape education in the United States and the effect of these forces on school leadership. Examines the social and political functions of schooling in the past and present.

Prerequisite(s): Admission to Ph.D. in Education Program.

Notes: May be taken as corequisite with EDLE 801. Second in three course sequence.
EDLE 815 - Conceptual Frameworks in Education Leadership

Credits: 3 (NR)
Introduces three different disciplinary perspectives on education leadership, and helps identify and articulate different conceptual frameworks. Major focus is designing a conceptual framework that informs research questions.

Prerequisite(s): Admission to PhD in education program or permission of instructor

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDLE 816 - Instructional Leadership-Curriculum Policy and Practice

Credits: 3 (NR)
Focuses on curriculum and instruction theory, policy, and practice with research emphasis on instructional leadership. Students develop research proposals to investigate instructional leadership in schools and districts, and relate instructional leadership to their own specific research interests.

Prerequisite(s): Admission to Ph.D. in Education Program.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Summer, Spring.

EDLE 818 - Instructional Leadership-Supervision Policy and Practice

Credits: 3 (NR)
Introduces current topics and research in supervision and instruction, including theory and empirical work focused on instruction, teacher learning, teacher evaluation, and instructional leadership.

Prerequisite(s): Admission to Ph.D. in Education Program.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Summer, Spring.

EDLE 895 - Emerging Issues in Administration and Supervision

Credits: 3 (RD)
Covers selected emerging issues in educational leadership. Students engage in research, study, discussion, and writing about various topics selected for study.

Prerequisite(s): Admission to PhD program, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
Education Research (EDRS)

Offered by the College of Education and Human Development

EDRS 531 - Educational and Psychological Measurement

Credits: 3 (NR)
Emphasizes techniques and principles used in the construction, administration, and quantification of measuring devices for evaluation purposes. Discusses interpretation of standardized tests of ability, aptitude, achievement, interest, and personality.

Prerequisite(s): Appropriate methods and advanced methods courses.

Corequisite(s): Appropriate methods and advanced methods courses.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDRS 590 - Education Research

Credits: 3 (NR)
Develops skills, insights, and understanding to perform research, with emphasis on interpreting and applying research results. Critiques research, and uses findings in educational settings.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDRS 597 - Special Topics in Education

Credits: 1-6 (RD)
Provides advanced study on selected topic or emerging issue in American or international education.

Prerequisite(s): Admission to program in GSE.

Notes: May be repeated for credit with CEHD approval.

Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 0
Grading: Graduate Special

EDRS 620 - Quantitative Inquiry in Education

Credits: 3 (NR)
Examines fundamental concepts and methods of statistics as applied to educational problems, including descriptive and
inferential statistics.

**Prerequisite(s):** EDRS 590 or equivalent experience.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**EDRS 621 - Qualitative Inquiry in Education**

Credits: 3 (NR)  
Focuses on basic application of naturalistic research methods. Examines major theoretical frameworks and qualitative research techniques, which include content analysis, coding, and interpretation of data.

**Prerequisite(s):** EDRS 590 or equivalent experience.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**EDRS 630 - Educational Assessment**

Credits: 3 (NR)  
Examines research theory and practice relevant to assessments. Focuses on assessment strategies for students including developing skills to select, score, and interpret educational assessments.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**EDRS 631 - Program Evaluation**

Credits: 3 (NR)  
Focuses on perspectives of existing and emerging issues, theories, and models of program evaluation. Involves implementation of program evaluation in related fields and school districts.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall

---

**EDRS 797 - Advanced Topics in Education**

Credits: 1-6 (RD)  
Advanced study of selected topics in education for students preparing for doctoral studies or who have been admitted to the PhD program in education.

**Notes:** May be repeated for credit with CEHD approval.
EDRS 810 - Problems and Methods in Education Research

Credits: 3 (NR)
Advanced course in interpreting and applying education research methods. Emphasizes comparison of alternative philosophies of research, ways of formulating questions and hypotheses, research plans, and analysis procedures. Students evaluate existing studies, and investigate a range of research approaches.

Equivalent to CTCH 710, CTCH 801 (2013-2014 Catalog).

Prerequisite(s): Admission to PhD program, or permission of instructor.

EDRS 811 - Quantitative Methods in Educational Research

Credits: 3 (NR)
Emphasizes advanced methods of conducting research using quantitative methods of data collection, and analysis appropriate for research in education. Includes design of experimental and quasiexperimental research studies, and methods of analysis appropriate to these studies, including analyzing variance and multiple linear regression.

Prerequisite(s): Satisfactory completion of EDUC 810 or equivalent, or permission of instructor. Prerequisite enforced by registration system.

EDRS 812 - Qualitative Methods in Educational Research

Credits: 3 (NR)
Teaches how to apply qualitative data collection and analysis procedures in educational research, including ethnographic and other field-based methods, and unobtrusive measures.

Prerequisite(s): Satisfactory completion of EDUC 810 or equivalent, or permission of instructor. Prerequisite enforced by registration system.

Notes: Emphases vary depending on student interests and needs.
EDRS 820 - Evaluation Methods for Educational Programs and Curricula

Credits: 3 (NR)
Explores development and types of current systems and models for evaluating educational programs and curricula. Emphasizes evaluation needs and problems of public and private elementary and secondary schools, and colleges and universities. Also considers needs of government agencies, industry, and health-related organizations.

Prerequisite(s): Successful completion of EDRS 810, or permission of instructor.

Notes: Prior completion of EDRS 811 and 812 helpful but not required.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDRS 821 - Advanced Applications of Quantitative Methods

Credits: 3 (NR)
Advanced study of applications of quantitative methods in educational research, reinforcing and building on concepts and skills acquired in EDRS 811. Uses modular approach, and provides advanced study of techniques appropriate to survey research, group-experimental and quasieperimental research, selected multivariate procedures and factor analysis, and quantitative synthesis (meta-analysis) of research. Combines text reading assignments, critiques, and discussion of relevant journal articles; and application activities.

Prerequisite(s): EDRS 810 and 811.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDRS 822 - Advanced Applications of Qualitative Methods

Credits: 3 (NR)
Advanced seminar devoted to study of current topics in qualitative research. Deals with cutting-edge information on selected advanced topics in qualitative research, and provides opportunities to apply new skills and knowledge to projects related to students’ interests.

Prerequisite(s): EDRS 810 and 812.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDRS 823 - Advanced Research Methods in Single Subject/Case Design

Credits: 3 (NR)
Prepares students to conduct research using single subject design and single case study design. Provides understanding of salient features as well as advantages, disadvantages of these research methodologies. Students critique and analyze published research using these methodologies. Provides opportunities to apply these methodologies to research questions related to student interests.
Prerequisite(s): EDRS 810, 811, and 812.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDRS 824 - Mixed Methods Research: Integrating Qualitative and Quantitative Approaches

Credits: 3 (NR)
Advanced research seminar that integrates qualitative and quantitative approaches, methods, and data in a single study. The course covers the paradigms and "mental models" that inform both approaches, and the ways in which qualitative and quantitative goals, questions, methods, and interpretive strategies can be productively combined.

Prerequisite(s): EDRS 810, 811, and 812 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring.

EDRS 825 - Advanced Research Methods in Self-Study

Credits: 3 (NR)
Prepares students to conduct research using the self-study research methodology, a qualitative research approach for systematically examining one's practitioner role for improvement-aimed purposes with contributions to the educational field and knowledge base.

Prerequisite(s): Admission to PhD in Education program; EDRS 810; EDRS 811 or EDRS 812

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDRS 826 - Qualitative Case Study Methods

Credits: 3 (NR)
Advanced research seminar on qualitative case study design and application in educational research. Topics include descriptive, theoretical, evaluation, and policy case study design and methods. Students will conduct and critique a case study appropriate to their discipline.

Prerequisite(s): EDRS 812 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Summer.
EDRS 827 - Development and Validation of Assessment Scales

Credits: 3 (NR)
Focusing on the acquisition of knowledge and skills related to development of assessment scales and validation of assessment scale data in the context of education, psychology, and related fields.

Prerequisite(s): EDRS 811.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall.

EDRS 828 - Modern Measurement in Education and Human Development

Credits: 3 (NR)
Focuses on the acquisition of knowledge and skills related to modern theory of measurement with application in the context of education, psychology, and related fields.

Prerequisite(s): EDRS 811 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Summer, Spring.

EDRS 830 - Hierarchical Linear Modeling

Credits: 3 (NR)
Analyzes nested data structures (e.g. students within classrooms) as well as student growth. Students will learn through reading assignments, lecture and applications using a computer program for data analysis. Students will be expected to critically read multilevel methods used in published research, analyze data, and provide written report of results in APA format.

Prerequisite(s): EDRS 821.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

EDRS 831 - Structural Equation Modeling

Credits: 3 (NR)
Focusing on the development of knowledge and skills related to structural equation modeling and research applications in education, psychology, and related fields.

Prerequisite(s): EDRS 811.

Hours of Lecture or Seminar per week: 3
EDRS 890 - Research in Practice

Credits: 3 (NR)
Interns work with appropriate staff member in cooperating school, school system, or other educational institution, agency, or setting.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
Grading: Graduate Special

Educational Psychology (EDEP)

Offered by the College of Education and Human Development

EDEP 402 - Brain, Behavior, and Neuroimaging in Children

Credits: 3 (NR)
Focus on research regarding the development of cognitive processes in children, their neurobiological substrates, and the imaging technology used to explore the functioning brain.

Prerequisite(s): At least junior standing or sophomore honors/university scholar candidate.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDEP 405 - The Neuroscience of Learning and Cognition

Credits: 3 (NR)
Focuses on research regarding the development of cognitive processes in children and adults of various ages, their neurobiological substrates, and the imaging technology used to explore the functioning brain.

Equivalent to EDEP 655

Prerequisite(s): Junior standing or sophomore honors / university scholar candidate.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring

EDEP 550 - Theories of Learning and Cognition
Credits: 3 (NR)
Explores theoretical perspectives on learning and cognition, and relation of these theories to construction of learning environments, student motivation, classroom management, assessment, and technology to support teaching and learning.

Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0

**EDEP 551 - Principles of Learner Motivation**

Credits: 3 (NR)
Focuses on theories and concepts of human motivation; and examines strategies, techniques, and interventions that promote and sustain learner motivation.

Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0

**EDEP 591 - Data-Driven Decision Making for Continuous Educational Improvement**

Credits: 3 (NR)
Provides an intellectual and practical framework for creating and understanding formative and summative assessments of student performance. Emphasis is placed on the learning principles, cognitive processes, and psychometric models as they pertain to assessment issues.

Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0  
When Offered: Summer.

**EDEP 592 - Data-Driven Decision-Making: Development of Assessments**

Credits: 3 (NR)
Focuses on strategies to design assessments for students and schools with a particular emphasis on developing and using assessment methods to inform instructional decisions.

Prerequisite(s): EDEP 591-may be taken concurrently

Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0  
When Offered: Summer.

**EDEP 593 - Data-Driven Decision Making: Analysis and Interpretation of Assessment Data**

Credits: 3 (NR)
Focusing on the development of knowledge and skills related to analyzing and interpreting educational assessment data.
Prerequisite(s): EDEP 592.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

EDEP 594 - Data-Driven Decision-Making Application in Education Contexts

Credits: 3 (NR)
Applies fundamental knowledge of assessment using team-based projects. Incorporates development of assessments and the analysis, interpretation, and reporting of assessment data to inform curriculum and instruction based on the context-specific needs of educators.

Prerequisite(s): EDEP 593.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
Grading: Graduate Special
When Offered: Spring.

EDEP 597 - Special Topics in Educational Psychology

Credits: 1-3 (RT)
Covers critical current and emerging issues in educational psychology across the span of human development with an emphasis on research methodology and evidence-based practice.

Prerequisite(s): Permission of instructor.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0
When Offered: Fall, Summer, Spring

EDEP 601 - Creativity and Cognition in the Arts and Media

Credits: 3 (NR)
Focuses on research on cognition, development, learning, and creativity in the visual arts and media in formal and informal educational settings.

Equivalent to AVT 606

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDEP 632 - Human Development
Credits: 3 (NR)
Examines the course of human development from early childhood to adult, with special attention paid to childhood and adolescence. Major emphasis is placed on principles of research in human development and the major areas of cognitive, linguistic, and social contexts of development as they pertain to learners in schools and beyond.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring.

EDEP 650 - High-Stakes Assessment and Accountability Systems

Credits: 3 (NR)
Focuses on school effectiveness, assessment tools, and accountability models on state and national levels. Explores issues and methods relevant to educational policy, standardized testing, and classroom assessment.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDEP 651 - Modern Measurement with Applications in Education and the Behavioral Sciences

Credits: 3 (NR)
Provides background in modern measurement theory and applications. Covers topics from classical test theory, generalizability theory, and item response theory. Applications include advanced techniques in test construction, analysis of binary and rating data, test equating, item fairness, and cognitive diagnosis.

Prerequisite(s): EDRS 531

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDEP 652 - Process of Learning and Development

Credits: 3 (NR)
Explores different theoretical perspectives on learning and development. Focuses on historical and contemporary theories of learning and cognitive development, and examines current research and its application in educational settings.

Prerequisite(s): EDEP 550.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDEP 653 - Culture and Intelligence
Credits: 3 (NR)
Explores different theoretical perspectives on intelligence as they relate to individual and cultural differences. Examines issues related to heritability and measures of intelligence, and intelligence in the cultural context.

Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0

**EDEP 654 - Learning, Motivation, and Self-Regulation**

Credits: 3 (NR)
Focuses on theories and research on self-regulation of academic learning. Presents multidimensional conceptual framework for studying and applying self-regulation in educational contexts.

Prerequisite(s): EDEP 550, 551.

Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0

**EDEP 655 - The Neuroscience of Learning and Cognition**

Credits: 3 (NR)
Focuses on research regarding the development of cognitive processes in children and adults of various ages, their neurobiological substrates, and the imaging technology used to explore the functioning brain.

Equivalent to EDEP 405

Prerequisite(s): EDEP 550

Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0  
When Offered: Spring

**EDEP 798 - Directed Reading, Research, and Individual Projects in Educational Psychology**

Credits: 1-3 (RD)
Offers a capstone experience to students after completion of majority of program coursework with the exception of 6 credit hours. Enables students to demonstrate their integrative knowledge and skills accrued through study in their concentration area in educational psychology.

Prerequisite(s): Project mentor approval and completion of coursework in the MS in Educational Psychology exclusive of 6 credit hours.

Hours of Lecture or Seminar per week: 1-3  
Hours of Lab or Studio per week: 1-9  
Grading: Graduate Special  
When Offered: Fall, Spring, Summer
EDEP 799 - Thesis in Educational Psychology

Credits: 1-3 (RD)
The thesis is based on original research. It enables students to demonstrate their integrative knowledge and skills accrued through study in their concentration area in educational psychology.

Prerequisite(s): Thesis chair approval and completion of coursework in the MS in Educational Psychology exclusive of 6 credit hours.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 1-12
Grading: Satisfactory/No credit only
When Offered: Fall, Spring, Summer

EDEP 820 - Teaching, Learning, and Cognition

Credits: 3 (NR)
Focuses on foundational educational psychology theories including cognitive, social, and constructivist themes and their implications for improving instructional practices and learning at all developmental levels and content areas.

Prerequisite(s): EDUC 800, 805; EDLE 802; and EDRS 810.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDEP 821 - Sociocultural Processes in Learning, Instruction, and Motivation

Credits: 3 (NR)
Examines processes by which social, cultural, and linguistic variables influence human behavior. Focuses on differences within and between cultural groups related to student's learning and achievement in educational settings.

Prerequisite(s): EDUC 800, 805; EDLE 802; and EDRS 810.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDEP 822 - Advanced Learning, Motivation, and Self-Regulation

Credits: 3 (NR)
Examines development of self-regulatory and motivational processes as they relate to educational practice. Emphasizes how processes influence students' self-motivation and achievement in various domains.

Prerequisite(s): EDUC 800, 805; EDLE 802; and EDRS 810.
EDEP 823 - Research Project in Educational Psychology: Sequence I

Credits: 3 (NR)
Focuses on development and implementation of research studies in educational psychology. Students acquire skills regarding developing research questions and a sound methodological approach for their study.

Prerequisite(s): EDEP 820, 821, 822.

Notes: First in two-course sequence.

EDEP 824 - Research Project in Educational Psychology: Sequence II

Credits: 3 (NR)
Focuses on development and implementation of research studies in educational psychology. Students acquire skills regarding collecting, analyzing, and interpreting data.

Prerequisite(s): EDEP 823.

Notes: Second in two course sequence.

Electrical and Computer Engineering (ECE)

Offered by the Volgenau School of Engineering.

Students may attempt an undergraduate course taught by the Volgenau School of Engineering twice. A third attempt requires approval of the department offering the course.

ECE 101 - Introduction to Electrical and Computer Engineering

Credits: 3 (NR)
Introduces fundamental concepts in Electrical and Computer engineering and provides insight to the various careers in each field. Both theory and practical applications of electronic components are covered through examples of real world applications. Topics are reinforced through hands-on laboratory experiments.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 3
ECE 201 - Introduction to Signal Analysis

Credits: 3 (NR)
Provides technically more rigorous introduction to problems and tools commonly encountered by electrical engineers. Introduces mathematical modeling of engineering problems and their solutions. Introduces standard software packages for electrical engineering as tools to simulate engineering problems on computer. Mathematical and computer models are related to physical reality provided by hands-on experiments.

Prerequisite(s): Grade of C or better in MATH 113. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 2
When Offered: Fall, Spring, Summer

ECE 220 - Signals and Systems I

Credits: 3 (NR)
First of two-semester sequence of courses providing mathematical background for many ECE courses taken in junior and senior years. Introduces methods of representing continuous time signals and systems, and interaction between signals and systems. Covers analysis of signals and systems via differential equations and transform methods; Laplace and Fourier transforms as convenient analysis tools; frequency response of systems; and stability of systems in time and frequency domains. Presents application examples from communications, circuits, control, and signal processing.

Prerequisite(s): C or better in ECE 201 or equivalent. Prerequisite enforced by registration system.

Corequisite(s): MATH 203, 214

Notes: Students cannot receive credit for both ECE 220 and BENG 220.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 2
When Offered: Fall, Spring

ECE 280 - Electric Circuit Analysis

Credits: 5 (NR)
Includes circuit analysis using superposition, equivalent circuits, and transient and steady-state analysis of RL, RC, and RLC circuits; applications of Laplace transform in circuit analysis; sinusoidal excitations and phasors; resonance; filters; AC steady-state analysis; coupled coils; and three-phase circuits. Includes lab demonstrating and investigating circuit analysis concepts.

Prerequisite(s): Grade of C or better in PHYS 260 and 261. Prerequisite enforced by registration system.

Corequisite(s): ECE 220 must be taken concurrently or before ECE 280.

Notes: Builds on simple circuit concepts introduced in PHYS 260.

Hours of Lecture or Seminar per week: 4
Hours of Lab or Studio per week: 3
When Offered: Fall, Spring

ECE 285 - Electric Circuit Analysis I

Credits: 3 (NR)
Covers the first half of electric circuit theory and practice. Topics include DC analysis of circuits including Ohm's and Kirchhoff's laws, Thevenin and Norton equivalents, and analysis of circuits with resistors, capacitors, inductors, and operational amplifiers. Includes lab experiments to reinforce topics covered in the course.

Prerequisite(s): PHYS 260 and 261. Prerequisite enforced by registration system.

Corequisite(s): MATH 214 and ECE 220.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 2
When Offered: Fall, Spring

ECE 286 - Electric Circuit Analysis II

Credits: 3 (NR)
Covers the second half of electric circuit theory and practice. Topics include AC analysis of circuits including phasors, frequency response, power analysis, and transformers. Includes a project and lab experiments to reinforce topics covered in the course.

Prerequisite(s): ECE 285, MATH 214 and ECE 220. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 2
When Offered: Fall, Spring

ECE 301 - Digital Electronics

Credits: 3 (NR)
Introduces digital systems, circuits, and computers. Topics include binary systems and codes, digital logic gates and circuits, microelectronics and integrated circuits, coding and multiplexing, multivibrators, shift registers, counters, A/D converters, and elementary computer architecture.

Prerequisite(s): Grade of C or better in MATH 125 or MATH 112.

Notes: Not intended for those majoring in electrical or computer engineering.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 2
When Offered: Fall, Spring
ECE 305 - Electromagnetic Theory

Credits: 3 (NR)
Static and time varying electric and magnetic fields, dielectrics, magnetization, Maxwell's Equations, and introduction to transmission lines. Course uses vector calculus and algebra of complex numbers.

Prerequisite(s): Grade of C or better in PHYS 260 and MATH 214. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

ECE 320 - Signals and Systems II

Credits: 3 (NR)
Second of two-semester sequence providing mathematical background for many ECE courses taken in junior, senior years. Provides methods of representing and analyzing discrete-time signals and systems. Studies effects of converting from continuous-time to discrete time, and presents Z-transform as convenient analysis tool. Emphasizes powerful concept of frequency response of systems developed in first semester. Presents application examples from communications, circuits, control, and signal processing.

Prerequisite(s): Grade of C or better in ECE 220 and MATH 203. Prerequisite enforced by registration system.

Notes: Students cannot receive credit for both ECE 320 and BENG 320.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

ECE 331 - Digital System Design

Credits: 3 (NR)
Covers principles of digital logic and digital system design and implementation in VHDL. Topics include number systems; Boolean algebra; analysis, design, and minimization of combinational logic circuits; analysis and design of synchronous and asynchronous finite state machines; and introduction to VHDL and behavioral modeling of combinational and sequential circuits.

Prerequisite(s): Grade of C or better in PHYS 260 and PHYS 261. Prerequisite enforced by registration system.

Corequisite(s): ECE 332.

Notes: ECE 332 should be taken concurrently with ECE 331. Credit may not be received for ECE 301 and 331.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring
ECE 332 - Digital Electronics and Logic Design Lab

Credits: 1 (NR)
Lab associated with ECE 331.

Prerequisite(s): PHYS 261 or 265, or permission of instructor Prerequisite enforced by registration system.

Corequisite(s): ECE 331.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 3
When Offered: Fall, Spring

ECE 333 - Linear Electronics I

Credits: 3 (NR)
Principles of operation and application of electron devices and linear circuits. Topics include semiconductor properties, diodes, bipolar and field effect transistors, biasing, amplifiers, frequency response, operational amplifiers, and analog design.

Prerequisite(s): Grade of C or better in ECE 280 or ECE 285. Prerequisite enforced by registration system.

Corequisite(s): ECE 286 (required only if ECE 285 is taken).

Notes: ECE 334 is usually taken concurrently with ECE 333.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring, Summer

ECE 334 - Linear Electronics Lab I

Credits: 1 (NR)
Lab associated with ECE 333.

Prerequisite(s): PHYS 261 or 265, or permission of instructor Prerequisite enforced by registration system.

Corequisite(s): ECE 333.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 3
When Offered: Fall, Spring

ECE 390 - Engineering Design and Fabrication

Credits: 3 (NR)
Project based course where students will design projects containing analog and digital components as well as mechanical parts.
Students will simulate, build, and test their projects.

Equivalent to BENG 390.

**Prerequisite(s):** Grade of C or better in BENG 380, or in ECE 280, or in ECE 285. Prerequisite enforced by registration system.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall

---

**ECE 392 - Engineering Design Studio**

Credits: 1 (RD)  
Identification and feasibility study of advanced engineering problems. Application of math, physics and engineering methods to challenging projects. Preliminary design, modeling, simulation and prototyping of projects. This course should be taken the semester preceding ECE/BENG 492.

Equivalent to BENG 392.

**Prerequisite(s):** 75 hours of completed coursework applicable to the EE, CpE, or BIOE degree and permission of instructor.

**Hours of Lecture or Seminar per week:** 1  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall, Spring

---

**ECE 410 - Principles of Discrete-Time Signal Processing**

Credits: 3 (NR)  
Introduces fundamental concepts of digital signal processing. Emphasis on the theoretical and numerical tools used for frequency domain analysis of sampled signals. Topics covered include sampling, the discrete Fourier transform, fast transform algorithms, spectral analysis, and digital filtering.

**Prerequisite(s):** ECE 320 with grade of C or better. Prerequisite enforced by registration system.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**ECE 421 - Classical Systems and Control Theory**

Credits: 3 (NR)  
Introduces analysis and synthesis of feedback systems, including functional description of linear and nonlinear systems, block diagrams and signal flow graphs; state-space representation of dynamical systems, frequency response methods, Root Locus, Nyquist, and other stability criteria; performance indices and error criteria; and applications to mechanical and electromechanical control systems.

Equivalent to SYST 421
Prerequisite(s): Grade of C or better in ECE 220. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0  
When Offered: Fall, Spring

ECE 422 - Digital Control Systems

Credits: 3 (NR)  
Introduces analysis, design of digital control systems, Z-transform, discrete linear systems, frequency domain, and state variable techniques. Discusses use of microcomputers in control systems.

Prerequisite(s): Grade of C or better in ECE 320 and 421. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0  
When Offered: Spring

ECE 429 - Control Systems Lab

Credits: 1 (NR)  
Laboratory experiments for topics in control systems analysis, design, and implementation with emphasis on using microcomputers.

Prerequisite(s): Grade of C or better in ECE 421. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 1-6  
Hours of Lab or Studio per week: 3  
When Offered: Spring

ECE 430 - Principles of Semiconductor Devices

Credits: 3 (NR)  
Introduces solid-state physics and its application to semiconductors and semiconductor devices. Topics include band theory, doping, p-n junctions, diffusion theory, low-frequency circuits, devices including bipolar transistor, MOSFET, CMOS, and photo transistors.

Prerequisite(s): Grade of C or better in ECE 333, ECE 305 and MATH 214. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0  
When Offered: Fall

ECE 431 - Digital Circuit Design
Credits: 3 (NR)
Analysis and design of discrete and integrated switching circuits. Topics include transient characteristics of diodes, bipolar, and field-effect transistors; MOS and bipolar inverters; nonregenerative and regenerative circuits; TTL, ECL, IIL, NMOS, and CMOS technologies; semiconductor memories; VLSI design principles; and SPICE circuit analysis.

Prerequisite(s): Grade of C or better in ECE 331 and 333. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

ECE 433 - Linear Electronics II

Credits: 3 (NR)
Second course in linear electronics. Covers differential amplifiers, feedback circuits, power amplifiers, feedback amplifier frequency response, analog integrated circuits, operational amplifier systems, oscillators, wide band and microwave amplifiers, and computer-aided design.

Prerequisite(s): Grade of C or better in ECE 333. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

ECE 434 - Linear Electronics II Laboratory

Credits: 1 (NR)
Second lab course in linear electronics involving analysis and design of topics listed in ECE 433.

Prerequisite(s): ECE 334 Prerequisite enforced by registration system.

Corequisite(s): ECE 433.

Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 3
When Offered: Fall, Spring

ECE 435 - Digital Circuit Design Laboratory

Credits: 1 (NR)
Lab experiments for topics covered in ECE 431.

Prerequisite(s): ECE 334. Prerequisite enforced by registration system.

Corequisite(s): ECE 431.

Hours of Lecture or Seminar per week: 1-6
ECE 437 - Principles of Microelectronic Device Fabrication

Credits: 3 (NR)
Introduces fundamentals of microelectronic semiconductor device fabrication technology. Processing steps include photolithography, oxidation, diffusion, ion implantation, chemical vapor deposition, ohmic contact metalization, interconnects, packaging, MOS process integration, and bipolar process integration. Laboratory project integral to course.

Prerequisite(s): Grade of C or better in ECE 333 or 430. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 3

ECE 445 - Computer Organization

Credits: 3 (NR)
General overview of operating a digital computer. Topics include computer arithmetic, arithmetic unit, hardwired and microprogrammed control, memory, register-to-register, input-output operations, and behavioral modeling of computer organization using VHDL.

Prerequisite(s): Grade of C or better in ECE 331 and ECE 332 and in either CS 262 or CS 222. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring, Summer

ECE 446 - Device Driver Development

Credits: 3 (NR)
Addresses device driver and kernel level software programming and development. The C programming language and program trouble shooting are reviewed. Basics of device driver software, Character driver operations and data structures, concurrency and race conditions, kernel timers, memory allocation, communications with hardware, interrupt handling, kernel data types, memory mapping and Direct Memory Access concepts are explored.

Prerequisite(s): C or better in ECE 445. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall.

ECE 447 - Single-Chip Microcomputers
Credits: 4 (NR)
Explores designing with single-chip microcomputers and microcomputer interfacing. Topics include role of microcomputers compared with microprocessors and other computers, microcomputer architecture and organization, real-time control issues, assembly language programming for control, design of control software, input/output methods, design tools, and available single-chip microcomputers. Students select project and design, and construct system including single-chip microcomputer and ancillary hardware to implement control system.

Fulfills Mason Core requirement in synthesis.

Prerequisite(s): Grade of C or better in ECE 445 and in either CS 367 or CS 222. Prerequisite enforced by registration system.

Notes: This course is highly recommended for ECE 492/493 students interested in using microcontroller technology in their senior design projects. It should be taken before ECE 493.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 3
When Offered: Fall, Spring

ECE 448 - FPGA and ASIC Design with VHDL

Credits: 4 (NR)
Practical introduction to modeling of digital systems with VHDL for logic synthesis. Overview and comparative analysis of design flow and tools for FPGAs and standard-cell ASICs. Discusses verification of digital systems using testbenches, prototyping boards and modern testing equipment, and illustrates VHDL-based design methodology with multiple examples from communications, control, DSP, and cryptography. Laboratory experiments create link between simulation and actual hardware implementation based on FPGA boards.

Prerequisite(s): Grade of C or better in ECE 445. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 3
When Offered: Spring

ECE 450 - Introduction to Robotics

Credits: 3 (NR)
Introduces mobile robotic systems. Topics include overview of power systems, motors, behavior-based programming, sensors, and sensor integration. Design projects conceived, developed, implemented, and presented.

Prerequisite(s): CS 112, ECE 280, ECE 331 and either ECE 332 or ECE 301, all with grade of C or better.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

ECE 460 - Communication and Information Theory
Credits: 3 (NR)
Introduction to analog and digital communications. Topics include review of important concepts from signals and systems theory and probability theory; Gaussian processes and power spectral density; digital transmission through additive white Gaussian channels; sampling and pulse code modulation; analog signal transmission and reception using amplitude, frequency and phase modulation; and affects of noise on analog communication systems.

Prerequisite(s): Grade of C or better in ECE 220 and STAT 346. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

ECE 461 - Communication Engineering Laboratory

Credits: 1 (NR)
Lab experiments in analog and digital communication areas covered in ECE 460.

Prerequisite(s): ECE 460 and 334. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 1-12
Hours of Lab or Studio per week: 3
When Offered: Fall, Spring

ECE 462 - Data and Computer Communications

Credits: 3 (NR)
Introduces modern data communications and computer networks. Topics include point-to-point communication links and transmission of digital information, modems, and codecs; packet switching, multiplexing, and concentrator design; multiaccess and broadcasting; local area and wide area networks; architectures and protocols for computer networks; OSI reference model and seven layers; physical interfaces and protocols; and data link control layer and network layer. Provides examples of data networks.

Prerequisite(s): STAT 344 or 346, and ECE 220, and ECE 331 or 303, all with grade of C or better. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

ECE 463 - Digital Communications Systems

Credits: 3 (NR)
Introduces digital transmission systems. Topics include quantization, digital coding of analog waveforms, PCM, DPCM, DM, baseband transmission, digital modulation schemes, ASK, FSK, PSK, MSK, QAM, pulse shaping, intersymbol interference, partial response, voice-band and wideband modems, digital cable systems, regenerative repeaters, clock recovery and jitter, multipath fading, digital radio design, optimal receiver design, MAP receiver, and probability of error.
Prerequisite(s): ECE 460. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring

ECE 465 - Computer Networking Protocols

Credits: 3 (NR)
Introduces computer networking protocols and concepts, emphasizing Internet and Internet Protocol Suite. Covers computer networking protocols at application, transport, and network layers, including multimedia networking protocols, and network security and management.

Prerequisite(s): STAT 346 or STAT 344, and CS 112, both with a grade of C or better. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

ECE 467 - Network Implementation Laboratory

Credits: 1 (NR)
Hands-on experience in implementing, configuring, and operating local and wide area networks in live laboratory environment equipped with modern local and wide area network devices and technologies. Students exposed to real-world computer networking scenarios including local area network implementation, asynchronous communication setup, and wide area network implementation using various protocols and technologies covering all layers of computer network protocol stack.

Prerequisite(s): ECE 462. Prerequisite enforced by registration system.

Corequisite(s): ECE 465.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 3
When Offered: Fall, Spring

ECE 469 - Microwave Circuit Laboratory

Credits: 1 (NR)
Introduces microwave engineering laboratory techniques and measurements, and the design, fabrication, and test of microwave microstrip circuits.

Prerequisite(s): ECE 305 and 334.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 2
ECE 491 - Engineering Seminar

Credits: 1 (NR)
Engineering ethics, professionalism, role of engineer in society, current topics, and employment opportunities.

Equivalent to BENG 491

Prerequisite(s): 90 credits applicable to electrical engineering or computer engineering program, and COMM 100. Prerequisite enforced by registration system.

Notes: Students cannot receive credit for both ECE 491 and BENG 491.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

ECE 492 - Senior Advanced Design Project I

Credits: 1 (NR)

Conception of senior design project and determination of feasibility of proposed project. Work includes developing preliminary design and implementation plan. Students planning to use microcontroller technology in their projects should enroll in ECE 447 before taking ECE 493.

Fulfills Mason Core requirement in synthesis.

Prerequisite(s): 90 credits applicable to electrical engineering or computer engineering program and COMM 100 and ENGH 302. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

ECE 493 - Senior Advanced Design Project II

Credits: 2 (NR)

Implementation of project for which preliminary work was done in ECE 492. Project includes designing and constructing hardware, writing required software, conducting experiments or studies, and testing complete system. Requires oral and written reports during project and at completion.

Fulfills Mason Core requirement in synthesis.
Designated as a research and scholarship intensive course.

Prerequisite(s): ECE 492, preferably in preceding semester. Prerequisite enforced by registration system.

Notes: Students planning to use microcontroller technology in their projects should enroll in ECE 447 before taking ECE 493.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

ECE 498 - Independent Study in Electrical and Computer Engineering

Credits: 1-3 (RT)
Directed self-study of special topics of current interest in ECE. Topic must be arranged with an instructor and approved by department chair before registering.

Notes: Maximum 3 credits.

Hours of Lecture or Seminar per week: 1-9
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

ECE 499 - Special Topics in Electrical Engineering

Credits: 0-4 (RT)
Topics of special interest to undergraduates.

Prerequisite(s): Permission of instructor; specific prerequisites vary with nature of topic.

Notes: May be repeated for maximum of 6 credits if topics substantially different.

Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

ECE 507 - Seminar in Emerging Technologies

Credits: 3 (NR)
Study of emerging technologies, how they are identified, how they evolve, actions which may encourage or stifle their growth, government influences, societal influences, examples of success and failure, and some lessons to be learned which are unique to government information technology. Topics covered will include a general introduction to emerging technologies, with emphasis on IT, discussion of difficulty in letting go of legacy systems, the DOD Global Information Grid, Cyberwarfare, Complex Adaptive Systems, and Federal Government support of Research and Development. Cannot be used in the PhD IT program.

Prerequisite(s): Graduate Standing.

Hours of Lecture or Seminar per week: 3
ECE 510 - Real-Time Concepts

Credits: 3 (NR)
Presents design methodology, principles and practice for the development of real-time embedded systems and their application to robotics, mechatronics, sensing, signal processing, and control. Topics include system decomposition, multi-tasking, task communication and synchronization, system modeling, time analysis, principles of filter and controller implementation, 'fuzzy' engineering, and multi-microcontroller systems.

Prerequisite(s): ECE 450 or ECE 447 or permission of instructor.

ECE 511 - Microprocessors

Credits: 3 (NR)
Introduces microprocessor software and hardware architecture. Includes fundamentals of microprocessor system integration, instruction set design, programming memory interfacing, input/output, direct memory access, interrupt interfacing, and microprocessor architecture evolution. Studies Intel family of microprocessors, and reviews other microprocessor families and design trends.

Prerequisite(s): ECE 445 or equivalent.

ECE 513 - Applied Electromagnetic Theory

Credits: 3 (NR)
Maxwell's Equations, electromagnetic wave propagation, wave guides, transmission lines, radiation, and antennas.

Prerequisite(s): ECE 305 or equivalent.

ECE 520 - Applications of Analog and Digital Integrated Circuits

Credits: 3 (NR)
Studies analog and digital integrated circuits mainly from communications applications point of view. Covers analog, digital, and mixed (analog/digital) building block circuits used in system design including operational amplifiers, comparators, voltage regulators, video amplifiers, oscillators, modulators, phaselocked loops, multiplexers, active filters, A/D and D/A converters, and optoelectronic circuits.
Prerequisite(s): ECE 433 and 431, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**ECE 521 - Modern Systems Theory**

Credits: 3 (NR)
Introduces linear systems theory and design of linear feedback control systems. Reviews linear algebra, state variables, state-space description of dynamic systems, analysis of continuous-time and discrete-time linear systems, controllability and observability of linear systems, and stability theory.

Prerequisite(s): ECE 421.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**ECE 524 - Process Control Fundamentals**

Credits: 3 (NR)
Provides fundamentals of process control methodologies that are applicable in manufacturing industries, such as semiconductor manufacturing. Introduces the basic concepts of controlled processes equipped with digital control loops, starting with basic discrete-time models, deterministic and random signals and parameter estimation. Provides exposition of fundamentals and applications of feedback control principles, self-tuning control, run-to-run control and system diagnostics.

Prerequisite(s): Graduate standing.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**ECE 525 - Hardware/Software Integration**

Credits: 3 (NR)
Provides fundamentals of modern computer system and hardware/software integration through the use of quantitative approaches, cost-performance-power tradeoffs, and engineering designs. Introduces design considerations where hardware and software interlock with each other. Course topics include quantitative computer design, exploitation of hardware and software parallelism at instruction-, multiprocessor-, and thread-level, memory hierarchy, storage system, interconnection network, and embedded system design.

Prerequisite(s): Graduate standing

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
ECE 528 - Introduction to Random Processes in Electrical and Computer Engineering

Credits: 3 (NR)
Probability and random processes are fundamental to communications, control, signal processing, and computer networks. Provides basic theory and important applications. Topics include probability concepts and axioms; stationarity and ergodicity; random variables and their functions; vectors; expectation and variance; conditional expectation; moment-generating and characteristic functions; random processes such as white noise and Gaussian; autocorrelation and power spectral density; linear filtering of random processes, and basic ideas of estimation and detection.

Prerequisite(s): ECE 220 and STAT 346, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ECE 530 - Sensor Engineering

Credits: 3 (NR)
Presents the fundamentals of sensor characteristics and transfer functions, sensor circuits and interfacing, sensor noise, and protection methods. Studies of different methods used in sensing position, motion, acceleration, force, humidity, temperature, chemicals, etc. are developed, followed by an analysis of specific sensor designs.

Prerequisite(s): Graduate Standing, or permission from instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring.

ECE 531 - Introduction to Wireless Communications and Networks

Credits: 3 (NR)
Presents the basics of modern wireless communications and wireless networking at the first-year graduate level. Topics include wireless signal design, channel characterization, receiver structure, multiple access technologies, cellular concepts, capacity enlargement, mobility management, and wireless/wireless interworking.

Prerequisite(s): ECE 460 or equivalent

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

ECE 535 - Digital Signal Processing

Credits: 3 (NR)
Representation analysis and design of digital signals and systems. Covers sampling and quantization, z-transform and discrete Fourier transform, digital filter realizations, design techniques for recursive and non-recursive filters, fast Fourier transform algorithms, and spectral analysis. Additional topics may include adaptive filtering, homomorphic digital signal processing, digital
interpolation and decimation.

Prerequisite(s): ECE 320 and STAT 346.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

**ECE 537 - Introduction to Digital Image Processing (DIP)**

Credits: 3 (NR)
First course in digital-image processing; introduces scanning systems, focal plane array detectors, data acquisition methods, display hardware, image preprocessing algorithms, feature extraction, and basic image processing methods. Semester-long image processing project includes utilizing modern image processing system prototyping software.

Prerequisite(s): Graduate standing.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**ECE 538 - Medical Imaging**

Credits: 3 (NR)
Provides an introduction to the physical, mathematical and engineering foundations of modern medical imaging systems, medical image processing and analysis methods. In addition, this course introduces engineering students to clinical applications of medical imaging. The emphasis is on diagnostic ultrasound and magnetic resonance imaging methods, although several other modalities are covered. The course also provides an overview of recent developments and future trends in the field of medical imaging, discusses some of the challenges and controversies, and involves hands-on experience applying the methods learned in class to real-world problems.

Equivalent to BENG 538

Prerequisite(s): Graduate Standing or permission of instructor; ECE 320 or equivalent; PHYS 262 or equivalent.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

**ECE 540 - Modern Telecommunications**

Credits: 3 (NR)
Comprehensive overview of telecommunications including current status and future directions. Topics include review of evolution of telecommunications; voice and data services; basics of signals and noise, digital transmission, network architecture, and protocols; local area, metropolitan, and wide area networks and narrowband ISDN; asynchronous transfer mode and broadband ISDN; and satellite systems, optical communications, cellular radio, personal communication systems, and multimedia services. Uses examples of real-life networks to illustrate concepts and gain insight.
Equivalent to TCOM 500

**Prerequisite(s):** Graduate standing

**Notes:** For students outside of the program. Cannot be applied toward degrees in electrical or computer engineering.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

### ECE 541 - Computer Architectures - A Survey

Credits: 3 (NR)  
Survey of computer architectures. Covers basic concepts, definitions, single and multiple processor machines, multicore processors, parallel processing, pipelining, instruction level parallelism (ILP), simultaneous multithreading (SMT), and current trends in computer architectures. Course designed for MS AIT students. Cannot be used for credit in MSCpE or MSEE.

**Prerequisite(s):** IT 212 or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

### ECE 542 - Computer Network Architectures and Protocols

Credits: 3 (NR)  
Introduction to architectures and protocols of computer networks and concept of packet switching. Topics include ISO standard layer model, physical interfaces and protocols, data link control, multiaccess techniques, packet switching, routing and flow control, network topology, data communication subsystems, error control coding, local area network, satellite packet broadcasting, packet radio, interconnection of packet-switching networks, network security and privacy, and various examples of computer networks.

**Prerequisite(s):** STAT 344 or equivalent, and graduate standing in VSITE.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall, Spring, Summer

### ECE 545 - Digital System Design with VHDL

Credits: 3 (NR)  
Introduction to the design of complex digital systems using hardware description languages. Emphasizes the design methodology based on the partitioning of a digital system into a datapath and control unit. Introduces a clear sequence of steps leading from specification to synthesizable, register transfer level (RTL), and fully verified HDL code. Covers VHDL for digital circuit design, including dataflow, structural, and behavioral coding styles. Introduces and illustrates the concepts of VHDL simulation, verification, synthesis, mapping, placing, routing, timing analysis and performance optimization. Requires semester long project devoted to the design of a complex digital system using VHDL as a hardware description language and FPGA as an implementation platform.
Prerequisite(s): Graduate standing.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ECE 548 - Sequential Machine Theory

Credits: 3 (NR)
Theoretical study of sequential machines. Topics include sets, relations and lattices, switching algebra, functional decomposition, iterative networks, representation, minimization and transformation of sequential machines, state identification, state recognizers, and linear and stochastic sequential machines.

Prerequisite(s): ECE 331, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring

ECE 565 - Introduction to Optical Electronics

Credits: 3 (NR)
Introduces optoelectronic devices for generation, detection, and modulation of light. Topics include electro-optic modulators, gas, solid state and semiconductor lasers, photodetectors, and detector arrays.

Prerequisite(s): ECE 305 and 333.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ECE 567 - Optical Fiber Communications

Credits: 3 (NR)
Studies components and integration of fiber-optic transmission systems. Topics include optical fibers, signal degradation, optical sources, power launching and coupling, photodetectors, receiver circuits, link analysis, and optical measurements.

Prerequisite(s): ECE 565 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ECE 568 - Introduction to Imaging Sensors

Credits: 3 (NR)
Imaging sensors are being used extensively in defense, homeland security, biomedical, scientific and consumer applications. This
course provides introduction to the operating principles of the front-end optics and sensor technologies. In addition to the familiar cameras, the course will also discuss advanced microscopy, 3D medical imaging (tomography, MRI) and radar-imaging systems.

Prerequisite(s): Graduate status or permission of instructor.

Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0

ECE 584 - Semiconductor Device Fundamentals

Credits: 3 (NR)
Studies principals of operation of semiconductor devices based on solid state physics. Topics include band theory of solids, intrinsic and extrinsic semiconductor properties, pn junction diode, bipolar junction transistor, Schottky diode, metal insulator semiconductor junctions, field-effect transistors, and hetero-structures.

Prerequisite(s): ECE 430 or permission of instructor.

Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0  
When Offered: Fall

ECE 586 - Digital Integrated Circuits

Credits: 3 (NR)
Studies design and analysis of digital integrated circuits, emphasizing CMOS technology. Reviews MOSFET operation and SPICE modeling. Covers analysis and design of basic inverter circuits, structure and operation of combinational and sequential logic gates, dynamic logic circuits, chip I/O circuits, and brief introduction to VLSI methodologies.

Prerequisite(s): ECE 331 and 430, or permission of instructor.

Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0  
When Offered: Fall

ECE 587 - Design of Analog Integrated Circuits

Credits: 3 (NR)
Studies design methodologies of CMOS-based analog integrated circuits. Topics include differential amplifiers, current sources, output stages, operational amplifiers, comparators, frequency response, noise, and computer-aided design.

Prerequisite(s): ECE 333 and 430, or permission of instructor.

Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0  
When Offered: Fall
ECE 590 - Selected Topics in Engineering

Credits: 3 (RT)
Selected topics from recent developments, and applications in various engineering disciplines. Designed to help professional engineering community keep abreast of current developments.

Prerequisite(s): Graduate standing or permission of department.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ECE 611 - Advanced Microprocessors

Credits: 3 (NR)
Covers principles of advanced 32-bit and 64-bit microprocessors. Includes microprocessor structure and architecture, pipeline hazards, instruction-level parallelism, superscalar and superpipelined execution, thread-level parallelism; and RISC principles and advantages. Offers examples of RISC-type microprocessors. Studies in detail Intel IA-32, Intel and HP IA-64, and Motorola M68000 families.

Prerequisite(s): ECE 511 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ECE 612 - Real-Time Embedded Systems

Credits: 3 (NR)
Study of real-time operating systems and device drivers for embedded computers. Emphasizes microprocessor systems and associated input device sampling strategies, including interrupt driven and polled I/O. Covers basic input/output operations, analog to digital conversion methods, I/O programming techniques and process, and communication control methodologies. Involves design project.

Prerequisite(s): ECE 511 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ECE 620 - Optimal Control Theory

Credits: 3 (NR)
Detailed treatment of optimal control theory and its applications. Topics include system dynamics and performance criteria, calculus of variations and Pontryagin's minimum principle, computational methods in optimal control, and applications of optimal control.

Prerequisite(s): ECE 521 or permission of instructor.
ECE 621 - Systems Identification

Credits: 3 (NR)

Prerequisite(s): ECE 521 and 528, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ECE 624 - Control Systems

Credits: 3 (NR)
Analysis, design, and implementation of digital feedback control systems. Topics include discrete-time models, pole-placement, controller design methods, MIMO system decoupling, and observer design.

Prerequisite(s): ECE 421 and 521, or permission of instructor.

Notes: Course may include simulation and design project.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ECE 630 - Statistical Communication Theory

Credits: 3 (NR)
Introduces optimum receiver design in the additive white Gaussian noise environment. Topics include efficient signal set design, modulation techniques, matched filter, correlation detector, coherent and noncoherent detections, fading and diversity channels, random amplitude and phase, diversity techniques, performance bounds of communications, and waveform communications.

Prerequisite(s): ECE 528.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ECE 633 - Coding Theory
Mathematics of coding groups, rings, and fields, and polynomial algebra. Topics include linear block codes, generator and parity check matrices; error syndromes, binary cyclic and convolutional codes; and implementation of encoders and decoders.

**Prerequisite(s):** ECE 528 or permission of instructor

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**ECE 635 - Adaptive Signal Processing**

Credits: 3 (NR)  
Introduces adaptive systems and adaptive signal processing. Topics include correlation functions and matrices; performance functions; search of minimum; steepest descent and Newton algorithms; least mean squares algorithm; noise perturbed search and misadjustment; sequential regression algorithm and convergence issues; recursive least squares algorithm and forgetting factor; frequency domain algorithms; adaptive equalization; pseudorandom binary sequences and system identification; adaptive interference cancellation; and adaptive beam forming and arrays. Simulates adaptive algorithms.

**Prerequisite(s):** ECE 528.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**ECE 638 - Fast Algorithms and Architectures for Digital Signal Processing**

Credits: 3 (NR)  
Studies recent advances in development of signal processing algorithms and relevant computational architectures. Topics include fast polynomial transforms, Winograd's algorithms, multirate processing of digital signals, spectral estimation, adaptive filtering, and wavelet transforms.

Equivalent to IT 838

**Prerequisite(s):** ECE 535 or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**ECE 641 - Computer System Architecture**

Credits: 3 (NR)  
Advanced course in computer architecture. Covers definitions, multiple processors, VLSI architecture, data flow, computation, semantic gap, high-level language architecture, object-oriented design, RISC architecture, and current trends in computer architecture.

**Prerequisite(s):** ECE 511 or permission of instructor.
ECE 642 - Design and Analysis of Computer Communication Networks

Credits: 3 (NR)
Introduces queuing theory. Other topics include concentrator design, multiplexing, capacity assignments, random access schemes, polling and probing techniques, topology design, flow control and routing, packet radio, protocol specification, and validation.

Prerequisite(s): ECE 542 and 528, or equivalent.

ECE 643 - Network Switching and Routing

Credits: 3 (NR)
Fundamentals of switching and routing with application to communications networks, both wireline and wireless. Topics include concepts of space and time for switching and forwarding of data, scalability and performance, label swapping, algorithms for routing and path computation, constrained route optimization, traffic theory, control and signaling, and traffic engineering. The course also covers the concepts and issues underlying the design and implementation of the contemporary switched networks.

Prerequisite(s): ECE 528 and 542

ECE 644 - Architectures and Algorithms for Image Processing

Credits: 3 (NR)
Architectures and algorithms to analyze and process pictorial information. Topics include systems and techniques for digital representation of images; image scanning methods and their applications; picture processing languages; image data structures; feature detection, extraction, and reconstruction; detection of symmetries; systems and methods for regular decomposition; image desegmentation; object thinning; real-time orthogonal transformations; and applications. Includes design project.

Prerequisite(s): ECE 511 and 537, or equivalent.

ECE 645 - Computer Arithmetic
Credits: 3 (NR)
Covers computer arithmetic as applied to the design of general-purpose microprocessors and application-specific integrated circuits for cryptography, coding, and digital signal processing. Focuses on efficient implementations of all basic arithmetic operations in three major domains: integers, real numbers, and elements of Galois Fields GF(2^n). Illustrates tradeoffs among various hardware algorithms and architectures depending on primary optimization criteria, such as speed, area, and power consumption. Demonstrates the use of software implementations as a source of test vectors for verification of hardware implementations and for evaluating hardware versus software speed-up.

Prerequisite(s): ECE 545 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ECE 646 - Cryptography and Computer Network Security

Credits: 3 (NR)
Topics include need for security services in computer networks, basic concepts of cryptology, historical ciphers, modern symmetric ciphers, public key cryptography (RSA, elliptic curve cryptosystems), efficient hardware and software implementations of cryptographic primitives, requirements for implementation of cryptographic modules, data integrity and authentication, digital signature schemes, key exchange and key management, standard protocols for secure mail, the web and electronic payments, security aspects of mobile communications, key escrow schemes, zero-knowledge identification schemes, smart cards, quantum cryptography, and quantum computing.

Prerequisite(s): ECE 542 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ECE 650 - Robotics

Credits: 3 (NR)
Introduces robotics and advanced automation from electrical engineering standpoint. Topics include hardware overview; coordinate systems and manipulator kinematics; differential motion and inverse Jacobian; manipulator path control and motion planning; design and control of articulated hands; sensory feedback; machine vision; and applications to industrial automation.

Prerequisite(s): ECE 521 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ECE 652 - Mobile Robots

Credits: 3 (NR)
Treats kinematic modeling of mobile robots with wheels, steering control, navigation and remote sensing. GPS as well as inertial navigation discussed. Kalman filtering applied to state estimation of robot position and attitude and also applied to estimation of the location of detected objects. Target tracking is developed for repeated observations of a detected object as well as simultaneous tracking of multiple objects.
Prerequisite(s): ECE 521 and ECE 528 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring.

ECE 665 - Fourier Optics and Holography

Credits: 3 (NR)
Studies optical systems for processing temporal signals as well as images. Topics include use of coherent optical systems for image processing and pattern recognition, principles of holography, and acousto-optic systems for radar-signal-processing optical computers.

Prerequisite(s): ECE 565.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ECE 670 - Principles of C4I

Credits: 3 (NR)
Provides broad introduction to fundamental principles of command, control, communication, computing, and intelligence (C4I). Applies principles, techniques to wide range of civilian and military situations. Discusses modeling, simulation of combat operations; studies sensing, fusion, and situation assessment processes. Derives optimal decision-making rules. Discusses concepts of C4I architectures and tools to evaluate and design systems such as queuing theory.

Prerequisite(s): ECE 528 or SYST 611 or OR 542, or equivalent.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ECE 672 - Introduction to Architecture-Based Systems Engineering

Credits: 3 (NR)
Explores life cycles in systems engineering and human, organizational, process, and technological basis for systems integration and architecting. Includes societal and cultural basis; conceptual frameworks; structure, function, and purpose; risk management; user requirements and functional specifications; bid and proposal process; System of Systems issues; systems management; increasing returns to scale, network effects, and path dependency issues; and evolutionary systems.

Equivalent to SYST 619

Prerequisite(s): SYST 510 or SYST 520 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
ECE 673 - Discrete Event Systems

Credits: 3 (NR)
Introduces modeling and analysis of discrete event dynamical systems. Covers elements of discrete mathematics, and focuses on Petri Net Models and their basic properties: locality and concurrency, condition and event systems, place and transition nets, Colored Petri Nets, reachability graphs (occurrence nets), and invariant analysis. Includes issues in Petri Nets and temporal logic; stochastic Petri Nets; relation to other discrete event models of dynamical systems; and applications of the theory to modeling and simulation and systems engineering problems, especially in systems architecting.

Equivalent to SYST 620

Prerequisite(s): ECE 521, or SYST 611 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ECE 674 - Systems Architecture Design

Credits: 3 (NR)
Intensive study of relationships of different types of architecture representations and methodologies to obtain them. Uses approaches based on systems engineering constructs, such as structured analysis and software engineering constructs, including object orientation, to develop architecture representations and derive executable model of information architecture. Executable model is then used for behavior analysis and performance evaluation. Discusses roles of systems architect and engineer. Uses examples from current practice including C4ISR architectures.

Equivalent to SYST 621

Prerequisite(s): SYST 619/ECE 672 and SYST 620/ECE 673 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ECE 675 - System Integration and Service Oriented Architectures

Credits: 3 (NR)
Explores human, organizational, societal, cultural, and technological aspects of system integration problem. Includes role of architectures in systems integration, and integration in System of Systems and Federation of Systems. Evaluates architectures; measures performance and effectiveness; analyzes alternative architecture and integration strategies; and assesses system capabilities.

Equivalent to SYST 622.

Prerequisite(s): ECE 674 or SYST 621.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
ECE 678 - Systems Engineering of Information Architectures

Credits: 3 (NR)
An intensive study of the relationships between different types of architecture representations and the methodologies used to obtain them. Approaches based on systems and software engineering constructs, such as object orientation and structured analysis are used to develop architecture representations or views. The roles of the systems architect and the systems engineer are discussed. The function of an executable model of the information architecture in deriving requirements is presented. Examples from current practice including C4ISR architectures are included.

Equivalent to SYST 631

Prerequisite(s): SYST 520 and SYST 619 or ECE 672.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ECE 680 - Physical VLSI Design

Credits: 3 (NR)
Introduces NMOS, CMOS, and BiMOS integrated circuit technology and fabrication. Reviews MOS and BiCMOS inverter structures and operation, MOS and BiCMOS circuit design processes, MOS layers, stick diagrams, design rules, and layout. Covers subsystem design and layout illustration of design process through design of 4bit arithmetic processor and its parts, adder, multiplier, register, and memory cells; and aspects of system timing, test and testability. Reviews currently available VLSI CAS tools.

Prerequisite(s): ECE 586 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ECE 681 - VLSI Design for ASICs

Credits: 3 (NR)
Introduces VLSI design of application-specific integrated circuits (ASICs) from front-end to back-end using HDL and modern design automation software. Covers simulation, synthesis of digital circuits using standard cells, static timing analysis, formal verification, power analysis, test generation/fault simulation, and physical design including floor planning, placement, routing, and design rule checking. Addresses deep submicron CMOS scaling issues and other advanced topics.

Prerequisite(s): ECE 545, or permission of instructor.

Corequisite(s): ECE 586

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
ECE 682 - VLSI Test Concepts

Credits: 3 (NR)
Broad introduction to basic concepts, techniques, and tools of modern VLSI testing. Fundamentals of defect modeling, fault simulation, design for testability, built-in self-test techniques, and failure analysis. Test economics, physical defects and fault modeling, automated test pattern generation, fault simulation, design for test, built-in self test, memory test, PLD test, mixed-signal test, Idq test, boundary scan and related standards, test synthesis, diagnosis and failure analysis, automated test equipment, embedded core test.

Prerequisite(s): ECE 586

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ECE 684 - MOS Device Electronics

Credits: 3 (NR)
Study of Metal Oxide Semiconductor (MOS)-based device theory, characteristics, models, and limitations. Topics include MOS capacitor, MOSFETs, CMOS, charge coupled devices, scaling, hot carrier effects, latchup, radiation effects, and isolation techniques.

Prerequisite(s): ECE 584 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ECE 685 - Nanoelectronics

Credits: 3 (NR)
Emphasizes the fundamental concepts and principles that govern the operation of nano-electronic devices (100 nm down to 1 nm.). Addresses basic device building blocks such as quantum dot (QD), single electron tunneling transistor (SETT), carbon nanotube (CNT), nanowire, etc. Considers the design and analysis of a variety of nano-devices ("quantum" or "mesoscopic" devices) and examine some notable applications.

Prerequisite(s): ECE 584

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

ECE 689 - VLSI Processing

Credits: 3 (NR)
In-depth study of various steps in silicon VLSI circuit processing. Includes thermal oxidation, diffusion, ion implantation, epitaxial growth, polysilicon, metal and insulator layer deposition, photolithography, and MOS processing integration. Involves hands-on laboratory projects and using process simulator SUPREM.
Prerequisite(s): ECE 584 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ECE 698 - Independent Reading and Research

Credits: 1-3 (RD)
Independent study under the supervision of a faculty member, resulting in an acceptable technical report. No more than a combined total of 3 credits may be taken towards satisfying the master’s degree, although students may register for more credits. No more than a combined total of 3 credits may be taken of ECE 698 and ECE 798 towards satisfying the master’s degree, although students may register for more credits. Students may not count both ECE 799 and ECE 698 for master’s credit.

Prerequisite(s): Graduate standing, completion of at least two core courses, and permission of instructor.

Notes: Requires written report. May be taken no more than twice for graduate credit.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ECE 699 - Advanced Topics in Electrical and Computer Engineering

Credits: 1-6 (RT)
Advanced topics of current interest in electrical and computer engineering. Topics chosen so they do not duplicate other courses in department. Active participation encouraged in form of writing and presenting papers in research areas.

Prerequisite(s): Permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ECE 721 - Nonlinear Systems

Credits: 3 (NR)
Includes motivating examples; analysis techniques include basic fixed-point theory, implicit function theorem, and dependence of trajectories on initial data and parameters. Also covers computational simulation techniques; stability theory including Lyapunov's direct method; nonlinear control systems of input-output and absolute stability; strong positive real transfer functions; feedback linearization of nonlinear systems; nonlinear canonical forms; nonlinear decoupling; sliding control; and applications to adaptive control, neural networks, and robotics.

Equivalent to IT 846

Prerequisite(s): ECE 620 or ECE 621.
ECE 722 - Kalman Filtering with Applications

Credits: 3 (NR)
Detailed treatment of Kalman Filtering Theory and its applications, including some aspects of stochastic control theory. Topics include state-space models with random inputs, optimum state estimation, filtering, prediction and smoothing of random signals with noisy measurements, all within the framework of Kalman filtering. Additional topics are nonlinear filtering problems, computational methods, and various applications such as global positioning system, tracking, system control, and others. Stochastic control problems include linear-quadratic-Gaussian problem and minimum-variance control.

Prerequisite(s): ECE 521 and 528 or equivalent, or permission of instructor.

ECE 727 - System Identification and Adaptive Control

Credits: 3 (NR)
Advanced treatment. Topics include identification algorithms, their convergence and accuracy, and computational aspects; model reference and self-tuning adaptive control, transients, stability, and robustness; and intelligent schemes to improve robustness. Students required to study literature and complete computer project.

Prerequisite(s): ECE 621, or permission of instructor.

ECE 728 - Random Processes in Electrical and Computer Engineering

Credits: 3 (NR)
Recommended for advanced master's and doctoral students. Provides background in random processes needed for pursuing graduate studies and research in statistical signal processing, communications, control, and computer networks. Covers probability spaces, random variables, Lebesque integration, conditional mean on a sigma field, convergence of random variables, limit and ergotic theorems, Markov processes, and Martingales.

Prerequisite(s): ECE 528 or permission of instructor.

ECE 731 - Digital Communications

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall
Credits: 3 (NR)
Digital transmission of voice, video, and data signals. Covers signal digitization, pulse code modulation, delta modulation, low bit-rate coding, multiplexing, synchronization, intersymbol interference, adaptive equalization, frequency spreading, encryption, transmission codes, digital transmission using bandwidth compression techniques, and satellite communications.

Prerequisite(s): ECE 630 or equivalent.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ECE 732 - Mobile Communication Systems

Credits: 3 (NR)
Topics include modeling of mobile communication channel, signal set and receiver design for mobile communication channel, access and mobility control, mobile network architectures, connection to fixed network, and signaling protocols for mobile communication systems. Examples of mobile communication systems are presented, including pan-European GSM, North American D-AMPS, and personal communication systems.

Prerequisite(s): ECE 542 and 630.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ECE 734 - Detection and Estimation Theory

Credits: 3 (NR)
Introduces detection and estimation theory with communication and radar and sonar applications. Topics include classical detection and estimation theory, detection of known signals in Gaussian noise, signal parameter and linear waveform estimation, and Wiener and Kalman filters.

Equivalent to IT 830

Prerequisite(s): ECE 528.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ECE 737 - Spread Spectrum Communications

Credits: 3 (NR)
Introduces spread spectrum communications. Topics include pseudo noise spread spectrum systems, feedback shift registers, jamming strategy, code acquisition, synchronization, tracking, gold codes, burst-communication systems, time-hopping, frequency hopping, and multiple access communications.

Equivalent to IT 932

Prerequisite(s): ECE 630.
ECE 738 - Advanced Digital Signal Processing

Credits: 3 (NR)
Theory and practice of advanced digital signal processing techniques. Topics may include efficient high-speed algorithms for convolution, correlation, orthogonal transforms, multirate processing of digital signals, multiresolution time-frequency and time-scale analysis of one- and two-dimensional signals, and multitaper spectral estimation.

Prerequisite(s): ECE 528 and ECE 535.

ECE 740 - Digital Signal Processing Hardware Architectures

Credits: 3 (NR)
Addresses topics that include high-level DSP optimizations, such as pipelining, unfolding, and parallel processing; common DSP structures such as FFTs, filters, direct digital frequency synthesizers, and correlators; modeling of DSP algorithms in MATLAB and conversion of MATLAB models into fixed-point VHDL blocks; platform implementation issues: hardware vs. software, FPGA vs. ASIC, power, area, throughput, and applications of DSP hardware.

Prerequisite(s): ECE 535 and ECE 545 or equivalents or permission of instructor.

ECE 741 - Wireless Networks

Credits: 3 (NR)
Theoretical foundation and practice in design of wireless networks. Emphasizes mobility and teletraffic modeling aspects, and networking issues and state-of-the-art performance evaluation methods of radio and system infrastructure applicable to wireless cellular and local networks. Topics include analysis of mobility, handoff, control traffic loading, resource allocation techniques, multiaccess protocols, admission policy and call control, network infrastructure and multilayer configuration, wireless LANs, and packet data systems.

Prerequisite(s): ECE 642 or equivalent.

ECE 742 - High-Speed Networks
Theories for design, analysis and evaluation of high-speed networks including scalability, performance, and issues related to local area, metropolitan, and wide area networks. Includes architecture, protocols, and applications of high-speed networks; performance modeling of high-speed networks; flow control and routing; design issues for high-speed switches, interfaces, and controllers; all optical networks and their architectures; examples of high-speed computer networks and Internet working; video, imaging, and multimedia applications; software issues, robustness, and applications; and selected topics in current research areas in high-speed computer networks.

Equivalent to IT 834

Prerequisite(s): ECE 528 and 642, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ECE 743 - Multimedia Networking and Communications Software

Credits: 3 (NR)
Advanced modern networks and services increasingly rely on communication protocols and their implementation in software. Course provides principle methodologies, constraints, and technologies for advanced store-and-forward or packet-switched communications nodes, networks and protocols, and emerging software-based applications. Specific examples include next-generation integrated Internet and Intranet, underlying transport infrastructure over wired and wireless media, switching and routing, multipoint and real-time multimedia and web-based services, and quality of services aspects.

Equivalent to IT 848

Prerequisite(s): ECE 642 or equivalent.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ECE 744 - Computer Vision and Expert Systems

Credits: 3 (NR)
Brief review of image analysis. Includes vision system architectures such as human and computer visual systems; vision system operations such as focus and zooming; picture recognition languages; knowledge-based systems; learning algorithmic schemes; and applications to text processing and analysis as expert systems. Students conceive, simulate, and test design projects.

Prerequisite(s): ECE 644 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ECE 745 - ULSI Microelectronics

Credits: 3 (NR)
Studies UltraLargeScaleIntegration (more than a million devices in a single chip) by considering limits of packing density,
modeling of devices, and circuit topology. Semiconductor material and device physics imposed "second order effects" and limitations on deep submicron CMOS performance. Reliability studied through analytical (compact) modeling and numerical simulations. Presents and evaluates new ULSI technologies such as SOI CMOS.

**Prerequisite(s):** ECE 684.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**ECE 746 - Advanced Applied Cryptography**

Credits: 3 (NR)  
Discusses complex cryptographic algorithms and their implementations in software and hardware. Provides mathematical background necessary to understand, implement, and break modern cryptoalgorithms. Covers implementations of cryptosystems using smart cards, network processors, and other platforms. Discusses side channel attacks against implementations of cryptography, including timing attacks, power analysis, fault analysis, cache attacks, etc. Introduces advanced topics, such as random and pseudorandom number generators, secret sharing, zero-knowledge, and quantum cryptography. Requires a semester-long project devoted to implementation of selected algorithms or protocols in software or hardware, and/or comparative analysis of various algorithms, protocols, or implementations.

**Prerequisite(s):** ECE 646 or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**ECE 749 - Neural Networks for Control**

Credits: 3 (NR)  
General neural network principles for control applications and supervised control, direct inverse control, neural adaptive control, backpropagation trout time (BTT), adaptive critics, sensorimotor principles. Topics include applications to adaptive control and system identification, neural networks for motion control and path planning in robotics, neural network process control, aerospace control problems and neural network autopilot, neural network control of aircraft flare and touchdown, and neural network control of autonomous vehicles.

Equivalent to IT 844

**Prerequisite(s):** ECE 549 and 620.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**ECE 750 - Intelligent Systems for Robots**

Credits: 3 (NR)  
Reviews recent developments in intelligent autonomous systems. Studies applications of artificial intelligence, control theory, operations research, decision sciences, computer vision, and machine learning to robotics as well as correspondences between various fields. Topics include analysis and design of methods, algorithms and architecture for planning, navigation, sensory data
understanding, visual inspection, spatial reasoning, motion control, learning, self-organization, and adaptation to environment.

Equivalent to CS 685/SYST 672/IT 840

Prerequisite(s): SYST 611, ECE 650, or CS 580; or SYST 555 or equivalent.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ECE 751 - Information Theory

Credits: 3 (NR)
Introduces information theory, which is mathematical theory of communication systems. Topics include measures of information such as entropy, relative entropy, and mutual information; Shannon-McMillan-Breiman theorem and applications to data compression; entropy rate and source coding theorem; Huffman, arithmetic and Lempel-Ziv codes; method of types, channel capacity, and channel-coding theorem; joint source-channel coding theorem; differential entropy; Gaussian channel; rate distortion theory; and vector quantization.

Equivalent to IT 886

Prerequisite(s): ECE 528 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ECE 752 - Spectral Estimation

Credits: 3 (NR)
In-depth study of spectral analysis and application to statistical signal processing. Topics include classical Fourier analysis of deterministic signals and Wiener theory of spectral analysis for random processes; spectral estimation using Periodogram and window approaches; maximum entropy spectral estimation and relation to autoregression modeling; signal subspace approaches for frequency estimation; and wavelet transform and elation to short-time Fourier transform.

Equivalent to IT 885

Prerequisite(s): ECE 528 or STAT 652, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ECE 753 - Distributed Estimation and Multisensor Tracking and Fusion

Credits: 3 (NR)
Centralized and distributed estimation theory, hierarchical estimation, tracking and data association, multisensor multitarget tracking and fusion, distributed tracking in distributed sensor networks, track-to-track association and fusion, and Bayesian networks for fusion.
Prerequisite(s): ECE 734 or SYST 611.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**ECE 754 - Optimum Array Processing I**

Credits: 3 (NR)

Prerequisite(s): ECE 528 and ECE 535.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**ECE 755 - Optimum Array Processing II**

Credits: 3 (NR)
Adaptive beamformers, SMI and RLS estimators, spatial smoothing and FB averaging, QR decomposition, LMS algorithm, optimum detection and parameter estimation, UML and CML estimation, Cramer-Rao bounds, IQML, weighted subspace fitting, subspace algorithms such as MUSIC and ESPRIT, root versions, beam-space algorithms, sensitivity, robustness, and calibration.

Prerequisite(s): IT 837.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**ECE 760 - Advances in Multi-Modeling**

Credits: 3 (NR)
Focuses on the inter-operation of multiple models expressed in different modeling languages but which draw from the same data set: i.e., multi-modeling. Socio-technical systems often require a variety of modeling tools to define their operation accurately. An ontology based approach is used to analyze the validity of a proposed modeling architecture and workflow to address a specific issue.

Equivalent to SYST 740.

Prerequisite(s): ECE 673 or SYST 620 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring.
ECE 780 - High-Frequency Electronics

Credits: 3 (NR)
Studies devices and circuits in high-speed communications systems. Topics include microwave bipolar transistors and high-speed integrated circuits, and designing linear and power amplifiers using S-parameter techniques and computer simulation.

Equivalent to IT 845

Prerequisite(s): ECE 563 and 684, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ECE 795 - Engineering Seminar

Credits: 0 (RD)
Fulfills seminar requirement for MS in electrical and computer engineering programs. Invited speakers, faculty, and ECE graduate students lecture on current topics and research.

Prerequisite(s): Graduate standing.

Notes: Students must enroll in ECE 795 the final semester they file to graduate. Once the department verifies that the seminar requirement has been met, a grade of S (satisfactory) will be submitted. Students who have not met the seminar requirement in their final semester must continue to register for ECE 795 in subsequent semesters until the requirement is met.

Grading: Graduate Special.
When Offered: Fall, Summer, Spring

ECE 797 - Scholarly Paper

Credits: 0 (RD)
Student must develop a report (called Scholarly Paper) on an ECE technical topic and make an oral presentation of his report approved by a two-member faculty committee.

Prerequisite(s): Completed 18 credit hours of graduate work.

Grading: Graduate Special.
When Offered: Fall, Summer, Spring

ECE 798 - Research Project

Credits: 1-3 (RD)
Student must do a one-semester long 3 credit hour research project on an ECE technical topic under the guidance of a faculty advisor, and write a research report that will be presented as Scholarly Paper.

Prerequisite(s): Completed 18 credit hours of graduate work.
Corequisite(s): ECE 797.

Notes: No more than a combined total of 3 credits may be taken towards satisfying the master's degree, although students may register for more credits. No more than a combined total of 3 credits may be taken of ECE 698 and ECE 798 towards satisfying the master's degree, although students may register for more credits. Students may not count both ECE 799 and ECE 798 for master's degree.

Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 0
Grading: Graduate Special
When Offered: Fall, Summer, Spring

ECE 799 - Master's Thesis

Credits: 1-6 (RD)
Research project chosen and completed under guidance of graduate faculty member that results in technical report and oral defense acceptable to thesis committee of three faculty members.

Prerequisite(s): 9 graduate credits, and permission of instructor.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0
Grading: Satisfactory/No Credit

ECE 836 - Special Topics in Statistical Signal Processing

Credits: 3 (RD)
Advanced topics in statistical signal processing in areas of current research interest. Topics may include detection, estimation, information theory, array processing, and underwater acoustics.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

ECE 899 - Research Topics in ECE

Credits: 3 (RD)
Studies advanced research areas in Electrical and Computer Engineering within a course format. Students will develop specialized research skills, which will also involve the presentation of their own work, developed individually and within groups. This course may be repeated for credit if the research areas differ.

Prerequisite(s): Completion of at least one 600 or 700 level course in the Research Topic area; and permission of instructor.

Notes: This will be an irregularly scheduled course intended for advanced master’s students who want to pursue a specific topic to more depth than a typical course offers at the master’s level. It will prepare students to undertake their individual research topics when they move on to pursue a Ph.D. program, or enter a research environment in their chosen professional careers.
ECE 998 - Doctoral Dissertation Proposal

Credits: 1-12 (RD)
Work on research proposal that forms basis for doctoral dissertation.

Notes: May be repeated. No more than 24 credits of ECE 998 and 999 may be applied to doctoral degree requirements.

ECE 999 - Doctoral Dissertation

Credits: 1-12 (RD)
Formal record of commitment to doctoral dissertation research under direction of ECE faculty member.

Prerequisite(s): Admission to candidacy.

Notes: May be repeated as needed. Students must complete minimum 12 credits of doctoral proposal (ECE 998) and doctoral dissertation research (ECE 999) Maximum of 24 credits of ECE 998 and 999 may be applied to degree. Students who choose to take less than 24 credits of ECE 998 and 999 may earn remaining credits from approved course work. Students cannot enroll in ECE 999 before research proposal accepted and approved by dissertation committee.

EDCI 370 - Young Adult Literature in Multicultural Settings

Credits: 3 (NR)
Examines literary works written for and about young adults, introduces critical issues surrounding teaching of young adult literature in multiculturally diverse schools, and requires reading and review of young adult literature.

Notes: Significant online work is required.
EDCI 372 - Teaching Mathematics in the Secondary School

Credits: 3 (NR)
Covers curricula, current issues, and research literature in secondary school mathematics. Emphasis is on developing different styles of teaching. Field experience is required for those seeking initial teacher licensure.

Corequisite(s): EDUC 422

EDCI 469 - Teaching English in Secondary School

Credits: 3 (NR)
Provides study of advanced methods, materials, content, and organization of English programs in secondary school.

Prerequisite(s): EDUC 422

Corequisite(s): EDUC 422

EDCI 472 - Advanced Methods for Teaching Mathematics in the Secondary School

Credits: 3 (NR)
Focuses on learning processes for mathematics. Introduces national and state standards regarding content and methodologies for teaching mathematics. Examines instructional methods and materials in relation to secondary mathematical content, curriculum, and assessment.

Prerequisite(s): EDCI 372, EDUC 422.

When Offered: Fall, Spring

EDCI 473 - Teaching Science in the Secondary School

Credits: 3 (NR)
Builds fundamental knowledge of science teaching and learning including standards-based curriculum design and research-based teaching strategies.
Prerequisite(s): Admission to the Secondary Education Program.

Notes: School-based field experience required for those seeking initial teacher licensure.

**EDCI 479 - Advanced Methods of Teaching English in the Secondary School**

Credits: 3 (NR)
Guides students in working effectively with national and local standards for teaching secondary English. Continuation course in methods from EDCI 469.

Prerequisite(s): EDCI 469.

**EDCI 483 - Advanced Methods of Teaching Science in Secondary School**

Credits: 3 (NR)
Provides advanced study of teaching and curriculum development based on research and current issues. Emphasizes integrating science and technology, adapting instruction to needs of diverse learners, and promoting safety.

Prerequisite(s): EDCI 473.

**EDCI 490 - Student Teaching in Education**

Credits: 6 (NR)
Provides intensive, supervised clinical experience in approved school for fall or spring semester.

Fulfills Mason Core requirement in synthesis.

Prerequisite(s): Completion of licensure and all endorsement course work

**EDCI 510 - Linguistics for PreK-12 ESOL Teachers**
EDCI 511 - Developing Curriculum and Designing Instruction in Early Childhood Education

Credits: 3 (NR)
Examines language as a system, with particular focus on teaching English as a second language (ESOL) to students in public schools, grades PreK-12. Considers teaching implications of phonology, morphology, syntax, semantics, and pragmatics.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDCI 516 - Bilingualism and Language Acquisition Research

Credits: 3 (NR)
Examines research in first and second language acquisition, including interaction of bilingual person's two languages, with applications for classroom.

Corequisite(s): EDCI 560

Notes: Field experiences required for students without previous teaching or administrative experience in early childhood settings.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDCI 519 - Methods of Teaching Multilingual Students

Credits: 3 (NR)
Examines approaches, methods, and techniques for teaching English as second language (ESL) in bilingual and ESL classrooms, as well as resources available in field. Participants critically analyze and demonstrate teaching approaches based on second language acquisition research, including teaching language through content.

Prerequisite(s): EDCI 516.

Notes: Field experience in public schools required.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
Grading: Graduate Special
EDCI 520 - Assessment of Language Learners

Credits: 3 (NR)
Examines innovative approaches to assessing language minority students and English language learners. Topics include identification, placement, monitoring of student progress, development of authentic performance-based measures, design of portfolios, application of measurement concepts, analysis of assessment instruments, and linking assessment to instruction.

Prerequisite(s): EDCI 516 and 519.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
Grading: Graduate Special

EDCI 521 - Curriculum Development for Language Learners

Credits: 3 (NR)
Examines current approaches to curriculum development for second language learners and language minority students. Participants review, evaluate, and develop curricular materials, with emphasis on learner-centered activities, cooperative learning, interdisciplinary and thematic approaches, authentic and problem-based learning, integration of language and content, and linking assessment and instruction.

Prerequisite(s): EDCI 516 and 519.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
Grading: Graduate Special

EDCI 544 - Curriculum and Methods of Teaching in Elementary Education

Credits: 3 (NR)
Introduction to general methods of teaching in elementary schools focusing on planning, teaching strategies, management, assessment, and differentiation.

Prerequisite(s): Admission into elementary education graduate program; must be taken in programmatic sequence.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDCI 545 - Assessment and Differentiation

Credits: 3 (NR)
Provides a research-based introduction to differentiated instruction for children in grades PK-6. Emphasis on the assessment of learners and differentiation of instruction to meet the needs of all learners.
Prerequisite(s): Admission into elementary education graduate program; must be taken in programmatic sequence.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDCI 546 - Integrating Technology in Elementary Classrooms: Literacy

Credits: 1 (NR)
Studies the development and integration of technology in the elementary education literacy curriculum.

Prerequisite(s): Admission into elementary education graduate program.

Corequisite(s): EDCI 556.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0

EDCI 547 - Integrating Technology in Elementary Classrooms: Mathematics

Credits: 1 (NR)
Studies the development and integration of technology in the elementary education mathematics curriculum.

Prerequisite(s): Admission into elementary education graduate program.

Corequisite(s): EDCI 552.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0

EDCI 548 - Integrating Technology in Elementary Classrooms: Social Studies and Fine Arts

Credits: 1 (NR)
Studies the development and integration in the elementary education social studies and fine arts curriculum.

Prerequisite(s): Admission into elementary education graduate program.

Corequisite(s): EDCI 554.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0

EDCI 549 - Foreign Language Immersion in the Elementary School
EDCI 552 - Mathematics Methods for the Elementary Classroom

Credits: 1-3 (RD)
Introduces methods for teaching all children topics in arithmetic, geometry, algebra, probability, and statistics in elementary grades. Focuses on using manipulatives and technologies to explore mathematics and solve problems.

Prerequisite(s): Admission to elementary education licensure program.

Notes: Requires field experience in public schools.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0
Grading: Graduate Special

EDCI 553 - Science Methods for the Elementary Classroom

Credits: 1-3 (RD)
Develops skills and abilities in science teaching methods, applications of technology, safety practices, and creation of integrated science curricula. Examines science teaching based on contemporary theory, practice, and standards.

Prerequisite(s): Admission to elementary education licensure program.

Notes: Requires field experience in public schools.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0
Grading: Graduate Special

EDCI 554 - Methods of Teaching Social Studies and Integrating Fine Arts in the Elementary Classroom

Credits: 3 (RD)
Focuses on the design and delivery of standards-based integrated curriculum centered on the social sciences. Includes integration of fine arts and examines the central role of the arts in learning.

Prerequisite(s): Admission into elementary education graduate program; must be taken in programmatic sequence.

Notes: Field experience is required.

Hours of Lecture or Seminar per week: 3
EDCI 555 - Literacy Teaching and Learning in Diverse Elementary Classrooms I

Credits: 3 (NR)
Provides research-based introduction to literacy teaching and learning for younger children. Emphasizes language development; reading and writing processes; emergent literacy; culture, families, and literacy; and literacy integration in the curriculum.

Prerequisite(s): Admission to elementary education licensure program

Notes: School-based field experience required.

EDCI 556 - Literacy Teaching and Learning in Diverse Elementary Classrooms II

Credits: 1-3 (RD)
Provides research-based introduction to literacy teaching and learning for older children. Emphasizes literacy and language processes and development; connections among cultures, families, and literacy; and literacy integration in curriculum.

Prerequisite(s): Admission to elementary education licensure program

Notes: School-based field experience required.

EDCI 557 - Integrating Technology in the Elementary Curriculum

Credits: 3 (NR)
Examines development and implementation of curriculum and instruction in elementary classroom. Emphasizes integrating technology in curriculum, and inclusion of special needs and culturally diverse students.

Prerequisite(s): Admission to elementary education licensure program

Notes: School-based field experience required.

EDCI 558 - Integrating Fine Arts and Movement in Elementary Education
EDCI 559 - Research and Assessment in Elementary Education

Credits: 3 (NR)
Provides teacher candidates an understanding of research paradigms utilizing systematic evidence to improve practice and further skills in assessment of learning outcomes. Emphasizes linking research and practice, making instructional decisions based on systematically collected data.

Prerequisite(s): Admission into elementary education graduate program; capstone course for degree must be taken last in programmatic sequence.

Notes: Requires field experience in schools.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDCI 560 - Methods of Teaching in Foreign/World Languages

Credits: 3 (NR)
Covers approaches, theories, and methods of teaching foreign and second languages, with practical application to classroom. Students demonstrate teaching strategies, develop lesson and unit-planning skills, and evaluate curricula and materials.

Corequisite(s): EDCI 516

Notes: Requires field experience in schools.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDCI 567 - Teaching Social Studies in the Secondary School

Credits: 3 (NR)
Advanced course in methods, materials, content, and organization of social studies programs in secondary schools.

Prerequisite(s): EDUC 522 and 15 hours school-based field experience

Corequisite(s): EDUC 522 and 15 hours school-based field experience
Notes: Requires field experience for those seeking initial teacher licensure.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDCI 569 - Teaching English in the Secondary School

Credits: 3 (NR)
Provides study of advanced methods, materials, content, and organization of English programs in secondary school.

Prerequisite(s): EDUC 522.

Corequisite(s): EDUC 522.

Notes: 15 hours school-based field experience required.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDCI 570 - Teaching Young Adult Literacy in a Multicultural Setting

Credits: 3 (NR)
Examines literary works written for and about young adults. Introduces critical issues surrounding teaching young adult literature in multiculturally diverse public schools and requires reading and reviewing young adult literature from several genres.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDCI 572 - Teaching Mathematics in the Secondary School

Credits: 3 (NR)
Emphasizes developing different styles of teaching.

Prerequisite(s): EDUC 522.

Corequisite(s): EDUC 522.

Notes: 15 hours school-based field experience required.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDCI 573 - Teaching Science in the Secondary School
Credits: 3 (NR)

Provides study of methods, materials, content, and organization of science programs. Emphasizes curriculum planning, current methodologies, safety, and trends in secondary schools.
Designated a Green Leaf Course.

Prerequisite(s): EDUC 522.

Corequisite(s): EDUC 522.

Notes: 15 hours school-based field experience required.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDCI 577 - Curriculum and Methods of Teaching, PK-12

Credits: 3 (RD)
Blends theory and practice by providing instruction in curriculum and planning, theoretical concepts, application of research, models of learning and teaching, and practical experiences. Examines educational standards, assessment, and classroom management in PK-12 schools.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDCI 597 - Special Topics in Education

Credits: 1-6 (RD)
Provides advanced study on selected topic or emerging issue in American or international education.

Prerequisite(s): Admission to program in GSE.

Notes: May be repeated for credit with GSE permission.

Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 0
Grading: Graduate Special

EDCI 600 - Workshop in Education

Credits: 1-6 (NR)
Offers full-time workshops and weekend seminars on selected topics in education and education tour seminars.

Notes: May be repeated for credit.
EDCI 601 - Applied Study of Communicative Competence and Classroom Discourse

Credits: 3 (NR)
Analyzes young children's language development and design of individual and group language experiences.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDCI 602 - Technology Applications in Early Childhood Education

Credits: 3 (NR)
Examines criteria and methods for integrating technology into all areas of early childhood curriculum. Emphasizes use of instructional technology to facilitate cognitive and social growth.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDCI 603 - Trends, Issues, and Research in Early Childhood Education

Credits: 3 (NR)
Examines trends, issues, research findings, and resulting program development.

Prerequisite(s): Admission to GSED.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDCI 613 - Curriculum and Assessment in Early Childhood Education I

Credits: 3 (NR)
First of two-course sequence addressing current thinking about curriculum and assessment in programs for preschool through third grade. Gives overview of effective ways to plan and implement integrated curriculum; special focus on content, subject matter.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDCI 614 - Curriculum and Assessment in Early Childhood Education II
Credits: 3 (NR)
Second of two-course sequence focusing on planning and assessing children's knowledge of content and subject matter. Emphasizes action research.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDCI 615 - Advanced Human Development

Credits: 3 (NR)
Advanced course in development and learning across lifespan. Critically reviews contemporary research and theories of human development and learning, and relevance to educational practice and family contexts as they relate to children under eight.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDCI 616 - The Creative Arts and Play in Early Childhood Education

Credits: 3 (NR)
Advanced course using creative arts and play as central approaches to teaching and learning. Focuses on an integrated approach to what arts-based curriculum looks like and how it functions.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDCI 617 - Using Digital and Popular-Culture Media with Grades 4-12

Credits: 3 (NR)
Exposes students to recent knowledge on how middle and high school teachers can use digital media and popular culture texts to engage students in subject area learning or literacy development. Focus is on grades 4-12.

Prerequisite(s): Admission to a GSE licensure, Master's, or doctoral program and at least one year of PK-12 teaching experience, completion of EDCI 569, EDCI 567, EDCI 572, EDCI 573, or EDCI 544, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Summer

EDCI 621 - Introduction to Gifted and Talented Learners

Credits: 3 (NR)
Examines nature and needs of gifted and talented learners. Participants become knowledgeable about characteristics of gifted and talented students, and examine role of culture in manifestation of gifts and talents as well as gifted behaviors in special populations.
EDCI 622 - Curriculum Differentiation for Diverse Learners

Credits: 3 (NR)
Develops personal and professional rationale for differentiating instruction in mixed-ability classrooms, as well as skills and knowledge of strategies to utilize pre-assessment data and plan for and implement differentiated instruction.

EDCI 623 - Models and Strategies for Teaching Gifted Learners

Credits: 3 (NR)
Provides framework to examine and apply curriculum models and instructional strategies advocated for use with gifted students according to national and state standards that reflect best practices in gifted education.

EDCI 624 - Assessment, Identification, and Evaluation of Gifted Learners

Credits: 3 (NR)
Examines broad understandings of intelligence and assessment. Provides techniques to identify gifted students. Develops specific understandings of assessment techniques and awareness of the influences of language, culture, ethnicity, gender, and exceptionality on recognition and subsequent identification of giftedness.

EDCI 625 - Contemporary Issues and Trends in Gifted Education

Credits: 3 (NR)
Focuses on research, trends, issues, legislation, and litigation concerning gifted and talented children. Provides professionals in gifted education and related fields with knowledge and skills to serve as advocates for gifted-child education.

Prerequisite(s): EDCI 621, 622, 623, 624.
EDCI 626 - Action Research in Gifted Education

Credits: 3 (NR)
Opportunity to identify and investigate school-based problem and apply inquiry, writing, and research skills to relevant issue or concern in gifted education.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDCI 627 - Advanced Practicum in Gifted Education

Credits: 3 (NR)
Intensive supervised clinical experiences for one semester in accredited elementary or secondary school. Students supervised in setting that includes scheduled observations and seminar experiences.

Prerequisite(s): EDCI 621, 622, 623, 624.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
Grading: Graduate Special

EDCI 631 - Research in Elementary Education

Credits: 3 (NR)
Helps beginning teachers understand various research paradigms to use research literature and systemic evidence to improve practice. Emphasizes linking research and practice, and making data-based instructional decisions.

Prerequisite(s): Completion of elementary education (PK-6) licensure.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDCI 632 - Advanced Social Studies Methods for the Elementary Classroom

Credits: 3 (NR)
Provides advanced study of teaching social studies in elementary education. Uses inquiry, research, and reflection to improve teaching. Emphasizes design and delivery of integrated social studies curriculum centered on knowledge, skills, and dispositions from history, geography, civics and economics, arts and humanities, and multicultural education. Covers student assessment and using student data in instructional decision-making and improvement.

Prerequisite(s): Completion of elementary education (PK-6) licensure, and EDCI 631.

Notes: Requires extensive field experience in public schools.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
EDCI 633 - Advanced Mathematics Methods for the Elementary Classroom

Credits: 3 (NR)
Focuses on teaching all children, including those from nonmainstreamed populations. Emphasizes teaching problem-solving and higher-order thinking skills promoted by National Council of Teachers of Mathematics and Virginia Mathematics Standards of Learning. Uses techniques and materials to develop specific problem-solving strategies in hands-on, activity, and workshop-oriented experience. Explores teaching of problem-solving, reasoning, communications, and connections in PK-6 mathematics by working with manipulatives and technologies.

Prerequisite(s): Completion of elementary education (PK-6) licensure, and EDCI 631.

Notes: Requires field experience in public schools.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDCI 634 - Advanced Science Methods for the Elementary Classroom

Credits: 3 (NR)
Emphasizes inquiry and extensions of theoretical understanding of how children learn. Develops expertise in teaching and assessment, and incorporates technology, safety, and issues of culture and gender into day-to-day teaching activities.

Prerequisite(s): Completion of elementary education (PK-6) licensure, and EDCI 631.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDCI 635 - Applied Research in Elementary Education

Credits: 3 (NR)
Helps beginning teachers plan and complete action research project related to teaching assignment. Students apply research methods explored during prerequisite series of courses.

Prerequisite(s): Completion of elementary education (PK-6) licensure; and EDCI 631, 632, 633, and 634.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDCI 644 - Mathematics Learning and Assessment (K-8)

Credits: 3 (NR)
Introduces students to learning theories and associated assessment practices specific to mathematics education. Intended for mathematics specialists and teachers interested in problems of learning and assessment across K-8 settings in mathematics education.
Prerequisite(s): Admission to the MEd in Education Leadership Mathematics Education Leadership concentration

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDCI 645 - Curriculum Development in Mathematics Education

Credits: 3 (NR)
Analysis, design, and evaluation of school mathematics curricula.

Prerequisite(s): Admission to mathematics education leadership master's degree program, or permission of instructor.

Notes: Yearlong seminar for master's-level students in mathematics education leadership cohort program.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
Grading: Graduate Special

EDCI 646 - Mathematics Education Leadership for School Change

Credits: 1-3 (NR)
Surveys current literature and large-scale studies in mathematics education. Engages students in research, study, and discussion of factors that affect teaching and learning of mathematics in school settings.

Prerequisite(s): Admission to mathematics education leadership master's degree program, or permission of instructor.

Notes: Yearlong seminar for master's-level students in mathematics education leadership cohort program.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0
Grading: Graduate Special

EDCI 663 - Research in Science Teaching

Credits: 3 (NR)
Investigates the research and methodology involved in teaching and learning biological, chemical, physical, and earth sciences from K-12.

Prerequisite(s): Course in teaching science in elementary or secondary school, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
Grading: Graduate Special
EDCI 666 - Research in Mathematics Teaching

Credits: 3 (NR)
Explores curricula, current issues, and research literature in elementary school mathematics. Emphasizes development of different styles of teaching.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDCI 667 - Advanced Methods of Teaching Social Sciences in the Secondary School

Credits: 3 (NR)
Emphasizes interdisciplinary curriculum and instruction, implementing national state standards, authentic assessment, and adaptations for diverse populations.

Prerequisite(s): EDCI 567 and EDUC 522. 15 hours school-based field experience required.

Notes: School-based field experience required.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDCI 669 - Advanced Methods of Teaching English in the Secondary School

Credits: 3 (NR)
Continuation course in methods (See EDCI 569). Guides students in working effectively with national and local standards for teaching secondary English.

Prerequisite(s): EDCI 569 and EDUC 522. 15 hours school-based field experience required.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDCI 670 - Advanced Methods in Science Teaching

Credits: 3 (NR)
Application of major principles of education and psychology for the improvements of science teaching in secondary schools.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDCI 671 - Innovations in Science Teaching
EDCI 672 - Advanced Methods of Teaching Mathematics in the Secondary School

Credits: 3 (NR)
Focuses on learning processes for mathematics. Introduces national and state standards regarding content and methodologies for teaching mathematics. Examines instructional methods and materials in relation to secondary mathematical content, curriculum, and assessment.

Prerequisite(s): EDCI 572, EDUC 522. 15 hours school-based field experience required.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDCI 673 - Advanced Methods of Teaching Science in the Secondary School

Credits: 3 (NR)
Provides advanced study of teaching and curriculum development based on research and current issues. Emphasizes integrating science and technology, and adapting instruction to the needs of diverse learners.

Prerequisite(s): EDCI 573 and EDUC 522. 15 hours school-based field experience required.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDCI 677 - Advanced Curriculum and Methods of Teaching, Secondary

Credits: 3 (NR)
Includes application of skills in discipline-specific methodology, communication, classroom management, and evaluation of student performance appropriate to elementary level.

Prerequisite(s): EDCI 577.

Notes: Extends principles of teaching and learning introduced in EDCI 577.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDCI 678 - Advanced Curriculum and Methods of Teaching, Elementary
EDCI 673 - Curriculum Development and Evaluation of Student Performance

Credits: 3 (RD)
Includes application of skills in discipline-specific methodology, communication, classroom management, and evaluation of student performance appropriate to elementary level.

Prerequisite(s): EDCI 577

Notes: Extends principles of teaching and learning introduced in EDUC 577.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDCI 683 - Curriculum Development and Evaluation in Science Education

Credits: 3 (NR)
Advanced course in science curriculum design and development. Emphasizes instructional materials and assessment.

Prerequisite(s): EDCI 663, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
Grading: Graduate Special

EDCI 684 - Advanced Methods of Teaching Foreign/Second Languages in PK-12 Schools

Credits: 3 (NR)
Blends theoretical knowledge and practical application. Provides advanced study of second language pedagogy and teaching trends. Topics include multiple learning styles, alternative forms and assessment, and teaching diverse populations.

Prerequisite(s): EDCI 560 or permission of instructor. Field experience in public schools will be required during course.

Notes: Requires field experience.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDCI 693 - Leadership and Organizational Issues in Science Education

Credits: 3 (NR)
Advanced course in current issues for leadership in science education. Emphasizes technology, safety, professional development, and related organizational change issues.

Prerequisite(s): EDCI 663 and 683, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
Grading: Graduate Special
EDCI 702 - Internship in Mathematics Education

Credits: 3 (NR)
Offers practical experiences and professional challenges for mathematics leaders in authentic educational settings. Activities emphasize school-based and classroom based research and leadership. Develops the skills and abilities of the mathematics leaders to analyze classroom practice, investigate teaching and disseminate information about mathematics education in professional development settings for teachers.

Prerequisite(s): Internship Math Education

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

EDCI 705 - Instructional Design

Credits: 3 (NR)
Helps students analyze, apply, and evaluate principles of instructional design to develop education and training materials spanning a wide range of knowledge domains and instructional technologies. Focuses on variety of instructional design models, with emphasis on recent contributions from cognitive science and related fields.

Equivalent to EDIT 705

Prerequisite(s): Teaching experience.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDCI 710 - Technology and the Culture of Schools

Credits: 3 (RD)
Explores relationship of human inventions and social, political, cultural, and epistemological constructions. Examines history of technology, relationship of technology and human behavior, and theories of social change and technology. Focuses on how technological and social changes influence and shape goals and outcomes of K-12 educational process. Considers links between technology and educational reform, how technology is associated with educational reform movement, and ways educators can take leadership roles in facilitating intersection of educational reform and technology.

Corequisite(s): EDIT 711.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDCI 712 - Technology and Learning
Credits: 3 (RD)
Explores ways of knowing and theories of learning as reflected in and influenced by technology. Analyzes, applies, and evaluates current theories such as constructivism, multiple intelligences, role of symbolization in human cognition, development of problem-solving and critical thinking strategies, and learning conditions. Covers relationship of technological forms and nature and structure of human cognition, especially as it influences K-12 educational practice. Explores technology and nature of individual learner attributes, learners in context, special-needs learners, access, equity, and values.

Corequisite(s): EDIT 713.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDCI 714 - Methods of Integration

Credits: 3 (RD)
Includes examples of curriculum design strategies, readings, discussions, and design of lessons or units appropriate to various contents. First course in sequence focuses on disciplinary standards, role of technology applications to support standards, and strategies for curriculum design such as learning cycle, thematic design, interdisciplinary and transdisciplinary approaches, and writing across the curriculum.

Corequisite(s): EDIT 715. Considers curriculum design strategies that facilitate technology integration.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDCI 716 - Principles of Technology Leadership

Credits: 3 (NR)
Focuses on the relationship of leadership, change, and technology advocacy with emphasis on leadership roles for technology educators.

Corequisite(s): EDIT 719

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDCI 725 - National and International Leadership Issues in Mathematics Education

Credits: 3 (NR)
Students study research on mathematics teaching and learning, including current issues and trends in mathematics education leadership at national and international levels.

Prerequisite(s): Admission to mathematics education leadership PhD program.

Notes: Yearlong seminar for PhD students in the mathematics education leadership cohort program.

Hours of Lecture or Seminar per week: 3
EDCI 726 - State and Local Leadership Issues in Mathematics Education

Credits: 3 (NR)
Students study issues and policies that affect mathematics teaching and learning, including current trends in mathematics school reform at state, district, and individual school levels.

Prerequisite(s): Admission to mathematics education leadership PhD program.

Notes: Yearlong seminar for PhD students in the mathematics education leadership cohort program.

EDCI 777 - Research to Practice

Credits: 3 (NR)
Provides culminating experience that synthesizes and applies essential elements of second language teaching and learning. Emphasizes teacher as change agent through critical inquiry into practice. Promotes collaboration between ESL and grade-level teachers to advance achievement of English language learners and language minority students.

Prerequisite(s): All other program courses except EDRS 590 and elective, or permission of instructor.

EDCI 784 - Capstone Seminar in Early Childhood Education

Credits: 3 (NR)
Culminating seminar devoted to analyzing and synthesizing knowledge and skills gained through graduate course work as it applies to early childhood education.

EDCI 790 - Internship in Education

Credits: 1-6 (RT)
Intensive, supervised clinical experience for full semester in accredited school. Students must register for appropriate section.
**Prerequisite(s):** EDUC 522, EDUC 672, two methods classes in content area; passing Praxis II and VCLA, completing all endorsements.

**Corequisite(s):** EDCI 791 only for students enrolled in Curriculum and Instruction M.Ed, Concentration in Secondary Education.

**Hours of Lecture or Seminar per week:** 1-6
**Hours of Lab or Studio per week:** 0
**Grading:** Satisfactory/No Credit

---

**EDCI 791 - Internship Seminar in Secondary Teaching**

Credits: 2 (NR)
Evaluates the effects of teacher actions on others (students, parents, and other professionals in the learning community) and provides opportunities for professional growth.

**Corequisite(s):** EDCI 790.

**Hours of Lecture or Seminar per week:** 2
**Hours of Lab or Studio per week:** 0
**When Offered:** Fall, Summer

---

**EDCI 795 - Science Education Research**

Credits: 3 (NR)
Explores science education research, theory, and practice, including sources and methods of study. Students review and report on research literature and teaching practices on topics of interest.

**Prerequisite(s):** EDCI 891.

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0
**Grading:** Graduate Special

---

**EDCI 796 - Science Education Curriculum**

Credits: 3 (NR)
Explores science education curriculum from preschool through high school, including identifying and evaluating curriculum materials and resources. Emphasizes research-based exemplary materials and use of technology.

**Prerequisite(s):** EDCI 891.

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0
**Grading:** Graduate Special
EDCI 797 - Advanced Topics in Education

Credits: 1-6 (NR)
Advanced study of selected topics in education for students preparing for doctoral studies or who have been admitted to the PhD program in education.

Notes: May be repeated for credit with CEHD approval.
Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 0
Grading: Graduate Special

EDCI 810 - Foundations of Science Education Research

Credits: 3 (NR)
Explores and analyzes the range of research designs currently utilized by science education researchers. Develops an understanding of the assumptions and frameworks of different types of science education inquiry through an examination of ways of knowing. Examines historical trends that have taken place in science education.

Prerequisite(s): Permission of instructor.
Corequisite(s): EDUC 800.
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall.

EDCI 811 - Current Trends in Science Education Research

Credits: 3 (NR)
Provides an in-depth examination and analysis of literature and research in science education. Examines theoretical foundations of research studies in science education, discusses methodologies of research, critique research, and examines trends in emerging science education research. Includes presentations by science education researchers as well as opportunities for graduate students to explore research ideas with colleagues within the class.

Prerequisite(s): EDCI 810.
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring.

EDCI 813 - Focused Science Education Research

Credits: 3 (NR)
Provides an opportunity for students to gain hands-on experience designing and conducting a research study in science education that leads to publication and/or conference presentations. The scholarship embodied in student development to this point in the
The doctoral program will lead students to work with a science education faculty member of their choice to develop and seek to answer a research question of interest.

**Prerequisite(s):** EDRS 810, EDRS 811, EDRS 827.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall, Summer, Spring.

**EDCI 855 - Mathematics Education Research on Teaching and Learning**

Credits: 3 (NR)  
Students survey most current research literature in mathematics education and engage in research, study, and discussion of mathematics education research on teaching and learning in school settings.

**Prerequisite(s):** Admission to mathematics education leadership PhD program.

**Notes:** Yearlong seminar for PhD students in the mathematics education leadership cohort program.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**Grading:** Graduate Special

**EDCI 856 - Mathematics Education Curriculum Design and Evaluation**

Credits: 3 (NR)  
Students engage in research, analysis, design, and evaluate school mathematics curricula.

**Prerequisite(s):** Admission to mathematics education leadership PhD program.

**Notes:** Yearlong seminar for PhD students in the mathematics education leadership cohort program.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**Grading:** Graduate Special

**EDCI 857 - Preparation and Professional Development of Mathematics Teachers**

Credits: 3 (NR)  
Students study attributes of effective professional development in mathematics education, develop expertise in designing and teaching mathematics methods courses, and learn to create and teach professional development experiences for practicing teachers.

**Prerequisite(s):** Admission to mathematics education leadership PhD program.

**Notes:** Yearlong seminar for PhD students in the mathematics education leadership cohort program.
EDCI 858 - Mathematics Education Research Design and Evaluation

Credits: 3 (NR)
Students review methods of research appropriate for mathematics education settings and develop theoretical framework and action plan for conducting research project.

Prerequisite(s): Admission to mathematics education leadership PhD program.

Notes: Yearlong seminar for PhD students in the mathematics education leadership cohort program.

EDCI 891 - Science Teaching and Learning

Credits: 3 (NR)
Explores research, theory, and practice for effective science teaching and learning. Focuses on science education standards at local, state, national, and international levels. Students review common core of research literature and topics of individual interest.

EDCI 892 - Science Education History and Research

Credits: 3 (NR)
Explores history of science education research, theory, and practice, including research on general teaching strategies in science instruction. Reviews common historical core of research literature; students conduct exploratory research of individual interest.

Prerequisite(s): EDCI 891.

EDCI 893 - Science Education Staff Development
Credits: 3 (NR)
Explores staff development in science education with emphasis on planning and conducting professional development on key topics in science teaching and learning. Reviews common core of research literature; students conduct research of individual interest.

Prerequisite(s): EDCI 891.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
Grading: Graduate Special

EDCI 894 - Science Education Leadership and Policy

Credits: 3 (NR)
Focuses on leadership and policy issues at local, state, and national levels that affect science education. Emphasizes understanding decision-making structure and process; current issues; and trends. Students participate in leadership and policy events.

Prerequisite(s): EDCI 891.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
Grading: Graduate Special

EDCI 895 - Emerging Issues in Curriculum and Instruction

Credits: 3 (NR)
Covers issues in curriculum and instruction through individual and group research, discussion, writing, and presentations by experts. Students conduct critical analysis of specific field.

Prerequisite(s): Admission to PhD program, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
Grading: Graduate Special

Engineering (ENGR)

Offered by the Volgenau School of Engineering.

Students may attempt an undergraduate course taught by the Volgenau School of Engineering twice. A third attempt requires approval of the department offering the course.

ENGR 107 - Introduction to Engineering
Introduces engineering profession fundamentals and problem-solving. Topics include description of engineering disciplines, functions of the engineer, professionalism, ethics and registration, problem solving and representation of technical information, estimation and approximations, and analysis and design.

Fulfills Mason Core requirement in information technology (ethics only).

Corequisite(s): MATH 105, or Math Placement Test score qualifying student for MATH 113.

ENGR 498 - Independent Study in Engineering

Credits: 1-3 (RT)
Directed self-study of special topics of current interest in ENGR.

Prerequisite(s): 60 credits; must be arranged with instructor and approved by department chair before registering.

Notes: May be repeated for maximum 6 credits if topics substantially different.

ENGR 499 - Special Topics in Engineering

Credits: 0-4 (RT)
Topics of special interest to undergraduates.

Prerequisite(s): 60 credits and permission of instructor; specific prerequisites vary with nature of topic.

Notes: May be repeated for maximum 6 credits if topics substantially different.

English (ENGH)

Offered by the College of Humanities and Social Sciences

Effective 2011-2012 Catalog, the English course prefix has changed from ENGL to ENGH.

Prerequisite to all 200-level and above: 3 credits of 100-level English. Prerequisite to all English courses numbered above 302 unless otherwise noted. Satisfaction of University requirements in 100-level English and in Mason Core literature. Nonnative speakers of English with limited language proficiency are encouraged to take ENGH 100 instead of ENGH 101. Students may not receive credit for both ENGH 100 and 101.
ENGH 100 - Composition for Non-native Speakers of English

Credits: 4 (NR)
Intensive practice in drafting, revising, and editing expository essays of some length and complexity. Studies logical, rhetorical, and linguistic structure of expository prose, with attention to particularly difficult aspects of the language for non-native speakers. Methods and conventions of preparing research papers.

Fulfills Mason Core requirement in written communication (lower level).

Equivalent to ENGH 122; ENGL 122 and ENGL 100 (2010-2011 Catalog)

Notes: For non-native English speakers with limited language proficiency. Students must attain minimum grade of C to fulfill degree requirements.

Hours of Lecture or Seminar per week: 4
Hours of Lab or Studio per week: 0

ENGH 101 - Composition

Credits: 3 (NR)
Intensive practice in drafting, revising, and editing expository essays of some length and complexity. Studies logical, rhetorical, and linguistic structure of expository prose. Methods and conventions of preparing research papers.

Fulfills Mason Core requirement in written communication (lower level).

Equivalent to ENGH 122; ENGL 122 and ENGL 101 (2010-2011 Catalog)

Notes: Students must attain minimum grade of C to fulfill degree requirements.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ENGH 121 - Enhanced Composition For Multilingual Writers of English I

Credits: 3 (NR)
Provides intensive practice in drafting, revising, and editing essays in common academic genres such as description, exposition, and analysis, with additional language support for building English fluency. Addresses logical, rhetorical, and linguistic structures of expository prose. This course is the first of a two-part course for students in the ACCESS program.

Prerequisite(s): Admission to the ACCESS program for international Students.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
Grading: Undergraduate Special.
ENGH 122 - Enhanced Composition For Multilingual Writers of English II

Credits: 3 (NR)
Provides intensive practice in drafting, revising and editing essays in common academic genres such as argumentation and research based writing, with additional language support for building English fluency. Addresses logical, rhetorical, and linguistic structures of expository prose, and builds critical reading strategies. This course is the second of a two-part course for students in the ACCESS program.

Equivalent to ENGH 100, ENGH 101; ENGL 100, ENGL 101 (2010-2011 Catalog)

Prerequisite(s): Satisfactory progress in ENGL 121/ENGH 121.

Notes: Students must attain minimum grade of C to fulfill Mason Core degree requirement for written communication (lower level).

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
Grading: Undergraduate Special.

Equivalent to ENGL 360 (2010-2011 Catalog), ENGL 363 (2010-2011 Catalog)

Prerequisite(s): Satisfaction of University requirements in 100-level English and in Mason Core literature.

Notes: Topic varies. May be repeated for credit when topic is different.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0

ENGH 310 - Topics: Women and Literature

Credits: 3 (RT)
Explores experiences of women as both authors and subjects of imaginative literature.

Equivalent to WMST 305, ENGL 369 (2010-2011 Catalog)

Prerequisite(s): Satisfaction of University requirements in 100-level English and in Mason Core literature.

Notes: May be repeated for a maximum of 6 credits when topic is different.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ENGH 315 - Folklore and Folklife

Credits: 3 (NR)
Topics include folktales, personal narratives, legends, proverbs, jokes, folk songs, folk art and craft, and folk architecture. Considers ethnicity, community, family, festival, folklore in literature, and oral history. Discusses traditions in students' own lives.

Equivalent to ENGL 333 (2010-2011 Catalog)

Prerequisite(s): Satisfaction of University requirements in 100-level English and in Mason Core literature.
ENGH 316 - Topics in Myth and Literature

Credits: 3 (RT)
Studies how traditional mythologies are reflected in English and American literature and other texts as themes, motifs, and patterns.

Equivalent to ENGL 337 (2010-2011 Catalog)

Prerequisite(s): Satisfaction of University requirements in 100-level English and in Mason Core literature.

Notes: May be repeated for a maximum of 6 credits when topic is different.

ENGH 318 - Introduction to Cultural Studies

Credits: 3 (NR)
Introduces interpretive practices associated with cultural studies.

Equivalent to ENGL 327 (2010-2011 Catalog)

Prerequisite(s): Satisfaction of University requirements in 100-level English and in Mason Core literature.

ENGH 319 - Popular Culture

Credits: 3 (RT)
Emphasizes popular fiction and adaptation of popular prose genres to media that have strong verbal and visual elements. Relationship between verbal and nonverbal elements of media such as film, comics, and radio.

Equivalent to ENGL 334 (2010-2011 Catalog)

Prerequisite(s): Satisfaction of University requirements in 100-level English and in Mason Core literature.

ENGH 320 - Literature of the Middle Ages
ENGH 321 - English Poetry and Prose of the 16th Century

Credits: 3 (NR)

Equivalent to ENGL 401 (2010-2011 Catalog)

Prerequisite(s): Satisfaction of University requirements in 100-level English and in Mason Core literature.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ENGH 322 - Shakespeare

Credits: 3 (NR)
Introduction to Shakespeare's art.

Equivalent to ENGL 335 (2010-2011 Catalog)

Prerequisite(s): Satisfaction of University requirements in 100-level English and in Mason Core literature.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ENGH 323 - Shakespeare: Special Topics

Credits: 3 (RD)
Study of one aspect of Shakespeare's art or critical issues surrounding it.

Equivalent to ENGL 336 (2010-2011 Catalog)

Prerequisite(s): Satisfaction of University requirements in 100-level English and in Mason Core literature.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
ENGH 324 - English Renaissance Drama

Credits: 3 (NR)
Major dramas and dramatists of English Renaissance, such as Lyly, Marlowe, Jonson, Middleton, Webster, and Ford.

Equivalent to ENGL 440 (2010-2011 Catalog)

Prerequisite(s): Satisfaction of University requirements in 100-level English and in Mason Core literature.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ENGH 325 - English Poetry and Prose of the 17th Century

Credits: 3 (NR)
English poetry and prose from 1603 to 1688, excluding Milton.

Equivalent to ENGL 402 (2010-2011 Catalog)

Prerequisite(s): Satisfaction of University requirements in 100-level English and in Mason Core literature.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ENGH 330 - Augustan Age: 1660-1745

Credits: 3 (NR)
English literature from late 17th century to mid-18th century. Includes Dryden, Rochester, Behn, Defoe, Swift, Pope, and Montagu.

Equivalent to ENGL 404 (2010-2011 Catalog)

Prerequisite(s): Satisfaction of University requirements in 100-level English and in Mason Core literature.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ENGH 331 - Age of Sensibility: 1745-1800

Credits: 3 (NR)
English literature of later 18th century, time of American and French Revolutions, including new developments in novel, drama, biography, and poetry. Includes Johnson, Boswell, Blake, Goldsmith, Sterne, Gray, Cowper, Burney, Godwin, and Wollstonecraft.

Credits: 3 (NR)
Restoration comedy of manners, sentimental comedy, and neoclassical and bourgeois tragedy. Theories of drama and conventions of staging. Includes writers such as Wycherley, Behn, Congreve, and Cowley.

Equivalent to ENGL 443 (2010-2011 Catalog)

Prerequisite(s): Satisfaction of University requirements in 100-level English and in Mason Core literature.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ENGH 333 - British Novel of the 18th Century

Credits: 3 (NR)
English novel from its beginnings through turn of 19th century. Covers works by Behn, Defoe, Haywood, Richardson, Fielding, Sterne, Burney, Smollett, and Austen.

Equivalent to ENGL 450 (2010-2011 Catalog)

Prerequisite(s): Satisfaction of University requirements in 100-level English and in Mason Core literature.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ENGH 334 - British Poetry of the Romantic Period

Credits: 3 (NR)

Equivalent to ENGL 406 (2010-2011 Catalog)

Prerequisite(s): Satisfaction of University requirements in 100-level English and in Mason Core literature.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
ENGH 335 - Prose and Poetry of the Victorian Period

Credits: 3 (NR)
Poetry and nonfiction prose by such authors as Carlyle, Arnold, Tennyson, Elizabeth Barrett Browning, Robert Browning, Ruskin, Mill, and Wilde.

Equivalent to ENGL 407 (2010-2011 Catalog)

Prerequisite(s): Satisfaction of University requirements in 100-level English and in Mason Core literature.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ENGH 336 - British Novel of the 19th Century

Credits: 3 (NR)
Works by Dickens, Thackeray, the Brontes, Eliot, Trollope, and Hardy.

Equivalent to ENGL 453 (2010-2011 Catalog)

Prerequisite(s): Satisfaction of University requirements in 100-level English and in Mason Core literature.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ENGH 337 - British Poetry after 1900

Credits: 3 (NR)
Emphasizes Hardy, Yeats, Lawrence, Graves, Auden, Thomas, and Hughes. Fiction works employing poetic techniques, such as Joyce's Ulysses, may also be studied.

Equivalent to ENGL 462 (2010-2011 Catalog)

Prerequisite(s): Satisfaction of University requirements in 100-level English and in Mason Core literature.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ENGH 338 - British Novel after 1900

Credits: 3 (NR)
Works by Conrad, Forster, Lawrence, Joyce, Woolf, Greene, Lessing, Spark, and Fowles.

Equivalent to ENGL 456 (2010-2011 Catalog)

Prerequisite(s): Satisfaction of University requirements in 100-level English and in Mason Core literature.
ENGH 339 - British and Irish Drama after 1900

Credits: 3 (NR)
English or Irish drama from Yeats to the present. Plays by authors such as Yeats, Synge, O'Casey, Osborne, Wesker, Pinter, Friel, Churchill, and Gems.

Equivalent to ENGL 445 (2010-2011 Catalog)

Prerequisite(s): Satisfaction of University requirements in 100-level English and in Mason Core literature.

ENGH 340 - Early American Literature

Credits: 3 (NR)
Works of first 200 years of American literature, including Edwards, Franklin, Irving, Cooper, and Bryant.

Equivalent to ENGL 423 (2010-2011 Catalog)

Prerequisite(s): Satisfaction of University requirements in 100-level English and in Mason Core literature.

ENGH 341 - Literature of the American Renaissance

Credits: 3 (NR)
Major writers of American Renaissance (1830-1865), with emphasis on Emerson, Thoreau, Hawthorne, Melville, Whitman, Poe, Stowe, Douglass, and Dickinson.

Equivalent to ENGL 425 (2010-2011 Catalog)

Prerequisite(s): Satisfaction of University requirements in 100-level English and in Mason Core literature.

ENGH 343 - Development of the American Novel to 1914
Major American novels of the pre-World War I period with emphasis on Brown, Cooper, Hawthorne, Melville, Twain, Howells, James, Crane, Dreiser, Norris, and others.

Equivalent to ENGL 452 (2010-2011 Catalog)

Prerequisite(s): Satisfaction of University requirements in 100-level English and in Mason Core literature.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**ENGH 344 - Development of the American Novel since 1914**

Credits: 3 (NR)
Works by Fitzgerald, Hemingway, Faulkner, Dos Passos, Wolfe, Bellow, and Nabokov.

Equivalent to ENGL 454 (2010-2011 Catalog)

Prerequisite(s): Satisfaction of University requirements in 100-level English and in Mason Core literature.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**ENGH 345 - American Drama of the 20th Century**

Credits: 3 (NR)
American drama of 20th century, with special attention to playwrights such as Glaspell, O'Neill, Miller, Williams, Fornes, and Albee.

Equivalent to ENGL 447 (2010-2011 Catalog)

Prerequisite(s): Satisfaction of University requirements in 100-level English and in Mason Core literature.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**ENGH 346 - American Poetry of the 20th Century**

Credits: 3 (NR)
Emphasizes work of Robinson, Frost, Stevens, Williams, Pound, Crane, Eliot, and Lowell. May include work of fiction employing poetic techniques, such as Faulkner's *The Sound and the Fury*.

Equivalent to ENGL 463 (2010-2011 Catalog)

Prerequisite(s): Satisfaction of University requirements in 100-level English and in Mason Core literature.
ENGH 348 - Beginnings of African American Literature Through 1865

Credits: 3 (NR)
Concentrating on such poets as Phillis Wheatley, Jupiter Hammon, Lucy Terry, and George Moses Horton, examines significant African American literary, social, and political texts produced through 1865. Special attention to narrative accounts of enslavement and freedom by Frederick Douglass, Harriet Jacobs, and Olaudah Equiano; political writings and orations of David Walker and Sojourner Truth; fiction of Harriet Wilson and William Wells Brown; and nonwritten cultural artifacts such as slave songs and spirituals.

Equivalent to ENGL 368 (2010-2011 Catalog)

Prerequisite(s): Satisfaction of University requirements in 100-level English and in Mason Core literature.

ENGH 349 - African American Literature: Reconstruction to 1903

Credits: 3 (NR)

Equivalent to ENGL 370 (2010-2011 Catalog)

Prerequisite(s): Satisfaction of University requirements in 100-level English and in Mason Core literature.

ENGH 350 - African American Literature Through 1946

Credits: 3 (NR)
Focusing on fiction, poetry, drama, and autobiography, explores evolution of African American literature and aesthetics and major social, cultural, and historical movements such as the Harlem Renaissance of the 1920s and emergence of black naturalism, realism, and modernism in the 1930s-40s. Major authors include Zora Neale Hurston, Langston Hughes, Jessie Fauset, James Weldon Johnson, Jean Toomer, Nella Larsen, Margaret Walker, Chester Himes, Richard Wright, and Ann Petry.

Equivalent to ENGL 371 (2010-2011 Catalog)

Prerequisite(s): Satisfaction of University requirements in 100-level English and in Mason Core literature.
ENGH 351 - Contemporary African American Literature

Credits: 3 (NR)
Encompassing array of genres and forms, examines black writing from mid-20th century to present. Engages textual, critical, political, and theoretical issues related to cardinal literary movements, such as Black Arts Movement of 1960s and Third Renaissance of 1980s-90s. Examines how musical forms such as blues, jazz, and rap shaped literary production. Major authors include Ralph Ellison, Gwendolyn Brooks, James Baldwin, Lorraine Hansberry, Amiri Baraka, Alice Walker, Ernest Gaines, Gloria Naylor, August Wilson, and Toni Morrison.

Equivalent to ENGL 372 (2010-2011 Catalog)

Prerequisite(s): Satisfaction of University requirements in 100-level English and in Mason Core literature.

ENGH 352 - Topics in Ethnic American Literature

Credits: 3 (RT)
Studies particular ethnic American literatures. Focuses on literatures such as Asian American, Native American, Latino/a, Arab American, or Jewish American.

Equivalent to ENGL 352 (2010-2011 Catalog)

Prerequisite(s): Satisfaction of University requirements in 100-level English and in Mason Core literature.

Notes: May be repeated for a maximum of 6 credits when topic (expressed by course subtitle and content) is different.

ENGH 355 - Recent American Fiction

Credits: 3 (NR)
American short story writers and novelists from World War II to present, including Mailer, Barth, Cheever, Oates, Gass, Beattie, Updike, and Morrison.

Equivalent to ENGL 355 (2010-2011 Catalog)

Prerequisite(s): Satisfaction of University requirements in 100-level English and in Mason Core literature.
ENGH 356 - Recent American Poetry

Credits: 3 (NR)

Equivalent to ENGL 390 (2010-2011 Catalog)

Prerequisite(s): Satisfaction of University requirements in 100-level English and in Mason Core literature.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ENGH 360 - Continental Fiction, 1770-1880

Credits: 3 (NR)
Selected European novels in translation. Focuses on continental novel from 18th century to end of 19th century. Includes works of Balzac, Goethe, Gogol, Stendhal, Turgenev, Flaubert, Dostoievski, Tolstoy, and Chekhov.

Equivalent to ENGL 436 (2010-2011 Catalog)

Prerequisite(s): Satisfaction of University requirements in 100-level English and in Mason Core literature.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ENGH 361 - Continental Fiction, 1880-1950

Credits: 3 (NR)
Offered in cooperation with the Department of Modern and Classical Languages. Focuses on continental novel from beginning of 20th century to present. Includes Proust, Mann, Gide, Kafka, Yourcenar, Beauvoir, Calvino, and Garcia Marquez. Attention to influence of this literature on novel in English.

Equivalent to ENGL 437 (2010-2011 Catalog)

Prerequisite(s): Satisfaction of University requirements in 100-level English and in Mason Core literature.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ENGH 362 - Global Voices

Credits: 3 (RD)
Studies two cultures other than contemporary British or American culture through exploration of several textual forms such as
written literature, oral literature, film, folklore, or popular culture. Specific cultures vary, but at least one is non-Western.

Fulfills Mason Core requirement in global understanding.

Equivalent to ENGL 349 (2010-2011 Catalog)

Prerequisite(s): Satisfaction of University requirements in 100-level English and in Mason Core literature.

Notes: May be repeated for credit when topic is different.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ENGH 366 - The Idea of a World Literature

Credits: 3 (NR)
Examines history and current status of conceptions of world literature, considering such topics as non-European influences on Western literature, shifting horizons of comparative literature, rise of postcolonial literature, place of translation, and role of international institutions such as UNESCO and the Nobel Prize. Focuses on degree to which these initiatives have been successful in promoting global understanding of literary production.

Fulfills Mason Core requirement in global understanding.

Equivalent to ENGL 350 (2010-2011 Catalog)

Prerequisite(s): Satisfaction of University requirements in 100-level English and in Mason Core literature.

Notes: May be repeated for a maximum of 6 credits when topic is different with permission of department.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ENGH 367 - World Literatures in English

Credits: 3 (RT)
Study of selected topics, periods, genres, or authors in literature written in English, originating in Canada, Australia, New Zealand, South Asia, or Africa, for example.

Equivalent to ENGL 439 (2010-2011 Catalog)

Prerequisite(s): Satisfaction of University requirements in 100-level English and in Mason Core literature.

Notes: May be repeated for a maximum of 6 credits when topic is different with permission of department.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ENGH 368 - Modern Drama
Credits: 3 (NR)
Representative plays of most influential European and American dramatists, with emphasis on dramatic styles such as realism, expressionism, epic, and existentialism. Studies Chekhov, Ibsen, Strindberg, Brecht, and Beckett.

Equivalent to ENGL 448 (2010-2011 Catalog)

Prerequisite(s): Satisfaction of University requirements in 100-level English and in Mason Core literature.

ENGH 370 - Introduction to Documentary

Credits: 3 (NR)
Considers fundamental concepts of documentary form, style, and subject matter, ethical considerations, and theories of documentary. Includes close analysis of a series of representative film and television texts.

Fulfills Mason Core requirement in arts.

Equivalent to ENGL 331 (2010-2011 Catalog)

Prerequisite(s): Satisfaction of University requirements in 100-level English and in Mason Core literature.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ENGH 371 - Television Studies

Credits: 3 (NR)
Learn to identify and analyze formal elements of television. Learn how to situate and evaluate television in their cultural and historical contexts, interpret specific texts, and understand the relationships among broadcasting and networks, citizenship, audiences, and the public sphere.

Prerequisite(s): Satisfaction of University requirements in 100-level English and in Mason Core literature.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ENGH 372 - Introduction to Film

Credits: 3 (NR)
Introduces film medium as an art form.

Fulfills Mason Core requirement in arts.

Equivalent to ENGL 332 (2010-2011 Catalog)
Prerequisite(s): Satisfaction of University requirements in 100-level English and in Mason Core literature.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**ENGH 375 - Web Authoring and Design**

Credits: 3 (NR)
Provides a rhetorical foundation for web authoring and design in professional settings. Students will learn basic principles of writing for the web, information architecture, coding for accessibility, and usability testing. The production-oriented component of the course provides instruction in writing valid code and practice with web- and graphic-editing software tools.

Equivalent to ENGL 342 (2010-2011 Catalog)

Prerequisite(s): Satisfaction of University requirements in 100-level English and in Mason Core literature.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**ENGH 376 - Rhetoric and New Media**

Credits: 3 (NR)
Critical reading of new media texts and creation of technology-enriched texts in variety of rhetorical genres. Instructs students in rhetoric of new media, whether produced as hypertext, multimedia, or interactive digital productions. Technology-enriched activities present complex textuality of words, images, word-as-image, and kinetic text.

Equivalent to NCLC 343, ENGL 343 (2010-2011 Catalog)

Prerequisite(s): Satisfaction of University requirements in 100-level English and in Mason Core literature.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**ENGH 377 - Digital Creative Writing**

Credits: 3 (NR)
Combined workshop and studio course in technological and aesthetic issues of reading and writing hypermedia texts with emphasis on poetry, fiction, creative nonfiction, mixed genre, drama, or performance. Explores how genre meets hypertext and hypermedia in original creative work. Includes techniques in authoring interactive hypermedia projects using digital media tools.

Equivalent to ENGL 344 (2010-2011 Catalog)

Prerequisite(s): ENGL 396/ENGH 396 or permission of instructor.

Notes: May include reading assignments in hypertext and hypermedia theory.
ENGH 380 - Introduction to Writing and Rhetoric

Credits: 3 (NR)
Introduces students to advanced strategies for writing academic, professional, and civic documents. Develops expository, persuasive, organizational, and stylistic skills through analysis of rhetorical situations and understanding of the features and approaches of successful writing. Students develop a significant informational or argumentative writing project related to their major field, profession, or area of interest.

Equivalent to ENGL 380 (2010-2011 Catalog)

Prerequisite(s): ENGL 302/ENGH 302 is recommended.

ENGH 382 - Writing Nonfiction Genres

Credits: 3 (NR)
Advanced practice in analyzing and writing nonfiction forms such as essay, profile, article, and technical or scientific report, depending on student's interests.

Equivalent to ENGL 382 (2010-2011 Catalog)

Prerequisite(s): Satisfaction of University requirements in 100-level English and in Mason Core literature.

Notes: Not to be taken concurrently with ENGH 399 or 486, and not to be taken by students who have taken ENGH 486. Not a remedial course.

ENGH 384 - RS: Writing Ethnography

Credits: 3 (NR)
Study and practice of ethnographic writing. Students conduct ethnographic investigations and practice journal keeping, field note recording, interviewing, transcription, and interpretation. Includes introduction to current issues in ethnographic writing.

Designated as a research and scholarship intensive course.

Equivalent to ENGL 311 (2010-2011 Catalog)

Prerequisite(s): Satisfaction of University requirements in 100-level English and in Mason Core literature.
ENGH 386 - Editing for Audience, Style, and Voice

Credits: 3 (NR)
Introduces editing as a textual and rhetorical practice. Addresses copyediting, stylistics, and design; revisions based on audience, purpose, and genre; multimedia editing; interactions between editors and authors. (Not a remedial course in fixing sentence errors.)

Equivalent to ENGL 386 (2010-2011 Catalog)

Prerequisite(s): Satisfaction of University requirements in 100-level English and in Mason Core literature.

ENGH 388 - Professional and Technical Writing

Credits: 3 (NR)
Intensive study and practice in various forms of professional and technical writing, including proposals, reports, instructions, news releases, white papers, and correspondence. Emphasizes writing for variety of audiences, both lay and informed, and writing within various professional and organizational contexts.

Equivalent to ENGL 410 (2010-2011 Catalog)

Prerequisite(s): ENGL 302/ENGH 302.

ENGH 391 - Forms of Poetry

Credits: 3 (NR)
Intensive study of and practice in formal elements of poetry through analyzing models and weekly writing assignments. Depending upon specific instructor, can cover rhyme, meter, rhythm, lineation, stanza pattern, traditional and experimental forms, free verse and open-form composition, lyric, narrative, and dramatic modes.

Prerequisite(s): ENGH 396.

ENGH 392 - Forms of Fiction
Credits: 3 (NR)
Intensive practice in the elements and forms of fiction, through analyzing models and completing weekly writing assignments. Covers short stories, short-shorts, longer narratives, and such elements as plot, narrative technique, dialogue, point of view, voice and style, along with tools such as evocation, description, and epiphany.

Prerequisite(s): ENGH 396.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ENGH 393 - Forms of Nonfiction

Credits: 3 (NR)
Intensive study of and practice in various forms of nonfiction writing, through analyzing models and completing weekly writing assignments. Includes in-depth discussion and practice in such forms as biographies, documentaries, editorials, interviews, reports, reviews, and essays.

Prerequisite(s): ENGH 396.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ENGH 396 - Introduction to Creative Writing

Credits: 3 (NR)
Assignments include writing exercises and original works of poetry and fiction. May also include drama or creative nonfiction. Includes reading assignments in covered genres, and may include oral presentations or in-class performance. Original student work read and discussed in class and conference with instructor.

Fulfills Mason Core requirement in arts.

Equivalent to ENGL 396 (2010-2011 Catalog)

Prerequisite(s): Satisfaction of University requirements in 100-level English and in Mason Core literature.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ENGH 397 - Poetry Writing

Credits: 3 (NR)
Workshop in reading, writing poetry. Original student work read and discussed in class and conferences with instructor. Technical exercises in craft of poetry; may include reading assignments.

Equivalent to ENGL 397 (2010-2011 Catalog)

Prerequisite(s): ENGL 396/ENGH 396 or permission of instructor.
ENGH 398 - Fiction Writing

Credits: 3 (NR)
Workshop course in reading and writing fiction. Original student work read and discussed in class and conferences with instructor. Includes technical exercises in craft of fiction; may include reading assignments.

Equivalent to ENGL 398 (2010-2011 Catalog)

Prerequisite(s): ENGL 396/ENGH 396 or permission of instructor.

ENGH 399 - Creative Nonfiction Writing

Credits: 3 (NR)
Workshop in reading and writing of nonfiction that makes use of literary techniques normally thought of in context of fiction, such as evoking senses and use of dialog. Original student work read and discussed in class and conferences with instructor. Includes technical exercises in artful creating of nonfiction; may include reading assignments.

Equivalent to ENGL 399 (2010-2011 Catalog)

Prerequisite(s): ENGL 309/ENGH 382 or ENGL 396/ENGH 396 or permission of instructor.

ENGH 400 - Honors Seminar

Credits: 3 (RT)
Emphasizes growth in awareness of literary scholarship as a discipline, providing opportunity for advanced study in literary and cultural criticism. Covers variety of topics, including consideration of a literary period, genre, author, work, theme, discourse, or critical theory.

Equivalent to ENGL 414 (2010-2011 Catalog)

Prerequisite(s): Permission of department. Only open to English department honors students.

Notes: May be repeated for a maximum of 6 credits.
ENGH 401 - RS: Honors Thesis Writing Seminar

Credits: 3 (NR)

Provides guidance in research methods to students writing an honor thesis as well as workshop for critiquing works in progress. May be taken concurrently with another approved course offered by English Department, in which case thesis work may substitute for some assigned work in second course by arrangement of both instructors.

Designated as a research and scholarship intensive course.

Equivalent to ENGL 401 (2010-2011 Catalog)

Prerequisite(s): Acceptance into English honors; permission of department and ENGL 414/ENGH 400 or ENGL 416/ENGH 402.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ENGH 402 - Honors Independent Study

Credits: 1-3 (NR)

Intensive writing course. Honors students concentrating in nonfiction writing and editing may use English 416 to replace English 414 as first course in honors program.

Equivalent to ENGL 416 (2010-2011 Catalog)

Prerequisite(s): Admission to honors program in English, and permission of instructor

Notes: Honors students concentrating in creative writing may use English 402 to replace 401 as second course in honors program.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 1-12

ENGH 408 - Topics in Criticism

Credits: 3 (RT)

Studies selected approach to literary criticism, as announced, with exercises in critical analysis. Includes new criticism, structuralism, psychoanalysis, and Marxism.

Equivalent to ENGL 494 (2010-2011 Catalog)

Prerequisite(s): Satisfaction of University requirements in 100-level English and in Mason Core literature.

Notes: May be repeated when topic is different with permission of department.
ENGH 409 - Literary Modes

Credits: 3 (RT)
Theory and practice of such modes as tragedy, comedy, tragicomedy, romance, and satire, considered in separate semesters and drawn from variety of periods ranging from biblical times to present, with examples from drama, poetry, and fiction.

Equivalent to ENGL 495 (2010-2011 Catalog)

Prerequisite(s): Satisfaction of University requirements in 100-level English and in Mason Core literature.

Notes: May be repeated for a maximum of 12 credits with permission of department.

ENGH 412 - Topics in Folklore Studies

Credits: 3 (RT)
Exploration of various aspects of folklore and folklife such as folklore and literature, folk arts, folk song, and material culture.

Equivalent to ENGL 491 (2010-2011 Catalog)

Prerequisite(s): Satisfaction of University requirements in 100-level English and in Mason Core literature.

Notes: May be repeated for a maximum of 6 credits when topic is different with permission of department.

ENGH 414 - Folklore of the Spirit World

Credits: 3 (NR)
Examines traditional narratives and beliefs about otherworldly experiences and beings. Introduces traditional narrative theory and discusses how people construct and tell their stories about encounters with the supernatural. Considers the conflicts, worldviews, and competing values these stories bring into material form. Focuses on traditions from around the world as well as on personal experiences of students.

Equivalent to ENGL 480 (2010-2011 Catalog)

Prerequisite(s): Satisfaction of University requirements in 100-level English and in Mason Core literature.

Notes: May be repeated for a maximum of 12 credits with permission of department.
ENGH 415 - Folk Arts and Folk Artists

Credits: 3 (NR)
Examines the traditional arts of everyday life, such as festive foods, mementos and other objects of memory, textile arts, pottery, carving in wood and stone, roadside shrines, and more. Explores the folk aesthetics of group-based creativity through the lenses of biography, history, literature, and folklore studies. Considers traditional objects as narratives in material form. Examples drawn from multiple cultures as well as traditions in students' own lives.

Equivalent to ENGL 481 (2010-2011 Catalog)

Prerequisite(s): Satisfaction of University requirements in 100-level English and in Mason Core literature.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ENGH 416 - Ethnicity and Migration in Folklore

Credits: 3 (NR)
Explores U.S. immigration trends and the historical basis for the concepts of ethnicity, identity, and immigration in folklore scholarship, literature, film, and popular media. The course explores at least three of the following ethnic groups: Latino, Asian, Jewish, European, Arab, or African.

Equivalent to ENGL 479 (2010-2011 Catalog)

Prerequisite(s): Satisfaction of University requirements in 100-level English and in Mason Core literature.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ENGH 418 - Cultural Constructions of Sexualities

Credits: 3 (NR)
Introductory survey of cultural, literary, and theoretical constructions of sexuality that seek to complicate traditionally fixed categories of identity. Examines various representations of human sexuality, with particular attention to intersections with gender, race, ethnicity, nationality, and class.

Equivalent to WMST 302, ENGL 338 (2010-2011 Catalog)

Prerequisite(s): Satisfaction of University requirements in 100-level English and in Mason Core literature.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ENGH 419 - Topics in Popular Literature
Credits: 3 (RT)
Studies specific topic or theme in popular literature.
Equivalent to ENGL 493 (2010-2011 Catalog)

Prerequisite(s): Satisfaction of University requirements in 100-level English and in Mason Core literature.

Notes: May be repeated for a maximum of 6 credits when topic is different with permission of department.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**ENGH 421 - Topics in Medieval and Renaissance Literature**

Credits: 3 (RD)
Studies selected topics, genres, themes or authors in medieval or Renaissance literature and culture.
Equivalent to HIST 431/FRLN 431 and ENGL 431 (2010-2011 Catalog)

Prerequisite(s): Satisfaction of University requirements in 100-level English and in Mason Core literature.

Notes: May be taken for credit by English or history majors. Specific topic may vary. Primary emphasis is literary or historical, depending on discipline of instructor. May consider relevant material from philosophy, theology, and art. May be repeated for a maximum of 6 credits when topic is different.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**ENGH 422 - Chaucer**

Credits: 3 (NR)
Major works of Chaucer, with emphasis on *The Canterbury Tales*.
Equivalent to ENGL 471 (2010-2011 Catalog)

Prerequisite(s): Satisfaction of University requirements in 100-level English and in Mason Core literature.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**ENGH 424 - Spenser**

Credits: 3 (NR)
Poetry of Edmund Spenser, with central emphasis on *The Faerie Queene*.
Equivalent to ENGL 472 (2010-2011 Catalog)
**Prerequisite(s):** Satisfaction of University requirements in 100-level English and in Mason Core literature.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**ENGH 428 - Milton**

Credits: 3 (NR)  
Milton's major poetic works, with emphasis on *Paradise Lost*.

Equivalent to ENGL 474 (2010-2011 Catalog)

**Prerequisite(s):** Satisfaction of University requirements in 100-level English and in Mason Core literature.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**ENGH 431 - Topics: British Literary Periods**

Credits: 3 (RT)  
In-depth study of selected period of British literature. In addition to literary examples, materials may be chosen from art, philosophy, or popular culture of the time.

Equivalent to ENGL 408 (2010-2011 Catalog)

**Prerequisite(s):** Satisfaction of University requirements in 100-level English and in Mason Core literature.

**Notes:** May be repeated for a maximum of 6 credits when topic is different with permission of department.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**ENGH 432 - Topics: British Authors**

Credits: 3 (RT)  
Study of one or two major figures in British literature.

Equivalent to ENGL 477 (2010-2011 Catalog)

**Prerequisite(s):** Satisfaction of University requirements in 100-level English and in Mason Core literature.

**Notes:** May be repeated for a maximum of 12 credits when topic is different with permission of department.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0
**ENGH 441 - Topics: American Authors**

Credits: 3 (RT)
Study of one or two major figures in American literature.

Equivalent to ENGL 478 (2010-2011 Catalog)

Prerequisite(s): Satisfaction of University requirements in 100-level English and in Mason Core literature.

Notes: May be repeated for a maximum of 6 credits when topic is different with permission of department.

Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0

**ENGH 442 - Topics: American Literary Periods**

Credits: 3 (RT)
In-depth study of selected period of American literature. In addition to literary examples, materials may be chosen from art, philosophy, or popular culture of time.

Equivalent to ENGL 429 (2010-2011 Catalog)

Prerequisite(s): Satisfaction of University requirements in 100-level English and in Mason Core literature.

Notes: May be repeated for a maximum of 6 credits when topic is different with permission of department.

Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0

**ENGH 451 - Science Fiction**

Credits: 3 (NR)
Major works of science fiction in terms of mode, themes, and narrative techniques, especially role of hypothesis in science fiction. Focuses on novels, short stories from early 19th century to present.

Equivalent to ENGL 492 (2010-2011 Catalog)

Prerequisite(s): Satisfaction of University requirements in 100-level English and in Mason Core literature.

Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0

**ENGH 452 - Critical Study of Children’s Literature**

Credits: 3 (NR)
Examines the history and criticism of children's literature and the strategies used by authors of children's literature to address
their audience. Selected readings range from Puritan to contemporary writing for children, as well as influential works in educational philosophy, such as those by Locke and Rousseau.

Equivalent to ENGL 460 (2010-2011 Catalog)

**Prerequisite(s):** Satisfaction of University requirements in 100-level English and in Mason Core literature.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**ENGH 453 - Topics in Fiction**

Credits: 3 (RT)  
Study of selected topics, periods, or authors.

Equivalent to ENGL 459 (2010-2011 Catalog)

**Prerequisite(s):** Satisfaction of University requirements in 100-level English and in Mason Core literature.

**Notes:** May be repeated for a maximum of 6 credits when topic is different with permission of department.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**ENGH 454 - Topics in Poetry**

Credits: 3 (RT)  
Study of selected topics, periods, or poets.

Equivalent to ENGL 468 (2010-2011 Catalog)

**Prerequisite(s):** Satisfaction of University requirements in 100-level English and in Mason Core literature.

**Notes:** May be repeated for a maximum of 6 credits when topic is different with permission of department.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**ENGH 455 - Topics in Drama**

Credits: 3 (RT)  
Studies selected topics, periods, or playwrights.

Equivalent to ENGL 449 (2010-2011 Catalog)

**Prerequisite(s):** Satisfaction of University requirements in 100-level English and in Mason Core literature.
Notes: May be repeated for a maximum of 6 credits when topic is different with permission of department.

**ENGH 456 - Topics in Literary Nonfiction**

Credits: 3 (RD)
Special studies in literary nonfiction by topic, such as the personal essay, New Journalism, the "nonfiction novel," the memoir, or historical traditions of literary nonfiction.

Equivalent to ENGL 385 (2010-2011 Catalog)

**Prerequisite(s):** Satisfaction of University requirements in 100-level English and in Mason Core literature.

Notes: May be repeated for a maximum of 6 credits when topic is different.

**ENGH 459 - Internship**

Credits: 1-3 (RT)
Under supervision of a faculty director, students report and reflect on their work as interns at organizations of their choosing, usually in writing and/or editing positions. For 3 credits, students work on site at least 135 hours as specified in the agreement developed with the internship supervisor and approved by the faculty director.

Equivalent to ENGL 498 (2010-2011 Catalog)

**Prerequisite(s):** Permission of internship director. 60 credits. English majors need 18 credits of English (3 credits of 100-level English course; 3-6 credits of 200-level English courses; 3 credits of ENGL 302/ENGH 302, and 6-9 credits of upper-level English courses). Non-English majors must meet the same requirements, except that they replace one upper-level English course with an upper-level course in their major.

Notes: Contact the English Department one semester prior to enrollment. No more than 3 credits can be counted in concentration or English minor. May be repeated for a total of 6 credits with permission of department.

**When Offered:** Fall, Spring

**ENGH 470 - Topics in Film/Media History**

Credits: 3 (RT)
Advanced studies of development of film language, both as cultural practice and medium for formal innovation. Topics might include studies of national cinemas, historical periods, genres, or individual directors.
Designated as a research and scholarship intensive course.

Equivalent to ENGL 421 (2010-2011 Catalog)

**Prerequisite(s):** ENGL 332/ENGH 372 or permission of instructor

**Notes:** May be repeated for a maximum of 6 credits when topic is different.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**ENGH 472 - Topics in Film/Media Theory**

Credits: 3 (RT)  
Advanced studies of theories about various aspects of production, distribution, and reception of film-mediated experiences. Topics may include theories of spectator, semiotics, feminist film theory, theories of narrativity, structuralist film theory, or deconstruction.

Equivalent to ENGL 422 (2010-2011 Catalog)

**Prerequisite(s):** ENGL 332/ENGH 372 or permission of instructor.

**Notes:** May be repeated for a maximum of 6 credits when topic is different.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**ENGH 474 - Topics in Film/Media Studies**

Credits: 3 (RT)  
American and foreign films selected by type, period, or director with emphasis varying from year to year. Required viewings, student discussion, and written critiques.

Equivalent to ENGL 490 (2010-2011 Catalog)

**Prerequisite(s):** ENGL 332/ENGH 372 or permission of instructor.

**Notes:** May be repeated for a maximum of 6 credits with permission of department.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**ENGH 486 - RS: Writing Nonfiction for Publication**

Credits: 3 (NR)  
Workshop course. Intensive practice in advanced nonfiction writing; emphasizes writing for publication. Occasional special topics sections in such forms as autobiography and scientific writing.
Designated as a research and scholarship intensive course.

Equivalent to ENGL 489 (2010-2011 Catalog)

**Prerequisite(s):** ENGL 309/ENGH 382 or ENGL 399/ENGH 399 or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**ENGH 488 - Topics in Writing and Rhetoric**

Credits: 3 (RD)
Advanced studies in rhetoric and writing. Introduces key rhetorical terminology and examines how texts construct meaning and how those meanings are determined within social contexts. Topics may include the relationship between rhetorics and poetics, rhetoric and new media, histories of rhetoric, global rhetorics, argument theory, discourse analysis, theories of technical communication, or advanced theories of composition and pedagogy.

Equivalent to ENGL 496 (2010-2011 Catalog)

**Prerequisite(s):** Satisfaction of University requirements in 100-level English and in Mason Core literature.

**Notes:** May be repeated for a maximum of 6 credits when topic is different with permission of department.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**ENGH 492 - Advanced Fiction Writing Workshop**

Credits: 3 (RD)
Workshop; intensive practice in creative writing and study of creative process. Intended for students already writing original creative work.

Equivalent to ENGL 458 (2010-2011 Catalog)

**Prerequisite(s):** ENGL 398/ENGH 398 and manuscript review.

**Notes:** Enrollment is controlled. Submit 8-10 pages of fiction to instructor for review. May be repeated for a maximum of 6 credits with permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**ENGH 494 - Advanced Poetry Writing Workshop**

Credits: 3 (RD)
Intensive practice in the craft of poetry and study of the imagination in creative process. Intended for students already writing
original poetry.

Equivalent to ENGL 464 (2010-2011 Catalog)

**Prerequisite(s):** ENGL 397/ENGH 397 and manuscript review.

**Notes:** Enrollment is controlled. Submit 8-10 pages of poetry to instructor for review. May be repeated for a maximum of 6 credits with permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**ENGH 495 - Capstone and Thesis**

Credits: 3 (NR)  
Presentations of original work for critique by peers and faculty. Students synthesize what they have learned during prior work in the program through workshops for final revisions of manuscripts for the BFA portfolio. Students submit the revised manuscripts as their final submission for evaluation by faculty. Students receive guidance in research methods as they investigate the lives of writers and learn the procedures for such tasks as submitting original work for publication and applying for jobs.

**Prerequisite(s):** ENGH 396; ENGL 391, 392, or 393; ENGH 397, 398, and 399.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**ENGH 497 - Topics in Creative Writing**

Credits: 3 (RT)  
Intensive practice in creative writing and study of creative process. Workshop course. Concentrates on specialized literary type other than short story or poetry such as playwriting, screenwriting, children's literature, travel literature, autobiography, gothic novel, or translation.

Equivalent to ENGL 497 (2010-2011 Catalog)

**Prerequisite(s):** ENGL 396/ENGH 396 or equivalent and permission of instructor.

**Notes:** For students already writing original creative work. Students must submit typed manuscript at least one week before registration. May be repeated for a maximum of 6 credits.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**ENGH 499 - Independent Study**

Credits: 1-6 (RT)  
Intensive study of particular author, genre, period, or critical or theoretical problem in literature or linguistics, to be conducted by
student in close consultation with instructor. Student produces at least one substantial piece of written work during semester on
research findings.

Equivalent to ENGL 499 (2010-2011 Catalog)

**Prerequisite(s):** Permission of department and instructor.

**Notes:** Individualized section form required. May be repeated for a maximum of 6 credits with approval of department.

**Hours of Lecture or Seminar per week:** 1-6
**Hours of Lab or Studio per week:** 0

---

**ENGH 501 - Introduction to Professional Writing and Rhetoric**

Credits: 3 (NR)
Provides historical and theoretical background in professional writing and editing in a seminar format. Explores professional
writing's emergence as a field of scholarship and practice, emphasizes the relationships between rhetorical theories and practice,
and introduces students to bibliographic research in the field.

Equivalent to ENGL 501 (2010-2011 Catalog)

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0

---

**ENGH 502 - Research Methods in Rhetoric and Professional Writing**

Credits: 3 (NR)
Introduces theory, methods, and ethics of conducting research in rhetoric and professional writing. Students learn to conduct and
evaluate research that may include rhetorical analysis, discourse analysis, historical methods, ethnography, user-centered design,
document and usability testing, and others.

Equivalent to ENGL 502 (2010-2011 Catalog)

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0

---

**ENGH 503 - Theory and Practice of Editing**

Credits: 3 (NR)
Instruction in revising, editing, and preparing specialized writing for printing. Emphasizes methods of achieving clarity,
accuracy, and completeness. Lecture and discussion on editing and printing techniques; practical exercise in revision, layout, and
production.

Equivalent to ENGL 503 (2010-2011 Catalog)

**Prerequisite(s):** 6 credits of English courses numbered above 300, including one of 382, 384, 396, 397, 398, 388, 492, 494, 486,
or 497; or permission of department.
ENGH 504 - Internship

Credits: 1-6 (RD)
Under supervision of a faculty director, students report and reflect on their work as interns at organizations of their choosing, usually in writing and/or editing positions. For 3 credits, students work on site at least 135 hours as specified in the agreement developed with the internship supervisor and approved by the faculty director.

Equivalent to ENGL 504 (2010-2011 Catalog)

Prerequisite(s): Permission of internship director.

Notes: Contact the English Department one semester prior to enrollment. May be repeated for a maximum of 6 credits.

ENGH 505 - Document Design

Credits: 3 (NR)
Theory and practice of using computer programs to design and produce publications including brochures, fliers, newsletters, and small magazines. Includes readings, writing papers, and producing and editing copies and original publications.

Equivalent to ENGL 505 (2010-2011 Catalog)

ENGH 506 - Research for Narrative Writing

Credits: 3 (NR)
Combines study of basic research tools with field work and writing workshop experience. Helps students develop techniques and skills necessary for writing a research-dependent project of sufficient complexity to be of book or long essay length. Emphasis on finding story behind facts, using material from numerous sources.

Equivalent to ENGL 506 (2010-2011 Catalog)

Prerequisite(s): ENGL 565/ENGH 565 or ENGL 566/ENGH 566, or permission of instructor.
**ENGH 507 - Web Authoring and Design**

Credits: 3 (NR)
Provides a rhetorical foundation for web authoring and design in professional settings. Teaches basic principles of writing for the web, information architecture, coding for accessibility, and usability testing. Production-oriented component provides instruction in writing valid code and practice with web- and graphic-editing software tools.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**ENGH 508 - Digital Rhetoric**

Credits: 3 (NR)
Provides an examination of major works on digital rhetoric and digital media framed by contemporary rhetorical theories that inform the emergent field of digital rhetoric. Course work includes projects that engage in the design, analysis, and assessment of digital media.

Equivalent to ENGL 508 (2010-2011 Catalog)

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**ENGH 511 - Styles and Modes in Literary History**

Credits: 3 (NR)
Historical consideration of principal styles, modes, and intellectual paradigms in literary and cultural texts.

Equivalent to ENGL 511 (2010-2011 Catalog)

**Prerequisite(s):** 15 credits of advanced undergraduate work and approval of the department.

**Notes:** Baccalaureate degree highly recommended.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**ENGH 512 - Issues in Literature and Philosophy**

Credits: 3 (NR)
Interdisciplinary seminar offering opportunity to arrive at a personal synthesis of work previously done in philosophy and literature. Topic changes yearly, but focuses on themes or methodologies common to both disciplines.

Equivalent to ENGL 512 (2010-2011 Catalog)

**Prerequisite(s):** Graduate or senior standing, 6 credits of upper-level English, 6 credits of philosophy, and permission of instructor.
**ENGH 513 - Advanced Special Topics in English**

Credits: 3 (RT)
Intensive study of topics involving literary or other texts such as film, television, opera, and folklore.

Equivalent to ENGL 513 (2010-2011 Catalog)

**Prerequisite(s):** 15 credits of advanced undergraduate English courses and permission of department; or baccalaureate degree.

**Notes:** May be repeated for a maximum of 6 credits with permission of department.

**ENGH 514 - Theories of Comparative Literature**

Credits: 3 (NR)
Intensive study of major theories of comparative literature with special emphasis on development and redefinition of comparative outlook, from Great Books and Western Canon to transnationalism, multiculturalism, and intercultural studies.

Equivalent to CL 514

**Prerequisite(s):** CL 300 and senior standing, or baccalaureate degree; or permission of instructor.

**ENGH 526 - Special Topics in the History and Criticism of Children's Literature**

Credits: 3 (RD)
Focuses on the history and criticism of children's literature by concentrating on selected historical periods and literary modes such as "Golden Age" children's literature, contemporary fantastic and children's literature, or Romantic and Victorian children's literature.

Equivalent to ENGL 526 (2010-2011 Catalog)

**Notes:** May be repeated for a maximum of 6 credits with permission of instructor.
**ENGH 551 - Literary Criticism**

Credits: 3 (NR)
Studies in selected critical theories pertinent to textual and cultural analysis.

Equivalent to ENGL 551 (2010-2011 Catalog)

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**ENGH 555 - Introduction to Cinema Studies**

Credits: 3 (NR)
Advanced introduction to film study, including overview of approaches to study of cinema, methods of close analysis, basic concepts of film form and style, and contemporary theories of film.

Equivalent to ENGH 372 and ENGL 332 (2010-2011 catalog)

**Notes:** Students who have taken ENGL 332/ENGH 372 may not take this course for credit.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**ENGH 564 - Form of Poetry**

Credits: 3 (NR)
Students seeking permission must submit typed manuscript of original poetry. Intensive study of and practice in formal elements of poetry through analyzing models and weekly or biweekly writing assignments. Intended for students already writing original poetry. Covers rhyme, meter, rhythm, lineation, stanza pattern, traditional and experimental forms, free verse and open-form composition, lyric, narrative, and dramatic modes.

Equivalent to ENGL 564 (2010-2011 Catalog)

**Prerequisite(s):** Admission to MFA concentration in poetry; ENGL 464/ENGH 494 or equivalent, or permission of instructor.

**Notes:** Other interested students should contact the English Department at (703) 993-1180.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**ENGH 565 - Forms of Nonfiction**

Credits: 3 (NR)
Intensive study of and practice in various forms of nonfiction writing through analyzing models and weekly writing assignments. Includes biographies, documentaries, editorials, interviews, reports, reviews, and essays.
**ENH 566 - Forms of Fiction**

Credits: 3 (NR)
Students seeking permission must submit typed manuscript of original fiction. Intensive practice in formal elements of fiction through analyzing models and weekly or biweekly writing assignments. Intended for students already writing original fiction. Covers description, narration, plot, dialogue, voice, point of view, style, epiphany, and antifiction techniques.

Equivalent to ENGL 566 (2010-2011 Catalog)

Prerequisite(s): Admission to MFA concentration in fiction; ENGL 458/ENGH 492 or equivalent or permission of instructor.

Notes: Other interested graduate students should contact the English Department at (703) 993-1180.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

---

**ENH 590 - Topics in Folk Narrative**

Credits: 3 (RD)
Explores types of folk narratives such as mythology, folktale, fairy tale, legend, family narrative, personal narrative. Focuses on tales from around the world. Considers aspects of storytelling such as storytelling as performance, storytelling as therapeutic modality, and storytelling during crises and conflicts.

Equivalent to ENGL 590 (2010-2011 Catalog)

Notes: May be repeated for a maximum of 9 credits when topic is different.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

---

**ENH 591 - Topics in Folklore Studies**

Credits: 3 (RT)
Explores folklore and folklife topics such as folk narrative and storytelling, folklore and literature, folksong, and folk arts.

Equivalent to ENGL 591 (2010-2011 Catalog)
Notes: May be repeated for a maximum of 12 credits when topic is different.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**ENGH 592 - Historical Studies of the English Language**

Credits: 3 (NR)
Either a chronological survey of development of English from Old and Middle English to Modern English and American English; or intensive study of grammar and syntax of Old English as literary language in representative texts of period.

Equivalent to ENGL 592 (2010-2011 Catalog)

Notes: May be repeated for credit with permission of department.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**ENGH 604 - Internship in Folklore**

Credits: 1-6 (NR)
Unpaid, approved work-study positions at specific sites arranged by interested students and their advisor. Under supervision of faculty advisor, student works as intern with site supervisor in agency of student's choosing, given advisor's permission.

Equivalent to ENGL 604 (2010-2011 Catalog)

Prerequisite(s): A course in folklore, which may be taken concurrently.

Notes: For 3 credits, students work 120 hours on site and write 3,500 words, or equivalent, given contract with advisor. Contact English Department one semester prior to enrollment.

Hours of Lecture or Seminar per week: 1-12
Hours of Lab or Studio per week: 0

**ENGH 608 - Craft Seminars**

Credits: 3 (RT)
Non-MFA students seeking permission must submit manuscript of original written work in appropriate genre. Various sections offer work in fiction, poetry, and nonfiction, each focusing in different ways on the practices and the craft development of writers. Numerous writing assignments mixed with reading followed by careful analytical and craft discussions.

Equivalent to ENGL 608 (2010-2011 Catalog)

Prerequisite(s): Admission to MFA program or ENGL 464/ENGH 494, ENGL 458/492, ENGL 489/486, or permission of instructor. Non-MFA students must submit manuscript for review prior to registration.

Notes: Assignments vary with genre and specific topic. May be taken concurrently with ENGH 564, 565, 566.
ENGH 610 - Proseminar in Teaching the Reading of Literature

Credits: 3 (NR)
Methods of teaching literature. Includes study of methods of literary analysis, and ways of developing student responses to literature, with some classroom practice.

Equivalent to ENGL 610 (2010-2011 Catalog)

Notes: Does not satisfy Virginia certification requirement in diagnostic or developmental reading.

ENGH 611 - Studies in Rhetoric

Credits: 3 (NR)
Reading and discussion of several major texts that address patterns of discourse, communication, and other issues of rhetoric.

Equivalent to ENGL 611 (2010-2011 Catalog)

Notes: Content varies. Recent offerings include 20th century rhetoric, collaborative writing, and computers and rhetoric. May be repeated for credit with permission of department.

ENGH 612 - Cultures of Professional Writing

Credits: 3 (NR)
Students work as ethnographers, studying selected sites where people write professionally, and analyzing ways production and reception of writing contribute to and result from local culture of each site. Lecture and workshop format.

Equivalent to ENGL 612 (2010-2011 Catalog)

ENGH 613 - Technical Communication
Credits: 3 (NR)
Intensive study of theory and practice of technical and scientific writing, with emphasis on writing for variety of audiences. Focuses on writing and evaluating formal reports, articles for lay and technical audiences, proposals, theses, manuals, and other forms of technical prose.

Equivalent to ENGL 613 (2010-2011 Catalog)

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**ENGH 614 - Internship in the Teaching of Writing**

Credits: 1-3 (NR)
Internships provide experience working in a teaching program such as school or writing center. Under direction of faculty member, students must secure cooperation of on-site supervisor.

Equivalent to ENGL 614 (2010-2011 Catalog)

**Notes:** Students work minimum 3 hours per week per credit to be awarded, keep a weekly reflective and analytical log, and communicate regularly with faculty director. May not be repeated for credit.

**Hours of Lecture or Seminar per week:** 1-5  
**Hours of Lab or Studio per week:** 0

---

**ENGH 615 - Proseminar in Composition Instruction**

Credits: 3 (NR)
Methods of teaching expository writing. Includes consideration of planning courses, practice in teaching and grading papers, and study of recent developments in teaching writing.

Equivalent to ENGL 615 (2010-2011 Catalog)

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**ENGH 616 - Nonfiction Writing Workshop**

Credits: 1-6 (RD)
Intensive practice in craft of nonfiction and study of creative process. Intended for students already familiar with traditional and contemporary nonfiction, and already writing original nonfiction.

Equivalent to ENGL 616 (2010-2011 Catalog)

**Prerequisite(s):** ENGL 565/ENGH 565, which may be taken concurrently, and permission of instructor, except for MFA students in concentration.

**Notes:** At discretion of instructor, reading may be required. May be repeated for credit with permission of department.
ENGH 617 - Poetry Writing Workshop

Credits: 1-6 (RD)
Intensive practice in craft of poetry and study of creative process. Intended for students already familiar with traditional and contemporary poetic modes and already writing original poetry.

Equivalent to ENGL 617 (2010-2011 Catalog)

Prerequisite(s): ENGL 564/ENGH 564, which may be taken concurrently, and permission of instructor, except for MFA students in concentration.

Notes: At discretion of instructor, reading may be required. May be repeated for credit with permission of department.

ENGH 618 - Fiction Writing Workshop

Credits: 1-6 (RD)
Intensive practice in craft of fiction and study of creative process. Intended for students already familiar with traditional and contemporary fiction and already writing original fiction.

Equivalent to ENGL 618 (2010-2011 Catalog)

Prerequisite(s): Admission to MFA concentration in fiction or ENGL 566/ENGH 566, which may be taken concurrently, or permission of instructor. Other interested graduate students should contact the English Department at (703) 993-1180.

Notes: At discretion of instructor, reading may be required. May be repeated for credit with permission of department.

ENGH 619 - Special Topics in Writing

Credits: 3 (RT)
Workshop course. Intensive practice in creative writing and study of creative process. Concentrates on specialized literary type other than short story, such as essay, playwriting, film writing, children's literature, travel literature, autobiography, gothic novel, and translation.

Equivalent to ENGL 619 (2010-2011 Catalog)

Prerequisite(s): Admission to MFA program.
Notes: Intended for students already writing original creative work. Other interested graduate students should contact the English department at (703) 993-1180. May be repeated for credit with permission of department.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ENGH 620 - Topics in Pedagogy

Credits: 3 (RT)
Offers advanced study of teaching practices in literature, composition, creative writing, linguistics, folklore, or film and media studies.

Notes: May be repeated for a maximum of 12 credits when topic is different.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ENGH 625 - British Medieval

Credits: 3 (RD)
Selected literary authors, works, or movements from 1300 to 1500, studied in Middle English.

Equivalent to ENGL 625 (2010-2011 Catalog)

Notes: Topics vary. May be repeated for a maximum of 6 credits when topic is different with permission of department.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ENGH 630 - Early Modern

Credits: 3 (RT)
Selected literary authors, works, or movements of English Renaissance.

Equivalent to ENGL 630 (2010-2011 Catalog)

Notes: Topics vary. May be repeated for a maximum of 9 credits with permission of department.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ENGH 635 - Eighteenth-Century British
Credits: 3 (RD)
Selected English literary authors, works, or movements of the 18th century.
Equivalent to ENGL 635 (2010-2011 Catalog)

Notes: Topic varies. May be repeated for a maximum of 6 credits when topic is different with permission of department.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**ENGH 640 - Nineteenth-Century British**

Credits: 3 (RD)
Selected English literary authors, works, or movements of the 19th century.
Equivalent to ENGL 640 (2010-2011 Catalog)

Notes: Topics vary. May be repeated for a maximum of 6 credits when topic is different with permission of department.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**ENGH 645 - Twentieth-Century British**

Credits: 3 (RD)
Selected English literary authors, works, or movements of the 20th century.
Equivalent to ENGL 645 (2010-2011 Catalog)

Notes: Topics vary. May be repeated for a maximum of 6 credits when topic is different with permission of department.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**ENGH 650 - Seventeenth-Century American**

Credits: 3 (RD)
Selected literary authors, works, or movements of the "new world" before 1800.
Equivalent to ENGL 650 (2010-2011 Catalog)

Notes: Topics vary. May be repeated for a maximum of 6 credits when topic is different with permission of department.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
ENGH 655 - Nineteenth-Century American

Credits: 3 (RD)
Selected American literary authors, works, or movements of 19th century.

Equivalent to ENGL 655 (2010-2011 Catalog)

Notes: Topics vary. May be repeated for a maximum of 6 credits when topic is different with permission of department.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ENGH 660 - Twentieth-Century American

Credits: 3 (RT)
Selected American literary authors, works, or movements of the 20th century.

Equivalent to ENGL 660 (2010-2011 Catalog)

Notes: Topics vary. May be repeated for credit when topic is different with permission of department.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ENGH 661 - Advanced Survey in African American Literature

Credits: 3 (RD)
Intensive study of a period in African-American literature between 1800 and present with focus to be determined by instructor. Considers different genres including autobiography, fiction, drama, poetry, essays, and oral artifacts such as slave songs, spirituals, and hip-hop.

Equivalent to ENGL 661 (2010-2011 Catalog)

Notes: May be repeated for a maximum of 6 credits when topic is different with permission of department.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ENGH 665 - Texts in Global Contexts

Credits: 3 (RT)
Examines various cultural texts such as literature, drama, film, and folklore in terms of transnational circulation or production and reception in locations around the world other than Britain and United States. Engages with issues arising from globalization of English and interplay of global cultures.

Equivalent to ENGL 665 (2010-2011 Catalog)
Notes: Texts studied in English or English translation. May be repeated for a maximum of 6 credits with permission of department.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**ENGH 670 - Visual Culture: Theories and Histories**

Credits: 3 (RT)
Advanced study in histories of visual representation including film, television, and video, and in theories of production and circulation of meanings in visual culture.

Equivalent to ENGL 670 (2010-2011 Catalog)

Prerequisite(s): Introductory film course, or permission of instructor.

Notes: May be repeated for a maximum of 6 credits with permission of department.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**ENGH 675 - Feminist Theory and Criticism**

Credits: 3 (NR)
Presents historically based introduction to major debates within feminist theory and criticism. Stressing gender in literature and its interpretation, explores diverse collection of feminist interpretive practices.

Equivalent to ENGL 675 (2010-2011 Catalog)

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**ENGH 676 - Introduction to Cultural Studies**

Credits: 3 (NR)
Advanced introduction to theoretical practice known as cultural studies, with attention to role in textual studies. Part of interdisciplinary cultural studies PhD and MA in English programs.

Equivalent to ENGL 676 (2010-2011 Catalog)

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**ENGH 681 - Advanced Topics in Folklore Studies**
Explores advanced folklore and folklife topics such as bodylore, sense of place, festival, folk drama, and folk narrative studies.

Equivalent to ENGL 681 (2010-2011 Catalog)

Notes: May be repeated for a maximum of 12 credits when topic is different.

ENGH 684 - Proseminar in Poetry

Credits: 3 (RD)
For students working on independent reading and research in poetry. Designed for students preparing to take the MFA reading exam in poetry but open to others with comparable reading projects in poetry.

Equivalent to ENGL 684 (2010-2011 Catalog)

Notes: May be repeated for a maximum of 6 credits.

ENGH 685 - Selected Topics, Movements, or Genres of Literature in English

Credits: 3 (RT)
Content varies.

Equivalent to ENGL 685 (2010-2011 Catalog)

Notes: May be repeated for a maximum of 12 credits with permission of department.

ENGH 690 - Special Topics in Writing and Rhetoric

Credits: 3 (RT)
Includes readings and discussion in a wide range of topics related to writing and rhetoric. May focus on a specific theory, method or practice in writing and rhetoric.

Notes: May be repeated for credit when topic varies.
ENGH 695 - Northern Virginia Writing Project Inservice Program

Credits: 1-3 (RT)
Offered at request of school division or other education agency to assist teachers in improving student writing and use of writing to learn.

Equivalent to EDUC 695; ENGL 695 (2010-2011 Catalog)

**Prerequisite(s):** Admission to graduate program, or permission of department.

**Notes:** Content varies. May be repeated for credit with permission of department.

**Hours of Lecture or Seminar per week:** 1-5
**Hours of Lab or Studio per week:** 0

---

ENGH 696 - Northern Virginia Writing Project Teacher/Research Seminar

Credits: 3 (NR)
Acquaints classroom teachers with current research on composing as well as methods of studying writing in school settings. Participants collect data and write up results of their research.

Equivalent to ENGL 696 (2010-2011 Catalog)

**Prerequisite(s):** ENGL 615/ENGH 615, ENGL 695/ENGH 695, the Northern Virginia Writing Project Summer Institute, or other course in the teaching of writing.

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0

---

ENGH 697 - Composition Theory

Credits: 3 (NR)
Acquaints classroom teachers with theory relating to writing and teaching composition. Focuses on explaining theories of participants, reading works of leading theorists, and developing statement describing implications of theoretical consistency in teaching writing.

Equivalent to EDUC 697 and ENGL 697 (2010-2011 Catalog)

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0

---

ENGH 699 - Workshop in English
Credits: 1-3 (RT)
Concentrated workshops, educational tours, independent studies, and special seminars dealing with selected topics in writing, linguistics, film, electronic media, and literature written in English.

Equivalent to ENGL 699 (2010-2011 Catalog)

Prerequisite(s): Admission to MFA program or permission of department.

Notes: All tours are optional, and may be replaced by specified work conducted on campus. May be repeated for a maximum of 12 credits with permission of department, but no more than 6 credits of ENGH 699 may be applied to master's degree in English. No more than 3 credits of 699 may be applied to literature requirement for MFA degree.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0

**ENGH 701 - Research in English Studies**

Credits: 3 (NR)
Introduces research in English studies, including practice in library methods, writing critical bibliography, evaluating issues and problems, and surveying scholarly activities in department.

Equivalent to ENGL 701 (2010-2011 Catalog)

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**ENGH 702 - Research Methods in Rhetoric and Writing**

Credits: 3 (NR)
Explores a variety of text-based and empirical approaches and methods for addressing questions and problems related to public rhetoric and writing programs. Seminar participants work through a complete research design and pilot study.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**ENGH 705 - Literary Theory and Criticism**

Credits: 3 (RD)
Major theories of literature and methods of analyzing and evaluating literary works.

Equivalent to ENGL 705 (2010-2011 Catalog)

Notes: Topics vary. May be repeated for a maximum of 6 credits when topic is different with permission of department.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
ENGH 720 - Histories of Institutional Rhetorics

Credits: 3 (NR)
Examines the development of rhetorics within their historical and institutional contexts. Investigates rhetoric and rhetoricians across the development of oral rhetorics and the shift to written genres, the rise of scientific discourses, and the establishment of educational and bureaucratic organizations.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ENGH 722 - Composition Pedagogies and Programs in Context

Credits: 3 (NR)
Examines scholarship on pedagogy, curriculum design and assessment, faculty development, and program management related to the practice of teaching or training writers in an institutional setting: two- and four-year colleges, K-12 schools, and workplace training seminars. Students will complete independent projects analyzing a current or potential writing program.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ENGH 724 - Professional Writing Theory and Research

Credits: 3 (NR)
Examines current research in the field and the theories that inform it. Special emphasis is placed on workplace contexts and users in technological contexts. Course may include theories and methods such as activity theory, actor-network theory, complexity theory, cross-cultural rhetoric, digital rhetoric, discourse analysis, ethnography, genre theory, usability, and systems theory.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ENGH 726 - Rhetorical Theory and Public Spaces

Credits: 3 (NR)
Covers the major theories of public rhetoric and the public sphere; explores how rhetoric influences public perceptions; examines publics as a site of interpretive mediation.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ENGH 740 - Seminar in English/Cultural Studies
Analyzes historical shifts in literary and cultural discourse or of relationships between literary and nonliterary elements of culture within specific historical moment.

Equivalent to ENGL 740 (2010-2011 Catalog)

**Prerequisite(s):** 9 credits of graduate English courses including ENGL 701/ENGH 701, or permission of department.

**Notes:** Major research paper required. Topics vary. May be repeated for a maximum of 6 credits when topic is different with permission of department.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**ENGH 750 - Advanced Workshop in Poetry Writing**

Credits: 3 (RD)  
Intensive practice in craft of poetry for experienced writers.

Equivalent to ENGL 750 (2010-2011 Catalog)

**Prerequisite(s):** Admission to MFA concentration in poetry, ENGL 564/ENGH 564, and ENGL 617/ENGH 617.

**Notes:** May be repeated for credit with permission of department.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**ENGH 751 - Advanced Workshop in Fiction Writing**

Credits: 1-6 (RD)  
Intensive practice in craft of fiction for experienced writers.

Equivalent to ENGL 751 (2010-2011 Catalog)

**Prerequisite(s):** Admission to MFA concentration in fiction, ENGL 566/ENGH 566, and ENGL 618/ENGH 618.

**Notes:** May be repeated for credit with permission of department.

**Hours of Lecture or Seminar per week:** 1-6  
**Hours of Lab or Studio per week:** 0

---

**ENGH 752 - Advanced Workshop in Nonfiction Writing**

Credits: 1-6 (RD)  
Intensive practice in craft of nonfiction for experienced writers.
Equivalent to ENGL 752 (2010-2011 Catalog)

Prerequisite(s): Admission to MFA concentration in nonfiction, ENGL 565/ENGH 565 and ENGL 616/ENGH 616.

Notes: May be repeated for credit with permission of department.

Hours of Lecture or Seminar per week: 1-6  
Hours of Lab or Studio per week: 0

ENGH 790 - Projects in Literary Studies

Credits: 3 (NR)  
Students complete a capstone project guided by instructor and a faculty consultant based on work produced in a previous graduate course. Class meetings focus on building skills in research, revision, and editing, discussing topics related to professionalization both in and out of academia, and revising work in a workshop environment. Students will produce a professional-quality article or similar final project.

Prerequisite(s): 21 credits in MA coursework including ENGH 701, permission of instructor.

Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0  
Grading: Satisfactory/No Credit  
When Offered: Spring.

ENGH 797 - Projects in Professional Writing and Rhetoric

Credits: 3 (NR)  
Students complete a capstone project guided by instructor and a faculty consultant. Reflecting on theories and methods learned in previous coursework and applying them to a concrete rhetorical situation, students produce a professional-quality project for a primary audience located in the professional workplace or the discipline of rhetoric and professional writing.

Equivalent to ENGL 797 (2010-2011 Catalog)

Prerequisite(s): 21 credits in MA coursework, including the core, theory, PWR and Writing requirements, or permission of instructor.

Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0  
Grading: S/NC

ENGH 798 - Directed Reading and Research

Credits: 1-6 (RT)  
Reading, research, and writing on specific project under direction of department member.

Equivalent to ENGL 798 (2010-2011 Catalog)
Prerequisite(s): Open only to degree students who have preregistered and have completed 15 credits, including ENGL 701/ENGH 701.

Notes: Oral or written report required. For MA students: May be repeated for a maximum of 6 credits with permission of department. For MFA students: May be repeated for a maximum of 12 credits; 12 credits may be applied to the MFA requirements but no more than 3 credits may count toward completing the literature requirement.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0
Grading: Graduate Special

ENGH 799 - Thesis

Credits: 1-6 (RD)
Students who take ENGH 798 to develop thesis topic and then elect thesis option receive 3 credits for ENGH 799 on completion of thesis. Students who do not take ENGH 798, or who take it to work on project unrelated to thesis, receive up to 6 credits for ENGH 799 on completion of thesis.

Equivalent to ENGL 799 (2010-2011 Catalog)

Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 0
Grading: S/NC

ENGH 821 - Writing Program Design and Administration

Credits: 3 (NR)
Examines the theory and practice of writing program leadership. Investigates the principles that inform faculty support, curriculum development, program assessment, institutional alignment, and leadership approaches with regard to administering writing instruction.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ENGH 822 - Studies in Composition

Credits: 3 (RT)
Offers advanced study of theoretical, practical, or pedagogical topics related to composition.

Notes: May be repeated for a maximum of 12 credits when topic is different.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ENGH 824 - Studies in Professional Writing
Credits: 3 (RT)
Offers advanced study of theoretical, practical, or pedagogical topics related to professional writing and technical communication.

Notes: May be repeated for a maximum of 12 credits when topic is different.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**ENGH 826 - Studies in Public Rhetorics**

Credits: 3 (RT)
Offers advanced study of theoretical, practical, or pedagogical topics related to public rhetorics.

Notes: May be repeated for a maximum of 12 credits when topic is different.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**ENGH 897 - Directed Research**

Credits: 1-3 (RD)
Reading, research, and writing on a specific project under direction of faculty member.

Prerequisite(s): Permission of Instructor.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0
Grading: Satisfactory/No Credit

**ENGH 898 - Qualifying Exams Seminar**

Credits: 1-3 (RD)
Work on PhD qualifying exams.

Prerequisite(s): Completion of 36 credits in coursework in the writing and rhetoric PhD Program.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0
Grading: Satisfactory/No Credit.

**ENGH 998 - Doctoral Dissertation Proposal**
ENH 999 - Doctoral Dissertation

Credits: 1-12 (RD)
Doctoral dissertation research and writing under direction of student’s dissertation committee.

Prerequisite(s): Completion of ENGH 898.

Hours of Lecture or Seminar per week: 1-12
Hours of Lab or Studio per week: 0
Grading: Satisfactory/No Credit

English for Academic Purposes (EAP)

EAP 097 - Preparation for the Graduate Record Examination

Credits: 0 (RD)
Prepares students in Graduate Pathways requiring the general Graduate Record Examination test for progression to take the computer adaptive version of the exam. This course emphasizes test language and vocabulary, in addition to: testing strategies; practicing logical, rhetorical, and mathematical problem-solving relevant to the GRE; identifying common test-taking errors; and managing test anxiety. May also be listed as PROV 097.

Hours of Lecture or Seminar per week: 0.5
Hours of Lab or Studio per week: 0
Grading: Satisfactory/No Credit
When Offered: Summer, Spring

EAP 102 - Language Support for American Cultures

Credits: 1 (RD)
Academic language support course for Undergraduate Pathways students taking American Cultures. Designed to increase students' ability to comprehend and respond to readings, discussions, and lectures related to American Cultures. Emphasizes the development of successful strategies for intrapersonal and small/large group communication activities, student familiarity with anthropological and sociological terminology and effective application of reading/annotating strategies. Also listed as PROV 102.
Corequisite(s): PROV 105.

Notes: Students must attain minimum grade of C to fulfill program requirements.

Hours of Lecture or Seminar per week: 1.5
Hours of Lab or Studio per week: 0
Grading: Satisfactory/No Credit
When Offered: Fall, Summer, Spring

EAP 108 - Language Support for Business in American Society

Credits: 1 (RD)
Academic language support course for Undergraduate Pathway students taking Business in American Society. This course is designed to increase students' ability to read and analyze qualitative and quantitative information, understand and use business terminology, and utilize oral English fluency and literacy practices/strategies in anticipation of group discussions, debates, and oral/written critiques of business-related current events. Also listed as PROV 108.

Corequisite(s): SOM 100.

Notes: Students must attain minimum grade of C to fulfill program requirements.

Hours of Lecture or Seminar per week: 1.5
Hours of Lab or Studio per week: 0
Grading: Satisfactory/No Credit
When Offered: Fall, Summer, Spring

EAP 109 - College Reading Skills

Credits: 1 (RD)
Academic reading support for Undergraduate Pathways students in specific pathways. Designed to increase students' ability to read, summarize, and analyze texts, including information graphics and visuals. Focuses on student comprehension and utilization of discipline-specific genres/terminology and effective literacy practices/strategies in anticipation of group discussions, reading research, and responding to writing assignments. Also listed as PROV 109.

Corequisite(s): See advisor for approved corequisite courses for specific pathways.

Notes: Students must attain minimum grade of C to fulfill program requirements.

Hours of Lecture or Seminar per week: 1.5
Hours of Lab or Studio per week: 0
Grading: Satisfactory/No Credit
When Offered: Fall, Summer, Spring

EAP 111 - Language Support for Introduction to Information Technology
Credits: 1 (RD)
Academic language support for Undergraduate Pathways students taking Information Technology. Designed to increase students' IT literacy, including familiarity and accurate usage of terms related to digital devices, computer hardware, software, telecommunications, networking and multimedia. Supports students' oral and written academic English skills in anticipation of class lectures, textbook readings, individual assignments, and online discussion boards. Also listed as PROV 111.

Corequisite(s): IT 101.

Notes: Students must attain minimum grade of C to fulfill program requirements.

Hours of Lecture or Seminar per week: 1.5
Hours of Lab or Studio per week: 0
Grading: Satisfactory/No Credit
When Offered: Fall, Summer, Spring

EAP 112 - Language Support for Introduction to Computer Programming

Credits: 1 (RD)
Academic language support for Undergraduate Pathways students taking Computer Programming. This course is designed to increase students' ability to respond accurately to computer programming problems in English, understand and use programming terminology, and utilize oral English fluency and literacy practices/strategies in anticipation of class lectures, lab work, individual assignments, and online discussion boards. Also listed as PROV 112.

Corequisite(s): CS 112.

Notes: Students must attain minimum grade of C to fulfill program requirements.

Hours of Lecture or Seminar per week: 1.5
Hours of Lab or Studio per week: 0
Grading: Satisfactory/No Credit
When Offered: Fall, Summer, Spring

EAP 113 - Language Support for University Physics

Credits: 1 (RD)
Academic language support course for Undergraduate Pathways students taking program University Physics I. This course is designed to increase students' ability to respond accurately to physical problems in English, understand and use mathematical and physics terminology, and utilize oral English fluency and literacy practices/strategies in anticipation of class lectures, lab/recitation work, and online discussion boards. Also listed as PROV 113.

Corequisite(s): PHYS 160 and PHYS 161.

Notes: Students must attain minimum grade of C to fulfill requirements.

Hours of Lecture or Seminar per week: 1.5
Hours of Lab or Studio per week: 0
Grading: Satisfactory/No Credit
When Offered: Fall, Summer, Spring
EAP 114 - Language Support for General Chemistry I

Credits: 1 (RD)
Academic language support for Undergraduate Pathways students taking General Chemistry I. This course is designed to increase students' ability to read and comprehend qualitative and quantitative information, understand and use general science and chemistry-related terminology, set-up and solve numerical problems in English, and take notes from oral lectures and textbook chapters. Also listed as PROV 114.

Corequisite(s): CHEM 211.

Notes: Students must attain minimum grade of C to fulfill requirements.

Hours of Lecture or Seminar per week: 1.5
Hours of Lab or Studio per week: 0
Grading: Satisfactory/No Credit
When Offered: Fall, Summer, Spring

EAP 115 - Language Support for Introductory Geology I

Credits: 1 (RD)
Academic language support for Undergraduate Pathways students taking Introductory Geology I. This course is designed to increase students' ability to read and comprehend qualitative and quantitative information in English, understand and use general science and geology-related terminology, take notes from oral lectures and textbook chapters, and participate in group discussions. Also listed as PROV 115.

Corequisite(s): GEOL 101.

Notes: Students must attain minimum grade of C to fulfill program requirements.

Hours of Lecture or Seminar per week: 1.5
Hours of Lab or Studio per week: 0
Grading: Satisfactory/No Credit
When Offered: Fall, Summer, Spring

EAP 120 - Linguistics Capstone

Credits: 0 (RD)
Required to complete all standard undergraduate pathways. Provides students with opportunity to demonstrate mastery of English language skills in reading, writing, speaking, listening, grammar and/or vocabulary. Builds on work in language support classes. Includes language assessment, feedback on skills, and review of post-program support. Required during second semester of the Undergraduate Pathways program. Also listed as PROV 120.

Notes: A passing grade of "S" confirms the student's English language proficiency is sufficient for degree-seeking study.

Hours of Lecture or Seminar per week: 0.5
Hours of Lab or Studio per week: 0
Grading: Satisfactory/No Credit
When Offered: Summer, Spring

EAP 503 - Interpersonal Communication for International Students: Practicum and Theory

Credits: 2 (NR)
The course requires that students use intensive practice in oral communication contexts typical at universities to build knowledge and skills for informal interpersonal communication settings with faculty, peers, and students, and skills needed for formal presentations, class discussion, and tutoring. Readings & assignments cover research on first impression management; informative and explanatory communication; conveying emotional support; listening, and narrative skill.

Prerequisite(s): Completion of undergraduate degree at a university outside of the US.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 0
When Offered: Fall, Summer, Spring

EAP 505 - Special Topics in Advanced English for Academic Purposes

Credits: 2 (NR)
This special topics course is tailored to international students who received their undergraduate degrees outside the United States. The course provides intensive practice and individualized feedback in advanced communication methods appropriate at the graduate level.

Equivalent to PROV 505 (2013-2014 Catalog).

Prerequisite(s): Completion of undergraduate degree at a university outside of the US.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 0
When Offered: Fall, Summer, Spring

EAP 506 - Graduate Communication in the Disciplines I

Credits: 3-4 (NR)
Students develop strategies for completing research-based writing and presentations in their field and review rhetorical structures and organizational strategies common to US scholarly communications generally and in their particular field. Students will practice strategies at the sentence and discourse levels to increase the clarity, precision, and appropriateness of their communication skills. Group instruction will be supplemented by one-on-one conferencing.

Prerequisite(s): Completion of undergraduate degree at a university outside of the US.

Hours of Lecture or Seminar per week: 3
**EAP 507 - Graduate Communication in the Disciplines II**

Credits: 3 or 4 (NR)
The second course in a series that helps students develop strategies for completing research-based writing and presentations in their field. Students will review rhetorical structures and organizational strategies common to US scholarly communications generally and in their particular field. Students will also practice strategies at sentence and discourse levels to increase the clarity, precision, and appropriateness of their communication skills.

**Prerequisite(s):** EAP 506.

**Environmenta Science and Public Policy (EVPP)**

Offered by the College of Science

*See additional course work under Biology (BIOL), Chemistry (CHEM), Public and International Affairs (PUAD), School of Public Policy (PUBP), Geography (GEOG), and Geology (GEOL)*

**EVPP 110 - The Ecosphere: An Introduction to Environmental Science I**

Credits: 4 (NR)

Studies components and interactions that make up natural systems of our home planet. Teaches basic concepts in biological, chemical, physical, and earth sciences in integrated format with lecture, laboratory, and field exercises.

Designated a Green Leaf Course.

Fulfills Mason Core requirement in natural science (lab).

**Notes:** One of two semesters of environmental lab science that fulfills Mason Core science requirements for non science majors. Along with EVPP 111, can be taken in any order.

**EVPP 111 - The Ecosphere: An Introduction to Environmental Science II**

Credits: 4 (NR)
Studies components and interactions that make up natural systems of our home planet. Teaches basic concepts in biological, chemical, physical, and Earth sciences in integrated format with lecture, laboratory, and field exercises. Designated a Green Leaf Course.

Fulfills Mason Core requirement in natural science (lab).

Notes: One of two semesters of environmental lab science that fulfills Mason Core science requirements for non science majors. Along with EVPP 110, can be taken in any order.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 3

**EVPP 201 - Environment and You: Issues for the Twenty-First Century**

Credits: 3 (NR)

Introduces broad aspects of human-environmental interactions in the contemporary world. Topics range broadly from global populations and wastewater treatment to environmental law, and genetic engineering. Includes both science and science policy of the environment.

Designated a Green Leaf Course.

Fulfills Mason Core requirement in natural science (nonlab).

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**EVPP 210 - Environmental Biology: Molecules and Cell**

Credits: 4 (NR)

This course provides environmental science majors with the cellular foundation required for subsequent courses in the BS curriculum with a focus on how biological systems respond to environmental threats. The course emphasizes the connection between cellular processes and a healthy environment, and how this relationship is jeopardized by a variety of chemical and physical environmental perturbations.

Corequisite(s): CHEM 211.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 3

When Offered: Fall

**EVPP 305 - Environmental Microbiology Essentials**

Credits: 3 (NR)

Provides understanding of microbes and their function as a vital part of an environmental education. The role of microbes is central to many environmental issues such as climate change, biodegradation of toxics, wastewater treatment and drinking water
contamination. Course provides an introduction to the breadth of microbiology including essential information for students studying environmental problems and their solution.

**Prerequisite(s):** EVPP110 and 111 or BIOL 213, and 30 semester hours, or Permission of Instructor.

**Corequisite(s):** EVPP 306

**Notes:** Laboratory section (EVPP306 proposed) is a corequisite unless previously completed

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 3  
**When Offered:** Fall, Spring, Summer

---

**EVPP 306 - Environmental Microbiology Essentials Laboratory**

Credits: 1 (NR)  
Laboratory study of environmental microbiology. Course provides an introduction to the microbiological techniques for students studying environmental problems and their solution. Examples include wastewater treatment - a microbial reactor metabolizing organic matter, drinking water quality - is based on detection and quantification of coliform bacteria, visualization of bacteria in their natural habitat.

**Prerequisite(s):** EVPP 110 and 111 or BIOL 213, and 30 semester hours

**Corequisite(s):** EVPP 305

**Notes:** Lecture section (EVPP 305 proposed) is a corequisite.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 3  
**When Offered:** Fall, Spring, Summer

---

**EVPP 318 - Conservation Biology**

Credits: 3 (NR)  
Introduces science used to identify species in need of conservation, and techniques to manage and protect organisms.

Equivalent to BIOL 318.

**Prerequisite(s):** BIOL 308 or BIOL 310, or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**EVPP 322 - Business and Sustainability**

Credits: 3 (NR)
Examines the types of approaches businesses can take to respond to sustainability concerns. Designed to prepare students for assisting organizations to incorporate sustainability considerations into their strategic decision-making. Designated a Green Leaf Course.

Prerequisite(s): 30 credit hours, recommend EVPP 361/GOVT 361 - Introduction to Environmental Policy

Notes: Students from multiple disciplines (business, social sciences, natural sciences, humanities, education, etc.) can participate in the class without having had previous courses in management.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

EVPP 335 - People, Plants, and Culture

Credits: 3 (NR)

Introduces students to the complex interactions of people and plants in historical and contemporary times. Address the fundamental links between botany, human ecology, and environmental health and sustainability. Designated a Green Leaf Course.

Fulfills Mason Core requirement in synthesis.

Prerequisite(s): Completion or concurrent enrollment in all other required Mason Core courses.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EVPP 336 - Human Dimensions of the Environment

Credits: 3 (NR)

Overview of current knowledge regarding human and environment interactions and human ecology. Topics include basic theoretical and conceptual issues, relationship between social and biological sciences, human causes and consequences of environmental change, and contemporary perspectives on environmental issues. Designated a Green Leaf Course.

Prerequisite(s): One of EVPP 110, EVPP 111, GEOL 101, SOCI 101, or ANTH 114

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EVPP 337 - Environmental Policy Making in Developing Countries
Overview of environmental policy process in developing countries around the world. Major focus on understanding distinctive problems and dynamics of environmental policy making in poor countries to generate better policy decisions and management. Designated a Green Leaf Course.

Fulfills writing intensive requirement in the global affairs major.

**Prerequisite(s):** 60 credits.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**EVPP 338 - Economics of Environmental Policy**

Credits: 3 (NR)

Introduction to environmental, resource, and ecological economics for non-economist undergraduates. Covers basic theories of scarce resource allocation and examines conditions under which market allocations are efficient and sustainable. Includes graphical and verbal presentation of theory. Designated a Green Leaf Course.

**Prerequisite(s):** ECON 100 or ECON 103 or ECON 105 or ECON 110, or permission from instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**EVPP 350 - Freshwater Ecosystems**

Credits: 4 (NR)

Studies physical, chemical, and biological processes in lakes, streams, and wetlands. Teaches physical and chemical aspects of aquatic systems and life cycles, and adaptations of aquatic organisms. Lectures, field trips, lab exercises.

Equivalent to BIOL 350

**Prerequisite(s):** Either CHEM 211/212 or CHEM 155/156 and either EVPP 110/111 or BIOL 307.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 3

---

**EVPP 355 - Ecological Engineering and Ecosystem Restoration**

Credits: 4 (NR)
Provides definition, classification, and practice of ecological engineering and ecosystem restoration. Describes general system ecology, ecosystem restoration (i.e., wetland and river systems), and the use of natural processes to provide ecosystem services to society. Provides students with a systems-oriented perspective on designing and managing ecosystems. Students will study principles in designing field ecological studies, ecological models, ecological engineering, and explore practices in sustainable ecological design by carrying out a hands-on experimental design project with the field wetland mesocosm on the Mason campus. One field trip is required part of the course.

Designated a Green Leaf Course.

Equivalent to BIOL 355

**Prerequisite(s):** CHEM 211, BIOL 308, PHYS 243 and/or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 3

---

**EVPP 361 - Introduction to Environmental Policy**

Credits: 3 (NR)

Environmental politics and policymaking since the 1970s. Primary focus on United States, with some discussion of global issues. Examines policy strategies and outcomes, ethical and economic debates, political controversies, lawmaking and enforcement, and role of key players.

Designated a Green Leaf Course.

Equivalent to GOVT 361

**Prerequisite(s):** 30 credit hours

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**EVPP 362 - Intermediate Environmental Policy**

Credits: 3 (NR)

Examines environmental issues building on learning objectives from EVPP 361. Focuses on environmental and policy issues in the US and internationally, exploring the politics of nature and the interaction of environmental science and politics and resulting controversy. Risk and uncertainty loom large in most environmental issues. "Natural" disasters as well as direct "man-made" problems will be covered.

Designated a Green Leaf Course.

**Prerequisite(s):** EVPP 361 or GOVT 361 or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall, Spring
EVPP 363 - Coastal Morphology and Processes

Credits: 4 (NR)
Studies global coastal geomorphology and processes with emphasis on U.S. Atlantic and gulf coasts. Topics include plate tectonics; sea-level changes; sediment supply; impact of waves, tides, and storms; and human activities. Lectures and extended weekend field trips to mid-Atlantic coast.

Equivalent to EVPP 563/GEOL 363

Prerequisite(s): GEOL 309, BIOL 309, or GEOL 317; or 9 credits in geography, including GGS 309.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 3

EVPP 377 - Applied Ecology

Credits: 3 (NR)
Introduces ecosystem concepts and applications to natural and managed ecosystems.

Equivalent to BIOL 377

Prerequisite(s): 60 credits, including 8 credits of biology, geology, or chemistry; or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EVPP 378 - Ecological Sustainability

Credits: 4 (NR)

Introduces the concepts and applications of several important topics relating to ecological sustainability. Focuses on the role of soils in maintaining and managing environmental quality. The Teaches students how to understand and interpret scientific data presented in various types of literature covering ecological sustainability.
Designated as a Green Leaf Course.
Designated as a research and scholarship intensive course.

Equivalent to BIOL 379.

Prerequisite(s): BIOL 308 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 3
When Offered: Spring.
EVPP 380 - Wetlands of the World

Credits: 4 (NR)
A study of the ecosystems of the world. Emphasizes different types of wetland ecosystems and their services, including water quality, coastal protection, flood mitigation, and wildlife protection. The course includes trips to local wetlands and to the Everglades National Park.

Prerequisite(s): BIOL 308 or 310 or EVPP 110-111 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring

EVPP 395 - Undergraduate Research in Environmental Science and Policy

Credits: 1-3 (RD)
Original research project. May involve field and lab study, computer modeling and analysis, or other original research as appropriate. Research formulated and completed under instructor's guidance.

Prerequisite(s): 45 credits including at least two upper-level science lab courses.

Notes: Culminates in final report. May be repeated for total 10 credits.

Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 0

EVPP 396 - Directed Topic in Environmental Science and Policy

Credits: 1-4 (RD)
Study of topics not available in fixed-topics courses. May involve readings, lectures, lab assignments, and tutorials as jointly agreed on by student and instructor.

Prerequisite(s): 45 credits.

Notes: Culminates in term paper, final exam, or both. May be repeated for maximum 8 credits.

Hours of Lecture or Seminar per week: 1-9
Hours of Lab or Studio per week: 0

EVPP 408 - Mushrooms, Molds and Society

Credits: 3 (NR)
Provides a modern, comprehensive knowledge of fungal biology including classification, phylogeny, structure, physiology/metabolism, growth and development, genetics, industrial applications including biotechnology, ecological roles including pathogenic interactions with plants, animals, and man.
**Prerequisite(s):** EVPP 110 and 111 or BIOL 213.

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0
**When Offered:** Spring

---

**EVPP 409 - Medical Mycology**

Credits: 3 (NR)
Provides the student with current knowledge of both the medical and microbiological aspects of fungal diseases in humans, including the etiologic agents, geographic distribution, epidemiology, transmission, determinants of pathogenicity, laboratory detection, and therapy associated with the major human mycoses.

**Prerequisite(s):** EVPP 110 and 111 or BIOL 213.

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0
**When Offered:** Summer

---

**EVPP 419 - Marine Mammal Biology and Conservation**

Credits: 3 (NR)
Covers the evolution, biology, ecology, and behavior of marine mammals from polar bears and sea otters to whales and dolphins. Marine mammal conservation and policy is also a major component of the course; several lecture sessions are devoted to the issue of whaling, threats to marine mammal populations, and recent conservation issues such as marine mammals and noise pollution. The course also includes a number of guest lectures from a variety of international marine mammal experts.

Equivalent to EVPP 519/BIOL 508

**Prerequisite(s):** BIOL/GEOL 309 or BIOL 449; 60 credit hours.

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0

---

**EVPP 420 - Marine Mammal Biology and Conservation Field Course**

Credits: 1 (NR)
This course provides laboratory, seminar sessions and field work to accompany EVPP 419-001 - marine mammal biology and conservation. Field work includes several day-long boat trips. The field course may take place in the US or abroad.

**Prerequisite(s):** EVPP 419 or BIOL 454.

**Corequisite(s):** EVPP 419 or BIOL 454.

**Hours of Lecture or Seminar per week:** 1
**Hours of Lab or Studio per week:** 1-12
**When Offered:** Summer
EVPP 421 - Marine Conservation

Credits: 3 (NR)

Provides an overview of threats to the marine environment, and discusses the scientific, socioeconomic, and political issues behind marine conservation. Covers categories of marine pollutants (chemical, biological, and physical contaminants) and their impacts on the marine ecosystem, as well as impacts on humans (health, social, and economic), threats to key marine species (e.g., coral, sharks, turtles, and marine mammals) and initiatives and laws developed to reduce these threats. Scientific and socioeconomic problems that hinder sustainable fisheries management and the science and policy behind the global warming debate are also discussed. Provides an overview of marine environmental law and policy issues related to marine conservation policy.

Designated a Green Leaf Course.

Equivalent to EVPP 521/BIOL 507

Prerequisite(s): BIOL/GEOL 309 and completed or concurrent enrollment in all other required Mason Core courses.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EVPP 427 - Disease Ecology and Conservation

Credits: 3 (NR)

Presents the trans-disciplinary discipline of conservation medicine, the study of relationships between organism and ecosystem health and environmental conditions. Topics include infectious and noninfectious diseases, pathogens, processes, and impacts on human, biotic, and ecosystem health, and how to address the consequences of diseases to populations and ecological communities.

Prerequisite(s): 60 credits and BIOL 213 or BIOL/EVPP 305/306 and BIOL 308.

Notes: This course will co-meet with EVPP 527. Undergraduate students in this course will have separate (shorter) reading and writing assignments and will be graded according to a different rubric than the graduate students.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

EVPP 430 - Fundamentals of Environmental Geographic Information Systems

Credits: 3 (NR)

Provides the basic knowledge to explore complex environmental data sets and relationships among biological, ecological, physical and anthropogenic variables using geographic information systems. Using spatial mapping and exploration tools students will be capable of independent analysis of complex environment.

Prerequisite(s): EVPP 110 and 111, and IT 103 or CDS 103, and 60 credits or Permission of Instructor.
Notes: Previous knowledge of fundamentals of geography, coordinate systems and map projections is an asset. Knowledge of operating systems, text editor and spreadsheet is required.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Summer

EVPP 432 - Energy Policy

Credits: 3 (NR)
Overview of energy policy issues, including different energy sources, electricity generation, efficiency and conservation, energy economics, related energy issues, such as climate change, energy in a global context, transmission of power, and others. Updated yearly. One field trip is part of the course.

Prerequisite(s): 60 credits and EVPP 361/GOVT 361, or Permission of Instructor

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

EVPP 436 - The Human Dimensions of Global Climate Change

Credits: 3 (NR)
Social science investigation of humans' role(s) in global climate change, including diversity of ecological, cultural and policy issues. Focuses on current science, causes and responses, human rights and social justice, vulnerability of marginalized populations, relevant issues associated with communication and behavior change, place of policy, and the multiple existing and potential roles of academic action. Discussion format.

Prerequisite(s): EVPP 336, CLIM 101 and 60 credits, or Permission of Instructor

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

EVPP 440 - Field Environmental Science

Credits: 0-4 (RD)
Directed field studies emphasizing ecology and behavior. Topics vary but include design of field manipulations, data collection and analysis, and introduction to organisms of study site.

Equivalent to BIOL 440.

Prerequisite(s): BIOL 308 or 310 or permission of instructor.

Notes: Students bear cost of required field trips. May be repeated with permission of Environmental Science and Policy. Total limit of 4 credits. This course does not satisfy requirements of the BA degree or BS degree, which state that students must complete at least one (BA degree) or two (BS degree) upper division courses that include a laboratory.
EVPP 445 - Principles of Environmental Toxicology

Credits: 3 (NR)
Explores basic principles of toxicology with an emphasis on the environment. Includes the history and scope of the field; absorption, distribution, metabolism and excretion of toxicants; mechanisms of toxic action; genetic toxicology; ecotoxicology as well as specific examples important toxicants. Introduces regulatory toxicology and human and ecological risk assessment.

Prerequisite(s): EVPP 110, 111 and Chem 211,212 and 60 credit hours; or permission of instructor.

EVPP 449 - Marine Ecology

Credits: 3 (NR)
Plants and animals of marine environments and physical and chemical conditions that affect their existence.

Equivalent to BIOL 449.

Prerequisite(s): BIOL 308 and EVPP/GEOL 309 or permission of instructor.

Notes: Will be cross-listed with BIOL 449.

EVPP 451 - Fungi and Ecosystems

Credits: 3 (NR)
Considers impact of fungi on ecosystems in terms of effects on biogeochemical cycling, primary and secondary production, and regulating community structure and populations of individual species through activities as symbionts and parasites.

Equivalent to EVPP 551; BIOL 459; BIOL 559

Prerequisite(s): BIOL 304 or course in microbiology; or permission of instructor.
EVPP 468 - Vertebrate Natural History

Credits: 4 (NR)
Introduces vertebrates with emphasis on systematics, evolution, life history, behavior, and ecology. Laboratory emphasis on identification, taxonomy, and natural history of local vertebrates.

Equivalent to BIOL 468

Prerequisite(s): BIOL 303 and BIOL 307 or permission of the instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 3
When Offered: Fall

EVPP 480 - Sustainability in Action

Credits: 4 (NR)

Provide students with valuable and tangible experience in practical aspects of realizing sustainability goals and to transfer theory into practice. Allows students to engage in real-world, sustainability-related projects that provide benefits for a target community. Identify and attempt to solve a sustainability-related problem or address a sustainability-related need in a specific target community.
Designated a Green Leaf Course.
Fulfills Mason Core requirement in synthesis.

Prerequisite(s): Completed or concurrent enrollment in all other required Mason Core courses; completion of 60 credits.

Notes: Capstone course for the Sustainability Minor – see Environmental Science and Policy department listing for details.

Hours of Lecture or Seminar per week: 4
Hours of Lab or Studio per week: 3

EVPP 490 - Special Topics in Environmental Science and Policy

Credits: 0-4 (RD)
Studies selected topics in environmental science and policy using lectures, guest lectures, student presentations, or laboratory exercises.

Prerequisite(s): 60 credits, and permission of instructor.

Notes: Topics vary, but each offering has coherent syllabus. May be repeated for credit if topics are significantly different.

Hours of Lecture or Seminar per week: 1-4
Hours of Lab or Studio per week: 1-4
EVPP 503 - Field Mapping Techniques

Credits: 3 (NR)
Basic techniques for collecting, recording, and plotting spatial field data, including topographic maps, compass, transit, alidade, and global positioning systems. Field work and field-based research project.

Equivalent to GEOL 303

Prerequisite(s): MATH 105 or equivalent; and EVPP 110, GGS 102, or GEOL 101 or equivalent.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 6

EVPP 505 - Selected Topics in Environmental Science

Credits: 0-4 (RT)
Topic depends on instructor's specialty.

Prerequisite(s): Course in ecology or geology, or permission of instructor.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0-6

EVPP 506 - Science of the Environment I

Credits: 3 (NR)
Environmental science is explored in this 2-semester sequence providing the foundation in chemistry (I) and biology (II) required for graduate students with social sciences backgrounds seeking a degree and career in environmental science and policy.

Prerequisite(s): Permission of the instructor.

Notes: For graduate students entering the Environmental Science and Policy or other programs. Not available to students with undergraduate degrees in the natural sciences. This course is in addition to all other degree requirements.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EVPP 507 - Science of the Environment II

Credits: 3 (NR)
Environmental science is explored in this 2-semester sequence providing the foundation in chemistry (I) and biology (II) required for graduate students with social sciences backgrounds seeking a degree and career in environmental science and policy.

Prerequisite(s): EVPP 506 or permission of instructor.

Notes: For graduate students entering the Environmental Science and Policy or other programs. Not available to students with
undergraduate degrees in the natural sciences. This course is in addition to all other degree requirements.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**EVPP 515 - Molecular Environmental Biology I**

Credits: 3 (NR)
Introduces molecular environmental biology covering basic concepts of molecular biology, molecular evolution, and bioinformatics, and application to problems in molecular and environmental biology.

*Prerequisite(s):* Introductory biology and genetics course, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**EVPP 518 - Conservation Biology**

Credits: 3 (NR)
Introduction to the science used to identify species in need of conservation, and techniques to manage and protect organisms.

*Prerequisite(s):* Course in Ecology.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring

**EVPP 519 - Marine Mammal Biology and Conservation**

Credits: 3 (NR)
Covers the evolution, biology, ecology, and behavior of marine mammals from polar bears and sea otters to whales and dolphins. Marine mammal conservation and policy is also a major component of the course; several lecture sessions are devoted to the issue of whaling, threats to marine mammal populations, and recent conservation issues such as marine mammals and noise pollution. The course also includes a number of guest lectures from a variety of international marine mammal experts.

Equivalent to EVPP 419/BIOL 508

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**EVPP 520 - Marine Mammal Biology and Conservation Field Course**

Credits: 1 (NR)
This course provides laboratory, seminar sessions and field work to accompany EVPP 519-001 marine mammal biology and
conservation. Field work includes several day-long boat trips. The field course may take place in the US or abroad.

**Corequisite(s):** EVPP 519.

**Notes:** At present the two week residential field course takes place in Scotland at the University (of London) Marine Biological Station, which is equipped with boats and laboratories. The course has been running for 11 years, 2 years with GMU as a special topics course.

**When Offered:** Summer

### EVPP 521 - Marine Conservation

Credits: 3 (NR)

Provides an overview of threats to the marine environment, and discusses the scientific, socioeconomic, and political issues behind marine conservation. Covers categories of marine pollutants (chemical, biological, and physical contaminants) and their impacts on the marine ecosystem, as well as impacts on humans (health, social, and economic), threats to key marine species (e.g., coral, sharks, turtles, and marine mammals) and initiatives and laws developed to reduce these threats. Scientific and socioeconomic problems that hinder sustainable fisheries management and the science and policy behind the global warming debate are also discussed. Provides an overview of marine environmental law and policy issues related to marine conservation policy.

Designated a Green Leaf Course.

Equivalent to EVPP 421/BIOL 507

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

### EVPP 524 - Introduction to Environmental and Resource Economics

Credits: 3 (NR)

Introduces theory of external costs and benefits, public goods, natural resource management, and benefit and cost analysis for noneconomists. Lecture-discussion format with student presentations and participation. Analytical problems set, short writing assignments, and exams.

Equivalent to GGS 524

**Prerequisite(s):** Basic algebra skills.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

### EVPP 525 - Economics of Human/Environment Interactions

Credits: 3 (NR)
Advanced topics in environmental, natural resource, and ecological economics for noneconomist. Emphasizes sustainability, intergenerational equity, and economic-ecological feedbacks.
Designated a Green Leaf Course.

Equivalent to ECON 895/GGS 525

Prerequisite(s): EVPP 524/GGS 524 or equivalent.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EVPP 527 - Disease Ecology and Conservation

Credits: 3 (NR)
Presents the trans-disciplinary discipline of conservation medicine, the study of relationships between organism and ecosystem health and environmental conditions. Topics include infectious and noninfectious diseases, pathogens, processes, and impacts on human, biotic, and ecosystem health, and how to address the consequences of diseases to populations and ecological communities.

Prerequisite(s): Courses in microbiology, ecology, or conservation, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

EVPP 531 - Land-use Modeling Techniques and Applications

Credits: 3 (NR)
Surveys literature on spatially explicit empirical models of land-use change. Offers hands-on experience developing and running simple models. Includes statistical models, mathematical programming models, cellular automata, agent-based models, and integrated models.

Equivalent to GGS 531

Prerequisite(s): GGS 550, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EVPP 532 - Animal Behavior

Credits: 3 (NR)
Ecological aspects of animal behavior.

Prerequisite(s): Permission of instructor.
EVPP 536 - The Diversity of Fishes

Credits: 3 (NR)
This course delves into the biology and ecology of fishes. Subjects of this class include fish anatomy, taxonomy, evolution, habitat adaptations, community dynamics, and ecosystem interactions. The course will also touch on human impacts on fishes, and conservation.

Equivalent to BIOL 536

Prerequisite(s): Ecology course, or permission of instructor.

EVPP 537 - Ornithology

Credits: 4 (NR)
Study of evolution, systematics, physiology, ecology, and behavior of birds, emphasizing field work.

Prerequisite(s): Course in ecology or equivalent.

EVPP 538 - Mammalogy

Credits: 4 (NR)
Study of evolution, systematics, physiology, ecology, and behavior of mammals, emphasizing fieldwork.

Equivalent to BIOL 538

Prerequisite(s): BIOL 303 and BIOL 307 or permission of the instructor.

EVPP 539 - Herpetology
EVPP 543 - Tropical Ecosystems

Credits: 4 (NR)
Terrestrial, aquatic, and marine ecosystems in the tropics, emphasizing plant communities, plant-animal interactions, and role of humans in tropics.

Equivalent to BIOL 543

Prerequisite(s): Ecology course, and permission of instructor.

Notes: Requires field trip to tropics as part of lab.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 3

EVPP 550 - Waterscape Ecology and Management

Credits: 3 (NR)
Studies physical, chemical, and biological components of freshwater ecosystems with emphasis on streams, rivers, and lakes; links between watersheds and freshwater ecosystems; and impact of human management.

Equivalent to BIOL 550

Prerequisite(s): A course in chemistry and a course in ecology.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EVPP 551 - Fungi and Ecosystems

Credits: 3 (NR)
Considers impact of fungi on ecosystems in terms of effects on biogeochemical cycling, primary and secondary production, and regulating community structure and populations of individual species through activities as symbionts and parasites. Discusses role of fungi in ameliorating pollutants produced by anthropogenic activities.

Equivalent to EVPP 451; BIOL 459; BIOL 559

Prerequisite(s): BIOL 304 or course in microbiology, or permission of instructor.
EVPP 555 - Lab in Waterscape Ecology

Credits: 1 (NR)
Field and laboratory approaches to freshwater ecology with emphasis on study design, sampling methods, laboratory and data analysis, and report writing.

Equivalent to BIOL 555

Prerequisite(s): EVPP 550 or permission of instructor.

Hours of Lecture or Seminar per week: 1-12
Hours of Lab or Studio per week: 3

EVPP 563 - Coastal Morphology and Processes

Credits: 4 (NR)
Studies global coastal geomorphology and processes, emphasizing U.S. Atlantic and gulf coasts. Topics include plate tectonics; sea-level changes; sediment supply; impact of waves, tides, storms; and human activities. Lecture, extended weekend field trips to mid-Atlantic coast.

Equivalent to EVPP 363/GEOL 363

Prerequisite(s): Previous courses in geology, oceanography, marine science or physical geography; or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 3

EVPP 576 - Microbial Ecology of Soils

Credits: 3 (NR)
Surveys microbial ecology in surface and subsurface soils. Describes organisms and their function and interaction.

Equivalent to BIOL 576

Prerequisite(s): Course in microbiology or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EVPP 577 - Biogeochemistry: A Global Perspective
Credits: 3 (NR)
Structure and function of ecosystems, their interactions as components of landscapes, and contributions to the global environment. Emphasizes biogeochemical cycles of natural, disturbed, and managed ecosystems, and integration at landscape and global level as related to current ecological problems such as transfer of nonpoint source pollutants, atmospheric deposition, stratospheric ozone depletion, and global change.

Equivalent to BIOL 577

Prerequisite(s): Course in ecology and course in chemistry; or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EVPP 581 - Estuarine and Coastal Ecology

Credits: 3 (NR)
Emphasizes marine biology of estuarine and coastal habitats of Chesapeake Bay region, and factors affecting distribution and abundance of organisms.

Equivalent to BIOL 581

Prerequisite(s): Course in ecology and permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EVPP 582 - Estuarine and Coastal Ecology Laboratory

Credits: 1 (NR)
Provides training in field measurement of physical and chemical parameters, and collection and identification of local organisms. Emphasizes the practice of ecological field research.

Equivalent to BIOL 582

Prerequisite(s): EVPP 581/BIOL 581

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 3

EVPP 607 - Fundamentals of Ecology

Credits: 3 (NR)
Overview of concepts in physiological, population, community, ecosystem, biogeographical and human ecology.

Equivalent to BIOL 607

Notes: Restricted to graduate students with little or no background in ecology. Students who have taken BIOL 307 or the
equivalent elsewhere are ineligible for this course.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**EVPP 610 - Bioremediation: Theory and Applications**

Credits: 3 (NR)  
Provides basis for understanding proper application of bioremedial technologies to treatment of hazardous wastes. Includes evaluation of data to determine successful treatment.

Equivalent to BIOL 610

**Prerequisite(s):** Courses in microbiology and either organic chemistry or biochemistry; or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**EVPP 613 - Environmental Geochemistry and Mineralogy**

Credits: 3 (NR)  
Explores hot topics and aids students in developing intellectual skills to identify key research problems. Students will also improve their writing and presentation skills.

Equivalent to GEOL 613

**Prerequisite(s):** Graduate standing.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**EVPP 615 - Molecular Environmental Biology II**

Credits: 4 (NR)  
Applied course covering theory and methodology of molecular environmental biology, including analysis of selected case studies in conservation biology of macro-organisms, molecular systematics, and microbial ecology.

**Prerequisite(s):** EVPP 515 or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 3

**EVPP 619 - The Challenge of Biodiversity**
The Challenge of Biodiversity examines the science and policy of biodiversity conservation, through case studies, current events, guest speakers, class discussion, reading and assignments. Emphasis is placed on problem solving, communication skills and critical thinking.

Prerequisite(s): Graduate Standing and 6 credit hours of graduate course work or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring

EVPP 620 - Development of U.S. Environmental Policies

Credits: 3 (NR)

Examines nature and historical development of environmental policy in the United States, including consideration of social, political, economic and environmental factors, and ways it is expressed and implemented. Also considers sustainability and emerging issues.

Designated a Green Leaf Course.

Prerequisite(s): 8 graduate credits including graduate course in policy process and course in ecology; or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EVPP 621 - Overview of Biodiversity Conservation

Credits: 3 (NR)

Lectures, reading assignments, class discussions, and orally presented and written case studies to explore what biodiversity is, why it is important, how conservation has evolved, and status today.

Prerequisite(s): 8 graduate credits in ecology and environmental science or environmental policy, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EVPP 622 - Management of Wild Living Resources

Credits: 3 (NR)

Examines management of different types of wild living resources: animal and plant, aquatic and terrestrial. Reviews status of resources, analyzes factors that have led to present situation, and considers what may be required to achieve effective and sustainable management.

Designated a Green Leaf Course.
Prerequisite(s): 8 graduate credits of ecology or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**EVPP 623 - Translating Environmental Policy into Action**

Credits: 3 (NR)
Guest lecturers, class discussions, written and orally presented case studies, and assigned reading to identify and analyze factors involved in moving from science and policy to concrete action. Provides understanding of basic principles, skills, and strategies.

Prerequisite(s): 8 graduate credits in environmental science or environmental policy, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**EVPP 626 - Environment and Development in Asia**

Credits: 3 (NR)
Examine environment and development in selected countries of South, Southeast, and East Asia. Reviews relationship between environment and development, considers background and history leading up to the present, and considers requirements to achieve more effective and sustainable results.
Designated a Green Leaf Course.

Prerequisite(s): 8 graduate credits in policy process, international development, and ecology; or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**EVPP 627 - Environmental Policy in Latin America**

Credits: 3 (NR)
Examine environmental policy in Latin America. Reviews evolution of environmental policy and relationship between environment and development, considers background and history leading up to the present, and considers requirements to achieve more effective and sustainable results.
Designated a Green Leaf Course.

Prerequisite(s): 8 graduate credits in policy process, international development, and ecology; or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
EVPP 628 - Environment and Development in Africa

Credits: 3 (NR)

Examine environment and development in sub-Saharan Africa. Reviews relationship between environment and development, considers background and history leading up to present, and considers requirements to achieve more effective and sustainable results. Designated a Green Leaf Course.

Prerequisite(s): 8 graduate credits in policy process, international development, and ecology; or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EVPP 630 - Methods and Logic of Social Inquiry

Credits: 3 (NR)

Emphasizes gathering, interpretation, and evaluation of scientific evidence. Develops critical thinking skills and covers logic of scientific inquiry, including various data collection methods such as experiments, observational research, and Q methodology.

Prerequisite(s): Undergraduate statistics and research methods, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EVPP 631 - Spatial Agent-based Models of Human-Environment Interactions

Credits: 3 (NR)

Discusses key challenges in spatial modeling of human-environment interactions. Reviews agent-based modeling applications in urban and rural interactions, agriculture, forestry, and other areas. Hands-on development of simple ABM models, and investigation of links between GIS and ABM.

Equivalent to CSI 709; GGS 631

Prerequisite(s): EVPP 531 or CSS 600, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EVPP 632 - Qualitative Research Methods for Environmental Scientists

Credits: 3 (NR)

Course engages questions of qualitative research methods for scientists conducting human-environment research. Focuses on tools to investigate the human-environment nexus, including community-based conservation and management research and decolonizing methodologies. Students discuss and practice 'triangulation'-- the integration of qualitative and quantitative methods-- a necessary skill for environmental/human-environment research.
Prerequisite(s): Graduate standing.

**EVPP 635 - Environment and Society**

Credits: 3 (NR)

Human-environment interactions in human ecology perspective, historical basis of human environmental impact, indigenous and nonindigenous worldviews in context of modernization, environmental degradation and globalization, and contemporary policy and research initiatives geared toward resilience and sustainability. Discussion format. Designated a Green Leaf Course.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**EVPP 636 - Gender, Race, and the Natural World**

Credits: 3 (NR)

Advanced study of links among gender, race, and nature using social-psychological framework, original sources, and seminar and discussion. Analyzes ideologies that underpin the interlocking narratives of gender, race, and nature, and examines role of science in producing these ideologies.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**EVPP 637 - Human Dimensions of Global Change**

Credits: 3 (NR)

Examines human dimensions of climate change, biodiversity loss, ozone depletion, and related anthropogenic alterations of biosphere.

Prerequisite(s): Graduate standing, or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**EVPP 638 - Corporate Environmental Management and Policy**

Credits: 3 (NR)

Provides understanding of how environmental issues interact with business strategy decisions. Emphasizes learning about proactive win-win environmental management strategies being implemented by world's leading firms, and shows how
government policies and regulations can be designed to simultaneously promote higher environmental protection and competitiveness. Combines mini lectures, participatory discussions.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**EVPP 641 - Environmental Science and Public Policy**

Credits: 3 (NR)  
Effects of human activities on environment. Considers airborne, waterborne, and solid waste contaminants with respect to sources, control, and effect on ecosystems and humans. Focus is on scientific and technical aspects of environmental contamination. Includes discussion of science policy related to these topics.

**Prerequisite(s):** Course in ecology, or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**EVPP 642 - Environmental Policy**

Credits: 3 (NR)  
In-depth examination of U.S. efforts since 1970 to mitigate pollution of air, land, and water. Addresses issues of global concern, including biodiversity loss, ozone depletion, and climate change.  
Designated a Green Leaf Course.

Equivalent to PUAD 642

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**EVPP 643 - Microbial Ecology**

Credits: 4 (NR)  
Studies relationships between microorganisms and their natural environment, and methodology for observing the microbes in nature and the biochemistry of environmental systems. Includes discussion of the role of microbes both in creating and removing toxic threats in the environment. Laboratory component includes field sampling/analyses and laboratory isolation and identification of microbes as well as measurement of their physiological activities.

Equivalent to BIOL 643

**Prerequisite(s):** Course in microbiology, or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 3
**EVPP 645 - Freshwater Ecology**

Credits: 3 (NR)
Studies biotic and abiotic interactions that affect structure and composition of freshwater ecosystems. Emphasizes research literature.

Prerequisite(s): EVPP 550, or permission of instructor.

Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0

**EVPP 646 - Wetland Ecology and Management**

Credits: 3 (NR)
Emphasizes structure, functions, and ecological processes of created and natural wetlands from an ecosystem perspective. Students will be expected to develop an understanding of hydrologic, physicochemical, and ecological aspects of wetlands and the management of these systems through in-class and field/lab works. Each student is required to carry out an individual research project that involves field and lab works, and write a research paper.

Prerequisite(s): BIOL 307 or EVPP 377, or permission of instructor.

Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0

**EVPP 647 - Wetland Ecology Lab and Field**

Credits: 1 (NR)
Use laboratory and field work to study the structure and function of wetland ecosystems.

Prerequisite(s): EVPP 646 (formerly EVPP 644)

Hours of Lecture or Seminar per week: 1-3  
Hours of Lab or Studio per week: 3

**EVPP 648 - Population Ecology**

Credits: 3 (NR)
Surveys ecological models and theory. Topics include population growth and regulation, competition, predator-prey, herbivore-plant, and parasite-host interactions, mutualism, and metapopulation ecology.

Equivalent to BIOL 648

Prerequisite(s): Course in ecology or permission of instructor.
EVPP 650 - Environmental Analysis and Modeling

Credits: 4 (NR)
Introduces principles, history, and methodologies of systems ecology, emphasizing development and simulation of ecological models for natural resource/ecosystem management, conceptual and symbolic models, and simulation techniques on microcomputers.

Prerequisite(s): Course in ecology or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EVPP 651 - Multivariate Data Analysis for Ecology and Environmental Science

Credits: 3 (NR)
Provides graduate students in ecology and environmental science with tools needed to analyze multivariate data sets. Topics include classification and ordination.

Prerequisite(s): EVPP 607 or equivalent.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring

EVPP 652 - The Hydrosphere

Credits: 3 (NR)
Components and transfer processes within hydrosphere, which consists of aqueous envelope of Earth including oceans, lakes, rivers; snow, ice, glaciers, soil, moisture, ground water, and atmospheric water vapor.

Equivalent to GGS 656

Prerequisite(s): Two semesters of calculus and partial differential equation.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EVPP 670 - Environmental Law

Credits: 3 (NR)
Studies environmental laws such as the National Environmental Policy Act, and regulatory issues such as the Clean Water and
Clean Air Acts. Emphasizes critical evaluation of alternatives to unresolved issues in environmental policies.

Equivalent to BIOL 670

**Prerequisite(s):** Courses in ecology and environmental biology, or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**EVPP 675 - Environmental Planning and Administration**

Credits: 3 (NR)  
Examines interaction of man and ecological systems; causes of damage or deterioration in environment; content, oversights, and externalities in management decision processes that affect environment and effectiveness of plan implementation; means of assessing environmental impact; and administrative approaches for minimizing environmental impact.

**Prerequisite(s):** Permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**EVPP 677 - Applied Ecology and Ecosystem Management**

Credits: 3 (NR)  
Uses ecological principles to manage natural resources. Emphasizes hierarchical levels of organization within ecological systems, and management of ecosystems to conserve biodiversity, natural resources, and environment.

**Prerequisite(s):** BIOL 607 or EVPP 607 or equivalent.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**EVPP 681 - Introduction to Bioinformatics**

Credits: 3 (NR)  
Overview of methods and tools in bioinformatics including Internet interfaces to sequence databases, methods for performing searches of biological databases, sequence alignment, phylogenetic analysis, other types of DNA sequence analysis, web-based tools, and databases in structural biology.

**Prerequisite(s):** Course in molecular biology, or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**EVPP 682 - Principles of Environmental Conflict**
Credits: 3 (NR)
Explores the nature and characteristics of environmental conflict and efforts to manage, resolve or transform it. Students will develop a capacity to assess the strengths and weaknesses of environmental conflict resolution processes while learning about best practices for preventing, preparing for, and addressing environmental conflict.

Equivalent to CONF 682

Prerequisite(s): EVPP 607, CONF 501, and CONF 502, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

Credits: 3 (NR)
This course explores best practices for managing, resolving, and transforming environmental conflict using environmental conflict resolution (ECR) processes. Nature and dynamics of environmental disputes, methods for assessing conflict situations, and methods for conducting various forms of ECR processes will be covered in the context of selected case studies with emphasis on student involvement.

Equivalent to CONF 683

Prerequisite(s): EVPP 682 or CONF 682, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EVPP 684 - Environmental Conflict Resolution and Collaboration: Leadership Practicum/Capstone

Credits: 3 (NR)
This course is the capstone course for the Graduate Certificate in Environmental Conflict Resolution and Collaboration. Under supervision of the instructor, students will undertake an assessment of an active environmental conflict and recommend a range of processes that promote identified goals for preferred conflict outcomes.

Equivalent to CONF 684

Prerequisite(s): EVPP 682 or CONF 682, and EVPP 683 or CONF 683.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EVPP 692 - Master's Seminar in Environmental Science and Public Policy
Credits: 1 (RT)
Explores selected topics in environmental science and public policy using lectures, guest lectures, student presentations, and discussions of current literature.

Notes: Topics vary. May be repeated for credit.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0

EVPP 693 - Directed Studies in Environmental Science and Public Policy

Credits: 1-4 (RT)
Studies topic not otherwise available in graduate program. May involve reading assignments, tutorials, lectures, papers, presentations, and lab or field study determined in consultation with instructor.

Prerequisite(s): Permission of instructor and chair.

Notes: Short study plan required. May not be used to fulfill explicit undergraduate prerequisites for graduate work.

Hours of Lecture or Seminar per week: 1-4
Hours of Lab or Studio per week: 0
Grading: Graduate Special

EVPP 730 - Environmental Policy Research in Practice

Credits: 3 (RD)
Course is designed for students interested in social science-oriented environmental research. Student learn how to ground their research ideas in social science theory, develop a central research question and construct original research hypotheses that are grounded in social science literature. They also hone their peer reviewing skills by assessing other students' research and offering constructive commentary.

Prerequisite(s): 12 credit hours of graduate course work at Mason or approval of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring

EVPP 738 - Sustainable Enterprise Theory

Credits: 3 (NR)
This course is designed to critically evaluate the scholarly research related to sustainable enterprise. The class provides an overview of the major theories, research designs, and methodologies associated with this emerging research domain. Students apply these theories to develop social science research proposals for empirical investigation.

Prerequisite(s): EVPP 638 Corporate Environmental Management and Policy, equivalent class, or permission of instructor.

Hours of Lecture or Seminar per week: 3
EVPP 741 - Advanced Topics in Environmental Science and Public Policy

Credits: 0-4 (RT)
Studies selected advanced topics in environmental science and public policy. Lectures, guest lectures, student presentations, laboratory exercises.

Prerequisite(s): 8 credits of graduate course work in environmental science and public policy, or permission of instructor.

Notes: Topics vary; each offering has coherent theme. May be repeated for credit if topics significantly differ.

EVPP 745 - Environmental Toxicology

Credits: 3 (NR)
Studies nature, distribution, and interaction of toxic chemicals released into environment. Topics include acute, subchronic, and chronic toxicity testing; uptake, distribution and metabolism of toxins as well as their distribution in the environment. Emphasizes effects on nonhuman biota, detection and fate of chemicals, and includes discussion of implications for government regulation.

Equivalent to BIOL 745

Prerequisite(s): Courses in ecology and physiology, or permission of instructor.

EVPP 758 - Environment and Public Policy

Credits: 3 (NR)

EVPP 791 - Colloquium in Earth Systems Science

Credits: 1 (NR)
Covers various parts of Earth systems. Invited talks by Mason faculty and primarily Earth science experts in region. Students graded on written reports demonstrating understanding of wide topics covered.
EVPP 792 - Seminar in Earth Systems Science

Credits: 2 (NR)
Seminar for Earth systems science graduate students with background in major systems. Capstone experience. Seminars presented by faculty and students.

Equivalent to GGS 792

Prerequisite(s): 15 graduate credits; and courses on atmosphere, hydrosphere and lithosphere.

Notes: Topics vary from semester to semester.

EVPP 793 - Research in Environmental Science and Public Policy

Credits: 1-3 (RD)
Library, laboratory, or field investigation under supervision of instructor.

Prerequisite(s): 8 graduate credits in EVPP, and permission of instructor and chair.

Notes: Short proposal required. May be repeated for total of 6 credits.

EVPP 798 - Master's Research Project in Environmental Science and Public Policy

Credits: 1-3 (RD)
Experimental, observational, literature-based, or theoretical research project chosen and completed under guidance of faculty member. Proposal required before enrollment. Comprehensive report acceptable to student's committee required for completion.

Prerequisite(s): Approved project proposal, and permission of instructor and chair.

Notes: Students taking EVPP 798 may receive no more than 6 credits for both EVPP 793 and EVPP 798.
EVPP 799 - Master's Thesis in Environmental Science and Public Policy

Credits: 1-6 (RD)
Experimental, observational, or theoretical research under instructor's supervision that culminates in production of thesis. Thesis work should be potentially publishable.

Prerequisite(s): Approved thesis proposal, and permission of instructor and chair.

Notes: No more than 6 credits of EVPP 793 and EVPP 799 may be applied to master's degree.

Hours of Lecture or Seminar per week: 1-8
Hours of Lab or Studio per week: 0
Grading: Satisfactory/No credit only

EVPP 894 - Supervised Internship

Credits: 3-12 (RD)
Training in application of ecological skills to environmental management and policy under supervision of a qualified environmental scientist at governmental agency, consulting firm, industry, or other acceptable organization.

Prerequisite(s): Permission of student's doctoral committee, graduate program director and department chair.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0
Grading: Graduate Special

EVPP 991 - Advanced Seminar in Environmental Science

Credits: 2 (RT)
Topics generally address interface between environmental science and public policy.

Prerequisite(s): 8 hours of ecology, or permission of instructor.

Notes: May be repeated for credit.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 0

EVPP 998 - Doctoral Dissertation Proposal

Credits: 1-6 (RD)
Work on research proposal that forms basis for a doctoral dissertation.

Prerequisite(s): Admission to doctoral candidacy.

Hours of Lecture or Seminar per week: 0
EVPP 999 - Doctoral Dissertation Research

Credits: 1-12 (RD)
Research on basic or applied problem in environmental science and public policy.

Prerequisite(s): Approval of dissertation proposal.

Executive Master of Business Administration (EMBA)

Offered by the School of Management

EMBA 500 - Workshop

Credits: 0 (RT)
Workshop.

Prerequisite(s): Acceptance into EMBA program.

EMBA 603 - Managerial Economics

Credits: 3 (NR)
Develops and applies economic analysis tools in managerial decision situations. Focuses on economic analysis to understand firm's competitive environment.

Prerequisite(s): Admission to EMBA program, or permission of the director.

When Offered: Fall
EMBA 612 - Cost Accounting

Credits: 1-3 (NR)
Focuses on developing accounting information for use by managers in planning and control activities. Examines traditional and emerging cost-management systems. Special emphasis on information for decision-making, operational control, and performance evaluation.

Prerequisite(s): Admission to EMBA program.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0
Grading: Graduate Special
When Offered: Fall

EMBA 613 - Financial Accounting

Credits: 3 (NR)
Develops framework of concepts and procedures essential for interpreting general-purpose financial statements and internal managerial accounting reports. Emphasizes understanding basic concepts and applying selected procedures to problem-solving situations.

Prerequisite(s): Admission to EMBA program.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
Grading: Graduate Special
When Offered: Fall

EMBA 623 - Marketing

Credits: 3 (NR)
Develops market-based knowledge and skills for effective marketing strategy design, implementation, and evaluation. Develops ability to make marketing decisions in wide variety of institutional and competitive situations. Addresses the importance of companies being market-driven and customer-focused. Emphasis on case studies, team work, and projects.

Prerequisite(s): Admission to EMBA program.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
Grading: Graduate Special
When Offered: Spring

EMBA 633 - Applied Business Decision Models

Credits: 3 (NR)
Applies statistical methods in analyzing problems in business decision-making. Topics include descriptive statistics, probability
distributions, estimation and hypothesis testing, and linear regression.

**Prerequisite(s):** Admission to EMBA program, or permission of the director.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**Grading:** Graduate Special  
**When Offered:** Fall

**EMBA 638 - Services and Operations Management**

Credits: 3 (NR)  
Integrates theory and practice of operations management with mathematical modeling and quantitative techniques of management science. Addresses range of operations management issues, including technology and strategy decisions, systems design issues, project operations, quality control, and inventory planning.

**Prerequisite(s):** Admission to EMBA program, or permission of the director.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**Grading:** Graduate Special  
**When Offered:** Spring

**EMBA 641 - Building the High-Performing Team**

Credits: 0-3 (NR)  
Develops the knowledge and skills needed for creating powerful, high-performance teams within and among organizational units. Strategies are offered for alignment of goals, building conditions for coordinated action, generating innovation, and resolving breakdowns.

**Prerequisite(s):** Admission to EMBA program.

**Hours of Lecture or Seminar per week:** 0-3  
**Hours of Lab or Studio per week:** 0  
**Grading:** Satisfactory/No Credit  
**When Offered:** Fall

**EMBA 643 - Managerial Finance**

Credits: 3 (NR)  
Introduces theories of finance and their application to the formulation of business policy. Topics include internal financial analysis, financial forecasting, valuation, risk and return analysis, capital allocation, and capital structure.

**Prerequisite(s):** Admission to EMBA program.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0
EMBA 653 - Organizational Behavior and Teams

Credits: 3 (NR)
Examines development, theories, and practice of management within organizations. Emphasizes human behavior and how it influences organizational effectiveness.

Prerequisite(s): Admission to EMBA program.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
Grading: Graduate Special
When Offered: Fall

EMBA 660 - Management of Information Technology

Credits: 3 (NR)
Examines computer-based information technologies and their interrelation with management processes, especially problem-solving and decision-making at individual, work group, and organization levels. Topics include management information system life cycle, with emphasis on manager's perspective, and modeling and analysis to support decision-making.

Prerequisite(s): Admission to EMBA program, or permission of the director.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
Grading: Graduate Special
When Offered: Fall

EMBA 673 - Legal Environment for Executives

Credits: 1.5 (NR)
Examines the managerial impact of the law upon decision-making processes in business organizations. Lectures as well as discussions of judicial opinions and readings.

Prerequisite(s): Admission to EMBA program.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0
Grading: Graduate Special
When Offered: Fall

EMBA 674 - Business Ethics
Credits: 1-3 (NR)
Designed to strengthen the ability to identify, critically analyze, appropriately respond to, and provide leadership regarding the issues of ethical and socially responsible behavior you may confront as an executive in charge of people, projects, and organizations.

**Prerequisite(s):** Admission to the EMBA program.

**Hours of Lecture or Seminar per week:** 1-3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall, Spring

---

**EMBA 678 - Business Strategy**

Credits: 3 (NR)
Integrates business strategy and policy with functional knowledge developed in other courses and business practice. Issues include formulation of strategy, industry analysis, building core competencies, and strategy implementation.

**Prerequisite(s):** Admission to EMBA program.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**Grading:** Graduate Special  
**When Offered:** Spring

---

**EMBA 696 - Directed Studies in Executive MBA**

Credits: 1-3 (RD)
Approval by faculty member and program director required prior to registration. Studies specialized topics in business not otherwise available in the curriculum.

**Prerequisite(s):** Admission to the EMBA program or permission of the program director.

**Hours of Lecture or Seminar per week:** 1-3

---

**EMBA 697 - Special Topics in Executive MBA**

Credits: 1-3 (RT)
Sections established as necessary to focus on various topical issues that emerge in practice of executive business administration.

**Prerequisite(s):** Admission to the EMBA program or permission of the program director.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**Grading:** Graduate Special.
EMBA 703 - Financial Markets

Credits: 0-3 (RD)
Explores the relationships between financial markets and their impact on corporate financial decision making. Considers cross-market interrelationships, including how financial markets respond by creating financial instruments to meet the varying financial requirements of business firms. The course includes a domestic financial residency in New York that focuses on contemporary developments in these markets.

Prerequisite(s): Admission to EMBA program.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
Grading: Graduate Special
When Offered: Fall

EMBA 709 - Global Capital Markets

Credits: 1-3 (NR)
Considers emerging topics in finance, with focus on links between global markets and strategic firm decisions. Emphasizes understanding valuation of strategic investment opportunities, and identification of financing alternatives.

Prerequisite(s): Admission to EMBA program.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0
Grading: Graduate Special
When Offered: Offered on an irregular basis at the discretion of the department or school

EMBA 710 - Global Macroeconomics

Credits: 1.5 (NR)
Focuses on the modern system of international trade and the opportunities that the global trading environment creates for firms. Attention will be directed toward the roles of national policies, international agreements, and business activities in the development of the system.

Prerequisite(s): Admission to EMBA program.

Hours of Lecture or Seminar per week: 1.5
Hours of Lab or Studio per week: 0
Grading: Graduate Special
When Offered: Spring

EMBA 712 - International Macroeconomics: Concepts and Country Strategy

Credits: 1.5 (NR)
Focuses on the basic concepts of international macroeconomics—national income accounts, monetary and fiscal policies, balance
of payments, and exchange rates. These concepts are introduced and discussed in situations where national economic strategies affect the decisions and performance of business operations.

Prerequisite(s): Admission to EMBA program.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0
When Offered: Fall

**EMBA 715 - Special Topics in Accounting**

Credits: 1-6 (RT)
In-depth examination of advanced topics in accounting.

Prerequisite(s): Admission to EMBA program.

Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 1-12
Grading: Graduate Special
When Offered: Offered on an irregular basis at the discretion of the department or school

**EMBA 716 - Managing Change**

Credits: 1.5 (NR)
Focuses on how organizations can successfully adapt and change. Topics include understanding forces that make change necessary, developing vision of appropriate course, aligning organization behind that vision, and motivating people to achieve it.

Prerequisite(s): Admission to EMBA program.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0
Grading: Graduate Special
When Offered: Fall

**EMBA 718 - Leadership and Change Management**

Credits: 3 (NR)
Focuses on the essential elements of successful organizational change. Emphasis on understanding the forces for change, as well as developing skills to manage a successful change process. Gives a deeper understanding of organizational leadership and an increased ability to be a successful leader. Incorporates and integrates theory, research, and application, with the ultimate goal of providing the student with practical information about leadership.

Prerequisite(s): Admission to the EMBA program.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring
EMBA 725 - Leadership

Credits: 1.5 (NR)
Explores key leadership roles in organizations and their own leadership competencies. Provides understanding of leadership development, power and influence, motivation, strategic decision making, leading change, the influence of globalization and diversity on leadership, and ethical issues.

Prerequisite(s): Admission to the EMBA program or permission of the program director.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0
Grading: Graduate Special
When Offered: Fall

EMBA 735 - Systems Thinking and Dynamics

Credits: 1-3 (NR)
Enables students to develop, express, improve, and validate holistic mental models of problems. In doing so, they will build a foundation for better decision making leading to improved business performance. The main strength of the systems-thinking approach is its emphasis on long-term strategic outcomes as opposed to short-term tactical ones.

Prerequisite(s): Admission to the MBA program, or permission of the program director.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0
When Offered: Fall

EMBA 745 - Special Topics in Finance

Credits: 1-6 (RT)
In-depth examination of advanced topics in finance.

Prerequisite(s): Admission to EMBA program.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0
Grading: Graduate Special
When Offered: Offered on an irregular basis at the discretion of the department or school

EMBA 750 - Capstone Project: Action Learning Project

Credits: 1.5 (RT)
The Integrated Project Application is a lab-based course designed to provide an action learning experience that integrates course content from throughout the EMBA program. Students work in teams to develop solutions to organizational challenges and
opportunities. They select one project from those offered by sponsoring organizations and approved by the faculty members for the course. Student teams evaluate the strategic issues for their assigned clients, design a solution, and present results to an executive panel. Depending on the nature of the issue and faculty requests, team presentations of results include one or more of the following sections: 1) an analysis of the situation 2) recommendations including changes in goals and organizational design, 3) a plan of action integrating marketing, human resource development, organizational design, finance, and operations, and 4) an implementation plan using theories of communication and change management, to include the business case and a business plan. Students are expected to draw upon course work from multiple disciplines in completing this project.

Prerequisite(s): Admission to the EMBA program or permission of the program director.

Notes: Course is repeatable within the term. Offered twice in spring semester for a total of 3 credit hours.

EMBA 751 - Corporate Global Strategy and Capstone

Credits: 1.5-3 (NR)
Examines issues in strategy for firms operating in multiple markets or businesses, including diversification, portfolio approaches to corporate strategy, mergers and acquisitions, corporate alliances and joint ventures, restructuring, and coordinating multibusiness corporations.

Prerequisite(s): Admission to EMBA program.

EMBA 752 - A Strategic View of the Firm

Credits: 0-3 (NR)
Examines the interplay between the industry environment and a firm's resources and capabilities to drive superior performance. The course seeks to integrate multiple functional perspectives to arrive at a complete understanding of the firm within its environment.

Prerequisite(s): Admission to EMBA program.

EMBA 755 - Special Topics in Management
EMBA 765 - Special Topics in Management Information Systems

Credits: 1-6 (RT)
In-depth examination of advanced topics in management information systems.

Prerequisite(s): Admission to EMBA program.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0
Grading: Graduate Special
When Offered: Offered on an irregular basis at the discretion of the department or school

EMBA 775 - Special Topics in Marketing

Credits: 1-6 (RT)
In-depth examination of advanced topics in marketing.

Prerequisite(s): Admission to EMBA program.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0
Grading: Graduate Special
When Offered: Offered on an irregular basis at the discretion of the department or school

EMBA 790 - National Defense Residency # 1

Credits: 1-6 (NR)
Develops National Defense perspective through seminars led by professors and high-level managers; briefings by officials of government and other policy-making organizations.

Prerequisite(s): Admission to EMBA Program or permission of the program director.

Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 0
Grading: Satisfactory/No Credit
When Offered: Fall, Summer
EMBA 791 - The Regulatory and Business Environment of the European Union

Credits: 0-1.5 (RD)
Considers contemporary interactions of businesses, government, and regulation. Seminars and presentations with business, government, and regulatory officials.

Prerequisite(s): Admission to the EMBA program, or permission of the director.

Hours of Lecture or Seminar per week: 1.5
Hours of Lab or Studio per week: 0
Grading: Graduate Special
When Offered: Spring

EMBA 792 - National Defense Residency 2

Credits: 1-6 (NR)
Develops National Defense perspective through seminars led by professors and high-level managers; briefings by officials of government and other policy-making organizations.

Prerequisite(s): Admission to EMBA Program or permission of the program director.

Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 0
Grading: Satisfactory/No Credit
When Offered: Spring

EMBA 795 - Global Residency

Credits: 0-3 (RT)
Develops global perspective through seminars led by professors and high-level managers; briefings by officials of government and other policy-making organizations; and site visits to production and distribution facilities, research centers, IT units, and other corporate offices.

Prerequisite(s): Admission to the EMBA program or permission of the program director.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
Grading: Graduate Special
When Offered: Spring, Summer

Exercise, Fitness, and Health Promotion (EFHP)

Offered by the College of Education and Human Development

EFHP 500 - Workshop in Exercise, Fitness, and Health Promotion
Provides concentrated full-time workshops, weekend seminars, and workshops on selected topics in exercise, fitness, and health promotion.

**Prerequisite(s):** Graduate standing or permission of instructor

**Notes:** May be repeated. No more than 6 credits may be applied for degree credit.

**Hours of Lecture or Seminar per week:** 1-3  
**Hours of Lab or Studio per week:** 0

**EFHP 522 - Anatomy for the Athletic Trainer: Structure and Function of the Neuromuscular and Musculoskeletal Systems**

Credits: 3 (NR)  
Promotes familiarity and proficiency with anatomy of neuromuscular and musculoskeletal systems, which relate directly to sports related injuries.

**Prerequisite(s):** BIOL 124 and 125 or equivalent, and permission of instructor

**Hours of Lecture or Seminar per week:** 2  
**Hours of Lab or Studio per week:** 1

**EFHP 524 - Physiology for the Athletic Trainer Including the Pharmacology of Sports Injuries**

Credits: 3 (NR)  
Promotes familiarity and proficiency in physiology, pharmacology, and rehabilitation of sports injuries.

**Prerequisite(s):** BIOL 124 and 125 or equivalent, and permission of instructor

**Hours of Lecture or Seminar per week:** 2  
**Hours of Lab or Studio per week:** 1

**EFHP 526 - Athletic Training Perspectives: Evaluation and Prevention of Sports Injuries**

Credits: 3 (NR)  
Promotes familiarity and proficiency with assessment and physical examination of sports-related injuries.

**Prerequisite(s):** BIOL 124 and 125 or equivalent, and permission of instructor

**Notes:** Recommended that this course be taken concurrently with EFHP 522.

**Hours of Lecture or Seminar per week:** 2  
**Hours of Lab or Studio per week:** 1
EFHP 528 - Advanced Athletic Training

Credits: 3 (NR)
Promotes familiarity and proficiency with assessment and intervention of neuromusculoskeletal system and other systems of body that relate directly to sports-related injuries.

Prerequisite(s): BIOL 124 and 125 or equivalent, EFHP 526, and permission of instructor

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 1

EFHP 598 - Special Topics

Credits: 1-6 (RT)
Focuses on projects related to exercise, fitness, or health promotion.

Prerequisite(s): Graduate standing or permission of instructor

Notes: May be repeated with no more than 6 credits earned.

Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 0

EFHP 599 - Independent Study EFHP

Credits: 1-3 (RD)
Studies problem areas in exercise, fitness, and health promotion research, theory, or practice under direction of faculty member. May be repeated. No more than 3 credits may be earned.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 1-6

EFHP 605 - History of American Sport, Exercise, and Physical Culture

Credits: 3 (NR)
Role of sport and physical education in Europe and its impact on developments in America.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EFHP 610 - Advanced Exercise Physiology

Credits: 3 (NR)
Lecture, demonstration, and seminar experiences in applying research findings to understanding physiological function and
effects of exercise on people.

**Prerequisite(s):** Graduate standing or permission of instructor

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

### EFHP 611 - Fitness Assessment: Theory and Practice

Credits: 3 (NR)  
Promotes familiarity and proficiency with methods and instrumentation in assessing individual fitness and establishing base for exercise and other lifestyle alternatives to improve fitness.

**Prerequisite(s):** Graduate standing or permission of instructor

**Hours of Lecture or Seminar per week:** 2  
**Hours of Lab or Studio per week:** 2

### EFHP 612 - Scientific Foundation of Applied Kinesiology

Credits: 3 (NR)  
An integrated study of human anatomy, physiology, chemistry, and microbiology, presenting a complete picture of how the body functions and the diseases and disorders that cause the body to malfunction.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

### EFHP 613 - Advanced Applied Biomechanics

Credits: 3 (NR)  
Focuses on kinetic and kinematic concepts and how they apply to the qualitative and quantitative assessment of human movement. Designed for advanced study of motion analysis techniques.

**Prerequisite(s):** Full admission to EFHP graduate program. Introductory Biomechanics, Basic Human Anatomy, and Physics or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Spring

### EFHP 614 - Advanced Exercise Nutrition

Credits: 3 (NR)  
Advanced study of nutrition's relation to physical activity, exercise, and sports. Reviews biochemical, physiological, and
behavioral aspects of nutrition in promoting health, fitness, and sports performance. Focuses on nutrient needs during life cycle stages.

**Prerequisite(s):** Graduate standing or permission of instructor

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**EFHP 615 - Epidemiology and Environmental Health**

Credits: 3 (NR)  
Principles, methods, and application of epidemiology. Reviews behavioral, psychological, social, and environmental risks to disease distribution. Focuses on lifestyle, exercise patterns, and environmental factors to health and disease conditions.

**Prerequisite(s):** Graduate standing or permission of instructor

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**EFHP 616 - Motor Behavior and Development**

Credits: 3 (NR)  
Human motor behavior development and theory with application to evaluation of skill acquisition.

**Prerequisite(s):** Graduate standing or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**EFHP 618 - Exercise and Sport Psychology**

Credits: 3 (NR)  
Covers psychological and social-psychological antecedents and consequences of exercise, physical activity, and sports participation. Emphasizes theory and research on personality, motivation, arousal, cognition, attributions, attitudes, self-efficacy, leadership effectiveness, and group dynamics.

**Prerequisite(s):** Graduate standing or permission of instructor

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**EFHP 620 - Research Methods for Applied Kinesiology**
Credits: 3 (NR)
Introduction to the techniques of research generally employed in the fields of exercise science and health.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**EFHP 621 - Statistical Methods for Applied Kinesiology**

Credits: 3 (NR)
Introduction to practical and applied aspects of both descriptive and applied aspects of both descriptive and inferential statistics in exercise science and health.

Prerequisite(s): Full admission to EFHP graduate program, MATH 102, STAT 250 or permission of the instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**EFHP 623 - Research Design and Statistical Reasoning**

Credits: 3 (NR)
Introduces techniques of research and methods of data analysis.

Prerequisite(s): Graduate standing or permission of instructor

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**EFHP 630 - Exercise, Health, and Fitness Program Development**

Credits: 3 (NR)
Covers exercise and health program development related to fitness and health of adult populations.

Prerequisite(s): Graduate standing or permission of instructor

Notes: Provides 3 to 6 hours of field experience.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**EFHP 650 - Scientific Principles of Motor Learning**

Credits: 3 (NR)
Biomechanical analysis and application of scientific principles of movement to instructing sport skills in physical education and sport programs.
Prerequisite(s): Graduate standing or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EFHP 660 - Management of Exercise, Fitness, and Health Promotion Organizations

Credits: 3 (NR)
Advanced study in management and administration of organizations dedicated to human development and improvement of quality of life. Covers application of theories and practices of management and behavioral sciences, fiscal management, marketing, and evaluation research.

Prerequisite(s): Graduate standing or permission of instructor

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EFHP 670 - Analysis of Teaching in Physical Education

Credits: 3 (NR)
Presents qualitative and quantitative research methods for studying teacher and student behaviors in physical education setting, and engaging teacher as researcher. Revisits teaching strategies, develops action research projects, and examines current education reform movements.

Prerequisite(s): Graduate standing or permission of instructor

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EFHP 671 - Teaching PHED in Secondary School

Credits: 3 (NR)
Advanced study of methods, materials, content and organization of physical education programs. Emphasis on curriculum planning, current methodologies, and trends.

Prerequisite(s): Graduate standing or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EFHP 680 - Ethical Issues in Exercise, Fitness, and Health Promotion
EFHP 690 - Scientific Communications

Credits: 3 (NR)
Studies and applies written and verbal communication skills in reading, analyzing, writing, and distributing scientific information in Applied Kinesiology.

Prerequisite(s): EFHP 612, EFHP 620, EFHP 621, or Permission of Instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall.

EFHP 798 - Project

Credits: 1-3 (RD)
Addresses an applied exercise, fitness, and health promotion issue under supervision of graduate faculty member.

Prerequisite(s): Graduate standing or permission of instructor

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0
Grading: Graduate Special

EFHP 799 - Thesis

Credits: 1-6 (RD)
Explores exercise, fitness, and health promotion problem using appropriate research methodology and under supervision of graduate faculty member.

Prerequisite(s): Graduate standing or permission of instructor

Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 0
Grading: Satisfactory/No Credit

EFHP 802 - Readings for the Doctor of Arts in Community College Education
Credits: 3-9 (RD)
Intensive reading in recent scholarship in physical education and related fields. Students must propose reading list that must be approved by faculty advisor and use list to prepare potentially publishable literature review.

Prerequisite(s): Graduate standing or permission of instructor

Hours of Lecture or Seminar per week: 3-9
Hours of Lab or Studio per week: 0
Grading: Graduate Special

Film and Video Studies (FAVS)

Offered by the College of Visual and Performing Arts

FAVS 100 - Film and Video Studies Colloquium

Credits: 1 (RD)
Students are exposed to the film and video industry through film professionals. Students are required to attend all sessions, review the speaker's materials prior to the class, prepare questions, and complete written critiques. FAVS majors are required to take FAVS 100 twice.

Prerequisite(s): FAVS majors only.

Notes: Students may repeat for a total of 5 credits but only 2 credits of C or better may be applied to the degree.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 2
When Offered: Fall, Summer, Spring

FAVS 225 - The History of World Cinema

Credits: 3 (NR)
This course is a survey of the history of cinema. It explores the development of world cinema from its beginnings in the late nineteenth century to the 1990s. The course will enable students to comprehend the evolution of the history and language of cinema in order to connect the art of filmmaking with the "outside forces" (i.e., the economic institutions, key figures, historical events and social issues) that profoundly shape and influence it.

Fulfills Mason Core requirement in arts.

Hours of Lecture or Seminar per week: 3
When Offered: Fall, Summer, Spring

FAVS 255 - Video Production for Film
This course is a hands-on methods course in video production for film. Through practice, reading, film viewing and discussions, you will be introduced to the art and activity of digital filmmaking across film genres. Students must complete reading, writing, and production assignments that justify and plan for their creative choices. Handouts describing projects, expectations and evaluative criteria will be provided.

Equivalent to COMM 355.

Notes: FAVS majors only.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

FAVS 300 - Global Horror Film

Credits: 3 (NR)
Taking an historical approach through various national and international cinemas, the course begins with horror film's literary and theatrical origins and traces its development into a modern (and postmodern) form of universal storytelling.

Fulfills Mason Core requirement in global understanding.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Summer, Spring

FAVS 335 - Sound and Lighting for Film and Video

Credits: 3 (NR)
This course will instruct students on the theories, techniques, and technologies pertaining to recording audio and lighting scenes in both field and studio video productions. The course will be lecture based with practical lab styled exercises reinforcing topics presented during lecture.

Prerequisite(s): COMM 355 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

FAVS 352 - Ethics of Film and Video

Credits: 3 (NR)
An examination of ethical issues associated with image production and consumption. Topics include the technological development of the film apparatus, privacy, the pursuit of objectivity, excess, consent, and representing others. All issues highlight the increasingly sophisticated and powerful role of film and media authorship. Students will develop a more complex view of the ethics of screen representation (both fiction and nonfiction) and be encouraged to take stock of the ethics of their own media literacy.
Fulfills Mason Core requirement in synthesis.

Prerequisite(s): Completion or concurrent enrollment in all other required Mason Core courses and completion of 21 credits within the FAVS program.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

FAVS 355 - Film Business Practices

Credits: 3 (NR)
An overview of the film industry from a business perspective. Students learn basic business practices, film financing, business plans, film distribution, and management and marketing techniques appropriate for the film industry.

Prerequisite(s): COMM 454 or FAVS 352.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

FAVS 356 - Film Marketing

Credits: 3 (NR)
This course is designed to teach students how to market their film projects (pre- and post-production) using traditional methods and techniques of the 21st century.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Summer, Spring

FAVS 357 - New Media and Film Distribution

Credits: 3 (NR)
This course explores how emerging media technologies function and how the film and video firms are changing with the advent of new media technologies. Through research and guided projects, students learn how new media technologies are altering the financing, distribution, exhibition, and marketing of films and videos.

Prerequisite(s): Completion of 45 credits or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Summer, Spring

FAVS 365 - Documentary Filmmaking I
An introduction to documentary filmmaking in which each student makes a short digital documentary, from concept development to finished piece. The class covers essential technical skills, emerging styles of nonfiction film, and documentary storytelling techniques.

Prerequisite(s): Satisfactory completion of COMM 355.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

FAVS 375 - Fiction Film Directing

Credits: 3 (NR)
This course examines techniques for directing fiction films. Students study the directorial approaches of a variety of directors by viewing and critiquing classic films. Students learn about the director's role in each stage of film production. Students shoot, direct and edit fictional scenes and sequences intended to develop and convey the beginnings of the authorial signatures.

Prerequisite(s): COMM 355 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Summer, Spring

FAVS 399 - Special Topics in Film and Video Studies

Credits: 1-3 (RT)
In-depth presentation and exploration of topical studies.

Notes: Subject matter varies. May be repeated for a maximum 12 credits when taken under different topics.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0
When Offered: Fall, Summer, Spring.

FAVS 400 - Film and Video Career Seminar

Credits: 1 (RD)
This course is designed to guide students through the portfolio process. At the end of the semester, students will have a completed, professionally reviewed resume and demo reel, and have experienced a professional interview.

Prerequisite(s): Completion of required courses within chosen concentration or permission of instructor.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0
When Offered: Fall, Summer, Spring
FAVS 450 - Internship in Film and Video Studies

Credits: 3 (RD)
On-the-job training in film and video studies through approved fieldwork study programs. Internships are arranged and supervised by the FAVS director.

Prerequisite(s): 75 credits, 15 credits in core/elective FAVS courses, and permission of the Internship Coordinator.

Notes: Required for all FAVS majors.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0

FAVS 453 - Film and Video Studies Pedagogy and Principles

Credits: 3 (RD)
Theory and practice in facilitating the learning of principles and skills in film and video. Students work as instructor aids under the supervision of a faculty member. Activities include facilitating small group activities and individually critiquing classroom performances.

Prerequisite(s): Declared FAVS major. Student must have successfully completed the course they will facilitate with a grade of B or better, have comparable experience, or receive permission from the instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Summer, Spring

FAVS 455 - Studio and Field Productions Practicum

Credits: 3 (NR)
Practical knowledge in studio and field productions. Students complete a minimum 150 hours of work as assistants to engineers, producers, directors, and organizers of video production facilities on campus.

Prerequisite(s): COMM 355 and permission of instructor.

Notes: Not repeatable.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Summer, Spring

FAVS 460 - Advanced Video Editing

Credits: 3 (NR)
This course will instruct students on the theories, techniques and technologies pertaining to video editing for fiction and documentary films, as well as commercials. The course will combine lectures, discussions, and demonstrations with hands on
projects.

**Prerequisite(s):** COMM 355, COMM 360 or portfolio review.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall, Summer, Spring.

---

**FAVS 470 - Film and Video Screenwriting**

Credits: 3 (NR)
The purpose of this course is to build a strong foundation in fundamental, narrative, screenwriting techniques for film. Students will learn how to express their unique story ideas through character development, plot and dialogue.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall, Summer, Spring

---

**FAVS 483 - Feature-Length Scriptwriting**

Credits: 3 (NR)
This course is an introduction to the development and analysis of feature length screenplays. The approach combines lecture, discussion, screening and presentation of student work. By the end of the semester, each student should have a complete first draft of an original screenplay. Students will also complete story reports/coverage reports of screenplays by other writers.

**Prerequisite(s):** FAVS 470 or THR 482 or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Spring

---

**FAVS 490 - Independent Study**

Credits: 1-6 (RD)  
Independent research on specific project under direction of selected faculty member.

**Prerequisite(s):** Permission of instructor.

**Hours of Lecture or Seminar per week:** 1-6  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall

---

**FAVS 498 - Creative Producing and Development**
An introduction to the creative process of researching and developing material for film and video for senior projects. The course examines evaluating and developing existing literary material, documentary work, and/or fictional material.

**Prerequisite(s):** Senior status in the FAVS program.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall, Summer, Spring.

### FAVS 499 - Senior Project

Credits: 3 (NR)  
Culminating seminar devoted to analyzing and synthesizing knowledge and skills gained through undergraduate course work as it applies to film, video studies, and professional development.

**Prerequisite(s):** FAVS 498.

**Notes:** Students will be required to develop and present written materials and documentation related to the development and presentation of their works, as well as present their work in FAVS 100 Film and Video Studies Colloquium as part of their formal oral presentation.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

### FAVS 535 - Sound and Lighting

Credits: 3 (NR)  
This course will instruct students on the theories, techniques, and technologies pertaining to recording audio and lighting scenes in both field and studio video productions. The course will be lecture based with practical lab styled exercises reinforcing topics presented during lecture.

**Prerequisite(s):** Admission to the MAIS in Film and Video Studies or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall, Summer, Spring

### FAVS 550 - Internship

Credits: 3 (RD)  
On-the-job training in film and video studies through approved fieldwork study programs. Internships are arranged and supervised by the FAVS director.

**Prerequisite(s):** Permission of the Internship Coordinator.

**When Offered:** Fall, Summer, Spring.
FAVS 565 - Documentary Filmmaking

Credits: 3 (NR)
A documentary filmmaking workshop in which each student makes a short digital documentary, from concept development to finished piece. The class covers essential technical skills, emerging styles of nonfiction film, and documentary storytelling techniques.

Prerequisite(s): Admission to the MAIS in Film and Video Studies or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Summer, Spring

FAVS 570 - Screenwriting

Credits: 3 (NR)
Screenwriting course emphasizing student development in screenplay form, structure, and storytelling with emphasis on craft, character, and story culminating in a screenplay.

Prerequisite(s): Undergraduate degree or equivalent, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Summer, Spring.

FAVS 575 - Fiction Film Directing

Credits: 3 (NR)
This course examines techniques for directing fiction films. Students study the directorial approaches of a variety of directors by viewing and critiquing classic films. Students learn about the director’s role in each stage of film production. Students shoot, direct and edit fictional scenes and sequences intended to develop and convey the beginnings of the authorial signatures.

Prerequisite(s): Admission to the MAIS in Film and Video Studies or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Summer, Spring

FAVS 590 - Independent Study

Credits: 1-6 (RD)
Independent research on specific project under direction of selected faculty member.

Prerequisite(s): Undergraduate degree or equivalent, or permission of instructor.
FAVS 597 - Independent Production

Credits: 1-3 (RD)
Media or creative production activities under direction of faculty member. Requires completed production; written report, oral exam may be required.

Prerequisite(s): Permission from department.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0
When Offered: Fall, Summer, Spring.

FAVS 598 - Seminar in Film and Video Studies

Credits: 3 (RD)
Develop tools and techniques for successful pursuit of a career in film and video production, distribution and marketing through readings, original projects, case studies, analysis of industry practices, and study of film and media tools and projects.

Prerequisite(s): Enrollment in CVPA or CHSS graduate program.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

FAVS 599 - Special Topics

Credits: 1-6 (RT)
In-depth presentation and exploration of topical studies.

Prerequisite(s): Undergraduate degree or equivalent, or permission of instructor.

Notes: Subject matter varies. May be repeated for a maximum 9 credits when taken under different topics.

Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 0
When Offered: Fall, Summer, Spring.

Finance (FNAN)

Offered by the School of Management
If a student takes noncore, upper-level business courses before admission to SOM, those courses will not count on an undergraduate degree application for any major in the school, except as general elective credit. A grade of C or higher must be presented on the graduation application for each upper-level course in the major. Course prerequisites are strictly enforced. Degree status is defined as formal admission to BS degree status in SOM.

**FNAN 300 - Personal Financial Management**

Credits: 3 (NR)
Emphasis is on understanding the importance of developing financial goals and how financial decisions affect those goals throughout their lifetime. In addition, students will develop their own financial goals along with a financial plan that would enable them to meet those goals. This course may be taken for regular grading or S/NC. Students must notify instructor which option they want. FNAN 300 may be taken for general elective credit by School of Management students.

- **Hours of Lecture or Seminar per week:** 3
- **Hours of Lab or Studio per week:** 0
- **Grading:** Special undergraduate.
- **When Offered:** Fall, Spring

**FNAN 301 - Financial Management**

Credits: 3 (NR)

Introduction to managing a firm's financial resources given wealth maximization decision criterion. Includes working capital management, fixed-asset investment, cost of capital, capital structure, and dividend decision analysis. School of Management students will not be permitted to make more than three attempts to achieve a C or higher in FNAN 301. Those who do not successfully complete this course within three attempts will be terminated from their major and will not be eligible to receive a degree from the School of Management. For more information about this, see the "Termination from the Major" section under Academic Policies.

**Prerequisite(s):** C or better in ECON 103, ACCT 203, and OM 210; sophomore standing. Prerequisite enforced by registration system.

**Notes:** Lecture, problems, and discussion. Requires attendance in weekly lectures and recitations. The final exam for FNAN 301 may be scheduled to take place for all sections at the same time during the final exam period. Accommodations will be made for exam and religious conflicts and for certain official university-sponsored activities.

- **Hours of Lecture or Seminar per week:** 3
- **Hours of Lab or Studio per week:** 0
- **When Offered:** Fall, Spring, Summer

**FNAN 302 - Financial Analysis, Forecasting, and Valuation**

Credits: 3 (NR)
Examines techniques for analyzing, understanding, and applying financial information in decision situations. Topics include financial statement analysis, development of financial models, and financial planning and forecasting.
**Prerequisite(s):** Degree Status and a grade of B minus or higher in FNAN 301. Prerequisite enforced by registration system.

**Notes:** Lecture, discussion, computer-assisted research.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall, Spring

---

**FNAN 311 - Principles of Investment**

Credits: 3 (NR)  
Introduces analysis of the valuation of equity and debt securities given modern capital market theory. Includes discussion of portfolio analysis as related to valuation of securities.

**Prerequisite(s):** Degree Status and a grade of B minus or higher in FNAN 301. Prerequisite enforced by registration system.

**Notes:** Lecture, discussion, and computer-assisted research.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall, Spring

---

**FNAN 321 - Financial Institutions**

Credits: 3 (NR)  
Discusses basic objectives of financial institutions in light of industry structure and regulatory environment, and decision variables that management should concentrate on to achieve objectives. Includes role of financial institutions in allocation of funds in financial markets.

**Prerequisite(s):** Degree Status and a grade of B minus or higher in FNAN 301. Prerequisite enforced by registration system.

**Notes:** Lecture, discussion, and computer-assisted research.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall, Spring

---

**FNAN 351 - Principles of Real Estate**

Credits: 3 (NR)  
Studies dimensions and specialties involved in public control and private development, sale, finance, and management of real estate. Includes land planning, land-use control, appraisal, finance, brokerage, property management, and investment.

**Prerequisite(s):** C or higher in FNAN 301, degree status. Prerequisite enforced by registration system.

**Notes:** Lecture, discussion, and computer-assisted research.
FNAN 401 - Advanced Financial Management

Credits: 3 (NR)
Analyzes decision-making in firm, emphasizing conceptual structure of problems and using advanced analytic techniques. Topics include current asset management, capital budgeting and structure, dividend policy, long-term financing, mergers, and corporate planning models.

Prerequisite(s): Degree Status and a grade of B minus or higher in FNAN 301. Prerequisite enforced by registration system.

Notes: Lecture, discussion, and case analysis.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

FNAN 411 - Investment Analysis and Portfolio Management

Credits: 3 (NR)
Analyzes modern techniques of portfolio management including evaluating standards for selecting individual securities to include or delete from portfolios. Presents risk-return analysis for portfolios and portfolio performance measures. Lecture, discussion, computer assisted research.

Prerequisite(s): Degree Status and a grade of C or higher in FNAN 311. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

FNAN 412 - Futures and Options Markets

Credits: 3 (NR)
Introduces options, commodity, and financial futures markets as they function to provide pricing mechanisms and alternative investment vehicles. Lecture, discussion, and computer-assisted research.

Prerequisite(s): Degree Status and a grade of C or higher in FNAN 311. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

FNAN 421 - Money and Capital Markets

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring
Discussion of how financial markets are organized, their role in the allocation of funds to various market segments, and interaction between markets. Topics include aggregate flow of funds analysis; and money, government, corporate, and mortgage markets. Lecture, discussion, and computer assisted research.

**Prerequisite(s):** Degree Status and a grade of C or higher in FNAN 321. Prerequisite enforced by registration system.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall, Spring

---

### FNAN 430 - Empirical Methods in Finance

Credits: 3 (NR)  
Examines statistical and econometric techniques used in analyzing financial data and developing financial models. Combines development of understanding of fundamental concepts with applications. Includes extensive use of standard software.

**Prerequisite(s):** C or higher in FNAN 311 or FNAN 321; BS degree status. Prerequisite enforced by registration system.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall, Spring

---

### FNAN 432 - Fixed-Income Securities

Credits: 3 (NR)  
Focuses on analysis of fixed-income securities, including corporate and government bonds, mortgage-backed securities, and derivatives. Major topics include institutional features of fixed-income securities markets, valuation, analysis of risks, and portfolio management decisions.

**Prerequisite(s):** C or higher in FNAN 311; BS degree status. Prerequisite enforced by registration system.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall, Spring

---

### FNAN 440 - International Financial Management

Credits: 3 (NR)  
Introduces management of contemporary firm's international financial operations. Topics include foreign exchange risk, political risk, returns and risks of international projects, international money and capital markets, financial accounting, capital structure, and cost of capital. Lecture, discussion, readings, and problems.

**Prerequisite(s):** Degree Status and a grade of B minus or higher in FNAN 301. Prerequisite enforced by registration system.

**Hours of Lecture or Seminar per week:** 3
**FNAN 451 - Real Estate Finance**

Credits: 3 (NR)
Studies mechanisms of real estate finance, sources of funds, loan contracts, principles of mortgage risk analysis, and secondary mortgage markets. Develops analytical skills including using microcomputer and appropriate software.

**Prerequisite(s):** C or higher in FNAN 351, degree status. Prerequisite enforced by registration system.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall, Spring

**FNAN 454 - Real Estate Development**

Credits: 3 (NR)
Examines commercial real estate development process and principles plus actual residential, office, retail, and industrial projects. Includes financial analytical techniques to investigate project feasibility, density, financing viability, cash flows, and valuation. Emphasis placed on real-world, entrepreneurial, decision-making skills for developing commercial real estate. Lecture, discussion, project analysis.

**Prerequisite(s):** C or higher in FNAN 351, degree status. Prerequisite enforced by registration system.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall, Spring

**FNAN 462 - Honors Seminar in Finance**

Credits: 3 (NR)
Provides an in-depth study and analysis of contemporary developments and topics of interest in finance. Topics and format will vary. Enrollment is limited and competitive.

**Prerequisite(s):** Finance major, degree status, senior standing, permission of the instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall, Spring

**FNAN 491 - Special Topics in Finance**
Credits: 3 (NR)
Advanced study of special topics in finance.

**Prerequisite(s):** C or higher in FNAN 301, degree status. Prerequisite enforced by registration system.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall, Spring

---

**FNAN 499 - Independent Study**

Credits: 1-3 (RT)  
May be repeated to a maximum of 6 credits if topics vary. Degree status. Research and analysis of selected problems or topics in finance.

**Prerequisite(s):** Finance majors with at least 9 upper-level credits, degree status.

**Notes:** Must be arranged with instructor and approved in writing by associate dean for undergraduate programs before registration. Written report required. May be repeated for maximum 6 credits if topics vary.

**Hours of Lecture or Seminar per week:** 1-10  
**Hours of Lab or Studio per week:** 0

---

**Foreign Languages (FRLN)**

Offered by the College of Humanities and Social Sciences

---

**FRLN 309 - Humanities College to Career**

Credits: 1 (NR)  
Focuses on career choices and effective self-presentation for soon-to-be graduating students with majors in the humanities. Explores how skills typically learned in humanities majors can be leveraged for a successful transition to post-graduation employment.

Equivalent to ENGH 303, HIST 385, PHIL 393.

**Hours of Lecture or Seminar per week:** 1  
**Hours of Lab or Studio per week:** 0

---

**FRLN 310 - Outside of Hitler’s Shadow: Germany in its Global Context**

Credits: 3 (NR)  
Critical examination of images of Nazis, Hitler, and Holocaust in media, popular culture. Demystify and de glamorize such images while highlighting philosophical, cultural, and scientific contributions of Germany, Austria, and Switzerland.
Prerequisite(s): Completion of concurrent enrollment in all other Mason Core courses.

FRLN 330 - Topics in World Literature

Credits: 3 (RT)
Major works of world literature with varying perspectives and topics, such as specific cultures, histories, myths, or music and the arts, as represented in literature.

Fulfills Mason Core requirement in literature.

Prerequisite(s): ENGL 101/ENGH 101 and 45 credits, or permission of instructor.

Notes: Taught in English. May be repeated for a maximum of 9 credits when topic differs with permission of department.

FRLN 331 - Topics in World Cinema

Credits: 3 (RD)
Major works of world cinema with varying perspectives and topics, such as specific genres, periods, schools.

Prerequisite(s): English 101 or permission of instructor.

Notes: Course work in English. May be repeated for a maximum of 9 credits when topic is different with permission of department.

FRLN 380 - Topics in the Sociopolitics of Language

Credits: 3 (RD)
Addresses relationship between language and other social and cultural systems (macro sociolinguistics), and critical study of people's ideas about language (language ideology). Utilizes comparative approach to explore ways people use language to perform and communicate various social identities and categories; how and why people attach social meanings and values to particular ways of using language; development of official and unofficial language policies; and impact of language policies.

Prerequisite(s): ENGL 101/ENGH 101 and 45 credits, or permission of instructor.

Notes: May be repeated for a maximum of 6 credits when topic is different.
FRLN 385 - Multilingualism, Identity, and Power

Credits: 3 (NR)
Study of individual and societal aspects of multilingualism including language choice, linguistic maintenance and shift, code-switching, language planning, educational policy, and representations of multilingualism. Interdisciplinary approach emphasizes the social and political aspects of multilingualism, as well as the relationship of language to cultural, ethnoracial, and national identities and categories.

Fulfills Mason Core requirement in synthesis.

Prerequisite(s): Completion or concurrent enrollment in all other required Mason Core courses.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

FRLN 430 - Topics in Comparative World Literatures

Credits: 3 (RD)
Explores comparative studies of a topic through literary works written in at least two different languages. All material provided in translation.

FRLN 431 - Medieval Intellectual Topics

Credits: 3 (NR)
Focuses on topic in intellectual history of Middle Ages. Emphasizes literary or historical, depending on discipline of instructor. Relevant material may be drawn from philosophy, theology, and art.

Equivalent to ENGH 421/HIST 431, ENGL 431 (2010-2011 Catalog)

Notes: May be taken for credit by English or history majors.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

FRLN 510 - Bibliography and Research in Foreign Languages and Literature

Credits: 3 (NR)
Use of basic bibliographical tools and methodologies for scholarly research in French, German, and Spanish. Taught in cooperation with university library staff.

Prerequisite(s): Graduate standing or permission of department.

Notes: Conducted in English.
FRLN 525 - Literary Translation

Credits: 3 (NR)
Critical approach and analysis of diverse texts such as poetry, drama, essay, and novel excerpts.

Prerequisite(s): Graduate standing or permission of department and advanced coursework in literary translation.

FRLN 550 - Special Topics

Credits: 3 (RT)
Themes, periods, or genres vary from semester to semester. Focuses on topics that incorporate one or more languages taught in department, but instruction is in English.

Notes: May be repeated for a maximum of 6 credits with permission of department.

FRLN 551 - Special Topics

Credits: 3 (RD)
Themes, periods, or genres vary from semester to semester. Focuses on topics that incorporate one or more languages taught in department, but instruction is in English.

Notes: May be repeated for a maximum of 6 credits with permission of department.

FRLN 565 - Theory of Translation

Credits: 3 (NR)
Lectures on nature, function of translating process. Evaluates theories of translation with respect to text typology. Critiques selected translations from target languages to English and vice versa.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
FRLN 572 - Integrating Technology into Language Learning

Credits: 3 (NR)
Explores pedagogical and theoretical basis for integrating interactive technologies into language learning programs, and examines potential for learning, teaching, testing, and research. Includes hands-on analysis and evaluation of materials.

Prerequisite(s): Graduate standing or permission of department, language teaching methods course, and language teaching experience.

Notes: Prior experience with technology not required.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

FRLN 573 - Basic Issues in Language Pedagogy

Credits: 3 (NR)
Explores major issues controversial in language pedagogy. Topics include communicative competence as pedagogical goal, role of explicit grammar teaching, proficiency movement, cultural authenticity, student-centered learning, and technology.

Prerequisite(s): Graduate standing or permission of department, language teaching methods course, and language teaching experience.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

FRLN 590 - Internship and Seminar in Translation

Credits: 3 (NR)
Internships are nonpaying, work-study positions that focus on the practice of translation. Qualified students placed with area institutions, interest groups, agencies, or corporations.

Prerequisite(s): Admission to translation certificate program.

Notes: Placement depends on availability of positions.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

FRLN 600 - Workshop in Foreign Languages

Credits: 1-6 (RT)
In-service workshops, tours, and seminars on selected topics in literature, language, bilingualism, culture, methodology.

Notes: May not be applied toward MA in foreign languages without permission of department.
FRLN 620 - Literary Theory and Criticism

Credits: 3 (NR)
Studies nature of literary work, and analyzes contemporary critical approaches to literature.

Notes: May not be taken for credit by students who previously received credit for FRLN 615.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

FRLN 650 - The Teaching of Culture in Foreign Language Programs

Credits: 3 (NR)
Purpose and methods of study of culture, with emphasis on strategies and techniques for teaching culture in foreign language programs.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

FRLN 660 - Approaches to the Study of Language

Credits: 3 (NR)
Linguistics and its relationship to other disciplines, including study of generative grammar with syntactic problems drawn from commonly taught foreign languages.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

FRLN 670 - Foreign Language Learning and Teaching

Credits: 3 (NR)
Theories, methods, and strategies of second and foreign language learning and teaching.

Notes: May not be taken by students who have completed FRLN 570.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

Forensics (FRSC)
FRSC 200 - Survey of Forensic Science

Credits: 3 (NR)
This course will familiarize students with the basic principles and uses of forensic science in the American system of justice. This course will review the basic applications of biological, physical, chemical, medical and behavioral sciences to questions of evidence and law. In doing so, students should gain a basic understanding of the capabilities and limitations of the forensic sciences as they are practiced.

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0
**When Offered:** Fall

FRSC 201 - Introduction to Criminalistics

Credits: 3 (NR)
An overview of the field of criminalistics, with a focus on the recognition, collection, preservation, and analysis of physical evidence. An introduction to topics such as fingerprints examination, trace evidence analysis, and to prepare students for additional, more in-depth classes in criminalistics/forensic science.

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0
**When Offered:** Fall

FRSC 302 - Forensic Bio-Trace

Credits: 3 (NR)
This course will familiarize students with an overview of the field of forensic science, including areas of trace and biological evidence. Various topics address the analysis of blood and physiological fluid identification, typing, reporting results, and expert testimony.

**Prerequisite(s):** Admitted to Forensic Science Program FRSC 200, FRSC 201, BIOL 213.

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0
**When Offered:** Fall

FRSC 303 - Forensic Evidence and Ethics

Credits: 3 (NR)
This course will acquaint the student with the application of scientific methods and the interaction it may have with legal principles. It will prepare, in a broad sense, the student for future applications of forensic science with its role in the
administration of justice, and the ethical rules and duties under codes of professional conduct.

Prerequisite(s): Admitted to Forensic Science Program, FRSC 200, and CRIM 100; or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

FRSC 304 - Forensic Chemistry and Microscopy

Credits: 3 (NR)
Introduction to the theme of forensic science in its application to the fundamentals of chemistry exposing students to widely used concepts of toxicology and arson investigation. An introduction to microscopy helps students master the foundational principles of microscopy in analyzing forensic trace evidence.

Prerequisite(s): Admitted to Forensic Science Program, CHEM 211, and CHEM 212; or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring

FRSC 405 - Independent Studies / Research

Credits: 3 (NR)
Independent Studies / Research. Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.

Prerequisite(s): Admitted to Forensic Science Program and 90 hours, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring, Summer

FRSC 415 - Selected Topics in Forensic Science

Credits: 3 (RD)
Topics vary according to instructor's specialty.

Prerequisite(s): Permission of instructor

Notes: May be repeated only with permission of program chair.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring
FRSC 420 - Forensic Toxicology

Credits: 3 (NR)
Examines toxic substances and their effects on human cellular and organ systems. The course focuses on human physiological concepts, the human enzymatic detoxification processes, methodologies for identifying toxins, and specific toxic analytes.

Prerequisite(s): Completion of forensic science foundation courses

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

FRSC 440 - Forensic Chemistry

Credits: 3 (NR)
The principles of forensic chemistry will be addressed in this course, including analytical chemistry, instrumentation, sample handling, drug chemistry and pharmacology, and analysis of physical evidence such as papers, inks, paints, and coatings.

Prerequisite(s): Completion of forensic science foundation courses

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

FRSC 460 - Forensic DNA Sciences

Credits: 3 (NR)
Presentation of the general principles and methodologies used in forensic DNA profiling. Topics include the development of DNA profiling methods, current DNA typing techniques, forensic DNA and paternity-related issues, and legal issues associated with quality control, frequency estimates, sample conditions, chain of custody, and admissibility.

Prerequisite(s): Completion of forensic science foundation courses

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

FRSC 500 - Introduction to Forensic Science

Credits: 3 (NR)
Overview of forensic science and related investigative techniques. Includes coverage of crime scene investigation, crime scene procedures, the role of the forensic pathologist, the modern forensic laboratory, DNA analysis techniques, microanalysis, examination of trace evidence, hair and fibers, examination of questioned documents, forensic anthropology, forensic odontology, homicide investigation, and analysis of a mock crime scene.

Prerequisite(s): Graduate standing.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
FRSC 510 - Basic Crime Analysis

Credits: 3 (NR)
Examines the role of the first officer at the scene, search, seizure and related legal issues, traditional crime scene measurements, photogrammetry, processing latents, crime scene reconstruction methods, 2-D and 3-D impressions, blood spatter analysis, collection of trace evidence, packaging and preserving evidence, outdoor crime scenes, and explosion and fire scenes.

Prerequisite(s): Graduate standing.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

FRSC 511 - Advanced Crime Scene Analysis

Credits: 3 (NR)
Advanced Crime Scene Analysis is designed to build on concepts introduced in FRSC 510 (Basic Crime Scene Analysis), and to provide an enhanced foundation in the field of criminalistics for those students who are interested in learning the application of science to solving crimes.

Prerequisite(s): FRSC 510 or permission of instructor

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring

FRSC 512 - Physical Evidence Analysis

Credits: 3 (NR)
This is a series of practical laboratory exercises that introduces the student to sophisticated crime scene documentation techniques including collection of evidence, examination of hairs, fibers, toolmarks and other trace evidence. Advanced topics in blood spatter, trajectory, pattern casting, and alternate light sources will be explored.

Prerequisite(s): FRSC 510 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring

FRSC 513 - Forensic Photography

Credits: 3 (NR)
This series of lecture and practical exercises introduces the student to sophisticated crime scene documentation techniques including photography, digital imaging, use of lighting, and legal issues relating to images.
Prerequisite(s): Admitted to the Forensic Science Master’s Program, or permission of instructor.

Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0  
When Offered: Spring

FRSC 515 - Selected Topics in Forensic Science

Credits: 3 (RD)  
Topics vary with instructor's specialty. May be repeated only with permission of program chair.

Prerequisite(s): Permission of instructor

Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0  
When Offered: Fall, Summer, Spring

FRSC 520 - Toxicology

Credits: 3 (NR)  
Examines toxic substances and their effects on human cellular and organ systems. The course focuses on human physiological concepts, the chemistry of toxins, the human enzymatic detoxification processes, and the analytical techniques required for detecting the presence of toxins and their metabolites in human tissue or serum.

Prerequisite(s): Advanced level undergraduate course in molecular or cellular biology, biochemistry or permission of instructor.

Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0

FRSC 530 - Law and Forensic Science

Credits: 3 (NR)  
A detailed examination and analysis of the law affecting forensic science across the discipline range. Special emphasis is given to the laws affecting evidence, courtroom procedure, and the forensic expert.

Prerequisite(s): Minimum of 10 credit hours of graduate Forensic Science coursework.

Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0

FRSC 540 - Forensic Chemistry

Credits: 3 (NR)  
The principles of forensic chemistry will be addressed in this course, including analytical chemistry, instrumentation, sample
handling, drug chemistry and pharmacology, and analysis of physical evidence such as papers, inks, paints, and coatings.

Prerequisite(s): Undergraduate degree in chemistry or biology, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

FRSC 550 - Issues in Forensic Anthropology

Credits: 3 (NR)
Examines issues related to skeletal analyses and interpretation of forensic case reports in determining personal identification and cause of death. Discussions include skeletal variation, age criteria, sexing criteria, pathology, trauma, and postmortem damage.

Prerequisite(s): Graduate standing.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

FRSC 560 - Forensic DNA Sciences

Credits: 3 (NR)
Intensive introduction to parameters affecting data QC and analysis, including factors arising from biochemistry, chemistry, genetics, statistics, instrumentation, and software.

Equivalent to BINF 637

Prerequisite(s): Graduate standing or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

FRSC 570 - Introduction to Biochemical Forensics

Credits: 3 (NR)
An introduction to biochemical forensics for non-scientists. This class will first lay a basic groundwork in chemistry and biochemistry. This background will be used in the explanation of forensic toxicology, DNA and blood analysis, identification of bodily fluids and stains, and analysis of controlled substances.

Prerequisite(s): A course in introductory biology or chemistry, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

FRSC 580 - Image Analysis in Forensic Science
This course begins with an introduction to methods used in image analysis, and the methods of facial reconstruction. The course will then explore modern techniques applied to several areas of forensic imaging. Advance topics in forensic sculpturing, 3D imagery, and post-mortem imagery will be explored.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall, Spring

---

**FRSC 600 - Forensics Seminar**

Credits: 1 (RD)  
Selected topics in forensic science research, generally consisting of research presentations by forensic professionals and faculty members. Students must write up a one page summary of each talk attended.

**Prerequisite(s):** Admission to the Forensic Science MS program.

**Notes:** Students enrolled in the forensic science MS program must attend at least 80% of the seminars. May be repeated for a total of 3 credits.

**Hours of Lecture or Seminar per week:** 1  
**Hours of Lab or Studio per week:** 0

---

**FRSC 610 - Forensics Research Project**

Credits: 1-4 (RD)  
Research project in a current area of forensic science performed under the direction of a faculty member or affiliated forensic science professional.

**Prerequisite(s):** Admission to Forensic Science MS program.

**Notes:** May be repeated for a total of 4 credits.

**Hours of Lecture or Seminar per week:** 1-4  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall, Summer, Spring

---

**FRSC 690 - Forensics Capstone Course**

Credits: 3 (NR)  
Integrates all the various techniques used in the study of forensic science and medicine, and applies them to the interpretation of facts and the reconstruction of the sequence of events at a variety of typical death scenes. Integrates medical, scientific, sociological, and legal methodology as they apply to medicolegal death investigations, using a variety of forensic literature and text resources. Presents an integrative approach to crime scene analysis based on actual case studies, in which students apply theoretical concepts discussed in class to real-world situations. Includes weekly group projects, with students organized in rotating groups and assigned a research topic in forensic medicine. Students discuss, examine, and analyze forensic, medical, and physical elements present at the death scenes, and develop their own hypotheses, which are then evaluated and discussed as the
FRSC 790 - Internship in Forensic Science

Credits: 1-3 (RD)
On the job experience for Forensic Science majors in industry or government laboratories or investigative units, or approved study programs with specific employers. Students work in observational, experimental, or theoretical research, and prepare weekly journals, as well as a written report at the end of the internship.

Prerequisite(s): Admitted to Forensic Science Program, or permission of instructor. See department for requirements and application procedures prior to enrollment.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring, Summer

FRSC 799 - Master's Thesis

Credits: 1-6 (RD)
Project chosen and completed under guidance of graduate faculty member. Comprehensive report (thesis) acceptable to student's advisory committee is required.

Prerequisite(s): Permission of forensic science MS program director.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0
Grading: Satisfactory/No credit only

French (FREN)

Offered by the College of Humanities and Social Sciences

Placement: See Academic Testing in the Admissions section.

See also FRLN course listings.

FREN 101 - Elementary French I

Credits: 3 (NR)
For students with no knowledge of French. Introduces elements of grammar, vocabulary, oral skills, listening comprehension,
and reading.

Notes: Students may not receive credit for FREN 101 and FREN 105, 109, or 110.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

FREN 102 - Elementary French II

Credits: 3 (NR)
Continuation of FREN 101.

Prerequisite(s): FREN 101, appropriate placement score, or permission of instructor.

Notes: Students may not receive credit for FREN 102 and FREN 105, 109, or 110.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

FREN 109 - Intensive Elementary French

Credits: 6 (NR)
Equivalent to FREN 101 and 102 taught in single semester.

Notes: Recommended for students who desire intensive introduction. Students may not receive credit for FREN 109 and FREN 101, 102, 105 or 110.

Hours of Lecture or Seminar per week: 6
Hours of Lab or Studio per week: 2

FREN 110 - Elementary French

Credits: 6 (NR)
Introduces elements of grammar, vocabulary, oral skills, listening comprehension, and reading.

Notes: Students may not receive credit for FREN 110 and FREN 101, 102, 105, or 109.

Hours of Lecture or Seminar per week: 6
Hours of Lab or Studio per week: 0

FREN 115 - Review of Elementary French

Credits: 3 (NR)
Reviews elements of French for students who have studied French previously.
FREN 201 - Intermediate French I

Credits: 3 (NR)
Further development of skills in listening, speaking, reading, and writing.

Prerequisite(s): FREN 102, 105, and 109; appropriate placement score; or permission of department.

Notes: FREN 201 and 202 must be taken in sequence. Students may not receive credit for FREN 201 and FREN 209 or 210.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

FREN 202 - Intermediate French II

Credits: 3 (NR)
Applies language skills to reading, composition, and class discussion.

Prerequisite(s): FREN 201, appropriate placement score, or permission of department.

Notes: Students may not receive credit for FREN 202 and FREN 209 or 210.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

FREN 209 - Intensive Intermediate French

Credits: 6 (NR)
Equivalent to FREN 201 and 202 taught in single semester.

Prerequisite(s): FREN 102, 105, and 109; appropriate placement score; or permission of department.

Notes: Students may not receive credit for FREN 209 and FREN 201, 202, or 210.

Hours of Lecture or Seminar per week: 6
Hours of Lab or Studio per week: 0

FREN 210 - Intermediate French
Continuation of the development of basic components of the language, with focus on listening, speaking, reading, and writing skills. Introduces students to the cultures and histories of French-speaking regions.

**Prerequisite(s):** FREN 110 or appropriate placement score.

**Notes:** Students may not receive credit for FREN 210 and FREN 201, 202, or 209.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

### FREN 250 - Gateway to Advanced French

Credits: 3 (NR)  
Integration of advanced intermediate-level French reading, writing, listening, and speaking skills, and the development of critical thinking about authentic texts from around the globe.

**Prerequisite(s):** FREN 210, appropriate placement score, or permission of department.

**Notes:** Taught in French.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

### FREN 300 - Study Tour in France

Credits: 1-6 (NR)  
Directed study tour of cultural and literary points of interest in France. Briefing sessions and reading selection given before the trip.

**Prerequisite(s):** FREN 250, appropriate placement score or permission of instructor.

**Notes:** All papers and exams required for credit are due by end of summer session.

**Hours of Lecture or Seminar per week:** 1-6  
**Hours of Lab or Studio per week:** 1-12

### FREN 309 - Reading and Writing Skills Development

Credits: 6 (NR)  
Development of ability to write on topics of current interest. Readings provide examples of each topic and necessary vocabulary for compositions. Introduces reading strategies and provides practice in reading of different kinds of texts.

Fulfills writing intensive requirement in the major.

**Prerequisite(s):** FREN 202, 250, or equivalent; appropriate placement score; or permission of instructor.
FREN 310 - Oral Proficiency in French

Credits: 3 (NR)
Develops conversational proficiency in French with attention to various specific communicative strategies and functions. Practice in pronunciation and diction based on systematic study of sound system of French.

Prerequisite(s): FREN 250, appropriate placement score or permission of instructor.

Notes: Taught in French.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

FREN 320 - Contemporary Tour de France

Credits: 3 (NR)
Examines contemporary social, political, economic, cultural trends in France. Covers domestic and international topics such as debates around French identity, migration and civil rights, political parties, the media, family life, work-related issues, participation in international organizations and involvement with former colonies and overseas regions.

Prerequisite(s): FREN 309 or permission of the instructor.

Notes: Taught in French.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

FREN 325 - Major French Writers

Credits: 3 (NR)
Studies works of major French writers. Writers to be studied vary.

Fulfills Mason Core requirement in literature.

Prerequisite(s): ENGL 101/ENGH 101 or equivalent, or permission of instructor.

Notes: Taught in English. May be repeated for credit with permission of department.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
FREN 329 - Problems of Western Civilization in French Literature

Credits: 3 (NR)
Basic philosophical, moral, social, and political dilemmas reflected in literature of major French writers.

Fulfills Mason Core requirement in literature.

**Prerequisite(s):** ENGL 101/ENGH 101 or equivalent, or permission of instructor.

**Notes:** Taught in English. May be repeated for credit with permission of department.

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0

FREN 340 - Francophone Identities

Credits: 3 (NR)
Provides opportunity to learn about richness, variety, and complexity of francophone world through study of literature, culture, social life, and identities of various francophone regions including Caribbean, Africa, Quebec, and Indochina.

**Prerequisite(s):** FREN 309, appropriate placement score, or permission of instructor.

**Notes:** Taught in French.

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0

FREN 357 - Introduction to Translation

Credits: 3 (NR)
French to English, English to French translations, of texts from current periodicals and newspapers in various fields.

**Prerequisite(s):** FREN 250, appropriate placement score or permission of instructor.

**Notes:** Recommended for students who wish to improve language skills.

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0

FREN 370 - French Civilization, Culture, and Literature: Ancient Gaul to 1789

Credits: 3 (NR)
Examines history, civilization (daily life, politics, science, philosophy, religion), culture (architecture, art, music, dance), and literature of France from Ancient Gaul to the eve of the French Revolution. Studies development of French nation and its people through written texts, visual arts, and music.
Prerequisite(s): FREN 309, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

FREN 371 - French Civilization, Culture, and Literature: 1789 to the Present

Credits: 3 (NR)
Examines history, civilization (daily life, politics, science, philosophy, religion), culture (architecture, art, music, dance), and literature of France from French Revolution of 1789 to present. Studies development of French nation and its people through written texts, visual arts, and music.

Prerequisite(s): FREN 309, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

FREN 381 - Introduction to Literary Analysis

Credits: 3 (NR)
Structured approach to reading and analysis of French literary texts.

Prerequisite(s): 15 credits of French.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

FREN 391 - French for the Business World

Credits: 3 (NR)
Studies written and oral styles of communication in commercial, governmental and non-governmental settings. Satisfies needs of students preparing for work in multinational business and foreign service.

Prerequisite(s): 15 credits of French, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

FREN 400 - Study Abroad in France or Francophone Region

Credits: 1-6 (RD)
2 to 4 week programs in France or the Francophone world with language, culture and literature courses, local visits and excursions.
Prerequisite(s): 15 credits of French at the 300 level or permission of instructor.

Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 0

FREN 415 - Topics in Medieval French Literature and Culture

Credits: 3 (RD)
Analyzes a selection of important literary texts (chanson, novel, poetry, short story) and authors in their historical and cultural contexts: geste, feudalism, socio-political and religious (in)stability.

Prerequisite(s): 15 credits of French at the 300 level or permission of instructor.

Notes: May be repeated for a maximum of 6 credits when topic is different.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

FREN 416 - Topics in Renaissance French Literature and Culture

Credits: 3 (RD)
Analyzes a selection of important literary texts (novel, short story, poetry, and theater) and authors in their historical and cultural contexts: humanism, reformation, codification of language and birth of nation-state.

Equivalent to FREN 405 (2011-2012 Catalog)

Prerequisite(s): 15 credits of French at the 300 level or permission of instructor.

Notes: May be repeated for a maximum of 6 credits when topic is different.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

FREN 417 - Topics in Seventeenth-Century French Literature and Culture

Credits: 3 (RD)
Analyzes a selection of important literary texts (novel, short story, poetry, and theater) and authors in their historical and cultural contexts: baroque, classicism, social and philosophical essays, satirical plays.

Equivalent to FREN 413 (2011-2012 Catalog), FREN 414 (2011-2012 Catalog).

Prerequisite(s): 15 credits of French at the 300 level or permission of instructor.

Notes: May be repeated for a maximum of 6 credits when topic is different.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
FREN 418 - Topics in Eighteenth-Century French Literature and Culture

Credits: 3 (RD)
Analyzes a selection of important literary texts (novel, short story, poetry, and theater) and authors in their historical and cultural contexts: enlightenment, social, political and philosophical trends and issues, pre-romanticism.

Equivalent to FREN 421 (2011-2012 Catalog), FREN 422 (2011-2012 Catalog).

Prerequisite(s): 15 credits of French at the 300 level or permission of instructor.

Notes: May be repeated for a maximum of 6 credits when topic is different.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

FREN 419 - Topics in Nineteenth-Century French Literature and Culture

Credits: 3 (RD)
Analyzes a selection of important literary texts (novel, short story, poetry, and theater) and authors in their historical and cultural contexts: pre-Romanticism; Romanticism; Realism; Symbolism; Naturalism.

Equivalent to FREN 431 (2011-2012 Catalog), FREN 432 (2011-2012 Catalog).

Prerequisite(s): 15 credits of French at the 300 level or permission of instructor.

Notes: May be repeated for a maximum of 6 credits when topic is different.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

FREN 420 - Topics in Twentieth and Twenty-First-Century French Literature and Culture

Credits: 3 (RD)
Analyzes a selection of important literary texts (novel, short story, poetry, and theater) and authors in their historical and cultural contexts: surrealists, existentialists, new novelists, feminists, etc.

Equivalent to FREN 441 (2011-2012 Catalog), FREN 442 (2011-2012 Catalog).

Prerequisite(s): 15 credits of French at the 300 level or permission of instructor.

Notes: May be repeated for a maximum of 6 credits when topic is different.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
FREN 450 - Special Topics Related to French Literature and Culture

Credits: 3 (RD)
Analyzes selected texts, authors, movements, and issues within a comparative historical and cultural context over two or more centuries or with an interdisciplinary approach.

Prerequisite(s): 15 credits of French at the 300 level or permission of instructor.

Notes: May be repeated for a maximum of 6 credits when topic is different.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

FREN 451 - Topics in Sub-Saharan Francophone Literature and Culture

Credits: 3 (RD)
Analyzes a selection of literary texts (novel, short story, poetry, and/or theater) and authors in their historical and cultural contexts: Négritude, (post)colonialism, new African voices within and beyond the continent.

Prerequisite(s): 15 credits of French at the 300 level or permission of instructor.

Notes: May be repeated for a maximum of 6 credits when topic is different. Fulfills the college requirement in non-Western culture.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

FREN 453 - Topics in North African Francophone Literature and Culture

Credits: 3 (RD)
Analyzes a selection of literary texts (novel, short story, poetry, and/or theater) and authors in their historical and cultural contexts with a focus on the construction of identity: Maghreb in pre and (post)colonial era, recent ideological trends in writing.

Prerequisite(s): 15 credits of French at the 300 level or permission of instructor.

Notes: May be repeated once for credit with permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

FREN 454 - Topics in Caribbean Francophone Literature and Culture

Credits: 3 (RD)
Analyzes a selection of important literary texts (novel, short story, poetry, and/or theater) and authors in their historical and cultural contexts: the construction of identity through and beyond Négritude, Antillanité, Créolité, and migration.
Prerequisite(s): 15 credits of French at the 300 level or permission of instructor.

Notes: Fulfills the college requirement in non-Western culture.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

FREN 455 - Special Topics related to Francophone Literature and Culture

Credits: 3 (RD)
Analyzes a selection of important literary texts (novel, short story, poetry, and/or theater) and authors in their historical and cultural contexts: gender studies, migration and identity-building, ethno-social tensions, political strife, religious conflicts throughout the francophone world.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

FREN 457 - Topics in Quebec and French-Canadian Literature and Culture

Credits: 3 (RD)
Analyzes representative literary texts (novel, short story, poetry, and/or theater) and authors in their historical and cultural contexts. Emphasizes contemporary works.

Prerequisite(s): 15 credits of French at the 300 level or permission of instructor.

Notes: May be repeated for a maximum of 6 credits when topic is different.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

FREN 460 - Advanced Oral and Written Expression

Credits: 3 (NR)
Intensive course designed to help students obtain fluency in oral and written French. Develops conversational skills and mastery of vocabulary through class discussions, oral and written reports, debates and presentations on current topics and events linked to the French and Francophone world.

Prerequisite(s): 15 credits of French, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

FREN 461 - Linguistic Structure of Modern French
Credits: 3 (NR)
Analyzes phonology, morphology, and syntax of modern standard French, through a close study of selected texts (newspaper articles, short stories, novel excerpts, informal correspondence.)

Prerequisite(s): 15 credits of French, or permission of instructor.

Notes: Optional lab work.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

FREN 462 - Stylistics

Credits: 3 (NR)
Describes and analyzes the variability of forms and styles and the more complex aspects of the French language. Develops writing skills through readings, discussions, and compositions.

Prerequisite(s): 15 credits of French at the 300 level or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

FREN 463 - History of the French Language

Credits: 3 (NR)
Diachronic study of the French language from the 9th to the 20th century, with a focus on morphology, syntax and lexicon changes. Close study of various texts (prose, poetry, political writing, theater and short stories.) in the light of their socio-historical contexts.

Prerequisite(s): 15 credits of French at the 300 level or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

FREN 464 - Advanced Translation

Credits: 3 (RD)
Analyzes theories and methods of translation, with a focus on translation practice (French to English and English to French) of a varied selection of texts (periodicals, short stories, novel excerpts, newspaper articles, etc.).

Prerequisite(s): 15 credits of French at the 300 level or permission of the instructor.

Notes: May be repeated for a maximum of 6 credits when topic is different.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
FREN 465 - Special Topics related to the French language

Credits: 3 (RD)
Content varies: diachronic or synchronic study of the French language or one of its aspects; sociolinguistics; language teaching methodology; etc.

Prerequisite(s): 15 credits of French at the 300 level or permission of instructor.

Notes: May be repeated for a maximum of 6 credits when topic is different.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

FREN 467 - Special Topics related to French and Francophone Literature and Culture

Credits: 3 (RD)
Analyzes selected texts, authors, movements, and issues within comparative historical and cultural contexts as related to France and to various francophone regions of the world or with an interdisciplinary approach.

Prerequisite(s): 15 credits of French at the 300 level or permission of instructor.

Notes: May be repeated for a maximum of 6 credits when topic is different.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

FREN 470 - French and Francophone Cinema

Credits: 3 (RD)
Analyzes topics such as the early days of French cinema, la nouvelle vague, women film directors, Quebecois, African and Caribbean films, selected by type, period or director.

Prerequisite(s): 15 credits of French at the 300 level or permission of instructor.

Notes: May be repeated once with permission of department or film studies advisor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

FREN 475 - Grammatical Analysis

Credits: 3 (NR)
Study of characteristic features of contemporary French. Examines spoken and written French, including syntactic analysis, distributional analysis, and generative-transformational grammar. Emphasis on problem areas for American learner.
Prerequisite(s): 15 credits of French at the 300 level or permission of instructor.

FREN 490 - Independent Study
Credits: 1-3 (NR)
Research and analysis of selected problem in literature or linguistics in consultation with department member.

Prerequisite(s): French majors with 90 credits, and permission of chair.

Notes: Only 6 credits of independent study may be applied to fulfilling requirements in concentration.

FREN 491 - Independent Study
Credits: 1-3 (NR)
Research and analysis of selected problem in literature or linguistics in consultation with department member.

Prerequisite(s): French majors with 90 credits, and permission of chair.

Notes: Only 6 credits of independent study may be applied to fulfilling requirements in concentration.

FREN 497 - Senior Honors Tutorial
Credits: 3 (NR)
Students who meet these requirements admitted to candidacy after submitting letter of application to departmental Honors Committee in second half of junior year. Also requires faculty recommendation and interview by Honors Committee. First semester involves weekly meetings with faculty member to discuss readings from comprehensive list prepared by French faculty. Second semester requires independent research and completion of honors essay under supervision of French faculty member.

Prerequisite(s): French majors with 90 credits, cumulative GPA of 3.00, and 3.00 in major field.

FREN 498 - Senior Honors Tutorial
Credits: 3 (NR)
Students who meet these requirements admitted to candidacy after submitting letter of application to departmental Honors Committee in second half of junior year. Also requires faculty recommendation and interview by Honors Committee. First semester involves weekly meetings with faculty member to discuss readings from comprehensive list prepared by French faculty. Second semester requires independent research and completion of honors essay under supervision of French faculty member.

Prerequisite(s): French majors with 90 credits, cumulative GPA of 3.00, and 3.00 in major field.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

FREN 500 - Study Abroad in France or Francophone Region

Credits: 1-6 (RD)
2 to 4-week programs in France or the Francophone world with language, culture and literature courses, local visits and excursions. Advanced critical research and writing required.

Notes: May be repeated for a maximum of 6 credits.

Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 0

FREN 515 - Topics in Medieval French Literature and Culture

Credits: 3 (RD)
Analyzes a selection of important literary texts (chanson, novel, poetry, short story) and authors in their historical and cultural contexts: geste, feudalism, socio-political and religious (in)stability. Advanced critical research and writing required.

Notes: Course work in French. May be repeated for a maximum of 6 credits when topic is different.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

FREN 516 - Topics in Renaissance French Literature and Culture

Credits: 3 (RT)
Analyzes a selection of important literary texts (novel, short story, poetry, and theater) and authors in their historical and cultural contexts: humanism, reformation, and codification of language and birth of nation-state. Advanced critical research and writing required.

Notes: May be repeated for a maximum of 6 credits when topic is different.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
FREN 517 - Topics in Seventeenth-Century French Literature and Culture

Credits: 3 (RD)
Analyzes a selection of important literary texts (novel, short story, poetry, and/or theater) and authors in their historical and cultural contexts: enlightenment, social, political and philosophical trends and issues, pre-romanticism. Advanced critical research and writing required.

Notes: Content varies. May be repeated once for credit. Course work in French.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

FREN 518 - Topics in Eighteenth-Century French Literature and Culture

Credits: 3 (RD)
Analyzes a selection of important literary texts (novel, short story, poetry, and/or theater) and authors in their historical and cultural contexts: enlightenment, social, political and philosophical trends and issues, pre-romanticism. Advanced critical research and writing required.

Notes: Content varies. Course work in French. May be repeated for a maximum of 6 credits when topic is different.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

FREN 519 - Topics in Nineteenth-Century French Literature and Culture

Credits: 3 (RD)
Analyzes a selection of important literary texts (novel, short story, poetry, and/or theater) and authors in their historical and cultural contexts: pre-Romanticism; Romanticism; Realism; Symbolism; Naturalism. Advanced critical research and writing required.

Notes: Content varies. Course work in French. May be repeated for a maximum of 6 credits when topic is different.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

FREN 520 - Topics in Twentieth and Twenty-First-Century French Literature and Culture

Credits: 3 (RD)
Analyzes a selection of important literary texts (novel, short story, poetry, and/or theater) and authors in their historical and cultural contexts: surrealists, existentialists, new novelists, feminists, etc. Advanced critical research and writing required.

Notes: May be repeated for a maximum of 6 credits when topic is different.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
FREN 550 - Special Topics

Credits: 3 (RT)
Specialized topics relating to French culture and literature.

Notes: Content varies. May be repeated once for credit. Course work in French.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

FREN 551 - Topics in Francophone Sub-Saharan Literature and Culture

Credits: 3 (RD)
Analyzes a selection of important literary texts (novel, short story, poetry, and/or theater) and authors in their historical and cultural contexts: Négritude, (post)colonialism, new African voices within and beyond the continent. Advanced critical research and writing required.

Notes: May be repeated for a maximum of 6 credits when topic is different.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

FREN 553 - Topics in North African Francophone Literature and Culture

Credits: 3 (RD)
Analyzes a selection of literary texts (novel, short story, poetry, and/or theater) and authors in their historical and cultural contexts with a focus on the construction of identity: Maghreb in pre and (post)colonial era, recent ideological trends in writing. Advanced critical research and writing required.

Notes: May be repeated for a maximum of 6 credits when topic is different.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

FREN 554 - Topics in Francophone Caribbean Literature and Culture

Credits: 3 (RD)
Analyzes a selection of important literary texts (novel, short story, poetry, and/or theater) and authors in their historical and cultural contexts: the construction of identity through and beyond Négritude, Antillanité, Créolité, and migration. Advanced critical research and writing required.

Notes: May be repeated for a maximum of 6 credits when topic is different.
FREN 555 - Special Topics related to Francophone Literature and Culture

Credits: 3 (RD)
Analyzes a selection of important literary texts (novel, short story, poetry, and/or theater) and authors in their historical and cultural contexts: gender studies, migration and identity-building, ethno-social tensions, political strife, religious conflicts throughout the francophone world. Advanced critical research and writing required.

Notes: May be repeated for a maximum of 6 credits when topic is different.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

FREN 557 - Topics in Quebec and French-Canadian Literature and Culture

Credits: 3 (RD)
Analyzes representative literary texts (novel, short story, poetry, and/or theater) and authors in their historical and cultural contexts. Emphasizes contemporary works. Advanced critical research and writing required.

Notes: May be repeated for a maximum of 6 credits when topic is different.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

FREN 561 - Linguistic Structure of Modern French

Credits: 3 (NR)
Analyzes phonology, morphology, and syntax of modern standard French, through a close study of selected texts (newspaper articles, short stories, novel excerpts, informal correspondence). Advanced critical research and writing required.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

FREN 562 - Stylistics

Credits: 3 (NR)
Describes and analyzes the variability of forms and styles and the more complex aspects of the French language. Develops writing skills through readings, discussions, and compositions. Advanced critical research and writing.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
FREN 563 - History of the French Language

Credits: 3 (NR)
Analyzes a selection of literary texts (novel, short story, poetry, and/or theater) and authors in their historical and cultural contexts with a focus on the construction of identity: Maghreb in pre and (post)colonial era, recent ideological trends in writing. Advanced critical research and writing required.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

FREN 564 - Advanced Translation

Credits: 3 (NR)
Analyzes theories and methods of translation, with a focus on translation practice (French to English and English to French) of a varied selection of texts (periodicals, short stories, novel excerpts, newspaper articles, etc.) Advanced critical research and writing required.

Notes: Translations from French to English and English to French.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

FREN 565 - Special Topics Related to the French Language

Credits: 3 (RT)
Content varies: diachronic or synchronic study of the French language or one of its aspects; sociolinguistics; language teaching methodology; etc. Advanced critical research and writing required.

Notes: May be repeated for a maximum of 6 credits when topic is different.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

FREN 567 - Special Topics related to French and Francophone Literature and Culture

Credits: 3 (RD)
Explores issues related to the francophone world. Emphasis on comparative issues, not geographical areas.

Prerequisite(s): 15 credits of French at the 300 level or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

FREN 570 - French and Francophone Cinema
Credits: 3 (RD)
Topics such as early days of French cinema, a nouvelle vague, women film directors, Quebecois, African and Caribbean films, selected by type, period or director. Advanced critical research and writing required. Viewing of films outside of class time.

Notes: May be repeated for a maximum of 6 credits when topic is different.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

FREN 575 - Grammatical Analysis

Credits: 3 (NR)
Analyzes selected texts, authors, movements, and issues within comparative historical and cultural contexts as related to France and to various francophone regions of the world or with an interdisciplinary approach. Advanced critical research and writing required.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

FREN 798 - Directed Reading and Thesis Research

Credits: 3 (NR)
Reading and research for thesis under direction of a faculty member.

Notes: Open to degree students who desire to work on independent study with a faculty mentor or who have completed at least 24 credits and have been approved by the French Graduate Faculty to conduct research for a M.A. thesis. See Modern Classical Languages Graduate Student Handbook for complete explanation of the thesis option.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
Grading: Graduate Special

FREN 799 - Thesis

Credits: 1-6 (RD)
Research on approved thesis topic under direction of thesis committee.

Prerequisite(s): FREN 798 and approval of director.

Notes: Students must register for a minimum of 3 credits in the first semester of 799 and maintain continuous enrollment in 799 while writing and submitting the thesis.

Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 0
Grading: S/NC
Geography and Geoinformation Science (GGS)

Offered by the College of Science

Graduate standing is prerequisite to all 600-level courses.

GGS 101 - Major World Regions

Credits: 3 (NR)
Patterns, problems, and prospects of the world’s principal human-geographic regions. Emphasizes areal differentiation and role of geographic differences in interpreting current world scene.

Fulfills Mason Core requirement in global understanding.

Equivalent to GEOG 101 (2009-10 catalog)

Notes: Fulfills the college-level requirement in non-Western culture.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GGS 102 - Physical Geography

Credits: 3 (NR)

Interrelated processes affecting global distribution and character of climate, soils, vegetation, hydrology, and landforms. Includes elements of mapping.
Designated a Green Leaf Course.

Fulfills Mason Core requirement in natural science (nonlab).

Equivalent to GEOG 102 (2009-10 catalog)

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GGS 103 - Human Geography

Credits: 3 (NR)

Overview of major ideas and approaches to studying spatial aspects of human social and behavioral systems. Surveys distribution and movement of human populations, characteristics and distribution of cultural mosaics, patterns of economic interdependence, and study of forces of cooperation and conflict among people from global perspective.
Designated a Green Leaf Course.

Fulfills Mason Core requirement in social and behavioral science.

Equivalent to GEOG 103 (2009-10 catalog)

**GGS 110 - Maps and Mapping**

Credits: 3 (NR)
Introduces maps and spatial analytic tools and methods, including geographic information systems. Familiarizes students with key geographic concepts and skills through integrating information technology with map-making technology. Includes introduction to computer and web-based geographic applications, databases, and graphics.

Equivalent to GEOG 110 (2009-10 catalog)

**GGS 121 - Dynamic Atmosphere and Hydrosphere**

Credits: 4 (NR)
Systematic study of weather, climate, energy, and hydrologic systems viewed from a geospatial and global perspective. Studies the spatial distribution and relationships of the Earth’s climate and hydrologic systems to other Earth systems, as well as the processes driving and changing them, including energy, climate, weather, and water resources. Designated a Green Leaf Course.

Fulfills Mason Core requirement in natural science (lab).

Equivalent to EOS 121 (2009-10 catalog)

**GGS 122 - Dynamic Geosphere and Ecosphere**

Credits: 4 (NR)
Systematic study of biogeography and soils, viewed from a geographic, or spatial, perspective. We will study the spatial distribution and relationships of Earth’s biomes and soils systems to other Earth systems, and the processes driving them, including energy, climate, nutrients, chemistry, and moisture.
Designated a Green Leaf Course.

Equivalent to EOS 122 (2009-10 catalog)

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 3

---

**GGS 300 - Quantitative Methods for Geographical Analysis**

Credits: 3 (NR)  
Comprehensive introduction to quantitative methods in spatial analysis, with emphasis on solving geographical research problems. Topics include nature of spatial data; collection of spatial data; preparation of spatial data for mapping, geographic information systems, and statistical analysis; descriptive spatial statistics; areal sampling theory and methods; probability theory and distributions; hypothesis testing; correlation and regression; and areal and point pattern spatial statistics.

Equivalent to GEOG 300 (2009-10 catalog)

**Prerequisite(s):** 30 credits, including GGS 102 and 103, or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**GGS 301 - Political Geography**

Credits: 3 (NR)  
Distribution and effects of power on landscape, particularly on national and global scales.

Equivalent to GEOG 301 (2009-10 catalog)

**Prerequisite(s):** 30 credits

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**GGS 302 - Global Environmental Hazards**

Credits: 3 (NR)  
Introduces applications of observational and modeling techniques to natural hazards and the threat they pose to the world, as well as a general introduction to global climate change and its effect on regional and local scales. Examples include topics of interest to different countries and regions of the world, such as earthquakes, sand and dust storms, slope failures, volcanoes, land slides, droughts and desertification, floods, hurricanes and typhoons, severe weather, wild fires (U.S., Indonesia, Africa, S. America), sea-level rise, and tsunamis. Covers Earth system science topics related to the above hazards and their coupling with anthropogenic hazards as well as how societies respond to natural disasters and mitigation.  
Designated a Green Leaf Course.
GGS 303 - Conservation of Resources and Environment

Credits: 3 (NR)

Provides analysis of world resources distribution, conservation, and preservation; and problems resulting from their natural occurrence and utilization. Uses knowledge from physical and social sciences to develop complex and sophisticated understanding of issues surrounding natural resource exploitation and management, conservation, and preservation. Designated a Green Leaf Course.

Fulfills Mason Core requirement in synthesis.

Equivalent to GEOG 303 (2009-10 catalog)

Prerequisite(s): 30 credits, and completion or concurrent enrollment in all other required Mason Core courses.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GGS 304 - Populations Dimensions of Global Change

Credits: 3 (NR)

Spatial distribution of population, its causes and effects, and changing patterns resulting from population mobility. Emphasizes spatial characteristics of variables such as age, sex, race, education, and income. Designated a Green Leaf Course.

Fulfills Mason Core requirement in synthesis.

Fulfills writing intensive requirement in the major.

Equivalent to GEOG 304 and EOS 304 (2009-10 catalog)

Prerequisite(s): 30 credits and completion of or concurrent enrollment in all Mason Core requirements

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GGS 305 - Economic Geography
Analyzes pattern of distribution of world economic activity, spatial economics behind this pattern, and influence of distribution on other spatial systems.

Equivalent to GEOG 305 (2009-10 catalog)

Prerequisite(s): 30 credits

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GGS 306 - Urban Geography

Credits: 3 (NR)
Structure and internal differentiation of cities. Variety of perspectives on nature of cities, and opportunities for intensive use of space. Urban problems and alternatives in their spatial context.

Equivalent to GEOG 306 (2009-10 catalog)

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GGS 307 - Sustainable Development

Credits: 3 (NR)
Explores the concepts, applications, and tools for analysis and decision making in support of environmentally sustainable development. Case studies and problem-solving exercises will be used to stimulate learning and provide practical experience in addressing sustainable development issues.
Designated a Green Leaf Course.

Equivalent to EOS 306 (2009-10 catalog)

Prerequisite(s): 60 hours; GGS 122 and GGS 302, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GGS 308 - Field Mapping Techniques

Credits: 3 (NR)
Basic techniques for collecting and recording spatial field data, including topographic maps, compass, transit, alidade, and geographic positioning systems. Includes field work.

Equivalent to GEOG 308 (2009-10 catalog)
Prerequisite(s): MATH 105, GGS 102 or GEOL 101, and 30 credits.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 6

GGS 309 - Meteorology and Climate

Credits: 3 (NR)
Elements of meteorology; analysis of world distribution of meteorological controls as bases of regional climatic variations.

Equivalent to GEOG 309, EOS 312 (2009-10 catalog)

Prerequisite(s): GGS 102, 121, or equivalent; permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GGS 310 - Introduction to Digital Cartography

Credits: 4 (NR)
Origins, principles, and methods of thematic map design and production. Principles of graphic design, data compilation, analysis, and display.

Equivalent to GEOG 310 (2009-10 catalog)

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 2

GGS 311 - Introduction to Geographic Information Systems

Credits: 3 (NR)
Fundamental concepts and theories for appropriate use of geographic information systems (GIS). Discusses basic GIS functionality and applications in various fields.

Equivalent to GEOG 311 (2009-10 catalog)

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GGS 312 - Physical Climatology

Credits: 3 (NR)
Quantitative description of nature and theory of the climate system, dynamics of atmosphere-ocean-land surface, internal interactions and response to external forcing, description of the climate record and simple climate models. Designated a Green Leaf Course.

Equivalent to EOS 312 (2009-10 catalog)

**Prerequisite(s):** 30 hours; and GGS 121, MATH 113, PHYS 243-244, or permission of instructor

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**GGS 314 - Severe and Extreme Weather**

Credits: 3 (NR)

Behavior of weather events ranging from small scale (e.g., thunderstorms and tornadoes) to mesoscale (e.g., fronts and hurricanes). Introduces the dynamical and physical processes, atmospheric boundary layer processes, and coupling between different spatial scales that create and shape severe and localized weather events. Designated a Green Leaf Course.

Equivalent to CLIM 314; EOS 310 (2009-10 catalog)

**Prerequisite(s):** MATH 113 or equivalent; CLIM/PHYS 111/112 or EOS 121 or GGS 121

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall, Spring, Summer

---

**GGS 315 - Geography of the United States**

Credits: 3 (NR)  
Diversity of US physical and cultural landscapes.

Equivalent to GEOG 315 (2009-10 catalog)

**Prerequisite(s):** 6 credits of geography or American studies, or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**GGS 316 - Geography of Latin America**

Credits: 3 (NR)  
Regional survey of physical resources, populations, cultural characteristics, and economic activities in Latin America.
Equivalent to GEOG 316 (2009-10 catalog)

**Prerequisite(s):** 6 credits of geography or Latin American studies, or permission of instructor.

**Notes:** Fulfills the college-level requirement in non-Western culture.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

### GGS 319 - Air Pollution

Credits: 3 (NR)

Description of major types of air pollution and introduction to how their characteristics are influenced by interaction with the atmosphere. Topics include sources and distribution of pollution from local to global scales, effects of radiation and wind on pollution, modeling of plume dispersion and pollution effects on climate. Designated a Green Leaf Course.

Equivalent to EOS 320 (2009-10 catalog)

**Prerequisite(s):** CLIM 111 or GGS 121.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall, Spring

### GGS 320 - Geography of Europe

Credits: 3 (NR)  
Environmental, economic, social, and political factors influencing regional structure of Europe.

Equivalent to GEOG 320 (2009-10 catalog)

**Prerequisite(s):** 6 credits of geography or European studies, or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

### GGS 321 - Biogeography: Space, Time and Life

Credits: 3 (NR)  
A survey of the relationship between distribution of plants and animals on the earth surface and the physical geography and environmental characteristics.

Equivalent to BIOL 374; EOS 321 (2009-10 catalog)
**Prerequisite(s):** GGS 122 or permission of instructor.

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0

---

**GGS 322 - Issues in Global Change**

Credits: 3 (RD)

Provides the basis for evaluating existing and emerging issues in the environmental sciences at the regional and global scale, using interdisciplinary scientific principles. Combines activities designed to provide an understanding of the following: first principles underlying regional/global issues in the environmental sciences, with attention to links among the disciplines of atmospheric sciences, biology, ecology, hydrology, oceanography, geology, human health, toxicology, and mathematical modeling; concepts of systems control, feedbacks, modeling, and hierarchical scales (spatial and temporal); role of retrospective analyses in developing a scientifically sound basis for evaluation and analysis; and studies of specific issues of interest on a regional to global scale

Designated a Green Leaf Course.

Equivalent to EOS 322 (2009-10 catalog)

**Prerequisite(s):** GGS 121, GGS 122, or permission of instructor

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0

---

**GGS 325 - Geography of North Africa and the Middle East**

Credits: 3 (NR)

Environmental, economic, and social factors of differentiation of regional structure and distribution of resources in North African and Middle Eastern countries.

Equivalent to GEOG 325 (2009-10 catalog)

**Prerequisite(s):** 6 credits of geography or courses related to Middle East; or permission of instructor.

**Notes:** Fulfills the college-level requirement in non-Western culture.

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0

---

**GGS 330 - Geography of the Soviet Succession States**

Credits: 3 (NR)

Analyzes geographic factors involved in history, economic development, and geopolitical situation of the former Soviet Union.

Equivalent to GEOG 330 (2009-10 catalog)
Prerequisite(s): 6 credits of geography or Russian studies, or permission of instructor.

Notes: Fulfills the college-level requirement in non-Western culture.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GGS 333 - Issues in Regional Geography

Credits: 3 (NR)
Geographical study of particular region or relevant regional issue.

Equivalent to GEOG 333 (2009-10 catalog)

Prerequisite(s): 30 credits

Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 0

GGS 353 - Observations of the Earth and its Climate

Credits: 3 (NR)
Provides a general introduction to observations of the Earth and its climate, focusing on regional and global aspects. Introduces remote sensing and other Earth-observing techniques, as well as providing a survey of some of the physical and mathematical aspects of remote sensing at a very high level. Concepts and foundations of remote sensing in addition to different approaches and techniques are discussed. Covers several key Earth system science topics such as El Niño, carbon dioxide increase, climate change including sea rise, ozone depletion, and the energy budget of the Earth.
Designated a Green Leaf Course.

Equivalent to EOS 353 (2009-10 catalog)

Prerequisite(s): GGS 121, GGS 122 or permission of instructor

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GGS 354 - Data Analysis and Global Change Detection Techniques

Credits: 3 (NR)
Introduces basic time series methods, especially those used in detecting trends and randomness in time series data. Various data related to global changes on different temporal and spatial scales will be identified, and the relevant analysis methods will be used to those data so that students can detect or confirm changing trends or lack of them in data. Other topics such as data formats, data visualization, and data mining may also be included based on the background of the student body.
Equivalent to EOS 354 (2009-10 catalog)

**Prerequisite(s):** IT 103 STAT 250 or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**GGS 357 - Structures in Urban Governance and Planning**

Credits: 3 (NR)  
Reviews spatial, policy, and administration principles that guide planning activity in United States. Outlines differences between theory and practice; and provides tools, methods, and perspectives commonly incorporated into practice of urban and regional policy analysis. Provides orientation to public-sector economy in general; and urban administration, planning, and policy in particular.

Equivalent to GEOG 357 (2009-10 catalog)

**Prerequisite(s):** 30 credits

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**GGS 380 - Geography of Virginia**

Credits: 3 (NR)  
Natural and cultural forces of Virginia. Studies regional makeup and analysis of human and environmental characteristics.

Equivalent to GEOG 380 (2009-10 catalog)

**Prerequisite(s):** 30 credits

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**GGS 398 - Selected Topics in Global Change**

Credits: 3 (RT)  
Covers selected topics in global change not covered in fixed-content global change courses.

Equivalent to EOS 399 (2009-10 catalog)

**Prerequisite(s):** 30 credits or permission of instructor.

**Notes:** Content varies and is determined by instructor. May be repeated.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0
**GGS 399 - Selected Topics in Geography**

Credits: 3 (RT)
Content varies; determined by instructor.

Equivalent to GEOG 399 (2009-10 catalog)

**Prerequisite(s):** 30 credits.

**Notes:** May be repeated for maximum of 12 credits.
Fulfills the college-level requirement in non-Western culture.

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0

---

**GGS 410 - Introduction to Hyperspectral Imaging**

Credits: 3 (NR)
Provides an introduction to quantitative measurements by remote-sensing methods covering an introduction to quantitative spectroscopy, spectral and thermal signatures, atmospheric physics, and the electromagnetic spectrum. Emphasis will be on the scientific principles involved and the transition of the technology to real-world applications. The requisite materials to begin to understand hyperspectral imaging (HSI) technology and its many civil and military applications are presented. The course covers the needed mathematics used in the analysis of n-dimensional data. Topics such as hyperspectral concepts, data collection systems, data processing techniques, case studies, and U.S. national policy issues will be covered. The data processing techniques will include N-dimensional space, scatterplots, spectral angle mapping, spectral mixture analysis, spectral matching, and other techniques. Applications and case studies will include environmental, medical, agricultural, military, and others. Ground, airborne, and spaceborne hyperspectral systems will be covered.

Equivalent to EOS 410 (2009-10 catalog)

**Prerequisite(s):** PHYS 243-244, 245-246, MATH 113-114, GGS 353 GGS 416, or permission of instructor.

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0

---

**GGS 411 - Advanced Digital Cartography**

Credits: 3 (NR)
Design and production of full-color digital maps and information graphics, map cognition and use, and principles of desktop mapping.

Equivalent to GEOG 411 (2009-10 catalog)

**Prerequisite(s):** GGS 311

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0
GGS 412 - Air Photography Interpretation

Credits: 3 (NR)
Methods and techniques of interpreting and using information contained in aerial photography, including applications to various aspects of physical and cultural landscape.

Equivalent to GEOG 412 (2009-10 catalog)

Prerequisite(s): 60 credits and GGS 102 or 103, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GGS 415 - Seminar in Geography

Credits: 3 (NR)
Students produce, present original research papers.

Fulfills writing intensive requirement in the major.

Equivalent to GEOG 415 (2009-10 catalog)

Prerequisite(s): GGS 300 and 310

Notes: Capstone seminar for geography majors integrating previous course work into disciplinary framework.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

GGS 416 - Satellite Image Analysis

Credits: 3 (NR)
Examines methods and techniques of interpreting and using information obtained by non-photographic remote sensing systems, with particular emphasis on space-borne platforms. Includes analysis of imagery for both physical and cultural environments.

Equivalent to GEOG 416 (2009-10 catalog)

Prerequisite(s): 60 credits and GGS 412, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
GGS 455 - Environmental Impact Assessment

Credits: 3 (NR)

Evaluates current methods and practices for conducting and planning environmental assessments to include techniques and requirements for assessing impacts on air, water, natural resources, transportation, water facilities, and industrial and community development.
Designated a Green Leaf Course.

Equivalent to EOS 455 (2009-10 catalog)

Prerequisite(s): GGS 122 GGG 302 or EVPP 377 or 6 hours of courses in ecology and environmental sciences or permission of instructor

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GGS 456 - Introduction to Atmospheric Radiation

Credits: 3 (NR)
The content of this course is designed to help students learn about the fundamental aspects of atmospheric radiation. The goal is to understand their essential roles in advanced remote sensing, atmospheric sciences and global and environmental change. It will provide a foundation for and will be beneficial to students in taking advanced courses in those areas.

Equivalent to EOS 456 (2009-10 catalog)

Prerequisite(s): GGS 353/GGS 309 and a course in physics, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

GGS 463 - Applied Geographic Information Systems

Credits: 3 (NR)
Selected applications in geographic information systems (GIS). Topics include automated data capturing and processing, spatial data models and structure including object-oriented approach, advanced spatial analytical techniques including raster modeling and network analysis, programming, and algorithm development in GIS. Major purpose of course is to extend fundamental theories and concepts in GIS so students are able to conduct research with and on GIS.

Equivalent to GEOG 463 (2009-10 catalog)

Prerequisite(s): 2.00 or better in GGS 300 and 311.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
GGS 470 - Special Topics in Geographic Techniques

Credits: 3 (RT)
Content varies in the subject of Geographic Techniques.

Prerequisite(s): GGS 110.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GGS 480 - Internship in Geography

Credits: 1 to 3 (RD)
Approved study programs with specific employers.

Equivalent to GEOG 480

Prerequisite(s): Open only to authorized GGS majors with 90 credits and GPA of 2.50 or higher in GGS courses. Permission of instructor required.

Notes: Credit determined by department, may be repeated to a maximum of 6 credits. Contact department one semester before enrollment.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0

GGS 490 - Practicum in Geographical Applications

Credits: 1-3 (RD)
Application of geographical research tools and techniques in conjunction with faculty instruction and research. Individualized sections taught by arrangement with full-time faculty.

Equivalent to GEOG 490 (2009-10 catalog)

Prerequisite(s): Open only to authorized geography majors with 90 credits. Permission of department and instructor required.

Notes: May be repeated to a total of 6 credits

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 1-9

GGS 495 - Senior Research in Global and Environmental Change

Credits: 3 (NR)
Applications of research tools and techniques on specific global change topics, in conjunction with faculty instruction and research. Individualized sections taught by arrangement with full-time faculty.
Equivalent to EOS 495 (2009-10 catalog)

Prerequisite(s): 90 credit hours authorized major with permission of department and instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GGS 499 - Independent Study in Geography

Credits: 1 to 3 (RD)
Individual study of selected area of geography.

Equivalent to GEOG 499 (2009-10 catalog)

Prerequisite(s): Open only to geography majors with 90 credits and GPA of 2.50 or higher. Permission of department and instructor required.

Notes: Requires directed research paper. May be repeated to a maximum of 6 credits with permission of the department.

Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 0

GGS 501 - Geography and Geoinformation Science Distance Education Orientation

Credits: 1 (NR)
Describes study structure and basic expectations (in terms of time commitment, expectations, technical issues and communication) for distance education courses in the Geography and Geoinformation Science department.

Notes: The course is self-paced, enabling students to proceed at their own speed.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0
Grading: Satisfactory/No Credit
When Offered: Fall, Summer, Spring

GGS 503 - Problems in Environmental Management

Credits: 3 (NR)
Case studies of effects of human activities on atmospheric, hydrologic, geomorphic, and biotic processes.

Equivalent to GEOG 503 (2009-10 catalog)

Prerequisite(s): 6 credits of geography, including GGS 102.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
GGS 505 - Transportation Geography

Credits: 3 (NR)
Structure, principles, location, and development of world transportation. Critical role of transportation in moving people, goods, and ideas at international, national, regional, and urban levels.

Equivalent to GEOG 505 (2009-10 catalog)

Prerequisite(s): 6 credits of geography

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GGS 520 - Geography for Teachers

Credits: 3 (NR)
Emphasizes problems and techniques in teaching geography; and current developments in research, methodology, and philosophy in the discipline.

Equivalent to GEOG 520 (2009-10 catalog)

Prerequisite(s): Graduate standing, or permission of department.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GGS 524 - Introduction to Environmental and Resource Economics

Credits: 3 (NR)
Introduces theory of external costs and benefits, public goods, natural resource management, and benefit and cost analysis for noneconomists. Lecture-discussion format with student presentations and participation. Analytical problem set, short writing assignments, and exams.

Equivalent to GEOG 524 (2009-2010 Catalog) and EVPP 524

Prerequisite(s): Basic algebra skills.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

GGS 525 - Economics of Human/Environment Interactions

Credits: 3 (NR)
Advanced topics in environmental, natural resource, and ecological economics for noneconomist. Emphasizes sustainability, intergenerational equity, and economic-ecological feedbacks. Designated a Green Leaf Course.

Equivalent to GEOG 525 (2009-2010 Catalog) and ECON 895/EVPP 525

**Prerequisite(s):** EVPP 524/GGS 524 or equivalent

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall, Spring

---

**GGS 531 - Land-Use Modeling Techniques and Applications**

Credits: 3 (NR)  
Survey of literature on spatially explicit empirical models of land-use change. Hands-on experience developing and running simple models. Techniques covered include statistical models, mathematical programming models, cellular automata, agent-based models, and integrated models.

Equivalent to EVPP 531 and GEOG 531 (2009-10 catalog)

**Prerequisite(s):** GGS 550, or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**GGS 533 - Issues in Regional Geography**

Credits: 1-6 (RT)  
Geographical study of particular region or relevant regional issue.

Equivalent to GEOG 533 (2009-10 catalog)

**Notes:** Content varies. May be repeated to a total of 12 credits with permission of the department.

**Hours of Lecture or Seminar per week:** 1-6  
**Hours of Lab or Studio per week:** 0

---

**GGS 540 - Medical Geography**

Credits: 3 (NR)  
Spatial approaches to study of health and disease. Topics include disease ecology and diffusion, and geographic perspectives on improving health care delivery.

Equivalent to GEOG 540
Prerequisite(s): Course in statistics.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GGS 550 - Geospatial Science Fundamentals

Credits: 3 (NR)
Introduces geospatial sciences, emphasizing concepts and theories of cartography, remote sensing, air photo interpretation, Global Positioning Systems, spatial data structures, and geographic information systems. Lectures accompanied by hands-on exercises.

Equivalent to GEOG 550 (2009-10 catalog)

Notes: Only available for students without previous course work in cartography.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GGS 551 - Thematic Cartography

Credits: 3 (NR)
Analyzes nature of perceptual organization and visual systems in thematic map communication portrayal, graphic handling, and data analysis.

Equivalent to GEOG 551 (2009-10 catalog)

Prerequisite(s): GGS 310 or 550

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GGS 553 - Geographic Information System

Credits: 3 (NR)
Sources of digital geospatial data; and methods of input, storage, display, and processing of spatial data for geographic analysis using GIS. Lectures, hands-on exercises familiarize students with current technology.

Equivalent to GEOG 553 (2009-10 catalog)

Prerequisite(s): GGS 550 or course in cartography

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
GGS 554 - History of Cartography

Credits: 3 (NR)
History of cartographic portrayal of Earth from ancient times through 19th century, emphasizing interrelation of human culture, technological development, and geographical knowledge as reflected in maps.

Equivalent to GEOG 554 (2009-10 catalog)

Prerequisite(s): Graduate standing

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GGS 560 - Quantitative Methods

Credits: 3 (NR)
Survey of quantitative methods commonly used in geographic research. Emphasizes spatial analysis techniques.

Equivalent to GEOG 585 (2009-10 catalog)

Prerequisite(s): Previous course work in statistics, GGS 310 or 550

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GGS 562 - Photogrammetry

Credits: 3 (NR)
Treatment of photogrammetric problems, including least squares adjustments, image coordination refinements, colinearity equation, resection, relative orientation, and analytic aerotriangulation.

Equivalent to GEOG 562 (2009-10 catalog)

Prerequisite(s): GGS 412, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GGS 563 - Advanced Geographic Information Systems

Credits: 3 (NR)
Discusses advanced GIS concepts including spatial data structure, spatial analysis, programming data fusion, Internet components, and spatial database management. Hands-on activities demonstrate concepts and specific applications in both cultural and physical geography.

Equivalent to GEOG 563 (2009-10 catalog)
Prerequisite(s): GGS 553 or equivalent.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GGS 575 - Reconstructing Past Environments: Seminar in Geoarchaeology

Credits: 3 (NR)
Research seminar examining intersection of geoarchaeology and paleoecology with cultural ecology. Addresses methods common to these research areas, and ranges of scales and reliability of evidences to reconstruct past environments, both natural and cultural. Applied examples cover selected geoarchaeological and paleoecological projects from variety of geographical regions.

Equivalent to GEOG 575

Prerequisite(s): Permission of instructor and course work in geography, biology, geology, or archaeology.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GGS 579 - Remote Sensing

Credits: 3 (NR)
Examines use of various types and combinations of electromagnetic energy to obtain spatial information. Concentrates on nonphotographic and spaceborne remote sensing platforms and sensors. Examines essential operational parameters for existing and future systems and strategies for visual extraction of features.

Equivalent to EOS 753 and GEOG 579 (2009-10 catalog)

Prerequisite(s): GGS 416 or permission of instructor

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GGS 581 - World Food and Population

Credits: 3 (NR)
Topics include maldistribution of population, regional disparities in growth rates and income distribution, food production, and world hunger. Discusses population policies, with emphasis on Third World countries.

Equivalent to GEOG 581 (2009-10 catalog)

Prerequisite(s): Graduate standing.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
GGS 590 - Selected Topics in Geography

Credits: 1-3 (RT)
Analyses topics of immediate interest.

Equivalent to GEOG 590 (2009-10 catalog)

Notes: Content varies. May be repeated to a maximum of 12 credits.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 1-6

GGS 600 - Communication Skills for Scientists

Credits: 2 (NR)
Develops basic set of essential skills for scientific communication of written and oral materials. Oral skills focus on delivery of successful and informative presentations to both peers and the general public. Written communication skills focus on writing of scientific abstracts, manuscripts, and grant proposals. Meets objectives through combination of activities, including practical writing assignments, planned and extemporaneous oral presentations, discussion of grant preparation for extramural competition, and personal advice on developing and delivering oral presentations.

Equivalent to EOS 600 (2009-10 catalog)

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GGS 603 - Geographic Perspectives on Complex Natural Resource Management

Credits: 3 (NR)
Develops better understanding of strengths, limitations of restoring large and complex natural resource systems by examining critical aspects of one such effort.

Equivalent to GEOG 603 (2009-10 catalog)

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GGS 605 - Socioeconomic Applications of GIS

Credits: 3 (NR)
Provides those working with spatially referenced data the technical skills to use GIS to conduct spatial analyses on socioeconomic phenomena related to labor, retail, and real estate markets. Introduces and emphasizes the development of technical and methodological skills to understand the potential and the pitfalls of using GIS for spatial analyses of socioeconomic phenomena.
GGS 631 - Spatial Agent-Based Models of Human-Environment Interactions

Credits: 3 (NR)
Discusses key challenges in spatial modeling of human-environment interactions. Reviews agent-based modeling applications in urban and rural interactions, agriculture, forestry, and other areas. Hands-on development of simple ABM models and investigation of linkages between GIS and ABM.

Equivalent to EVPP 631 and GEOG 631 (2009-10 catalog)

Prerequisite(s): GGS 531 or CSS 600, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GGS 644 - Fundamentals and Interpretation of Imaging Radar

Credits: 3 (NR)
Provides understanding of components, functionality, and use of radar remote sensing for acquiring spatial information. Concentrates on operational systems. Includes hands-on assignments.

Equivalent to GEOG 644 (2009-10 catalog)

Prerequisite(s): GGS 579, or other basic course in remote sensing.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GGS 650 - Introduction to GIS Algorithms and Programming

Credits: 3 (NR)
Introduction to programming methods and their application to Geographic Information Systems, including the fundamentals of object-oriented programming and GIS-specific data structures and algorithms. Employs an object-oriented language such as Visual Basic.Net, and existing freeware and commercial GIS libraries. Topics covered include variables, arrays, control structures, objects and classes, raster and vector data structures, spatial algorithms, and spatial indexing methods.

Equivalent to EOS 650 and GEOG 650 (2009-10 catalog)

Prerequisite(s): GGS 553 or equivalent introductory GIS course, or permission of instructor.
GGS 653 - Geographic Information Analysis

Credits: 3 (NR)
Explores existing and potential capabilities of geographic information systems in conducting spatial analysis and modeling

Equivalent to GEOG 653 (2009-10 catalog)

Prerequisite(s): GGS 553 and 560

GGS 655 - Map Design

Credits: 3 (NR)
Advanced examination of principles of map design, including discussions of map design research.

Equivalent to GEOG 655 (2009-10 catalog)

Prerequisite(s): GGS 310 or 550.

GGS 656 - The Hydrosphere

Credits: 3 (NR)
Covers components and transfer processes in hydrosphere, which consists of aqueous envelope of Earth including oceans, lakes, rivers, snow, ice, glaciers, soil moisture, ground water, and atmospheric water vapor.

Equivalent to EVPP 652; EOS 656 and GEOG 570 (2009-10 catalog)

Prerequisite(s): Two semesters of calculus, partial differential equation recommended; or permission of instructor.

GGS 657 - The Lithosphere
Global-scale overview of lithosphere; the solid nonliving Earth, its materials, cycles, plate tectonic and geomorphic processes; and history, including interactions with and history of hydrosphere, atmosphere and biosphere, and methods of analysis.

Equivalent to GEOL 601, EOS 657 and GEOG 671 (2009-10 catalog)

Prerequisite(s): Graduate standing

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GGS 658 - Terrain Mapping

Credits: 3 (NR)
Covers fundamental methods of digitally representing terrain data, major technologies, and programs for generating terrain data; methods for quantifying terrain error and assessing terrain data quality; and a variety of applications.

Equivalent to GEOG 656 (2009-10 catalog)

Prerequisite(s): GGS 553 or equivalent, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GGS 660 - Automated Cartography

Credits: 3 (NR)
Survey of algorithms and techniques to generalize information on maps and in geographic information systems. Covers simplified representation of geographic objects, surfaces, and thematic information. Includes GIS programming component.

Equivalent to GEOG 556 (2009-10 catalog)

Prerequisite(s): GGS 650 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GGS 661 - Map Projections and Coordinate Systems

Credits: 3 (NR)
Covers development of various map projections and coordinate systems, property analysis, distortions, and applications.

Equivalent to GEOG 661 (2009-10 catalog)

Prerequisite(s): GGS 310 or 550.
GGS 664 - Spatial Data Structures

Credits: 3 (NR)
Studies spatial data structures and their application in digital cartography, geographic information systems, and image-processing systems. Examines raster and vector data structures, and attribution schemes and topological models. Includes data transformation, information loss, data quality, and the role of metadata.

Equivalent to GEOG 664 (2009-10 catalog)

Prerequisite(s): B or better in GGS 650

GGS 670 - Introduction to Atmosphere and Weather

Credits: 3 (NR)
Applies climatic concepts to natural and human-modified environments, and analyzes climatic change.

Equivalent to EOS 670 and GEOG 670 (2009-10 catalog)

GGS 671 - Algorithms and Modeling in GIS

Credits: 3 (NR)
Examines several fundamental GIS algorithms based upon computational geometry and computer graphics. Also discusses issues in modeling features of different dimensions and surfaces in GIS. Significant programming expected.

Equivalent to EOS 771 (2009-10 catalog)

Prerequisite(s): Prior course or experience in GIS, and knowledge of computer programming language.

GGS 674 - Environmental Impact Analysis

Credits: 3 (NR)
Scientific and administrative processes involved in environmental impact analysis and environmental impact statements.
Equivalent to GEOG 674 (2009-10 catalog)

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

### GGS 675 - Location Science

Credits: 3 (NR)  
This course presents the theory and practice of Location Science - the study of the optimal or near optimal spatial location or allocation of facilities, routes, personnel, or other assets. A variety of algorithms and heuristics for location problems is presented. Lectures and both in-class and take-home exercises reinforce students’ mastery of the techniques and understanding of advanced theoretical issues.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall

---

### GGS 680 - Earth Image Processing

Credits: 3 (NR)  
Focuses on how geoinformation technologies, including GIS, RS, and GPS, and spatial analytical techniques can be integrated to address various situations in environmental risk assessment, monitoring, and planning.

Equivalent to EOS 758 and GEOG 580 (2009-10 catalog)

**Prerequisite(s):** GGS 416 or GGS 579 or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

### GGS 681 - Environmental Applications of Integrated Geographic Information Technologies

Credits: 3 (NR)  
Focuses on how geoinformation technologies, including GIS, RS, and GPS, and spatial analytical techniques can be integrated to address various situations in environmental risk assessment, monitoring, and planning.

Equivalent to EOS 680 (2009-10 catalog)

**Prerequisite(s):** GGS 753 and GGS 550 or GGS 560 or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0
GGS 684 - Selected Topics in Geospatial Intelligence

Credits: 3 (NR)
Covers topics relevant to geospatial intelligence, especially addressing emerging trends, focused intelligence applications, and relevant technological advances, not covered by existing courses. Sample topics addressed in this course include geosensor networks, landmine detection using remote sensing techniques, the use of unmanned aerial vehicles in geospatial intelligence, and the use of virtual reality techniques for geospatial information modeling and analyst training.

Equivalent to EOS 684 (2009-2010 Catalog)

Prerequisite(s): Admission to the Geospatial Intelligence Certificate program or permission from the program's academic director.

Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0  
When Offered: Fall, Spring

GGS 685 - Capstone Course in Geoinformatics

Credits: 3 (NR)
A course for students completing their geospatial intelligence (GI) certificate program. It is intended to provide a capstone experience by synthesizing the knowledge and experience they acquired in their previous courses to address a complex geospatial intelligence problem. The course requires analytical, collaborative, and communication skills.

Prerequisite(s): 12 credits in the geospatial intelligence certificate program or permission of program coordinator.

Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0  
When Offered: Fall, Spring

GGS 689 - Seminar in Geographic Thought and Methodology

Credits: 3 (NR)
Includes historical development of geographic thought and current philosophy of geography; rationale for various subfields; and geographic research techniques and methods of analysis.

Equivalent to GEOG 680 (2009-10 catalog)

Prerequisite(s): GGS 560

Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0

GGS 690 - Advanced Practicum in Geographical Applications
Credits: 1-6 (RD)
Applies spatial technologies in conjunction with faculty instruction and research. Individualized sections taught by arrangement with full-time faculty.

Equivalent to GEOG 690 (2009-10 catalog)

Prerequisite(s): Permission of department.

Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 1-9

GGS 692 - Web-based Geographic Information Systems

Credits: 3 (NR)
Management of geospatial data by means of a database system. Communication of geospatial data over the Internet using browser-based interfaces.

Prerequisite(s): GGS 550 or equivalent, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

GGS 695 - Internship in Geography

Credits: 1 to 6 (RD)
Approved study programs with specific employers. Students and employer supervisors must demonstrate relevancy of study program to degree requirements.

Equivalent to GEOG 695 (2009-2010 Catalog)

Prerequisite(s): Permission of department.

Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

GGS 698 - Directed Readings and Research

Credits: 1-3 (RT)
Reading and research on specific topic under direction of faculty member.

Equivalent to GEOG 698 (2009-10 catalog)

Prerequisite(s): Permission of instructor and department.

Notes: Written report required; oral exam and report may be required. May be repeated to a maximum of 12 credits.
GGS 704 - Spatial Analysis and Modeling of Population

Credits: 3 (NR)
Intermediate-level, population geography course discussing demographic concepts and spatial dimensions of population. Features various indices, measures, and models commonly used in human geography.

Equivalent to EOS 704 (2009-10 catalog)

Prerequisite(s): Prior courses in quantitative methods and GIS recommended.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GGS 721 - Biogeography

Credits: 3 (NR)
Provides broad understanding of how physical geography and environment influence spatial and temporal distribution of plants and animals on Earth's surface.

Equivalent to EOS 721 (2009-2010 Catalog)

Prerequisite(s): Courses in ecology, chemistry, and geology.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

GGS 722 - Regional and Global Issues in the Earth Sciences

Credits: 3 (NR)
Provides basis for evaluating existing and emerging issues in Earth sciences at regional and global scales, utilizing interdisciplinary scientific principles.

Equivalent to EOS 722 (2009-2010 Catalog)

Prerequisite(s): Courses in ecology, chemistry, and physics.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring
GGS 725 - Advanced Hydrosphere

Credits: 3 (NR)
Uses mathematical and modeling approaches for in-depth study of different components and transfer processes within hydrosphere. Topics include transfer processes relevant for oceans, lakes, rivers, snow, ice, glaciers, soil moisture, ground water, and atmospheric water vapor.

Equivalent to EOS 725 (2009-2010 Catalog)

Prerequisite(s): Two semesters of calculus, preferably partial differential equations; or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

GGS 740 - Hyperspectral Imaging Systems

Credits: 3 (NR)
Provides requisite materials to understand hyperspectral imaging technology and its many civilian and military applications. Emphasizes scientific principles involved and technology application to real-world imaging systems. Topics include hyperspectral concepts and system tradeoffs; data collection systems; calibration techniques; data processing techniques and software; classification methods; and case studies. Data processing techniques include N-dimensional space, scatterplots, spectral angle mapping, spectral mixture analysis, spectral matching, and mixture tuned matched filtering. Discusses ground, airborne, and spaceborne hyperspectral remote sensing systems.

Equivalent to EOS 740 (2009-2010 Catalog)

Prerequisite(s): CSI 660 or equivalent, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

GGS 750 - Advanced Geographical Research Applications

Credits: 1-6 (RT)
Advanced research employing geographical tools and research techniques.

Equivalent to GEOG 750 (2009-10 catalog)

Prerequisite(s): Permission of instructor.

Notes: Content varies. May be repeated to a maximum of 12 credits with permission of the department.

Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 1-15
GGS 754 - Earth Science Data and Advanced Data Analysis

Credits: 3 (NR)
Covers accessing and applying Earth observations and remote-sensing data for Earth system science research and applications. Major topics are data formats, analysis and visualization tools, advanced data analysis methods, and data applications. Also covers combining innovative information technology techniques and Earth science data to set up online data centers for accessing data through the web.

Equivalent to EOS 754 (2009-2010 Catalog)

Prerequisite(s): GGS 753 or permission of instructor

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

GGS 756 - Physical Principles of Remote Sensing

Credits: 3 (NR)
Emphasizes fundamental physical and mathematical principles of remote sensing. Also provides overview of the current Earth Observation System as well as the National Polar-Orbiting Operational Environmental Satellite Systems (NPOESS), and NPOESS Preparatory Project missions.

Equivalent to EOS 756 (2009-2010 Catalog)

Prerequisite(s): GGS 753 or permission of instructor

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

GGS 759 - Topics in Earth Systems Science

Credits: 1-6 (NR)
Covers selected topics in Earth systems and global changes not covered in fixed-content Earth systems and global changes courses.

Equivalent to EOS 759 (2009-10 catalog)

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GGS 760 - Advanced Topics in Remote Sensing

Credits: 3 (RT)
Content varies in the area of remote sensing.
Equivalent to EOS 760 (2009-2010 Catalog)

**Prerequisite(s):** GGS 579 or GGS 680

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall, Spring

### GGS 772 - Distributed Geographic Information Systems

Credits: 3 (NR)  
Examines different aspects of science and technology in the context of distributed GIS. Includes general concepts, architecture, component design and development, and system integration as well as other advanced topics, including interoperability and agent-based GIS.

Equivalent to EOS 772 (2009-10 catalog)

**Prerequisite(s):** Introductory course in GIS and some programming experience, or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

### GGS 773 - Interoperability of Geographic Information Systems

Credits: 3 (NR)  
Advanced course addressing theories, standards, and implementations of web-based interoperable geographic information systems for online data and information services. Reviews international standards, including OGC, and associated tools for interoperability.

Equivalent to EOS 773 (2009-10 catalog)

**Prerequisite(s):** GGS 553 and 754, or a course in GIS.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

### GGS 777 - Remote Sensing Natural Hazards

Credits: 3 (NR)  
Provides an overview of major natural hazards, their governing dynamics and remote-sensing techniques used to study, forecast, and mitigate hazards.

Equivalent to EOS 777 (2009-2010 catalog).

**Prerequisite(s):** GGS 579 or GGS 680; or permission of instructor.
GGS 780 - Graduate Internship in Earth System Science

Credits: 1-6 (RD)
Applications of knowledge and skills in Earth systems and geoinformation sciences to real-world issues and problems in private industry, government agencies, or nonprofit organizations.

Equivalent to EOS 780 (2009-10 catalog)

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GGS 785 - Geographic Field Work

Credits: 3 (NR)
Introduces nature, scope, and objectives of geographic field methods and techniques, including use of base maps, acquisition of data, and field research design. Taught as much as possible in field situations with students required to develop and carry out relevant field research projects pertaining to both physical and cultural geography.

Equivalent to GEOG 785 (2009-10 catalog)

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GGS 787 - Scientific Data Mining for Geoinformatics

Credits: 3 (NR)
Covers specialized data mining algorithms, geoscience data models, and data information systems. Emphasis on domain-specific data mining algorithms suitable for spatial data and spatio-temporal data with geoscience and geoinformatics applications. Introduces real geoscience data mining applications in detailed applications.

Equivalent to EOS 787 (2009-2010 Catalog)

Prerequisite(s): Competency in programming at the level of CSI 601-607 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

GGS 791 - Advanced Spatial Statistics
Credits: 3 (NR)
Advanced course focusing on analyzing georeferenced or spatial data represented as points or polygons. Addresses higher moments, point pattern analyses, and interpolations of points to surfaces. Includes spatial regression.

Equivalent to EOS 791 (2009-10 catalog)

Prerequisite(s): GGS 560 or STAT 535/554, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GGS 792 - Seminar in Earth Systems Science

Credits: 2 (NR)
Capstone experience. Seminars presented by faculty and students.

Equivalent to EVPP 792 and EOS 792 (2009-10 catalog)

Prerequisite(s): 15 Graduate Credits including CSI 655, GGS 656, and GGS 657, or permission of instructor.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 0

GGS 795 - Seminar in Regional Analysis

Credits: 3 (NR)
Analyzes and synthesizes physical and cultural elements of geography in selected region. Should be taken near end of master’s degree program. Provides opportunity to apply selective knowledge gained in previous systematic courses to specific region.

Equivalent to GEOG 795 (2009-10 catalog)

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GGS 796 - Directed Readings and Research in Earth Systems Science

Credits: 1-6 (RD)
Reading and research on specific topic in Earth systems and geoinformation sciences under direction of faculty member.

Equivalent to EOS 796 (2009-10 catalog)

Prerequisite(s): Graduate standing, permission of instructor.

Notes: May be repeated as necessary.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
GGS 798 - Research Project in Earth Systems Science

Credits: 1-6 (RD)
Reading project chosen and completed under guidance of graduate faculty member resulting in acceptable technical report.

Equivalent to EOS 798 (2009-10 catalog)

Prerequisite(s): Admission to Earth Systems Science MS program, 12 graduate credits, and permission of instructor.

Notes: For students enrolled in Earth Systems Science master’s program.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GGS 799 - Thesis

Credits: 1-6 (RD)
Degree candidacy and departmental approval of thesis proposal.

Equivalent to EOS 799 and GEOG 799 (2009-10 catalog)

Prerequisite(s): Degree candidacy and departmental approval of thesis proposal.

Notes: May be repeated to a maximum of 6 credits earned.

Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 0
Grading: Satisfactory/No Credit

GGS 840 - Hyperspectral Imaging Applications

Credits: 3 (NR)
Introduces advanced hyperspectral imaging and multisensor concepts with emphasis on real-world civilian and military applications. Topics include advanced hyperspectral concepts, multisystem tradeoffs, data collection and processing systems, imaging radar systems, laser systems, calibration techniques, data fusion, quantitative remote sensing techniques, data compression techniques, case studies, and U.S. national policy. Applications and case studies include environmental, homeland security, medical, military, disaster mitigation, agricultural, and transportation.

Equivalent to EOS 840 (2009-2010 Catalog)

Prerequisite(s): CSI 660 or equivalent, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring
GGS 854 - Air Pollution Dispersion

Credits: 3 (NR)
Covers the basic concepts, theories, and models of pollutant dispersal in the atmosphere and the related atmospheric systems affecting dispersal of hazardous atmospheric releases.

Equivalent to EOS 854 (2009-2010 Catalog)

Prerequisite(s): CLIM 710 or 711, or permission of instructor

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

GGS 855 - Introduction to Mesoscale Atmospheric Modeling

Credits: 3 (NR)
Introduces physical and numerical modeling issues involved in mesoscale atmospheric flows. These flows involve time and space scales associated with diurnal cycle, atmospheric inertial mode, thermal and mechanical forcing due to mesoscale terrain inhomogeneities, mesoscale precipitation systems, and downscale energy transfer from synoptic scale to mesoscale due to nonlinear flow interactions.

Equivalent to EOS 855 (2009-2010 Catalog)

Prerequisite(s): Permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

GGS 900 - Colloquium Earth Systems Sciences

Credits: 1 (RD)
Presentations in specific research areas of Earth systems and geoinformation sciences by faculty and staff, Mason faculty in related programs, and professional visitors.

Equivalent to EVPP 791; EOS 900 and GEOG 791 (2009-10 catalog)

Prerequisite(s): Graduate standing

Notes: May be repeated for credit, but maximum 3 credits may be applied to Earth systems and geoinformation sciences PhD.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0

GGS 998 - Dissertation Proposal
Covers development of research proposal that forms basis for doctoral dissertation, under guidance of dissertation director and doctoral committee.

Equivalent to EOS 998 (2009-10 catalog)

**Prerequisite(s):** Doctoral student, permission of instructor.

**Notes:** May be repeated, but no more than 12 credits of GGS 998 may satisfy doctoral degree requirements.

**Hours of Lecture or Seminar per week:** 0  
**Hours of Lab or Studio per week:** 0  
**Grading:** Satisfactory/No credit only

---

**GGS 999 - Dissertation**

Credits: 1-12 (RD)  
Doctoral dissertation research under direction of dissertation advisor.

Equivalent to EOS 999 (2009-10 catalog)

**Prerequisite(s):** Permission of instructor.

**Notes:** May be repeated, but no more than total 24 credits in GGS 998 and 999 may be applied to doctoral degree.

**Hours of Lecture or Seminar per week:** 0  
**Hours of Lab or Studio per week:** 0  
**Grading:** Satisfactory/No credit only

---

**Geology (GEOL)**

Offered by the College of Science

---

**GEOL 101 - Introductory Geology I**

Credits: 4 (NR)

Covers Earth, processes that operate within Earth and on surface, and human interaction with Earth. Topics include minerals, earthquakes and seismology, isostasy, igneous processes and rocks, paleomagnetism and plate tectonics, weathering, mass movements, rivers and streams, groundwater, glaciers, and marine processes.

Designated a Green Leaf Course.

Fulfills Mason Core requirement in natural science (lab).

**Notes:** May include field trips.
**GEOL 102 - Introductory Geology II**

Credits: 4 (NR)

Earth processes in historical context. Topics include sedimentary rocks and principles, deformation and metamorphism, mountain building and plate tectonics, geologic time, fossils, and historical development of continents. Designated a Green Leaf Course.

Fulfills Mason Core requirement in natural science (lab).

Prerequisite(s): GEOL 101

Notes: May include field trips.

**GEOL 134 - Evolution and Extinction**

Credits: 3 (NR)

Evolution and Extinction is a science class for non-science majors that explores how diversity of animals and plants has changed through geologic time, when mass extinctions occurred, when major diversifications of life occurred, and how the position of continents on the surface of the earth influenced the evolution, extinction, and distribution of life, landforms and the atmosphere. Designated a Green Leaf Course.

Fulfills Mason Core requirement in natural science (nonlab).

**GEOL 206 - Topics in Geology I**

Credits: 1-3 (RT)

Discusses particular topic in geology.

Notes: May include field trips.

Hours of Lecture or Seminar per week: 1-3

Hours of Lab or Studio per week: 0
GEOL 302 - Mineralogy

Credits: 4 (NR)
Crystallographic, optical, chemical, and physical properties of minerals.

Prerequisite(s): GEOL 101 and 102 with grade of C or better, and CHEM 211.

Notes: May include field trips.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 3

GEOL 303 - Field Mapping Techniques

Credits: 3 (NR)

Basic techniques for collecting, recording, and plotting spatial field data including use of topographic maps, compasses, transit, alidade, and global positioning systems (GPS).
Designated a Green Leaf Course.

Prerequisite(s): 30 credits including MATH 105 or equivalent, and GGS 102 or GEOL 101.

Notes: Includes field work.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 6

GEOL 304 - Sedimentary Geology

Credits: 4 (NR)
Introduces sedimentation, sedimentary petrology, facies analysis, and stratigraphy.

Prerequisite(s): GEOL 101 and 102, and grade of C or better in GEOL 302.

Notes: May include field trips.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 3

GEOL 305 - Environmental Geology

Credits: 3 (NR)
Investigates geological principles directly relating to environmental hazards. Geological causes and effects of natural disasters such as earthquakes, tsunamis, volcanoes, floods and landslides; climate variability and change; prediction of, and planning for geological hazards and disasters and understanding their major societal impacts; and medical geology.
Designated a Green Leaf Course.

Prerequisite(s): GEOL 101, and either GEOL 102, GEOL 309/BIOL 309, or GGS 309

Notes: May include field trips.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GEOL 306 - Soil Science

Credits: 3 (NR)
Composition, classification, physical properties, and origin of soils.
Designated a Green Leaf Course.

Prerequisite(s): GEOL 101, and CHEM 103 or 211.

Notes: May include field trips.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GEOL 308 - Igneous and Metamorphic Petrology

Credits: 4 (NR)
Genesis, classification, and recognition of igneous and metamorphic rocks.

Prerequisite(s): GEOL 101 and 102, grade of C or better in GEOL 302, and MATH 105 or equivalent.

Notes: May include field trips.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 3

GEOL 309 - Introduction to Oceanography

Credits: 3 (NR)
Introduces physical, chemical, biological, and geological aspects of oceanic environment.

Equivalent to BIOL 309
Prerequisite(s): GEOL 101 and BIOL 103 or 213.

Notes: May include field trip.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**GEOL 312 - Invertebrate Paleontology**

Credits: 4 (NR)
Classification, evolutionary trends, and distribution of common invertebrate fossils.

Prerequisite(s): GEOL 101, 102; or BIOL 103, 104; or BIOL 213, 303, 304.

Notes: May include field trips.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 3

**GEOL 313 - Hydrogeology**

Credits: 3 (NR)
Geological and hydrologic factors controlling occurrence, distribution, movement, quality, and development of groundwater. Designated a Green Leaf Course.

Prerequisite(s): GEOL 101 or GGS 102, MATH 113, and CHEM 211.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**GEOL 315 - Topics in Geology II**

Credits: 1-3 (RT)
 Discusses particular topic in geology.

Prerequisite(s): GEOL 101 or GEOL 102 or permission of instructor.

Notes: May include field trips.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0

**GEOL 316 - Computers in Geology**
Credits: 3 (NR)
Uses of mainframe and microcomputers, with emphasis on geologic applications.

Prerequisite(s): GEOL 101, 102, and 302, and one semester of mathematics; or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GEOL 317 - Geomorphology

Credits: 4 (NR)
Analyzes processes that occur at Earth's surface and resulting landforms. Labs stress recognition and evaluation of landforms using maps and aerial photographs, and methods of data collection used in study of surficial geology.

Fulfills writing intensive requirement in the major.

Prerequisite(s): GEOL 101 and 102, with grade of C or better; or 6 credits in GGS, including GGS 102; GGS 412 strongly recommended.

Notes: May include field trips.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 3

GEOL 320 - Geology of Earth Resources

Credits: 3 (NR)
A survey of earth resources, including metallic and non-metallic ore deposits, mineral resources, precious gems, sand and gravel, water, and air.
Designated a Green Leaf Course.

Prerequisite(s): GEOL 101, GEOL 102, GEOL 302. GEOL 305 strongly suggested.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring

GEOL 321 - Geology of Energy Resources

Credits: 3 (NR)
A survey of energy resources, including fossil fuels, renewable, nuclear and unconventional sources. Emphasis on origin, use and implications of development.
Designated a Green Leaf Course.

**Prerequisite(s):** GEOL 101 or GEOL 102, and completion of all Mason Core Science requirements.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall

**GEOL 332 - Paleoclimatology**

Credits: 3 (NR)

Explores the natural evolution of Earth's climate with the goal of providing a baseline for understanding present climate variability and future trends through increased knowledge of the physical, chemical, and biological processes that influence climate over the long-term.

Designated a Green Leaf Course.

**Prerequisite(s):** GEOL 102 or BIOL 103 or EVPP 110.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Spring.

**GEOL 334 - Vertebrate Paleontology**

Credits: 4 (NR)  
Vertebrate Paleontology explores the evolution of vertebrates from the early Paleozoic to Recent. The course will cover the systematics, anatomy, paleogeography, and ecology of extinct vertebrates. Discussions will include fishes, early tetrapods & amniotes, dinosaurs, birds and mammals. Lab portion includes paleontology techniques, analysis, and study of fossil specimens and casts. A weekend field trip is included.

Equivalent to BIOL 334

**Prerequisite(s):** Any two courses from the following list: GEOL 101, GEOL 102, BIOL 103, BIOL 104, BIOL 213, BIOL 303 or the permission of the instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Spring

**GEOL 363 - Coastal Morphology and Processes**

Credits: 4 (NR)

Studies global coastal geomorphology and processes with emphasis on U.S. Atlantic and Gulf coasts. Topics include plate
tectonics, sea level changes, sediment supply, waves, tides, storm impacts, and human activities. Lecture and extended weekend field trips to mid-Atlantic coast.
Designated a Green Leaf Course.

Prerequisite(s): GEOL 309 or BIOL 309 or GEOL 317 with a grade C or better; or 9 credits in geography, including GGS 309.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 3

GEOL 364 - Marine Geology

Credits: 3 (NR)
This course will present a global overview of the geologic origin and composition of the ocean seafloor, and an introduction to the basic principles of the geologic processes occurring in the marine environment. Primary topics include geologic, tectonic and sedimentary characteristics of the deep ocean basins and continental margins; transport and deposition of marine sediments; micropaleontology and paleoceanography; geochemistry and hydrothermal systems; and marine mineral resources.

Prerequisite(s): GEOL 101, 102, 302, and CHEM 211

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GEOL 401 - Structural Geology

Credits: 4 (NR)
Igneous, sedimentary, and metamorphic rocks in folded, faulted, and metamorphosed terrains.

Prerequisite(s): Grade of C or better in GEOL 302 and 317; successful completion of one or both of GEOL 304 or 308; and MATH 110, 111, or 113. PHYS 160 or 243 highly recommended.

Notes: May include field trips.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 3

GEOL 402 - Geological Development of North America

Credits: 3 (NR)
Geological history of North America in terms of plate tectonics. Geological development and history of North America's major regions.

Prerequisite(s): GEOL 101, 102, 302, 304, 308, and 401.

Notes: May include field trips.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
**GEOL 403 - Geochemistry**

Credits: 3 (NR)
Includes stable isotope, crystal, water, and organic geochemistry; geochronology; and geochemistry of rocks.

**Prerequisite(s):** GEOL 101 and 102 and CHEM 211.

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0

---

**GEOL 404 - Geological Field Techniques**

Credits: 1-8 (RD)
Mapping techniques involved in collecting geological field data.

**Prerequisite(s):** GEOL 101, 102, 302, 304, 308, and 401.

**Notes:** Includes field work.

**Hours of Lecture or Seminar per week:** 1-12
**Hours of Lab or Studio per week:** 6-12

---

**GEOL 405 - Advanced Seminar in Earth Resources**

Credits: 3 (NR)

Analyzes current issues involving renewable and non-renewable earth resources with consideration of the economic, political, social and aesthetic significance of these resources and their utilization. Taught seminar style examining case-studies, with emphasis on discussion, reading, writing and student oral presentations.

Designated a Green Leaf Course.

**Prerequisite(s):** GEOL 101 and 102 and GEOL 302, 304 and 308 OR GEOL 305, 320 and 321 and completion of Mason Core requirements.

**Notes:** May include field trips.

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0

---

**GEOL 406 - Seminar in Earth and Environmental Science**

Credits: 3 (NR)

Students read, discuss research literature; produce, present original papers.
Prerequisite(s): 90 credits.

Notes: Capstone seminar for Earth and environmental science majors.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**GEOL 408 - Practicum for Geology Laboratories**

Credits: 1 (NR)
Studies techniques to make geology lab effective component in geological education. Discusses developing testing materials, supplemented by experience operating geology course lab section.

Prerequisite(s): Geology major with 80 credits, and permission of department chair.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 3

**GEOL 409 - Practicum for Geology Laboratories**

Credits: 1 (NR)
Studies techniques to make geology lab effective component in geological education. Discusses developing testing materials, supplemented by experience operating geology course lab section.

Prerequisite(s): Geology major with 80 credits, and permission of department chair.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 3

**GEOL 410 - Research Proposal Preparation**

Credits: 1 (NR)
Prepares students for research in GEOL 411. Includes literature research, initial data collection, and preparing research proposal.

Prerequisite(s): Geology or Earth Science major with 90 credits, cumulative GPA of 2.80 or higher, and permission of the Geology undergraduate coordinator.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0

**GEOL 411 - Geological Research**
Credits: 3 (NR)
Geological research: data collection and reduction, interpretation, preparation of written report, and oral presentation of results.

Prerequisite(s): GEOL 410.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 3

GEOL 412 - Physical Oceanography

Credits: 3 (NR)
Course describes the global patterns of temperature, salinity, currents and waves in the world’s oceans, and how these patterns influence marine biota, climate, and human activity. Course introduces key concepts which explain physical features of the ocean ranging from microscopic turbulence to global circulation.

Equivalent to CLIM 412

Prerequisite(s): MATH 113 or MATH 115, and PHYS 160 or PHYS 243, or permission of instructor

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GEOL 417 - Geophysics

Credits: 3 (NR)
Basic principles of geophysics including gravity, magnetism, and seismic reflection and refraction.

Prerequisite(s): GEOL 101, MATH 113, and one year of physics; or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GEOL 420 - Earth Science and Policy

Credits: 3 (NR)

Discusses Earth science issues that have policy implications. Course uses a broad definition of Earth science, from atmosphere to geosphere. Taught seminar-style, with emphasis on discussion, reading, writing, critical analysis, and student oral presentations. Designated a Green Leaf Course.

Fulfills Mason Core requirement in synthesis.

Prerequisite(s): Completion of or concurrent enrollment in all other required Mason Core courses; completion of at least 18 credit hours in major or minor (geology, Earth science, ocean and estuarine science, or global and environmental change), and one of the following social science-based courses: EVPP 361; ECON 103; ANTH 114; GGS 103; GLOA 101; GOVT 132 or 133; HIST 125 or 130; SOCI 101, 102, or 120.
GEOL 458 - Chemical Oceanography

Credits: 3 (NR)

The world's oceans, including a variety of closed basins and estuaries, comprise a complex and dynamic system of chemical processes that interact with biological, geological, physical, and atmospheric processes to play a significant role in defining the earth's fragile environment. This course will present an overview of the origin, occurrence, and distribution of the chemical components in sea water and an introduction to the basic principals of the chemical processes taking place in the marine environment.

Designated a Green Leaf Course.

Equivalent to CHEM 458

Prerequisite(s): CHEM 211 and CHEM 212, and CHEM 321 or GEOL 302.

GEOL 480 - Internship

Credits: 1-3 (NR)

Approved study programs with specific employers.

Prerequisite(s): Open only to majors with 90 credits.

Notes: Contact department one semester before enrollment.

GEOL 500 - Selected Topics in Modern Geology

Credits: 1-3 (RD)

Topic designated in class schedule.

Prerequisite(s): Baccalaureate degree in geology, or permission of instructor.

Notes: Lecture, lab, field trip.
GEOL 501 - Selected Topics in Modern Geology

Credits: 1-3 (RD)
Topic designated in class schedule. Lecture, lab, field trip.

Prerequisite(s): Baccalaureate degree in geology, or permission of instructor.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0

GEOL 503 - Special Topics in Earth Science

Credits: 1-6 (RD)
In-service course to strengthen and update knowledge of Earth science.

Prerequisite(s): Employment or anticipated employment as an Earth Science teacher.

Notes: May include field trips.

Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 0

GEOL 534 - Vertebrate Paleontology

Credits: 4 (NR)
Explores the evolution of vertebrates from the early Paleozoic to Recent. Covers systematics, anatomy, paleogeography, and ecology of extinct vertebrates. Discussions include fishes, early tetrapods and amniotes, dinosaurs, birds, and mammals. Lab portion includes paleontology techniques, analysis, and study of fossil specimens and casts.

Prerequisite(s): Undergraduate degree in biology or geology or permission of instructor.

Notes: A weekend field trip is included. Students who have taken GEOL 334 as an undergraduate may not take 534 as a graduate student.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 3
When Offered: Spring

GEOL 601 - The Lithosphere
Credits: 3 (NR)
Global-scale overview of lithosphere, solid non-living Earth, materials, cycles, plate tectonic and geomorphic processes; and
history, including interactions with and history of hydrosphere, atmosphere and biosphere, and methods of analysis.

Prerequisite(s): Graduate standing.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GEOL 613 - Environmental Geochemistry and Mineralogy

Credits: 3 (NR)
Explores hot topics and aids students in developing intellectual skills to identify key research problems. Students will also
improve their writing and presentation skills.

Prerequisite(s): Graduate standing.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GEOL 800 - Studies for the Doctor of Philosophy in Education

Credits: 1-6 (NR)
Program of studies designed by discipline director and approved by doctoral committee that allows student to participate in
current research of discipline director and results in paper reporting student's original contributions.

Prerequisite(s): Admission to PhD in education program to study geology.

Notes: Enrollment may be repeated.

Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 1-6
Grading: Graduate Special

German (GERM)

Offered by the College of Humanities and Social Sciences

Placement: See Academic Testing in the Admissions section.

See also FRLN course listing.

GERM 101 - Elementary German I
Credits: 3 (NR)
Designed for students with no knowledge of German. Introduces elements of grammar, vocabulary, oral skills, listening comprehension, and reading.

Notes: Students may not receive credit for GERM 101 and GERM 105 or 110.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GERM 102 - Elementary German II

Credits: 3 (NR)
Continuation of GERM 101.

Prerequisite(s): GERM 101, or permission of department.

Notes: Students may not receive credit for GERM 102 and GERM 105 or 110.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GERM 110 - Elementary German

Credits: 6 (NR)
Introduces elements of grammar, vocabulary, oral skills, listening comprehension, and reading.

Notes: Lab work required. Students may not receive credit for GERM 110 and GERM 101, 102, or 105.

Hours of Lecture or Seminar per week: 6
Hours of Lab or Studio per week: 1

GERM 201 - Intermediate German I

Credits: 3 (NR)
Further development of skills in listening, speaking, reading, and writing.

Prerequisite(s): GERM 102 and 105, appropriate placement score, or permission of department.

Notes: GERM 201 and 202 must be taken in sequence. Students may not receive credit for GERM 201 and GERM 210.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GERM 202 - Intermediate German II
GERM 201 - Intermediate German

Credits: 3 (NR)
Applies skills to reading, composition, and discussion.

Prerequisite(s): GERM 201, appropriate placement score, or permission of department.

Notes: Students may not receive credit for GERM 202 and GERM 210.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GERM 210 - Intermediate German

Credits: 3 (NR)
Continuation of the development of basic components of the language, with focus on listening, speaking, reading, and writing skills. Introduces students to the cultures and histories of German speaking regions.

Prerequisite(s): GERM 110 or appropriate placement score.

Notes: Students may not receive credit for GERM 210 and GERM 201 or 202.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GERM 250 - Gateway to Advanced German

Credits: 3 (NR)
Integration of advanced intermediate-level German reading, writing, listening, and speaking skills, and the development of critical thinking about authentic texts from around the globe.

Prerequisite(s): GERM 210, appropriate placement score, or permission of department.

Notes: Taught in German

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GERM 301 - Culture and Civilization

Credits: 3 (NR)
Covers development of German civilization from 18th century to present. Includes German cultural contributions to world civilization.

Prerequisite(s): 60 credits, or permission of instructor.

Notes: Taught in English.
GERM 310 - Conversation and Composition

Credits: 3 (NR)
Develops fluency in speaking and proficiency in writing German through discussion, reports, and compositions based on texts dealing with contemporary events and issues.

Prerequisite(s): GERM 250, appropriate placement score, or permission of instructor.

Notes: Taught in German. Not for native speakers of German.

GERM 316 - German for the Business World

Credits: 3 (NR)
Introduces terminology and structural features of business German. Emphasizes acquiring vocabulary and developing facility in reading German business articles and correspondence.

Prerequisite(s): GERM 250, appropriate placement score, or permission of instructor.

Notes: Taught in German.

GERM 318 - Translation of Texts

Credits: 3 (NR)
Introduces principles and techniques of translation. Translation of texts from the natural and social sciences, current events, and contemporary culture.

Prerequisite(s): GERM 250 or equivalent; appropriate placement score; or permission of instructor.

Notes: Taught in German. Translations mainly from German into English.

GERM 325 - Major Writers
Credits: 3 (RD)
Works of major German, Austrian, and Swiss writers in translation.

Fulfills Mason Core requirement in literature.

**Prerequisite(s):** ENGL 101/ENGH 101 or equivalent, or permission of instructor.

**Notes:** Taught in English. Writers studied vary. May be repeated for a maximum of 6 credits when topic is different with permission of department.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**GERM 340 - Survey of German Literature**

Credits: 3 (NR)
Overview of history of German literature to 1880.

**Prerequisite(s):** GERM 250, appropriate placement score or permission of instructor.

**Notes:** Taught in German.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**GERM 355 - Readings in Poetry**

Credits: 3 (NR)
Intensive reading of German poetry in its historical context. Studies genre characteristics and development. Types of poetry studied vary.

**Prerequisite(s):** GERM 250, appropriate placement score or permission of instructor.

**Notes:** Taught in German. May be repeated for credit when subject is different, with permission of department.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**GERM 365 - Readings in Narrative Prose**

Credits: 3 (NR)
Intensive reading of German narrative prose, such as autobiographical fiction, fairy tales, and film. Studies genre characteristics and development. Topics to be studied vary.

**Prerequisite(s):** GERM 250, appropriate placement score or permission of instructor.

**Notes:** Taught in German. May be repeated for credit when subject is different, with permission of department.
GERM 375 - Readings in Drama

Credits: 3 (NR)
Intensive reading of German dramas in their historical context. Study of genre characteristics and development, including performance aspects. Genre varies; may be historical drama, radio play, or epic theater.

Prerequisite(s): GERM 250, appropriate placement score, or permission of instructor.

Notes: Taught in German. May be repeated for credit with permission of department when subtitle differs.

GERM 415 - Advanced Grammar and Style

Credits: 3 (NR)
Studies syntax, idiomatic features, and levels of style. Extensive practice in different types of written expression.

Prerequisite(s): 15 credits of German or permission of instructor.

Notes: Taught in German.

GERM 418 - Advanced Composition

Credits: 3 (NR)
Develops proficiency in writing German through intensive practice in preparing guided and original compositions.

Prerequisite(s): 15 credits of German, or permission of instructor.

Notes: Taught in German.

GERM 442 - The Age of Goethe
Major works of Enlightenment, Sturm und Drang, Classicism, and early Romanticism. Emphasizes drama and poetry by Goethe and Schiller, with additional works by Lessing, Kleist, and other important writers of the era.

Prerequisite(s): 15 credits of German, or permission of instructor.

Notes: Taught in German.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GERM 444 - The Literature of Romanticism

Credits: 3 (NR)
German Romantic poetry and prose. Background and some theory included.

Prerequisite(s): 15 credits of German, or permission of instructor.

Notes: Taught in German.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GERM 450 - Modern Literature: 1880-1925

Credits: 3 (NR)
Literature of Naturalism, Impressionism, and Expressionism in Germany, Austria, and Switzerland.

Prerequisite(s): 15 credits of German, or permission of instructor.

Notes: Taught in German.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GERM 451 - Modern Literature: 1925 to the Present

Credits: 3 (NR)
Literary trends since 1925 in Germany, Austria, and Switzerland.

Prerequisite(s): 15 credits of German, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
GERM 480 - Special Topics

Credits: 3 (NR)
Special topics on language, literature, or culture by theme, approach, or era.

Prerequisite(s): 15 credits of German, or permission of instructor.

Notes: Taught in German. May be repeated for credit with permission of department.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

Global Affairs (GLOA)

Offered by the College of Humanities and Social Sciences

GLOA 101 - Introduction to Global Affairs

Credits: 3 (NR)
Surveys wide range of global topics: previous periods of globalization, international organizations and law, transnational corporations and global economy, immigration and refugees, world environmental concerns, world culture, war and peace, paradoxical presence of nationalism and fundamentalism in global world, and antiglobalization movement.

Fulfills Mason Core requirement in global understanding.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GLOA 450 - Topics in Global Affairs

Credits: 1-3 (RD)
Selected topics in global affairs. Content varies.

Prerequisite(s): GLOA 101 or SOCI 120.

Notes: May be repeated for a maximum of 9 credits when topic is different.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GLOA 480 - Study Abroad

Credits: 1-6 (RT)
Study abroad under supervision of Mason faculty. Course topics, content, and locations vary.
Notes: May be repeated for a maximum of 12 credits with permission of department.

Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring, Summer

GLOA 490 - Independent Study in Global Affairs

Credits: 1-6 (RT)
Reading or research on specific topic related to globalization, under direction of faculty member.

Prerequisite(s): Global affairs majors with 90 credits, GLOA 101, and permission of instructor.

Notes: At least one written paper required. Course may involve combination of reading assignments, tutorials, presentations, or off-campus activities. May be repeated for a maximum of 6 credits.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0

GLOA 491 - Honors Seminar in Global Affairs

Credits: 3 (NR)
Emphasizes an interdisciplinary approach to the study of global affairs. Covers a variety of topics, including consideration of economic, political, and cultural forces at work in the complex interactions among global processes.

Prerequisite(s): Admission to Global Affairs honors in the major.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

GLOA 492 - Honors Research Project in Global Affairs

Credits: 3 (NR)
Honors-level research on specialized topic in Global Affairs culminating in substantial paper and oral presentation.

Prerequisite(s): Completion of GLOA 491 with minimum grade of B.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring

GLOA 495 - Global Experiential Learning
On-the-job training in transnational or international fields through approved internship programs.

**Notes:** Enrollment and credits controlled by Global Affairs Program. Contact Global Affairs Program one semester before planned enrollment. May be repeated for a maximum of 18 credits.

**Hours of Lecture or Seminar per week:** 1-3  
**Hours of Lab or Studio per week:** 0

---

**GLOA 498 - Global Politics Fellow**

Credits: 0 (RD)  
The Global Politics Fellows program is a 15 credit academic program for selected students majoring in Global Affairs or Government and International Politics and Public Administration. This course indicates participation in the program.

**Prerequisite(s):** Acceptance into Global Policy Fellows Program.

**Grading:** Satisfactory/No Credit.  
**When Offered:** Fall, Spring

---

**GLOA 599 - Issues in Global Affairs**

Credits: 3 (RT)  
Studies current issues and debates in global affairs.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**GLOA 600 - Global Competencies**

Credits: 3 (NR)  
Explores the nature of globalization. Students will understand the characteristics of the current global system; be familiar with key global issues and debates; have an advanced understanding of and appreciation for organizations, languages, cultures in many global contexts; and be better habituated to thinking across disciplinary lines.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**GLOA 610 - Economic Globalization and Development**

Credits: 3 (NR)  
Focuses on the intersection of countries and firms in the arenas of international trade, investment and finance, as the lenses into understanding better today’s “global” economy: countries of differing levels of economic development and economic system structure, factors of monetary union and currency disequilibria, trade liberalization or protectionism, market entry, cross-border
variables, risk and relations.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

### GLOA 620 - Human Systems

Credits: 3 (NR)  
Examines the human dimensions relative to international educational systems and their relationship to basic education and higher education policy, research policy, science and technology, culture, language, social justice, equity, conflict and peace, human resources and national development.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

### GLOA 690 - Independent Study

Credits: 3 (NR)  
Reading or research on specific topic related to globalization, under directions of faculty member.

**Prerequisite(s):** Global Affairs major with 12 MA credits and permission of instructor.

**Notes:** At least one written paper required. Course may involve combination of reading assignments, tutorials, presentations, or off-campus activities.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

### GLOA 710 - Seminar Abroad

Credits: 3 (RD)  
Intensive program in a foreign setting focusing on a deep overview of the research specialization of the supervising faculty member. Required pre-departure component to set the intellectual, logistical and culture terms of the abroad period. Locations vary from year to year.

**Notes:** May be repeated for a maximum of 6 credits with permission of program.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

### GLOA 720 - Capstone Research Seminar

Credits: 3 (RD)  
Provides students with the opportunity to engage in significant original research an analysis of a topic in
global affairs. Topics vary from year to year.

Notes: May be repeated for a maximum of 6 credits.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

Global and Community Health (GCH)

Offered by the College of Health and Human Services

GCH 205 - Global Health

Credits: 3 (NR)
Examines cross-cultural values in health and nutrition, exploring health- and nutrition-related problems that afflict populations throughout the world and efforts to achieve optimal health for all. Introduces nutrition and health concerns from variety of cultures and considers population dynamics, vital statistics, global disease patterns, and cultural variations. Includes lectures, discussion, video presentations, oral presentations, and web research.

Fulfills Mason Core requirement in global understanding.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GCH 300 - Introduction to Public Health

Credits: 3 (NR)
Addresses population-focused health care and examines concepts of community and public health, and health policies affecting U.S. populations. Emphasizes primary, secondary, and tertiary levels of prevention related to health problems/diseases.

Notes: Open only to non-BS-COMH majors.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GCH 310 - Health Behavior Theories

Credits: 3 (NR)
Introduces students to various theoretical models for understanding health and illness behavior. Case studies examine the nature of health from planning, implementing, and evaluating to prevention and treatment of health problems.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
GCH 320 - Community Health and Literature

Credits: 3 (NR)
This on-line course explores key historical worldwide public health events and humankind's responses to them, through in-depth study of selected literary works. The course includes investigation of scientific, social, cultural, geographical, and political factors that affect health and policy development on local, community and global levels.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

GCH 325 - Stress, Coping and Health

Credits: 3 (NR)
Explores the influences of stress on population-based health issues. The causes and pathways of the stress experience are explored from an ecological public health perspective. Theoretical aspects of stress and coping are considered, along with methods for relieving and preventing the stress response in both individuals and communities.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Summer

GCH 332 - Health and Disease

Credits: 3 (NR)
Introduces epidemiology, health promotion, and disease prevention, and effect on health status of culturally diverse and vulnerable individuals, families, small groups, and communities. Focuses on health problems and potential interventions throughout life span, and incorporates principles of teaching and learning as they apply to health professionals.

Prerequisite(s): Junior standing.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GCH 350 - Health Education

Credits: 3 (NR)
Enables students to survey health and wellness issues related to their personal profile and explore options in reducing personal risk factors. Students define health in context of family, environment, culture, society, and life span. By examining, comparing, and using various methods of health-risk appraisal and assessment tools, students plan health education and promotion projects for targeted populations. Stresses motivational strategies for improving and maintaining health.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
GCH 360 - Health and Environment

Credits: 3 (NR)
Examines principles and methods, risk factors, prevention and control, and policies related to the aspects of human health determined by biological, physical, and chemical factors in the environment at the local, regional, and global levels.

Prerequisite(s): STAT 250 or equivalent.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GCH 370 - Sexuality and Human Behavior

Credits: 3 (NR)
Introduction to human sexual behavior with an emphasis on the interaction between psychological, social, and biological factors. Topics include sexual differentiation and development, sexually transmitted infections and HIV, sexual orientation, patterns of sexual behavior, and the sexual health of individuals, communities, and global populations.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Summer, Spring.

GCH 376 - Health Ethics, Leadership, and Advocacy

Credits: 3 (NR)
Examines legal and ethical issues in public health practice and the skills necessary for effective leadership. Includes personal and organizational ethics, management and leadership styles, and public health advocacy.

Prerequisite(s): GCH 205.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Summer, Spring.

GCH 380 - Public Health Research Methods

Credits: 3 (NR)
Emphasizes the formation of public health research questions and selection of appropriate study designs to address them.

Equivalent to GCH 460 (2013-2014 Catalog).

Prerequisite(s): GCH 205.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
GCH 405 - Global Health Interventions: History and Systems

Credits: 3 (NR)
Examines the history, development, and implementation of international health policies and programs, with an emphasis on maternal and child health, undernutrition, and infectious diseases.

Prerequisite(s): GCH 205.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

GCH 406 - Global Health Interventions: Emerging Issues

Credits: 3 (NR)
Examines strategies for addressing emerging global health issues, with an emphasis on noncommunicable diseases, aging, mental health, and injuries.

Prerequisite(s): GCH 205.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring

GCH 411 - Health Program Planning and Evaluation

Credits: 3 (NR)
Addresses planning, implementation and evaluation of highly effective health programs. Emphasis is placed on using evidence-based approaches to program design and evaluation and working productively with communities.

Prerequisite(s): GCH 310, GCH 380.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Summer, Spring

GCH 412 - Fundamentals of Epidemiology

Credits: 3 (NR)
Explores health research methods for measuring population health, designing and implementing observational and experimental studies, reading health science publications, and applying research findings to global and community health.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
GCH 430 - Community Health Systems and Agencies

Credits: 3 (NR)
Introduces students to local, state, and national community health systems and agencies. Topics include the historical impact of community health systems and agencies, the influence of health advocacy groups; the relationship between human rights and health; and the need for collaboration between groups advocating for optimum human health.

Corequisite(s): GCH 411.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring

GCH 435 - Applied Health Statistics

Credits: 3 (NR)
Emphasizes the statistical concepts and procedures used in applied public health practice and research. Students will use SPSS to analyze, interpret, and present statistical findings.

Prerequisite(s): STAT 250 or equivalent statistics course.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Summer, Spring

GCH 445 - Social Determinants of Health

Credits: 3 (NR)
Examine the social determinants of health and the application of this framework to social work and public health policy and practice interventions. Explore the many social justice factors that affect health and consider which community systems and social change approaches may decrease or eliminate health inequities.

Equivalent to SOCW 445

Prerequisite(s): 45 credits or permission of the instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring, Summer

GCH 450 - Culture, Sexuality and the Global AIDS Epidemic

Credits: 3 (NR)
Examines how the cultural values and mores regarding sexuality shape HIV/AIDS social policy and how these values and mores
facilitate and hinder prevention and care efforts. Also examines several sexuality-related topics that interface with culture (e.g., gender, the sex industry, homosexuality) and the effectiveness of prevention and care initiatives around such issues as condom use, blood donation restrictions, immigration laws, sex education, and HIV testing.

**Prerequisite(s):** BIOL 301: (HIV/AIDS topic only) or permission of instructor

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**GCH 462 - Health Promotion across the Lifespan**

Credits: 3 (NR)  
Addresses health maintenance issues in humans from birth to death, emphasizing prevention. Compares and contrasts prevention of acute and chronic illnesses. Analyzes health communication approaches for effective translation of evidence-based.

**Prerequisite(s):** GCH 332  
GCH 350

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall

**GCH 465 - Community Health Capstone**

Credits: 3 (NR)  
Assists students in synthesizing their roles as community health professionals in a global society. Provides students with opportunities to examine issues in community health. Course content builds on knowledge and skills acquired through coursework and field experience. Student writings and presentations receive written self-evaluation as well as formal review by peers and multiple faculty members. (Writing intensive course).

Fulfills Mason Core requirement in synthesis.

**Prerequisite(s):** ENGH 302 with C or better and senior standing.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall, Spring

**GCH 480 - Health Maintenance and Health Aspects of Aging**

Credits: 3 (NR)  
Studies physiological and psychological factors that influence health and have implications for preventive measures in disease and health disorders. Examines nutrition, nature of health problems, and methods of assessing physical and psychological needs.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0
GCH 494 - Special Topics in Global and Community Health

Credits: 3 (RT)
Selected topics analyzing specialized areas in global and community health.

Notes: Content varies. Lecture, seminar, laboratory, workshops.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GCH 496 - Violence in Today's Society

Credits: 3 (NR)
Examines magnitude of problem of violence globally and more specifically within the United States. Discussion and reflective activities engage students in the learning process.

Equivalent to NURS 496

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GCH 498 - Global and Community Health Internship

Credits: 1-6 (RD)
Provides advanced students with the opportunity to apply community health knowledge while working under the supervision of a community preceptor in a local health organization. Students submit an application to the GCH internship coordinator the semester prior to enrollment for review. Students who have demonstrated academic excellence will receive priority internship placement.

Prerequisite(s): Permission of instructor.

Notes: Open to community health majors only. This course provides experiential learning in a community health organization under the direction of a faculty advisor and a preceptor in the community health organization. Students are expected to understand the roles and functions of the community health organization and complete a project approved by the faculty advisor and the preceptor.

The course requires a weekly two-hour seminar and internship hours that vary depending on the number of credits. Students are required to complete 45 hours of work at their internship site per credit. For instance, a student enrolled for 2 credits must complete 90 internship hours.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 3-18
Grading: Satisfactory/No Credit
When Offered: Fall, Spring, Summer
GCH 499 - Independent Study in Global and Community Health

Credits: 1-6 (RT)
Provides individual study of a particular problem area in global and community health research, theory development, or education under the direction of faculty.

Prerequisite(s): Permission of instructor

Notes: May be repeated for maximum 6 credits.

Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 0

GCH 515 - Lesbian, Gay, Bisexual, Transgender, and Queer Health

Credits: 3 (NR)
Examines health status and health disparities among lesbian, gay, bisexual, transgender, and queer (LGBTQ) communities across the lifespan. Measurement and methodological considerations in LGBTQ health research, as well as health-related interventions targeting LGBTQ populations will be emphasized.

Notes: Offered every other year. Upper level undergraduates interested in taking this course are encouraged to contact the instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GCH 543 - Global Health

Credits: 3 (NR)
Examines the major infectious, nutritional, noncommunicable, neuropsychiatric, and other causes of morbidity, mortality, and disability in each world region. Explores sociocultural, economic, political, biological, and environmental factors that contribute to global and community health.

Notes: Lecture, discussion.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

GCH 560 - Environmental Health

Credits: 3 (NR)

Examines principles and methods, risk factors, prevention and control, and policies related to the aspects of human health determined by biological, physical, and chemical factors in the environment at the local, regional, and global levels.
Designated a Green Leaf Course.

**GCH 565 - Public Health Toxicology**

Credits: 3 (NR)
Focuses on the general mechanisms of toxicity and direct and indirect effects of major environmental and occupational agents. Considers the genetic, physiologic, and psychosocial factors that affect susceptibility to adverse health outcomes associated with environmental or occupational hazard exposure.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Spring

**GCH 571 - HIV/AIDS: Concepts, Principles, and Interventions**

Credits: 3 (NR)
Overview of HIV disease, including retrospective and current concepts and analyses, global and societal effect, and cutting-edge research. Examines development of therapeutic tools and skills to educate, reduce risks, control infection, and affect care and healing of client, family, and community, and issues of increasing dilemma for health care professionals.

Equivalent to NURS 571.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Summer

**GCH 594 - Special Topics in Global and Community Health**

Credits: 3 (RD)
Selected topics analyzing specialized areas in health care.

Equivalent to HAP 594/NURS 594

**Notes:** Content varies. Lecture, seminar, laboratory, and workshops.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**GCH 600 - Health Promotion Methods**
Credits: 3 (NR)
Fundamental principles and practices of public health promotion and education, including historical origins; professional responsibilities; ethics; health behavior and learning theories; models for planning, implementing and evaluating programs; health literacy; public health advocacy; and the development, selection and implementation of effective instructional materials, methods, and interventions.

**Hours of Lecture or Seminar per week: 3**
**Hours of Lab or Studio per week: 0**
**When Offered: Fall**

**GCH 601 - Introduction to Biostatistics**

Credits: 3 (NR)
Applies selected biostatistics techniques to public health and health system management issues. Includes univariate and bivariate statistics, and regression analysis.

**Hours of Lecture or Seminar per week: 3**
**Hours of Lab or Studio per week: 0**
**When Offered: Fall**

**GCH 602 - Global Health Issues Related to Violence**

Credits: 3 (NR)
Explores worldwide view of violence and its impact on health. Examines biological, psychological, and social determinants of violence. The epidemiology of violence is examined with special attention to collective violence, youth violence, abuse and neglect of children and the elderly, intimate partners, sexual violence, self-directed violence, and transgenerational violence. Preventive approaches attempted to help reduce the prevalence of violence will be addressed.

**Prerequisite(s):** Admission to a graduate program or permission of instructor.

**Notes:** GCH 602 will be offered in the spring of odd years.

**Hours of Lecture or Seminar per week: 3**
**Hours of Lab or Studio per week: 0**
**When Offered: Spring**

**GCH 610 - Health Behavior Theory**

Credits: 3 (NR)
Introduces students to the fundamentals of social and behavioral sciences, emphasizing current health behavior theories and models. Students develop an understanding of the theoretical and scientific basis of health promotion/health education interventions and develop community need and asset assessment skills.

**Hours of Lecture or Seminar per week: 3**
**Hours of Lab or Studio per week: 0**
**When Offered: Spring**
GCH 611 - Health Program Planning and Evaluation

Credits: 3 (NR)
Addresses the process of program planning, development, and fundamental evaluation principles, emphasizing health promotion programs. The focus is on development of clear and concise objectives leading to the design of effective primary, secondary, and tertiary prevention strategies.

Corequisite(s): GCH 610.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

GCH 612 - Interventions in Public Health

Credits: 3 (NR)
Application of intervention mapping to the design of theory-based interventions for target populations; collaboration with communities to design and implement interventions; selection of evidence-based interventions (EBIs); adaptation of EBIs for new populations; dissemination of EBIs; and cultural and ethical issues related to intervention development, implementation, evaluation, and sustainability.

Notes: There are no prerequisites for the course. Students may find completion of GCH 600 or GCH 610 to be beneficial preparation for the course.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GCH 618 - Environmental and Occupational Risk Assessment

Credits: 3 (NR)
Focuses on how environmental and occupational health risks are identified and quantitatively characterized. Introduces risk communication strategies for technical and non-technical audiences. Introduces students to the development of testable models of chemical exposure.

Corequisite(s): GCH 560.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring

GCH 622 - Mental Health: A Global Perspective

Credits: 3 (NR)
An introduction to mental health and mental disorders; a critical view of national and international classification of disorders; an
introduction to public health perspectives on mental health and mental disorders; and a review of cultural factors related to public health dilemmas and services, locally, regionally and in the global community, from a bio-psycho-social perspective.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall

**GCH 628 - Refugee Health**

Credits: 3 (NR)  
Intensive course aimed at addressing the specific health care problems and needs of refugees and internally displaced persons worldwide, the provision of basic health requirements for that population, and the coordination of care among the agencies concerned with them.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Spring

**GCH 640 - Global Infectious Diseases**

Credits: 3 (NR)  
Examines principles and methods for the prevention and control of infectious and parasitic diseases of global importance, including malaria, HIV/AIDS, tuberculosis, influenza, helminthic infections, emerging infections, and others.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Spring

**GCH 645 - U.S. and Global Public Health Systems**

Credits: 3 (NR)  
Examines the organization, financing, and delivery of health services for individuals and populations in the United States and across the globe. Compares international health systems and policies.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Spring

**GCH 650 - Global Non-Communicable Diseases**

Credits: 3 (NR)  
Examines principles and methods for the prevention and control of NCDs of global importance, including cardiovascular diseases, cancer, COPD, diabetes, dementias, and others.
GCH 651 - Behavioral Research Methods

Credits: 3 (NR)
Explores quantitative and qualitative research methods, principles and techniques necessary for implementation of health science research.

Equivalent to RHBS 651 (2011-2012 Catalog); GCH 551 (2010-2011 Catalog).

Corequisite(s): GCH 601 or graduate course in applied statistics

GCH 690 - Independent Study

Credits: 1-3 (NR)
In-depth studies of selected area of health science theory, research, or practice under direction of faculty.

Notes: May be repeated for a maximum of 3 credits.

GCH 691 - Project Management in Public Health

Credits: 3 (NR)
Course examines project management roles and environments, the project lifecycle and various techniques of work planning, and control and evaluation to achieve project objectives. Emphasizes leadership, communication, grant writing and ethics.

GCH 712 - Introduction to Epidemiology

Credits: 3 (NR)
Explores epidemiological methods for measuring population health, designing and implementing observational and experimental studies, critically reading the public health literature, and applying research findings to global and community health.
GCH 722 - Infectious Disease Epidemiology

Credits: 3 (NR)
Focuses on the epidemiology of infectious and parasitic diseases. Emphasizes study design and data analysis to support the prevention and control of communicable diseases.

Prerequisite(s): GCH 712. Prerequisite enforced by registration system.

GCH 726 - Advanced Methods in Epidemiology

Credits: 3 (NR)
Develops epidemiological skills through the study and exploration of special topics in epidemiology. Focuses on epidemiological methods and analysis, critical review of the literature, and scientific writing.

Prerequisite(s): GCH 601 and GCH 712. Prerequisite enforced by registration system.

GCH 732 - Chronic Disease Epidemiology

Credits: 3 (NR)
Focuses on the epidemiology of chronic diseases, including cancers, cardiovascular and lung diseases, and mental health disorders. Emphasizes study design, critical reading, and public health approaches to disease control, such as surveillance and screening.

Prerequisite(s): GCH 712. Prerequisite enforced by registration system.

GCH 742 - Behavioral Epidemiology
Credits: 3 (NR)
Focuses on applying epidemiological principles to the study of behavior and human health, emphasizing the role of behavior in public health, determinants of behavior, and research methods for studying health and disease in relation to behavior.

Prerequisite(s): GCH 712. Prerequisite enforced by registration system.

Notes: Offered every other year.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

GCH 752 - Nutritional Epidemiology

Credits: 3 (NR)
Focuses on the examination of the methodologies of dietary assessment and their application to design, conduct, analysis, and interpretation of epidemiologic studies related to nutrition. Introduces the practical application of nutritional epidemiology to health programs and policy.

Prerequisite(s): GCH 712. Prerequisite enforced by registration system.

Notes: Offered every other year.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring

GCH 762 - Environmental Epidemiology

Credits: 3 (NR)
Focuses on applying epidemiological principles to the study of the environment exposures and human health, emphasizing research methods and data analysis, critical review of research, communication of research results, and applications to public health.

Prerequisite(s): GCH 712. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

GCH 772 - Social Epidemiology

Credits: 3 (NR)
Focuses on applying epidemiological principles to the study of social factors and human health. Prepares students to measure population-level social determinants of health and quantitatively evaluate their relationship with health and disease. Requires students to translate information and analyses into summaries suitable for technical and non-technical audiences.
Equivalent to GCH 605 (2013-2014 Catalog)

Prerequisite(s): GCH 712. Prerequisite enforced by registration system.

Notes: Offered every other year.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

---

**GCH 780 - Practicum Seminar**

Credits: 0 (NR)
Provides students with guidance and preparation for engaging in the public health practicum.

Notes: This course should be taken one semester prior to enrollment in the practicum course.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0
Grading: Graduate Special
When Offered: Fall, Spring

---

**GCH 782 - International Research Ethics and Methods**

Credits: 3 (NR)
Prepares students to conduct global and community health research. Discusses ethical issues in international health research. Develops plans for identifying a research project, collecting and analyzing data, and reporting results of international health research.

Equivalent to GCH 680 (2013-2014 Catalog)

Prerequisite(s): GCH 712 and GCH 601 (or graduate-level statistics course). Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

---

**GCH 790 - Practicum in Public Health**

Credits: 3 (NR)
The practicum provides students with an in-depth supervised experience in an approved public health organization. The practicum will require students to complete a project related to an actual public health issue that is a focus within the organization.

Prerequisite(s): Students must be enrolled in the MPH program in good standing. Must have completed GCH 780 and 21 credit hours in the MPH program.
GCH 792 - Culminating Experience

Credits: 0 (NR)
Provides a structured experience for students to synthesize and integrate knowledge acquired in coursework and to apply theory and principles in a situation that approximates professional practice. Serves as a means by which faculty judge whether a student has mastered public health competencies.

Prerequisite(s): Must be enrolled in the MPH program in good standing and have completed at least 21 credit hours in the MPH program.

Notes: This course should be taken during the final semester of the program. It is highly recommended that students complete all other MPH Core Courses and at least two Concentration Courses prior to enrollment in this course.

GCH 794 - Global Health Research Capstone

Credits: 3 (NR)
Provides a supervised, collaborative research experience on a global health topic that allows students to synthesize, integrate, and apply the knowledge and skills acquired in coursework.

Prerequisite(s): Completion of at least 30 credits towards the M.S. Global Health with a grade of B- or higher. Completion of GCH 601 and GCH 712. Prerequisite enforced by registration system.

GCH 795 - Advanced Special Topics in Global and Community Health

Credits: 1-3 (RD)
Advanced special topics course to address in-depth study of contemporary areas of global and community health insufficiently covered in other courses.

Prerequisite(s): Must be enrolled in a graduate program and have permission of the instructor.

Notes: Fulfills elective requirement for MS in global health degree and global health certificate program. Topics vary. May take up to 6 credits within their degree program.
GCH 804 - Advanced Quantitative Data Analysis for Health Care Research I

Credits: 3 (NR)
Examines factorial ANOVA, factorial ANCOVA, repeated measures ANOVA, ANOVA and ANCOVA via regression approach, and multiway frequency analysis. Students apply mathematical calculations and interpret SPSS outputs using health care research data.

Equivalent to NURS 804

Prerequisite(s): A graduate-level statistics course.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

GCH 805 - Advanced Quantitative Data Analysis for Health Care Research II

Credits: 3 (NR)
Examines multivariate analysis of variance (MANOVA), multivariate analysis of covariance (MANCOVA), multiple regression (ordinary least squares), and logistic regression. Students apply mathematical calculations and use linear combinations of multivariate tests in health care research data.

Equivalent to NURS 805

Prerequisite(s): GCH/NURS 804 or an equivalent multivariate statistics course.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring

GCH 806 - Advanced Multivariate Statistics and Data Analysis for Health Care Research

Credits: 3 (NR)
Examines canonical correlation, discriminant analysis, factor analysis and causal analysis (path models and structural equation modeling). Students analyze and interpret data using these statistical techniques.

Equivalent to NURS 806

Prerequisite(s): GCH/NURS 805 or an equivalent multivariate statistics course.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
GCH 807 - Measurement Theories and Applications in Health Care Research

Credits: 3 (NR)
Theories, principles, and techniques presented as foundation for the development and evaluation of instruments for use in health care research. Includes review of statistical techniques required for understanding measurement theory, reliability, validity, item analysis, and instrument construction. Students required to design, construct, administer, analyze, and evaluate an original instrument or evaluate an existing instrument in health care research.

Equivalent to NURS 807

Prerequisite(s): GCH/NURS 805 or permission of instructor.

Notes: Completion of GCH/NURS 805 or GCH/NURS 806 is highly recommended.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

Government and International Politics (GOVT)

Offered by the College of Humanities and Social Sciences

GOVT 101 - Democratic Theory and Practice

Credits: 3 (NR)
Comparative exploration; topics include contemporary analysis of the meanings of liberty, equality, representation, property rights, voting rights, and civil responsibilities.

Fulfills Mason Core requirement in social and behavioral science.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GOVT 103 - Introduction to American Government

Credits: 3 (NR)
American government examined in light of basic concepts and institutions of democracy. Includes citizenship project, a first-hand observation or participation in and analysis of some public activity.

Fulfills Mason Core requirement in social and behavioral science.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
GOVT 132 - Introduction to International Politics

Credits: 3 (NR)
Nature of international politics, approaches to study of international politics, state and nonstate actors in international system, patterns of action and interaction between nation-states, international institutions, and major global issues.

Fulfills Mason Core requirement in global understanding.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GOVT 133 - Introduction to Comparative Politics

Credits: 3 (NR)
Discusses methods and subject matter of comparative political analysis. Includes political systems, politics, participation in politics, government structures, policy-making process, and evaluation of political performance.

Fulfills Mason Core requirement in global understanding.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GOVT 300 - Research Methods and Analysis

Credits: 4 (NR)
Emphasizes asking clear, researchable questions and using appropriate evidence to answer them. Introduces broad range of evidence including quantitative and qualitative information. Studies design and analysis of surveys, government archives, case studies, and interpretations of events in journals. Examines ethical implications of information technologies.

Fulfills Mason Core requirement in information technology (all).

Notes: Required for all majors in government and international politics, and public administration. Strongly recommended before or during first semester of enrolling in 300-level courses.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 1

GOVT 301 - Public Law and the Judicial Process

Credits: 3 (NR)
American judicial organization and operation, role of the Supreme Court in policy formation, and selected constitutional principles.

Prerequisite(s): GOVT 103.
GOVT 302 - American Political Development

Credits: 3 (NR)
Examines American political development, both in itself and compared to other nations. Addresses the extent to which the United States has or has not been exceptional in its development as a nation state.

Prerequisite(s): GOVT 103.

GOVT 304 - American State and Local Government

Credits: 3 (NR)

Prerequisite(s): GOVT 103.

Notes: Students may not receive credit for GOVT 204 and 304.

GOVT 305 - Contemporary American Federalism

Credits: 3 (NR)
Legal, administrative, fiscal, and political dimensions of evolving American federalism.

Prerequisite(s): GOVT 103.

GOVT 307 - Legislative Behavior

Credits: 3 (NR)
Organization, processes, functions, and roles of legislature and U.S. Congress members. Topics include state legislatures and cross-national comparisons as time and resources permit.

Prerequisite(s): GOVT 103.
GOVT 308 - The American Presidency

Credits: 3 (NR)
Survey of modern presidency, including constitutional origins of office, growth and influence of White House staff, Cabinet, presidential appointees and control of executive branch, relations with Congress, and domestic and national security policy making.

Prerequisite(s): GOVT 103

GOVT 309 - Government and Politics of Metropolitan Areas

Credits: 3 (NR)
Government, politics, and problems of metropolitan centers and surrounding areas.

Prerequisite(s): GOVT 103.

GOVT 311 - Public Opinion and Electoral Behavior

Credits: 3 (NR)
Studies actions of voters, candidates, and political parties in relation to the expression of relevant public opinion in a democratic system.

Prerequisite(s): GOVT 103 and 300.

GOVT 312 - Political Parties and Campaigns

Credits: 3 (NR)
Characteristics and functions of political parties, influence of parties and other political forces on electoral decisions, and emphasis on parties’ inability or ability to hold government accountable to citizens.

Prerequisite(s): GOVT 103.
GOVT 318 - Interest Groups, Lobbying, and the Political Process

Credits: 3 (NR)
Role, internal operations, strategies, and activities of interest groups. Evaluates ability of these groups to influence or control government and enhance democratic process. Considers conditions under which social movements become, or fail to become, effective interest groups.

Prerequisite(s): GOVT 103.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GOVT 319 - Issues in Government and Politics

Credits: 1-3 (RT)
Studies special issues relevant to government and politics. Topics announced in advance. Examples include politics and the arts, ethnic conflict and the political system, gender politics, and changing dynamics in political institutions.

Prerequisite(s): GOVT 103.

Notes: May be repeated for a maximum of 9 credits when topic is different with permission of department.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GOVT 322 - International Relations Theory

Credits: 3 (NR)
Advanced inquiry into international relations. Studies theories, concepts of international relations, and major forces and issues in international politics.

Prerequisite(s): GOVT 132 or 133.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GOVT 323 - Classical Western Political Theory

Credits: 3 (NR)
Lectures, discussions of developments in Western tradition of political thought from time of Greek city-state to late medieval Christendom. Topics include nature and purpose of politics, relationship between individual and state, political significance of
religion and tradition, and concept of natural law.

Prerequisite(s): GOVT 101, or 3 credits of philosophy.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GOVT 324 - Modern Western Political Theory

Credits: 3 (NR)
Lectures, discussions of developments in Western tradition of political thought from Renaissance to mid-19th century. Topics include rise of individualism in political theory, early developments in social contact theory, theories of radical popular sovereignty, and early criticisms of liberal theory.

Equivalent to PHIL 324

Prerequisite(s): GOVT 101, or 3 credits of philosophy.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GOVT 327 - Contemporary Western Political Theory

Credits: 3 (RT)
Lectures, discussions of developments in Western tradition of political thought from mid-19th century to today. Different sections focus on various political theories that have been influential during this period, such as liberal, libertarian, conservative, communitarian, Marxist, feminist, and postmodern thought.

Equivalent to PHIL 327

Prerequisite(s): GOVT 101, or 3 credits of philosophy.

Notes: May be repeated for a maximum of 12 credits when topic is different.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GOVT 328 - Non-Western Political Theory

Credits: 3 (NR)
Theory and history of political community, governance, and development as understood by various non-Western societies, including China, Japan, India, Africa, and Islamic World; relations to Western tradition; methodology of studying other cultures; postcolonial theories; and cultural politics on contemporary globalization.

Prerequisite(s): GOVT 101 or 133.

Notes: Fulfills the college requirement in non-Western culture.
GOVT 329 - Issues in Political Theories and Values

Credits: 1-3 (RT)
Studies special issues relevant to theoretical and value aspects of government and politics. Topics announced in advance. Examples include ethics and politics, ethics and environmental policy, changing perspectives on civil rights and liberties, religion and politics, and changing views of public space.

Prerequisite(s): GOVT 103.

Notes: May be repeated for a maximum of 9 credits when topic is different with permission of department.

GOVT 331 - Government and Politics of Latin America

Credits: 3 (NR)
Contemporary political systems of Latin America, with emphasis on institutions, political processes, and political behavior. Presents case studies of several key Latin American politics; discusses problems of political development.

Prerequisite(s): GOVT 132, 133.

GOVT 332 - Government and Politics of the Middle East and North Africa

Credits: 3 (NR)
Societies of Middle East and North Africa and their response to impact of internal sociocultural-political determinants and external forces. Focuses on contemporary politics, ideologies, popular manifestations, institutions, and operations.

Prerequisite(s): GOVT 132, 133.

Notes: Fulfills the college requirement in non-Western culture.

GOVT 333 - Government and Politics of Asia
GOVT 334 - Government and Politics of Europe

Credits: 3 (NR)
Contemporary democratic political systems of Europe, with emphasis on political processes, institutions, and behavior. Presents case studies of key European policies. Discusses problems of multiparty systems, coalition governments, Eurocommunism, and stability and change in postindustrial societies.

Prerequisite(s): GOVT 132, 133.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GOVT 336 - Political Development and Change

Credits: 3 (NR)
Process of political development and change in context of modernization and industrialization. Examines patterns of political development, with emphasis on developing world.

Prerequisite(s): GOVT 132, 133.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GOVT 337 - Ethnic Politics in Western Europe and North America

Credits: 3 (NR)
Studies resurgence of ethnic nationalism in industrial democracies of Western Europe and North America, and the comparative analysis of policy issues related to ethnonationalism. Case studies drawn from the industrial democracies.

Prerequisite(s): GOVT 132, 133.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
GOVT 338 - Government and Politics of Russia

Credits: 3 (NR)
Examines continuity and change in Russia's Soviet era and post-Soviet era politics and international relations.

Prerequisite(s): GOVT 132, 133.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GOVT 339 - Issues in the Politics of Advanced Industrial Societies

Credits: 1-3 (RT)
Studies selected current political issues in industrial democracies of Western Europe and North America. Specific topics chosen each semester to reflect contemporary political concerns in these countries, but political process in advanced industrial countries is organizing principle throughout the course.

Prerequisite(s): GOVT 103 or 133, or permission of instructor.

Notes: May be repeated for a maximum of 9 credits when topic is different.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GOVT 340 - Central Asian Politics

Credits: 3 (NR)
Comparative examination of political change in Central Asia with attention to national identity formation, political economy, political conflict, political Islam, and democratization.

Notes: Fulfills the college requirement in non-Western culture.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GOVT 341 - Chinese Foreign Policy

Credits: 3 (NR)
Discusses theories and practices of Chinese foreign policy decision making, which are then used to understand China's relations with United States, Japan, Russia, Europe, and its Asian neighbors, and China's policy in issues such as human rights, environmental protection, and nuclear nonproliferation.

Prerequisite(s): GOVT 132, 133.

Notes: Fulfills the college requirement in non-Western culture.
GOVT 342 - Diplomacy

Credits: 3 (NR)

Prerequisite(s): GOVT 132, 133.

GOVT 343 - International Political Economy

Credits: 3 (NR)
Introduces international political economy. Examines interplay of economics and politics, and applies these to different issues. Focuses on issues of contemporary significance, with attention to historical issues and basic political and economic concepts.

Prerequisite(s): GOVT 132, 133; or permission of instructor.

GOVT 344 - American Foreign Policy

Credits: 3 (NR)
Central issues surrounding the conduct of America's foreign relations, with special emphasis on structural and constitutional questions, national policy objectives abroad, and conduct of foreign policy in a democracy.

Prerequisite(s): GOVT 132, 133.

GOVT 345 - Political Islam

Credits: 3 (NR)
Covers politics of religion in Muslim societies; history, ideology, and practices of key individuals, movements, and institutions; case studies of political Islam in the Middle East, Asia, Africa, and the West; plurality and diversity of political expression in Muslim world; nature of democracy in Islam; and Islamic state.

Notes: Fulfills the college requirement in non-Western culture.
GOVT 346 - American Security Policy

Credits: 3 (NR)
Approaches U.S. National security policy from perspective of organization and implementation of specific policies. Applies theoretical concerns to historic cases to illuminate problems that continue to challenge country.

Prerequisite(s): GOVT 132, 133

GOVT 347 - International Security

Credits: 3 (NR)
Explores enduring security problems and new developments. Examines effects of international system on defense policies of states, particularly tensions of world caught between emerging interdependence and national demands. Encourages development of critical-thinking and group and oral presentation skills.

Prerequisite(s): GOVT 132.

GOVT 351 - Administration in the Political System

Credits: 3 (NR)
Administrative structures and processes in political setting of public management. Presents organization and administrative theory, critiques, and current practices; and examines impact of changes in social, political, and economic environment on concepts, models.

Prerequisite(s): GOVT 103.

GOVT 353 - Social Entrepreneurship

Credits: 3 (NR)
Introduces students to the different steps that social entrepreneurs work through to drive social change: identifying problem to address, developing a strategy to address the social need, fundraising, growing the organization, tracking results, and maximizing
GOVT 354 - Third-Party Government and the Nonprofit Sector

Credits: 3 (NR)

Introduces students to the concept of third-party government and the new realities of governments employing networks of public and private actors to orchestrate the production of public goods and services. Also explores the role of nonprofit organizations as the most prominent "third parties" that governments heavily depend on in social welfare provision.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GOVT 355 - Public Personnel Administration

Credits: 3 (NR)

Analyzes techniques and tools in human resource management including merit system, classification, compensation, evaluation, recruitment, and labor relations. Emphasizes current legal and policy issues in personnel administration, such as diversity and privatization.

Prerequisite(s): GOVT 351.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GOVT 356 - Public Budgeting and Finance

Credits: 3 (NR)

Covers tools and techniques in budgeting and financial management in U.S. governments, including management of public financial institutions, budgetary process and reform, and relationship of public budgeting to national economic policy.

Prerequisite(s): GOVT 351.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GOVT 357 - Urban Governance and Planning

Credits: 3 (NR)

Framework, subject matter, uses, methods, administration, and future of public planning. Emphasizes setting goals, defining
objectives, and choosing between program alternatives. Discusses political and bureaucratic constraints, and problems of implementation. Planning illustrations may be drawn from various levels of government.

Prerequisite(s): GOVT 351.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GOVT 358 - Nonprofit Financial Planning

Credits: 4 (NR)
Provides understanding of social mission and entrepreneurial cross pressures underlying financial planning and accounting in nonprofit sector. Topics include revenue sources and projections, entrepreneurial techniques, and cost analysis for nonprofit and nongovernmental entities. Lectures, student case studies.

Prerequisite(s): 60 credits or permission of instructor

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 1

GOVT 359 - Computers in Public Management

Credits: 3 (NR)
Applies computer-based techniques to management information in public sector. Focuses on the logic and implementation of computer applications, internet technology, web development, security, and mobile apps.

Prerequisite(s): GOVT 300.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GOVT 361 - Introduction to Environmental Policy

Credits: 3 (NR)

Environmental politics and policy making since the 1970s. Primarily U.S. focus, with some discussion of global issues. Examines policy strategies and outcomes, ethical and economic debates, political controversies, lawmaking and enforcement, and role of key players.
Designated a Green Leaf Course.

Equivalent to EVPP 361

Prerequisite(s): 30 credits

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
GOVT 362 - Intermediate Environmental Policy

Credits: 3 (NR)
Examines environmental issues building on learning objectives from GOVT 361. Focuses on environmental and policy issues in the US and internationally, exploring the politics of nature and the interaction of environmental science and politics and resulting controversy. Risk and uncertainty loom large in most environmental issues. Covers "natural" disasters as well as direct "man-made" problems.

Prerequisite(s): EVPP 361 or GOVT 361 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

GOVT 364 - Public Policy Making

Credits: 3 (NR)
Processes, agencies, and politics involved in the proposal making, implementation, evaluation, and revision of U.S. public policy.

Prerequisite(s): GOVT 103.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GOVT 365 - State and Regional Public Policy

Credits: 3 (NR)
Examines public policy decisions that affect local and state jurisdictions in context of federal system of government. Examines context, substance, and impact of such policies as housing, transportation, land use, crime prevention, service delivery, and health care.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GOVT 366 - Public Policy Analysis

Credits: 3 (NR)
Methods of public policy analysis, evaluation, and research. Studies design and development of alternative courses of government action and evaluation of results, and problems in applying systematic analysis to political issues.

Prerequisite(s): GOVT 300.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
GOVT 367 - Money, Markets and Economic Policy

Credits: 3 (NR)
Applies basic economic concepts and principles to issues facing the U.S. and global economies. Topics include productivity and economic growth, taxes, health care, globalization, income distribution and financial crises, with an emphasis on market structure, social institutions and the not-always rational behavior of investors and consumers.

Fulfills Mason Core requirement in social and behavioral science.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GOVT 398 - Study Abroad

Credits: 3 (RT)
Study abroad. Course topics, content, and locations vary.

Notes: GOVT 398 may only be applied to a major or minor with prior written approval from the department. A maximum of 6 credits may be applied to the BA in government and international politics, the BS in public administration, or any minor offered by the Department of Public and International Affairs.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GOVT 399 - Research Practicum in Public and International Affairs

Credits: 1-3 (RD)
Applies research methods in context of assisting with faculty research. Individualized sections taught by arrangement with full-time faculty. Methods adopted vary, but generally include library research, data collection, data analysis, and report construction.

Prerequisite(s): GOVT 300, and permission of instructor

Notes: May be repeated for a maximum of 6 credits.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0

GOVT 407 - Law and Society

Credits: 3 (NR)
Explores relationship between law and society, including concept of law; origin, development, and role of law in society; and relationship between law and social change. Assesses different approaches and methodologies.

Prerequisite(s): CRIM 100 or GOVT 301.
**GOVT 409 - Virginia Government and Politics**

Credits: 3 (NR)
Examines history of politics in Virginia and current political issues. Particular attention to changing dynamics of political parties, key legislative issues, and policies of recent administrations.

**Prerequisite(s):** GOVT 103.

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0

**GOVT 412 - Politics and the Mass Media**

Credits: 3 (NR)
Responsibilities and freedoms of mass media in democracy. Explores Influence of media on citizens' opinions, elections, and decisions of public officials.

Equivalent to COMM 412

**Prerequisite(s):** GOVT 103.

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0

**GOVT 414 - Politics of Race and Gender**

Credits: 3 (NR)
Examines political, economic, and social impact of public policies and implications for race, gender, and age.

**Prerequisite(s):** GOVT 103.

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0

**GOVT 420 - American Political Thought**

Credits: 3 (NR)
Major political values and theories in America from formation of American republic to present. Covers changes in American political values in crisis periods and contemporary American political theory including pluralism, elite theories of democracy, and empirical political theory.
GOVT 421 - Contemporary Political Ideologies

Credits: 3 (NR)
Studies political ideologies that shape values, beliefs, and actions of contemporary regimes and political movements. Topics include liberalism, conservatism, socialism, communism, and fascism in theory and contemporary practice; and totalitarianism and nationalism in postindustrial and developing societies.

GOVT 422 - Constitutional Interpretation

Credits: 3 (NR)
Examines Supreme Court's interpretation of constitutional powers of Congress, presidency, and judiciary. Includes examination of major decisions concerning state regulation, taxation, and interstate relations.

Prerequisite(s): GOVT 103.

GOVT 423 - Constitutional Law: Civil Rights and Liberties

Credits: 3 (NR)
Studies First Amendment freedoms of speech, press, assembly, association, and religion; right to privacy; and Fourteenth Amendment equal protection.

Prerequisite(s): GOVT 103.

GOVT 427 - Feminist Political Thought

Credits: 3 (NR)
Explores feminist political thought in historical context. Topics include feminist political movements, feminist critiques of political philosophy, and feminist contributions to political theory.
Prerequisite(s): GOVT 101, WMST 200, 3 credits of philosophy, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**GOVT 428 - Advanced Democratic Theory**

Credits: 3 (NR)
Explores various theoretical approaches to nature and justification of democracy. Topics may include liberal, communitarian, pluralist, and deliberative theories and their critics; constitutionalism; role of markets; and transnational democracy.

Equivalent to PHIL 428

Prerequisite(s): GOVT 101 or one course in philosophy

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**GOVT 430 - Comparative Political Leadership**

Credits: 3 (NR)
Comparative political leadership, relationships between political cultures and types of leadership, patterns of leadership recruitment, and linkages between political elites and citizenry.

Prerequisite(s): GOVT 132, 133.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**GOVT 432 - Political Change and Social Development in Sub-Saharan Africa**

Credits: 3 (NR)
Examines relationship of culture, history, ethnicity, and religion, and contemporary political and socioeconomic developments in Africa. Special attention to implications of ethnic conflict for nation-building in the post-Cold War period, and strategies for resolving conflicts.

Prerequisite(s): GOVT 132, 133.

Notes: Fulfills the college requirement in non-Western culture.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**GOVT 433 - Political Economy of East Asia**
Credits: 3 (NR)
Discusses different theoretical perspectives of East Asian political economy; transformation of East Asia; and issues such as money, finance, trade, investment, environment, and energy. Focuses on issues of contemporary significance, but attention also given to history.

Prerequisite(s): GOVT 133 and 60 credits, or permission of instructor.

Notes: Fulfills the college requirement in non-Western culture.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GOVT 434 - Democracy in Global Perspective

Credits: 3 (NR)
Comparative study of structures and performance of democracies around the world since 1975. Examines growing influence of global forces such as economy, media, and culture in process of democratization. Examines select current elections.

Prerequisite(s): GOVT 133.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GOVT 443 - Law and Ethics of War

Credits: 3 (NR)
Explores sources of morality in armed conflict, and implications of such ideas for international relations. Examines content and philosophy of modern law of war.

Prerequisite(s): GOVT 132.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GOVT 444 - Issues in International Studies

Credits: 1-3 (RT)
Major issues in international systems, including international political economy and security.

Prerequisite(s): GOVT 132, 133.

Notes: May be repeated for a maximum of 9 credits when topic is different with permission of department.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

George Mason University 2014-2015 Official University Catalog 2541
GOVT 445 - Human Rights

Credits: 3 (NR)
Explores philosophical, legal, and political issues at heart of modern international human rights movement. Examines historical background legal architecture of modern human rights movement.

Prerequisite(s): GOVT 132.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GOVT 446 - International Law and Organization

Credits: 3 (NR)
Nature, sources, and subject of law of nations; law and individual; territorial questions; nature, sources, and functions of international organizations; international transactions and organizations; war and present; and future status of international law.

Prerequisite(s): GOVT 132, 133.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GOVT 447 - Revolution and International Politics

Credits: 3 (NR)
Historical overview of modern revolutions as well as different theories about causes and consequences of revolutions. Special attention to Marxist-Leninist, Arab nationalist, and Islamic revolutions.

Prerequisite(s): GOVT 133.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GOVT 448 - Ethics and International Politics

Credits: 3 (NR)
Ethics and international politics ask students to wrestle with dilemmas raised by a desire to behave morally in an international system in which consensus about ethical matters is absent. Distributive justice and use of force are two overarching themes. Students also develop, apply, and justify their own perspectives on ethical problem using philosophical theory, history, and social science research.

Prerequisite(s): 60 credits, and GOVT 132 or PHIL 151.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
GOVT 452 - Administrative Law and Procedures

Credits: 3 (NR)
Law of public office. Studies procedures followed by and the legal limits on administrative agencies and their officers and employees.

Prerequisite(s): GOVT 351.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GOVT 460 - Surveillance and Privacy in Contemporary Society

Credits: 3 (NR)
Philosophical perspectives, historical context, technological developments, and institutional changes that surround controversies about privacy and surveillance in contemporary society. Explores public and private institutions doing surveillance, how they calculate and manage risk, and legal constraints on surveillance activities.

Prerequisite(s): CRIM 100.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GOVT 464 - Issues in Public Policy and Administration

Credits: 1-3 (RT)
Analyzes selected policy issues in administering public policies. Topics announced in advance. Examples include environmental policy, government regulation, federal mandates, state policy, and regional policy.

Prerequisite(s): GOVT 103 plus 60 credits.

Notes: May be repeated for a maximum of 9 credits when topic is different with permission of department.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GOVT 467 - Current Issues in Economic Policy

Credits: 3 (NR)
Applies basic concepts of economics, political science and ethics to some of the most pressing issues facing the U.S. and global economies. Topics include productivity and economic growth, taxes, soaring costs for health care and higher education, globalization, income inequality, financial crises, the size of government and the proper role of regulation.

Prerequisite(s): Open to PPE concentrators or permission of instructor.
GOVT 469 - Philosophy, Politics, and Economics

Credits: 3 (NR)
Covers issues in the philosophy, economics, and political science of institutions, information, and collective action. Through case studies of existing legal and political institutions, applies the insights to problems in politics, policy making, social theory, and social, moral, and political philosophy. (Specific content varies).

Equivalent to PHIL 460, ECON 460.

Prerequisite(s): PHIL 358, ECON 412, and GOVT 467, or permission of instructor.

GOVT 470 - Faith and Reason in the Making of the Modern Mind

Credits: 3 (NR)
Investigates the interlocking claims of religious faith and human reason in Western culture, from Biblical times to the present. First covers tightly focused reading assignments in theology and philosophy, and second covers particular case studies, from Galileo to the Intelligent Design debate.

GOVT 471 - Millennialism and Philosophies of History in Western Culture

Credits: 3 (NR)
Is there purpose in human history? Are we really going anywhere as humanity moves through time? This seminar studies major patterns by which thinkers in the West have discerned meaning in humanity's temporal existence. Extends from the Jewish roots of historical understanding, through Christian millennialism, to contemporary naturalism.

GOVT 472 - Christianity, Secularism, and Democracy

Credits: 3 (NR)
Examines the evolving relationship between religion and the American political order, from the Reformation to George W. Bush.
GOVT 480 - Internship

Credits: 3 (RT)
Approved internships with specific employer. Programs relate in some capacity to government, politics, public policy, or the law. Students develop individual contracts defining learning and competencies they plan to gain from the experience. For 3 credits, a minimum of 135 hours is required.

Prerequisite(s): GOVT 101, 103, 132, 133

Notes: Contact the department one semester before enrolling. A maximum of 6 credits of GOVT 480 may be applied to a degree in government and international politics or in public administration. 3 of those credits may be applied to requirements for the major (to the advanced government field requirement for the BA in government and international politics) with prior approval of the internship coordinator. A maximum of 3 additional credits may be used for general elective credit toward the 120 credits required for the bachelor's degree.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
Grading: Satisfactory/No Credit.

GOVT 490 - Synthesis Seminar

Credits: 3 (NR)
Readings, individual or group projects, and discussion of papers reflecting on connections between liberal arts and sciences and political world.

Fulfills Mason Core requirement in synthesis.

Fulfills writing intensive requirement in the major.

Prerequisite(s): Completion or concurrent enrollment in all other required Mason Core courses, GOVT 300, and 18 credits in major.

Notes: Students may not receive credit for 490 more than once.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GOVT 491 - Honors Seminar

Credits: 3 (NR)
Readings, individual or group projects, and discussions of seminar papers.

Fulfills Mason Core requirement in synthesis.

Fulfills writing intensive requirement in the major.

Prerequisite(s): GOVT 300 and 18 credits in major.
Notes: Subject varies.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GOVT 496 - Directed Readings and Research

Credits: 1-3 (RT)
Reading and research on specific topic under direction of faculty member.

Prerequisite(s): Major in government and international politics with 90 credits and permission of instructor and department.

Notes: Written report required; oral report of research may be required. May be repeated for a maximum of 6 credits.

Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 0

GOVT 500 - The Scientific Method and Research Design

Credits: 3 (NR)
Grounds students in the principles of the scientific method as the framework for investigating all research questions in political science, whether qualitative or quantitative in character (or both). Focus is on sound and rigorous research design.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GOVT 510 - American Government and Politics

Credits: 3 (NR)
Examines institutions and processes of American government, including separate institutions of power in national government, theory and practice of federal system, role of interest groups and political parties, and effects of media and public opinion on electoral behavior and policy making. Seminar examining normative and empirical research.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GOVT 511 - Problem Solving and Data Analysis I

Credits: 3 (NR)
Introduces fundamental statistical and quantitative techniques for analyzing social science data rigorously and soundly. Focuses on problem definition, research design, and problem solving under conditions of uncertainty in political science.

Equivalent to PUAD 511; GOVT 711 (2011-2012 Catalog)
Prerequisite(s): GOVT 500 and passing grade on screening exam.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GOVT 520 - Political Theory

Credits: 3 (NR)
Analyzes selected major works of ancient, modern, or contemporary political theory that illuminate basic problems and questions for people engaged in political or civic life. Examines justice, liberty, equality, autonomy, rights, obligation, participation, and nature of politics.

Prerequisite(s): Admission to the MA in political science or permission of department.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GOVT 530 - Comparative Politics

Credits: 3 (NR)
Examines fundamental issues in comparative politics and provides broad coverage of the central themes under study. Designed to help students think theoretically and critically about the study of comparative politics, its scientific objectives, and its epistemological assumptions. Within this context, students will look at concepts and approaches, as well as important theories and debates that characterize the subfield. Helps prepare students for qualifying exams in comparative politics.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GOVT 540 - International Relations

Credits: 3 (NR)
Focuses on changing structure of international politics, post-Cold War security issues, effect of globalized economy and information technology revolution, enhanced role of global corporations and nongovernmental organizations, and rise of nonsecurity issues in emerging international agenda.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GOVT 541 - Introduction to Critical Analysis and Strategic Response to Terrorism

Credits: 3 (NR)
Introduces terrorism as a complex threat to human security. Focuses on tools for analyzing terrorism and the underlying sources and conditions that contribute to it. Considers similarities and differences between terrorism and other threats to human security.
Explores the lessons learned in the history of responding to terrorism. Focuses not only on different tactics of response, but also includes how different types of societies (dictatorship, democracies, etc.) have responded to terrorism and what the results of those responses have been. Includes case studies of responses to terrorism.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**GOVT 550 - Seminar in Theories of Public Administration**

Credits: 3 (NR)
Reviews the theoretical traditions in American public administration, from the earliest days of the founding to the present. Concludes with consideration of contemporary theoretical debates over the proper role of public administrators and controversies about conflicting demands made on the public service and the public sector.

Prerequisite(s): GOVT 510.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**GOVT 603 - Seminar in the Courts and Constitutional Law**

Credits: 3 (NR)
Analyzes role, influence, and effects of U.S. courts in creating constitutional legal norms and interpreting them. Special attention to First and Fourteenth Amendments and Commerce Clause. Lecture and discussion; students expected to read and analyze leading court cases.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**GOVT 604 - Seminar on Congress and Legislative Behavior**

Credits: 3 (NR)
Examines theories and empirical research on the U.S. Congress and legislative behavior, including elections, representation, structures, and processes. Also examines Congress' impact on the design and implementation of public policy, interactions with other branches of government, and comparisons with parliamentary systems.

Prerequisite(s): GOVT 510.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**GOVT 605 - Seminar on the Presidency**
Credits: 3 (NR)
Examines the American presidency from a number of substantive and methodological perspectives. Readings and discussions in the course appraise the presidency within the system and focus on the role the presidency plays in formulating and implementing public policy.

Prerequisite(s): GOVT 510.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GOVT 631 - Seminar in Comparative Politics and Institutions

Credits: 3 (RT)
Examines theories and practices of governance and development in comparative national settings. Course explores key subsets of the comparative politics literature in depth, including institutional change, regime types and transitions, democracy and authoritarianism, states and state-society relations, revolution, social movements, political cultures, and methods. Course is explicitly conceptual and cross-regional.

Notes: May be repeated for a maximum of 9 credits when topic is different.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GOVT 640 - Strategic Responses to Terrorism: Coordinated Decision Making

Credits: 3 (NR)
Revisits, expands, and examines the critical themes developed in the terrorism certificate program. Provides students with the opportunity to apply the theoretical concepts developed in practice. Integrates the ideas, theories, and practices considered in this track within the larger field of terrorism analysis and strategic responses to this threat.

Corequisite(s): GOVT 541

Notes: This is the capstone course for the terrorism certificate program and must be completed in the final semester of the certificate program.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GOVT 641 - Global Governance

Credits: 3 (NR)
Applies systems approach to understanding global politics. Emphasizes properties and functions of global systems such as population, food, disease, energy, and trade, and how world's political systems interact with them. Discusses how governance at municipal, national, and international levels affected by global systems. Examines role of nongovernmental organizations in global affairs.

Prerequisite(s): GOVT 540.
GOVT 706 - Federalism and Intergovernmental Relations

Credits: 3 (NR)
Examines broad trends in governance, including theory and practice of federal, state, and local governments. May include privatization, devolution, mandating, regulatory reform, and comprehensive federalism reform.

Prerequisite(s): GOVT 510.

GOVT 712 - Problem Solving and Data Analysis II

Credits: 3 (NR)
Advanced techniques and skills for solving policy-related problems or analyzing political data. Focuses on data gathering and analysis, use of statistical software, and multivariate analysis.

Prerequisite(s): GOVT 511.

GOVT 713 - The Constitution, Criminal Procedure, and Security

Credits: 3 (NR)
Explains legal doctrines that form basis of U.S. constitutional procedural rights, how these doctrines develop, and why courts rule as they do. Evaluates strengths, weaknesses of these rights.

Prerequisite(s): CRIM 720/GOVT 728, or permission of instructor.

GOVT 717 - Qualitative Methods

Credits: 3 (NR)
Focuses on scientific design of qualitative research questions and use of specific qualitative methods in scientific analysis. Covers when and how to use qualitative research methods to answer empirical questions in political science; primary data collection methods (interviews, observations, document review); the appropriateness of different research approaches; procedural and ethical concerns that may arise in use of qualitative methods.
**GOVT 719 - Issues in American Politics**

Credits: 3 (RD)
Examines significant issue in American politics and political behavior. Analyzes topic of contemporary and emerging concern.

**Prerequisite(s):** GOVT 510.

**Notes:** May be repeated for a maximum of 6 credits when topic is different.

**GOVT 725 - Democratic Theory**

Credits: 3 (NR)
Examines democracy in terms of versions of liberalism, theories of social capital and civic participation, and discourses about civil, political, and human rights. How is democracy conceptualized normatively and empirically? What underlying economic, social, and cultural conditions promote democracy? What role do institutions play in creating and sustaining a stable democratic society? Takes a broadly comparative perspective, focusing on variety of established and emerging democracies around the world. Elective for students specializing in American government or international politics and comparative governments.

**GOVT 726 - Theories of Justice**

Credits: 3 (NR)
Overview of ancient and modern theories of justice with application to contemporary issues involving justice system and other social and political institutions.

**GOVT 727 - Restorative Justice**

Credits: 3 (NR)
Origins of restorative justice, its principles, implications for different justice organizations and processes, and application to problems such as family violence, human rights, and reconciliation following mass victimizations.
**Prerequisite(s):** CRIM 700, GOVT 726, or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**GOVT 728 - Behavior of Law**

Credits: 3 (NR)  
Examines development of law, and law's effect on human behavior. Reviews theories of law's meaning and aims. Examines construction of law, and investigates consequences of law and legal decisions.

Equivalent to CRIM 720

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**GOVT 731 - Advanced Seminar in Comparative Politics**

Credits: 3 (RT)  
Assumes basic proficiency in comparative analysis. Regionally based examination of key debates in the comparative politics field. Key theoretical and methodological debates are addressed through in depth examination of regional political processes. Regions include Latin America, Asia, Middle East, European Union, Africa, and Russia.

**Prerequisite(s):** GOVT 530.

**Notes:** May be repeated for a maximum of 6 credits when topic is different with permission of department.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**GOVT 732 - Comparative Justice**

Credits: 3 (NR)  
Survey of justice systems and their environments in different lands and cultures. Identifies commonalities and differences among justice systems, evaluates them, and considers policy implications.

**Prerequisite(s):** CRIM 700/ GOVT 726, or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**GOVT 733 - Islam and Politics**
Credits: 3 (NR)
Provides an overview and understanding of the multifaceted nature of political Islam in the contemporary world. Covers brief history of Islam, formation of modern states in the post-colonial Muslim world, nature of contemporary Islamic radicalism and militancy and the future of Islamism.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GOVT 734 - Democratization

Credits: 3 (NR)
Examines concepts and concrete cases of democratization and cases where democratization is absent or incomplete. Investigates methods for measuring democracy and authoritarianism; the role state and society play in political change; the effects religion, the military, ethnic division, and technology have on government reform; and the extent to which international actors can encourage democratization.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GOVT 735 - Comparative Public Management

Credits: 3 (NR)
Examines the comparative decision environments for public managers and policy elites in the OECD countries generally, focusing on four models: 1) Franco-Japanese model, 2) German concentration model, 3) "Anglo-Saxon" (United States) model, 4) Chinese model.

Notes: May apply to elective credit in the fields of comparative politics and public administration.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GOVT 739 - Issues in Comparative and International Politics

Credits: 3 (RT)
Explores issues of contemporary and emerging concern in comparative and international politics.

Prerequisite(s): GOVT 540.

Notes: May be repeated for a maximum of 6 credits when topic is different.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GOVT 741 - Advanced Seminar in International Politics
Credits: 3 (RT)
Examines theoretical and methodological issues central to study of international relations by focusing on specific topic: American foreign policy, diplomacy, international law and organization, international relations theory, international ethics, human rights and humanitarian intervention, the environment, and others.

Prerequisite(s): GOVT 540.

Notes: May be repeated for a maximum of 9 credits when topic is different with permission of department.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GOVT 742 - International Negotiation

Credits: 3 (NR)
Examines frameworks and perspectives that have guided scholarly work on negotiation. Students will analyze complex cases of negotiations in the areas of security, trade, and the environment, and practice negotiating key security and environmental issues on the agendas of nations and international organizations.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GOVT 743 - International Political Economy

Credits: 3 (NR)
Examines interplay of international politics and economics. Discusses theoretical perspectives and analytical tools in academic field of international political economy, and applies theories and tools to trade, investment, exchange rates, development, regionalization, and globalization. Explores how international economic and political forces increasingly shape domestic interests, and how domestic politics affect international political economy. Lecture, discussion.

Prerequisite(s): GOVT 343 or equivalent.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GOVT 744 - Foundations of Security Studies

Credits: 3 (NR)
Introduces students to a selection of the original sources of the most important ideas that form the basis of security studies as a subfield of political science.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GOVT 745 - International Security
Credits: 3 (NR)
Examines interplay of international politics and international security. Discusses theoretical perspectives and analytical tools in academic field of international security, and applies theories and tools to nuclear, biological, and chemical weapons, strategy and defense, and arms control. How domestic issues affect defense policies, terrorism, changing nature of international conflict, and human security will be examined.

Prerequisite(s): GOVT 540.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GOVT 746 - Media and International Affairs

Credits: 3 (NR)
Examines government/media interaction and media coverage of war and foreign policy since Vietnam and considers a range of critical policy questions.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GOVT 753 - Third-Party Governance

Credits: 3 (NR)
Examines design and management of government programs that rely on other levels of government and the private sector for delivery, with focus on such governmental tools as contracts, grants, loans, regulation, and tax credits.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GOVT 755 - Seminar in Politics and Bureaucracy

Credits: 3 (NR)
Explores research and theory on political causes and effects of actions of government bureaucratic agencies. Readings examine origins of agencies, influences on decisions and programs, sources of internal and external accountability, pathologies of bureaucracies, and contributions bureaucracies make on effective and just governance.

Prerequisite(s): GOVT 510.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GOVT 758 - Homeland/Transportation Security Administration
Credits: 3 (NR)
Examines the terrorist attacks of 9/11, vulnerabilities of the aviation security at that time, failure of elected officials and administrators to act more decisively to improve security before 9/11, and the policy and administrative responses to the 9/11 attacks, including the creation of the Transportation Security Administration and the Department of Homeland Security. Includes the development of radical Islam and the rise of Osama bin Laden and Al Qaeda.

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0

**GOVT 759 - Issues in Public Administration and Management**

Credits: 1-3 (RD)
Current issues in administration and management of public organizations in contemporary American government. Includes practical applications of theories and analysis to managerial problems. Emphasizes competence in improving management in selected government settings.

**Notes:** May be repeated for a maximum of 6 credits when topic is different.

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0

**GOVT 794 - Internship**

Credits: 1-6 (RT)
Work-study program with specific employers.

**Prerequisite(s):** Admission to graduate program and 12 credits.

**Notes:** Contact internship coordinator one semester before enrollment. Credit determined by department. May be repeated for a maximum of 6 credits.

**Hours of Lecture or Seminar per week:** 1-3
**Hours of Lab or Studio per week:** 0
**Grading:** Graduate Special

**GOVT 796 - Directed Readings and Research**

Credits: 1-6 (RT)
Reading and research on specific topic under direction of faculty member.

**Prerequisite(s):** 15 credits of GOVT courses at 500 level and above, and permission of instructor.

**Notes:** Written paper required.

**Hours of Lecture or Seminar per week:** 1-3
**Hours of Lab or Studio per week:** 0
**GOVT 798 - Political Science Research Project**

Credits: 3 (NR)
Research project related to student's concentration under supervision of a faculty advisor. Student produces substantial and original contribution to political science knowledge on model of article in scholarly journal.

**Prerequisite(s):** 24 credits.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**Grading:** Graduate Special

**GOVT 799 - Political Science Thesis**

Credits: 1-6 (RT)
Substantial and original research paper with guidance of faculty advisor. Thesis proposal must be approved in advance by advisor and two faculty members who comprise thesis committee. Completed research must be approved by committee and defended publicly in oral presentation.

**Prerequisite(s):** 24 credits, and approval of thesis proposal.

**Hours of Lecture or Seminar per week:** 1-4  
**Hours of Lab or Studio per week:** 0  
**Grading:** Satisfactory/No credit only

**GOVT 800 - PhD Research Seminar**

Credits: 3 (NR)
Provides an opportunity for PhD students in political science to present and refine independent research, and to further improve understanding of social scientific method as they prepare for conference presentations, qualifying exams, and subsequent dissertations.

**Notes:** Open to PhD students in political science only.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Spring

**GOVT 810 - American Political Development**

Credits: 3 (NR)
Advanced graduate-level seminar on historical roots of American politics. Examines political culture and historical development of U.S. institutions, and how laws and programs have been affected by historical and cultural development.
Prerequisite(s): GOVT 510.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GOVT 811 - Advanced Seminar in American Institutions

Credits: 3 (RT)
Advanced graduate-level seminar on specific topics of contemporary research and theory in American governmental institutions. Topics vary to include presidential politics, Congress, and politics of the judiciary. Readings include classic and contemporary literature. Seminar format with discussion, student presentations.

Prerequisite(s): GOVT 510.

Notes: May be repeated for a maximum of 9 credits when topic is different.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GOVT 815 - Advanced Seminar in Political Behavior

Credits: 3 (RT)
Advanced graduate-level seminar on specific topics of contemporary research and theory in American political behavior. Topic varies to include political parties, electoral politics, public opinion and voting behavior, interest groups, and lobbying. Readings include classic and contemporary literature. Seminar format with discussion, student presentations.

Prerequisite(s): GOVT 510.

Notes: May be repeated for a maximum of 9 credits when topic is different.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GOVT 820 - Advanced Topics in Political Thought

Credits: 3 (RT)
Advanced graduate-level seminar on topics of contemporary research and theory in political thought. Topics vary to include political ideologies, feminist theory, and political theory. Seminar format with discussion, student presentations.

Prerequisite(s): GOVT 520.

Notes: May be repeated for a maximum of 9 credits when topic is different.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
GOVT 831 - Research Seminar in Regional Political Culture and Development

Credits: 3 (NR)
Advanced graduate-level seminar on theories of political culture and economic development applied to Middle East, Latin America, Asia, and Africa. Debates economic growth and development from broad and rigorous analytical base.

Prerequisite(s): GOVT 540.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GOVT 841 - Ethics and Human Rights in International Affairs

Credits: 3 (NR)
Seminar on ethical behavior in an international system in which consensus about ethical matters is absent. Overarching themes are distributive justice, human rights, and use of force. Students develop, apply, and justify their own perspective on an ethical problem using ethical theory and social science research.

Prerequisite(s): GOVT 540.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GOVT 843 - Diplomacy

Credits: 3 (NR)
Advanced graduate seminar on theory and practice of diplomacy; alliance construction and destruction; coercive and cooperative diplomacy; diplomacy of certain great powers such as America, Russia, China, France, and Japan, and small and revolutionary powers. Also examines diplomacy and the media, and day-to-day diplomacy.

Prerequisite(s): GOVT 540.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GOVT 850 - Advanced Seminar in Public Administration Research and Theory

Credits: 3 (RD)
Focuses on a topic of central concern in contemporary public administration research and theory. Content of the seminar varies but includes such topics as organizing for homeland security, managerial and political effects of e-government, or the application of principal-agency models in public management.

Prerequisite(s): GOVT 510, 650.

Notes: May be repeated for a maximum of 9 credits when topic is different.
GOVT 851 - Doctoral Seminar in Theories of Organization and Bureaucracy

Credits: 3 (NR)
Examines key issues in organization theory and behavior. Issues include organization design; interorganizational coordination, intelligence and decision making systems; leadership and motivation theories; and theories of organizations as agents of political and social change. Uses case studies.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GOVT 852 - Seminar in Political Leadership

Credits: 3 (NR)
Graduate seminar on theories and practices of political and governmental leadership in American and comparative settings. Domestic and comparative cases of leadership in state-building, presidency, and public administration. Primary or secondary research on leaders encouraged.

Prerequisite(s): GOVT 510.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GOVT 853 - Advanced Seminar in Global Innovations in Public Finance

Credits: 3 (NR)
Explores how financial decisions by government jurisdictions are affected by global competition and global markets. The impact of cross-national movements of capital and information on tax, tariff, and interest rate policies will be examined, as will the numerous organizations, such as the World Bank, that have been created to reduce the impact on developing nations. Government and supernational efforts to deal with the unintended consequences and global capital flows will also be examined.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GOVT 998 - Doctoral Dissertation Proposal

Credits: 3-6 (RT)
Work on research proposal that forms basis for doctoral dissertation.

Prerequisite(s): Advancement to candidacy.

Hours of Lecture or Seminar per week: 0
GOVT 999 - Doctoral Dissertation Research

Credits: 1-12 (RT)
Research on approved dissertation topic under direction of dissertation committee.

Prerequisite(s): Approval of dissertation proposal.

Notes: May be repeated for up to 9 credits in a semester, but no more than 15 total.

Graduate School of Management (GSOM)

Offered by the School of Management

GSOM 540 - Analysis of Financial Decisions

Credits: 3 (NR)
Provides a survey of financial decision-making. Assists students with developing a framework within which they can understand the linkages between financial decisions and organizational performance. Examines methods for using information based on financial statements in making decisions and assessing performance, evaluating investment opportunities, and choosing among alternative sources of funds. Focuses on public firms in the corporate sector as well as applications for privately-held companies and organizations in the government and non-for-profit sectors.

Prerequisite(s): Graduate admission or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GSOM 696 - Directed Studies in Graduate School of Management

Credits: 1-3 (RD)
Approval by faculty member and program director required prior to registration. Studies specialized topics in business not otherwise available in the curriculum.

Prerequisite(s): Permission of the program director.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0
GSOM 697 - Special Topics in Graduate School of Management

Credits: 1-3 (RT)
Sections established as necessary to focus on various topical issues that emerge in practice of business.

Prerequisite(s): Permission of the program director.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
Grading: Graduate Special.

GSOM 746 - Real Estate Analysis and Valuation

Credits: 3 (NR)
Overview of real estate assets, markets, and decisions. Emphasizes development of analytical techniques and information required for implementation. Includes legal, economic, and public policy perspectives.

Equivalent to MBA 746

Prerequisite(s): Graduate admission or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GSOM 747 - Real Estate Finance

Credits: 3 (NR)
Examines financing of residential and income-producing real estate from perspectives of both suppliers and users of funds. Focuses on financing alternatives, primary and secondary markets, and decision implications of available arrangements.

Equivalent to MBA 747

Prerequisite(s): Graduate admission or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GSOM 748 - Real Estate Investment

Credits: 3 (NR)
Develops frameworks for analyzing decisions about investing in real estate assets. Focuses on acquisition and analysis of information required to evaluate potential performance of assets. Applications of theories and techniques through case studies.

Equivalent to MBA 748
Prerequisite(s): Graduate admission or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

Greek (GREE)

Offered by the College of Humanities and Social Sciences

GREE 150 - Classical Greek I

Credits: 3 (NR)
Addresses linguistic, semantic, and cultural aspects. Covers basic structure and vocabulary, its place among other world languages and its unique role in development of modern thought.

Notes: Lectures, discussions supplemented by web-posted material.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GREE 160 - Classical Greek II

Credits: 3 (NR)
Expands proficiency, refines grasp of morphology and syntax, and fosters greater command of vocabulary. Introduces selected original passages from Greek classical authors.

Prerequisite(s): GREE 150 or permission of instructor.

Notes: Lectures, discussions supplemented by web-posted material.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

Health Administration and Policy (HAP)

Offered by the College of Health and Human Services

HAP 201 - Health Professions Careers

Credits: 3 (NR)
Acquaints students early in their college education with a variety of health professions careers. Provides overview of the health care system, and identifies the current supply and demand for health care professionals. Presents information about educational
and licensing requirements as well as expected salaries. Defines professionalism and outlines the principal rights and responsibilities of being a health care professional.

Equivalent to HHS 201 (2010-2011 Catalog)

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

HAP 202 - Medical Terminology

Credits: 3 (NR)
Prepares students with a basic understanding of medical terminology needed to work in a wide variety of healthcare environments.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Summer, Spring.

HAP 290 - Lifestyle Management through Systems Analysis

Credits: 3 (NR)
In this introductory course on practical application of Bayesian causal modeling techniques and Statistical Process Control tools, students make resolutions and analyze their progress toward goal achievement. Each student maintains a diary and analyses it using Bayesian causal modeling techniques to understand the constraints and causes leading to their success and failures. Students analyze their pattern of success using Statistical Process Control tools and engage cyclical assessment of their self improvements.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

HAP 301 - Health Care Delivery in the United States

Credits: 3 (NR)
Introduces history and current structure and function of U.S. health care delivery. Explores components and subsystems of health care, and sociopolitical (public and private) context that shapes system and affects access to health care and delivery of health services.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HAP 307 - Assisted Living/Senior Housing Management and Philosophy
Credits: 3 (NR)
Overview of growth of assisted living industry, its role in health care continuum, current or proposed regulatory environments, and differences between assisted living and other forms of senior health care and senior living services. Specific instruction provided in philosophy and day-to-day management of assisted-living communities, including resident care, operations, finance and budgeting, human resources and staffing, and successful marketing and community relations. Also examines industry future, including cutting-edge programs and technologies, and approaches to creating next generation of assisted-living services.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HAP 310 - Healthcare Ethics

Credits: 3 (NR)
Introduces current ethical ideas and issues in healthcare and the healthcare system. Case studies require students to apply critical thinking in ethical decision making situations encountered by healthcare professionals.

Prerequisite(s): HAP 301.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Summer, Spring.

HAP 312 - Healthcare Law

Credits: 3 (NR)
Introduces students to the legal environment in healthcare with emphasis on laws and regulations of routine importance to healthcare managers in the areas of labor, contracts, real estate, medical malpractice, general business, and intellectual property.

Prerequisite(s): HAP 301.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Summer, Spring.

HAP 360 - Introduction to Health Information Systems

Credits: 3 (NR)
An introduction to basic information management in health care service organizations. Provides an overview of health information systems for selected administrative functions and clinical care services, including electronic data interchange for billing and claims management, institutional approaches to ensuring data security and privacy, and information management and decision support for managers and clinicians.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
HAP 361 - Health Databases

Credits: 3 (NR)
Introduces students to the design and use of various health and healthcare databases, and provides hands-on experience with database design and use. Reviews database management systems. Examines the application of databases for both clinical and managerial purposes.

Prerequisite(s): HAP 360

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

HAP 392 - Human Resources Management in Healthcare

Credits: 3 (NR)
Exposes students to the major issues, laws, administrative processes, procedures, and psychological factors to be considered when developing a human resources management system in healthcare organizations.

Prerequisite(s): HAP 301.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Summer, Spring.

HAP 395 - Health Care Finance

Credits: 3 (NR)
Introduces finance in health care organizations. Reviews issues in reimbursement structures, regulatory mechanisms, cost control, and related factors affecting financial management of health service organizations including financial decision support skills.

Prerequisite(s): HAP 301

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HAP 396 - Strategic Health Management and Planning

Credits: 3 (NR)
Introduces past and present interventions that affect supply and demand for health care at community, state, regional, and national levels. Presents health planning and regulatory entities, and discusses strategic and program planning in context of current economic and market conditions.

Prerequisite(s): HAP 301
HAP 410 - Introduction to Health/Medical Practice Management

Credits: 3 (NR)
An introductory course in the leadership and management of ambulatory health service practices and small provider organizations. Content covers a variety of health/medical practice management functions, including administrative systems, operations and strategies for effective management of quality, efficiency and business performance (contracts and marketing), and human resources. Trends in practice integration and affiliations with multiprovider groups and larger enterprises will be covered.

Prerequisite(s): HAP 301

HAP 416 - Leadership and Management of Health Systems I

Credits: 3 (NR)
Introduces theoretical concepts and their application to the leadership and management of effective health care organizations. Explores the structure and function of health-related organizations and selected administrative and operational issues in program development and service design, emphasizing strategies for effective performance management, decision making, and communication.

Prerequisite(s): HAP 301. Completion of HAP 300-level course requirements.

HAP 417 - Leadership and Management of Health Systems II

Credits: 3 (NR)
Explores challenges to providing effective leadership and management of health care organizations and systems of care related to operational issues such as personnel management and labor relations, information management, conflict and goal alignment, financial management, accountability, and quality and safety improvement. Focuses on identification of management skills, technology, and strategy that influence optimal performance and communication between clinicians, administrative staff, and managers.

Prerequisite(s): Completion of HAP 416.

HAP 420 - Management of Project Resources
Credits: 3 (NR)
An introductory course in the management of project resources, including, but not limited to, assessing return on investment for projects and costing out resources needed in project subtasks. Includes hands-on application of project management tools as they are applied in the health-related organization and the health service industry. Also includes a variety of variables that may affect cost control and cost variation, including the impact of finishing projects in shorter time frames than originally planned and activity-based costing.

Prerequisite(s): HAP 360 and HAP 378

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HAP 425 - Health Economics and Policy

Credits: 3 (NR)
An introduction to the role of economics in health care policy. Concepts used by economists to analyze health outcomes, health behaviors, health care markets, health insurance markets, and the role of government. Concepts are linked to current health policy debates. Relevance and limits of the health economics approach to analyzing health issues are discussed.

Prerequisite(s): ECON 103

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring

HAP 430 - Process Improvement in Healthcare Organizations

Credits: 3 (NR)
Introduction to the process of quality management in health care organizations. Principles of quality management and guidelines for implementing total quality in health care are discussed, and differentiation between quality assurance and quality management presented.

Prerequisite(s): HAP 301

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Summer, Spring.

HAP 442 - Introduction to Health Care Politics and Policy

Credits: 3 (NR)
Reviews health care system issues and trends, and economic concepts, ways to understand the critical role of public health policy and the policy-making process in the United States. Identifies the major political institutions and policy processes that shape health policy. Examines the past and present health policy and its impact on changes in the ability of patients to access health services, the practice of health sciences professionals, and the quality and process of care. Explores the role of politics at both the federal and state government in health policy-making and critical aspects of the U.S. health system are compared to those of other countries.
Prerequisite(s): HAP 301

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**HAP 445 - Introduction to Health Services Research**

Credits: 3 (NR)
An introductory course for undergraduate students in understanding the basic methods of interdisciplinary health services research and program evaluation in health systems and policy. Emphasis is placed on understanding, assessing and using relevant findings from health services research. The course covers a variety of topics related to policy, management, and program evaluation in health delivery systems.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**HAP 459 - Health Data Standards**

Credits: 3 (NR)
Introduction to prevailing and emerging data standards applicable in health information technology. Students will learn about standard-making organizations, such as HL7 and Healthcare Information Technology Standards Panel (HITSP), and their standardization processes. The structure of and relationship between standard terminologies applicable in healthcare, such as International Classification of Diseases (ICD-10-CM), Logical Observation Identifiers Names and Codes (LOINC) and Systematized Nomenclature of Medicine--Clinical Terms (SNOMED-CT), will be explained.

Prerequisite(s): HAP 301 or permission of instructor.
HAP 361.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

**HAP 460 - Information Technology Project Management**

Credits: 3 (NR)
Identifies methods and skills for managing health care information technology (IT) projects. Students learn tools such as critical path analysis, resource management, crashing projects, vendor selection, quality assessment, and risk analysis.

Prerequisite(s): HAP 360

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**HAP 461 - Internet and Web Technology Applications for Healthcare**
Introduces students to the major applications of Internet and Web technology in healthcare. Two major applications are studied: online promotion/marketing for consumer-oriented health web sites, and online Personal Health Records (PHR). Students will learn about Search Engine marketing and the practical skill of creating an online health marketing/promotion campaign. They also will learn to create and manage PHR. The technological challenges such as reliability, privacy, security and organizational barriers to adoption are discussed.

Prerequisite(s): HAP 360.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall.

HAP 462 - Privacy and Security in Health Informatics

Credits: 3 (NR)
Health information security and privacy issues in the current healthcare system. Evaluates methods to achieve privacy and security. Discusses the important role of sound security policies and procedures; looks into technical solutions and non-technical solutions for achieving privacy and security.

Prerequisite(s): HAP 360.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall.

HAP 463 - Aging and Health Care Policy

Credits: 3 (NR)
Introduces issues and controversies surrounding need to sustain viability of Medicare, Medicaid and Social Security. Provides insights on the interaction of health policy, health economics, and aging of the population to help students understand and participate in ongoing debates about key U.S. entitlement programs. Provides skills in policy process and analysis as applied to aging and health policy.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall.

HAP 465 - Integration of Professional Skills and Issues

Credits: 3 (NR)
Assists students in synthesizing the varied dimensions of their roles as health professionals in a global society. Provides opportunities to examine issues in health care through reflection on the natural and behavioral sciences, humanities and other prerequisite coursework. Selected topics examined through writing, presentation, reading and discussion. (Writing intensive course).

Fulfills Mason Core requirement in synthesis.
Prerequisite(s): Senior standing.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring, Summer

HAP 468 - Health System Reform Policy Debates

Credits: 3 (NR)
Introduction to competing views about US health system reform. Financing, insurance, delivery system and federalism issues will be covered, using theme of personal vs. collective responsibility. Topics include: determinants of health; private insurance markets, regulation, and public insurance; sources of and alternative solutions to inequitable access, poor quality and excess cost growth. Emphasizes evidence, beliefs, and self-interest behind competing visions.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring

HAP 480 - Research Internship in Health and Human Services

Credits: 3 (NR)
The student works as a member of a team engaged in health and human services research and attends a bi-weekly research seminar. Under direction of the course seminar leader and the faculty research mentor, the student will acquire selected research skills and develop introductory research writing and presentation skills.

Equivalent to HHS 480, SOCW 480.

Prerequisite(s): Open only to CHHS majors or students who have completed CHHS minor or certificate courses.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

HAP 489 - Pre-Internship Seminar

Credits: 1 (NR)
Provides students with guidance and preparation for engaging in the internship.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0
Grading: Satisfactory/No Credit
When Offered: Fall, Spring.

HAP 494 - Special Topics in Health Administration and Policy
Credits: 3 (RT)
Selected topics analyzing specialized areas in health administration and policy.

**Notes:** Content varies. Lecture, seminar, laboratory, and workshops.

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0

---

**HAP 498 - Health Administration Internship**

Credits: 6 (NR)
Provides variety of applied management experiences in a health systems or related organization (field agency), under the direction of a HAP faculty member and a preceptor in the field. Students integrate and apply critical-thinking, project-planning, and management and communication skills in the internship experience and toward completion of an approved internship project.

**Prerequisite(s):** Open to HAP majors only.

**Notes:** Taken in last semester of studies. Capstone course involves a two-hour weekly seminar and a 12-hour internship in a health-related organization. Not repeatable for credit.

**Hours of Lecture or Seminar per week:** 2
**Hours of Lab or Studio per week:** 12

---

**HAP 499 - Independent Study in Health Administration and Policy**

Credits: 1-6 (RT)
Provides individual study of a particular problem area in health administration and policy research, theory development, or education under the direction of faculty.

**Prerequisite(s):** Permission of instructor and department.

**Notes:** May be repeated for maximum 6 credits.

**Hours of Lecture or Seminar per week:** 1-6
**Hours of Lab or Studio per week:** 0

---

**HAP 511 - Ethics in Public Health**

Credits: 3 (NR)
Explores selected ethical issues in public health practice, research, and policy; specific ethical theories identified as the proper basis of public health; relevant ethical concepts and principles and how they inform existing public health policies, practices, and research; and how ethical reasoning can operate in public health practice, research, and policies.

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0
**When Offered:** Spring
HAP 540 - Introduction to Emergency Preparedness/Disaster Recovery for Health Care Professionals

Credits: 3 (NR)
Introductory course in emergency preparedness and disaster recovery issues for health and human service professionals, using blended learning methods. Introduces policy guiding public and private sector emergency preparedness activities, and provides overview of issues in emergency preparedness infrastructure, needs assessment, and interdisciplinary roles in emergency response operations. Uses knowledge acquired from recent state and federal responses to disasters.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 1

HAP 594 - Special Topics in Health Care

Credits: 3 (RD)
Selected topics analyzing specialized areas in health care.

Equivalent to GCH 594/NURS 594

Notes: Content varies. Lecture, seminar, laboratory, and workshops.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HAP 601 - E-Commerce and On-line Marketing for Health Services

Credits: 3 (NR)
Explores development of online health services; organization of online businesses; online marketing, financial, and clinical transactions; and venture capital and the IPO process. Explores creating and maintaining web pages and databases. Reviews literature on effect of computer services on patient care and health care organizations. Also reviews examples of both successful and bankrupt technology firms in health care. Student groups draft business plan and develop early version of service proposal.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HAP 602 - Statistics in Health Services Management

Credits: 3 (NR)
An introductory course in basic statistics applied to applications in health systems management. Students use spreadsheet applications to perform a variety of statistical analyses (parametric and nonparametric statistics, including regression) to support program evaluation and managerial decision making in health systems.

Equivalent to HAP 501 (2010-2011 Catalog)
HAP 605 - Introduction to Health Policy

Credits: 3 (NR)
An introductory survey to the process and politics of health policy as it relates to the delivery and financing of health care in the United States. Examines the major public and private sector institutions responsible for health policy development, the interaction of these institutions and their competing interests to create and implement health policies, and public programs providing health coverage and services. Classroom and field experience involved.

HAP 609 - Comparative International Health Systems

Credits: 3 (NR)
Uses Roemer's Model of Health Systems to examine resource allocation, management, and health outcomes in the United States and around the globe. The structure and functioning of national health systems based on geographic location and governance in developing and developed countries (democracies, monarchies, and communist nations). Resource allocation across the continuum of nations and relationship to national health needs, health status, and longevity are examined.

Notes: An online course in comparative international health care systems.

HAP 610 - Health/Medical Practice Management

Credits: 3 (NR)
Regulatory pressures, technology, managed care contracting, revenue cycle management, and legal issues are making medical practice management more complex. Physicians groups struggling with these demands are finding a need for sophisticated management. Prepares the student to manage the modern practice by providing a foundation in the leadership and management of ambulatory health services and small provider organizations.

HAP 612 - Maintaining Business Continuity in Health Care

Credits: 3 (NR)
Considers potential types of catastrophes, their likely impact, and how organizations could continue their mission in the...
aftermath. Explores interdependences among various components of the health care delivery system, regional health services, disaster planning, business record protection, patient information and information systems protection, manpower planning, professional credentialing, access to supplies and drugs, and financial implications and resources.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**HAP 615 - Revenue Management for Clinical Practices**

Credits: 3 (NR)
Assists healthcare leaders and managers to become more effective decision makers, problem solvers, and communicators in revenue and financial management of clinical practices.

Prerequisite(s): HAP 610.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring

**HAP 621 - Organization Behavior and Healthcare Leadership**

Credits: 3 (NR)
This is an introductory course in the application of organizational behavior and theories of leadership to the management of interdisciplinary teams and decision making in healthcare organizations.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**HAP 632 - Grants Funding and Development**

Credits: 3 (NR)
Provides knowledge of private and public funders, funding mechanisms, tools and resources. Includes content on private and government funding streams relevant to public health, hospitals and other non-profit health related entities, interpretation of funder motivations and engagement strategies; essential skills for developing externally funded projects; grant proposal writing and grant requirements; assessment skills/strategies and award management/stewardship.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring

**HAP 642 - Health Policy Development and Analysis**

Credits: 3 (NR)
Examines the process and factors that influence formulation, implementation and modification of health policy in the United
States, including competing interests and the relationship between public decisions and the market place. Emphasis is on the application of commonly-used frameworks for policy analysis, including contributions from health economics, health services research, and other policy-related disciplines, to contemporary policy issues in health care delivery, organization, and financing.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

### HAP 645 - Introduction to Health Services Research

Credits: 3 (RD)  
An introductory course in the basic methods of interdisciplinary health services research and program evaluation in health systems and policy. The course covers topics related to policy, management, and program effect and evaluation within health delivery systems, including research design, existing data systems, measurement of quality and basic cost benefit, and effectiveness analysis.

**Prerequisite(s):** HAP 678 (if required in program of study).

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

### HAP 647 - Regulatory Requirements for Health Care Systems

Credits: 3 (NR)  
Helps health care professionals understand link between infrastructures of organization and regulatory and accreditation processes for health care organizations. Covers major accrediting agencies and their roles, accreditation principles, and survey process. Focuses on hospitals with reference to ambulatory care, managed care organizations, rehabilitation centers, laboratories, and home health and long-term care facilities. Emphasizes requirements of Joint Commission on Accreditation of Health Care Organization and regulations mandated by Health Care Finance Administration.

Equivalent to HAP 447, HAP 547 (Catalog 2010-2011)

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall

### HAP 650 - Senior Housing Management and Operations

Credits: 3 (NR)  
Issues, trends, and practices related to administration of assisted-living and senior housing communities. Emphasizes budgeting; staffing; hospitality services; resident care and risk management indicators; and evaluation of demographic, cultural, and regulatory environments affecting industry.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Spring
HAP 651 - Senior Housing Sales and Marketing

Credits: 3 (NR)
Introduction and analysis of sales and marketing practices within senior housing environments, including but not limited to Active Adult (55+), assisted living, Alzheimer’s assisted living, and Continuing Care Retirement Communities (CCRC’s). Topics include a review of the role of marketing in health care, the senior housing consumer and product, the development of marketing plans, and administrative management of the promotion, lead management, and sales process.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Summer

HAP 662 - Essentials of Health Insurance and Managed Care

Credits: 3 (NR)
Survey course in US health insurance and managed care. Provides an overview of the different types of health insurers and managed care organizations, with content on sales and marketing, provider network management and reimbursement, medical and quality management, claims processing, member services, IT and operational finance. Policy, laws and regulations affecting the industry will also be addressed.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HAP 661 - Policy Development and Analysis for Community Health Programs

Credits: 3 (NR)
Prepares students to critically analyze issues and develop skills pertinent to effective policy development for community and family public health programs. Explores what constitutes a vulnerable population and examines current government programs and policies supporting these programs for such populations. Recent case examples ground students in current issues faced by community groups and other health interests.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HAP 662 - Health Policy for Elders and People with Disabilities

Credits: 3 (NR)
An introduction to health policy, health economics, and the aging of the American population. Focuses on the effect of chronic illness and disability on health care costs and provides students with skills in policy process and analysis as applied to acute care, long-term care, and health promotion for elders and people with disabilities.

Hours of Lecture or Seminar per week: 3
 Hours of Lab or Studio per week: 0
When Offered: Spring
HAP 678 - Introduction to the U.S. Health System

Credits: 3 (NR)
Explores the U.S. Health System focusing on historical development, current configuration and possible future direction. Includes study of health system development, key influencers, accessibility, financing, changing components and effects system has on patients, providers, financiers, employers, government, insurers and society. Role of population health management and public health is explored, including impact of social, cultural, economic, and environmental factors on health care systems and practices.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HAP 680 - Applied Public Health Leadership and Management

Credits: 3 (NR)
Survey course in leadership, management, and planning applied to public health systems. Students apply theoretical knowledge from a variety of disciplines relevant to development and implementation of public health policy, regulatory directives, public health program planning and management (including human resources and financial management), and the design and evaluation of public health services/functions. Content includes strategies for ensuring access to essential public health services and use of evaluation and monitoring systems to ensure the safety, efficiency, and effectiveness of local public health programs/systems. Course emphasizes leadership, communication, systems thinking, data-driven decision making, and ethical practice in public health systems.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HAP 686 - Quality Improvement in Health Services

Credits: 3 (NR)
Examines how improved work processes lead to quality improvement. Explores contribution of operations research and quality management to improve delivery and production of health services and business processes from the perspective of health care managers.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

HAP 690 - Independent Study

Credits: 1-3 (RD)
In-depth studies of selected area of health science theory, research, or practice under direction of faculty.

Notes: May be repeated for a maximum of 3 credits.
HAP 700 - Introduction to Health Informatics

Credits: 3 (NR)
Introduces the study of data and information flow in healthcare delivery. Covers the history and evolution of methods in information management and the role and contributions of an inter-disciplinary health informatics workforce.

Corequisite(s): HAP 678 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

HAP 701 - Health Data: Vocabulary and Standards

Credits: 3 (NR)
Explores the challenges of representing health care data using standardized vocabulary in health information systems. Topics include data standards and semantics, policy, and theory and practice of standardization.

Corequisite(s): HAP 678, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

HAP 702 - Managerial Accounting in Health Care

Credits: 3 (NR)
Practical examination of controllership function in health care organizations and systems (profit and nonprofit), with emphasis on policy formulation and evaluation of performance, including cost methods and systems; measurement criteria; and managerial planning, methods, and techniques.

Prerequisite(s): Graduate-level statistics course.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HAP 703 - Financial Management in Health Systems

Credits: 3 (NR)
Examines tools and methods of financial management in health care organizations and systems, with emphasis on allocation and use of funds. Analyzes costs and constraints of alternative source of funds, and applies financial decision instruments and effect
on operational management and market value of entity.

Prerequisite(s): Graduate-level statistics course.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HAP 704 - Contemporary Issues in Health Systems Management

Credits: 3 (NR)
Analyzes management theory and practice from recently evolving works that identify, analyze, and resolve strategic organizational problems and issues in health care systems. Applies leadership strategy to effectively manage variety of critical issues, including organizational development, change management, human relations and diversity, quality management for organizational and clinical effectiveness, technology, competing priorities, conflicting constituencies, delivery system redesign, and health services research.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HAP 705 - Strategic Management and Marketing in Health Care

Credits: 3 (NR)
Explores role of strategic management and marketing in healthcare organizations and process used to formulate, implement, and evaluate cross-functional decisions to achieve their objectives. Reviews formulation of strategic plans to address strengths, weakness, opportunities and threats facing organizations from both external and internal environments. Considers type of environmental forecasts and competitor intelligence healthcare organizations need to make timely and adaptive strategic and marketing decisions. Addresses conditions necessary for successful strategic execution.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HAP 706 - Integrated Health Systems Management

Credits: 3 (NR)
Explores emerging structures for financing and delivery of comprehensive health services in integrated health systems. Covers successful development and management of alliances, provider hospital organizations, and managed care systems with emphasis on strategies for vertical integration, community partnering, contract negotiation, governance, and management of antitrust situations.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HAP 709 - Health Care Databases
Credits: 3 (NR)
Introduces design and use of health and medical databases, providing hands-on experience. Explores uses of medical record systems. Includes review and analysis of databases and database management systems. Examines application of databases to clinical and managerial transaction.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**HAP 710 - Inferential Statistics in Health Services Research and Management**

Credits: 3 (NR)
Introduction and practical application of advanced statistical analyses and their use/application in health services (research, management, policy analysis) using various software applications (STATA, Microsoft Excel and Access, SAS, SPSS, MINITAB). Topics include analysis of variance (one and two way) and design of experiments, multiple regression, model building, chi-square and the analysis of contingency tables, and nonparametric statistics.

Prerequisite(s): Graduate-level statistics course.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 1

**HAP 712 - Topics in Public Policy**

Credits: 3 (NR)
Presents selected topics current in public policy related to health care and health care administration.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**HAP 713 - Project Management in Health Information Technology**

Credits: 3 (NR)
Applies body of knowledge in project management to the implementation of information technology and systems in healthcare organizations. Examines how tasks such as needs assessment, project planning, project cost analysis, risk management, and management of personnel are readily included in the use of health information systems.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring

**HAP 714 - Ethical Issues in Health Administration and Policy**

Credits: 3 (NR)
Seeks to explore selected ethical issues in health administration and policy and decision options by understanding ethical
theories, concepts, and principles and their role and selective application in the development, organization, and administration of health policy, as well as the organization and delivery of health services. Students will learn specific ethical concepts, theories, and principles, how these inform existing health policies and practices, and how ethical reasoning can operate in the policy process and administrative decisions in the health delivery systems.

**HAP 715 - Health Economics**

Credits: 3 (NR)
Emphasizes understanding of economic efficiency in the U.S. health system. Microeconomic methods examine markets and resources in health care. Health care examined as commodity. Explores demand for health and medical care services, provider behavior, and function and behavior of insurance markets. Topics include government role, financing arrangements, insurance reform, rationing, price regulation, and provider competition.

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0

**HAP 720 - Health Data Integration**

Credits: 3 (NR)
Students learn to manipulate large databases, create link table queries, write SQL application programs, understand sources of data conflicts, and identify methods of integrating ODBC databases with legacy data. Covers data warehousing, methods of analyzing large databases, including Bayesian belief networks and machine learning in health care context. Features semester long data integration group project.

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0

**HAP 727 - Program Evaluations in Health Care**

Credits: 3 (NR)
Methods of evaluating health and social programs, including anthropological case studies, decision analytic and quasi-experimental approaches. Emphasis is placed on using methods of continuous quality improvement and benchmarking exchanges in evaluating multisite programs. Assess cost effectiveness of programs (including assessment of patient census, employee activities and program outcomes). Evaluation of health care interventions, rate setting, and managed care are discussed.

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0

**HAP 730 - Health Care Decision Analysis**
Students analyze practice patterns and find optimal methods of improving them. Uses decision analysis and failure mode analysis in health care settings. Students integrate scientific evidence, patients' preferences, and experts' opinions to identify optimal alternatives.

**Prerequisite(s):** Graduate-level statistics course.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**HAP 735 - Fundamentals of Patient Safety and Risk Management**

Credits: 3 (NR)  
Students build and interpret causal model of risks and test the accuracy of them against extant incidence reports using risk analysis models, risk analysis life cycle, as well as methods of evaluating the validity and reliability of risk analysis. Bayesian probability models, probabilistic risk analysis, root-cause analysis, and failure model analysis are covered. Includes applications to terrorism, unauthorized disclosures, and patient safety.

**Prerequisite(s):** HAP 730 or equivalent approved by instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**HAP 740 - Management of Health Information Systems**

Credits: 3 (NR)  
Introduces health and medical information systems with emphasis on systems analysis and design to support managerial and clinical communications and decision making. Explores trends and innovations in information technology and systems, focusing on managerial oversight of health and medical information systems. Explores contemporary management strategies for information systems personnel.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**HAP 745 - Health Care Security Policy**

Credits: 3 (NR)  
Focuses on health security and privacy policy and compliance issues. Students will develop policies for the type of threats faced by facilities. The legal and business policies for facility, personnel, travel, information, and patient security will be discussed.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**HAP 746 - Health Policy Leadership**
Credits: 3 (RD)
Identifies and assesses critical leadership skills in many areas of health policy making necessary for health care professionals. Teaches individuals how to link health issues with policy development and pursue appropriate strategies.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**HAP 750 - Legal Issues in Health Administration**

Credits: 3 (NR)
Prepares health professionals to understand legal principles, statutes, regulations, and case law related to managing health care organizations and health professionals’ practice. May compare legal health care issues from domestic and international perspectives.

Equivalent to HHS 750 (2010-2011 catalog)

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Spring

**HAP 752 - Advanced Health Information Systems**

Credits: 3 (NR)

**Prerequisite(s):** HAP 700 and HAP 709, or permission by the instructor or Program Coordinator.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall, Spring

**HAP 755 - Analysis of Causality in Health Services Research**

Credits: 3 (NR)
Covers philosophical and statistical problems with analysis of causes as separate and distinct from associations. Topics discussed include structural modeling, self selection, risk adjustment, propensity scoring, and Bayesian networks. Students examine real health care databases and the pitfalls of causal inferences. Special attention is made to investigation of causes of outbreaks and illness.

**Prerequisite(s):** Graduate-level statistics course.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0
HAP 760 - Philosophy of Science in Health Services Research

Credits: 3 (NR)
An introductory course on the theory and philosophy of science and humanism that relate to the design and conduct of health services research. The course examines selected theories on the nature of reality (ontology), the justification of knowledge claims (epistemology), and how knowledge is constructed (methodology) in design and analysis of health services research.

Prerequisite(s): Admission to a doctoral program or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HAP 762 - Cost-Effectiveness for Health Care Management and Policy Decisions

Credits: 3 (NR)
A survey course in health services research methods for the application of economic evaluation techniques used in health care policy analysis and clinical or administrative applications for health care service planning and evaluation. Introduces methods applied to health care technology assessment, medical decision making, health resource allocation, and policy-making.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HAP 764 - Health Policy and Government Payment Systems for Health Care Services

Credits: 3 (NR)
Examines the rationale for government intervention in provider payment and explores the current policy issues and politics of major government provider payment systems, including Medicare and Medicaid, and examines options for managing these programs more effectively. The course will "follow the money" as it flows through government and provider payment systems, model potential changes in such systems, and identify policies for improving the operation of these programs and payment systems.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HAP 765 - Methods for Health Policy Analysis

Credits: 3 (NR)
Explores conceptual, analytic, and technical methods/approaches used in health policy analysis and planning. Students will learn to select from among alternative methods for applied concept modeling, graphical data presentation, needs assessment, goal clarification, group decision methods, and a variety of quantitative applications and frameworks for evaluating policy impact.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
HAP 766 - Policy Implementation and Health System Management Dilemmas

Credits: 3 (NR)
Analyzed selected public policies and regulations and the impact of implementation and compliance/noncompliance on health care systems and organizations. Examines management responsibilities, challenges, and dilemmas (fiduciary and ethical) of implementing selected policies and regulations (promulgated or proposed).

Prerequisite(s): HAP 703 or equivalent, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HAP 770 - Medical Decision Making and Decision Support Systems

Credits: 3 (NR)
Introduces the complex subject of medical decision making. Examines systematic approaches to decision making. Explores principles governing the design, application, and maintenance of clinical decision support systems. Laboratory time provides learning experience in various applied situations.

Prerequisite(s): HAP 701 or permission of instructor.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 1
When Offered: Spring

HAP 775 - Implementing Health Reform in Health Service Organizations

Credits: 3 (NR)
Prepares health professionals to understand, lead, and manage health service organizations undergoing payment reform, evolving quality and outcomes reporting requirements, process redesign challenges, culture change, and a changing regulatory environment.

Prerequisite(s): HAP 678.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring

HAP 780 - Data Mining in Health Care

Credits: 3 (NR)
An introductory course to data mining and knowledge discovery in health care. Methods for mining health care databases and synthesizing task-oriented knowledge from computer data and prior knowledge are emphasized. Topics include fundamental concepts of datamining, data preprocessing, classification and prediction (decision trees, attributional rules, Bayesian networks),
constructive induction, cluster and association analysis, knowledge representation and visualization, and an overview of practical tools for discovering knowledge from medical data. These topics are illustrated by examples of practical applications in health care.

Prerequisite(s): Graduate-level statistics course.

Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0

HAP 783 - Quantitative Analysis for Healthcare Executive Decision Making

Credits: 3 (NR)  
This advanced course in executive decision making in healthcare organizations challenges students to demonstrate the application of quantitative skills and critical thinking to the resolution of complex case studies.

Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0  
When Offered: Fall

HAP 789 - Pre-Capstone Professional Development Seminar

Credits: 1 (NR)  
Provides students with guidance and preparation for engaging in the capstone practicum.

Hours of Lecture or Seminar per week: 1  
Hours of Lab or Studio per week: 0  
Grading: Satisfactory/No Credit  
When Offered: Fall, Spring

HAP 790 - Capstone Practicum in Health Systems Management

Credits: 3 (NR)  
Field practicum in health systems management where students function as an integral member of an organizational entity to complete a non-thesis project while continuing to build skills in leadership, critical thinking and systematic problem analysis.

Prerequisite(s): All coursework in the major. Practicum hours required in addition to class meetings. Permission of instructor required.

Hours of Lecture or Seminar per week: 1  
Hours of Lab or Studio per week: 2  
When Offered: Fall, Spring, Summer

HAP 791 - Practicum in Public Health
HAP 792 - Practicum in Health Policy

Credits: 3 (NR)
The practicum provides students with an in-depth supervised experience in an approved health policy related organization. The practicum will require students to complete a project related to an actual public health policy issue that is a focus within the organization.

Notes: Students must complete all the core MSHMP coursework prior to registering for HAP 792. Only students enrolled in the MSHMP concentration in Health Policy program may register. Proposal of practicum experience and selection of practicum location and preceptor must be determined one semester prior to taking the practicum.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Summer, Spring.

HAP 799 - Master's Thesis

Credits: 1-6 (RD)
Provides students with skills to develop their research proposal, conduct their research, and complete their thesis in a relevant field of study.

Prerequisite(s): Admission to one of the master’s programs in the department and permission of instructor.

Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 0
Grading: Satisfactory/No Credit only
When Offered: Fall, Spring, Summer

HAP 820 - Analytic Models in Health Services Management, Policy, and Research

Credits: 3 (NR)
An advanced statistics course in applied linear and multiple regression analysis, including polynomial regression, indicator variables and covariance analysis, model selection and validation, methods for measurement errors, diagnostic methods for outliers, influence and multicollinearity, nonlinear regression, logistic regression with non-normal distributions, correlations, and time-series analysis and forecasting as used in health services administration research and policy analysis.
Prerequisite(s): HAP 710 or equivalent graduate statistics course.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HAP 821 - Analysis of Categorical Data in Health Policy and Administration

Credits: 3 (NR)
An advanced statistics course in analysis of categorical data. Topics include tests and measures of association for contingency table analysis, including chi-square, odds ratio, relative risk, comparative trials, analysis of categorical data with matched samples, log-linear models, and logistic regression. Econometric models involving categorical variables could also be covered.

Prerequisite(s): HAP 710 or equivalent graduate statistics course.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HAP 822 - Research Designs and Analysis in Pharmaceutical and Health-Related Clinical Trials

Credits: 3 (NR)
A survey course that introduces students to the design and management of clinical trials research and pharmaceutical research and development, including drug development and FDA drug approval. This course also covers a variety of biostatistical methods as they apply to biomedical and biotechnology industry research with human subjects.

Prerequisite(s): HAP 710 or equivalent graduate statistics course.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HAP 866 - Politics of Influencing Health Care Policy

Credits: 3 (NR)
Focuses on process of formulating health care policy and analyzing implications for nursing, administration in nursing, and education and nursing service. Examines current and impending health issues, legislative process, and program implementation evaluation.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 1

HAP 868 - Advanced Research Seminar in Health Policy Analysis
Seminar on advanced research methods that analyzes theoretical and analytic foundations to critique health services research and health policy analysis. Students synthesize, integrate, and apply theoretical knowledge and advanced skills relevant to health services research, policy analysis, and program evolution.

Prerequisite(s): HAP 703 or equivalent or permission of instructor.

Notes: Limited to doctoral students having completed core courses in statistics and research design, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HAP 999 - Doctoral Dissertation

Credits: 1-9 (RD)
Under faculty direction, develop dissertation proposal and complete the dissertation.

Prerequisite(s): All courses in the PhD program.

Hours of Lecture or Seminar per week: 1-9
Hours of Lab or Studio per week: 0
Grading: Satisfactory/No Credit
When Offered: Fall, Summer, Spring

Health and Human Services (HHS)

Offered by the College of Health and Human Services

HHS 432 - Healthy Aging

Credits: 3 (NR)
Offers a broad perspective of normal aging in the older adult, and the impact of chronic disease and psychosocial and cultural factors on the aging process.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

HHS 480 - Research Internship in Health and Human Services

Credits: 3 (NR)
The student works as a member of a team engaged in health and human services research and attends a bi-weekly research seminar. Under direction of the course seminar leader and the faculty research mentor, the student will acquire selected research skills and develop introductory research writing and presentation skills.
Equivalent to SOCW 480, HAP 480.

Prerequisite(s): Open only to CHHS majors or students who have completed CHHS minor or certificate courses.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 1
When Offered: Spring

HHS 597 - Approaches to Quantitative Data Analysis in Health Care Research

Credits: 3 (NR)
Examine univariate and bivariate statistical procedures appropriate for analyzing quantitative health care research data. Includes selecting, applying, and interpreting data analysis procedures.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HHS 648 - Aging and Health

Credits: 3 (NR)
Provides an overview of normal aging and explores factors that affect health and well being in older adults; demonstrates strategies for maintaining health and managing chronic illness in older adults; examines common misconceptions about aging and healthcare issues; and explores the process of normal aging and the presentation of common health conditions in older adults.

Equivalent to NURS 648

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

HHS 702 - Health Promotion and Disease Prevention

Credits: 3 (NR)
Prepares students to address health needs of individuals or groups through health promotion and disease prevention. Emphasis is placed on research evidence and motivational interviewing to improve healthy lifestyle, prevent disease and manage chronic conditions.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Summer, Spring

HHS 810 - Systematic Reviews of Health Care Research
Applies systematic methods for evaluating current research in order to develop empirically-based decisions about the next major research questions that need to be addressed in the students' selected area of inquiry.

**Prerequisite(s):** Master's degree in nursing, social work or health-related discipline.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall

---

**HHS 818 - Advanced Ethics of Healthcare Research**

Credits: 3 (NR)  
Analyze ethical issues associated with research in multiple settings including academic, business, practice, policy-making, and international, and apply ethical principles to the student's selected area of inquiry.

Equivalent to NURS 957.

**Prerequisite(s):** Master's degree in nursing, social work, or health-related discipline and Collaborative Institutional Training Initiative certification for Biomedical Research Investigators and Key Personnel.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Spring

---

**HHS 825 - Conducting and Publishing Research**

Credits: 3 (NR)  
Apply scientific and ethical principles of inquiry by participating in a guided research practicum and seminars. Apply principles of writing for scientific publication.

Equivalent to NURS 875 (2013-2014 Catalog).

**Prerequisite(s):** Master's degree in nursing, social work, or health-related discipline.

**Hours of Lecture or Seminar per week:** 1  
**Hours of Lab or Studio per week:** 5  
**When Offered:** Spring

---

**HHS 830 - The Scholarship of Writing**

Credits: 3 (NR)  
Boyer’s framework for scholarship shapes the presentation of theory related to writing for scholarship. Students apply research in composition to inform writing for a variety of scholarly purposes, including overall conceptualization of research papers and proposals, writing for publication, and writing for scientific, creative, quantitative, and qualitative research. Seminar and intensive writing.
Health Education (HEAL)

Offered by the College of Education and Human Development

HEAL 110 - Personal Health

Credits: 3 (NR)
Focuses on individual health improvement by studying mental/emotional well-being, fitness, nutrition, drug abuse prevention, consumerism, safety and other topics.

Notes: One section of HEAL 110 will be dedicated as Distance Education while remaining sections will be traditional classroom, 100% face-to-face.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

HEAL 205 - Principles of Accident Causation and Prevention

Credits: 4 (NR)
Investigates safety-related problems. Emphasizes fire, home, occupational, and vehicle safety; identification, care, and treatment of various medical emergencies; and violence and property crime prevention.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 1

HEAL 220 - Dimensions of Mental Health

Credits: 3 (NR)
Focuses on integrating behavioral and sociocultural factors in studying mental health.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HEAL 230 - Introduction to Health Behavior

Credits: 3 (NR)
Introduces health behavior in context of health psychology. Explores various theoretical models to understand health, illness and sick-role behaviors. Studies health and disease from a biopsychosocial perspective. Examines means of preventing and treating health problems.
Fulfills Mason Core requirement in social and behavioral science.

**HEAL 310 - Drugs and Health**

Credits: 3 (NR)
Analyzes drug use, with emphasis on positive aspects, and presents alternatives to drug misuse and abuse.

**HEAL 312 - Health and Wellness Choices**

Credits: 3 (NR)
Actively involves students in becoming managers of their personal health and well-being throughout life span. Consistent with Healthy People 2000 goals for nation. Emphasizes lifestyle activity and fitness, behavioral change, and maintenance.

**Notes:** May be taken by nonmajors.

**HEAL 314 - Community Health Issues and Strategies**

Credits: 3 (NR)
Explores health promotion and disease prevention issues in a range of community health settings: schools, colleges, governmental agencies, municipal organizations, private sector workplaces, community service groups, and health care centers. Issue exploration will be global, national, and local levels.

**HEAL 323 - Program Leadership and Evaluation**

Credits: 3 (NR)
Covers leadership and evaluation of health, fitness, and recreation programs. Uses computer technology to study evaluative aspects of program planning and administration.

**Prerequisite(s):** PRLS 310 or permission of instructor Prerequisite enforced by registration system.
HEAL 325 - Health Aspects of Human Sexuality

Credits: 3 (NR)
Covers biological, behavioral, and sociocultural factors in human sexual behavior.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HEAL 327 - Women's Health

Credits: 3 (NR)
Examines health issues unique to women, including health care, food and exercise, reproductive and gynecological issues, chronic diseases, and issues of violence.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HEAL 330 - Nutrition

Credits: 3 (NR)
Assesses dietary habits and patterns in relation to nutrient requirements. Emphasizes weight control, diet and fitness, and current nutritional controversies.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HEAL 331 - Men's Health

Credits: 3 (NR)
Examines socio-cultural influences on men's development and expression of health beliefs and practices. Explores health issues specific to men. Analyzes research literature on interventions to improve men's health.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring

HEAL 350 - Interventions for Populations and Communities at Risk
Identifies culturally, physically, emotionally, mentally, and demographically diverse populations and communities at risk. Covers implications for developing innovative programs and role of HFRR interventions.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

### HEAL 351 - Relationship Health

Credits: 3 (NR)  

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall, Spring

### HEAL 370 - Health Determinants and Status

Credits: 3 (NR)  
Focuses on determining person's health status and health behavior change strategies. Covers skills acquisition in health-risk appraisal, screening, and related instruction.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

### HEAL 372 - Health Communication

Credits: 3 (NR)  
Applies research-based models and theories of health assessment and promotion at individual, organizational, agency, and community levels. Uses communication approaches and skills in context of behavior change strategies, including policy and program development.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

### HEAL 402 - Introduction to Driver Education Instruction

Credits: 3 (NR)  
Introduces vehicle operator's tasks in highway transportation system. Provides essential knowledge and skills to instruct driver education.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0
HEAL 403 - Driver Education Practice and Administration

Credits: 3 (NR)
Applies driver education to simulated and actual driving environments. Provides essential knowledge and skills to administrate driver education.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HEAL 405 - Teaching Methods in Health Education (K-12)

Credits: 3 (NR)
Covers content, methodology, and resource materials in teaching health education for physical education teaching majors.

Prerequisite(s): BSED status or permission of instructor

Notes: Field experience required.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HEAL 430 - Seminar in Exercise Science and Health Promotion

Credits: 3 (NR)
Provides overview of contemporary and often controversial health issues with analysis of selected problems of current concern to society.

Equivalent to KINE 330.

Prerequisite(s): 90 hours.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HEAL 450 - Epidemiology and Environmental Health

Credits: 3 (NR)
Covers incidence, distribution, and causes of diseases and injuries in human populations. Emphasizes essential diagnostics and planning for community health problem-solving with environmental consideration.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 1
HEAL 470 - Community Health Systems

Credits: 3 (NR)
Examines complexities of community health and community health system infrastructure. Focuses on planning and navigating multi system agency environment, including population and subpopulation health.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HEAL 480 - Special Topics

Credits: 1-3 (RD)
Presents selected health issues or problems. Focuses on applying information to education programs.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0

HEAL 490 - Internship

Credits: 12 (NR)
Provides directed experience in observing and participating in health promotion and exercise science programs at community agencies, health care centers, and private sector organizations.

Prerequisite(s): 90 credits or permission of instructor

Notes: See internship manual for specific concentration requirements. Minimum period of 10 to 12 consecutive weeks.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 12
Grading: Satisfactory/No credit

HEAL 499 - Independent Study in Health Education

Credits: 1-3 (NR)
Studies problem area in health education research, theory, or practice under faculty direction.

Prerequisite(s): 90 credits or permission of instructor

Notes: May be repeated, but no more than 3 credits may be earned.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0

HEAL 516 - Program Development and Resources in Health Education
Credits: 3 (NR)
Open to licensed and provisionally licensed health and physical education teachers in the commonwealth of Virginia and students in ASTL physical education program. Focuses on program development, health content, methodology, and resources for teaching preK-12 health education.

Notes: Distance learning course.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**Hebrew (HEBR)**

Offered by the College of Humanities and Social Sciences

---

**HEBR 101 - Elementary Hebrew I**

Credits: 3 (NR)  
Designed for students with no knowledge of Hebrew. Introduction including grammar, vocabulary, oral skills, listening comprehension, and reading.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 1

---

**HEBR 102 - Elementary Hebrew II**

Credits: 3 (NR)  
Continuation of HEBR 101.

**Prerequisite(s):** HEBR 101 or equivalent.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**HEBR 150 - Introduction to Biblical Hebrew**

Credits: 3 (NR)  
Introduces basic vocabulary, grammar, and development of reading skills with introduction to religion and culture of ancient Israel that produced the Hebrew Bible/Old Testament.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**HEBR 160 - Readings in Biblical Hebrew**
Credits: 3 (NR)
Continuation of HEBR 150 to increase students' proficiency in vocabulary and understanding of morphology and syntax. Selected passages from Hebrew Bible read; students introduced to text formation and analysis.

Prerequisite(s): HEBR 150 or equivalent.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HEBR 201 - Intermediate Hebrew I

Credits: 3 (NR)
Further development of skills acquired in HEBR 101 and 102, including grammar, oral expression, listening comprehension, reading, and writing.

Prerequisite(s): HEBR 102 or equivalent.

Notes: Lab work required.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 1

HEBR 202 - Intermediate Hebrew II

Credits: 3 (NR)
Continuation of HEBR 201.

Prerequisite(s): HEBR 201 or equivalent.

Notes: Lab work required.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 1

History (HIST)

Offered by the College of Humanities and Social Sciences

HIST 100 - History of Western Civilization

Credits: 3 (NR)
History of Western civilization from ancient Mediterranean origins through medieval and modern development of Europe to contemporary world.

Fulfills Mason Core requirement in western civilization/world history.
Notes: Students who take HIST 100 may not receive credit for HIST 101 or HIST 102.  

Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0

HIST 101 - Foundations of Western Civilization

Credits: 3 (NR)  
Evolution of Western culture from ancient Mediterranean world to formation of modern Europe in 17th century.

Notes: Students may not receive credit for HIST 101 if they have taken HIST 100.  

Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0

HIST 102 - Development of Western Civilization

Credits: 3 (NR)  
History of Western institutions and ideas from 17th century to the present.

Notes: Students may not receive credit for HIST 102 if they have taken HIST 100.  

Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0

HIST 121 - Formation of the American Republic

Credits: 3 (NR)  
Social, political, economic, and intellectual growth of American institutions from colonization through Reconstruction.

Fulfills Mason Core requirement in social and behavioral science.

Notes: Students may not receive credit for HIST 121 if they have taken HIST 120.  

Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0

HIST 122 - Development of Modern America

Credits: 3 (NR)  
History of the United States since 1877.

Fulfills Mason Core requirement in social and behavioral science.
Notes: Students may not receive credit for HIST 122 if they have taken HIST 120.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HIST 125 - Introduction to World History

Credits: 3 (NR)
Analytical approach to world history overview that surveys major features of principal existing civilizations of world, as originally formed and as altered by key global processes including forces of modernity.

Fulfills Mason Core requirement in western civilization/world history.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HIST 130 - History of the Modern Global System

Credits: 3 (NR)
Provides understanding of processes that have shaped modern world. Beginning in 1500, traces developments that reorganized peoples, reshaped cultures, and generated new economies in interaction between Western and non-Western societies. Focuses on Western and non-Western regions of world, and their participation in global networks resulting from mercantile expansion, industrial revolution, imperialism, nationalism, and legacies in postcolonial period.

Fulfills Mason Core requirement in global understanding.

Notes: Fulfills the college requirement in non-Western culture.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HIST 200 - Freshman/Sophomore Seminar in U.S. History

Credits: 3 (NR)
Focuses on skills, methods of learning, and subject matter to introduce discipline of history.

Prerequisite(s): Freshman or sophomore standing.

Notes: Topics vary.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HIST 201 - Freshman/Sophomore Seminar in European History
Credits: 3 (NR)
Focuses on skills, methods of learning, and subject matter to introduce discipline of history.

**Prerequisite(s):** Freshman or sophomore standing.

**Notes:** Topics vary.

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0

**HIST 202 - Freshman/Sophomore Seminar in Global History**

Credits: 3 (NR)
Focuses on skills, methods of learning, and subject matter to introduce discipline of history.

**Prerequisite(s):** Freshman or sophomore standing.

**Notes:** Topics vary.

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0

**HIST 251 - Survey of East Asian History**

Credits: 3 (NR)
Surveys history of China and Japan from prehistoric times to ca. 1600.

Fulfills Mason Core requirement in global understanding.

**Notes:** Fulfills the college requirement in non-Western culture.

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0

**HIST 252 - Survey of East Asian History**

Credits: 3 (NR)
Surveys history of China and Japan from early modern times (ca. 1600) to present.

Fulfills Mason Core requirement in global understanding.

**Notes:** Fulfills the college requirement in non-Western culture.

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0
HIST 261 - Survey of African History

Credits: 3 (NR)
Focuses on the sub-Saharan region and examines evolving systems of kinship power, spirituality, and slavery. Explores the interactions between Africans and global influences from the religions of the book and colonialism to the politics of development and continuities and changes in production. HIST 261 surveys African history from the earliest times to 1800. HIST 262 surveys African history from 1800 to the present.

Fulfills Mason Core requirement in global understanding.

Notes: Fulfills the college requirement in non-Western culture.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HIST 262 - Survey of African History

Credits: 3 (NR)
Focuses on the sub-Saharan region and examines evolving systems of kinship power, spirituality, and slavery. Explores the interactions between Africans and global influences from the religions of the book and colonialism to the politics of development and continuities and changes in production. HIST 261 surveys African history from the earliest times to 1800. HIST 262 surveys African history from 1800 to the present.

Fulfills Mason Core requirement in global understanding.

Notes: Fulfills the college requirement in non-Western culture.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HIST 271 - Survey of Latin American History

Credits: 3 (NR)
Surveys colonial era to 1825. Emphasizes interactions of United States, Latin America.

Fulfills Mason Core requirement in global understanding.

Notes: Fulfills the college requirement in non-Western culture.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HIST 272 - Survey of Latin American History

Credits: 3 (NR)
Surveys development of independent Latin America since 1825. Emphasizes interactions of United States, Latin America.
Fulfills Mason Core requirement in global understanding.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**HIST 281 - Survey of Middle Eastern Civilization**

Credits: 3 (NR)  
Survey of Middle Eastern history from rise of Islam to present, emphasizing processes that led to emergence of economic, cultural, social, and political institutions that characterize region today. Surveys period from rise of Islam in 570 to medieval period (ca. 1258)

Fulfills Mason Core requirement in global understanding.  
**Notes:** Fulfills the college requirement in non-Western culture.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**HIST 282 - Survey of Middle Eastern Civilization**

Credits: 3 (NR)  
Survey of Middle Eastern history from rise of Islam to present, emphasizing processes that led to emergence of economic, cultural, social, and political institutions that characterize region today. Surveys medieval period to present.

Fulfills Mason Core requirement in global understanding.  
**Notes:** Fulfills the college requirement in non-Western culture.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**HIST 298 - History and the Web**

Credits: 1 (NR)  
Introduces techniques and methods of creating historical web sites. Overview of historical resources on web, including Internet archives, hypertext scholarly articles, and online exhibits. Examines new narrative and interpretive possibilities for doing history.

**Notes:** Combines lecture, lab.

**Hours of Lecture or Seminar per week:** 1  
**Hours of Lab or Studio per week:** 0

**HIST 299 - Databases for Historians**
Credits: 1 (NR)
Introduces techniques and methods to create historical databases. Overview of web, CD-ROM, and personal databases helpful for historical research. Examines database as electronic archive and interpretive and analytical tool.

Notes: Combines lecture and lab.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0

HIST 300 - Introduction to Historical Method

Credits: 3 (NR)
Introduces research skills and methods, as well as historical interpretation, culminating in written and oral presentations.

Fulfills Mason Core requirement in synthesis.

Fulfills writing intensive requirement in the major.

Prerequisite(s): History majors with 30 credits or permission of instructor.

Notes: Topics vary according to instructor. History majors strongly urged to take HIST 300 early in their program of upper-level courses. Grade of C or better is required to graduate with BA in history.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HIST 301 - Classical Greece

Credits: 3 (NR)
Political, social, economic, and cultural history of classical Greece from development of the city-state through 5th century.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HIST 302 - Classical Rome

Credits: 3 (NR)
Political, social, economic, and cultural history of classical Rome from founding of the city through fall of Roman republic.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HIST 304 - Western Europe in the Middle Ages
HIST 305 - The Renaissance
Credits: 3 (NR)
Survey considering Renaissance as phenomenon rather than chronological period. Emphasizes growth of humanism in Italy in 14th and 15th centuries, development of new political concepts, and laicization of society. Includes transmission of these developments to transalpine Europe in late 15th and 16th centuries.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HIST 306 - The Reformation
Credits: 3 (NR)
Late medieval ecclesiastical conditions and reform movements, late scholasticism, Protestant Reformation, Catholic Reformation, dynastic rivalries, and religious wars. Concludes with Peace of Westphalia.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HIST 307 - Old Regime and Revolutionary Europe
Credits: 3 (NR)
Political, social, economic, and cultural history of Europe from 1648 to 1815. Crisis of authority, consolidation of the state, absolutism, colonial expansion, the Scientific Revolution and the Enlightenment, and the French Revolution and Napoleon.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HIST 308 - Nineteenth-Century Europe
Credits: 3 (NR)
History of Europe from Congress of Vienna to outbreak of World War I.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
HIST 309 - Europe in Crisis: 1914-1948

Credits: 3 (NR)
Two world wars, the Great Depression, and political and cultural revolutions transformed Europe as never before. Explores causes and consequences of these tumultuous events, and concludes with consideration of reconstruction that caps period.

Prerequisite(s): 45 credits or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HIST 312 - Nationalism in Eastern Europe

Credits: 3 (NR)
Examines history of modern Eastern Europe from mid-19th century through collapse of communist regimes in 1989, and includes focus on Yugoslav wars of 1990s. Nationalism provides organizing theme; topic approached through literature, political, social, cultural, and new media sources. Class sessions emphasize discussion of central issues and sources.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HIST 314 - History of Germany

Credits: 3 (NR)
Political, diplomatic, economic, social, and cultural development of Germany from dissolution of Holy Roman Empire to present.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HIST 322 - Modern Britain

Credits: 3 (NR)
History of Britain from mid-18th century to present. Focuses on social, political, and economic transformations of industrialization; culture of 19th-century industrial society; problems of late 19th-century economic competition and imperialism; creation of welfare state; and experience of post-World War II political, social, and economic realignments.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HIST 327 - The Soviet Union and Russia Since World War II

Credits: 3 (NR)
Analyzes the Soviet Union, the Cold War "enemy" of the United States, from victory in World War II under Joseph Stalin through collapse in 1991. Studies the fifteen independent countries that emerged from the Soviet collapse, including Russia, the
Baltic States, Ukraine, Belarus, Moldova, Central Asia, and the Caucasus, which continue to influence world politics and culture today.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**HIST 328 - Rise of Russia**

Credits: 3 (NR)  
Political, social, and cultural development of Russia from early times to the end of the 19th century.

Fulfills Mason Core requirement in global understanding.

**Notes:** Fulfills the college requirement in non-Western culture.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**HIST 329 - Modern Russia and the Soviet Union**

Credits: 3 (NR)  
Russia and the Soviet Union from the early 20th century to the present. Focuses on the Russian Revolution and the political, social, cultural, and economic developments of the Soviet and post-Soviet eras.

Fulfills Mason Core requirement in global understanding.

**Notes:** Fulfills the college requirement in non-Western culture.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**HIST 331 - Postwar United States, 1945-1973**

Credits: 3 (NR)  
Examines political, cultural, and economics history in the three decades after 1945. Themes include the emergence of the civil rights movement and feminism; the domestic and international events of the Cold War, especially the Vietnam War; and the rise and fall of the presidency's prestige in the years of the Great Society and Watergate.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**HIST 332 - United States since 1973**
Credits: 3 (NR)
Examines political, cultural, and economic history since the end of the Vietnam War. Themes include the shifting political economy of the country during the resurgence of conservatism, the political debates over culture and identity, and the waning of the Cold War and its replacement with other international concerns.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HIST 333 - The Automobile in the United States

Credits: 3 (NR)
Examines the biography of one of the most important characters in twentieth-century U.S. history: the automobile. Embraces the histories of business, policy, labor, the environment, technology, and culture, and seeks a holistic understanding of the role of the car in American life.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HIST 335 - The African American Experience in the United States: African Background to 1885

Credits: 3 (NR)
History of African American experience in United States including African origins; trans-Atlantic slave trade; development of slavery in colonial, revolutionary, and antebellum periods; abolitionist movements; and African American participation in Civil War and during Reconstruction.

Prerequisite(s): 6 credits of history, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HIST 336 - The African American Experience in the United States: Reconstruction to the Present

Credits: 3 (NR)
History of African American life in post-slavery America, and rise and consequences of racial segregation in 19th and 20th centuries. Examines African American response to continued racial inequality and repression. Covers great migration, urbanization, black nationalism, and civil rights era, as well as contemporary debates about race.

Prerequisite(s): 6 credits of history or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
HIST 337 - Race and Gender in American Sports

Credits: 3 (NR)
Examines how ideas about race and gender have affected sports in America from late 19th century to the 1980s. Will also consider how athletes and sporting activities have shaped American racial and gender paradigms.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HIST 338 - History of College Athletics

Credits: 3 (NR)
Examines America's unique blend of higher education and sports from 1870s to modern collaborations between college athletic programs and America's media outlets.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HIST 339 - History of Baseball

Credits: 3 (NR)
Examines development of baseball in U.S. context of labor, intellectual, economic and political events including racial segregation.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HIST 340 - Basketball and the American Experience

Credits: 3 (NR)
Explores history of basketball in the United States since the late 1800s. Examines how basketball reflects and informs attitudes toward race, ethnicity, gender, and national identity. Possible topics include YMCA movement, Jews in basketball, racial segregation, growth of college basketball, international politics, evolution of black aesthetic, ABA-NBA merger, women's basketball, Magic Johnson-Larry Bird rivalry, Michael Jordan, and basketball's professionalization, commercialization, and globalization.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HIST 341 - History of Sport in the United States

Credits: 3 (NR)
Examines the roots of American sport in colonial play and recreation, the emergence of organized and national sports, issues of gender and race in the sporting world, and the intersection of U.S. sport with events such as the Civil Rights Movement and the
HIST 350 - U.S. Women’s History

Credits: 3 (NR)
History of women and their changing status and gender roles in American society from colonial period through "second wave" of feminism in 1970s. Explores images and lives of women of different class, ethnic, and regional origins. Also focuses on women's political, economic, and legal conditions, and changes in them.

Prerequisite(s): 45 credits or permission of instructor.

HIST 351 - History of the Old South

Credits: 3 (NR)
History of South to outbreak of Civil War, with particular emphasis on rise of sectionalism. Focuses on development of distinct Southern culture through emergence of economic, political, social, agricultural, and intellectual institutions.

HIST 352 - The South since 1865

Credits: 3 (NR)
History of South during Reconstruction, Redeemer era, and New South, with particular emphasis on race relations. Covers political, economic, cultural, and intellectual development from aftermath of war.

HIST 353 - History of Traditional China

Credits: 3 (NR)
China from earliest times to period of modern Western intrusion. Development of traditional Chinese culture, society, and government.

Prerequisite(s): 6 credits of history or permission of instructor.

Notes: Fulfills the college requirement in non-Western culture.
HIST 354 - Modern China

Credits: 3 (NR)
China from 1644 to the People's Republic of China. Emphasizes coming of West and various stages of Chinese reaction.

Prerequisite(s): 6 credits of history or permission of instructor

Notes: Fulfills the college requirement in non-Western culture.

HIST 356 - Modern Japan

Credits: 3 (NR)
Japan from Meiji Restoration to World War II. Emphasizes Japan's modernization in face of challenge.

Fulfills Mason Core requirement in global understanding.

Notes: Fulfills the college requirement in non-Western culture.

HIST 357 - Postwar Japan

Credits: 3 (NR)
History of Japan from World War II to present. Examines Japanese experience of several key moments: Japan's defeat in Pacific War, reconstruction during U.S. occupation, rise to economic prominence during 1960s and 1970s, and cultural and international identity crisis during 1980s and 1990s.

Fulfills Mason Core requirement in global understanding.

Prerequisite(s): 45 credits or permission of instructor.

HIST 358 - Post-1949 China
Credits: 3 (NR)
Puts People's Republic of CHINA (PRC) into historical context by assessing legacies of China's socialist revolution (1949-1976) and post-socialist reforms (1978-present). Explores revolutionary heritage of the Chinese Communist Party, goals and agendas of China's socialist state, ideologies and policies shaping urban and rural development, individual agency and responses to revolutionary mass mobilization and market reforms.

Fulfills Mason Core requirement in global understanding.

Prerequisite(s): 6 credits of history or permission of instructor

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HIST 359 - Modern Iraq

Credits: 3 (NR)
Examines the politics of Iraq under the British mandate, as an independent state under the monarchy, and as a republic after the revolution of 1958, emphasizing the social composition of Iraq's people and its ruling elites.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HIST 360 - History of South Africa

Credits: 3 (NR)
Explores the historical processes that led to the rise of African kingdoms, colonialism, industrialization, resistance movements, and legalized segregation.

Fulfills Mason Core requirement in global understanding.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring, Summer

HIST 364 - Revolution and Radical Politics in Latin America

Credits: 3 (NR)
During 20th century, Latin America has witnessed both peaceful political movements and violent revolutions aimed at achieving social justice. Considers several of these movements in comparative perspective: Mexican Revolution, Arbenz government in Guatemala, Allende regime in Chile, Cuban and Nicaraguan revolutions, and Brazilian Worker's Party.

Fulfills Mason Core requirement in global understanding.

Prerequisite(s): 6 credits of history or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
HIST 365 - Conquest and Colonization in Latin America

Credits: 3 (NR)
Examines forms of conquest and colonization practiced by Aztec, Inca, Spanish, and Portuguese in what is now Latin America. Includes role of ideology and religion in imperial rule, use of warfare to create empires and colonies, and implementation of political and economic systems to rule subject people.

Fulfills Mason Core requirement in global understanding.

Prerequisite(s): 45 credits or permission of instructor.

Notes: Fulfills the college requirement in non-Western culture.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HIST 366 - Comparative Slavery

Credits: 3 (NR)
Examines systems of slavery from ancient world to modern world, with special emphasis on Atlantic slave trade and slave societies in Latin America and Anglo America. Considers impact of slaves and slavery on cultural, economic, and political systems in Africa and Americas from 16th to 19th centuries.

Prerequisite(s): 45 credits or permission of instructor.

Notes: Fulfills the college requirement in non-Western culture.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HIST 367 - History, Fiction, and Film in Latin America

Credits: 3 (NR)
Explores modern Latin American history through different types of texts: scholarly histories, historical novels, fictional films, documentary films, and oral history. Explores ways these texts produce knowledge about the past. What motivates different approaches? What counts as evidence? How do we know what really happened? How do we decide what mattered and what did not? Also introduces several important episodes in 20th century Latin American history.

Notes: Fulfills the college requirement in non-Western culture.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HIST 370 - War and American Society
Credits: 3 (NR)
Examines war and American society from the colonial period to the post-Cold War era, including how military institutions, war, and the preparation for war have affected American society, and how Americans have thought about military service, experience war, and made peace through their history. Special emphasis on civil-military relations and the role of war and militarism in American culture.

**Hours of Lecture or Seminar per week: 3**
**Hours of Lab or Studio per week: 0**

**HIST 373 - The Civil War and Reconstruction**

Credits: 3 (NR)
Analyzes the history of the American Civil War from its origins in the late 18th century to the withdrawal of federal troops from the south in 1877. Examines the political, social, and economic issues that led to war; the home fronts, war leadership, diplomacy, combat motivation, and grand strategy; problems associated with reconstituting the nation's political institutions; and the integration of millions of newly freed slaves.

**Hours of Lecture or Seminar per week: 3**
**Hours of Lab or Studio per week: 0**

**HIST 377 - The Vietnam War**

Credits: 3 (NR)
Covers the causes, major events, and legacies of America's Vietnam War, including an introduction to Vietnamese history and culture, American decisions for war, strategy and major military engagements, diplomacy and peace talks, and the aftermath of the conflict in Vietnam and United States.

**Hours of Lecture or Seminar per week: 3**
**Hours of Lab or Studio per week: 0**

**HIST 380 - Uncovering the U.S. Past Through Film**

Credits: 3 (NR)
Examines Hollywood films as historical sources that reveal the social, political, cultural and economic landscapes of their historical moment. Explores the ways films participate in pressing national debates over gender, race and ethnicity, and national security.

**Hours of Lecture or Seminar per week: 3**
**Hours of Lab or Studio per week: 0**

**HIST 385 - Humanities College to Career**

Credits: 1 (NR)
Focuses on career choices and effective self-presentation for soon-to-be graduating students with majors in the humanities.
Explores how skills typically learned in humanities majors can be leveraged for a successful transition to post-graduation employment.

Equivalent to ENGH 303, PHIL 393, FRLN 309.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0

**HIST 386 - Topics in History**

Credits: 1-6 (RT)
Study of historical topics of special interest.

**Notes:** Topics announced in advance. May be repeated for credit when topic is different.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0

**HIST 387 - Topics in Global History**

Credits: 3-6 (RT)
Study of historical topics or periods of special interest in global, Latin American, African, Asian, or Middle Eastern history.

Fulfills Mason Core requirement in global understanding.

**Notes:** Topics announced in advance. May be repeated for credit when topic is different. Fulfills the college requirement in non-Western culture.

Hours of Lecture or Seminar per week: 3-6
Hours of Lab or Studio per week: 0

**HIST 388 - Topics in European History**

Credits: 3 (RT)
Study of historical topics or periods of special interest.

**Notes:** Topics announced in advance. May be repeated for credit when topic is different.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**HIST 389 - Topics in U.S. History**
Credits: 3 (RT)
Study of historical topics or periods of special interest.

Notes: Topics announced in advance. May be repeated for credit when topic is different.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**HIST 390 - The Digital Past**

Credits: 3 (NR)
Teaches the fundamentals of information technology within the context of a history course. Students learn fundamentals and skills as well as how our society became so enamored of and dependent on these knowledge and information tools. Understanding a new technology requires understanding how new technologies transform the societies that embrace them. Emphasizes the use of free and open-source software whenever possible.

Fulfills Mason Core requirement in information technology (all).

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**HIST 391 - History of Virginia to 1800**

Credits: 3 (NR)
Discovery and settlement of Virginia. Colonial period with emphasis on development of representative government and race relations, Golden Age of Virginia dynasty, and coming of Civil War.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**HIST 392 - History of Virginia Since 1800**

Credits: 3 (NR)
Decision to secede, Civil War and Reconstruction, Readjustors and Populism, disfranchisement and Constitution of 1902, and rise of Senator Harry F. Byrd. Recent developments.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**HIST 393 - Topics in Film and History**

Credits: 3 (RT)
Study of historical periods or topics from perspective of feature films and documentaries.
Notes: Topics available in advance from the department. May be repeated for a maximum of 6 credits when topic is different. A maximum of 6 credits may be applied to the BA in history.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HIST 398 - Historical Study Abroad

Credits: 1-6 (RD)
Intended for participation in formally organized course offered by Center for Global Education during intersession or spring break.

Notes: May be repeated for a maximum of 6 credits with permission of department.

Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 0

HIST 399 - Internship

Credits: 1-9 (RD)
Approved work-study programs in cooperation with specific organizations including area museums; archives; historic sites; and local, state, and federal agencies.

Prerequisite(s): History majors with permission of undergraduate director.

Notes: Credit determined by department. May be repeated for a maximum of 9 credits.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0

HIST 401 - Colonial America

Credits: 3 (NR)
Intensive study of colonial American history from European origins through Revolutionary War.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HIST 403 - Revolutionary Era in American History, 1763-1812

Credits: 3 (NR)
Study of formative years of new republic from Treaty of Paris of 1783 to election of 1820.
HIST 404 - Jacksonian America, 1812-1854

Credits: 3 (NR)
Study of age of Andrew Jackson. Emphasizes democratic institutions that emerged as dominant influences in American society.

HIST 426 - The Russian Revolution

Credits: 3 (NR)
Era of revolutionary activity from 19th century to end of 1920s, with emphasis on Russian Revolutions of 1917. Explores why revolutionary situation developed; political, social, and cultural issues at stake; why it took various forms; and revolution's contribution to nature of Soviet state and post-Soviet problems.

Prerequisite(s): 45 credits or permission of instructor.

Notes: Fulfills the college requirement in non-Western culture.

HIST 431 - Medieval Intellectual Topics

Credits: 3 (NR)
Selected topics in intellectual history of Middle Ages. Topics vary, depending on discipline of instructor.

Equivalent to ENGH 421/FRLN 431, ENGL 431 (2010-2011 Catalog)

Notes: May be taken for credit by English or history majors.

HIST 435 - Society and Culture in Early Modern Europe

Credits: 3 (NR)
Examines social and cultural lives of Europeans from end of Middle Ages to Industrial Revolution. Emphasizes popular and elite culture, as well as bridges and interrelationships between them. Focuses on religious, artistic, literary, and recreational behavior. Covers political activity and riots, strikes, royal receptions, and rituals.
HIST 436 - European Society and Culture: 19th and 20th Centuries

Credits: 3 (NR)
Examines major cultural trends in Europe since French Revolution. Major themes include romanticism; socialism; Marxism; and social effect of modernization, science, and societies.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HIST 455 - History of Print Journalism

Credits: 3 (NR)
Development of print journalism from inception to present, with emphasis on interaction of technology, audience, and government intervention. Topics include birth of press; development of modern newspaper and American development, including Revolutionary and Civil wars; rise of independent press; and yellow journalism.

Equivalent to COMM 455

Prerequisite(s): 3 credits in COMM or HIST courses.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HIST 460 - Modern Iran

Credits: 3 (NR)
Modern Iran, from 1800 to present, in context of several broad themes: institutional structure of state; role of great powers in Iran and Iranian response to economic, military, technological, and ideological challenge posed by West; interaction of religion and other ideologies and politics; economic development and impact on politics and society; and ways historians have sought to understand and interpret modern Iranian history.

Fulfills Mason Core requirement in global understanding.

Prerequisite(s): 45 credits or permission of instructor.

Notes: Fulfills the college requirement in non-Western culture.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HIST 461 - Arab-Israeli Conflict
Overview of history of Arab-Israeli conflict. Examines conflict from various perspectives: over land and between competing nationalism and identities; in terms of national interests of various states, including Israelis and Palestinians as well as other Arab governments and great powers; and in terms of peace making and conflict resolution. Some knowledge of history of Middle East since World War I strongly advised.

Prerequisite(s): 45 credits or permission of instructor.

Notes: Fulfills the college requirement in non-Western culture.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HIST 462 - Women in Islamic Society

Credits: 3 (NR)
Surveys history of women in Islamic society from rise of Islam to present day. Examines historical processes that affected role and status of women in society, and specific topics around which issues of gender status and identity coalesced, especially in modern period.

Fulfills Mason Core requirement in global understanding.

Prerequisite(s): 6 credits of history or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HIST 465 - The Middle East in the 20th Century

Credits: 3 (NR)
Political, social, and cultural history of Middle East since World War I. Emergence of Israel, Arab nationalism, and political and economic influence of Middle East in world affairs.

Prerequisite(s): 6 credits of history or permission of instructor.

Notes: Fulfills the college requirement in non-Western culture.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HIST 466 - Origins of Conflict in Southern Africa

Credits: 3 (NR)
Explores historical origins of conflict in South Africa, focusing on themes of economic change, cultural interaction, and political consolidation during past five centuries.

Notes: Fulfills the college requirement in non-Western culture.
HIST 480 - Alexander the Great

Credits: 3 (NR)
Rise of Persia, Persian wars with Greece, subjugation of Greece by Philip II of Macedonia, and Alexander the Great and his conquest of Persian empire.

HIST 490 - Honors Directed Readings, Honors Directed Research

Credits: 3 (NR)
Students must have completed at least one course in the field, or with the professor, chosen for these honors courses.

Prerequisite(s): Admission to history honors program and permission of instructor

Notes: The 3 reading credits should be taken before 3 research credits, though they may be taken concurrently. Either may be taken concurrently with HIST 499. Linked, individualized courses, usually given by same instructor. Involves directed readings.

HIST 491 - Honors Directed Readings, Honors Directed Research

Credits: 3 (NR)
Students must have completed at least one course in the field, or with the professor, chosen for these honors courses.

Prerequisite(s): Admission to history honors program and permission of instructor

Notes: The 3 reading credits should be taken before 3 research credits, though they may be taken concurrently. Either may be taken concurrently with HIST 499. Linked, individualized courses, usually given by same instructor. Culminates in research paper related to subject of readings.

HIST 498 - Directed Readings/Research in History

Credits: 1-3 (RT)
Readings, research conducted on individual basis in consultation with instructor.
Prerequisite(s): History majors with 90 credits and permission of instructor.

Notes: May be repeated for a maximum of 6 credits. Only 3 credits may be applied to credits for degree.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0

HIST 499 - Senior Seminar in History

Credits: 3 (NR)
Research on specialized historical topic culminating in seminar paper and oral presentation. Synthesis course; students expected to integrate knowledge and skills acquired in Mason Core courses.

Fulfills Mason Core requirement in synthesis.

Fulfills writing intensive requirement in the major.

Designated as a research and scholarship intensive course.

Prerequisite(s): History majors with 90 credits, ENGL 302/ENGH 302, HIST 300, and completion or concurrent enrollment in all Mason Core courses.

Notes: Subject determined by instructor. Student may present no more than 3 credits for graduation credit. Must receive passing grade to graduate with BA in history.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

HIST 510 - Approaches to Modern World History

Credits: 3 (NR)
Introduces historical study of world beyond Europe and United States. Students read major theoretical works and case studies of particular regions. Examines imperialism, national identity, and various forms of popular resistance; familiarizes students with range of scholarly approaches, including world systems theory and subaltern studies.

Prerequisite(s): Admission to graduate program in history.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HIST 523 - Issues in American History

Credits: 1-3 (RT)
Reading, analysis of selected problems.
Notes: Open to advanced undergraduates and graduates. Topic determined by instructor. May be repeated for credit when content differs.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0

**HIST 524 - Issues in European History**

Credits: 3 (RT)
Reading, analysis of selected problems.

Notes: Open to advanced undergraduates and graduates. Topic determined by instructor. May be repeated for credit when topic is different.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**HIST 525 - Problems in Latin American History**

Credits: 3 (RT)
Analysis of selected problems. Emphasizes reading and discussion of historical interpretations, and development of bibliography.

Notes: May be repeated for credit when topic is different.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**HIST 535 - Problems in Comparative World History**

Credits: 3 (RT)
Investigates selected problems in global and comparative history, covering multiple countries or world regions.

Notes: May be repeated for credit when topic is different.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**HIST 555 - Problems in Asian History**

Credits: 3 (RT)
Discussion of readings and historical interpretations and compilation of a comprehensive bibliography on given theme.

Notes: Topics announced by instructor. May be repeated for credit when topic is different.
HIST 565 - Problems in African History

Credits: 3 (RT)
Analysis of selected problems in African history. Emphasis on reading and discussion of historical interpretations and development of bibliography.

Notes: May be repeated for credit when topic is different.

HIST 575 - Approaches to Middle East and Islamic History

Credits: 3 (NR)
Introduces students to the central issues and debates surrounding the study of the Middle East, Islam, and Muslim societies. Covers key methodological issues including the role of area studies vis-à-vis disciplinary approaches and debates on the politics of knowledge production and historiography.

HIST 585 - Problems in Middle Eastern History

Credits: 3 (RT)
Analyzes selected problem. Emphasizes reading and discussion of historical interpretations, and development of bibliography.

Notes: May be repeated for credit when topic is different.

HIST 598 - Historical Study Abroad

Credits: 1-3 (RT)
Intended for participation in formally organized course offered by the Center for Global Education.

Notes: May be repeated for a maximum of 6 credits.
HIST 601 - Themes in U.S. History I

Credits: 3 (NR)
Survey of U.S. History prior to 1877. Designed for individuals entering the graduate program who need to strengthen preparation in area, or who seek to enhance knowledge of latest interpretations in field. Stresses factual knowledge and its interpretation.

Prerequisite(s): Graduate standing.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HIST 602 - Themes in U.S. History II

Credits: 3 (NR)
Continuation of HIST 601.

Prerequisite(s): Graduate standing.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HIST 605 - Themes in European History I

Credits: 3 (NR)
Survey of European history from 1500 to 1815. Designed for individuals entering graduate program who need to strengthen preparation in this area, or who seek to enhance knowledge of latest interpretations in field. Stresses factual knowledge and its interpretation.

Prerequisite(s): Graduate standing.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HIST 606 - Themes in European History II

Credits: 3 (NR)
Survey of European history from 1815 to present. Designed for individuals entering graduate program who need to strengthen preparation in this area, or who seek to enhance knowledge of latest interpretations in field. Stresses factual knowledge and its interpretation.

Prerequisite(s): Graduate standing.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
**HIST 610 - The Study and Writing of History**

Credits: 3 (NR)
Methodology of the historian including techniques of research, use of documentation and other sources, development of bibliography, and synthesis of material.

**Prerequisite(s):** Graduate standing.

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0

**HIST 613 - The Colonial Origins of American Society**

Credits: 3 (NR)
Study of evolution of elements in colonial society that affect contemporary American institutions and patterns of behavior.

**Prerequisite(s):** Graduate standing.

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0

**HIST 615 - Problems in American History**

Credits: 1-6 (RT)
Readings and discussion of bibliographies, interpretations, and research trends in topics selected by instructor.

**Prerequisite(s):** Graduate standing.

**Notes:** May be repeated for credit when topic is different.

**Hours of Lecture or Seminar per week:** 1-6
**Hours of Lab or Studio per week:** 0

**HIST 616 - U.S. Westward Movement**

Credits: 3 (NR)
Investigates continuity and change in American West. Topics include economic development, ethnicity, rural and urban life, and role of federal government.

**Prerequisite(s):** Graduate standing.

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0
HIST 617 - Topics in the American Civil War Era

Credits: 3 (NR)
Joint project of instructor and students into various aspects of common topic in Civil War era, with emphasis on historiography and historical method.

Prerequisite(s): Graduate standing.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HIST 618 - The Age of Jackson, 1815-1854

Credits: 3 (NR)
Survey of social, cultural, intellectual, economic, and political changes in United States during period of rapid growth and expansion. Topics include second-party system; growth of sectionalism, nationalism, and expansionism; industrialization and spread of market economy; rise of romantic reform and evangelical religion; and growth of abolitionist and proslavery movements.

Prerequisite(s): Graduate standing.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HIST 619 - The Constitution, Civil Liberties, and the Supreme Court

Credits: 3 (NR)
Investigates evolution of civil liberties in American history, and interaction of three branches of government in applying various constitutional guarantees. Students read extensively in Supreme Court decisions and secondary literature, and undertake independent research.

Prerequisite(s): Graduate standing.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HIST 620 - Development of the Early Republic, 1783-1815

Credits: 3 (NR)
Investigates breakdown of Confederation, Constitutional Convention, and role of revolutionary ideology of republicanism. Discusses leadership and policies of republic in hostile international context. Students read extensively in monographic literature and prepare research paper.

Prerequisite(s): Graduate standing
**HIST 621 - Virginia and the American Revolution**

Credits: 3 (NR)
Detailed examination of Virginia society on eve of American Revolution, and role in events from 1750 to 1789. Combines lectures, discussion of major themes, ideas, and personalities.

Prerequisite(s): Graduate standing.

**HIST 623 - Recent U.S. History, 1945 to Present**

Credits: 3 (NR)
Selected political, social, economic, diplomatic, and cultural forces that shaped the post-World War II American experience.

Prerequisite(s): Graduate standing.

**HIST 624 - U.S. Diplomatic History**

Credits: 3 (NR)
Study of selected issues in American foreign relations and changing historical interpretations of American diplomacy.

Prerequisite(s): Graduate standing.

**HIST 626 - Approaches to American Culture**

Credits: 3 (NR)
Focuses on various approaches historians have taken to history of American culture: questions they asked, assumptions they made, disciplinary tools they used, and types of materials they analyzed. Concentrates on patterns of culture, and what they say about American past and present.

Prerequisite(s): Graduate standing.
HIST 628 - Immigration and Ethnicity in the United States

Credits: 3 (NR)
Examines immigration and ethnicity in America since 1840. Considers why immigrants came, from where, under what circumstances, and how they adapted. Examines immigration policy and American attitudes toward immigration and ethnicity.

Prerequisite(s): Graduate standing.

Notes: Conducted as readings colloquium.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HIST 629 - The Gilded Age and Progressive Era

Credits: 3 (NR)
Examines history of United States from 1877 to 1918, with attention to history of reform movements and politics, and social history of the period. Familiarizes with major issues and historical literature of the period.

Prerequisite(s): Graduate standing.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HIST 630 - U.S. Women's History

Credits: 3 (NR)
Wide-ranging survey of burgeoning field of women's history, emphasizing critical evaluation of sources and interpretation. Readings represent variety of approaches, which may include material culture studies, medical history, history of sexuality, political history, and social and cultural history.

Prerequisite(s): Graduate standing.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HIST 631 - Era of the American Revolution

Credits: 3 (NR)
Examines history and historiography of revolutionary era, with special emphasis on social and ideological interpretations of period. Includes events leading to War for Independence, war itself, and social and political effects of war on American society.
Prerequisite(s): Graduate standing.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**HIST 633 - Reconstruction**

Credits: 3 (NR)
Examines panoply of political, social, economic, and constitutional concerns from 1863 to 1880, as North and South struggled over outcome of Civil War. Addresses political institutions and power in postwar North and South, and place of former slaves in society, politics, and economy.

Prerequisite(s): Graduate standing.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**HIST 634 - Interwar America: 1918-1939**

Credits: 3 (NR)
Considers issues of United States between the two world wars. Explores various ways issues complemented and contradicted each other in rich and complex historical era.

Prerequisite(s): Graduate standing.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**HIST 635 - Problems in European History**

Credits: 3 (RT)
Investigates selected problems. Readings, discussions, development of bibliographies. Primary sources used where possible.

Prerequisite(s): Graduate standing.

Notes: May be repeated for credit when topic is different.

Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 0

**HIST 636 - Political Culture in Twentieth-Century Germany and Austria: Continuities and Discontinuities**
Recent interpretations of key political events of 20th century. Asks if there were fundamental continuities in structure of German and Austrian society that can be observed throughout the period under review.

Prerequisite(s): Baccalaureate degree in history or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HIST 637 - Great Britain: Empire to Commonwealth, 1870-1970

Credits: 3 (NR)
Examines rise of "new imperialism" in Great Britain from 1870 to end of empire, and gradual formation of Commonwealth of Nations.

Prerequisite(s): Graduate standing.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HIST 638 - Western Europe in the Post-War Period

Credits: 3 (NR)
Examines process of reconstruction, reconciliation, and integration in Western Europe in 20 years after World War II.

Prerequisite(s): Graduate standing.

Notes: Conducted as readings colloquium.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HIST 639 - Society and Politics in Western Europe, 1750-1914

Credits: 3 (NR)
Focuses on changes in social conditions and ramifications in political life. Attention to urbanization of workers, changes in peasantry, growth of middle classes, decline of nobility, and major political developments and expansion of liberal reforms.

Prerequisite(s): Graduate standing.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HIST 640 - Metropolitan Cities of Europe in the Nineteenth and Twentieth Centuries
Credits: 3 (NR)
Studies individual cities, and investigates particular cities in depth. Considers economic, social, cultural, and political features of urban life.

**Prerequisite(s):** Graduate standing.

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0

**HIST 642 - Humanism and the Renaissance**

Credits: 3 (NR)
The Renaissance as a unique period in European cultural history from ca. 1350 to 1520. Concentrates on Italian situation as standard, with consideration given to manifestations of Renaissance in northern Europe, especially Germany, until Reformation. Focuses on recent studies of political, social, intellectual, and religious changes. Students write class reports and a larger bibliographic paper.

**Prerequisite(s):** Graduate standing.

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0

**HIST 643 - Religion and Society in the Reformation Era**

Credits: 3 (NR)
The Reformation, ca. 1500 to 1650, was a time of major religious, intellectual, social, and political upheaval in European history. Investigates reasons for changes, and effects on European society. First half focuses on Germany, but major events throughout Europe are studied.

**Prerequisite(s):** Graduate standing.

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0

**HIST 644 - Society and Culture in Early Modern Europe**

Credits: 3 (NR)
Overview of most recent historical work on social and cultural history of premodern West, ca. 1400 to 1800. Uses theoretical approaches and empirical methodologies of other disciplines, especially social anthropology, sociology, and literary theory, to shed new light on popular culture, class, manners, taste, rituals, religion, language, gender, and the state. Formulates new topics of research and poses new questions, and suggests new approach to more traditional topics such as politics, religion, and ideas.

**Prerequisite(s):** Graduate standing.

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0
HIST 645 - The Russian Revolution and the Origins of the Soviet State

Credits: 3 (NR)
Period between 1890 and 1924 with concentration on sources of Bolshevism, problems of old regime as they led to revolutions of 1905 and 1917, and establishment of new regime and its survival in environment of foreign and civil war.

Prerequisite(s): Graduate standing.
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HIST 670 - Introduction to Behavioral History

Credits: 3 (NR)
Analyzes and investigates the historical origins and development of contemporary behaviors and values, with particular emphasis on how these behaviors and values, as well as our perceptions of them, have changed over time and place.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HIST 675 - Problems in Military History

Credits: 3 (RD)
Readings and discussion of bibliographies, interpretations, and research trends in military history topics selected by the instructor.

Prerequisite(s): Graduate standing or permission of instructor.
Notes: May be repeated once when topic is different.
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HIST 677 - The Vietnam War

Credits: 3 (NR)
Considers the causes, major events, and historiographic debates of America’s Vietnam War including the war’s antecedents in Vietnamese history, American decisions for war, strategy and major military engagements, the American antiwar movement, and diplomacy and peace talks.

Prerequisite(s): Graduate standing or permission of instructor.
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
HIST 679 - War and Remembrance

Credits: 3 (NR)
Considers various approaches to the study of public or collective memory as it pertains to war, in particular how people around the world have constructed memories of war and how those memories have been expressed in literature, popular culture, memorials, and commemorative activities.

Prerequisite(s): Graduate standing or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HIST 688 - Topics in History and New Media

Credits: 3 (RT)
Covers specific topics in history and new media selected by the instructor, with an emphasis on combining theoretical analysis and readings with hands-on projects and problem-solving.

Notes: May be repeated for a maximum of 12 credits when topic is different.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HIST 689 - Teaching and Learning History in the Digital Age

Credits: 3 (NR)
Examines what happens when instructors integrate new media technology into history classroom. Includes consideration of learning theory, new media theory, and an in-depth examination of state-of-the-art in practice. In the final third of semester, students produce practicum that is either working history teaching web site or concept paper for site, depending on student's degree of technical sophistication. No prior facility with information technology required. Course appropriate for graduate students working as teachers or planning career in teaching.

Prerequisite(s): Graduate standing.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HIST 690 - The Administration of Archives and Manuscripts

Credits: 3 (NR)
Introduces principles and practices of managing records and administering archival and manuscript collections, public and private. Designed for graduate students with special interest in historical sources as well as for those specializing in applied history.
Prerequisite(s): 6 credits of U.S. history, or permission of department. Graduate standing.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HIST 691 - Museum Studies

Credits: 3 (NR)
General introduction to museums of history and museum studies in the United States, intended for interested citizen as well as for assistance to students in course and career choices. Explores development, present state, and future possibilities of U.S. Museums, with some reference to international developments.

Prerequisite(s): 6 credits of U.S. history or permission of department. Graduate standing.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HIST 692 - Historical Editing

Credits: 3 (NR)
Introduces fundamentals of historical editing of documents, including microform, word processing, and computer techniques. Designed for those seeking introduction to various areas of applied history, and those intending to edit historical documents for publication.

Prerequisite(s): Graduate standing.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HIST 693 - Historic Preservation

Credits: 3 (NR)
General introduction to historic preservation in the United States, intended for interested citizen and to assist students in course and career choices. Explores development, present state, and future possibilities of historic preservation in the United States, with some reference to international aspects of preservation.

Prerequisite(s): Graduate standing and 6 credits of U.S. history or permission of department.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HIST 694 - Digital Public History
Credits: 3 (NR)
Introduces students to the theories and methods central to doing digital public history, and develops the skills necessary for students to plan and execute their own projects. Topics include digital strategy development, developing effective digital exhibits, describing and publishing digital collections, mobile computing and curating the landscape, creating participatory history projects, and effective methods for evaluating digital public history work.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**HIST 695 - History Symposium**

Credits: 1-3 (NR)
Subject of academic and community interest pursued through discussions and lectures by distinguished guest instructors.

Prerequisite(s): Graduate standing.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**HIST 696 - Clio Wired: An Introduction to History and New Media**

Credits: 3 (NR)
Students with limited computer competency should consult department before enrolling. Introduces changes that new media and technologies are bringing to how we research, write, present, and teach about the past. Students explore theoretical and historical issues as well as learn hands-on skills in digital history.

Prerequisite(s): Graduate standing.

Notes: Students with limited computer competency should consult with department before enrolling.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**HIST 697 - Creating History in New Media**

Credits: 3 (NR)
Seminar; students create original historical projects in digital media.

Prerequisite(s): HIST 696 or permission of instructor. Graduate standing.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**HIST 698 - Programming in History and New Media**
Provides students with advanced conceptual and technical skills to enhance historical practice and research in the digital arena. Focuses on in-depth analysis of theoretical frameworks and on developing proficiency in a variety of programming languages and tools for humanistic and historical research.

**Prerequisite(s):** HIST 696, 697, or literacy in new media.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**HIST 711 - Research Seminar in U.S. History**

Credits: 3 (RT)  
Research in specialized topics using primary sources.

**Prerequisite(s):** Admission to MA in history, PhD in cultural studies, or a degree in the Higher Education Program and HIST 610 or permission of department.

**Notes:** May be repeated for a maximum of 6 credits.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**HIST 731 - Research Seminar in European History**

Credits: 3 (RT)  
Research in specialized topics using primary sources.

**Prerequisite(s):** Admission to MA in history, PhD in cultural studies, or a degree in the Higher Education Program and HIST 610 or permission of department.

**Notes:** May be repeated for a maximum of 6 credits.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**HIST 751 - Research Seminar in Comparative World History**

Credits: 3 (NR)  
Research seminar requiring comparative research and analysis. Organized around significant topic or theme in field of world history.

**Prerequisite(s):** HIST 610 or permission of department.

**Notes:** Topics vary from year to year. Maximum 6 credits may be earned.
HIST 790 - Comprehensive Readings in U.S. History

Credits: 3 (NR)
Integrates past work in major field and fills gaps before comprehensive exam. After a review of graduate experience, student and instructor design reading list to round out preparation for exam.

Notes: To be taken in final semester of program.

HIST 791 - Comprehensive Readings in Comparative World History

Credits: 3 (NR)
Integrates past work in major field and fills gaps before comprehensive exam. After a review of graduate course work, student and instructor design reading list to round out preparation for exam.

Notes: To be taken in final semester of program.

HIST 792 - Comprehensive Readings in European History Since 1500

Credits: 3 (NR)
Integrates past work in major field and fills gaps before comprehensive exam. After review of graduate experience, student and instructor design reading list to round out preparation for exam.

Notes: To be taken in final semester of program.

HIST 794 - Internship in Applied History

Credits: 3-6 (RD)
All internship placements must be approved by the department to ensure suitability to student's program. Introduces applied history through work and study at historical museum, site, library archive, editing project, or other approved agency.

Prerequisite(s): Admission to graduate program in history and 3 hours of applied history.
Notes: May be repeated for a maximum of 6 credits.

Hours of Lecture or Seminar per week: 2-3
Hours of Lab or Studio per week: 0
Grading: Graduate Special

HIST 795 - Practicum in Digital History

Credits: 3 (RD)
Exposes students to various projects in digital history through work and study at the Center for History and New Media. All placements must be approved by CHNM to ensure the suitability of students and projects.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
Grading: Graduate Special

HIST 796 - Directed Readings

Credits: 1-6 (RD)
Independent reading on topic agreed to by student and faculty member.

Notes: May be repeated for a maximum of 6 credits.

Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 0

HIST 798 - Directed Research and Writing in History

Credits: 3 (NR)
Intended for students in department's predoctoral track who are not writing master's thesis. Goal is to produce substantial and original contribution to historical knowledge on model of article in scholarly journal.

Prerequisite(s): Admission to MA program, HIST 610, and research seminar.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
Grading: Graduate Special

HIST 799 - Thesis

Credits: 1-6 (RD)
Master's thesis research and writing under direction of faculty committee.

Notes: May not be taken prior to successful completion of comprehensive exam.
HIST 801 - New Developments in History

Credits: 3 (NR)
Survey of current developments in historical analysis and methodology.

Prerequisite(s): Admission to doctoral program.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HIST 802 - Readings for Doctor of Arts in Community College Education

Credits: 1-6 (RT)
Intensive reading of recent scholarship in broad areas of historical study. With advisor, students develop readings list and define at least three areas in which to prepare readings courses.

Prerequisite(s): Admission to doctor of arts in community college education program to study history.

Notes: May be repeated for credit.

Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 0

HIST 803 - Doctoral Readings for Major Field

Credits: 3 (RT)
Independent readings for PhD students on topic agreed on by student and instructor, taken in preparation for completing major field exam. Should be broadly comprehensive of field, and cover major historical themes and historiographical debates.

Prerequisite(s): Admission to doctoral program.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HIST 804 - Doctoral Readings for Minor Field

Credits: 3 (RT)
Independent readings for PhD students on topic agreed on by student and instructor, taken in preparation for completing minor field statement. Designed to help student master literature of subfield that is subject of field statement.
Prerequisite(s): Doctoral standing.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HIST 810 - History Doctoral Colloquium

Credits: 1 (NR)
Introduces array of scholars and scholarship through discussions of innovative historical events, important theories, and significant methodological breakthroughs in history.

Prerequisite(s): Doctoral standing.

Notes: May be taken for credit 6 times.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0
Grading: S/NC

HIST 811 - Doctoral Research Seminar

Credits: 3 (NR)
Students pursue research projects in their areas of specialization.

Prerequisite(s): Doctoral standing.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HIST 998 - Doctoral Dissertation Proposal

Credits: 1-6 (RD)
Work on research proposal that forms basis for doctoral dissertation.

Prerequisite(s): Advancement to candidacy

Notes: May be taken for maximum 6 credits.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0
Grading: S/NC

HIST 999 - Doctoral Dissertation Research
Credits: 1-12 (RD)
Doctoral dissertation research and writing under direction of student's dissertation committee.

Prerequisite(s): Completion of HIST 998.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0
Grading: S/NC

**Honors Program in General Education (HNRS)**

Offered by the College of Humanities and Social Sciences

Only students enrolled in the Honors Program are eligible to take HNRS courses. HNRS 110 must be taken in the first semester.

**HNRS 110 - Research Methods**

Credits: 4 (NR)
Prepares students in humanities and social sciences research practices. Offers students the opportunity to learn about research practices in the natural sciences, mathematics, economics, management, and law. Students learn how to choose and focus a research question, find and analyze sources, organize evidence in an essay shaped by an original thesis, write clearly, and address an audience of scholars.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 1

**HNRS 122 - Reading the Arts**

Credits: 3 (NR)
Explores relationship of parts to whole in artworks, connections among different art forms, and links between art and its historical context.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**HNRS 130 - Conceptions of Self**

Credits: 3 (NR)
Drawing from appropriate works in social sciences, arts, and humanities, examines different conceptions and definitions of the self from diverse cultures and historical contexts.

Prerequisite(s): HNRS 110 or HNRS 210. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
HNRS 131 - Contemporary Society in Multiple Perspectives

Credits: 3 (NR)
Explores methods and perspectives in social sciences and humanities to evaluate contributions of different disciplines to understanding significant social issues and their global ramifications and our responsibilities as citizens of the world.

Prerequisite(s): HNRS 110 or HNRS 210. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HNRS 210 - Research Methods II

Credits: 2 (RD)
Prepares students transferring into the Honors College in humanities and social sciences research practices. Students learn how to choose and focus a research question, find and analyze sources, organize evidence in an essay shaped by an original thesis, write clearly, and address an audience of scholars.

Prerequisite(s): Admission to Honors College.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 0

HNRS 211 - Mentorship in Undergraduate Research

Credits: 0-2 (RD)
Students learn to use their own research experience as a tool to guide beginning scholars: mentoring students in Honors 110, Research methods, through individual workshops, in larger workshops, and through oral presentations.

Prerequisite(s): HNRS 110.

Hours of Lecture or Seminar per week: 0-2
Hours of Lab or Studio per week: 0
Grading: Satisfactory/No Credit

HNRS 230 - Cross-Cultural Perspectives

Credits: 3 (NR)
Enables students to broaden cultural horizons and understand human behavior by studying societies in depth and in comparison.

Prerequisite(s): HNRS 110 or HNRS 210. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
HNRS 240 - Reading the Past

Credits: 3 (NR)
Considers constructions of historical narratives by examining significant current topics such as revolution, race, empire, and religion over time. Considers how public narratives about history are constructed.

Prerequisite(s): HNRS 110 or HNRS 210. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HNRS 310 - Honors College Connects I

Credits: 0 (RD)
The first of a two-semester course in which students work in groups on long-term service projects coming from community nonprofit organizations.

Prerequisite(s): HNRS 110 or HNRS 210.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0
Grading: Satisfactory/No Credit

HNRS 311 - Honors College Connects II

Credits: 0 (RD)
A continuation of HNRS 310, culminating in student presentations of their results to the community nonprofit organizations and constituents of the Honors College.

Prerequisite(s): HNRS 110 or HNRS 210 and HNRS 310.

Grading: Satisfactory/No Credit

HNRS 312 - Research in the Public Sphere

Credits: 3 (RD)
Building on projects begun in HNRS 310, students use research/scholarship skills to address community problems presented by nonprofit organizations.

Designated as a research and scholarship intensive course.

Prerequisite(s): HNRS 110 or HNRS 210 and 310 or permission of the instructor.
Corequisite(s): HNRS 311 or permission of the instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
Grading: Satisfactory/No Credit

HNRS 353 - Technology in the Contemporary World

Credits: 3 (NR)
Analyzes emergence and impact of specific technologies on contemporary cultures. Explores television, automobile, newspapers, Internet, and computer games from historical, scientific, political, economic, and global perspectives.

Prerequisite(s): HNRS 110 or HNRS 210. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HNRS 410 - Thesis Proposal

Credits: 2 (RD)
Provides guidance in research methods to students writing an honor thesis proposal as well as workshop for critiquing works in progress and understanding the research process in multiple disciplines.

Prerequisite(s): HNRS 110 or HNRS 210.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 0
Grading: Satisfactory/No Credit

HNRS 411 - Honors College Thesis

Credits: 1 (RD)
Directed research on topic agreed on by student, advisor, and the Honors College.

Prerequisite(s): HNRS 110 or HNRS 210 and HNRS 410 of permission of instructor.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0
Grading: Satisfactory/No Credit

HNRS 490 - Undergraduate Apprenticeship

Credits: 1-3 (NR)
Independent work with a faculty mentor on an inquiry-based project involving research, the arts, design, or teaching and...
mentoring.

Prerequisite(s): 45 credits and acceptance into the Undergraduate Apprenticeship Program.

Notes: This course is open only to undergraduates who have been accepted to the Undergraduate Apprenticeship Program.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0

Honors Program Sciences (HNRT)

HNRT 125 - A Liberal Arts Approach to Calculus

Credits: 3 (NR)
Assumes understanding of basic algebra and functions. Studies exponential models and develops mathematical concepts of limit and infinity including the topic of derivatives.

Equivalent to HNRS 125 (2010-2011 Catalog)

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

HNRT 225 - Applied Calculus

Credits: 3 (NR)
A second course in the theory and applications of calculus for nonSTEM students. Topics include exponential models in the life sciences and business, and may include improper integrals and infinite series, differential equations, or probabilities.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

HNRT 226 - Topics in Quantitative Analysis

Credits: 3 (NR)
Studies selected topics of special interest to honors students with suitable preparation.

Equivalent to HNRS 226 (2010-2011 Catalog)

Notes: For students who have taken calculus in high school. HNRT 226 is an alternative to HNRT 125

Hours of Lecture or Seminar per week: 3
HNRT 227 - Scientific Thought and Processes I

Credits: 4 (NR)
Explores and integrates principles of classical and modern science through study of such topics as cosmology, evolution, ecology, mechanics, relativity, and quantum physics.

Equivalent to HNRS 227 (2010-2011 Catalog)

Notes: Includes a weekly lab session.

HNRT 228 - Scientific Thought and Processes II

Credits: 4 (NR)
Explores and integrates principles of classical and modern science through study of such topics as cosmology, evolution, ecology, mechanics, relativity, quantum physics, and the environment.
Designated a Green Leaf Course.

Equivalent to HNRS 228 (2010-2011 Catalog)

Prerequisite(s): HNRT 227

Notes: Includes a weekly lab session.

Human Development and Family Science (HDFS)

HDFS 200 - Individual and Family Development

Credits: 3 (NR)
Examines how individuals and families function and develop over the lifespan. Uses a multidisciplinary approach to integrate theories of family science and human development emphasizing the role of contextual factors in contemporary families' lives.
Explores the impact of gender, socioeconomics, race/ethnicity, culture, and immigrant status on human development and family relationships. Introduces a basic model of scientific inquiry and theorizing.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall, Summer, Spring

### HDFS 300 - Individual and Family Services Delivery

Credits: 3 (NR)  
Overview of human services delivery with a focus on families. Explores the historical and social contexts as well as the theoretical orientations of systems that shape delivery of services to families. Examines: 1) economic and cultural barriers that prevent families from gaining access to services; 2) social policy surrounding services for families; 3) ethical and legal issues in family services.

**Prerequisite(s):** HDFS 200.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall, Summer, Spring

### HDFS 400 - Advanced Family Processes

Credits: 3 (NR)  
Examines family system dynamics and processes, with an emphasis on cultural and contextual factors that influence family functioning and well-being over the lifespan. Examines both healthy and dysfunctional family processes (including abuse, neglect, and family violence). Explores evidence-based practices and interventions that promote family health, resilience, and well-being.

**Prerequisite(s):** HDFS 200 or permission from instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall

### HDFS 401 - Family Law and Public Policy

Credits: 3 (NR)  
Examines contemporary family life and the impact of government laws, policies, and programs on families over time and across contexts and cultures. Explores the intended and unintended consequences of policies for diverse families across a variety of policy matters, from anti-poverty and social welfare policies to health and environmental policies.

**Prerequisite(s):** HDFS 200 or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Spring
HDFS 498 - Internship and Analysis in Human Development and Family Science

Credits: 3 (NR)
First course in a two-course series that supports students in their internship and in transitioning from student to professional. Enables students to discuss work-related experiences within the context of developmental and family theories and research. Fosters and promotes professional development through class and small group discussions, activities, lectures, guest speakers, and practical assignments.

Prerequisite(s): HDFS 300.

Notes: Students will have 135 contact hours for the semester; however, 125 will be in the field and 10 in the classroom.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0
When Offered: Fall, Summer, Spring

HDFS 499 - Advanced Internship & Analysis in Human Development and Family Science

Credits: 3 (NR)
Accompanies the second semester of the required internship experience. Supports students in the development and implementation of a program for staff and/or clients at internship site. Examine internship-related experiences within the context of developmental and family theories and empirical research. Contemplate and prepare for the transition to professional.

Prerequisite(s): HDFS 498.

Notes: Students will have 135 contact hours for the semester; however, 125 will be in the field and 10 in the classroom.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0
When Offered: Fall, Summer, Spring

Information Security and Assurance (ISA)

Offered by the Volgenau School of Engineering

ISA 562 - Information Security Theory and Practice

Credits: 3 (NR)
A technical introduction to the theory and practice of information security, which serves as the first security course for the MS-ISA degree, is required as a prerequisite for all subsequent ISA courses (at the 600 and 700 levels) and subsumes most topics covered by the CISSP examination. Also serves as an entry-level course available to non-ISA students, including MS-CS, MS-IS, and MS-SWE students.

Prerequisite(s): INFS 501, 515, 519, and SWE 510, or permission of instructor.
ISA 563 - Fundamentals of Systems Programming

Credits: 3 (NR)
Introduces systems and network programming for UNIX and Windows using lectures and hands-on labs. Covers ANSI C programming, system libraries and APIs, forking and threads, interprocess communications, synchronization, Windows API, and code debugging.

Prerequisite(s): INFS 515 and INFS 519 or equivalent.

ISA 564 - Security Laboratory

Credits: 3 (NR)
Provides hands-on experience in configuring and experimenting with commodity-networked systems and security software in a live laboratory environment, with the purpose of understanding real-world security threats. Takes both offensive and defensive approaches and exposes students to a variety of real-world attacks, including viruses, worms, rootkits, and botnets. Possible mitigation and defending mechanisms, such as firewalls and intrusion detection software, also covered.

Prerequisite(s): ISA 562 and ISA 563 or equivalent.

ISA 650 - Security Policy

Credits: 3 (NR)
Focuses on security policy and its management for information systems having national and international connectivity. Issues include legal, international, cultural, and local factors. Students are expected to participate regularly in presenting material, in discussion of recent security issues, and by writing short papers on major current issues.

Prerequisite(s): ISA 562.

ISA 652 - Security Audit and Compliance Testing

Credits: 3 (NR)
Presents the fundamental concepts of the IT-security audit and control process that is being conducted in a plethora of
environments, including government, the financial industry, and the healthcare industry. The goal of this course is to enable the students to structure and perform audits based on the specifications of Sarbanes-Oxley, HIPAA, and FISMA audit programs. Covers all the CISA certification requirements in depth. Students completing the course are encouraged to attempt the certification exam on their own.

Prerequisite(s): ISA 562.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ISA 656 - Network Security

Credits: 3 (NR)
An in-depth introduction to the theory and practice of network security. It assumes basic knowledge of cryptography and its applications in modern network protocols. Studies firewalls architectures and virtual private networks and provides deep coverage of widely used network security protocols such as SSL, TLS, SSH, Kerberos, IPSec, IKE, and LDAP. It covers countermeasures to distributed denial of service attacks, security of routing protocols and the Domain Name System, e-mail security and spam countermeasures, wireless security, multicast security, and trust negotiation.

Prerequisite(s): ISA 562 and INFS 612 or CS 555.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ISA 673 - Operating Systems Security

Credits: 3 (NR)
Covers fundamentals and advanced topics in operating system (OS) security, including OS-level security mechanisms and policies in investigating and defending against real-world attacks on computer systems, such as self-propagating worms and large-scale botnets. Basic OS security techniques, such as logging, system call auditing, and memory protection, will be discussed. Recent advanced techniques, such as honeypots and honeyfarms, system randomization, vulnerability fingerprinting, and virtualization, will also be introduced.

Prerequisite(s): ISA 562.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ISA 674 - Intrusion Detection

Credits: 3 (NR)
Studies methodologies, techniques, and tools for monitoring events in computer system or network, with the objective of preventing and detecting unwanted process activity and recovering from malicious behavior. Topics include types of threats, host-based and network-based information sources, vulnerability analysis, denial of service, deploying and managing intrusion detection systems, passive versus active responses, and designing recovery solutions.

Prerequisite(s): ISA 564 and ISA 656.
ISA 681 - Secure Software Design

Credits: 3 (NR)
Theory and practice of software security, focusing in particular on some common software security risks, including buffer overflows, race conditions and random number generation, and the identification of potential threats and vulnerabilities early in the design cycle. Emphasis is on methodologies and tools for identifying and eliminating security vulnerabilities, techniques to prove the absence of vulnerabilities, and ways to avoid security holes in new software and on essential guidelines for building secure software. Explores how to design software with security in mind from the ground up and integrate analysis and risk management throughout the software life cycle.

Equivalent to SWE 781 (2012-2013 Catalog), SWE 681.

Prerequisite(s): SWE 619.

ISA 697 - Topics in Information Security

Credits: 1-6 (RT)
Special topics in information security and assurance not occurring in regular ISA sequence.

Prerequisite(s): Permission of instructor.

Notes: May be repeated for credit when distinct offerings of course differ in subject.

ISA 763 - Security Protocol Analysis

Credits: 3 (NR)
Teaches how to design, understand, verify, and test communication protocols so they meet their objectives of recognizing the basic components of a communication protocol; specifying security properties accurately; modeling actors and mal-actors against which a protocol ought to be secure; discussing verification and testing methods and their limitations by ensuring that the specified protocol satisfies stated security objectives in the presence of specified mal-actions; designing a medium-size protocol that satisfies a specification of requirement; using existing tools to specify and verify security protocols; and testing protocols for satisfying their security objectives.

Prerequisite(s): ISA 656.
**ISA 764 - Security Experimentation**

Credits: 3 (NR)
Teaches how to conduct security experimentations and empirically demonstrate, validate, and evaluate security vulnerabilities, exploits, and defense mechanisms. By the end of the course, students will gain a deeper understanding and first-hand experience on capturing packets of interests from both wired and wireless networks, and replying interested network flows and how shellcode various buffer overflows attacks, worms, spyware, rootkits, botnets, anonymous communication and traceback mechanisms work.

**Prerequisite(s):** ISA 564 and ISA 656.

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0

**ISA 785 - Research in Digital Forensics**

Credits: 3 (NR)
Focuses on research-related aspects of digital forensics including open problems in digital forensics, countermeasures against digital forensics, and fundamental and practical limitations of current digital forensics techniques. Also covers currently established techniques and tools for digital forensics as well as common legal and ethical issues.

**Prerequisite(s):** ISA 562 and INFS 612 or CS 555.

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0

**ISA 796 - Directed Readings in Information Security**

Credits: 3 (RD)

Research and analysis of contemporary problem in information security.

**Prerequisite(s):** Graduate standing in information security and assurance, with at least 12 prior credits in MS.

**Notes:** Prior approval required by faculty sponsor who supervises student's work. To register, students must complete independent study form available in department office. It must be initialed by faculty sponsor and approved by department chair. Written report also required. Maximum of 6 credits may be earned.

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0
**Grading:** Graduate Special

**ISA 797 - Advanced Topics in Information Security**
Credits: 3 (RT)
Special advanced topics not occurring in regular ISA sequence.

Prerequisite(s): Permission of instructor.

Notes: May be repeated for credit when distinct offerings of course differ in subject.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ISA 798 - Research Project

Credits: 3 (RD)

Research project chosen under guidance of full-time graduate faculty member, resulting in written technical report.

Prerequisite(s): 18 credits applicable toward MS.

Notes: Prior approval required by faculty sponsor who supervises student's work. To register, students must complete independent study form available in department office. It must be initialed by faculty sponsor and approved by department chair.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
Grading: Graduate Special

ISA 799 - Thesis

Credits: 1-6 (RD)
Original or expository work chosen and completed under supervision of graduate faculty member, which results in technical report accepted by three-member faculty committee. Report must be defended in oral presentation.

Prerequisite(s): 18 credits applicable toward MS or permission of instructor.

Notes: To register, students must complete independent study form available in department office. It must be initialed by faculty sponsor and approved by department chair.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
Grading: Satisfactory/No Credit

ISA 862 - Models for Computer Security

Credits: 3 (RD)
This class will be focused on current research in Security with emphasis in Network and Software Security.
Prerequisite(s): ISA 562.

Notes: May be repeated with change in topic.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

ISA 863 - Advanced Topics in Computer Security

Credits: 3 (RD)
Current topics of advanced research. Content varies depending on faculty interests, research developments, and student demand. Requires substantial student participation. May include formal models for computer security, multilevel data models, multilevel database management system architectures, secure concurrency control protocols, distributed secure system architectures, integrity models and mechanisms, security policy, and requirements analysis.

Prerequisite(s): ISA 562.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

Information Systems (INFS)

Offered by the Volgenau School of Engineering.

Students may attempt an undergraduate course taught by the Volgenau School of Engineering twice. A third attempt requires approval of the department offering the course.

INFS 315 - High-Level Programming Languages

Credits: 3 (NR)
Studies structure and application of high-level languages by stressing design and implementation of data types, data structures, and algorithms. Includes computing lab. Credit does not count toward requirements for major in computer science.

Prerequisite(s): INFS 310 or CS 112.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

INFS 501 - Discrete and Logical Structures for Information Systems

Credits: 3 (NR)
Study of discrete and logical structures for information systems analysis and design including basic set theory and proof techniques, propositional and predicate logic, trees and graphs, finite state machines, formal languages and their relation to automata, computability and computational complexity, formal semantics-operational, axiomatic and denotational approaches.
Prerequisite(s): 6 credits of undergraduate mathematics.

Notes: Credit cannot be applied to a graduate degree in the Volgenau School or the BS degree in computer science.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

INFS 515 - Computer Organization Course and Operating Systems

Credits: 3 (NR)
Computer hardware architecture concepts including number systems, machine representation of numbers, instruction set formats, addressing techniques, memory organization, internal processor structure and operation. Symbolic assembly language fundamental operating systems concepts: process synchronization and scheduling, interprocess communication, memory management, virtual memory, deadlocks, file I/O and disk management, and LINUX operating system case studies.

Prerequisite(s): Undergraduate courses or equivalent knowledge in structured programming in a high-level language.

Notes: Credit cannot be applied to a graduate degree in the Volgenau School or the BS degree in computer science.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

INFS 519 - Program Design and Data Structures

Credits: 3 (NR)
Study of the fundamentals of data structures and algorithms applied in programming solutions to application problems. The course stresses programming in a modern high-level language. Laboratory required.

Prerequisite(s): Undergraduate courses or equivalent knowledge in structured programming in a high-level language.

Notes: Credit cannot be applied to a graduate degree in the Volgenau School or the BS degree in computer science.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

INFS 612 - Principles and Practices of Communication Networks

Credits: 3 (NR)
Introduces principles of computer networks and applications to Internet. Discusses details of layering, protocols, performance, resource allocation, management, security and other contemporary issues related to networks. Examples of course material are protocols such as HTTP(S), DNS, TCP/IP, RSVP, SNMP, algorithms such as Dijkstra's link state routing; and security measures such as firewalls and encryption, the principles behind them and analysis of performance.

Prerequisite(s): INFS 501, 515, 519, and SWE 510, or equivalent
Notes: No substitutions can be made for this class.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

INFS 614 - Database Management

Credits: 3 (NR)
Introduces database systems, emphasizing study of database models and languages and practice of database design and programming. Topics include Entity-Relationship model, relational model and its formal query languages, SQL, theory of relational database design, and object-oriented and logic-based databases.

Prerequisite(s): INFS 501, 515, 519, and SWE 510, or equivalent.

Notes: Requires computing lab. No substitutions can be made for this class.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

INFS 622 - Information Systems Analysis and Design

Credits: 3 (NR)
Integration of computing technologies, systems analysis, system design practices, and management criteria in the design of large-scale information management and decision-support systems. Includes cases, computing lab.

Prerequisite(s): INFS 501, 515, and 519, or equivalent

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

INFS 623 - Web Search Engines and Recommender Systems

Credits: 3 (NR)
Study of Web search engines and recommender systems. Topics to include classical information retrieval methods, Boolean retrieval systems, ranked retrieval, performance metrics, Web crawling, link analysis, overall search engine architecture, fundamentals and classification of recommender systems, learning user interests and object properties, and case studies.

Prerequisite(s): INFS 501, 515, 519, and SWE 510.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

INFS 640 - Introduction to Electronic Commerce
Studies electronic commerce from both managerial and technical perspectives. Topics include e-commerce models and concepts; Internet and web protocols and infrastructure; e-commerce marketing and branding; security protocols and standards; e-commerce payment systems; and case studies of business-to-consumer, business-to-business, consumer-to-consumer, and e-government.

**Prerequisite(s):** INFS 501, 515, and 519; and SWE 510 or equivalent.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

### INFS 697 - Topics in Information Systems

Credits: 1-6 (RD)  
Presents special topics in information systems not occurring in regular INFS sequence.

**Prerequisite(s):** Permission of instructor.

**Notes:** May be repeated for credit when distinct offerings of course differ in subject.

**Hours of Lecture or Seminar per week:** 1-6  
**Hours of Lab or Studio per week:** 0

### INFS 740 - Database Programming for the World Wide Web

Credits: 3 (NR)  
Information systems accessible through web and Internet are becoming prevalent. Course focuses on technologies and industry standards for accessing and manipulating persistent data that are suitable for web applications.

**Prerequisite(s):** INFS 614.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

### INFS 755 - Data Mining

Credits: 3 (NR)  

**Prerequisite(s):** STAT 344 or equivalent undergraduate course in probability, INFS 614 or equivalent.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0
INFS 760 - Advanced Database Management

Credits: 3 (NR)
Study of advanced database models and languages, database design theory, transaction processing, recovery, concurrency, distributed database, and security and integrity. Discusses recent developments and research directions.

Prerequisite(s): INFS 614.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

INFS 770 - Knowledge Management for E-Business

Credits: 3 (NR)
Addresses knowledge management (KM) from managerial, technical viewpoints in context of large organizations doing business over web and Internet. Topics include KM life cycle for knowledge creation, aggregation, dissemination, and sharing; ontology modeling, design, and engineering; role of standards such as XML, RDF, web services, and semantic web for e-business; business rules and reasoning engines; and digital rights management for e-business.

Prerequisite(s): INFS 622 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

INFS 772 - Intelligent Agents and the Semantic Web

Credits: 3 (NR)
Course covers the role of intelligent agents in cooperating to access, harvest, sift and winnow information and knowledge from the semantic web. Topics include agent architectures, practical reasoning and deductive agents, beliefs-desires-intentions (BDI) framework for agent reasoning, commitments and actions; Semantic Web ontology languages, description logics, reasoning and rule languages; and agent communication languages, protocols and standards.

Prerequisite(s): INFS 614

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

INFS 774 - Enterprise Architecture

Credits: 3 (NR)
This course presents the basic concepts and methodologies for the discipline known as Enterprise IT Architecting within a framework, structure, and methodology. Enterprise IT Architecting is a necessary step for designing and developing a system of information systems. It includes the definition of the business, work, functional, information and technical perspectives. As such, it is the enabling approach for the system development process that builds complex information systems.

Prerequisite(s): INFS 622 or permission of instructor.
INFS 796 - Directed Readings in Information Systems

Credits: 3 (RT)
Research and analysis of contemporary problem in information system development.

Prerequisite(s): Graduate standing in information systems, with at least 12 prior credits in MS.

Notes: To register, students must complete independent study form available in department office. It must be initialed by faculty sponsor and approved by department chair. Prior approval required by faculty sponsor who supervises student's work. Written report required. Maximum 6 credits may be earned.

INFS 797 - Advanced Topics in Information Systems

Credits: 1-6 (RD)
Special advanced topics not occurring in regular INFS sequence.

Prerequisite(s): Permission of instructor.

Notes: May be repeated for credit when distinct offerings of course differ in subject.

INFS 798 - Research Project

Credits: 3 (NR)
Research project chosen under guidance of full-time graduate faculty member, resulting in written technical report.

Prerequisite(s): 18 credits applicable toward MS.

Notes: To register, students must complete independent study form available in department office. It must be initialed by faculty sponsor and approved by department chair. Prior approval required by faculty sponsor who supervises student's work.

INFS 799 - Thesis
Credits: 1-6 (RD)
Original or compilary work evaluated by a committee of three faculty members.

Prerequisite(s): 18 credits applicable toward MS.

Notes: To register, students must complete independent study form available in department office. It must be initialed by faculty sponsor and approved by department chair.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0
Grading: Satisfactory/No Credit

Information Technology (IT)

Offered by the Volgenau School of Engineering.

Students may attempt an undergraduate course taught by the Volgenau School of Engineering twice. A third attempt requires approval of the department offering the course.

IT 101 - Introduction to Information Technology

Credits: 3 (NR)
Introduces fundamental concepts underpinning state-of-the-art applications. Topics include quantitative and historical perspectives underlying major information technologies, theoretical background on wide range of information technologies as well as issues surrounding the social, economic, and political contexts in which IT exists. Provides exposure to cutting-edge technologies and trends including wireless multimedia, mobile communications, computer security, digital video and audio, and high-performance computing.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

IT 103 - Introduction to Computing

Credits: 3 (NR)
This course, using both lecture and laboratory practice, introduces students to basic computer concepts in hardware, software, networking, computer security, programming, database, e-commerce, decision support systems, and other emerging technologies such as blogs, wiki, RSS, podcasting, and Google applications. Additional lectures examine social, legal, ethical issues including privacy, intellectual property, health concerns, green computing, and accessibility. Students learn techniques to search, evaluate, validate, and cite information found online. Widely used applications including word processing, spreadsheets, databases, presentation, and web development software are studied.

Fulfills Mason Core requirement in information technology (all).

Prerequisite(s): Knowledge of high school algebra.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 2
IT 106 - Introduction to IT Problem Solving Using Computer Programming

Credits: 3 (NR)
Introduces techniques for developing solutions to business problems using procedural programming as an IT resource/tool. Students apply problem solving concepts by analyzing problems and constructing, testing, and implementing algorithms using pseudocode, desk checking, and procedural programming. Topics include: program flow, control structures, programming fundamentals, and integrating program modules into a cohesive solution. (MATH 112 prior completion or co-registration is required).

Prerequisite(s): IT 103. Prerequisite enforced by registration system.

Corequisite(s): MATH 112.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 1
When Offered: Fall, Spring

IT 193 - Review of Multimedia and Web Design

Credits: 1 (NR)
Provides a self-paced, comprehensive review of concepts and techniques for designing and developing attractive and accessible websites with multimedia components. Introduces and discusses technological, aesthetic, and human factors. Open only to students with transfer credit comparable to IT 213 who have not attempted IT 193 or IT 213.

Prerequisite(s): Permission of department.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0
Grading: Satisfactory/No Credit
When Offered: Fall, Summer, Spring

IT 194 - Review of Database Fundamentals

Credits: 1 (NR)
Provides a self-paced, comprehensive review of database fundamentals. Topics include: database classifications, data models with extensive coverage of the relational model, entity-relationship and extended entity relationship models, normalization, advanced data modeling, and Structured Query Language (SQL) programming. Open only to students with transfer credit comparable to IT 214 who have not attempted IT 194 or IT 214.

Prerequisite(s): Permission of department.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0
Grading: Satisfactory/No Credit
When Offered: Fall, Summer, Spring
IT 196 - Review of IT Problem Solving Using Computer Programming

Credits: 1 (NR)
Provides a self-paced, comprehensive review of techniques for developing solutions to business problems through an iterative design and implementation approach. Open only to students with transfer credit comparable to IT 106 who have not attempted IT 106 or IT 196. (MATH 112 prior completion or co-registration is strongly recommended).

Prerequisite(s): Permission of department.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0
Grading: Satisfactory/No Credit
When Offered: Summer

IT 198 - Independ Study Informatn Tech

Credits: 1-3 (RD)
Prerequisite(s): Permission of instructor. Individualized section form required.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0

IT 206 - Object Oriented Techniques for IT Problem Solving

Credits: 3 (NR)
Introduces techniques for developing solutions to business problems using object-oriented programming as an IT resource/tool. Students apply problem solving concepts by analyzing problems and constructing, testing, and implementing object-oriented solutions using object-oriented analysis and design, data modeling, and object-oriented programming fundamentals. Topics include: Unified Modeling Language (UML), classes, inheritance, polymorphism, and exception handling.

Prerequisite(s): (IT 106 or CS 112) and (MATH 112 or MATH 125). Prerequisite enforced by registration system.

Notes: Students cannot receive credit for both IT 108 and IT 206.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 1
When Offered: Fall, Spring

IT 207 - Applied IT Programming

Credits: 3 (NR)
Building on fundamentals of structured and object-oriented programming, this course covers client and server side scripting languages and an SQL database management system. Students will use open source software tools to develop database-enabled web applications.

Prerequisite(s): IT 206 and IT 214. Prerequisite enforced by registration system.
IT 212 - Computer Hardware Fundamentals

Credits: 3 (NR)
This course explains the basic principles of how computers work. It provides a comprehensive understanding of the essential components associated with computers with a focus on PCs. Topics include history of computers, the microprocessor, motherboard, memory, graphics and sound adapters, input and output devices, and storage media. An overview of operating systems and other software, as well as the various methods used to connect computers to each other and the Internet, are presented. The course also addresses recent advances in computer architectures and computer hardware and how they affect computer performance. Presentations of actual hardware are included so that students can gain experience in identifying the various internal and external components of a PC.

IT 213 - Multimedia and Web Design

Credits: 3 (NR)
Through lecture, class demonstration, class discussion, and hands-on lab experience, introduces multimedia and web computer graphics. Focuses on development of web-enabled multimedia applications from practical business perspective. Introduces and discusses technological, aesthetic, and human factors.

Prerequisite(s): IT 103. Prerequisite enforced by registration system.

IT 214 - Database Fundamentals

Credits: 3 (NR)
Covers fundamentals of relational database management systems and their use in business environments. Topics include: database classifications, data models with extensive coverage of the relational model, entity-relationship and extended entity-relationship models, normalization, advanced data modeling, and Structured Query Language (SQL) programming. Students design and implement a real-world relational database and create complex SQL queries to retrieve data from the database.

Prerequisite(s): IT 103 or CS 112. Prerequisite enforced by registration system.

IT 223 - Information Security Fundamentals
Introduces concept of information security. Discusses need for organizational policy to define required services such as
confidentiality, authentication, integrity, nonrepudiation, access control, and availability, and mechanisms to implement those
services. Covers different types of security including physical security, computer security, and network security; common threats
to and attacks against information systems, including accidental damage, identity theft, malicious software, and "spam"; and
defensive measures.

Prerequisite(s): IT 101 and IT 103. Prerequisite enforced by registration system.

Notes: Students cannot receive credit for both IT 221 and 223.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

IT 293 - Applied IT: Junior Transition

Credits: 1 (NR)
Focuses on transition issues for sophomores and transfer students in Applied Information Technology programs. Assists
sophomore and transfer students with choice of concentration, course selection, and career readiness.

Prerequisite(s): Sophomore standing

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring, Summer

IT 300 - Modern Telecommunications

Credits: 3 (NR)
Comprehensive overview of the fundamental principles of telecommunications, including current status and future directions of
the public switched telephone network, cellular networks, satellite networks, and computer networks.

Prerequisite(s): IT 101 and (MATH 108 or MATH 113) and (MATH 112 or MATH 125). Prerequisite enforced by registration
system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

IT 304 - IT in the Global Economy

Credits: 3 (NR)
Explores how IT changed nature of society and contributed to evolution of global economy. Examines changing nature of work,
education, and communication, and ethical issues such as intellectual property rights, computer-related crime, privacy concerns,
and public policy issues.

Fulfills Mason Core requirement in information technology (ethics only).
Prerequisite(s): IT 103. Prerequisite enforced by registration system.

Notes: Students cannot receive credit for both IT 304 and CS 306.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

IT 306 - Program Design and Data Structures

Credits: 3 (NR)
Fundamentals of data structures and analysis of algorithms. Large programs written in a modern, high-level programming language. Stresses abstraction, modular design, code reuse, and correctness.

Prerequisite(s): (IT 206 or CS 211) and (MATH 112 or MATH 125). Prerequisite enforced by registration system.

Notes: Students cannot receive credit for both IT 208 and IT 306.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

IT 308 - Event-Driven Programming

Credits: 3 (NR)
Building on the programming concepts covered in IT 206, this course focuses on graphical user interfaces. Students will design, develop, and document event-driven programs using an object-oriented language.

Equivalent to INFS 310 (2012-2013 Catalog).

Prerequisite(s): IT 206 or CS 211. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

IT 314 - Database Programming

Credits: 3 (NR)
The course introduces students to the Oracle Developer application development utilities and tools and describes how to create and manipulate databases in Oracle database management system. The course provides an extensive overview of SQL and introduction to PL/SQL. Topics include data definition and manipulation languages, stored procedures, triggers, indexing techniques, and elementary query optimization.

Equivalent to INFS 311 (2012-2013 Catalog).

Prerequisite(s): IT 214. Prerequisite enforced by registration system.
IT 315 - Mobile Development

Credits: 3 (NR)
Studies business-oriented applications for popular mobile platforms including Blackberry, Android and Apple. Provides overview of mobile platforms and devices including evaluation, uses, design and development of applications.

Prerequisite(s): (IT 206 or CS 211) and IT 213. Prerequisite enforced by registration system.

IT 322 - Healthcare Data Challenges

Credits: 3 (NR)
Covers methodology and tools used to work with health data structures supporting organizations' needs for reliable data that are captured, stored, processed, integrated, and prepared for further querying, decision making, data mining and knowledge discovery for a variety of clinical and organizational purposes. Data security and privacy, data standards, data interoperability, health information exchange, and big data analytics are discussed.

Equivalent to BENG 322.

Prerequisite(s): IT 214 and (STAT 250 or STAT 344). Prerequisite enforced by registration system.

IT 324 - Health Information Technology Fundamentals

Credits: 3 (NR)
Explores challenges in the development and implementation of information systems and informatics tools in healthcare environment. Discusses the importance and benefits of electronic health records (EHRs). Students learn about EHRs’ creation, management, and evolution, and their use for clinical decision support. In addition health information security, privacy, federal laws, regulations and standards, and their impact on healthcare delivery are discussed.

Prerequisite(s): IT 214. Prerequisite enforced by registration system.
IT 328 - Health Information Emerging Technologies

Credits: 3 (NR)
Provides an introduction to networking in the healthcare environment and covers a wide range of topics on emerging health information technologies. Discusses internet protocols, safety procedures, and data privacy considerations in healthcare environments, and processes required to design, secure, and troubleshoot a network to support healthcare organizations. Mobile computing, patient portals, personal health records, telehealth, health information exchange are discussed.

Prerequisite(s): HAP 301 and IT 341. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

IT 331 - Web I: Web Development

Credits: 3 (NR)
Introduces the principles and techniques necessary for successful client-side web development. Topics such as HTML5, Cascading Style Sheets, JavaScript, DOM, XML, AJAX, and jQuery are presented. Students will learn to develop attractive and interactive web pages and applications and use client-side web-scripting languages to solve problems both with a text editor and more powerful WYSIWYG HTML editors.

Prerequisite(s): (IT 106 or CS 112) and IT 213. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

IT 332 - Web Server Administration

Credits: 3 (NR)
Covers the installation, configuration, and administration of Web servers, FTP servers, and DNS servers. Additional topics include security setups, administration, and associated performance issues.

Prerequisite(s): IT 213. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

IT 335 - Web Development using Content Management Systems

Credits: 3 (NR)
Through lectures and hands-on lab experience, presents web development techniques using content management systems (e.g. Joomla, Dot net nuke). Introduces characteristics of various types of websites (corporate portals, intranets and extranets; online magazines, newspapers, and publications; e-commerce and online reservations, government applications, small business websites). Presents methods, languages, tools related to web content management systems from an applied perspective.
Prerequisite(s): IT 213. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

IT 341 - Data Communications and Network Principles

Credits: 3 (NR)
Focuses on primary aspects of data communications and networking. Open Systems Interconnection (OSI) and Internet models; Layer 1 interfaces and cabling configurations; IP network addressing, network design, router and port configurations; security protocols; static routing, RIPv2, and OSPF configurations; TCP, UDP, data reliability, and error correction methods; Telnet, FTP, TFTP, HTTP, SMTP, POP, and DNS protocols.

Prerequisite(s): IT 101 and IT 212 and (IT 106 or CS 112) and (MATH 108 or MATH 113). Prerequisite enforced by registration system.

Notes: This course is 50 percent lab work of configuration of routers and network design, implementation, and testing.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

IT 342 - Operating Systems Fundamentals

Credits: 3 (NR)
Practices and procedures for installing and configuring modern operating systems, including user accounts, file, print, and terminal servers, mobile computing, and disaster recovery. Through practical lab sessions, students receive real-world experiences with multiple operating systems.

Prerequisite(s): IT 101 and IT 212 and (IT 106 or CS 112). Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

IT 343 - IT Project Management

Credits: 3 (NR)
Provides essential strategies and procedures for planning, organizing, staffing, monitoring, and controlling design, development, and production of system to meet stated IT-related need in effective and efficient manner. Fulfills writing-intensive requirement for BS in information technology.

Fulfills writing intensive requirement in the major.

Prerequisite(s): IT 293 and junior standing in BS in applied information technology program.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
IT 344 - Information Storage and Management Technologies

Credits: 3 (NR)
Provides an introduction to principles of information storage and management including the emerging field of virtualization technologies. Covers Direct Attached Storage (DAS), networked storage models such as Network Attached Storage (NAS), Storage Area Network (SAN), and Content Addressed Storage (CAS); and applications in business continuity, replication, disaster recovery, and cloud computing. Includes exposure to real-world storage networking technologies.

Prerequisite(s): IT 341. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0  
When Offered: Fall, Spring

IT 353 - Information Defense Technologies

Credits: 3 (NR)
This course will examine and assess the role of information technology as a tool of warfare and civil defense. Topics will be discussed from both defensive and offensive perspectives and will include asset tracking, asymmetric warfare, network centric warfare, physical attacks, cyberterrorism, espionage, psyops, reconnaissance and surveillance, space assets, and applications of GPS and cryptographic technology. Students will research and write about the social, ethical, and political effects of such technology.

Prerequisite(s): IT 101 and IT 223. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0

IT 357 - Computer Crime, Forensics, and Auditing

Credits: 3 (NR)
Covers computer crime, relevant laws, agencies, and standards. Presents auditing, logging, forensics, and related software. Explores legal principles such as chain of evidence, electronic document discovery, eavesdropping, and entrapment. Students get hands-on experience with forensics tools.

Equivalent to CRIM 304

Prerequisite(s): IT 103 and IT 223. Prerequisite enforced by registration system.

Notes: Students cannot receive credit for both IT 222 and 357.

Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0  
When Offered: Fall, Spring
IT 366 - Network Security I

Credits: 3 (NR)
Examines information security services and mechanisms in network context. Topics include symmetric and asymmetric cryptography; message authentication codes, hash functions and digital signatures; digital certificates and public key infrastructure; access control including hardware and biometrics; intrusion detection; and securing network-enabled applications including e-mail and web browsing.

Prerequisite(s): (IT 206 or CS 211) and IT 223. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

IT 390 - Rapid Development of Scalable Applications

Credits: 3 (NR)
Presents software engineering, programming techniques, platforms and tools necessary for rapid development of scalable applications including: cloud platforms; scalable data storage solutions; web applications development environments. The course will provide a general overview of such techniques but will concentrate on selected ones in each term. The students will work in small teams and must develop scalable prototypes during the course.

Prerequisite(s): IT 206, IT 213, IT 214. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

IT 410 - Java Web Programming

Credits: 3 (NR)
This course covers layers of the n-tier architecture. Students will build web applications using available frameworks at each tier, such as Java Server Faces and Servlets for the UI tier, Web Services for the business tier and Java Database Connectivity for the persistence tier.

Prerequisite(s): IT 206 and IT 214. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

IT 413 - Digital Media Editing

Credits: 3 (NR)
Examines three areas of digital media editing- tools for editing, content and logic decision process, and information technology used by major corporations for development and distribution- through video examples from entertainment industry and corporate productions as well as hands-on editing experience.
Prerequisite(s): IT 213. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

IT 414 - Database Administration

Credits: 3 (NR)
Explores advanced concepts of database administration using enterprise-level database management system. Topics include: backup, recovery, corruption, automatic management, resource management, job scheduling, space management, memory management, storage management, diagnosis and corresponding tools.

Equivalent to INFS 414 (2012-2013 Catalog).

Prerequisite(s): IT 314. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

IT 415 - Information Visualization

Credits: 3 (NR)
Provides an overview of information visualization applications in intelligence analysis, decision support systems, and network monitoring. Covers human factors, human interface with information, and current and future trends in information visualization. Students also learn to develop a rudimentary visualization application.

Prerequisite(s): IT 213. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

IT 429 - Security Accreditation of Information Systems

Credits: 3 (NR)
This course explains basic principles of performing FISMA certification and accreditation (C&A) of an IT System: covering methodology for completing C&A, explaining the role of the Certifier and the Information System Security Officer (ISSO), and giving students real world experience on the performing the process: valuable experience since IT Systems in the Federal Government need C&A every three years.

Prerequisite(s): IT 223 and IT 212. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Summer
IT 431 - Web II: Advanced Web Development

Credits: 3 (NR)
Focuses on database-driven Web application development and Web presentation using server-side coding and advanced techniques. Additional topics include AJAX, Web server configuration and Web services.

Prerequisite(s): IT 331. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

IT 435 - Applied Knowledge Technologies for the Semantic Web

Credits: 3 (NR)
Methods, languages, and tools related to the knowledge technologies for semantic web from an applied perspective. Combines survey lectures with in-depth presentation of relevant issues and hands-on experience with existing technologies.

Prerequisite(s): IT 331; or permission of department. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

IT 436 - Agile Web Development with Open Source Frameworks

Credits: 3 (NR)
Introduces the principles and techniques for TDD (test-driven development) and deployment using open source frameworks (e.g., Ruby on Rails). Topics such as agile development methodology, version control, and Lean Startup are also presented. Students will work in small teams and propose, develop, and deploy interactive web applications and use an open source application framework to solve real-world problems.

Prerequisite(s): IT 106, IT 213, IT 214. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

IT 441 - Network Servers and Infrastructures

Credits: 3 (NR)
Covers IP networking concepts and practices for IPv6 addressing, DHCP and DNS in IPv6 networks, secure communication over VPNs, VoIP architecture, Virtual Computing, Cloud Computing, MPLS, traffic monitoring and network connectivity between operating systems. Students learn the latest technologies of IP networks and understand application-level services used in the Internet. Lab sessions focus on installation of applications on virtual servers.

Prerequisite(s): IT 341 and (MATH 112 or MATH 125). Prerequisite enforced by registration system.
Notes: Term project.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

IT 445 - Advanced Networking Principles

Credits: 3 (NR)
This course focuses on Layer 2 and 3 of the OSI model and WAN technologies. Frame Relay and ISDN, complex router configurations of Variable Length Subnet Masking (VLSM), Classless Inter-Domain Routing (CIDR), Network Address Translation (NAT), Dynamic Host Configuration Protocol (DHCP), and study of Network Management Systems available for Data Communications Networks. Layer 2 involves Ethernet-switching components, including detailed hands-on configuration covering all aspects of switches using the command-line interface method.

Prerequisite(s): IT 341. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

IT 455 - Wireless Communications and Networking

Credits: 3 (NR)
Covers fundamental principles underlying wireless data communications. Topics include wireless transmission basics, radio propagation issues, antennas, digital modulation, spread spectrum techniques and their applications, and popular standards: WiFi, WiMAX and Bluetooth. Also presents practical knowledge to enable the design, testing, deployment, debugging and commissioning of WiFi, WiMAX networks and point-to-point microwave systems. Discussions on cellular network technologies are also included.

Prerequisite(s): IT 101 and IT 341. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

IT 462 - Information Security Principles

Credits: 3 (NR)
Studies security policies, models, and mechanisms for secrecy, integrity, availability, and usage controls. Topics include models and mechanisms for mandatory, discretionary, and role-based access controls; authentication technologies; control and prevention of viruses and other rogue programs; common system vulnerabilities and countermeasures; privacy and security policies and risk analysis; intellectual property protection; and legal and social issues.

Equivalent to INFS 462 (2012-103 Catalog).

Prerequisite(s): IT 212 and IT 223. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
IT 465 - Peer-to-Peer Systems and Overlay Networks

Credits: 3 (NR)
Peer-to-Peer (P2P) systems and overlay networks have become popular over the years because they are a cost-effective and scalable content sharing solution. Fundamentals of P2P systems and overlay networks are introduced to validate it as a better option than the traditional client server architecture. Students learn the classifications of P2P systems and architectures; overlay network categories, and their benefits and disadvantages.

Prerequisite(s): IT 206, IT 341 and IT 441. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

IT 466 - Network Security II

Credits: 3 (NR)
Detailed study of certain symmetric and asymmetric cryptographic schemes; analysis of network data (including "packet sniffing"); security at different network layers (including IPSec, SSL/TLS and Kerberos); and secure e-commerce. Teaches principles of designing and testing secure networks, including use of network partitioning, firewalls, intrusion detection systems, and vulnerability assessment tools.

Equivalent to INFS 466

Prerequisite(s): IT 223 and IT 341 and IT 366 and (IT 206 or CS 211) and (MATH 112 or MATH 125). Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

IT 467 - Network Defense

Credits: 3 (NR)
Practices and procedures for defending business-class, heterogeneous networks against threats (including system failure, environmental events, human error) and attacks (including intrusion, malicious software, denial of service). Through practical lab sessions, students receive real-world experience designing networks, installing and configuring system components, detecting and recovering from problems and attacks, and gathering data to support prosecution of offenders and refinement of countermeasures.

Prerequisite(s): IT 366. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Summer
IT 471 - Applications of Digital Technologies

Credits: 3 (NR)
The course covers an overview of technologies and applications of a wide array of digital components used within state of the art IT systems. Topics include an understanding of the applications of such digital devices embedded within telecommunications systems, storage systems, computing systems, multimedia systems, and computer networks.

Prerequisite(s): IT 101. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

IT 481 - Concepts of Multimedia Processing and Transmission

Credits: 3 (NR)
Covers fundamentals of audio and image processing and transmission. Technical topics include audio and video compression algorithms for efficient storage and transmission of multimedia content, streaming video, high definition video, multimedia storage technologies. Other issues discussed include legal aspects concerning distribution of multimedia content, multimedia standards, the entertainment industry as well as the future of multimedia processing and transmission.

Prerequisite(s): IT 101 and IT 213. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

IT 484 - Voice Communications Technologies

Credits: 3 (NR)
Examines current and emerging technologies for transmission of voice signals over telecommunications systems. Highlights significant differences between the requirements for voice and other forms of data. Topics provide a balance between traditional voice technologies and those that use data networks. Real-world implementations are analyzed to determine reliability, quality, and cost effectiveness. Includes lab experiments with analog and digital technologies.

Prerequisite(s): IT 300 and IT 341. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

IT 488 - Fundamentals of Satellite Communications

Credits: 3 (NR)
Provides a comprehensive overview of the principles of satellite communications systems. Major topics include satellite orbits and constellations, the space segment, antennas, modulation, coding, satellite access methods and link analysis. Also covers satellite applications, with emphasis on recent developments in the satellite communications field. Hands-on design experience is gained through the use of readily available vendor software systems.
Prerequisite(s): IT 300 and IT 341 and (MATH 108 or MATH 113). Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**IT 490 - Application Maintenance and Spiral Development**

Credits: 3 (NR)

Presents software engineering, programming techniques, platforms and tools necessary for application maintenance, optimization and spiral development. Models discussed may include: incremental development, waterfall, evolutionary; on various platforms: mobile, cloud, web-based. Provides a general overview of such techniques but concentrates on selected topics. Students will work in small teams to maintain and further develop previously deployed applications.

Prerequisite(s): IT 390. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

When Offered: Fall, Spring

**IT 492 - Senior Design Project I**

Credits: 3 (NR)

Students use information technology as a tool to redesign business processes so the enterprise can achieve its objectives. Student teams analyze the business processes of real organizations, quantify the negative impact caused by current process challenges, then develop and present a compelling Business Case for Change. Students develop skills critical for preparing and delivering effective verbal briefings and presentations.

Fulfills Mason Core requirement in synthesis.

Prerequisite(s): IT 343. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**IT 493 - Senior Design Project II**

Credits: 4 (NR)

Students, in teams, complete projects demonstrating preparedness as an IT professional. This work includes ethical challenges, status reports and engineering notebooks evaluated during class. Teams members develop detailed designs, build solutions up to Beta, present final written reports and final verbal presentations before review panels of business leaders. Students must register for the section that continues their IT 492 section.

Prerequisite(s): IT 492. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 4
Hours of Lab or Studio per week: 0
IT 495 - Turning Ideas into Successful Companies

Credits: 3 (NR)
This is a practical course in entrepreneurship. Each class session will focus on specific topics associated with building a business: team creation, business planning, market research, product development, financial planning, funding, people and organizations, competitive strategies, operations, growth and exit strategies, and more. Students will have reading assignments and will participate in competitive team assignments.

Prerequisite(s): Senior standing.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

IT 496 - Decision Making in IT Ventures

Credits: 3 (NR)
Introduces students to the decision making processes involved in leading IT companies. Topics include: the role of major IT applications in strategic, tactical, and operational decisions; assessment and justification of IT ideas and investments; methodologies to predict decision outcomes; how to measure IT investments performance; strategies to inspire, influence and organize the workforce to accomplish key business goals.

Prerequisite(s): MSOM 301. Prerequisite enforced by registration system.

Notes: Students develop skills through assessment and role-playing activities, discussions, cases, and hands-on applications.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

IT 498 - Independent Study in Information Technology

Credits: 1-3 (RT)
Directed self-study of special topics of current interest in IT.

Notes: Topics must be arranged with instructor and approved by department chair before registering. Maximum 3 credits.

Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 0

IT 499 - Special Topics in Information Technology

Credits: 3 (RT)
Topics of special interest to undergraduates.
Prerequisite(s): Permission of department; specific prerequisites vary with nature of topic.

Notes: May be repeated for maximum 6 credits if topics are substantially different.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**IT 796 - Directed Reading and Research**

Credits: 1-6 (NR)
Reading and research on specific topic in information technology under direction of faculty member.

Prerequisite(s): Permission of Chair.

Notes: May be repeated as needed.

Hours of Lecture or Seminar per week: 1-12
Hours of Lab or Studio per week: 0

**IT 797 - Directed Reading and Research**

Credits: 1-3 (NR)
Reading and research on specific topic in information technology under direction of faculty member.

Notes: May be repeated as needed.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0

**IT 990 - Dissertation Topic Presentation**

Credits: 1 (NR)
Students put together a professional presentation of a research proposal and present it for critique to fellow students and interested faculty. May be repeated with change of research topic, but credit toward doctoral degree is given once.

Equivalent to CS 990, STAT 990

Prerequisite(s): Completion of all course requirements for PhD, or permission of instructor.

Notes: May be repeated with change in topic, but degree credit is given only once.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0
Grading: Graduate Special
IT 991 - Engineer Project Presentation

Credits: 1 (RD)
Opportunity for engineer degree students to present project proposal for critique to interested faculty and students. Covers presentation of project topic for engineer degree in information technology, and is required of all engineer degree students. Students complete project proposal.

Prerequisite(s): Completion of all course requirements for engineer degree in information technology, or permission of instructor.

Notes: May be repeated with change in topic, but degree credit is only given once.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0
Grading: Graduate Special

IT 996 - Engineer Project Proposal

Credits: 1-6 (RD)
Work on project proposal that forms basis for dissertation for engineer degree.

Prerequisite(s): Completion of all course requirements for the Engineer degree in Information Technology and permission of Project Director. Students must submit a Project Progress Report form to the Graduate Student Service Office.

Notes: May be repeated. No more than 12 credits of IT 996 and 997 may be applied to engineer degree requirements.

Hours of Lecture or Seminar per week: 1-4
Hours of Lab or Studio per week: 0
Grading: Satisfactory/No Credit

IT 997 - Engineer Project Dissertation

Credits: 1-6 (RD)
Formal record of commitment to engineer project dissertation under direction of advisory committee in information technology.

Prerequisite(s): Admission to candidacy.

Notes: May be repeated as needed.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0
Grading: Satisfactory/No Credit

IT 998 - Doctoral Dissertation Proposal
Credits: 1-12 (RD)
Work on research proposal that forms basis for doctoral dissertation.

Notes: May be repeated. No more than 24 credits of IT 998 and 999 may be applied to doctoral degree requirements.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0
Grading: Satisfactory/No Credit

**IT 999 - Doctoral Dissertation**

Credits: 1-12 (RD)
Formal record of commitment to doctoral dissertation research under direction of faculty member in information technology.

Prerequisite(s): Admission to candidacy.

Notes: May be repeated as needed.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0
Grading: Satisfactory/No Credit

**Initiatives in Educational Transformation-Teaching (IETT)**

Offered by the College of Education and Human Development

**IETT 500 - Introduction to IETT**

Credits: 0 (NR)
Introduces students to the ideas and the experiential pedagogy of the IET program in an intensive summer session designed to develop relationships among participating educators and faculty by building a vibrant learning community through shared and emerging knowledge and experience.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0
Grading: Not Gradable

**IETT 750 - Studies in Language and Culture I**

Credits: 3 (NR)
Explores the interdependence and mutual construction of languages and cultures, as well as how both provide interpretive frames and thus mediate lived experiences. Investigates culture and language as primary shapers of relationships and identities. Engages teachers in constructing culturally responsive curriculum and pedagogy.
IETT 751 - Studies in Language and Culture II

Credits: 3 (NR)
Deepens understandings of how language and culture shape interpretations that affect people's lives. Investigates student achievement in relationship to classroom experiences and the language and cultural knowledge students bring to school. Examines vernacular discourses, including those in cyberspace and popular culture, while considering pedagogical implications. Probes social justice issues in and out of educational institutions.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

IETT 752 - Research in Practice: The Team Project

Credits: 6 (NR)
Builds further understanding of teacher research with an emphasis on collaborative research process to develop skills, construct knowledge, and transform practice. Teams engage in collaborative inquiry as they form and frame salient questions, take actions to improve teaching and learning, gather, analyze and interpret multiple forms of data, and share their experience in communities of practice.

Prerequisite(s): MNPE 704

Hours of Lecture or Seminar per week: 6
Hours of Lab or Studio per week: 0

IETT 753 - Teaching and Learning

Credits: 3 (NR)
Provides a structured opportunity for offering evidence of individual growth and transformation of professional practice. Through a process of deep reflection, examines fundamental philosophical and pedagogical assumptions, explores individual educational experiences, and critically examines professional practices related to meeting K-12 students' needs, continuous improvement, and program experiences.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

IETT 754 - Introduction to Teaching Historic Places with Diverse Populations

Credits: 1 (NR)
Explores and interprets national, regional, and local historic sites in the Washington DC area, students will practice historical thinking and teaching through an analysis of historic sites as primary sources.
Corequisite(s): MNPE 700; MNPE 703

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0
When Offered: Spring.

IETT 755 - Advanced Teaching Historic Places with Diverse Populations

Credits: 2 (NR)
Building on the exploration and interpreting skills learned in IETT 754, students will practice historical thinking and teaching for diverse P-12 classroom populations to convey critical thinking skills and civic engagement.

Prerequisite(s): IETT 754.
Corequisite(s): IETT 750.

Hours of Lecture or Seminar per week: 1.5
Hours of Lab or Studio per week: 0.5
When Offered: Fall

Instructional Technology (EDIT)

Offered by the College of Education and Human Development

EDIT 201 - Strategies for Online Learning Success

Credits: 1 (NR)
Helps students assess their readiness for online learning using effective strategies for online interaction and activities designed to promote successful online experiences.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0
When Offered: Fall, Summer, Spring

EDIT 401 - Introduction to Learning Technologies

Credits: 3 (NR)
Provides an overview of the field of learning technologies, including its history, theoretical foundations, design processes, and technologies. Illustrates how learning technologies can be applied in a variety of teaching and training contexts including e-learning, educational software, instructional design, corporate training, and curriculum development.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Summer, Spring
EDIT 413 - Technology, Society, and the Culture of Learning

Credits: 3 (NR)
Explores the relationship between technological change and education reform initiatives. Emphasis will be placed on the ways in which technological and social changes influence and shape the goals and outcomes of the K-12 educational process.

Prerequisite(s): EDUC 300.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDIT 426 - Web Accessibility and Design

Credits: 3 (NR)
Provides instruction for accessible web design using HTML and existing authoring tools. Section 508 web accessibility standards and assistive technologies to access the computer will be explored.

Notes: Class may be delivered via distance education.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDIT 504 - Introduction to Educational Technology

Credits: 3 (NR)
Examines uses of and issues in educational technology. Explores curriculum integration of technology, and focuses on learning and using commercially available applications software.

Notes: Field experience in public schools will be required during course.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDIT 526 - Web Accessibility and Design

Credits: 3 (NR)
Develops understanding of principles of universal web design. Students apply this understanding by designing and developing accessible web site using web authoring tools.

Equivalent to EDSE 526 (2012-2013 Catalog).

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
EDIT 530 - Scripting and Programming

Credits: 2 (RT)
Enables development of computer-based educational materials using widely known educational scripting language. Students explore basic authoring capabilities, and learn to apply those capabilities by designing and producing materials using commands, procedures, and functions of scripting language.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 0

EDIT 561 - Teaching with Telecommunications

Credits: 1 (NR)
Develops expertise with various aspects of telecommunications tools, and models ways these tools can be used for personal learning and integration into teaching/learning process. Addresses e-mail, Internet, web, and online databases.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0

EDIT 562 - Teaching with Databases

Credits: 1 (NR)
Develops expertise with various aspects of databases, and models ways databases can be integrated into teaching and learning process. Focuses on strategies for searching, sorting, creating, and communicating with information, much of which is structured by variety of online and offline databases.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0

EDIT 563 - Teaching with Graphics

Credits: 1 (NR)
Explores various graphic programs available for constructing visual images. Addresses draw and paint programs, scanning and editing images, and using visual communication to support K-12 learning.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0

EDIT 564 - Teaching with Web 2.0

Credits: 2 (NR)
Develops expertise with social, cognitive, and learning implications of film, video, and television. Engages students in process of
planning, storyboarding, and filming with video.

Prerequisite(s): EDIT 561.

EDIT 565 - Teaching with Educational Software

Credits: 1 (RD)
Explores variety of educational software, including simulations, problem-solving software, computational tools (calculators, probeware, LOGO, and spreadsheets), and drill-and-practice/integrated learning systems. Emphasizes ways these programs support K-12 teaching and learning process.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0

EDIT 566 - Teaching with Multimedia/Hypermedia

Credits: 2 (RD)
Covers variety of hypertext/hypermedia and multimedia tools. Emphasizes students' ability to use tools and then teach others. Covers the ways integration of tools in K-12 curriculum support learning, and difference between hypermedia and multimedia.

Prerequisite(s): EDIT 563.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 0

EDIT 567 - Teaching with Desktop Publishing

Credits: 2 (RD)
Explores variety of publishing tools, including word processors, desktop publishers, and idea processors. Emphasizes using tools to communicate. Covers design and layout principles, appropriate use of images to facilitate communication, and ways K-12 teachers can design opportunities for students to learn concepts.

Prerequisite(s): EDIT 563.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 0

EDIT 568 - Teaching with the Web

Credits: 2 (NR)
Examines the various aspects of web-based learning and the ways these tools can be integrated into the teaching/learning process.
The course is taught online.

Prerequisite(s): EDIT 561

Hours of Lecture or Seminar per week: 1-12
Hours of Lab or Studio per week: 0

EDIT 571 - Visual Design and Applications

Credits: 1-3 (RT)
Provides basic knowledge of the range of capabilities of available graphic and visual design applications. Students learn to cultivate effective visual design practices for creating instructional products.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0

EDIT 572 - Digital Audio/Video Design and Applications

Credits: 1-3 (RT)
Provides basic knowledge of the range of capabilities of available audio and video design applications. Students learn to cultivate effective audio and video design practices for creating instructional products.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0

EDIT 573 - Project Management

Credits: 1-3 (RT)
Explores project management principles and applications used to manage, plan, and track large-scale, complex instructional design projects.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0

EDIT 574 - Social Media and Digital Collaboration Applications

Credits: 1-3 (RD)
Provides basic knowledge of the range of capabilities of available social networking, teleconferencing, and collaboration applications. Students learn to integrate the latest information and communication technologies into the creation of instructional products.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0
EDIT 575 - e-Learning Design Applications

Credits: 1-3 (RT)
Provides basic knowledge of available applications for creating, delivering, managing and tracking e-learning experiences. Students learn to create instructional products using the latest e-learning design applications.

Notes: Content customized to particular software tool presented.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0

EDIT 576 - Mobile Learning and Applications

Credits: 1-3 (RT)
Explores current best practices and techniques required to deliver effective learning content through mobile devices. Students learn pedagogical approaches to mobile learning as well as investigate various mobile platforms and applications.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0

EDIT 590 - Educational Research in Technology

Credits: 3 (NR)
Focuses on developing skills, insights, and understanding basics to performing research with emphasis on interpretation, application, critique, and use of findings in educational settings. Students develop expertise in action research methodology, design, and implementation.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDIT 593 - Instructional Hardware Systems

Credits: 3 (NR)
Teaches basic technical features of computer-based hardware systems used in educational settings, including stand-alone computers, peripheral devices, and networking systems.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDIT 597 - Special Topics in Education

Credits: 1-6 (RT)
Provides advanced study on selected topic or emerging issue in American or international education.
EDIT 601 - Instructional Design and Development (IDD) Portfolio

Credits: 1 (NR)
Enables students to create and publish electronic portfolio that demonstrates effective and meaningful integration and syntheses of instructional design and development concepts, principles, and competencies learned across program courses at mid-degree program point.

Notes: May be repeated for credit with GSE permission.

Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 0

EDIT 611 - Innovations in e-Learning

Credits: 3 (NR)
Explores leading-edge learning technologies and their integration into the e-learning design process. Hands-on activities focus on technology planning, selection, implementation, and evaluation utilizing instructional design best practices.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDIT 641 - Understanding Virtual Schools

Credits: 1 (NR)
Develops knowledge about online learning for K-12 students. Examines history and trends of online learning, and characteristics of K-12 virtual learners.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0

EDIT 642 - The Online Academy

Credits: 1 (NR)
Develops knowledge about Mason's virtual high school. Focuses on design model with attention to representative problems, performances of understanding, communities of practice, and mentors.

Prerequisite(s): EDIT 641

Corequisite(s): EDIT 641
EDIT 643 - Online Mentoring I: Building Virtual Relationships

Credits: 1 (NR)
Assists in developing online mentoring skills related to integral role that building relationships plays in success of online learning.

EDIT 644 - Online Mentoring II: Promoting Self-Regulation

Credits: 1 (NR)
Assists in developing online mentoring skills related to integral role that self-regulation plays in success of online learning.

Prerequisite(s): EDIT 643

EDIT 645 - Online Mentoring III: Conceptual Learning

Credits: 1 (NR)
Assists in developing online mentoring skills related to role of support of conceptual and content understanding in success of online learning.

Prerequisite(s): EDIT 644

EDIT 646 - Online Mentoring IV: Moderating

Credits: 2 (NR)
Assists in developing expertise with moderating student learning asynchronous and synchronous in online environments including discussion boards, chat rooms, and general communication patterns.

Prerequisite(s): EDIT 645 or permission of instructor
EDIT 701 - Advanced Instructional Design and Development (IDD) Portfolio

Credits: 1 (NR)
To be taken in the last semester of course work. Enables students to create and publish electronic portfolio that demonstrates effective and meaningful integration and syntheses of instructional design and development concepts, principles, and competencies learned across program courses at end degree program point.

Prerequisite(s): EDIT 601. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0

EDIT 704 - Instructional Technology Foundations and Theories of Learning

Credits: 3 (RD)
Reviews practical and pedagogical issues related to design and development of technological instruction. Emphasizes investigating instructional design as a field and community of practice, and reviewing core learning theory constructs applicable to design of instructional technology.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDIT 705 - Instructional Design

Credits: 3 (NR)
Helps students analyze, apply, and evaluate principles of instructional design to develop education and training materials spanning a wide range of knowledge domains and instructional technologies. Focuses on variety of instructional design models, with emphasis on recent contributions from cognitive science and related fields.

Equivalent to EDCI 705

Prerequisite(s): Teaching or Training Experience or equivalent.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDIT 706 - Business of Learning Design and Technologies

Credits: 3 (NR)
Explores the business issues underlying the selection, implementation and evaluation of technology-based learning interventions. Focuses on developing the skills necessary to improve performance and achieve measurable, positive change that supports an organization's strategic goals.

Prerequisite(s): EDIT 705 or instructor permission.
EDIT 711 - Teaching with Technology I: Telecommunications and Databases

Credits: 3 (RD)
Explores and develops expertise with various aspects of telecommunications and databases, and models how tools can be used for personal learning and integration into teaching and learning process. Addresses e-mail, Internet, and web, and online and multimedia databases. Also focuses on strategies for searching, sorting, creating, and communicating with information, many of which are structured by online and offline databases.

Corequisite(s): EDCI 710.

EDIT 713 - Teaching with Technology II: Graphics, TV and Video, and Simulations

Credits: 3 (RD)
Explores and develops expertise with various graphic programs for constructing visual images, interpreting and creating video, and structuring and using simulations for learning. Addresses draw and paint programs, scanning and editing images, and using visual communication to support K-12 learning. Explores social, cognitive, and learning implications of film, video, and television, and engages students in planning, storyboarding, and filming with video. Also focuses on various categories of simulation, relationship between simulations and ways of knowing, and strategies for using simulations to promote K-12 learning.

Corequisite(s): EDCI 712.

EDIT 715 - Teaching with Technology III: Publishing and Computational Tools

Credits: 3 (RD)
Explores and develops expertise with variety of publishing tools, including word processors, desktop publishers, and idea processors. Emphasizes using tools to communicate. Covers design and layout principles, appropriate use of images to facilitate communication, and ways K-12 teachers can design opportunities for students to learn these concepts. Also helps students explore and develop expertise with tools commonly used as part of "computational science" and mathematical modeling. Tools include programming languages such as LOGO, calculators, spreadsheets, probeware, and graphing calculators.

Corequisite(s): EDCI 714.
EDIT 717 - Teaching with Technology IV: Hypermedia and Emerging Technologies

Credits: 3 (RD)
Develops expertise with hypertext/hypermedia and multimedia tools. Emphasizes ability to use tools and then teach others. Focuses on understanding difference between hypermedia and multimedia. Also examines educational technologies expected to become important applications soon, including virtual reality and distributed learning.

Corequisite(s): EDCI 716.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDIT 719 - Tools 5: Web 2.0 and Digital Video Editing

Credits: 3 (NR)
Explores emerging Web2 tools (blogs, wikis, and podcasts) and digital video with attention to conceptual understanding and potential applications in K-12 settings. Culminates in the design and development of products and lesson plans for K-12 settings.

Prerequisite(s): EDIT 717.

Corequisite(s): EDCI 716.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDIT 720 - Leadership Issues in Educational Technology

Credits: 3 (NR)
Examines how educational technology can provide infrastructure for creating, managing, and evaluating innovative types of teaching and learning environments. Explores new assumptions about learning, instructional technology, and organizational development as foundation for planning how schools can use technology to evolve beyond conventional approaches.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDIT 721 - Web-Based Learning

Credits: 3 (NR)
Examines web-based learning and how these tools can be integrated into the teaching/learning process in K-12 settings.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
EDIT 725 - Technology and Diversity

Credits: 3 (NR)
Focuses on technology to support learning needs of all students, including English-as-a-second-language, bilingual, and special-needs students. Emphasizes helping teachers use technology to support learning when faced with such diverse learners in one classroom.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDIT 730 - Advanced Instructional Design

Credits: 3 (NR)
Capstone course of three-course sequence on theory and practice of instructional design. Helps students apply ideas developed in prior courses to complete major instructional design project. Covers leading-edge ideas in evolution of instructional design.

Prerequisite(s): EDCI/EDIT 705

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDIT 732 - Analysis and Design of Technology-Based Learning Environments

Credits: 3 (NR)
Enables design, implementation, and evaluation of technology-based education and training materials using advanced computer-based authoring tools.

Prerequisite(s): EDIT 730 or permission of instructor

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDIT 742 - Interactive Technologies: Gaming and Robotics

Credits: 3 (NR)
Project-based, hands-on course focusing on technology, science, and engineering. LEGOS, controlled by small microcomputers, used to show principles behind many technological innovations. Other technological advances explored.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDIT 745 - Technology Leadership Issues
Credits: 3 (NR)
Explores relationship of leadership, innovations, change, and technology advocacy. Emphasizes implementation of ideas and strategies to influence decisions of policy makers. Explores sources of grant funding, and interaction with professional organizations.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDIT 746 - Educational Technology and Assessment

Credits: 3 (NR)
Covers fundamentals of educational assessment and measurement, and relates them to current attempts to use technology for educational assessment. Explores use of computer technology to support traditional testing and innovative ways to assess complex learning.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDIT 747 - Technology and Teacher Development

Credits: 3 (NR)
Investigates latest research and issues related to teacher education to include staff development in K-12 in-service as well as university courses. Students paired with preservice teachers who act as online mentors to develop leadership and mentoring skills.

Prerequisite(s): EDIT 590 or equivalent.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDIT 748 - TIP 2 Technology Innovations Project

Credits: 3 (NR)
Continuation of design and development of EDIT 741 technology-enriched learning module. Students conduct action research, and implement advanced action research project.

Prerequisite(s): EDIT 741 and 590.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDIT 750 - Emerging Educational Technologies
Credits: 3 (NR)
Examines range of educational technologies expected to become important applications in three to eight years. Assesses potential of these emerging technologies to improve practice and alter mission and content of education, and helps students develop skills in strategic planning.

Notes: To be taken in final year of course work.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDIT 752 - Design and Implementation of Technology-based Learning Environments

Credits: 3 (RD)
Students design and produce multimedia/hypermedia applications based on current theory and research in instructional design and cognitive science. Examines user needs, information models, structure, and media selection and uses to inform design and production of final project.

Prerequisite(s): EDIT 732 or permission of instructor. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDIT 760 - Online Teachers and Learners

Credits: 1 (NR)
Examines the attributes of teachers and K-12 learners with emphasis on attitudes, behaviors, and adaptations required by online teachers and learners.

Corequisite(s): EDIT 761.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0
When Offered: Fall

EDIT 761 - Models of Online Learning

Credits: 2 (NR)
Provides opportunities for learners to identify, explore, and evaluate a range of educational models for K-12 online learning. These include blended learning (web-enhanced, web-supported), the flipped classroom, mentor-mentee dyad, group collaborative, synchronous, asynchronous, parent directed e-learning, mobile learning, and web-delivered programmed instruction.

Prerequisite(s): Admissions to Integration of Online Learning in Schools program (IOLS).

Corequisite(s): EDIT 760.

Hours of Lecture or Seminar per week: 2
EDIT 762 - Quality K-12 Online Learning

Credits: 1 (NR)
Examines and evaluates quality indicators for the design of online learning pointing to the six major areas for consideration: instructor-learner, learner-learner, learner-content, learner-interface, learner-instructional strategies, and social presence.

Prerequisite(s): EDIT 760, EDIT 761.
Corequisite(s): EDIT 763.

EDIT 763 - Tools for K-12 Online Learning

Credits: 2 (NR)
Examines tools that structure and support online learning with particular emphasis on the unique affordances of each tool including tools for producing, delivering, and supporting online learning.

Prerequisite(s): EDIT 760, EDIT 761.
Corequisite(s): EDIT 762.

EDIT 764 - The ART of Online Communication

Credits: 3 (NR)
Examines strategies to assess, respond to, and target online communication and develops expertise in questioning and listening, supporting self-regulation, and clarifying conceptual understanding using a series of case studies and role playing activities.

Prerequisite(s): EDIT 763; may also be taken as corequisite.
Corequisite(s): EDIT 763.

When Offered: Fall, Summer, Spring
EDIT 765 - Facilitating K-12 Online Learning

Credits: 2 (NR)
Develops expertise in facilitating and moderating online learning to include synchronous and asynchronous environments, community building strategies, questioning strategies, prompting reflection, and facilitating conceptual understanding.

Prerequisite(s): EDIT 764.
Corequisite(s): EDIT 766.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 0
When Offered: Fall

EDIT 766 - Understanding Online Presence

Credits: 2 (NR)
Examines impacts of distance on teachers and learners and develops strategies to establish teacher presence, to establish and express self, to promote learner-learner connections, and to compensate for the separation of teacher-learner and learner-learner.

Prerequisite(s): EDIT 764.
Corequisite(s): EDIT 765.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 0
When Offered: Fall

EDIT 767 - Designing K-12 Online Learning

Credits: 3 (NR)
Develops frameworks for designing and structuring online learning opportunities and emphasizes course content and learning outcomes, selection of appropriate online models, and organization of online lessons and courses, online learning tools, and assessment and evaluation strategies.

Prerequisite(s): EDIT 766.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring

EDIT 768 - K-12 Online Design I

Credits: 1 (NR)
Develops frameworks for designing and structuring online learning opportunities and emphasizes course content and learning outcomes, selection of appropriate online models, and organization of online lessons and courses online learning tools, and
assessment and evaluation strategies.

**Prerequisite(s):** EDIT 764.

**Corequisite(s):** EDIT 791.

**Hours of Lecture or Seminar per week:** 1  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Summer

---

**EDIT 769 - K-12 Online Design II**

Credits: 1 (NR)  
Focuses on the creation of online courses appropriate for K-12 learners and culminates in comprehensive design documents that detail goals, assessments, learning tools, and detailed scripts or documents ready for the production phase.

**Prerequisite(s):** EDIT 767.

**Corequisite(s):** EDIT 792.

**Hours of Lecture or Seminar per week:** 1  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Summer

---

**EDIT 771 - Overview of Digital Media**

Credits: 1-3 (NR)  
Provides overview of media and technology tools used in teaching, learning and training. Focuses on developing skills necessary to implement digital media approaches using a systematic design process.

**Hours of Lecture or Seminar per week:** 1-3  
**Hours of Lab or Studio per week:** 0

---

**EDIT 772 - Virtual Worlds, Augmented Reality, and Gaming Applications**

Credits: 1-3 (RT)  
Provides basic knowledge of available applications and platforms for creating contextually-based learning environments such as immersive virtual worlds, simulated worlds, alternate reality games, and massive multiplayer online role playing games for e-learning.

**Hours of Lecture or Seminar per week:** 1-3  
**Hours of Lab or Studio per week:** 0

---

**EDIT 773 - Human Computer Interface Design for Teaching and Learning**
Credits: 3 (RD)
Provides overview of human-computer interface issues related to instructional design of technology-centered learning environments. Examines continuum of human-computer feedback.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDIT 790 - Practicum in Instructional Technology

Credits: 1-6 (RD)
Provides supervised practice in applying knowledge and skills of student's chosen track through placement in appropriate work setting.

Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 0
Grading: Graduate Special

EDIT 791 - Project Development Practicum I

Credits: 6 (NR)
Designed for students in the Division of Learning Technologies programs to facilitate the application of design and production processes to the solution of learning challenges with particular emphasis on the design and development phase of the design process.

Prerequisite(s): Permission of Instructor.

Corequisite(s): EDIT 768.

Hours of Lecture or Seminar per week: 6
Hours of Lab or Studio per week: 0
When Offered: Summer

EDIT 792 - Project Development Practicum II

Credits: 6 (NR)
Facilitates the application of design and production processes to the solution of learning challenges with particular emphasis on the implementation and evaluation phase of the design process.

Prerequisite(s): Permission of Instructor.

Corequisite(s): EDIT 769.

Hours of Lecture or Seminar per week: 6
Hours of Lab or Studio per week: 0
When Offered: Summer
EDIT 797 - Advanced Topics in Education

Credits: 1-6 (RD)
Advanced study of selected topics in education for students preparing for doctoral studies or who have been admitted to the PhD program in education.

Notes: May be repeated for credit with CEHD approval.

Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 0

EDIT 801 - Nature and Process of Design

Credits: 3 (NR)
Examines multi- and cross-disciplinary perspectives on the nature and process of designing and developing learning technologies.

Prerequisite(s): EDCI 716, EDIT 752, or EDSE 649

Corequisite(s): EDIT 802 or permission of instructor

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDIT 802 - Cognition and Technology: A Multidisciplinary Approach

Credits: 3 (NR)
Examines learning interactions between cognition and technology using multiple disciplinary perspectives including, cognitive science, psychology, neuroscience, education, design theory, instructional design, technology design, anthropology, sociology, information science, philosophy, semiotics, and linguistics.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDIT 803 - Design-Based Research

Credits: 3 (NR)
Provides an introduction to systematic cycles of design-based research in education. Applicable to all content domains to explore cycles of research within design, development and implementation of educational and training interventions.

Prerequisite(s): EDIT 801

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring
**EDIT 891 - Design Research Practicum**

Credits: 1-9 (RD)
Applies multiple design research cycles to an identified research problem to systematically test and improve technology-based product interventions or other curriculum/training strategies or materials in order to systematically develop knowledge related to teaching, learning and/or training in context.

Prerequisite(s): EDRS 811, EDRS 812, and EDIT 803 or equivalent

Hours of Lecture or Seminar per week: 1-9
Hours of Lab or Studio per week: 1-12
Grading: Graduate Special
When Offered: Fall, Spring, Summer

**EDIT 895 - Emerging Issues in Instructional Technology**

Credits: 3 (NR)
Covers selected emerging issues. Examines ways instructional technology provides infrastructure for creating, managing, and evaluating innovative types of teaching-learning environments.

Prerequisite(s): Admission to PhD program, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**Interdisciplinary Studies (MAIS)**

Offered by the College of Humanities and Social Sciences

**MAIS 796 - MAIS ProSeminar**

Credits: 1 (NR)
Introduces students to the structure of the MAIS program; students create a portfolio of their work which continues during their studies; the portfolio prepares students for the capstone project or thesis.

Prerequisite(s): Acceptance into the MAIS Program

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0
Grading: Satisfactory/No Credit

**MAIS 797 - Interdisciplinary Studies Proposal**

Credits: 1 (NR)
Focused on formulating and writing a MAIS project or thesis proposal.
Prerequisite(s): Admission to MAIS and completion of 21 credits of graduate course work, including any required research methodology course; MAIS 796. ZAL students must have completed 30 credits or have obtained ZAL Director's permission before enrolling in MAIS 797.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0
Grading: Satisfactory/No Credit.

MAIS 798 - Interdisciplinary Studies Project

Credits: 1-5 (RD)
Research project related to student's concentration taken under supervision of faculty advisor and project evaluation committee.

Prerequisite(s): MAIS 797 and prior approval of a project proposal by the committee chair, two committee members, and MAIS director. ZAL student project proposals must have been approved in writing by their institutional supervisor and the ZAL Director.

Notes: Individualized section form required.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0
Grading: S/NC

MAIS 799 - Interdisciplinary Studies Thesis

Credits: 1-5 (RD)
Original research endeavor related to student's MAIS program concentration. Research must result in document meeting MAIS and university standards.

Prerequisite(s): MAIS 797 and prior approval of a thesis proposal by the committee chair, two committee members, and MAIS director.

Notes: Individualized section form required.

Hours of Lecture or Seminar per week: 1-5
Hours of Lab or Studio per week: 0
Grading: S/NC

International Commerce and Policy (ITRN)

Offered by the School of Public Policy

ITRN 500 - Global Political Economy
Foundation course in the ICP program. Explores issues and ideas affecting global security, stability, growth and development from country, regional and thematic perspectives. Introduces students to key concepts, policies, and practices that underpin international commerce, international relations more broadly, and non-governmental transnational activities.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**ITRN 501 - Methods of Analysis for International Commerce and Policy**

Credits: 4 (NR)
Provides the skills necessary to conduct qualitative and quantitative research and analysis of issues related to international commerce and policy. Students obtain practical information on sources of data, their origins, strengths, and weaknesses. Helps develop tools for statistical analysis of data, and includes use of computers for analyzing and displaying information. It covers major data sources as well and literature and indices related to international policy, including trade data, economics and financial indicators, and development indicators.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**ITRN 503 - Macroeconomic Policy in the Global Economy**

Credits: 1-4 (NR)
Provides an analytical introduction and overview of basic concepts in macroeconomic theory with an emphasis on applications to problems in the United States and the contemporary global economy. Covers topics such as inflation, growth and business cycles, fiscal and monetary policies, balance of payments and exchange rates.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Summer, Spring

**ITRN 504 - Microeconomics and Trade Policy**

Credits: 1-4 (NR)
Provides a foundation in microeconomics, including supply and demand analysis, elasticities, the theory of the firm, allocative efficiency and market failure. Covers applications of this microeconomic foundation to international trade theory, trade policy analysis, preferential trade agreements, and international production. Emphasis is on graphical and algebraic analysis.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Summer, Spring

**ITRN 602 - Global Financial Crises and Institutions**
Credits: 3 (NR)
Examines the modern financial sector: how it operates, its regulation, and its role in risk transmission and crisis formation. Reviews global financial markets and instruments. Considers the role of multilateral and regional financial institutions in management of crises, macroeconomic adjustment, development policy and capital flows with emphases on financial crises including the 2007-09 crisis.

Prerequisite(s): ITRN 503.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Summer, Spring

ITRN 603 - Global Trade Relations

Credits: 3 (NR)
Examines U.S. trade policy in the context of global trade relations. Considers the global trading system from legal, institutional and political perspectives, giving particular attention to trade agencies in the United States and abroad, international agreements, and the World Trade Organization. Trade policy formation is analyzed within the context of competing interest groups and corporate strategies.

Prerequisite(s): ITRN 504.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Summer, Spring

ITRN 604 - International Trade and Technology

Credits: 3 (NR)
Examines science and technology policies and international trade, with emphasis on relationships and interactions. Assesses roles of science and technology as economic drivers, and explores strategies employed by companies and governments to link research and development to economic growth and competitiveness. Examines research and development systems and technology-related trade policies of United States, Japan, Europe, major developing countries, and selected newly industrialized economies, emphasizing policies affecting trade and technology. Explores specific cases involving interactions among science, technology, and international trade.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ITRN 612 - International Business Operations and the Multinational Corporation

Credits: 3 (NR)
Examines international business environment and challenges facing companies in conducting operations in increasingly interconnected global marketplace. Focuses on issues of management and organization, and resolution of conflicts that may arise between business organizations and home and host governments. Also focuses on role of multinational corporations in international environment, and impact on global trade, economic development, and political system. Also studies trade and international investment theories and world financial environment. Explores broad issues such as sovereignty of decision making.
and global impact of business activities.

**Hours of Lecture or Seminar per week: 3**
**Hours of Lab or Studio per week: 0**

**ITRN 701 - Special Topics in International Commerce and Policy**

Credits: 1-3 (RT)
Offers specialized courses on various aspects of international commerce and policy.

**Hours of Lecture or Seminar per week: 1-3**
**Hours of Lab or Studio per week: 0**

**ITRN 702 - Special Topics in International Commerce and Policy: Study Abroad**

Credits: 3-6 (RT)
Provides opportunity for study abroad under supervision of Mason faculty.

**Notes:** Course topics, content, and locations vary.

**Hours of Lecture or Seminar per week: 3**
**Hours of Lab or Studio per week: 0**

**ITRN 710 - International Business Transactions: Finance and Investment**

Credits: 3 (NR)
Focuses on techniques for financing trade and payment methods, including letters of credit, counter trade, and other approaches. Covers issues of direct concern in financing international business operations, such as preparing financing proposals, risk insurance, international taxation, pricing policies, and currency conversion and foreign exchange risk management. Introduces foreign direct investment, alliances and acquisitions, joint ventures, and other methods for investing overseas.

**Hours of Lecture or Seminar per week: 3**
**Hours of Lab or Studio per week: 0**

**ITRN 711 - United States Law and Global Trade**

Credits: 3 (NR)
Surveys types of regulations imposed by United States, foreign governments, and international institutions on transnational business activities. Reviews principal regulatory bodies in United States and overseas, and powers and authorities. Covers tariffs and customs regulations; product safety and environmental restrictions; intellectual property, copyright, trademark, and patent regulations; and licensing rules. Also covers special restrictions that may be imposed because of political considerations such as embargoes, munitions controls, and antibribery and antiboycott regulations.
ITRN 712 - World Trade Organization and Global Trade

Credits: 3 (NR)
Focuses on legal aspects of international trade regulation by studying international legal and political regime established under WTO, and assessing impact of domestic economic legislation on U.S. trade regulations.

ITRN 715 - Global Environment and the World Economy

Credits: 3 (NR)
Examines growing relationship between environmental interdependence and developing world economy. Assesses increased globalization of environmental and health issues with a focus on the impact on those issues on international transactions involving trade and development. Attempts to develop an understanding of relationship of scientific knowledge to global environment in context of existing political and economic institutions. Emphasizes formulating and assessing policies and structures for corporations, nations, regions, and international organizations. Tensions among free trade, international competitiveness, and regulatory responses are central. Gives attention to practices of nations and international organizations, emerging forms of regional and international cooperation, and growing use of multilateral agreements.

ITRN 716 - European Union in the International System

Credits: 3 (NR)
Examines current developments in European market integration from global perspective. Emphasizes impact of single market, and proposed economic and monetary union of United States and other major trading partners. Examines European economic relations with Eastern Europe, former Soviet Union, and Lome Pact countries.

ITRN 717 - International Science and Technology

Credits: 3 (NR)
Examines U.S. science and technology policies (S&T) and structures, as well as those in other leading countries. Assesses functional links between S&T and international transactions focusing on trade, national security, finance, and development assistance. Considers emergence of multilateralism and international institutional arrangements as alternatives to traditional bilateral patterns of cooperation.
ITRN 718 - Global Economic and Human Development

Credits: 3 (NR)
Interdisciplinary examination of economic and human development in world economy. Introduces alternative concepts and theories of economic and human development, and analytical frameworks for assessing important issues that arise in development process. Topics include colonialism, economic growth, population, health, education, industrialization, and rural development.

ITRN 720 - Regional and Supranational Organizations

Credits: 3 (NR)
Assesses role of international organizations in international system today, and focuses on wide range of international and regional economic and political institutions. Emphasizes changing nature of these organizations in relation to nation states, and relationship of international organizations to U.S. national security and economic interests.

ITRN 731 - Business-to-Business Marketing in International Commerce

Credits: 3 (NR)
Provides understanding of concepts of international marketing process and international environment within which companies operate.

ITRN 734 - Pricing in International Commerce

Credits: 3 (NR)
Deals with theory and techniques of pricing that enable organizations to effectively pursue marketing and business strategies.

ITRN 736 - Sources of Growth in East Asia
Credits: 3 (NR)
Examines extraordinary economic success of East Asian NIEs and some of their problems. Focuses on understanding proximate sources of growth, role of technological development, and salient political issues.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**ITRN 738 - Fundamentals of International Marketing**

Credits: 3 (NR)
Offers working knowledge of principles and practices that enable managers to effectively market organizations, products, services, and brands. Emphasizes international dimensions of marketing where appropriate.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**ITRN 740 - ABCs of Exporting and Importing**

Credits: 3 (NR)
Acquaints students with legal, regulatory, and practical issues in importation and exportation of merchandise. Topics include theoretical framework for government oversight of international movement of goods; legal issues between parties and governments; and practical guidance concerning structuring of import and export transactions to avoid legal and tariff liability.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**ITRN 742 - Technology Policy and International Strategies**

Credits: 3 (NR)
Introduces opportunities and problems created for organizations and society by Internet, and policies affecting trajectory of Internet developments. Also covers technological factors in planning horizon; domestic policy and international treaty factors affecting Internet trajectory; and new horizons for Internet applications.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**ITRN 744 - The Politics of International Competitiveness**

Credits: 3 (NR)
Provides inquiry into governance problems of public managers and political leaders as they cope with global competitiveness in post-industrial era. Focuses on integrating public and private sectors worldwide, with special emphasis on U.S. role and how it influences such areas as technology transfer, national security, electronic commerce, trade policies, money flows, and human resources.
ITRN 750 - Trade and Politics in Eastern Europe and the Former Soviet Union

Credits: 3 (NR)
Examines background and recent developments in political, business, and cultural environment confronting American firms seeking to do business in Eastern Europe and former Soviet Union. Emphasizes international trade patterns and relations between these states and United States. Examines modes of doing business in these countries, and unique problems American firms confront. Focuses on privatization, joint ventures, and counter trade.

ITRN 752 - Global Business and Policy

Credits: 3 (NR)
Focuses on the multinational firm (MNE) and examines the international activities of large companies as well as small and medium sized enterprises. Assesses how firms strategize across national borders and address the challenges posed by different governance structures, political economies, institutions and cultures. Theoretical concepts are applied to ‘real’ business situations and case studies.

ITRN 754 - International Commercialization of Space

Credits: 3 (NR)
Identifies and analyzes problems and transactions concerning privatization and commercialization of transnational space activities, including launch and satellite operations. Emphasizes interplay of new technologies with existing legal, political, and business structures in formulating viable commercial satellite and launch operations. Focuses on planning and implementing private space actions in conjunction with various public and private international organizations. Sessions focus on interdisciplinary aspects of space commercialization involving technology, finance, tax, insurance, joint venture and business matters, and international legal and national regulatory issues. Guest lecturers include leading business executives engaged in space and satellite operations.

ITRN 756 - National Security and the Global Economy

Credits: 3 (NR)
Examines impact of globalization and changes in international economic and political systems on concepts of national security.
Emphasizes nexus of economic and security concerns in post-Cold War era, with particular attention to emerging issues including trade and economic security, proliferation of advanced military technology and control of weapons of mass destruction, international drug trafficking, and defense conversion. Focuses on implications of changing security requirements on U.S. defense and economic policy and activities.

**ITRN 757 - Business and Politics in Emerging Markets**

Credits: 3 (NR)
Examines developing countries that are major destination points for international financial flows and foreign direct investment. Emerging markets have become a major influence in the world economy both because of the potential for growth and the downside risks from economic crises. The course uses the new institutional economics to analyze the interplay of political, economic, and business conditions. Institutional economics is a combination of economics, economic history, and political science. Topics covered include the politics of economic reform, drivers of globalization and investment, the informal sector, and relationships of risk and reward.

**ITRN 758 - Global Market Planning Practicum**

Credits: 3 (NR)
Provides opportunity to develop international market plan for specific industry or service sector. Students consult with industry experts and use key trade databases to develop strategic plan that recommends market entry strategies. Completed market plan submitted to industry experts for use and dissemination.

**ITRN 759 - Country Risk Analysis**

Credits: 3 (NR)
Presents a wide variety of country risk analysis methods used by corporations, financial institutions, governments, international organizations, specialized consulting groups, and publications. These methods are used to design policies, programs, and projects in the international arena. The course explores natural, commercial, economics, political and financial risk. It also provides a conceptual foundation for understanding the sources of risk, the impacts of risk on public and private sector activities, and the ways that risk can be successfully mitigated or managed.

**ITRN 760 - International Environmental Politics**
Credits: 3 (NR)

Examines growing concerns related to global environmental issues and problems they pose to domestic, foreign, and international political institutions. Covers major environmental issues including global warming, ozone depletion, cross-border flow of pollution, and threats to biodiversity. Assesses strengths and weaknesses of traditional political institutions in dealing with these issues and providing for sustainable economic development while limiting environmental damage. Designated a Green Leaf Course.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ITRN 761 - European Political and Economic Union

Credits: 3 (NR)

Examines movement for European integration since World War II, focusing on political and institutional development of European Community/Union. Topics include theories of European integration, Treaties of Rome, Single European Act, Maastricht Treaty, European Union (EU) policies and programs, and EU's external relations. Analyzes changing nature of U.S.-EU relations and prospects for EU enlargement into Central and Eastern Europe.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ITRN 764 - Trade, Investment, and Politics in East Asia

Credits: 3 (NR)

Examines issues related to international transactions involving Korea, China, Taiwan, and Hong Kong, with some attention to Japan. Focuses on trade and financial relations between these East Asian nations and United States. Assesses impact of culture and domestic political and economic institutions within these states, and roles in regional institutions and in international system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ITRN 765 - Trade, Investment, and Politics in Sub-Saharan Africa

Credits: 3 (NR)

Examines role and potential of sub-Saharan Africa in international trading system. Emphasizes political, historical, cultural, and development factors. Focuses on perspectives of U.S. firms and on international institutions trading or investing in region.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ITRN 766 - Trade, Investment, and Politics in the Middle East and North Africa
Credits: 3 (NR)
Examines major economic, political, and cultural issues that influence trade and investment relations with Middle East and North Africa. Focuses on roles of international and regional institutions in economic development, and develops understanding of challenges facing region and their implications for formulating trade and investment strategies by U.S. firms.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ITRN 767 - Political Economy and Integration in Latin America

Credits: 3 (NR)
Examines contemporary political, economic, and cultural dynamics of Latin American and Caribbean regions. Emphasizes issues and trends that affect U.S.-Latin American political, business, and trade relations, particularly recent political and economic reforms. Examines roles of domestic interest groups and decision-making systems in individual countries, and evolution of regional integration arrangements and integration with international system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ITRN 768 - Global Intellectual Property Rights and International Trade

Credits: 3 (NR)
Examines national and regional systems, international contractual relations (licensing), and the evolving global system for protecting intellectual property. Addresses current international treaty system and the ongoing multilateral efforts to strengthen worldwide intellectual property protection. Examines intellectual property regimes worldwide, including regional and bilateral challenges and opportunities, and relevant U.S. law and policy responses.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ITRN 769 - International Entrepreneurship

Credits: 3 (NR)
Introduces practical planning approach for small and medium-size entrepreneurial firms seeking to enter international marketplace. Focuses on key business and financial documents related to doing business overseas; and assesses role of language, technology, and information systems in formulating successful business strategy. Role playing and simulated negotiations provide opportunities for students to sharpen business skills.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ITRN 770 - International Contract Negotiation
Reviews growing role of arbitration in international transactions. Examines international, national, and government arbitration bodies, with particular emphasis on how differing cultural characteristics affect negotiating behavior and effectiveness of arbitration.

Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0

**ITRN 771 - Trade, Investment, and Politics in South and Southeast Asia**

Credits: 3 (NR)  
Focuses on trade and finance issues in the most dynamic countries of South and Southeast Asia. Assesses cultural and political factors, regional trade patterns, and institutions, focusing on implications for regional development and business opportunities for U.S. firms.

Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0

**ITRN 772 - International Telecommunications**

Credits: 3 (NR)  
Focuses on developments in international telecommunications and satellite regulation. Examines regulatory environment, and business and financial aspects of global telecommunications industry.

Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0

**ITRN 773 - International Strategic Management**

Credits: 3 (NR)  
Presents comprehensive approach to international strategy formulation, implementation, and evaluation processes affecting policy and program development within multinational firms and government agencies. Integrates marketing, finance, accounting, and management. Covers techniques for forecasting international business, political, economic, technological, legal, and sociocultural forces.

Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0

**ITRN 780 - Internship**

Credits: 1-3 (NR)  
Provides practical work experience in state, federal, or international agencies or private sector. Requires written project integrating work experience and academic program.
Prerequisite(s): Permission of Department and Advisor. Majors only.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
Grading: Satisfactory/No Credit

**ITRN 790 - Independent Study**

Credits: 1-3 (RT)
Provides opportunity to pursue intensive research in area of interest not covered by other courses.

Prerequisite(s): Permission of Department and Advisor. Majors only.

Notes: Note: Not all courses earn 3 graduate credits. Some courses may vary in length and thus, in credits earned. Some course requirements subject to change.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**ITRN 791 - Advanced Trade Policy**

Credits: 3 (NR)
Covers international trade theory, trade policy analysis, regional economic integration, and institutional arrangements governing world trade. Examines dispute settlement regimes, and relationship between trade and environment. Includes WTO and constituent agreements in the areas of goods, services, intellectual property, and trade-related investment measures.

Prerequisite(s): Permission of instructor required.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**ITRN 795 - Final Project**

Credits: 1-3 (RD)
Includes writing 40-page capstone paper that draws together key themes of program.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
Grading: Graduate Special

**Italian (ITAL)**

Offered by the College of Humanities and Social Sciences
ITAL 101 - Elementary Italian I

Credits: 3 (NR)
Designed for students with no prior knowledge of Italian. Includes elements of grammar, vocabulary, oral skills, listening comprehension, and reading.

Notes: Students may not receive credit for ITAL 101 and ITAL 110.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ITAL 102 - Elementary Italian II

Credits: 3 (NR)
Continuation of ITAL 101.

Prerequisite(s): ITAL 101 or permission of instructor.

Notes: Students may not receive credit for ITAL 102 and ITAL 110.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ITAL 110 - Elementary Italian

Credits: 6 (NR)
Introduces elements of grammar, vocabulary, oral skills, listening comprehension, and reading.

Notes: Students may not receive credit for ITAL 110 and ITAL 101 or 102.

Hours of Lecture or Seminar per week: 6
Hours of Lab or Studio per week: 0

ITAL 201 - Intermediate Italian I

Credits: 3 (NR)
Further development of skills in listening, speaking, and writing.

Prerequisite(s): ITAL 102 or permission of department.

Notes: ITAL 201 and 202 must be taken in sequence. Students may not receive credit for ITAL 201 and ITAL 210.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
ITAL 202 - Intermediate Italian II

Credits: 3 (NR)
Application of language skills to reading, composition, and discussion.

Prerequisite(s): ITAL 201 or permission of department.

Notes: Students may not receive credit for ITAL 202 and ITAL 210.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 1

ITAL 210 - Intermediate Italian

Credits: 3 (NR)
Continuation of the development of basic components of the language, with focus on listening, speaking, reading, and writing skills. Introduces students to the cultures and histories of Italian-speaking regions.

Prerequisite(s): ITAL 110 or appropriate placement score.

Notes: Students may not receive credit for ITAL 210 and ITAL 201 or 202.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ITAL 250 - Gateway to Advanced Italian

Credits: 3 (NR)
Development of advanced intermediate-level proficiency with a primary focus on seven major communicative functions: describing, comparing, recommending and expressing opinions, recounting the past, expressing likes and dislikes, hypothesizing, and talking about the future. Examination of authentic materials from various Italian-speaking regions.

Prerequisite(s): ITAL 210; appropriate placement score; or permission of department.

Notes: Taught in Italian.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ITAL 320 - Topics in Italian Film and Literature

Credits: 3 (NR)
Explores Italian history through the lens of literary and cinematic movements from 1911 onwards. Compares the representations of historical movements in different artistic languages, from poetry and prose to the moving image. Topics include neorealism, Fascism, the Resistance, the Mafia and others.
ITAL 325 - Major Italian Writers

Credits: 3 (NR)
Works of major Italian or Italian-American authors in translation. Writers to be studied vary.

Fulfills Mason Core requirement in literature.

Prerequisite(s): ENGL 101/ENGH 101 or equivalent; or permission of instructor

Notes: Taught in English.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ITAL 330 - Advanced Italian: Language and Culture

Credits: 3 (NR)
Develops linguistic and critical proficiency in Italian language and culture for students who have completed intermediate studies in Italian. Analyzes authentic texts that reveal the diversity of Italian experience in regional, national and international contexts. Fosters advanced reading, writing, speaking, and listening skills that will enable students to understand and to critique Italian with greater ease and sophistication.

Prerequisite(s): ITAL 250; appropriate placement score; or permission of instructor

Notes: Taught in Italian.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ITAL 331 - Advanced Italian Language and Culture

Credits: 3 (NR)
An advanced course that emphasizes linguistic fluency and cultural awareness in contemporary Italian realities. Highlights changes in the domestic, regional, and national spheres.

Prerequisite(s): ITAL 330

Notes: Taught in Italian.
ITAL 340 - Italian through Film

Credits: 3 (NR)
Develops linguistic proficiency and historical and cultural awareness through the study of a thematic selection of films. Fosters advanced reading, writing, speaking, and listening skills, incorporating advanced-level grammar and vocabulary in a content-based approach.

Prerequisite(s): ITAL 250, appropriate placement score, or permission of instructor.

Notes: Taught in Italian.

ITAL 420 - Global and Local Italy

Credits: 3 (NR)
Examines Italian culture in its urban, regional, national, and diasporic manifestations. Analyzes authentic texts, from literature to journalism, in the spirit of a cultural studies approach. Fosters advanced reading, writing, speaking, and listening skills that will enable students to understand and critique contemporary Italy with greater ease and sophistication.

Prerequisite(s): ITAL 330.

Notes: Taught in Italian.

Japanese (JAPA)

Offered by the College of Humanities and Social Sciences

JAPA 101 - Introduction to the Japanese Language

Credits: 3 (NR)
Includes basic grammar, oral expression, listening comprehension, and reading and writing.

Notes: Students may not receive credit for JAPA 101 and JAPA 109 or 110.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
JAPA 102 - Introduction to the Japanese Language

Credits: 3 (NR)
Includes basic grammar, oral expression, listening comprehension, and reading and writing.

Notes: Students may not receive credit for JAPA 102 and JAPA 109 or 110.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

JAPA 109 - Intensive Japanese I

Credits: 6 (NR)
Equivalent to JAPA 101, 102 taught in a single semester.

Notes: Recommended for students who desire intensive introduction to Japanese. Students may not receive credit for JAPA 109 and JAPA 101, 102, or 110.

Hours of Lecture or Seminar per week: 6
Hours of Lab or Studio per week: 0

JAPA 110 - Elementary Japanese

Credits: 6 (NR)
Introduces elements of grammar, vocabulary, oral skills, listening comprehension, reading, and writing.

Notes: Students may not receive credit for JAPA 110 and JAPA 101, 102, or 109.

Hours of Lecture or Seminar per week: 6
Hours of Lab or Studio per week: 0

JAPA 201 - Intermediate Japanese I

Credits: 3 (NR)
Further development of skills acquired in JAPA 101 and 102, including grammar, oral expression, listening comprehension, reading and writing. Use of written language (katakana, hiragana, and kanji) emphasized.

Prerequisite(s): JAPA 102 or equivalent.

Notes: Students may not receive credit for JAPA 201 and JAPA 209 or 210.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
JAPA 202 - Intermediate Japanese II

Credits: 3 (NR)
Continuation of JAPA 201.

Prerequisite(s): JAPA 201 or equivalent.

Notes: Students may not receive credit for JAPA 202 and JAPA 209 or 210.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

JAPA 209 - Intensive Japanese II

Credits: 6 (NR)
Equivalent to JAPA 201, 202 taught in a single semester.

Prerequisite(s): JAPA 102 or 109, or equivalent.

Notes: Students may not receive credit for JAPA 209 and JAPA 201, 202, or 210.

Hours of Lecture or Seminar per week: 6
Hours of Lab or Studio per week: 0

JAPA 210 - Intermediate Japanese

Credits: 3 (NR)
Continuation of the development of basic components of the language, with focus on listening, speaking, reading, and writing skills. Also introduces students to Japanese culture and society.

Prerequisite(s): JAPA 110, appropriate placement score, or permission of instructor.

Notes: Students may not receive credit for JAPA 210 and JAPA 201, 202, or 209.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

JAPA 250 - Gateway to Advanced Japanese

Credits: 3 (NR)
Development of advanced intermediate-level Japanese language skills in the interpersonal, interpretive, and presentational modes of communication. Incorporates strong component of critical and comparative analysis of Japanese cultural products, practices, and perspectives of the past and the present.
Prerequisite(s): JAPA 210, appropriate placement score, or permission of department.

Notes: Taught in Japanese.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

JAPA 310 - Japanese Culture in a Global World

Credits: 3 (NR)
Study of globalizing Japanese cultural phenomena from the 19th through the 21st century. Explores how movements of ideas, technologies and products across borders influence both local and global ideas and practice.

Fulfills Mason Core requirement in global understanding.

Prerequisite(s): ENGL 101/ENGH 101 or equivalent; or permission of instructor.

Notes: Taught in English. Fulfills the college requirement in non-Western culture.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

JAPA 320 - Japanese Cinema

Credits: 3 (RT)
Comprehensive analysis of Japanese cinema based on cross-cultural perspectives and cultural criticism. Major developments and trends as viewed in selected Japanese films with emphasis on post war and contemporary eras. Knowledge of Japanese history, communication, and cultural studies or film and media studies helpful.

Notes: Taught in English. May be repeated for a maximum of 6 credits when topic is different with approval of department.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

JAPA 330 - Advanced Reading and Speaking I

Credits: 3 (NR)
Designed for students to develop conversational proficiency and reading skills. Students work toward a mastery of linguistic and sociolinguistic rules by incorporating reading and speaking abilities through class discussions, reports, and presentations.

Prerequisite(s): JAPA 250, appropriate placement score, or permission of instructor.

Notes: Taught in Japanese.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
**JAPA 331 - Advanced Reading and Speaking II**

Credits: 3 (NR)
Designed for students to develop conversational proficiency and reading skills. Students continue to develop mastery of linguistic and sociolinguistic rules by incorporating reading and speaking abilities through class discussions, reports and presentations.

**Prerequisite(s):** JAPA 330, appropriate placement score, or permission of instructor.

**Notes:** Taught in Japanese.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**JAPA 340 - Topics in Japanese Literature**

Credits: 3 (RD)
Study of selected topics in Japanese literature in English translation. Content varies.

Fulfills Mason Core requirement in literature.

**Prerequisite(s):** ENGH 101 or equivalent, or permissions of instructor.

**Notes:** May be repeated for a maximum of 6 credits when topic is different with permission of department. Fulfills the college requirement in non-Western culture.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**JAPA 350 - Readings in Japanese Culture**

Credits: 3 (NR)
An integrated content-based Japanese course designed to advance students' oral and writing skills, as well as their critical understanding of Japanese culture and mythology. Introduces a variety of genres, such as rakugo (traditional comical storytelling), shinwa (myths), and mukashi-banashi (folk legends).

**Prerequisite(s):** JAPA 250, appropriate placement score, or permission of department.

**Notes:** Taught in Japanese.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**JAPA 440 - Integrated Study of Japanese Language and Society I**

---

George Mason University 2014-2015 Official University Catalog 2725
Credits: 3 (NR)
Integrated approach to study of Japanese language and society through grammar review, vocabulary and kanji development, intensive practice in spoken and written Japanese, and sociological and cultural readings and analysis. Includes class discussion, oral and written reports, and out-of-class direct interactions with native speakers.

Prerequisite(s): JAPA 331, appropriate placement score, or permission of instructor.

Notes: Taught in Japanese.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

JAPA 441 - Integrated Study of Japanese Language and Society II

Credits: 3 (NR)
Integrated approach to study of Japanese language and society through grammar review, vocabulary and kanji development, intensive practice in spoken and written Japanese, and sociological and cultural readings and analysis. Includes class discussion, oral and written reports, and out-of-class direct interactions with native speakers. More emphasis on actual use of Japanese language.

Prerequisite(s): JAPA 440, appropriate placement score, or permission of instructor.

Notes: Taught in Japanese.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

Kinesiology (KINE)

Offered by the College of Education and Human Development

KINE 100 - Introduction to Kinesiology

Credits: 3 (NR)
Provides an overview of the field of kinesiology in the form of an introductory course. Students gain exposure to: history of the field, policies and procedures for the concentration, career options, and the model of evidence-based knowledge.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Summer, Spring

KINE 200 - Principles of Health Related Fitness

Credits: 2 (NR)
Provides students with basic knowledge and skills associated with exercise training methods, lifting techniques, and health-
related fitness testing procedures. Selection of developmentally appropriate exercises emphasized. Participation in fitness tests required.

**Prerequisite(s):** BIOL 124, BIOL 125, ATEP 300. Prerequisite enforced by registration system.

**Corequisite(s):** KINE 310.

**Hours of Lecture or Seminar per week:** 2  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall, Spring

---

**KINE 249 - An Analysis of Boxing**

Credits: 3 (NR)  
Provides study of the sport of boxing from cultural, historical, physical, and scientific perspectives. Well-known writings from literature on boxing as well as boxing training methods, and program design will be addressed. Physical participation will include basic boxing skills, conditioning, and fitness testing of participants.

**Prerequisite(s):** ENGH 100 or ENGH 101.

**Notes:** All students must purchase hand wraps, heavy bag gloves, mouthpieces, and jump ropes. Boxing and/or wrestling shoes are strongly recommended.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall, Summer

---

**KINE 250 - Endurance Sport Program Design**

Credits: 3 (NR)  
Provides students with knowledge necessary to train another individual safely and effectively for endurance sports. Emphasis will be placed on running; however, cycling and swimming will be covered. Topics covered include: functional, physiology, psychological aspects of endurance competitions, basic nutritional requirements, injury reduction, training techniques, safety, race management, and history of endurance sports.

**Prerequisite(s):** BIOL 124, BIOL 125, ATEP 300, KINE 200.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Summer, Spring

---

**KINE 310 - Exercise Physiology I**

Credits: 3 (NR)  
Introduces students to the physiologic, neuroendocrine, and biochemical changes of the human body that are associated with exercise and work.
Prerequisite(s): BIOL 124, BIOL 125, ATEP 300. Prerequisite enforced by registration system.

Corequisite(s): KINE 200.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Summer, Spring

KINE 320 - Principles of Human Nutrition

Credits: 3 (NR)
Assesses dietary habits and patterns in relation to nutrient requirements across the age spectrum and for a variety of populations. Emphasizes weight control, diet in relation to physical activity, and current nutritional controversies.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring, Summer

KINE 330 - Seminar in Kinesiology

Credits: 3 (NR)
Prepares students for the fieldwork experience in KINE 341: Kinesiology Internship I. Topics covered include: professionalism, review of evidence-based position papers, and discussion of contemporary issues in kinesiology.

Equivalent to HEAL 430.

Prerequisite(s): Junior standing (60 credit hours)
KINE 100, KINE 200, ATEP 300, KINE 310, KINE 370. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

KINE 341 - Kinesiology Internship I

Credits: 3 (NR)
Provides a paid or voluntary supervised professional experience in an approved exercise science professional setting under the supervision of a practicum University Supervisor and Agency Supervisor.

Prerequisite(s): KINE 200, KINE 310, KINE 330, KINE 350, KINE 370. Junior status (60 credits). Current CPR, AED, and First Aid. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Summer, Spring
KINE 350 - Exercise Prescription and Programming

Credits: 3 (NR)
Provides students with an opportunity to develop an understanding of the assessment and evaluation process used in cardio-respiratory training and anaerobic conditioning for healthy, athletic, and symptomatic populations.

Prerequisite(s): KINE 200
ATEP 300
KINE 310
KINE 370 Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

KINE 360 - Strength Training: Concepts and Applications

Credits: 3 (NR)
Provides students with an opportunity to develop an in-depth understanding of the principles of strength training and conditioning, including: anatomical and physiological considerations, lifting techniques, equipment selection, program development/evaluation, and weightlifting safety; thus enabling them to teach and train client.

Equivalent to PHED 364

Prerequisite(s): BIOL 124 and BIOL 125; ATEP 300 and KINE 310. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring

KINE 370 - Measurement and Evaluation of Physical Fitness

Credits: 3 (NR)
This course provides students with an opportunity to develop a understanding of the assessment and evaluation process in the determination of physical fitness.

Equivalent to PHED 365

Prerequisite(s): BIOL 124 and BIOL 125; ATEP 300 and KINE 310. Prerequisite enforced by registration system.

Notes: This is designated a writing intensive course.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall
KINE 380 - Exercise Prescription and Programming for Special Populations

Credits: 3 (NR)
Provides the study of the pathophysiology of common diseases and conditions with concentration in the design and implementation of exercise programs.

Prerequisite(s): KINE 200, KINE 310, KINE 330, KINE 350, KINE 370; or permission of instructor. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring

KINE 400 - Biomechanics

Credits: 3 (NR)
Focuses on kinetic and kinematic concepts and how they apply to the quantitative assessment of human movement. Analyzes human movement and the functional dynamics of tissue such as muscle or bone.

Prerequisite(s): BIOL 124, BIOL 125, ATEP 300, KINE 360. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

KINE 410 - Exercise Physiology II

Credits: 3 (NR)
Provides study in the advanced theory of exercise physiology. Knowledge related to the physiologic, neuroendocrine, and biochemical changes of the human body associated with both a single bout of exercise and chronic exercise training will be addressed.

Prerequisite(s): BIOL 124, BIOL 125, KINE 310. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Summer

KINE 420 - Sport and Exercise Nutrition

Credits: 3 (NR)
Explores the fundamental biochemical and physiological rationale for optimal nutrient intake for health, physical fitness, and athletic performance. Specific attention is focused upon the relationship nutrition has with exercise, physical fitness, health, and athletic performance.

Prerequisite(s): HEAL 330
KINE 310 Prerequisite enforced by registration system.
**KINE 441 - Kinesiology Internship II**

Credits: 3 (NR)
Provides a supervised professional experience in two separate approved kinesiology professional settings under the supervision of both a University Supervisor and an Agency Supervisor with emphasis placed upon exercise programming and implementation for both clinical (site 1) and performance (site 2) populations.

Prerequisite(s): 90 credits (Senior status)
KINE 330, KINE 341, KINE 350, KINE 360, KINE 370, KINE 380
Current CPR, AED, and First Aid Prerequisite enforced by registration system.

**KINE 490 - Kinesiology Internship III**

Credits: 12 (NR)
Provides a directed, field-based experience, in which students observe and participate in conditions, practices, and settings where sought career roles are conducted. The kinesiology fieldwork coordinator must approve placement for the practicum. Both a University supervisor and an approved agency supervisor with recognized professional certifications coordinate and oversee the student's internship experience.

Prerequisite(s): 90 credits, KINE 330, KINE 341, KINE 400, KINE 410, KINE 420, KINE 441, Current CPR, AED, and First Aid Certification. Prerequisite enforced by registration system.

**KINE 499 - Independent Study in Kinesiology**

Credits: 1-3 (RD)
Study of a topic regarding theory, research, or practice in kinesiology under the direction of a faculty member. May be repeated, but no more than 3 total credits hours may be earned.

Prerequisite(s): Completion of 90 credit hours and Permission of Instructor.
Korean (KORE)

Offered by the College of Humanities and Social Sciences

KORE 110 - Elementary Korean

Credits: 6 (NR)
Introduces elements of grammar, vocabulary, oral skills, listening comprehension, and reading.

Hours of Lecture or Seminar per week: 6
Hours of Lab or Studio per week: 0

KORE 201 - Intermediate Korean I

Credits: 3 (NR)
Continuation of basic Korean listening, speaking, reading, and writing skills. Online and lab work required.

Prerequisite(s): KORE 102, appropriate placement score, or permission of department

Notes: Students may not receive credit for KORE 201 and KORE 210.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

KORE 202 - Intermediate Korean II

Credits: 3 (NR)
Continuation of KORE 201. Online and lab work required.

Prerequisite(s): KORE 201, appropriate placement score, or permission of department

Notes: Students may not receive credit for KORE 202 and KORE 210.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

KORE 210 - Intermediate Korean

Credits: 3 (NR)
Continuation of the development of basic components of the language, with focus on listening, speaking, reading, and writing skills. Introduces students to the cultures and histories of Korean-speaking regions.

Prerequisite(s): KORE 110 or appropriate placement score.
KORE 250 - Gateway to Advanced Korean

Credits: 3 (NR)
Develops advanced-intermediate level reading, writing, listening, and speaking skills through a comparative analysis of Korean cultural products and practices and a critical analysis of the influence of globalization and East Asian regional dynamics.

Prerequisite(s): KORE 210; appropriate placement score; or permission of instructor.

KORE 305 - Business Korean

Credits: 3 (NR)
Develops intermediate- to high- level Korean reading, writing, listening and speaking skills while increasing culture awareness in Korean business settings through authentic materials and hands-on projects with people in the Korean business community.

Prerequisite(s): KORE 250; appropriate placement score; or permission of instructor.

Notes: Taught in Korean.

KORE 310 - Classical Korean Literature

Credits: 3 (NR)
Develops students' advanced-intermediate Korean language skills and cultural awareness through an extensive overview of classical Korean literature.

Prerequisite(s): KORE 250; appropriate placement score; or permission of department.

KORE 311 - Modern Korean Literature in Translation
Credits: 3 (NR)
Explores twentieth and twenty-first century Korean literary works through the critical and comparative analysis of Korean
cultural products, practices and perspectives of the past and the present.

**Prerequisite(s):** ENGH 101; appropriate placement score; or permission of instructor.

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0

---

**KORE 330 - Advanced Korean Language and Culture**

Credits: 3 (NR)
Develops advanced level Korean language skills and cultural awareness in interpersonal, interpretive and presentational modes of
communication.

**Prerequisite(s):** KORE 250; Appropriate Placement Score; or Permission of Instructor.

**Notes:** Taught in Korean.

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0

---

**Latin (LATN)**

Offered by the College of Humanities and Social Sciences.

Placement: See Academic Testing in the Admissions section.

---

**LATN 101 - Elementary Latin**

Credits: 3 (NR)
Introduction including basic grammar, vocabulary, and development of reading skills, and introduction to Roman civilization.

**Notes:** Must be taken in sequence. Students may not receive credit for LATN 101 and LATN 109.

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0

---

**LATN 102 - Elementary Latin**

Credits: 3 (NR)
Introduction including basic grammar, vocabulary, and development of reading skills, and introduction to Roman civilization.

**Notes:** Must be taken in sequence. Students may not receive credit for LATN 102 and LATN 109.
LATN 109 - Intensive Elementary Latin

Credits: 6 (NR)
Recommended for students in minors of classical studies or Latin, and for students who want intensive introduction.

Notes: Students may not receive credit for LATN 109 and LATN 101 or 102.

Hours of Lecture or Seminar per week: 6
Hours of Lab or Studio per week: 0

LATN 201 - Intermediate Latin I

Credits: 3 (NR)
Intensive review of elementary grammar. Introduces more advanced grammatical constructions and patterns of usage, continued development of reading proficiency, and vocabulary and readings in Latin literature.

Prerequisite(s): LATN 102 or equivalent.

Notes: Students may not receive credit for LATN 201 and LATN 209.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

LATN 202 - Intermediate Latin II

Credits: 3 (NR)
Study of advanced grammatical constructions, vocabulary, and patterns of usage. Reading of selections from Roman authors of late Republic and early Empire, and study of cultural and political backgrounds.

Prerequisite(s): LATN 201 or equivalent.

Notes: Students may not receive credit for LATN 202 and LATN 209.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

LATN 209 - Intensive Intermediate Latin

Credits: 6 (NR)
Intensive Intermediate Latin.
Notes: Students may not receive credit for LATN 209 and LATN 201 or 202.

Hours of Lecture or Seminar per week: 6
Hours of Lab or Studio per week: 2

LATN 351 - Roman Prose Literature

Credits: 3 (RD)
Introduces major work of prose, themes, and literary qualities. Emphasizes interpretation and stylistic analysis. Concentrates on one complete work; topics, authors vary.

Prerequisite(s): LATN 202 or equivalent.

Notes: Readings in Latin. May be repeated for a maximum of 6 credits when topic is different.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

LATN 352 - Roman Poetry

Credits: 3 (RD)
Introduces major work of poetry and themes, meters, and poetic techniques. Emphasizes interpretation, metrical and stylistic analysis, and poet's role in society. Topics and authors vary.

Prerequisite(s): LATN 202 or equivalent.

Notes: Readings in Latin. May be repeated for a maximum of 6 credits when topic is different.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

LATN 451 - Studies in Roman Literature

Credits: 3 (RD)
Focuses on a single Latin author or literary genre. Approaches subject from variety of interpretive perspectives, and uses secondary literature as well as primary texts. Topics and authors vary.

Prerequisite(s): LATN 351/352 or equivalent, or permission of instructor.

Notes: Readings in Latin. May be repeated for a maximum of 6 credits when topic is different.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

LATN 452 - Studies in Roman Literature
Credits: 3 (RD)
Focuses on a single Latin author or literary genre. Approaches subject from variety of interpretive perspectives, and uses secondary literature as well as primary texts. Topics and authors vary.

Prerequisite(s): LATN 351/352 or equivalent, or permission of instructor.

Notes: Readings in Latin. May be repeated for a maximum of 6 credits when topic is different.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

Latin American Studies (LAS)

Offered by the College of Humanities and Social Sciences

LAS 100 - Introduction to Latin American Studies

Credits: 1 (NR)
Weekly series of presentations by various Latin American Studies faculty. Short reading assignments and journal entries required.

Notes: Required for all Latin American studies majors.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0
Grading: Satisfactory/No credit

LAS 490 - Internship

Credits: 1-6 (RD)
Approved work-study programs in cooperation with specific organizations including area museums, NGOs, and local, state and federal agencies.

Prerequisite(s): Latin American studies majors with permission of director.

Notes: Credit determined by program. May be repeated for a maximum of 9 credits.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0

LAS 491 - Directed Reading for Honors in Latin American Studies

Credits: 3 (NR)
Directed readings on specialized topic in Latin American Studies to prepare students for LAS 492, the honors research seminar in the major.
Prerequisite(s): admission to Latin American studies honors program.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

LAS 498 - Study Abroad

Credits: 1-6 (RD)
Study abroad.

Notes: May be repeated for a maximum of 6 credits with permission of department.

Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 0

LAS 499 - Research Seminar in Latin American Studies

Credits: 3 (NR)
Research on specialized topic in Latin American Studies culminating in substantial paper and oral presentation. Students expected to integrate knowledge and skills acquired in Mason Core courses.

Fulfills Mason Core requirement in synthesis.

Fulfills writing intensive requirement in the major.

Prerequisite(s): 90 credits

Notes: Must receive passing grade to graduate with a BA in Latin American studies.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

Linguistics (LING)

Offered by the College of Humanities and Social Sciences

LING 306 - General Linguistics

Credits: 3 (NR)

Fulfills Mason Core requirement in social and behavioral science.
Equivalent to LING 326 (2010-2011 Catalog)

**LING 307 - English Grammar**

Credits: 3 (NR)
Overview of grammatical structure of English including word classes, phrases, and complex sentences. Analyzes English grammar using modern syntactic theory. Students engage in language description through problem solving.

Equivalent to ENGH 307, LING 322 (2010-2011 Catalog)

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**LING 450 - Introduction to Sociolinguistics**

Credits: 3 (NR)
Overview of the study of language variation and change. Topics to be covered include the interaction between language and social factors (age, sex, social class), dialects of English, speech communities, language contact, and language and gender.

**Prerequisite(s):** LING 326.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**LING 480 - First Language Acquisition**

Credits: 3 (NR)
Examines first language acquisition from a linguistic perspective. Covers the development of a first phonology, syntax, and semantics. Methodology in studying child language is discussed.

**Prerequisite(s):** LING 306.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall

**LING 485 - Semantics and Pragmatics**

Credits: 3 (NR)
Developments in theoretical linguistics that explore how language form is related to meaning and context. Topics include reference, lexical semantics, logic, quantification, truth conditions and sentential meaning, presuppositions, and speech acts.
LING 486 - Syntax I

Credits: 3 (NR)
Nature and form of syntactic theory, and examination and analysis of the properties of several major natural language syntactic structures.

Prerequisite(s): LING 326.
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

LING 490 - Generative Phonology

Credits: 3 (NR)
Sound systems of English and other languages from perspectives of phonological theory. Topics include articulatory phonetics, distinctive features, nature of phonological representations, rhythm and stress, and phonological universals and constraints.

Prerequisite(s): LING 326.
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

LING 499 - Independent Study

Credits: 1-3 (RD)
Intensive study of particular theoretical problem in linguistics conducted by student in close consultation with instructor. Student produces substantial piece of written work on research findings.

Prerequisite(s): LING 326 and 3 other LING credits, and permission of instructor.
Notes: May be repeated for a maximum of 6 credits with permission of instructor.
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

LING 507 - Field Work in Applied Linguistics
Field work providing working experience in language-teaching program or educational research organization.

Prerequisite(s): LING 326, 520, 521, or 582.

Notes: Contact the department one semester prior to enrollment. May be repeated for a maximum of 6 credits.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**LING 520 - Introduction to Linguistics**

Credits: 3 (NR)
Introduces terminology and methodology of modern linguistic science, and detailed structural analysis of English phonology, morphology, and syntax.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**LING 521 - Applied Linguistics: Teaching English as a Second Language**

Credits: 3 (NR)
Theories and basic principles of teaching a second language, especially as they relate to English language. Introduces students to methods of teaching English to speakers of other languages.

Prerequisite(s): LING 520, 690, or 786.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**LING 522 - Modern English Grammar**

Credits: 3 (NR)
Overview of structure of modern English beginning with word classes and ending with analyses of complex sentences. Most topics introduced as problems of language description; in solving them, principles of syntactic argumentation are demonstrated. Students learn to tap intuitions about English to analyze grammatical structure.

Prerequisite(s): One course in linguistics, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**LING 523 - English Phonetics**
Credits: 3 (NR)
In-depth description and analysis of sound system processes of modern English. Topics include segmental phonetics, syllable structure, connected speech, and prosodic phenomena. Also addresses implications for language instruction.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

LING 525 - Practicum in ESL

Credits: 3 (NR)
Involves preparation and presentation of lessons to adult English as second language (ESL) learners under guidance of mentor teacher and practicum professor. Field experience consists of observation and teaching in assigned ESL classroom.

Prerequisite(s): LING 521

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
Grading: Satisfactory/No Credit

LING 580 - First Language Acquisition

Credits: 3 (NR)
Examines first language acquisition from a linguistic perspective. Covers the development of a first phonology, syntax, and semantics. Methodology in studying child language is discussed.

Prerequisite(s): LING 520 or one of the following: LING 690, 786, 785, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

LING 581 - Psycholinguistics

Credits: 3 (NR)
Study of mental and psychological aspects of human language, including aphasia, association, autism, language acquisition, verbal concept formation, and perception.

Prerequisite(s): LING 520, 690, or 786; or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

LING 582 - Second Language Acquisition
Examines second language (L2) acquisition from linguistic perspective. Compares first and second language acquisition. Explores factors contributing to L2 variation, including linguistic universals, transfer, age, input, and affective considerations.

Prerequisite(s): LING 520, 690, or 786; or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

LING 650 - Introduction to Sociolinguistics

Credits: 3 (NR)
An overview of the study of language variation and change. Topics to be covered include the interaction between language and social factors (age, sex, social class), dialects of English, speech communities, language contact, and language and gender.

Prerequisite(s): LING 520, 523, or 690.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

LING 686 - Special Topics in Linguistics

Credits: 3 (NR)
Detailed advanced study of selected area of linguistics.

Prerequisite(s): Varies with topic.

Notes: Content varies. May be repeated once for credit with permission of department.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

LING 690 - Generative Phonology

Credits: 3 (NR)
Sound systems of English and other languages from the perspective of phonological theory. Topics include articulatory phonetics, distinctive features, nature of phonological representations and processes, rule ordering, abstractness, role of external evidence, and nonlinear phonology.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

LING 691 - Theories of Language
Seminar in linguistic metatheory. Examines wide range of theories about language and linguistic theory, including those of Saussure, Bloomfield, Chomsky, and others. Readings from original sources.

Prerequisite(s): LING 520, 690, or 786; or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

LING 692 - Phonology II

Credits: 3 (NR)
Recent trends in phonological theory. Topics include stress assignment, tone spreading, and vowel harmony, from within nonlinear framework. Discusses segmental structure and underspecification.

Prerequisite(s): LING 690.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

LING 770 - Research Methods

Credits: 3 (NR)
Conceptualizing and conducting second language research, including process of developing research questions, gathering data, obtaining permission from institutional review board, choosing data collection measures, and coding linguistic and nonlinguistic data.

Prerequisite(s): LING 582 and one of LING 690, 785, or 786; or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

LING 782 - Second Language Acquisition II

Credits: 3 (NR)
Advanced course in second-language acquisition theory. Detailed analysis of internal and external constraints. Variation addressed from linguistic, psychological, and environmental perspectives.

Prerequisite(s): LING 582 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

LING 785 - Semantics and Pragmatics
Developments in theoretical linguistics that explore how language form relates to meaning and context. Topics include reference, lexical semantics, logic, quantification, truth conditions and sentential meaning, presuppositions, and speech acts.

Prerequisite(s): LING 520, 690, or 786; or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

LING 786 - Syntax I

Credits: 3 (NR)
Nature and form of syntactic theory. Examines and analyzes properties of several major natural language syntactic structures.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

LING 787 - Syntax II

Credits: 3 (NR)
Theoretical treatment of syntactic phenomena that have emerged as standard problems for syntactic analysis. Problems include binding, extraction, and quantification. Extensive reading in primary theoretical literature.

Prerequisite(s): LING 786.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

LING 788 - Semantics and Pragmatics II

Credits: 3 (NR)
Advanced course in semantic and pragmatic theory. Study of meaning under truth-conditional, model-theoretic framework explored and related to syntax and pragmatics.

Prerequisite(s): LING 785 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

LING 798 - Directed Reading and Research

Credits: 1-3 (RD)
Reading, research, and writing on specific project under direction of departmental member.
Prerequisite(s): 18 credits of linguistics courses.

Notes: Open only to students who have completed at least 18 credits of LING courses. Prior approval by faculty member required. Written report required. May be repeated for a maximum of 6 credits with permission of director.

Hours of Lecture or Seminar per week: 2  
Hours of Lab or Studio per week: 0  
Grading: Graduate Special

LING 799 - Thesis

Credits: 1-6 (RD)  
Students who take LING 798 to develop thesis topic and then elect thesis option receive 3 credits after completing thesis. Students who do not take LING 798, or who take it to work on project unrelated to thesis, receive up to 6 credits after completing thesis.

Hours of Lecture or Seminar per week: 3-6  
Hours of Lab or Studio per week: 0  
Grading: Satisfactory/No credit only

LING 882 - Seminar in Language Acquisition

Credits: 3 (RT)  
Advanced topics seminar in current language acquisition theory.

Prerequisite(s): LING 782 or permission of instructor.

Notes: Topics vary. May be repeated for a maximum of 9 credits.

Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0

LING 886 - Advanced Syntax Seminar

Credits: 3 (RT)  
Advanced course in current syntactic theory.

Prerequisite(s): LING 786, LING 787, or permission of instructor.

Notes: Topics vary. May be repeated for a maximum of 9 credits.

Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0

LING 890 - Advanced Phonology Seminar
Credits: 3 (RT)
Advanced topics seminar in current phonological theory.

Prerequisite(s): LING 692 or permission of instructor.

Notes: Topics vary. May be repeated for a maximum of 9 credits.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

LING 897 - Independent study

Credits: 3 (RD)
Independent reading on a topic agreed on by student and faculty member.

Prerequisite(s): PhD rank or permission of instructor.

Notes: May be repeated

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

LING 898 - Advanced Qualifying Seminar

Credits: 3 (RT)
Work on PhD qualifying paper.

Prerequisite(s): Completion of 33 credits of core courses in linguistics.

Notes: May be repeated for a maximum of 6 credits.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

LING 998 - Doctoral Dissertation Proposal

Credits: 1-6 (RD)
Work on research proposal that forms basis for the doctoral dissertation.

Prerequisite(s): Advancement to candidacy.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0
Grading: S/NC
LING 999 - Doctoral Dissertation

Credits: 1-12 (RD)
Doctoral dissertation research and writing under direction of student's dissertation committee.

Prerequisite(s): Completion of LING 998.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0
Grading: S/NC

Management (MGMT)

Offered by the School of Management

If a student takes noncore, upper-level business courses before admission to SOM, those courses will not count on an undergraduate degree application for any major in the school, except as general elective credit. A grade of C or higher must be presented on the graduation application for each upper-level course in the major. Course prerequisites are strictly enforced.
Degree status is defined as formal admission to BS degree status in SOM.

MGMT 301 - People and Organizations

Credits: 3 (NR)

Explores how individuals behave in the workplace, and how group and organizational structures affect behavior. Builds managerial skills required for working with and through others to reach organizational goals. Topics include individual differences, groups and teams, managing conflict, organizational ethics, culture, diversity, influence, leadership, and motivational theories and techniques. The course format provides opportunities to discuss and apply concepts.

School of Management students will not be permitted to make more than three attempts to achieve a C or higher in MGMT 301. Those who do not successfully complete this course within three attempts will be terminated from their major and will not be eligible to receive a degree from the School of Management. For more information about this, see the "Termination from the Major" section under Academic Policies

Prerequisite(s): Sophomore standing.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring, Summer

MGMT 312 - Principles and Practices of Management

Credits: 3 (NR)

Builds on fundamental theories and concepts learned in MGMT 301 by examining the nature of managerial work under a range of business models and under rapidly changing business conditions. Managerial functions and activities such as planning, strategizing, organizing, controlling, and directing are examined in depth and in the context of current organizational examples and scenarios.
Prerequisite(s): C or higher in MGMT 301 and degree status. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

MGMT 321 - Introduction to Human Resource Management

Credits: 3 (NR)
The field of human resource management examines what can or should be done to make workers more productive and satisfied. The course builds on MGMT 301 by introducing key concepts and techniques that managers need to attract, retain, develop, compensate, and motivate quality talent. Also emphasizes legal and ethical considerations in human resource management.

Prerequisite(s): C or higher in MGMT 301 and degree status. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

MGMT 412 - Diversity in Organizations

Credits: 3 (NR)
Builds on MGMT 301 by emphasizing intrapersonal, interpersonal, organizational, and societal phenomena relevant to issues of diversity. Examines phenomena and processes in general and with regard to specific dimensions such as gender, race, and ability. Designed to increase students' knowledge of diversity in organizations, understanding of others' perspectives, and ability to work well with people who differ from themselves.

Prerequisite(s): C or higher in MGMT 301 and degree status. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

MGMT 413 - Organizational Development and Management Consulting

Credits: 3 (NR)
Introduces theory and practice of organization development. Assumes some basic knowledge of organizational behavior, and addresses how to use knowledge about organizations to change them. Focuses on ways of understanding organizations with attention to theoretical underpinnings of field and diagnostic models, and processes for entering organizations. Later sessions focus on contracting, data collection, organizational diagnosis, data feedback, and change technologies.

Prerequisite(s): C or higher in MGMT 301; degree status. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring
MGMT 421 - Advanced Human Resource Management

Credits: 3 (NR)
Builds on MGMT 321 by using a case-based approach to deepen understanding of HRM practices. Students conduct projects requiring application of strategic HR processes. Includes discussion of advanced topics not thoroughly covered in MGMT 321. Relevant for management majors, particularly those seeking a human resource management career. Helps prepare for SHRM Professional in Human Resources certification exam.

Prerequisite(s): C or higher in MGMT 301 and 321, and degree status. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

MGMT 431 - The Legal Environment for Employee and Labor Relations

Credits: 3 (NR)
Examines the legal aspects of employee and labor relations from a managerial perspective. Topics include the employment at will doctrine; wrongful discharge; federal and state employment discrimination legislation; and regulation of employee welfare. Includes lectures, cases, readings.

Prerequisite(s): C or higher in BULE 302; degree status. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

MGMT 451 - New Venture Creation

Credits: 3 (NR)
Explains process of conceptualizing and creating new venture. Using central concepts of innovation, strategic opportunities, and globalization, students learn to evaluate new venture opportunities and consider external environment’s impact. Students gain greater understanding of entrepreneurial concepts by developing business plans that address critical issues, including management composition and structure, effective business and functional strategies, operational logistics, legal issues, financial projections, and financing options.

Prerequisite(s): C or higher in MGMT 301 and degree status. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring
MGMT 461 - Cross Cultural and Global Management

Credits: 3 (NR)
Explores theory and practice of managing culturally diverse organizations in domestic and international contexts. Topics include management customs and practices in different world regions, cross-cultural communication and learning, and the developing culturally and internationally sophisticated employees and managers.

Prerequisite(s): C or higher in MGMT 301, and degree status. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

MGMT 462 - Honors Seminar in Management

Credits: 3 (NR)
Topic and format vary. In-depth study of topic of interest to managers and organizations.

Prerequisite(s): Invitation by professor.

Notes: Enrollment limited and competitive.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

MGMT 463 - Negotiations in Organizations

Credits: 3 (NR)
Focuses on theory, processes, and practice of negotiation within and across organizations, including attention to ethical issues. Explores systematic ways to increase quality of negotiated agreements, including methods of preparation and use of rational assumption, bidding and decision criteria. Format includes negotiation exercises, lecture, and discussion.

Prerequisite(s): C or higher in MGMT 301 and degree status. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

MGMT 464 - Teamwork and Interpersonal Skills

Credits: 3 (NR)
Focuses on intensive development of high professional-level skill set for collaboration and leadership in contemporary environments. Builds on content introduced in MGMT 301, 312. Attention to developing personal leadership capabilities, collaborating in traditional and virtual environments, improving group processes, project management, tolerating ambiguity, improving communication, creative problem solving, time management, coaching, and empowering employees.
MGMT 471 - Competitive Strategy

Credits: 3 (NR)
Explores industry structures and competitive behavior of firms. Attention to how firm uses tangible, intangible, and human resources to develop sustainable competitive advantage, and how competitors interact in marketplace. Introduces tools and concepts to analyze industry dynamics and competitive interactions of firms in these industries.

Prerequisite(s): C or higher in MGMT 301 and degree status. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

MGMT 491 - Current Topics in Management

Credits: 3 (RD)
Advanced study of management concepts and selected topics. Incorporates intensive analysis of management problems of long-term strategic significance or current urgency for organizational planning and operations. Includes significant contemporary research findings.

Prerequisite(s): C or higher in MGMT 312; degree status. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

MGMT 499 - Independent Study

Credits: 1-3 (RT)
Research and analysis of selected problems or topics in management must be arranged with instructor and approved in writing by associate dean for undergraduate programs.

Prerequisite(s): Management majors with at least 9 upper-level management credit hours.

Notes: Written report required.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0
Management Information Systems (MIS)

Offered by the School of Management

If a student takes noncore, upper-level business courses before admission to SOM, those courses will not count on an undergraduate degree application for any major in the school, except as general elective credit. A grade of C or higher must be presented on the graduation application for each upper-level course in the major. Course prerequisites are strictly enforced. Degree status is defined as formal admission to BS degree status in SOM.

MIS 102 - Spreadsheet Applications for Business

Credits: 1 (NR)
Hands-on course using popular spreadsheet package. Business examples used to teach fundamentals of spreadsheets and their use in business applications.

Hours of Lecture or Seminar per week: 2-3
Hours of Lab or Studio per week: 1
Grading: S/NC
When Offered: Fall, Spring, Summer

MIS 301 - Introduction to Business Information Systems

Credits: 3 (NR)

Introduces fundamentals of hardware, software, and networking. Emphasizes role of technology in improving contemporary business processes and competitive advantage. Includes basic relational concepts, hands-on experience in building business database applications and decision support using spreadsheet software.

School of Management students will not be permitted to make more than three attempts to achieve a C or higher in MIS 301. Those who do not successfully complete this course within three attempts will be terminated from their major and will not be eligible to receive a degree from the School of Management. For more information about this, see the "Termination from the Major" section under Academic Policies

Prerequisite(s): Grade of C or higher in MIS 102; sophomore standing. Prerequisite enforced by registration system.

Notes: Projects required.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring, Summer

MIS 302 - Introduction to Programming for Business Applications

Credits: 3 (NR)
Coveredesign and implementation of program data structures and algorithms to solve business problems using structured
programming techniques. Students become familiar with program development life cycle using standard programming language such as Visual BASIC.NET supported by a modern Integrated Development Environment (IDE). Students complete assignments involving development of real-life business application.

Prerequisite(s): Degree status.

Notes: IT 108 highly recommended but not required.

MIS 310 - Database Management Systems

Credits: 3 (NR)
Introduces principles of designing and manipulating relational databases with a focus on business applications. Theoretical database concepts and hands-on experience with a relational package. Term project requiring implementation of a substantial business database application.

Prerequisite(s): C or higher in MIS 301, degree status. Prerequisite enforced by registration system.

Notes: SOM majors may not receive credit for both MIS 310 and IT 214. Requires hands-on implementation using software package.

MIS 320 - Networks and Security

Credits: 3 (NR)
Introduces students to fundamentals of networking technologies and their role in businesses. Emphasis is on understanding the business implications of different networking technologies and solutions. Students learn to identify and understand the business requirements, and bring together the different technological components to design the required communication solutions. Also focuses on the types of security threats to the business network infrastructure, and approach to tackling such threats through business practices combined with appropriate technological solutions.

Prerequisite(s): C or higher in MIS 301, degree status. Prerequisite enforced by registration system.

Notes: The course also includes lab work and exercises.

MIS 330 - Systems Analysis and Design
Credits: 3 (NR)
Understanding systems analysis and design methods is a necessary skill for contemporary business analysts, managers, software engineers and system users. Provides students with the foundations for effectively using modern systems analysis and design tools and methodologies for developing modern software and applications. Topics include systems planning and feasibility analysis, requirements analysis, economics, systems design and project management.

Prerequisite(s): C or higher in MIS 310, degree status. Programming course recommended. Prerequisite enforced by registration system.

Notes: Requires team project.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring, Summer

MIS 411 - Management and Control of Information Systems

Credits: 3 (NR)
Managerial perspective on issues arising in managing information systems through their life-cycle. The topics include using different methodologies for estimating software development costs, maintenance costs, systems project management, and pricing information products and services. The course also covers methodologies for monitoring performance of information systems, and ways for assessing the strategic and business value of use of information technology.

Prerequisite(s): C or higher in MIS 301, degree status. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

MIS 412 - E-Business Systems Development

Credits: 3 (NR)
Introduces students to the development of web-based information systems for E-business. Students learn to develop web-based database applications for eCommerce using ASP.NET. Also covers Web 2.0 technologies and contemporary business trends and issues related to web application development. Emphasizes technologies, methods, and application development tools.

Prerequisite(s): C or higher in MIS 301, degree status. Prerequisite enforced by registration system.

Notes: Requires team project and computer lab.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

MIS 430 - Data Warehousing and Data Mining
Deals with the challenges faced by businesses in managing large amounts of data and making meaningful use of this data for informed decision making. Introduces students to data warehousing fundamentals, practices, and technologies; and their application to solving business problems. Specific emphasis is on designing of data warehouse to meet the business requirements and hands-on learning of the design principles through implementation on commercially used data warehouse technologies. Also introduces students to OLAP solutions and data mining approaches to supporting business decision making.

**Prerequisite(s):** C or higher in MIS 310, degree status. Prerequisite enforced by registration system.

**Notes:** Term project required.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall, Spring

---

**MIS 435 - Knowledge Management**

Credits: 3 (NR)  
Focuses on new trends on how knowledge management works for organizations, best strategy for such transition, and what are knowledge management elements.

**Prerequisite(s):** C or higher in MIS 310, degree status. Prerequisite enforced by registration system.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall, Spring

---

**MIS 440 - E-Commerce Business Models and Applications**

Credits: 3 (NR)  
Introduces students to business models used in E-commerce and E-business. Covers B2B, B2C, and C2C business models and also introduces current business trends of the Web 2.0 era and the core concepts of the information economy, networked business models, and the social web. The class will discuss Blogging, Wikis, Social Networks, Information Goods, and E-Tailing. Students complete a group project in which they create a business plan for a viable Internet-based business.

**Prerequisite(s):** C or higher in MIS 310, degree status. Prerequisite enforced by registration system.

**Notes:** Requires a term project.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall, Spring

---

**MIS 462 - Honors Seminar in Management Information Systems**

Credits: 3 (NR)  
Topic and format vary. In-depth study of a topic in the area of information technology management. Enrollment limited and
competitive.

Prerequisite(s): Senior standing, ISOM (or DMIS) major, senior standing; permission of department.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring

MIS 491 - Seminar in Management Information Systems

Credits: 3 (RT)
Analyzes selected topics that highlight latest developments in information resource management field, including contemporary research findings and case studies of information systems in business and other organizations.

Prerequisite(s): C or higher MIS 301, degree status. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

MIS 499 - Independent Study in Management Information Systems

Credits: 1-3 (RT)
Research and analysis of selected problems or topics in information resource management.

Prerequisite(s): C or higher in MIS 301; degree status. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

Management of Secure Information Systems (MSEC)

MSEC 510 - Foundations of Cyber Security

Credits: 2 (NR)
Provides an overview of the introductory topics in cyber security, which will be the basis for the other security-related in the MSIS. Topics include basic concepts on CIA (confidentiality, integrity, and availability), risk management, disaster recovery, access control, basic cryptography and software application vulnerabilities.

Prerequisite(s): Admission to the Executive MS in Management of Secure Information Systems.

Notes: 4 class sessions will be 3.5 hours long.
1 class session will be 2 hours and 20 minutes long.
MSEC 511 - Security Practices in the Enterprise

Credits: 2 (NR)
Provides the practices and methods currently used by information security professionals to manage and operate the secure IT infrastructures in the enterprise industry and in the US Federal Sector. It covers tools and knowledge required to design, execute, and/or evaluate the INFOSEC standards and procedures required of government and industry. The topic includes security operation center (SOC), network security, malware countermeasures, operational systems security, risk analysis and incident response practices.

Prerequisite(s): MSEC 510.

Notes: 4 class sessions will be 3.5 hours long.
1 class session will be 2 hours and 20 minutes long.
(5 classes; 16 hours and 20 minutes total)

MSEC 520 - Networking Principles

Credits: 1 (NR)
Introduction to the principles guiding the design and operation of modern communication networks; using the structure provided by layered service models, this course explores systematically the architecture and protocols of large, decentralized networks. Topics include medium access control in local area networks, switching, routing, and addressing, reliable and secure transport, flow and congestion control. Throughout, examples are drawn from the suite of Internet protocols.

Prerequisite(s): Admission to the Executive MS in Management of Secure Information Systems.

MSEC 620 - Networking Security

Credits: 2 (NR)
Provides a comprehensive introduction to network security concepts and problems and the mechanisms and tools to secure networks. Focuses on the Internet, discusses the threats to and from the Internet and examines existing Internet security techniques and protocols and their limitations. Topics include secret key and public key cryptography, Hash algorithms, authentication, IPSEC/VPN, IPSEC key exchange, SSL/TLS, firewall, anonymous communication, and VoIP security.
Prerequisite(s): MSEC 510 and 520.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

MSEC 630 - Secure Information System Governance, Regulation, and Compliance

Credits: 2 (NR)
Provides insight into secure information system governance, regulations, and compliance including noteworthy legislation, regulations, and compliance issues as well as commonalities and significant differences between departments and agencies within the Federal Executive Branch (FEB). The course is presented as formal lectures complemented by group discussion. Each topic is addressed as part of the larger Secure Information System structure.

Prerequisite(s): MSEC 510

Notes: 4 class sessions will be 3.5 hours long.
1 class session will be 2 hours and 20 minutes.
(5 total class sessions; 16 hours and 20 minutes total).

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring, Summer

MSEC 640 - Privacy and Ethics in an Interconnected World

Credits: 2 (NR)
Course considers key ethical issues for professionals in network security in an emerging age of internet access, virtual environments, and wireless capabilities. Intellectual property, privacy, computer abuse, free speech, and commerce are examined

Prerequisite(s): Admission to the Executive MS in Management of Secure Information Systems program.

Notes: 4 class sessions will be 3.5 hours long.
1 class session will be 2 hours and 20 minutes long.
(5 class sessions; 16 hours 20 minutes total)

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring, Summer

MSEC 641 - Enterprise Security Threats

Credits: 1 (NR)
Provides a broad exposition of emerging cyber-security threats for large-scale enterprises: Denial of Service (DoS), insider attacks, remote exploitation. It covers defenses that may mitigate or curtail some aspects of these emerging security threats.

Prerequisite(s): MSEC 511.
MSEC 642 - Enterprise Security Technologies

Credits: 2 (NR)
Provides an overview of enterprise security tools used in advanced security IT departments of enterprises today. In addition to understanding the tools, their capabilities, and their gaps, students participate in hands-on laboratory exercises with enterprise security tools.

Prerequisite(s): MSEC 511.

Notes: 4 class sessions will be 3.5 hours long.
1 class session will be 2 hours and 20 minutes long.
(5 class sessions; 16 hours 20 minutes total)

MSEC 650 - Seminar: Enterprise Security Case Studies

Credits: 1 (NR)
Provides an exposition of large enterprise security systems including operational requirements, threat model, security analysis, economic analysis, and defense posture options that expose the operational and economic trade-offs when architecting Enterprise security.

Prerequisite(s): MSEC 641.

MSEC 696 - Directed Studies Management of Secure Information Systems

Credits: 1-3 (RD)
Approval by faculty member and program director required prior to registration. Studies specialized topics in business not otherwise available in the curriculum.

Prerequisite(s): Admission to the MSIS program or permission of the program director.

MSEC 697 - Special Topics in Management of Secure Information Systems
Credits: 1-3 (RT)
Sections established as necessary to focus on various topical issues that emerge in practice of management of secure information systems.

Prerequisite(s): Admission to the MSIS program or permission of the program director.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
Grading: Graduate Special.

MSEC 710 - Global Residency

Credits: 1-4 (RD)
Students spend a week in an international residency. Emphasis is on how other nations deal with management of secure information system, the management of those systems, and related public policy issues. Corporate site visits are combined with presentations by professors from universities outside the United States and relevant practitioners. Students are required to write a paper summarizing their observations and attend pre-residency preparatory sessions.

Equivalent to TECM 757

Prerequisite(s): Admission to Executive MS in Management of Secure Information Systems.

Hours of Lecture or Seminar per week: 1-4
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring, Summer

MSEC 720 - Capstone Project in Management of Secure Information Systems

Credits: 1-3 (RD)
Teams undertake a strategic evaluation and plan for the management of secure information systems. They develop plans that include technical, organizational, and policy aspects. A report is produced and presented to the entire cohort for discussion.

Equivalent to TECM 737

Prerequisite(s): Admission to Executive MS in Management of Secure Information Systems.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
Grading: Graduate Special
When Offered: Fall, Spring, Summer

Marketing (MKTG)

Offered by the School of Management

If a student takes noncore, upper-level business courses before admission to SOM, those courses will not count on an undergraduate degree application for any major in the school, except as general elective credit. A grade of C or higher must be
presented on the graduation application for each upper-level course in the major. Course prerequisites are strictly enforced. Degree status is defined as formal admission to BS degree status in SOM.

**MKTG 301 - Principles of Marketing**

Credits: 3 (NR)

Examines marketing principles and practices for analyzing, creating, delivering, capturing, and communicating value to customers. Focuses on managing customer relationships using market-driven strategies, particularly segmentation, targeting, and positioning. The role of customer satisfaction in achieving organizational objectives and ethical decision making in a global economy are also emphasized.

School of Management students will not be permitted to make more than three attempts to achieve a C or higher in MKTG 301. Those who do not successfully complete this course within three attempts will be terminated from their major and will not be eligible to receive a degree from the School of Management. For more information about this, see the "Termination from the Major" section under Academic Policies.

**Prerequisite(s):** Grade of C or higher in ACCT 203 or ACCT 204. Grade of C or higher in ECON 103; sophomore standing. Prerequisite enforced by registration system.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall, Spring, Summer

**MKTG 311 - Sales Management**

Credits: 3 (NR)

Familiarizes students with marketing-sales interfaces including sales force role and capabilities, personal selling strategies, organizational relationships, and responsibilities of sales managers including training, motivating, and evaluating sales force.

**Prerequisite(s):** C or higher in MKTG 301, degree status. Prerequisite enforced by registration system.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall

**MKTG 312 - Consumer Behavior**

Credits: 3 (NR)

Marketing strategy implications of internal and external influences on consumer decision making, purchase, and consumption behaviors. Emphasizes demographics, lifestyle, situation, perception, learning, and attitude formation and change, focusing on customer segmentation, satisfaction and loyalty.

**Prerequisite(s):** C or higher in MKTG 301, degree status. Prerequisite enforced by registration system.

**Hours of Lecture or Seminar per week:** 3
MKTG 313 - Integrated Marketing Communications

Credits: 3 (NR)
Examines development of integrated communications programs, including advertising, sales promotion, public relations, direct marketing, and other communication tools. Focuses on setting communications objectives and budgets, media planning, creative strategy, execution, and evaluation. Provides skills for analyzing the strengths, weaknesses and synergies of marketing communication tools.

Prerequisite(s): C or higher in MKTG 301, degree status. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

MKTG 315 - Internet Marketing

Credits: 3 (NR)
Explores impact of Internet technology on marketing strategy and practice. Topics include online advertising campaigns (focusing on search marketing), web site usability and content, and the use of social and interactive media to build customer relationships and foster brand loyalty.

Prerequisite(s): C or higher in MKTG 301, degree status. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

MKTG 332 - Retailing and E-Commerce Management

Credits: 3 (NR)
Examination of retailing as a specialized economic and social institution within the distribution process and as it relates to overall marketing activities. The planning and implementing of store and nonstore (catalog, Internet) retail marketing strategies are addressed. Critical decision alternatives, variables, forces, and processes are considered from a managerial perspective.

Prerequisite(s): C or higher in MKTG 301, degree status. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

MKTG 333 - Business to Business Marketing
Examines unique challenges and opportunities of marketing systems among suppliers, manufacturers, resellers, and government. Focuses on developing a capability to identify and nurture long-term B2B relationships. Provides tools and techniques commonly leveraged by B2B marketers to develop these relationships with their clients.

**Prerequisite(s):** C or higher in MKTG 301, degree status. Prerequisite enforced by registration system.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Spring, Summer

---

**MKTG 351 - Marketing Research Techniques and Applications**

Credits: 3 (NR)  
Presents the concepts and techniques underlying the marketing research process and their role in managerial decision making. Focuses on skills required to conduct a marketing research project: qualitative and quantitative research designs, survey methodology, instrument creation, sampling procedures, data collection, data analysis, and reporting of findings.

**Prerequisite(s):** C or higher in OM 210 and MKTG 301, degree status. Prerequisite enforced by registration system.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall, Spring

---

**MKTG 407 - International Marketing**

Credits: 3 (NR)  
Multidisciplinary approach to international marketing from viewpoint of business management. Examines major marketing issues affecting companies operating in a global environment. Students achieve understanding of economic, political, and cultural differences among nations as they affect marketing opportunities and operations, and develop skills to identify and evaluate international marketing opportunities.

**Prerequisite(s):** C or higher in MKTG 301, degree status. Prerequisite enforced by registration system.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall, Spring

---

**MKTG 451 - Competitive Intelligence and Information Security**

Credits: 3 (NR)  
Develops understanding of benefits to commerce and society because of Internet-based commerce, escalating threats against Internet-based marketing initiatives, and protection of knowledge-based assets of firms.

**Prerequisite(s):** C or higher in MKTG 301, degree status. Prerequisite enforced by registration system.

**Hours of Lecture or Seminar per week:** 3
MKTG 455 - Ethnic and Multicultural Marketing

Credits: 3 (NR)
Ethnic and Multicultural Marketing examines the critical marketing issues and opportunities that have arisen with the changing U.S. demographics. The focus is domestic markets. The growth in minority populations indicates a need for specialized approaches for the entire marketing mix. Segmentation can be powerful when considering non-mainstream markets if the marketer understands and capitalizes on the different approaches cultural and ethnic groups use as consumers.

Prerequisite(s): "C" or higher in MKTG 301; Degree Status. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

MKTG 462 - Honors Seminar in Marketing

Credits: 3 (NR)
Topic and format vary. In-depth study of topic of interest to managers and organizations.

Prerequisite(s): Degree status in MKTG major; senior standing; permission of department.

Notes: Enrollment limited and competitive.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

MKTG 471 - Marketing Management

Credits: 3 (NR)
Emphasizes managerial aspects of marketing, including developing marketing strategies and plans, and integrating specific elements of marketing process. Emphasizes case analysis.

Prerequisite(s): Senior standing; C or higher in MKTG 312 and 351; degree status. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring, Summer

MKTG 481 - Marketing in the Nonprofit Sector

Credits: 3 (NR)
Examines the unique challenges of applying marketing principles and practices to not-for-profit groups such as human service
and philanthropic organizations, museums, health and wellness advocates, educational institutions, industry associations and government. Emphasis on case studies, team work, and projects.

**Prerequisite(s):** C or higher in MKTG 301, degree status. Prerequisite enforced by registration system.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Spring

---

**MKTG 491 - Special Topics in Marketing**

Credits: 3 (RT)  
In-depth treatment in seminar format of contemporary topics in marketing. Culminates in preparation of substantial paper and oral presentation.

**Prerequisite(s):** C or higher in MKTG 301, 9 credits of marketing, degree status. Prerequisite enforced by registration system.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Spring

---

**MKTG 499 - Independent Study**

Credits: 1-3 (RT)  
Primary research proposal in marketing area. Requires prior approval from instructor and associate dean for undergraduate programs.

**Prerequisite(s):** 90 credits (senior class standing) and a minimum of 24 credits of business courses, including principles of marketing, finance, and management.

**Hours of Lecture or Seminar per week:** 1-6  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall, Spring, Summer

---

**Master of Business Administration (MBA)**

Offered by the School of Management

---

**MBA 603 - Managerial Economics and Decisions of the Firm**

Credits: 0-3 (RD)  
Provides fundamental understanding of applying microeconomics concepts to managerial decision making. Explores principles of microeconomic theory, including market supply and demand, production and cost functions, industry structure, and product and resource pricing.
**Prerequisite(s):** Admission to the MBA or MSA program or permission of the program director.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**Grading:** Graduate Special.  
**When Offered:** Fall, Spring

**MBA 612 - Managing Costs and Evaluating Performance**

Credits: 1.5-3 (NR)  
Examines impact of cost and cost allocation on performance and evaluation.

**Prerequisite(s):** Admission to the MBA or MSA program or permission of the program director.

**Hours of Lecture or Seminar per week:** 1.5-3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Spring, Summer

**MBA 613 - Financial Reporting and Decision Making**

Credits: 0-3 (RD)  
Foundation course focusing on economics and analysis of business transactions and related financial reporting issues. Topics include introduction to accounting framework used in financial reporting; and analysis of financial statements, economic events and their impact on financial reports, and impact of accounting methods on financial reports.

**Prerequisite(s):** Admission to MBA program.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**Grading:** Graduate Special.  
**When Offered:** Fall, Spring

**MBA 623 - Marketing Management**

Credits: 0-3 (RD)  
Develops market-based knowledge and skills for effective marketing decision making, strategy design, implementation, and evaluation in wide variety of institutional and competitive situations. Addresses the importance of companies being market-driven and customer-focused.  
Emphasis on case studies, team work, and projects.

**Prerequisite(s):** Admission to MBA program.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**Grading:** Graduate Special.  
**When Offered:** Fall, Spring
MBA 633 - Statistics for Business Decision Making

Credits: 0-3 (RD)
Uses statistical methods as analytical tools for understanding and solving business problems and supporting business decision making. Includes descriptive statistics, sampling, inferencing and regression. Extensive use of applied business scenarios to illustrate concepts and computer software for data analysis.

Prerequisite(s): Admission to the MBA or MSA program or permission of the program director.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
Grading: Graduate Special.
When Offered: Fall, Spring

MBA 638 - Operations Management

Credits: 0-3 (RD)
Focuses on design, planning, and control activities to produce and deliver goods and services in modern organizations. Introduces wide range of operations management decisions, such as operations strategy, process analysis and design, capacity planning, supply chain management, total quality management, and project management. Uses quantitative modeling, case studies, and computer software to analyze and solve operations management problems.

Prerequisite(s): Admission to MBA or MSA program.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
Grading: Graduate Special.
When Offered: Fall, Spring

MBA 643 - Managerial Finance

Credits: 0-3 (RD)
Introduces theory and practice of finance within corporations. Topics include intertemporal choice, valuation, capital budgeting and structure, working capital management, and risk and return analysis.

Prerequisite(s): Admission to the MBA or MSA program or permission of the program director.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
Grading: Graduate Special.
When Offered: Fall, Spring

MBA 653 - Organizational Behavior
Credits: 0-3 (RD)
Emphasizes development of conceptual tools for understanding and analyzing individual and group behavior in organizations and organizational processes. Considerable focus on developing relevant skills for working in groups and teams. Lectures, discussions, case analyses, and class exercises.

Prerequisite(s): Admission to MBA or MSA program.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
Grading: Graduate Special.
When Offered: Fall, Spring

MBA 662 - Management of Information Technology

Credits: 1.5-3 (NR)
The strategic, economic and managerial aspects of managing an organization's IT assets are covered. The business value of IT is understood and assessed in context of its impact on the organization's structure and strategy. The course includes discussion on major issues pertaining management of IT infrastructure.

Prerequisite(s): Admission to the MBA or MSA program of permission of the program director.

Hours of Lecture or Seminar per week: 1.5-3
Hours of Lab or Studio per week: 0
When Offered: Spring, Summer

MBA 673 - Legal Environment for Management

Credits: 1.5 (NR)
Examines the managerial impact of the law upon decision-making processes in business organizations. Lectures as well as discussions of judicial opinions and readings.

Prerequisite(s): Admission to MBA program or MSA program or permission of the program director.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring, Summer

MBA 674 - Ethical and Social Environment of Business in the 21st Century

Credits: 1.5 (NR)
Strengthens the student's ability to identify, critically analyze, appropriately respond to, and provide leadership regarding the issues of ethical and socially responsible behavior which they may confront as employees and eventually as managers of people, objects, and organizations.

Prerequisite(s): Admission to the MBA or MSA program of permission of the program director.

Hours of Lecture or Seminar per week: 3
**MBA 678 - Strategic Management**

Credits: 0-3 (RD)
Capstone course focusing on strategy development at business unit and corporate level. Cases, readings, and project format familiarize students with strategic management function and help them develop analytical, organizational, and managerial skills to analyze complex business situations. Provides opportunities to integrate knowledge gained in prior course work.

**Prerequisite(s):** Admission to MBA program.

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0
**Grading:** Graduate Special.
**When Offered:** Fall, Spring

---

**MBA 701 - Business Analysis and Valuation**

Credits: 0-3 (RD)
Develops framework for business analysis and valuation using financial statement data. Analyzes management decisions such as equity valuation, creditworthiness, merger valuation, corporate financial structure, and management communication strategy.

Equivalent to ACCT 701.

**Prerequisite(s):** Completion of MBA or MSA core requirements or permission of the program director.

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0
**Grading:** Graduate Special.
**When Offered:** Spring

---

**MBA 702 - Corporate Financial Policy**

Credits: 0-3 (RD)
Applies theories and methods of corporate financial management to series of complex cases. Topics include capital projects as real options, cost of capital and capital structure, firm valuation, project finance, and merger and acquisition analysis.

**Prerequisite(s):** Completion of MBA core requirements, or permission of instructor.

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0
**Grading:** Graduate Special.
**When Offered:** Fall
MBA 703 - Financial Markets

Credits: 0-3 (RD)
Explores relationship among financial markets including global equity markets, U.S. Treasury securities, and exchange-traded and over-the-counter financial derivative instruments such as futures, options, swaps, and asset-backed securities.

Prerequisite(s): Completion of MBA core requirements, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
Grading: Graduate Special.
When Offered: Summer

MBA 704 - Risk Management and Financial Innovation

Credits: 0-3 (RD)
Considers how to identify, measure, and manage financial risk using innovative financial instruments and diversification strategies. Focuses on derivatives as tools in risk-management plans.

Prerequisite(s): Completion of MBA core requirements, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
Grading: Graduate Special.
When Offered: Fall

MBA 705 - Venture Capital and Private Finance

Credits: 0-3 (RD)
Considers market microstructure of venture capital and private finance: costs and benefits from employing private financing, interaction between the financiers and entrepreneurs, financial analysis of potential ventures, and investor exit strategies.

Prerequisite(s): Completion of MBA core requirements, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
Grading: Graduate Special.
When Offered: Spring

MBA 706 - Investment Analysis

Credits: 0-3 (RD)
Focuses on analyzing equity securities and debt instruments given implications of efficient market hypothesis and modern capital market theory.

Prerequisite(s): Completion of MBA core requirements, or permission of instructor.
MBA 708 - Taxes and Business

Credits: 0-3 (RD)
Provides framework for making managerial decisions in global tax environment. Examines business decisions such as location of facilities, employee compensation, mergers and acquisitions, capital and asset structure, and business form.

Equivalent to ACCT 708.

Prerequisite(s): Completion of MBA core requirements, or permission of instructor.

MBA 711 - Entrepreneurship

Credits: 0-3 (RD)
Considers fundamental aspects of entrepreneurship and process of new venture creation. Draws on broad range of business disciplines including management, marketing, finance, and accounting to develop evaluation and execution skills.

Prerequisite(s): Completion of MBA core requirements, or permission of instructor.

MBA 712 - Project Management

Credits: 0-3 (RD)
Focuses on designing, planning, monitoring, and controlling projects. Involves practical examination of how projects should be managed from start to finish, including specific emphasis on how to avoid common pitfalls. Includes hands-on experience with a common project management software package.

Prerequisite(s): Completion of MBA core requirements, or permission of instructor.
MBA 713 - Managing Human Capital

Credits: 0-3 (RD)
Effective management of human capital drives values for the firm and, in today's business environment, is a source of competitive advantage. Course prepares managers and entrepreneurs to leverage human capital by aligning practices with strategic objectives. Course provides systems perspective noting interrelationships between practices designed to attract, retain, & motivate human capital. Opportunities provided for personal skill-building on topics; interviewing, providing performance feedback, rewards, career development and termination.

Prerequisite(s): Completion of MBA core requirements, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
Grading: Graduate Special.
When Offered: Spring

MBA 714 - Managing Growth of Small Businesses

Credits: 0-3 (RD)
Focuses on unique challenges faced by small and entrepreneurial firms that seek long-term growth. Builds on concepts and knowledge of creating start-up company, and introduces processes and strategies required to become significant player in industry segment. Designed for students interested in understanding opportunities and problems in their own businesses, employment in small or entrepreneurial businesses, or exploring corporate entrepreneurship within large firms.

Prerequisite(s): Completion of MBA or MSA core requirements or permission of the program director.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
Grading: Graduate Special.
When Offered: Spring

MBA 715 - Advanced Project and Program Management

Credits: 0-3 (RD)
Examines advanced topics in project and program management with specific attention to issues and skills that managers needs to effectively manage multiple projects and programs. Topics include project selection, multiple project resource allocation, and organization of project office.

Prerequisite(s): Completion of MBA core requirements, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
Grading: Graduate Special.
When Offered: Spring
MBA 716 - International Business Strategy

Credits: 0-3 (RD)
Focuses on the globalization of business activities, the strategic challenges faced by companies in global competition, and how companies strategically respond to these new competitive challenges.

Prerequisite(s): Completion of MBA core requirements

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
Grading: Graduate Special.
When Offered: Summer

MBA 717 - International Finance

Credits: 0-3 (RD)
Advanced analysis of managing firm's international financial operations. Topics include currency risk, political risk, returns and funding of international projects, international markets and accounting, and cost of capital. Lecture, discussion, readings, and cases.

Prerequisite(s): Completion of MBA or MSA core requirements or permission of the program director.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
Grading: Graduate Special.
When Offered: Summer

MBA 718 - International Marketing

Credits: 0-3 (RD)
Addresses marketing process for products and services within major international markets. Topics include marketing mix strategies using standardization, localization, or globalization approaches. Emphasizes the introduction of service innovations and new products in the global market.

Prerequisite(s): Completion of MBA or MSA core requirements or permission of the program director.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
Grading: Graduate Special.
When Offered: Spring

MBA 719 - Entrepreneurship Laboratory

Credits: 1.5 (RT)
Permits MBA students to work with entrepreneurial community to gain first-hand knowledge of process of soliciting second-stage funding for new businesses, evaluating applications for second-stage funding, consulting for entities seeking funding, and
negotiations for obtaining second-stage funding.

**Prerequisite(s):** Completion of MBA or MSA core requirements or permission of the program director.

**Notes:** May be repeated three times in same semester.

**Hours of Lecture or Seminar per week:** 1-3  
**Hours of Lab or Studio per week:** 1.5  
**When Offered:** Fall, Spring, Summer

### MBA 721 - Marketing Decision Systems

Credits: 0-3 (RD)  
Develops skills to plan and implement effective marketing research studies. Topics include research design, data collection, statistical analysis, and use of database systems. Offers perspective on how managers can use market data to develop successful product or service strategies.

**Prerequisite(s):** Completion of MBA core requirements, or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**Grading:** Graduate Special.  
**When Offered:** Fall

### MBA 722 - Consumer Behavior

Credits: 0-3 (RD)  
An integrated analysis of internal and external influences on consumer decision making, purchase, and consumption behaviors with attention to marketing strategy implications. Emphasizes demographics, lifestyle, situation, perception, learning, and attitude formation and change, focusing on customer segmentation, satisfaction, loyalty, and product-person relationships.

**Prerequisite(s):** Completion of MBA core requirements, or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**Grading:** Graduate Special.  
**When Offered:** Spring

### MBA 723 - Supply Chain Management

Credits: 0-3 (RD)  
Examines logistics of supply chain systems, including inventory management, distribution channels, and information systems. Emphasizes strategic alliances and international issues.

**Prerequisite(s):** Completion of MBA core requirements, or permission of instructor.

**Hours of Lecture or Seminar per week:** 3
MBA 724 - Marketing Communications

Credits: 0-3 (RD)
Examines all forms of communication and sources of brand or company contacts as potential message channels in building relationship with customers. Focuses on integrated planning process for all communication elements, including consumer and trade advertising, public relations, direct and database marketing, promotions, and sales presentations to achieve synergy in communicating with various constituencies.

Prerequisite(s): Completion of MBA core requirements, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
Grading: Graduate Special.
When Offered: Spring

MBA 725 - Leadership

Credits: 0-3 (RD)
Overview of major conceptualizations of leadership and motivation in organizations. Integrates theory, research, and applications. Students apply principles of leadership and motivation to their own work situations and case evaluation.

Prerequisite(s): Completion of MBA core requirements, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
Grading: Graduate Special.
When Offered: Fall

MBA 726 - Negotiations

Credits: 0-3 (RD)
Focuses on theory, processes, and practice of negotiation within and across organizations, including attention to ethical issues. Explores systematic ways to increase quality of negotiated agreements, including methods of preparation, effective communication, and various strategies to increase power. Format includes negotiation exercises, lecture, and discussion.

Prerequisite(s): Completion of MBA core.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
Grading: Graduate Special.
When Offered: Fall
MBA 730 - Management of Technology and Innovation Processes

Credits: 0-3 (RD)
Students will develop a strong conceptual foundation for managing technological innovation. It introduces frameworks for analyzing how firms can create, commercialize and capture value from products and services. Topics covered comprise the formulation of innovation strategies, the process of developing new products and services, and how to create and manage an innovative organization to drive revenue growth.

Prerequisite(s): Admission to the MBA program or permission of the program director.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
Grading: Graduate Special.
When Offered: Fall, Spring

MBA 731 - Business Application and Life Cycle Management

Credits: 0-3 (RD)
Studies methods and tools for analyzing and designing business information systems with emphasis on business processes. Topics include data modeling, process modeling, interaction analysis, and user interface.

Prerequisite(s): Completion of MBA or MSA core requirements or permission of the program director.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
Grading: Graduate Special.
When Offered: Fall

MBA 732 - Knowledge Management

Credits: 0-3 (RD)
Examines firms that use knowledge management principles and approaches: intellectual capital, human capital, customer capital, tacit and explicit knowledge, new role of chief knowledge officer, leveraging of knowledge management.

Prerequisite(s): Completion of MBA core requirements, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
Grading: Graduate Special.
When Offered: Summer

MBA 733 - Business Data Communications

Credits: 3 (NR)
Introduces data communications and telecommunications technologies and application in business, including LANs, WANs, PBXs, voice services, network operating systems, corporate internetworking, and Internet. Analyzes data communications
industry, and business applications in manufacturing and service sectors, along with regulatory issues and impact of globalization.

**Prerequisite(s):** Completion of MBA core requirements, or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**MBA 734 - Electronic Commerce and E-Business**

Credits: 0-3 (RD)  

**Prerequisite(s):** Completion of MBA core requirements, or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**Grading:** Graduate Special.  
**When Offered:** Spring

**MBA 735 - Systems Thinking for Business Performance**

Credits: 0-3 (RD)  
The business world is increasingly interconnected. "Systems Thinking" is a way to understand the structure of a system and its relationship to behavior, and provides a foundation for making more effective management decisions in an interconnected world. The course introduces fundamentals of systems thinking, and involves hands-on use of "systems thinking" tools and techniques to improve performance in a variety of situations spanning different industries.

**Prerequisite(s):** Completion of MBA or MSA core requirements or permission of the program director.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**Grading:** Graduate Special.  
**When Offered:** Summer

**MBA 737 - Information Technology Governance and Policy**

Credits: 0-3 (RD)  
Considers specific objectives of IT governance and policy, frameworks that help chart roadmap for this function, and tools and techniques used in specific areas of IT governance.

**Prerequisite(s):** Completion of MBA or MSA core requirements or permission of the program director.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**Grading:** Graduate Special.
MBA 738 - Business Intelligence and Data Mining

Credits: 0-3 (RD)
Examines how data warehouses and data mining are used to help businesses successfully gather, structure, analyze, understand and act on relevant data, both operational and contextual.

Prerequisite(s): Completion of MBA core requirements, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
Grading: Graduate Special.
When Offered: Fall

MBA 741 - Information Technology Auditing

Credits: 0-3 (RD)
Introduces methodologies to assess security and control issues concerning accounting and other information systems. Key feature of course is applying computer-assisted audit tools and techniques to test effectiveness of application.

Equivalent to ACCT 741

Prerequisite(s): Admission to MSA or MBA program, or permission of program director.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
Grading: Graduate Special.
When Offered: Fall

MBA 742 - Corporate Governance and Ethics

Credits: 0-3 (RD)
Focuses on developing understanding of corporate governance issues and ethical decision-making. Topics include examination of internal and external and international governance issues, and ethical analysis in current business environment.

Equivalent to ACCT 742

Prerequisite(s): Admission to MSA or MBA program, or permission of program director.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
Grading: Graduate Special.
When Offered: Spring

MBA 743 - Corporate Financial Reporting
Credits: 0-3 (RD)
Addresses contemporary issues in corporate financial reporting. Focuses on role of financial reporting in providing decision-useful information to participants of capital market, and theoretical and empirical assessments of performance.

Equivalent to ACCT 743

Prerequisite(s): Admission to MSA or MBA program, or permission of program director.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
Grading: Graduate Special.
When Offered: Summer

MBA 744 - Fraud Examination

Credits: 0-3 (RD)
Introduces strategies and techniques for fraud prevention and detection. Focuses on financial fraud such as bribery, contract rigging and kickbacks, embezzlement, fraudulent financial reporting, payroll fraud, and misappropriation of inventory and other assets.

Equivalent to ACCT 636, ACCT 744 (2013-2014 Catalog).

Prerequisite(s): Admission to MSA or MBA program, or permission of program director.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
Grading: Graduate Special.
When Offered: Fall

MBA 745 - International Financial Reporting

Credits: 0-3 (RD)
Examines accounting from an international perspective, including the study of various functional areas of accounting across countries and the reporting requirements encountered by companies engaged in international trade and making foreign direct investments.

Equivalent to ACCT 745

Prerequisite(s): Completion of MBA or MSA core requirements, or permission of program director.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
Grading: Graduate Special.

MBA 746 - Real Estate Analysis and Valuation
Overview of real estate assets, markets, and decisions. Emphasizes development of analytical techniques and information required for implementation. Includes legal, economic, and public policy perspectives.

Equivalent to GSOM 746

**Prerequisite(s):** Completion of MBA or MSA core requirements or permission of the program director.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**Grading:** Graduate Special.

### MBA 747 - Real Estate Finance

Credits: 0-3 (RD)  
Examines financing of residential and income-producing real estate from perspectives of both suppliers and users of funds. Focuses on financing alternatives, primary and secondary markets, and decision implications of available arrangements.

Equivalent to GSOM 747

**Prerequisite(s):** Completion of MBA or MSA core requirements or permission of the program director.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**Grading:** Graduate Special.

### MBA 748 - Real Estate Investment

Credits: 0-3 (RD)  
Develops frameworks for analyzing decisions about investing in real estate assets. Focuses on acquisition and analysis of information required to evaluate potential performance of assets. Applications of theories and techniques through case studies.

Equivalent to GSOM 748

**Prerequisite(s):** Completion of MBA or MSA core requirements or permission of the program director.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**Grading:** Graduate Special.

### MBA 752 - Turning Ideas into Successful Companies

Credits: 0-3 (RD)  
An advanced course in entrepreneurship focused on discovery and development of an achievable business concept. The centerpiece of the course is development of the formal business plan and associated presentation materials. Students are assigned to teams and must hypothesize a new business, research and test their hypothesis, and develop a comprehensive written business plan. The plan must be for an actual business that the students intend to start upon the successful completion of the course.
Technology-based projects are encouraged, but not required. Because the course is cross-listed with IT&E and SOM, most teams will include both engineering and business students. Weekly presentations of the team's progress are required.

Prerequisite(s): Completion of MBA or MSA core requirements or permission of the program director.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
Grading: Graduate Special.
When Offered: Spring

MBA 795 - Global Business Perspectives

Credits: 0-3 (RD)
Applies MBA core courses to global business enterprise through site visits to facilities located outside the United States.

Prerequisite(s): Admission to the MBA program or permission of the program director.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
Grading: Graduate Special.
When Offered: Spring, Summer

MBA 796 - Directed Studies in Business Administration

Credits: 1-3 (RD)
Approval by faculty member and MBA program director required prior to registration. Studies specialized topics in business administration not otherwise available in curriculum.

Prerequisite(s): Admission to the MBA or MSA program or permission of the program director.

Notes: May be repeated for up to 3 credits.

Hours of Lecture or Seminar per week: 1-9
Hours of Lab or Studio per week: 0

MBA 797 - Special Topics in Business

Credits: 1-3 (RT)
Sections established as necessary to focus on various topical issues that emerge in practice of business administration.

Prerequisite(s): Admission to the MBA program or permission of the program director.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
Grading: Graduate Special.
When Offered: Fall, Spring, Summer
Master of New Professional Studies (MNPS)

Offered by the School of Public Policy

MNPS 700 - The New Professionalism: Theory and Practice

Credits: 3 (NR)
Experientially explores contemporary and relevant ethical theories and their diverse applications to professional studies field. Examines ethical relationship between professionals and clients, ethical accountability and responsibility, ethos of institutions, and the professional's role in sustaining ethical standards. Explores philosophical and pedagogical assumptions to understand professional management issues, and social and individual purposes of being professional.

Notes: Customized for each track; for detailed course content, contact appropriate program directors.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

MNPS 702 - The New Professional as Reflective Practitioner

Credits: 3 (NR)
Identifies central problems in epistemology. Examines how an epistemology appropriate to professional practice may be constructed, what is meant by "ways of knowing" and the "reflective practitioner," and implications for professional learning. Studies core issues of generalizability; objective knowledge and understanding; and how evidence, truth, and meaning affect nature of organizational reality and professional's practice. Special attention to developing skills for "double-loop learning," and reflection in professional lives through journals, narrative, autobiography, and imaginative literature.

Notes: Customized for each track; for detailed course content, contact appropriate program directors.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

MNPS 703 - Technology and Learning in the New Professions

Credits: 3 (NR)
Examines enormous potential for enhancing the way organizations can learn, notably through developing Internet literacy and skills in using differing Internet navigation tools. Focuses on applying technology to real-world problems in different professional work-sites and offers in-depth training in use and development of groupware applications.

Notes: Customized for each track; for detailed course content, contact appropriate program directors.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
MNPS 704 - Research Methodologies in the New Professionalism

Credits: 3 (NR)
Concentrates on understanding and using research methodologies from such varied sources as Friere, McKeon, and Janowitz, with a practical team activity in which students study organization or aspects of it, using ethnography, field study, or any appropriately defensible research methodology.

Corequisite(s): EDUC 597

Notes: Customized for each track; for detailed course content, contact appropriate program directors.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

MNPS 720 - Learning Community

Credits: 3 (NR)
Workshops, seminars, and reading groups involving at least 60 hours of contact time and culminating in two-day retreat during which candidates for MS in New Professional Studies (organizational learning) make presentations to class and faculty on research practica. Theme of module is communication, collaboration, and interaction in organizations. After initial one-and-a-half day workshop, MNPS candidates meet with all faculty once a month to give talks and presentations on application of ideas in their organizations, discuss issues in organizational learning, and provide feedback about using collaborative computing technology in learning process.

Equivalent to ODKM 740

Notes: Only for MNPS in organizational learning degree candidates.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
Grading: Graduate Special

Master of New Professional Studies-Teaching (MNPE)

Offered by the College of Education and Human Development

MNPE 700 - The New Professionalism: Theory and Practice

Credits: 3 (NR)

Explores the philosophical and pedagogical assumptions of teachers as individuals and professionals. Critiques educational issues such as accountability, institutional structures, and professional roles engage teachers to be more just and responsive in their relationships with students, families, and colleagues. Provides a deeper understanding of a teacher's participatory and ethical role in a democracy, which includes questioning the status quo.
MNPE 702 - The New Professional as a Reflective Practitioner

Credits: 3 (NR)

Explores the central questions of epistemology to encourage depth of understanding of the assumptions and issues of education. Uses reflection to consider how personal and professional identities are influenced by intentions and commitments to learning and teaching. Provides an understanding of the processes of critical inquiry, dialogue, reflection, and action.

MNPE 703 - Technology and Learning in the New Professions

Credits: 3 (NR)

Supports effective technology integration for teaching and learning by constructive knowledge not just of content, technology and pedagogy, but also of their mutually reinforcing relationships. Develops repertoire of technology-mediated learning approaches with appropriate context specific strategies and representations to support learning. Includes concurrent critique of technology and includes equal access to information, critical web literacy, and privacy issues.

MNPE 704 - Research Methodologies in the New Professionalism

Credits: 3 (NR)

Introduces teacher research in a school setting. Supports intentional, systematic, public, ethical, and contextual inquiry into practice; participants form and frame salient questions, take actions to transform curriculum, gather, analyze and interpret multiple forms of data, and share experience in communities of practice.

Mathematical Sciences (MATH)

Offered by the College of Science
Knowledge of high school algebra is a prerequisite for all mathematics courses. In exceptional cases, the prerequisite for a course above the calculus sequence may be waived at the discretion of instructor.

Prior knowledge of linear algebra and single and multivariable calculus assumed in all math graduate courses. A double number separated by a comma (MATH 555, 556) indicates both graduate courses normally constitute a sequence, and the first semester is prerequisite to the second. The prerequisite may be waived by permission of department chair. See also STAT and OR courses.

**MATH 104 - Trigonometry and Transcendental Functions**

Credits: 2 (NR)
Exponential and logarithmic functions, trigonometric functions, and analytic trigonometry. This course does not satisfy the university's quantitative reasoning requirement. May not be taken for credit after receiving a C or better in MATH 105 or in any MATH course numbered 113 or higher. May not take MATH 105 for credit after receiving a C or better in MATH 104.

**Prerequisite(s):** Specified score on math placement test. Prerequisite enforced by registration system.

**Notes:** May not be used as credit toward BA or BS in mathematical sciences.

**Hours of Lecture or Seminar per week:** 2  
**Hours of Lab or Studio per week:** 0

**MATH 105 - Precalculus Mathematics**

Credits: 4 (NR)
Reviews mathematics skills essential to studying calculus. Topics include equations, inequalities, absolute values, graphs, functions, exponential and logarithmic functions, and trigonometry.

**Prerequisite(s):** Appropriate score on the math placement test or successful completion of the algebra tutorial program offered through the Math Literacy Center. Prerequisite enforced by registration system.

**Notes:** Call Mathematical Sciences Department at 703-993-1460 for details. May not be used as credit toward BA or BS in mathematical sciences. This course does not satisfy the university's quantitative reasoning requirement for the BA degree. May not be taken for credit after receiving grade of C or better in any MATH course numbered 113 or higher.

**Hours of Lecture or Seminar per week:** 4  
**Hours of Lab or Studio per week:** 0

**MATH 106 - Quantitative Reasoning**

Credits: 3 (NR)
Quantitative skills for real world. Topics include critical thinking, modeling by functions, graphs, growth, scaling, probability, and statistics.

Fulfills Mason Core requirement in quantitative reasoning.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0
MATH 108 - Introductory Calculus with Business Applications

Credits: 3 (NR)
Functions, limits, derivative, and integral. Applications of differentiation and integration.

Fulfills Mason Core requirement in quantitative reasoning.

Prerequisite(s): A passing score on the Mathematics Placement Test or C or better in MATH 105 or MATH 112. Prerequisite enforced by registration system.

Notes: Call Mathematical Sciences Department at 703-993-1460 for details. Students who have received credit for MATH 113 or 114 may not receive credit for this course.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

MATH 110 - Introductory Probability

Credits: 3 (NR)
Elementary set theory, probability, and statistics.

Fulfills Mason Core requirement in quantitative reasoning.

Prerequisite(s): Specified score on Math Placement Test, or successful completion of self-paced Basic Math Program offered by Math Literacy Center. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

MATH 111 - Linear Mathematical Modeling

Credits: 3 (NR)
Matrix algebra, systems of linear equations, Markov chains, difference equations, and data fitting.

Fulfills Mason Core requirement in quantitative reasoning.

Prerequisite(s): Specified score on Math Placement Test, or successful completion of self-paced Basic Math Program offered by Math Literacy Center. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

MATH 112 - Discrete Mathematics for IT
Credits: 3 (NR)
Introduces ideas of discrete mathematics including mathematical induction, sets, logic, graphs, trees, basic counting arguments, and discrete probability. Students who have received credit for MATH 125 may not receive credit for this course.

Prerequisite(s): A passing score on the Mathematics Placement Test or C or better in MATH 105 or MATH 108. Prerequisite enforced by registration system.

Notes: Intended for IT students; does not count toward a major or minor in mathematics.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

MATH 113 - Analytic Geometry and Calculus I

Credits: 4 (NR)
Functions, limits, the derivative, maximum and minimum problems, the integral, and transcendental functions.

Fulfills Mason Core requirement in quantitative reasoning.

Prerequisite(s): C or better in MATH 104 or MATH 105 or specified score on math placement test. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 4
Hours of Lab or Studio per week: 1

MATH 114 - Analytic Geometry and Calculus II

Credits: 4 (NR)
Methods of integration, conic sections, parametric equations, infinite series, and power series.

Prerequisite(s): C or better in MATH 113 or in both MATH 123 and 124. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 4
Hours of Lab or Studio per week: 1

MATH 115 - Analytic Geometry and Calculus I (Honors)

Credits: 4 (NR)
More challenging version of MATH 113. Functions, limits, the derivative, maximum and minimum problems, the integral, and transcendental functions.

Fulfills Mason Core requirement in quantitative reasoning.

Prerequisite(s): Permission of department. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 4
Hours of Lab or Studio per week: 1
MATH 116 - Analytic Geometry and Calculus II (Honors)

Credits: 4 (NR)
More challenging version of MATH 114. Methods of integration, conic sections, parametric equations, infinite series, and power series.

Prerequisite(s): Successful completion of MATH 115, or grade of A in MATH 113 and recommendation of MATH 113 instructor. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 4
Hours of Lab or Studio per week: 1

MATH 123 - Calculus with Algebra/Trigonometry, Part A

Credits: 3 (NR)
Math 123, with 124 is a two semester sequence for students with limited math background who desire careers in the sciences. In two semesters, students progress from algebra through the basic calculus covered in Math 113. Math 123 integrates the beginnings of calculus through the derivative with relevant precalculus algebra and trigonometry.

Prerequisite(s): C or better in MATH 104 or 105 or specified score on the math placement test. Prerequisite enforced by registration system.

Notes: Students who successfully complete Math 123-124 are considered the same as having successfully completed MATH 113 and can sign up for Math 114, Calculus II.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall.

MATH 124 - Calculus with Algebra/Trigonometry, Part B

Credits: 3 (NR)
Math 123, with 124 is a two semester sequence for students with limited math background who desire careers in the sciences. In two semesters, students progress from algebra through the basic calculus covered in Math 113. Math 124 will review basic differentiation and applications and then proceed to cover integration including transcendental functions.

Prerequisite(s): C or better in MATH 123.

Notes: Students who successfully complete Math 123-124 are considered the same as having successfully completed MATH 113 and can sign up for Math 114, Calculus II.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall.
MATH 125 - Discrete Mathematics I

Credits: 3 (NR)
Introduces ideas of discrete mathematics and combinatorial proof techniques including mathematical induction, sets, graphs, trees, recursion, and enumeration.

Fulfills Mason Core requirement in quantitative reasoning.

Prerequisite(s): A passing score on the Mathematics Placement Test or C or better in MATH 105 or MATH 108. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

MATH 203 - Linear Algebra

Credits: 3 (NR)
Systems of linear equations, linear independence, linear transformations, inverse of a matrix, determinants, vector spaces, eigenvalues, eigenvectors, and orthogonalization.

Prerequisite(s): C or better in MATH 114 or MATH 116. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

MATH 213 - Analytic Geometry and Calculus III

Credits: 3 (NR)
Partial differentiation, multiple integrals, line and surface integrals, and three-dimensional analytic geometry.

Prerequisite(s): C or better in MATH 114 or MATH 116. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

MATH 214 - Elementary Differential Equations

Credits: 3 (NR)
First-order ODEs, higher-order ODEs, Laplace transforms, linear systems, nonlinear systems, numerical approximations, and modeling.

Prerequisite(s): Grade of C or better in MATH 213 or 215. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
MATH 215 - Analytic Geometry and Calculus III (Honors)

Credits: 3 (NR)
Vectors and vectorvalued functions, partial differentiation, multiple integrals, line integrals, surface integrals, and transformation of coordinates.

Prerequisite(s): C or better in MATH 113, MATH 115 or both MATH 123 and MATH 124 and also in MATH 114 or MATH 116. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

MATH 216 - Theory of Differential Equations

Credits: 3 (NR)
First- and second-order equations, existence uniqueness of solutions, systems of differential equations, and phase plane analysis.

Prerequisite(s): Grade of C or better in MATH 203 and 213 or 215. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

MATH 271 - Mathematics for the Elementary School Teachers I

Credits: 3 (NR)
Concepts and theories underlying elementary school mathematics including problem solving, patterns, sequences, set theory, numeration, number sense, operations and properties of integers, whole, rational, irrational and real numbers, number theory, ratio, proportion, percent and mathematical systems.

Prerequisite(s): Grade of C or better in 3 credits of college math.

Notes: Does not count toward major in mathematics.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

MATH 272 - Mathematics for the Elementary School Teachers II

Credits: 3 (NR)
Continuation of MATH 271. Concepts and theories underlying elementary school mathematics including functions, algebra, geometry, statistics, and probability.

Prerequisite(s): Grade of C or better in MATH 271 or permission of instructor.

Notes: Intended for school educators; does not count toward major in mathematics.
MATH 290 - Introduction to Advanced Mathematics

Credits: 3 (NR)
Introduction to proofs and the language of mathematics. Topics include induction, equivalence relations, cardinality and basic properties of the real numbers. Designated as a writing intensive course for mathematics majors.

Fulfills writing intensive requirement in the major.

Prerequisite(s): C or better in MATH 114 or MATH 116. Prerequisite enforced by registration system.

Notes: Primarily intended for mathematics majors.

MATH 301 - Number Theory

Credits: 3 (NR)
Prime numbers, factorization, congruences, and Diophantine equations.

Prerequisite(s): 6 math credits.

MATH 302 - Foundations of Geometry

Credits: 3 (NR)
Fundamental concepts of incidence. Axioms of Euclidean geometry and the resulting theory, and axioms and development of non-Euclidean and projective geometry.

Prerequisite(s): 6 math credits.

MATH 307 - Mathematical Modeling

Credits: 3 (NR)
Focuses on the development and analysis of mathematical models that make qualitative and quantitative predictions. Students will address particular situations while learning general modeling strategies.
Prerequisite(s): MATH 203 and MATH 214 or MATH 216.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Summer, Spring.

MATH 312 - Geometry

Credits: 3 (NR)
Two and three dimensional analytic geometry, complex geometry, projective geometry, conics and quadric surfaces, spherical geometry, quaternions, Euclidean and non-Euclidean geometry. This course meets the requirement for secondary school teacher certification.

Prerequisite(s): Grade C or higher in MATH 114.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

MATH 313 - Introduction to Applied Mathematics

Credits: 3 (NR)
Vector differential calculus, vector integral calculus, Fourier analysis, and complex analysis.

Prerequisite(s): Grade of C or better in MATH 213 or 215 Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

MATH 314 - Introduction to Applied Mathematics

Credits: 3 (NR)

Prerequisite(s): Grade of C or better in MATH 214 or 216. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

MATH 315 - Advanced Calculus I
Number system, functions, sequences, limits, continuity, differentiation, integration, transcendental functions, and infinite series.

**Prerequisite(s):** Grade of C or better in MATH 213 or 215 and 290. Prerequisite enforced by registration system.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

### MATH 316 - Advanced Calculus II

Credits: 3 (NR)  
Sequences of functions, Taylor series, vectors, functions of several variables, implicit functions, multiple integrals, and surface integrals.

**Prerequisite(s):** Grade of C or better in MATH 315. Prerequisite enforced by registration system.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

### MATH 321 - Abstract Algebra

Credits: 3 (NR)  
Theory of groups, rings, fields.

**Prerequisite(s):** Grade of C or better in MATH 213 or 215 and 290. Prerequisite enforced by registration system.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

### MATH 322 - Advanced Linear Algebra

Credits: 3 (NR)  
Abstract vector spaces, linear independence, bases, linear transformations, matrix algebra, inner product, and special topics.

**Prerequisite(s):** Grade of C or better in MATH 203 and 290. Prerequisite enforced by registration system.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

### MATH 325 - Discrete Mathematics II

Credits: 3 (NR)  
Advanced counting, binomial identities, generating functions, advanced recurrence, inclusion-exclusion, and network flows.
**MATH 351 - Probability**

Credits: 3 (NR)
Random variables, probability functions, special distributions, and limit theorems.

**Prerequisite(s):** Grade of C or better in MATH 213 or 215. Prerequisite enforced by registration system.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**MATH 352 - Statistics**

Credits: 3 (NR)
Estimation, decision theory, testing hypothesis, correlation, linear models, and design.

**Prerequisite(s):** Grade of C or better in MATH 351. Prerequisite enforced by registration system.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**MATH 400 - History of Math**

Credits: 3 (NR)
Explores internal controversies and dynamics of mathematics in larger intellectual and social settings. Topics vary but might include differential equations devised for mechanics and astronomy by Euler, Lagrange, and Laplace; foundation of mathematical analysis from Cauchy to Weierstrass; algebras of Galois and Boole; or creation of non-Euclidean geometry and Cantor's transfinite sets.

Fulfills Mason Core requirement in synthesis.

**Prerequisite(s):** Completion or concurrent enrollment in all other required Mason Core courses, and completion of MATH 290. Prerequisite enforced by registration system.

**Notes:** Credits may not be used toward "upper division" math hours required of math majors.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**MATH 405 - Honors Thesis in Mathematics I**
A project, which is intended to result in a thesis, is to be chosen and completed under the guidance of a full-time faculty member. An oral presentation is required for MATH 405.

Prerequisite(s): MATH 315, 3 additional credits of MATH above the 300 level (excluding MATH 400), and admission to the Mathematics Honors Program.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**MATH 406 - Honors Thesis in Mathematics II**

Credits: 3 (NR)
A project, which is intended to result in a thesis, is to be chosen and completed under the guidance of a full-time faculty member. Oral and written presentations are required in MATH 406.

Prerequisite(s): MATH 405 Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**MATH 411 - Functions of a Complex Variable**

Credits: 3 (NR)
Analytic functions, contour integration, residues, and applications to such topics as integral transforms, generalized functions, and boundary value problems.

Prerequisite(s): Grade of C or better in MATH 214 or 216. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**MATH 413 - Modern Applied Mathematics I**

Credits: 3 (NR)

Prerequisite(s): Grade of C or better in MATH 203 and 214 or 216. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**MATH 414 - Modern Applied Mathematics II**
Continuation of MATH 413, which involves synthesis of pure mathematics and computational mathematics. Fourier analysis and its role in applied mathematics developed (differential equations and approximations). Discrete aspects emphasized in computational models.

**Prerequisite(s):** Grade of C or better in MATH 413. Prerequisite enforced by registration system.

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0

**MATH 431 - Topology**

Credits: 3 (NR)
Metric spaces, topological spaces, compactness, and connectedness.

**Prerequisite(s):** C or better in MATH 315. Prerequisite enforced by registration system.

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0

**MATH 441 - Deterministic Operations Research**

Credits: 3 (NR)

**Prerequisite(s):** Grade of C or better in MATH 203 Prerequisite enforced by registration system.

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0

**MATH 442 - Stochastic Operations Research**

Credits: 3 (NR)

Equivalent to OR 442

**Prerequisite(s):** Grade of C or better in MATH 351. Prerequisite enforced by registration system.

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0
MATH 446 - Numerical Analysis I

Credits: 3 (NR)
Significant figures, round-off errors, iterative methods of solution of nonlinear equations of a single variable, solutions of linear systems, iterative techniques in matrix algebra, interpolation and polynomial approximation.

Prerequisite(s): Grade of C or better in MATH 203 and CS 112. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

MATH 447 - Numerical Analysis II

Credits: 3 (NR)

Prerequisite(s): Grade of C or better in Math 214 or 216 and 446. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

MATH 453 - Advanced Mathematical Statistics

Credits: 3 (NR)
Maximum likelihood tests, sufficiency, most powerful tests, distributions of quadratic forms, topics from nonparametric statistics, Bayesian statistics and linear models.

Prerequisite(s): C or better in MATH 352.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall.

MATH 478 - Introduction to Partial Differential Equations with Numerical Methods

Credits: 3 (NR)
Introduces basic facts about partial differential equations, including elliptic equations, parabolic equations and hyperbolic equations. Methods of solution, characteristics, initial/boundary-value problems, and numerical approximation techniques.

Prerequisite(s): C or better in MATH 203 and 214 or 216. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
MATH 491 - Reading and Problems
Credits: 1-3 (RT)
For mathematical sciences majors only. Independent study in math.

Notes: Must be arranged with instructor before registering.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0

MATH 492 - Reading and Problems
Credits: 1-3 (RT)
For mathematical sciences majors only. Independent study in math.

Prerequisite(s): For mathematical science majors only. Permission of Instructor required.

Notes: Must be arranged with instructor before registering.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0

MATH 493 - Topics in Applicable Mathematics
Credits: 3 (RT)
Topics that have been successfully used in applications of mathematics.

Prerequisite(s): 6 credits of math at or above 310 level.

Notes: Subject determined by instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

MATH 494 - Topics in Pure Mathematics
Credits: 3 (RT)
Topics of pure math not covered in other courses. Topics might include Galois theory, cardinal and ordinal arithmetic, measure theory, mathematical logic, and differential geometry.

Prerequisite(s): 6 credits of math at or above 310 level.

Notes: Subject determined by instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
MATH 495 - Undergraduate Seminar

Credits: 1 (RD)
Prerequisite(s): Permission of instructor.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0

MATH 551 - Regression and Time Series

Credits: 3 (NR)
Mathematics of regression, exponential smoothing, time series, and forecasting. Material included in this course constitutes Society of Actuaries Validation by Educational Experience (VEE) for applied statistics and corresponds to part of Casualty Actuary Society Exam 3.

Prerequisite(s): MATH 352, STAT 652, SOA Exam P, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

MATH 554 - Financial Mathematics

Credits: 3 (NR)
Simple and compound interest, annuities, present and future value, yield rates, capital budgeting, amortization schedules, mortgages, bonds. Material corresponds to the Society of Actuaries Exam: Financial Mathematics (FM). Not appropriate for graduate science and engineering majors not considering actuarial or financial career. Cannot be counted toward MS or PhD degree in mathematics.

Prerequisite(s): MATH 113

Corequisite(s): MATH 114

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

MATH 555 - Actuarial Modeling I

Credits: 3 (NR)
Two-semester sequence covering portions of the material corresponding to the Society of Actuaries Exam M, Casualty Actuary Society Exam 3, and Joint Board Exam EA1. The remaining material for these exams is covered in MATH 551 and 653. Topics include survival distribution and life tables, life insurance, life annuities, net premiums, net premium reserves, multiple life and multiple decrement models, pensions, insurance models including expense, and nonforfeiture benefits and cash values.
Prerequisite(s): MATH 554 and either MATH 351 or STAT 344.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

MATH 556 - Actuarial Modeling II

Credits: 3 (NR)
Two-semester sequence covering portions of the material corresponding to the Society of Actuaries Exam M, Casualty Actuary Society Exam 3, and Joint Board Exam EA1. The remaining material for these exams is covered in MATH 551 and 653. Topics include survival distribution and life tables, life insurance, life annuities, net premiums, net premium reserves, multiple life and multiple decrement models, pensions, insurance models including expense, and nonforfeiture benefits and cash values.

Prerequisite(s): MATH 554 and either MATH 351 or STAT 344.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

MATH 557 - Financial Derivatives

Credits: 3 (NR)

Prerequisite(s): MATH 554 and either MATH 351 or STAT 344, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring

MATH 600 - Special Topics in Mathematics

Credits: 1-6 (RT)
Mathematical workshops, special courses, or other projects.

Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 0

MATH 601 - Analysis I for Teachers

Credits: 3 (NR)
Develops continuous ideas of calculus with particular emphasis on concepts as opposed to computational aspects of calculus. Specific topics include decimal representation of real numbers, sequences, series, and limits; differentiation to find speed, slopes
of curves, and tangents; integration to find volumes and distances and area under curves. Optimization problems including maximization of area and volume, and modeling of these concepts. Graphing techniques supported by theory of calculus and graphing utilities such as TI-83 calculator or computer software such as Maple.

Prerequisite(s): Open to in-service teachers of mathematics at middle or secondary level. Others may enroll with permission of instructor.

Notes: Background in mathematics desirable but not necessary. Some topics from college algebra will be reviewed in class, but thorough understanding of high school algebra and trigonometry expected.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 1

MATH 602 - Analysis II for Teachers

Credits: 3 (NR)
Develops continuous ideas of calculus with particular emphasis on concepts as opposed to computational aspects of calculus. Specific topics include decimal representation of real numbers, sequences, series, and limits; differentiation to find speed, slopes of curves, and tangents; integration to find volumes and distances and area under curves. Optimization problems including maximization of area and volume, and modeling of these concepts. Graphing techniques supported by theory of calculus and graphing utilities such as TI-83 calculator or computer software such as Maple.

Prerequisite(s): Open to in-service teachers of mathematics at middle or secondary level. Others may enroll with permission of instructor.

Notes: Background in mathematics desirable but not necessary. Some topics from college algebra will be reviewed in class, but thorough understanding of high school algebra and trigonometry expected.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 1

MATH 604 - Geometry for Teachers

Credits: 3 (NR)
Covers standard topics from Euclidean geometry, and includes discussion of non-Euclidean geometries. Emphasizes informal and explorative approach to geometry, and makes use of geometry sketchpad. Other topics include geometric constructions, and role of proof in geometry.

Prerequisite(s): Open to in-service teachers of mathematics at middle or secondary level. Others may enroll with permission of instructor.

Notes: Background in mathematics desirable but not necessary.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 1

MATH 605 - Discrete/Finite Mathematics for Teachers
Credits: 3 (NR)
Thorough understanding of high school algebra assumed. Discusses finite mathematics in juxtaposition to continuous ideas of calculus. Topics may consist of elementary counting and combinatorics including recursion and difference equations and their analogy to calculus; thorough discussion of probability and central measures of statistics; and graph theory and its connection to geometry.

Prerequisite(s): Open to in-service teachers of mathematics at middle or secondary level. Others may enroll with permission of instructor.

Notes: Background in mathematics desirable but not necessary.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 1

MATH 607 - Algebraic Structure for Teachers

Credits: 3 (NR)
Expands on customary operations on integers and rationals to discuss systems that mimic these operations. Emphasizes multiplicative and additive inverses and their corresponding identities as they occur in other systems. Topics might include permutation groups, rigid transformations, groups of symmetry of the plane and connection to geometry, and matrices treated as linear transformations and connections to solutions of systems of equations.

Prerequisite(s): Open to in-service teachers of mathematics at middle school level. Others may enroll with permission of instructor.

Notes: Background in mathematics desirable but not necessary. Thorough understanding of high school algebra assumed.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 1

MATH 608 - Problem Solving in Mathematics

Credits: 3 (NR)
Introduces variety of challenging mathematical problems appropriate for middle school student to analyze, and solving problems using mathematics learned in previous courses. Also asks students to search for such problems and orally present solutions.

Prerequisite(s): Open to in-service teachers of mathematics at middle school level. Others may enroll with permission of instructor.

Notes: Background in mathematics or science desirable but not necessary. Assumes exposure to most of topics covered in MATH 601, 604, 605, and 607.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 1

MATH 610 - Number Systems and Number Theory for K-8 Teachers
This course covers the topics: ways of representing numbers, relationships between numbers, number systems, the meanings of operations and how they relate to one another, and computation within the number system as a foundation for algebra. It also includes episodes in history and development of the number system, and will examine the developmental sequence and learning trajectory as children learn this material.

**MATH 611 - Geometry and Measurement for K-8 Teachers**

Credits: 3 (NR)
The course explores the foundations of informal measurement and geometry in one, two, and three dimensions. The van Hiele model for geometric learning is used as a framework for how children build their understanding of length, area, volume, angles, and geometric relationships. Visualization, spatial reasoning, and geometric modeling are stressed. As appropriate, transformational geometry, congruence, similarity, and geometric constructions will be discussed.

**MATH 612 - Probability and Statistics for K-8 Teachers**

Credits: 3 (NR)
An introduction to probability, descriptive statistics, and data analysis. Topics studied will include the exploration of randomness, data representation, modeling. Descriptive statistics will include measures of central tendency, dispersion, distributions, and regression. The analysis of experiments requiring hypothesizing, experimental design and data gathering will also be discussed.

**MATH 613 - Algebra and Functions for K-8 Teachers**

Credits: 3 (NR)
The course will examine representing and analyzing mathematical situations and structures using generalization and algebraic symbols and reasoning. Attention will be given to the transition from arithmetic to algebra, working with quantitative change, and the description of and prediction of change.

**MATH 614 - Rational Numbers and Proportional Reasoning for K-8 Teachers**

Credits: 3 (NR)
This course will cover the basic number strands in fractions and rational numbers, decimals and percents, and ratios and...
proportions in the school curriculum. Instruction will cover interpretations, computations, and estimation with a coordinated program of activities that develop both rational number concepts and skills and proportional reasoning.

**MATH 619 - Topics in Mathematical Logic**

Credits: 3 (RT)
Special topics in foundations of mathematics not included in regular mathematics curriculum. May be repeated for credit.

**Prerequisite(s):** Permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**MATH 621 - Algebra I**

Credits: 3 (NR)
Groups, linear algebra, and matrix groups.

**Prerequisite(s):** Familiarity with basic properties of groups and rings, or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**MATH 624 - Euclidean Geometry**

Credits: 3 (NR)
Euclidean space, geometry of k-dimensional planes, the affine structure of Euclidean space, rigid motions and similarities, parallelepipeds and volumes, convex polytopes, quadric surfaces, and additional topics by instructor's choice.

**Prerequisite(s):** MATH 315 and MATH 322, or equivalent.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**MATH 625 - Numerical Linear Algebra**

Credits: 3 (NR)
Theory and development of numerical algorithms for solving variety of matrix problems: linear systems, least squares problems, eigenvalue problems, and singular value decomposition. Direct and iterative method, analysis of sensitivity to rounding errors, and applications.
Equivalent to CSI 740

Prerequisite(s): Computer literacy, including some programming experience.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**MATH 629 - Topics in Algebra**

Credits: 3 (RT)
Special topics in pure and applied algebra not covered in regular algebra. May be repeated for credit.

Prerequisite(s): Permission of instructor.

Notes: Topic may not be repeated.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**MATH 631 - Topology I: Topology of Metric Spaces**

Credits: 3 (NR)
Covers definition and basic examples of metric spaces, open and closed sets, subspaces and finite products, sequences and convergence, compactness and separability, continuous functions, uniform continuity, metric space C(X) and uniform convergence, and homotopy.

Prerequisite(s): MATH 315 or equivalent.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**MATH 639 - Topics in Geometry and Topology**

Credits: 3 (RD)
Special topics in geometry and topology not covered in regular geometry and topology sequence. May be repeated for credit.

Prerequisite(s): Permission of instructor.

Notes: Topic may not be repeated.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring
MATH 641 - Combinatorics and Graph Theory

Credits: 3 (NR)
Covers enumerative combinatorics, including partially ordered sets; Moebius inversion and generating functions; and major topics in graph theory such as graph coloring, Ramsey theory, and matching.

Prerequisite(s): MATH 321 or equivalent.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

MATH 644 - Convex and Discrete Geometry

Credits: 3 (NR)
Basic properties of Euclidean space, convex sets and convex cones, convex hulls, extremal structure of convex sets, support and separation properties, polyhedra and polytopes, special classes of convex sets, Helly-type theorems, selected problems of discrete geometry.

Prerequisite(s): MATH 315 and MATH 322, or equivalent.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

MATH 649 - Topics in Combinatorics

Credits: 3 (RT)
Special topics in combinatorics not covered in regular combinatorics sequence. May be repeated for credit.

Prerequisite(s): Permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Summer, Spring

MATH 653 - Construction and Evaluation of Actuarial Models I

Credits: 3 (NR)
Economics of insurance, individual risk models for short term, collective risk models for single period, collective risk models over an extended period, and applications of risk theory. Material included in this course corresponds to portions of the Society of Actuaries Exam M and Casualty Actuary Society Exam 3. The remaining material for these exams is covered in MATH 551, 555, and 556.

Prerequisite(s): MATH 351 or STAT 644 are required. MATH 555 is recommended but not required.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
MATH 654 - Construction and Evaluation of Actuarial Models II

Credits: 3 (NR)
Nature and properties of survival and loss models, methods of estimates from complete and incomplete data, tabular and parametric models, and practical issues in survival model estimation. Material included in this course corresponds to most of the Society of Actuaries Exam C and Casualty Actuarial Society Exam 4.

Prerequisite(s): MATH 556 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

MATH 655 - Pension Valuation

Credits: 3 (NR)
Basic mathematics used in pension actuarial work without regard to pension law. Material included in this course corresponds to all of the Joint Board Exam EA-2A and portions of the Society of Actuaries Exam 8. This course cannot be counted toward the MS or PhD degree in mathematics.

Prerequisite(s): MATH 556, SOA Exam EA-1, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

MATH 661 - Complex Analysis I

Credits: 3 (NR)
Topology of complex numbers, holomorphic functions, series, complex integration. Meromorphic, multivalued, and elliptic functions.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

MATH 671 - Fourier Analysis

Credits: 3 (NR)
Study of fundamental ideas in Fourier analysis. Topics include orthonormal systems, Fourier series, continuous and discrete Fourier transform theory, generalized functions, and introduction to spectral analysis. Uses applications to physical sciences, linear systems theory, and signal processing to integrate topics.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
MATH 673 - Dynamical Systems

Credits: 3 (NR)
Contemporary topics in nonlinear dynamical systems illustrated in mathematical models from physics, ecology, and population dynamics. Traditional qualitative analysis of difference and differential equations provides background for understanding chaotic behavior when it occurs in these models. Topics include stability theory, fractals, Lyapunov exponents, and chaotic attractors.

Prerequisite(s): Elementary courses in linear algebra and differential equations.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

MATH 674 - Stochastic Differential Equations

Credits: 3 (NR)
Introduces stochastic calculus and differential equations. Includes Wiener process, Ito and Stratonovich integrals, Ito formula, martingales, diffusions, and applications, including financial applications. Simulations and numerical approximations of solutions.

Prerequisite(s): MATH 214 and 351

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

MATH 675 - Linear Analysis

Credits: 3 (NR)
Metric spaces, normed linear spaces, completeness, compactness, continuous (bounded) linear transformations, Banach spaces, Hilbert spaces, and orthogonal series.

Prerequisite(s): MATH 315 and MATH 322, or equivalent.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

MATH 677 - Ordinary Differential Equations

Credits: 3 (NR)
Qualitative and quantitative theory of ordinary differential equations. Phase portrait analysis of linear and nonlinear systems, including classification of stable and unstable equilibrium states and periodic orbits. Poincare-Bendixson theorem, Lyapunov stability and Lyapunov functions, and bifurcation theory. Optional topics include averaging and perturbation methods, numerical solution techniques, and chaos.

Prerequisite(s): MATH 214 or equivalent.
MATH 678 - Partial Differential Equations

Credits: 3 (NR)
Physical examples, characteristics, boundary value problems, integral transforms, and other topics, such as variational, perturbation, and asymptotic methods.

Prerequisite(s): Elementary differential equations course.

MATH 679 - Topics in Analysis and Potential Theory

Credits: 3 (RT)
Special topics not covered in regular analysis or potential theory sequence. May be repeated for credit.

Notes: Topic may not be repeated.

MATH 680 - Industrial Mathematics

Credits: 3 (NR)
 Takes examples from industry and goes through complete solution process: formulation of mathematical model of problem; solution, possibly by numerical approximation; and interpretation and presentation of results. Emphasizes working in groups, relating mathematics to concrete situations, and communication and presentation skills.

Prerequisite(s): Permission of instructor.

MATH 683 - Modern Optimization Theory

Credits: 3 (NR)
Introduces basic mathematical ideas and methods for solving linear and nonlinear programming problems, with emphasis on mathematical aspects of optimization theory. Reviews classical topics of linear programming, and covers recent developments in linear programming, including interior point method. Considers basic results in nonlinear programming, including very recent developments in this field.
Prerequisite(s): Permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

MATH 685 - Numerical Methods

Credits: 3 (NR)
Computational techniques for solving problems arising in science and engineering. Includes theoretical development as well as implementation, efficiency, and accuracy issues in using algorithms and interpreting results. Specific topics include linear and nonlinear systems of equations, polynomial interpolation, numerical integration, and introduction to numerical solution of differential equations.

Equivalent to CSI 700

Prerequisite(s): Computer literacy, including some programming experience.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

MATH 686 - Numerical Solutions of Differential Equations

Credits: 3 (NR)
Finite difference methods for initial value problems, two-point boundary value problems, Poisson equation, heat equation, and first-order partial differential equations.

Prerequisite(s): MATH 214 and MATH 446 or 685.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

MATH 687 - Variational Methods

Credits: 3 (NR)
Weak formulation of partial differential equations, energy principles, Galerkin approximations, and finite element methods. Includes review and development of necessary analysis.

Prerequisite(s): MATH 446 or 685, and elementary differential equations course.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

MATH 689 - Topics in Applied and Computational Mathematics
Credits: 3 (RT)
Special topics in applied and computational mathematics not covered in the regular applied and computational mathematics sequence. May be repeated for credit.

Prerequisite(s): Permission of instructor.

Notes: Topic may not be repeated.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

MATH 697 - Independent Reading and Research

Credits: 1-6 (RT)
In areas of importance, but with insufficient demand to justify a regular course, students may undertake a course of study under the supervision of a consenting faculty member. Written statement of the content of the course and a tentative reading list is normally submitted as part of the request for approval. Literature review, project report, or other written product is normally required. May be repeated for credit.

Prerequisite(s): Graduate standing and permission of instructor.

Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 0

MATH 721 - Algebra II

Credits: 3 (NR)
Rings, fields, and Galois theory.

Prerequisite(s): MATH 621.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

MATH 722 - Algebraic Topology

Credits: 3 (NR)
Covers simplices and simplicial complexes, cycles and boundaries, simplicial homology, homological algebra, homotopy and the fundamental group, cohomology.

Prerequisite(s): MATH 621 and 631, or equivalent.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
MATH 723 - Combinatorial Structures

Credits: 3 (NR)
Studies structural properties of objects encountered in pure and applied combinatorics. Topics include partially ordered sets, codes, designs, matroids, buildings, symmetrical structures, permutation groups, and face lattices of polytopes.

Prerequisite(s): MATH 321 or equivalent.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

MATH 724 - Commutative Algebra

Credits: 3 (NR)
Study of commutative rings and their ideals, and of modules over commutative rings and their homological properties. More specific topics include Noetherian rings, primary decomposition, completions, graded rings and dimension theory with applications to algebraic geometry.

Prerequisite(s): MATH 621.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

MATH 732 - Topology II: Set-Theoretic Topology

Credits: 3 (NR)
Topics include review of basic set theory (including cardinal numbers products of sets, the Axiom of Choice), definition of topological spaces, bases for topological spaces, forming new topological spaces by taking subspace, quotients, and products, separation properties (Hausdorff, regular, Tychonoff, and normal spaces) compactness, the Lindelof property, separability, connectedness, continuity and homeomorphism, manifolds.

Prerequisite(s): MATH 631 or equivalent.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

MATH 740 - Differential Topology

Credits: 3 (NR)
Differential forms, manifolds, smooth maps, vector fields, the Euler characteristic, integration on manifolds, and de Rham cohomology.

Prerequisite(s): MATH 621 and Math 631, or equivalent.

Notes: MATH 740 will be an elective course acceptable (but not required) for the PhD Degree in the Mathematical Sciences offered by the Department of Mathematical Sciences.
MATH 762 - Complex Analysis II

Credits: 3 (NR)
Harmonic functions, generalizations of the maximum principle, entire and meromorphic functions, analytic continuation, and the Riemann mapping theorem.

Prerequisite(s): MATH 661.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

MATH 763 - Functions of Several Complex Variables

Credits: 3 (NR)
Covers the important results for analytic functions in several variables, including analyticity in several variables and the differences between the theory of one and the theory of several complex variables.

Prerequisite(s): MATH 661 and 762, or equivalent preparation in one complex variable.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

MATH 772 - Wavelet Theory

Credits: 3 (NR)
Study of the theory and computational aspects of wavelets and the wavelet transform. Emphasizes computational aspects of wavelets, defining the Fast Wavelet Transform in one and two dimensions. Developing the appropriate numerical algorithms. Includes developing the theory of wavelet bases on the real line, discussing multiresolution analysis, splines, time-frequency localization, and wavelet packets.

Equivalent to CSI 746

Prerequisite(s): MATH 315 or equivalent.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

MATH 776 - Measure and Integration
Lebesque measure and integration. Theory of Lp spaces with p between one and infinity on the real line. Theory of linear operators on Banach spaces, including the Hahn-Banach theorem, open mapping theorem, closed graph theorem and the uniform boundedness principle.

**Prerequisite(s):** MATH 675.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**MATH 781 - Advanced Methods in Applied Mathematics**

Credits: 3 (NR)  
Bifurcation theory and perturbation methods for solutions in ordinary and partial differential equations. This course will develop and apply these mathematical tools in current scientific fields, such as biology, materials science, or financial mathematics.

**Prerequisite(s):** MATH 677 or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**MATH 784 - Nonlinear Functional Analysis**

Credits: 3 (NR)  
Techniques in nonlinear functional analysis with applications. Contraction mapping principle, Frechet and higher derivatives, the implicit function theorem, Lyapunov-Schmidt method, and bifurcation theory. Finite and infinite dimensional degree theory with applications in partial differential equations.

**Prerequisite(s):** MATH 675 or permission of instructor.

**Notes:** Different backgrounds may be appropriate, but generally, a student is expected to be an upper level graduate student who has already taken Linear Analysis. Since the applications given in the course are for differential equations, some familiarity with differential equations is extremely useful.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**MATH 790 - Classical Potential Theory**

Credits: 3 (NR)  
Potential theory of Laplace's equation in Euclidean space. Harmonic functions, superharmonic functions, potentials, polar sets and capacity, the Dirichlet problem, the Martin boundary, boundary behavior of superharmonic functions using real variable techniques, and minimal fine limit techniques.

**Prerequisite(s):** Math 675 and 776
MATH 795 - Graduate Seminar

Credits: 1 (RD)
Mandatory for all PhD students. Weekly seminar graded on presentations and attendance. Faculty presentations on potential thesis topics and presentations by students.

Prerequisite(s): Enrolled in the PhD program in Mathematics.

MATH 799 - MS Thesis

Credits: 1-6 (RD)
Original or compilatory work evaluated by committee of three faculty members.

Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 0
Grading: S/NC

MATH 800 - Studies for the Doctor of Philosophy in Education

Credits: 1-6 (NR)
Program of studies designed by student's discipline director and approved by student's doctoral committee, which brings the student to participate in current research of discipline director and results in paper reporting the original contributions of student. Enrollment may be repeated.

Prerequisite(s): Admission to PhD in education program to study in mathematical sciences.

Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 0
Grading: Graduate Special

MATH 998 - PhD Thesis Proposal

Credits: 1-9 (RD)
Work on research proposal that forms basis for doctoral dissertation. May be repeated for credit. No more than 24 credit hours of 998 and 999 may be applied to doctoral degree requirements.

Prerequisite(s): Successful completion of qualifying exam.
MATH 999 - PhD Thesis Research

Credits: 1-12 (RD)
Formal record of commitment to doctoral dissertation research under the direction of a faculty member. May be repeated for credit. No more than 24 credit hours of 998 and 999 may be applied to doctoral degree requirements.

Prerequisite(s): Advancement to doctoral candidacy.

Mechanical Engineering (ME)

Offered by the Volgenau School of Engineering.

Students may attempt an undergraduate course taught by the Volgenau School of Engineering twice. A third attempt requires approval of the department offering the course.

ME 211 - Statics

Credits: 3 (NR)
An initial course in applied vector mechanics with emphasis on static equilibrium. Topics include forces, moments, couples, equivalent force-couple systems, centroids, distributed forces, and Coulomb friction. The application of the free body diagram in the analysis of static equilibrium of frames, machines and trusses is stressed.

Prerequisite(s): PHYS 160 and PHYS 161.

ME 212 - Strength of Materials

Credits: 4 (NR)
A first course in mechanics of deformable bodies with emphasis on the engineering approach to the responses of these bodies to various types of loadings. Topics include stress-strain relationships, stress-strain analysis, stress and strain transformation (Mohr's circle), load-deflection, bending, torsion, buckling, and thermal effects.

Prerequisite(s): ME 211. Prerequisite enforced by registration system.
ME 221 - Thermodynamics

Credits: 3 (NR)
A basic thermodynamics course in which the first and second laws of thermodynamics are studied primarily from the classical macroscopic viewpoint and applied to both closed and open systems. Working substances include perfect gases, real gases and vapors in addition to solids and liquids.

Equivalent to ENGR 307 (2013-2014 Catalog).

Corequisite(s): MATH 214.

ME 231 - Dynamics

Credits: 3 (NR)
A course in classical vector dynamics. Topics include vector algebra and calculus, kinematics and kinetics of particles and rigid bodies, as well as energy and momentum methods. Extensive problem solving involving particle and rigid body motion is required.

Prerequisite(s): ME 211. Prerequisite enforced by registration system.

Corequisite(s): MATH 214.

ME 313 - Material Science

Credits: 4 (NR)
An introductory course in physical and mechanical properties of engineering design materials, ceramics and plastics, their structures, use in engineering applications and failure phenomena. All laboratory projects are structured to provide strong physical illustrations for the topics covered in the lectures.

Prerequisite(s): CHEM 251. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
ME 322 - Fluid Mechanics

Credits: 4 (NR)
An introductory course in fluid dynamics stressing both the integral and differential forms of the conservation laws of fluid flow. Engineering applications are made to hydrostatics and to ideal and real fluid flows. Laboratory experiments and problems sessions complement the lectures.

Prerequisite(s): ME 221. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 2
When Offered: Fall, Spring

ME 323 - Heat Transfer

Credits: 4 (NR)
Study of thermal radiation, steady and transient conduction, laminar and turbulent convection, internal and external flow, boundary layers and empirical correlations. Applications address fins, nuclear reactor cooling, heat exchangers and interactive computing.

Prerequisite(s): ME 322. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 2
When Offered: Fall, Spring

ME 351 - Engineering Mathematics

Credits: 3 (NR)
Survey of advanced mathematics topics needed in the study of engineering. Topics include: vector differential and integral calculus, matrix analysis, partial differential equations, complex variables and numerical methods.

Prerequisite(s): MATH 214. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

ME 352 - Engineering Economics
Basic methods and reasons for conducting an engineering economic study are presented. Economic criteria are developed. Procedures for selecting from among a set of technically feasible alternatives are studied. Assumptions and implications associated with these decision-making procedures are discussed.

Equivalent to CEIE 301.

**Prerequisite(s):** Completion of at least 15 credits hours in major courses.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall, Spring

---

**ME 368 - Manufacturing**

Credits: 3 (NR)  
Surveys selected manufacturing processes including rapid prototyping, metal cutting and machining, casting and molding, and thermoforming. Considers selection and use of engineering materials, including composites. Explores the use of Computer Numerical Control (CNC) machine tools for automated component design. Uses a computer-aided design (CAD) and computer-aided manufacturing (CAM) system to design and analyze a mechanical system.

**Prerequisite(s):** ME 362. Prerequisite enforced by registration system.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall, Spring

---

**ME 430 - Mechanical Engineering Laboratory**

Credits: 1 (NR)  
Introduces experimental methods in mechanical engineering. Reviews principles of measurement, sources of experimental error, experimental uncertainty, measurement standards and accuracy. Utilizes instrumentation including detectors, transducers, and data acquisition systems. Experimental measurements of material, mechanical and thermal responses. Involves technical report writing.

Equivalent to ME 350 (2013-2014 Catalog).

**Prerequisite(s):** STAT 344. Prerequisite enforced by registration system.

**Corequisite(s):** ME 443.

**Hours of Lecture or Seminar per week:** 0  
**Hours of Lab or Studio per week:** 2  
**When Offered:** Fall

---

**ME 431 - Systems Dynamics**

Credits: 3 (NR)
A first course which deals with the mathematical modeling of dynamic systems and response analysis of these systems. Topics include state variable and transfer functions, mathematical analysis of systems response, and the use of computational tools for modeling, design, and simulation.

Equivalent to ME 380 (2013-2014 Catalog)

Prerequisite(s): ME 231, PHYS 260/261. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring

ME 432 - Control Engineering

Credits: 4 (NR)
Introduces fundamentals of feedback and modern control theory. Topics include analysis of mechanical and thermal systems by root locus and frequency response techniques. Use of sensors and transducers in control systems, data acquisition and analysis.

Prerequisite(s): ME 431. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring

ME 441 - Design of Mechanical Elements

Credits: 3 (NR)
Fundamentals of mechanical design. Introduction to the fundamentals of static and fatigue failure theories, design of basic machine elements such as fasteners, bearings, gearing and shafts. Builds on the fundamentals of design introduced in earlier courses by introducing the concepts of customer requirements, specification development, reverse engineering, functional decomposition, and design for manufacturing.

Prerequisite(s): ME 212. Prerequisite enforced by registration system.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 2
When Offered: Fall, Spring

ME 442 - Design of Thermal Systems

Credits: 3 (NR)
A study of equipment which operate on principles of thermodynamics and fluid mechanics is used to reinforce analyses and design of gas and vapor power cycles, refrigeration and air conditioning, propulsion systems, combustion, energy conversion and compressible flow.

Prerequisite(s): ME 221. Prerequisite enforced by registration system.
ME 443 - Mechanical Design I

Credits: 3 (NR)
The first course in a two-semester capstone design sequence. Topics include the engineering design process, project management, codes and standards, engineering ethics, and computer-aided design. Students form design teams, select a capstone design project and progress through the proposal and preliminary design stages of the project. The capstone design project continues in ME 444.

Equivalent to ME 360 (2013-2014 Catalog)

Prerequisite(s): ME 323. Prerequisite enforced by registration system.

Corequisite(s): ME 441 or ME 442.

ME 444 - Mechanical Engineering Design II

Credits: 3 (NR)
The second of the two-semester capstone design course sequence. Students continue with concept selection, detail design, prototyping and evaluation of their major design projects. Formal presentations and reports are prepared to review and document the designs.

Prerequisite(s): ME 443. Prerequisite enforced by registration system.

ME 453 - Senior Seminar

Credits: 2 (NR)
A course which highlights, through speakers, discussions and workshops, the professional responsibility of a being mechanical engineer. Additional topics that will be covered include ethical issues, current events and trends in the profession. Engineering case studies will be explored.

Corequisite(s): ME 443.
Medical Laboratory Science (MLAB)

**MLAB 200 - Introduction to Medical Laboratory Science**

Credits: 1 (NR)
Introduction to the profession of Medical Laboratory Science.

Equivalent to MTCH 200 (2013-2014 Catalog)

Prerequisite(s): Prerequisite completion of requirements for BS with major in medical technology except for 30 credits of professional study, and admission to school of medical technology approved by National Accrediting Agency for Clinical Laboratories.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0
When Offered: Fall

**MLAB 300 - Science Writing**

Credits: 2 (NR)
Intensive practice in biological science writing. Science Writing will fulfill the university's writing intensive requirement as well as prepare Medical Laboratory Science students for the types of writing that they will encounter in the industry including, but not limited to: writing, resumes, grants, cover letters, etc.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

**MLAB 401 - Orientation to the Problems and Practices of the Clinical Laboratory**

Credits: 1-2 (NR)
Orientation to clinical lab; specimen collection and record keeping; management principles and problems; educational theories as they apply to the teaching of clinical laboratory procedures; and quality control principles.

Equivalent to MTCH 401 (2013-2014 Catalog)

Prerequisite(s): Prerequisite completion of requirements for BS with major in medical technology except for 30 credits of professional study, and admission to school of medical technology approved by National Accrediting Agency for Clinical Laboratories.

Notes: Not offered on campus.

Hours of Lecture or Seminar per week: 1-2
MLAB 402 - Clinical Hematology and Coagulation

Credits: 1-8 (NR)
Morphology of blood cells in health and disease; theories of hematopoiesis and coagulation; techniques for measurement of hematologic parameters; and hematologic pathologies and their lab evaluation.

Equivalent to MTCH 402 (2013-2014 Catalog)

Prerequisite(s): Prerequisite completion of requirements for BS with major in medical technology except for 30 credits of professional study, and admission to school of medical technology approved by National Accrediting Agency for Clinical Laboratories.

Notes: Not offered on campus.

MLAB 403 - Clinical Microscopy

Credits: 1-3 (NR)
Methods for the routine examination of urine, feces, and certain other body fluids, especially the microscopic identification of normal and pathologic components. Includes a study of the kidney and theories of microscopy.

Equivalent to MTCH 403 (2013-2014 Catalog)

Prerequisite(s): Prerequisite completion of requirements for BS with major in medical technology except for 30 credits of professional study, and admission to school of medical technology approved by National Accrediting Agency for Clinical Laboratories.

Notes: Not offered on campus.

MLAB 404 - Serology and Immunohematology

Credits: 1-7 (NR)
Clinical lab procedures involving antigen-antibody reactions, and theoretical bases of such procedures. Includes both diagnostic and blood bank techniques.

Equivalent to MTCH 404 (2013-2014 Catalog)
**Prerequisite(s):** Prerequisite completion of requirements for BS with major in medical technology except for 30 credits of professional study, and admission to school of medical technology approved by National Accrediting Agency for Clinical Laboratories.

**Notes:** Not offered on campus.

**Hours of Lecture or Seminar per week:** 1-7  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Spring

---

**MLAB 405 - Clinical Microbiology**

Credits: 1-8 (NR)  
Biology and pathology of bacteria, rickettsia, fungi, parasites, and viruses of clinical importance and their culture and identification.

Equivalent to MTCH 405 (2013-2014 Catalog)

**Prerequisite(s):** Prerequisite completion of requirements for BS with major in medical technology except for 30 credits of professional study, and admission to school of medical technology approved by National Accrediting Agency for Clinical Laboratories.

**Notes:** Not offered on campus.

**Hours of Lecture or Seminar per week:** 1-12  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Spring

---

**MLAB 406 - Clinical Chemistry**

Credits: 1-10 (NR)  
Chemical reactions and procedures used in clinical determinations on blood, urine, and cerebral spinal fluid. Includes manual, automated methods of chemical analyses.

Equivalent to MTCH 406 (2013-2014 Catalog)

**Prerequisite(s):** Prerequisite completion of requirements for BS with major in medical technology except for 30 credits of professional study, and admission to school of medical technology approved by National Accrediting Agency for Clinical Laboratories.

**Notes:** Not offered on campus.

**Hours of Lecture or Seminar per week:** 1-3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Summer
Middle East and Islamic Studies (MEIS)

MEIS 500 - Critical Issues and Debates in Middle East and Islamic Studies

Credits: 3 (NR)
Introduces the interdisciplinary study of the Middle East and the Islamic world through an examination of recent seminal works and debates in the field representing the disciplinary perspectives of history, religious studies, political science, and sociology.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

MEIS 799 - Thesis Research and Writing in Middle East and Islamic Studies

Credits: 1-6 (RD)
Original research and thesis writing for students in the Middle East and Islamic Studies MA program.

Prerequisites: Completion of MEIS 500, HIST 535, GOVT 731, GOVT 733, RELI 644; and 27 credit hours toward MA in MEIS degree; permission of MEIS director.

Grading: Satisfactory/No Credit

Military Science (MLSC)

Offered by the University

MLSC 100 - Introduction to Army/ROTC

Credits: 1 (NR)
Introduces leadership values and ethics; responsibilities of officership; the organization, customs, and traditions of the U.S. Army; time management; and physical well-being. Includes a laboratory in applied leadership, common military tasks, and physical fitness.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 2

MLSC 102 - Leadership Skills II

Credits: 1 (NR)
Introduces leadership principles, dimensions, styles, and assessment, among other varied topics. Includes a laboratory in applied
LEADERSHIP, COMMON MILITARY TASKS, AND PHYSICAL FITNESS.

Equivalent to MLSC 101 (2012-2013 Catalog)

**Hours of Lecture or Seminar per week:** 0
**Hours of Lab or Studio per week:** 1
**When Offered:** Spring

---

**MLSC 200 - Self/Team Development**

Credits: 1 (NR)
Covers leadership skills, such as values and ethics. Also teaches how to influence, how to communicate, how and when to make decisions, how to engage in creative problem solving, and how to plan and organize. Includes a laboratory in applied leadership, common military tasks, and physical fitness.

**Prerequisite(s):** MLSC 100 and 101, or approval of professor of military science

**Hours of Lecture or Seminar per week:** 2
**Hours of Lab or Studio per week:** 2

---

**MLSC 202 - Leadership Skills IV**

Credits: 1 (NR)
Builds on the leadership skills developed in Leadership Skills III with additional emphasis on communication, team building, and team leadership. Includes a laboratory in applied leadership, common military tasks, and physical fitness.

Equivalent to MLSC 201 (2012-2013 Catalog)

**Prerequisite(s):** MLSC 100 level completion/dual enrollment or military waiver granted by Professor of Military Science (Dept Head).

**Hours of Lecture or Seminar per week:** 0
**Hours of Lab or Studio per week:** 1
**When Offered:** Spring

---

**MLSC 300 - Applied Leadership I**

Credits: 0 or 1 (NR)
Applied leadership with an introduction to the principles of physical fitness and healthy lifestyle; counseling as means of subordinate development; problem solving; operational analysis, development, and execution; and methods for preparing and presenting instruction. Students are given an introduction to the Leader Development Program that is used to evaluate their leadership performance and provide students with developmental feedback. Some weekend training required. Includes a laboratory in applied leadership, common military tasks, and physical fitness.

**Prerequisite(s):** MLSC 100, 101, 200, and 201; and credit or veteran status with approval from military science professor
MLSC 302 - Applied Leadership II

Credits: 1 (NR)
Applied leadership covering the models of communications (verbal and nonverbal), technology to communicate, how to prepare and conduct formal briefings, an introduction to the Army branches, diversity and equal opportunity training, ethical decision making, & group cohesion and dysfunction. Some weekend training required. Includes a laboratory in applied leadership, common military tasks, and physical fitness.

Equivalent to MLSC 301 (2012-2013 Catalog)

Prerequisite(s): MLSC 100 & 200 level completion or military credit exemption granted by Professor of Military Science (Dept Head).

Notes: Enrollment in MLSC 300 level course is restricted to students who are contracted or are pre-approved by department/Army ROTC as pending contracting.

MLSC 400 - Leadership and Management

Credits: 3 (NR)
Considered the "transition to lieutenant" phase in which managerial theories are applied to personnel, training, and logistics management situations. Students have command and staff responsibilities for the Mason cadet corps and receive hands-on experience operating as a management team. There are several briefing and writing requirements as well. Includes a laboratory in applied science, common military tasks, and physical fitness.

Prerequisite(s): MLSC 300 and 301

MLSC 402 - Leadership and Ethics

Credits: 3 (NR)
Continuing the "transition to lieutenant" phase of ROTC, examines ethics of military environment to include customs, ethical codes & decision making, constraints, and appeals to moral principles. American judicial system is also examined, with emphasis on the Uniform Code of Military Justice. Command and staff responsibilities are assigned to students for hands-on experience operating as a management team for Mason cadet corps. Includes a laboratory in applied leadership, common military tasks, and physical fitness.
Equivalent to MLSC 401 (2012-2013 Catalog)

Prerequisite(s): MLSC 300 & 302

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring

Music (MUSI)

Offered by the College of Visual and Performing Arts

All private music instruction is by arrangement. Students must consult the director of applied music studies in the School of Music for teacher assignment and registration numbers. Applied music fee applies. Majors and minors who register for applied music must also register for an ensemble.

For music major, music minor, or jazz studies minor: half-hour lesson per week, 1 credit, $193; hour lesson per week, 2 or 3 credits, $390. For non-major or minor: half hour lesson per week, 1 credit, $390; hour lesson per week, 2 credits, $780.

MUSI 100 - Fundamentals of Music

Credits: 3 (NR)
Study of musical notation, interval and triad construction, reading of treble and bass clefs, scale construction, rhythm, elementary sight singing and ear training, and application at keyboard.

Fulfills Mason Core requirement in arts.

Notes: Cannot be applied toward degree in music.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

MUSI 101 - Introduction to Classical Music

Credits: 3 (NR)
Introduces art-music tradition of West. Techniques for expanding listening skills developed through study of musical elements, styles, and selected masterworks of musical literature.

Fulfills Mason Core requirement in arts.

Notes: Music majors may take only as free elective.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring
MUSI 102 - Popular Music in America

Credits: 3 (NR)
Investigates popular music styles and development in the United States with particular emphasis on the past 50 years. Lectures, recordings, and video enhance critical listening skills and examine stylistic and social contexts of popular music.

Fulfills Mason Core requirement in arts.

Notes: Music majors may take only as free elective.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

MUSI 103 - Musics of the World

Credits: 3 (NR)
Study and comparison of musical structure and expression in several world cultures, with special attention to social context and function. Studies selected Asian, Middle Eastern, African, and American (Latin, Native, African) cultures.

Fulfills Mason Core requirement in global understanding.

Notes: For non-music majors only. Fulfills the college-level requirement in non-Western culture.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

MUSI 104 - Introduction to Twentieth-Century Music

Credits: 3 (NR)
Survey of various styles found in 20th-century music. Tonal, atonal, serial, and experimental music.

Notes: Music majors may take only as free elective.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

MUSI 105 - Music in the United States

Credits: 3 (NR)
Study of music in the United States from colonial times to present. Through interaction with musical examples, traces significant African and European influences on emerging style and artistic activity in the United States.
Notes: Music majors may take only as free elective.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

MUSI 106 - Fundamentals of Rock, Blues, and Jazz

Credits: 3 (NR)
Fundamentals of Blues, Rock, and Jazz is designed for students without formal training in music theory. The course focuses on Afro-centric concepts in twentieth-century American musical culture including improvisation, emphasis on rhythm and groove, and use of multiple and integrated tonalities, such as major and minor in the blues.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

MUSI 107 - Jazz and Blues in America

Credits: 3 (NR)
Historical, analytical, and aural survey of jazz from inception to present day. Looks at trends resulting from synthesis of jazz with other musical idioms.

Fulfills Mason Core requirement in arts.

Notes: Music majors may take as free elective or part of jazz studies concentration.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

MUSI 113 - Aural Skills I

Credits: 1 (NR)
Students taught to sing a line of music without accompaniment of instrument. Matching tones, major and minor scales, key signatures, intervals, rhythm, treble and bass clefs, and rhythmic and melodic dictation.

Prerequisite(s): Restricted to MUSI majors, MUSI minors, and Jazz Studies minors, or to those with permission of music associate chair.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

MUSI 114 - Aural Skills II
Credits: 1-2 (NR)
Continuation of MUSI 113. Alto and tenor clefs, modulation, various modes, and melodic and harmonic dictation.

Prerequisite(s): MUSI 113, or permission of instructor

Hours of Lecture or Seminar per week: 1-2
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

MUSI 115 - Theory I

Credits: 3 (NR)
Music notation, scales, key signatures, intervals, chords, cadences, and figured bass.

Prerequisite(s): Student must be able to read music, be able to pass a fundamentals of music test (administered during first week of classes), and have some proficiency on a musical instrument or in voice. Restricted to MUSI majors; MUSI minors and Jazz Studies minors need permission of music associate chair; non-MUSI majors need permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

MUSI 116 - Theory II

Credits: 3 (NR)
First- and second-inversion chords, modulation, nonharmonic tones, figured bass, seventh chords. Analysis of Bach chorales; composition of four-part chorales in 18th-century style.

Prerequisite(s): MUSI 115, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring

MUSI 121 - NonMaj PMI:First Instrum

Credits: 1-2 (RD)
Prerequisite(s): For non-music majors only. Two-credit level restricted to students with substantial prior private study.

Hours of Lecture or Seminar per week: 1-2
Hours of Lab or Studio per week: 0

MUSI 122 - NonMaj PMI:Secnd Instrum
Credits: 1-2 (RD)

Hours of Lecture or Seminar per week: 1-2
Hours of Lab or Studio per week: 0

MUSI 171 - Keyboard Skills I

Credits: 1 (NR)
Study of piano keyboard as it relates to various clefs in music. Emphasis on solution of basic stylistic and technical problems.

Prerequisite(s): Restricted to MUSI majors, MUSI minors, and jazz studies minors, or to those with permission of music associate chair.

Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 3
When Offered: Fall

MUSI 172 - Keyboard Skills II

Credits: 1 (NR)
Study of piano keyboard as it relates to intermediate song and combined in various music forms.

Prerequisite(s): MUSI 171. Restricted to MUSI majors, MUSI minors, and jazz studies minors, or to those with permission of music associate chair.

Notes: Nonmusic majors must have permission of instructor.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 3
When Offered: Spring

MUSI 213 - Aural Skills III

Credits: 2 (NR)
Continuation of Music 114. Emphasizes modulation, chromatic and nontonal melodies, various modes, melodic and harmonic dictation, c clefs, and improvisation.

Prerequisite(s): Music 114, or permission of instructor.

Corequisite(s): Music 114, or permission of instructor.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 0

MUSI 214 - Aural Skills IV
Continuation on MUSI 213 with emphasis on chromatic and non-tonal harmonies.

**MUSI 215 - Theory III**

Credits: 3 (NR)
Study of four-part chromatic harmony and analysis of 19th-century compositions.

**Prerequisite(s):** MUSI 116 or permission of instructor. Restricted to music majors; music minors and jazz studies minors need permission of music associate chair; non-music majors need permission of instructor.

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0
**When Offered:** Fall

**MUSI 216 - Theory IV**

Credits: 3 (NR)
Study of melodic, harmonic, rhythmic, and formal processes in post-tonal music.

**Prerequisite(s):** MUSI 215, or permission of instructor.

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0
**When Offered:** Spring

**MUSI 221 - Applied Music I**

Credits: 1 (RD)
Applied music studies 1.

**Prerequisite(s):** Audition or portfolio.

**Notes:** May be repeated for up to 8 credits.

**Hours of Lecture or Seminar per week:** 1-3
**Hours of Lab or Studio per week:** 0.5

**MUSI 222 - Applied Music in Keyboard**
Applied music studies in Keyboard.

Prerequisite(s): Audition.

Notes: May be repeated for up to 8 credits.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0.5

MUSI 223 - Applied Music in Voice

Credits: 1 (RD)
Applied music studies in Voice.

Prerequisite(s): Audition.

Corequisite(s): MUSI 381, 384, or 385.

Notes: May be repeated for up to 8 credits.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0.5

MUSI 224 - Applied Music in Woodwind

Credits: 1 (RD)
Applied music studies in Woodwind.

Prerequisite(s): Audition.

Notes: May be repeated for up to 8 credits.

Hours of Lecture or Seminar per week: 1-12
Hours of Lab or Studio per week: 0.5

MUSI 225 - Applied Music in Brass

Credits: 1 (RD)
Applied music studies in Brass.

Prerequisite(s): Audition.

Notes: May be repeated for up to 8 credits.

Hours of Lecture or Seminar per week: 1-12
Hours of Lab or Studio per week: 0.5
MUSI 226 - Applied Music in String

Credits: 1 (RD)
Applied music studies in String.

Prerequisite(s): Audition.

Notes: May be repeated for up to 8 credits.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0.5

MUSI 227 - Applied Music in Percussion

Credits: 1 (RD)
Applied music studies in Percussion.

Prerequisite(s): Audition.

Notes: May be repeated for up to 8 credits.

Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 0.5

MUSI 228 - Applied Music in Composition

Credits: 1 (RD)
Applied music studies in Composition.

Prerequisite(s): Portfolio of recent compositions.

Notes: May be repeated for up to 8 credits.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0.5

MUSI 229 - Non-Major Applied Music I

Credits: 1 (RD)
Applied music studies I.

Prerequisite(s): Audition or portfolio.
MUSI 241 - Applied Music II

Credits: 2 (RD)
Applied music studies 2.

Prerequisite(s): Audition or portfolio.

Notes: May be repeated for up to 16 credits.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 1

MUSI 242 - Applied Music in Keyboard

Credits: 2 (RD)
Applied music studies in Keyboard.

Prerequisite(s): Audition.

Notes: May be repeated for up to 16 credits.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 1

MUSI 243 - Applied Music in Voice

Credits: 2 (RD)
Applied music studies in Voice.

Prerequisite(s): Audition.

Corequisite(s): MUSI 381, 384, or 385.

Notes: May be repeated for up to 16 credits.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 1

MUSI 244 - Applied Music in Woodwind
MUSI 245 - Applied Music in Woodwind

Credits: 2 (RD)
Applied music studies in Woodwind.

Prerequisite(s): Audition.

Notes: May be repeated for up to 16 credits.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 1

MUSI 245 - Applied Music in Brass

Credits: 2 (RD)
Applied music studies in Brass.

Prerequisite(s): Audition.

Notes: May be repeated for up to 16 credits.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 1

MUSI 246 - Applied Music in String

Credits: 2 (RD)
Applied music studies in String.

Prerequisite(s): Audition.

Notes: May be repeated for up to 16 credits.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 1

MUSI 247 - Applied Music in Percussion

Credits: 2 (RD)
Applied music studies in Percussion.

Prerequisite(s): Audition.

Notes: May be repeated for up to 16 credits.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 1
MUSI 248 - Applied Music in Composition

Credits: 2 (RD)
Applied music studies in Composition.

Prerequisite(s): Portfolio of recent compositions.

Notes: May be repeated for up to 16 credits.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 1

MUSI 249 - Non-Major Applied Music II

Credits: 2 (RD)
Applied music studies II.

Prerequisite(s): Audition or portfolio.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 2

MUSI 251 - The Art of Teaching Music

Credits: 3 (NR)
Introduces and explores various music teaching professions. Examines philosophical, pedagogical, and practical issues in context of diverse teaching situations and venues that range from private studio and public school to community music schools and commercial establishments.

Fulfills Mason Core requirement in oral communication for the Music BM only.

Prerequisite(s): Admission to music major or minor program, or jazz studies minor program.

Notes: Requires observing professionals in the field.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

MUSI 252 - Popular Music Arranging

Credits: 3 (NR)
This course explores popular music styles and genres. Using this information to analyze popular music and arrange the music for various ensembles.

Prerequisite(s): MUSI 215.
MUSI 254 - Music and Technology

Credits: 3 (NR)
Study of technology related to music, including audio synthesis and computer-based hardware and software.

Equivalent to MUSI 315.

Prerequisite(s): MUSI 100 or MUSI 115.

MUSI 259 - Music in Computer Technology

Credits: 3 (NR)
Overview of ways computer is used in music. Topics include principles of musical instrument digital interface (MIDI); various kinds of synthesis; acoustics and sound processing; and musical composition using the computer. Explores music resources of internet and surveys current multimedia applications in music history, theory, ear training, improvisation, and notation.

Equivalent to MUSI 415.

MUSI 273 - Keyboard Skills III

Credits: 1 (NR)
Continuation of MUSI 172. Study of techniques of harmonization at the piano keyboard.

Prerequisite(s): MUSI 172. Restricted to MUSI majors, MUSI minors, and Jazz Studies minors, or permission of music associate chair.

Notes: Nonmusic majors must have permission of instructor.
MUSI 280 - Athletic and Ceremonial Ensemble

Credits: 0-1 (RT)
Students gain an understanding of American popular and other musics developing personal expression via performance and creative design. Students also learn and develop leadership and management skills. An understanding of the vital role of community outreach and service is gained through first-hand experience.

Fulfills Mason Core requirement in arts.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0
When Offered: Fall, Summer, Spring

MUSI 300 - Recital Attendance

Credits: 0 (RD)
Students attend 10 student recitals to be selected from departmental and music education recitals, and junior, senior, and graduate recitals.

Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 0
Grading: S/NC
When Offered: Fall, Spring

MUSI 301 - Music in Motion Pictures

Credits: 3 (NR)
Intensive study and analysis of using music tracks in motion pictures to introduce the picture, set a scene, create moods, or for musical numbers. From the silent film scores of the 1920s to the present (including electronic music).

Fulfills Mason Core requirement in arts.

Prerequisite(s): 30 credits.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

MUSI 302 - American Musical Theater

Credits: 3 (NR)
Intensive study of the musical elements in the American musical theater from its European and later African roots to its evolution between the wars into a native form, and its continual assimilation of external influences such as new forms of jazz and rock to the eclectic form of the present day.

Fulfills Mason Core requirement in arts.
Prerequisite(s): 30 credit hours or permission of the instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

MUSI 303 - Topics in Ethnomusicology

Credits: 3 (RD)
Advanced study of theory and method in ethnomusicology with specific thematic or geographic focus. Course emphasizes critical thinking, listening, and research in the study of music from around the world.

Prerequisite(s): MUSI 103, or MUSI 431, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Summer, Spring

MUSI 304 - Topics in Musicology

Credits: 3 (RD)
Designed for students with no music theory background, the course explores the intersection of music and culture in relation to specific topics. Issues addressed may include race, class, gender, economic context, aesthetics, etc.

Prerequisite(s): 30 hours completed.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

MUSI 311 - Jazz Studies

Credits: 3 (NR)
Musicianship course integrating jazz improvisation, theory, composition, and arranging. Focuses on concepts unique to our time in style, form, and harmony.

Prerequisite(s): MUSI 379 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

MUSI 315 - Music Technology

Credits: 3 (NR)
Study of technology related to music, including audio synthesis and computer-based hardware and software.
Equivalent to MUSI 254.

**Prerequisite(s):** MUSI 100 or 115

**Notes:** There is a course fee beyond tuition charges.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**MUSI 316 - Topics in Music Technology**

Credits: 3 (RD)  
Selected topics in music technology with an emphasis on musical creativity. Includes consideration of recent developments in areas such as electronic composition, the science of music, recording industry and practices, and music industry.

Equivalent to MUSI 359.

**Prerequisite(s):** MUSI 315.

**Notes:** Can be repeated for up to 9 credits. There is a course fee beyond tuition charges.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**MUSI 319 - Class Composition and Arranging**

Credits: 3 (NR)  
Students write original compositions for specified instruments, voices, or combinations. They then apply compositional principles to the creative arrangement of existing music of various styles.

**Prerequisite(s):** MUSI 114 or 216, or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall

---

**MUSI 321 - Non-Major PMI**

Credits: 1-2 (NR)  
**Prerequisite(s):** 4 credits in Non-Major Private Music Instruction or audition for the PMI coordinator.

**Hours of Lecture or Seminar per week:** 1-2  
**Hours of Lab or Studio per week:** 0
MUSI 323 - Music Education Recital

Credits: 0 (NR)
Recital on major instrument given by student during junior or senior year.

Prerequisite(s): Minimum 8 credits in private music instruction in major instrument

Corequisite(s): Concurrent enrollment in appropriate 2-credit private music instruction course.

Notes: Recital must be at least 25 minutes long. All recitals by arrangement. Students must consult with director of applied music studies to register and schedule dates.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
Grading: S/NC

MUSI 324 - Junior Recital

Credits: 1 (NR)
Public recital by student during junior year.

Corequisite(s): Concurrent enrollment in appropriate 3-credit private music instruction course.

Notes: Junior recital must be at least 25 minutes long. All recitals by arrangement. Students must consult with director of applied music studies to register and schedule dates.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

MUSI 325 - Performance Seminar and Vocal Literature for Singers and Accompanists I

Credits: 2 (RD)
Students assigned vocal literature in Italian, English, German, and French from Baroque to 21st century, and perform in a weekly master class format. Designed for vocal performance and piano and accompanying majors; develops and improves artistic and performance skills, repertoire preparation and execution, diction, interpretation, style, and overall stage presence.

Prerequisite(s): Admission to the Music major program or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 1

MUSI 326 - Performance Seminar and Vocal Literature for Singers and Accompanists II

Credits: 2 (RD)
Students assigned vocal literature in Italian, English, German, and French from Baroque to 21st century, and perform in a weekly master class format. Designed for vocal performance and piano and accompanying majors; develops and improves artistic and
performance skills, repertoire preparation and execution, diction, interpretation, style, and overall stage presence.

**Prerequisite(s):** Admission to the Music major program or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 1

**MUSI 331 - Music History in Society I**

Credits: 3 (NR)  
Historical survey of Western music from Greek times through the late Baroque era, with emphasis on specific musical genres and composers who developed them. Musical developments are related to other aspects of society. Instruction conducted by lectures, recordings, and video. Learning process enhanced by reading, listening, writing, and analytical assignments.

**Prerequisite(s):** MUSI 215 or permission of instructor

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Spring

**MUSI 332 - Music History in Society II**

Credits: 3 (NR)  
Historical survey of Western music from the early Classical era through mid-19th century, with emphasis on specific musical genres and composers who developed them. Musical developments related to other aspects of society. Lectures, recordings, video. Learning process enhanced by reading, listening, writing, and analytical assignments.

Fulfills writing intensive requirement in the major.

**Prerequisite(s):** MUSI 216 and 331, or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall

**MUSI 338 - Music History in Society A**

Credits: 3 (NR)  
Historical survey of Western music from the late Renaissance through the Romantic era, with emphasis on specific musical genres and composers who developed them. Musical developments are related to other aspects of society. Instruction conducted by lectures, recordings, and video. Learning process enhanced by reading, listening, writing, and analytical assignments.

**Prerequisite(s):** MUSI 215, or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall, Summer, Spring
MUSI 341 - Diction for Singers I: Italian Diction and English Diction

Credits: 2 (NR)
Increases proficiency in singing in Italian and English by teaching International Phonetic Alphabet (IPA), and strengthens performance of Italian and English art songs and operatic repertoire. Focuses on intensified, systematic study of phonetics as it applies to singing in Italian and English.

Prerequisite(s): Admission to the Music major program or permission of instructor.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 1

MUSI 342 - Diction for Singers II: German Diction and French Diction

Credits: 2 (NR)
Increases proficiency in singing in German and French by teaching International Phonetic Alphabet (IPA), and strengthens performance of German and French art songs and operatic repertoire. Focuses on intensified, systematic study of phonetics as it applies to singing in German and French.

Prerequisite(s): Restricted to MUSI majors and minors. Non majors need permission of instructor.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 1

MUSI 351 - Keyboard Pedagogy

Credits: 3 (NR)
Investigates methods, theories, techniques, and materials to teach keyboard to children and adults in individual and group situations.

Prerequisite(s): MUSI 114, 216 and 273; and 8 credits in piano, organ, or harpsichord; or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Summer

MUSI 352 - Vocal Pedagogy and Lab

Credits: 3 (NR)
Instruction in teaching of voice through systematic study of vocal physiology and its implications for pedagogical methods. Includes theoretical and systematic study of processes, procedures, and practices to develop art of singing. Offers technical, physiological, theoretical, and practical principals of the singing art, with emphasis on the importance of vocal health.

Prerequisite(s): 8 credits Applied Music in Voice, or permission of instructor.
MUSI 353 - Instrumental Pedagogy and Literature

Credits: 3 (NR)
Instruction in teaching instrumental music techniques for all levels through study of pedagogical methods, standard literature, and musical instruments produced by present-day manufacturers.

Prerequisite(s): Junior standing in instrumental private music instruction, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

MUSI 354 - Electronic Composition

Credits: 3 (NR)
This course explores the techniques used in recording music with current software and hardware to edit, modify, and market music.

Prerequisite(s): MUSI 255.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Summer, Spring

MUSI 355 - Recording Techniques

Credits: 3 (NR)
Explores the techniques used in recording music with current software and hardware to edit, modify, and market music.

Prerequisite(s): MUSI 255.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Summer, Spring

MUSI 359 - Topics in Music Technology

Credits: 3 (NR)
Selected topics in music technology with an emphasis on musical creativity. Includes consideration of recent developments in areas such as electronic composition, the science of music, recording industry and practices, and music industry.
Equivalent to MUSI 316

**Prerequisite(s):** MUSI 354, MUSI 355.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall, Summer, Spring

---

**MUSI 361 - Class Strings: Violin, Viola, Cello, and Bass**

Credits: 1 (NR)  
Study of playing and teaching string instruments with emphasis on violin and cello through beginning method book. Study of fingerings and bowing techniques to teach and play viola and bass at beginning levels. Survey of string playing techniques to conduct rehearsals at intermediate-, advanced-, and artist-level ensembles.

**Prerequisite(s):** Admission to music major program, or permission of instructor.

**Notes:** Three hours per week studying violin, viola, cello, and bass; one hour per week in laboratory ensemble.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 4

---

**MUSI 363 - Class Woodwinds**

Credits: 1 (RD)  
Study of Techniques of playing and teaching Woodwind instruments, including flute, clarinet, saxophone, oboe, and bassoon. Survey of instructional materials, and mouthpiece and instrument selection.

**Prerequisite(s):** Admission to music major program, or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 4  
**When Offered:** Fall, Spring

---

**MUSI 364 - Class Woodwinds: Oboe and Bassoon**

Credits: 1 (RD)  
Study of techniques of playing and teaching oboe and bassoon. Survey of instructional materials, instrument selection, and reed adjustment.

**Prerequisite(s):** Admission to music major program, or permission of instructor.

**Notes:** Three hours per week studying oboe and bassoon; one hour per week in laboratory ensemble.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 4
