- OR 642 - Integer Programming Credits: 3
- OR 643 - Network Modeling Credits: 3
- OR 644 - Nonlinear Programming Credits: 3
- OR 682 - Computational Methods in Engineering and Statistics Credits: 3
- OR 741 - Advanced Linear Programming Credits: 3

Students must also complete the following:
- one stochastic methods course
- one elective course with written concurrence of the student's advisor

▲ Concentration in Stochastic Models (STM)

Students concentrating in stochastic models must complete three courses from the following:

- OR 645 - Stochastic Processes Credits: 3
- OR 647 - Queuing Theory Credits: 3
- OR 674 - Dynamic Programming Credits: 3
- OR 677 - Statistical Process Control Credits: 3
- OR 719 - Graphical Models for Inference and Decision Making Credits: 3
- SYST 664 - Bayesian Inference and Decision Theory Credits: 3
- Either STAT 554 - Applied Statistics I Credits: 3 or
- STAT 663 - Statistical Graphics and Data Exploration I Credits: 3

Students must also complete the following:
- one deterministic methods course
- one elective course with written concurrence of the student's advisor

Total: 30 credits

Dual-Degree MS in Operations Research and Statistical Science

The program allows students to earn an MS in operations research and an MS in statistical science by completing 48 credits of course work in both areas instead of the 60 that would be required if the degrees were sought independently. See the corresponding catalog entry.

Systems Engineering, MS

Banner Code: VS-MS-SYST
Mason's educational and research program in systems engineering addresses a broad range of issues relevant to the design, implementation, analysis and management of systems. Concentration areas include: Advanced Transportation Systems; Architecture-Based Systems Integration; Command, Control, Communications, Computing, and Intelligence; Financial Systems Engineering; Systems Engineering and Data Analytics; Systems Engineering of Software-Intensive Systems; and Systems Management. Research activities include both fundamental and applied research. Mason's graduate program in Systems Engineering recognizes the importance of balancing an education in quantitative models and engineering tools with a proper understanding of the systems "perspective."

The program prepares students for a professional career in systems design, development, and management, associated with problem formulation, issue analysis, and evaluation of alternative courses of action. The program emphasizes both analytical and practical aspects of engineering complex systems. Students are expected to demonstrate proficiency in several quantitative modeling disciplines. Students are also expected to master issues relevant to practical aspects of systems architecture design, and management.

Each student is assigned a faculty advisor with whom to work to complete an approved plan of study. This plan of study must include five core courses, one methods course, three electives in a concentration area, and a thesis or systems engineering project. The plan of study must include 30 graduate credits including a capstone project (3 credits). Matriculation requirements for candidates needing additional work in mathematics or engineering also may be included in the plan of study.

An accelerated master of science option is available for students in selected bachelors of science programs. See BS (selected)/Systems Engineering, Accelerated MS for specific requirements.

**Foundation and Admission Requirements**

Applicants should have a baccalaureate degree from an accredited institution in engineering, mathematics, computer science, physical sciences, economics, or a related field. They also should have completed courses in calculus (MATH 113, MATH 114, and MATH 213), matrix algebra (MATH 203), differential equations (MATH 214), applied probability (STAT 346), and a scientific programming language (CS 112).

Other requirements are as follows:

- Evidence of satisfactory educational achievement in at least one of the following forms: a GPA of at least 3.00 as an undergraduate or an acceptable GPA in graduate courses. International students must also achieve satisfactory scores on the GRE. Nonnative English speakers must have achieved a satisfactory score on the TOEFL exam.
- Three letters of recommendation submitted by former professors or supervisors
- Working background in engineering mathematics and computer systems. Students with minor deficiencies in preparation may apply for admission to the program, but they will be required to take one or more foundation courses. The department offers SYST 500 - Quantitative Foundations for Systems Engineering as an intensive review of undergraduate engineering mathematics, including matrix algebra, transforms, differential equations, probability, and statistics.

Students who have not completed a basic engineering undergraduate mathematics sequence will be required to complete courses in engineering calculus and matrix algebra prior to acceptance. On acceptance, students will be required to take a foundation qualification test a week or two before school starts, unless waived by the department chair or graduate coordinator. Students who fail the test will be required to take SYST 500 or other foundation courses. A sample test is available from the department.

Familiarity with analytical modeling software, such as spreadsheets or math packages, is also expected. Students should acquaint themselves with these software packages before beginning classes.

**Degree Requirements**
Core Courses (15 credits):

- SYST 505 - Systems Engineering Principles Credits: 3
- SYST 510 - Systems Definition and Cost Modeling Credits: 3
- SYST 520 - System Engineering Design Credits: 3
- SYST 530 - Systems Engineering Management I Credits: 3
- SYST 611 - System Methodology and Modeling Credits: 3

Students who have work experience in systems engineering should consult with their advisor on replacing SYST 505 with a higher-level SYST course.

Concentrations (12 credits):

Students may construct concentration areas by choosing electives from among special groupings. The seven concentrations available are:

- Advanced Transportation Systems
- Architecture-Based Systems Integration
- Command, Control, Communications, Computing, and Intelligence (C4I)
- Financial Systems Engineering
- Systems Engineering and Data Analytics
- Systems Engineering of Software-Intensive Systems
- Systems Management

Students may also devise their own grouping of electives subject to prior approval of their advisor.

Basic Methods Courses (3 credits)

Students must complete 3 credits of a basic methods course. The choice of basic methods course may depend on the student's concentration.

List of Basic Methods Courses:

- SYST 563 - Research Methods in Systems Engineering and Information Technology Credits: 3
- SYST 573 - Decision and Risk Analysis Credits: 3
- SYST 620 - Discrete Event Systems Credits: 3
- SYST 664 - Bayesian Inference and Decision Theory Credits: 3
- OR 531 - Analytics and Decision Analysis Credits: 3
- OR 541 - Operations Research: Deterministic Models Credits: 3
- OR 542 - Operations Research: Stochastic Models Credits: 3
- OR 568 or SYST 568 - Applied Predictive Analytics Credits: 3
- ECE 528 - Introduction to Random Processes in Electrical and Computer Engineering Credits: 3

▲Concentration in Advanced Transportation Systems (ATS)
The air transportation system is among the most complex networked systems. This concentration is designed to provide students with the skills to address the next generation of challenges of the air transportation system. Topics addressed include congestion and safety of the national air space, economic and human factors, impact of technology innovation, and public policy. The program emphasizes design, modeling, and analysis to support decision making for government and the aviation industry.

Basic methods course:

- One course from the list of basic methods courses above.

Concentration-specific courses:

Students must complete the following:

- SYST 560 - Introduction to Air Traffic Control Credits: 3
- SYST 660 - Air Transportation Systems Modeling Credits: 3
  The remaining elective course must be taken from the list below with the approval of the advisor. Courses designated as basic methods courses may also be used as the elective.
- SYST 618 - Model-based Systems Engineering Credits: 3
- SYST 630 - Systems Engineering Management II Credits: 3
- SYST 671 - Judgment and Choice Processing and Decision Making Credits: 3
- CSS 610 - Agent-based Modeling and Simulation Credits: 3
- OR 647 - Queuing Theory Credits: 3

▲ Concentration in Architecture-Based Systems Integration (ABSI)

There is much interest today in the engineering of systems that comprise other component systems, where each of the component systems serves organizational and human purposes. These systems families are often categorized as systems of systems, federations of systems, or coalitions of systems. The design of architectures is a major ingredient in the design of systems families. Furthermore, it provides the conceptual basis for achieving system integration. This concentration covers the formulation of the system integration problem, definition of architecture frameworks, use of structured analysis and object-oriented methodologies for the design of architectures, modeling and simulation for the evaluation of architectures, and approaches to integration. Both defense and industrial applications are considered.

With careful planning, students who complete this concentration might be able to complete the Architecture-Based Systems Integration Graduate Certificate simultaneously with their MS.

Basic methods course:

- SYST 620 - Discrete Event Systems Credits: 3

Concentration-specific courses:

Students must complete the following courses:

- SYST 618 - Model-based Systems Engineering Credits: 3
- SYST 621 - Systems Architecture Design Credits: 3
The remaining elective course must be taken from the list below with approval of the advisor. Courses designated as basic methods courses may also be used as the elective.

- SYST 542 - Decision Support Systems Engineering Credits: 3
- SYST 622 - System Integration and Architecture Evaluation Credits: 3
- SYST 683 - Modeling, Simulation, and Gaming Credits: 3

▲Concentration in Command, Control, Communications, Computing, and Intelligence (C4I)

C4I systems are concerned with gathering, retrieving, analyzing, and disseminating time-sensitive information to achieve mission-critical objectives. These systems support military operations across the spectrum of conflict, intelligence operations, transportation monitoring, emergency response, drug interdiction, and law enforcement, among others. C4I systems include the equipment, people, and procedures necessary to accomplish the mission. The equipment may include a variety of sensors, communications systems, and information processing and decision-support systems.

The program focuses on the analysis, design, development, and management of C4I systems. Topics addressed include C4I architectures and software, communications, decision support, modeling and simulation, and sensor data fusion.

With careful planning, students who complete this concentration might be able to complete the Command, Control, Communications, Computing, and Intelligence Graduate Certificate simultaneously with their MS.

Basic methods course:

- OR 542 - Operations Research: Stochastic Models Credits: 3
  or
- ECE 528 - Introduction to Random Processes in Electrical and Computer Engineering Credits: 3

Concentration-specific courses:

Students must take the following:

- SYST 680 - Principles of Command, Control, Communications, Computing, and Intelligence (C4I) Credits: 3
  or ECE 670 - Principles of C4I Credits: 3
- SYST 584 - Heterogeneous Data Fusion Credits: 3
  The remaining elective course must be taken from the list below with the approval of the advisor. Courses designated as basic methods courses may also be used as the elective.
- SYST 671 - Judgment and Choice Processing and Decision Making Credits: 3
- SYST 683 - Modeling, Simulation, and Gaming Credits: 3
- SYST 760 - Special Topics in Command, Control, Communications, Computing, and Intelligence Systems Engineering Credits: 3
- ECE 542 - Computer Network Architectures and Protocols Credits: 3
- ECE 630 - Statistical Communication Theory Credits: 3

▲Concentration in Financial Systems Engineering (FNSE)
Financial engineering is a cross-disciplinary field which relies on mathematical finance, numerical methods, and computer simulations to make trading, hedging, and investment decisions, as well as facilitating the risk management of those decisions. While mathematics is indispensable in financial engineering, the concentration will try best to focus on the concepts and ideas of finance, while limiting the math within a scope acceptable to most students in engineering.

Basic methods course:

- SYST 538 - Analytics for Financial Engineering and Econometrics Credits: 3

Concentration-specific courses:

Students must complete the following:

- SYST 588 - Financial Systems Engineering I: Introduction to Options, Futures, and Derivatives Credits: 3
- SYST 688 - Financial Systems Engineering II: Derivative Products and Risk Management Credits: 3
  The remaining elective course must be taken from the list below with approval of the advisor. Courses designated as basic methods courses may also be used as the elective.
- SYST 573 - Decision and Risk Analysis Credits: 3
- SYST 584 - Heterogeneous Data Fusion Credits: 3
- SYST 664 - Bayesian Inference and Decision Theory Credits: 3
- SYST 671 - Judgment and Choice Processing and Decision Making Credits: 3
- OR 635 - Discrete System Simulation Credits: 3
- OR 645 - Stochastic Processes Credits: 3
- OR 682 - Computational Methods in Engineering and Statistics Credits: 3
- MBA 705 - Venture Capital and Private Finance Credits: 0-3
- MBA 706 - Investment Analysis Credits: 0-3

CENTRCONCENTRATION in Systems Engineering and Data Analytics (SEDA)

Systems engineers must address a broad range of issues relevant to the design, implementation, analysis, and management of systems. This concentration provides methodological tools that can be applied to the systems engineering process. Areas of focus include decision support systems, distributed intelligent systems, knowledge-based planning systems, network systems, probabilistic reasoning systems, sensor fusion systems, and optimization methods.

Basic methods course:

- OR 541 - Operations Research: Deterministic Models Credits: 3

Concentration-specific courses:

Students must complete the following course:

- SYST 568 - Applied Predictive Analytics Credits: 3
  The remaining two elective courses must be taken from the list below with the approval of the advisor. Courses designated as basic methods courses may also be used as an elective.
• OR 603 - Sports Analytics Credits: 3
• OR 604 - Practical Optimization Credits: 3
• SYST 538 - Analytics for Financial Engineering and Econometrics Credits: 3
• SYST 542 - Decision Support Systems Engineering Credits: 3
• SYST 584 - Heterogeneous Data Fusion Credits: 3
• SYST 618 - Model-based Systems Engineering Credits: 3
• SYST 621 - Systems Architecture Design Credits: 3
• SYST 671 - Judgment and Choice Processing and Decision Making Credits: 3
• SYST 683 - Modeling, Simulation, and Gaming Credits: 3

▲Concentration in Systems Engineering of Software-Intensive Systems (SESI)

This concentration addresses the software component of the systems engineering life cycle. It specifically covers the allocation of system requirements to software. Practitioners are concerned with the theoretical and practical aspects of technology, cost, and the social effect of computer systems that are reliable, maintainable, secure, efficient, and cost effective. The program emphasizes the integration of hardware, software, and firmware, and the management of these complex computer systems over their life cycle through systems engineering methods, tools, and processes.

With careful planning, students who complete this concentration might be able to complete the Systems Engineering of Software-Intensive Systems Graduate Certificate simultaneously with their MS.

Basic methods course:

• One course from the list of basic methods courses above.

Concentration-specific courses:

Students must take the following:

• SYST 542 - Decision Support Systems Engineering Credits: 3
• SYST 618 - Model-based Systems Engineering Credits: 3
  The remaining elective course must be taken from the list below with the approval of the advisor. Courses designated as basic methods courses may also be used as an elective.
• CS 571 - Operating Systems Credits: 3
• INFS 622 - Information Systems Analysis and Design Credits: 3
• SWE 619 - Object-Oriented Software Specification and Construction Credits: 3
• SYST 584 - Heterogeneous Data Fusion Credits: 3
• SYST 630 - Systems Engineering Management II Credits: 3
  or one of the following:
  • CS 555 - Computer Communications and Networking Credits: 3
  • ECE 542 - Computer Network Architectures and Protocols Credits: 3
  • INFS 612 - Principles and Practices of Communication Networks Credits: 3

▲Concentration in Systems Management (SMG)

The management aspect of systems engineering involves tracking and control of system development through the major phases of the system lifecycle, identifying and resolving problems to minimize their effect on cost, schedule, or performance, and
iteratively improving product and process. This concentration emphasizes the theory and practice of systems management and prepares students for careers in managing the development of complex systems.

Basic methods course:

- One course from the list of basic methods courses above.

Concentration-specific courses:

Students must take the following:

- SYST 618 - Model-based Systems Engineering Credits: 3
- SYST 630 - Systems Engineering Management II Credits: 3
  The remaining elective course must be taken from the list below with the approval of the advisor. Courses designated as basic methods courses may also be used as an elective.
- SYST 542 - Decision Support Systems Engineering Credits: 3
- SYST 584 - Heterogeneous Data Fusion Credits: 3
- SYST 621 - Systems Architecture Design Credits: 3
- SYST 622 - System Integration and Architecture Evaluation Credits: 3
- SYST 671 or OR 671 - Judgment and Choice Processing and Decision Making Credits: 3
- SYST 677 or OR 677 - Statistical Process Control Credits: 3

Project (3 credits) or Thesis (6 credits)

Students must complete a capstone project (3 credit hours) or thesis (6 credit hours) under the direction of a Systems Engineering faculty member.

Under the project option, the student completes three credit hours of SYST 699. Students in these courses work in teams on an approved applied project. A project report is submitted at the end of the semester, and a final project presentation is made to the entire faculty of the SEOR Department.

Under the thesis option, the student completes six credit hours of SYST 799. The master's thesis should reflect a significant independent research effort. The work is conducted under the guidance of a faculty thesis advisor, and the final written thesis and oral defense are approved by a three-member faculty committee and submitted to the library. The thesis work is expected to be completed while taking six semester hours of SYST 799. Although a student is required to maintain continuous enrollment by registering for SYST 799 each semester until the thesis is completed, only six hours will be applied to the degree. The thesis option requires approval by the department chair and approval is only given in rare circumstances.

- SYST 699 - Masters Project Credits: 3
  or
- SYST 799 - Master's Thesis Credits: 1-6

Total: 30-33 credits

Non-Degree
Aviation Flight Training and Management Minor

Banner Code: AVIM

School: Volgenau School of Engineering
Department: Systems Engineering and Operations Research

Students completing the Aviation Flight Training and Management minor will take classes for Pilot Ground school and Flight Training leading up to a solo flight. In addition, students will study aspects of aviation from systems engineering of air traffic control, design of airports, human factors and psychology, and financial planning and management. Students will be trained for required government licensing exams such as the Federal Aviation Administration (FAA) Knowledge Test and FAA Flight tests. Special fees will apply. Students are responsible for meeting all eligibility requirements. For policies governing all minors, see the Academic Policies section of this catalog.

Minor Requirements

The minor in Aviation Flight Training and Management consists of 15 credit hours of course work. The specific requirements are as follows:

Three required SEOR courses:

- SYST 460 - Introduction to Air Traffic Control Credits: 3
- SYST 462 - Flight Training Lab I Credits: 3 (Lab fees to cover flight training costs apply.)
- SYST 463 - Flight Training Lab II Credits: 3 (Lab fees to cover flight training costs apply.)

One additional course from the following:

- SYST 371 - Systems Engineering Management Credits: 3
- SYST 461 - Air Transportation System Engineering Credits: 3
- MIS 303 - Introduction to Business Information Systems Credits: 3
- MBUS 301 - Managing People and Organizations in a Global Economy Credits: 3
- MBUS 305 - Introduction to International Business Credits: 3

One additional course from the following:

- SYST 469 - Human Computer Interaction Credits: 3
- SYST 470 - Human Factors Engineering Credits: 3
- PSYC 317 - Cognitive Psychology Credits: 3
- PSYC 333 - Industrial and Organizational Psychology Credits: 3
- HIST 378 - History of Aviation Credits: 3
Prerequisites:

Some of the courses listed above have additional prerequisites. Students should pay careful attention to prerequisites when selecting courses.

Total: 15 credits

Systems Engineering and Operations Research Minor

Banner Code: SEOR

School: Volgenau School of Engineering
Department: Systems Engineering and Operations Research

For policies governing all minors, see the Academic Policies section of this catalog.

Minor Requirements

The minor in Systems Engineering and Operations Research consists of 15 credit hours of coursework. The specific requirements are as follows:

Two required SEOR courses:

- SYST 101 - Understanding Systems Engineering Credits: 3 or SYST 210 - Systems Design Credits: 3
- SYST 473 - Decision and Risk Analysis Credits: 3

Three additional courses from the following:

- SYST 371 - Systems Engineering Management Credits: 3
- SYST 460 - Introduction to Air Traffic Control Credits: 3
- SYST 461 - Air Transportation System Engineering Credits: 3
- SYST 469 - Human Computer Interaction Credits: 3 or SYST 470 - Human Factors Engineering Credits: 3
- OR 335 - Discrete Systems Modeling and Simulation Credits: 3
- OR 441 - Deterministic Operations Research Credits: 3 or MATH 441 - Deterministic Operations Research Credits: 3
- OR 442 - Stochastic Operations Research Credits: 3 or MATH 442 - Stochastic Operations Research Credits: 3
- OR 481 - Numerical Methods in Engineering Credits: 3 or MATH 446 - Numerical Analysis I Credits: 3

Prerequisites:

Some of the courses listed above have additional prerequisites. Students should pay careful attention to prerequisites when selecting courses.
Total: 15 credits
Mechanical Engineering, BS: Mathematics and Science Electives

Select 3 credits from this list:

BIOL 213 - Cell Structure and Function Credits: 4
BIOL 309 - Introduction to Oceanography Credits: 3

CHEM 212 - General Chemistry II Credits: 3 and CHEM 214 - General Chemistry Laboratory II Credits: 1
CHEM 300 - Chemistry of Semiconductor Processing Credits: 3
CHEM 333 - Physical Chemistry for the Life Sciences I Credits: 3
CLIM 411 - Atmospheric Dynamics Credits: 3
CLIM 412 - Physical Oceanography Credits: 3
CLIM 429 - Atmospheric Thermodynamics Credits: 3
EVPP 210 - Environmental Biology: Molecules and Cells Credits: 4
GEOL 412 - Physical Oceanography Credits: 3

PHYS 262 University Physics III Credits: 3 and PHYS 263 University Physics III Laboratory Credits: 1
PHYS 331 Fundamentals of Renewable Energy Credits: 3
MATH 203 Linear Algebra Credits: 3
MATH 290 Introduction to Advanced Mathematics Credits: 3
MATH 301 Number Theory Credits: 3
MATH 302 Foundations of Geometry Credits: 3
MATH 312 Geometry Credits: 3
MATH 313 Introduction to Applied Analysis Credits: 3
MATH 314 Introduction to Applied Mathematics Credits: 3
MATH 351 Probability Credits: 3
MATH 411 Functions of a Complex Variable Credits: 3

STAT 344 Probability and Statistics for Engineers and Scientists I Credits: 3
STAT 346 Probability for Engineers Credits: 3
Technical Focus Courses

Students must satisfy all prerequisites and other requirements in order to take any of the courses listed below. Courses chosen for the technical focus must be chosen with a coordinator in the Information Sciences and Technology department. Not all courses are offered each semester.

IT 206 - Object Oriented Techniques for IT Problem Solving Credits: 3
IT 207 - Applied IT Programming Credits: 3
IT 213 - Multimedia and Web Design Credits: 3
IT 214 - Database Fundamentals Credits: 3
IT 223 - Information Security Fundamentals Credits: 3
IT 300 - Modern Telecommunications Credits: 3
IT 304 - IT in the Global Economy Credits: 3
IT 306 - Program Design and Data Structures Credits: 3
IT 308 - Event-Driven Programming Credits: 3
IT 314 - Database Programming Credits: 3
IT 315 - Mobile Development Credits: 3
IT 322 - Health Data Challenges Credits: 3
IT 324 - Health Information Technology Fundamentals Credits: 3
IT 328 - Health Information Emerging Technologies Credits: 3
IT 331 - Web I: Web Development Credits: 3
IT 332 - Web Server Administration Credits: 3
IT 335 - Web Development using Content Management Systems Credits: 3
IT 341 - Data Communications and Network Principles Credits: 3
IT 344 - Information Storage and Management Technologies Credits: 3
IT 353 - Information Defense Technologies Credits: 3
IT 357 - Computer Crime, Forensics, and Auditing Credits: 3
IT 366 - Network Security I Credits: 3
IT 390 - Rapid Development of Scalable Applications
IT 410 - Web Programming Credits: 3
IT 413 - Digital Media Editing Credits: 3
IT 414 - Database Administration Credits: 3
IT 415 - Information Visualization Credits: 3
IT 431 - Web II: Advanced Web Development Credits: 3
IT 436 - Agile Web Development with Open Source Frameworks Credits: 3
IT 441 - Network Servers and Infrastructures Credits: 3
IT 445 - Advanced Networking Principles Credits: 3
IT 455 - Wireless Communications and Networking Credits: 3
IT 462 - Information Security Principles Credits: 3
IT 465 - Peer-to-Peer Systems and Overlay Networks Credits: 3
IT 466 - Network Security II Credits: 3
IT 467 - Network Defense Credits: 3
IT 484 - Voice Communications Technologies Credits: 3
IT 488 - Fundamentals of Satellite Communications Credits: 3
Applied Science, BAS

Applied Science, BAS

Banner Code: UN-BAS-APLS

Administration

Academic Director: Janette Kenner Muir, Associate Provost for Undergraduate Education
Program Coordinator, Adult Learning: Hermione Pickett

The Bachelor of Applied Science (BAS) is an undergraduate liberal arts degree program for adult learners. It is designed primarily to deepen student knowledge in an academic area and foster critical thinking, analytic reasoning, and an ability to synthesize information.

The BAS articulates well with specialized Applied Associate Science (AAS) degree programs, providing a streamlined path to completion of traditional academic requirements leading to the baccalaureate degree. It meets students' professional and personal goals while developing a depth of knowledge and proficiency of skill that translates well to the workplace. However, it is not organized in the same way as a traditional baccalaureate degree. Students planning graduate study should consult with an academic advisor prior to undertaking this degree program.

Admission

As a prerequisite to enrollment in the BAS, students must be at least 7 years out of high school and have received an Associate of Applied Science (AAS) degree from an accredited two-year institution in an approved area of specialization. The AAS degree will normally fulfill some, but not all, Mason Core requirements. Students who do not meet the 7 year rule may be able to waive this requirement by completing a waiver form available at bas.gmu.edu/age-waiver-form/.

Degree Requirements

BAS students must fulfill all requirements for bachelor's degrees including Mason Core requirements, to include 45 credits of upper-level course work. All Mason Core requirements must be met with either George Mason courses or transferrable equivalents.

The minimum credit requirement for a bachelor's degree is 120 credits; however, while there is some variation between concentration areas, fulfilling all Mason Core requirements and an academic concentration or specialization is likely to require most BAS students to complete at least 63-66 credits at George Mason, which may lead to over 120 credits of coursework in order to receive the degree.

Admitted BAS students will be academically advised by the appropriate BAS Program concentration Advisor to plan their course of study including completion of the Mason Core, the BAS concentration or specialization, and any remaining requirements. See bas.gmu.edu for more information.

The following degree plan is based on a student who transfers in a minimum of 30 credits from a completed AAS degree. Some of these credits may count only towards the elective requirement within the BAS degree.

Concentrations or Area of Specialization
Concentrations are intended to provide focus for the BAS curriculum in an area relevant to the student's AAS degree while allowing for the breadth of study associated with a liberal arts baccalaureate degree. Please note that determination of current transfer work for these concentrations may impact course requirements.

In addition to satisfying all Mason Core requirements, students must satisfy the requirements for one of the seven concentrations listed below:

- Applied Conflict Analysis and Resolution
- Conservation Studies
- Cyber Security
- Defense Information Systems Technology
- Health, Wellness and Social Services
- Human Development and Family Science
- Legal Studies
- Technology and Innovation

Students who do not wish to pursue a concentration may seek permission to plan a course of study in a specialization outside the concentration areas in collaboration with the program advisor.

▲ Concentration in Applied Conflict Analysis and Resolution (ACAR)

This concentration is in collaboration with the School for Conflict Analysis and Resolution.

Core Requirement (3 credits)

- BAS 300 - Building Professional Competencies Credits: 3

Concentration Requirements (39 credits)

- CONF 101 - Conflict and Our World Credits: 3
- CONF 210 - Theories of Conflict Analysis and Resolution Credits: 3
- CONF 302 - Culture, Identity, and Conflict Credits: 3
- CONF 490 - RS: Integration Credits: 3

One course (3 credits) from the following:

- CONF 300 - Conflict Resolution Techniques and Practice Credits: 3
- CONF 301 - Research and Inquiry in Conflict Resolution Credits: 3

Two courses (6 credits) from the following:
• CONF 320 - Interpersonal Conflict Analysis and Resolution Credits: 3
• CONF 330 - Community, Group, and Organizational Conflict Analysis and Resolution Credits: 3
• CONF 340 - Global Conflict Analysis and Resolution Credits: 3

Remaining coursework (18 credits)

In consultation with their advisor, students are required to take an additional 18 credits of coursework to complete the concentration. At least 9 credits must be from the CONF department. Please see scarf.gmu.edu/undergraduate/10300#Concentration for the most recent list of approved courses.

Electives (variable)

All BAS students are required to complete a minimum of 120 credit hours of coursework. Students will work with their advisor to determine how to fulfill their outstanding credit hours to ensure they have met all major and university requirements. The number of elective credits that a BAS student may have available will vary by concentration and the amount of applicable transfer coursework the student has been awarded.

▲ Concentration in Conservation Studies (CNST)

This concentration is in collaboration with New Century College and the Smithsonian-Mason School of Conservation. This degree is ideal for students who have earned an AAS in Veterinary Technology. One semester of study at the Smithsonian-Mason School of Conservation is required for completion of degree requirements.

Core Requirements (9 credits)

• BAS 300 - Building Professional Competencies Credits: 3
• BAS 490 - Introduction to Research Methods Credits: 3
• BAS 491 - Applied Sciences Capstone Credits: 3

Concentration Requirements (28 credits)

All students must complete one of the Smithsonian Semesters listed below:

Smithsonian Semester: Conservation, Biodiversity and Society (16 credits)

• CONS 401 - Conservation Theory Credits: 3
• CONS 402 - Applied Conservation Credits: 4
• CONS 410 - Human Dimensions in Conservation Credits: 3
• CONS 490 - RS: Integrated Conservation Strategies Credits: 3
• CONS 320 - Conservation in Practice Credits: 3

Smithsonian Semester: Wildlife Ecology and Conservation (16 credits)
• CONS 403 - Ecology and Conservation Theory Credits: 3  
• CONS 404 - Monitoring and Assessment of Biodiversity Credits: 4  
• CONS 411 - Science Communication for Conservation Credits: 3  
• CONS 491 - RS: Comprehensive Conservation Planning Credits: 3  
• CONS 320 - Conservation in Practice Credits: 3

Two courses (12 credits) from the following:

• INTS 311 - The Mysteries of Migration: Consequences for Conservation Credits: 6  
• INTS 401 - Conservation Biology Credits: 6  
• INTS 402 - Plants and People - Sustenance, Ceremony, and Sustainability Credits: 6

Electives (minimum 15 credits required)

Students in this concentration have a minimum of 15 required elective credit hours, selected from the courses listed below.

Please note: All BAS students are required to complete a minimum of 120 credit hours of coursework. Students will work with their advisor to determine how to fulfill their outstanding credit hours to ensure they have met all major and university requirements. The number of elective credits that a BAS student may have available will vary by concentration and the amount of applicable transfer coursework the student has been awarded.

• INTS 318 - Exploring Virginia's Watersheds Credits: 4  
• INTS 331 - The Nonprofit Sector Credits: 4  
• INTS 334 - Environmental Justice Credits: 4  
• INTS 336 - Poverty, Wealth and Inequality in the US Credits: 3  
• INTS 338 - Animal Rights and Humane Education Credits: 3  
• INTS 395 - Field-Based Work Credits: 1-18  
• INTS 402 - Plants and People - Sustenance, Ceremony, and Sustainability Credits: 6  
• INTS 435 - Leadership in a Changing Environment Credits: 4

▲ Concentration in Cyber Security (CYBS)

This concentration is in collaboration with the Volgenau School of Engineering and is only available to students who graduate with an AAS degree in Cyber Security from the Virginia Community College System.

Core Requirements (13 credits)

• EDIT 201 - Strategies for Online Learning Success Credits: 1  
• BAS 300 - Building Professional Competencies Credits: 3  
• BAS 490 - Introduction to Research Methods Credits: 3  
• BAS 491 - Applied Sciences Capstone Credits: 3
• IT 499 - Special Topics in Information Technology Credits: 3

Concentration Requirements (18 credits)

• IT 104 - Introduction to Computing Credits: 3
• IT 105 - IT Architecture Fundamentals Credits: 3
• IT 223 - Information Security Fundamentals Credits: 3
• IT 304 - IT in the Global Economy Credits: 3
• IT 353 - Information Defense Technologies Credits: 3
• IT 357 - Computer Crime, Forensics, and Auditing Credits: 3
• IT 462 - Information Security Principles Credits: 3

IT Cyber Security (15 credits met via transfer)

Specific courses must be taken at the community college to fulfill this requirement. Students should consult with their advisor.

IT Elective Transfer Courses (15 credits met via transfer)

Specific courses must be taken at the community college to fulfill this requirement. Students should consult with an advisor.

Electives (minimum 15 credits required)

Students in this concentration have 15 credit hours of required elective IT or MBUS coursework, selected in consultation with their advisor. Select course options are listed below.

All BAS students are required to complete a minimum of 120 credit hours of coursework. Students will work with their advisor to determine how to fulfill their outstanding credit hours to ensure they have met all major and university requirements. The number of elective credits that a BAS student may have available will vary by concentration and the amount of applicable transfer coursework the student has been awarded.

• IT 429 - Security Accreditation of Information Systems Credits: 3
• MBUS 300 - Accounting in a Global Economy Credits: 3
• MBUS 301 - Managing People and Organizations in a Global Economy Credits: 3
• MBUS 302 - Managing Information in a Global Economy Credits: 3
• MBUS 303 - Marketing in a Global Economy Credits: 3
• MBUS 304 - Entrepreneurship: Starting and Managing a New Enterprise Credits: 3

▲ Concentration in Defense Information Systems Technology (DIST)

This concentration is in collaboration with the Volgenau School of Engineering and is only available to students who graduate with an AAS degree in Applied Science. All courses in this concentration have sections offered via distance learning.

Core Requirements (9 hours)

• BAS 300 - Building Professional Competencies Credits: 3
• BAS 490 - Introduction to Research Methods Credits: 3
• BAS 491 - Applied Sciences Capstone Credits: 3

Concentration Requirements (27 credits)

• MATH 108 - Introductory Calculus with Business Applications Credits: 3
• IT 104 - Introduction to Computing Credits: 3
• IT 105 - IT Architecture Fundamentals Credits: 3
• IT 102 - Discrete Structures Credits: 3
• IT 106 - Introduction to IT Problem Solving Using Computer Programming Credits: 3
• IT 206 - Object Oriented Techniques for IT Problem Solving Credits: 3
• IT 223 - Information Security Fundamentals Credits: 3
• IT 300 - Modern Telecommunications Credits: 3
• IT 341 - Data Communications and Network Principles Credits: 3

Concentration Options (15 credits)

Networking and Telecommunications

• IT 366 - Network Security I Credits: 3
• IT 441 - Network Servers and Infrastructures Credits: 3
• IT 445 - Advanced Networking Principles Credits: 3
• IT 455 - Wireless Communications and Networking Credits: 3
• IT 499 - Special Topics in Information Technology Credits: 3

Information Systems Security

• IT 366 - Network Security I Credits: 3
• IT 441 - Network Servers and Infrastructures Credits: 3
• IT 462 - Information Security Principles Credits: 3
• IT 466 - Network Security II Credits: 3
• IT 499 - Special Topics in Information Technology Credits: 3

Electives (minimum 12-15 credits required)

Students in this concentration will complete 12-15 hours of required 300/400 level elective coursework, selected in consultation with their advisor as need to complete the required 45 hours.

All BAS students are required to complete a minimum of 120 credit hours of coursework. Students will work with their advisor to determine how to fulfill their outstanding credit hours to ensure they have met all major and university requirements. The
number of elective credits that a BAS student may have available will vary by concentration and the amount of applicable transfer coursework the student has been awarded.

▲ Concentration in Health, Wellness and Social Services (HWSS)

This concentration is in collaboration with the College of Health and Human Services

To enroll in this concentration, students must have an AAS in one of the following areas:

- Health Information Management
- Hospitality Management, Nutrition Management specialization
- Nursing
- Physical Therapist Assistant
- Respiratory Therapy

Core Requirements (18 credits)

- BAS 300 - Building Professional Competencies Credits: 3
- SOCW 200 - Introduction to Social Work Credits: 3
- GCH 205 - Global Health Credits: 3
- NURS 434 - Vulnerable Populations Credits: 3
- BAS 490 - Introduction to Research Methods Credits: 3
- BAS 491 - Applied Sciences Capstone Credits: 3

Additional Concentration Requirements (9-12 credits)

To complete the Health, Wellness and Social Services concentration, students must complete one of the two following areas:

- Health Care Administration
- Physical and Mental Health Care Delivery

Health Care Administration

- HAP 301 - Health Care Delivery in the United States Credits: 3
- HAP 442 - Introduction to Health Care Politics and Policy Credits: 3
- HAP 360 - Introduction to Health Information Systems Credits: 3
- SOCW 380 - Changing Social Policies and Systems Credits: 3

Physical and Mental Health Care Delivery

- HAP 301 - Health Care Delivery in the United States Credits: 3
- NUTR 295 - Introduction to Nutrition Credits: 3
Choose one of the courses below to complete this track:

- HHS 432 - Healthy Aging Credits: 3
- SOCW 375 - Human Behavior and the Family Life Course Credits: 3
- SOCW 435 - Introduction to Gerontology Credits: 3
- SOCW 483 - Selected Approaches to Social Work Intervention Credits: 3
- GCH 360 - Health and Environment Credits: 3

Electives (variable)

All BAS students are required to complete a minimum of 120 credit hours of coursework. Students will work with their advisor to determine how to fulfill their outstanding credit hours to ensure they have met all major and university requirements. The number of elective credits that a BAS student may have available will vary by concentration and the amount of applicable transfer coursework the student has been awarded.

▲ Concentration in Human Development and Family Science (HDFS)

This concentration is in collaboration with College of Humanities and Social Sciences, New Century College and College of Education and Human Development.

Core Requirement (6 credits)

- BAS 300 - Building Professional Competencies Credits: 3
- HDFS 200 - Individual and Family Development Credits: 3

Concentration Requirements (21-25 credits)

Adult Development and Aging (3 credits)

- PSYC 415 - Psychological Factors in Aging Credits: 3

Family Processes (3-4 credits)

Choose one course from:

- ECED 404 - Engaging Families of Diverse Young Learners Credits: 3
- INTS 317 - Issues in Family Relationships Credits: 4
- PSYC 466 - Psychology of Intimate Relationships Credits: 3
- SOCI 309 - Marriage, Families, and Intimate Life Credits: 3

Diversity (3-6 credits)
Choose one course from:

- ANTH 315 - Socialization Processes: Family, Childhood, Personality in Cross-Cultural Perspective Credits: 3
- ATEP 205 - Cultural Competence Credits: 3
- EDUC 203 - Disability in American Culture Credits: 3
- HEAL 350 - Interventions for Populations and Communities at Risk Credits: 3
- INTS 320 - Construction of Differences: Race, Class, and Gender Credits: 6
- INTS 336 - Poverty, Wealth and Inequality in the US Credits: 3
- PSYC 379 - Applied Cross-Cultural Psychology Credits: 3
- SOCI 355 - Social Inequality Credits: 3

Applied Research Methods (3 credits)

Choose one course from:

- PRLS 450 - Research Methods Credits: 3
- PSYC 301 - Research Methods in Psychology Credits: 3
- SOCI 303 - Methods and Logic of Inquiry Credits: 3

Human Service Delivery (3 credits)

- HDFS 300 - Individual and Family Services Delivery Credits: 3 (fulfills synthesis and writing intensive requirement)

Internship (6 credits)

- HDFS 498 - Internship and Analysis in Human Development and Family Science Credits: 3
- HDFS 499 - Advanced Internship & Analysis in Human Development and Family Science Credits: 3

Electives (variable)

All BAS students are required to complete a minimum of 120 credit hours of coursework. Students will work with their advisor to determine how to fulfill their outstanding credit hours to ensure they have met all major and university requirements. The number of elective credits that a BAS student may have available will vary by concentration and the amount of applicable transfer coursework the student has been awarded.

▲ Concentration in Legal Studies (LGLS)

This concentration is in collaboration with New Century College and College of Humanities and Social Sciences.

Core Requirements (9 credits)
• BAS 300 - Building Professional Competencies Credits: 3
• BAS 490 - Introduction to Research Methods Credits: 3
• BAS 491 - Applied Sciences Capstone Credits: 3

Concentration Requirements (27 credits)

Required Courses (9 credits):

• BULE 303 - Legal Environment of Business Credits: 3
• GOVT 301 - Public Law and the Judicial Process Credits: 3
• PHIL 311 - Philosophy of Law Credits: 3

Choose one of the following (3 credits):

• GOVT 422 - Constitutional Interpretation Credits: 3
• GOVT 423 - Constitutional Law: Civil Rights and Liberties Credits: 3

Choose 15 credits from the following:

• COMM 475 - Journalism Law Credits: 3
• GOVT 307 - Legislative Behavior Credits: 3
• GOVT 420 - American Political Thought Credits: 3
• GOVT 446 - International Law and Organization Credits: 3
• GOVT 452 - Administrative Law and Procedures Credits: 3
• INTS 304 - Social Movements and Community Activism Credits: 4
• INTS 305 - Conflict Resolution and Transformation Credits: 6
• INTS 362 - Social Justice and Human Rights Credits: 3
• SOCI 301 - Criminology Credits: 3
• SOCI 302 - Sociology of Delinquency Credits: 3
• SOCI 471 - Prevention and Deterrence of Crime Credits: 3

Electives (variable)

All BAS students are required to complete a minimum of 120 credit hours of coursework. Students will work with their advisor to determine how to fulfill their outstanding credit hours to ensure they have met all major and university requirements. The number of elective credits that a BAS student may have available will vary by concentration and the amount of applicable transfer coursework the student has been awarded.

▲ Concentration in Technology and Innovation (TCNV)

This concentration is in collaboration with School of Business and Volgenau School of Engineering.

Core Requirements (10 credits)
Concentration Requirements (30 credits)

All courses for this concentration are available in an online format with most offered as asynchronous delivery.

- IT 106 - Introduction to IT Problem Solving Using Computer Programming Credits: 3 *
- IT 213 - Multimedia and Web Design Credits: 3 *
- IT 214 - Database Fundamentals Credits: 3 *
- IT 223 - Information Security Fundamentals Credits: 3
- IT 304 - IT in the Global Economy Credits: 3
- MBUS 300 - Accounting in a Global Economy Credits: 3
- MBUS 301 - Managing People and Organizations in a Global Economy Credits: 3
- MBUS 302 - Managing Information in a Global Economy Credits: 3
- MBUS 303 - Marketing in a Global Economy Credits: 3
- MBUS 305 - Introduction to International Business Credits: 3

*Note

The Information Sciences and Technology department offers 1-credit, self-paced, online review courses; ending with an in-class final exam. Students who register for a 1-credit course and successfully pass will receive credit (not a waiver) for the corresponding 3-credit course. Students who are not successful must take the respective course at Mason to meet their degree requirements.

Review courses are available as follows:

- for IT 106: IT 196 - Review of IT Problem Solving Using Computer Programming Credits: 1
- for IT 213: IT 193 - Review of Multimedia and Web Design Credits: 1
- for IT 214: IT 194 - Review of Database Fundamentals Credits: 1

Electives (variable)

All BAS students are required to complete a minimum of 120 credit hours of coursework. Students will work with their advisor to determine how to fulfill their outstanding credit hours to ensure they have met all major and university requirements. The number of elective credits that a BAS student may have available will vary by concentration and the amount of applicable transfer coursework the student has been awarded.

Total: 120-126 credits
Mason Core

Janette Kenner Muir, Associate Provost for Undergraduate Education
Office of the Provost
Phone: 703-993-8722
Web: masoncore.gmu.edu

All undergraduates seeking a baccalaureate degree must complete the Mason Core requirements. Additional requirements for specific degree programs can be found in the college or school sections of this catalog. At Mason, we have created several distinctive ways to develop your liberal education: the Mason Core, detailed in the following pages, and, for a small group of outstanding students, the Honors College.

The Mason Core at Mason

George Mason University, in fall 2013, approved a new Vision Statement that articulates the characteristics important for any student graduating with a Mason degree. The Mason Graduate should be: an engaged citizen, a well-rounded scholar, and someone who is prepared to act for the world. In 2014, the Mason Core was created to reframe the university general education program to better illuminate the full range of coursework that prepares students for work in their major and to align with the Mason Graduate goals. In essence, the Mason Core is the foundational aspect of a student's academic career.

Beginning in Fall 2016 with the entering freshman class, the Mason Core: Engagement Series (ENCORE) will provide an optional pathway for students interested in combining academic coursework with co-curricular activities towards a completion certificate in a specific area of engagement.

The Mason Core is comprised of elements important to all students pursuing a liberal arts education that map to the key characteristics of the Mason Graduate. The Core consists of two major areas: general education requirements and a writing intensive course in one's major. These courses are designed to complement work in a student's chosen area of study. The classes serve as a means of discovery for students, providing a foundation for learning, connecting to potential new areas of interest and building tools for success in whatever field a student pursues. Learning outcomes are guided by the qualities every student should develop as they move toward graduating with a George Mason University bachelor's degree. Through a combination of courses and experiences, the Mason Core is designed to help student become:

Critical and Creative Scholars

Students who have a love of and capacity for learning. Their understanding of fundamental principles in a variety of disciplines, and their mastery of quantitative and communication tools, enables them to think creatively and productively. They are inquisitive, open-minded, capable, informed, and able to integrate diverse bodies of knowledge and perspectives.

Self-Reflective Learners

Students who develop the capacity to think well. They can identify and articulate individual beliefs, strengths and weaknesses, critically reflect on these beliefs and integrate this understanding into their daily living.

Ethical, Inquiry-Based Citizens

Students who are tolerant and understanding. They can conceptualize and communicate about problems of local, national and global significance, using research and evaluative perspectives to contribute to the common good.

Thinkers and Problem-Solvers
Students who are able to discover and understand natural, physical, and social phenomena; who can articulate their application to real world challenges; and who approach problem-solving from various vantage points. They can demonstrate capability for inquiry, reason, and imagination and see connections in historical, literary and artistic fields.

Mason Core Requirements

The Mason Core is divided into three sections: foundation, core and synthesis. Each section contains courses that have specific learning outcomes for students and are assessed on a regular basis.

Foundation Requirements (15-19 credits)

- Written Communication (6 credits)
- Oral Communication (3 credits)
- Quantitative Reasoning (3 credits)
- Information Technology (3-7 credits)

Core Requirements (22 credits)

- Arts (3 credits)
- Global Understanding (3 credits)
- Literature (3 credits)
- Natural Science (7 credits)
- Social and Behavioral Sciences (3 credits)
- Western Civilization/World History (3 credits)

Synthesis or Capstone Experience Requirement (varies; minimum 3 credits)

Total: 40 credits

Writing-Intensive Course Requirement

As part of the university's commitment to student writers in all undergraduate programs, at least one upper-division course in each major has been designated as fulfilling the "writing intensive" (WI) requirement. While other courses in the major may require written projects, teachers of the designated WI courses will devote class time to instruction on how to complete assignments successfully, assign and grade a minimum of 3500 words, provide constructive feedback on drafts, and allow revision of at least one graded assignment. See the description of each major for the specific course or courses that fulfill the WI requirement; select the following for a complete list:

- Writing-Intensive Courses
Mason Core: Foundation Requirements

Foundation Requirements (15-22 credits)

Foundation requirements help ensure that students master the tools and techniques necessary to succeed in college and throughout their lives and careers. These courses emphasize skills—in writing, speaking, and working with numbers and technology—that can be applied to any major field of study and career goal.

- Written Communication (6 credits)
- Oral Communication (3 credits)
- Quantitative Reasoning (3 credits)
- Information Technology (minimum 3 credits)

Note: The course list reflects approved courses as of press time. For the most current list, go to masoncore.gmu.edu/general-education-at-mason-2/

Written Communication (6 credits: 3 lower, 3 upper)

Learning Outcomes:

Students develop the ability to use written communication as a means of discovering and expressing ideas and meanings: in short, employing writing as a way of thinking. Students begin this process at the fundamental level in English 101 (100 for ESL students) and build higher-level skills in English 302. Writing will be emphasized in many courses throughout a student's career, and at least one course in every student's major is designated "writing intensive."

Required: The following courses as well as an approved writing-intensive course in the major.

- ENGH 100 - Composition for Non-native Speakers of English Credits: 4 or ENGH 101 - Composition Credits: 3
- ENGH 302 - Advanced Composition Credits: 3

Oral Communication (3 credits)

Learning Outcomes:

1. Students will demonstrate understanding of and proficiency in constructing and delivering multiple message types.
2. Students will understand and practice effective elements of ethical verbal and nonverbal communication.
3. Students will develop analytical skills and critical listening skills.
4. Students will understand the influence of culture in communication and will know how to cope with cultural differences when presenting information to an audience. Students develop the ability to use oral communication as a way of thinking and learning, as well as sharing ideas.

Required: One approved course. Students will be expected to continue developing oral communication skills in additional Mason Core courses as appropriate.

- COMM 100 - Public Speaking Credits: 3 or COMM 101 - Interpersonal and Group Interaction Credits: 3

Quantitative Reasoning (3 credits)
Learning Outcomes:

1. Students are able to interpret quantitative information (i.e., formulas, graphs, tables, models, and schematics) and draw inferences from them.
2. Given a quantitative problem, students are able to formulate the problem quantitatively and use appropriate arithmetical, algebraic, and/or statistical methods to solve the problem.
3. Students are able to evaluate logical arguments using quantitative reasoning.
4. Students are able to communicate and present quantitative results effectively.

Required: One approved course.

- MATH 106 - Quantitative Reasoning Credits: 3
- MATH 108 - Introductory Calculus with Business Applications Credits: 3
- MATH 110 - Introductory Probability Credits: 3
- MATH 111 - Linear Mathematical Modeling Credits: 3
- MATH 113 - Analytic Geometry and Calculus I Credits: 4
- MATH 115 - Analytic Geometry and Calculus I (Honors) Credits: 4
- MATH 123 - Calculus with Algebra/Trigonometry, Part A Credits: 3 and MATH 124 - Calculus with Algebra/Trigonometry, Part B Credits: 3
- MATH 125 - Discrete Mathematics I Credits: 3
- SOCI 313 - Statistics for the Behavioral Sciences Credits: 4
- STAT 250 - Introductory Statistics I Credits: 3

Information Technology (minimum 3 credits)

Learning Outcomes:

Almost no area of academic, professional, or personal life is untouched by the information technology revolution. Success in college and beyond requires computer and information literacies that are flexible enough to change with a changing IT environment and adaptable to new problems and tasks.

The purpose of the information technology requirement is to ensure that students achieve an essential understanding of information technology infrastructure encompassing systems and devices; learn to make the most of the Web and other network resources; protect their digital data and devices; take advantage of latest technologies; and become more sophisticated technology users and consumers.

Courses meeting the "IT only" requirement must address learning outcomes 1 and 2, and one additional outcome. Courses meeting "IT with Ethics component" must address outcomes 1, 2, 3, and 5. Courses meeting the only IT Ethics component must address outcomes 3 and 5.

1. Students will be able to use technology to locate, access, evaluate, and use information, and appropriately cite resources from digital/electronic media.
2. Students will understand the core IT concepts in a range of current and emerging technologies and learn to apply appropriate technologies to a range of tasks.
3. Students will understand many of the key ethical, legal and social issues related to information technology and how to interpret and comply with ethical principles, laws, regulations, and institutional policies.
4. Students will demonstrate the ability to communicate, create, and collaborate effectively using state-of-the-art information technologies in multiple modalities.
5. Students will understand the essential issues related to information security, how to take precautions and use techniques and tools to defend against computer crimes.

Required: One approved 3-credit course that meets all IT requirements, or completion of an appropriate combination of courses, proficiency exams, and modules.
Courses meeting all IT requirements:

- ANTH 395 - Work, Technology, and Society: An IT Perspective Credits: 3
- CDS 130 - Computing for Scientists Credits: 3
- CS 100 - Principles of Computing Credits: 3
- GOVT 300 - Research Methods and Analysis Credits: 4
- HIST 390 - The Digital Past Credits: 3
- IT 104 - Introduction to Computing Credits: 3
- MIS 303 - Introduction to Business Information Systems Credits: 3
- MUSI 259 - Music in Computer Technology Credits: 3

Courses meeting all requirements except ethics:

- AVT 180 - New Media in the Creative Arts Credits: 3
- CS 112 - Introduction to Computer Programming Credits: 4
- PHYS 251 - Introduction to Computer Techniques in Physics Credits: 3
- SOCI 410 - Social Surveys and Attitude and Opinion Measurements Credits: 3

The following must be taken in sequence:

- PSYC 300 - Statistics in Psychology Credits: 4
- PSYC 301 - Research Methods in Psychology Credits: 3
- PSYC 372 - Physiological Psychology Credits: 3

Courses meeting only ethics requirements:

- CDS 151 - Data Ethics in an Information Society Credits: 1
- CEIE 409 - Professional Practice and Management in Engineering Credits: 1
- CS 105 - Computer Ethics and Society Credits: 1
- ENGR 107 - Introduction to Engineering Credits: 2
- IT 304 - IT in the Global Economy Credits: 3
- PHIL 112 - Ethics and the Cybersociety Credits: 1

Total: 15-22 credits
Mason Core: Core Requirements

Core Requirements (22 credits)

Core requirements help ensure that students become acquainted with the broad range of intellectual domains that contribute to a liberal education. By experiencing subject matter and ways of knowing in a variety of fields, students will be better able to synthesize new knowledge, respond to fresh challenges, and meet the demands of a complex world.

- Arts (3 credits)
- Global Understanding (3 credits)
- Literature (3 credits)
- Natural Science (7 credits)
- Social and Behavioral Science (3 credits)
- Western Civilization/World History (3 credits)

The course list reflects approved courses as of press time. For the most current list, go to masoncore.gmu.edu/general-education-at-mason-2/

Note: Beginning Fall 2014, certain courses within the Mason Core can count for more than one category, if approved by the Mason Core committee. Students will be allowed to double count two courses (up to six credit hours) to fulfill their Mason Core requirements. Courses that qualify for double counting will be listed in their individually approved sections. Students may not double count credits in Oral Communication, Written Communication, or Quantitative Reasoning categories.

Arts (3 credits)

Mason courses in the film making, visual and performing arts stress generative, inquiry based learning through direct aesthetic and creative experience in the studio environment. Art history courses address the intrinsic relationship of personal and cultural creativity, and the manifestation of aesthetics, visual culture and visual narrative within historical contexts.

Learning Outcomes:

Students who successfully complete a course in the Arts category must meet the first learning outcome and a minimum of two of the remaining four learning outcomes:

1. Demonstrate an understanding of the relationship between artistic process, and a work's underlying concept, and where appropriate, contexts associated with the work.
2. Identify and analyze the formal elements of a particular art form using vocabulary and critique appropriate to that form.
3. Analyze cultural productions using standards appropriate to the form, as well as the works cultural significance and context.
4. Analyze and interpret the content of material or performance culture through its social, historical, and personal contexts.
5. Engage in generative artistic processes, including conception, creation, and ongoing critical analysis.

Required: One approved course.

- ARTH 101 - Introduction to the Visual Arts Credits: 3
- ARTH 102 - Symbols and Stories in Art Credits: 3
- ARTH 103 - Introduction to Architecture Credits: 3
- ARTH 200 - History of Western Art I Credits: 3
• ARTH 201 - History of Western Art II Credits: 3
• ARTH 203 - Survey of Asian Art Credits: 3
• ARTH 204 - Survey of Latin American Art Credits: 3
• ARTH 321 - Greek Art and Archaeology Credits: 3
• ARTH 322 - Roman Art and Archaeology Credits: 3
• ARTH 324 - From Alexander the Great to Cleopatra: The Hellenistic World Credits: 3
• ARTH 333 - Early Christian and Byzantine Art Credits: 3
• ARTH 334 - Western Medieval Art Credits: 3
• ARTH 335 - Arts of Medieval England Credits: 3
• ARTH 340 - Early Renaissance Art in Italy, 1300-1500 Credits: 3
• ARTH 341 - Northern Renaissance Art Credits: 3
• ARTH 342 - High Renaissance Art in Italy, 1480–1570 Credits: 3
• ARTH 344 - Baroque Art in Italy, France, and Spain, 1600–1750 Credits: 3
• ARTH 345 - Northern Baroque Art, 1600-1750 Credits: 3
• ARTH 360 - Nineteenth-Century European Art Credits: 3
• ARTH 362 - Twentieth-Century European Art Credits: 3
• ARTH 370 - Arts of the United States Credits: 3
• ARTH 372 - Studies in 18th- and 19th-Century Art of the United States Credits: 3
• ARTH 373 - Studies in 20th-Century Art of the United States Credits: 3
• ARTH 376 - Twentieth-Century Latin American Art Credits: 3
• AVT 103 - Introduction to the Artist's Studio Credits: 3
• AVT 104 - Two-Dimensional Design and Color Credits: 4
• AVT 215 - Typography Credits: 4
• AVT 222 - Drawing I Credits: 4
• AVT 232 - Painting I Credits: 4
• AVT 243 - Printmaking I Credits: 4
• AVT 252 - Fundamentals of Photography Credits: 4
• AVT 253 - Introduction to Digital Photography Credits: 4
• AVT 262 - Sculpture I Credits: 4
• AVT 272 - Interdisciplinary Arts Credits: 4
• AVT 385 - EcoArt Credits: 3
• DANC 101 - Dance Appreciation Credits: 3
• DANC 119 - Dance in Popular Culture: Afro-Latino Dance Credits: 3
• DANC 125 - Modern/Contemporary Dance I Credits: 3
• DANC 131 - Beginning Jazz Technique Credits: 3
• DANC 145 - Ballet I Credits: 3
• DANC 161 - Beginning Tap Dance Credits: 3
• DANC 225 - Modern/Contemporary Dance II Credits: 3
• DANC 231 - Intermediate Jazz Technique Credits: 3
• DANC 245 - Ballet II Credits: 3
• DANC 301 - What is Dance? Credits: 3
• DANC 325 - Modern/Contemporary Dance III Credits: 1-3
• DANC 331 - Advanced Jazz Dance Credits: 3
• DANC 345 - Ballet III Credits: 1-3
• DANC 425 - Modern/Contemporary Dance IV Credits: 1-3
• DANC 445 - Ballet IV Credits: 1-3
• DANC 390 - Dance History I Credits: 3
• DANC 391 - Dance History II Credits: 3
• ENGH 370 - Introduction to Documentary Credits: 3
• ENGH 371 - Television Studies Credits: 3
• ENGH 372 - Introduction to Film Credits: 3
• ENGH 396 - Introduction to Creative Writing Credits: 3
• FAVS 225 - The History of World Cinema Credits: 3
• GAME 101 - Introduction to Game Design Credits: 3
• MUSI 100 - Fundamentals of Music Credits: 3
• MUSI 101 - Introduction to Classical Music Credits: 3
• MUSI 102 - Popular Music in America Credits: 3
• MUSI 107 - Jazz and Blues in America Credits: 3
• MUSI 280 - Athletic and Ceremonial Ensemble Credits: 0-1
• MUSI 301 - Music in Motion Pictures Credits: 3
• MUSI 302 - American Musical Theater Credits: 3
• MUSI 380 - Wind Symphony Credits: 1
• MUSI 381 - University Chorale Credits: 1
• MUSI 382 - Piano Ensemble Credits: 1
• MUSI 383 - Symphonic Band Credits: 1
• MUSI 384 - Symphonic Chorus Credits: 1
• MUSI 385 - Chamber Singers Credits: 1
• MUSI 387 - Symphony Orchestra Credits: 1
• MUSI 389 - Jazz Ensemble Credits: 1
• MUSI 485 - Chamber Ensembles Credits: 1
• PHIL 156 - What Is Art? Credits: 3
• THR 101 - Theatrical Medium Credits: 3
• THR 150 - Greeks to Restoration Credits: 3
• THR 151 - Romanticism to Present Credits: 3
• THR 210 - Acting I Credits: 3
• THR 230 - Fundamentals of Production Credits: 3
• THR 395 - Theater as the Life of the Mind Credits: 3
• THR 411 - Great Film Directors Credits: 3
• THR 412 - Great Film Performances Credits: 3

Global Understanding (3 credits)

Learning Outcomes:

The goals of Global Understanding are accomplished through disciplinary or inter-disciplinary study with the following three learning outcomes:

1. Demonstrate understanding of global patterns and processes;
2. Demonstrate understanding of the interconnectedness, difference, and diversity of a global society;
3. Explore individual and collective responsibilities within a global society through analytical, practical, or creative responses to problems or issues, using resources appropriate to the field.

Required: One approved course.

• ANTH 302 - Peoples and Cultures of Latin America Credits: 3
• ANTH 306 - Peoples and Cultures of Island Asia Credits: 3
• ANTH 307 - Ancient Mesoamerica Credits: 3
• ANTH 308 - Peoples and Cultures of the Middle East Credits: 3
• ANTH 309 - Peoples and Cultures of India Credits: 3
• ANTH 312 - Political Anthropology Credits: 3
• ANTH 313 - Myth, Magic, and Mind Credits: 3
• ANTH 316 - Peoples and Cultures of the Caribbean Credits: 3
• ANTH 331 - Refugees Credits: 3
• ANTH 332 - Cross-Cultural Perspectives on Globalization Credits: 3
• ARTH 319 - Art and Archaeology of the Ancient Near East Credits: 3
• ARTH 320 - Art of the Islamic World Credits: 3
• ARTH 380 - African Art (Topic Varies) Credits: 3
• ARTH 382 - Arts of India Credits: 3
• ARTH 383 - Arts of Southeast Asia Credits: 3
• ARTH 384 - Arts of China Credits: 3
• ARTH 385 - Arts of Japan Credits: 3
• ARTH 386 - The Silk Road Credits: 3
• BUS 200 - Global Environment of Business Credits: 3
• CEIE 100 - Environmental Engineering around the World Credits: 3
• COMM 305 - Foundations of Intercultural Communication Credits: 3
• COMM 456 - Comparative Mass Media Credits: 3
• CRIM 405 - Law and Justice around the World Credits: 3
• DANC 118 - World Dance Credits: 3
• DANC 318 - Global Perspectives: World Dance Forms Credits: 3

• RELI 374 - Islamic Thought Credits: 3
• RUSS 354 - Contemporary Post-Soviet Life Credits: 3
• SOCI 120 - Globalization and Society Credits: 3
• SOCI 320 - Social Structure and Globalization Credits: 3
• SOCI 332 - The Urban World Credits: 3
• SPAN 322 - Introduction to Latin American Culture Credits: 3
• SPAN 466 - Latin American Civilization and Culture Credits: 3
• SYST 202 - Engineering Systems in a Complex World Credits: 3
• THR 359 - World Stages Credits: 3
• TOUR 210 - Global Understanding through Travel and Tourism Credits: 3
• WMST 100 - Representations of Women Credits: 3

Literature (3 credits)

Learning Outcomes:

1. Students will be able to read for comprehension, detail, and nuance.
2. Identify the specific literary qualities of language as employed in the texts they read.
3. Analyze the ways specific literary devices contribute to the meaning of a text.
4. Identify and evaluate the contribution of the social, political, historical, and cultural contexts in which a literary text is produced.
5. Evaluate a critical argument in others’ writing as well as one’s own.

Required: One approved course.

• ARAB 325 - Major Arab Writers/Stories Credits: 3
Natural Science (7 credits total)

The Mason Core natural sciences courses engage students in scientific exploration; foster their curiosity; enhance their enthusiasm for science; and enable them to apply scientific knowledge and reasoning to personal, professional and public decision-making. Lab courses must meet all five learning outcomes. Non-lab courses must meet learning outcomes 1 through 4.

**Learning Outcomes:**

1. Understand how scientific inquiry is based on investigation of evidence from the natural world, and that scientific knowledge and understanding: a) evolves based on new evidence, and b) differs from personal and cultural beliefs.
2. Recognize the scope and limits of science.
3. Recognize and articulate the relationship between the natural sciences and society and the application of science to societal challenges (e.g., health, conservation, sustainability, energy, natural disasters, etc.).
4. Evaluate scientific information (e.g., distinguish primary and secondary sources, assess credibility and validity of information).
5. Participate in scientific inquiry and communicate the elements of the process, including: a) making careful and systematic observations, b) developing and testing a hypothesis, c) analyzing evidence, and d) Interpreting results.

**Required:** Two approved science courses. At least one course will include laboratory experience.
Non-lab (3 credits):

- ANTH 135 - Introduction to Biological Anthropology Credits: 3
- ASTR 103 - Astronomy Credits: 3
- ASTR 302 - Foundations of Cosmological Thought Credits: 3
- BIOL 140 - Plants and People Credits: 3
- CHEM 101 - Introduction to Modern Chemistry Credits: 3
- CHEM 102 - Introduction to Organic, Biochemical, Pharmacological, and Fuel Chemistry Credits: 3
- CHEM 201 - Introductory Chemistry I Credits: 3
- CHEM 202 - Introductory Chemistry II Credits: 3
- CLIM 101 - Global Warming: Weather, Climate, and Society Credits: 3
- EVPP 201 - Environment and You: Issues for the Twenty-First Century Credits: 3
- GEOG 134 - Evolution and Extinction Credits: 3
- GGS 102 - Physical Geography Credits: 3
- NUTR 295 - Introduction to Nutrition Credits: 3
- PHYS 106 - The Quantum World: A Continuous Revolution in What We Know and How We Live Credits: 3
- PROV 301 - Great Ideas in Science Credits: 3

Lab (4 credits):

- ASTR 111 - Introductory Astronomy: The Solar System Credits: 3 and ASTR 112 - Introductory Astronomy Lab: The Solar System Credits: 1
- ASTR 113 - Introductory Astronomy: Stars, Galaxies, and the Universe Credits: 3 and ASTR 114 - Introductory Astronomy Lab: Stars, Galaxies, and the Universe Credits: 1
- ASTR 115 - Finding New Worlds Credits: 4
- BIOL 103 - Introductory Biology I Credits: 4
- BIOL 104 - Introductory Biology II Credits: 4
- BIOL 213 - Cell Structure and Function Credits: 4
- CDS 101 - Introduction to Computational and Data Sciences Credits: 3 and CDS 102 - Introduction to Computational and Data Sciences Lab Credits: 1
- CHEM 103 - Chemical Science in a Modern Society Credits: 4
- CHEM 104 - Introduction to Organic, Biochemical, Pharmacological, and Fuel Chemistry Credits: 4
- CHEM 155 - Introduction to Environmental Chemistry I Credits: 4
- CHEM 156 - Introduction to Environmental Chemistry II Credits: 4
- CHEM 211 - General Chemistry I Credits: 3 and CHEM 213 - General Chemistry Laboratory I Credits: 1
- CHEM 212 - General Chemistry II Credits: 3 and CHEM 214 - General Chemistry Laboratory II Credits: 1
- CHEM 251 - General Chemistry for Engineers Credits: 4
- CLIM 102 - Introduction to Global Climate Change Science Credits: 4
- CLIM 111 - Introduction to the Fundamentals of Atmospheric Science Credits: 3 and CLIM 112 - Introduction to the Fundamentals of Atmospheric Science Lab Credits: 1
- EVPP 110 - The Ecosphere: An Introduction to Environmental Science I Credits: 4
- EVPP 111 - The Ecosphere: An Introduction to Environmental Science II Credits: 4
- GEOL 101 - Introductory Geology I Credits: 4
- GEOL 102 - Introductory Geology II Credits: 4
- GGS 121 - Dynamic Atmosphere and Hydrosphere Credits: 4
- PHYS 103 - Physics and Everyday Phenomena I Credits: 4
- PHYS 104 - Physics and Everyday Phenomena II Credits: 4
• PHYS 111 - Introduction to the Fundamentals of Atmospheric Science Credits: 3 and PHYS 112 - Introduction to the Fundamentals of Atmospheric Science Lab Credits: 1
• PHYS 160 - University Physics I Credits: 3 and PHYS 161 - University Physics I Laboratory Credits: 1
• PHYS 243 - College Physics Credits: 3 and PHYS 244 - College Physics Lab Credits: 1
• PHYS 245 - College Physics Credits: 3 and PHYS 246 - College Physics Lab Credits: 1
• PHYS 260 - University Physics II Credits: 3 and PHYS 261 - University Physics II Laboratory Credits: 1
• PHYS 262 - University Physics III Credits: 3 and PHYS 263 - University Physics III Laboratory Credits: 1

Social and Behavioral Science (3 credits)

Learning Outcomes:

The following three learning outcomes are required goals of disciplinary or interdisciplinary courses:

1. Explain how individuals, groups or institutions are influenced by contextual factors;
2. Demonstrate awareness of changes in social and cultural constructs;
3. Use appropriate methods and resources to apply social and behavioral science concepts, terminology, principles and theories in the analysis of significant human issues, past or present.

Required: One approved course.

• AFAM 200 - Introduction to African American Studies Credits: 3
• ANTH 114 - Introduction to Cultural Anthropology Credits: 3
• ANTH 120 - Unearthing the Past: Prehistory, Culture and Evolution Credits: 3
• ANTH 135 - Introduction to Biological Anthropology Credits: 3
• ANTH 363 - Humans, Disease, and Death Credits: 3
• ANTH 372 - Cultures of Disaster, Risk, and Hope Credits: 3
• ANTH 396 - Issues in Anthropology: Social Sciences Credits: 3
• BUS 100 - Business and Society Credits: 3
• CONF 101 - Conflict and Our World Credits: 3
• CONS 410 - Human Dimensions in Conservation Credits: 3
• CRIM 100 - Introduction to Criminal Justice Credits: 3
• ECON 100 - Economics for the Citizen Credits: 3
• ECON 103 - Contemporary Microeconomic Principles Credits: 3
• ECON 104 - Contemporary Macroeconomic Principles Credits: 3
• ECON 105 - Environmental Economics for the Citizen Credits: 3
• ECON 367 - Money, Markets, and Economic Policy Credits: 3
• EDUC 203 - Disability in American Culture Credits: 3
• EDUC 372 - Human Development, Learning, and Teaching Credits: 3
• GGS 103 - Human Geography Credits: 3
• GOVT 101 - Democratic Theory and Practice Credits: 3
• GOVT 103 - Introduction to American Government Credits: 3
• GOVT 367 - Money, Markets and Economic Policy Credits: 3
• HEAL 230 - Introduction to Health Behavior Credits: 3
• HIST 121 - Formation of the American Republic Credits: 3
• HIST 122 - Development of Modern America Credits: 3
• LING 306 - General Linguistics Credits: 3
• PSYC 100 - Basic Concepts in Psychology Credits: 3
• PSYC 211 - Developmental Psychology Credits: 3
• PSYC 231 - Social Psychology Credits: 3
• SOCI 101 - Introductory Sociology Credits: 3
• SOCI 352 - Social Problems and Solutions Credits: 3
• SOCI 355 - Social Inequality Credits: 3
• TOUR 311 - Women and Tourism Credits: 3
• WMST 200 - Introduction to Women and Gender Studies Credits: 3

Western Civilization/World History (3 credits)

Learning Outcomes:

Courses must meet at least three of the five learning outcomes.

1. Demonstrate familiarity with the major chronology of Western civilization or world history.
2. Demonstrate the ability to narrate and explain long-term changes and continuities in Western civilization or world history.
3. Identify, evaluate, and appropriately cite online and print resources.
4. Develop multiple historical literacies by analyzing primary sources of various kinds (texts, images, music) and using these sources as evidence to support interpretation of historical events.
5. Communicate effectively—through speech, writing, and use of digital media—their understanding of patterns, process, and themes in the history of Western civilization or the world.

Required: One approved course.

• HIST 100 - History of Western Civilization Credits: 3 or HIST 125 - Introduction to World History Credits: 3

Transfer students may substitute one of the following for HIST 100

• HIST 101 - Foundations of Western Civilization Credits: 3
• HIST 102 - Development of Western Civilization Credits: 3
• HIST 301 - Classical Greece Credits: 3
• HIST 302 - Classical Rome Credits: 3
• HIST 304 - Western Europe in the Middle Ages Credits: 3
• HIST 305 - The Renaissance Credits: 3
• HIST 306 - The Reformation Credits: 3
• HIST 308 - Nineteenth-Century Europe Credits: 3
• HIST 309 - Europe in Crisis: 1914-1948 Credits: 3
• HIST 312 - Nationalism in Eastern Europe Credits: 3
• HIST 314 - History of Germany Credits: 3
• HIST 322 - Modern Britain Credits: 3
• HIST 388 - Topics in European History Credits: 3
• HIST 436 - European Society and Culture: 19th and 20th Centuries Credits: 3
• HIST 480 - Alexander the Great Credits: 3

Transfer students may substitute one of the following for HIST 125

• HIST 202 - Freshman/Sophomore Seminar in Global History Credits: 3
• HIST 387 - Topics in Global History Credits: 3-6
Total: 22 credits
Mason Core: Synthesis or Capstone Experience Requirement

Return to: Mason Core

- Synthesis Requirement

Synthesis or Capstone Experience Requirement (minimum 3 credits)

The purpose of the synthesis course is to provide students with the opportunity to synthesize the knowledge, skills and values gained from the Mason Core curriculum. Synthesis courses strive to expand students' ability to master new content, think critically, and develop life-long learning skills across the disciplines. While it is not feasible to design courses that cover "all" areas of general education, synthesis courses should function as a careful alignment of disciplinary goals with a range of Mason Core learning outcomes.

Many departments may require a Capstone Experience instead of a Synthesis course. Please see your major advisor to confirm which requirement you must complete.

Learning Outcomes for Synthesis:

The Mason Core synthesis course must address outcomes 1 and 2, and at least one outcome under 3. Upon completing a synthesis course, students will be able to:

1. Communicate effectively in both oral and written forms, applying appropriate rhetorical standards (e.g., audience adaptation, language, argument, organization, evidence, etc.)
2. Using perspectives from two or more disciplines, connect issues in a given field to wider intellectual, community or societal concerns
3. Apply critical thinking skills to:
   a. Evaluate the quality, credibility and limitations of an argument or a solution using appropriate evidence or resources, OR,
   b. Judge the quality or value of an idea, work, or principle based on appropriate analytics and standards

Required: One approved course.

Note: The course list reflects approved courses as of press time. For the most current list, go to masoncore.gmu.edu/general-education-at-mason-2/

- ANTH 400 - Engaging the World: Anthropological Perspectives Credits: 3
- ARTH 394 - The Museum Credits: 3
- AVT 385 - EcoArt

• SYST 495 - Senior Design Project II Credits: 3
• THR 440 - Advanced Studies in Directing/Dramaturgy Credits: 3
• THR 496 - Text in Production Credits: 3

Total: minimum 3 credits
Writing-Intensive Courses

The following courses have been approved to meet the writing-intensive requirement.

NOTE: students MUST select the course approved for their major. See specific degree program for details.

- ACCT 461 - Assurance and Audit Services Credits: 3
- ANTH 490 - Theories, Methods, and Issues II Credits: 3
- ARTH 400 - Historiography and Methods of Research in Art History (Topic Varies) Credits: 3
- ARTH 420 - Advanced Studies in Ancient Art Credits: 3
- ARTH 430 - Advanced Studies in Medieval or Islamic Art Credits: 3
- ARTH 440 - RS: Advanced Studies in Renaissance and Baroque Art Credits: 3
- ARTH 460 - RS: Advanced Studies in 20th-Century European Art Credits: 3
- ARTH 471 - Advanced Studies in Art of the United States Credits: 3
- ARTH 472 - RS: Advanced Studies in 20th-Century Latin American Art Credits: 3
- ARTH 474 - Advanced Studies in Contemporary Art Credits: 3
- ARTH 482 - RS: Advanced Studies in Asian Art Credits: 3
- ARTH 490 - Independent Study in Art History Credits: 3
- ARTH 491 - Independent Study in Art History Credits: 3
- ARTH 492 - Honors Directed Readings, Honors Directed Research Credits: 3
- ARTH 493 - Honors Directed Readings, Honors Directed Research Credits: 3
- ARTH 495 - RS: Objects and Archives in Art History Credits: 3
- ARTH 499 - Advanced Studies in Art History Credits: 3
- AVT 395 - Writing for Artists Credits: 3
- BENG 304 - Modeling and Control of Physiological Systems Credits: 3
- BENG 495 - Bioengineering Senior Seminar II Credits: 1
- BIOL 308 - Foundations of Ecology and Evolution Credits: 5
- BIS 390 - The Research Process Credits: 3
- CEIE 301 - Engineering and Economic Models in Civil Engineering Credits: 3
- CHEM 336 - Physical Chemistry Lab I Credits: 2
- CHEM 456 - Honors Research in Chemistry Credits: 3
- CHIN 480 - Fourth-Year Chinese I Credits: 3
- COMM 300 - Foundations of Public Communication Credits: 3
- CONF 302 - Culture, Identity, and Conflict Credits: 3
- CRIM 495 - Capstone in Criminology, Law and Society Credits: 3
- CS 306 - Synthesis of Ethics and Law for the Computing Professional Credits: 3
- CS 321 - Software Engineering Credits: 3
- DANC 390 - Dance History I Credits: 3
- ECE 333 - Linear Electronics I Credits: 3
- ECE 445 - Computer Organization Credits: 3
- ECE 491 - Engineering Seminar Credits: 1
- ECON 345 - Introduction to Econometrics Credits: 3
- ECON 355 - The Political Economy of Nonprofit Institutions Credits: 3

• SYST 489 - Senior Seminar Credits: 3
• THR 350 - Script Analysis Credits: 3
• THR 482 - Advanced Screenplay Workshop Credits: 3
Mason Core: Engagement Series (ENCORE)

The Mason Core Engagement Series (ENCORE)

Creating more opportunities for students to make meaning of the Mason Core educational offerings, to draw greater connections to the larger university community, and to develop additional marketable skill sets, the Mason Core Engagement Series (ENCORE) begins Fall 2016 with the entering freshmen class. This program is an optional pathway for students interested in combining academic coursework with co-curricular activities towards a completion certificate in a specific area of engagement.

How does the Engagement Series work?

Academic connections

Each ENCORE program combines courses within the Mason Core categories with co-curricular activities that enhance classroom learning. Courses are identified in the catalog and in the schedule of classes, enabling a student to select those relevant to the specific engagement series. Out of the approximately 40 credits of Mason Core requirements, at least 18 credits must be related to the relevant ENCORE program.

Co-curricular connections

Working in conjunction with University Life and the Patriot Experience, each Engagement Series maps to one of four pathways – career readiness, civic learning/community engagement, global/multicultural, or well-being.

What happens once the Engagement Series is completed?

After completing the Mason Core classes and the Patriot Experience pathway, students will earn a Mason Core completion certificate. This achievement will be recognized on the academic transcript and honored at graduation.

What programs are currently available?

Mason Core: Engagement Series - Sustainability

Sustainability programs at Mason seek to guide students as they critically assess the environmental, social, economic and ethical impacts of technology and policy decisions. The Engagement Series in Sustainability identifies Green Leaf Programs and Courses designated offerings that contribute significantly to students' understanding and practice of sustainability. These offerings extend beyond environmental management, natural resources protection and conservation studies alone to embrace economic development and social responsibility. Both sustainability-focused and sustainability-related courses may receive the green leaf designation.

Mason Core: Engagement Series - Well-Being

The ability to thrive and succeed as students, employees, organizations, and in life, directly correlates to one's sense of well-being. Mason has committed to being a "Well-Being University" focused on helping students, faculty and staff build lives with vitality, purpose, and resilience. The Engagement Series in Well-Being identifies offerings that contribute significantly to students' understanding and practice of well-being. These offerings include both well-being-focused and well-being-related courses that are designated in the catalog and in the schedule of classes.
Well-Being

Return to: Mason Core: Engagement Series (ENCORE)

Students who complete the Engagement Series in Well-Being will be able to:

1. Describe and apply methods to enhance interpersonal communication and empathy. This will help the student to create sustainable, quality relationships and social support networks, at a one-on-one and small group level.
2. Demonstrate skills for communication (written, oral, and/or somatic) about well-being.
3. Demonstrate the ability to practice methods to enhance well-being, self-care, self-awareness, and awareness of others.
4. Articulate societal factors impacting community and global well-being, and/or to engage in practices which build greater sensitivity to the needs of others and the inter-dependent nature of life on the earth.
5. Describe the science of stress and its effects – both constructive and destructive – as well as the methodologies used to respond to stress, promote resilience, and enhance well-being.

The following courses have been identified as meeting the criteria for inclusion in the Engagement Series in Well-Being curriculum. To complete the certification, students must select a minimum of 18 credits across the categories offered below. Please note, in several of these courses only specific sections will count for meeting the requirement. No substitutions will be made. Information on courses that count at the section level will be included in the Schedule of Classes, found on Patriot Web. The co-curricular section of the certificate is completed through the Patriot Experience, located at http://patriotexperience.gmu.edu.

*only well-being designated sections of the course may count to fulfill the requirement*
Sustainability

Return to: Mason Core: Engagement Series (ENCORE)

Students who complete the Engagement Series in Sustainability will be able to:

1. Characterize the meaning of sustainability (including its focus on fulfilling needs and its social, economic and ecological dimensions).
2. Distinguish sustainable from unsustainable human activities and practices.
3. Integrate concepts and principles of sustainability to analyze and address complex societal issues.
4. Present working knowledge of the University's sustainability history, goals, initiatives and pertinent decision-making processes.
5. Demonstrate the ability to lead and apply sustainability knowledge to make a positive societal impact on campus and/or in our community.

Requirements and approved courses

All students pursuing the sustainability engagement series must take one credit of INTS 295 - Field-Based Work Credits: 1-18 with the topic, 'Leadership for Sustainability,' as the series' gateway. Additional requirements include 18 credits of Mason Core courses that have the Green Leaf Programs and Courses designation. (At least 6 Mason Core categories include one or more Green Leaf course options.)

The following courses have been identified as meeting the criteria for inclusion in the Engagement Series in Sustainability curriculum. The co-curricular section of the certificate is completed through the Patriot Experience, located at http://patriotexperience.gmu.edu.

Programs

George Mason University offers academic Pathway and English language programs through the INTO Mason joint venture. Personalized support tailored to international students' educational, social, and cultural needs prepares them to progress with confidence as degree-seeking students. INTO Mason provides international students with learning experiences and services that promote academic, professional, and personal success.

Located in the Mason Global Center, INTO Mason supports the outstanding academic programs offered by the university with technology-assisted learning; a welcoming, interconnected community of students from across the U.S. and the world; strong student support programs; and state-of-the-art facilities. The innovative International Pathway and Academic English language programs offered at the Center are delivered by highly qualified Mason teaching faculty. INTO Mason also provides a breadth of academic preparation and support services designed specifically to meet the unique needs of its international students.

There are four programs administered through the INTO Mason joint venture:

- Undergraduate International Pathways Program
- Graduate International Pathways Program
- Academic English Program
- General English Program

Each program has a specific curriculum and guidelines as indicated on the special sections for each program in the catalog.

Facilities

All Undergraduate Pathway students and many Academic English students may live in the Mason Global Center for their first year. The Mason Global Center opened in August 2014 and is the primary home for INTO George Mason University. This community connects domestic and international students for academic, language, cultural, and social exchange. The building includes residential accommodations for up to 270 international and domestic students; 14 classrooms; 100+ computers; wireless Internet throughout the center; a learning resource center with study materials, books, DVDs, and periodicals; a dining facility; lounge areas for meetings and study groups; and open spaces for socializing.

Student Services
The INTO Mason Student Services team provides a range of co-curricular programs and services promoting academic, social, and personal well-being. Upon arrival at Mason, the team helps students settle in to life in Fairfax and provides social opportunities and a variety of resources tailored to the specific needs of international students.

**International Student Orientation**

Orientation involves a variety of important events that prepare students to be successful at Mason, including information about maintaining visa status, registering for Mason classes, health requirements, and insurance coverage. All students must attend the INTO Mason Student Orientation in order to enroll in classes.
INTO Mason - Academic English Program

Administered by INTO George Mason University's English Language Programs, the Academic English (AE) Program, prepares international students for university degree-seeking study in the United States. The AE Program is designed to develop the English skills needed for successful communication, cultural integration, and participation in the academic environment of the university. As a non-credit program, AE has unique academic policies that differ from degree- and non-degree seeking programs.

Admission

Students who apply to the AE Program must submit an application, application fee, and required documents through INTO Mason. In order to qualify for admission to the AE Program, students must demonstrate that they have earned at least a high school diploma.

Students have the option to apply for the AE or Pathway Program. Students who apply to the Pathway Program but do not demonstrate entry language requirements are given an individual pre-arrival study plan that provides an estimate of the number of Academic English terms to complete in order to fulfill Pathway entry requirements (AE+Pathway). This pre-arrival study plan is only an estimate; an updated post-arrival study plan with a minimum of one term of AE will be provided to AE+Pathway students after taking the INTO Mason Placement Test.

For more information about Pathway admission requirements, see Undergraduate International Pathways Program or Graduate International Pathways Program.

Program Outcomes

After successfully completing the upper level(s) of the Academic English program, students will be able to do the following:

- Interact comfortably in the U.S. classroom with professors and fellow students
- Understand U.S. values in an academic setting
- Present their spoken and written ideas accurately and effectively in English
- Write research papers with proper use of citations and references
- Use the Internet and Mason library databases to conduct academic research
- Read, understand, and critically evaluate academic texts
- Understand and use vocabulary common to academic disciplines
- Take useful and accurate notes in academic lectures and presentations
- Develop and deliver oral presentations

Program Structure

The Academic English Program is offered three terms per year: Fall (15 weeks of instruction), Spring (15 weeks of instruction), and Summer (10 weeks of instruction). Upon arrival, all Academic English students are given a language proficiency assessment to determine their AE level placement. In order to be eligible for full-time status, students must be enrolled in a minimum of 18 hours of non-credit AE coursework per week. AE courses are offered at eight levels of proficiency regularly throughout the year.
AE faculty are highly-qualified with significant teaching experience and masters and doctoral degrees in TESOL or other related fields. The program is also supported by academic advisors experienced in working with multilingual speakers of English and the Student Experience staff, who help students utilize university resources and engage in the Mason experience through opportunities to participate in campus and local community groups/programs.

**Curriculum**

In keeping with the current literature on second language acquisition and pedagogy, the Academic English curriculum is aligned with the Common European Framework of Reference scales (CEFR), American Council on The Teaching of Foreign Languages (ACTFL) Proficiency Guidelines 2012, and the Pearson Global Scale of English (GSE) Learning Objectives for Academic English. Curricular objectives and learning outcomes for each of the eight AE levels are geared toward an exit goal that is one level higher than the entrance level.

<table>

<td>A1+</td>
<td>Novice Mid</td>
</tr>
</tbody>
</table>

All students, regardless of level, take one Core, one Oral Communication Skills (OCS), and one or two Elective courses for a minimum of 18 classroom hours per week. Core courses focus on reading and writing with additional attention to written grammar and vocabulary. OCS courses focus on listening and speaking with additional attention to pronunciation and oral grammar and vocabulary. Elective courses offer students a variety of content-based and skills-based instruction and can be selected by students enrolled in appropriate co-requisite Core or OCS courses.

**Grading System for Academic English**

Throughout the semester, students are assessed on how well they have met curricular learning outcomes. Midterm and final grades for all Academic English courses are submitted to the University as letter grades.

<table>
<thead>
<tr>
<th>Letter Grade</th>
<th>Percent Grade</th>
<th>Quality Points</th>
<th>Type</th>
</tr>
</thead>
<tbody>
<tr>
<td>A+</td>
<td>97-100</td>
<td>4.00</td>
<td>Passing</td>
</tr>
<tr>
<td>A</td>
<td>93-96</td>
<td>4.00</td>
<td>Passing</td>
</tr>
</tbody>
</table>
In Core and OCS courses, students must receive a passing final grade (A+, A, A-, B+, B, or B-) in order to advance to the next level of Core/OCS. If a student has performed exceptionally well in Core/OCS, the instructor may submit an AE Level Skip Form requesting that the student skip a Core/OCS level in the subsequent semester.

Program-to-Program Progression

In order for an AE+Pathway student to progress to his/her planned pathway, the student must earn for the most current AE semester a 2.5 or higher term GPA and a final passing grade (A+, A, A-, B+, B, or B-) of specified levels of Core and OCS. AE only students must meet the same language requirements for progression and submit other documentation as required by the prospective pathway.

AE students applying for direct admission to George Mason University must earn a final passing grade (A+, A, A-, B+, B, or B-) of specified levels of Core and OCS to meet entry language proficiency requirements.

AE Language Requirements for INTO Mason Pathway and Mason Direct Admission

<table>
<thead>
<tr>
<th>Program</th>
<th>Language Requirement 1</th>
<th>Language Requirement 2</th>
<th>Language Requirement 3</th>
</tr>
</thead>
<tbody>
<tr>
<td>Undergraduate Standard Pathway</td>
<td>Passing grade in AE 040: Level 4 Core</td>

<td>AE Term GPA ≥ 2.5</td>
</tr>
</tbody>
</table>
Undergraduate Accelerated Pathway
- Passing grade in AE 050: Level 5 Core
- Passing grade in AE 051: Level 5 OCS
- AE Term GPA ≥ 2.5

Direct Undergraduate Admission
- Passing grade in AE 060: Level 6 Core
- Passing grade in AE 061: Level 6 OCS

Graduate Standard Pathway
- Passing grade in AE 050: Level 5 Core
- Passing grade in AE 051: Level 5 OCS
- AE Term GPA ≥ 2.5

Graduate Accelerated Pathway
- Passing grade in AE 060: Level 6 Core
- Passing grade in AE 061: Level 6 OCS
- AE Term GPA ≥ 2.5

Direct Graduate Admission
- Passing grade in AE 070: Level 7 Core
- Passing grade in AE 071: Level 7 OCS

* Information in the chart above only shows program eligibility based on language proficiency requirements met.

Academic English students may not level skip into a pathway or direct admission the following semester. Even if a student is approved to skip into an Academic English level beyond what is required for the pathway or direct admission, the student must complete the subsequent semester in the AE Program. Students also have the option of submitting official TOEFL/IELTS/PTE Academic scores to George Mason University in lieu of meeting the AE program-to-program progression requirements, but must still maintain good standing in the AE Program.

**Attendance and Academic Probation**

In order to make progress in developing academic language skills, students are expected to attend classes regularly and remain in good academic standing.

**Attendance**

Students with excessive absences in a course (more than 15%) will automatically receive an NG as a final course grade:

<table>
<thead>
<tr>
<th>Term</th>
<th>Meetings/Wk</th>
<th>Course</th>
<th>Absences</th>
<th>Course Grade</th>
</tr>
</thead>
<tbody>
<tr>
<td>15-weeks: Fall, Spring</td>
<td>5x</td>
<td>Core</td>

<td>Core</td>
<td>8 or more</td>
<td></td>
</tr>
<tr>
<td></td>
<td>4x</td>
<td>OCS</td>
<td>6 or more</td>
<td></td>
</tr>
</tbody>
</table>

A final grade of NG in an AE course will result in probation and/or termination from the AE Program and George Mason University:
A student receives a final grade of NG for excessive absences in any course.

The student receives an e-mail and hand-delivered letter from INTO Mason Academic Services stating that s/he is on Attendance Probation for the next semester. Before being permitted to register for AE classes, the student must meet with an INTO Mason Academic Advisor and sign an Attendance Probation contract. Students who refuse the contract or who violate the conditions of the contract will be dismissed immediately. Students who follow the terms of the contract and complete a successful semester will be removed from Academic Probation and considered in good standing.

A student on probation receives an NG for excessive absences in any course.

The student is terminated from the AE Program and George Mason University.

**Academic Progress**

Students are expected to make satisfactory progress in developing their language skills and may not attempt the same Core or OCS course more than three times. Academic progress is determined primarily through term GPA. Students whose GPAs fall below 2.5 will be given a warning, placed on probation, and/or terminated from the AE Program and George Mason University:

<table>
<thead>
<tr>
<th>A student earns a term GPA below 2.5.</th>
<th>INTO Mason Academic Services e-mails the student that s/he is on Academic Warning for the next semester.</th>
</tr>
</thead>
<tbody>
<tr>
<td>A student on Academic Warning earns a term GPA below 2.5.</td>
<td>The student receives an e-mail and hand-delivered letter from INTO Mason Academic Services stating that s/he is on Academic Probation for the next semester. Before being permitted to register for AE classes, the student must meet with an INTO Mason Academic Advisor and sign an Academic Probation contract. Students who refuse the contract or who violate the conditions of the contract will be dismissed immediately. Students who follow the terms of the contract and complete a successful semester will be removed from Academic Probation and considered in good standing.</td>
</tr>
<tr>
<td>A student on Academic Probation earns a term GPA below 2.5.</td>
<td>The student is terminated from the AE Program and George Mason University.</td>
</tr>
</tbody>
</table>

**Termination Appeals Process - INTO Mason students only**

All termination appeals must be submitted in writing to the INTO Mason Academic Services office located in the Mason Global Center within 14 days of notification. Requests should provide an explanation and supplementary documentation. Students who fail to meet the program requirements after an additional semester will be reviewed for termination from the university.

Decisions on these requests are reviewed and approved at the discretion of the Academic Director. In some cases, additional reviews by the Associate Provost for Undergraduate Education may also be required.

**Reenrollment and Readmission**
Academic English students who do not enroll after the first term or withdraw for reasons other than poor academic performance (e.g., spring and fall) must apply for readmission to the program and be reassessed for language proficiency upon return.
INTO Mason - Undergraduate International Pathways Program

Return to: INTO Mason
Phone: 703-993-4501
Fax: 703-993-4502
Email: INTOmason@gmu.edu
Website: www.intohigher.com/mason

The Undergraduate International Pathway Program combines academic coursework, English language support, and academic skills development in a carefully constructed program designed to prepare students for rigorous Mason degree programs. For most students, participation in the pathway program will not add more time to the completion of their bachelor's degree.

Two types of undergraduate pathways are available:

- **Standard Pathway (2 terms):** This program is designed to lead students through their first year of study. Upon completion of all progression requirements, students will move on to their degree-seeking program as second-year, freshman (up to 29 credits) or as sophomore students (30 or more credits).

- **Accelerated Pathway (1 term):** This program is composed of one term of Pathway study. Upon completion of all progression requirements, students will move on to their degree-seeing program as second semester freshmen (up to 16 credits).

The Undergraduate International Pathway Program is designed for students who:

- Desire to study for an undergraduate degree in the U.S.
- Need to improve their English language skills
- May have slightly lower GPAs than required of direct-entry students
- Desire additional academic, language, and cultural support in order to succeed during their first year at a U.S. university
- Any or all of the above

Offered through INTO Mason in partnership with the academic units across the university, the courses in the Undergraduate International Pathway program are taught by highly qualified Mason instructional faculty members and supported by pathway academic advisors.

**Admission**

Admission to the Undergraduate International Pathway Program is offered to international and multilingual students by two methods:

- Students may apply directly through the INTO Mason admissions process OR
- By referral from the University Admissions Office due to not having met the grade point average, English language proficiency, or other requirements for direct admission.

The Undergraduate International Pathway Program entry requirements are as follows:

- High school diploma
- 2.5 minimum high school GPA equivalent based on the applicant's country/institutional scale
- Documentation demonstrating the minimum English language proficiency levels:
  - Standard Pathway:
    - TOEFL iBT 60 (13 minimum subscores in reading and listening)
IELTS 5.5 (5.5 minimum subscores in reading and listening)
- PTE Academic 45
- Successful completion of or waiver from Academic English Level 4
  - Accelerated Pathway:
    - TOEFL iBT 80 (17 minimum subscores in reading and writing)
    - IELTS 6.5 (6.0 minimum subscores in reading and writing)
    - PTE Academic 53
    - Successful completion of or waiver from Academic English Level 5

Students should review the specific requirements by Pathway at www.intohigher.com/mason for details.

Available Pathway & Majors

There are five undergraduate pathways available:

- Business, leading to 5 undergraduate majors in the School of Business
- Engineering and Computing, leading to 10 undergraduate majors in the Volgenau School of Engineering
- Humanities and Social Sciences, leading to 21 undergraduate majors in the College of Humanities and Social Sciences and the College of Visual and Performing Art's School of Music
- Human and Social Development, leading to 7 undergraduate majors in the College Health and Human Services, the College of Education and Human Development's School of Recreation and Tourism, and the School of Conflict Analysis and Resolution
- Science, leading to 13 undergraduate majors in the College of Science

Each pathway allows students to progress to preapproved undergraduate degree programs. For a full listing of specific academic programs associated with a specific Pathway, students should refer to www.intohigher.com/mason for specific pathway program requirements.

Curriculum

The program curricula comprise a combination of Mason Core, major requirements, and English for Academic Purposes courses.

All Pathways include the following core course(s):

- Enhanced Composition For Multilingual Writers of English (4-6 credits)
  - ENGH 100 - Composition for Non-native Speakers of English Credits: 4
  - ENGH 121 - Enhanced Composition For Multilingual Writers of English I Credits: 3
  - ENGH 122 - Enhanced Composition For Multilingual Writers of English II Credits: 3
- COMM 100 - Public Speaking Credits: 3
- EAP 103 - Language Support for Public Speaking Credits: 1
- PROV 105 - American Cultures Credits: 3
- EAP 102 - Language Support for American Cultures Credits: 1
- UNIV 140 - INTO Mason Pathway Transition Credits: 0-1 / UNIV 141 - INTO Mason Pathway Extended Transition Credits: 0-1
- EAP 120 - Linguistics Capstone Credits: 0

In addition to the core coursework, students will also take:

- Appropriate coursework toward undergraduate program of study (3 - 10 credits)
- Additional language support courses (1 – 2 credits)
  - EAP 104 - Language Support World History Credits: 1
  - EAP 108 - Language Support for Business in American Society Credits: 1
  - EAP 109 - College Reading Skills Credits: 1
  - EAP 111 - Language Support for Introduction to Information Technology Credits: 1
Students should review the specific curriculum requirements by pathway at www.intohigher.com/mason for details.

**Progression into Degree Status**

Each Pathway program has specific progression requirements for completion. These typically include a minimum grade point average and minimum individual course grades (no grades of W, NC, or I are permitted). Students should refer to www.intohigher.com/mason for specific pathway program requirements. Students admitted to the university through the Undergraduate International Pathway Program are required to complete all program requirements in order to maintain continuous enrollment.

**Dismissal/Termination Appeals Process - INTO Mason students only**

Students who do not meet all requirements for progression to their desired degree program at the end of the second term will be reviewed for termination from the pathway program. Terminated students may initiate one of the following academic action requests in writing: (1) request an exception to the program policy, (2) request to change to an alternate pathway, and/or (3) request an extension to continue studying in a pathway as an Undergraduate Pathway Extender student for one additional term. All terminated student academic action requests must be submitted in writing to the academic advising office located in the Mason Global Center within 14 days of notification. Requests should provide an explanation and supplementary documentation. Students who earn a GPA below 2.00 will be ineligible to continue as an Extender. Students who fail to meet the program requirements after an extension will be reviewed for dismissal from the university.

Decisions on these requests are reviewed and approved at the discretion of the Academic Director. In some cases, additional reviews by the Associate Provost for Undergraduate Education or from a College Dean may also be required.

**Reenrollment and Readmission**

Due to the nature of the Pathway program as both English language development and academic coursework, Pathway students are subject to a limited reenrollment policy. Students who do not enroll after the first term or withdraw for reasons other than poor academic performance may request to reenroll in the Pathway program for the following term (e.g., spring) to continue making progress toward meeting program requirements, with advance permission from the Academic Director. Students who do not enroll for two consecutive terms (e.g., spring and fall) must apply for readmission to the program and be reassessed for language proficiency. Summer terms are counted for students whose initial pathway enrollment begins in Spring semester.
The Graduate International Pathway Program is a pre-master's program that provides international students a direct path to various graduate degrees at the university. The program gives students the academic foundation, essential language skills, and GRE test preparation to successfully move on to the master's degree. For most students, entering the Pathway will add up to one additional semester to their degree program.

Three types of Graduate Pathways are available:

- **Standard Pathway (2 terms):** This program leads students through their first year. Upon completion of all progression requirements, students will move on to their degree-seeking program.

- **Accelerated Pathway (1 term):** This program is composed of one term of Pathway coursework, some of which counts toward the student's master's degree as determined by the graduate program.

- **Bridge Pathway (2 terms):** This program provides foundational coursework designed to add an additional year of academic coursework, to render students with three-year baccalaureate degrees eligible to move on to their degree-seeking program.

The Graduate International Pathway Program is designed for international students who:

- Need further English language development. Students who require a moderate amount of English language support can enter all available pathways to strengthen their language proficiency and ensure their long-term academic success
- Require a fourth year of undergraduate study. Students who hold three-year baccalaureate degrees that are not formally evaluated as equivalent to a four-year US bachelor's degree may enter a select pathway. For these students, the Graduate International Pathway Program acts as a "bridge" enhancing their international educational background with academic coursework to meet the eligibility for admission
- Fall short of meeting the minimum GPA or admission test score requirements
- Need to improve study skills for success in their chosen field of study
- Any or all of the above

Administered through INTO Mason in partnership with the academic units across the university, the courses in the Graduate International Pathway program are taught by highly qualified Mason instructional faculty members and supported by pathway academic advisors.

Students enrolled in the Graduate International Pathway Program should review the program's student guidebook for specific details related to program requirements and expectations.

**Admission**

Admission to the Graduate International Pathway Program is offered to international and multilingual students by two methods:

- Students may apply directly through the INTO Mason admissions process OR
- By referral from the appropriate graduate admissions office due to not having met the grade point average, English language proficiency, or other requirements for direct admission (cascade).

The minimum documentation required for admission include: application, mark sheets/transcripts (in English and the original language), degree certificates (in English and the original language) and other required items as stated in the program catalog.
supplement.

The typical graduate pathway entry requirements are as follows:

- An undergraduate degree equivalent to a US bachelor's degree in a relevant field as specified by the Pathway;
- A 2.75 minimum high school GPA equivalent based on the applicant's country/institutional scale; and
- Documentation demonstrating the minimum English proficiency levels as specified by the pathway. The general minimum scores are:
  - **Standard Pathway:**
    - TOEFL iBT 70 - 75 (13 - 17 minimum subscores in reading and listening)
    - IELTS 6.0 - 6.5 (5.5 - 6.0 minimum subscores in reading and listening)
    - PTE Academic 47 - 52
    - Successful completion of or waiver from Academic English Level 5
  - **Accelerated & Bridge Pathway:**
    - TOEFL iBT 80 – 85 (17 minimum subscores in reading and writing)
    - IELTS 6.5 (6.0 – 6.5 minimum subscores in reading and writing)
    - PTE Academic 53 – 58
    - Successful completion of or waiver from Academic English Level 6

Students who hold three year baccalaureate degrees may be eligible for select Pathway. Students should review the specific requirements by pathway at www.intohigher.com/mason for details.

**Available Pathway & Majors**

There are over 45 pathways available to graduate students, and some pathways offer concentrations. Each pathway allows students to progress to preapproved graduate degree programs. A full listing of specific academic programs associated with specific pathways, visit: www.intohigher.com/mason.

- College of Education and Human Development (5 degree options)
- College of Health and Human Services (5 degree options)
- College of Humanities and Social Sciences (3 degree options)
- College of Science (9 degree options)
- College of Visual and Performing Arts (3 degree options)
- School of Business (4 degree options)
- School for Conflict Analysis and Resolution (1 degree option)
- School of Policy, Government and International Affairs (2 degree options)
- Volgenau School of Engineering (16 degree options)

**Curriculum**

Prescribed courses for the Graduate International Pathway Program include approximately 21 - 24 credits, most of which are English for Academic Purposes courses. The intent of these courses is to prepare students for the demands of the Mason graduate curriculum. Further, the prescribed courses may include up to 10 credits of coursework toward the student's graduate degree during the pathway year.

All pathways include the following core course(s):

- **Introduction to Graduate Study (2 - 3 credits)**
  - PROV 501 - Introduction to Graduate Study for International Students I Credits: 2 or 3
  - PROV 502 - Introduction to Graduate Study for International Students II Credits: 2 or 3
  - PROV 504 - Accelerated Introduction to Graduate Study for International Students Credits: 3
• EAP 503 - Interpersonal Communication for International Students: Practicum and Theory Credits: 2 or EAP 504 - Advanced English for Academic Purposes Reading and Writing Credits: 2
• Graduate Communication in the Disciplines I (4 – 8 credits)
  o EAP 506 - Graduate Communication in the Disciplines I Credits: 3-4
  o EAP 507 - Graduate Communication in the Disciplines II Credits: 3 or 4
  o EAP 508 - Graduate Communication in the Disciplines III Credits: 4
• EAP 510 - Linguistic Capstone Credits: 0

In addition to the core coursework, students will also take:

• Appropriate coursework toward graduate program of study (6 - 10 credits)

Students whose degree program requires the GRE prior to completing the program will also be required to take:

• Preparation for the Graduate Record Examination (specified by pathway) (0 credits)
  o PROV 095 - Quantitative Preparation for the Graduate Record Examination Credits: 0
  o PROV 096 - Verbal and Quantitative Preparation for the Graduate Record Examination Credits: 0
  o PROV 097 - Verbal, Quantitative, and Academic Writing Preparation for the Graduate Record Examination Credits: 0
  o EAP 097 - Verbal Preparation for the Graduate Record Examination Credits: 0

Progression into Degree Status

Each Pathway has specific progression requirements for completion. These typically include a minimum grade point average and minimum individual course grades (no grades of W, NC, or I are permitted). Students should refer to www.intohigher.com/mason for specific Pathway program requirements. Students admitted to the university through the Graduate International Pathway Program are required to complete all program requirements in order to maintain continuous enrollment.

Dismissal/Termination Appeals Process for INTO Mason students only

Students who do not meet all requirements for progression to their desired degree program at the end of the second term will be reviewed for termination from the Graduate Pathway program. Terminated students may initiate one of the following an academic action requests in writing: (1) request an exception to the program policy, (2) request to change to an alternate Pathway, and/or (3) request an extension to continue studying as a Graduate International Pathways Extender student for one additional term. All terminated student academic action requests must be submitted in writing to the academic advising staff located in the Mason Global Center within 14 days of notification. Requests should provide an explanation and supplementary documentation. Students who earn two unsatisfactory grades of C or lower will be ineligible to continue as an Extender. Students who fail to meet the program requirements after an extension will be reviewed for dismissal from the university.

Decisions on these requests are reviewed and approved at the discretion of the Academic Director. In some cases, additional reviews by the Associate Provost for Graduate Education or from a College Dean may also be required.

Reenrollment and Readmission

Due to the nature of the Pathway program as both English language development and academic coursework, Pathway students are subject to a limited reenrollment policy. Students who do not enroll after the first term or withdraw for reasons other than poor academic performance may request to reenroll in the Pathway program the following term (e.g., spring) to continue making progress toward meeting program requirements, with advance permission from the Academic Director. Students who do not enroll for two consecutive terms (e.g., spring and fall) must apply for readmission to the program and be reassessed for language proficiency. Summer terms are counted for students whose initial pathway enrollment begins in Spring semester.
College Year Abroad is a long-term General English program for students who want to fully experience an American university. College Year Abroad students have access to all the same resources and amenities as the General English students and all other university students.

With conversation groups/social programs organized by INTO Mason, students are more likely to have a successful experience integrating and contributing to the campus community. 25- and 35-week programs are available, with a discounted tuition rate for the 35-week program.

Information on admissions, programs structure and outcomes is available in the description of the General English Program.
The General English program is designed for students who want to develop their listening, speaking, reading and writing skills, learn about American culture, and satisfy personal, professional and academic goals with an emphasis on real world communication. Language learned in class is put into immediate practical use through hands-on tasks, assignments and creative projects. Learning experience is enhanced by field trips to places of interest and importance in and around the nation's capital of Washington, D.C.

Admission

Applicants for the General English program must submit at least an application and application fee through INTO George Mason University. In order to qualify for admission, students must demonstrate that they have earned at least a high school diploma and be at least 17 years of age. Students who require an F-1 visa for study must also submit a signed affidavit of support together with bank statements and passport copy with the application for admission. Upon arrival, all General English students will be given a language proficiency assessment which will determine exactly which level of the program is most appropriate for them to participate.

This program does not include academic study courses. Students planning to enroll in classes at Mason must apply to a Pathway program or the Academic English program. Successful completion of General English does not meet any language requirement for admission to Mason.

Program Structure and Curriculum

The General English program consists of 5-week sessions, making it a flexible option for all students. Students are placed into one of four levels and enjoy small classes (typically 10-15 students) with highly trained and experienced instructors. Each term of the General English program lasts for 5 weeks. In order to be eligible for full-time enrollment status, General English students must be enrolled for 18 hours of coursework per week consisting of:

- Reading/Writing
- Listening/Speaking
- American Culture

Daily class assignments are designed to help build both communication skills and cultural understanding. To complement classroom instruction, the General English Program offers fun and educational out-of-class activities and field trips. Students also benefit from access to university campus events and facilities, including one-on-one language advising and tutoring in the fully-equipped Global Living and Learning Center.

Program Outcomes

The General English program allows students to tailor their program to suit their academic, professional, and personal goals. At all levels of General English, students will be able to:

- Communicate ideas and opinions on various topics
• Expand comprehension of content and vocabulary used in conversation and in the media
• Develop conversation skills and strategies and build fluency
• Enhance writing correspondence skills for personal, professional and academic purposes, such as e-mail formatting and etiquette
• Interact with native speakers
• Gain insight into American history, culture, values and behaviors
• Apply English grammar knowledge in both spoken and written real world situations
• Demonstrate improved pronunciation
• Read and improve comprehension of texts of various length and complexity
Honors College

Phone: 703-993-1110
Web: honorscollege.gmu.edu

Faculty

Honors students have the opportunity to study with some of Mason's most accomplished teachers and scholars from disciplines across the university, including Mason's Robinson Professors.

Administration

Zofia Burr, Dean

Kathleen Alligood, Associate Dean

Courses

The Honors College offers all courses designated HNRS and HNRT in the Courses section of this catalog and select honors courses or sections within the majors.

The Honors College

The Honors College focuses attention on the excellence of Mason's student body and highlights the full spectrum of opportunities for academic achievement, professional development, and public service that Mason offers our most highly-motivated undergraduates. The Honors College provides talented students in all majors an enriched academic and social environment that enhances their college experience. Participation in challenging and innovative programs encourages student leadership and active engagement in local, national, and global communities.

Through the resources of the Honors College, the university provides students the support to excel academically and to pursue life-long goals. Included in these resources is the Honors College curriculum, which offers challenging courses that fulfill core academic requirements at Mason. Senior faculty, including Mason's Robinson Professors, teach small classes of students taking the curriculum. A select group of entering students is invited to become part of the University Scholars, a community of learners and leaders who receive Mason's most competitive merit-based scholarships. All Honors College students have direct access to the Postgraduate Scholarships and Fellowships Office, which provides advice and information to high-achieving Mason undergraduates and recent alumni about the application process for nationally competitive fellowships.

The benefits of being part of the Honors College include participating in a diverse living-learning community. Community programs include special lectures, events, and excursions on and off campus, as well as opportunities to take advantage of internships and cultural programs in Washington, D.C.

All students in the Honors College receive individualized academic advising, priority registration, and opportunities for close interaction with faculty for one-on-one mentoring and graduate and professional advising.

Admission

Admission to the Honors College is based on a holistic review of each student's academic performance as well as any other information included in the general application, such as rigor of coursework, standardized test scores, class rank, essay response,
Admission to the Honors College requires an application and is open to both freshmen and transfer students.

**Honors Curriculum**

The honors curriculum is designed to satisfy Mason Core requirements through a small number of courses, allowing students increased opportunities to pursue minors or other individual interests. Students may also take honors sections of selected major courses as well as upper division courses offered by the Honors College.

Students who earn a minimum GPA of 3.00 in HNRS and HNRT courses and supporting courses required for their approved honors program will receive a designation of *Honors College Requirements Completed* on their transcripts. Students whose GPA falls below 3.00 may complete the program to satisfy Mason Core requirements but will not receive honors recognition on their transcripts.

Honors College students are required to develop a formal Plan of Study with their Honors College advisor during their first year in the Honors College. Students who do not complete a Plan of Study in their first year may be removed from the College and the benefits that it offers until an official Plan of Study is completed and approved by the student's Honors College advisor.

**Requirement One (6-7 credits)**

**One of the following research methods courses:**

HNRS 108 - Introduction to Research Methods I Credits: 3 and HNRS 109 - Introduction to Research Methods II Credits: 3  

or  

HNRS 110 - Research Methods Credits: 4  

or  

HNRS 302 - Research Methods II Credits: 3  

AND  

HNRS 353 - Technology in the Contemporary World Credits: 3

**Requirement Two (9 credits)**

**Three honors core courses chosen from:**

HNRS 122 - Reading the Arts Credits: 3 (Art History/Arts)  

HNRS 131 - Contemporary Society in Multiple Perspectives Credits: 3 (Social Science with a Global Perspective)  

HNRS 240 - Reading the Past Credits: 3 (Western or World History)  

HNRS 130 - Conceptions of Self Credits: 3 (Philosophy/Religion)
HNRS 230 - Cross-Cultural Perspectives Credits: 3 (Social Science with a Non-Western Perspective)

**Students are required to take either HNRS 230 or HNRS 131.** Substitutions for both courses will only be allowed if a student transfers in credit for all the following Mason Core requirements:
- Non-Western Culture
- Global Understanding
- Social Science and Behavioral Science

**Honors students must satisfy all Mason Core requirements.** These requirements may be satisfied by HNRS 122, 240, and 131 or 230, or by taking an approved Mason Core course. HNRS 130 and HNRS 230 meet additional college requirements for the B.A. in the College of Humanities and Social Sciences and the College of Science.

**Note:** Students who complete Requirements One and Two also fulfill Mason Core requirements for information technology, oral communication and literature.

### Requirement Three (6-10 credits)

**Choose any two courses from the following list of approved departmental honors courses. Students may substitute only one course taken before attending Mason for Requirement Three.**

ACCT 204 - Honors Survey of Accounting Credits: 3

BIOL 213 - Cell Structure and Function Credits: 4 (Honors section only)

BIOL 214 - Biostatistics for Biology Majors Credits: 4 (Honors section only)

BIOL 308 - Foundations of Ecology and Evolution Credits: 5 (Honors section only)

BIOL 310 - Biodiversity Credits: 3 (Honors section only)

BIOL 311 - General Genetics Credits: 4 (Honors section only)

BIOL 314 - Introduction to Research Design and Analysis Credits: 4

BIOL 493 - Honors Research in Biology Credits: 1-2

CHEM 211 - General Chemistry I Credits: 3 (Honors section only)

CHEM 212 - General Chemistry II Credits: 3 (Honors Section only)

CS 211 - Object-Oriented Programming Credits: 3 (Honors Section only)

CS 390 - Research and Project Design Principles in Computing Credits: 3

ECON 103 - Contemporary Microeconomic Principles Credits: 3 (Honors section only)

ENGR 107 - Introduction to Engineering Credits: 2 (Honors section only)

HHS 492 - RS: Internship in Clinical Research Credits: 3

HNRS 130 - Conceptions of Self Credits: 3 (Philosophy/Religion), if not taken to satisfy Requirement Two

HNRS 230 - Cross-Cultural Perspectives Credits: 3 (Social Science with a Non-Western Perspective), if not taken to satisfy Requirement Two
HNRS 312 - RS: Research in the Public Sphere Credits: 0-3
HNRS 330 - Research, Technology, and Online Community Credits: 0-3
HNRS 410 - Thesis Proposal Credits: 0-3
HNRS 411 - RS: Honors College Thesis Credits: 0-3
HNRS 430 - Multidisciplinary Challenges in Professional Environments Credits: 0-3
MATH 116 - Analytic Geometry and Calculus II (Honors) Credits: 4
MATH 215 - Analytic Geometry and Calculus III (Honors) Credits: 3
MATH 216 - Theory of Differential Equations Credits: 3
OM 211 - Honors Statistical Analysis for Management Credits: 4
PHYS 160 - University Physics I Credits: 3 (Honors section only)
PHYS 260 - University Physics II Credits: 3 (Honors section only)
UNIV 495 - RS: Undergraduate Research Scholars Program Seminar Credits: 0-3

Additional Requirements:

- **Mathematics:** Each honors student must take one approved math course, depending on major. Approved math courses are MATH 113, MATH 123 and 124, HNRT 125 or HNRT 225, or MATH 108. School of Business and Information Sciences and Technology majors may take any of these courses, except HNRT 125. Additional math courses are required for some majors.
- **Science:** The Honors College science requirement mirrors the science requirement of a student's college and major.
- **Foreign Language:** Students pursuing BA degrees may have a foreign language requirement.
- **Beyond the Honors College requirements, students must satisfy all requirements of their college and major.**

Continuation in Honors

A student whose GPA falls below 2.00 (1.80 in the first or second semester) will be placed on academic warning and may be ineligible to continue in the Honors College.

Honors students are expected to maintain high standards of academic integrity and personal conduct. Students may be asked to withdraw from the program for a violation of the University Honor Code or any other conduct that reflects adversely on the Honors College.

Students who leave the Honors College before completion of the curriculum must meet Mason Core requirements and college-level requirements for their particular degree programs. On leaving the college and before registering for Mason Core courses, students should be advised in their major program on equivalencies between the honors courses they have completed and Mason Core requirements.

Transfer of Honors Credits
Within George Mason: Because of the sequential and integrated nature of the program, honors courses may not correspond exactly to other courses used to fulfill Mason Core requirements. A list of equivalencies is available in the Honors College office and on the Honors College website.

Outside George Mason: Course work in the Honors College curriculum may meet the general education requirements of other universities. As in all transfer situations, general education requirements of one institution may not precisely match those of another.
Bachelor's/Accelerated Master's Programs

Highly-qualified undergraduates have the opportunity to apply to accelerated master's degree programs in selected Mason programs of study, listed below by both the applicable bachelor's or master's degrees. Applicants receive a waiver of the graduate application fee and admitted students may obtain both a bachelor's and a master's degree after satisfactory completion of 144-150 credits (number of required credits depends on the degree program).

More information on bachelor's/accelerated master's programs may be found in the Graduate Policies AP.6.7 section of this catalog.

Programs by Master's Degree

- Accounting, Accelerated MS/Accounting, BS
- Anthropology, Accelerated MA/Anthropology, BA
- Applied and Engineering Physics, Accelerated MS/Physics, BS
- Applied Information Technology, Accelerated MS/Individualized Study, BIS
- Applied Information Technology, Accelerated MS/Information Technology, BS
- Art Education, Accelerated MAT/Art and Visual Technology, BFA
- Art History, Accelerated MA/Bachelor's Degree (any)
- Arts Management, Accelerated MA/Art and Visual Technology, BA
- Arts Management, Accelerated MA/Art and Visual Technology, BFA
- Arts Management, Accelerated MA/Theater, BA
- Biology, Accelerated MS/Biology, BS
- Chemistry, Accelerated MS/Chemistry, BS
- Civil and Infrastructure Engineering, Accelerated MS/Civil and Infrastructure Engineering, BS
- Computational Science, Accelerated MS/Computational and Data Sciences, BS
- Computer Engineering, Accelerated MS/Computer Engineering, BS
- Computer Forensics, Accelerated MS/Information Technology, BS
- Computer Science, Accelerated MS/Applied Computer Science, BS
- Computer Science, Accelerated MS/Computer Science, BS
- Conflict Analysis and Resolution, Accelerated MS/Conflict Analysis and Resolution, BA or BS
- Curriculum and Instruction, Accelerated MEd (Early Childhood Education for Diverse Learners Concentration)/Bachelor's Degree (any)
- Curriculum and Instruction, Accelerated MEd (Elementary Education Concentration)/Bachelor's Degree (any)
- Curriculum and Instruction, Accelerated MEd (Secondary Education Biology Concentration)/Biology, BA or BS
- Curriculum and Instruction, Accelerated MEd (Secondary Education Chemistry Concentration)/Chemistry, BA or BS
- Curriculum and Instruction, Accelerated MEd (Secondary Education Earth Science Concentration)/Earth Science, BS
- Curriculum and Instruction, Accelerated MEd (Secondary Education English Concentration)/English, BA or Creative Writing, BFA
- Curriculum and Instruction, Accelerated MEd (Sec Ed History and Soc Sci Concentration)/Integrative Studies, BA (Soci Sci for Education Concentration)
- Curriculum and Instruction, Accelerated MEd (Secondary Education Mathematics Concentration)/Mathematics, BA or BS
- Curriculum and Instruction, Accelerated MEd (Secondary Education Physics Concentration)/Physics, BS
- Data Analytics Engineering, Accelerated MS/Applied Computer Science, BS
- Data Analytics Engineering, Accelerated MS/Bioengineering, BS
- Data Analytics Engineering, Accelerated MS/BS (selected)
- Data Analytics Engineering, Accelerated MS/Computer Science, BS
• Economics, Accelerated MA/Economics, BA or BS
• Educational Psychology, Accelerated MS/Bachelor's Degree (any)
• Electrical Engineering, Accelerated MS/Electrical Engineering, BS
• English, Accelerated MA (Linguistics Concentration)/Bachelor's Degree (any)
• Environmental Science and Policy, Accelerated MS/Bachelor's Degree (Green Leaf)
• Foreign Languages, Accelerated MA (Spanish Concentration)/Foreign Languages, BA (Spanish Concentration)
• Foreign Languages, Accelerated MA (Spanish/Bilingual Multicultural Education Concentration)/Foreign Languages, BA (Spanish Concentration)
• Global Affairs, Accelerated MA/Bachelor's Degree (any)
• Graphic Design, Accelerated MA/Art and Visual Technology, BFA
• History, Accelerated MA/History, BA
• Information Security and Assurance, Accelerated MS/Information Security and Assurance, Accelerated MS/Information Technology, BS
• Information Systems, Accelerated MS/Information Technology, BS
• Interdisciplinary Studies, Accelerated MAIS (Energy and Sustainability Concentration)/Bachelor's Degree (any)
• Interdisciplinary Studies, Accelerated MAIS (Folklore Studies)/Bachelor's Degree (any)
• Interdisciplinary Studies, Accelerated MAIS (Religion, Culture, and Values Concentration)/Bachelor's Degree (selected)
• Interdisciplinary Studies, Accelerated MAIS (Social Justice and Human Rights Concentration)/Bachelor's Degree (selected)
• Interdisciplinary Studies, Accelerated MAIS (Women and Gender Studies)/Bachelor's Degree (selected)
• International Commerce and Policy, Accelerated MA/Bachelor's Degree (any)
• Mathematics, Accelerated MS/Mathematics, BS
• Middle East and Islamic Studies, Accelerated MA/Bachelor's Degree (selected)
• Music, Accelerated MM (Performance)/Music, BM (Performance)
• Operations Research, Accelerated MS/BS degree (selected)
• Philosophy, Accelerated MA/Philosophy, BA
• Political Science, Accelerated MA/Bachelor's Degree (any)
• Psychology, Accelerated MA (Cognitive and Behavioral Neuroscience Concentration)/Psychology, BA or BS
• Public Administration, Accelerated MPA/Bachelor's Degree (any)
• Public Health, Accelerated MPH/Bachelor's Degree (Any)
• Public Policy, Accelerated MPP/Bachelor's Degree (any)
• Sociology, Accelerated MA/Sociology, BA
• Software Engineering, Accelerated MS/Applied Computer Science, BS
• Software Engineering, Accelerated MS/Computer Science, BS
• Software Engineering, Accelerated MS/Information Technology, BS
• Special Education, Accelerated MEd/Bachelor's Degree (any)
• Special Education, Accelerated MEd (Early Childhood Special Education {Non-Licensure} Concentration)/Bachelor's Degree (any)
• Sport and Recreation Studies, Accelerated MS/Bachelor's Degree (any)
• Statistical Science, Accelerated MS/BS degree (selected)
• Systems Engineering, Accelerated MS/BS degree (selected)
• Telecommunications, Accelerated MS/Electrical Engineering, BS
• Telecommunications, Accelerated MS/Individualized Study, BIS
• Telecommunications, Accelerated MS/Information Technology, BS
• Telecommunications, Accelerated MS/Systems Engineering, BS

Programs by Bachelor's Degree

• Accounting, BS/Accounting, Accelerated MS
• Anthropology, BA/Anthropology, Accelerated MA
• Applied Computer Science, BS/Computer Science, Accelerated MS

Courses

This section lists George Mason University’s undergraduate and graduate courses that are available for credit.

For more detailed information on courses, please go to the AP.2 Course Information section.

Notes effective Fall 2016:

Courses formerly under the CTCH prefix may now be found under the HE (Higher Education) prefix.

Courses formerly under the NCLC prefix may now be found under the INTS (Integrative Studies) prefix.

Selected activity courses formerly under the PHED or PRLS prefixes may now be found under the RECR (Recreation) prefix.

Accounting (ACCT)

Offered by the School of Business.

If a student takes noncore, upper-level business courses before admission to the School of Business, those courses will not count on an undergraduate degree application for any major in the school, except as general elective credit. A grade of C or higher must be presented on the graduation application for each upper-level course in the major. Course prerequisites are strictly enforced. Degree status is defined as formal admission to BS degree status in the School of Business.

ACCT 203 - Survey of Accounting

Credits: 3
Not Repeatable for Credit
Offered by School of Business
Introduction to financial and managerial accounting. Financial accounting from viewpoint of those who prepare and use financial information. Financial accounting topics include recording financial transaction, creating financial statements, the study of cash and internal controls. Managerial accounting topics include introduction to job order costing, breakeven analysis, standard costs and variances and short term decision making. Lecture, recitation format; requires attendance in weekly lecture and weekly recitation.

Equivalent to ACCT 204

Prerequisite(s): Grade of C or higher in ECON 103.
Prerequisite(s) enforced by registration system.

Schedule Type: LEC, RCT
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring, Summer

ACCT 204 - Honors Survey of Accounting
Credits: 3
Not Repeatable for Credit
Offered by School of Business

Introduction to financial and managerial accounting. Financial accounting from viewpoint of those who prepare & use financial information. Financial accounting topics include recording financial transaction, creating financial statements, the study of cash and internal controls. Managerial accounting topics include introduction to job order costing, breakeven analysis, standard costs and variances and short term decision making. Lecture, recitation format; requires attendance in weekly lecture and weekly recitation. Project on a global corporation is conducted to reinforce accounting concepts.

Equivalent to ACCT 203

Prerequisite(s): Cum GPA of 3.5 or higher; ECON 103 with a grade of B or higher.
Prerequisite(s) enforced by registration system.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

ACCT 301 - Financial Accounting and Managerial Decision Making

Credits: 3
Limited to 3 Attempts
Offered by School of Business

Examines financial accounting from the viewpoint of both users and preparers of financial statements, emphasizing use of financial statement information to make financing, operating, and investing decisions. International Financial Reporting Standards (IFRS) are introduced.
School of Business students will not be permitted to make more than three attempts to achieve a C or higher in ACCT 301. Those who do not successfully complete this course within three attempts will be terminated from their major and will not be eligible to receive a degree from the School of Business. For more information about this, see the "Termination from the Major" section under Academic Policies.

Prerequisite(s): Grade of C or higher in ACCT 203 or ACCT 204; sophomore standing.
Prerequisite(s) enforced by registration system.

Notes: Mid-term and final exams may be scheduled on Saturdays for this class. The number of class sessions will be modified to compensate for mid-term examination time. Accommodations will be made for religious conflicts, Saturday classes, and certain official university activities.

Students cannot receive credit for ACCT 301 and ACCT 303/330.

This course will not meet School of Business requirements for students with catalog year Fall 2015 or forward.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring, Summer
ACCT 303 - Accounting for Decision Making

Credits: 3  
Limited to 3 Attempts  
Offered by School of Business  
Examines accounting from the viewpoint of managers and users of accounting information including using financial statement information to make financing, operating, and investing decisions, recognizing how tax system and body of tax law impacts business decision making, using managerial accounting information to make operating and compensation decisions, and understanding importance of internal and external audits to business and capital markets.

Prerequisite(s): Grade of C or higher in each of the following courses:

BUS 103 and BUS 200 are strongly recommended.

The following courses are required:  
ACCT 203 or ACCT 204  
BUS 100 or SOM 100  
BUS 210  
MATH 108 or MATH 113 or MATH 114 or HNRT 225.

Degree status.  
Prerequisite(s) enforced by registration system.

Notes: Students cannot receive credit for ACCT 301 and ACCT 303/ACCT 330.

School of Business students will not be permitted to make more than three attempts to achieve a C or higher in ACCT 303. Those who do not successfully complete this course within three attempts will be terminated from their major and will not be eligible to receive a degree from the School of Business. For more information about this, see the "Termination from the Major" section under Academic Policies.

This course will not meet School of Business requirements for students with a catalog year before Fall 2015

Schedule Type: LEC  
Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0  
When Offered: Fall, Summer, Spring

ACCT 311 - Managerial and Cost Accounting

Credits: 3  
Limited to 3 Attempts  
Offered by School of Business  
Develops skills in identifying business processes, transforming data into useful information, and making managerial decisions. Designed for students in all areas of management, especially those whose career aims include cost management. Topics include analyzing and managing costs, developing cost systems that facilitate decision making, identifying opportunities for improving business process, creating financial and operating budgets for planning and control, and developing measures to assess performance.

Prerequisite(s): Grade of C or higher in ACCT 301 or ACCT 330 degree status. Prerequisite enforced by registration system.  
Prerequisite(s) enforced by registration system.
Notes: Mid-term and final exams may be scheduled on Saturdays for this class. The number of class sessions will be modified to compensate for mid-term examination time. Accommodations will be made for religious conflicts, Saturday classes, and certain official university activities.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

ACCT 330 - Financial Accounting I

Credits: 3
Limited to 3 Attempts
Offered by School of Business
This is the first of the three-course financial accounting sequence that examines financial accounting from the viewpoint of preparers and users of financial statements, including preparing financial statements to reflect financing, operating, and investing decisions of the firm and using financial statement information to make financing, operating and investing decisions for the firm.

Prerequisite(s): Grade of C or higher in each of the following courses:

BUS 103 and BUS 200 are strongly recommended.

The following courses are required:
ACCT 203 or ACCT 204
BUS 100 or SOM 100
BUS 210
MATH 108 or MATH 113 or MATH 114 or HNRT 225.

Degree status.
Prerequisite(s) enforced by registration system.

Notes: ACCT 330 is required for all School of Business Accounting and Finance majors.

School of Business students will not be permitted to make more than three attempts to achieve a C or higher in ACCT 330. Those who do not successfully complete this course within three attempts will be terminated from their major and will not be eligible to receive a degree from the School of Business. For more information about this, see the "Termination from the Major" section under Academic Policies.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Summer, Spring

ACCT 331 - Financial Accounting II

Credits: 3
Limited to 3 Attempts
Offered by School of Business
This is the second of the three-course financial accounting sequence that examines financial accounting from the viewpoint of
preparers and users of financial statements, including preparing financial statements to reflect financing, operating, and investing decisions of the firm and using financial statement information to make financing, operating and investing decisions for the firm.

**Prerequisite(s):** Grade of C or better in ACCT 301 or ACCT 330. Degree Status.
Prerequisite(s) enforced by registration system.

**Notes:** Mid-term and final exams may be scheduled on Saturdays for this class. The number of class sessions will be modified to compensate for mid-term examination time. Accommodations will be made for religious conflicts, Saturday classes, and certain official university activities.

**Schedule Type:** LEC  
**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall, Spring

### ACCT 332 - Financial Accounting III

Credits: 3  
Limited to 3 Attempts  
Offered by School of Business  
This is the third of the three-course financial accounting sequence that examines financial accounting from the viewpoint of preparers and users of financial statements, including preparing financial statements to reflect financing, operating, and investing decisions of the firm and using financial statement information to make financing, operating and investing decisions for the firm.

**Prerequisite(s):** Degree Status, grades of C or higher in ACCT 331 and FNAN 301 or FNAN 303. Prerequisite(s) enforced by registration system.

**Notes:** This course is a continuation of ACCT 331. Mid-term and final exams may be scheduled on Saturdays for this class. The number of class sessions will be modified to compensate for mid-term examination time. Accommodations will be made for religious conflicts, Saturday classes, and certain official university activities.

**Schedule Type:** LEC  
**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall, Spring

### ACCT 351 - Taxation and Managerial Decision Making

Credits: 3  
Limited to 3 Attempts  
Offered by School of Business  
Introduction to fundamental topics in taxation using a business-entities approach. Specific topics include gross income, deductions, losses, and property transactions. The course emphasizes the identification of planning and compliance issues and the application of tax law to resolve those issues. Both tax and non-tax factors affecting decision making are considered.

**Prerequisite(s):** Grade of C or better in ACCT 301, ACCT 303 or ACCT 330, degree status. Prerequisite(s) enforced by registration system.
Notes: Mid-term and final exams may be scheduled on Saturdays for this class. The number of class sessions will be modified to compensate for mid-term examination time. Accommodations will be made for religious conflicts, Saturday classes, and certain official university activities.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

ACCT 361 - Accounting Information Systems

Credits: 3
Limited to 3 Attempts
Offered by School of Business
This course involves the study and development of accounting information systems. The focus is on business processes covering many industries with an emphasis on data modeling and internal control. Special topics including XBRL and commercial systems are incorporated throughout the course.

Prerequisite(s): Grade of C or higher in ACCT 301 or ACCT 330 or ACCT 303 and MIS 301 or MIS 303, degree status.
Prerequisite enforced by registration system
Prerequisite(s) enforced by registration system.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

ACCT 370 - Accounting in a Global Economy

Credits: 3
Not Repeatable for Credit
Offered by School of Business
International Accounting is study of entity reported as multinational company or entity whose reporting obligations to stakeholders are located in a different country. Course focuses on effects of financial reporting, managerial planning and control, international taxation, and international financial statement analysis on multinational reporting entity, and as the convergence of U.S. Generally Accepted Accounting Principles and International Financial Reporting Standards.

Prerequisite(s) enforced by registration system.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

ACCT 372 - Financial Statement Analysis
Detailed overview of financial statement analysis by users of financial statements. Students learn about common features of mandatory and voluntary accounting disclosures, behaviors and interactions among different users of financial statement information. Primary focus is analysis of financial statement information in body of financial statements and footnotes, and implications of those disclosures for firm valuation, fraud prediction, taxation, and governance.

**Prerequisite(s):** Degree Status, grade of C or higher in ACCT 331 or FNAN 341. Prerequisite(s) enforced by registration system.

**Schedule Type:** LEC  
**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall, Spring

---

**ACCT 411 - Advanced Managerial Accounting**

Credits: 3  
Not Repeatable for Credit  
Offered by School of Business  
Managerial uses of accounting information in planning, controlling, motivating, and decision making. Emphasizes quantitative and behavioral aspects of managerial accounting.

**Prerequisite(s):** Degree status, grade of C or higher in ACCT 311. Prerequisite(s) enforced by registration system.

**Schedule Type:** LEC  
**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall, Spring

---

**ACCT 433 - Advanced Financial Accounting**

Credits: 3  
Not Repeatable for Credit  
Offered by School of Business  

**Prerequisite(s):** C or higher in ACCT 332, degree status. Prerequisite(s) enforced by registration system.

**Schedule Type:** LEC  
**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall, Spring
ACCT 451 - Advanced Federal Taxation

Credits: 3
Not Repeatable for Credit
Offered by School of Business
Federal taxation of corporations, partnerships, fiduciaries, and gratuitous transfers.

Prerequisite(s): Degree status, grade of C or higher in ACCT 351.
Prerequisite(s) enforced by registration system.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

ACCT 461 - Assurance and Audit Services

Credits: 3
Limited to 3 Attempts
Offered by School of Business
Introduction to audit and other assurance services' objectives, theory, and practices. Focuses on developing skills for interpreting business strategies and identifying related business risks, describing internal control solutions to those risks, identifying evidential sources, providing assurance about those risks and controls, and designing strategies to provide assurance services about the reliability of business information.

Fulfills writing intensive requirement in the major.

Prerequisite(s): Degree status, grades of C or higher in ACCT 331 and 361.
Prerequisite(s) enforced by registration system.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

ACCT 462 - Honors Seminar in Accounting

Credits: 3
Not Repeatable for Credit
Offered by School of Business
An in-depth study and analysis of contemporary developments and topics of interest in accounting.

Prerequisite(s): Accounting major, senior standing, permission of the instructor.
Notes: The topics and format will vary. Enrollment in this course is limited and competitive.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
ACCT 472 - Government and Not-for-Profit Accounting

Credits: 3
Not Repeatable for Credit
Offered by School of Business
Introduction to accounting for nonbusiness organizations. Emphasizes accounting issues unique to these entities, including non-exchange transactions and lack of ownership interest. Includes accounting and reporting for state and local governments, charitable organizations, and the federal government.

Prerequisite(s): Degree status, grade of C or higher in ACCT 331.
Prerequisite(s) enforced by registration system.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

ACCT 491 - Seminar in Accounting

Credits: 3
Not Repeatable for Credit
Offered by School of Business
Advanced study of accounting concepts and selected topics.

Prerequisite(s): Degree status, C or higher in ACCT 331.
Prerequisite(s) enforced by registration system.

Schedule Type: SEM
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

ACCT 492 - Internship in Accounting

Credits: 3
Repeatable within Degree for Credit
Offered by School of Business
Opportunity to gain practical and professional experience in conjunction with academic development.

Equivalent to BUS 492 (2016-2017 catalog)

Prerequisite(s): Grade of C or higher in ACCT 330. Degree Status.
Prerequisite(s) enforced by registration system.
Notes: No more than 6 credits of School of Business internship coursework (BUS 492 or ACCT 492) can be applied towards a student's 120 (BU) degree applicable credits. Students must receive departmental approval in order to register for this course; please contact the School of Business for internal eligibility requirements.

Schedule Type: INT
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring, Summer

ACCT 499 - Independent Study

Credits: 1-3
Repeatable within Term for Credit
Offered by School of Business
Research and analysis of selected problems or topics in accounting.

Prerequisite(s): 9 credits in upper-level accounting courses, degree status.
Notes: Must be arranged with an instructor, and students must receive written approval from the associate dean for undergraduate programs before registration. Written report required. May be repeated for maximum 6 credits if topics vary.

Schedule Type: IND
Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0

ACCT 531 - Foundations of Financial Reporting I

Credits: 3
Not Repeatable for Credit
Offered by School of Business
Upon completing course students will be knowledgeable about global business and trade as it applies to international financial reporting standards. Students will be capable of recording, analyzing, interpreting, and communicating financial and non-financial information for users of such information in accordance with applicable professional authoritative literature.

Prerequisite(s): ACCT 301 or BMGT 613, or equivalent with a grade of "B-" or higher. Or permission of program director.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ACCT 532 - Foundations of Financial Reporting II

Credits: 3
Not Repeatable for Credit
Offered by School of Business
Upon completing course students will be knowledgeable about global business and trade as it applies to international financial reporting standards. Students explore topics including: current liabilities and contingencies, bonds and long term notes, leases, accounting for income taxes, pensions, shareholder's equity and share based compensation.
**Prerequisite(s):** ACCT 331, ACCT 531, or equivalent and FNAN 301, BMGT 643 or equivalent, both with a grade of “B-” or higher. Or permission of program director.

**Schedule Type:** LEC

**Hours of Lecture or Seminar per week:** 3

**Hours of Lab or Studio per week:** 0

---

**ACCT 551 - Foundations of Taxation of Business Entities**

Credits: 3
Not Repeatable for Credit
Offered by School of Business
The objective of this course is to build a sound conceptual and technical foundation for the study of federal income taxation that provides students with the tools necessary to stay current with the ever-changing tax law.

**Prerequisite(s):** Permission of program director.

**Schedule Type:** LEC

**Hours of Lecture or Seminar per week:** 3

**Hours of Lab or Studio per week:** 0

---

**ACCT 561 - Foundations of Assurance Services**

Credits: 3
Not Repeatable for Credit
Offered by School of Business
The course focuses on planning, performing and reporting on an audit of financial statements conducted in accordance with U.S. generally accepted auditing standards (U.S. GAAS). It also introduces the public accounting profession and the services CPAs provide.

**Prerequisite(s):** ACCT 331 or ACCT 531 with a B- or better or permission of MSA Program Director.

**Schedule Type:** LEC

**Hours of Lecture or Seminar per week:** 3

**Hours of Lab or Studio per week:** 0

---

**ACCT 601 - Online MSA Orientation Course**

Credits: 0
Not Repeatable for Credit
Offered by School of Business
The main objective of this course is to help students understand program expectations and time commitment and prepare themselves for online communication and technology requirements necessary to successfully complete their online MSA degree.

**Prerequisite(s):** Enrollment in the online MSA program or permission of the MSA academic director.

**Schedule Type:** SEM

**Grading:** Graduate Special.
ACCT 611 - Advanced Managerial Accounting

Credits: 3
Not Repeatable for Credit
Offered by School of Business
Examines the firm's planning and control decisions that require a more sophisticated approach than the rule-of-thumb procedures advocated for traditional cost accounting problems. Students will work with real-world issues and problems and apply the appropriate analytical model to develop relevant management accounting treatments.

Prerequisite(s): Admission to the MSA program and ACCT 311 or equivalent, or permission of the program director.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring

ACCT 630 - Advanced Financial Accounting

Credits: 3
Not Repeatable for Credit
Offered by School of Business
This course covers advanced topics in financial accounting like business combinations and preparation of consolidated financial statements. Students are also introduced to specialized accounting issues related to partnerships and segment reporting.

Prerequisite(s): Enrollment in MSA program or permission of MSA Director.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ACCT 633 - Identifying and Resolving Advanced Issues in Financial Accounting

Credits: 3
Not Repeatable for Credit
Offered by School of Business
Students will gain knowledge and skills used in the interpretation of complex corporate financial accounting issues and in the preparation of complex financial statements. Topics include acquisitions, consolidations, derivatives, segment reporting, partnerships, and SEC reporting. Students also will learn to conduct research using the FASB Accounting Standards Codification to resolve ambiguous reporting issues.

Prerequisite(s): Enrollment in MSA program or permission of MSA Director.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ACCT 636 - Fraud Examination
ACCT 650 - Fraud Prevention and Detection
Credits: 3
Not Repeatable for Credit
Offered by School of Business
Introduces strategies and techniques for fraud prevention and detection. Focuses on financial fraud such as bribery, contract rigging and kickbacks, embezzlement, fraudulent financial reporting, payroll fraud, and misappropriation of inventory and other assets. Several real-life cases and examples will be used to illustrate how to detect and prevent fraud.

Equivalent to MBA 744, ACCT 744 (2013-2014 Catalog)

Prerequisite(s): Admission to MSA program or permission of program director.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ACCT 651 - Identifying and Resolving Advanced Issues in Taxation
Credits: 3
Not Repeatable for Credit
Offered by School of Business
Examines the application of the federal income tax law to C-corporations, S-corporations, and partnerships. Topics will include the formation, operations, and dissolutions of such entities. Students will read and apply primary tax authorities to client fact patterns and engage in significant professional research and writing.

Prerequisite(s): Admission to the MSA program or permission of the program director. ACCT 351 or equivalent.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

ACCT 662 - Seminar in Accounting
Credits: 3
Not Repeatable for Credit
Offered by School of Business
Provides selective analysis of important issues in contemporary accounting practice.

Prerequisite(s): Admission to the MS Accounting program or permission of the program director.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ACCT 672 - Governmental and Nonprofit Accounting
Credits: 3
Not Repeatable for Credit
Offered by School of Business
Accounting and Reporting for non-business organizations. Emphasizes accounting issues unique to these entities, including non-
exchange transactions and lack of ownership interest. Includes accounting and reporting for state and local governments, nongovernment organizations, and the federal government.

**Prerequisite(s):** Admission to the MSA program or permission of the program director.

**Schedule Type:** LEC

**Hours of Lecture or Seminar per week:** 3

**Hours of Lab or Studio per week:** 0

**When Offered:** Fall

---

**ACCT 690 - Professional Accounting Colloquium**

Credits: 3
Not Repeatable for Credit
Offered by School of Business

The Professional Accounting Colloquium is designed to give graduate accounting students the opportunity to identify, develop, and improve professional skills and attributes critical to success in the accounting profession. Students will gain an understanding of these professional accounting skills and attributes from both a theoretical and applied perspective.

**Prerequisite(s):** Admission to the MSA program or permission of the program director.

**Schedule Type:** LEC

**Hours of Lecture or Seminar per week:** 3

**Hours of Lab or Studio per week:** 0

**Grading:** Graduate Special.

**When Offered:** Fall, Spring

---

**ACCT 695 - Graduate Field Experience**

Credits: 1-3
Repeatable within Degree for Credit
Offered by School of Business

This course provides a framework for approaching, successfully completing, and reflecting upon a professional field experience in accounting. The course is designed for students who will complete semester long internship in the field of accounting either in public accounting or in industry.

**Prerequisite(s):** Permission of MSA Program Director.

**Schedule Type:** INT

**Hours of Lecture or Seminar per week:** 1-3

**Hours of Lab or Studio per week:** 0

---

**ACCT 696 - Directed Studies in Accounting**

Credits: 1-3
Repeatable within Degree for Credit
Offered by School of Business

Approval by faculty member and program director required prior to registration. Studies specialized topics in business not otherwise available in the curriculum.
**Prerequisite(s):** Admission to the MSA program or permission of the program director.

**Schedule Type:** IND

**Hours of Lecture or Seminar per week:** 1-3

**ACCT 697 - Special Topics in Accounting**

Credits: 1-3
Repeatable within Term for Credit
Offered by School of Business
Sections established as necessary to focus on various topical issues that emerge in practice of accounting.

**Prerequisite(s):** Admission to the MSA program or permission of the program director.

**Schedule Type:** LEC

**Hours of Lecture or Seminar per week:** 3

**Hours of Lab or Studio per week:** 0

**Grading:** Graduate Special.

**ACCT 701 - Business Valuation**

Credits: 3
Not Repeatable for Credit
Offered by School of Business
Provides hands-on-experience in financial statement analysis and valuation. Takes an accounting-based valuation perspective and offers a comprehensive framework for analyzing financial statements consisting of (a) Business Strategy, (b) Accounting Analysis, (c) Financial Analysis, and (d) Prospective Analysis and Valuation.

Equivalent to MBA 701

**Prerequisite(s):** Admission to the MSA program or permission of instructor. "B" or better in MBA 613.

**Schedule Type:** LEC

**Hours of Lecture or Seminar per week:** 3

**Hours of Lab or Studio per week:** 0

**ACCT 708 - Taxes and Business Strategy**

Credits: 3
Not Repeatable for Credit
Offered by School of Business
Provides a framework for making managerial decisions in a global tax environment. Examines business decisions such as location of facilities, employee compensation, mergers and acquisitions, capital and asset structure, and business form. Focuses on tax planning concepts and the effect of taxes on business decisions.

Equivalent to MBA 708.

**Prerequisite(s):** Admission to the MSA program or permission of instructor. Completion of MBA core requirements.

**Schedule Type:** LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ACCT 737 - Fraud and the Law

Credits: 3
Not Repeatable for Credit
Offered by School of Business
Provides an overview of US legal system including law-making process, structure of court system, and how frauds are brought to trial, prosecuted and resolved. Explores common fraud statutes used to penalize wrongdoers. Course will examine evidentiary rules including types of evidence, hearsay, impeachment and privileges. Highlight the legal requirements for serving as an expert witness and testifying in court.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ACCT 738 - Advanced Topics in Fraud

Credits: 3
Not Repeatable for Credit
Offered by School of Business
Course will cover advanced topics in forensic accounting. The focus will be on contemporary issues in fraud. Examples of topics include litigation support, money laundering, consumer fraud, bankruptcy, divorce and tax fraud, fraud in e-commerce, insurance fraud and mortgage fraud. The course will provide a comprehensive look at fraud investigation.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ACCT 741 - Information Technology Auditing

Credits: 3
Not Repeatable
Offered by School of Business
Introduces methodologies to assess security and control issues concerning accounting and other information systems. Key feature of course is applying computer-assisted audit tools and techniques to test effectiveness of application controls.

Equivalent to (2015-2016 Catalog) MBA 741

Prerequisite(s): Admission to MSA or MBA program, or permission of program director.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall
ACCT 742 - Corporate Governance and Ethics

Credits: 3
Not Repeatable for Credit
Offered by School of Business
Focuses on developing understanding of corporate governance issues and ethical decision making. Topics include examination of internal and external international governance issues, and ethical analysis in current business environment.

Equivalent to MBA 742

Prerequisite(s): Admission to MSA or MBA program, or permission of program director.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
WhenOffered: Spring

ACCT 743 - Corporate Financial Reporting

Credits: 3
Not Repeatable for Credit
Offered by School of Business
Addresses contemporary issues in corporate financial reporting. Focuses on role of financial reporting in providing decision-useful information to participants of capital market, and theoretical and empirical assessments of its performance.

Equivalent to (2015-2016 Catalog) MBA 743

Prerequisite(s): Admission to MSA or MBA program, or permission of program director.
Schedule Type: SEM
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
WhenOffered: Summer

ACCT 745 - International Financial Reporting

Credits: 3
Not Repeatable for Credit
Offered by School of Business
Examines accounting from an international perspective, including the study of various functional areas of accounting across countries and the reporting requirements encountered by companies engaged in international trade and making foreign direct investments.

Equivalent to MBA 745

Prerequisite(s): Completion of MBA or MSA core requirements, or permission of program director.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
ACCT 792 - Seminar in Accounting

Credits: 3
Repeatable within Term for Credit
Offered by School of Business
Selective analysis of topics addressing important issues in contemporary accounting practice. Discussion of two or three major topics.

Schedule Type: SEM
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ACCT 795 - Global Accounting Environment

Credits: 3
Not Repeatable for Credit
Offered by School of Business
Examines the activities of accounting firms competing in the global business environment. Students will observe these activities in residency and study the decision-making processes of international accounting firms to develop an understanding of the regulatory environment of global accounting.

Prerequisite(s): Admission to the MSA program or permission of the program director.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Summer

ACCT 796 - Independent Studies/Directed Readings

Credits: 1-3
Not Repeatable for Credit
Offered by School of Business
Research and analysis of selected problems or topics in accounting not otherwise available in curriculum.

Prerequisite(s): Permission of Program Director.
Notes: Approval of faculty member and program director required. May be repeated for up to 3 credits.

Schedule Type: IND, LEC
Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0

African and African American Studies (AFAM)

Offered by the College of Humanities and Social Sciences
AFAM 200 - Introduction to African American Studies

Credits: 3  
Not Repeatable for Credit  
Offered by African and African American Studies  
Interdisciplinary introduction to the field of African American studies. Includes comparative analysis of approaches, methodologies, and key concepts related to the study of people of African descent in the United States, continental Africa, and throughout the African diaspora. Lectures and discussion integrate attention to such issues as diversity and multiculturalism from national and global perspectives.

Fulfills Mason Core requirement in social and behavioral science.

Schedule Type: LEC  
Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0

AFAM 390 - Special Topics in African and African American Studies

Credits: 3  
Repeatable within Term for Credit  
Offered by African and African American Studies  
Study of selected topics related to the study of people of African descent in Africa, the United States, the Caribbean, Latin Americas and throughout the African Diaspora.

Notes: May be repeated for a maximum of 12 credits when topic is different.

Schedule Type: LEC, SEM  
Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0

AFAM 490 - Internship

Credits: 2-6  
Not Repeatable for Credit  
Offered by African and African American Studies  
Approved work-study program in cooperation with specific organizations including area museums; NGOs; and local, state, and federal agencies. Students should arrange for an internship in the semester before they wish to enroll. Requires approval of department.

Prerequisite(s): AFAM 200 and 60 credits.  
Notes: Credit to be determined by the African American Studies Program.

Schedule Type: INT  
Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0
AFAM 499 - Independent Study

Credits: 1-3
Not Repeatable for Credit
Offered by African and African American Studies
Investigation of an area related to African American studies according to individual interest, with emphasis on research.

Prerequisite(s): Permission required from program director, Dr. Wendi Manuel-Scott.
Schedule Type: IND
Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0

Anthropology (ANTH)

Offered by the College of Humanities and Social Sciences

ANTH 114 - Introduction to Cultural Anthropology

Credits: 3
Not Repeatable for Credit
Offered by Sociology and Anthropology.
Overview of major ideas and approaches to the study of cultures around the world. Surveys kinship, social organization, political economy, religious beliefs, language and other aspects of non-Western cultures.

Fulfills Mason Core requirement in social and behavioral science.

Notes: Fulfills the college requirement in non-Western culture.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ANTH 120 - Unearthing the Past: Prehistory, Culture and Evolution

Credits: 3
Not Repeatable for Credit
Offered by Sociology and Anthropology.
Introduction to archeology and bioanthropology. Explore issues and debates in human biological evolution, prehistory and social change, as well as lab and field methods for understanding archaeological remains.

Fulfills Mason Core requirement in social and behavioral science.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
**ANTH 135 - Introduction to Biological Anthropology**

Credits: 3  
Not Repeatable for Credit  
Offered by Sociology and Anthropology.  
Uses an evolutionary perspective to introduce students to the study of humans and non-human primates as biological organisms. The course will analyze the genetic and environmental bases for modern human biological variation, understand primate behavior and biological relationships, and reconstruct the fossil record. Discussions about prehistoric skeletal remains will emphasize biological responses to changes in subsistence and social structure.  

Fulfills Mason Core requirement in social and behavioral science and natural science (nonlab).

**Schedule Type:** LEC  
**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**ANTH 299 - Independent Study**

Credits: 1-3  
Not Repeatable for Credit  
Offered by Sociology and Anthropology.  
Individual study in anthropology on topic organized in advance by student and instructor.

**Prerequisite(s):** ANTH 114, or permission of instructor.  
**Schedule Type:** IND  
**Hours of Lecture or Seminar per week:** 1-3  
**Hours of Lab or Studio per week:** 0

**ANTH 300 - Civilizations**

Credits: 3  
Not Repeatable for Credit  
Offered by Sociology and Anthropology.  
Cross-cultural and transtemporal examination of complex societies and civilizations. Explores developmental schema for rise, articulation, spread, and decline of historic and contemporary civilizations.

**Notes:** Fulfills the college requirement in non-Western culture.

**Schedule Type:** LEC  
**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0
ANTH 301 - Native North Americans

Credits: 3  
Not Repeatable for Credit  
Offered by Sociology and Anthropology.  
Exploration of native North American cultures and selected aspects of Indian-white historical relations. Emphasizes cultural persistence as well as change.

Notes: Fulfills the college requirement in non-Western culture.

Schedule Type: LEC  
Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0

ANTH 302 - Peoples and Cultures of Latin America

Credits: 3  
Not Repeatable for Credit  
Offered by Sociology and Anthropology.  
Examines Latin American cultures and selected aspects of historical record.

Fulfills Mason Core requirement in global understanding.

Prerequisite(s): ANTH 114, 60 credits, or permission of instructor.  
Notes: Fulfills the college requirement in non-Western culture.

Schedule Type: LEC  
Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0

ANTH 303 - Peoples and Cultures of the Andes

Credits: 3  
Not Repeatable for Credit  
Offered by Sociology and Anthropology.  
Examines issues and problems of selected regions of highland and lowland Andean South America. Provides knowledge of people of the Andes, their diverse cultural practices and adaptations, and the causes and consequences of conflicts.

Notes: Fulfills the college requirement in non-Western culture.

Schedule Type: LEC

ANTH 306 - Peoples and Cultures of Island Asia

Credits: 3  
Not Repeatable for Credit
Offered by Sociology and Anthropology.
Examines cultures of the Island Asia culture region, focusing on native cultures of Indonesia, Borneo, and the Philippines.

Fulfills Mason Core requirement in global understanding.

Notes: Fulfills the college requirement in non-Western culture.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ANTH 307 - Ancient Mesoamerica

Credits: 3
Not Repeatable for Credit
Offered by Sociology and Anthropology.
Examines the peoples and cultures of ancient Mesoamerica, including Olmec, Maya, Teotihuacan, and Aztec societies. Major topics include the rise of civilization, the development of the Mesoamerican cultural tradition, the growth of cities, trade, exchange, writing systems, political organization, religion, conflict, and the archaeological study of this indigenous heritage.

Fulfills Mason Core requirement in global understanding.

Prerequisite(s): ANTH 120, 60 credits, or permission of instructor.
Notes: Fulfills the college requirement in non-Western culture.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ANTH 308 - Peoples and Cultures of the Middle East

Credits: 3
Not Repeatable for Credit
Offered by Sociology and Anthropology.
Examines the anthropological literature on peoples and cultures of the Middle East, with particular attention to political and social change over the course of the 20th century.

Fulfills Mason Core requirement in global understanding.

Notes: Fulfills the college requirement in non-Western culture.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ANTH 309 - Peoples and Cultures of India
Examination of South Asia, with emphasis on India. Includes general overview of prehistory and history; impact of colonialism; contemporary Indian culture, including the changing relations of caste and class, family organization, and the roles of women, religion, and ideology; and current trends in economic development and socioeconomic differences in different parts of the country.

Fulfills Mason Core requirement in global understanding.

Notes: Fulfills the college requirement in non-Western culture.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ANTH 312 - Political Anthropology

Credits: 3
Not Repeatable for Credit
Offered by Sociology and Anthropology.
Examines cultural and ecological contexts of political structures and competition for power in selected societies; and cross-cultural and comparative approaches to study of political conflict, leadership, values, and symbolism.

Fulfills Mason Core requirement in global understanding.

Prerequisite(s): ANTH 114, 60 credits, or permission of instructor.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ANTH 313 - Myth, Magic, and Mind

Credits: 3
Not Repeatable for Credit
Offered by Sociology and Anthropology.
Examines religion as a cultural system. Topics include mythology, ritual, symbolism, and dogma. Emphasizes cross-cultural and predominantly non-Western material.

Fulfills Mason Core requirement in global understanding.

Notes: Fulfills the college requirement in non-Western culture.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
ANTH 314 - Zombies

Credits: 3
Not Repeatable for Credit
Offered by Sociology and Anthropology.
Explores how human beings across cultures have historically expressed social anxieties through references to the one particular manifestation of the undead: zombies, figures representing a state in which human beings are animate and affective in the world around them, but lack consciousness or free will.

Notes: Fulfills the college requirement in non-Western culture.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ANTH 315 - Socialization Processes: Family, Childhood, Personality in Cross-Cultural Perspective

Credits: 3
Not Repeatable for Credit
Offered by Sociology and Anthropology.
Examines aspects of the cultural transmission process in specific local cultures selected from various world culture regions, with emphasis on transmission of cultures.

Prerequisite(s): ANTH 114, 60 credits, or permission of instructor.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ANTH 316 - Peoples and Cultures of the Caribbean

Credits: 3
Not Repeatable for Credit
Offered by Sociology and Anthropology.
Examines the social, cultural, and political history of the Caribbean Sea islands and coastal Central and South American lowlands that collectively constitute the geographic and cultural region known as the Caribbean. Emphasizes the central role this region has historically played in creating a sense of global interconnectedness among diverse regions of the world.

Fulfills Mason Core requirement in global understanding.

Notes: Fulfills the college requirement in non-Western culture.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
ANTH 322 - Pirates, Conquest, and Death: Archaeology and Globalism since 1500

Credits: 3
Not Repeatable for Credit
Offered by Sociology and Anthropology.
Examines materials, theories, and methods of archaeology derived from and applied to historical sites, as they complement archival records.

Prerequisite(s): ANTH 120, 60 credits, or permission of instructor.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ANTH 323 - Digging and Dealing in the Dead: Ethics in Archaeology

Credits: 3
Not Repeatable for Credit
Offered by Sociology and Anthropology.
Survey of the ethical and legal dimensions of conducting archaeological research. Examines historical and contemporary debates about the responsibilities archaeologists have to the communities they study. Explores appropriate methods of artifact preservation, excavation, and the interpretation of data.

Notes: Fulfills the college requirement in non-Western culture.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ANTH 324 - Warfare, Violence, and Sacrifice in Antiquity

Credits: 3
Not Repeatable for Credit
Offered by Sociology and Anthropology.
Examines origin and nature of conflict in human society with an emphasis on the ancient past. Major topics include the possible role of violence in human evolution, cross-cultural studies of conflict in indigenous society, warfare in early states, and sacrifice as a ritual practice.

Prerequisite(s): ANTH 120, 60 credits, or permission of instructor.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ANTH 325 - Field Techniques in Archaeology

Credits: 3-6
Repeatable within Term for Credit
Offered by Sociology and Anthropology.
Intensive study of archaeological field techniques by directed group projects in site survey, site testing, recording techniques, and stratigraphy through discussions, demonstrations, and hands-on experience.

Prerequisite(s): ANTH 120, 60 credits, or permission of instructor.
Notes: May be repeated for a maximum 6 credits.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0

ANTH 330 - Peoples and Cultures of Selected Regions: Non-Western

Credits: 3
Not Repeatable for Credit
Offered by Sociology and Anthropology.
Examines cultures of a specific region such as Africa and the Middle East. Focuses primarily on non-Western cultures.

Prerequisite(s): ANTH 114, 60 credits, or permission of instructor.
Notes: Fulfills the college requirement in non-Western culture.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ANTH 331 - Refugees

Credits: 3
Not Repeatable for Credit
Offered by Sociology and Anthropology.
Introduction to causes and consequences of forced dislocation as a global issue. Covers formally recognized refugees, as well as people such as internally displaced persons and asylum seekers who are in refugee-like circumstances. Focuses on understanding the personal experiences of refugees and examining efforts on their behalf at national and international levels.

Fulfills Mason Core requirement in global understanding.

Prerequisite(s): ANTH 114, 60 credits, or permission of instructor.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ANTH 332 - Cross-Cultural Perspectives on Globalization

Credits: 3
Not Repeatable for Credit
Offered by Sociology and Anthropology.
Examines the varieties of cultural experience. Several cultures are studied in depth; with attention to local histories, global
contexts, and shifting perspectives on the practice of ethnography.

Fulfills Mason Core requirement in global understanding.

Notes: May be used for credit toward the BA in sociology. Fulfills the college requirement in non-Western culture.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**ANTH 340 - Comparative Perspectives on Immigration**

Credits: 3
Not Repeatable for Credit
Offered by Sociology and Anthropology.
Considers the dimensions and meanings of the immigrant experience in the United States, with a focus on the diversity of immigrants and refugees who have arrived during the past 30 years. Emphasis on the social context in which immigration occurs and on the bearing of institutional and cultural influences on patterns of adaptation, assimilation, and exclusion from the host society.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**ANTH 350 - Human Growth and Development**

Credits: 3
Not Repeatable for Credit
Offered by Sociology and Anthropology.
Introduces human developmental stages in terms of behavior, biology, and genetics. Addresses the history and methods of human growth research. Explores the environmental and socioeconomic influences on human growth. Investigates the evolution of uniqueness in human developmental stages of the human species in comparison of other primates.

Prerequisite(s): ANTH 135.
Schedule Type: LEC

**ANTH 355 - Human Origins**

Credits: 3
Not Repeatable for Credit
Offered by Sociology and Anthropology.
Explores the fossil evidence for human and primate evolution. Exposes students to evidence for the origins of mammals and primates, and to discussions of human evolution. Uses human fossils as tools to understand evolutionary relationships (phylogenetics), behavior, functional anatomy, and broader adaptation.

Prerequisite(s): ANTH 135.
Schedule Type: LEC
ANTH 357 - Bioarchaeology

Credits: 3
Not Repeatable for Credit
Offered by Sociology and Anthropology.
Introduces students to the study of human skeletal remains and their associated archaeological artifacts, focusing on using the human skeleton to address behavior, growth, stress, ritual, social complexity, diet, disease, and violence in the past. Uses the human body and associated artifacts to provide a detailed analysis of cultural transitions, expression of socioeconomic inequality, the origins of ritual complexity, violence, and disease.

Prerequisite(s): ANTH 135.
Schedule Type: LEC

ANTH 360 - Evolution, Sex, and Society

Credits: 3
Not Repeatable for Credit
Offered by Sociology and Anthropology.
Inquiry into the biological dimensions of humans as culture-bearing animals. Topics include altruism, aggression, primate social organization, morphology, comparative ethnology, and microevolutionary genetic differentiation.

Prerequisite(s): ANTH 135, 60 credits, or permission of instructor.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ANTH 363 - Humans, Disease, and Death

Credits: 3
Not Repeatable for Credit
Offered by Sociology and Anthropology.
Explores human health and disease from anthropological and evolutionary perspectives. Examines what a disease is, what causes them, how we have co-evolved with diseases, how disease patterns have changed over human history, and the future of disease.

Fulfills Mason Core requirement in Social and Behavioral Sciences.

Schedule Type: LEC

ANTH 365 - Human Variation

Credits: 3
Not Repeatable for Credit
Offered by Sociology and Anthropology.
Examines biological dimensions of human variation and the beginnings of race as a concept. Discusses evolution of human biodiversity in culturally distinct human groups related to environment, physiology, genetics, nutrition, and disease. Explores use of scientific analyses of human biodiversity.

**Prerequisite(s):** ANTH 135, 60 credits, or permission of instructor.

**Schedule Type:** LEC

**Hours of Lecture or Seminar per week:** 3

**Hours of Lab or Studio per week:** 0

**ANTH 366 - Food and Human Evolution**

Credits: 3
Not Repeatable for Credit
Offered by Sociology and Anthropology.
Explores the relationship between diet and human adaptation from biological, archaeological, cultural, and evolutionary perspectives. Examines how humans are unique in our ability to find and process a wide range of foods. Introduces agriculture as a co-evolutionary strategy between humans and other species.

**Schedule Type:** LEC

**ANTH 370 - Environment and Culture**

Credits: 3
Not Repeatable for Credit
Offered by Sociology and Anthropology.

Examines relationships among environment, culture, and human behavior with an emphasis on cultural ecological explanations in mainly non-Western contexts.
Designated a Green Leaf Course.

**Prerequisite(s):** ANTH 114, 60 credits, or permission of instructor

**Schedule Type:** LEC

**Hours of Lecture or Seminar per week:** 3

**Hours of Lab or Studio per week:** 0

**ANTH 372 - Cultures of Disaster, Risk, and Hope**

Credits: 3
Not Repeatable for Credit
Offered by Sociology and Anthropology.
By using ethnographic accounts on disasters in different cultural settings, this course explores cultural meanings of disasters as well as broader anthropological issues such as risk, power, modernity, memory, trauma, temporality, monster, nature, science and technology, and hope.

Fulfills Mason Core requirement in Social and Behavioral Sciences.
**ANTH 375 - Culture, Power, History**

Credits: 3  
Not Repeatable for Credit  
Offered by Sociology and Anthropology.  
Use of ethnographic, archaeological, linguistic, and documentary data, in light of anthropological theory, to interpret the past and processes of change among indigenous peoples throughout the world.

**Schedule Type:** LEC  
**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**ANTH 376 - Food and Culture**

Credits: 3  
Not Repeatable for Credit  
Offered by Sociology and Anthropology.  
Examines a variety of experiences through foods, which bring not only nutritional but also sociocultural debates to our table (e.g. identity, memory, senses, ethnicity, gender, geopolitics, climate change, and globalization). Focuses on both Western and non-Western cultures.

**Schedule Type:** LEC

**ANTH 377 - Mortuary Archaeology**

Credits: 3  
Not Repeatable for Credit  
Offered by Sociology and Anthropology.  
Focuses on the study of burial patterns and death rituals in antiquity by introducing students to the methods of burial excavation, examining the history of mortuary archaeology theory and engagement with processual and postprocessual schools of thought, and examining case studies from around the world to decode the complex symbolisms encoded in burial practices.

**Prerequisite(s):** ANTH 135  
**Schedule Type:** LEC  
**Hours of Lecture or Seminar per week:** 3  
**When Offered:** Spring

**ANTH 380 - Language and Culture**

Credits: 3  
Not Repeatable for Credit
Offered by Sociology and Anthropology.
Anthropological analyses of language behavior, origins, and change. Emphasizes the interplay of language, culture, anthropology, and linguistics.

Prerequisite(s): ANTH 114, 60 credits, or permission of instructor.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ANTH 381 - Medical Anthropology

Credits: 3
Not Repeatable for Credit
Offered by Sociology and Anthropology.
Surveys the discipline of medical anthropology, focusing on traditional medical beliefs and the diverse responses to modern scientific medicine in developing countries and among cultural minorities in the United States.

Prerequisite(s): ANTH 114, 60 credits, or permission of instructor.
Notes: Fulfills the college requirement in non-Western culture.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ANTH 382 - Urban Anthropology

Credits: 3
Not Repeatable for Credit
Offered by Sociology and Anthropology.
Uses tools and resources of social and cultural anthropology to study life in cities, including urban poverty, migration, urban planning, and discrimination. Case studies draw from different urban environments around the world, including Washington, D.C., and New York City.

Prerequisite(s): ANTH 114 and 60 credits, or permission of instructor.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ANTH 383 - Cities of the Global South

Credits: 3
Not Repeatable for Credit
Offered by Sociology and Anthropology.
Explores ethnographic perspectives on urban life in Latin America, Africa, and Asia in order to build a ground-up, comparative approach to studying cities. Examines the global connections between cities and critically evaluates north/south and first/third world paradigms.
Notes: Fulfills the college requirement in non-Western culture.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ANTH 390 - Theories, Methods, and Issues I

Credits: 3
Not Repeatable for Credit
Offered by Sociology and Anthropology.
First of a two-course sequence that reviews the major theoretical traditions and schools of thought in anthropology.

Prerequisite(s): ANTH 114 and 60 credits, including 6 credits of ANTH 300-level (or above) courses, or permission of instructor.
Notes: Required for anthropology majors.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ANTH 391 - Forensic Anthropology

Credits: 3
Not Repeatable for Credit
Offered by Sociology and Anthropology.
Human remains play key roles in medicolegal investigations. Provides an overview of contemporary forensic anthropology including age and sex estimation from human remains, estimation of the time since death, analysis of sharp force, blunt force, and gunshot trauma, mass disaster contexts, and the forensic archaeological recovery of buried remains.

Prerequisite(s): ANTH 135
Schedule Type: LEC

ANTH 392 - Forensic Anthropology Lab

Credits: 2
Not Repeatable for Credit
Offered by Sociology and Anthropology.
This lab class in the companion to ANTH 391. Involves hands-on lab exercises in the learning of methods in modern forensic anthropology, covering age and sex estimation from human remains, estimation of the time since death, analysis of traumatic trauma, individual identification, and archaeological recovery of buried remains.

Prerequisite(s): ANTH 135.
Corequisite(s): ANTH 590
Schedule Type: LAB
ANTH 395 - Work, Technology, and Society: An IT Perspective

Credits: 3
Not Repeatable for Credit
Offered by Sociology and Anthropology.
Introduction to the anthropology of work, technology, and society, with emphasis on information technology. Covers general conceptual issues of information technology and also involves specific practical exercises with computers, their operating systems, the logic of automated production, databases, and web-based communication. Attention also directed to social and ethical issues raised by contemporary information technology.

Fulfills Mason Core requirement in information technology (all).

Prerequisite(s): ANTH 114, 60 credits, or permission of instructor.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ANTH 396 - Issues in Anthropology: Social Sciences

Credits: 3
Repeatable within Term for Credit
Offered by Sociology and Anthropology.
Topic of contemporary interest in anthropology, focusing on social science topics of interest.

Fulfills Mason Core requirement in social and behavioral science.

Notes: May be repeated for a maximum of 18 credits when topic is different. Fulfills the college requirement in non-Western culture.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring, Summer

ANTH 398 - Study Abroad

Credits: 1-6
Repeatable within Degree for Credit
Offered by Sociology and Anthropology.
Field project or study abroad experience leading to the production of a written report.

Notes: May be repeated with permission of department for a maximum of 6 credits.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring, Summer
ANTH 399 - Issues in Anthropology

Credits: 3
Repeatable within Term for Credit
Offered by Sociology and Anthropology.
Topic of contemporary interest in anthropology, changing from semester to semester, and focusing on topics such as sex roles, anthropology and ethics, and primate social organization.

Prerequisite(s): ANTH 114 and 60 credits, or permission of instructor.
Notes: May be repeated for credit when topic is different.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ANTH 400 - Engaging the World: Anthropological Perspectives

Credits: 3
Repeatable within Term for Credit
Offered by Sociology and Anthropology.
Examines selected topics with emphasis on the integration of different kinds of knowledge and the balancing of alternative ways of assessing meaning and relevance. Topics usually drawn from issues of global economic processes, civic rights and responsibilities, ethics, museums, public policy, the environment, and migration.

Fulfills Mason Core requirement in synthesis.

Prerequisite(s): ANTH 114, 60 credits, or permission of instructor.
Notes: May be repeated for a maximum of 9 credits when topic is different.

Schedule Type: SEM
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ANTH 420 - Interpretation in Archaeology

Credits: 3
Not Repeatable for Credit
Offered by Sociology and Anthropology.
Explores theoretical and methodological issues in archaeology. Considers patterns and contexts of archaeological remains, analytic problems, and interpretation of material culture.

Prerequisite(s): 6 credits of anthropology including ANTH 120, or permission of instructor.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
ANTH 427 - Historic Cemetery Survey

Credits: 4
Not Repeatable for Credit
Offered by Sociology and Anthropology.
Explores demographic, stylistic, and religious aspects of historic cemeteries. Students learn to survey, record, and analyze gravestone data through field projects.

Prerequisite(s): ANTH 120, or permission of instructor.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 4
Hours of Lab or Studio per week: 0

ANTH 430 - Research Methods in Archaeology

Credits: 3
Not Repeatable for Credit
Offered by Sociology and Anthropology.
Studies archaeological research process through discussions of current archaeological methodologies and student participation in designing and critiquing research projects.

Prerequisite(s): ANTH 120, 60 credits, or permission of instructor.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ANTH 435 - Special Projects: Archaeology and Biological Anthropology

Credits: 1-3
Not Repeatable for Credit
Offered by Sociology and Anthropology.
Lab or field project leading to a written report of the research.

Prerequisite(s): ANTH 120 or 135, 60 credits, and permission of instructor.
Notes: Research and paper completed under instructor's guidance.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 1-12
Hours of Lab or Studio per week: 0

ANTH 436 - Special Projects: Archaeology and Biological Anthropology

Credits: 1-3
Not Repeatable for Credit
Offered by Sociology and Anthropology.
Lab or field project leading to a written report of the research.
ANTH 440 - Applied Anthropology

Credits: 3
Not Repeatable for Credit
Offered by Sociology and Anthropology.
Examines the needs and problems of communities and organizations and develops professional skills for a career in applied anthropology. Topics include the history of applied anthropology, research methods and ethics, fields in which applied anthropologists work, career options, and professionalization. Students prepare a career portfolio and other documents common in the workplace for applied anthropologists.

Prerequisite(s): ANTH 114, 60 credits, or permission of instructor.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

ANTH 450 - Qualitative Methods: Nonstatistical Approaches in Culture and Social Research

Credits: 3
Not Repeatable for Credit
Offered by Sociology and Anthropology.
Explores some of the most useful nonquantitative research techniques in social sciences and offers practice in their application.

Prerequisite(s): 60 credits and 6 credits of anthropology including ANTH 114, or permission of instructor.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ANTH 488 - Gender, Sexuality, and Culture

Credits: 3
Not Repeatable for Credit
Offered by Sociology and Anthropology.
Examines how gender, sexuality, race, and class come together as analytically distinct, yet practically intertwined, systems of meaning and practice. Examples highlight questions of political economy and history while focusing on specific ethnographic or historical readings.

Prerequisite(s): 60 hours and ANTH 340 or permission of instructor.
ANTH 490 - Theories, Methods, and Issues II

Credits: 3
Not Repeatable for Credit
Offered by Sociology and Anthropology.
Second of a two-course sequence that reviews major theoretical traditions and schools of thought in anthropology.

Fulfills writing intensive requirement in the major.

Prerequisite(s): 60 hours and 9 hours of ANTH, including ANTH 390, or permission of instructor.
Notes: Required for anthropology majors and usually taken as a senior seminar.

ANTH 492 - Contemporary Controversies in Anthropology

Credits: 3
Not Repeatable for Credit
Offered by Sociology and Anthropology.
Examines recent important works, issues, and controversies in anthropology.

Prerequisite(s): 60 credits and 9 credits of anthropology including ANTH 390, or permission of instructor.

ANTH 495 - Internship

Credits: 1-6
Repeatable within Degree for Credit
Offered by Sociology and Anthropology.
Supervised project in applying anthropology in relevant settings including public and historical archaeology, developmental anthropology, museums, non-profit organizations, advocacy, communications, or consulting organizations.

Prerequisite(s): 60 credits or permission of instructor.
Notes: May be repeated for a maximum of 6 credits. Students must complete 45 hours of work at the internship site for each credit.
ANTH 496 - Evolutionary Theory

Credits: 4
Not Repeatable for Credit
Offered by Sociology and Anthropology.
Considers evolution as a biological as well as cultural concept. Parallels and contrasts among conceptual approaches allow a critique of the potential of evolution as a unifying biosocial theory.

Prerequisite(s): 60 credits and 9 credits of anthropology, or permission of instructor.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 2

ANTH 499 - Independent Research

Credits: 1-12
Repeatable within Term for Credit
Offered by Sociology and Anthropology.
Individual research on a topic to be organized in advance by student and instructor.

Schedule Type: IND
Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 0

ANTH 535 - Anthropology and the Human Condition: Seminar I

Credits: 3
Not Repeatable for Credit
Offered by Sociology and Anthropology.
Examines some of the major theorists of 19th- and early 20th-century cultural theory. Marx, Freud, Durkheim, and Weber are surveyed as foundational thinkers for reading the works of such 20th-century theorists as Boas, Malinowski, Benedict, and Sapir.

Prerequisite(s): Graduate standing or permission of instructor.
Schedule Type: LEC, SEM
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ANTH 536 - Anthropology and the Human Condition: Seminar II

Credits: 3
Not Repeatable for Credit
Offered by Sociology and Anthropology.
Examines contemporary theorists of anthropology, covering ongoing debates over epistemology and the multiple strands that
inform anthropological theory and practice.

**Prerequisite(s):** ANTH 535.
**Schedule Type:** SEM
**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0

### ANTH 555 - Policy and Culture

Credits: 3  
Not Repeatable for Credit  
Offered by Sociology and Anthropology.  
Examines the relevance of cultural processes to policymaking and the culture of policymaking organizations. Topics include development, welfare policy, environmental and energy policy, regulation and risk; health care and immigration policy; and the war on drugs.

**Schedule Type:** SEM  
**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

### ANTH 570 - Andean Archaeology

Credits: 3  
Not Repeatable for Credit  
Offered by Sociology and Anthropology.  
Examines 12,000 years of pre-Hispanic cultures of the Andean region of western South America - that constituted the most remarkable complex civilizations of the New World. Focuses on the development and key achievements of the Chavin, Paracas, Cupisnique, Moche, Sican, Nasca, Chimú, Wari, and Inka cultures, and the nature, priorities, and accomplishments of scientific Andean archaeology.

**Schedule Type:** LEC  
**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

### ANTH 576 - American Cultures

Credits: 3  
Not Repeatable for Credit  
Offered by Sociology and Anthropology.  
Examines U.S. cultures and explores concept of an American culture. Course readings and discussions explore underpinnings of the American experience, document broad historical shifts, and detail the experience of diverse groups of Americans, thus forming the basis for a critical, analytical, and comparative discussion of American life and life in America.

**Prerequisite(s):** Graduate standing, or permission of instructor.  
**Schedule Type:** LEC  
**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0
ANTH 577 - Mortuary Archaeology

Credits: 3
Not Repeatable for Credit
Offered by Sociology and Anthropology.
Focuses on the study of burial patterns and death rituals in antiquity by introducing students to the methods of burial excavation, examining the history of mortuary archaeology theory and engagement with processual and postprocessual schools of thought, and examining case studies from around the world to decode the complex symbolisms encoded in burial practices.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ANTH 580 - Environmental Anthropology

Credits: 3
Not Repeatable for Credit
Offered by Sociology and Anthropology.

Covers major theoretical trends and ethnographic works in environmental anthropology, focusing on the frameworks developed and used by environmental anthropologists, including cultural ecology, ecological anthropology, environmentalism, political ecology, new ecology, and science and technology studies. Explores how environmental anthropologists have contributed to broader debates about modernity, globalization, power, kinship, science and technology, and human-environmental relations. Designated a Green Leaf Course.

Prerequisite(s): Graduate standing, or permission of instructor.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ANTH 582 - Human Osteology

Credits: 3
Not Repeatable for Credit
Offered by Sociology and Anthropology.
Introduces students to the methods of modern human skeletal analysis in bioarchaeological and forensic science. Covers introductory human skeletal and dental gross anatomy and describes analytical techniques spanning including age and sex estimation, osteometry, and paleopathology.

Corequisite(s): ANTH 583.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
ANTH 583 - Human Osteology Lab

Credits: 2
Not Repeatable for Credit
Offered by Sociology and Anthropology.
Laboratory course associated with ANTH 582.

Corequisite(s): ANTH 582.

Schedule Type: LAB
Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 3

ANTH 584 - Paleopathology

Credits: 3
Not Repeatable for Credit
Offered by Sociology and Anthropology.
Provides an introduction to the field of paleopathology which involves identification of pathological conditions in human skeletal remains, and reconstruction of the natural history and co-evolution of disease with humans. Covers the differential diagnosis and history of infectious pathogens such as tuberculosis and syphilis, skeletal trauma, oral diseases, metabolic abnormalities neoplasms developmental defects joint disease and more.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ANTH 585 - Bioarchaeology

Credits: 3
Not Repeatable for Credit
Offered by Sociology and Anthropology.
Explores the cutting-edge methods of bioarchaeological science and reconstructs ancient living worlds from the remarkable information encoded in bones via patterns of demography, disease, diet, trauma, violence, lifestyle, social structures, sex and gender, ethnicity, and identities on a global scale and over the last 10,000 years of history.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ANTH 590 - Forensic Anthropology

Credits: 3
Not Repeatable for Credit
Offered by Sociology and Anthropology.
Provides an overview of contemporary forensic anthropology. Topics include: age and sex estimation from human remains,
estimation of the postmortem interval, analysis of sharp force, blunt force, and gunshot trauma, individual identification, forensic
taphonomy, mass disaster contexts, and the forensic archaeological recovery of buried remains.

Corequisite(s): ANTH 591.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ANTH 591 - Forensic Anthropology Lab

Credits: 2
Not Repeatable for Credit
Offered by Sociology and Anthropology.
Laboratory course associated with ANTH 590. Involves hands-on lab exercises in the learning of methods in modern forensic
anthropology, covering age and sex estimation from human remains, estimation of postmortem intervals, analyses of traumatic
trauma, individual identification, forensic taphonomy, and archaeological recovery of buried remains.

Corequisite(s): ANTH 590.

Schedule Type: LAB
Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 2

ANTH 600 - Anthropology and Museums

Credits: 3
Not Repeatable for Credit
Offered by Sociology and Anthropology.
Explores the changing relations between culture, indigenous groups, representation and knowledge by examining how meaning is
created and conveyed in museums and exhibits.

Schedule Type: LEC, SEM
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring, Summer

ANTH 615 - Ritual and Power in Social Life

Credits: 3
Not Repeatable for Credit
Offered by Sociology and Anthropology.
Domains of religion and politics are conjoined by questions of power: its deployment, distribution, and forms of resistance it
genenders. Course investigates connections among religious thought, ritual practice, and political action by drawing on a variety of
theoretical orientations in the social sciences including structuralism, semiotics, psychoanalysis, and performance theory.
Prerequisite(s): Graduate standing, or permission of instructor.

ANTH 616 - Anthropology of the City

Credits: 3
Not Repeatable for Credit
Offered by Sociology and Anthropology.
Examines classic and contemporary works in urban theory, in light of broader scholarly discussions of modernity and globalization. Uses a case-study approach to analyze topics such as: public and private space, citizenship and governance, architecture and design, housing, transportation, formal and informal settlements, and the contest over space and environmental resources in cities around the world.

Notes: Course may be offered fall or spring.

ANTH 617 - Political Economy

Credits: 3
Not Repeatable for Credit
Offered by Sociology and Anthropology.
Human societies have always engaged in complex political relations and economic exchanges. The cultural meanings people create are shaped by, and in turn shape, systems of power. Political economy is the attempt to understand the relationship between politics and economics, at the juncture of local meanings and global histories. Course reviews major works and models of political economy, especially as they relate to social and cultural analysis.

Prerequisite(s): Graduate standing, or permission of instructor.

ANTH 620 - Theory: Archaeology and Biological Anthropology

Credits: 3
Not Repeatable for Credit
Offered by Sociology and Anthropology.
Examines theoretical approaches in archaeology, paleoanthropology, and biological anthropology.

Prerequisite(s): Course in archaeology, or permission of instructor.
ANTH 631 - Refugees in the Contemporary World

Credits: 3
Not Repeatable for Credit
Offered by Sociology and Anthropology.
Explores major refugee flows since the mid-20th century, emphasizing mechanisms for providing assistance, asylum, and resettlement.

Prerequisite(s): Graduate standing.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ANTH 632 - International Migration in Comparative Perspective

Credits: 3
Not Repeatable for Credit
Offered by Sociology and Anthropology.
International migration in the contemporary world, focusing on the full range of economic, political, and social reasons for migration and the effects of different national policies on that process.

Prerequisite(s): Graduate standing or permission of instructor.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ANTH 635 - Regional Ethnography

Credits: 3
Repeatable within Degree for Credit
Offered by Sociology and Anthropology.
In-depth study of peoples and cultures of a specific world region (Latin America, East Asia, the Pacific, or United States). Content may include cultures defined by diaspora, migration, and other global forces and processes.

Prerequisite(s): Graduate standing, or permission of instructor.
Notes: May be repeated for a maximum of 6 credits when topic is different.
Schedule Type: SEM
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ANTH 640 - Applied Anthropology
Explores the application of contemporary anthropological ideas, theories, and methods to find solutions to practical problems as defined by various organizations and institutions including business, government, nongovernmental organizations, and various institutions.

**Prerequisite(s):** Graduate standing, or permission of instructor.

**ANTH 650 - Methods in Anthropology**

Credits: 3
Not Repeatable for Credit
Offered by Sociology and Anthropology.
Reviews and examines major research methods commonly employed in cultural anthropological field study, with emphasis on ethnographic research design and the use of standard ethnographic techniques. Includes practice in designing ethnographic research project and using ethnographic methods and techniques in a field setting.

**Prerequisite(s):** Graduate standing, or permission of instructor.

**ANTH 655 - Nationalism, Transnationalism, and States: Local and Global Perspectives**

Credits: 3
Not Repeatable for Credit
Offered by Sociology and Anthropology.
Explores different approaches to understanding the interaction of nationalism, transnationalism, and states given the apparently simultaneous dissolution of demographic, economic and cultural borders, and modernist social science paradigms.

**Prerequisite(s):** Graduate standing, or permission of instructor.

**ANTH 670 - Regional Studies in Archaeology**

Credits: 3
Not Repeatable for Credit
Offered by Sociology and Anthropology.
Regional survey of specific culture area in archaeology to be chosen by student and instructor.

**Prerequisite(s):** Permission of instructor.
Schedule Type: IND
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ANTH 677 - Anthropology and History

Credits: 3
Not Repeatable for Credit
Offered by Sociology and Anthropology.
Considers anthropological approaches to the study of history, the ways in which people construct their histories, and social historians' effort to incorporate anthropological and ethnographic orientations into their accounts. Attention to tensions between culture and power in the constitution of historiography and to methodological challenges of interpreting qualitative and quantitative data.

Prerequisite(s): Graduate standing, or permission of instructor.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ANTH 684 - Independent Study in Sociocultural Anthropology

Credits: 1-6
Repeatable within Degree for Credit
Offered by Sociology and Anthropology.
Directed reading and research on a specific topic, agreed on by student and faculty member, resulting in a written project.

Notes: May be repeated for maximum of 6 credits.

Schedule Type: IND
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
Grading: Graduate Special

ANTH 687 - Medical Anthropology

Credits: 3
Not Repeatable for Credit
Offered by Sociology and Anthropology.
Explores the wide variety of cultural interpretations of health, illness, and curing. Examines a number of different curing systems, both traditional and modern, and compares them with cosmopolitan biomedicine. Several book-length case studies cover a wide variety of cultural groups, health topics, and theoretical orientations.

Prerequisite(s): Graduate standing, or permission of instructor.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
ANTH 690 - Internship

Credits: 3-6
Repeatable within Term for Credit
Offered by Sociology and Anthropology.
All internships must be approved by faculty advisor to ensure suitability to the student's course of study. Introduction to applied anthropology through approved work and study at a museum, institute, agency, or other approved site.

Prerequisite(s): Graduate standing in anthropology with 3 credits of methods and 12 credits in program, or with permission of primary advisor.
Notes: May be repeated for maximum 6 credits.

Schedule Type: INT
Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 0
Grading: Graduate Special

ANTH 698 - Study Abroad

Credits: 1-6
Repeatable within Degree for Credit
Offered by Sociology and Anthropology.
Intended for participation in formally organized course offered by Center for Global Education or an overseas institution or engagement in a field project related to the Master's thesis or project.

Notes: May be repeated for a maximum of 6 credits.

Schedule Type: IND

ANTH 699 - Contemporary Issues in Sociocultural Anthropology

Credits: 3
Repeatable within Term for Credit
Offered by Sociology and Anthropology.
Explores current issues and debates in sociocultural anthropology.

Prerequisite(s): Graduate standing, or permission of instructor.
Notes: May be repeated for a maximum of 6 credits when topic is different.

Schedule Type: SEM
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ANTH 721 - Culture, Power, and Conflict
ANTH 750 - Ethnographic Genres

Credits: 3
Not Repeatable for Credit
Offered by Sociology and Anthropology.
"Genre" refers to kind, sort, or type. Course surveys the various modes of representation anthropologists use in elaborating participant-observation field work, as well as how these styles refer to and construct ethnographic "others." Explores a set of central philosophical and methodological issues in social-cultural anthropology such as framing, perspective, authority, reflexivity, and politics of style.

Prerequisite(s): Graduate standing, or permission of instructor.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ANTH 769 - Gender, Sexuality, and Culture

Credits: 3
Not Repeatable for Credit
Offered by Sociology and Anthropology.
Utilizes interdisciplinary material within an overall anthropological perspective on body meanings and practices. Readings highlight questions of political economy and history, focusing on specific ethnographic or historical contexts, to develop an understanding of how gender, sexuality, race, and class become analytically distinct yet intertwined systems of meaning and practice.

Prerequisite(s): Graduate standing, or permission of instructor.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ANTH 796 - Master's Research Project

Credits: 1-6
Repeatable within Degree for Credit
Offered by Sociology and Anthropology.
Capstone research project conducted under the supervision of a faculty project director and project evaluation committee. Project
should be a substantial contribution to anthropological knowledge and is in lieu of a thesis.

**Prerequisite(s):** Approval of project proposal.

**Notes:** Students must initially enroll for a minimum of 3 credits of ANTH 796 and maintain continuous enrollment in 796 until project is submitted. A maximum of 6 credits of ANTH 796 may be applied to the degree.

**Schedule Type:** IND

**Hours of Lecture or Seminar per week:** 1-6

**Hours of Lab or Studio per week:** 0

**Grading:** Satisfactory/No Credit only

**ANTH 798 - Thesis or Project Proposal**

Credits: 3

Repeatable within Degree for Credit

Offered by Sociology and Anthropology.

Work on research proposal that forms basis for master's thesis or project.

**Prerequisite(s):** Completion of 15 credits, including all other core courses.

**Schedule Type:** IND

**Hours of Lecture or Seminar per week:** 3

**Hours of Lab or Studio per week:** 0

**Grading:** Satisfactory/No credit only

**When Offered:** Fall, Spring, Summer

**ANTH 799 - Master's Thesis**

Credits: 1-6

Repeatable within Degree for Credit

Offered by Sociology and Anthropology.

Master's thesis research and writing under direction of thesis committee.

**Prerequisite(s):** Approval of thesis proposal.

**Notes:** Students must register for a minimum of three credit hours in their first semester of 799 and maintain continuous enrollment in 799 while writing and submitting a thesis. A maximum of 6 credits of 799 may be applied to the degree.

**Schedule Type:** IND

**Hours of Lecture or Seminar per week:** 3-6

**Hours of Lab or Studio per week:** 0

**Grading:** S/NC

**Applied Information Technology (AIT)**

Offered by the Volgenau School of Engineering
AIT 500 - Quantitative Foundations for Information Systems Analysis

Credits: 3
Not Repeatable for Credit
Offered by Information Sciences and Technology
Provides common background in basic quantitative areas focused on decision making, information processing, and telecommunications. Topics include review of precalculus, introduction to matrix algebra, problems in optimization, and introduction to probability and statistics.

Prerequisite(s): MATH 108 or equivalent
Notes: Does not fulfill any VSITE graduate degree requirement.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

AIT 504 - Issues of Cyberspace

Credits: 3
Not Repeatable for Credit
Offered by Information Sciences and Technology
Student panels explore, report on, and make recommendations regarding major and novel problems presented by the explosive and intrusive growth of ‘cyberspace.’ Legal, ethical, financial, security, utility and value to users and organizations, feasibility, and desirability aspects are considered. Each semester features a major topic area.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

AIT 510 - Learning Technology: Theory, Application and Design

Credits: 3
Not Repeatable for Credit
Offered by Information Sciences and Technology
Introduces students to theory, application and design of learning technologies, discussing why technology should be used for learning and education, how it should be applied, and how one can design digital tools to improve learning and education. Use of data, analytics, and emerging applications such as social media will also be discussed.

Prerequisite(s): (IT 415 or equivalent) and (SYST 469 or equivalent).
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring

AIT 521 - Software Engineering Essentials
Credits: 3
Not Repeatable for Credit
Offered by Information Sciences and Technology
Provides an overview of essential topics in software engineering, including problem solving with computers, requirements, software design, software development, testing, verification, validation, usability, and management. Discuss concepts related to building software, including data structures, object-oriented programming, event handling in GUIs, and web application technologies and how these concepts are handled in various languages, but without requiring the students to program.

Equivalent to SWE 521 (2015-2016 Catalog).

Prerequisite(s): Graduate standing.
Notes: This course does not count towards MS programs offered in the Computer Science Department and cannot be used to satisfy course requirements for PhD IT students.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring

AIT 524 - Database Management Essentials

Credits: 3
Not Repeatable for Credit
Offered by Information Sciences and Technology
Relational database management systems. Covers logical and physical database design; query languages and database programming; and examines commercial systems. Computing lab.

Prerequisite(s): Graduate Standing in MS, AIT program or permission of instructor.
Notes: This course does not count towards MS programs offered in the Computer Science Department and cannot be used to satisfy course requirements for PhD IT students.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring

AIT 580 - Analytics: Big Data to Information

Credits: 3
Not Repeatable for Credit
Offered by Information Sciences and Technology
Course provides an overview of Big Data and its use in commercial, scientific, governmental and other applications. Topics include technical and non-technical disciplines required to collect, process and use enormous amounts of data available from numerous sources. Lectures cover system acquisition, law and policy, and ethical issues. It includes brief discussions of technologies involved in collecting, mining, analyzing and using results.

Prerequisite(s): Graduate Standing.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
AIT 581 - Problem Formation and Solving in Big Data

Credits: 3
Not Repeatable for Credit
Offered by Information Sciences and Technology
The course explores challenges facing analysts exploiting Big Data or Bespoke Data in combination with Big Data, and looks at solutions, mindful of the fact that our intellectual and practical practices are based entirely on the 5000 year old Bespoke Data paradigm, and considering that Big Data practices are too recent to lead to comparable Big Data tools and practices.

Prerequisite(s): Graduate standing.
Notes: Course may be used in other certificate and degree programs.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

AIT 582 - Applications of Metadata in Complex Big Data Problems

Credits: 3
Not Repeatable for Credit
Offered by Information Sciences and Technology
Course explores technical and analytical issues, solutions and gaps in processing large volumes of data by leveraging metadata. The goal is to find "facts of interest" (Intelligence) that represent threats to, or even opportunities for, a given industry or domain (e.g., healthcare, finance or national intelligence/national defense) where there is limited time.

Prerequisite(s): Graduate standing.
Notes: Course may be used in other Certificate or Degree programs.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

AIT 590 - Topics in Applied Information Technology

Credits: 3
Repeatable within Term for Credit
Offered by Information Sciences and Technology
Topics in the application of information technology. Students are expected to participate actively through class dialogues and the crafting of IT solutions to specific problem areas. Course cannot be used to satisfy course requirements for PhD IT students.

Prerequisite(s): Graduate standing and permission of instructor.
Schedule Type: LEC
AIT 597 - Developing IT Leaders of Integrity

Credits: 3  
Not Repeatable for Credit  
Offered by Information Sciences and Technology  
Considers the cultural and organizational influences and focuses on leadership's ethical dimensions. Students identify their core values, study the attributes of effective and toxic leaders, and examine the difference between managing and leading through selected readings, discussions, team projects, in-class activities and guest presentations. Students practice and receive in-class coaching to hone their leadership skills.

Prerequisite(s): Registered student in MS, Applied IT or by instructor's permission.  
Notes: Course cannot be used to satisfy course requirements for PhD IT students.

Schedule Type: LEC  
Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0  
When Offered: Fall, Spring

AIT 601 - Foundations of Applied Information Technology

Credits: 3  
Not Repeatable for Credit  
Offered by Information Sciences and Technology  
Introduces students to foundational scholarship in applied information technology. Reviews seminal readings and applications of information technology. Students learn about the interdisciplinary history of the field, are introduced to influential scholars and important topics, and get an overview of key theoretical paradigms in applied information technology.

Prerequisite(s): Admission to a graduate program in Applied IT.  
Schedule Type: LEC  
Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0  
When Offered: Fall, Spring

AIT 602 - Introduction to Research in Applied Information Technology

Credits: 3  
Not Repeatable for Credit  
Offered by Information Sciences and Technology  
Introduces students to research methods required to conduct original research in applied information technology. Reviews different research approaches and methods, discusses issues of data collection, validity reliability, data analysis, and interpretation. Throughout, seminal research papers will be used as case studies and students will also learn to read and understand research.
Prerequisite(s): Admission to a graduate program in Applied IT.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

AIT 603 - Research Practice

Credits: 3
Not Repeatable for Credit
Offered by Information Sciences and Technology
Complementing AIT 602's treatment on the nature of AIT research, this course examines various pragmatic aspects of conducting research, including: research venues, public & private funding sources, grant proposals, publishing, regulation and reporting obligations, operating labs and centers, legal and intellectual property issues, collaboration nationally and internationally.

Prerequisite(s): AIT 602 or equivalent.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

AIT 614 - Data Engineering Emerging Technologies

Credits: 3
Not Repeatable for Credit
Offered by Information Sciences and Technology
Hands-on course discusses emerging technologies for big data analytics and their applications in real-world environments. Students apply learned concepts and best practices using several emerging technology tools simulating development, implementation, and use of big data analytical systems. Topics include RDBMS, SQL, NoSQL, R, MapReduce Programming paradigm, Hadoop, HDFS, HIVE, PIG and others in the Hadoop ecosystem for unstructured data analytics.

Prerequisite(s): IT 314 or equivalent.
Schedule Type: LEC
When Offered: Fall, Spring

AIT 622 - Determining Needs for Complex Big Data Systems

Credits: 3
Not Repeatable for Credit
Offered by Information Sciences and Technology
Explores Big Data Systems Engineering methodologies for consensus in system needs among stakeholders having different perspectives, competing objectives. Course goal is more efficient delivery of results coming from the rigor of traditional methods. Traditional methods establish foundation for extensions to non-traditional, streamlining methods. Principles, explained and demonstrated, are applied by students to a case study based project and individual assignments/labs.

Prerequisite(s): Admission to a graduate program in Applied IT or Health Informatics, or permission of the instructor.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
**AIT 624 - Semantic Web Tools for Multimedia Applications**

Credits: 3  
Not Repeatable for Credit  
Offered by Information Sciences and Technology  
Methods, languages, and tools related to the knowledge technologies for Multimedia Applications from an applied perspective with the focus on relevant research problems. Combines survey lectures with in-depth presentation of relevant issues through seminars, and hands-on experience with existing technologies and data sources.  
**Prerequisite(s):** IT 306 and IT 481 and MATH 125.  
**Schedule Type:** LEC  
**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall, Spring

**AIT 631 - Advanced Decision Making in IT Ventures**

Credits: 3  
Not Repeatable for Credit  
Offered by Information Sciences and Technology  
The course provides students with an understanding of decision making processes and methodologies needed to successfully run IT companies. Topics include: assessment of IT ideas and investments; measuring IT investments performance; forecasting methods; multi-criteria information technology decision making methods; decision support systems; value analysis and benefit/risk methodologies.  
**Prerequisite(s):** IT 496 or equivalent  
**Schedule Type:** LEC  
**Hours of Lecture or Seminar per week:** 3  
**When Offered:** Fall, Spring

**AIT 650 - Distributed Systems and Overlay Networking**

Credits: 3  
Not Repeatable for Credit  
Offered by Information Sciences and Technology  
This graduate level seminar examines advanced networking research topics and potential applications, including distributed systems, peer-to-peer and overlay net workings, routing, protocols, replication strategies, tree formation, resource sharing, fault tolerance, and network modeling.  
**Prerequisite(s):** This course requires thorough understanding of computer networking, IP and TCP protocols, congestion control, queuing, and addressing and routing mechanisms.  
**Schedule Type:** LEC  
**Hours of Lecture or Seminar per week:** 3  
**When Offered:** Fall, Spring
AIT 665 - Managing Information Technology Programs in the Federal Sector

Credits: 3
Not Repeatable for Credit
Offered by Information Sciences and Technology
This case study-grounded seminar introduces student team members to the unique complexities of the Federal Sector, including Congressional and Executive Branch oversight, reporting, justifying and sustaining annually very large IT programs. Course cannot be used to satisfy course requirements for PhD IT students.

Prerequisite(s): Permission of instructor.
Schedule Type: SEM
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

Credits: 3
Not Repeatable for Credit
Offered by Information Sciences and Technology
Offers a survey of security and privacy issues in Cloud Computing systems, along with an overview of current solutions and available technologies. Examines cloud computing models and threat model and security issues related to data and computation outsourcing, and explores practical applications of secure Cloud Computing.

Prerequisite(s): Restricted to MS, Applied IT program majors or permission of instructor.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

AIT 671 - Information System Infrastructure Lifecycle Management

Credits: 3
Not Repeatable for Credit
Offered by Information Sciences and Technology
Examines information system infrastructure lifecycle management including the audit process, IT governance and best practices, system and infrastructure control, IT service delivery and support, protection of information assets, physical security, business and disaster recovery.

Prerequisite(s): Registration in MS, Applied IT program or permission of Instructor.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring.
AIT 672 - Identity Management for Federal IT

Credits: 3
Not Repeatable for Credit
Offered by Information Sciences and Technology
Provides a hands-on in-depth description of the principles, concepts, and technology of Identity Management. Topics include digital identity, credentials, authentication, authentication protocols, trust frameworks, cryptography and digital signatures, identity tokens (smart cards), and smart card-based identity verification and authorization applications.

Prerequisite(s): Admission into MS AIT program or permission of instructor.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

AIT 673 - Cyber Incident Handling and Response

Credits: 3
Not Repeatable for Credit
Offered by Information Sciences and Technology
Examines Computer Emergency Response Team (CERT), including Incident Response, Vulnerability Assessment, Incident Analysis, Malcode Analysis, Forensics and Investigations. Includes exercises in CERT operations and a final Incident Handling project.

Prerequisite(s): AIT 670 or permission of instructor.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

AIT 674 - Research, Development and Technology in the Intelligence Community

Credits: 3
Not Repeatable for Credit
Offered by Information Sciences and Technology
Provides overview of research, development and engineering components of agencies within U.S. Intelligence Community, how they prioritize research and deliver products used in collection, processing, and dissemination of information. Examines different types of technical intelligence and related phenomenologies employed in their collection. Highlights evolution of technologies used in gathering and discusses new and emerging trends in intelligence collection and analysis.

Prerequisite(s): Graduate standing.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

AIT 675 - Overview of the National Intelligence Community
Credits: 3
Not Repeatable for Credit
Offered by Information Sciences and Technology
Introduces structure and basic operations of the U.S. national intelligence community (IC). Students learn general information about organization, structure and missions of the IC and about the tools and techniques employed by intelligence agencies of the U.S. and other intelligence services. Surveys the range of intelligence problems and challenges, types of data and data collectors employed, and how information is processed, analyzed, and disseminated.

Prerequisite(s): Admission into the MS-AIT degree program or permission of instructor.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

AIT 676 - Intelligence Technologies, Research and Development in the Intelligence Community

Credits: 3
Not Repeatable for Credit
Offered by Information Sciences and Technology
Overview of R & D and engineering components of agencies within U.S. Intelligence. Describes: process by which these agencies prioritize research and deliver products to collect, process and disseminate information; types of technical intelligence and the related phenomenologies employed in their collection; evolution of technologies used in gathering, and; discusses new and emerging trends in intelligence collection and analysis.

Prerequisite(s): Admission into the MS-AIT degree program or permission of instructor.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

AIT 677 - Intelligence Analysis Methods

Credits: 3
Not Repeatable for Credit
Offered by Information Sciences and Technology
Presents various intelligence analysis methods addressing basic topics: substance-blind analysis of evidence and its credentials, chain of custody analysis, combination of evidence, divide and conquer paradigm for analysis, sources of uncertainty, competing hypotheses and analyses. Discusses case studies in various domains following a hands-on approach using educational analysis tools.

Prerequisite(s): Admission into the MS-AIT degree program or permission of instructor.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring
AIT 678 - National Security Challenges

Credits: 3
Not Repeatable for Credit
Offered by Information Sciences and Technology
Presents the process by which decision makers identify and prioritize intelligence problems and allocate collection and analysis resources to their solutions. Discusses nation-state issues such as Russia, China, and Iran, and transnational issues such as terrorism, weapons proliferation, narcotics and smuggling, and cyber conflict and the intelligence shortcomings and needs in regard to these problems.

Prerequisite(s): Admission into the MS-AIT degree program or permission of instructor.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

AIT 679 - Law and Ethics of Big Data

Credits: 3
Not Repeatable for Credit
Offered by Information Sciences and Technology
Examines Law, Ethics and Policy in Big Data operations.

Prerequisite(s): Admission to the MS, AIT program or permission of instructor.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Summer

AIT 680 - Social Media in Homeland Security Operations

Credits: 3
Not Repeatable for Credit
Offered by Information Sciences and Technology
Overview of social media uses by Homeland Security agencies and U.S. adversaries, in both active and passive modes, including recruitment and disinformation. Examines regulations and laws governing social media usage. Explores future technological developments.

Prerequisite(s): Registered students in Homeland Security Technology or permission of Instructor.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Summer, Spring

AIT 685 - Capstone Seminar
Credits: 3  
Not Repeatable for Credit  
Offered by Information Sciences and Technology

Student team-based experience grounded on solid understanding of the proceeding nine courses mastered in each of the program's three areas of study. Teams analyze cases of mega-system programs from the 20th Century. Course cannot be used to satisfy course requirements for PhD IT students.

Prerequisite(s): Completion of all core courses and at least nine credits of concentration courses in the program, or permission of department.

Schedule Type: SEM  
Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0  
When Offered: Fall, Spring, Summer

AIT 686 - Capstone: Student Design Solution

Credits: 3  
Not Repeatable for Credit  
Offered by Information Sciences and Technology

Synthesis course of MS Homeland Security Technology. Student teams examine several historical or hypothetical cases that demonstrate vulnerabilities to the homeland security of the nation. Task is to choose one case, conduct appropriate outside research, then design and brief detection/prevention/mitigation processes that can protect the nation.

Prerequisite(s): Registered students in MS Homeland Security Technology or permission of Instructor. Must be among the last two courses attempted in the degree program.

Schedule Type: SEM  
Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0  
When Offered: Fall, Summer, Spring

AIT 690 - Advanced Topics in Applied Information Technology

Credits: 3  
Repeatable within Term for Credit  
Offered by Information Sciences and Technology

Students participate actively through class dialogues and the crafting of IT solutions to specific problem areas. Course cannot be used to satisfy course requirements for PhD IT students.

Prerequisite(s): Graduate standing & permission of instructor.

Schedule Type: LEC  
Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0  
When Offered: Fall, Spring, Summer

AIT 697 - Leading Organizations Through Change
Introduces students to the critical tools for leading organizations through sustainable change. Through selected readings, discussions, team projects, in-class activities and guest appearances, students learn how to prepare the organization, plan the details, execute a change process across an organization and measure the plan's effectiveness and the change it brings to achieve continuous improvement. Students practice and receive in-class coaching to hone their leadership skills.

**Prerequisite(s):** Graduate Standing in MS, AIT program or permission of instructor.

**Schedule Type:** LEC

**Hours of Lecture or Seminar per week:** 3

**Hours of Lab or Studio per week:** 0

**When Offered:** Fall, Spring

**AIT 699 - Research Capstone**

Credits: 3
Not Repeatable for Credit
Offered by Information Sciences and Technology

Pursuit of a research project chosen with and directed by a research faculty member culminating in a journal-quality paper publicly presented and defended.

**Prerequisite(s):** Completion of at least 24 credits in the MS AIT program's research concentration.

**Schedule Type:** IND

**Hours of Lecture or Seminar per week:** 3

**Hours of Lab or Studio per week:** 0

**When Offered:** Fall, Summer, Spring

**AIT 701 - Cyber Security: Emerging Threats and Countermeasures**

Credits: 3
Not Repeatable for Credit
Offered by Information Sciences and Technology

Covers security issues and current best practices in several applicative domains, ranging from the enterprise to the military. Discusses emerging security threats and available countermeasures with respect to the most recent network and computing technologies, including wireless networks, computer-controlled physical systems, and social networks. Concludes by presenting current trends and open problems.

**Prerequisite(s):** Registration in MS, Applied IT program or permission of instructor.

**Schedule Type:** LEC

**Hours of Lecture or Seminar per week:** 3

**Hours of Lab or Studio per week:** 0

**When Offered:** Fall, Spring.

**AIT 702 - Penetration Testing and Ethical Hacking**
The course presents students with a principled approach to ethical hacking, and offers an in-depth analysis of the overall process, including aspects related to scanning, testing, ethically attacking, and eventually securing systems and networks. The course covers popular attack tools such as Social Engineering and DDoS, and concludes with a discussion about open challenges and current research in the area.

**Prerequisite(s):** Admission to a graduate program in Applied IT and 3 credits of coursework in security fundamentals, or permission of instructor.

**Schedule Type:** LEC

**Hours of Lecture or Seminar per week:** 3

**Hours of Lab or Studio per week:** 0

**When Offered:** Spring

---

**AIT 710 - Design of Learning and Educational Technologies**

Credits: 3
Not Repeatable for Credit
Offered by Information Sciences and Technology
Examines foundations, theoretical perspectives, underlying learning theories, case studies, and key enabling technologies to provide context for understanding, designing, and researching learning and educational technologies. Considers technologies for diverse areas and users including teachers, instructors, higher education and K-12 learners, and learning among informal communities of interest. Technologies demonstrations are combined with hands-on activities involving participation in multiple learning environments.

**Prerequisite(s):** AIT 501 or permission of department.

**Schedule Type:** LEC

**Hours of Lecture or Seminar per week:** 3

**Hours of Lab or Studio per week:** 0

**When Offered:** Fall, Spring

---

**AIT 711 - Rapid Development of Scalable Applications**

Credits: 3
Not Repeatable for Credit
Offered by Information Sciences and Technology
Presents software engineering, programming techniques, security practices, platforms and tools necessary for rapid development of applications. Provides a survey of programming techniques and static code analysis, including security and privacy consideration throughout the application life cycle. Students work in small teams and develop or maintain scalable applications exercising risk based analysis and techniques and practices presented in the course.

**Prerequisite(s):** AIT 521 or equivalent

**Schedule Type:** LEC

**Hours of Lecture or Seminar per week:** 3

**Hours of Lab or Studio per week:** 0

**When Offered:** Fall, Spring
AIT 721 - Design of IT Artifacts, Applications and Systems

Credits: 3  
Not Repeatable for Credit  
Offered by Information Sciences and Technology  
This course will introduce students to design principles and design thinking in applied information technology. Students will learn different approaches to design IT applications across a range of domains. Students will learn how to approach design of systems for large organizations and also for individuals. Students will learn about the interdisciplinary nature of design and get introduced to influential designers.

Prerequisite(s): Enrollment in the IST concentration of the PhD in IT program and AIT 501, or permission of department.  
Schedule Type: LEC  
Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0  
When Offered: Fall, Spring

AIT 799 - Master's Thesis

Credits: 1-6  
Repeatable within Degree for Credit  
Offered by Information Sciences and Technology  
Pursuit of a research project chosen with and directed by a research faculty member culminating in a report (thesis) publicly presented and defended.

Prerequisite(s): Completion of at least 24 credits in the MS AIT program's research concentration.  
Schedule Type: IND  
Hours of Lecture or Seminar per week: 1-6  
Hours of Lab or Studio per week: 0  
Grading: Satisfactory/No credit only  
When Offered: Fall, Summer, Spring

AIT 800 - Applied Information Technology Colloquium

Credits: 1  
Repeatable within Degree for Credit  
Offered by Information Sciences and Technology  
Students attend a series of colloquia including talks by distinguished speakers, faculty candidates and Mason faculty. Topic areas include research advances in technology, its application, and policy issues.

Prerequisite(s): Completion of AIT Core and at least 6 credits of AIT Field Requirements in PhD program.  
Notes: Students must attend a minimum of three events per semester to earn one credit in this course. PhD INFT students with a concentration in Information Science and Technology must complete at least two credits of AIT 800.

Schedule Type: SEM  
Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0  
Grading: Satisfactory/No Credit  
When Offered: Fall, Spring
Arabic (ARAB)

Offered by the College of Humanities and Social Sciences

ARAB 101 - Introduction to the Arabic Language

Credits: 3
Not Repeatable for Credit
Offered by Modern and Classical Languages.

Introduction to Arabic language, dialects, countries, and culture. Beginning modern standard and classical Arabic, with emphasis on the written language, script and phonology. Basic grammar covering gender, numbers, cases, prepositions, nominal sentences, and basic conversation and greetings.

Notes: Students may not receive credit for ARAB 101 and ARAB 110.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ARAB 102 - Introduction to the Arabic Language

Credits: 3
Not Repeatable for Credit
Offered by Modern and Classical Languages.
Introduction to developing reading skills in formal settings. Emphasizes modern standard Arabic in oral communication. Beginning grammar level focuses on verbal sentences, present tenses, questions, and compound nouns.

Prerequisite(s): ARAB 101.
Notes: Students may not receive credit for ARAB 102 and ARAB 110.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ARAB 110 - Elementary Arabic

Credits: 6
Not Repeatable for Credit
Offered by Modern and Classical Languages.
Introduces elements of grammar, vocabulary, oral skills, listening comprehension, and reading.
ARAB 201 - Intermediate Arabic I

Credits: 3  
Not Repeatable for Credit  
Offered by Modern and Classical Languages.  
Further development of listening, speaking, reading, and writing skills. Advanced level of vocabulary. Grammar covers past tenses, subordinated conjunctions, and introduction to passive voice.

Prerequisite(s): ARAB 101, 102.  
Notes: Also introduces Arabic dictionary. Students may not receive credit for ARAB 201 and ARAB 210.

ARAB 202 - Intermediate Arabic II

Credits: 3  
Not Repeatable for Credit  
Offered by Modern and Classical Languages.  
Emphasis on application of language skills to reading, composition, and discussion. Focuses on language structure, format of developing vocabulary from verbs, covering different derivations, and language patterns. Leads to learning the use of Arabic dictionary in depth. Grammar covers passive voice and verbal nouns.

Prerequisite(s): ARAB 201  
Notes: Students may not receive credit for ARAB 202 and ARAB 210.

ARAB 210 - Intermediate Arabic

Credits: 3  
Not Repeatable for Credit  
Offered by Modern and Classical Languages.  
Continuation of the development of basic components of the language, with focus on listening, speaking, reading, and writing skills. Introduces students to the cultures and histories of Arabic-speaking regions.

Prerequisite(s): ARAB 110 or appropriate placement score.
Notes: Students may not receive credit for ARAB 210 and ARAB 201 or ARAB 202.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ARAB 250 - Gateway to Advanced Arabic

Credits: 3
Not Repeatable for Credit
Offered by Modern and Classical Languages.
Integration of advanced intermediate-level Arabic reading, writing, listening, and speaking skills and the development of critical thinking and understanding authentic texts from the Arabic world.

Prerequisite(s): ARAB 210, appropriate placement score, or permission of department.
Notes: Taught in Arabic.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ARAB 325 - Major Arab Writers/Stories

Credits: 3
Repeatable within Degree for Credit
Offered by Modern and Classical Languages.
Studies works of major Arab writers or collections such as The Arabian Nights.

Fulfills Mason Core requirement in literature.

Prerequisite(s): ENGL 101/ENGH 101 or permission of instructor
Notes: Taught in English. Knowledge of Arabic helpful but not required. May be repeated for a maximum of 6 credits when topic is different with permission of department.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ARAB 330 - Reading and Conversation I

Credits: 3
Not Repeatable for Credit
Offered by Modern and Classical Languages.
Development of conversational fluency and reading skills in modern standard Arabic through class discussion, reports, and presentations. Includes readings from newspapers, journals, magazines, web sites, literary works, and other sources.

Prerequisite(s): ARAB 250, appropriate placement score, or permission of instructor.
Notes: Taught in Arabic. ARAB 330 and 331 must be taken in sequence.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ARAB 331 - Reading and Conversation II

Credits: 3
Not Repeatable for Credit
Offered by Modern and Classical Languages.
Continuation of ARAB 330.

Prerequisite(s): ARAB 250 (or equivalent), appropriate placement score, or permission of instructor.
Notes: Taught in Arabic.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ARAB 350 - Media Arabic I (Written Media)

Credits: 3
Not Repeatable for Credit
Offered by Modern and Classical Languages.
Develops advanced reading skills through work with current written media in Arabic.

Prerequisite(s): ARAB 330 and 331 or appropriate placement score or permission of instructor.
Notes: Taught in Arabic.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ARAB 351 - Media Arabic II (Spoken Media)

Credits: 3
Not Repeatable for Credit
Offered by Modern and Classical Languages.
Develops advanced listening and speaking skills through work with current broadcasts in Arabic TV and Radio.

Prerequisite(s): ARAB 350 or permission of instructor.
Notes: Taught in Arabic.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
ARAB 360 - Topics in Arabic Cultural Production

Credits: 3
Repeatable within Degree for Credit
Offered by Modern and Classical Languages.
Focuses on major trends and issues in modern Arabic cultural production. In addition to material from the Middle East and North Africa, the course surveys works of art, cinema, media, and literature from across the global Arabic diaspora.

Notes: Taught in English. Some knowledge of Arabic is preferable.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ARAB 375 - Study Abroad - Arab World

Credits: 1-6
Repeatable within Degree for Credit
Offered by Modern and Classical Languages
Designated study abroad programs in the Arab world.

Prerequisite(s): ARAB 110.
Notes: Must be approved by Arabic program coordinator.

Schedule Type: IND
Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 0

ARAB 380 - Arabic Dialects

Credits: 3
Repeatable within Term for Credit
Offered by Modern and Classical Languages.
Study of the structure of one Arabic dialect with comparison to Modern Standard Arabic and the classical Fusha. Includes study of literature, proverbs, and culture associated with that dialect.

Prerequisite(s): ARAB 250 or appropriate placement score.
Notes: Taught in Arabic. May be repeated for a maximum of 6 credits when dialect covered is different.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ARAB 390 - Translation Methods: Arabic to English
Credits: 3
Not Repeatable for Credit
Offered by Modern and Classical Languages.
Provides students with essential tools and techniques to translate Arabic texts to English. Includes practice applying these techniques to a variety of documents including literary, media, and legal texts.

Prerequisite(s): ARAB 330 and 331 or appropriate placement score or permission of instructor.
Notes: Taught in Arabic.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ARAB 420 - Survey of Arabic Literature

Credits: 3
Not Repeatable for Credit
Offered by Modern and Classical Languages.
A survey of Arabic literature from its genesis to the present day.

Prerequisite(s): Six credits of 300 level courses taught in Arabic or permission of instructor.
Notes: Taught in Arabic. Fulfills the college requirement in non-Western culture.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ARAB 430 - Advanced Arabic Grammar

Credits: 3
Not Repeatable for Credit
Offered by Modern and Classical Languages.
Introduction to traditional Arabic grammar. Covers parts of speech, sentence structure, case marking, and verb structure. Combines traditional with modern approaches to Arabic grammar and includes practical drills.

Prerequisite(s): Six credits of 300 level courses taught in Arabic or permission of instructor.
Notes: Taught in Arabic.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ARAB 440 - Topics in Arabic Religious Thought and Texts

Credits: 3
Repeatable within Degree for Credit
Offered by Modern and Classical Languages.
Survey of the religious and intellectual heritage of the Arab world.

**Prerequisite(s):** Six credits of 300 level Arabic or permission of instructor.
**Notes:** Taught in Arabic. May be repeated for a maximum of 9 credits when topic and texts are different. Fulfills the college requirement in non-Western culture.

**Schedule Type:** LEC  
**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**ARAB 498 - Independent Study**

Credits: 1-6  
Not Repeatable for Credit  
Offered by Modern and Classical Languages  
Designated independent study in the United States or abroad under the direction of a full-time faculty member.

**Prerequisite(s):** ARAB 250.  
**Notes:** Must be approved by Arabic program coordinator.

**Schedule Type:** IND  
**Hours of Lecture or Seminar per week:** 1-6  
**Hours of Lab or Studio per week:** 0

**Art History (ARTH)**

Offered by the College of Humanities and Social Sciences

Students taking ARTH courses should expect to participate in field trips or assignments outside the classroom at area museums.

*At least one 400- or 500-level course is offered each semester; each topic area is generally offered every two years.*

**ARTH 101 - Introduction to the Visual Arts**

Credits: 3  
Not Repeatable for Credit  
Offered by History and Art History  
Introduction to the content and principles of the visual arts. Approach varies with instructor.

Fulfills Mason Core requirement in arts.

**Schedule Type:** LEC  
**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**ARTH 102 - Symbols and Stories in Art**
ARTH 103 - Introduction to Architecture

Credits: 3
Not Repeatable for Credit
Offered by History and Art History
Introduces study, principle, and understanding of art of architecture. Approach varies with instructor; may be historical, geographical, technical, or thematic.

Fulfills Mason Core requirement in arts.

Notes: Field trips required.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ARTH 200 - History of Western Art I

Credits: 3
Not Repeatable for Credit
Offered by History and Art History
Major periods, monuments, and themes of Western art and architecture. Introduces Washington, D.C., museum collections and a historical framework for further study in art history. Covers prehistory, the ancient world, and the Middle Ages.

Fulfills Mason Core requirement in arts.

Notes: Designed as a two-course sequence, but each part may be taken independently without prerequisite.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ARTH 201 - History of Western Art II

Credits: 3
Not Repeatable for Credit
Offered by History and Art History
Major periods, monuments, and themes of Western art and architecture. Introduces Washington, D.C., museum collections and a historical framework for further study in art history. Covers the art of the Renaissance, the baroque period, and modern Europe and the Americas.

Fulfills Mason Core requirement in arts.

Notes: Designed as a two-course sequence, but each part may be taken independently without prerequisite.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ARTH 203 - Survey of Asian Art

Credits: 3
Not Repeatable for Credit
Offered by History and Art History
Introduces the arts of South, Southeast, and east Asia. Examines aspects of the culture and history of Asia. Discusses monuments and artifacts in a variety of media and their relation to social and historical contexts.

Fulfills Mason Core requirement in arts.

Notes: Fulfills the college requirement in non-Western culture.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ARTH 204 - Survey of Latin American Art

Credits: 3
Not Repeatable for Credit
Offered by History and Art History
Introduces arts of Latin America from pre-Columbian to modern era. Discusses important examples of painting, sculpture, and architecture in relation to culture and history of region.

Fulfills Mason Core requirement in arts.

Notes: Fulfills the college requirement in non-Western culture.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ARTH 303 - National Traditions
Credits: 1-3
Repeatable within Term for Credit
Offered by History and Art History
Studies traditions of art and architecture within a single selected country or historical region.

Prerequisite(s): 24 credits or permission of instructor.
Notes: May be repeated for a maximum of 6 credits when topic is different.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0

**ARTH 311 - Design of Cities**

Credits: 3
Repeatable within Degree for Credit
Offered by History and Art History
Explores problems in urban design in a particular geographical region or historical period. Approach varies with instructor and may involve archaeological or theoretical approaches appropriate to the specific context.

Prerequisite(s): 24 credits.
Notes: May be repeated for a maximum of 6 credits when topic is different.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**ARTH 315 - Modern Architecture**

Credits: 3
Not Repeatable for Credit
Offered by History and Art History
Studies in modern architecture from the Beaux Arts movement to the present; an investigation of stylistic, structural, or theoretical innovations.

Prerequisite(s): 24 credits.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**ARTH 319 - Art and Archaeology of the Ancient Near East**

Credits: 3
Not Repeatable for Credit
Offered by History and Art History
Aspects of the art, archaeology, and culture of ancient Near East and Bronze Age Mediterranean. Approach varies depending on instructor; emphasis may be on Mesopotamia, Iran, Egypt, Anatolia, the Levant, or the Aegean.
Fulfills Mason Core requirement in global understanding.

**Prerequisite(s):** 24 credits.

**Notes:** Fulfills the college requirement in non-Western culture.

**Schedule Type:** LEC

**Hours of Lecture or Seminar per week:** 3

**Hours of Lab or Studio per week:** 0

### ARTH 320 - Art of the Islamic World

Credits: 3  
Not Repeatable for Credit  
Offered by History and Art History  
Introduction to Islamic art, from the time of Muhammad to present. Cultural and regional approach, utilizing local museum collections.

Fulfills Mason Core requirement in global understanding.

**Prerequisite(s):** 24 credits.

**Notes:** Fulfills the college requirement in non-Western culture.

**Schedule Type:** LEC

**Hours of Lecture or Seminar per week:** 3

**Hours of Lab or Studio per week:** 0

### ARTH 321 - Greek Art and Archaeology

Credits: 3  
Not Repeatable for Credit  
Offered by History and Art History  
History of ancient Greek architecture, sculpture, and painting.

Fulfills Mason Core requirement in arts.

**Prerequisite(s):** Completion of 24 credits.

**Schedule Type:** LEC

**Hours of Lecture or Seminar per week:** 3

**Hours of Lab or Studio per week:** 0

### ARTH 322 - Roman Art and Archaeology

Credits: 3  
Not Repeatable for Credit  
Offered by History and Art History  
History of Roman architecture, sculpture, and painting.
ARTH 324 - From Alexander the Great to Cleopatra: The Hellenistic World

Credits: 3

Credits: 3
Not Repeatable for Credit
Offered by History and Art History
Aspects of medieval art and culture in eastern Mediterranean world. Topics may include late antiquity, early Christianity, and the Byzantine empire and its neighbors. Designed to take advantage of unique local museum resources.

Fulfills Mason Core requirement in arts.

Prerequisite(s): 24 credits.
Notes: Specific focus varies with instructor.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ARTH 334 - Western Medieval Art

Credits: 3
Not Repeatable for Credit
Offered by History and Art History
Aspects of art and architecture in medieval Europe, from the fall of the Roman Empire through the Gothic period.
Fulfills Mason Core requirement in arts.

Prerequisite(s): 24 credits.
Notes: May be repeated for a maximum of 6 credits when topic is different.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**ARTH 335 - Arts of Medieval England**

Credits: 3
Not Repeatable for Credit
Offered by History and Art History
Explores aspects of the art, architecture, and archeology of medieval England. Special emphasis may be placed on Cultural contexts and literary sources.

Fulfills Mason Core requirement in arts.

Prerequisite(s): 24 credits.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**ARTH 340 - Early Renaissance Art in Italy, 1300-1500**

Credits: 3
Not Repeatable for Credit
Offered by History and Art History
Studies in architecture, sculpture, and painting in the age of Giotto, Ghiberti, Masaccio, and Botticelli.

Fulfills Mason Core requirement in arts.

Prerequisite(s): 24 credits.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**ARTH 341 - Northern Renaissance Art**

Credits: 3
Not Repeatable for Credit
Offered by History and Art History
Studies in the art of France, Germany, and the Netherlands in the age of Van Eyck and Dürer.

Fulfills Mason Core requirement in arts.
Prerequisite(s): 24 credits
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ARTH 342 - High Renaissance Art in Italy, 1480–1570

Credits: 3
Not Repeatable for Credit
Offered by History and Art History

Studies in architecture, sculpture, and painting in the age of Leonardo, Michelangelo, Raphael, and Titian.

Fulfills Mason Core requirement in arts.

Prerequisite(s): 24 credits.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ARTH 344 - Baroque Art in Italy, France, and Spain, 1600–1750

Credits: 3
Not Repeatable for Credit
Offered by History and Art History

Studies in architecture, sculpture, and painting in the age of Caravaggio, Bernini, Velazquez, and Poussin.

Fulfills Mason Core requirement in arts.

Prerequisite(s): 24 credits.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ARTH 345 - Northern Baroque Art, 1600-1750

Credits: 3
Not Repeatable for Credit
Offered by History and Art History

Studies in architecture, sculpture, and painting in the age of Rubens, Van Dyck, Rembrandt, and Vermeer.

Fulfills Mason Core requirement in arts.

Prerequisite(s): 24 credits.
ARTH 350 - History of Photography

Credits: 3
Not Repeatable for Credit
Offered by History and Art History
Development of photography from origins in France in the 19th century to the present.

Prerequisite(s): 24 credits.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ARTH 359 - Art of the 18th and 19th Centuries

Credits: 3
Repeatable within Degree for Credit
Offered by History and Art History
Introduction to the art and architecture of the 18th and 19th centuries. Topics focus on specific art forms, media, geographic regions, or the thematic categories.

Prerequisite(s): 24 credits.
Notes: May be repeated for a maximum of 6 credits when topic is different.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ARTH 360 - Nineteenth-Century European Art

Credits: 3
Not Repeatable for Credit
Offered by History and Art History
Movements from neoclassicism to symbolism discussed in relation to social, cultural, political, and technological changes in Europe.

Fulfills Mason Core requirement in arts.

Prerequisite(s): 24 credits.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
**ARTH 362 - Twentieth-Century European Art**

Credits: 3  
Not Repeatable for Credit  
Offered by History and Art History  
Study of major movements (fauvism, cubism, futurism, constructivism, surrealism, and expressionism) and important artists in 20th-century painting and sculpture.

Fulfills Mason Core requirement in arts.

**Notes:** Focus may vary.

**Schedule Type:** LEC  
**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**ARTH 370 - Arts of the United States**

Credits: 3  
Not Repeatable for Credit  
Offered by History and Art History  
Introduces students to high art (painting and sculpture) and popular material and visual cultural forms (prints, furniture, textiles) through a chronological and thematic survey of U.S. Art, 1600 to 1950. Explores changing roles of arts, artists, craftsmen; issues of gender, race, class; and formation of national identity through the arts. Lectures and discussion are featured.

Fulfills Mason Core requirement in arts.

**Prerequisite(s):** 24 hours of undergraduate credit.  
**Schedule Type:** LEC  
**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**ARTH 371 - American Architecture and Material Culture**

Credits: 3  
Not Repeatable for Credit  
Offered by History and Art History  
Studies in the history of American architecture or decorative arts in cultural context. Topics range from 17th century to 20th century, depending on instructor.

**Prerequisite(s):** 24 credits.  
**Schedule Type:** STU  
**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**ARTH 372 - Studies in 18th- and 19th-Century Art of the United States**
Credits: 3  
Repeatable within Degree for Credit  
Offered by History and Art History  
Developments in visual culture and the changing status of art practitioners throughout these periods. Focus is either chronological (Colonial Period, Gilded Age) or thematic (19th-century genre scenes, the American landscape and national identity).

Fulfills Mason Core requirement in arts.

Prerequisite(s): 24 credits.  
Notes: May be repeated for a maximum of 6 credits when topic is different.

Schedule Type: LEC  
Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0

**ARTH 373 - Studies in 20th-Century Art of the United States**

Credits: 3  
Repeatable within Degree for Credit  
Offered by History and Art History  
Developments in 20th-century American visual culture across all media.

Fulfills Mason Core requirement in arts.

Prerequisite(s): 24 credits

Notes: May be repeated for a maximum of 6 credits when topic is different.

Schedule Type: LEC  
Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0

**ARTH 374 - Art Now**

Credits: 3  
Not Repeatable for Credit  
Offered by History and Art History  
Explores visual art production since 1980, drawing on regional resources. Examines social, institutional, and political issues in recent art and its markets.

Prerequisite(s): Any course in art history or art studio, or permission of instructor.  
Notes: Requires students to work collaboratively and make several field trips, including one Saturday bus trip to New York. Specific topics and assignments vary with the changing art season and instructor. Lecture, discussion.

Schedule Type: LEC  
Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0
ARTH 376 - Twentieth-Century Latin American Art

Credits: 3  
Not Repeatable for Credit  
Offered by History and Art History  
Major movements and important artists in 20th-century Latin American art discussed in relation to social, cultural, and political conditions in the region.

Fulfills Mason Core requirement in arts.

Prerequisite(s): 24 credits.  
Schedule Type: LEC  
Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0

ARTH 380 - African Art (Topic Varies)

Credits: 3  
Not Repeatable for Credit  
Offered by History and Art History  
Focuses on sub-Saharan African art in terms of styles and aesthetics; materials and techniques; and geographical, social, cultural, and religious contexts. Specific focus of course may vary with instructor.

Fulfills Mason Core requirement in global understanding.

Prerequisite(s): 24 credits.  
Notes: Fulfills the college requirement in non-Western culture.

Schedule Type: LEC  
Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0

ARTH 382 - Arts of India

Credits: 3  
Not Repeatable for Credit  
Offered by History and Art History  
History, culture, and arts of south Asia from earliest civilizations along the Indus River to onset of Western colonialism. Emphasizes role of material evidence in the creation of the South Asian history and how political, social, and religious developments affected the arts. Discusses monuments and artifacts in a variety of media in relation to historical contexts.

Prerequisite(s): 24 credits.  
Notes: Fulfills the college requirement in non-Western culture.

Schedule Type: LEC  
Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0
**ARTH 383 - Arts of Southeast Asia**

Credits: 3  
Not Repeatable for Credit  
Offered by History and Art History  
Examines various cultural and artistic traditions of ancient Southeast Asia, from the earliest archaeological evidence to onset of colonialism. Lectures and discussions focus on material culture of the great civilizations that arose within borders of modern Thailand, Cambodia, Indonesia, Burma (Myanmar), Vietnam, Laos, and Malaysia.

Fulfills Mason Core requirement in global understanding.

**Prerequisite(s):** 24 credits.  
**Notes:** Fulfills the college requirement in non-Western culture.

**Schedule Type:** LEC  
**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**ARTH 384 - Arts of China**

Credits: 3  
Not Repeatable for Credit  
Offered by History and Art History  
Explores the complex and dynamic history of China by examining ways in which social, religious, and political shifts have given rise to new and variant forms of material culture.

Fulfills Mason Core requirement in global understanding.

**Notes:** Fulfills the college requirement in non-Western culture.

**Schedule Type:** LEC  
**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**ARTH 385 - Arts of Japan**

Credits: 3  
Not Repeatable for Credit  
Offered by History and Art History  
Art and architecture of Japan, with particular attention to the ways political changes, religious movements, and social developments influenced and shaped those creations. Discusses monuments and artifacts in a variety of media in relation to social and historical contexts.

Fulfills Mason Core requirement in global understanding.

**Prerequisite(s):** 24 credits.  
**Notes:** Fulfills the college requirement in non-Western culture.
ARTH 386 - The Silk Road

Credits: 3
Not Repeatable for Credit
Offered by History and Art History
Explores luxury arts and material culture of Eurasian trade routes between Mediterranean and China in historical, religious, and social contexts. Emphasizes cultural interactions in medieval Central Asia.

Fulfills Mason Core requirement in global understanding.

Prerequisite(s): 24 credits.
Notes: Fulfills the college requirement in non-Western culture.

ARTH 393 - Art History Internships

Credits: 3-6
Repeatable within Degree for Credit
Offered by History and Art History
Internship with a professional arts institution, organization, or individual in the Washington, D.C., area. Project to be arranged by student in consultation with faculty instructor and field supervisor.

Prerequisite(s): Art history major or minor, and permission of instructor.
Notes: Strongly recommended for advanced art history students seeking exposure to professional work in visual arts. May be taken for 3 to 6 credits, or repeated for up to 6 credits.

ARTH 394 - The Museum

Credits: 3
Not Repeatable for Credit
Offered by History and Art History
Examines history, theory, practice, ethics, and current problems of collecting and displaying art and artifacts to the public. Emphasizes issues central to museums in Washington, D.C., or museums in other locations; focus varies with instructor.

Fulfills Mason Core requirement in synthesis.
**Prerequisite(s):** 6 credits in art history at the 300-level and completion or concurrent enrollment in ENGH 302.

**Schedule Type:** LEC

**Hours of Lecture or Seminar per week:** 3

**Hours of Lab or Studio per week:** 0

---

**ARTH 398 - Study Abroad in the History of Art**

Credits: 1-6
Repeatable within Term for Credit
Offered by History and Art History
Study abroad. Course topics, content, and locations vary.

**Notes:** A maximum of 6 credits may be applied to the major or minor with permission of the program.

**Schedule Type:** IND

**Hours of Lecture or Seminar per week:** 1-6

**Hours of Lab or Studio per week:** 1-12

---

**ARTH 399 - Special Topics in the History of Art**

Credits: 3
Repeatable within Term for Credit
Offered by History and Art History
Topics vary.

**Notes:** May be repeated when topic is different.

**Schedule Type:** LEC

**Hours of Lecture or Seminar per week:** 3

**Hours of Lab or Studio per week:** 0

---

**ARTH 400 - Historiography and Methods of Research in Art History (Topic Varies)**

Credits: 3
Not Repeatable for Credit
Offered by History and Art History
Historical investigation of theories, methods, and critiques involved in the discipline of art history. Approach or focus may vary with instructor.

Fulfills writing intensive requirement in the major.

**Prerequisite(s):** ENGL 302/ENGH 302, and 6 credits in art history at the 300 level; or permission of instructor.

**Notes:** May be repeated for credit.

**Schedule Type:** SEM
ARTH 420 - Advanced Studies in Ancient Art

Credits: 3
Repeatable within Term for Credit
Offered by History and Art History
Studies a particular area of ancient art of the Mediterranean, Near East, or Middle East. Topics may be art form or medium, geographical area, theme, function, or context.

Fulfills writing intensive requirement in the major.

Prerequisite(s): ENGL 302/ENGH 302 and 6 credits in Art History at the 300 level, or permission of instructor.
Notes: May be repeated for credit when topic is different.

Schedule Type: SEM
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ARTH 430 - Advanced Studies in Medieval or Islamic Art

Credits: 3
Repeatable within Term for Credit
Offered by History and Art History
Studies a single topic in medieval or Islamic art. May focus on a particular period, region, or medium, or may explore cultural interconnections within medieval Eurasian world.

Fulfills writing intensive requirement in the major.

Prerequisite(s): ENGL 302/ENGH 302, and a 300-level course in medieval or Islamic art; or permission of instructor.
Notes: May be repeated for a maximum of 12 credits when topic is different.

Schedule Type: SEM
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ARTH 440 - RS: Advanced Studies in Renaissance and Baroque Art

Credits: 3
Repeatable within Term for Credit
Offered by History and Art History
Studies a particular aspect of Renaissance or baroque art. Topics may be monographic, thematic, or concentrated on the art of a smaller time period or a particular area.

Fulfills writing intensive requirement in the major.
Designated as a research and scholarship intensive course.

**Prerequisite(s):** ENGL 302/ENGH 302 and 6 credits in Art History at the 300 level, or permission of instructor.

**Notes:** May be repeated for credit when topic is different.

**Schedule Type:** SEM  
**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**ARTH 460 - RS: Advanced Studies in 20th-Century European Art**

Credits: 3  
Repeatable within Term for Credit  
Offered by History and Art History  
Study of a particular topic in 20th century European art. Course may focus on a specific period, region, movement, medium, or theoretical issue, or explore cultural connections and transfer between regions.

Fulfills writing intensive requirement in the major.

Designated as a research and scholarship intensive course.

**Prerequisite(s):** ENGL 302/ENGH 302 and 300-level course in the art of 19th- or 20th-century Europe or the Americas; or permission of instructor.

**Notes:** May be repeated for a maximum of 9 credits when topic is different.

**Schedule Type:** SEM  
**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**ARTH 471 - Advanced Studies in Art of the United States**

Credits: 3  
Not Repeatable for Credit  
Offered by History and Art History  
Studies a particular area of American art, focusing on a form, such as landscape or genre painting; theme, such as nationalism, regionalism, or iconography of the family; or movement, such as American modernism.

Fulfills writing intensive requirement in the major.

**Prerequisite(s):** ENGL 302/ENGH 302 and 300-level course in American art

**Notes:** May be repeated for credit.

**Schedule Type:** LEC  
**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**ARTH 472 - RS: Advanced Studies in 20th-Century Latin American Art**
Credits: 3
Repeatable within Degree for Credit
Offered by History and Art History
Study of a particular topic in 20th-century Latin American art. Course may focus on a specific period, region, movement, medium, or theoretical issue, or explore cultural connections and transfer between regions.

Fulfills writing intensive requirement in the major.

Designated as a research and scholarship intensive course.

Prerequisite(s): ENGL 302/ENGH 302 and 300 level course in 19th- or 20th-century art of Europe or the Americas, or permission of the instructor.

Notes: May be repeated for a maximum of 6 credits when topic is different.

Schedule Type: SEM
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ARTH 474 - Advanced Studies in Contemporary Art

Credits: 3
Repeatable within Degree for Credit
Offered by History and Art History
Study of a topic in contemporary art in a research seminar setting. Focus on particular theme, region, artist, or medium, or take a comparative approach.

Fulfills writing intensive requirement in the major.

Prerequisite(s): ENGL 302/ENGH 302 and 300-level course work in modern or contemporary art, or permission of the instructor

Notes: May be repeated for a maximum of 6 credits when topic is different.

Schedule Type: SEM
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ARTH 482 - RS: Advanced Studies in Asian Art

Credits: 3
Repeatable within Term for Credit
Offered by History and Art History
Seminar-style discussions on a specific topic in Asian art. May focus on the art of a particular period, movement, reign, or region, as well as theoretical issues or works in a particular medium.

Fulfills writing intensive requirement in the major.

Designated as a research and scholarship intensive course.

Prerequisite(s): ENGL 302/ENGH 302, and 300-level course in any area of Asian art; or permission of instructor.
Notes: May be repeated for a maximum of 6 credits when topic is different. Fulfills the college requirement in non-Western culture.

Schedule Type: SEM
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**ARTH 490 - Independent Study in Art History**

Credits: 3  
Not Repeatable for Credit  
Offered by History and Art History  
Intensive study of a particular artist, period, or theoretical problem to be conducted by an individual student in consultation with instructor.

Fulfills writing intensive requirement in the major.

Prerequisite(s): 60 credits, ENGH 302, permission of instructor and chair, plus 9 credits in art history beyond ARTH 200, 201. Study proposal submitted prior to registration.

Schedule Type: IND
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**ARTH 491 - Independent Study in Art History**

Credits: 3  
Not Repeatable for Credit  
Offered by History and Art History  
Intensive study of a particular artist, period, or theoretical problem to be conducted by an individual student in consultation with instructor.

Fulfills writing intensive requirement in the major.

Prerequisite(s): 60 credits, ENGH 302, permission of instructor and chair, plus 9 credits in art history beyond ARTH 200, 201. Study proposal submitted prior to registration.

Schedule Type: IND
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**ARTH 492 - Honors Directed Readings, Honors Directed Research**

Credits: 3  
Not Repeatable for Credit  
Offered by History and Art History  
Linked individualized courses, usually given by same instructor. Involves directed readings.

Fulfills writing intensive requirement in the major.
**Prerequisite(s):** Admission to Art History Honors Program, ENGH 302, permission of instructor and chair, departmental approval of Honors Proposal submitted term prior to registration.

**Notes:** Students must have completed at least one course in the field, or with the professor, chosen for these honors courses. The 3 credits of readings should be taken before the 3 research credits, or they may be taken concurrently.

**Schedule Type:** IND

**ARTH 493 - Honors Directed Readings, Honors Directed Research**

Credits: 3  
Not Repeatable for Credit  
Offered by History and Art History  
Linked individualized courses, usually given by same instructor. Culminates in research paper related to subject of readings.

Fulfills writing intensive requirement in the major.

**Prerequisite(s):** Admission to Art History Honors Program, ENGH 302, permission of instructor and chair.  
**Notes:** Students must have completed at least one course in the field, or with the professor, chosen for these honors courses. The 3 credits of readings should be taken before the 3 research credits, or they may be taken concurrently.

**Schedule Type:** IND

**ARTH 495 - RS: Objects and Archives in Art History**

Credits: 3  
Not Repeatable for Credit  
Offered by History and Art History  
Conduct hands-on research with objects and primary and secondary sources. Select particular artifacts, works of art, or group of objects and undertake original research, and bring objects from storage to publication to exhibition. Develops skills in material analysis, critical reading, and academic writing. Focuses on VA/DC/MD libraries, archives, and storerooms.

Fulfills writing intensive requirement in the major.

Designated as a research and scholarship intensive course.

**Prerequisite(s):** 6 credits of 300-level courses in the College of Humanities and Social Sciences and ENGH 302.  
**Schedule Type:** SEM

**ARTH 499 - Advanced Studies in Art History**
Credits: 3
Repeatable within Degree for Credit
Offered by History and Art History
Seminar-style discussion on specific subjects in art history.

Fulfills writing intensive requirement in the major.

Prerequisite(s): ENGL 302/ENGH 302 and 300-level course, or permission of instructor.
Notes: May be repeated for a maximum of 6 credits when topic is different.

Schedule Type: SEM
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ARTH 570 - Proseminar in History of Decorative Arts

Credits: 3
Not Repeatable for Credit
Offered by History and Art History
A writing-intensive course designed to equip students with the skills required for professional scholarship in the history of decorative arts. Examines a variety of theories and methods for analyzing objects. Teaches visual and contextual analysis skills as well as critical thinking about and documentation of primary and secondary sources.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ARTH 571 - Survey of Decorative Arts I

Credits: 3
Not Repeatable for Credit
Offered by History and Art History
Overview of European decorative arts from fifteenth to eighteenth centuries, with focus on objects from Italy, France, and England. Examines the role of decorative arts in the formation of identity of the elite in Renaissance Italy as well as Renaissance France and England. Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ARTH 572 - Survey of Decorative Arts II

Credits: 3
Not Repeatable for Credit
Offered by History and Art History
This writing-intensive course is designed to equip students with the skills required for professional scholarship in the history of
decorative arts. Students will examine a variety of theories and methods for analyzing objects through assigned readings, class discussions, and short writing assignments.

**Schedule Type:** LEC  
**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**ARTH 593 - Internship in Art History and the Decorative Arts**

Credits: 3-6  
Repeatable within Degree for Credit  
Offered by History and Art History  
Internship with a professional arts institution, organization, or individual in the Washington, D.C., area. Project to be arranged by student in consultation with faculty instructor and field supervisor.

**Prerequisite(s):** BA or equivalent or permission of instructor.  
**Notes:** Recommended for advanced art history students seeking exposure to professional work in visual arts. May be taken for 3 to 6 credits, or repeated for up to 6 credits.

**Schedule Type:** INT  
**Hours of Lecture or Seminar per week:** 1-6  
**Hours of Lab or Studio per week:** 0

**ARTH 594 - The Museum**

Credits: 3  
Not Repeatable for Credit  
Offered by History and Art History  
Examines history, theory, practice, ethics, and current problems of collecting and displaying art and artifacts to the public. Emphasizes issues central to museums in Washington, D.C., or museums in other locations.

**Prerequisite(s):** Baccalaureate degree or permission of instructor.  
**Notes:** Specific focus may vary with instructor.

**Schedule Type:** LEC  
**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**ARTH 596 - Independent Study**

Credits: 1-3  
Repeatable within Term for Credit  
Offered by History and Art History  
Independent reading and research on specific project under direction of department member.

**Prerequisite(s):** Baccalaureate degree or permission of instructor.  
**Notes:** Written report is required. May be repeated for credit.
**ARTH 599 - Special Topics in Art History and the Decorative Arts**

Credits: 1-6  
Repeatable within Term for Credit  
Offered by History and Art History  
Topics vary.

Prerequisite(s): Baccalaureate degree or permission of instructor.  
Notes: May be repeated for credit when topic is different.

**ARTH 600 - Methods and Research in Art History**

Credits: 3  
Not Repeatable for Credit  
Offered by History and Art History  
Investigates theories, methods, and research strategies in discipline of art history. Designed for first-semester students in art history MA program; foundation for further graduate-level work in the program.

Prerequisite(s): Admission to the art history MA program.

**ARTH 601 - Colloquium in Art History**

Credits: 3  
Not Repeatable for Credit  
Offered by History and Art History  
Offers graduate-level survey in academic art history led by an instructor of record, with input from full Art History faculty. Participants review the current field through lectures, focused readings and group discussions with relevant faculty member. Participants may read in more depth in areas of special interest. Provides preparation for MA exams and professional preparation for teaching.

Prerequisite(s): Admission to the MA Program in Art History.
ARTh 610 - Theory of Decorative Arts

Credits: 3  
Not Repeatable for Credit  
Offered by History and Art History  
Covers the analysis of objects and design from a number of different perspectives: cultural studies, art history, Marxism, the Frankfurt School, and feminism among others. Offers different tools and viewpoints for each approach to analyze and understand decorative arts.

Schedule Type: LEC  
Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0

ARTh 620 - Topics in Individual Decorative Arts

Credits: 3  
Repeatable within Term for Credit  
Offered by History and Art History  
Survey of a single decorative art including media and methods of production. Covers connoisseurship issues such as identifying materials and techniques, fakes, forgeries, repairs, reproductions.

Notes: May be repeated for credit when topic is different.

Schedule Type: LEC  
Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0

ARTh 630 - Material Culture Studies

Credits: 3  
Repeatable within Term for Credit  
Offered by History and Art History  
Introduction to traditions that have contributed to the field of material culture study. Examines a broad range of the material world from the past to the present. Surveys the field's historical roots and examines approaches to material culture scholarship.

Notes: May be repeated for credit when topic is different.

Schedule Type: LEC  
Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0

ARTh 640 - European Decorative Arts
Credits: 3  
Repeatable within Term for Credit  
Offered by History and Art History  
Examines one or more European decorative arts from periods from the Renaissance to the early 20th century. Arts may include tapestries, pottery and ceramics, silver, furnishing, jewelry and metalwork, glass as well as distinctive stylistic periods.

Notes: May be repeated for credit when topic is different.

**Schedule Type:** LEC  
**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**ARTH 650 - Global Decorative Arts**

Credits: 3  
Repeatable within Term for Credit  
Offered by History and Art History  
Examines specific key media, moments, or locations in the global decorative arts beyond the Western tradition.

Notes: May be repeated for credit with topic is different.

**Schedule Type:** LEC  
**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**ARTH 660 - Museum Studies**

Credits: 3  
Repeatable within Term for Credit  
Offered by History and Art History  
Explores the role of museums, through presentations by key museum personnel and discussion of required readings. Administrators, curators, conservators, educators, editors, among others, work with students to expand their knowledge of how museums function.

Notes: May be repeated for credit when topic is different.

**Schedule Type:** LEC  
**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**ARTH 670 - Design and Design History**

Credits: 3  
Repeatable within Term for Credit  
Offered by History and Art History  
Examination of key moments in design history. Through focus on the chosen topic, discusses the nature of design. Covers history of interiors, furniture and architecture, and theories of design and design composition.
Note: May be repeated for credit with topic is different.

**Schedule Type:** LEC  
**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**ARTH 696 - Independent Directed Readings**

Credits: 3  
Not Repeatable for Credit  
Offered by History and Art History  
Designed to prepare students for comprehensive exams by integrating past work and filling gaps in expected knowledge before the exam.

Prerequisite(s): Admission to art history MA program, and permission of instructor.  
Notes: Taken in final semester of art history MA.

**Schedule Type:** IND  
**Hours of Lecture or Seminar per week:** 1-3  
**Hours of Lab or Studio per week:** 0

**ARTH 699 - Topics in Art History**

Credits: 3  
Repeatable within Term for Credit  
Offered by History and Art History  
Research seminar on aspects of art history. Topics vary, but course entails extensive critical readings and discussion, development of bibliographies, and advanced-level research papers.

Prerequisite(s): Graduate standing.  
Notes: May be repeated for a maximum of 15 credits when topic is different.

**Schedule Type:** SEM  
**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**ARTH 797 - Thesis Writing Workshop**

Credits: 0  
Not Repeatable for Credit  
Offered by History and Art History  
Schedule Type: SEM  
Grading: Satisfactory/No Credit
**ARTH 799 - Master's Thesis**

Credits: 1-3  
Repeatable within Degree for Credit  
Offered by History and Art History  
Research and writing on approved thesis topic under direction of thesis committee.

**Prerequisite(s):** Completion of 24 credits (for art history) or 45 credits (for history of decorative arts) and approval of thesis proposal by the faculty and program director.  
**Notes:** Students must register for a minimum of three credits in their first semester of 799 and maintain continuous enrollment in 799 while writing and submitting a thesis. A maximum of 3 credits of 799 may be applied to the MA in art history and a maximum of 6 credits to the MA in the history of decorative arts.

**Schedule Type:** IND  
**Hours of Lecture or Seminar per week:** 1-3  
**Hours of Lab or Studio per week:** 1-6  
**Grading:** Satisfactory/No Credit only

**Art and Visual Technology (AVT)**

Offered by the College of Visual and Performing Arts

**AVT 101 - New Majors Colloquium**

Credits: 1  
Not Repeatable for Credit  
Offered by School of Art  
Provides a common core experience of contemporary perspectives on the broad range of professional career options open to studio art majors. Lectures address practical concerns but emphasize social, ethical, and philosophical aspects of visual arts professions.

**Notes:** Required of all AVT majors. May be taken prior to declaring the major or during the first semester as a declared AVT major.

**Schedule Type:** LEC  
**Hours of Lecture or Seminar per week:** 1  
**Hours of Lab or Studio per week:** 0

**AVT 103 - Introduction to the Artist's Studio**

Credits: 3  
Not Repeatable for Credit  
Offered by School of Art  
Through projects, readings, class critiques, visuals, and field trips, students explore materials, techniques, concepts, and processes essential to understanding the language of visual arts and the artist's role. Develops imaginative thinking and sensitivity to visual environment.
Fulfills Mason Core requirement in arts.

Notes: For non-majors only.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 2

AVT 104 - Two-Dimensional Design and Color

Credits: 4
Not Repeatable for Credit
Offered by School of Art
Explores elements and principles of two-dimensional design, establishment of visual vocabulary, and critical analysis that supports conceptual development. Studio projects build fundamental knowledge, skills, understanding of precedents, and contemporary practices in visual arts.

Fulfills Mason Core requirement in arts.

Schedule Type: STU
Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 6
When Offered: Fall, Spring, Summer

AVT 105 - Three-Dimensional Design and Beyond

Credits: 4
Not Repeatable for Credit
Offered by School of Art
Explores elements and principles of three-dimensional design, establishment of visual vocabulary, and critical analysis that supports conceptual development. Studio projects explore form and composition, time-based media, materials, precedents, and contemporary practices in visual arts.

Prerequisite(s): AVT 104 or permission of instructor.

Schedule Type: STU
Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 6
When Offered: Fall, Spring, Summer

AVT 180 - New Media in the Creative Arts

Credits: 3
Not Repeatable for Credit
Offered by School of Art
Introduces computing from artist's perspective. Emphasizes computer use for artistic creation and research. Overview of image making and time-based media within the broad context of contemporary art, new media art, and mediated culture.
Fulfills Mason Core requirement in information technology (all except ethics).

**Schedule Type:** STU  
**Hours of Lecture or Seminar per week:** 1  
**Hours of Lab or Studio per week:** 2  
**When Offered:** Fall, Spring, Summer

### AVT 204 - Visual Thinking

Credits: 3  
Not Repeatable for Credit  
Offered by School of Art  
Explores the ways contemporary artists use principles of design and perception to challenge how we see our world physiologically, psychologically, or socially. Examples drawn from film, photography, new media art, and other contemporary artistic media.

**Schedule Type:** LEC  
**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

### AVT 206 - Color

Credits: 4  
Not Repeatable for Credit  
Offered by School of Art  
Color theory and principles of color interaction, including additive, subtractive, and partitive color experience; study of harmony, contrast, focus, space, opacity, transparency, temperature and value in both wet and dry media; and related applications of color technology.

**Prerequisite(s):** AVT 104 or permission of instructor.  
**Schedule Type:** STU  
**Hours of Lecture or Seminar per week:** 1  
**Hours of Lab or Studio per week:** 6  
**When Offered:** Fall, Spring, Summer

### AVT 215 - Typography

Credits: 4  
Not Repeatable for Credit  
Offered by School of Art  
Introduction to history and use of type. Reading and projects develop awareness of type as a linguistic and visual communication tool. Introduces typographic design elements, including color, hierarchy, integration with imagery, structure, and content.

Fulfills Mason Core requirement in arts.

**Prerequisite(s):** C or higher in AVT 104 and 180, or permission of instructor, or admittance into the Graphic Design Undergraduate Certificate.
AVT 217 - Introduction to Web Design

Credits: 4
Not Repeatable for Credit
Offered by School of Art
An introduction to contemporary web design, in particular to standards, as a successful tool in design communication. Students gain hands-on experience on design issues specific to Web-based presentations, learn web page layout, effective navigation and delve into the design process.

Prerequisite(s): C or higher in AVT 180, or permission of instructor, or admittance into the Graphic Design Undergraduate Certificate.
Prerequisite(s) enforced by registration system.

Schedule Type: STU
Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 6
When Offered: Fall, Spring, Summer

AVT 222 - Drawing I

Credits: 4
Not Repeatable for Credit
Offered by School of Art
Introduction and exploration of the fundamentals of drawing methods and materials, with emphasis on observational study and critical analysis of the effective and expressive use of line, mass, value, perspective, and formal composition. Emphasis on problems involved in representational and abstract visual interpretations of forms.

Fulfills Mason Core requirement in arts.

Notes: AVT majors encouraged to take AVT 222 with AVT 104.

Schedule Type: STU
Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 6
When Offered: Fall, Spring, Summer

AVT 232 - Painting I

Credits: 4
Not Repeatable for Credit
Offered by School of Art

Introduction to the basic methods and principles of painting with a focus on observation, paint application, formal composition, color mixing, and the articulation of form. Students develop a visual awareness as they become familiar with the language of image making, construction, analysis, and awareness. Students prepare portfolios for collaborative and reflective critique.

Fulfills Mason Core requirement in arts.

**Schedule Type:** STU  
**Hours of Lecture or Seminar per week:** 1  
**Hours of Lab or Studio per week:** 6  
**When Offered:** Fall, Spring, Summer

---

**AVT 243 - Printmaking I**

Credits: 4  
NotRepeatable for Credit  
Offered by School of Art  
Introduction to basics of hand printing. Emphasis on translation and transferal of images, tools, equipment, and technical skills for making a well-defined print. Students explore drawing, synthesis, and multiplicity in this interactive and collaborative course. Presentations and field trips focus on aesthetic and cultural concerns of making multiple images.

Fulfills Mason Core requirement in arts.

**Schedule Type:** STU  
**Hours of Lecture or Seminar per week:** 1  
**Hours of Lab or Studio per week:** 6  
**When Offered:** Fall, Spring, Summer

---

**AVT 252 - Fundamentals of Photography**

Credits: 4  
Not Repeatable for Credit  
Offered by School of Art  
Introduces photographic study and investigation of the fundamental practices and techniques of both film and digital forms with attention to its history and contemporary practices. Class discussions, field trips and critiques enhance visual and verbal vocabularies.

Fulfills Mason Core requirement in arts.

**Schedule Type:** STU  
**Hours of Lecture or Seminar per week:** 1  
**Hours of Lab or Studio per week:** 6  
**When Offered:** Fall, Spring, Summer

---

**AVT 253 - Introduction to Digital Photography**
AVT 254 - Photography

Credits: 4
Not Repeatable for Credit
Offered by School of Art
Introduction to the digital camera as a tool for electronic photographic image making. Students will be introduced to principles and exploration of the aesthetics of digital photography and also learn basic image-editing skills in a computer environment.

Fulfills Mason Core requirement in arts.

Schedule Type: STU
Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 6
When Offered: Fall, Spring, Summer

AVT 262 - Sculpture I

Credits: 4
Not Repeatable for Credit
Offered by School of Art
Projects in sculpture that emphasizes contemporary theory and issues, the development of individual concepts, and creative solutions. Explores the application of materials, tools, and imaginative processes. Faculty demonstrations, lectures, gallery and museum visits, and regular student work critiques.

Fulfills Mason Core requirement in arts.

Schedule Type: STU
Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 6
When Offered: Fall, Spring, Summer

AVT 272 - Interdisciplinary Arts
AVT 280 - Introduction to New Media Arts

Credits: 4  
Not Repeatable for Credit  
Offered by School of Art

Introduces contemporary interdisciplinary art practice through readings and studio projects in performance and installation. Provides students with opportunities to deepen understanding of conceptual art, nontraditional media practices, and collaborative practice in visual arts.

Fulfills Mason Core requirement in arts.

Schedule Type: STU  
Hours of Lecture or Seminar per week: 1  
Hours of Lab or Studio per week: 6  
When Offered: Fall, Spring, Summer

AVT 300 - Artsbus Attendance

Credits: 0  
Repeatable within Term for Credit  
Offered by School of Art

Students travel to New York or other destinations aboard the AVT Artsbus to attend faculty-selected exhibitions.

Notes: AVT majors must satisfactorily complete course once for each semester they are enrolled as majors, up to five times. Repeatable up to three times per semester.

Schedule Type: LAB  
Hours of Lecture or Seminar per week: 1  
Hours of Lab or Studio per week: 0  
Grading: S/NC

AVT 301 - Visual Voices Colloquium

Credits: 1  
Repeatable within Degree for Credit
Offered by School of Art
Students attend AVT Visual Voices lecture series during the semester and complete assignments related to the topics covered.

Notes: AVT majors must accumulate at least 3 credits in this colloquium to graduate. May be repeated each semester up to a total of 8 credits.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0

AVT 305 - Creative Processes

Credits: 3
Not Repeatable for Credit
Offered by School of Art
Study of the creative process in general, with emphasis on the inspiration, working methods, and final creations of various artists. Students explore their own creative processes through journal keeping, collaborative exercises, and projects.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

AVT 307 - Aesthetics

Credits: 3
Not Repeatable for Credit
Offered by School of Art
Interdisciplinary course examines broad range of contemporary art and culture to engage an expansive conception of aesthetic experience. Students engage with historical and contemporary aesthetic theories, build heightened aesthetic sensibility, and explore their personal aesthetic.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

AVT 309 - Art as Social Action

Credits: 3
Not Repeatable for Credit
Offered by School of Art
Interdisciplinary exploration of work by citizen-artists whose art-making engages the social world. Students learn about the history of socially engaged art-making and experiment with individual and collaborative projects addressing social issues.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
AVT 311 - Graphic Design Methods and Principles

Credits: 3
Not Repeatable for Credit
Offered by School of Art
Emphasis on developing design solutions requiring demographic, historical, and/or cultural research. Course strengthens design and typography skills, introduces conceptual problem solving, audience considerations, and broad-based tools designers use to develop effective visual communication solutions.

Prerequisite(s): C or higher in AVT 215 or permission of instructor
Prerequisite(s) enforced by registration system.

Schedule Type: STU
Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 6

AVT 313 - Editorial Design

Credits: 3
Not Repeatable for Credit
Offered by School of Art
Development and production of long-form design projects (magazines, newspapers, catalogs, and other serial and/or multipage publications). Emphasis on narrative, consistency, structure, clarity. Addresses information design issues and reinforces conceptual skills and integration of imagery and text.

Prerequisite(s): D or higher in AVT 311 or permission of instructor.
Prerequisite(s) enforced by registration system.

Schedule Type: STU
Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 6

AVT 318 - History of Graphic Design

Credits: 3
Not Repeatable for Credit
Offered by School of Art
A survey of design history. Looks at print and web design as both a reaction to and shaper of the broader culture (including other fine applied arts) through the study of major movements and designers.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
When Offered: Fall, Spring
AVT 323 - Drawing II

Credits: 3
Not Repeatable for Credit
Offered by School of Art
Students develop observational, sketching, and rendering skills. Introduction to a range of materials, methods, formal concepts, drawing in series, and critique vocabulary.

Prerequisite(s): AVT 222 or permission of instructor.
Schedule Type: STU
Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 6

AVT 324 - Figure Drawing

Credits: 3
Not Repeatable for Credit
Offered by School of Art
Drawing with an emphasis on the observational study of the human body. Human anatomy and proportion are examined through a series of methodological approaches, including gesture, contour, mass, and modeling.

Prerequisite(s): AVT 222 or permission of the instructor.
Schedule Type: STU
Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 6

AVT 326 - Nontraditional Approaches to Drawing

Credits: 3
Not Repeatable for Credit
Offered by School of Art
Encourages students to challenge some traditional approaches to drawing by creating innovative works that combine familiar drawing techniques with a variety of materials, approaches, and unusual formats.

Prerequisite(s): AVT 222 or permission of instructor.
Schedule Type: STU
Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 6

AVT 327 - Illustration

Credits: 3
Not Repeatable for Credit
Offered by School of Art
This course is intended to provide an overview of illustration as a visual communication medium. Sharing the tools and techniques of gallery artists and the communicative goals of graphic designers, illustrators work across media to make concepts
understandable and powerful in the service of editorial, informational or persuasive goals. Students will begin to discover individually unique methods of problem solving by developing a personal visual vocabulary and relating it to historical and contemporary trends of art, design and illustration.

Prerequisite(s): AVT 222 or permission of instructor.
Schedule Type: STU
Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 6
When Offered: Fall, Spring

AVT 328 - Mixed Media

Credits: 3
Not Repeatable for Credit
Offered by School of Art
Students investigate the contemporary innovations and disciplinary cross-pollination which have revolutionized and expanded the boundaries of traditional fine arts. Projects incorporate text, sound, computer generated imagery, collaboration and installation.

Prerequisite(s): AVT 104 or permission of instructor
Schedule Type: STU
Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 6
When Offered: Fall, Spring

AVT 333 - Painting II

Credits: 3
Not Repeatable for Credit
Offered by School of Art
Focuses on the development of formal and technical skills, with an emphasis on paint application, color interaction, and support building and preparation. Introduces concepts, methodologies, and approaches relevant to contemporary painting.

Prerequisite(s): AVT 232 or permission of instructor.
Schedule Type: STU
Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 6

AVT 336 - Experimental Painting

Credits: 3
Not Repeatable for Credit
Offered by School of Art
Using contemporary painting practices as starting place, students explore a variety of experimental and conceptual approaches to painting.

Prerequisite(s): AVT 232 or permission of instructor.
Schedule Type: STU
AVT 337 - Figurative Painting

Credits: 3
Not Repeatable for Credit
Offered by School of Art
Working primarily with live models, students explore the human form as the main subject for a variety of visual and expressive inquiries.

Prerequisite(s): AVT 232 or permission of instructor.
Schedule Type: STU
Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 6

AVT 343 - Printmaking II

Credits: 3
Not Repeatable for Credit
Offered by School of Art
An introduction to relief, screenprint, and intaglio printing; including the study of historical antecedents and their relevancy to contemporary printmaking. Students learn reductive and additive techniques in preparing printing surfaces.

Prerequisite(s): AVT 243 or permission of instructor.
Schedule Type: STU
Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 6

AVT 345 - Paper/Print/Book as Language

Credits: 3
Not Repeatable for Credit
Offered by School of Art
Introduces the artist's book as both physical structure and creative association of words and images. Students learn techniques of bookmaking, binding, and traditional and digital printmaking to produce an artist-made book with narrative and sequential elements.

Prerequisite(s): AVT 180 or permission of instructor.
Schedule Type: STU
Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 6

AVT 346 - Digital Printmaking
AVT 353 - Traditional Photo Methods

Credits: 3
Not Repeatable for Credit
Offered by School of Art
Continuation of Fundamentals of Photography with further investigation into the aesthetics of photography through experimentation with new camera formats, films, papers, developers and development of a photographic portfolio.

Prerequisite(s): AVT 252 or AVT 254, or permission of instructor.
Notes: Continuation of Photography I.

Schedule Type: STU
Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 6

AVT 354 - Digital Photo Techniques

Credits: 3
Not Repeatable for Credit
Offered by School of Art
A computer-intensive class in which students create digital images from the viewpoint of a photographic artist. Emphasis on digital photo techniques, including making digital negatives, concept development, and visual aesthetics.

Prerequisite(s): AVT 253 and 180, or permission of the instructor.
Schedule Type: STU
Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 6

AVT 355 - Color Photo Methods

Credits: 3
Not Repeatable for Credit
Offered by School of Art
Introduces basic concepts, theories, histories, contemporary materials, and processes of color photography with focus on creative photographic expression and technique. Combines lecture, studio, and darkroom time to expand students' photographic repertoire through work with both film and digital materials.
AVT 356 - Photo Studio Techniques

Credits: 3
Not Repeatable for Credit
Offered by School of Art
Introduces Theory, concepts and applications of photographic studio lighting. Emphasis on the ability to control and manipulate light in a photographic lighting studio environment using large format film cameras.

Prerequisite(s): AVT 353 or AVT 354 or permission of instructor.

AVT 359 - About Photography: Practice and Research

Credits: 3
Not Repeatable for Credit
Offered by School of Art
A combined studio and lecture course investigating photography's history, critical theory, philosophy, and practice. Lectures, discussions, readings, and projects focus on a medium that has enormously influenced art and culture.

Prerequisite(s): AVT 353 or permission of the instructor.

AVT 363 - Sculpture II

Credits: 3
Not Repeatable for Credit
Offered by School of Art
Expands on the principles and processes introduced in Sculpture I, developing a higher level of technical competence and critical sophistication.

Prerequisite(s): AVT 262 or permission of instructor.
Notes: Lectures, independent student research, and gallery and museum visits required. Vigorous critiques.
AVT 370 - Entrepreneurship in the Arts

Credits: 3  
Not Repeatable for Credit  
Offered by School of Art  
Combined lecture and studio course in developing entrepreneurial skills in arts. Special focus on developing communication skills and planning strategies, as well as on nurturing skills that enable students to creatively solve problems and think about opportunities.

Schedule Type: LEC, STU  
Hours of Lecture or Seminar per week: 0  
Hours of Lab or Studio per week: 6

AVT 371 - Visual Perception and the Arts

Credits: 3  
Not Repeatable for Credit  
Offered by School of Art  
Review of major approaches to the study of visual perception. Topics include analysis of picture perception, visual thinking, the relationship between symbolic and non-symbolic thinking and representation, and how pathologies of vision affect art production.

Schedule Type: LEC  
Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0

AVT 372 - Hip Hop Culture

Credits: 3  
Not Repeatable for Credit  
Offered by School of Art  
Examines hip hop as an art form within a continuum of cultural expression. Explores multilayered social, political, and aesthetic aspects of hip hop, historical causes and precedents, and contemporary derivatives and implications.

Schedule Type: LEC  
Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0

AVT 373 - Performance Studio

Credits: 3  
Not Repeatable for Credit  
Offered by School of Art
Studio course focused on theory and practice of collaborative performance art. Detailed analysis of creation and production processes from interdisciplinary perspective in conjunction with practical training in multimedia technologies, body sculpture, and theater of images.

**Prerequisite(s):** AVT 272 or permission of instructor.

**Schedule Type:** STU

**Hours of Lecture or Seminar per week:** 0

**Hours of Lab or Studio per week:** 6

### AVT 374 - Sound Art I

Credits: 3
Not Repeatable for Credit
Offered by School of Art

Introduction to the physics, phenomenology, and production of sound as an expressive medium. Using analog and digital tools, students will explore constructing with sound.

**Prerequisite(s):** AVT 180 or 280, or permission of instructor.

**Schedule Type:** STU

**Hours of Lecture or Seminar per week:** 0

**Hours of Lab or Studio per week:** 6

**When Offered:** Fall, Spring

### AVT 376 - Live Movies

Credits: 3
Not Repeatable for Credit
Offered by School of Art

Advanced performance studio emphasizing cinematic forms and multimedia technologies. Also covers sound design, scenic design and materials, production planning, and interdisciplinary approaches to narrative and content in performance.

**Notes:** Students collaborate on production projects.

**Schedule Type:** STU

**Hours of Lecture or Seminar per week:** 0

**Hours of Lab or Studio per week:** 6

### AVT 377 - Cyberpunk

Credits: 3
Not Repeatable for Credit
Offered by School of Art

Traces the ways that cinema, music, fiction, cultural theory, visual art, television, theater, and performance have embraced and been shaped by cyberpunk and cyberculture. Includes readings, writings, discussion, screenings, guest speakers, and research projects.

**Schedule Type:** STU
AVT 378 - The African American Experience in the Performing Arts

Credits: 3
Not Repeatable for Credit
Offered by School of Art
Through lectures, slides, audio recordings, videos, and films, students examine African American contributions to cultural fabric of American forms and institutions. Artistic contributions examined in aesthetic, political, historical, and social contexts.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

AVT 380 - Thinking Through Animation

Credits: 3
Not Repeatable for Credit
Offered by School of Art
Students will be encouraged to expand their abilities and capabilities as thinkers, artists and citizens. This course will provide an introduction to issues relating to the production and reception of animated media bracketing the turn of the 21st century.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
When Offered: Fall, Spring

AVT 382 - 2D Experimental Animation

Credits: 3
Not Repeatable for Credit
Offered by School of Art
Introduces conceptual, contextual, technical, and aesthetic practices of two-dimensional experimental animation. Students learn to animate hand-drawn and computer-generated images. Students work to create an imaginative and meaningful short animation with sound.

Prerequisite(s): AVT 280 or permission of instructor.
Schedule Type: STU
Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 6
When Offered: Fall, Spring

AVT 383 - 3D Experimental Animation
Credits: 3
Not Repeatable for Credit
Offered by School of Art
Students create socially relevant 3D scenes with scaled objects, surface textures, lights, and shadows. These scenes serve as environments for short, thought-provoking animations. Emphasis on idea development, critical examination of animation practices, and visual aesthetics.

Prerequisite(s): AVT 280 or permission of instructor.
Schedule Type: STU
Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 6
When Offered: Fall, Spring

AVT 385 - EcoArt

Credits: 3
Repeatable within Degree for Credit
Offered by School of Art

Develop collaborative projects that explore art and visual culture, the environment, and sustainability. Students are given access to the School of Art Permaculture Studio as a “green” work space for developing course projects. Designated a Green Leaf Course.

Fulfills Mason Core requirement in arts and synthesis.

Schedule Type: STU
Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 6
When Offered: Fall, Spring

AVT 390 - Video Art

Credits: 3
Not Repeatable for Credit
Offered by School of Art

Integrates study of contemporary art theory, montage theory, and artistic practices with application to new media and technology. Special focus on visual culture and video art, sound design, and the sociopolitical implications of media.

Prerequisite(s): AVT 280 or permission of the instructor.
Schedule Type: STU
Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 6
When Offered: Fall, Spring

AVT 392 - Gallery Practices
AVT 393 - Field Experience in the Arts

Credits: 1-6
Repeatable within Degree for Credit
Offered by School of Art
Introductory working and learning experience with an organization or individual in the arts or as a teaching assistant.

Prerequisite(s): Junior standing and permission of instructor and academic advisor.
Notes: Placement documentation to include 45 hours of work per credit. May be repeated for credit for maximum 6 credits.

Schedule Type: INT
Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0

AVT 394 - Honors Seminar

Credits: 1
Repeatable within Degree for Credit
Offered by School of Art
Offers highly motivated students opportunities to interact with art world professionals through field trips, research, critiques, and creative assignments.

Prerequisite(s): By invitation to qualified honors students.
Notes: Students accrue credits toward graduation with AVT honors. Repeatable for up to 8 credits.

Schedule Type: SEM
Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0

AVT 395 - Writing for Artists

Credits: 3
Not Repeatable for Credit
Offered by School of Art
Practical writing seminar in which students practice typical writing needs of creative professionals; including artist's statements,
grant proposals, and reviews; while also exploring ways in which artists have used writing, books, and language in art making.

Fulfills writing intensive requirement in the major.

**Prerequisite(s):** C or higher in ENGL 302/ENGH 302 or permission of instructor.
Prerequisite(s) enforced by registration system.

**Schedule Type:** LEC
**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0

**AVT 407 - Advanced Aesthetics**

Credits: 3
Not Repeatable for Credit
Offered by School of Art
Advanced examination of aesthetic concepts and theories, focusing on issues pertinent to artmaking.

**Prerequisite(s):** AVT 307 or permission of instructor.
**Schedule Type:** LEC
**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0
**When Offered:** Fall, Spring

**AVT 410 - Experiential Design History**

Credits: 3
Not Repeatable for Credit
Offered by School of Art
This hybrid lecture/studio course provides a historical perspective of the evolution of graphic design and examines graphic design's contribution to culture through writing and design projects. The course will have both lecture and studio content, providing 'hands-on' experiential opportunities in traditional graphic techniques.

**Schedule Type:** SEM
**Hours of Lecture or Seminar per week:** 3
**When Offered:** Fall, Spring

**AVT 411 - Motion Design**

Credits: 3
Not Repeatable for Credit
Offered by School of Art
Motion Design introduces the theories, techniques and practices of motion design and the integration of design, image, sound, video and animation.

**Prerequisite(s):** Admission to AVT BFA Graphic Design concentration or Web Design Minor, C or higher in AVT 217 and 311 or permission of instructor.
AVT 412 - Advanced Typography

Credits: 3
Not Repeatable for Credit
Offered by School of Art
An advanced exploration of type, design and the graphic organization of visual information. Emphasis is on the aesthetic and technical execution of typographic hierarchy in visual communications.

Prerequisite(s): D or higher in AVT 313 or permission of instructor.
Prerequisite(s) enforced by registration system.

AVT 413 - Professional Design Practices

Credits: 3
Not Repeatable for Credit
Offered by School of Art
Addresses the nature of the professional graphic designer in terms of career development and self-marketing, visual presentations of design work, preparation of written materials and interview techniques. Special emphasis will be given to the development of a design business, as well as freelance and pro-bono design work.

Prerequisite(s): C or higher in AVT 313 and 414 or permission of instructor.
Prerequisite(s) enforced by registration system.

AVT 414 - Corporate Design and Branding

Credits: 3
Not Repeatable for Credit
Offered by School of Art
Fundamentals of branding and identity design. Topics include logo development, product packaging, marketing and advertising collaterals, web branding, and broadcast advertising development. Special attention is given to the creation of a graphics
standards guide.

**Prerequisite(s):** C or higher in AVT 252 or AVT 253, AVT 311, and AVT 395, or permission of instructor or admittance into the Graphic Design Undergraduate Certificate, or Graphic Design Minor.
Prerequisite(s) enforced by registration system.

**Schedule Type:** STU  
**Hours of Lecture or Seminar per week:** 0  
**Hours of Lab or Studio per week:** 6

### AVT 415 - Web Design and Usability

Credits: 3  
Not Repeatable for Credit  
Offered by School of Art  
Introduces students to web design, usability, and the use of popular applications for static, interactive, and motion-based web development.

**Prerequisite(s):** C or higher in AVT 217 and AVT 311, AVT 313 or AVT 414 or permission of instructor.  
Prerequisite(s) enforced by registration system.

**Schedule Type:** STU  
**Hours of Lecture or Seminar per week:** 0  
**Hours of Lab or Studio per week:** 6  
**When Offered:** Fall, Spring

### AVT 416 - Advertising Design

Credits: 3  
Not Repeatable for Credit  
Offered by School of Art  
Provides insight and practice in the creative design process behind effective and memorable advertising. Emphasis on the design and presentation of a series of portfolio-ready advertising campaigns for actual client use.

**Prerequisite(s):** C or higher in AVT 414 or permission of instructor.  
Prerequisite(s) enforced by registration system.

**Schedule Type:** STU  
**Hours of Lecture or Seminar per week:** 0  
**Hours of Lab or Studio per week:** 6  
**When Offered:** Fall, Spring

### AVT 417 - Package Design

Credits: 3  
Not Repeatable for Credit  
Offered by School of Art
Provides a focused studio experience to conceptualize and design multiple applications for contemporary package design.

**Prerequisite(s):** Admitted AVT BFA Graphic Design concentration, C or higher in AVT 414 or permission of instructor. Prerequisite(s) enforced by registration system.

**Schedule Type:** STU  
**Hours of Lecture or Seminar per week:** 0  
**Hours of Lab or Studio per week:** 6  
**When Offered:** Fall, Spring

### AVT 419 - Topics in Graphic Design

Credits: 1-6  
Repeatable within Term for Credit  
Offered by School of Art  
Rotating subjects give students a deep look into and appreciation of a specific topic in design practice.

**Prerequisite(s):** C or higher in AVT 311 and either AVT 313 or 414. Prerequisite(s) enforced by registration system.

**Notes:** Topics and credit vary with instructor. May be repeated when taken under different topics.

**Schedule Type:** LEC  
**Hours of Lecture or Seminar per week:** 1-6  
**Hours of Lab or Studio per week:** 0-6

### AVT 420 - Advanced Web Design

Credits: 3  
Not Repeatable for Credit  
Offered by School of Art  
Building on the principles and skills gained in AVT 415, this course delves deeper into web-related concepts and techniques. Students will gain advanced knowledge in evolving web technology, preparing them for professional entry into the web design field.

**Prerequisite(s):** Admission to AVT BFA Graphic Design concentration, or the Web Design Minor, C or higher in AVT 415 or permission of instructor. Prerequisite(s) enforced by registration system.

**Schedule Type:** STU  
**Hours of Lecture or Seminar per week:** 0  
**Hours of Lab or Studio per week:** 6  
**When Offered:** Fall, Spring

### AVT 422 - Drawing III
AVT 423 - Drawing IV

Credits: 3
Not Repeatable for Credit
Offered by School of Art
Builds on intermediate drawing skills, emphasizing individual exploration and expressive techniques. Along with rigorous observational study, students work from a variety of sources to develop a broad understanding of visual solutions within contemporary art practice.

Prerequisite(s): AVT 323 or permission of instructor.
Schedule Type: STU
Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 6

AVT 432 - Painting III

Credits: 3
Not Repeatable for Credit
Offered by School of Art
Intermediate course with an emphasis on developing personal content, concepts, painting strategies, and a practical understanding of contemporary ideas in painting.

Prerequisite(s): AVT 333 or permission of instructor.
Schedule Type: STU
Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 6

AVT 433 - Advanced Painting I

Credits: 3
Not Repeatable for Credit
Offered by School of Art
Students engage in a self-directed studio practice through the development of content, personal sources, techniques, presentation strategies, and methods of analysis through critique.

Prerequisite(s): AVT 432 or permission of instructor.
Schedule Type: STU
Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 6

AVT 434 - Advanced Painting II

Credits: 3
Not Repeatable for Credit
Offered by School of Art
Students work rigorously and independently, advancing individual studio practice through in-depth dialogue with faculty and formal group critiques. Emphasis on individual decision making, personal initiative, and critical vocabularies.

Prerequisite(s): AVT 433 or permission of instructor.
Schedule Type: STU
Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 6

AVT 435 - Advanced Painting III

Credits: 3
Not Repeatable for Credit
Offered by School of Art
Advanced directed research in painting. Employing rigorous concepts, presentation strategies, and in-depth critique, students develop independent projects into a cohesive body of work.

Prerequisite(s): AVT 434 or permission of instructor.
Schedule Type: STU
Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 6

AVT 442 - Printmaking III

Credits: 3
Not Repeatable for Credit
Offered by School of Art
An intermediate print media course with an emphasis on a wider variety of tools and concepts that investigate photo-based imagery and advance personal narrative.

Prerequisite(s): AVT 343 or permission of the instructor.
Schedule Type: STU
Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 6

AVT 443 - Printmaking IV
An advanced print media course that uses hand-drawn, digital, and photo-based imagery. Students explore traditional and new printmaking techniques in a series of related prints and explore their relevancy to contemporary printmaking.

Prerequisite(s): AVT 442 or permission of the instructor.

Schedule Type: STU
Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 6

AVT 444 - Printmaking V

Credits: 3
Not Repeatable for Credit
Offered by School of Art
Advanced print media course incorporating three-dimensional applications of hand printmaking. Students develop concepts in digital printmaking, book making, sculptural prints, and installation works. Explores issues in contemporary printmaking through critical discussions, reading, and writing assignments.

Prerequisite(s): AVT 443 or permission of the instructor.

Schedule Type: STU
Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 6

AVT 445 - Printmaking VI

Credits: 3
Not Repeatable for Credit
Offered by School of Art
Students produce a body of print media work reflecting their interests, including the broader context of social, cultural, and contemporary issues. Students engage in collaborative studio practices and independent projects to integrate multiple visual technologies.

Prerequisite(s): AVT 444 or permission of the instructor.

Schedule Type: STU
Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 6

AVT 453 - Professional Practices

Credits: 3
Not Repeatable for Credit
Offered by School of Art
This course prepares studio art majors for their professional careers. Each student will select a facet of interest to develop assets for a professional portfolio. Emphasis will be placed on developing your professional brand and accompanying materials such as portfolio, websites, CVs etc. with critiques focusing on the individual's process.
Prerequisite(s): Completion of 60 credits and must have 12 credits of upper level studio course work.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

AVT 454 - Alternative Photo Processes

Credits: 3
Not Repeatable for Credit
Offered by School of Art
Introduction to 19th century and nontraditional photographic processes including cyanotype, van dyke, gum bichromate, liquid emulsion, and image transfer. Exploration and discussion of photography’s influences, application, and use in other mediums.

Prerequisite(s): AVT 353 or permission of instructor.
Schedule Type: STU
Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 6

AVT 455 - Digital Printing Techniques

Credits: 3
Not Repeatable for Credit
Offered by School of Art
Continuation of 354 Digital Photo Methods with further examination into digital techniques, personal expression and digital printing. Course emphasis is on the fine art and craft of the digital print and portfolio development.

Prerequisite(s): AVT 354 or permission of instructor.
Notes: Continuation of AVT 354
Schedule Type: STU
Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 6

AVT 457 - Documentary Photography

Credits: 3
Not Repeatable for Credit
Offered by School of Art
Introduces documentary photography: techniques, history, choices, and ideas necessary to create meaningful photo essays that incorporate a personal, committed, in-depth approach to seeing and depicting lives and situations.

Prerequisite(s): AVT 353 or permission of instructor.
Schedule Type: STU
Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 6
AVT 458 - Advanced Studio Lighting

Credits: 3  
Not Repeatable for Credit  
Offered by School of Art  
The advanced study of photographic studio lighting concepts using electronic strobes and power packs with emphasis placed on constructing studio materials, metering techniques, staging complex sets, and on-location photography.

Prerequisite(s): AVT 356 or permission of instructor.  
Schedule Type: STU  
Hours of Lecture or Seminar per week: 0  
Hours of Lab or Studio per week: 6

AVT 462 - Sculpture III

Credits: 3  
Not Repeatable for Credit  
Offered by School of Art  
Advanced studio course for continued individual, conceptual, and critical development in sculpture. Biweekly seminar, independent research, museum and gallery visits, vigorous individual and group critiques, required documentation, and portfolio preparation supporting studio projects.

Prerequisite(s): AVT 363 or permission of instructor.  
Schedule Type: STU  
Hours of Lecture or Seminar per week: 0  
Hours of Lab or Studio per week: 6

AVT 463 - Sculpture IV

Credits: 3  
Not Repeatable for Credit  
Offered by School of Art  
Intensive studio course for advanced sculpture students to further individual, conceptual, and critical development. Students produce a body of work based on technical exploration, critical discussion, reading, and writing.

Prerequisite(s): AVT 462 or permission of instructor.  
Schedule Type: STU  
Hours of Lecture or Seminar per week: 0  
Hours of Lab or Studio per week: 6

AVT 464 - Sculpture V

Credits: 3  
Not Repeatable for Credit
Offered by School of Art
Advanced studio course for rigorous and independent production of sculpture. Weekly topical seminar, vigorous critiques, museum and gallery visits, professional documentation, and research resulting in a body of work to be exhibited.

**Prerequisite(s):** AVT 463 or permission of instructor.
**Schedule Type:** STU
**Hours of Lecture or Seminar per week:** 0
**Hours of Lab or Studio per week:** 6

**AVT 465 - Sculpture VI**

Credits: 3
Not Repeatable for Credit
Offered by School of Art
Students work rigorously and independently, gaining insights into personal process and direction through one-on-one critical dialogue with faculty and formal group critiques. Emphasizes individual decision making and personal initiative.

**Prerequisite(s):** AVT 464 or permission of instructor.
**Notes:** Continuation of advanced work in AVT 465.

**Schedule Type:** STU
**Hours of Lecture or Seminar per week:** 0
**Hours of Lab or Studio per week:** 6

**AVT 472 - Critical Theory in the Visual Arts**

Credits: 3
Not Repeatable for Credit
Offered by School of Art
Examination of currents in theory and criticism that inform contemporary practice and critical analysis in the visual arts.

**Prerequisite(s):** ARTH 374 or permission of instructor.
Prerequisite enforced by registration system.

**Schedule Type:** LEC
**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0

**AVT 473 - Advanced Performance Studio**

Credits: 3
Not Repeatable for Credit
Offered by School of Art

**Prerequisite(s):** AVT 373 or permission of instructor.
AVT 474 - Sound Art II

Credits: 3
Not Repeatable for Credit
Offered by School of Art

Extends a working knowledge of the materiality of sound into an in-depth exploration of creation in the sonic realm. May include synthesis, circuit-bending, use of field recordings and other samples, and live performance.

AVT 482 - Advanced Image Making

Credits: 3
Not Repeatable for Credit
Offered by School of Art

In-depth look at the processes and mechanisms used to generate, reconstruct, and/or create new media images. Students are required to create a series of contextually related images and to further develop their critical analysis abilities.

Prerequisite(s): AVT 280 or permission of instructor.

AVT 483 - RS: Art and Interactivity

Credits: 3
Not Repeatable for Credit
Offered by School of Art

Provides a context for art making as an interactive and participatory experience while critically examining the ways in which technologies may aid and also inhibit engagement with the social and political world.

Designated as a research and scholarship intensive course.
AVT 487 - Advanced Topics: New Media Art

Credits: 3
Repeatable within Term for Credit
Offered by School of Art
Provides a context for exploring current developments in new media art practice in and outside the studio. Specific course content adapts and responds to ongoing movements in new media art and contemporary culture.

Prerequisite(s): AVT 280 plus one 300-level New Art Course, or permission of instructor.
Schedule Type: STU
Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 6
When Offered: Fall, Spring

AVT 489 - Internship in Art and Visual Technology

Credits: 1-6
Repeatable within Degree for Credit
Offered by School of Art
Unpaid professional-level work experience in a professional organization or with an individual artist, related to the student's concentration and career plans.

Prerequisite(s): Senior standing, completion of 12 concentration credits, and permission of instructor.
Notes: Placement documentation to include 45 hours of work per credit. May be repeated for credit for maximum 12 credits.

Schedule Type: INT
Hours of Lecture or Seminar per week: 1-12
Hours of Lab or Studio per week: 0

AVT 491 - Independent Study in Art and Visual Technology

Credits: 1-6
Repeatable within Term for Credit
Offered by School of Art
Opportunity for development of advanced skills and concepts in a field of interest. Study proposal must be approved by instructor prior to registration.

Prerequisite(s): Senior standing, completion of 12 concentration credits, and permission of instructor.
Notes: Project documentation to include 45 hours of work per credit. May be repeated for credit for maximum 24 credits.

Schedule Type: IND
Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 0

AVT 493 - Teaching Visual Thinking Through Media, PK-12
AVT 494 - Strategies in Art Room: PK-12

Credits: 3
Not Repeatable for Credit
Offered by School of Art
The study of various media, skills and concepts adapted for PK-12 curriculum. Includes instructor demonstrations, prototypes, practicum, and class presentations. Participants will learn appropriate instructional strategies for implementation.

Prerequisite(s): C or higher in AVT 495 or permission of art education director.
Prerequisite(s) enforced by registration system.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

AVT 495 - Introduction to Art Teaching and Learning

Credits: 3
Not Repeatable for Credit
Offered by School of Art
Explores art-teaching profession through readings, discussion, hands-on activities, and visits to diverse area public schools. Students discover a variety of ways that art is taught and evaluated to meet multiple educational needs of today's PK-12 students.

Prerequisite(s): Junior standing, completion of ENGL 302/ENGH 302 with a C or higher, and completion of at least 20 credits of AVT coursework (including AVT 307) with a C or higher; or permission of art education director.
Prerequisite(s) enforced by registration system.

Notes: Prior to enrollment, students must complete art education inquiry form.

Schedule Type: SEM
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
AVT 496 - Special Topics: (specific course title varies)

Credits: 1-4
Repeatable within Degree for Credit
Offered by School of Art
Explores topical studies in AVT including theoretical and critical aspects of art or studio production.

Notes: Topics and credit vary with instructor. May be repeated when taken under different topics.

Schedule Type: STU
Hours of Lecture or Seminar per week: 1-4
Hours of Lab or Studio per week: 0-4

AVT 497 - Senior Project

Credits: 3
Not Repeatable for Credit
Offered by School of Art
Capstone course in which students develop and present a cohesive body of work along with written materials and documentation. Students participate in critiques with visiting artists or AVT faculty and in workshops supporting professional goals.

Fulfills Mason Core requirement in synthesis.

Prerequisite(s): Senior art and visual technology major, completion of 12 concentration credits, and completion of or concurrent enrollment in all required Mason Core courses.
Schedule Type: STU
Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 6

AVT 498 - Senior Design Project

Credits: 3
Not Repeatable for Credit
Offered by School of Art
Capstone course in which students develop and present a design project exploring the possibilities of personal or professional expression. Students participate in critiques with visiting artists or AVT faculty and in workshops supporting professional goals.

Fulfills Mason Core requirement in synthesis.

Prerequisite(s): Senior art and visual technology major, completion of AVT 311, 313, and 414 with a C or higher, and completion of or concurrent enrollment in all required Mason Core courses.
Prerequisite(s) enforced by registration system.

Schedule Type: STU
Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 6
AVT 507 - Advanced Aesthetics

Credits: 3
Not Repeatable for Credit
Offered by School of Art
Graduate seminar in aesthetic concepts and theories, focusing on issues pertinent to artmaking.

Prerequisite(s): Admission to the MFA program or permission of instructor.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

AVT 519 - Special Topics in Graphic Design

Credits: 1-6
Repeatable within Term for Credit
Offered by School of Art
Exploration of topical studies in graphic design, including theoretical and critical aspects of studio production.

Prerequisite(s): Admission to AVT graduate program or permission of instructor.
Schedule Type: STU
Hours of Lecture or Seminar per week: 0-8
Hours of Lab or Studio per week: 1-6
When Offered: Fall, Spring

AVT 522 - Drawing V

Credits: 4
Not Repeatable for Credit
Offered by School of Art
Drawing on an advanced level, emphasizing individual decision-making and personal initiative.

Prerequisite(s): Admission to the AVT graduate program or permission of instructor.
Schedule Type: STU
Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 4

AVT 523 - Drawing VI

Credits: 4
Not Repeatable for Credit
Offered by School of Art
Drawing on an advanced level, emphasizing individual decision-making and personal initiative.

Prerequisite(s): Admission to the AVT graduate program, AVT 522, or permission of instructor.
AVT 595 - Introduction to Art Teaching and Learning

Credits: 3
Not Repeatable for Credit
Offered by School of Art
Explores art-teaching profession through readings, discussion, hands-on activities, visits to diverse area public schools and action research. Students analyze ways that art is taught and evaluated to meet multiple educational needs of today's PK-12 students.

Prerequisite(s): Admission to MAT Program or permission by the art education advisor or director

Schedule Type: SEM
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

AVT 596 - Independent Study

Credits: 1-6
Repeatable within Term for Credit
Offered by School of Art
Independent reading and research on specific project under department faculty member's direction.

Prerequisite(s): Admission to AVT graduate program or permission of instructor.
Notes: Written reports required. May be repeated for credit.

Schedule Type: IND
Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 0

AVT 599 - Special Topics in Art and Visual Technology

Credits: 1-6
Repeatable within Term for Credit
Offered by School of Art
Exploration of topical studies in AVT, including theoretical and critical aspects of art or studio production.

Prerequisite(s): Admission to AVT graduate program or permission of instructor.
Notes: Topics and credit vary with instructor. May be repeated when taken under different topics.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0-6
AVT 600 - Research Methodologies

Credits: 3  
Not Repeatable for Credit  
Offered by School of Art  
Graduate seminar focusing on development of independent research project in student's area of emphasis. Explores principal methods of researching and documenting art and arts practice. Along with traditional methods of library research, emphasizes new processes of examination and investigation through the use of computer-aided research systems.

Prerequisite(s): Admission to AVT graduate program or permission of instructor.  
Schedule Type: SEM  
Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0

AVT 605 - Issues and Research in Art Education

Credits: 3  
Not Repeatable for Credit  
Offered by School of Art  
Readings and projects explore historical and contemporary ideas, issues, philosophies, pedagogy, and research in art education. Investigates teachers' use of research-oriented questions and data to explore classroom issues and improve teaching and learning.

Prerequisite(s): Admission to the MAT program and permission of instructor.  
Schedule Type: LEC  
Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0

AVT 606 - Creativity and Cognition in the Arts and Media

Credits: 3  
Not Repeatable for Credit  
Offered by School of Art  
Focuses on research on cognition, development, learning, and creativity in the visual arts and media in formal and informal educational settings.

Equivalent to EDEP 601  
Schedule Type: SEM  
Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0

AVT 610 - Graduate Seminar

Credits: 2  
Repeatable within Degree for Credit  
Offered by School of Art
Students present their work or the work of contemporary artists for discussion and peer and faculty critiques. Special focus on developing public communication and presentation skills on contemporary issues in the arts.

**Prerequisite(s):** Admission to AVT graduate program or permission of instructor.
**Notes:** Seminar course required of all AVT graduate students four times during course of study. Repeatable for 8 credits.

**Schedule Type:** SEM  
**Hours of Lecture or Seminar per week:** 2  
**Hours of Lab or Studio per week:** 0

---

**AVT 611 - Graduate Design Seminar**

Credits: 1  
Repeatable within Degree for Credit  
Offered by School of Art  
A laboratory for the exploration of contemporary design theory and practice through writing and design making, this class will have rotating topical content.

**Prerequisite(s):** Admission to graphic design MA (or MFA) program, or permission of the instructor.  
**Notes:** Can be repeated.

**Schedule Type:** SEM  
**Hours of Lecture or Seminar per week:** 1  
**Hours of Lab or Studio per week:** 0

---

**AVT 612 - Independent Project Research**

Credits: 1  
Repeatable within Degree for Credit  
Offered by School of Art  
Provides the development and research phase in preparation for AVT 794: Independent Design Project, the capstone course in the Graphic Design masters program. Students will prepare their written final project proposal for presentation to the AVT GD Graduate Faculty Committee.

**Prerequisite(s):** Admission to AVT MA Graphic Design program and completion of 30 graduate credits.  
**Notes:** To be completed prior to enrolling in AVT 794: Independent Design Project.

**Schedule Type:** IND  
**Hours of Lecture or Seminar per week:** 1-12  
**Hours of Lab or Studio per week:** 0  
**Grading:** Graduate Special  
**When Offered:** Fall, Spring

---

**AVT 613 - Experiential Design History**

Credits: 3  
Not Repeatable for Credit
Offered by School of Art
This hybrid lecture/studio course provides a historical perspective of the evolution of graphic design and examines graphic design's contribution to culture through writing and design projects. The course will have both lecture and studio content, providing "hand's on" experiential opportunities in traditional graphic techniques.

**Prerequisite(s):** Admission to AVT graduate program or permission of instructor.

**Schedule Type:** LEC
**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0

### AVT 614 - Brand Identity Design

Credits: 4
Not Repeatable for Credit
Offered by School of Art
This is an advanced design course with an emphasis on brand identity development. Topics include logo development, product packaging, marketing and advertising collaterals, web branding, and broadcast advertising development. Special attention is given to the creation of a graphic standards guide.

**Prerequisite(s):** Admission to the AVT graduate program or permission of instructor.

**Schedule Type:** STU
**Hours of Lecture or Seminar per week:** 2
**Hours of Lab or Studio per week:** 4

### AVT 615 - Technology for Art Teachers

Credits: 3
Not Repeatable for Credit
Offered by School of Art
Addresses use of technology in PK-12 art classroom. Focuses on research, presentation and instruction, and image creation. Students develop technology-enhanced teaching units for different grade levels and explore related issues, including copyright, plagiarism, and appropriation.

**Prerequisite(s):** Admission to the Art Education concentration ASTL and/or permission of art education director.

**Schedule Type:** LEC, STU
**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0

### AVT 616 - Advanced Art and Interactivity

Credits: 4
Not Repeatable for Credit
Offered by School of Art
Studio, lecture course investigating art as networked activity. Particular attention focused on Internet as context for creation, distribution, and patronage of art.
**Prerequisite(s):** Admission to AVT graduate program.

**Schedule Type:** STU  
**Hours of Lecture or Seminar per week:** 1  
**Hours of Lab or Studio per week:** 6

---

**AVT 617 - Advanced Typography**

Credits: 4  
Not Repeatable for Credit  
Offered by School of Art  
Students will produce a body of work exploring the opportunities and limitations of typographical design.

**Prerequisite(s):** Admission to graphic design MA (or MFA) program, or permission of the instructor.  
**Corequisite(s):** Admission to the AVT graduate program or permission of instructor.

**Schedule Type:** STU  
**Hours of Lecture or Seminar per week:** 2  
**Hours of Lab or Studio per week:** 4

---

**AVT 618 - Visual Communication Theories**

Credits: 2  
Not Repeatable for Credit  
Offered by School of Art  
Advanced graduate seminar focusing on key theories and themes that have informed 20th and 21st century design practice. Explores theory and criticism in a variety of contexts, from popular to scholarly, and considers the role of designers as thinkers and writers.

**Prerequisite(s):** Admission to MFA program, or permission of instructor.  
**Schedule Type:** LEC  
**Hours of Lecture or Seminar per week:** 2  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall, Spring

---

**AVT 619 - Advanced Web Design**

Credits: 4  
Not Repeatable for Credit  
Offered by School of Art  
Develops skills for the application of information, interaction, usability, and visual design for web site developments. Students gain in-depth knowledge of user behaviors and broader context of social, cultural, and contemporary issues in web communication. Students learn professional design processes and integrate multiple web developing technologies.

**Prerequisite(s):** Admission to Graphic Design MA program or permission of instructor.  
**Schedule Type:** STU  
**Hours of Lecture or Seminar per week:** 2  
**Hours of Lab or Studio per week:** 4
**AVT 620 - Theory, Criticism, and the Arts**

Credits: 3  
Not Repeatable for Credit  
Offered by School of Art  
Cross-disciplinary graduate seminar focusing on key theories and themes that have informed 20th- and 21st-century arts practice. Explores theory and criticism in a variety of contexts, from popular to scholarly, and considers the role of artists as thinkers and writers.

**Prerequisite(s):** Admission to AVT graduate program or permission of instructor.  
**Schedule Type:** LEC  
**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**AVT 621 - Art Writing Seminar**

Credits: 3  
Not Repeatable for Credit  
Offered by School of Art  
Includes criticism, the artist statement, manifestos, and language as visual art.

**Prerequisite(s):** Admission to the MFA program.  
**Schedule Type:** LEC  
**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall, Spring

**AVT 622 - Advanced Drawing**

Credits: 4  
Not Repeatable for Credit  
Offered by School of Art  
Advanced directed research in drawing with continued development of individual aesthetic. Study of historical and philosophical precedents integral.

**Prerequisite(s):** Admission to AVT graduate program or permission of instructor.  
**Schedule Type:** STU  
**Hours of Lecture or Seminar per week:** 2  
**Hours of Lab or Studio per week:** 4

**AVT 632 - Graduate Painting I**

Credits: 4  
Not Repeatable for Credit
Offered by School of Art
Entering students are expected to be competent painters, with technical proficiency, a disciplined process, and a directed personal vision. Students work rigorously and independently toward the understanding and mastery of techniques, methods, and concepts relevant to formal expression of personal content. Students expected to participate in critical discourse with supervising faculty. Achievement measured by faculty review board at mid-semester and term's end.

Prerequisite(s): Admission to AVT graduate program or permission of instructor.
Schedule Type: STU
Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 4

AVT 633 - Graduate Painting II

Credits: 4
Not Repeatable for Credit
Offered by School of Art
Building on research and practices established in Graduate Painting I, students continue to develop strategies for the expression of personal vision and style. Progress tracked and assessed through periodic one-on-one critical discussions with supervising faculty. Achievement measured by faculty review board at mid-semester and term's end.

Prerequisite(s): AVT 632, or permission of instructor.
Schedule Type: STU
Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 4

AVT 634 - Advanced Graduate Painting I

Credits: 4
Not Repeatable for Credit
Offered by School of Art
Working independently on a cohesive body of work, students must demonstrate a thorough understanding and mastery of techniques, methods, and concepts relevant to their own practices, and be able to discuss their work within the context of historical and contemporary art practices. Progress tracked and assessed through periodic one-on-one critical discussions with supervising faculty. Achievement measured by faculty review board at mid-semester and term's end.

Prerequisite(s): AVT 633, or permission of instructor.
Schedule Type: STU
Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 4

AVT 635 - Advanced Graduate Painting II

Credits: 4
Not Repeatable for Credit
Offered by School of Art
Advanced independent studio production. Progress tracked and assessed through periodic critical discussions with supervising faculty. Achievement measured by faculty review board at mid-semester and end of term.
Prerequisite(s): AVT 634, or permission of instructor.
Schedule Type: STU
Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 4
When Offered: Fall, Spring

AVT 641 - Graduate Graphic Design I

Credits: 4
Not Repeatable for Credit
Offered by School of Art
Working independently on a cohesive body of work, students must demonstrate a thorough understanding and mastery of techniques, methods, and concepts relevant to their own practices, and be able to discuss their work within the context of historical and contemporary design practices. Progress tracked and assessed through periodic one-on-one critical discussions with supervising faculty. Achievement measured by faculty review board at term's end.

Prerequisite(s): Admission to MFA program.
Schedule Type: IND
Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 4
When Offered: Fall, Spring

AVT 642 - Graduate Printmaking I

Credits: 4
Not Repeatable for Credit
Offered by School of Art
Directed research and practice in printmaking focuses on individualized development of content and technique. Explores intellectual and expressive aspects of printmaking process.

Prerequisite(s): Admission to AVT graduate program or permission of instructor.
Schedule Type: STU
Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 4

AVT 643 - Graduate Printmaking II

Credits: 4
Not Repeatable for Credit
Offered by School of Art
Directed research and practice in printmaking focuses on individualized development of content and technique. Explores intellectual and expressive aspects of printmaking process.

Prerequisite(s): AVT 642 or permission of instructor.
Schedule Type: STU
AVT 644 - Advanced Graduate Printmaking I

Credits: 4
Not Repeatable for Credit
Offered by School of Art
Intensive course of creative exploration in print media that furthers students' independence through production of individualized body of work reflecting interests within the broader contexts of contemporary social, technological, and cultural issues. Students also engage in collaborative studio practices to integrate visual technologies in their work. These may include digital imaging, drawing, graphic design, painting, performance, photography, and sculpture.

Prerequisite(s): Admission to the AVT graduate program, AVT 643, or permission of instructor.
Schedule Type: STU
Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 6

AVT 645 - Advanced Graduate Printmaking II

Credits: 4
Not Repeatable for Credit
Offered by School of Art
Intensive studio course that furthers student independence through production of a body of work reflecting a broad context of social, cultural and contemporary issues.

Prerequisite(s): Admission to MFA program, and AVT 644.
Schedule Type: IND
Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 4
When Offered: Fall, Spring

AVT 646 - Graduate Graphic Design II

Credits: 4
Not Repeatable for Credit
Offered by School of Art
Continuing to work independently on a cohesive body of work, students must demonstrate a thorough understanding and mastery of techniques, methods, and concepts relevant to their own practices, and be able to discuss their work within the context of historical and contemporary art and design practices. Progress tracked and assessed through periodic one-on-one critical discussions with supervising faculty. Achievement measured by faculty review board at term's end. (This is the second course in a two-course sequence.)

Prerequisite(s): Admission to MFA program.
Schedule Type: IND
Hours of Lecture or Seminar per week: 0
AVT 647 - Advanced Graduate Graphic Design I

Credits: 4
Not Repeatable for Credit
Offered by School of Art
Working independently on a cohesive body of work, students must demonstrate a thorough understanding and mastery of techniques, methods, and concepts relevant to their own practices, and be able to discuss their work within the context of historical and contemporary design practices. Progress tracked and assessed through periodic one-on-one critical discussions with supervising faculty. Achievement measured by faculty review board at term's end.

Prerequisite(s): Admission to MFA program, and AVT 646
Schedule Type: IND
Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 4
When Offered: Fall, Spring

AVT 648 - Advanced Graphic Design II

Credits: 4
Not Repeatable for Credit
Offered by School of Art
Continuing to work independently on a cohesive body of work, students must demonstrate a thorough understanding and mastery of techniques, methods, and concepts relevant to their own practices, and be able to discuss their work within the context of historical and contemporary art and design practices. Progress tracked and assessed through periodic one-on-one critical discussions with supervising faculty. Achievement measured by faculty review board at term's end. (This is the second course in a two course sequence.)

Prerequisite(s): Admission to MFA program, and AVT 647.
Schedule Type: IND
Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 4
When Offered: Fall, Spring

AVT 652 - Graduate Photography I

Credits: 4
Not Repeatable for Credit
Offered by School of Art
Critical theory and directed practice in photography focusing on development of a personal voice and working method through intellectual activity and creative work. Emphasizes ability to explore concepts, develop skills, and evolve as a communicator of ideas and photographic artist.

Prerequisite(s): Admission to AVT graduate program or permission of instructor.
Schedule Type: STU
AVT 653 - Graduate Photography II

Credits: 4
Not Repeatable for Credit
Offered by School of Art
An intensive critique class concentrating on the development of creative work with emphasis on articulating responses to others' work, the cultural climate, and issues involved in one's own work as it progresses.

Prerequisite(s): Admission to AVT graduate program or permission of instructor.
Notes: Continuation of Graduate Photography I. Weekly classes share equal time with critical theory and hands-on studio work. Includes readings, visiting artists and lecturers, and field trips.

Schedule Type: STU
Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 4

AVT 654 - Advanced Graduate Photography I

Credits: 4
Not Repeatable for Credit
Offered by School of Art
Intensive critique class concentrating on the development of creative work with emphasis on articulating responses to others' work, the cultural climate, and issues involved in one's own work as it progresses.

Prerequisite(s): Admission to the AVT graduate program, AVT 653, or permission of instructor.
Notes: Advanced graduate photography course. Weekly classes share equal time with critical theory and hands-on studio work. Includes readings, visiting artists and lecturers, and field trips.

Schedule Type: STU
Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 4

AVT 655 - Advanced Graduate Photography II

Credits: 4
Not Repeatable for Credit
Offered by School of Art
AVT 655, Advanced Graduate Photography II, Advanced independent studio production. Progress tracked and assessed through periodic critical discussions with supervising faculty. Achievement measured by faculty review board at mid-semester and end of term.

Prerequisite(s): AVT 652, or permission of instructor.
Schedule Type: STU
Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 4
When Offered: Fall, Spring.

AVT 662 - Graduate Sculpture I

Credits: 4
Not Repeatable for Credit
Offered by School of Art
Intensive studio course that furthers student independence through production of a body of work reflecting interests, including a broader context of social, cultural, and contemporary issues. Emphasizes self-evaluation, critical discussion, reading, and writing.

Prerequisite(s): Admission to AVT graduate program or permission of instructor.
Schedule Type: STU
Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 4

AVT 663 - Graduate Sculpture II

Credits: 4
Not Repeatable for Credit
Offered by School of Art
Intensive studio course that furthers student independence through production of a body of work reflecting interests, including a broader context of social, cultural, and contemporary issues. Emphasizes self-evaluation, critical discussion, reading, and writing.

Prerequisite(s): Admission to the AVT graduate program, AVT 662 or permission of instructor.
Schedule Type: STU
Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 4

AVT 664 - Advanced Graduate Sculpture I

Credits: 4
Not Repeatable for Credit
Offered by School of Art
Emphasizes individual creative production and development, with periodic exposure of student's work and ideas to the critical attention of the AVT teaching faculty and other graduate students.

Prerequisite(s): Admission to the AVT graduate program, AVT 663 or permission of instructor.
Notes: Writing and reading components.
Schedule Type: STU
Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 4

AVT 665 - Advanced Graduate Sculpture II
AVT 667 - Two-Dimensional Art Making: Form, Theme, and Context

Credits: 3
Not Repeatable for Credit
Offered by School of Art
Through studio work and research on basic and innovative drawing strategies, students explore expressive visual qualities, composition, and color. Students develop professional portfolios that incorporate meaningful themes and contexts for developing visual literacy in PK-12.

Prerequisite(s): Admission to the MAT program and permission of the instructor based on a portfolio review.
Schedule Type: STU
Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 4

AVT 668 - Three-Dimensional Art Making Across Cultures

Credits: 3
Not Repeatable for Credit
Offered by School of Art
Explores the diversity of art forms in world cultures and work of traditional and contemporary artists. Students learn basic three-dimensional art-making techniques, including ceramics and fibers, and learn to design three-dimensional art instruction for PK-12 levels.

Prerequisite(s): Admission to the MAT program or Art Education Concentration ASTL; or permission of the art education director.
Schedule Type: STU
Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 4

AVT 669 - Four Dimensional Art Making: Technology and New Media

Credits: 4
Not Repeatable for Credit
Offered by School of Art
Develops teacher skills for the application of advanced technology for the PK-12 art program and examines the changing nature
and uses of technology for expanding visual literacy through pedagogical strategies.

**AVT 670 - Teaching Practicum**

Credits: 1  
Repeatable within Degree for Credit  
Offered by School of Art  
Supervised classroom teaching practicum in Mason's undergraduate program or community college program.

**Prerequisite(s):** Admission to AVT graduate program or permission of instructor.  
**Notes:** May be repeated for total of 4 credits.

**AVT 672 - Performance Studio I**

Credits: 4  
Not Repeatable for Credit  
Offered by School of Art  
Introductory studio course looking at performance as a visual art practice and focusing on time, space and the body. Emphasizes artist as performer. Students study the work of performance practitioners, make short performance pieces, document and exhibit their work, and go to galleries and performances locally and in New York.

**Prerequisite(s):** Admission to AVT graduate program or permission of instructor.  
**Notes:** Substantial research project required.

**AVT 674 - Advanced Performance Studio**

Credits: 4  
Not Repeatable for Credit  
Offered by School of Art  
Advanced laboratory for creating and producing performance art. Emphasizes new technologies and their applications, multimedia scriptwriting and storyboarding, and the creation of audiovisual performance. Students work independently and also contribute to collaborative production.
AVT 676 - Graduate Sound Art

Credits: 4
Not Repeatable for Credit
Offered by School of Art
Assuming basic competency in digital audio production and within the theory of sounded experience, students will be assisted in the incorporation of sonic material into their graduate research projects.

Prerequisite(s): Admission to AVT graduate program or permission of instructor.
Schedule Type: STU
Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 2
When Offered: Fall, Spring

AVT 678 - Interface and CD-ROM Design

Credits: 5
Not Repeatable for Credit
Offered by School of Art
Combined lecture and studio course in multimedia interface and CD-ROM design. Focuses on exporting traditional visual and aural artistic aesthetic to the computer environment within a multimedia context. Assigned class readings augmented and supported by presentations of various digital interfaces and CD-ROM examples. Discusses commercial, entertainment, and educational titles, as well as CD-ROM experimental art works. Studio time divided between AVT labs and area multimedia facilities. Students conceive, design, and develop two CD-ROM or kiosk interfaces due at midterm, and complete a dual platform CD-ROM project due at semester end.

Prerequisite(s): Admission to AVT graduate program or permission of instructor.
Schedule Type: STU
Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 6

AVT 682 - Experimental 2D Animation

Credits: 4
Not Repeatable for Credit
Offered by School of Art
Designed to broaden range of visually expressive, time-based media from cell animation and stop motion animation to rotoscoping and two-dimensional digital animation. Emphasizes idea generation, concept development, and visual aesthetics.

Prerequisite(s): Admission to AVT graduate program or permission of instructor.
Schedule Type: STU
AVT 684 - Advanced Image Making

Credits: 4
Not Repeatable for Credit
Offered by School of Art
Overview of two-dimensional computer-imaging applications in the arts, including painting, printmaking, mixed media, illustration, video, and animation. Lectures combine technical and aesthetic material, including image processing for artists and color reproduction. Emphasis on developing advanced studio portfolio.

Prerequisite(s): Admission to AVT Graduate Program.
Schedule Type: STU
Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 4

AVT 685 - Video Art

Credits: 4
Not Repeatable for Credit
Offered by School of Art
Explores video as medium that is transforming art and is transformed by art. Emphasizes developing an approach to personal narrative, creative skills, and construction of meaning, as well as on acquiring technical skills.

Prerequisite(s): Admission to AVT graduate program or permission of instructor.
Schedule Type: STU
Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 4

AVT 686 - Experimental 3D Animation

Credits: 4
Not Repeatable for Credit
Offered by School of Art
Teaches how to create realistic, three-dimensional scenes with scaled objects, surface textures, lights, and shadows. Emphasizes idea generation, concept development, visual aesthetics, and technical abilities. Students required to render a portfolio of high-resolution images.

Prerequisite(s): Admission to AVT Graduate Program.
Schedule Type: STU
Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 4

AVT 687 - Advanced Topics: New Media
AVT 688 - Hybrid Animation

Credits: 4
Not Repeatable for Credit
Offered by School of Art
Advanced course in digital media, including layer compositing, digital video editing, rotoscoping, and cell animation. Emphasizes integrating traditional techniques with software applications; and publishing projects to CD-ROM, DV tape, DVD, and Internet.

Prerequisite(s): Admission to AVT graduate program or permission of instructor.
Schedule Type: STU
Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 6

AVT 691 - Elementary Art Education

Credits: 3
Not Repeatable for Credit
Offered by School of Art
Concepts and methods in early childhood and elementary art education.

Prerequisite(s): Admission to the MAT program and permission of instructor.
Notes: Students spend three hours per week in class and one hour per week in required field experience in public schools and other educational settings.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 1

AVT 692 - Secondary Art Education

Credits: 3
Not Repeatable for Credit
Offered by School of Art
Concepts and methods in secondary art education.
**Prerequisite(s):** AVT 691 or permission of instructor.
**Notes:** Students spend three hours per week in class, and one hour per week in required field experience in the public schools and other educational settings.

**Schedule Type:** LEC  
**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 1

**AVT 694 - Advanced Studies in Teaching Critical Response to Art, PK-12**

Credits: 3  
Not Repeatable for Credit  
Offered by School of Art  
Develops visual literacy and critical thinking skills by examining diverse theoretical models and applying strategies to expand knowledge about art and artifacts in the PK-12 classroom and museum.

**Prerequisite(s):** Admission to the Art Education concentration ASTL and/or permission of the art education director.
**Schedule Type:** SEM  
**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**AVT 695 - Internship in Art Education (Student Teaching)**

Credits: 5  
Not Repeatable for Credit  
Offered by School of Art  
Full-time internship in which students teach in elementary and secondary schools with guidance from cooperating mentor teachers. College supervisors make periodic site visits to observe, assess, and evaluate progress.

**Prerequisite(s):** Completion of all other MAT program requirements.  
**Corequisite(s):** AVT 696.

**Schedule Type:** INT  
**Hours of Lecture or Seminar per week:** 1-2  
**Hours of Lab or Studio per week:** 0  
**Grading:** Satisfactory/No Credit.

**AVT 696 - Internship in Art Education Seminar**

Credits: 1  
Not Repeatable for Credit  
Offered by School of Art  
Weekly professional seminar focused on needs and concerns of student teachers. Covers issues as they emerge in practice, and concludes with an "Art of Teaching Art" exhibit of work by students of preservice teachers.

**Corequisite(s):** AVT 695.
AVT 697 - Advanced Strategies and Curricular Innovations in the Visual Arts

Credits: 3
Not Repeatable for Credit
Offered by School of Art
Synthesizing knowledge and understandings gained in ASTL program, seminar focuses on innovative curriculum design, mastery of effective instructional strategies, and developing leadership potential for the field of visual art education.

Prerequisite(s): Completion of all ASTL art education concentration courses.
Schedule Type: SEM
Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 0

AVT 698 - Independent Study/Directed Readings

Credits: 1-3
Repeatable within Degree for Credit
Offered by School of Art
Prerequisite(s): Admission to the MAT or Art Education Concentration,(ASTL) and permission of art education director.
Schedule Type: IND
Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 1-12

AVT 794 - Graphic Design Project

Credits: 4
Not Repeatable for Credit
Offered by School of Art
The capstone course in the graphic design Master of Arts degree. Provides for the independent development, design, production and presentation of a graduate-level design project guided by faculty and design professionals.

Prerequisite(s): Admission to the AVT Graphic Design graduate program and completion of 30 graduate credits.
Schedule Type: IND
Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0
Grading: Graduate Special

AVT 796 - Directed Reading
The development of independent research into the historical precedents, theoretical underpinnings, cultural forms, and idea territories pertinent to student's individual studio practice. Individualized section under the direction of division member.

Prerequisite(s): Admission to AVT graduate program or permission of instructor.
Notes: One of three courses comprising the MFA comprehensive experience for AVT students.

Schedule Type: IND
Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0

AVT 798 - Directed Project and Exhibition

The construction and presentation of a professional-quality public exhibition. Course includes significant independent studio production of a comprehensive body of work, leading to the MFA Thesis Exhibition. Exhibition must demonstrate student's mastery of studio craft and concept. Individualized section under the direction of division member.

Prerequisite(s): Admission to AVT graduate program or permission of instructor.
Notes: One of three courses comprising the MFA comprehensive experience for AVT students.

Schedule Type: STU
Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

AVT 799 - Thesis

The written thesis informs, documents, and enhances the MFA thesis exhibition, which is the student's primary creative research activity. The content of the written thesis may vary in accordance with artistic discipline and final exhibition. Individualized section under the direction of division member.

Prerequisite(s): Admission to AVT graduate program or permission of instructor.
Notes: One of three courses comprising the MFA comprehensive experience for AVT students.

Schedule Type: IND
Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 0
Grading: Satisfactory/No credit only

Arts Management (AMGT)
AMGT 402 - Professional Development

Credits: 1
Not Repeatable for Credit
Offered by Arts Management
Seminar course that involves the development of workplace frameworks for success.

Prerequisite(s): Junior standing, admission to the arts administration minor, or permission of instructor.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0
When Offered: Fall

AMGT 405 - Seminar in Arts Management

Credits: 3
Not Repeatable for Credit
Offered by Arts Management
Focuses on not-for-profit visual and performing arts organizations. Topics covered include the evolution of the field, the internal culture and structure, external influences, governance, planning, human resources, marketing, fundraising, financial management, economic impact, and other topics. Students will be introduced to a wide range of arts organizations, working arts administrators, and institutional models through field trips, guest lectures, readings, and institutional data.

Prerequisite(s): Junior standing, admission to arts administration minor, or permission of instructor.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring

AMGT 410 - Arts Advocacy and Community

Credits: 3
Not Repeatable for Credit
Offered by Arts Management
This course is an overview of advocacy and community engagement as practiced by the arts manager, artist, and educator. Students will learn to identify the need for community engagement and to develop successful techniques to implement outreach. Other topics will include accessibility, diversity, volunteerism, and governance.

Prerequisite(s): Junior standing or permission of program director.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring
AMGT 471 - Introduction to Grant Writing

Credits: 1
Not Repeatable for Credit
Offered by Arts Management
Course focuses on developing the skills necessary for successful grant applications for arts organizations. Study of relevant funding sources, awareness of available research materials, ability to construct coherent proposals, and defining fund-raising strategy for an arts organization.

Prerequisite(s): Junior standing, admission to the arts administration minor, or permission of the instructor.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0
When Offered: Summer

AMGT 472 - Technology in the Arts

Credits: 1
Not Repeatable for Credit
Offered by Arts Management
The one constant in life is change. In today's world, both technology and arts organizations are changing. This course will give a broad overview of the technologies commonly used in entrepreneurial, small, and large arts organizations and examines the intersection of technology, management, and the arts.

Prerequisite(s): Junior standing.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0
When Offered: Spring

AMGT 489 - Internship in Arts Management

Credits: 1-4
Repeatable within Degree for Credit
Offered by Arts Management
Apprenticeship, internship, or project with organization or individual in the arts. Must be prearranged with the minor coordinator before enrollment.

Prerequisite(s): Junior Standing, completion of 6 credits of courses in area of residency, AMGT 305, or permission of instructor.
Schedule Type: INT
Hours of Lecture or Seminar per week: 1-4
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring, Summer

AMGT 504 - Professional Development Arts Management
Combines experimental facets happening within the creative community and the development of an increasing awareness of self. Professional development is not only for the manager, but also for those who work for that manager. It is collaborative, ideally incorporating an evaluative stage. Topics addressed include professional development, consultation, coaching, communities of practice, lesson study, mentoring, reflective supervision and technical assistance.

**Prerequisite(s):** Admission to Arts Management program or permission of program director.

**Schedule Type:** LEC

**Hours of Lecture or Seminar per week:** 1

**Hours of Lab or Studio per week:** 0

**When Offered:** Fall, Spring

### AMGT 511 - Introduction to Grant Writing

Credits: 1

Not Repeatable for Credit

Offered by Arts Management

Places components of the grant writing process; including research, proposal writing, terminology, oral and written techniques, and specific focus; within broader context of nonprofit management. Introduction to perspectives of grant seeker and maker. Discover resources and compelling writing skills pertaining to proposal and letters of intent.

**Prerequisite(s):** Admission to Arts Management program or permission of program director.

**Schedule Type:** LEC

**Hours of Lecture or Seminar per week:** 1

**Hours of Lab or Studio per week:** 0

### AMGT 512 - Grant Writing in the Arts

Credits: 1

Not Repeatable for Credit

Offered by Arts Management

Places components of grant writing process within broader context of nonprofit management. Introduction to perspectives of grant seeker and maker. The grant writing process: research, proposal writing, terminology, oral and written techniques, and specific focus. Discover resources and compelling writing skills pertaining to proposal and letters of intent.

Equivalent to AMGT 712 (2013-2014 Catalog).

**Prerequisite(s):** Admission to Arts Management program or permission of program director.

**Schedule Type:** LEC

**Hours of Lecture or Seminar per week:** 1

**Hours of Lab or Studio per week:** 0

**When Offered:** Fall

### AMGT 513 - Technology in the Arts
Credits: 1
Not Repeatable for Credit
Offered by Arts Management
The one constant in life is change. In today's world, both technology and arts organizations are changing. This course will give a board overview of the technologies commonly used in entrepreneurial, small, and large arts organizations and examines the intersection of technology, management, and the arts.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0
When Offered: Spring

AMGT 599 - Special Topics in Arts Management

Credits: 1-6
Repeatable within Degree for Credit
Offered by Arts Management
Provides opportunity to explore special and timely topics in arts management including theoretical and applied areas. Topics and credit vary; may be repeated for up to 12 credits taken under different topics.

Prerequisite(s): Admission to Arts Management program or permission of program director.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring, Summer

AMGT 601 - Fund Raising/Development I

Credits: 3
Not Repeatable for Credit
Offered by Arts Management
Overview for students seeking general knowledge, as well as introductory course for those who will complete the fund-raising concentration. Teaches role of fund raising as management function and part of overall strategic intention of arts organizations, presenting fund raising as a multifaceted, team-based process. Analyzes tools and techniques for effective fund raising.

Prerequisite(s): Admission to Arts Management program or permission of program director.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

AMGT 602 - Seminar in Arts Management

Credits: 3
Not Repeatable for Credit
Offered by Arts Management
Develops tools and techniques necessary for successful pursuit of a management career in visual and performing arts. Introduces
wide range of arts organizations, working arts administrators, and institutional models through guest lectures, readings, field trips, and analysis of institutional data. Students gain understanding of organizational structures and functions, as well as models for general management.

**Prerequisite(s):** Admission to Arts Management program or permission of program director.

**Schedule Type:** SEM
**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0
**When Offered:** Fall, Spring, Summer

**AMGT 603 - Arts and Society**

Credits: 3
Not Repeatable for Credit
Offered by Arts Management
Examines role of visual and performing arts, with emphasis on historic traditions and trends that have most directly influenced contemporary American practice. Consideration is given to the functions of art in society in addressing questions: What constitutes good or bad art? What is the value of art? What encouragements or impediments does our society offer to the creative artist or arts institution?

**Prerequisite(s):** Admission to Arts Management program or permission of program director.

**Schedule Type:** LEC
**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0
**When Offered:** Fall, Spring, Summer

**AMGT 604 - Public Relations and Marketing Strategies for the Arts I**

Credits: 3
Not Repeatable for Credit
Offered by Arts Management
Teaches strategic way of thinking about audience, community, and markets. Structured into four modules, beginning with fundamentals of strategic planning. Students learn about external and internal environments and the interplay among them; discuss marketing fundamentals pertaining to arts audiences; and are introduced to fundamentals of applied marketing media and advertising fundamentals.

**Prerequisite(s):** Admission to Arts Management program or permission of program director.

**Schedule Type:** LEC
**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0
**When Offered:** Fall, Spring, Summer

**AMGT 606 - Governance and Leadership**

Credits: 3
Not Repeatable for Credit
Offered by Arts Management
Board development including oversight and management of a board, as well as understanding board functions. Board relationships, including volunteers, are essential through all of the stages of a management career.

**Prerequisite(s):** Admission to Arts Management program or permission of program director.

**Schedule Type:** LEC

**Hours of Lecture or Seminar per week:** 3

**Hours of Lab or Studio per week:** 0

**When Offered:** Fall, Spring

---

**AMGT 609 - Performing Arts Management**

Credits: 3
Not Repeatable for Credit
Offered by Arts Management

Bridging strategic planning and marketing; audience development; financial management; and board and volunteer management with issues of scheduling, ticketing and sales, mission integration and strategic challenges of new facilities, and growth and operations of existing ones.

**Prerequisite(s):** Admission to Arts Management program or permission of program director.

**Schedule Type:** LEC

**Hours of Lecture or Seminar per week:** 3

**Hours of Lab or Studio per week:** 0

**When Offered:** Fall, Spring

---

**AMGT 610 - Visual Arts Management**

Credits: 3
Not Repeatable for Credit
Offered by Arts Management

Covers the many facets of visual art gallery management, from practical considerations of daily operations to the broader examination of gallery's role in art education, criticism, and art market. Topics such as exhibition coordination and installation, contracts, artist representation, fine art insurance, exhibition policies, budgets, and marketing are covered, along with the responsibility of educating a diverse public.

**Prerequisite(s):** Admission to Arts Management program or permission of program director.

**Schedule Type:** LEC

**Hours of Lecture or Seminar per week:** 3

**Hours of Lab or Studio per week:** 0

**When Offered:** Fall, Spring

---

**AMGT 620 - Legal Aspects in Arts Management**

Credits: 3
Not Repeatable for Credit
Offered by Arts Management

Overview of practical legal issues that will be encountered by arts managers of both for-profit and not-for-profit arts organizations, including contracts, copyrights, licensing, and for-profit and non-profit incorporation.
Prerequisite(s): Admission to Arts Management program or permission of program director.

Schedule Type: LEC

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

When Offered: Fall, Spring, Summer

AMGT 640 - Programming and Project Arts Management

Credits: 3
Not Repeatable for Credit
Offered by Arts Management
Provides both a theoretical framework for thinking about and assessing the value of various programming options and practical examples of the potential partners and resources available for program and project implementation.

Prerequisite(s): Admission to Arts Management program or permission of program director.

Schedule Type: LEC

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

When Offered: Fall, Spring, Summer

AMGT 704 - Finance and Budgeting for Arts I

Credits: 3
Not Repeatable for Credit
Offered by Arts Management
Introduces budget and finance as fundamentals of the budget process, specifically tailored to needs of arts organizations. Provides overview of accounting as tool to manage and control arts organizations. Involves laboratory component for teaching software application frequently encountered in fiscal operation of arts organizations.

Prerequisite(s): Admission to Arts Management program or permission of program director.

Schedule Type: LEC

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

When Offered: Fall, Spring

AMGT 705 - Finance and Budgeting for Arts II

Credits: 2
Not Repeatable for Credit
Offered by Arts Management
Introduces budgeting, planning, and finance as fundamentals of the strategic planning process and management control, specifically tailored to the needs of arts organizations.

Prerequisite(s): AMGT 704

Schedule Type: LEC

Hours of Lecture or Seminar per week: 2
AMGT 706 - Festivals and Special Events

Credits: 3
Not Repeatable for Credit
Offered by Arts Management
Technical aspects of events and festival management. Topics may include cultural understanding, tourism, sponsorship, fundraising and development, logistics of scheduling and contracts, and the relationship to larger venues, marketing and sales, and budgeting.

Prerequisite(s): Admission to Arts Management program or permission of program director.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring, Summer

AMGT 710 - Arts Policy

Credits: 3
Not Repeatable for Credit
Offered by Arts Management
Reviews current state of the sector, familiarizing students with most common rationales for public support of the arts and respective roles of federal, state, and local governments and private policy actors. Examines dilemmas that arts organizations face in balancing need for government support and artistic integrity with push and pull of the market. Compares U.S. policies to other developed countries.

Prerequisite(s): B- or higher in AMGT 602 and AMGT 603. Prerequisite(s) enforced by registration system.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring, Summer

AMGT 711 - Directed Readings and Project

Credits: 1-6
Repeatable within Degree for Credit
Offered by Arts Management
Opportunity to engage in a more intensive study or project in arts management. Students partner with faculty member for intensive readings and project in strategy and planning in the arts, fundraising and development, entrepreneurial project work, arts marketing, arts policy and law, or other specialized areas pertinent to arts administration.

Prerequisite(s): Admission to Arts Management program or permission of program director.
Schedule Type: IND
AMGT 740 - Internal Internship

Credits: 2
Not Repeatable for Credit
Offered by Arts Management
Builds on apprenticeship as a core means of teaching applied concepts of arts management. Augments use of Center of the Arts and active arts environment, both performing and visual, as a learning laboratory. Builds on practical learning and provides internal training as preparation for external internship. Minimum 42 hours/credit.

Prerequisite(s): Admission to Arts Management program or permission of program director. 9-credit standing.
Notes: 9 credits taken within the master in arts management program; or permission of program director. Required for developing practical application.

Schedule Type: INT
Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 6
When Offered: Fall, Spring, Summer

AMGT 742 - Internship I

Credits: 3
Not Repeatable for Credit
Offered by Arts Management
Provides a specific work environment to build on skills developed in the classroom and integrates work experience with specific academic exercises. Minimum 42 hours/credit.

Prerequisite(s): Admission to Arts Management program, 15 credit standing; or permission of program director.
Notes: 15 credits taken within the master in arts management program; or permission of program director. Required for developing practical application.

Schedule Type: INT
Hours of Lecture or Seminar per week: 3-6
Hours of Lab or Studio per week: 6-12
When Offered: Fall, Summer, Spring

AMGT 752 - Arts Entrepreneurship

Credits: 3-6
Repeatable within Degree for Credit
Offered by Arts Management
Lecture course in discovering and developing entrepreneurial skills in the arts. Students will conceive, develop, and present a for-profit or not-for-profit business plan and strategy; which will include model(s), market overview, management structure, along
with revenue streams, an acquisition strategy, and technical and information technology strategies. Advanced course focuses on developing financial planning skills, funding strategies, marketing and arts sales.

Prerequisite(s): Admission to Arts Management program or permission of program director; AMGT 704.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

AMGT 790 - External Internship

Credits: 1-4
Repeatable within Degree for Credit
Offered by Arts Management
Designed to follow internal internship. Provides a specific work environment to build on skills developed in the classroom and integrates work experience with specific academic exercises. Students advised to pursue a three-pronged approach toward specialization: electives; internal internship in the same area as concentrated electives; and external internship consistent with specialized course work and internal internship. Minimum 42 hours/credit.

Prerequisite(s): Admission to Arts Management program, 15 credit standing; or permission of program director.
Notes: 15 credits taken within the master in arts management program; or permission of program director. Required for developing practical application.

Schedule Type: INT
Hours of Lecture or Seminar per week: 3-6
Hours of Lab or Studio per week: 6-12
When Offered: Fall, Spring, Summer

AMGT 792 - Internship II

Credits: 3
Not Repeatable for Credit
Offered by Arts Management
Provides a specific work environment to build on skills developed in the classroom and integrates work experience with specific academic exercises. Elective. Minimum 42 hours/credit.

Prerequisite(s): Admission to Arts Management program, AMGT 742 Internship I; 15 credit standing; or permission of program director.
Notes: 15 credits taken within the master in arts management program; or permission of program director. Required for developing practical application.

Schedule Type: INT
Hours of Lecture or Seminar per week: 3-6
Hours of Lab or Studio per week: 6-12
When Offered: Fall, Summer, Spring

AMGT 795 - Capstone in Arts Management
Credits: 1
Repeatable within Degree for Credit
Offered by Arts Management
Required in order to complete the MA AMGT degree. Provides students with the opportunity to deepen, expand, and demonstrate mastery of one area of arts management expertise. Builds on work undertaken in a completed AMGT course or internship. Faculty will provide guidance and approve capstone topics. The capstone is a required one-credit course. Students may register for the capstone after having completed all core course requirements for the MA AMGT degree.

Prerequisite(s): Students may register for the capstone after having completed all core course requirements for the MA AMGT degree.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0
Grading: Satisfactory/No Credit
When Offered: Fall, Spring

Assistive Technology (EDAT)

Offered by the College of Education and Human Development

EDAT 410 - Introduction to Assistive Technology

Credits: 3
Not Repeatable for Credit
Offered by Graduate School of Education
Provides an understanding of assistive technology and application in instructional programs, career tasks, and life skills for individuals with disabilities. Presentation and exploration experiences enable students to better use assistive technology in education, work, community, and home environments.

Equivalent to EDIT 410 (2012-2013 Catalog).

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Summer, Spring

EDAT 421 - Augmentative Communication

Credits: 3
Not Repeatable for Credit
Offered by Graduate School of Education
Provides an overview of augmentative and alternative communication tools for use by individuals with speech and communication disabilities. Exploration experiences enable students to locate, use and train others on the range of AAC technologies available. Field experience may be required.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
EDAT 422 - Assistive Technology for Individuals with Sensory Impairments

Credits: 3  
Not Repeatable for Credit  
Offered by Graduate School of Education  
Provides an overview of specific technology and resources available to enhance and improve the ability of individuals who are visually impaired/blind or hearing-impaired/deaf. Field experience may be required.

Equivalent to EDIT 412 (2012-2013 Catalog)

Schedule Type: LEC  
Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0  
When Offered: Fall, Summer, Spring

EDAT 423 - Accessibility and Input Modifications

Credits: 3  
Not Repeatable for Credit  
Offered by Graduate School of Education  
Provides an overview of accessibility strategies and input modifications designed for use by individuals with disabilities. Exploration experiences enable students to locate, use and train others on the range of technologies available as well as design opportunities for constructing unique devices. Field experience may be required.

Schedule Type: LEC  
Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0  
When Offered: Fall, Summer, Spring

EDAT 510 - Introduction to Assistive Technology

Credits: 3  
Not Repeatable for Credit  
Offered by Graduate School of Education  
Provides an understanding of assistive technology and application in instructional programs, career tasks, and life skills for individuals with disabilities. Presentation and exploration experiences enable students to better use assistive technology in education, work, community, and home environments.

Equivalent to EDSE 510 (2012-2013 Catalog); EDIT 510 (2012-2013 Catalog).

Schedule Type: LEC  
Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0  
When Offered: Fall, Summer, Spring
EDAT 521 - Augmentative Communication

Credits: 3  
Not Repeatable for Credit  
Offered by Graduate School of Education

Provides an overview of augmentative and alternative communication tools for use by individuals with speech and communication disabilities. Exploration experiences enable students to locate, use and train others on the range of AAC technologies available. Field experience may be required.

Schedule Type: LEC  
Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0  
When Offered: Fall, Summer, Spring

EDAT 522 - Assistive Technology for Individuals with Sensory Impairments

Credits: 3  
Not Repeatable for Credit  
Offered by Graduate School of Education

Provides an overview of specific technology and resources available to enhance and improve the ability of individuals who are visually impaired/blind or hearing-impaired/deaf. Field experience may be required.

Schedule Type: LEC  
Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0  
When Offered: Fall, Summer, Spring

EDAT 523 - Accessibility and Input Modifications

Credits: 3  
Not Repeatable for Credit  
Offered by Graduate School of Education

Provides an overview of accessibility strategies and input modifications designed for use by individuals with disabilities. Exploration experiences enable students to locate, use and train others on the range of technologies available as well as design opportunities for constructing unique devices. Field experience may be required.

Schedule Type: LEC  
Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0  
When Offered: Fall, Summer, Spring

EDAT 524 - Universal Design for Learning
EDAT 525 - Software and Mobile Applications for Individuals with Disabilities

Credits: 3
Not Repeatable for Credit
Offered by Graduate School of Education
Provides overview with software, mobile applications, and accessibility features. Identifies design features to meet individual's special needs; provides hands-on experiences with the range of software and mobile applications that incorporate evidence-based strategies for individuals with disabilities across environments, settings and the life span. Field experience may be required.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Summer, Spring

EDAT 530 - Assistive Technology for Independent Living

Credits: 3
Not Repeatable for Credit
Offered by Graduate School of Education
Provides an overview of activities of daily living (ADLs) for individuals who have disabilities and the elderly. ADLs include but are not limited to assistive technologies that support dressing, feeding, hygiene, housework and safety. Field experience may be required.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Summer, Spring

EDAT 531 - Assistive Technology in the Workplace

Credits: 3
Not Repeatable for Credit
Offered by Graduate School of Education
Provides an overview of workplace accommodations, functional barriers commonly experienced in the workplace, assistive
technology, ergonomic strategies, and universal design approaches to improve performance of work activities for individuals with disabilities, including but not limited to mobility, dexterity, sensory, communication, and cognitive impairments. Field experience may be required.

**Schedule Type:** LEC  
**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall, Summer, Spring

**EDAT 597 - Special Topics in Assistive Technology**

Credits: 1-6  
Repeatable within Term for Credit  
Offered by Graduate School of Education  
Provides advanced study on selected topic or emerging issue in assistive technology.

**Schedule Type:** LEC  
**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall, Summer, Spring

**EDAT 599 - Independent Study in Assistive Technology**

Credits: 1-6  
Repeatable within Term for Credit  
Offered by Graduate School of Education  
Studies assistive technology research, theory, or practice under direction of faculty member.

**Schedule Type:** LEC  
**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall, Summer, Spring

**EDAT 610 - Designing Adapted Environments**

Credits: 3  
Not Repeatable for Credit  
Offered by Graduate School of Education  
Provides an overview of environmental adaptations for individuals with disabilities to increase their access to community, workplace, and school activities. Covers legal issues within the ADA for adapting environments and addresses programmatic and physical access issues. Field experience is required.

**Prerequisite(s):** EDAT 510.  
**Notes:** Field Experience required.

**Schedule Type:** LEC  
**Hours of Lecture or Seminar per week:** 3
EDAT 649 - Assistive Technology Assessment

Credits: 3
Not Repeatable for Credit
Offered by Graduate School of Education
Provides an overview of AT consideration and assessment procedures with emphasis on generated assessment plan and written report. Review and administer existing assistive technology (AT) evaluation instruments. Field experiences required.

Prerequisite(s): EDAT 510.
Notes: Field Experience required.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Summer, Spring

Astronomy (ASTR)

Offered by the College of Science

ASTR 103 - Astronomy

Credits: 3
Not Repeatable for Credit
Offered by Physics and Astronomy
Introduction to origin of life, Earth, planets and sun, stars, galaxies, quasars, nature of space radiation, and general theory of relativity.

Fulfills Mason Core requirement in natural science (nonlab).

Notes: Not for physics majors.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ASTR 111 - Introductory Astronomy: The Solar System

Credits: 3
Not Repeatable for Credit
Offered by Physics and Astronomy
Topics include history of astronomy, evolution of the solar system, properties of planets, scientific method, critical thinking,
nature of light, and principles of telescope design.

Fulfills Mason Core requirement in natural science (lab).

Notes: ASTR 111 and 112 can be used to fulfill a 4-credit lab science requirement; not for physics majors.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ASTR 112 - Introductory Astronomy Lab: The Solar System

Credits: 1
Not Repeatable for Credit
Offered by Physics and Astronomy
Laboratory course associated with ASTR 111.

Fulfills Mason Core requirement in natural science (lab).

Notes: ASTR 111 and 112 can be used to fulfill a 4-credit lab science requirement; not for physics majors.

Schedule Type: LAB
Hours of Lecture or Seminar per week: 1-12
Hours of Lab or Studio per week: 3

ASTR 113 - Introductory Astronomy: Stars, Galaxies, and the Universe

Credits: 3
Not Repeatable for Credit
Offered by Physics and Astronomy
Topics include electromagnetic radiation, stellar evolution, interstellar medium, galaxies, cosmology, scientific method, and critical thinking.

Fulfills Mason Core requirement in natural science (lab).

Notes: ASTR 113 and 114 can be used to fulfill a 4-credit lab science requirement; not for physics majors.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ASTR 114 - Introductory Astronomy Lab: Stars, Galaxies, and the Universe

Credits: 1
Not Repeatable for Credit
Offered by Physics and Astronomy
Laboratory course associated with ASTR 113.
ASTR 113 and 114 can be used to fulfill a 4-credit lab science requirement; not for physics majors.

Schedule Type: LAB
Hours of Lecture or Seminar per week: 1-12
Hours of Lab or Studio per week: 3

ASTR 115 - Finding New Worlds

Credits: 4
Not Repeatable for Credit
Offered by Physics and Astronomy
Topics include the search for planets outside the solar system, and new developments in the theory of solar system formation with an emphasis on student-led investigation using public data sources.

ASTR 210 - Introduction to Astrophysics

Credits: 3
Not Repeatable for Credit
Offered by Physics and Astronomy
Introduction to astrophysics for scientists. Topics include astronomical measurement, celestial mechanics, electromagnetic radiation, stellar structure and evolution, the interstellar medium, galaxies, and a selection of topics at the forefront of astrophysics including space physics, exoplanets, galaxies, and cosmology.

Prerequisite(s): C or higher in PHYS 262.
Prerequisite(s) enforced by registration system.

Corequisite(s): PHYS 262.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring

ASTR 301 - Astrobiology
ASTR 302 - Foundations of Cosmological Thought

Credits: 3
Not Repeatable for Credit
Offered by Physics and Astronomy
Examines scientific, historical, and philosophical foundations and development of cosmological thought from antiquity to the present. Emphasizes qualitative understanding of the development of cosmology concluding with the present concept of origin and evolution of universe.

Fulfills Mason Core requirement in natural science (nonlab).

Notes: No advanced background in mathematics or natural sciences required. This course does not satisfy the PHYS elective requirement.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ASTR 328 - Stars and Interstellar Medium

Credits: 3
Not Repeatable for Credit
Offered by Physics and Astronomy
Stellar structure and evolution; radiative transfer; the interstellar medium. The course includes computational work. Previous programming experience is not required, as it will be developed in the course, but it is helpful.

Equivalent to PHYS 328 (2014-2015 Catalog).

Prerequisite(s): ASTR 210, PHYS 262.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ASTR 390 - Topics in Astronomy
Credits: 1-4  
Repeatable within Term for Credit  
Offered by Physics and Astronomy  
Selected topics not covered in fixed-content courses.

Notes: May not be included for credit by physics majors in the 45 credits of physics courses required for BS degree, or in 31 credits of physics courses required for BA degree.

Schedule Type: LEC  
Hours of Lecture or Seminar per week: 1-4  
Hours of Lab or Studio per week: 0

**ASTR 401 - Computer Simulation in Astronomy**

Credits: 3  
Not Repeatable for Credit  
Offered by Physics and Astronomy  
Techniques and methods to simulate astronomical phenomena using a computer. Examples taken from a wide variety of astronomical phenomena, including radiation transfer in astrophysical objects, self-gravitating systems, hydrodynamics, and stellar models.

Prerequisite(s): ASTR 210.  
Notes: Emphasizes hands-on projects.

Schedule Type: LEC  
Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0

**ASTR 402 - RS: Methods of Observational Astronomy**

Credits: 4  
Not Repeatable for Credit  
Offered by Physics and Astronomy  
An introduction to the observational, statistical, and computational techniques used by observational astronomers. The course covers some of the basic skills needed to pursue a career in astronomy and is designed around preparing for and executing an observational research project. Fulfills writing intensive requirement in the major.

Fulfills writing intensive requirement in the major.  
Designated as a research and scholarship intensive course.

Prerequisite(s): ASTR 210.  
Notes: This course meets the writing-intensive requirement.

Schedule Type: LAB, LEC  
Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 3
**ASTR 403 - Planetary Sciences**

Credits: 3  
Not Repeatable for Credit  
Offered by Physics and Astronomy  
Introduction to the physics and chemistry of planets and their natural satellites, asteroids, and comets. Topics include history of the solar system; origin and evolution of planets, their internal structure and atmospheres; and analytical techniques used in remote and in situ study.

**Prerequisite(s):** ASTR 210, PHYS 262.  
**Schedule Type:** LEC  
**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**ASTR 404 - Galaxies and Cosmology**

Credits: 3  
Not Repeatable for Credit  
Offered by Physics and Astronomy  
The structure of the Milky Way as the basis for our knowledge of galaxies; the properties of galaxies from our local neighborhood out to the youngest galaxies in the far distant universe; observational and theoretical approaches to the structure and evolution of galaxies; the basics of cosmology and the formation of structure in the universe. Computational tools introduced in ASTR 328 are developed further.

**Prerequisite(s):** ASTR 328.  
**Schedule Type:** LEC  
**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**ASTR 405 - Honors Thesis in Astronomy I**

Credits: 3  
Not Repeatable for Credit  
Offered by Physics and Astronomy  
Project chosen and completed under the guidance of a faculty member, resulting in a written thesis. An oral progress report is required for ASTR 405.

**Prerequisite(s):** 21 credit hours in Physics and Astronomy and acceptance into the astronomy honors program.  
**Schedule Type:** LEC  
**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**ASTR 406 - Honors Thesis in Astronomy II**
Credits: 3
Not Repeatable for Credit
Offered by Physics and Astronomy
Project chosen and completed under the guidance of a faculty member, resulting in a written thesis. An oral progress report is required for ASTR 406.

Prerequisite(s): ASTR 405 and 21 credit hours in Physics and Astronomy and acceptance into the astronomy honors program.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ASTR 408 - Senior Research

Credits: 3
Repeatable within Degree for Credit
Offered by Physics and Astronomy
Independent work under guidance of faculty member on research project in experimental, observational, or theoretical astronomy.

Prerequisite(s): 15 credits of ASTR courses.
Notes: Students may not receive more than 6 credits of ASTR 408 and 409. Written report on project required. May be taken twice with department permission.
Schedule Type: IND
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ASTR 409 - Astronomy Internship

Credits: 3
Not Repeatable for Credit
Offered by Physics and Astronomy
On-the-job experience for astronomy majors in industry or government laboratories, including summer research programs. Students work in observational, experimental, or theoretical astronomy, and prepare written report at end of internship.

Prerequisite(s): 75 credits, 15 ASTR credits, and permission of department.
Notes: See department for other requirements and application procedure prior to enrollment. Students may not receive more than 6 credits of ASTR 408 and 409.
Schedule Type: INT
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ASTR 532 - Phys Interplanetary Med

Credits: 3
Not Repeatable for Credit
ASTR 590 - Selected Topics in Astronomy and Astrophysics

Credits: 1-6
Repeatable within Degree for Credit
Offered by Physics and Astronomy
Advanced topics from recent theoretical or observational developments and their applications. Satisfies needs of professional community to keep abreast of current developments.

Prerequisite(s): Permission of instructor.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 0-6
Hours of Lab or Studio per week: 0

ASTR 602 - Methods of Observational Astronomy

Credits: 4
Not Repeatable for Credit
Offered by Physics and Astronomy
An introduction to the observational, statistical, and computational techniques used by observational astronomers. The course covers some of the basic skills needed to pursue a career in astronomy and is designed around preparing for and executing an observational research project.

Schedule Type: LAB,
LEC
Hours of Lecture or Seminar per week: 4
Hours of Lab or Studio per week: 0
When Offered: Spring

ASTR 603 - Planetary Sciences

Credits: 3
Not Repeatable for Credit
Offered by Physics and Astronomy
Prerequisite(s): MATH 213 and PHYS 262
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ASTR 604 - Galaxies and Cosmology
Credits: 3
Not Repeatable for Credit
Offered by Physics and Astronomy
The structure of the Milky Way as the basis for our knowledge of galaxies; the properties of galaxies from our local neighborhood out to the youngest galaxies in the far distant universe; observational and theoretical approaches to the structure and evolution of galaxies; the basics of cosmology and the formation of structure in the universe.

Prerequisite(s): ASTR 328 and MATH 214.
Corequisite(s): PHYS 308.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring

ASTR 660 - Plasma Physics for Space and Astrophysics

Credits: 3
Not Repeatable for Credit
Offered by Physics and Astronomy
Equivalent to PHYS 660

Prerequisite(s): PHYS 305
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

ASTR 680 - Physics of Interstellar Media

Credits: 3
Not Repeatable for Credit
Offered by Physics and Astronomy
Physical processes in the interstellar media. Topics include the production and transfer of radiation, ionization and recombination, atomic and molecular excitation, dust physics, gas heating and cooling, and star formation.

Prerequisite(s): PHYS 402 or permission of instructor.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ASTR 730 - Stellar Astrophysics

Credits: 3
Not Repeatable for Credit
Offered by Physics and Astronomy
Survey of contemporary astrophysics. Topics include physical concepts, stellar spectra, Hertzsprung-Russell diagram, stellar
atmospheres, stellar structure, interstellar matter, stellar evolution, high-energy phenomena, hydrodynamical processes in astrophysics, accretion disk formation, and shock formation.

**Prerequisite(s):** MATH 214, PHYS 303, 305, 308.
**Schedule Type:** LEC
**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0
**When Offered:** Spring

---

**ASTR 764 - Computational Astrophysics**

Credits: 3
Not Repeatable for Credit
Offered by Physics and Astronomy
Covers statistical mechanics concepts important in astrophysics. Presents unified approach to particle acceleration and interaction theory based on analytical and numerical analysis of Boltzmann and Liouville equations. Discusses computational methods relevant to particle transport problems, with emphasis on Fokker-lanck and Monte Carlo solution techniques. Applications from space sciences include studies of cosmic ray acceleration, photon comptonization, particle transport in the near-Earth environment, energy transport in stellar atmospheres, and self-gravitating system dynamics.

Equivalent to CSI 764

**Prerequisite(s):** ASTR 530, or permission of instructor.
**Schedule Type:** LEC
**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0

---

**ASTR 765 - High-Energy and Accretion Astrophysics**

Credits: 3
Not Repeatable for Credit
Offered by Physics and Astronomy
Overview of the field of atomic and nuclear physics, including nuclear reactions of use to high-energy astrophysics. Discusses radiation processes in cosmic plasmas emphasizing quantum mechanical calculations; stellar evolution and nucleosynthesis; computational models of stellar evolution; binary stars and accretion disks; numerical models of the structure of accretion disks; compact stars, white dwarfs, neutron stars, and black holes; acceleration processes and cosmic rays; interstellar medium and propagation of cosmic rays; high-energy processes in the center of galaxies; and ground- and space-based techniques and observations.

**Prerequisite(s):** PHYS 502 and 513, and ASTR 530; or permission of instructor.
**Schedule Type:** LEC
**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0

---

**ASTR 790 - Topics in Astronomy and Astrophysics**
ASTR 796 - Directed Reading and Research

Credits: 1-12
Repeatable within Degree for Credit
Offered by Physics and Astronomy
Reading and research on a specific topic in astronomy, astrophysics, or related field under direction of faculty member.

Prerequisite(s): Admission to master's program and permission of instructor.
Notes: May be repeated as needed.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 1-12
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

ASTR 798 - Research Project

Credits: 3
Not Repeatable for Credit
Offered by Physics and Astronomy
Research project chosen and completed under guidance of graduate faculty member resulting in an acceptable technical report.

Prerequisite(s): 9 credits and permission of instructor.
Notes: May not be repeated.

Schedule Type: IND
Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0
Grading: Satisfactory/No credit only

ASTR 799 - Master's Thesis
Credits: 1-6
Repeatable within Degree for Credit
Offered by Physics and Astronomy
Research project chosen and completed under guidance of graduate faculty member resulting in acceptable technical report and oral defense acceptable to three-faculty-member thesis committee.

Prerequisite(s): 9 credits, and permission of instructor.
Notes: May not be repeated.

Schedule Type: IND
Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0
Grading: Satisfactory/No credit only

ASTR 998 - Doctoral Dissertation Proposal

Credits: 1-12
Repeatable within Degree for Credit
Offered by Physics and Astronomy
Covers development of a research proposal under the guidance of a dissertation director and the doctoral committee. The proposal forms the basis for the doctoral dissertation.

Prerequisite(s): Admission to physics doctoral program and permission of advisor.
Notes: May be repeated as needed; however, no more than 24 credits in ASTR/PHYS 998 and ASTR/PHYS 999 may be applied toward satisfying doctoral degree requirements in the physics PhD program. Out of the 24, no more than 12 credits of ASTR/PHYS 998 may be applied.

Schedule Type: IND
Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0
Grading: Satisfactory/No credit only

ASTR 999 - Doctoral Dissertation

Credits: 1-12
Repeatable within Degree for Credit
Offered by Physics and Astronomy
Doctoral research performed under direction of dissertation director.

Prerequisite(s): Admission to doctoral candidacy in physics doctoral program and permission of advisor.
Notes: May be repeated as needed; however, no more than 24 credits in ASTR/PHYS 998 and ASTR/PHYS 999 may be applied toward satisfying doctoral degree requirements in the physics PhD program.

Schedule Type: IND
Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0
Grading: S/IP
Athletic Training (ATEP)

Offered by the College of Education and Human Development

ATEP 120 - First Aid and Emergency Care

Credits: 2  
Repeatable within Degree for Credit  
Offered by School of Recreation, Health, and Tourism  
Covers emergency management procedures for various injuries and sudden illnesses, including 1- and 2- person CPR, and use of an Automated External Defibrillator (AED) for cardiac emergencies and basic first aid techniques; certification in first aid and CPR.

Schedule Type: LAB, LEC  
Hours of Lecture or Seminar per week: 1  
Hours of Lab or Studio per week: 1  
When Offered: Fall, Summer, Spring

ATEP 150 - Introduction to Athletic Training and Preventative Care Techniques

Credits: 3  
Not Repeatable for Credit  
Offered by School of Recreation, Health, and Tourism  
Introduces the profession of athletic training and the basic principles of preventative care commonly used in the profession. Topics will include athletic training facility organization and procedures; protective sports equipment; construction of protective devices; and application of protective taping, braces, wrapping, and protective pads. Areas to be studied include the role of the athletic trainer in sports medicine, mechanisms of athletic injuries, tissue response to injury, blood-borne pathogens, introductory techniques of the assessment and evaluation of athletic injuries and emergency procedures.

Schedule Type: LEC  
Hours of Lecture or Seminar per week: 1  
Hours of Lab or Studio per week: 2

ATEP 180 - Emergency Medical Care for Physically Active Populations

Credits: 0-4  
Not Repeatable for Credit  
Offered by School of Recreation, Health, and Tourism  
An investigation of the scientific and philosophical foundations of pre-hospital emergency care principles pertinent to a physically active population. Students develop knowledge, critical thinking, and problem solving skills necessary to correctly apply emergency care principles and associated skills in a variety of clinical and professional settings. Upon successful completion of this course, the student will earn Emergency Cardiac Care (ECC) and First Aid certifications.

Prerequisite(s): BIOL 124
Corequisite(s): BIOL 125

Schedule Type: LAB, LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 1

ATEP 201 - Medical and Scientific Terminology

Credits: 3
Not Repeatable for Credit
Offered by School of Recreation, Health, and Tourism
Foundations of scientific and medical vocabulary including prefixes, suffixes and stems used to form compound words.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring, Summer

ATEP 203 - Prevention, Recognition, and Management of Athletic and Fitness Related Injuries

Credits: 3
Not Repeatable for Credit
Offered by School of Recreation, Health, and Tourism
Provides coaches and fitness professionals with theory on the prevention, recognition, and management of injuries and conditions that occur in athletic competition and recreational fitness activities.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring, Summer

ATEP 205 - Cultural Competence

Credits: 3
Not Repeatable for Credit
Offered by School of Recreation, Health, and Tourism
Explores cultural competence and its integration for effective professional practice. Includes communication styles, daily living practices, common sensitivities, self-awareness, and historical cultural implications in multicultural environments.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall
ATEP 250 - Physical Assessment of the Lower Body

Credits: 3
Not Repeatable for Credit
Offered by School of Recreation, Health, and Tourism
An analysis of the principles of physical assessment of the lower body.

Prerequisite(s): Grade of C or higher in ATEP 150, ATEP 180, BIOL 124, BIOL 125, HEAL 110, and ATEP 300.
Corequisite(s): ATEP 255, ATEP 256

Notes: Formal acceptance to the professional phase of the ATEP.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

ATEP 255 - Clinical Techniques I: Physical Assessment of the Lower Body

Credits: 3
Not Repeatable for Credit
Offered by School of Recreation, Health, and Tourism
An analysis of physical assessment clinical techniques of the lower body (including the lower extremity and abdomen).

Prerequisite(s): Grade of C or higher in ATEP 150, ATEP 180, BIOL 124, BIOL 125, HEAL 110, and ATEP 300.
Corequisite(s): ATEP 250 and ATEP 256

Notes: Formal acceptance to the professional phase of the ATEP.

Schedule Type: LAB
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

ATEP 256 - Practicum I: Physical Assessment of the Lower Body

Credits: 3
Not Repeatable for Credit
Offered by School of Recreation, Health, and Tourism
A clinical practicum field experience under the direct supervision of a preceptor with emphasis on physical assessment of the lower body.

Prerequisite(s): Grade of C of higher in ATEP 150, ATEP 180, BIOL 124, BIOL 125, HEAL 110, and ATEP 300.
Corequisite(s): ATEP 250 and 255

Notes: Formal acceptance to professional phase of the ATEP; Current Emergency Cardiac Care (ECC) Certification.

Schedule Type: INT
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

ATEP 260 - Physical Assessment of the Upper Body

Credits: 3
Not Repeatable for Credit
Offered by School of Recreation, Health, and Tourism
An analysis of the principles of physical assessment of the upper body.

Prerequisite(s): Grade of C or higher in ATEP 150, ATEP 180, ATEP 250, ATEP 255, ATEP 256, ATEP 300, BIOL 124, BIOL 125, HEAL 110, HEAL 230.
Corequisite(s): ATEP 265, ATEP 266.

Notes: Formal acceptance to the professional phase of the ATEP

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ATEP 265 - Clinical Techniques II: Physical Assessment of the Upper Body

Credits: 3
Not Repeatable for Credit
Offered by School of Recreation, Health, and Tourism
An analysis of physical assessment clinical techniques of the upper body (including the upper extremity, head, and neck).

Prerequisite(s): Grade of C or higher in ATEP 150, ATEP 180, ATEP 250, ATEP 255, ATEP 256, ATEP 300, BIOL 124, BIOL 125, HEAL 110, HEAL 230.
Corequisite(s): ATEP 260, 266

Notes: Formal acceptance to the professional phase of the ATEP

Schedule Type: LAB
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring

ATEP 266 - Practicum II: Physical Assessment of the Upper Body

Credits: 3
Not Repeatable for Credit
Offered by School of Recreation, Health, and Tourism
A clinical practicum field experience under the direct supervision of a preceptor with emphasis on physical assessment of the upper body.
**Prerequisite(s):** Grade of C or higher in ATEP 150, 180, 250, 255, 256, 300; BIOL 124, 125; HEAL 110, 230.

**Corequisite(s):** ATEP 260 and 265

**Notes:** Formal acceptance to the professional phase of the ATEP; Emergency Cardiac Care (ECC) Certification

**Schedule Type:** INT

**Hours of Lecture or Seminar per week:** 3

**Hours of Lab or Studio per week:** 0

**When Offered:** Spring

---

**ATEP 270 - General Medical Conditions and Pharmacology in Physically Active Populations**

Credits: 3
Not Repeatable for Credit
Offered by School of Recreation, Health, and Tourism
An examination of assessment and management techniques of general medical conditions and pharmacological principles in physically active populations.

**Prerequisite(s):** Grade of C or higher in ATEP 300; BIOL 124, 125.

**Notes:** Formal acceptance to the professional phase of the ATEP

**Schedule Type:** LEC

**Hours of Lecture or Seminar per week:** 3

**Hours of Lab or Studio per week:** 0

---

**ATEP 300 - Functional Anatomy**

Credits: 3
Not Repeatable for Credit
Offered by School of Recreation, Health, and Tourism
Increase students’ knowledge and exposure to the structural and functional components of human anatomy including musculoskeletal origins, insertions, actions and innervations.

Equivalent to KINE 300 (2012-2013 Catalog)

**Prerequisite(s):** BIOL 124.

**Corequisite(s):** BIOL 125.

**Schedule Type:** LAB, LEC

**Hours of Lecture or Seminar per week:** 2

**Hours of Lab or Studio per week:** 1

**When Offered:** Fall, Summer, Spring.

---

**ATEP 310 - Advanced Functional Anatomy**
ATEP 320 - Therapeutic Interventions Foundations

Credits: 3
Not Repeatable for Credit
Offered by School of Recreation, Health, and Tourism
Explores foundational knowledge and skills necessary for the safe, effective, and evidence-based application of therapeutic interventions. Investigates physiologic response to injury and healing, physiologic cause of pain, physiologic response of tissue to therapeutic intervention including modalities and exercise.

Prerequisite(s): ATEP 300; BIOL 124, BIOL 125; KINE 310.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
Grading: Undergraduate Special
When Offered: Summer

ATEP 325 - Athletic Training Foundations

Credits: 3
Not Repeatable for Credit
Offered by School of Recreation, Health, and Tourism
Investigates the knowledge, skill and professional foundations of the athletic training. Emphasizes is placed on the role of the athletic trainer as a member of the health care system by decision-making through evidence-based practice and foundational skills including fitting protective equipment and devices, and prophylactic preventative taping.

Prerequisite(s): Grade of C or higher in ATEP 120, ATEP 150, ATEP 201, ATEP 300; BIOL 124, BIOL 125; HEAL 230; KINE 310; KINE 320.
Prerequisite(s) enforced by registration system.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring
ATEP 330 - Emergency Procedures for Athletic Trainers

Credits: 3
Not Repeatable for Credit
Offered by School of Recreation, Health, and Tourism
Investigates the scientific and philosophical foundations of pre-hospital emergency care principles pertinent to athletic trainers. Develops knowledge, critical thinking and problem solving skills necessary to correctly apply emergency care principles and associated skills in a variety of clinical and professional settings.

Prerequisite(s): Admission to the professional phase of the ATEP and a grade of C or better in the following courses: ATEP 120, ATEP 150, ATEP 201, ATEP 300, ATEP 310, ATEP 320, ATEP 325; BIOL 124, BIOL 125; HEAL 230; KINE 310, KINE 320; PRLS 450.
Prerequisite(s) enforced by registration system.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3

ATEP 340 - Lower Body Physical Assessment

Credits: 3
Not Repeatable for Credit
Offered by School of Recreation, Health, and Tourism
Analyzes principles of lower body physical assessment. Investigates mechanisms of injury, the evaluation process, and testing leading to diagnosis.

Prerequisite(s): Admission to the professional phase of the ATEP and a grade of C or better in the following courses: ATEP 120, ATEP 150, ATEP 201, ATEP 300, ATEP 310, ATEP 320; BIOL 124, BIOL 125; HEAL 230; KINE 310, KINE 320; PRLS 450
Corequisite(s): ATEP 350

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
When Offered: Fall

ATEP 345 - Athletic Training Clinical Techniques 1

Credits: 3
Not Repeatable for Credit
Offered by School of Recreation, Health, and Tourism
Applies principles of lower body, thoracic and lumbar spine physical assessment. develops evaluation skills including special testing leading to diagnosis.

Prerequisite(s): Admission to the professional phase of the ATEP and a grade of C or better in the following courses: ATEP 120, ATEP 150, ATEP 201, ATEP 300, ATEP 310, ATEP 320; BIOL 124, BIOL 125; HEAL 230; KINE 310, KINE 320; PRLS 450
Corequisite(s): ATEP 340.

Schedule Type: LAB
ATEP 350 - Therapeutic Interventions I

Credits: 3
Not Repeatable for Credit
Offered by School of Recreation, Health, and Tourism
Integrates the use of therapeutic modalities and rehabilitation in the treatment of injuries and conditions including indications, contraindications, physiological effects, special programs, and resistance methods used with therapeutic modalities and prevention/rehabilitation methods.

Prerequisite(s): Grade of C or higher in ATEP 150, 180, 250, 255, 256, 260, 265, 266, 270, 300; BIOL 124, 125; HEAL 110, 230; KINE 310.
Corequisite(s): ATEP 355 and 356.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

ATEP 351 - Lower Body Therapeutic Interventions

Credits: 3
Not Repeatable for Credit
Offered by School of Recreation, Health, and Tourism

Prerequisite(s): Admission to the professional phase of the ATEP and a grade of C or better in the following courses: ATEP 120, ATEP 150, ATEP 201, ATEP 300, ATEP 310, ATEP 320; BIOL 124, BIOL 125; HEAL 230; KINE 310, KINE 320; PRLS 450.
Corequisite(s): ATEP 355.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

ATEP 354 - Athletic Training Clinical Techniques 2

Credits: 3
Not Repeatable for Credit
Offered by School of Recreation, Health, and Tourism
Applies therapeutic interventions for the lower body in a laboratory setting. Develops rehabilitation treatment plans and skills necessary to carry out patient care.
Prerequisite(s): Admission to the professional phase of the ATEP and a grade of C or better in the following courses: ATEP 120, ATEP 150, ATEP 201, ATEP 300, ATEP 310, ATEP 320; BIOL 124, BIOL 125; HEAL 230; KINE 310, KINE 320; PRLS 450.
Corequisite(s): ATEP 350.

Schedule Type: LAB
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

ATEP 355 - Clinical Techniques 3: Therapeutic Interventions I

Credits: 3
Not Repeatable for Credit
Offered by School of Recreation, Health, and Tourism
An examination of the scientific theory and standard operating procedures necessary for the safe application of therapeutic modalities in a physically active patient population.

Prerequisite(s): Grade of C or higher in ATEP 150, 180, 250, 255, 256, 260, 265, 266, 270, 300; BIOL 124, 125; HEAL 110, 230; KINE 310.
Corequisite(s): ATEP 350 and 356.

Schedule Type: LAB
Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 3
When Offered: Fall

ATEP 356 - Practicum III: Therapeutic Modalities

Credits: 3
Not Repeatable for Credit
Offered by School of Recreation, Health, and Tourism
A clinical practicum field experience under the direct supervision of a preceptor with emphasis on therapeutic modalities.

Prerequisite(s): Grade of C or higher in ATEP 150, 180, 250, 255, 256, 260, 265, 266,270,300 BIOL 124, 125; HEAL 110, 230; KINE 310.
Corequisite(s): ATEP 350 and 355

Notes: Formal Acceptance into the ATEP.

Schedule Type: INT
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

ATEP 360 - Therapeutic Interventions 2
ATEP 361 - Upper Body Therapeutic Interventions

Credits: 3  
Not Repeatable for Credit  
Offered by School of Recreation, Health, and Tourism  
Utilizes an integrated approach to therapeutic interventions including modalities and rehabilitation in the treatment of upper body, head and neck injuries and conditions. Includes development, implementation, and evaluation of treatment plans for upper body, head and neck injuries.

Prerequisite(s): Must be formally admitted to the professional phase of the ATEP and a grade of C or better in the following courses: ATEP 120, 150, 201, 300, 310,320,325,330,340,345,350,355; BIOL 124, 125; HEAL 230; KINE 310, 320; PRLS 450.

Corequisite(s): ATEP 365 and ATEP 366.

Schedule Type: LEC  
Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0  
When Offered: Fall, Spring

ATEP 365 - Athletic Training Clinical Techniques 4

Credits: 3  
Not Repeatable for Credit  
Offered by School of Recreation, Health, and Tourism  
Applies therapeutic interventions for the upper body, head and neck in a laboratory setting. Develops rehabilitation treatment plans and skills necessary to carry out patient care.

Prerequisite(s): Admission to the professional phase of the ATEP and a grade of C or better in the following courses: ATEP 120, ATEP 150, ATEP 201, ATEP 300, ATEP 310, ATEP 320, ATEP 325, ATEP 330, ATEP 340, ATEP 345, ATEP 350, ATEP 355, BIOL 124, BIOL 125; HEAL 110, HEAL 230; KINE 310, KINE 320; PRLS 450.

Corequisite(s): ATEP 360 and ATEP 366.

Schedule Type: LAB
HOURS OF LECTURE OR SEMINAR PER WEEK: 3
HOURS OF LAB OR STUDIO PER WEEK: 3
WHEN OFFERED: Spring

ATEP 366 - Practicum IV: Therapeutic Rehabilitation

Credits: 3
Not Repeatable for Credit
Offered by School of Recreation, Health, and Tourism
A clinical practicum field experience under the direct supervision of a preceptor with emphasis on therapeutic rehabilitation.

Prerequisite(s): Grade of C or better ATEP 150, 180, 250, 255, 260, 265, 266, 270, 350, 355, 356; BIOL 124, 125; HEAL 110, 230; PHED 300 and 450.
Corequisite(s): ATEP 360 and ATEP 365.

Notes: Formal acceptance into the professional phase of the ATEP; Current Emergency Cardiac Care (ECC) Certification.

SCHEDULE TYPE: INT
HOURS OF LECTURE OR SEMINAR PER WEEK: 3
HOURS OF LAB OR STUDIO PER WEEK: 0
WHEN OFFERED: Spring

ATEP 367 - Athletic Training Practicum 1

Credits: 2
Not Repeatable for Credit
Offered by School of Recreation, Health, and Tourism
Emphasizes physical assessment and therapeutic interventions of the lower body in a clinical immersion practicum field experience under the direct supervision of a preceptor for 150 hours.

Prerequisite(s): Admission to the professional phase of the ATEP and a grade of C or better in the following courses: ATEP 120, ATEP 150, ATEP 201, ATEP 300, ATEP 310, ATEP 320, 325, ATEP 330, ATEP 340, ATEP 345, ATEP 350, ATEP 355; BIOL 124, BIOL 125; HEAL 230; KINE 310, KINE 320; PRLS 450.
Corequisite(s): ATEP 360, ATEP 365, ATEP 370, ATEP 375.

Schedule Type: INT
Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 0
Grading: Special Undergraduate.
When Offered: Spring

ATEP 370 - Upper Body Physical Assessment

Credits: 3
Not Repeatable for Credit
Offered by School of Recreation, Health, and Tourism
Analyzes the principles of upper body physical assessment. Investigates mechanisms of injury, the evaluation process, and testing
leading to diagnosis.

**Prerequisite(s):** Admission to the professional phase of the ATEP and a grade of C or better in the following courses: ATEP 120, ATEP 150, ATEP 201, ATEP 300, ATEP 310, ATEP 320, ATEP 325, ATEP 330, ATEP 340, ATEP 345, ATEP 350, ATEP 355; BIOL 124, BIOL 125; HEAL 230; KINE 310, KINE 320; PRLS 450

**Corequisite(s):** ATEP 375, ATEP 366

**Schedule Type:** LEC
**Hours of Lecture or Seminar per week:** 3
**When Offered:** Spring

### ATEP 375 - Athletic Training Clinical Techniques 3

**Credits:** 3
**Not Repeatable for Credit**
**Offered by School of Recreation, Health, and Tourism**
Applies principles of upper body, heard and neck physical assessment. Develops evaluation skills including special testing leading to diagnosis.

**Prerequisite(s):** Admission to the professional phase of the ATEP and a grade of C or better in the following courses: ATEP 120, ATEP 150, ATEP 201, ATEP 300, ATEP 310, ATEP 320, ATEP 325, ATEP 330, ATEP 340, ATEP 345, ATEP 350, ATEP 355; BIOL 124, BIOL 125; HEAL 230; KINE 310, KINE 320; PRLS 450

**Notes:** ATEP 366, ATEP 370

**Schedule Type:** LAB
**Hours of Lab or Studio per week:** 3
**When Offered:** Spring

### ATEP 400 - Pathopharmacology

**Credits:** 3
**Not Repeatable for Credit**
**Offered by School of Recreation, Health, and Tourism**
Examines the assessment and management techniques of general medical conditions and pharmacological principles and interventions.

**Prerequisite(s):** ATEP 300; BIOL 124, BIOL 125; KINE 310

**Schedule Type:** LEC
**Hours of Lecture or Seminar per week:** 3
**When Offered:** Spring

### ATEP 441 - Senior Seminar in Athletic Training

**Credits:** 3
**Not Repeatable for Credit**
**Offered by School of Recreation, Health, and Tourism**
Capstone educational experience focusing on current topics in the Athletic Training Profession and career development issues.
**Prerequisite(s):** Grade of C or higher in ATEP 150, 180, 250, 255, 256, 260, 265, 266, 270, 300, 350, 355, 356, 360, 365, 366; BIOL 124, 125; HEAL 110, 230; KINE 300, 360.

**Schedule Type:** INT

**Hours of Lecture or Seminar per week:** 3

**Hours of Lab or Studio per week:** 0

**When Offered:** Fall, Spring

### ATEP 450 - Administration and Management in Athletic Training

Credits: 3

Not Repeatable for Credit

Offered by School of Recreation, Health, and Tourism

Focuses on the professional management and administrative issues in athletic training including the planning, designing, development, organization, implementation, direction, and evaluation of a health care program. Discusses current issues in athletic training related to professional conduct and practice.

**Prerequisite(s):** Admission to the professional phase of the ATEP and a grade of C or better in the following courses: ATEP 120, ATEP 150, ATEP 201, ATEP 300, ATEP 310, ATEP 320, ATEP 325, ATEP 330, ATEP 340, STEP 345, ATEP 350, ATEP 355, ATEP 360, ATEP 365, ATEP 366, ATEP 370, ATEP 375; BIOL 124, BIOL 125; HEAL 230; KINE 310, KINE 320; PRLS 450.

**Corequisite(s):** ATEP 456.

**Notes:** Formal acceptance into the ATEP.

**Schedule Type:** LEC

**Hours of Lecture or Seminar per week:** 3

**Hours of Lab or Studio per week:** 0

**When Offered:** Summer

### ATEP 456 - Practicum 5 Professional Integration

Credits: 6

Not Repeatable for Credit

Offered by School of Recreation, Health, and Tourism

A clinical practicum field experience under the direct supervision of a preceptor with emphasis on professional skill integration.

**Prerequisite(s):** Grade of C or higher in ATEP 150, 180, 250, 255, 256, 260, 265, 266, 270, 300, 350, 355, 356, 360, 365, 366; BIOL 124, 125; HEAL 110, 230; KINE 310, 360.

**Corequisite(s):** ATEP 450.

**Notes:** Formal acceptance into the professional phase of the ATEP; Current Emergency Cardiac Care (ECC) Certification.

**Schedule Type:** INT

**Hours of Lecture or Seminar per week:** 1

**Hours of Lab or Studio per week:** 0

**When Offered:** Fall
ATEP 457 - Athletic Training Practicum 2

Credits: 1
Not Repeatable for Credit
Offered by School of Recreation, Health, and Tourism
Emphasizes physical assessment and therapeutic interventions of the upper body with non-sport populations and assessment of general medical conditions in a clinical practicum field experience under the direct supervision of a preceptor for 75 hours.

Prerequisite(s): Admission to the professional phase of the ATEP and a grade of C or better in the following courses: ATEP 120, ATEP 150, ATEP 201, ATEP 300, ATEP 310, ATEP 320, ATEP 325, ATEP 330, ATEP 340, ATEP 345, ATEP 350, ATEP 355, ATEP 360, ATEP 365, ATEP 366, ATEP 370, ATEP 375; BIOL 124, BIOL 125; HEAL 230; KINE 310, KINE 320; PRLS 450.

Corequisite(s): ATEP 450.

Schedule Type: INT
Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0
Grading: Undergraduate Special.
When Offered: Summer

ATEP 460 - Pediatric Sports Medicine

Credits: 3
Not Repeatable for Credit
Offered by School of Recreation, Health, and Tourism
Examines evidence-based practices for injury preventions, sport safety, emergency preparedness, and risk management within youth and scholastic sport.

Prerequisite(s): A grade of C or better in the following courses: ATEP 300; BIOL 124, BIOL 125; KINE 310

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
When Offered: Fall

ATEP 466 - Athletic Training Practicum 3

Credits: 2
Not Repeatable for Credit
Offered by School of Recreation, Health, and Tourism
Emphasizes injury prevention administration physical assessment and therapeutic intervention during athletics preseason in a clinical practicum field experience under the direct supervision of a preceptor for 150 hours.

Prerequisite(s): Admission to the professional phase of the ATEP and a grade of C or better in the following courses: ATEP 120, ATEP 150, ATEP 201, ATEP 300, ATEP 310, ATEP 320, ATEP 325, ATEP 330, ATEP 340, ATEP 345, ATEP 350, ATEP 355, ATEP 360, ATEP 365, ATEP 366 ATEP 370, ATEP 375, ATEP 450, ATEP 456; BIOL 124, BIOL 125; HEAL 230; KINE 310, KINE 320; PRLS 450.

Schedule Type: INT
Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 0
Grading: Undergraduate Special
When Offered: Summer

ATEP 470 - Post Rehabilitative Therapeutic Interventions

Credits: 2
Not Repeatable for Credit
Offered by School of Recreation, Health, and Tourism
Explores current topics of musculoskeletal injury prevention and intervention. Investigates injury epidemiology, pain and nutritional theories.

Prerequisite(s): Admission to the professional phase of the ATEP and a grade of C or better in the following courses: ATEP 120, ATEP 150, ATEP 201, ATEP 300, ATEP 310, ATEP 320, ATEP 325, ATEP 330, ATEP 340, ATEP 345, ATEP 350, ATEP 355, ATEP 360, ATEP 365, ATEP 366, ATEP 370, ATEP 375, ATEP 450, ATEP 456, ATEP 466; BIOL 124, BIOL 125; HEAL 230; KINE 310, KINE 320; PRLS 450.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 0
When Offered: Fall

ATEP 476 - Athletic Training Practicum 4

Credits: 4
Not Repeatable for Credit
Offered by School of Recreation, Health, and Tourism
Emphasizes physical assessment and therapeutic interventions of the upper body in a clinical practicum field experience under the direct supervision of a preceptor for 300 hours.

Prerequisite(s): Admission to the professional phase of the ATEP and a grade of C or better in the following courses: ATEP 120, ATEP 150, ATEP 201, ATEP 300, ATEP 310, ATEP 320, ATEP 325, ATEP 330, ATEP 340, ATEP 345, ATEP 350, ATEP 355, ATEP 360, ATEP 365, ATEP 366, ATEP 370, ATEP 375, ATEP 450, ATEP 456, ATEP 466; BIOL 124, BIOL 125; HEAL 230; KINE 310, KINE 320; PRLS 450.
Corequisite(s): ATEP 470.

Schedule Type: INT
Hours of Lecture or Seminar per week: 4
Hours of Lab or Studio per week: 0
When Offered: Fall

ATEP 480 - Athletic Training Research

Credits: 3
Not Repeatable for Credit
Offered by School of Recreation, Health, and Tourism
Examines methods for critically evaluating clinical research techniques and interventions to improve patient outcomes specific to the practice of athletic training.
**Prerequisite(s):** Admission to the professional phase of the ATEP and a grade of C or better in the following courses: ATEP 120, ATEP 150, ATEP 201, ATEP 300, ATEP 310, ATEP 320, ATEP 325, ATEP 330, ATEP 340, ATEP 345, ATEP 350, ATEP 355, ATEP 360, ATEP 365, ATEP 366, ATEP 370, ATEP 375, ATEP 450, ATEP 456, ATEP 466; BIOL 124, BIOL 125; HEAL 230; KINE 310, KINE 320; PRLS 450.

**Corequisite(s):** ATEP 486.

**Schedule Type:** LEC

**Hours of Lecture or Seminar per week:** 3

**Hours of Lab or Studio per week:** 0

**When Offered:** Spring

---

**ATEP 486 - Athletic Training Practicum 5**

Credits: 6
Not Repeatable for Credit
Offered by School of Recreation, Health, and Tourism
Emphasizes professional skill integration with a clinical practicum field experience under the direct supervision of a preceptor for 400 hours

**Prerequisite(s):** Admission to the professional phase of the ATEP and a grade of C or better in the following courses: ATEP 120, ATEP 150, ATEP 201, ATEP 300, ATEP 310, ATEP 320, ATEP 325, ATEP 330, ATEP 340, ATEP 345, ATEP 350, ATEP 355, ATEP 360, ATEP 365, ATEP 366, ATEP 370, ATEP 375, ATEP 450, ATEP 456, ATEP 460, ATEP 466, ATEP 470, ATEP 476; BIOL 124, BIOL 125; HEAL 230; KINE 310, KINE 320; PRLS 450.

**Corequisite(s):** ATEP 480.

**Schedule Type:** INT

**When Offered:** Spring

---

**ATEP 499 - Independent Study in Athletic Training**

Credits: 1-6
Repeatable within Degree for Credit
Offered by School of Recreation, Health, and Tourism
Study of a topic area in athletic training research, theory, or practice under direction of a faculty member. May be repeated, but not more than 6 total credits may be earned.

**Prerequisite(s):** 60 credit hours and instructor approval

**Schedule Type:** IND

**Hours of Lecture or Seminar per week:** 1-6

**Hours of Lab or Studio per week:** 0

---

**ATEP 510 - Advanced Functional Anatomy**

Credits: 3
Not Repeatable for Credit
Offered by School of Recreation, Health, and Tourism
Investigates the musculoskeletal anatomy including innervation, vascular anatomy, and function of the neck, trunk and limbs.
Synthesizes anatomy, physiology, and human movement as it relates to injury; case studies are used to enhance the understanding of human anatomy and interpret movement impairments.

**Prerequisite(s):** Basic human anatomy and physiology and functional anatomy knowledge required.

**Schedule Type:** LEC

**Hours of Lecture or Seminar per week:** 3

**Hours of Lab or Studio per week:** 0

**Grading:** Graduate Special.

**When Offered:** Fall, Summer, Spring

---

**ATEP 520 - Therapeutic Interventions Foundations**

Credits: 3

Not Repeatable for Credit

Offered by School of Recreation, Health, and Tourism

Explores foundational knowledge and skills necessary for the safe, effective, and evidenced-based application of therapeutic interventions. Investigates physiologic response to injury and healing, physiologic cause of pain, physiologic response of tissue to therapeutic intervention including modalities and exercise.

**Prerequisite(s):** Basic human anatomy and physiology and functional anatomy knowledge required.

**Schedule Type:** LEC

**Hours of Lecture or Seminar per week:** 3

**Hours of Lab or Studio per week:** 0

**Grading:** Graduate Special.

**When Offered:** Summer

---

**ATEP 525 - Athletic Training Foundations**

Credits: 3

Not Repeatable for Credit

Offered by School of Recreation, Health, and Tourism

Investigates the knowledge, skill and professional foundations of the athletic training. Emphasizes is placed on the role of the athletic trainer as a member of the health care system by decision-making through evidence-based practice and foundational skills including fitting protective equipment and devices, arid prophylactic preventative taping.

**Prerequisite(s):** Admission to the Master of Science in Athletic Training program and a 8- or greater in the following courses: ATEP 510, 520.

**Schedule Type:** LEC

**Hours of Lecture or Seminar per week:** 3

**Hours of Lab or Studio per week:** 0

**When Offered:** Spring

---

**ATEP 530 - Emergency Procedures for Athletic Trainers**

Credits: 3

Not Repeatable for Credit

Offered by School of Recreation, Health, and Tourism
Investigates the scientific and philosophical foundations of pre-hospital emergency care principles pertinent to athletic trainers. Develops knowledge, critical thinking and problem solving skills necessary to correctly apply emergency care principles and associated skills in a variety of clinical and professional settings.

**Prerequisite(s):** Admission to the Professional Masters ATEP and a B- or greater in the following courses: ATEP 510, 520.

**Schedule Type:** LEC

**Hours of Lecture or Seminar per week:** 3

**Hours of Lab or Studio per week:** 0

**When Offered:** Fall

### ATEP 540 - Lower Body Physical Assessment

Credits: 3

Not Repeatable for Credit

Offered by School of Recreation, Health, and Tourism

Analyzes principles of lower body physical assessment. Investigates mechanisms of injury, the evaluation process, and testing leading to diagnosis.

**Prerequisite(s):** Admission to the Professional Masters ATEP and a grade of B- or better in the following courses: ATEP 510, ATEP 520.

**Corequisite(s):** ATEP 550.

**Schedule Type:** LEC

**Hours of Lecture or Seminar per week:** 3

**Hours of Lab or Studio per week:** 0

**When Offered:** Fall, Spring

### ATEP 545 - Athletic Training Clinical Techniques 1

Credits: 3

Not Repeatable for Credit

Offered by School of Recreation, Health, and Tourism

Applies principles of lower body, thoracic and lumbar spine physical assessment. Develops evaluation skills including special testing leading to diagnosis.

**Prerequisite(s):** Admission to Professional Masters ATEP and a grade of B- or better in the following courses: ATEP 510, ATEP 520.

**Corequisite(s):** ATEP 540.

**Schedule Type:** LAB

**Hours of Lecture or Seminar per week:** 0

**Hours of Lab or Studio per week:** 3

**When Offered:** Fall

### ATEP 550 - Lower Body Therapeutic Interventions
Develops, implements, and evaluates treatment plans using therapeutic modalities and rehabilitation interventions in the treatment of lower body injuries and conditions. Establishes an evidence-based approach to therapeutic interventions used in patient treatment.

**Prerequisite(s):** Admission to Professional Masters ATEP and a grade of B- or better in the following courses: ATEP 510, ATEP 520.

**Corequisite(s):** ATEP 555.

**Schedule Type:** LEC  
**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall

---

**ATEP 555 - Athletic Training Clinical Techniques 2**

Credits: 3  
Not Repeatable for Credit  
Offered by School of Recreation, Health, and Tourism  
Applies therapeutic interventions for the lower body in a laboratory setting. Develops rehabilitation treatment plans and skills necessary to carry out patient care.

**Prerequisite(s):** Admission to the Professional Masters ATEP and a grade of 8- or better in the following courses: ATEP 510, 520.  
**Corequisite(s):** ATEP 550.

**Schedule Type:** LAB  
**Hours of Lecture or Seminar per week:** 0  
**Hours of Lab or Studio per week:** 3  
**When Offered:** Fall

---

**ATEP 560 - Upper Body Therapeutic Interventions**

Credits: 3  
Not Repeatable for Credit  
Offered by School of Recreation, Health, and Tourism  
Utilizes an integrated approach to therapeutic interventions including modalities and rehabilitation in the treatment of upper body, head and neck injuries and conditions. Includes development, implementation, and evaluation of treatment plans for upper body, head and neck injuries.

**Prerequisite(s):** Admission to the Professional Masters ATEP and a grade of B- or better in the following courses: ATEP 510, 520, 530, 540, 545, 550, 555.  
**Corequisite(s):** ATEP 565 and 566.

**Schedule Type:** LEC  
**Hours of Lecture or Seminar per week:** 3
ATEP 565 - Athletic Training Clinical Techniques 4

Credits: 3
Not Repeatable for Credit
Offered by School of Recreation, Health, and Tourism
Applies therapeutic interventions for the upper body, head and neck in a laboratory setting. Develops rehabilitation treatment plans and skills necessary to carry out patient care.

Prerequisite(s): Admission to the Professional Masters ATEP and a grade of B- or better in the following courses: ATEP 510, 520, 530, 540, 545, 550, 555.
Schedule Type: LAB
Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 3
When Offered: Fall, Spring

ATEP 566 - Athletic Training Practicum 1

Credits: 2
Not Repeatable for Credit
Offered by School of Recreation, Health, and Tourism
Emphasizes physical assessment and therapeutic interventions of the lower body in a clinical immersion practicum field experience under the direct supervision of a preceptor for 150 hours.

Prerequisite(s): Admission to the Professional Masters ATEP and a grade of B- or better in the following courses: ATEP 510, ATEP 520, ATEP 530, ATEP 540, ATEP 545, ATEP 550, ATEP 555.
Corequisite(s): ATEP 560, ATEP 565, ATEP 570, ATEP 575.
Schedule Type: INT
Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0
Grading: Graduate Special.
When Offered: Spring

ATEP 570 - Upper Body Physical Assessment

Credits: 3
Not Repeatable for Credit
Offered by School of Recreation, Health, and Tourism
Analyses principles of upper body physical assessment. Investigates mechanisms of injury, the evaluation process, and testing leading to diagnosis.

Prerequisite(s): Admission to the Professional Masters ATEP and a grade of B- or better in the following courses: ATEP 510, ATEP 520, ATEP 530, ATEP 540, ATEP 545, ATEP 550, ATEP 555
Corequisite(s): ATEP 575, ATEP 566.
Schedule Type: LEC  
Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0  
When Offered: Spring

### ATEP 575 - Athletic Training Clinical Techniques 3

Credits: 3  
Not Repeatable for Credit  
Offered by School of Recreation, Health, and Tourism  
Applies principles of upper body, head and neck physical assessment. Develops evaluation skills including special testing, leading to diagnosis.

**Prerequisite(s):** Admission to the Professional Masters ATEP and a grade of B- or better in the following courses: ATEP 510, ATEP 520, ATEP 530, ATEP 540, ATEP 545, ATEP 550, ATEP 555.

**Corequisite(s):** ATEP 570, ATEP 566.

Schedule Type: LAB  
Hours of Lecture or Seminar per week: 0  
Hours of Lab or Studio per week: 3  
When Offered: Spring

### ATEP 600 - Pathopharmacology

Credits: 3  
Not Repeatable for Credit  
Offered by School of Recreation, Health, and Tourism  
Examines the assessment and management techniques of general medical conditions and pharmacological principles and interventions.

**Prerequisite(s):** Basic human anatomy and physiology knowledge required.

Schedule Type: LEC  
Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0  
When Offered: Fall, Spring

### ATEP 650 - Administration and Management in Athletic Training

Credits: 3  
Not Repeatable for Credit  
Offered by School of Recreation, Health, and Tourism  
Focuses on the professional management and administrative issues in athletic training including the planning, designing, development, organization, implementation, direction, and evaluation of a health care program. Discusses current issues in athletic training related to professional conduct and practice.

**Prerequisite(s):** Admission to the Professional Masters ATEP and a grade of B- or better in the following courses: ATEP 510,
ATEP 520, ATEP 530, ATEP 540, ATEP 545, ATEP 550, ATEP 555, ATEP 560, ATEP 565, ATEP 566, ATEP 570, ATEP 575.
Corequisite(s): ATEP 656.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Summer

ATEP 656 - Athletic Training Practicum 2

Credits: 1
Not Repeatable for Credit
Offered by School of Recreation, Health, and Tourism
Emphasizes physical assessment and therapeutic interventions of the upper body with non-sport populations and assessment of general medical conditions in a clinical practicum field experience under the direct supervision of a preceptor for 75 hours.

Prerequisite(s): Admission to Professional Masters ATEP and a grade of B- or better in the following courses: ATEP 510, ATEP 520, ATEP 530, ATEP 540, ATEP 545, ATEP 550, ATEP 555, ATEP 560, ATEP 565, ATEP 566, ATEP 570, ATEP 575.
Corequisite(s): ATEP 650.

Schedule Type: INT
Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0
Grading: Graduate Special.
When Offered: Summer

ATEP 660 - Pediatric Sports Medicine

Credits: 3
Not Repeatable for Credit
Offered by School of Recreation, Health, and Tourism
Examines evidence-based practices for injury prevention, sport safety, emergency preparedness, and risk management within youth and scholastic sport.

Prerequisite(s): Basic human anatomy and physiology knowledge required.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

ATEP 667 - Athletic Training Practicum 3

Credits: 2
Not Repeatable for Credit
Offered by School of Recreation, Health, and Tourism
Emphasizes injury prevention, administration, physical assessment and therapeutic intervention during athletics pre-season in a clinical practicum field experience under the direct supervision of a preceptor for 150 hours.
Prerequisite(s): Admission to the Professional Masters ATEP and a grade of B- or better in the following courses: ATEP 510, ATEP 520, ATEP 530, ATEP 540, ATEP 545, ATEP 550, ATEP 555, ATEP 560, ATEP 565, ATEP 566, ATEP 570, ATEP 575, ATEP 650, ATEP 656.

Corequisite(s): ATEP 660, 670.

Schedule Type: INT
Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0
Grading: Graduate Special.
When Offered: Summer

ATEP 670 - Post Rehabilitative Therapeutic Interventions

Credits: 2
Not Repeatable for Credit
Offered by School of Recreation, Health, and Tourism
Explores current topics of musculoskeletal injury prevention and intervention. Investigates injury epidemiology, pain and nutritional theories.

Prerequisite(s): Admission to the Professional Masters ATEP and a grade of B- or better in the following courses: ATEP 510, ATEP 520, ATEP 530, ATEP 540, ATEP 545, ATEP 550, ATEP 555, ATEP 560, ATEP 565, ATEP 566, ATEP 570, ATEP 575, ATEP 650, ATEP 656, ATEP 667.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 0
When Offered: Fall

ATEP 676 - Athletic Training Practicum 4

Credits: 4
Not Repeatable for Credit
Offered by School of Recreation, Health, and Tourism
Emphasizes physical assessment and therapeutic interventions of the upper body in a clinical practicum field experience under the direct supervision of a preceptor for 300 hours.

Prerequisite(s): Admission to the Professional Masters ATEP and a grade of B- or better in the following courses: ATEP 510, ATEP 520, ATEP 530, ATEP 540, ATEP 545, ATEP 550, ATEP 555, ATEP 560, ATEP 565, ATEP 566, ATEP 570, ATEP 575, ATEP 650, ATEP 656, ATEP 667.

Corequisite(s): ATEP 660, 670.

Schedule Type: INT
Hours of Lecture or Seminar per week: 4
Hours of Lab or Studio per week: 0
When Offered: Fall

ATEP 680 - Athletic Training Research
Credits: 3
Not Repeatable for Credit
Offered by School of Recreation, Health, and Tourism
Examines methods for critically evaluating clinical research techniques and interventions to improve patient outcomes specific to
the practice of athletic training.

Prerequisite(s): Admission to the Professional Masters ATEP and a grade of B- or better in the following courses: ATEP 510, ATEP 520, ATEP 530, ATEP 540, ATEP 545, ATEP 550, ATEP 555, ATEP 560, ATEP 565, ATEP 566, ATEP 570, ATEP 575, ATEP 650, ATEP 656, ATEP 667, ATEP 676, ATEP 660, ATEP 670.
Corequisite(s): ATEP 686.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring

ATEP 686 - Athletic Training Practicum 5

Credits: 6
Not Repeatable for Credit
Offered by School of Recreation, Health, and Tourism
Emphasizes professional skill integration with a clinical practicum field experience under the direct supervision of a preceptor for 400 hours.

Prerequisite(s): Admission to the Professional Masters ATEP and a grade of B- or better in the following courses: ATEP 510, ATEP 520, ATEP 530, ATEP 540, ATEP 545, ATEP 550, ATEP 555, ATEP 560, ATEP 565, ATEP 566, ATEP 570, ATEP 575, ATEP 650, ATEP 656, ATEP 667, ATEP 676, ATEP 660, ATEP 670.
Corequisite(s): ATEP 680.

Schedule Type: INT
Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0
When Offered: Spring

BA in Applied Science (BAS)

Offered by the Provost's Office

BAS 300 - Building Professional Competencies

Credits: 3
Not Repeatable for Credit
Offered by the Provost's Office.
This course serves as an orientation to the BAS degree program. Current strengths are assessed and future planning is highlighted. Core competency areas related to personal effectiveness and academic/workplace success are stressed. Introduction to the university online learning system and other available resources useful for degree completion are also emphasized.

Schedule Type: SEM
BAS 490 - Introduction to Research Methods

Credits: 3
Not Repeatable for Credit
Offered by the Provost's Office.
This course introduces students to fundamental research methods and processes. Students will explore their research interests and identify one topic as well as learn to set up research questions, review literature, and define appropriate methods for data collection. This course intends to prepare students for their practicum study in BAS 491.

Prerequisite(s): Student must have completed 85 credits prior to taking this course.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Summer, Spring

BAS 491 - Applied Sciences Capstone

Credits: 3
Not Repeatable for Credit
Offered by the Provost's Office.
Students participate in an approved fieldwork study program and complete a research project as identified in BAS 490 Introduction to Research Methods. The Capstone project involves choosing and researching a workplace problem; designing, implementing and evaluating a specific plan of action; and formally presenting the project once completed.

Prerequisite(s): Grade of C or higher in BAS 490.
Prerequisite(s) enforced by registration system.

Schedule Type: INT
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Summer, Spring

Bachelor of Individualized Study (BIS)

Offered by the College of Humanities and Social Sciences

BIS 300 - Understanding Interdisciplinary Studies

Credits: 3
Not Repeatable for Credit
Offered by Individualized Study
Focuses on literature and issues relevant to interdisciplinary and multidisciplinary studies and the BIS program. Students explore selected topics, develop and gather feedback on individualized concentration proposals, and review BIS program requirements.

Notes: Open only to pre-BIS students and BIS majors.

Schedule Type: LEC  
Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0

**BIS 390 - The Research Process**

Credits: 3  
Not Repeatable for Credit  
Offered by Individualized Study  
Focuses on skills to develop a research project, find and organize relevant information, examine and critique evidence, establish criteria, and create plan to complete senior project.

Fulfills writing intensive requirement in the major.

Prerequisite(s): BIS 300 and a grade of 2.00 or above in ENGL 302/ENGH 302.  
Notes: Open only to pre-BIS students and BIS majors. Students cannot receive credit for both BIS 390 and 391.

Schedule Type: LEC  
Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0

**BIS 391 - The Research Process for Honors**

Credits: 3  
Not Repeatable for Credit  
Offered by Individualized Study  
Focuses on skills to develop an honors-level research project, find and organize relevant information, examine and critique evidence, establish criteria, and create plan to complete Honors Senior Research Project (BIS 490). Approved research proposal required prior to registration in BIS 490.

Prerequisite(s): Acceptance to honors in the BIS major.  
Notes: Students cannot receive credit for both BIS 390 and 391.

Schedule Type: SEM  
Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0

**BIS 399 - Special Topics**

Credits: 1-3  
Repeatable within Term for Credit  
Offered by Individualized Study
Selected topics reflecting interest in specialized areas.

Prerequisite(s): Open only to degree students in BIS.
Notes: May be repeated for a maximum of 6 credits when topic is different.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0

BIS 489 - Directed Readings and Research
Credits: 1-3
Repeatable within Degree for Credit
Offered by Individualized Study
Readings and research on a topic directly relevant to student's core concentration.

Notes: Open only to pre-BIS students and BIS majors. Individualized sections by arrangement. Guided by instructor with expertise. Topics must be approved by instructor and BIS director prior to enrollment.

Schedule Type: IND
Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0

BIS 490 - RS: Senior Project
Credits: 3
Not Repeatable for Credit
Offered by Individualized Study
Project or thesis on a topic directly relevant to student's concentration. Guided by student's faculty advisor and 490 instructor.

Fulfills Mason Core requirement in synthesis.

Designated as a research and scholarship intensive course.

Prerequisite(s): BIS 390
Corequisite(s): BIS 491

Notes: Open only to BIS majors. Individualized sections for BIS honors. Capstone course in BIS core concentration. Research proposals must be approved by faculty mentor, executive committee, and BIS director prior to enrollment.

Schedule Type: IND
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
Grading: Undergraduate Special

BIS 491 - Senior Project Presentation
Credits: 1
Not Repeatable for Credit
Offered by Individualized Study
Focuses on preparation and delivery of a formal presentation of student's BIS 490 project. Includes review of basic presentation techniques.

Prerequisite(s): BIS 390.
Corequisite(s): BIS 490.

Notes: Open only to BIS majors.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0
Grading: Undergraduate Special

BIS 495 - Career Practicum

Credits: 1-6
Repeatable within Degree for Credit
Offered by Individualized Study
Supervised experience in application of specified area.

Prerequisite(s): Permission of instructor and BIS director.
Schedule Type: INT
Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 0
Grading: Undergraduate Special

Biodefense (BIOD)

Offered by the Schar School of Policy and Government (formerly SPGIA).

BIOD 604 - Emerging Infectious Diseases I: Bacteria and Toxins

Credits: 3
Not Repeatable for Credit
Offered by Schar School of Policy and Government (formerly SPGIA)
Covers the microbiology, pathogenesis, clinical effects, and epidemiology of bacteria and toxins that pose threats to global health or can be utilized as biological weapons.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Summer
BIOD 605 - Emerging Infectious Diseases II: Viral Agents

Credits: 3
Not Repeatable for Credit
Offered by Schar School of Policy and Government (formerly SPGIA)
Covers the microbiology, pathogenesis, clinical effects, and epidemiology of viruses that pose threats to global health or can be utilized as biological weapons.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Summer

BIOD 607 - Introduction to Biodefense/Threat Analysis III: Toxins

Credits: 3
Not Repeatable for Credit
Offered by Schar School of Policy and Government (formerly SPGIA)
Discusses the threat of toxins as biological weapons. Special focus on microbiological toxins, including botulinum toxin, and biochemical action of toxins. Comparison to chemical weapons and debate about classification as such.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

BIOD 609 - Biodefense Strategy

Credits: 3
Not Repeatable for Credit
Offered by Schar School of Policy and Government (formerly SPGIA)
Introduces students to the biodefense and biosecurity strategies and policies of the United States, other nations, and international organizations. Evaluates the effectiveness of these policies in strengthening defenses, improving intelligence, increasing oversight, enhancing nonproliferation, and reinforcing norms. Examines the interaction of biodefense and biosecurity with homeland, national, and international security.

Prerequisite(s): BIOD 604 and 605 or permission of instructor.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0-6

BIOD 610 - Advanced Topics in Global Health Security

Credits: 1-4
Repeatable within Term for Credit
Offered by Schar School of Policy and Government (formerly SPGIA)
Different topics, depending on instructor's specialty. Topics include ethical, legal, scientific, security, political, and/or policy
aspects of global health security, emphasizing current problems and research.

Prerequisite(s): BIOD 604 and 605 or permission of instructor.
Notes: May be repeated for a maximum of 18 credits when topic is different.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0-6

**BIOD 620 - Global Health Security Policy**

Credits: 3
Not Repeatable for Credit
Offered by Schar School of Policy and Government (formerly SPGIA)
Explores issues emerging from the interaction of health and security that represent novel challenges to policy makers confronting a rapidly changing international landscape. Examines the origin and evolution of the concept of health security. Analyzes strategic impact of infectious disease outbreaks, global health security case studies, global health governance, and formulation and implementation of U.S. global health security policy.

Prerequisite(s): BIOD 604 and 605 or permission of instructor
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**BIOD 621 - Ethics and International Security**

Credits: 3
Not Repeatable for Credit
Offered by Schar School of Policy and Government (formerly SPGIA)
Challenges students to wrestle with dilemmas raised by the desire to behave ethically in an international system in which consensus about ethical matters is absent. Students will develop, apply, and justify their own perspective on an ethical problem related to international security using ethical theory and social science research. Ethical issues related to nuclear, biological, and chemical weapons that confront researchers, policy makers, and practitioners will be addressed.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**BIOD 622 - Negotiating in the International Arena**

Credits: 3
Not Repeatable for Credit
Offered by Schar School of Policy and Government (formerly SPGIA)
Provides students with the concepts and tools for analyzing complex negotiation processes and introduces them to the challenges facing international negotiators. Students will read about the frameworks and perspectives that have guided the scholarly research on negotiation, as well as the latest findings from that research; analyze complex cases of actual negotiations in the security, trade, and environmental areas; and negotiate key issues on the agendas of nations and international organizations.
BIOD 705 - Intelligence: Theory and Practice

Credits: 3
Not Repeatable for Credit
Offered by Schar School of Policy and Government (formerly SPGIA)
Theory and practice of intelligence, including the intelligence cycle, organization of the intelligence community, and the origins and impact of recent reforms. Examines the capabilities and limitations of the different collection disciplines, analytic methodologies and pathologies, and the relationship between intelligence and policy. Analyzes challenges posed by collecting and analyzing intelligence on weapons of mass destruction programs conducted by states and terrorists.

Prerequisite(s): BIOD 604 and 605, or permission of instructor.

BIOD 706 - Nuclear, Biological, and Chemical Weapons Policy and Security

Credits: 3
Not Repeatable for Credit
Offered by Schar School of Policy and Government (formerly SPGIA)
Explores the causes, conduct, and consequences of the proliferation of nuclear, biological, and chemical weapons. Covers the historical, technological, normative, and strategic factors that have promoted and restrained the spread of these weapons. Addresses the motives for states to develop these weapons and the debate over the security implications of nuclear, biological, and chemical weapon proliferation.

Prerequisite(s): BIOD 604 and 605, or permission of instructor.

BIOD 709 - Nonproliferation and Arms Control

Credits: 3
Not Repeatable for Credit
Offered by Schar School of Policy and Government (formerly SPGIA)
Examines the array of national and international measures used to slow, halt, and reverse the spread of nuclear, biological, chemical, and missile weapons. Explores the theory and practice of proliferation to provide insights into the supply and demand aspects of proliferation.

Prerequisite(s): BIOD 604 and 605, or permission of instructor.
BIOD 710 - Health Security Preparedness

Credits: 3
Not Repeatable for Credit
Offered by Schar School of Policy and Government (formerly SPGIA)
Examines national and international public health and medical preparedness for and response to natural disasters, terrorist acts, and disease outbreaks. Explores organizational and policy architecture, implementation challenges, and strategies for preventing, detecting, and mitigating these threats.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Summer

BIOD 722 - Examining Terrorist Groups

Credits: 3
Not Repeatable for Credit
Offered by Schar School of Policy and Government (formerly SPGIA)
Introduction to terrorism including the history and evolution of terrorism, case studies of key terrorist groups, the current nature of the terrorist threat and counterterrorism strategies.

Prerequisite(s): BIOD 604 and 605, or permission of instructor.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

BIOD 723 - Legal Dimensions of Homeland Security

Credits: 3
Not Repeatable for Credit
Offered by Schar School of Policy and Government (formerly SPGIA)
Introduces the impact of legal issues on homeland security and biodefense. Topics include the origins of the Department of Homeland Security, the relationship between public health and law enforcement, the role of the military in homeland security, trade-offs between privacy and security, legal aspects of public-private cooperation in biodefense and homeland security, quarantine authority and enforcement, ensuring compliance with international treaties, and implementing biosecurity regulations.

Prerequisite(s): BIOD 604 and 605, or permission of instructor.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
BIOD 725 - Terrorism and Weapons of Mass Destruction

Credits: 3
Not Repeatable for Credit
Offered by Schar School of Policy and Government (formerly SPGIA)
Examines the capabilities and intentions of terrorists to acquire and use chemical, biological, radiological, and nuclear (CBRN) weapons. The course provides an in-depth understanding of the history of CBRN terrorism, the current challenges posed by this threat, and the range of national and international policy tools available to address this threat.

Prerequisite(s): BIOD 604 and 605, or permission of instructor.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

BIOD 726 - Food Security

Credits: 3
Not Repeatable for Credit
Offered by Schar School of Policy and Government (formerly SPGIA)
Analyzes threats to food security globally including those related to climate change and environmental degradation; animal and plant diseases; access to clean water; agricultural terrorism; and antimicrobial resistance. Explores the national and global health, economic, social, and ethical impacts of these disruptive forces. Examines strategies for enhancing the security of the global food production and supply systems.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Summer

BIOD 751 - Biosurveillance

Credits: 3
Not Repeatable for Credit
Offered by Schar School of Policy and Government (formerly SPGIA)
Provides an understanding of the capabilities required to provide reliable early warning of disease outbreaks and identify their etiological agents. Assesses strengths and limitations of physicians, laboratories, epidemiologists, aerosol sensors, and syndromic surveillance systems. Considers challenges posed by the integration and analysis of the information collected by these sources.

Prerequisite(s): BIOD 604 and 605, or permission of instructor.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

BIOD 752 - The Role of the Military in Homeland Security
BIOD 760 - National Security Technology and Policy

Credits: 3
Not Repeatable for Credit
Offered by Schar School of Policy and Government (formerly SPGIA)
Introduces students to the intersection of science, technology, and policy in national security. Will examine the players in the formation of science policy; the roles they play; how the types, uncertainties, and availability of data affect science policy debates; and how science policy decisions are made. Topics to be covered include weapons of mass destruction, nonlethal weapons, nanotechnology, bioengineering, energy security, and pandemic influenza.

Prerequisite(s): BIOD 604 and 605, or permission of instructor.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

BIOD 762 - Biotechnology and Society

Credits: 3
Not Repeatable for Credit
Offered by Schar School of Policy and Government (formerly SPGIA)
Examines the growing role of biotechnology in modern society, including benefits to human and animal health, industrial applications, and potential for misuse. Analyzes key variables influencing the revolution in biotechnology and impact in both developed and developing countries. Explores the political, economic, social, legal, security, and ethical implications of advances in life sciences and biotechnology.

Prerequisite(s): BIOD 604 and 605, or permission of instructor
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Summer

BIOD 766 - Development of Vaccines and Therapeutics

Credits: 3
Not Repeatable for Credit
Offered by Schar School of Policy and Government (formerly SPGIA)
Analyzes the process of developing new medical countermeasures against biological weapons and emerging infectious diseases such as SARS and pandemic influenza. Special attention is paid to the scientific, technical, political, regulatory, and economic obstacles to developing new vaccines and therapeutics. Examines the causes and potential solutions of public and private sector failures.

Prerequisite(s): BIOD 604 and 605 or permission of instructor.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

BIOD 780 - Master's Supervised Internship

Credits: 1-6
Repeatable within Degree for Credit
Offered by Schar School of Policy and Government (formerly SPGIA)
Internship under supervision of qualified professional in biodefense at a government agency, consulting firm, industrial firm, or other acceptable agency.

Prerequisite(s): Permission of program director or advisor.
Schedule Type: INT
Hours of Lecture or Seminar per week: 1-2
Hours of Lab or Studio per week: 0
Grading: Satisfactory/No Credit.

BIOD 790 - Global Health Security Capstone

Credits: 3
Not Repeatable for Credit
Offered by Schar School of Policy and Government (formerly SPGIA)
Provides students with the opportunity to hone their research, writing, collaboration, and presentation skills through completion of a capstone project that synthesizes the theoretical and subject matter knowledge students have gained in the program.

Schedule Type: SEM
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

BIOD 793 - Directed Studies in Biodefense

Credits: 1-3
Repeatable within Degree for Credit
Offered by Schar School of Policy and Government (formerly SPGIA)
Individualized study of topics not otherwise available in graduate program. May involve reading assignments, tutorials, lectures, papers, presentations, or lab or field study, determined in consultation with instructor.

Prerequisite(s): Permission of the instructor and program director.
Schedule Type: IND
BIOD 798 - Master's Research Project in Biodefense

Credits: 3
Not Repeatable for Credit
Offered by Schar School of Policy and Government (formerly SPGIA)
Research project related to student's concentration under supervision of faculty advisor. Student produces substantial and original contribution to the field of biodefense on the model of an article in a scholarly journal.

Prerequisite(s): 24 credits in BIOD and permission of project director.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
Grading: Satisfactory/No Credit

BIOD 810 - Advanced Seminar in Biodefense

Credits: 3
Repeatable within Term for Credit
Offered by Schar School of Policy and Government (formerly SPGIA)
Explores issues of contemporary and emerging concern in biodefense and biosecurity. Topics may include legal, ethical, scientific, economic, and political aspects of biodefense and biosecurity.

Prerequisite(s): BIOD 604 and 605 or permission of adviser.
Notes: May be repeated for a maximum of 9 credits when topic is different.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

BIOD 890 - Doctoral Supervised Internship

Credits: 1-6
Repeatable within Degree for Credit
Offered by Schar School of Policy and Government (formerly SPGIA)
Internship under supervision of qualified biodefense professional at government agency, consulting firm, industrial firm, or other acceptable agency.

Prerequisite(s): Permission of program director or advisor.
Schedule Type: INT
Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0
Grading: Graduate Special
**BIOD 899 - Directed Research in Biodefense**

Credits: 1-12  
Repeatable within Degree for Credit  
Offered by Schar School of Policy and Government (formerly SPGIA)  
Research on a pertinent topic in biodefense; scope and subject determined by instructor.  

**Prerequisite(s):** Approval of program director.  
**Schedule Type:** IND  
**Hours of Lecture or Seminar per week:** 1-3  
**Hours of Lab or Studio per week:** 0

**BIOD 996 - Doctoral Reading and Research**

Credits: 1-9  
Repeatable within Degree for Credit  
Offered by Schar School of Policy and Government (formerly SPGIA)  
Independent reading and research on specific biodefense topic under faculty member's direction. Specific arrangements for designing scope and area of study to be determined in consultation with instructor. May involve literature searches and review, workshops, tutorials, or other formats.  

**Notes:** May be repeated for credits.  
**Schedule Type:** IND  
**Hours of Lecture or Seminar per week:** 1-6  
**Hours of Lab or Studio per week:** 0  
**Grading:** Graduate Special

**BIOD 998 - Doctoral Dissertation Proposal**

Credits: 1-12  
Repeatable within Degree for Credit  
Offered by Schar School of Policy and Government (formerly SPGIA)  
Development of a research proposal, which forms the basis for doctoral dissertation under guidance of dissertation director committee.  

**Notes:** Only 12 credits may be applied to the degree.  
**Schedule Type:** IND  
**Hours of Lecture or Seminar per week:** 0  
**Hours of Lab or Studio per week:** 0  
**Grading:** S/NC

**BIOD 999 - Doctoral Dissertation**
Credits: 1-12
Repeatable within Degree for Credit
Offered by Schar School of Policy and Government (formerly SPGIA)
Doctoral dissertation research under direction of dissertation chair.

Prerequisite(s): Completion of 998 and advancement to candidacy.

Schedule Type: IND

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0
Grading: S/NC

Bioengineering (BENG)

Offered by the Volgenau School of Engineering.

Students may attempt an undergraduate course taught by the Volgenau School of Engineering twice. A third attempt requires approval of the department offering the course.

BENG 101 - Introduction to Bioengineering

Credits: 0-3
Limited to 2 Attempts
Offered by Bioengineering
Surveys the field of bioengineering and the global impact of technology innovation in solving problems in biology and medicine with an emphasis on engineering tools and concepts. Introduces mathematical modeling and analysis of bioengineering problems through the use of standard software packages for simulation. Discusses the history, ethical/social implications, and career paths in Bioengineering.

Schedule Type: LEC, RCT
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

BENG 220 - Physical Bases of Biomedical Systems

Credits: 3
Limited to 2 Attempts
Offered by Bioengineering
Introduces the physical basis of biomedical systems and signals. Demonstrates basic concepts of systems and signals theory, and shows their derivation from the biophysical concepts such as mechanics, fluid mechanics, pharmacokinetics and molecular biophysics which underlie the signals in living systems. Aims at providing the student with the mathematical and physical understanding to quantitatively describe biological systems.

Prerequisite(s): Grade of C or better in BENG 101, MATH 203, and PHYS 160.
Prerequisite(s) enforced by registration system.

Corequisite(s): MATH 214 or MATH 216.
Notes: Students cannot receive credit for both BENG 220 and ECE 220.

Schedule Type: LEC, RCT
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

BENG 301 - Bioengineering Measurements

Credits: 3
Limited to 2 Attempts
Offered by Bioengineering
Introduces the basic concepts and tools for making biomedical measurements, describes instrumentation design and analysis considerations, and discusses several practical applications.

Prerequisite(s): Grade of C or better in BENG 380 and BENG 320; Grade of C or better in BIOL 425 or BIOL 430 or BENG 313.
Prerequisite(s) enforced by registration system.

Corequisite(s): BENG 302.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

BENG 302 - Bioengineering Measurements Lab

Credits: 1
Limited to 2 Attempts
Offered by Bioengineering
Provides hands-on experience with sensors and instrumentation relevant to the analysis of living systems and related processes. Biomedical measurements include electrocardiograms, electromyograms, spirometry, pulse oximetry, and glucose monitoring.

Prerequisite(s) enforced by registration system.

Corequisite(s): BENG 301.

Schedule Type: LAB
Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 3
When Offered: Fall, Spring

BENG 304 - Modeling and Control of Physiological Systems

Credits: 3
Limited to 2 Attempts
Offered by Bioengineering
Introduces a systems-level understanding of biomedical systems. Emphasis on mathematical modeling of dynamic systems, including the role of feedback. Analogies between electrical and mechanical systems will be discussed. Examples covered will include multiple scales ranging from cells to organ systems.

Fulfills writing intensive requirement in the major.

**Prerequisite(s):** Grade of C or better in BENG 320 or SYST 320, MATH 214 and PHYS 260; Grade of C or better in BIOL 425 or BIOL 430 or BENG 313.
Prerequisite(s) enforced by registration system.

**Schedule Type:** LEC
**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0
**When Offered:** Fall, Spring

---

**BENG 313 - Physiology for Engineers**

Credits: 3
Limited to 2 Attempts
Offered by Bioengineering
Provides a broad introduction to the subject of human physiology, focusing on learning the subject matter from an engineering viewpoint. Emphasis on organs and physiological systems where engineering has a significant role.

**Prerequisite(s):** Grade of C or better in BENG 101 and
Grade of B- or better in either MATH 114 or MATH 116 and
Grade of C or better in BIOL 213.
Prerequisite(s) enforced by registration system.

**Schedule Type:** LEC
**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0
**When Offered:** Fall, Spring

---

**BENG 320 - Bioengineering Signals and Systems**

Credits: 3
Limited to 2 Attempts
Offered by Bioengineering
Introduces the conversion of analog signals to digital ones and methods for using digitally processed signals in biomedical applications.

**Prerequisite(s):** Grade of C or better in BENG 101 and BENG 220. Grade of B- or better in MATH 214.
Prerequisite(s) enforced by registration system.

**Notes:** Students cannot receive credit for both BENG 320 and ECE 320.

**Schedule Type:** LEC, RCT
**Hours of Lecture or Seminar per week:** 3
BENG 322 - Health Data Challenges

Credits: 3  
Limited to 2 Attempts  
Offered by Bioengineering  
Covers methodology and tools used to work with health data structures supporting organizations' needs for reliable data that are captured, stored, processed, integrated, and prepared for further querying, decision making, data mining and knowledge discovery for a variety of clinical and organizational purposes. Data security and privacy, data standards, data interoperability, health information exchange, and big data analytics are discussed.

Equivalent to IT 322

Prerequisite(s): IT 214, STAT 250 or STAT 344.  
Prerequisite(s) enforced by registration system.

Schedule Type: LEC  
Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0

BENG 341 - Introduction to Biomaterials

Credits: 3  
Limited to 2 Attempts  
Offered by Bioengineering  
To provide a fundamental understanding of current, state of the art, and future directions of biomaterials.

Prerequisite(s): Grade of C or better in CHEM 251 (or CHEM 211), MATH 113, and BIOL 213.  
Prerequisite(s) enforced by registration system.

Schedule Type: LEC  
Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0  
When Offered: Summer

BENG 380 - Introduction to Circuits and Electronics

Credits: 3  
Limited to 2 Attempts  
Offered by Bioengineering  
Builds on simple circuit concepts introduced in PHYS 260. Includes circuit analysis using superposition, equivalent circuits and transient analysis of RL, RC and RLC circuits; sinusoidal excitations, AC steady state analysis; frequency response; operational amplifiers; semiconductor devices such as diodes, field effect and bipolar transistors; and digital logic circuits. (Not intended for those majoring in electrical or computer engineering.)
Prerequisite(s): Grade of C or better in PHYS 260 and a grade of B- or better in MATH 214. Prerequisite(s) enforced by registration system.

Corequisite(s): BENG 320.

Schedule Type: LEC, RCT
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

BENG 381 - Circuits and Electronics Lab

Credits: 1
Limited to 2 Attempts
Offered by Bioengineering
Lab associated with BENG 380. Provides laboratory experience in basic electronics emphasizing issues and considerations that are paramount for biomedical instrumentation.

Prerequisite(s): Grade of C or better in PHYS 261. Prerequisite(s) enforced by registration system.

Corequisite(s): BENG 380

Notes: Not intended for those majoring in electrical or computer engineering.

Schedule Type: LAB
Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 3
When Offered: Fall, Spring

BENG 390 - Engineering Design and Fabrication

Credits: 3
Limited to 2 Attempts
Offered by Bioengineering
Project based course where students will design projects containing analog and digital components as well as mechanical parts. Students will simulate, build, and test their projects.

Equivalent to ECE 390.

Prerequisite(s): Grade of C or better in BENG 380, or in ECE 280, or in ECE 285. Prerequisite(s) enforced by registration system.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall
BENG 392 - Engineering Design Studio

Credits: 1  
Repeatable within Degree for Credit  
Offered by Bioengineering  
Identification and feasibility study of advance engineering problems. Application of path, physics and engineering methods to challenging projects. Preliminary design, modeling, simulation and prototyping of projects.

Equivalent to ECE 392.

Prerequisite(s): 75 hours of completed coursework applicable to EE, CpE, or BIOE degree and permission of instructor.  
Notes: This course should be taken preceding ECE/BENG 492.

Schedule Type: LEC  
Hours of Lecture or Seminar per week: 1  
Hours of Lab or Studio per week: 0  
When Offered: Fall, Summer, Spring

BENG 395 - RS: Mentored Research in Bioengineering

Credits: 1-3  
Repeatable within Degree for Credit  
Offered by Bioengineering  
Introduces the scientific research process through "hands on" experience: students are matched with faculty mentors who are actively involved in Bioengineering-related research. Requires no less than 60 hours per semester working with mentors.

Designated as a research and scholarship intensive course.

Prerequisite(s): At least 60 credit hours applicable to the Bioengineering program.  
Schedule Type: IND  
Hours of Lecture or Seminar per week: 1-3  
Hours of Lab or Studio per week: 0  
When Offered: Spring

BENG 406 - Introduction to Biomechanics

Credits: 3  
Limited to 2 Attempts  
Offered by Bioengineering  
This course introduces the fundamental principles of musculoskeletal biomechanics, computational simulation of movement, and OpenSim simulator. Topics include functions and models of the musculoskeletal structures, mathematical description of motion, kinetics, and simulation of movement using OpenSim.

Prerequisite(s): Grade of C or better in PHYS 160 (or PHYS 243), MATH 203, MATH 214, BENG 220 or SYST 220 or ECE 320, and BENG 313.  
Prerequisite(s) enforced by registration system.

Schedule Type: LEC  
Hours of Lecture or Seminar per week: 3
BENG 420 - Bioinformatics for Engineers

Credits: 3
Limited to 2 Attempts
Offered by Bioengineering
This course introduces the fundamental techniques and tools for analyzing biomedical data, important for many biomedical engineering problems. Topics include regression, classification, clustering, dimensionality reduction, data representation, pattern matching and algorithm performance evaluation. This innovative course will leverage hybrid learning through a combination of lectures, on-line content, and individual and group projects involving hands-on analysis.

Prerequisite(s): Grade C or better in BENG 320 or SYST 320 or ECE 320.
Prerequisite(s) enforced by registration system.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

BENG 441 - Nanotechnology in Health

Credits: 3
Limited to 2 Attempts
Offered by Bioengineering
Introduces fundamental principles of a wide range of nanoscale biomaterials and their applications in medicine and engineering.

Prerequisite(s): Grade of C or better in BIOL 213 and PHYS 160; Grade of C or better in CHEM 251 or CHEM 211.
Prerequisite(s) enforced by registration system.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring

BENG 451 - Translation and Entrepreneurship in Bioengineering

Credits: 3
Limited to 2 Attempts
Offered by Bioengineering

This course focuses on teaching the process of translational research and on creating both a medical device and a company vision. Emphasis is made on creating a robust medical device prototype based on a deep understanding of the disease. Regulatory and reimbursement processes are also addressed in detail. This course will draw upon lectures and different guest speakers.
**Prerequisite(s):** Grade of C or better in BIOL 213 and grade of C or better in either CHEM 251 or CHEM 211, or permission of instructor. Prerequisite(s) enforced by registration system.

**Schedule Type:** LEC  
**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall

---

**BENG 491 - Bioengineering Senior Seminar I**

Credits: 1  
Limited to 2 Attempts  
Offered by Bioengineering  
Covers the variety of responsibilities of bioengineers to society. Topics include ethics, regulation, research, industry, entrepreneurship, and cost issues. Professional approaches to job searching and effective technical communication will also be discussed. Speakers include faculty, invited guests from industry and government, as well as students.

Equivalent to ECE 491

**Prerequisite(s):** Senior standing.  
**Notes:** Students cannot receive credit for BENG 491 and ECE 491.

**Schedule Type:** SEM  
**Hours of Lecture or Seminar per week:** 1  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall

---

**BENG 492 - Senior Advanced Design Project I**

Credits: 2  
Limited to 2 Attempts  
Offered by Bioengineering  
Conception of senior design project in bioengineering and determination of feasibility of proposed project. Work includes developing preliminary design and implementation plan.

Fulfills Mason Core requirement in synthesis.

**Prerequisite(s):** 90 credit hours applicable to the Bioengineering Program, COMM 100. Prerequisite(s) enforced by registration system.

**Notes:** Students cannot receive credit for both BENG 492 and ECE 492.

**Schedule Type:** LEC  
**Hours of Lecture or Seminar per week:** 2  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall
BENG 493 - RS: Senior Advanced Design Project II

Credits: 2
Limited to 2 Attempts
Offered by Bioengineering
Project includes designing and constructing hardware, writing required software, conducting experiments or studies, and testing complete system. Requires oral and written reports during project and at completion.

Fulfills Mason Core requirement in synthesis.

Designated as a research and scholarship intensive course.

Prerequisite(s): BENG 492, preferably in the preceding semester.
Prerequisite(s) enforced by registration system.

Notes: Implementation of project for which preliminary work was done in BENG 492.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 0
When Offered: Spring

BENG 495 - Bioengineering Senior Seminar II

Credits: 1
Limited to 2 Attempts
Offered by Bioengineering
Covers a variety of responsibilities of bioengineers. Topics include dealing with biomedical ethics, regulatory requirements, global considerations, and health care costs. Speakers will include faculty as well as guests from industry, government, and academia. Students are required to explore and then present some material themselves.

Fulfills writing intensive requirement in the major.

Prerequisite(s): 90 credit hours applicable to the Bioengineering Program, COMM 100.
Prerequisite(s) enforced by registration system.

Schedule Type: SEM
Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0
When Offered: Spring

BENG 499 - Special Topics in Bioengineering

Credits: 0-4
Repeatable within Term for Credit
Offered by Bioengineering
Topics of special interest to undergraduates.
BENG 501 - Bioengineering Research Methods

Credits: 3
Not Repeatable for Credit
Offered by Bioengineering
Examines approaches for scientific research with emphasis on bioengineering. Topics include biophysical origins of bioengineering measures, tools and technology for bioengineering data collection, basic principles of experimental design and statistical analyses, and interpretation of scientific results. Special attention will be given to ethical issues associated with the collection, use, and dissemination of data.

Prerequisite(s): Graduate Standing.

Schedule Type: LEC

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

BENG 525 - Neural Engineering

Credits: 3
Not Repeatable for Credit
Offered by Bioengineering
Provides an overview of topics in Neural Engineering. Topics covered range from sensory and motor prosthetic devices, stimulation of biological tissue, bioelectrodes and characterization techniques, brain-machine interfaces, and engineered devices to ameliorate neurodisorders.

Prerequisite(s): Graduate Standing or permission of instructor; background in Electrical or Computer Engineering disciplines required.

Schedule Type: LEC

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring

BENG 538 - Medical Imaging

Credits: 3
Not Repeatable for Credit
Offered by Bioengineering
Introduction to the physical, mathematical and engineering foundations of modern medical imaging systems, medical image
processing and analysis methods. Introduces engineering students to clinical applications of medical imaging. Emphasis on diagnostic ultrasound and magnetic resonance imaging methods; several other modalities are also covered. Provides overview of recent developments and future trends in the field of medical imaging, discusses some of the challenges and controversies, and involves hands-on experience applying the methods learnt in class to real-world problems.

Equivalent to ECE 538

Prerequisite(s): Graduate Standing or permission of instructor; ECE 320 or equivalent; PHYS 262 or equivalent.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

BENG 541 - Biomaterials

Credits: 3
Not Repeatable for Credit
Offered by Bioengineering
Covers the principles of biomaterials and biological interactions with materials, including an overview of biomaterials characterization, design and testing. Specific topics include the use of polymers, ceramics and metallics in biomaterials, drug delivery applications, tissue engineering from an orthopedic and vascular perspective, biocompatibility, acute and chronic biological response to implanted material, and in vitro and in vivo testing of biomaterials.

Prerequisite(s): BIOL 213 (or equivalent), CHEM 251 (or equivalent).
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

BENG 550 - Advanced Biomechanics

Credits: 3
Not Repeatable for Credit
Offered by Bioengineering
Introduces the fundamental concepts of musculoskeletal biomechanics, and how to apply mechanical principles to quantitatively describe and analyze movement. Topics include properties, functions, and models of the musculoskeletal structures, 3D kinematics, locomotion, and instrumentation systems applied in musculoskeletal biomechanics and movement analysis.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

BENG 551 - Translational Bioengineering

Credits: 3
Not Repeatable for Credit
Offered by Bioengineering
Demonstrates the process for the creation of both medical device prototypes and medical device companies. Focuses on designing and building a robust medical device prototype and writing a business plan. Also addresses cost of healthcare, reimbursement, regulatory processes, intellectual property, and marketing and sales aspects. Course will feature lectures, videos, and guest speakers who are successful medical device entrepreneurs.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

BENG 590 - Selected Topics in Bioengineering

Credits: 3
Repeatable within Degree for Credit
Offered by Bioengineering
Addresses selected topics from recent developments in various Bioengineering disciplines. Content may vary each semester depending on instructor and students' interests.

Prerequisite(s): Graduate standing or permission of department.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring.

BENG 636 - Advanced Biomedical Signal Processing

Credits: 3
Not Repeatable for Credit
Offered by Bioengineering
Provides an overview of advanced topics in biomedical signal processing with an emphasis on practical applications. Topics include introduction to physiological origins of biomedical signals, stochastic and adaptive signal processing, spectral estimation, signal modeling and analysis of nonstationary signals.

Prerequisite(s): Graduate Standing; ECE 535 or equivalent; ECE 528 or equivalent.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring

BENG 641 - Advanced Nanotechnology in Health

Credits: 3
Not Repeatable for Credit
Offered by Bioengineering
Presents interdisciplinary scientific and engineering approaches to solve relevant medical problems. Contents include polymer structure, composition, and material properties, natural and synthetic polymers, and their application to design novel nanocarriers
for controlled drug release, scaffolds for tissue engineering, and new vectors for vaccines. The relevance of nanotechnology to advance treatments for cancer, infectious and neurodegenerative diseases are discussed in depth.

**Prerequisite(s):** BENG 541, or permission of instructor.
**Schedule Type:** LEC
**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0
**When Offered:** Spring

---

**BENG 699 - Advanced Topics in Bioengineering**

Credits: 3  
Repeatable within Degree for Credit  
Offered by Bioengineering

Advanced topics of current interest in bioengineering. Topics chosen so they do not duplicate other courses in department. Active participation encouraged in form of writing and presenting papers in research areas.

**Prerequisite(s):** Permission of instructor.
**Schedule Type:** LEC
**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0
**When Offered:** Fall, Spring.

---

**BENG 725 - Computational Motor Control**

Credits: 3  
Not Repeatable for Credit  
Offered by Bioengineering

Uses approaches from robotics, control theory, and neuroscience to understand biological motor systems. Contents include modeling muscles, reflexes and neural systems to understand how the central nervous system plans and controls movement of the eyes and limbs. The theoretical control problem is compared to known neuronal properties of the motor system and diseases of the motor system affecting movement control.

**Schedule Type:** LEC
**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0
**When Offered:** Fall

---

**BENG 738 - Advanced Medical Image Processing**

Credits: 3  
Not Repeatable for Credit  
Offered by Bioengineering

Advanced Medical Image Processing covers advanced processing techniques used in modern medical imaging. The course aims at developing an understanding of the mathematical background, principles and application of techniques such as segmentation, registration, morphometry, general linear modeling, principal and independent component analysis.
BENG 745 - Biomedical Systems and Microdevices

Credits: 3
Not Repeatable for Credit
Offered by Bioengineering
Bio-micro-electro-mechanical systems (BioMEMS) provide a robust approach to mimic in vivo microenvironments within controlled in vitro settings. This course introduces students to the highly interdisciplinary field of Lab-on-a-Chip technologies with emphasis on its advanced applications in biological and biomedical engineering. In addition to the microfabrication processes, a variety of analytical techniques routinely used in biomedical research will also be covered.

BENG 750 - Modeling and Simulation of Human Movement

Credits: 3
Not Repeatable for Credit
Offered by Bioengineering
Introduces the development and simulation of data-driven 3D neuro-musculoskeletal models to quantitatively study human movement in health and disease. Topics include reconstructing 3D models from imaging data, estimating kinematics from motion data, simulating movement incorporating multimodality data, and analyzing muscle and joint forces. Students use computational biomechanics software. The course consists of lectures, article presentations, modeling assignments and a project.

BENG 798 - Independent Reading and Research in Bioengineering

Credits: 1-6
Repeatable within Degree for Credit
Offered by Bioengineering
Independent study in Bioengineering under the supervision of a faculty member, resulting in an acceptable technical report or presentation. This course may be repeated once for a total of 12 credit hours towards a graduate degree in Bioengineering.

Prerequisite(s): Graduate standing, and permission of instructor.
BENG 800 - Bioengineering Colloquium

Credits: 0
Repeatable within Degree for Credit
Offered by Bioengineering

Students are required to attend colloquia including talks by distinguished speakers, faculty candidates, and Mason faculty.

Prerequisite(s): Admission to PhD Bioengineering program.
Notes: May be repeated as needed. Required attendance and participation in a minimum of 3 seminars per semester.

Schedule Type: SEM
Hours of Lecture or Seminar per week: 3-12
Hours of Lab or Studio per week: 0
Grading: Satisfactory/No Credit
When Offered: Fall, Summer, Spring

BENG 820 - Seminar in Neuroengineering

Credits: 3
Repeatable within Degree for Credit
Offered by Bioengineering

Selective analysis and discussion of topics in neuroengineering in areas of current research interest. Topics may include brain machine interfaces, advanced materials for implantable devices, computational neuroscience, neuronal biosensors and assays, and neuroprosthetics.

Prerequisite(s): Admission to PhD Bioengineering program or permission of instructor.
Schedule Type: SEM
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Summer, Spring

BENG 830 - Seminar in Biomedical Imaging

Credits: 3
Repeatable within Degree for Credit
Offered by Bioengineering

Selective analysis and discussion of topics in biomedical imaging in areas of current research interest. Topics may include techniques and analyses for ultrasound, magnetic resonance imaging (MRI), functional MRI, nuclear imaging, computer assisted tomography, positron emission tomography, and emergent approaches to imaging for health and disease.

Prerequisite(s): Admission to PhD Bioengineering program or permission of instructor.
Schedule Type: SEM
BENG 840 - Seminar in Nano-scale Bioengineering

Credits: 3  
Repeatable within Degree for Credit  
Offered by Bioengineering  
Selective analysis and discussion of topics in nano-scale bioengineering in areas of current research interest. Topics may include nanoengineered materials, nanoscale devices and systems, and novel nano-scale fabrication and modeling approaches with application to biomedicine.

Prerequisite(s): Admission to PhD Bioengineering program or permission of instructor.  
Schedule Type: SEM  
Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0  
When Offered: Fall, Summer, Spring

BENG 850 - Seminar in Biomechanics

Credits: 3  
Repeatable within Degree for Credit  
Offered by Bioengineering  
Selective analysis and discussion of topics in biomechanics in areas of current research interest. Topics may include computational and physiological modeling for biomechanics, multiscale representation of biomechanical systems, data fusion techniques for biomechanics, and application of quantitative biomechanics for diagnostics or medical intervention.

Prerequisite(s): Admission to PhD Bioengineering program or permission of instructor.  
Schedule Type: SEM  
Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0  
When Offered: Fall, Summer, Spring

BENG 998 - Doctoral Dissertation Proposal

Credits: 1-12  
Repeatable within Degree for Credit  
Offered by Bioengineering  
Work on research proposal that forms basis for doctoral dissertation.

Notes: May be repeated as needed. No more than 24 credits of BENG 998 and 999 may be applied to doctoral degree requirements.

Schedule Type: IND  
Grading: Graduate Special.  
When Offered: Fall, Summer, Spring
BENG 999 - Doctoral Dissertation

Credits: 1-12
Repeatable within Degree for Credit
Offered by Bioengineering
Formal record of commitment to doctoral dissertation research under direction of faculty member in bioengineering.

Prerequisite(s): Admission to candidacy.
Notes: May be repeated as needed. Once enrolled in 999, students must maintain continuous registration in 999 each semester until graduation, excluding summers. Students who defend in the summer must be registered for at least 1 credit of 999 in the summer

Schedule Type: IND
Grading: Graduate Special.
When Offered: Fall, Summer, Spring

Bioinformatics (BINF)

Offered by the College of Science

BINF 334 - Perl for Bioinformatics

Credits: 3
Not Repeatable for Credit
Offered by School of Systems Biology
Introduction into Perl programming language. Topics include data representation, control structures, file input/output, subroutines, regular expressions, debugging, relational databases. Emphasizes bioinformatics applications including DNA sequence analysis, parsing FASTA and GenBank files, processing BLAST output files, SQL or equivalent query language.

Prerequisite(s): Knowledge of programming language or CS 112 or equivalent.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

BINF 354 - Foundations in Mathematical Biology

Credits: 3
Not Repeatable for Credit
Offered by School of Systems Biology
Interdisciplinary introduction to life sciences for physicists, chemists, engineers, and mathematicians. Combines knowledge from natural sciences, social and behavioral sciences, quantitative reasoning, and information technology. Covers selected topics in ecology, physiology, biochemistry, and behavior. May include biochemical reaction kinetics, Hodgkin-Huxley model for cellular electrical activity, continuous and discrete population interactions, and neural network models of learning. Techniques utilized include ordinary differential equations, difference equations, algebraic equations, and computer simulations.
Fulfills Mason Core requirement in synthesis.

**Prerequisite(s):** Completion or concurrent enrollment in all other required Mason Core courses (must include a chemistry course); MATH 114 or equivalent.

**Schedule Type:** LEC

**Hours of Lecture or Seminar per week:** 3

**Hours of Lab or Studio per week:** 0

**BINF 401 - Bioinformatics and Computational Biology I**

Credits: 3
Not Repeatable for Credit
Offered by School of Systems Biology

Covers the following topics and related methodology: protein sequence, structure prediction, and modeling methods; nucleic acid sequence and structure prediction; gene structure prediction in prokaryotes and eukaryotes; elements of system biology. Students will learn programming approaches to solve bioinformatics problems.

**Prerequisite(s):** BIOL 213, STAT 344, and both IT 102 and IT 106, or CS 112, or CDS 130.

**Schedule Type:** LEC

**Hours of Lecture or Seminar per week:** 3

**Hours of Lab or Studio per week:** 0

**BINF 402 - Bioinformatics and Computational Biology II**

Credits: 3
Not Repeatable for Credit
Offered by School of Systems Biology

Continuation of BINF401 and studies in-depth several algorithms and methods used in bioinformatics and computational biology. Students will learn sequence alignment and assembly algorithms, hidden Markov models, classification and prediction methods, genome annotation. These techniques will then be applied to current bioinformatics problems. Programming assignments are incorporated in the course program.

**Prerequisite(s):** BINF 401.

**Schedule Type:** LEC

**Hours of Lecture or Seminar per week:** 3

**Hours of Lab or Studio per week:** 0

**BINF 403 - Bioinformatics and Computational Biology Lab I**

Credits: 1
Not Repeatable for Credit
Offered by School of Systems Biology

Laboratories will introduce students to bioinformatics tools designed to answer research problems in the topics covered in
lectures, such as sequence alignment, sequence pattern recognition, structural conformation modeling, phylogenetic analysis methods and image comparisons.

Corequisite(s): BINF 401.

Schedule Type: LAB  
Hours of Lecture or Seminar per week: 1-6  
Hours of Lab or Studio per week: 3

**BINF 404 - Bioinformatics and Computational Biology Lab II**

Credits: 1  
Not Repeatable for Credit  
Offered by School of Systems Biology  
Laboratories will introduce students to research bioinformatics tools relevant to lecture topics such as: the correspondence of measured fragments to parent biomolecules, inference methods for gene and protein networks, predicting system outputs given specified inputs.

Corequisite(s): BINF 402

Schedule Type: LAB  
Hours of Lecture or Seminar per week: 1-3  
Hours of Lab or Studio per week: 3

**BINF 450 - Bioinformatics for Life Sciences**

Credits: 4  
Not Repeatable for Credit  
Offered by School of Systems Biology  
Teaches students how to understand the basis of and use of bioinformatics software in database searching, sequence analysis, gene identification, genomics, protein structure and phylogeny.

Prerequisite(s): BIOL 213 and either BIOL 482 or BIOL 483/CHEM 463  
Schedule Type: LEC  
Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 3

**BINF 470 - Molecular Biophysics**

Credits: 3  
Not Repeatable for Credit  
Offered by School of Systems Biology  
Offers a broad introduction into molecular biophysics. Demonstrates that the application of methods of physics provides a unique opportunity to tackle complex biological problems. Designed for physics or chemistry majors; also useful for biology majors interested in bioinformatics and computational biology.

Equivalent to PHYS 370
BINF 490 - Independent Senior Research in Bioinformatics and Computational Biology

Credits: 3
Not Repeatable for Credit
Offered by School of Systems Biology
Course offers individual research in bioinformatics and computational biology under the guidance of faculty member. Written report required upon course completion.

Prerequisite(s): Permission of instructor.
Schedule Type: IND
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring, Summer

BINF 491 - Senior Thesis in Bioinformatics

Credits: 1
Not Repeatable for Credit
Offered by School of Systems Biology
A project is chosen and completed under the guidance of a Bioinformatics Department faculty member.

Corequisite(s): BINF 401.
Notes: An oral progress report with a poster at the fall semester Bioinformatics Student Research Day is required.

Schedule Type: LAB,
RCT
Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 3

BINF 492 - Senior Thesis in Bioinformatics

Credits: 1
Not Repeatable for Credit
Offered by School of Systems Biology
A project is chosen and completed under the guidance of a Bioinformatics Department faculty member.

Corequisite(s): BINF 402.
Notes: A written thesis in standard format is required.
BINF 530 - Introduction to Bioinformatics Methods

Credits: 3
Not Repeatable for Credit
Offered by School of Systems Biology
Introduction to methods and tools for pairwise sequence comparison, multiple sequence alignment, phylogenetic analysis, protein structure prediction and comparison, database similarity searches, and discovery of conserved patterns in protein sequence and structures.
Equivalent to BINF 360

BINF 531 - Molecular Cell Biology for Bioinformatics

Credits: 3
Not Repeatable for Credit
Offered by School of Systems Biology
Intensive review of biochemistry, molecular biology, and cell biology necessary OT begin research in bioinformatics. Topics include protein biochemistry, nucleic acids biochemistry, DNA replication transcription, and translation, recombinant DNA technology, genomics, molecular structure of genes and chromosomes, and expression and control.
Equivalent to BINF 631
Prerequisite(s): Undergraduate 300 and 400 level courses in biochemistry or cell biology, or permission of instructor.

BINF 550 - Introduction to Bioinformatics Database Design

Credits: 3
Not Repeatable for Credit
Offered by School of Systems Biology
Students will acquire skills needed to exploit public biological databases, and establish and maintain personal databases that support their own research. Skills include learning underlying data models and the basics of DBMS and SQL.
Equivalent to BINF 650
Prerequisite(s): Introductory computer programming course, or permission of the instructor.

Schedule Type: LEC

Hours of Lecture or Seminar per week: 3

Hours of Lab or Studio per week: 0

When Offered: Fall

BINF 630 - Bioinformatics Methods

Credits: 3
Not Repeatable for Credit
Offered by School of Systems Biology

Introduction to methods and tools for pairwise sequence comparison, multiple sequence alignment, phylogenetic analysis, protein structure prediction and comparison, database similarity searches, and discovery of conserved patterns in protein sequence and structures.

Prerequisite(s): Graduate standing, or permission of instructor.

Schedule Type: LEC

Hours of Lecture or Seminar per week: 3

Hours of Lab or Studio per week: 0

BINF 631 - Molecular Cell Biology for Bioinformatics

Credits: 3
Not Repeatable for Credit
Offered by School of Systems Biology

Intensive review of biochemistry, molecular biology, and cell biology necessary to begin research in bioinformatics. Topics include protein biochemistry, nucleic acids biochemistry, DNA replication, transcription, and translation, recombinant DNA technology, genomics, molecular structure of genes and chromosomes, and gene expression and control.

Prerequisite(s): Undergraduate background in biochemistry or cell biology, or permission of instructor.

Schedule Type: LEC

Hours of Lecture or Seminar per week: 3

Hours of Lab or Studio per week: 0

BINF 633 - Molecular Biotechnology

Credits: 3
Not Repeatable for Credit
Offered by School of Systems Biology

Introduction to the theory and practice of molecular biotechnology, with emphasis on the application of tools in today's society. Includes study of recombinant DNA technology, genomics, and bioinformatics as applied to commercially important products. Lectures reflect more recent advances and applications in the commercial aspects of biology.

Prerequisite(s): Graduate standing or permission of instructor.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**BINF 634 - Bioinformatics Programming**

Credits: 3
Not Repeatable for Credit
Offered by School of Systems Biology
Data representation, control structures, file input/output, subroutines, regular expressions, debugging, introduction to relational databases. Emphasizes bioinformatics applications including DNA sequence analysis, parsing FASTA and GenBank files, processing BLAST output files, SQL, or equivalent query language.

Prerequisite(s): Graduate standing and computer programming experience, or permission of instructor.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**BINF 636 - Microarray Methodology and Analysis**

Credits: 3
Not Repeatable for Credit
Offered by School of Systems Biology
Theory and practice of genome analysis including genetics, biochemistry, and tools for analyzing global gene expression, and detection and quantification of genes and gene products.

Prerequisite(s): BINF 633, or permission of instructor.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**BINF 637 - Forensic DNA Sciences**

Credits: 3
Not Repeatable for Credit
Offered by School of Systems Biology
Intensive introduction to parameters affecting data QC and analysis, including factors arising from biochemistry, chemistry, genetics, statistics, instrumentation, and software.

Equivalent to FRSC 560

Prerequisite(s): Graduate standing or permission of instructor
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
**BINF 639 - Introduction to Biometrics**

Credits: 3  
Not Repeatable for Credit  
Offered by School of Systems Biology  
Introduction to methods for measuring humans. Topics include face, speaker, fingerprint, and shoeprint recognition; and handwriting analysis. Students develop computer programs to perform many of these tasks.

Prerequisite(s): CSI 603 and 604 or permission of instructor.  
Schedule Type: LEC  
Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0

**BINF 641 - Biomolecular Modeling**

Credits: 3  
Not Repeatable for Credit  
Offered by School of Systems Biology  
Introduction to basic principles and practice of computational biomolecular modeling. Students learn the elements of physical chemistry and molecular biology, which constitute the foundation of molecular modeling. Practical application of biomolecular software and development of related skills are emphasized through online lectures, homework, and course project.

Prerequisite(s): Students are expected to be familiar with none basic concepts of physics, calculus, and biology on undergraduate level. Access to PC with internet connection is required.  
Schedule Type: LEC  
Hours of Lecture or Seminar per week: 3  
When Offered: Fall, Summer, Spring

**BINF 650 - Introduction to Bioinformatics Database Design**

Credits: 3  
Not Repeatable for Credit  
Offered by School of Systems Biology  
Students will acquire skills needed to exploit public biological databases and establish and maintain personal databases that support their own research; such skills include learning underlying data models and the basics of DBMS and SQL.

Prerequisite(s): BINF 634 or equivalent, or permission of the instructor.  
Schedule Type: LEC  
Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0

**BINF 690 - Numerical Methods for Bioinformatics**

Credits: 3  
Not Repeatable for Credit  
Offered by School of Systems Biology
Computational techniques for solving scientific problems focusing on applications in bioinformatics and computational biology. Students develop the ability to convert a quantitative problem into computer programs to solve the problem. Emphasizes efficiency and readability of code.

Prerequisite(s): CS 112, MATH 113 or permission of instructor.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**BINF 701 - Systems Biology**

Credits: 3
Not Repeatable for Credit
Offered by School of Systems Biology
Systems biology seeks to understand how a complex biological system functions. This involves the use of computational methods and models to integrate information obtained about these systems through a wide range of methods that span multiple spatial and temporal scales. Current research examples will be used to motivate and demonstrate these approaches.

Equivalent to BIOS 701

Prerequisite(s): Admission to PhD program in biosciences or bioinformatics, CHEM 663, or equivalent.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**BINF 702 - Biological Data Analysis**

Credits: 3
Not Repeatable for Credit
Offered by School of Systems Biology
Trains students in research methodologies for life sciences. Covers the three phases of biological research projects: experimental design, data collection and data analysis.

Equivalent to BIOS 702

Prerequisite(s): Admission to PhD program in bioinformatics or biosciences or permission of instructor.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**BINF 703 - Bioinformatics Lab Rotation**

Credits: 1
Repeatable within Term for Credit
Offered by School of Systems Biology
Short-term introductory research on a specific topic in computational sciences and informatics under direction of faculty member.
**Prerequisite(s):** Permission of instructor.
**Notes:** May be repeated.

**Schedule Type:** LAB  
**Hours of Lecture or Seminar per week:** 1-3  
**Hours of Lab or Studio per week:** 1  
**Grading:** Graduate Special

**BINF 704 - Colloquium in Bioinformatics**

Credits: 1  
Repeatable within Degree for Credit  
Offered by School of Systems Biology  
Seminar presentations in a variety of areas of bioinformatics and computational biology by COS faculty, staff, advanced PhD students, and professional visitors.

**Prerequisite(s):** Graduate standing.  
**Notes:** May be repeated for credit.

**Schedule Type:** LEC  
**Hours of Lecture or Seminar per week:** 1  
**Hours of Lab or Studio per week:** 0

**BINF 705 - Research Ethics**

Credits: 1  
Not Repeatable for Credit  
Offered by School of Systems Biology  
Examines ethical issues in scientific research, reflecting on purpose and reviewing foundational principles for evaluating ethical issues. Provides skills for survival in scientific research through training in moral reasoning and teaching of responsible conduct. Students learn to apply critical-thinking skills to design, execution, and analysis of experiments and analysis of ethical issues in research, including use of animals and humans, standards in computer community, and research fraud. Guidelines for data ownership, manuscript preparation, and conduct of people in authority may be presented and discussed.

**Prerequisite(s):** Permission of instructor.  
**Schedule Type:** LEC  
**Hours of Lecture or Seminar per week:** 1  
**Hours of Lab or Studio per week:** 0

**BINF 730 - Biological Sequence and Genome Analysis**

Credits: 3  
Not Repeatable for Credit  
Offered by School of Systems Biology  
Fundamental methods for analyzing nucleic acid and protein sequences, including pairwise and multiple alignment, database search methods, profile searches, and phylogenetic inference. Development of probabilistic tools, including hidden Markov models and optimization algorithms. Survey of current software tools.
**BINF 731 - Protein Structure Analysis**

Credits: 3  
Not Repeatable for Credit  
Offered by School of Systems Biology  
Computational methods for analyzing, classifying, and predicting three-dimensional protein structures. Covers theoretical approaches, techniques, and computational tools for protein structure analysis.

**Prerequisite(s):** Permission of instructor, or previous courses in molecular biology, biochemistry, and computer programming.

**Schedule Type:** LEC  
**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**BINF 732 - Genomics**

Credits: 3  
Not Repeatable for Credit  
Offered by School of Systems Biology  
Surveys computational tools and techniques to study whole genomes, and explores biological basis of genome analysis algorithms. Topics include genome mapping, comparative genomics, and functional genomics.

Equivalent to CSI 732

**Prerequisite(s):** General biology programming experience CSI 700 or equivalent CSI 731 or permission of instructor.

**Schedule Type:** LEC  
**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**BINF 733 - Gene Expression Analysis**

Credits: 3  
Not Repeatable for Credit  
Offered by School of Systems Biology  
Analyzes gene expression data. Topics include cluster analysis and visualization of expression data, inference of genetic regulatory networks, and theoretical models of genetic networks.

**Prerequisite(s):** Permission of instructor; ability to program in a high-level language and a course in molecular biology: S-Plus or Matlab experience recommended.

**Schedule Type:** LEC
BINF 734 - Advanced Bioinformatics Programming

Credits: 3
Not Repeatable for Credit
Offered by School of Systems Biology
Topics include algorithm design, complex data structures, object oriented programming, relational databases, designing modules, and graphics and web programming. Students complete a bioinformatics programming project.

Prerequisite(s): BINF 634, or permission of instructor.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

BINF 739 - Topics in Bioinformatics

Credits: 1-3
Repeatable within Term for Credit
Offered by School of Systems Biology
Selected topics in bioinformatics not covered in fixed-content bioinformatics courses.

Prerequisite(s): Permission of instructor.
Notes: May be repeated for credit.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

BINF 740 - Introduction to Biophysics

Credits: 3
Not Repeatable for Credit
Offered by School of Systems Biology
Introduces biophysics, focusing on physical and chemical concepts and their relation to rapidly expanding interdisciplinary interfaces among biology, chemistry, and physics. Reveals multiscale nature of biophysics, and includes exploration of macroscopic and microscopic applications.

Equivalent to PHYS 630

Prerequisite(s): Undergraduate courses in general physics, calculus, and biology.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
BINF 741 - Introduction to Computer Simulations of Biomolecules

Credits: 3  
Not Repeatable for Credit  
Offered by School of Systems Biology  
Details computational methods in biomolecular simulations, such as molecular dynamics and Monte Carlo algorithms. Special emphasis given to practical applications. Reviews most recent advances in biomolecular simulations.

Prerequisite(s): Graduate standing and good programming skills BINF 690 and 701 or permission of instructor.  
Schedule Type: LEC  
Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0

BINF 751 - Biochemical and Cellular Systems Modeling

Credits: 3  
Not Repeatable for Credit  
Offered by School of Systems Biology  
Mathematical and computational methods for analysis of cellular and subcellular processes. Topics may include ion channels, whole cell models, intracellular signaling, biochemical oscillations, pathway modeling, parameter estimation, and sensitivity analysis.

Prerequisite(s): Calculus and knowledge of a computer programming language; and BINF 690 and 701; or permission of instructor.  
Notes: Course in differential equations is recommended.  
Schedule Type: LEC  
Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0

BINF 760 - Machine Learning for Bioinformatics

Credits: 3  
Not Repeatable for Credit  
Offered by School of Systems Biology  
Machine learning and data mining methods relevant to application to problems in computational biology. Methods include decision trees, random forests, rule learning methods, support vector machines, neural networks, genetic algorithms, instance-based learning, Bayesian networks, and evaluation metrics for learning systems. Applications include cancer prediction, gene finding, protein function classification, gene regulation network inference, and other recent bioinformatics applications selected from the literature.

Prerequisite(s): BINF 630, BINF 631, and BINF 634 or permission of instructor.  
Notes: In addition to lectures from the instructor, students will present papers from the literature and complete a machine learning project.  
Schedule Type: LEC  
Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0
**BINF 795 - Bioinformatics Internship**

Credits: 1-3  
Repeatable within Degree for Credit  
Offered by School of Systems Biology.  
Involves off-campus, professional work with approved agencies, institutions, non-profits, or businesses throughout the semester.  
The internship work must produce one or more products such as; a comprehensive report, a departmental presentation, a research project, or an article. Internship placement and product type must be approved by the student's faculty advisor.

**Prerequisite(s):** Internship placement and parameters must be approved by the faculty advisor prior to registration.  
**Schedule Type:** INT  
**When Offered:** Fall, Spring, Summer

---

**BINF 796 - Directed Reading and Research**

Credits: 1-6  
Repeatable within Degree for Credit  
Offered by School of Systems Biology  
Reading and research on specific topic in computational sciences and informatics under direction of faculty member.

**Prerequisite(s):** Permission of instructor.  
**Notes:** May be repeated

**Schedule Type:** IND  
**Hours of Lecture or Seminar per week:** 1-3  
**Hours of Lab or Studio per week:** 0

---

**BINF 798 - Research Project**

Credits: 3  
Not Repeatable for Credit  
Offered by School of Systems Biology  
Project chosen and completed under guidance of graduate faculty member that results in acceptable technical report.

**Prerequisite(s):** 12 graduate credits and permission of instructor.  
**Schedule Type:** IND  
**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**Grading:** Graduate Special

---

**BINF 799 - Master's Thesis**

Credits: 1-6  
Repeatable within Degree for Credit
Offered by School of Systems Biology
Project chosen and completed under guidance of graduate faculty member that results in acceptable technical report (master's thesis) and oral defense.

Prerequisite(s): 12 graduate credits and permission of instructor.
Schedule Type: IND
Hours of Lecture or Seminar per week: 2-3
Hours of Lab or Studio per week: 0
Grading: S/IP

BINF 820 - Advanced Topics in Molecular Cell Biology

Credits: 3
Not Repeatable for Credit
Offered by School of Systems Biology
Topics may include cell structure, biomembranes and cell architecture, cell signaling, receptor activation, gene expression and control, protein targeting and trafficking, and cell cycle regulation.

Prerequisite(s): BINF 631 or equivalent.
Notes: Advanced molecular and cellular biology foundation for BINF students.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

BINF 831 - Structural Genomics Project

Credits: 3
Not Repeatable for Credit
Offered by School of Systems Biology
Covers knowledge-based, large-scale protein structure analysis; classification and prediction of protein structure and function; and other current research topics in structural genomics. Projects address entire research enterprise from developing and defending proposal to peer-reviewed publication.

Prerequisite(s): BINF 731, or permission of instructor.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

BINF 841 - Research Topics in Biomolecular Simulations

Credits: 3
Not Repeatable for Credit
Offered by School of Systems Biology
Research-oriented course combining lectures and work on individual projects in biomolecular simulations. Topics include protein and peptide aggregation, binding, and unfolding and folding.
Prerequisite(s): BINF 741, or permission of instructor.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

BINF 996 - Doctoral Reading and Research

Credits: 1-6
Repeatable within Degree for Credit
Offered by School of Systems Biology
Reading and research on specific topic in computational sciences and informatics under direction of faculty member.

Prerequisite(s): Admission to doctoral program and permission of instructor.
Notes: May be repeated.

Schedule Type: IND
Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 0

BINF 998 - Doctoral Dissertation Proposal

Credits: 1-12
Repeatable within Degree for Credit
Offered by School of Systems Biology
Covers development of research proposal, which forms basis for doctoral dissertation, under guidance of dissertation director and doctoral committee.

Prerequisite(s): Permission of advisor.
Notes: May be repeated.

Schedule Type: IND
Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0
Grading: Satisfactory/No Credit

BINF 999 - Doctoral Dissertation

Credits: 1-12
Repeatable within Degree for Credit
Offered by School of Systems Biology
Doctoral dissertation research under direction of dissertation director.

Prerequisite(s): Admission to doctoral candidacy.
Notes: May be repeated, but no more than 24 credits in BINF 998 and 999 may be applied to doctoral degree requirements.

Schedule Type: IND
Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0  
Grading: S/IP

Biology (BIOL)

Offered by the College of Science

See EVPP, Environmental Science and Public Policy, for additional related course work.

BIOL 103 - Introductory Biology I

Credits: 4  
Not Repeatable for Credit  
Offered by Biology  
Topics include chemistry of life, cell structure and function, Mendelian genetics, evolution, and diversity of life.

Fulfills Mason Core requirement in natural science (lab).

Notes: Survey course suitable for any major. May not be taken after BIOL 200-level or above courses have been taken.

Schedule Type: LAB, LEC  
Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 3  
When Offered: Fall, Spring, Summer

BIOL 104 - Introductory Biology II

Credits: 4  
Not Repeatable for Credit  
Offered by Biology  
Topics include animal (including human) structure, function, homeostatic mechanisms, organ systems, behavior, higher plant systems, and major concepts in ecology.

Fulfills Mason Core requirement in natural science (lab).

Notes: Students are strongly urged to take BIOL 103 prior to BIOL 104. Survey course suitable for any major. May not be taken after BIOL 200-level or above courses have been taken.

Schedule Type: LAB, LEC  
Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 3  
When Offered: Fall, Spring, Summer
BIOL 105 - Introductory Biology I Laboratory

Credits: 1
Not Repeatable for Credit
Offered by Biology
The chemical basis of life, the structure and function of the cell, Mendelian and human genetics, and the major animal phyla are presented.

Prerequisite(s): Permission of BIOL 103/104 coordinator and department chair.
Notes: Not available to students who have taken BIOL 103 or the equivalent.

Schedule Type: IND
Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 3

BIOL 106 - Introductory Biology II Laboratory

Credits: 1
Not Repeatable for Credit
Offered by Biology
The structure and function of major organ systems of animals and an examination of the structure and function of plants, emphasizing the higher plants.

Prerequisite(s): Permission of BIOL 103/104 coordinator and department chair.
Notes: Not available to students who have taken BIOL 104 or the equivalent.

Schedule Type: LAB
Hours of Lecture or Seminar per week: 1-12
Hours of Lab or Studio per week: 3

BIOL 124 - Human Anatomy and Physiology

Credits: 4
Not Repeatable for Credit
Offered by Biology
Introduction to structure and function of body's major organ systems.

Notes: Should be taken in sequence. Does not satisfy natural science requirement in COS or CHSS. Not available for Biology major credit.

Schedule Type: LAB, LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 3
When Offered: Fall, Summer

BIOL 125 - Human Anatomy and Physiology
Credits: 4
Not Repeatable for Credit
Offered by Biology
Introduction to structure and function of body's major organ systems.

Prerequisite(s): BIOL 124.
Notes: Does not satisfy the natural science requirement for the BA in COS or CHSS. Not available for Biology major credit.

Schedule Type: LAB, LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 3
When Offered: Spring, Summer

BIOL 140 - Plants and People

Credits: 3
Not Repeatable for Credit
Offered by Biology

An introduction to the interaction of plants and people from a biological perspective and the tools to continue life-long critical evaluation of emerging issues in human nutrition, agriculture, medicine, and global environmental change as they relate to plant biology. Designated a Green Leaf Course.

Fulfills Mason Core requirement in natural science (nonlab).

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3

When Offered: Spring

BIOL 213 - Cell Structure and Function

Credits: 4
Not Repeatable for Credit
Offered by Biology
For science majors and preprofessionals in life sciences. Introduction to cell chemistry, metabolism, and genetics.

Fulfills Mason Core requirement in natural science (lab).

Corequisite(s): CHEM 211

Schedule Type: LAB, LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 3
When Offered: Fall, Spring, Summer
BIOL 214 - Biostatistics for Biology Majors

Credits: 4  
Not Repeatable for Credit  
Offered by Biology  
An introduction to statistics used in the life sciences.

Corequisite(s): BIOL 213

Schedule Type: LEC, RCT  
Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 1  
When Offered: Fall, Spring, Summer

BIOL 246 - Introductory Microbiology

Credits: 3  
Not Repeatable for Credit  
Offered by Biology  
Introduction to microbial cell structure, physiology, and pathogenicity. Emphasizes control of microorganisms, host-parasite interactions including immunology, and viral and bacterial pathogens.

Prerequisite(s): C or better in BIOL 124 and 125, one year of general biology, or permission of instructor.  
Corequisite(s): BIOL 306.

Notes: Not available for biology major credit. Not available to students who have taken BIOL 213 or 418.

Schedule Type: LEC  
Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0  
When Offered: Fall, Spring

BIOL 295 - Summer Research in Biology

Credits: 1-3  
Repeatable within Degree for Credit  
Offered by Biology  
Students enrolled in this course study life science related topics in an approved research environment during the summer. This course may involve one or more of the following: reading peer reviewed literature, conducting a field or laboratory study, attending scientific seminars and workshops, writing an abstract, preparing and presenting a poster, or writing a research paper.

Prerequisite(s): Permission of instructor and Biology Program Director  
Notes: May be taken for 1 to 3 credits and repeated once for a total of 3 credits. Total limit for BIOL 295 is 3 credits toward 44 credits for BS or BA (as long as the number of 100-200 level credits for the biology areas has not been exceeded).

Schedule Type: IND
BIOL 301 - Biology and Society

Credits: 3
Repeatable within Term for Credit
Offered by Biology
Biological problems facing society including pollution, cloning, emerging diseases, global warming, and overpopulation.

Fulfills Mason Core requirement in synthesis.

Prerequisite(s): BIOL 103 and 60 credits, or permission of instructor.
Notes: Not available for biology major or minor elective credit. See Schedule of Classes for current topic; may be repeated if topic is different.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

BIOL 302 - Alternative Careers in Biology

Credits: 1
Not Repeatable for Credit
Offered by Biology
This course will explore non-traditional careers that utilize a biology degree. Weekly seminars will allow biology undergraduates to discuss and explore the broad-range of career options that utilize a biology degree with professionals in those fields.

Notes: Biology majors only.

Schedule Type: SEM
Hours of Lecture or Seminar per week: 1.5
When Offered: Spring

BIOL 303 - Animal Biology

Credits: 4
Not Repeatable for Credit
Offered by Biology
Emphasizes structure and function of vertebrates, but surveys all animal groups and protozoa. Also covers evolutionary theory, and evolutionary history of major animal groups.

Prerequisite(s): C or better in BIOL 213, or permission of instructor.
Schedule Type: LAB,
LEC
Hours of Lecture or Seminar per week: 3
**BIOL 304 - Plant Biology**

Credits: 4  
Not Repeatable for Credit  
Offered by Biology  
Introduction to study of plants, their structure, development, nutrition, and ecology. Emphasizes flowering plants, but surveys all groups and their phylogenetic relationships.

Prerequisite(s): C or better in BIOL 213, or permission of instructor.  
Schedule Type: LAB, LEC  
Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 3  
When Offered: Fall, Spring, Summer

**BIOL 305 - Biology of Microorganisms**

Credits: 3  
Not Repeatable for Credit  
Offered by Biology  
Morphology, physiology, and pathogenicity of certain groups of bacteria, fungi, and viruses; stresses host-parasite interactions.

Prerequisite(s): C or better in BIOL 213, or permission of instructor.  
Prerequisite(s) enforced by registration system.  
Corequisite(s): BIOL 306.

Schedule Type: LEC  
Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0  
When Offered: Fall, Spring, Summer

**BIOL 306 - Biology of Microorganisms Laboratory**

Credits: 1  
Not Repeatable for Credit  
Offered by Biology  
Laboratory techniques in culturing, staining, and identifying microorganisms.

Corequisite(s): BIOL 246 or 305.

Schedule Type: LAB  
Hours of Lecture or Seminar per week: 1-3
BIOL 308 - Foundations of Ecology and Evolution

Credits: 5  
Not Repeatable for Credit  
Offered by Biology  
An examination of the principles of ecology, evolution, and the impact of humans on the world around them. Topics will include evolutionary history, biological diversity, and analyzes of interactions among organisms and between organisms and their environment.  
Fulfills writing intensive requirement in the major.

Prerequisite(s): C or higher in BIOL 213 and 214 or EVPP 110 and BIOL 214 or permission of instructor. BIOL 311 recommended.  
Prerequisite(s) enforced by registration system.

Schedule Type: LAB, LEC, RCT  
Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 4  
When Offered: Fall, Spring, Summer

BIOL 309 - Introduction to Oceanography

Credits: 3  
Not Repeatable for Credit  
Offered by Biology  
Introduction to chemical, biological, and geological aspects of oceanic environment.  
Equivalent to GEOL 309, EVPP 309.

Prerequisite(s): Two of the following lab sciences courses are required for a total of 8 credits: [GEOL 101 or 102], [EVPP 110 or 111 or 210], Chem 211, [BIOL 103 or 213], [PHYS 160 and 161 or 243 and 244].  
Notes: May include field trip.

Schedule Type: LEC  
Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0  
When Offered: Fall

BIOL 310 - Biodiversity

Credits: 3  
Repeatable within Degree for Credit
Offered by Biology
Explores the fundamental principles governing organismal biology while introducing the three domains of life: the Archaea, the Bacteria, the Eukaryotes, plus viruses. One off-campus field trip is required.

Prerequisite(s): BIOL 213 with a Grade of 'C' or better, or permission of instructor. Prerequisite(s) enforced by registration system.

Corequisite(s): BIOL 330.

Notes: BIOL 310 has replaced BIOL 303 and 304. Students who have taken BIOL 310 may not receive credit toward the major for BIOL 303 and/or BIOL 304.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring, Summer

BIOL 311 - General Genetics

Credits: 4
Not Repeatable for Credit
Offered by Biology
Basic principles of heredity and modern developments in this field.

Prerequisite(s): BIOL 213 with grade of C or better, or permission of instructor. BIOL 214 is recommended. Prerequisite(s) enforced by registration system.

Schedule Type: LAB,
LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 3
When Offered: Fall, Spring, Summer

BIOL 312 - Biostatistics

Credits: 4
Not Repeatable for Credit
Offered by Biology
Use of probability and descriptive and inferential statistical techniques in interpreting biological data.

Prerequisite(s): BIOL 214 with a grade of C or better, or permission of the instructor.
Schedule Type: LAB,
LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 2
When Offered: Fall
BIOL 313 - Human Genetics for the Social Sciences

Credits: 3  
Not Repeatable for Credit  
Offered by Biology  
Emphasizes topics of interest to students in social sciences, but open to any non-biology major. Topics include human genome and its inheritance; nature versus nurture; genetic disease; genetics of sex determination, intelligence, personality, and mental illness; genetic differences within and between populations; and evolution of human beings.

Prerequisite(s): One year of biology, or permission of instructor.  
Notes: Not available for biology credit.

Schedule Type: LEC  
Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0  
When Offered: Spring, odd numbered years

BIOL 314 - Introduction to Research Design and Analysis

Credits: 4  
Not Repeatable for Credit  
Offered by Biology  
Introduction to research design in a wide range of biological disciplines. Lecture will concentrate on how to design experiments with proper controls for statistical analysis, as well as obtaining permits and approvals from appropriate agencies. In recitation students will be given data sets to analyze.

Prerequisite(s): BIOL 213, BIOL 214 or 312 or equivalent introductory statistics course, BIOL 311, CHEM 211-212  
Completion of Biology core recommended. Must be enrolled in Biology Research Semester. Registration must be approved by a faculty sponsor and by the Biology Program Director.  
Schedule Type: LEC, RCT  
Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 1  
When Offered: Fall

BIOL 318 - Conservation Biology

Credits: 3  
Not Repeatable for Credit  
Offered by Biology  
Introduction to science used to identify species in need of conservation and techniques to manage and protect organisms.

Equivalent to EVPP 318  
Prerequisite(s): BIOL 308 or BIOL 310, or permission of instructor.  
Schedule Type: LEC  
Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0
BIOL 320 - Comparative Chordate Anatomy

Credits: 4  
Not Repeatable for Credit  
Offered by Biology  
Compares anatomy and morphology of major chordate groups. Lab emphasizes shark, mudpuppy, cat, and rabbit.

Prerequisite(s): BIOL 308 or BIOL 310 or permission of instructor.  
Schedule Type: LAB, LEC  
Hours of Lecture or Seminar per week: 2  
Hours of Lab or Studio per week: 6  
When Offered: Alternate Fall

BIOL 322 - Developmental Biology

Credits: 3  
Not Repeatable for Credit  
Offered by Biology  
Principles of embryonic development and differentiation in animal species at cellular, molecular, tissue, and whole organism levels.

Prerequisite(s): BIOL 213 and BIOL 311, or permission of instructor.  
Schedule Type: LEC  
Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0  
When Offered: Spring

BIOL 323 - Lab for Developmental Biology

Credits: 1  
Not Repeatable for Credit  
Offered by Biology  
This laboratory will explore early developmental processes using classical and modern developmental, biology techniques. Students will have the opportunity to propose and carry out a small independent project using zebrafish as a model organism.

Prerequisite(s): BIOL 322 or permission of instructor.  
Schedule Type: LAB  
Hours of Lecture or Seminar per week: 0  
Hours of Lab or Studio per week: 3  
When Offered: Spring

BIOL 326 - Animal Physiology

Credits: 3  
Not Repeatable for Credit
Offered by Biology
General consideration of animal function emphasizing common life problems and methods for solving them. Topics include intercellular communication (nervous and endocrine), metabolism, water and solute balance, and cardiovascular and respiratory physiology.

Prerequisite(s): BIOL 213 and BIOL 311, or permission of instructor.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**BIOL 328 - Recitation for Fundamentals of Ecology and Evolution**

Credits: 1
Not Repeatable for Credit
Offered by Biology
This is a writing intensive experience for transfer students who have previously taken an equivalent course to BIOL 308 that did not meet the writing intensive requirements in the biology major. This course is paired with BIOL 308.

Prerequisite(s): Permission of Biology Program Director and faculty coordinator of BIOL 308.
Schedule Type: RCT
Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0
When Offered: Fall, Summer, Spring

**BIOL 330 - Biodiversity Lab and Recitation**

Credits: 2
Repeatable within Degree for Credit
Offered by Biology
Explores the fundamental principles governing organismal biology while introducing the three domains of life: the Archaea, the Bacteria, the Eukaryotes, plus viruses.

Prerequisite(s): BIOL 213 and BIOL 214 with a grade of 'C' or better or permission of instructor.
Corequisite(s): BIOL 310.

Schedule Type: LAB
Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 2

**BIOL 331 - Invertebrate Zoology**

Credits: 4
Not Repeatable for Credit
Offered by Biology
Survey of invertebrate phyla, excluding insects, showing morphology, phylogeny, and general biology of these groups.

Prerequisite(s): BIOL 308 or BIOL 310, or permission of instructor.
Schedule Type: LAB, LEC

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 3

**BIOL 332 - Insect Biology**

Credits: 4
Not Repeatable for Credit
Offered by Biology
Survey of insects including taxonomy, morphology, physiology, behavior, ecology, and economic importance.

**Prerequisite(s):** BIOL 308 or BIOL 310, or permission of instructor.

Schedule Type: LAB, LEC

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 3

**BIOL 334 - Vertebrate Paleontology**

Credits: 4
Not Repeatable for Credit
Offered by Biology
Vertebrate Paleontology explores the evolution of vertebrates from the early Paleozoic to Recent. The course will cover the systematics, anatomy, paleogeography, and ecology of extinct vertebrates. Discussions will include fishes, early tetrapods & amniotes, dinosaurs, birds and mammals. Lab portion includes paleontology techniques, analysis, and study of fossil specimens and casts. A weekend field trip is included.

Equivalent to GEOL 334

**Prerequisite(s):** Any two courses from the following list: GEOL 101, GEOL 102, BIOL 103, BIOL 104, BIOL 213, BIOL 303 or the permission of the instructor.

Schedule Type: LAB, LEC

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 3
When Offered: Spring

**BIOL 335 - Forensic Entomology**

Credits: 3
Not Repeatable for Credit
Offered by Biology
Explores the use of insects and other arthropods in field of forensic science as it pertains to the investigations of human and animal deaths and abuse, food and other product contamination, thefts, the illegal drug trade and unethical entomological practices. The use and presentation of this information from such investigations in court room proceedings will be discussed.
Prerequisite(s): BIOL 213 or permission of instructor.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

BIOL 336 - Invertebrate Paleontology

Credits: 4
Not Repeatable for Credit
Offered by Biology
Classification, evolutionary trends, and distribution of common invertebrate fossils.

Equivalent to GEOL 312.

Prerequisite(s): Either GEOL 101 and GEOL 102; or BIOL 103 and BIOL 104; or BIOL 213 and BIOL 310
Notes: May include field trips.
Schedule Type: LAB, LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 3
When Offered: Spring

BIOL 338 - Recitation and Lab for Fundamentals of Ecology and Evolution

Credits: 2
Not Repeatable for Credit
Offered by Biology
This is a writing intensive experience and laboratory for transfer students who have previously taken an equivalent course to BIOL 308 that did not have a lab and did not meet the writing intensive requirements in the biology major. This course is paired with BIOL 308.

Prerequisite(s): Permission of Biology Program Director and faculty coordinator of BIOL 308.
Schedule Type: LAB, RCT
Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 2
When Offered: Fall, Summer, Spring

BIOL 344 - Plant Diversity and Evolution

Credits: 4
Not Repeatable for Credit
Offered by Biology
Investigates the diversity of vascular plants, including angiosperms, their evolutionary relationships, and the bases of their classification and identification.
Prerequisite(s): BIOL 308 or BIOL 310, or permission of instructor.
Schedule Type: LAB,
LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 3
When Offered: Spring

BIOL 345 - Plant Ecology

Credits: 4
Not Repeatable for Credit
Offered by Biology
Investigates the interaction of plants with their abiotic and biotic environment, native Virginian plant communities and their causes, and global processes affecting plant distributions over geological time. 2 Saturday field trips required.

Prerequisite(s): BIOL 308 or BIOL 310, or permission of instructor.
Notes: Three Saturday or Sunday field trips required.

Schedule Type: LAB,
LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 3

BIOL 350 - Freshwater Ecosystems

Credits: 4
Not Repeatable for Credit
Offered by Biology
Studies physical, chemical, and biological processes in lakes, streams, and wetlands. Lectures, field trips, and lab exercises teach physical and chemical aspects of aquatic systems and life cycles, and adaptations of aquatic organisms.

Equivalent to EVPP 350

Prerequisite(s): CHEM 211/212 or CHEM 155/156 and BIOL 308.
Schedule Type: LAB,
LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 3

BIOL 355 - Ecological Engineering and Ecosystem Restoration

Credits: 4
Not Repeatable for Credit
Offered by Biology
Provides definition, classification and practice of ecological engineering and ecosystem restoration. Describes general system ecology, ecosystem restoration, and the utilization of natural processes to provide ecosystem services to society and benefits to
nature. Provides students with a systems-oriented perspective on environmental studies. Students will study principles in general system ecology and ecological engineering and explore practices in sustainable ecological design by carrying out a hands-on experimental design project with field microcosms/meocosms in a newly established Wetland Mesocosm Compound on the campus. This course will involve a field trip (1-2 days).

Equivalent to EVPP 355

Prerequisite(s): CHEM 211, BIOL 308 and PHYS 243
Schedule Type: LAB,
LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 3

BIOL 374 - Biogeography: Space, Time, and Life

Credits: 3
Not Repeatable for Credit
Offered by Biology
A survey of the relationship between the distribution of plants and animals on the earth surface and the physical geography and environmental characteristics.

Equivalent to GGS 321

Prerequisite(s): One of the following: BIOL 310, GGS 122, GGS 102, or permission of instructor.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring

BIOL 377 - Applied Ecology

Credits: 3
Not Repeatable for Credit
Offered by Biology
Introduction to ecosystem concepts and their applications to natural and managed ecosystems.

Equivalent to EVPP 377

Prerequisite(s): 8 credits of biology, geology, or chemistry; 60 credits; or permission of instructor.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

BIOL 379 - RS: Ecological Sustainability
Introduces the concepts and applications of several important topics relating to ecological sustainability. Focuses on the role of soils in maintaining and managing environmental quality. Teaches students how to understand and interpret scientific data presented in various types of literature covering ecological sustainability.

Designated a Green Leaf Course.

Designated as a research and scholarship intensive course.

Equivalent to EVPP 378

**BIOL 382 - Introduction to Virology**

Credits: 3
Not Repeatable for Credit
Offered by Biology
An introduction to the fundamental nature of viruses, their classification, morphology, chemistry and their role in human disease.

**Prerequisite(s):** BIOL 305 or permission of instructor. Grade of 'C' or better is required for each prerequisite.
Prerequisite(s) enforced by registration system.

**Schedule Type:** LEC
**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0
**When Offered:** Fall, Spring

**BIOL 385 - Biotechnology and Genetic Engineering**

Credits: 3
Not Repeatable for Credit
Offered by Biology
Emphasizes theory and applications, including significance and societal implications of biotechnology applied to medicine, agriculture, and environment.

**Prerequisite(s):** BIOL 311 or permission of instructor. Grade of 'C' or better for the prerequisite.
Prerequisite(s) enforced by registration system.

**Schedule Type:** LEC
**BIOL 402 - Applied and Industrial Microbiology**

Credits: 3  
Not Repeatable for Credit  
Offered by Biology  
Biology of microorganisms of ecological and industrial significance. Includes food production, spoilage and preservation, fermentation technology, waste disposal, water purification, biodeterioration, and decomposition.  

**Prerequisite(s):** BIOL 213, 305, 306; CHEM 211, 212; or permission of instructor.  
**Schedule Type:** LEC  
**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**BIOL 403 - Techniques in Applied and Industrial Microbiology**

Credits: 1  
Not Repeatable for Credit  
Offered by Biology  
Lab exercises illustrate basic and applied methodologies, including isolation of commercially useful strains. Discusses production and purification of industrial products.  

**Prerequisite(s):** BIOL 213, 305, 306; CHEM 211, 212.  
**Corequisite(s):** BIOL 402, or permission of instructor.  

**Schedule Type:** LAB  
**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 3

**BIOL 404 - Medical Microbiology**

Credits: 3  
Not Repeatable for Credit  
Offered by Biology  
Basic principles of infectious diseases caused by bacteria and viruses. Discusses genetics and molecular mechanisms of pathogenicity.  

**Prerequisite(s):** BIOL 305, 306; or permission of instructor. Grade of 'C' or better is required for each prerequisite.  
Prerequisite(s) enforced by registration system.  

**Schedule Type:** LEC  
**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0
**BIOL 405 - Microbial Genetics**

Credits: 4  
Not Repeatable for Credit  
Offered by Biology  
Study of structure and function of bacterial DNA, emphasizing mechanisms of gene transfer, expression and regulation. Introduces DNA repair, mutation, and life cycles of bacteriophage.

**Prerequisite(s):** BIOL 305 and 306; or permission of instructor. Grade of 'C' or better is required for each prerequisite. Prerequisite(s) enforced by registration system.

**Schedule Type:** LAB,  
LEC  
**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 3

---

**BIOL 406 - Microbial Physiology and Metabolism**

Credits: 4  
Not Repeatable for Credit  
Offered by Biology  
Study of complexity and diversity of microbial physiology and metabolism with emphasis on bacteria. Nutrition, growth, transport, and anabolic and catabolic processes are emphasized. Laboratory includes quantification of cellular macromolecules, enzyme purification and kinetics, column chromatography, and bacterial responses to environmental stimuli.

**Prerequisite(s):** BIOL 305 and 306; or permission of instructor. Grade of 'C' or better is required for each prerequisite. Prerequisite(s) enforced by registration system.

**Schedule Type:** LAB,  
LEC  
**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 3

---

**BIOL 407 - Microbial Diversity**

Credits: 4  
Not Repeatable for Credit  
Offered by Biology  
Studies effect of microorganisms on ecological and medical phenomena. Stresses evolution of microbial species, biochemical cycling, and species interactions. Laboratory stresses use of cultural, biochemical, and phylogenetic methods to study microbial isolation, metabolism, and identification.

**Prerequisite(s):** BIOL 305 and 306; or permission of instructor. Grade of 'C' or better is required for each prerequisite. Prerequisite(s) enforced by registration system.

**Schedule Type:** LAB,  
LEC  
**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 3
BIOL 408 - Mushrooms, Molds and Society

Credits: 3
Not Repeatable for Credit
Offered by Biology
Provides a modern, comprehensive knowledge of fungal biology including classification, phylogeny, structure, physiology/metabolism, growth and development, genetics, industrial applications including biotechnology, ecological roles including pathogenic interactions with plants, animals, and man.

Equivalent to EVPP 408.

Prerequisite(s): BIOL 213 with a grade of C or better.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring

BIOL 409 - Medical Mycology

Credits: 3
Not Repeatable for Credit
Offered by Biology
Provides the student with current knowledge of both the medical and microbiological aspects of fungal diseases in humans, including the etiologic agents, geographic distribution, epidemiology, transmission, determinants of pathogenicity, laboratory detection, and therapy associated with the major human mycoses.

Equivalent to EVPP 409.

Prerequisite(s): BIOL 213 with a grade of C or better.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Summer

BIOL 411 - Advanced General Genetics

Credits: 3
Not Repeatable for Credit
Offered by Biology
Topics include quantitative genetics, extrachromosomal inheritance, and special techniques such as mutation screening, developmental genetics, cancer genetics, behavior genetics, evolutionary genetics, and ethics of genetic technology.

Prerequisite(s): C or better in BIOL 311 or permission of instructor.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
BIOL 417 - Selected Topics in Molecular and Cellular Biology

Credits: 1-4
Repeatable within Term for Credit
Offered by Biology
Study of current topics in molecular and cellular biology. Lecture, laboratory.

Prerequisite(s): BIOL 311 or 482, or permission of instructor.
Notes: Topics vary. May be repeated for credit.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 0-3
Hours of Lab or Studio per week: 0-6

BIOL 418 - Current Topics in Microbiology

Credits: 3
Repeatable within Degree for Credit
Offered by Biology
Study of current topics in microbiology.

Prerequisite(s): BIOL 305 and 306.
Notes: Topics vary. May be repeated for credit.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

BIOL 420 - Vaccines

Credits: 3
Not Repeatable for Credit
Offered by Biology

Prerequisite(s): C or higher in BIOL 305 and BIOL 306.
Prerequisite(s) enforced by registration system.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

BIOL 421 - Genetics of Human Diseases
Credit: 3
Not Repeatable for Credit
Offered by Biology
Emphasizes strategies used for identification of genes involved in human genetic diseases. Both monogenic and complex human genetic diseases, as well as principles of genetic screening and counseling, will be presented.

Prerequisite(s): BIOL 311.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

BIOL 422 - Stem Cell Biology and Regenerative Medicine

Credit: 3
Not Repeatable for Credit
Offered by Biology
A broad overview of the biological principles governing stem cell populations. The functional roles stem cells play in regulating normal development and contributing to disease-state pathologies. An examination of the therapeutic potential of stem cells through "regenerative medicine."

Prerequisite(s): BIOL 311.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

BIOL 423 - Biology of Obesity and Weight Loss

Credit: 3
Not Repeatable for Credit
Offered by Biology
This course covers the causes and consequences of obesity and weight loss, including the general epidemiology and pathology of co-morbid conditions associated with obesity. The relative contributions of genetic and environmental factors influencing weight gain will be covered as well as recent trends in obesity research.

Prerequisite(s): BIOL 213 or permission of instructor.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

BIOL 425 - Human Physiology

Credit: 3
Not Repeatable for Credit
Offered by Biology
Organ system approach to study of homeostasis, including cardiovascular, respiratory, renal, digestive, endocrine, and nervous system functions.
BIOL 426 - Mechanisms of Aging

Credits: 3
Not Repeatable for Credit
Offered by Biology
A course where students will demonstrate knowledge of cellular and molecular mechanisms which drive the systematic changes that result in aging, and to understand the overall biological processes involved in complex biological systems.

Prerequisite(s): BIOL 213 and BIOL 311 or equivalent; or Permission of Instructor.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring.

BIOL 430 - Advanced Human Anatomy and Physiology I

Credits: 4
Not Repeatable for Credit
Offered by Biology
Organ system approach to studying the structure and function of the human organism and maintenance of homeostasis. Detailed discussion of anatomical structures and their functions of the endocrine, nervous, muscular, skeletal, and integumentary systems following introduction to the cellular and tissue levels of organization. Topics also include selected pathology for each organ system; current therapeutic interventions are addressed.

Prerequisite(s): C or higher in BIOL 213 and 60 credits.
Prerequisite(s) enforced by registration system.

Notes: Biology 124 is not approved for Biology Majors.

Schedule Type: LAB, LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 3
When Offered: Fall, Summer

BIOL 431 - Advanced Human Anatomy and Physiology II

Credits: 4
Not Repeatable for Credit
Offered by Biology
Continued study of the structure and function of the human organism and maintenance of homeostasis. Detailed discussion of
anatomical structures and their functions of the cardiovascular, lymphatic, respiratory, urinary, digestive and reproductive organ systems. Topics also include selected disorders for each organ system to illustrate disruption of homeostasis.

**Prerequisite(s):** BIOL 430. Grade of C or better is required for each prerequisite. Prerequisite(s) enforced by registration system.

**Schedule Type:** LAB, LEC

**Hours of Lecture or Seminar per week:** 3

**Hours of Lab or Studio per week:** 3

**When Offered:** Spring, Summer

---

**BIOL 433 - Selected Topics in Plant Biology**

Credits: 1-4
Repeatable within Degree for Credit
Offered by Biology
Lecture or field course in botany. Topic varies with instructor's specialty.

**Prerequisite(s):** BIOL 310 or permission of instructor.

**Schedule Type:** LAB, LEC

**Hours of Lecture or Seminar per week:** 1-4

**Hours of Lab or Studio per week:** 0-6

---

**BIOL 435 - Selected Topics in Biology**

Credits: 0-4
Repeatable within Degree for Credit
Offered by Biology
Topics vary with instructor's specialty. May be repeated only with permission of Biology Program Director.

**Prerequisite(s):** Permission of instructor.

**Schedule Type:** LAB, LEC

**Hours of Lecture or Seminar per week:** 1-3

**Hours of Lab or Studio per week:** 0-6

**When Offered:** Fall, Spring, Summer

---

**BIOL 440 - Field Biology**

Credits: 0-4
Repeatable within Degree for Credit
Offered by Biology
Directed field studies emphasizing ecology and behavior. Topics vary but include design of field manipulations, data collection and analysis, and introduction to organisms of study site.

Equivalent to BIOL 440.
Prerequisite(s): BIOL 308 or 310 or permission of instructor.

Notes: Students bear cost of required field trips. May be repeated with permission of Biology Program. Total limit of 4 credits. This course does not satisfy requirements of the BA degree or BS degree, which state that students must complete at least one (BA degree) or two (BS degree) upper division courses that include a laboratory.

Schedule Type: LAB, LEC
Hours of Lecture or Seminar per week: 0-3
Hours of Lab or Studio per week: 3-9
When Offered: Fall, Spring, Summer

BIOL 443 - Tropical Ecology

Credits: 3
Not Repeatable for Credit
Offered by Biology
An introduction to the abiotic and biotic factors that define tropical habitats. The course emphasizes evolution, taxonomic diversity, and plant-animal interactions in terrestrial tropic forests.

Prerequisite(s): Grade of C of better in BIOL 308 or BIOL 310 or permission of instructor.
Prerequisite(s) enforced by registration system.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring

BIOL 444 - Tropical Ecology Laboratory

Credits: 1
Not Repeatable for Credit
Offered by Biology
An introduction to field-based scientific research. This course focuses on methods for testing hypotheses related to tropical plant and animal biology.

Prerequisite(s): BIOL 308 or permission of instructor.
Prerequisite(s) enforced by registration system.

Schedule Type: LAB
Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 3
When Offered: Spring

BIOL 446 - Ecological and Evolutionary Physiology

Credits: 3
Not Repeatable for Credit
Offered by Biology
Physiological responses organisms use to survive and reproduce successfully in their ever-changing environments. Responses to temperature, salinity, low oxygen levels and diet will be covered from a phylogenetic and energetic perspective.

Prerequisite(s): BIOL 308 or BIOL 310, and BIOL 326 or BIOL 430 and BIOL 431, or permission of instructor.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

BIOL 449 - Marine Ecology

Credits: 3
Not Repeatable for Credit
Offered by Biology
Plants and animals of marine environments and physical and chemical conditions that affect their existence.

Prerequisite(s): BIOL 308 or permission of instructor.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

BIOL 450 - Marine Conservation

Credits: 3
Not Repeatable for Credit
Offered by Biology
Provides an overview of threats to the marine environment, and discusses the scientific, socioeconomic, and political issues behind marine conservation. Covers categories of marine pollutants (chemical, biological, and physical contaminants) and their impacts on the marine ecosystem, as well as impacts on humans (health, social, and economic), threats to key marine species (e.g., coral, sharks, turtles, and marine mammals) and initiatives and laws developed to reduce these threats. Scientific and socioeconomic problems that hinder sustainable fisheries management and the science and policy behind the global warming debate are also discussed. The course also provides an overview of marine environmental law and policy issues related to marine conservation policy.

Equivalent to EVPP 421.

Prerequisite(s): BIOL 309 or equivalent, or permission of instructor.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring

BIOL 452 - Immunology
Topics include structure and function of immunoglobulins, role of cell-mediated immunity, protective role of immune system, and disease and injury related to malfunctions of immune system.

Prerequisite(s): C or higher in BIOL 213, 305, 306, and 311; or permission of instructor. BIOL 311 recommended. Prerequisite(s) enforced by registration system.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring, Summer

BIOL 453 - Immunology Laboratory

Credits: 1
Not Repeatable for Credit
Offered by Biology
Techniques relevant to BIOL 452, including enzyme-linked immunoabsorbant assay, immunodiffusion, protein electrophoresis, and immune fixation.

Prerequisite(s): BIOL 452
Corequisite(s): BIOL 452

Schedule Type: LAB
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 3

BIOL 454 - Marine Mammal Biology and Conservation

Credits: 3
Not Repeatable for Credit
Offered by Biology

Covers the evolution, biology, ecology, and behavior of marine mammals from polar bears and sea otters to whales and dolphins. Marine mammal conservation and policy is also a major component of the course; several, lecture sessions are devoted to the issue of whaling, threats to marine mammal populations, and recent conservation issues such as marine mammals and noise pollution. The course also includes a number of guest lectures from a variety of international marine mammal experts.

Equivalent to EVPP 419.

Prerequisite(s): BIOL 309 or BIOL 449 or equivalent; or permission of instructor.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring
BIOL 455 - Marine Mammal Biology and Conservation Field Course

Credits: 1  
Not Repeatable for Credit  
Offered by Biology  
Provides laboratory, seminar sessions and field work to accompany BIOL 454-001 - marine mammal biology and conservation. Field work includes several day-long boat trips. May take place in the US or abroad.

Equivalent to ECPP 420.

Corequisite(s): EVPP 419 or 454.

Notes: At present the two week residential field course takes place in Scotland at the University (of London) Marine Biological Station, which is equipped with boats and laboratories. The" course has been running for 11 years, 2 years with GMU as a special topics course.

Schedule Type: LAB, SEM  
Hours of Lecture or Seminar per week: 1  
Hours of Lab or Studio per week: 1-12  
When Offered: Spring

BIOL 457 - Reproductive Strategies

Credits: 3  
Not Repeatable for Credit  
Offered by Biology  
Introduction to the research and evolutionary theory of sex and reproduction. Covers topics from the evolution of sex and gender to the evolution of complex reproductive strategies involving behaviors such as mate recognition, courtship displays, territoriality, polygamy, and offspring care. Lectures focus primarily on multi-cellular animals but also include discussions of unicellular prokaryotes and eukaryotes as well as plants.

Prerequisite(s): BIOL 308 and 60 hours.  
Schedule Type: LEC  
Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0  
When Offered: Fall

BIOL 459 - Fungi and Ecosystems

Credits: 3  
Not Repeatable for Credit  
Offered by Biology  
Considers impact of fungi on ecosystems in terms of biogeochemical cycling, primary and secondary production, and regulating community structure and populations of individual species through their activities as symbionts and parasites. Discusses role of fungi in ameliorating pollutants produced by anthropogenic activities.

Prerequisite(s): BIOL 308 or BIOL 310 or permission of instructor.
BIOL 460 - Infectious Diseases Wildlife

Credits: 3
Not Repeatable for Credit
Offered by Biology
During this course, diseases of wildlife will be examined with emphasis on causes and mechanisms, pathobiology, ecology and epidemiology and population significance. We will explore methods of diagnosis, control, prevention and outbreak investigation as they apply to management and conservation of wildlife populations. Also, diseases crossing species barriers will be examined.

Equivalent to EVPP 460, EVPP 305 and EVPP 306
Prerequisite(s): 60 credits plus: BIOL 308; or EVPP 305 and EVPP 306; or permission of the instructor.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
When Offered: Spring

BIOL 465 - Histology

Credits: 4
Not Repeatable for Credit
Offered by Biology
Microscopic structure of animal tissues and organs, with emphasis on vertebrates.

Prerequisite(s): BIOL 308 or 310.
Schedule Type: LAB,
LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 3

BIOL 468 - Vertebrate Natural History

Credits: 4
Not Repeatable for Credit
Offered by Biology
Introduces vertebrates with emphasis on systematic, evolution, life history, behavior and ecology. Laboratory emphasis on identification, taxonomy, and natural history of local vertebrates.

Equivalent to EVPP 468
Prerequisite(s): BIOL 308 or permission of the instructor.
Schedule Type: LAB,
LEC
Hours of Lecture or Seminar per week: 3
BIOL 470 - Dinosaur Biology

Credits: 3
Not Repeatable for Credit
Offered by Biology
Introduction to the evolution, diversity, and biology of the dinosaurs and their descendants. Emphasis on how current biological knowledge is used to estimate and infer the morphology, physiology, and ecology of these extinct animals.

Prerequisite(s): BIOL 308 or BIOL 310 or permission of instructor.
Schedule Type: LEC, RCT
Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 1

BIOL 471 - Evolution

Credits: 3
Not Repeatable for Credit
Offered by Biology
Process of evolution emphasizing role of genetics, properties of populations, and population differentiations.

Prerequisite(s): C or higher in BIOL 308.
Prerequisite(s) enforced by registration system.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring

BIOL 472 - Introductory Animal Behavior

Credits: 3
Not Repeatable for Credit
Offered by Biology
Study of mechanisms, functions, and evolution of behavior.

Prerequisite(s): BIOL 308 or BIOL 310 or permission of instructor.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

BIOL 473 - Introductory Laboratory in Animal Behavior

Hours of Lab or Studio per week: 3
When Offered: Spring
Field or laboratory study in animal behavior with emphasis on mechanisms, functions, and evolution of behavior. Stresses experimental design and analysis of data. Writing-intensive laboratory.

**Prerequisite(s):** BIOL 472.

**Corequisite(s):** BIOL 472.

**Schedule Type:** LAB

**Hours of Lecture or Seminar per week:** 3

**Hours of Lab or Studio per week:** 3

---

### BIOL 480 - The Diversity of Fishes

Credits: 3

Not Repeatable for Credit

Offered by Biology

This course delves into the biology and ecology of fishes. Subjects of this class include fish anatomy, taxonomy, evolution, habitat adaptations, community dynamics, and ecosystem interactions. The course will also touch on human impacts on fishes, and conservation.

**Prerequisite(s):** BIOL 309, BIOL 310, and BIOL 350/EVPP 350.

**Schedule Type:** LEC

**Hours of Lecture or Seminar per week:** 3

**Hours of Lab or Studio per week:** 0

**When Offered:** Spring

---

### BIOL 482 - Introduction to Molecular Genetics

Credits: 3

Not Repeatable for Credit

Offered by Biology

Basic concepts of structure and function of genetic material at molecular level.

**Prerequisite(s):** BIOL 213, 305, and 306, or permission of instructor.

**Schedule Type:** LEC

**Hours of Lecture or Seminar per week:** 3

**Hours of Lab or Studio per week:** 0

---

### BIOL 483 - General Biochemistry

Credits: 4

Not Repeatable for Credit

Offered by Biology

Prerequisite(s): BIOL 213; CHEM 313. A minimum grade of C is required for each prerequisite. Prerequisite(s) enforced by registration system.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 4
Hours of Lab or Studio per week: 0

**BIOL 484 - Eukaryotic Cell Biology**

Credits: 3
Not Repeatable for Credit
Offered by Biology
Structure and function of cell membranes and organelles with regard to cellular transport, sorting, compartmentalization, signaling, motility, and cell division.

Prerequisite(s): C or higher in BIOL 311 and 483 or permission of instructor. Prerequisite(s) enforced by registration system.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**BIOL 485 - Eukaryotic Cell Biology Laboratory**

Credits: 2-3
Not Repeatable for Credit
Offered by Biology
Laboratory experiments using cell biology techniques, including microscopy, spectrophotometry, centrifugation, chromatography, and electrophoresis.

Corequisite(s): BIOL 484 or permission of instructor.

Schedule Type: LAB
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 3

**BIOL 486 - Molecular Biology and Biotechnology Laboratory**

Credits: 2
Not Repeatable for Credit
Offered by Biology
Introduction to theory, techniques, and practices used in modern molecular biotechnology laboratories.

Prerequisite(s): BIOL 385 or 482.
Schedule Type: LAB
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 6
BIOL 489 - Teaching Practicum

Credits: 1-3
Repeatable within Degree for Credit
Offered by Biology
Student gains teaching experience in a lecture, laboratory or field environment under the supervision of a faculty member. Student responsibilities may include a lecturing component, but may also include lab preparation, design of course materials, tutoring and grading. Course may be repeated once.

Prerequisite(s): BIOL 213, 311, 60 credit hours and permission of instructor, course coordinator (where applicable) and Program Director.
Schedule Type: INT
Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0
When Offered: Fall, Summer, Spring

BIOL 492 - Senior Seminar

Credits: 1
Repeatable within Degree for Credit
Offered by Biology
Weekly seminar course dealing with recent advances in biology. Topics selected from recent publications in the field. May be repeated for credit.

Prerequisite(s): BIOL 311 and 90 credit hours, or permission of instructor.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

BIOL 493 - Honors Research in Biology

Credits: 1-2
Repeatable within Degree for Credit
Offered by Biology
Laboratory of field investigation under guidance of faculty member.

Prerequisite(s): Admission to the Biology Honors Program, permission of instructor and Biology Program Director.
Notes: Total limit for BIOL 493, 495 and 497 is 8 credits toward the 44 credit hours required for the Biology BS degree and only 4 credits toward the 32 hours required for the BA degree. Combined 493, 495 and 497 may not exceed 4 credit hours in any one semester.

Schedule Type: IND
Hours of Lecture or Seminar per week: 1-2
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring, Summer
BIOL 494 - Honors Seminar in Biology

Credits: 1
Repeatable within Degree for Credit
Offered by Biology
Weekly seminar course dealing with recent advances in biology.

Prerequisite(s): Admission to biology honors program and permission of instructor.
Notes: Topics selected from recent publications in field. May be repeated for credit six times.

Schedule Type: SEM
Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

BIOL 495 - Directed Studies in Biology

Credits: 1-3
Repeatable within Degree for Credit
Offered by Biology
Study of a topic not otherwise available to student. May involve reading assignments, tutorials, lectures, papers, presentations, or field or laboratory study, determined in consultation with instructor.

Prerequisite(s): Permission of instructor and Biology Program Director.
Notes: May be taken for 1 to 3 credits and repeated once for a total of 3 credits. Total limit for combination of 495 and 497 is 6 credits toward 44 credits for BS and 4 credits toward 32 credits for BA. This course does not satisfy requirements of the BA degree or BS degree, which state that students must complete at least one (BA degree) or two (BS degree) upper division courses that include a laboratory.

Schedule Type: IND
Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring, Summer

BIOL 497 - Special Problems in Biology

Credits: 1-4
Repeatable within Degree for Credit
Offered by Biology
Lab or field project leading to written report of research. Research and paper completed under instructor's guidance.

Prerequisite(s): 60 credits, and permission of instructor and department chair.
Notes: Total limit for 495 and 497 combined is 6 credits toward the 44 credits required for BS and 4 credits toward 32 credits for BA. This course does not satisfy requirements of the BA degree or BS degree, which state that students must complete at least one (BA degree) or two (BS degree) upper division courses that include a laboratory.

Schedule Type: IND
BIOL 498 - Research Seminar

Credits: 2
Not Repeatable for Credit
Offered by Biology
Seminar discussing current scientific literature and literature related to research project undertaken by student as part of the research semester.

Prerequisite(s): BIOL 213, BIOL 214 or 312 or equivalent introductory statistics course, BIOL 311, CHEM 211-212
Completion of Biology core recommended. Must be enrolled in Biology Research Semester. Registration must be approved by a faculty sponsor and by the Biology Program Director.
Notes: Registration limited to students who are enrolled concurrently in BIOL 499. For students in the Biology Honors Program, this course may be used to substitute for one credit of BIOL 494: Honors Seminar in Biology.

Schedule Type: SEM
Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 0
When Offered: Fall

BIOL 499 - RS: Research in Biology

Credits: 6-9
Not Repeatable for Credit
Offered by Biology
Laboratory or field investigation under faculty guidance. Students will earn 6-9 credits toward the BA or BS degrees in Biology.

Designated as a research and scholarship intensive course.

Prerequisite(s): BIOL 213, BIOL 214 or 312 or equivalent introductory statistics course, BIOL 311, CHEM 211-212
Completion of Biology core recommended. Must be enrolled in Biology Research Semester. Registration must be approved by a faculty sponsor and by the Biology Program Director.
Notes: Registering for the Research Semester requires successful application and approval by Biology Program and faculty sponsor. Student receiving 9 credits for 499 will not be allowed to use BIOL 440, BIOL495 and/or 497 neither toward the 32 BIOL hours needed for the BA degree, nor toward the 44 BIOL hours needed for the BS degree. This course will satisfy one upper division laboratory requirement for both the BA and BS degrees in Biology.

Schedule Type: LAB
Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 6-9
When Offered: Fall

BIOL 501 - Microbial Diversity: An Organismal Approach
Credits: 3
Not Repeatable for Credit
Offered by School of Systems Biology
In-depth study of nonpathogenic microbial world, emphasizing detection, enumeration, and classification of microorganisms; their physiological and evolutionary relationships; and biotechnological applications.

Prerequisite(s): Undergraduate course in microbiology, or permission of instructor.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

BIOL 506 - Selected Topics in Microbiology

Credits: 1-4
Repeatable within Degree for Credit
Offered by School of Systems Biology
Topic depends on instructor's specialty.

Prerequisite(s): BIOL 305, 306, or permission of instructor.
Notes: May be repeated only with permission of department chair.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0-6

BIOL 507 - Selected Topics in Ecology

Credits: 0-4
Repeatable within Degree for Credit
Offered by School of Systems Biology
Topic depends on instructor's specialty.

Prerequisite(s): Course in ecology and permission of instructor.
Notes: May be repeated only with permission of department chair.

Schedule Type: LAB,
LEC
Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0-6

BIOL 508 - Selected Topics in Animal Biology

Credits: 1-4
Repeatable within Degree for Credit
Offered by School of Systems Biology
Topic depends on instructor's specialty.
Prerequisite(s): BIOL 303, or permission of instructor.
Notes: May be repeated only with permission of department chair.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0-6

BIOL 509 - DNA Analysis of Biological Evidence

Credits: 3
Not Repeatable for Credit
Offered by School of Systems Biology
Historical development of DNA profiling methods, current DNA typing techniques and the ongoing development of new forensic DNA typing methods. Emphasis will be placed on various analytical techniques used in the analysis of forensic evidence.

Prerequisite(s): BIOL 311 or permission of instructor
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring

BIOL 510 - Forensic DNA Analysis Laboratory

Credits: 1
Not Repeatable for Credit
Offered by School of Systems Biology
Provides hands-on experience with the methodologies of forensic DNA analysis.

Prerequisite(s): BIOL 311
Schedule Type: LAB
Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 1-12
When Offered: Spring

BIOL 515 - Developmental Neurobiology

Credits: 3
Not Repeatable for Credit
Offered by School of Systems Biology
Introduction to developmental neurobiology with overview of embryological development of the nervous system. Topics include neural induction, patterning/cell fate specification, and neural circuit assembly together with modern molecular methods for exploring neural development.

Prerequisite(s): Completion of 60 credits, including PSYC 372; or BIOL 213 and 303.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 0
BIOL 516 - Mammalian Neurobiology

Credits: 3
Not Repeatable for Credit
Offered by School of Systems Biology
Functional anatomy of mammal brains emphasizing regional and systems neuroanatomy of humans. Correlates with material from clinical neurology, where possible. Laboratory component includes brain dissections and clinical correlations.

Prerequisite(s): BIOL 515.
Schedule Type: LAB, LEC
Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 3

BIOL 518 - Conservation Biology

Credits: 3
Not Repeatable for Credit
Offered by School of Systems Biology
Introduction to science used to identify species in need of conservation and techniques to manage and protect organisms.

Prerequisite(s): BIOL 307, 311, or equivalent.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

BIOL 532 - Animal Behavior

Credits: 3
Not Repeatable for Credit
Offered by School of Systems Biology
Ecological aspects of animal behavior.

Prerequisite(s): BIOL 324 or permission of instructor.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

BIOL 533 - Selected Topics in Plant Biology

Credits: 1-4
Repeatable within Degree for Credit
Offered by School of Systems Biology
Topic depends on instructor's specialty.
Prerequisite(s): Course in plant biology or permission of instructor.
Notes: May be repeated only with permission of department chair.

Schedule Type: LAB,
LEC
Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0-6
Grading: Graduate Special

BIOL 537 - Ornithology

Credits: 4
Not Repeatable for Credit
Offered by School of Systems Biology
Study of evolution, systematics, physiology, ecology, and behavior of birds, emphasizing field work.

Prerequisite(s): Course in ecology, or permission of instructor.
Schedule Type: LAB,
LEC
Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 6
When Offered: Alternate Spring

BIOL 538 - Mammalogy

Credits: 4
Not Repeatable for Credit
Offered by School of Systems Biology
Study of evolution, systematics, physiology, ecology, and behavior of mammals, emphasizing field work.

Equivalent to EVPP 538

Prerequisite(s): Course in ecology, or permission of instructor.
Schedule Type: LAB, LEC
Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 6

BIOL 539 - Herpetology

Credits: 4
Not Repeatable for Credit
Offered by School of Systems Biology
Study of evolution, systematics, physiology, ecology, and behavior of amphibians and reptiles, emphasizing field work.

Prerequisite(s): Course in ecology, or permission of instructor.
Schedule Type: LAB,
LEC
Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 6

BIOL 543 - Tropical Ecosystems

Credits: 4
Not Repeatable for Credit
Offered by School of Systems Biology
Terrestrial, aquatic, and marine ecosystems in tropics, emphasizing plant communities, plant-animal interactions, and role of humans in the tropics.

Equivalent to EVPP 543

Notes: Field trip to tropics required as part of laboratory.

Schedule Type: LAB,
LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 3
When Offered: Spring, even numbered years

BIOL 550 - Waterscape Ecology and Management

Credits: 3
Not Repeatable for Credit
Offered by School of Systems Biology
Field and laboratory approaches to freshwater ecology with emphasis on study design, sampling methods, laboratory and data analysis, and report writing.

Equivalent to EVPP 550.

Prerequisite(s): General Chemistry and a course in ecology.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

BIOL 553 - Advanced Topics in Immunology

Credits: 3
Repeatable within Degree for Credit
Offered by School of Systems Biology
Comprehensive study of immunologic mechanisms as they pertain to immunologic diseases and transplantation.

Prerequisite(s): BIOL 452, or permission of instructor.
Schedule Type: LEC
BIOL 555 - Lab in Waterscape Ecology

Credits: 1
Not Repeatable for Credit
Offered by School of Systems Biology
Equivalent to EVPP 555

Prerequisite(s): BIOL 550 or permission of instructor.
Schedule Type: LAB
Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 1-6

BIOL 556 - Advanced Topics in Microbial Physiology and Metabolism

Credits: 3
Not Repeatable for Credit
Offered by School of Systems Biology
Comprehensive study of microorganisms including growth, nutrition, transport, autotrophic and heterotrophic metabolism, regulation, and differentiation.

Prerequisite(s): BIOL 305, 306, or permission of instructor.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

BIOL 559 - Fungi and Ecosystems

Credits: 3
Not Repeatable for Credit
Offered by School of Systems Biology
Considers impact of fungi on ecosystems in terms of their effects on biogeochemical cycling, primary and secondary production, and regulating community structure and populations of individual species through their activities as symbionts and parasites. Discusses role of fungi in ameliorating pollutants produced by anthropogenic activities.

Prerequisite(s): BIOL 304 or a course in microbiology, or permission of instructor.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

BIOL 560 - Infectious Diseases of Wildlife
During this course, diseases of wildlife will be examined with emphasis on causes and mechanisms, pathobiology, ecology and epidemiology and population significance. We will explore methods of diagnosis, control, prevention and outbreak investigation as they apply to management and conservation of wildlife populations. Also, diseases crossing species barriers will be examined.

**Prerequisite(s):** Courses on Evolution, Ecology, Zoology and Conservation Biology of Instructor's permission.

**Schedule Type:** LEC
**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0

**BIOL 561 - Comparative Animal Physiology**

Credits: 3
Not Repeatable for Credit
Offered by School of Systems Biology
Detailed study of selected physiological systems of invertebrates and vertebrates, emphasizing current research.

**Prerequisite(s):** BIOL 326, or permission of instructor.

**Schedule Type:** LEC
**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0

**BIOL 562 - Personalized Medicine**

Credits: 3
Not Repeatable for Credit
Offered by School of Systems Biology
Covers basic principles of molecular medicine, including the definition and the need for individualized diagnostics and therapeutics. Students will study the application of proteomics, genomics and bioinformatics as they relate to individualized therapy, and review the major advances in these fields which have relevance to molecular medicine of the future.

**Prerequisite(s):** Advanced undergraduate coursework in Genetics and Molecular Cell Biology.

**Schedule Type:** LEC
**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0

**When Offered:** Spring

**BIOL 563 - Virology**

Credits: 3
Not Repeatable for Credit
Offered by School of Systems Biology
Fundamental concepts of nature of viruses, virus classification, cultivation, and biochemistry. Emphasizes bacteriophage and animal viruses.
BIOL 564 - Techniques in Virology

Credits: 2
Not Repeatable for Credit
Offered by School of Systems Biology
Basic techniques of animal virus propagation, isolation, and quantitation.

Prerequisite(s): BIOL 563, or permission of instructor.
Corequisite(s): BIOL 563, or permission of instructor.

Schedule Type: LAB, LEC
Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 3

BIOL 566 - Cancer Genomics

Credits: 3
Not Repeatable for Credit
Offered by School of Systems Biology
Review of modern concepts in cancer biology including taxonomy of human tumors, common cancer syndromes, and genome instability. Genetic and molecular studies of tumor cell proliferation, migration, invasion, and death.

Prerequisite(s): Course in genetics or biochemistry.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

BIOL 568 - Advanced Topics in Molecular Genetics

Credits: 3
Repeatable within Degree for Credit
Offered by School of Systems Biology
Comprehensive study of regulatory mechanisms controlling gene expression in viruses, prokaryotes, and eukaryotes, emphasizing current research.

Prerequisite(s): BIOL 482, or permission of instructor.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
BIOL 572 - Human Genetics

Credits: 3
Not Repeatable for Credit
Offered by School of Systems Biology
Inheritance of humans emphasizing current problems, including genetic control of metabolic diseases, effects of radiation and chemical agents in environment, and directed genetic change.

Prerequisite(s): BIOL 311, or permission of instructor.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

BIOL 573 - Developmental Genetics

Credits: 3
Not Repeatable for Credit
Offered by School of Systems Biology
Genetic approaches to problem of eukaryotic development, emphasizing current research on regulation of gene enzyme systems.

Prerequisite(s): BIOL 311, or permission of instructor.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

BIOL 574 - Population Genetics

Credits: 4
Not Repeatable for Credit
Offered by School of Systems Biology
Genetic structure and dynamics of populations, both real and ideal.

Prerequisite(s): BIOL 308 and 311, or permission of instructor.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

BIOL 575 - Selected Topics in Genetics

Credits: 1-4
Repeatable within Term for Credit
Offered by School of Systems Biology
Different topics in different years, including molecular, developmental, physiological, and classical genetics, emphasizing current problems and research.
BIOL 577 - Biogeochemistry: A Global Perspective

Credits: 3
Not Repeatable for Credit
Offered by School of Systems Biology
Structure and function of ecosystems, their interactions as components of landscapes, and contributions to global environment. Emphasizes biogeochemical cycles of natural, disturbed, and managed ecosystems, and their integration at landscape and global level as related to current ecological problems such as transfer of nonpoint source pollutants, atmospheric deposition, stratospheric ozone depletion, and global change.

Prerequisite(s): BIOL 308, CHEM 211, 212 or permission of instructor.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

BIOL 578 - Mutation, DNA Repair, and Environmental Contamination

Credits: 3
Not Repeatable for Credit
Offered by School of Systems Biology
Overview of relationship between environmental contamination and genetic damage. Covers types of contamination that result in mutations, and molecular mechanisms of DNA damage and repair.

Prerequisite(s): BIOL 307 and 311.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

BIOL 579 - Molecular Evolution and Conservation Genetics

Credits: 3
Not Repeatable for Credit
Offered by School of Systems Biology
Evolution of genes and gene families at molecular level, including gene duplication and divergence, positive and negative selection, genetic drift, and molecular clocks. Also includes selected applications in conservation genetics, such as molecular phylogenetics and estimates of population size.

Prerequisite(s): BIOL 311.
Corequisite(s): BIOL 471, or permission of instructor.
BIOL 580 - Computer Applications for the Life Sciences

Credits: 3
Not Repeatable for Credit
Offered by School of Systems Biology
Studies computer use in biological sciences. Combines lectures, supervised exercises on mainframe and microcomputers. Students present seminars on advanced application and complete project using computers to fulfill a major assignment associated with another course or employment.

Prerequisite(s): 12 credits of biology and one year of college mathematics, or permission of instructor.

BIOL 581 - Estuarine and Coastal Ecology

Credits: 3
Not Repeatable for Credit
Offered by School of Systems Biology
Emphasizes marine biology of estuarine and coastal habitats of Chesapeake Bay region, and factors affecting distribution and abundance of organisms.

Equivalent to EVPP 581

Prerequisite(s): Course in Ecology and permission of instructor.

BIOL 582 - Estuarine and Coastal Ecology Laboratory

Credits: 1
Not Repeatable for Credit
Offered by School of Systems Biology
Continues EVPP 546/BIOL 546 as the laboratory section focusing on the approach and methods of estuarine research, including analysis and communication of results.

Equivalent to EVPP 582

Corequisite(s): BIOL/EVPP 581

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
BIOL 583 - General Biochemistry

Credits: 4
Not Repeatable for Credit
Offered by School of Systems Biology
Structure and function of proteins, carbohydrates and lipids, enzymology, and metabolism and its controls. Emphasizes chemistry of nitrogen compounds.

Prerequisite(s): BIOL 213; CHEM 313, 314; or permission of instructor.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 1-2
Hours of Lab or Studio per week: 3

BIOL 585 - Eukaryotic Cell Biology Laboratory

Credits: 1-2
Not Repeatable for Credit
Offered by School of Systems Biology
Selected topics of laboratory procedures used in the study of eukaryotic cells.

Prerequisite(s): BIOL 484 or BIOL 682, or permission of instructor.
Notes: May be repeated one time with permission of program director.

Schedule Type: LAB
Hours of Lecture or Seminar per week: 0-1
Hours of Lab or Studio per week: 3-6

BIOL 589 - Teaching Practicum

Credits: 1
Not Repeatable for Credit
Offered by School of Systems Biology
Experience teaching biology in laboratory or in field under supervision of faculty member.

Prerequisite(s): Permission of instructor, chair, and course coordinator (if any).
Notes: Undergraduate assists instructor. May be repeated once.

Schedule Type: IND,
LEC
Hours of Lecture or Seminar per week: 3-6
Hours of Lab or Studio per week: 3
BIOL 591 - Special Topics

Credits: 1-6
Repeatable within Degree for Credit
Offered by School of Systems Biology
Prerequisite(s): Permission of instructor.
Schedule Type: LAB, LEC
Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 1-21

BIOL 607 - Fundamentals of Ecology

Credits: 3
Not Repeatable for Credit
Offered by School of Systems Biology
Overview of concepts in physiological, population, community, and ecosystem ecology. Restricted to graduate students with little or no background in ecology.

Equivalent to EVPP 607

Prerequisite(s): Permission of department.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

BIOL 608 - Topics in Biology

Credits: 1-4
Repeatable within Degree for Credit
Offered by School of Systems Biology
In-service course to strengthen and update teacher's knowledge of biology. Topics include organismal biology, cell biology, ecology, microbiology, or genetics.

Prerequisite(s): Employment or anticipated employment as science teacher.
Notes: Not available for credit toward MS in biology, or PhD in environmental science and public policy. May be repeated for credit with permission of department chair.

Schedule Type: LAB, LEC
Hours of Lecture or Seminar per week: 1-4
Hours of Lab or Studio per week: 0-9

BIOL 610 - Bioremediation: Theory and Applications
BIOL 610 - Techniques in Environmental Microbiology

Credits: 3
Not Repeatable for Credit
Offered by School of Systems Biology
Provides basis for understanding proper application of bioremedial technologies to treatment for hazardous wastes. Includes evaluation of data to determine successful treatment.

Equivalent to EVPP 610

Prerequisite(s): Course in microbiology and either organic chemistry or microbial physiology or equivalent or permission of instructor.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

BIOL 611 - Techniques in Environmental Microbiology

Credits: 2
Not Repeatable for Credit
Offered by School of Systems Biology
Laboratory exercises illustrate techniques to demonstrate microbial degradation, detection of microbes, isolation, and evaluation of physiological and genetic characteristics.

Prerequisite(s): Laboratory course in microbiology, or permission of instructor.

Notes: Open first to those enrolled in BIOL 610.

Schedule Type: LAB
Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 4

BIOL 643 - Microbial Ecology

Credits: 4
Not Repeatable for Credit
Offered by School of Systems Biology
Study of relationships between microorganisms and their natural environment, and methodology for observing their natural environment and biochemical activities in that environment.

Equivalent to EVPP 643

Prerequisite(s): Course in microbiology, or permission of instructor.

Schedule Type: LAB, LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 3

BIOL 644 - Wetland Ecology and Management
BIOL 645 - Freshwater Ecology

Credits: 3
Not Repeatable for Credit
Offered by School of Systems Biology
Prerequisite(s): EVPP 550 or permission of instructor.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

BIOL 648 - Population Ecology

Credits: 3
Not Repeatable for Credit
Offered by School of Systems Biology
Survey of ecological models and theory. Topics include population growth and regulation; competition; predator-prey, herbivore-plant, and parasite-host interactions; mutualism; and metapopulation ecology.
Equivalent to EVPP 648
Prerequisite(s): Course in ecology, or permission of instructor.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

BIOL 649 - Biological Resource Management

Credits: 3
Not Repeatable for Credit
Offered by School of Systems Biology
Applies modern ecological theories and methods to biological resource management in developing and developed countries. Explores problems in achieving optimum productivity of specific resources and application of systems analysis.
Prerequisite(s): Course in ecology, or permission of instructor.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
BIOL 650 - Environment Analysis and Modeling

Credits: 4
Not Repeatable for Credit
Offered by School of Systems Biology
Prerequisite(s): 8 hours of ecology or permission of instructor.
Schedule Type: LAB,
LEC
Hours of Lecture or Seminar per week: 4
Hours of Lab or Studio per week: 1-12

BIOL 665 - Environmental Hazards to Human Health

Credits: 3
Not Repeatable for Credit
Offered by School of Systems Biology
Health effects of chemical contaminants of air, water, and food resulting from industrialized society. Includes identifying, evaluating, and controlling hazards.

Prerequisite(s): Courses in animal physiology and organic chemistry, or permission of instructor.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

BIOL 666 - Human Genetics Concepts for Health Care

Credits: 3
Not Repeatable for Credit
Offered by School of Systems Biology
Principles of genetically determined diseases with emphasis on clinical aspects of these diseases, genetic counseling, and laboratory methods used in human genetics. Extended studies students preparing to enter medical or dental school are welcome.

Prerequisite(s): BS degree or enrollment in accelerated MS program.
Notes: Course in cell or molecular biology. Not available to students who have taken BIOL 572.

Schedule Type: LEC,
RCT
Hours of Lecture or Seminar per week: 4
Hours of Lab or Studio per week: 0

BIOL 668 - Advanced Techniques in Molecular Biology

Credits: 4
Not Repeatable for Credit
Offered by School of Systems Biology
Experimental studies using current methods for purification and characterization of biologically important compounds. Provides
training for research in molecular biology.

**Prerequisite(s):** BIOL 568, or permission of instructor.

**Schedule Type:** LAB, LEC

**Hours of Lecture or Seminar per week:** 2

**Hours of Lab or Studio per week:** 6

---

**BIOL 669 - Pathogenic Microbiology**

Credits: 3

Not Repeatable for Credit

Offered by School of Systems Biology

Molecular mechanisms of bacterial pathogenicity and immune response in infectious diseases.

**Prerequisite(s):** Courses in microbiology and biochemistry.

**Schedule Type:** LEC

**Hours of Lecture or Seminar per week:** 3

**Hours of Lab or Studio per week:** 0

---

**BIOL 675 - Aerosol Biology**

Credits: 4

Not Repeatable for Credit

Offered by School of Systems Biology

Provides students with familiarity with the state of the art aerosol equipment and techniques used in laboratory-based research pertaining to biological warfare or terrorism threats. Emphasis will be placed on biosafety procedures, techniques, and equipment used in conducting experiments with infectious organisms in a contained environment.

**Prerequisite(s):** Undergraduate courses in physics, math, and microbiology, and permission of the Director of the Center for Biodefense.

**Schedule Type:** LAB, LEC

**Hours of Lecture or Seminar per week:** 3

**Hours of Lab or Studio per week:** 3

---

**BIOL 678 - Cell-Based Assays**

Credits: 2

Not Repeatable for Credit

Offered by School of Systems Biology

Focus on 1) basics of eukaryotic cell culture; 2) various cell based assay techniques; 3) Real-Time PCR based functional analysis of the signaling pathways. Students will maintain their cell cultures for the duration of the experiments, perform at least one functional assay and analyze the resultant data. Students are expected to learn the properties and limitations of each cell based assay and should be able to explain their results regardless of the outcome. Each student will be responsible for submitting a written report summarizing the design of their experiments and its results. Each report will include the following sections: Introduction, Methods, Results and Discussion, and a special Troubleshooting section.
Prerequisite(s): Permission of Instructor, and 400-level coursework in cell or molecular biology.  
Notes: A lab fee of $300 will be charged per student for lab supplies.

Schedule Type: LAB, LEC  
When Offered: Fall, Spring

BIOL 680 - Experimental Design and Analysis for the Life Sciences

Credits: 4  
Not Repeatable for Credit  
Offered by School of Systems Biology  
Advanced course in applying probability and statistics to research in life sciences. Examples drawn from environmental, medical, physiological, genetic, and chemical biology.  
Prerequisite(s): Course in biostatistics, or permission of instructor.  
Schedule Type: LAB, LEC  
Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 3

BIOL 682 - Advanced Eukaryotic Cell Biology

Credits: 3  
Not Repeatable for Credit  
Offered by School of Systems Biology  
Structure and function of biomembranes, cytoskeleton, and transport systems. Also discusses protein trafficking, cell cycle, and cell adhesion molecules.  
Prerequisite(s): BIOL 483, CHEM 313, 314; or permission of instructor.  
Schedule Type: LEC  
Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0

BIOL 685 - Emerging Infectious Diseases

Credits: 3  
Not Repeatable for Credit  
Offered by School of Systems Biology  
Students will gain an understanding of the pathogenesis of emerging and/or re-emerging infectious diseases in terms of immune response and systemic alterations. Factors contributing to emergence and virulence for each pathogen will be emphasized. Epidemiology, disease progression, treatment strategies and/or control measures of identified emerging infectious diseases will be discussed.  
Prerequisite(s): BIOL 213 and 311, 482 or equivalent; or Permission of Instructor.  
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring.

**BIOL 690 - Introduction to Graduate Studies in Biology**

Credits: 1-2
Not Repeatable for Credit
Offered by School of Systems Biology
Required of all new MS students in biology.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 1-2
Hours of Lab or Studio per week: 0

**BIOL 691 - Current Topics in Biology**

Credits: 1-4
Repeatable within Term for Credit
Offered by School of Systems Biology
Study of current topics in biology as determined by instructor. Topics vary and center on emerging areas of investigation in the biological sciences. May be repeated for credit.

Notes: May be repeated for credit.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 1-4
Hours of Lab or Studio per week: 0-6

**BIOL 692 - Seminar in Biology**

Credits: 1
Repeatable within Degree for Credit
Offered by School of Systems Biology
Topics vary.

Notes: May be repeated for credit.

Schedule Type: SEM
Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0

**BIOL 693 - Directed Studies in Biology**
Credits: 1-8
Repeatable within Degree for Credit
Offered by School of Systems Biology
Study of topic not otherwise available in graduate program. May involve any combination of reading assignments, tutorials, lectures, papers, presentations, or laboratory or field study, determined in consultation with instructor.

Prerequisite(s): Permission of instructor, chair, and graduate committee.
Notes: May not be used to fulfill explicit undergraduate prerequisites for graduate work.

Schedule Type: IND
Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0
Grading: Graduate Special

BIOL 695 - Seminar in Molecular, Microbial, and Cellular Biology

Credits: 1
Repeatable within Term for Credit
Offered by School of Systems Biology
Review and discussion of recent literature in specialized area. Includes student presentations.

Notes: May be repeated for credit.

Schedule Type: SEM
Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0

BIOL 715 - Microbial Physiology

Credits: 3
Not Repeatable for Credit
Offered by School of Systems Biology
Comprehensive study of functioning of microbial cells, with emphasis on pathogens. Stresses growth, transport, cell-to-cell signaling, biofilm formation, antibiotic resistance, and secondary metabolites.

Prerequisite(s): Undergraduate lecture/lab course in microbiology, and course in biochemistry.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

BIOL 718 - Techniques in Microbial Pathogenesis

Credits: 3
Not Repeatable for Credit
Offered by School of Systems Biology
Laboratory-based class in which students perform current techniques in microbial pathogenesis.
Prerequisite(s): Admission to biosciences PhD or biology MS program, and permission of instructor.
Schedule Type: LAB
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 3

BIOL 720 - Microbial Metabolism

Credits: 3
Not Repeatable for Credit
Offered by School of Systems Biology
Discussions of catabolic and anabolic pathways of bacterial pathogens and regulation and integration of these pathways.

Prerequisite(s): Undergraduate lecture/lab course in microbiology, and course in biochemistry.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

BIOL 745 - Environmental Toxicology

Credits: 3
Not Repeatable for Credit
Offered by School of Systems Biology
Study of nature, distribution, and interaction of toxic chemicals released into the environment. Emphasizes effects on nonhuman biota, detection and fate of chemicals, and implications for government regulation.
Equivalent to EVPP 745

Prerequisite(s): Courses in ecology and physiology, or permission of instructor.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

BIOL 793 - Research in Biology

Credits: 1-3
Repeatable within Degree for Credit
Offered by School of Systems Biology
Library, laboratory, or field investigation under supervisor's guidance.

Prerequisite(s): 8 graduate credits in BIOL, and permission of instructor and chair.
Notes: May be repeated for total 3 credits.
Schedule Type: IND
Hours of Lecture or Seminar per week: 3-9
Hours of Lab or Studio per week: 0
Grading: Graduate Special
**BIOL 798 - Master's Research Project**

Credits: 1-3  
Repeatable within Degree for Credit  
Offered by School of Systems Biology  
Experimental or theoretical research project chosen and completed under guidance of graduate faculty member. Comprehensive report acceptable to student's advisory committee is required.

Prerequisite(s): Permission of instructor and department chair.  
Notes: Students who take BIOL 793 may not receive more than 6 credits total for both BIOL 793 and 798.

Schedule Type: IND  
Hours of Lecture or Seminar per week: 1-6  
Hours of Lab or Studio per week: 0  
Grading: S/NC

**BIOL 799 - Thesis**

Credits: 1-6  
Repeatable within Degree for Credit  
Offered by School of Systems Biology  
Thesis research under direction of supervisor.

Prerequisite(s): 8 graduate hours in BIOL and permission of instructor.  
Notes: Students who take BIOL 793 may not receive more than 6 credits total for both BIOL 793 and 799.

Schedule Type: IND  
Hours of Lecture or Seminar per week: 1-6  
Hours of Lab or Studio per week: 0  
Grading: S/NC

**Biomedical Sciences (BMED)**

Offered by the College of Science

**BMED 550 - Special Topics in Biomedicine**

Credits: 2  
Not Repeatable for Credit  
Offered by College of Science  
This course presents various topics in biomedicine in a lecture/seminar format. Students build on the ABS Certificate curriculum to enhance their understanding of biomedical issues and better prepare for careers in the health professions.

Prerequisite(s): Successful completion of the first semester of the ABS Certificate curriculum (Biochemistry, Biostatistics, Histology).
Corequisite(s): Spring ABS Certificate courses (Human Anatomy, Human Physiology).

Notes: Restricted to ABS Certificate students (CERG-ABS) and by invitation from the BMED director only.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 2
When Offered: Spring

BMED 601 - Cell and Molecular Physiology

Credits: 4
Not Repeatable for Credit
Offered by College of Science
Principles of biochemistry and cell signaling and current concepts regarding physiological processes at the cellular and molecular levels.

Prerequisite(s): Admission to Advanced Biomedical Science certificate program
Schedule Type: LEC
Hours of Lecture or Seminar per week: 4
Hours of Lab or Studio per week: 0
When Offered: Fall

BMED 602 - Biomedical Statistics

Credits: 3
Not Repeatable for Credit
Offered by College of Science
Basic principles of biostatistics and epidemiology in theoretical and practical context including: exploring and displaying data appropriately, exploring relationships between two variables, issues of gathering sample data, and understanding randomness and probability.

Prerequisite(s): Admission to Advanced Biomedical Science certificate program
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

BMED 603 - Cell Biology and Microscopic Anatomy

Credits: 3
Not Repeatable for Credit
Offered by College of Science
Examines basic histological techniques, ultrastructure of the cell, basic tissue types and histology of specific organ systems. Structure-functional and clinical correlations are described.

Prerequisite(s): Admission to Advanced Biomedical Science certificate program
Schedule Type: LEC
BMED 604 - Fundamentals of Human Physiology

Credits: 5  
Not Repeatable for Credit  
Offered by College of Science  
Essential concepts of physiology and mechanisms of body function are presented at various levels of organization, ranging from cellular and molecular to tissue and organ system levels. Emphasis is placed on understanding the integrated regulation of various body processes among the major systems.

Prerequisite(s): Admission to Advanced Biomedical Science certificate program  
Schedule Type: LEC  
Hours of Lecture or Seminar per week: 5  
Hours of Lab or Studio per week: 0  
When Offered: Spring

BMED 605 - Introduction to Human Anatomy

Credits: 3  
Not Repeatable for Credit  
Offered by College of Science  
Principles of anatomy as well as the pertinent anatomy associated with the thorax, abdomen, and pelvic cavities.

Prerequisite(s): Admission to Advanced Biomedical Science certificate program  
Schedule Type: LEC  
Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0  
When Offered: Spring

BMED 610 - Principles of Systems Biology

Credits: 2  
Not Repeatable for Credit  
Offered by College of Science  
Students will build on their knowledge of cellular and molecular biology, genetics, and physiology to understand how these components combine to give rise to complex systems function found in biology.

Prerequisite(s): Admission to Biomedical Sciences MS program  
Schedule Type: LEC  
Hours of Lecture or Seminar per week: 2  
Hours of Lab or Studio per week: 1-3  
When Offered: Fall
BMED 611 - Molecular Genetics

Credits: 2
Not Repeatable for Credit
Offered by College of Science
Students will build on their knowledge of molecular biology and genetics to understand how these components' functions are altered during the inception and course of human disease.

Prerequisite(s): Admission to Biomedical Sciences master's degree
Schedule Type: LEC
Hours of Lecture or Seminar per week: 4
Hours of Lab or Studio per week: 0
When Offered: Fall

BMED 612 - Principles of Gross Anatomy

Credits: 1
Not Repeatable for Credit
Offered by College of Science
Principles of anatomy as well as the pertinent anatomy associated with the thorax, abdomen, and pelvic cavities.

Prerequisite(s): Admission to Biomedical Science's master's program
Schedule Type: LEC
Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 0
When Offered: Fall

BMED 613 - Pathophysiology

Credits: 3
Not Repeatable for Credit
Offered by College of Science
Students build on knowledge of physiologic principles and apply the information to pathologic conditions. A higher understanding of the molecular and genetic basis of pathology will be developed as the mechanisms of disease are studied.

Prerequisite(s): Admission to Biomedical Sciences master's program
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring

BMED 614 - Introduction to Neuroscience

Credits: 3
Not Repeatable for Credit
Offered by College of Science
Achieve specific knowledge of the developmental and evolutionary aspects of the nervous system, to introduce systems neurobiology through study of the visual system and motor system pathways.

**Prerequisite(s):** Admission to Biomedical Science's master's program

**Schedule Type:** LEC

**Hours of Lecture or Seminar per week:** 3

**Hours of Lab or Studio per week:** 0

**When Offered:** Spring

**BMED 651 - Physician and Society**

Credits: 1
Repeatable within Degree for Credit
Offered by College of Science
Seminar series explores the cultural, social, economic and ethical factors that affect the practice of medicine in the 21st century.

**Prerequisite(s):** Admission to Advanced Biomedical Science certificate program

**Notes:** May be repeated for a maximum of two credits

**Schedule Type:** SEM

**Hours of Lecture or Seminar per week:** 2

**Hours of Lab or Studio per week:** 0

**Grading:** Satisfactory/No Credit

**When Offered:** Fall, Spring

**BMED 652 - Biomedical Career Pathways**

Credits: 1
Not Repeatable for Credit
Offered by College of Science
Series of workshops, presentations and field trips. Students will learn study and interview skills to become better prepared to complete AMCAS and secondary applications to medical schools.

**Prerequisite(s):** Admission to Advanced Biomedical Studies certificate program.

**Schedule Type:** SEM

**Hours of Lecture or Seminar per week:** 1

**Hours of Lab or Studio per week:** 0

**When Offered:** Spring

**BMED 653 - Forum and Research**

Credits: 3
Not Repeatable for Credit
Offered by College of Science
Bi-weekly seminar-style presentations and reading assignments, followed by short student reports, followed by a small group discussions on topics of current interest. Students will prepare a detailed research paper on a topic related to one of the forum topics.
BMED 660 - Molecular and Cellular Physiology

Credits: 3
Not Repeatable for Credit
Offered by College of Science
Biochemistry and physiology of the typical cell. The biochemical focus will be on the fundamentals of the forces affecting molecular interactions, the structure-function relationships of proteins and carbohydrates, kinetics and catalysis, and high-throughput analysis of proteins in clinical samples. The physiological focus will be on the structure and function of subcellular organelles, and the foundations of some specialized cells – blood and lymphoid cells, muscle cells, and nerve cells.

Prerequisite(s): Admission to Biomedical Sciences master's program
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

BMED 661 - Metabolism, Nutrition and Endocrinology

Credits: 4
Not Repeatable for Credit
Offered by College of Science
Students will learn the pathways involved in energy metabolism, biosynthesis, and catabolism of waste products in preparation for excretion. Major emphasis will be on the coordination of metabolic pathways in the major organs and tissues through hormonal regulation.

Prerequisite(s): Admission to Biomedical Sciences master's program
Schedule Type: LEC
Hours of Lecture or Seminar per week: 4
Hours of Lab or Studio per week: 0

BMED 662 - Cardiopulmonary Biology

Credits: 1-5
Repeatable within Degree for Credit
Offered by College of Science
Anatomy, hemodynamic function, and electrophysiology of the cardiovascular and respiratory system.

Prerequisite(s): Admission to the Biomedical Sciences master's program.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 5
BMED 663 - Gastrointestinal Biology

Credits: 2
Not Repeatable for Credit
Offered by College of Science

Embryologic development, gross and micro-anatomy, and physiologic function of the GI tract. Emphasis will be placed on understanding the integrated regulation of GI processes.

Prerequisite(s): Admission to Biomedical Sciences master's program
Schedule Type: LEC
Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 1-12
When Offered: Spring

BMED 664 - Renal Biology

Credits: 2
Not Repeatable for Credit
Offered by College of Science

Structural, functional and integrative aspects of the kidney and urinary system; identify the basic physiologic mechanisms that underpin renal function; and explain the role the kidney plays in fluid and electrolyte homeostasis, including acid-base balance.

Prerequisite(s): Admission to Biomedical Sciences master's program
Schedule Type: LEC
Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 0
When Offered: Spring

BMED 665 - Sexual Development and Reproduction

Credits: 3
Not Repeatable for Credit
Offered by College of Science

Cellular and anatomical components of reproduction and early development. These components include the development of the reproductive tract, development of gametes, fertilization, and formation of the germ layers and endocrinology of the system.

Prerequisite(s): Admission to the Biomedical Sciences master's program
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring
Biosciences (BIOS)

Offered by the College of Science

BIOS 701 - Systems Biology

Credits: 3
Not Repeatable for Credit
Offered by School of Systems Biology
Introduces biochemical systems to investigate complex, multicomponent, dynamic functions of cellular systems. Readings include articles from current literature in molecular biosciences. Application of molecular techniques within biosciences is now universal, and the underlying question remains "What is the structure of a cell, and how does it function?"

Equivalent to BINF 701

Prerequisite(s): General biochemistry.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

BIOS 702 - Research Methods

Credits: 3
Not Repeatable for Credit
Offered by School of Systems Biology
Trains students in research methodologies, techniques, and data analysis in life sciences. Divided into three modules that introduce separate but equally significant components of any research project: parameters required to outline and synthesize a problem, techniques of measurement and analysis used by life scientists, and approaches for data analysis and interpretations.

Prerequisite(s): Admission to PhD program in biosciences.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

BIOS 703 - Laboratory Rotation

Credits: 3
Repeatable within Term for Credit
Offered by School of Systems Biology
Intensive introduction to research laboratory in biosciences. Students read background material pertinent to problem under study, learn and practice research methods of laboratory, and formulate short final project that may be proposal or actual project, demonstrating some mastery of techniques and approaches employed.

Prerequisite(s): Admission to PhD program in biosciences.
Notes: Should be repeated three times (except by permission of concentration director).
BIOS 704 - Topics in Biosciences

Credits: 1
Repeatable within Term for Credit
Offered by School of Systems Biology
Combines invited seminars from internal and external faculty with graduate student seminars. Seminar presentation required for advancement to candidacy, generally given in last semester before candidacy. Includes discussion section led by course coordinator.

Prerequisite(s): Admission to PhD program in biosciences.
Notes: Required of all students during each semester prior to advancement to candidacy. Should be repeated three times (except by permission of concentration director).

BIOS 710 - Current Topics in Bioscience

Credits: 1-3
Repeatable within Term for Credit
Offered by School of Systems Biology
Studies current topic in biosciences.

Prerequisite(s): Admission to biosciences PhD or biology MS program.
Notes: Topics vary. May be repeated for credit with permission of concentration director.

BIOS 719 - Extremophiles

Credits: 5
Not Repeatable for Credit
Offered by School of Systems Biology
Schedule Type: LAB, LEC
Hours of Lecture or Seminar per week: 5
Hours of Lab or Studio per week: 1-12
BIOS 740 - Laboratory Methods in Functional Genomics and Biotechnology

Credits: 3
Not Repeatable for Credit
Offered by School of Systems Biology
Current laboratory techniques in molecular biology and genomics, including nucleic acid isolation, gene cloning and sequencing, gel blot analysis, PCR, in vitro mutagenesis, and theory and practice of DNA microarray analysis of gene expression. Topics may vary from year to year depending on advances in field.

Prerequisite(s): Graduate standing and undergraduate courses in genetics and molecular biology.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 3

BIOS 741 - Genomics

Credits: 3
Not Repeatable for Credit
Offered by School of Systems Biology
Genetic structure and function at whole genome level. Includes some sequence analysis, comparative genomics, classical genetics, and developmental genetics, as well as analysis of syntenic groups, isochores, gene families, genetic complexity, C value paradox, directed discovery of gene functions, and animal models of human disease. Readings from recent texts and primary research literature. Students expected to give one or two oral presentations of primary research papers, as well as complete midterm and final exams.

Prerequisite(s): At least one undergraduate course in genetics and molecular biology, or permission of instructor.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

BIOS 742 - Biotechnology

Credits: 3
Not Repeatable for Credit
Offered by School of Systems Biology
Theory and applications of biotechnology. Includes promoter design, gene fusions, protein targeting, techniques of protein purification, construction of transgenic organisms, cloning of animals and plants, ethical and legal issues. This is a relatively new area of study that is rapidly changing; course strives to keep students abreast of current literature.

Prerequisite(s): Undergraduate course work in genetics and molecular biology.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
BIOS 743 - Genomics, Proteomics, and Bioinformatics

Credits: 3  
Not Repeatable for Credit  
Offered by School of Systems Biology  
Fundamental methods for analyzing genomic and proteomic data, including nucleic acid and protein sequences, pair-wise and multiple alignment, database search methods, clustering and presentation of data, prediction modeling, and survey of available software and freeware tools.

Prerequisite(s): Admission to biosciences PhD or biology MS program.  
Schedule Type: LEC  
Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0

BIOS 744 - Molecular Genetics

Credits: 3  
Not Repeatable for Credit  
Offered by School of Systems Biology  
Develops understanding of principles of modern molecular genetics and methods of investigation of genomes of pro- and eukaryotes, including types of genetic manipulations conducted in research laboratories today.

Prerequisite(s): Undergraduate course work including BIOL 311; CHEM 313, 314, 315, and 318; equivalents; or permission of instructor.  
Schedule Type: LEC  
Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0

BIOS 760 - Seminar in Molecular Systematics

Credits: 1-3  
Repeatable within Degree for Credit  
Offered by School of Systems Biology  
Presentations and discussion by students and faculty of research papers and projects.

Schedule Type: LEC  
Hours of Lecture or Seminar per week: 1-3  
Hours of Lab or Studio per week: 0

BIOS 761 - Dispersal Patterns of Biological Agents

Credits: 3  
Not Repeatable for Credit  
Offered by School of Systems Biology  
Introduces military and terrorist methods of dispersal patterns. Covers physics of aerosols, engineering and mechanics of building ventilation systems, and mechanical dissemination including handheld, automatic, vehicle, and truck-mounted systems. Also
covers viability of specific agents involved.

**Prerequisite(s):** Admission to biosciences PhD or biology MS program, and permission of instructor.

**Schedule Type:** LEC

**Hours of Lecture or Seminar per week:** 3

**Hours of Lab or Studio per week:** 0

**BIOS 762 - Phylogenetic Analysis**

Credits: 4  
Not Repeatable for Credit  
Offered by School of Systems Biology  
A consideration of molecular systematics techniques in biology, especially cladistics and phenetics methods. Species concepts, biological nomenclature, and classifications will also be discussed. Laboratory will emphasize phylogenetic methods using online sources of comparative data.

**Schedule Type:** LAB,  
LEC  
**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 3

**BIOS 765 - Molecular Systematics**

Credits: 4  
Not Repeatable for Credit  
Offered by School of Systems Biology  
Comparative evolutionary techniques applied to molecular data. Use of molecular techniques, molecular databases, and analytical techniques will be covered.

**Schedule Type:** LAB,  
LEC  
**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**BIOS 767 - Molecular Evolution**

Credits: 3  
Not Repeatable for Credit  
Offered by School of Systems Biology  
A review of the diversity and organization of genomes and evolutionary processes that operate at the molecular level. Emphasis will be placed on processes of molecular evolution and techniques used to analyze these processes.

**Schedule Type:** LEC  
**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0
BIOS 782 - Interdisciplinary Issues in Bioethics: Law and Policy

Credits: 3
Not Repeatable for Credit
Offered by School of Systems Biology
Prerequisite(s): BIOS 780 and 781.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

BIOS 898 - Directed Studies in Biosciences

Credits: 1-12
Repeatable within Degree for Credit
Offered by School of Systems Biology
Studies of specialized topics in biosciences. Specific arrangements for designing scope and area of study to be determined in consultation with instructor. May involve literature searches and review, workshops, or tutorials.

Prerequisite(s): Permission of research advisor.
Schedule Type: IND
Hours of Lecture or Seminar per week: 1-12
Hours of Lab or Studio per week: 0
Grading: Graduate Special

BIOS 899 - Directed Research in Biosciences

Credits: 1-12
Repeatable within Degree for Credit
Offered by School of Systems Biology
Research on a pertinent topic in biosciences. Scope and subject of research to be determined by instructor.

Prerequisite(s): Permission of research advisor.
Schedule Type: IND
Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0
Grading: Graduate Special

BIOS 998 - Doctoral Dissertation Proposal

Credits: 1-6
Repeatable within Degree for Credit
Offered by School of Systems Biology
Research and writing of research proposal for doctoral dissertation.

Prerequisite(s): Permission of research advisor.
Schedule Type: IND
BIOS 999 - Doctoral Dissertation Research

Credits: 1-12
Repeatable within Degree for Credit
Offered by School of Systems Biology
Research in concentration pertinent to students' program of study.

Prerequisite(s): Admission to candidacy or approval by research advisor.
Notes: Maximum of 24 credits can be applied toward degree.

Schedule Type: IND
Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0
Grading: Satisfactory/No credit only

Business (BUS)

Offered by the School of Business

BUS 100 - Business and Society

Credits: 3
Not Repeatable for Credit
Offered by School of Business
Provides students with a foundation for understanding the role of business in society by exploring the nature and history of business enterprise, the social context of business, and the interaction of individuals with business by selecting current events in business and analyzing the content as well as the impact of the reported activities.

Fulfills Mason Core requirement in social and behavioral science.

Equivalent to SOM 100 (2014-2015 Catalog).

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

BUS 103 - Develop Professional Skills I: Foundational Elements

Credits: 3
Not Repeatable for Credit
Offered by School of Business
Students will investigate and develop their professional skill set. Topics include introduction to the business school and business world, what it means to be professional, how to consume the business press, and how to research business issues. Develop professional writing and presentation skills, explore career options and the job search process, and develop personal educational and professional development plans.

Prerequisite(s): Degree status.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Summer, Spring

BUS 200 - Global Environment of Business

Credits: 3
Not Repeatable for Credit
Offered by School of Business

As world becomes increasingly connected, business serves as core institution that mediates relations between individuals across national boundaries. Provides overview of global environment of business through study of political economy, international institutions and international trade theories, and global conflicts and cooperation around issues (natural resources, labor, human rights, distribution of income, and the environment). Addresses implications of topics for business. Designated a Green Leaf Course.

Fulfills Mason Core requirement in global understanding.

Prerequisite(s): Degree status.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Summer, Spring

BUS 210 - Business Analytics I

Credits: 3
Not Repeatable for Credit
Offered by School of Business

Course introduces business analytics and why businesses use analytics to create and sustain competitive advantage. Topics include data types, summarization and graphical display of data, application of basic probability rules, and probability distributions. Introduces fundamentals of spreadsheets and their use in business applications. Learn how to apply appropriate analytical tools to gain useful insights from real-life datasets.

Prerequisite(s): Degree status.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Summer, Spring
BUS 303 - Develop Professional Skills II: Advanced Elements

Credits: 3  
Limited to 3 Attempts  
Offered by School of Business  
In this course, students will continue to develop their professional skill set. Topics covered include understanding the modern work environment, business ethics and professional responsibilities, and professional judgment. Students will also continue to hone their professional writing and presentation skills, prepare for the job search process, and develop personal job search and professional development plans.

Prerequisite(s): Grade of C or higher in BUS 103. Sophomore standing. Degree status.  
Prerequisite(s) enforced by registration system.

Notes: School of Business students will not be permitted to make more than three attempts to achieve a C or higher in BUS 303. Those who do not successfully complete this course within three attempts will be terminated from their major and will not be eligible to receive a degree from the School of Business. For more information about this, see the "Termination from the Major" section under Academic Policies.

Schedule Type: LEC  
Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0  
When Offered: Fall, Summer, Spring

BUS 310 - Business Analytics II

Credits: 3  
Not Repeatable for Credit  
Offered by School of Business  
Introduces modeling relationships contained in data and linear models to make (predictions in business. Topics include estimation, hypothesis testing, statistical inference, analysis of variance and linear regression techniques. Fundamentals of linear programming to solve optimization problems in business. Apply analytical tools to gain insights from real-life datasets. Hands-on experience and application of the methods to data sets using spreadsheet software.

Prerequisite(s): Grade of C or higher in BUS 210. Degree status.  
Prerequisite(s) enforced by registration system.

Schedule Type: LEC  
Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0  
When Offered: Fall, Summer, Spring

BUS 492 - Undergraduate Internship

Credits: 3  
Repeatable within Degree for Credit  
Offered by School of Business  
Opportunity to gain practical, professional experience in conjunction with academic development. Internship is an important part of academic and career preparation. May be used as elective credit, but may not be repeated.

Prerequisite(s): Grade of C or higher in the 301 or 303 in the major. ISOM majors must complete MIS 301 or MIS 303 and OM 301 or OM 303. Degree status.

Notes: No more than 6 credits of School of Business internship coursework (BUS 492 or ACCT 492) can be applied towards a student's 120 (BU) degree applicable credits. Students must receive departmental approval in order to register for this course; please contact the School of Business for internal eligibility requirements.

Schedule Type: INT
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

BUS 498 - Capstone Course: Advanced Business Models

Credits: 3
Not Repeatable for Credit
Offered by School of Business
Advanced integrated exploration of business models and industry dynamics that uses case analyses to assess competition, organizational strategy, and firm performance. Students examine strategic change in organizations from multiple perspectives, integrating knowledge from core course work into several papers and major presentation. Students receive coaching from area business leaders as they complete their presentations.

Fulfills Mason Core requirement in synthesis.

Prerequisite(s): One course from each of the following groups with a D or higher:
ACCT 301, ACCT 303 or ACCT 330
BULE 302 or BULE 303
BUS 303 or SOM 301
BUS 310 or OM 210
FNAN 301 or FNAN 303
MGMT 301 or MGMT 303
MIS 301 or MIS 303
MKTG 301 or MKTG 303
OM 301 or OM 303

Senior standing; Degree status.
Prerequisite(s) enforced by registration system.

Notes: Fulfills synthesis requirement for School of Business majors. The minimum grade of D or higher only reflects the pre-requisite requirement for BUS 498. Students must earn a C or higher in order to meet the Business Core and Foundations degree requirements.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring, Summer

Business Legal Studies (BULE)
Offered by the School of Business.

If a student takes noncore, upper-level business courses before admission to the School of Business, those courses will not count on an undergraduate degree application for any major in the school, except as general elective credit. A grade of C or higher must be presented on the graduation application for each upper-level course in the major. Course prerequisites are strictly enforced. Degree status is defined as formal admission to BS degree status in the School of Business.

**BULE 302 - Legal Environment of Business**

Credits: 3
Limited to 3 Attempts
Offered by School of Business

Survey of the legal environment of business, emphasizing legal concepts and legal reasoning to prepare students to recognize legal problems and formulate appropriate responses. Topics include the federal and state court systems, constitutional and administrative law, business torts and crimes, contracts and business ethics. Lecture, discussion, cases.

School of Business students will not be permitted to make more than three attempts to achieve a C or higher in BULE 302. Those who do not successfully complete this course within three attempts will be terminated from their major and will not be eligible to receive a degree from the School of Business. For more information about this, see the "Termination from the Major" section under Academic Policies.

Equivalent to BULE 303.

**Notes:** Students cannot receive credit for both BULE 302 and BULE 303.

**Schedule Type:** LEC

**Hours of Lecture or Seminar per week:** 3

**Hours of Lab or Studio per week:** 0

**When Offered:** Fall, Spring, Summer

**BULE 303 - Legal Environment of Business**

Credits: 3
Limited to 3 Attempts
Offered by School of Business

Survey of the legal environment of business, emphasizing legal concepts and legal reasoning to prepare students to recognize legal problems and formulate appropriate responses. Topics include the federal and state court systems, constitutional and administrative law, business torts and crimes, contracts and business ethics. Lecture, discussion, cases.

Equivalent to BULE 302.

**Prerequisite(s):** Degree status; sophomore standing.

**Notes:** School of Business students will not be permitted to make more than three attempts to achieve a C or higher in BULE 303. Those who do not successfully complete this course within three attempts will be terminated from their major and will not be eligible to receive a degree from the School of Business. For more information about this, see the "Termination from the Major" section under Academic Policies.

Students cannot receive credit for both BULE 302 and BULE 303.
Schedule Type: LEC  
Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0

**BULE 402 - Commercial Law**

Credits: 3  
Not Repeatable for Credit  
Offered by School of Business  
Survey of commercial law emphasizing the Uniform Commercial Code. Lecture, discussion, cases.

Prerequisite(s): Grade of C or higher in BULE 302 or BULE 303, degree status. Prerequisite enforced by registration system.

Schedule Type: LEC  
Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0  
When Offered: Fall, Spring

**Business Management (BMGT)**

Offered by the School of Business.

**BMGT 603 - Economics for Successful Firm Management**

Credits: 3  
Not Repeatable for Credit  
Offered by School of Business  
Provides fundamental understanding of applying microeconomics concepts to managerial decision making. Explores principles of microeconomic theory, including market supply and demand, production and cost functions, industry structure, and product and resource pricing. Due to the presentation and application of course material, this course can only be taken by students enrolled in the Master of Science in Management Program.

Prerequisite(s): Admission to MGMT program.

Schedule Type: LEC  
Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0

**BMGT 612 - Performance Evaluation Through Cost Management**

Credits: 3  
Not Repeatable for Credit  
Offered by School of Business  
Examines impact of cost and cost allocation on performance and evaluation. Due to the presentation and application of course material, this course can only be taken by students enrolled in the Master of Science in Management Program.
Prerequisite(s): Admission to MGMT program.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

BMGT 613 - Financial Reporting and Firm Analysis

Credits: 3
Not Repeatable for Credit
Offered by School of Business
Foundation course focusing on economics and analysis of business transactions and financial reporting issues. Topics include introduction to accounting framework in financial reporting; analysis of financial statements, economic events and impact on financial reports, and impact of accounting methods on financial reports. Due to presentation and application of course material, course only open to students enrolled in the Master of Science in Management program.

Prerequisite(s): Admission to MGMT program.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

BMGT 623 - Marketing and Firm Performance

Credits: 3
Not Repeatable for Credit
Offered by School of Business
Develops market-based knowledge and skills for effective marketing decision making, strategy design, implementation, and evaluation in variety of institutional and competitive situations. Addresses importance of companies being market-driven and customer-focused. Emphasis on case studies, team work, and projects. Due to the presentation and application of course material, this course is only open to students enrolled in the Master of Science in Management Program.

Prerequisite(s): Admission to MGMT program.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

BMGT 633 - Statistical Analysis for Management

Credits: 3
Not Repeatable for Credit
Offered by School of Business
Use statistical methods as analytical tools for understanding and solving business problems and supporting business decision making. Includes descriptive statistics, sampling, inferencing and regression. Extensive use of applied business scenarios to illustrate concepts and computer software for data analysis. Due to presentation and application of course material, this course can only be taken by students in the Master of Science in Management Program.

Prerequisite(s): Admission to MGMT program.
BMGT 638 - Managing Business Operations in a Global Environment

Credits: 3
Not Repeatable for Credit
Offered by School of Business
Focuses on design, planning, and control activities to produce and deliver goods/services in organizations. Introduces operations management decisions; operations strategy, process analysis and design, capacity planning, supply chain management, total quality management, and project management. Uses quantitative modeling, case studies, and computer software to analyze/solve problems. Due to the presentation and application of course material, course only open to Master of Science in Management students.

Prerequisite(s): Admission to MGMT program.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

BMGT 643 - Financial Management in a Global Environment

Credits: 3
Not Repeatable for Credit
Offered by School of Business
Introduces theory and practice of finance within corporations. Topics include intertemporal choice, valuation, capital budgeting and structure, working capital management, and risk and return analysis. Due to the presentation and application of course material, this course can only be taken by students enrolled in the Master of Science in Management Program.

Prerequisite(s): Admission to MGMT program.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

BMGT 653 - Fundamentals of Behavior in Organizations

Credits: 3
Not Repeatable for Credit
Offered by School of Business
Emphasizes development of conceptual tools for understanding and analyzing individual and group behavior in organizations and organizational processes. Considerable focus on developing relevant skills for working in groups and teams. Lectures, discussions, case analyses, and class exercises. Due to the presentation and application of course material, this course can only be taken by students enrolled in the Master of Science in Management program.

Prerequisite(s): Admission to MGMT program.
Schedule Type: LEC
BMGT 662 - Management of Information Technology

Credits: 3
Not Repeatable for Credit
Offered by School of Business
Strategic, economic and managerial aspects of managing organization's IT assets are covered. Business value of IT is understood and assessed in context of its impact on organization's structure and strategy. Includes discussion on major issues pertaining management of IT infrastructure. Due to presentation and application of course material, course is only open to students enrolled in the Master of Science in Management Program.

Prerequisite(s): Admission to MGMT program.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

BMGT 673 - Business Legal Environment

Credits: 1.5
Not Repeatable for Credit
Offered by School of Business
Examines the managerial impact of the law upon decision-making processes in business organizations. Lectures as well as discussions of judicial opinions and readings. Due to the presentation and application of course material, this course can only be taken by students enrolled in the Master of Science in Management Program.

Prerequisite(s): Admission to MGMT program.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 1.5
Hours of Lab or Studio per week: 0

BMGT 674 - Ethics in the Global Business Environment

Credits: 1.5
Not Repeatable for Credit
Offered by School of Business
Strengthens student's ability to identify, critically analyze, appropriately respond to, and provide leadership regarding issues of ethical and socially responsible behavior which they may confront as employees and managers of people, objects and organizations. Due to the presentation and application of course material, this course can only be taken by students enrolled in the Master of Science in Management Program.

Prerequisite(s): Admission to MGMT program.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 1.5
Hours of Lab or Studio per week: 0
BMGT 678 - Business Strategy and Firm Leadership

Credits: 3  
Not Repeatable for Credit  
Offered by School of Business  
Capstone focusing on strategy development at business unit and corporate level. Cases, readings, and project format familiarize students with strategic management function and help develop analytical, organizational, and managerial skills to analyze complex business situations. Opportunities to integrate knowledge gained in prior course work. Due to presentation and application of course material, course only open to students enrolled in the Master of Science in Management program.

Prerequisite(s): Admission to MGMT program.  
Schedule Type: LEC  
Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0  
Grading: Graduate Special

BMGT 692 - Professional Development Experience

Credits: 3  
Not Repeatable for Credit  
Offered by School of Business  
Professional experience in conjunction with academic development. Hands-on experience is an important part of academic and career preparation and may be completed by an internship, consulting project, independent study or additional global experience. Must involve an average of 15 hours per week and be approved by program director.

Prerequisite(s): Admission to MGMT program and completion of 18 credit hours in MGMT program.  
Schedule Type: INT  
Grading: Special Graduate.

BMGT 695 - Global Business Perspectives

Credits: 3  
Not Repeatable for Credit  
Offered by School of Business  
Includes a weeklong international student study tour lead by a full-time School of Business professor. Students interact with business and government leaders, participate in seminars, and visit sites of local or multinational companies. Focus on developing an increased understanding of global markets, competition, business strategy, and business opportunities in addition to the social and cultural dimensions of global business.

Prerequisite(s): Admission to MGMT program or permission of the program director.  
Schedule Type: LEC  
Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0  
Grading: Special Graduate.
MSIS 611 - Leadership and Change Management

Credits: 2  
Not Repeatable for Credit  
Offered by School of Business  
Distinguishes between leadership and management, and focuses on the critical roles and functions of leadership, including communication ability, use of power and influence, providing direction, aligning an organization's systems, motivating a workforce, and creating a culture for effectiveness. It also focuses on strategies for developing oneself as an effective leader.  
Equivalent to TECM 611 (2014-2015 Catalog).  
Prerequisite(s): Admission to the MS in Management of Secure Information Systems or MS in Technology Management program.  
Schedule Type: LEC  
Hours of Lecture or Seminar per week: 2  
Hours of Lab or Studio per week: 0

MSIS 614 - Financial and Cost Accounting

Credits: 2  
Not Repeatable for Credit  
Offered by School of Business  
Provides managers with an overview of the purpose and importance of accounting within the organization and the financial valuation of information technology companies, projects, and product line. Students focus on the economics and analysis of business transactions and their related financial reporting issues from internal and external stakeholder perspectives. Students improve their skills in analyzing financial issues and presenting results in a case analysis framework.  
Prerequisite(s): Admission to the MS in Management of Secure Information Systems or MS in Technology Management program.  
Schedule Type: LEC  
Hours of Lecture or Seminar per week: 2  
Hours of Lab or Studio per week: 0

MSIS 620 - Economics of Technology Management

Credits: 2  
Not Repeatable for Credit  
Offered by School of Business  
Enables students to build and evaluate economic and business models that can be used to analyze real managerial questions that
affect all types of institutions, especially firms in the information technology industry. Students develop a better understanding of
the operation of markets in general and the use of various quantitative and qualitative methods when making decisions within the
firm. The use of economic analysis allows students to identify and evaluate decision alternatives, the competitive environments
of firms, and the factors that influence firm performance, especially in the information technology industry.

Prerequisite(s): Admission to the MS in Management of Secure Information Systems or MS in Technology Management
programs.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 0

MSIS 641 - Innovation, Commercialization and Entrepreneurship

Credits: 2
Not Repeatable for Credit
Offered by School of Business
Cybersecurity is a field with both tremendous opportunity and need for innovations and commercialization of new technologies.
In addition, there is tremendous opportunity and success by cybersecurity startup firms in US and internationally. Course
investigates technology and cybersecurity innovation and commercialization and keys to success for cybersecurity
entrepreneurship.

Prerequisite(s): Admission to the MS in Management of Secure Information Systems.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 0

MSIS 643 - Managerial Finance

Credits: 2
Not Repeatable for Credit
Offered by School of Business
Surveys the theory and practice of corporate financial management with specific application to the technology sector. Students
develop an understanding of key elements required in the valuation of project alternatives; including their strategic importance.
Students evaluate and use financial management models and gain an understanding of how finance can be employed as a source
of potential competitive advantage.

Prerequisite(s): Admission to the MS in Management of Secure Information Systems or MS in Technology Management
programs.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 0

MSIS 696 - Directed Studies in Management of Secure Information Systems
Credits: 1-3
Repeatable within Degree for Credit
Offered by School of Business
Approval by faculty member and program director required prior to registration. Studies specialized topics in business not otherwise available in the curriculum.

Prerequisite(s): Admission to the MS in Management of Secure Information Systems.
Schedule Type: IND
Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 0

MSIS 697 - Special Topics in Management of Secure Information Systems

Credits: 1-3
Repeatable within Term for Credit
Offered by School of Business
Sections established as necessary to focus on various topical issues that emerge in practice of management of secure information systems.

Prerequisite(s): Admission to the MS in Management of Secure Information Systems.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 0
Grading: Graduate Special.

MSIS 711 - Deriving Strategic Value from IT Investments

Credits: 2
Not Repeatable for Credit
Offered by School of Business
Prepares students to be educated consumers of information technology to maximize strategic advantage of IT to an organization. Information technologies, architectures, and products are categorized and analyzed with a view to develop and maintain the most favorable IT asset portfolio to successfully carry out business goals and strategies. Techniques for making group technology assessments, outsourcing decisions, project bidding, and contract negotiations.

Equivalent to TECM 711 (2014-2015 Catalog).

Prerequisite(s): Admission to the MS in Management of Secure Information Systems or MS in Technology Management.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 0

MSIS 735 - Capstone Project
Teams undertake a strategic evaluation and plan for IT-driven business initiatives. Presentation includes analysis of competitive forces and the value chain; recommendations, including changes in goals and organizational design; plan of action integrating marketing, human resource development, organizational design, finance, and information technology; and implementation plan using theories of communication and change management, to include business case and business plan.

Equivalent to TECM 735 (2014-2015 Catalog).

Prerequisite(s): Admission to the MS in Management of Secure Information Systems.

Offered by School of Business

Schedule Type: LEC

Hours of Lecture or Seminar per week: 1-3

Hours of Lab or Studio per week: 0

Grading: Graduate Special.

MSIS 750 - Global Practices in Security of Information Systems

Students spend a week in an international residency. Emphasizes dealing with technological changes across international markets and amid global developments, virtual organizations, and project management across cultures. Corporate site visits combined with presentations by professors from universities outside the United States and relevant practitioners.

Prerequisite(s): Admission to the MS in Management of Secure Information Systems.

Schedule Type: LEC

Hours of Lecture or Seminar per week: 1-3

Hours of Lab or Studio per week: 0

Grading: Graduate Special.

Business, Minor in (MBUS)

Offered by the School of Business.

Prerequisite for all MSOM courses is completion of 30 credits (sophomore standing). For the Business Minor, a grade of C or higher is required in each MSOM course used for the minor.

MBUS 300 - Accounting in a Global Economy

Focuses on using basic concepts of accounting and financial management to make investment, credit, and operating decisions for an organization. Emphasizes financial reports to aid planning and control of organizational activities.

Equivalent to MSOM 300 (2014-2015 Catalog).
MBUS 301 - Managing People and Organizations in a Global Economy

Credits: 3
Not Repeatable for Credit
Offered by School of Business
Introduces key issues in management, organizational behavior, and human resource management. Special attention to best practices used by effective managers.

Equivalent to MSOM 301 (2014-2015 Catalog).

Prerequisite(s): Completion of 30 credits (sophomore standing).
Notes: May not be taken for credit by School of Business majors. Students cannot receive credit for both MGMT 301 and MBUS 301.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring, Summer

MBUS 302 - Managing Information in a Global Economy

Credits: 3
Not Repeatable for Credit
Offered by School of Business
Provides overview of strategic role of information, need for information systems, organizing information, integration of information systems in management processes and decision making, and related discussions in electronic commerce.

Prerequisite(s): Completion of 30 credits (sophomore standing).
Notes: May not be taken for credit by School of Business majors. Students cannot receive credit for both MIS 301 and MBUS 302.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring, Summer
MBUS 303 - Marketing in a Global Economy

Credits: 3
Not Repeatable for Credit
Offered by School of Business
Presents marketing principles, concepts, strategies, and analytical tools used by profit and nonprofit organizations to market ideas, products, and services to selected target groups. Emphasizes how to develop, promote, distribute, and price firm's offerings in dynamic economic, social, political, and global environment.

Prerequisite(s): Completion of 30 credits (sophomore standing).
Notes: May not be taken for credit by School of Business majors. Students cannot receive credit for both MKTG 303 and MBUS 303.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring, Summer

MBUS 304 - Entrepreneurship: Starting and Managing a New Enterprise

Credits: 3
Not Repeatable for Credit
Offered by School of Business
Explores behaviors required to successfully launch a new business, tools to identify and evaluate opportunities, and the issues critical to a new firm. Issues include organizational structure, effective marketing strategy, operational logistics, legal issues, financial projections, financing options, and available support structures.

Prerequisite(s): Completion of 30 credits (sophomore standing).
Notes: May not be taken for credit by School of Business majors.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring, Summer

MBUS 305 - Introduction to International Business

Credits: 3
Not Repeatable for Credit
Offered by School of Business
Multidisciplinary approach to global economy from the viewpoint of managing international business. Introduces various aspects of managing business in a global economy including theories and practices of international trade, investment, and business strategies.

Fulfills Mason Core requirement in Global Understanding.
MBUS 306 - Managing Projects and Operations

Credits: 3
Not Repeatable for Credit
Offered by School of Business
Introduces project management and operations management concepts and tools including project planning, scheduling, monitoring, and control; process design, selection and improvement; supply chain management; inventory management; and quality assurance.

Prerequisite(s): Completion of 30 credits (sophomore standing).
Notes: May not be taken for credit by School of Business students. Students cannot receive credit for both OM 303 and MBUS 306.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

MBUS 307 - Marketing to the Federal Government

Credits: 3
Not Repeatable for Credit
Offered by School of Business
This course explores the government procurement process and contracting from the perspective of marketers and contractors engaged in the federal community. Students will review and analyze the procurement practices of major government contractors and seek to understand the challenges associated with conducting business with the United States government.

Prerequisite(s): Completion of 30 credits (sophomore standing).
Notes: May not be taken for credit by School of Business majors.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring
MBUS 308 - Corporate Finance and Investments in a Global Economy

Credits: 3
Not Repeatable for Credit
Offered by School of Business
Presents an introduction to corporate finance and investment topics within an international context and emphasis on time-value of money, interest rates, stock and bond valuation, and the risk/return relationship in financial markets.

Prerequisite(s): Completion of 30 credits (sophomore standing).
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Summer, Spring

MBUS 491 - Special Topics: Business Minor

Credits: 3
Repeatable within Degree for Credit
Offered by School of Business
Topics related to a minor in business will vary on the focus of the course and by discipline.

Equivalent to MSOM 491 (2014-2015 Catalog).

Prerequisite(s): Completion of 30 credits (sophomore standing).
Notes: May not be taken for credit by School of Business majors.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

Chemistry (CHEM)

Offered by the College of Science

CHEM 211, 212 are prerequisites to all other undergraduate CHEM courses numbered 301 or above.

CHEM 101 - Introduction to Modern Chemistry

Credits: 3
Not Repeatable for Credit
Offered by Chemistry and Biochemistry
Physical and chemical discoveries and properties of matter presented along with their application and impact on way of life. Topics include atomic and molecular structure, nuclear chemistry, and chemistry in Earth and atmosphere.

Fulfills Mason Core requirement in natural science (nonlab).
Notes: Not open to students majoring in chemistry. Credit will not be given for CHEM 101 and CHEM 103, or for both CHEM 101 and CHEM 211 or 212. No previous knowledge of chemistry required.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**CHEM 102 - Introduction to Organic, Biochemical, Pharmacological, and Fuel Chemistry**

Credits: 3
Not Repeatable for Credit
Offered by Chemistry and Biochemistry

Modern and historical accounts of organic chemistry, biochemistry, pharmacology, and fuel chemistry. Topics include the chemistry of carbon compounds, synthesis of polymers and their utility and use in the modern world, biomolecules, DNA and animal cloning, embryonic stem cells, the chemical structure and biological activity of drugs and medicines, and fuel chemistry including petroleum through green chemistry and the future.

Fulfills Mason Core requirement in natural science (nonlab).

Prerequisite(s): Not open to students majoring in chemistry.
Notes: Does not fulfill the requirement for a laboratory course in Chemistry. Not for Chemistry majors. No credit for both CHEM 102 and CHEM 104, or CHEM 212.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**CHEM 103 - Chemical Science in a Modern Society**

Credits: 4
Not Repeatable for Credit
Offered by Chemistry and Biochemistry
Terminal course in chemistry for nonscience and nursing majors. Principles and application of chemistry.

Fulfills Mason Core requirement in natural science (lab).

Notes: Not open to students majoring in chemistry. Credit will not be given for both this course and CHEM 211, 212. Topics are those described for CHEM 101 and 102 but with lab to enhance scientific experience.

Schedule Type: LAB,
LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 3
CHEM 104 - Introduction to Organic, Biochemical, Pharmacological, and Fuel Chemistry

Credits: 4
Not Repeatable for Credit
Offered by Chemistry and Biochemistry

Modern and historical accounts of organic chemistry, biochemistry, pharmacology, and fuel chemistry. Topics include the chemistry of carbon compounds, synthesis of polymers and their utility and use in the modern world, biomolecules, DNA and animal cloning, embryonic stem cells, the chemical structure and biological activity of drugs and medicines, and fuel chemistry including petroleum through green chemistry and the future. (CHEM 104 requires concomitant registration in a 104 laboratory section.)

Fulfills Mason Core requirement in natural science (lab).

Prerequisite(s): Not open to students majoring in chemistry.
Notes: Not open to students majoring in chemistry. Credit will not be given for both CHEM 104 and CHEM 212

Schedule Type: LAB, LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 3

CHEM 105 - Introductory Chemistry Laboratory I

Credits: 1
Not Repeatable for Credit
Offered by Chemistry and Biochemistry
Introductory laboratory course to demonstrate principles and application of chemistry.

Prerequisite(s): CHEM 101.
Notes: Not open to students majoring in chemistry. Credit will not be given for both this course and CHEM 211, 212.

Schedule Type: LAB
Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 3
When Offered: Fall

CHEM 106 - Introductory Chemistry Laboratory II

Credits: 1
Not Repeatable for Credit
Offered by Chemistry and Biochemistry
1-credit laboratory course for non-science majors. Laboratory experience to demonstrate principles and application of chemistry.

Prerequisite(s): CHEM 102.
Notes: Not open to students majoring in chemistry. Credit will not be given for both this course and CHEM 211, 212.
Schedule Type: LAB
Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 3
When Offered: Spring

CHEM 155 - Introduction to Environmental Chemistry I

Credits: 4
Not Repeatable for Credit
Offered by Chemistry and Biochemistry

Basic chemical principles of Earth's water, air, and soil systems; presented in the context of understanding environmental issues. Includes Saturday morning field trips to sites of past and present environmental contamination, alternating with Saturday morning laboratory activities. Designated a Green Leaf Course.

Fulfills Mason Core requirement in natural science (lab).

Notes: Credit will not be given for this course and CHEM 103, 104.

Schedule Type: LAB,
LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 3

CHEM 156 - Introduction to Environmental Chemistry II

Credits: 4
Not Repeatable for Credit
Offered by Chemistry and Biochemistry

Basic chemical principles of Earth's water, air, and soil systems; presented in the context of understanding environmental issues. Includes Saturday morning field trips to sites of past and present environmental contamination, alternating with Saturday morning laboratory activities. Designated a Green Leaf Course.

Fulfills Mason Core requirement in natural science (lab).

Prerequisite(s): CHEM 155.
Notes: Credit will not be given for this course and CHEM 103, 104.
**CHEM 201 - Introductory Chemistry I**

Credits: 3  
Not Repeatable for Credit  
Offered by Chemistry and Biochemistry  
Fundamental principles of atomic and molecular structure; chemical bonding; basic concepts of chemical reactions and thermochemistry; and properties of gases, liquids, and solids.  

Fulfills Mason Core requirement in natural science (nonlab).

**Notes:** Does not fulfill degree requirements for laboratory science course. Credit will not be given for this course and CHEM 211 or 103. General chemistry course for students interested in science, engineering, mathematics, or computer science who do not require a lab.

**Schedule Type:** LEC  
**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**CHEM 202 - Introductory Chemistry II**

Credits: 3  
Not Repeatable for Credit  
Offered by Chemistry and Biochemistry  
Fundamentals of reaction rates and equilibrium. Topics include kinetics, properties of solutions, ionic equilibrium, chemical thermodynamics, electrochemistry, and nuclear chemistry.  

Fulfills Mason Core requirement in natural science (nonlab).

**Prerequisite(s):** CHEM 201 or 211.  
**Notes:** Does not fulfill degree requirements for laboratory science course. Credit will not be given for this course and CHEM 212 or 104. Second-semester general chemistry course for those interested in science, engineering, mathematics, or computer science who do not require a lab.

**Schedule Type:** LEC  
**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**CHEM 203 - General Chemistry Laboratory I**

Credits: 1  
Not Repeatable for Credit  
Offered by Chemistry and Biochemistry  
General Chemistry laboratory course for students majoring in science, engineering, or mathematics. Laboratory experience to demonstrate general chemistry principles and applications.

Equivalent to CHEM 213.

**Prerequisite(s):** CHEM 201.  
**Notes:** Credit will not be given for this course and CHEM 101 or 102 to students majoring in science, engineering, or
mathematics.

**Schedule Type:** LAB  
**Hours of Lecture or Seminar per week:** 0  
**Hours of Lab or Studio per week:** 3  
**When Offered:** Spring

---

**CHEM 204 - General Chemistry Laboratory II**

Credits: 1  
Not Repeatable for Credit  
Offered by Chemistry and Biochemistry  
Second semester general chemistry laboratory course for students majoring in science, engineering, or mathematics. Laboratory experience to demonstrate general chemistry principles and applications.

Equivalent to CHEM 214.

**Prerequisite(s):** CHEM 202.  
**Notes:** Credit will not be given for this course and CHEM 101 or 102 to students majoring in science, engineering, or mathematics.

---

**CHEM 211 - General Chemistry I**

Credits: 3  
Limited to 2 Attempts  
Offered by Chemistry and Biochemistry  
Fundamental principles of atomic and molecular structure; chemical bonding; basic concepts of chemical reactions and thermochemistry; properties of gases, liquids, and solids.

Fulfills Mason Core requirement in natural science (lab).

Equivalent to CHEM 201.

Prerequisite(s) enforced by registration system.

**Corequisite(s):** CHEM 213.  
**Notes:** Credit will not be given for this course and CHEM 103, 104. Students majoring in science, engineering, or mathematics should choose this course sequence. CHEM 211 is a prerequisite to CHEM 212.

---

**Schedule Type:** LEC  
**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall, Spring, Summer
CHEM 212 - General Chemistry II

Credits: 3  
Limited to 2 Attempts  
Offered by Chemistry and Biochemistry  
Fundamentals of colligative properties, reaction rates and equilibrium. Topics Include kinetics, properties of solutions, ionic equilibrium, chemical thermodynamics, electrochemistry, and nuclear chemistry.

Fulfills Mason Core requirement in natural science (lab).

Equivalent to CHEM 202.

Prerequisite(s): Grade of C or higher in CHEM 211 and CHEM 214.  
Prerequisite(s) enforced by registration system.

Corequisite(s): CHEM 214.

Notes: Credit will not be given for this course and CHEM 103, 104. Students majoring in science, engineering, or mathematics should choose this course sequence.

Schedule Type: LEC  
Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0  
When Offered: Fall, Spring, Summer

CHEM 213 - General Chemistry Laboratory I

Credits: 1  
Limited to 2 Attempts  
Offered by Chemistry and Biochemistry  
General Chemistry laboratory course for students majoring in science, engineering, or mathematics. Laboratory experience will demonstrate general chemistry principles and applications.

Fulfills Mason Core requirement in natural science (lab).

Equivalent to CHEM 203.

Prerequisite(s): CHEM 211.  
Prerequisite(s) enforced by registration system.

Corequisite(s): CHEM 211.

Notes: Students majoring in science, engineering, or mathematics should choose this course sequence. Credit will not be given for this course and CHEM 103.

Schedule Type: LAB  
Hours of Lecture or Seminar per week: 0  
Hours of Lab or Studio per week: 3  
When Offered: Fall, Summer, Spring
CHEM 214 - General Chemistry Laboratory II

Credits: 1
Limited to 2 Attempts
Offered by Chemistry and Biochemistry
General Chemistry laboratory course for students majoring in science, engineering, or mathematics. Laboratory experience will demonstrate general chemistry principles and applications.

Fulfills Mason Core requirement in natural science (lab).

Equivalent to CHEM 204.

Prerequisite(s): Grade of C or better in CHEM 211, CHEM 212.
Prerequisite(s) enforced by registration system.

Corequisite(s): CHEM 212.

Notes: Credit will not be given for this course and CHEM 103, CHEM 104. Students majoring in science, engineering, or mathematics should choose this course sequence.

Schedule Type: LAB
Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 3
When Offered: Fall, Summer, Spring

CHEM 251 - General Chemistry for Engineers

Credits: 4
Not Repeatable for Credit
Offered by Chemistry and Biochemistry
Fundamental principles of chemical structure and reactivity including atomic and molecular structure; chemical bonding; structures of ionic, covalent, and metallic lattices; oxidation reduction; electrochemistry and chemistry of metals; and introduction to organic chemistry and polymers.

Fulfills Mason Core requirement in natural science (lab).

Notes: Enrollment restricted to students intending to major in engineering. Students who need two semesters of chemistry should enroll in CHEM 211. Credit will not be given for this course and CHEM 211.

Schedule Type: LAB,
LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 3

CHEM 300 - Chemistry of Semiconductor Processing
CHEM 313 - Organic Chemistry

Credits: 3
Not Repeatable for Credit
Offered by Chemistry and Biochemistry
Theoretical, synthetic, industrial, and biological aspects of the chemistry of carbon compounds.

Prerequisite(s): C or higher in CHEM 211 and CHEM 212.
Prerequisite(s) enforced by registration system.

Corequisite(s): CHEM 315.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CHEM 314 - Organic Chemistry II

Credits: 3
Not Repeatable for Credit
Offered by Chemistry and Biochemistry
Theoretical, synthetic, industrial, and biological aspects of the chemistry of carbon compounds.

Prerequisite(s): Grade of C or better in CHEM 211, CHEM 212 and CHEM 313.
Prerequisite(s) enforced by registration system.

Corequisite(s): CHEM 318.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CHEM 315 - Organic Chemistry Lab I
CHEM 318 - Organic Chemistry Lab II

Credits: 2
Not Repeatable for Credit
Offered by Chemistry and Biochemistry
Continuation of CHEM 315, arranged to accompany CHEM 314.

Prerequisite(s): C or higher in CHEM 313, CHEM 314 and CHEM 315.
Prerequisite(s) enforced by registration system.

Corequisite(s): CHEM 314.

Notes: One-hour recitation.

Schedule Type: LAB
Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 3

CHEM 321 - Elementary Quantitative Analysis

Credits: 4
Not Repeatable for Credit
Offered by Chemistry and Biochemistry
Principles of chemical analysis emphasizing ionic equilibria. Lab consists of gravimetric, volumetric, and instrumental methods illustrating principal types of quantitative determinations.

Prerequisite(s): Grade of C or better in CHEM 211, CHEM 212 and MATH 113.
Prerequisite(s) enforced by registration system.

Corequisite(s): MATH 114.

Schedule Type: LAB,
LEC
Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 6

CHEM 331 - Physical Chemistry I

Credits: 3
Not Repeatable for Credit
Offered by Chemistry and Biochemistry
Yearlong survey covering topics including thermodynamics, equilibria, kinetics, solution properties, elementary quantum theory, electrochemistry, atomic and molecular structure, and nuclear chemistry.

Prerequisite(s): Grade of C or better in CHEM 212 and MATH 114, and in PHYS 243 or PHYS 160. Prerequisite(s) enforced by registration system.

Corequisite(s): PHYS 243 or PHYS 160.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CHEM 332 - Physical Chemistry II

Credits: 3
Not Repeatable for Credit
Offered by Chemistry and Biochemistry
Yearlong survey covering topics including thermodynamics, equilibria, kinetics, solution properties, elementary quantum theory, electrochemistry, atomic and molecular structure, and nuclear chemistry.

Prerequisite(s): Grade of "C" or better in MATH 114, CHEM 331 and PHYS 243 or PHYS 160. Concurrent enrollment in PHYS 244 or PHYS 260 allowed. Prerequisite(s) enforced by registration system.

Corequisite(s): PHYS 244 or PHYS 260.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CHEM 333 - Physical Chemistry for the Life Sciences I

Credits: 3
Not Repeatable for Credit
Offered by Chemistry and Biochemistry
Yearlong survey of principles of physical chemistry emphasizing application in biological sciences. Topics include first and second laws of thermodynamics, free energy and chemical equilibria, kinetics, transport properties, molecular interactions, molecular structure, spectroscopy, statistical thermodynamics, and x-ray diffraction.
Prerequisite(s): MATH 113
Corequisite(s): MATH 114

Notes: Credit will not be given for both this course sequence and CHEM 331, 332.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CHEM 334 - Physical Chemistry for the Life Sciences II

Credits: 3
Not Repeatable for Credit
Offered by Chemistry and Biochemistry
Yearlong survey of principles of physical chemistry emphasizing application in biological sciences. Topics include first and second laws of thermodynamics, free energy and chemical equilibria, kinetics, transport properties, molecular interactions, molecular structure, spectroscopy, statistical thermodynamics, and x-ray diffraction.

Prerequisite(s): CHEM 333; MATH 113, 114
Notes: Credit will not be given for both this course sequence and CHEM 331, 332.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CHEM 336 - Physical Chemistry Lab I

Credits: 2
Not Repeatable for Credit
Offered by Chemistry and Biochemistry
Quantitative experimental study of physicochemical principles. CHEM 336 and 337 constitute an introduction to the practice and theory of experimental physical chemistry.

Fulfills writing intensive requirement in the major.

Prerequisite(s): Grade of C or better in CHEM 212, CHEM 321, CHEM 331 and in either MATH 114 or MATH 116, and either PHYS 243 or PHYS 160.
Prerequisite(s) enforced by registration system.

Corequisite(s): CHEM 331, PHYS 243 or PHYS 160.

Notes: One-hour recitation.

Schedule Type: LAB, RCT
Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 3
CHEM 337 - Physical Chemistry Lab II

Credits: 2
Not Repeatable for Credit
Offered by Chemistry and Biochemistry
Continuation of CHEM 336.

Prerequisite(s): C or higher in CHEM 331, CHEM 332, CHEM 336.
Prerequisite(s) enforced by registration system.

Corequisite(s): CHEM 332.

Notes: One-hour recitation.

Schedule Type: LAB, RCT
Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 3

CHEM 341 - Fundamental Inorganic Chemistry

Credits: 3
Not Repeatable for Credit
Offered by Chemistry and Biochemistry
Descriptive chemistry including chemical properties, reactions, and reaction mechanisms of inorganic elements and compounds. Topics include main group and transition elements, organometallic compounds, and bioinorganic chemistry.

Prerequisite(s): C or higher in CHEM 212, CHEM 313, CHEM 315.
Prerequisite(s) enforced by registration system.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CHEM 355 - Undergraduate Research

Credits: 1-3
Repeatable within Degree for Credit
Offered by Chemistry and Biochemistry
Original research project. May involve lab study, computer modeling and analysis, or other original research as appropriate. Research formulated and completed under instructor's guidance. Culminates in a written and oral final report. May be repeated for a total of 6 credits.

Prerequisite(s): C or higher in CHEM 313, CHEM 315, MATH 113; PHYS 243, PHYS 244.
Prerequisite(s) enforced by registration system.

Schedule Type: LAB
CHEM 413 - Synthetic and Mechanistic Organic Chemistry

Credits: 3
Not Repeatable for Credit
Offered by Chemistry and Biochemistry
General review of synthetic pathways and applications to new topics, emphasizing fused ring aromatics, heterocyclics, natural products, and biologically active compounds. Includes relationship of applied organic chemistry to consumer products, including drugs and agricultural chemicals.

Prerequisite(s): Grade of C or better in CHEM 314, CHEM 318 and CHEM 331.
Prerequisite(s) enforced by registration system.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CHEM 422 - Instrumental Analysis

Credits: 3
Not Repeatable for Credit
Offered by Chemistry and Biochemistry
Introduces theories of analysis by instrumental methods. Basic electronics applied to chemical measurements. Topics include introduction to theory of spectroscopy including ultraviolet, visible, and infrared, and electrochemical methods of analysis; theory of Fourier transform techniques such as FT-IR and FT-NMR; and theory of advanced pulse techniques.

Prerequisite(s): C or higher in CHEM 321, CHEM 332, CHEM 337.
Prerequisite(s) enforced by registration system.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CHEM 423 - Instrumental Analysis Laboratory

Credits: 2
Not Repeatable for Credit
Offered by Chemistry and Biochemistry
Laboratory-based introduction to quantitative analysis of organic and inorganic substances by using modern analytical instrumentation. Laboratory highlights practice of atomic and molecular spectroscopy, spectrophotometry, chromatography, voltammetry, and potentiometry in relation to chemical experimentation.

Prerequisite(s): C or higher in CHEM 422.
Prerequisite(s) enforced by registration system.
Schedule Type: LAB  
Hours of Lecture or Seminar per week: 1-3  
Hours of Lab or Studio per week: 6

CHEM 427 - Aquatic Environmental Chemistry  
Credits: 3  
Not Repeatable for Credit  
Offered by Chemistry and Biochemistry  
Thermodynamic and kinetic processes regulating the chemistry of surface and groundwater in natural and polluted environments with particular emphasis in explaining the aqueous concentrations of chemical species and controlling geochemical factors in the hydrosphere. Structure, sources and transformations of organic matter in the aquatic environment and interactions with aqueous solutes will be covered as related to contemporary issues in water quality.  
Prerequisite(s): Grade of C or better in CHEM 321.  
Prerequisite(s) enforced by registration system.

Schedule Type: LEC  
Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0

CHEM 438 - Atmospheric Chemistry  
Credits: 3  
Not Repeatable for Credit  
Offered by Chemistry and Biochemistry  
The fundamental chemical processes of the Earth's atmosphere including chemical cycles, thermodynamics, reaction kinetics, photochemistry, radiative balance, ozone chemistry and environmental issues, including air pollution, acid rain and global change.  
Equivalent to CLIM 438  
Prerequisite(s): C or higher in CHEM 332.  
Prerequisite(s) enforced by registration system.

Schedule Type: LEC  
Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0

CHEM 439 - RS: Atmospheric Chemistry II: Air Analysis Techniques  
Credits: 3  
Not Repeatable for Credit  
Offered by Chemistry and Biochemistry  
The theory, design and implementation of air sampling and analysis techniques for investigating GMU and regional air quality.  
Designated as a research and scholarship intensive course.
**CHEM 441 - Properties and Bonding of Inorganic Compounds**

Credits: 3  
Not Repeatable for Credit  
Offered by Chemistry and Biochemistry  
Interpretation of physical and chemical properties of inorganic compounds in terms of currently used bonding concepts. Topics include molecular symmetry and applications of symmetry, structure and bonding in ionic solids; reactions and characterizations of solids; electronic and magnetic properties and applications of solids.

Prerequisite(s): C or higher in CHEM 332, CHEM 337.  
Prerequisite(s) enforced by registration system.

**CHEM 445 - Inorganic Preparations and Techniques**

Credits: 2  
Not Repeatable for Credit  
Offered by Chemistry and Biochemistry  
Application of techniques of inorganic chemistry to preparation, purification, and spectroscopic characterization of selected substances.

Prerequisite(s): C or higher in CHEM 441.  
Prerequisite(s) enforced by registration system.

**CHEM 446 - Bioinorganic Chemistry**

Credits: 3  
Not Repeatable for Credit  
Offered by Chemistry and Biochemistry  
Application of inorganic coordination chemistry and physical methods in study of structure and function of metal ion sites in biomolecules. Properties of transition metal ions, ligand field theory. Topics include iron cytochromes, zinc and copper enzymes, cobalamins, iron sulfur proteins, oxygen transport, iron storage, electron transfer, inorganic model compounds, metals in
medicine, and toxicity of inorganic species.

Prerequisite(s): CHEM 331, CHEM 336, CHEM 463 or BIOL 483
Prerequisite(s) enforced by registration system.

Notes: Students may take this course concurrently with CHEM 463 or after taking CHEM 463.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CHEM 451 - Special Projects in Chemistry

Credits: 1-3
Not Repeatable for Credit
Offered by Chemistry and Biochemistry
Introduction to chemical research or development. Includes literature search, conferences, and lab.

Prerequisite(s): C or higher in CHEM 314, CHEM 318, CHEM 321, CHEM 331, CHEM 336.
Prerequisite(s) enforced by registration system.

Notes: Written and oral technical reports required.

Schedule Type: IND, LAB
Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 6

CHEM 452 - Special Projects in Chemistry

Credits: 1-3
Not Repeatable for Credit
Offered by Chemistry and Biochemistry
Introduction to chemical research or development. Includes literature search, conferences, and lab.

Prerequisite(s): C or higher in CHEM 451.
Prerequisite(s) enforced by registration system.

Notes: Written and oral technical reports required.

Schedule Type: IND, LAB
Hours of Lecture or Seminar per week: 1-12
Hours of Lab or Studio per week: 6

CHEM 455 - Honors Research in Chemistry
CHEM 456 - Honors Research in Chemistry

Credits: 3
Not Repeatable for Credit
Offered by Chemistry and Biochemistry
Introduction to research on current problem in chemical sciences under supervision of faculty advisor. Includes literature search, laboratory or theoretical work, conferences with faculty advisor, attendance at regularly scheduled seminars, and oral and written presentations.

Prerequisite(s): Admission to the Department Honors Program; C or higher in CHEM 313, CHEM 314, CHEM 315, CHEM 318, CHEM 331, CHEM 336, completion of Math and Physics degree requirements.
Prerequisite(s) enforced by registration system.

Notes: Credit will not be given for both these courses and CHEM 451, 452.

Schedule Type: SEM
Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 6

CHEM 458 - Chemical Oceanography

Credits: 3
Not Repeatable for Credit
Offered by Chemistry and Biochemistry

The world's oceans, including a variety of closed basins and estuaries, comprise a complex and dynamic system of chemical processes that interact with biological, geological, physical, and atmospheric processes to play a significant role in defining the earth's fragile environment. This course will present an overview of the origin, occurrence, and distribution of the chemical components in sea water and an introduction to the basic principles of the chemical processes taking place in the marine environment.
Designated a Green Leaf Course.
Equivalent to GEOL 458.

Prerequisite(s): Grade of C or better in CHEM 211 and CHEM 212, CHEM 321 or GEOL 309. Prerequisite(s) enforced by registration system.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CHEM 463 - General Biochemistry I

Credits: 4
Not Repeatable for Credit
Offered by Chemistry and Biochemistry
Brief introduction to biochemistry, followed by in-depth look at amino acids and proteins, 3-D structure, folding and dynamics, their specialized function, and primary metabolism. Emphasizes enzymes and their chemical mechanisms, and metabolism.

Equivalent to CHEM 483.

Prerequisite(s): Grade of C or better in CHEM 313 and BIOL 213. Prerequisite(s) enforced by registration system.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 4
Hours of Lab or Studio per week: 0

CHEM 464 - General Biochemistry II

Credits: 3
Not Repeatable for Credit
Offered by Chemistry and Biochemistry
Continuation of general biochemistry, focusing on secondary metabolism, cell signaling, and processes of replication, transcription, and translation. Emphasizes important biochemistry research topics; much material drawn from current biochemical literature.

Prerequisite(s): Grade of C or better in CHEM 314 and CHEM 463. Prerequisite(s) enforced by registration system.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CHEM 465 - Biochemistry Lab

Credits: 2
Not Repeatable for Credit
Offered by Chemistry and Biochemistry
Introduction to modern biochemical experimental methods of studying chemical and physical properties of biological molecules. Includes separation, identification, and characterization of biomolecules.

Fulfills writing intensive requirement in the major.

**Prerequisite(s):** Grade of C or better in CHEM 315 and CHEM 463. Prerequisite(s) enforced by registration system.

**Corequisite(s):** CHEM 463.

**Schedule Type:** LAB  
**Hours of Lecture or Seminar per week:** 1-12  
**Hours of Lab or Studio per week:** 6

**CHEM 467 - The Chemistry of Enzyme-Catalyzed Reactions**

**Credits:** 3  
**Not Repeatable for Credit**  
Offered by Chemistry and Biochemistry  
Examples of enzyme mechanisms demonstrate how chemical principles are employed by living organisms. Specific enzyme mechanisms used to illustrate principles from organic, inorganic, and physical chemistry. Discusses techniques to monitor enzyme reactions.

**Prerequisite(s):** Grade of C or better in CHEM 463, CHEM 464, CHEM 314 and CHEM 331. Prerequisite(s) enforced by registration system.

**Schedule Type:** LEC  
**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**CHEM 468 - Bioorganic Chemistry**

**Credits:** 3  
**Not Repeatable for Credit**  
Offered by Chemistry and Biochemistry  
Basic understanding of chemical nature of biomolecules and biomacromolecules. Introduces biomolecules such as amino acids, proteins, carbohydrates, and lipids. Lectures focus on biophysical properties and synthesis, using practical examples and visual aids.

**Prerequisite(s):** Grade of C or better in CHEM 463, CHEM 464 and CHEM 314. Prerequisite(s) enforced by registration system.

**Schedule Type:** LEC  
**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**CHEM 470 - Laboratory Instructional Methods for Chemistry**
Credits: 3
Not Repeatable for Credit
Offered by Chemistry and Biochemistry
Lecture and laboratory experience teaching chemistry in laboratory. Students work closely with faculty members and are responsible for all aspects of teaching undergraduate laboratory techniques. Students also learn techniques for acquisition and storage of chemicals and laboratory apparatus, safety, disposal of chemical waste, and literature of chemical education.

**Prerequisite(s):** CHEM 314.

**Schedule Type:** LAB

**Hours of Lecture or Seminar per week:** 1

**Hours of Lab or Studio per week:** 6

---

**CHEM 490 - Undergraduate Seminar**

Credits: 1
Repeatable within Degree for Credit
Offered by Chemistry and Biochemistry
Selected topics from recent chemical theory and applications, generally consisting of research presentations by invited faculty from other institutions. Attendance is required at 80% of the seminars and students must write up a one-page summary of each talk attended. This course will also be used to teach students how to give effective presentations. May be repeated for a total of 2 credits.

**Prerequisite(s):** C or higher in CHEM 331, CHEM 336.
Prerequisite(s) enforced by registration system.

**Schedule Type:** SEM

**Hours of Lecture or Seminar per week:** 1

**Hours of Lab or Studio per week:** 0

---

**CHEM 500 - Selected Topics in Modern Chemistry**

Credits: 3
Not Repeatable for Credit
Offered by Chemistry and Biochemistry
Topics of interest in analytical, biological, environmental, geological, geochemical, inorganic, organic, and physical chemistry.

**Notes:** May be repeated for credit with different topics. Credit not allowed toward major in chemistry. Credit not allowed toward minor in chemistry.

**Schedule Type:** LEC

**Hours of Lecture or Seminar per week:** 3

**Hours of Lab or Studio per week:** 0

---

**CHEM 513 - Synthetic and Mechanistic Organic Chemistry**

Credits: 3
Not Repeatable for Credit
Offered by Chemistry and Biochemistry
General review of synthetic pathways and applications to new topics, emphasizing fused ring aromatics, heterocyclics, natural products, and biologically active compounds. Includes relationship of applied organic chemistry to consumer products, including drugs and agricultural chemicals. Organic core course.

Prerequisite(s): Grade of ‘C’ or better in CHEM 314, CHEM 318 and CHEM 331.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CHEM 529 - Instrumental Techniques of Analysis

Credits: 2
Repeatable within Term for Credit
Offered by Chemistry and Biochemistry
Principles and operation of modern instrumentation, emphasizing applications to analysis of chemical, biological, and environmental samples. Methods include combined capillary column gas chromatography and mass spectrometry, high-performance liquid chromatography, optical methods, surface analysis methods, magnetic resonance spectroscopy, atomic emission and absorption spectrometry, and electroanalytical methods. With approval of research committee, students choose methods studied.

Prerequisite(s): CHEM 321 and 422 or 521, or permission of department.
Schedule Type: IND
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 6

CHEM 563 - General Biochemistry I

Credits: 4
Not Repeatable for Credit
Offered by Chemistry and Biochemistry
Brief introduction to biochemistry, followed by an in-depth look at amino acids and proteins, 3-D structure, folding and dynamics, their specialized function and primary metabolism. Emphasizes enzymes and their chemical mechanisms and metabolism. Students will be assigned papers from the primary literature and be required to answer questions from these papers on exams.

Prerequisite(s): CHEM 313; BIOL 213.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 4
Hours of Lab or Studio per week: 0

CHEM 564 - General Biochemistry II

Credits: 3
Not Repeatable for Credit
Offered by Chemistry and Biochemistry
Previous course in biology recommended but not required. Important biological compounds, including proteins, carbohydrates,
lipids, and nucleic acids, and their interrelations.

**Prerequisite(s):** CHEM 563 or equivalent.

**Schedule Type:** LEC

**Hours of Lecture or Seminar per week:** 4

**Hours of Lab or Studio per week:** 0

**CHEM 567 - The Chemistry of Enzyme-Catalyzed Reactions**

Credits: 3
Not Repeatable for Credit
Offered by Chemistry and Biochemistry
Examples of enzyme mechanisms demonstrate how chemical principles are employed by living organisms. Specific enzyme mechanisms used to illustrate principles from organic, inorganic, and physical chemistry. Discusses techniques to monitor enzyme reactions.

**Prerequisite(s):** CHEM 313 and 463 or permission of instructor.

**Schedule Type:** LEC

**Hours of Lecture or Seminar per week:** 3

**Hours of Lab or Studio per week:** 0

**CHEM 568 - Bioorganic Chemistry**

Credits: 3
Not Repeatable for Credit
Offered by Chemistry and Biochemistry
Basic understanding of chemical nature of biomolecules and biomacromolecules. Introduces biomolecules such as amino acids, proteins, carbohydrates, and lipids. Lectures focus on biophysical properties and synthesis, using practical examples and visual aids.

**Prerequisite(s):** CHEM 314 and 463, or equivalent, or permission of instructor.

**Schedule Type:** LEC

**Hours of Lecture or Seminar per week:** 3

**Hours of Lab or Studio per week:** 0

**CHEM 579 - Special Topics**

Credits: 1-6
Repeatable within Term for Credit
Offered by Chemistry and Biochemistry
Current topics in chemistry, depending on instructor's specialty.

**Prerequisite(s):** CHEM 313 and 314 or permission of instructor.

**Notes:** May be repeated with different topics, with department approval.

**Schedule Type:** IND, LEC
CHEM 613 - Modern Polymer Chemistry

Credits: 3
Not Repeatable for Credit
Offered by Chemistry and Biochemistry
Synthetic and analytical chemistry of synthetic macromolecules. Topics include polymer solutions, molecular weight determination, spectroscopy, thermal analysis, x-ray crystallinity, polymerization types, and commercial and electroactive polymers. Organic core course.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CHEM 614 - Physical Organic Chemistry

Credits: 3
Not Repeatable for Credit
Offered by Chemistry and Biochemistry
Principles underlying molecular structure, reactivity, and reaction mechanisms. Topics include valence-bond and molecular-orbital theory, electronic interpretation of organic reactions, stereochemistry, conformational analysis, kinetics and thermodynamics of organic reactions, and photochemistry. Organic core course.

Prerequisite(s): CHEM 314 or permission of instructor.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CHEM 620 - Modern Instrumentation

Credits: 3
Not Repeatable for Credit
Offered by Chemistry and Biochemistry
Methods of sensing and measurement of radiation, particles, pressure, concentrations of specific elements and compounds. Topics include basic operational amplifier circuits for analog signals, digitizing devices and computerized data collection, noise and noise-reduction methods, and specialized instrumentation systems for various areas of chemistry and physics.

Equivalent to PHYS 533

Prerequisite(s): CHEM 422 or permission of instructor.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
CHEM 624 - Principles of Chemical Separation

Credits: 3
Not Repeatable for Credit
Offered by Chemistry and Biochemistry
Theories and models of separation with applications to analyses of a wide range of chemical, biological, and environmental samples. Topics include high-resolution gas and high-performance liquid chromatography. Emphasizes theory of reverse phase, normal phase, ion exchange, size exclusion, and affinity based separations. Also presents instrumentation such as detectors, pumps, and columns, and data acquisition. Analytical core course.

Prerequisite(s): CHEM 422 or 521, or permission of instructor.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CHEM 625 - Electroanalytical Chemistry

Credits: 3
Not Repeatable for Credit
Offered by Chemistry and Biochemistry
Review of basic electrochemistry. Emphasizes analysis and research for applications of modern electrochemical techniques such as chronoamperometry; cyclic, stripping, and AC voltammetry; pulse polarography; coulometry; electrochemical sensors; and instrumentation.

Prerequisite(s): CHEM 321 and 331.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CHEM 627 - Aquatic Environmental Chemistry

Credits: 3
Not Repeatable for Credit
Offered by Chemistry and Biochemistry
Thermodynamic and kinetic processes regulating the chemistry of surface and groundwater in natural and polluted environments with particular emphasis in explaining the aqueous concentrations of chemical species and controlling geochemical factors in the hydrosphere. Structure, sources and transformations of organic matter in the aquatic environment and interactions with aqueous solutes will be covered as related to contemporary issues in water quality. Students will be assigned papers from the primary literature and be required to answer questions from these papers on exams.

Prerequisite(s): CHEM 321 or GEOL 302 or equivalent courses or permission of the instructor.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

CHEM 633 - Chemical Thermodynamics and Kinetics
Advanced study covering application of kinetics to the elucidation of reaction mechanisms and application of statistical thermodynamics to theory of elementary reaction rates. Physical core course.

Equivalent to CSI 711

Prerequisite(s): CHEM 331 and 332.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CHEM 641 - Solid State Chemistry

Focuses on the design and synthesis, structure and bonding of solid state compounds; physical properties and characterization of solids. Topics of current interest will also be included.

Prerequisite(s): CHEM 441 or permission of instructor.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring

CHEM 646 - Bioinorganic Chemistry

Applies inorganic coordination chemistry and physical methods to understand structure and function of metal ion sites in biomolecules. Biochemical roles of metal centers in oxygen transport, metalloenzymes, and electron transfer. Topics include iron cytochromes, zinc and copper enzymes, cobalamin, iron sulfur proteins, inorganic model compounds, and metals in medicine. Inorganic core course.

Prerequisite(s): CHEM 441 or permission of instructor.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CHEM 651 - Environmental Chemistry of Organic Substances

Credits: 3
Not Repeatable for Credit
Offered by Chemistry and Biochemistry

**Prerequisite(s):** One semester of physical chemistry, or permission of instructor.

**Schedule Type:** LEC

**Hours of Lecture or Seminar per week:** 3

**Hours of Lab or Studio per week:** 0

---

**CHEM 660 - Protein Biochemistry**

Credits: 3  
Not Repeatable for Credit  
Offered by Chemistry and Biochemistry  
Proteins play critical roles in most biological processes. Therefore, to understand these processes, it is necessary to understand proteins. This course will introduce students to proteins, their biosynthesis/biodegradation and their biophysical and biochemical properties. Biochemistry core course.

**Prerequisite(s):** CHEM 463 or equivalent or permission of instructor.

**Schedule Type:** LEC

**Hours of Lecture or Seminar per week:** 3

**Hours of Lab or Studio per week:** 0

---

**CHEM 661 - Antibiotic Chemistry and Resistance**

Credits: 3  
Not Repeatable for Credit  
Offered by Chemistry and Biochemistry  
Introduces the various classes of antibiotics. Focus on the chemistry of antibiotics and how they inhibit bacterial growth and/or cause death and the response of bacteria to these compounds.

**Prerequisite(s):** CHEM 463 (or equivalent), or permission of instructor.

**Schedule Type:** LEC

**Hours of Lecture or Seminar per week:** 3

**Hours of Lab or Studio per week:** 0

---

**CHEM 662 - Modern Methods of Drug Discovery**

Credits: 3  
Not Repeatable for Credit  
Offered by Chemistry and Biochemistry  
Introduction to the process of drug discovery. Covers modern methods and strategies of target identification, lead identification, and lead optimization. Biochemistry core course.

**Prerequisite(s):** CHEM 463 (or equivalent), or permission of instructor.

**Schedule Type:** LEC

**Hours of Lecture or Seminar per week:** 3

**Hours of Lab or Studio per week:** 0
CHEM 665 - Protein-Protein Interactions: Methods and Applications

Credits: 3
Not Repeatable for Credit
Offered by Chemistry and Biochemistry
Introduction to the fundamental principles of protein-protein interactions, including experimental design considerations and methods for quantification of these interactions.

Prerequisite(s): CHEM 463 (or equivalent), or permission of instructor.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CHEM 670 - Teaching Practicum

Credits: 2
Not Repeatable for Credit
Offered by Chemistry and Biochemistry
Prelaboratory lecture and laboratory teaching in chemistry. Students work closely with faculty and are responsible for all aspects of teaching undergraduate laboratory techniques.

Prerequisite(s): Enrollment in the graduate program and permission of Chair.
Schedule Type: INT
Hours of Lecture or Seminar per week: 6
Hours of Lab or Studio per week: 0
Grading: Graduate Special
When Offered: Fall, Spring, Summer

CHEM 728 - Introduction to Solid Surfaces

Credits: 3
Not Repeatable for Credit
Offered by Chemistry and Biochemistry
Introduces properties of solid surfaces. Topics include gas absorption isotherms, surface area measurement techniques, real and clean surfaces, physisorption and chemisorption, methods of gas adsorption and desorption, measurement of heats of adsorption, desorption kinetics, electron spectroscopies and surface sensitivities, instrumentation; and principles of vacuum technology.

Equivalent to CSI 712

Prerequisite(s): CHEM 422 or equivalent.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
CHEM 732 - Quantum Chemistry

Credits: 3
Not Repeatable for Credit
Offered by Chemistry and Biochemistry
Illustration of fundamental concepts of quantum mechanics with applications to chemical systems, including atomic and molecular electronic structure and properties, molecular symmetry, and intermolecular forces. Physical core course.

Equivalent to CSI 713.

Prerequisite(s): CHEM 332 or equivalent.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CHEM 735 - Astrophysical Chemistry of Planetary Bodies

Credits: 3
Not Repeatable for Credit
Offered by Chemistry and Biochemistry
In depth review of the chemistry of planets, comets and other bodies in the Solar System. Emphasis will be placed on the laboratory techniques and measurements made in order to understand and predict astronomical observations.

Prerequisite(s): CHEM 331, or ASTR 403, or permission of instructor.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CHEM 736 - Computational Quantum Mechanics

Credits: 3
Not Repeatable for Credit
Offered by Chemistry and Biochemistry
Study of fundamental concepts of quantum mechanics from computational point of view, review of systems with spherically symmetric potentials, electron-atom solutions to Schrodinger's equation, electron spin in many electron systems, atomic structure calculations, algebra of many electron calculations, Hartree-Fock, self-consistent field method, molecular structure calculations, scattering theory computations, and solid-state computations.

Equivalent to CSI 783/PHYS 736

Prerequisite(s): PHYS 502, 510, or permission of instructor.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CHEM 767 - Industrial Biochemistry
CHEM 463 - Introduction to Industrial Biochemistry

Credits: 3
Not Repeatable for Credit
Offered by Chemistry and Biochemistry
An introduction to industrial biochemistry. Includes a mechanistic examination of the biosynthesis of several industrially important secondary metabolites, the industrial scale process of obtaining commercially valuable biochemical products, and the regulations that oversee the industrial biochemical process.

Prerequisite(s): CHEM 463 or permission of instructor.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CHEM 790 - Graduate Seminar

Credits: 1
Repeatable within Degree for Credit
Offered by Chemistry and Biochemistry
Selected topics from recent chemical theory and applications, generally consisting of research presentations by invited faculty from other institutions. Attendance is required at 80% of the seminars and students must write up a 1 page summary of each talk attended. Course also used to teach students effective presentation methods.

Prerequisite(s): Admission to a graduate program in Chemistry and Biochemistry, or permission of instructor.
Notes: Requires, in last semester, seminar presentation on student's research or another topic acceptable to department. Three credits of CHEM 790 required for MS degree; an additional 3 credits required after admission to PhD program.

Schedule Type: SEM
Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0

CHEM 796 - Directed Reading and Research

Credits: 1-6
Repeatable within Degree for Credit
Offered by Chemistry and Biochemistry
Reading and research on a specific topic in chemistry or biochemistry under direction of a faculty member. May be repeated for a total of 12 credits.

Prerequisite(s): Admission to a graduate program in chemistry and biochemistry or affiliated programs.
Schedule Type: IND
Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 1-6

CHEM 798 - Research Project

Credits: 3-6
Repeatable within Degree for Credit
Offered by Chemistry and Biochemistry
Experimental or theoretical research project chosen and completed under guidance of graduate faculty member.

**Prerequisite(s):** Permission of department; 6 credits of CHEM 798 or 799, but credit will not be given for both.

**Notes:** Requires comprehensive report acceptable to advisory committee, and final oral exam on report.

**Schedule Type:** IND  
**Hours of Lecture or Seminar per week:** 1-12  
**Hours of Lab or Studio per week:** 0  
**Grading:** Satisfactory/No credit only

### CHEM 799 - Master’s Thesis

Credits: 1-6  
Repeatable within Degree for Credit  
Offered by Chemistry and Biochemistry  
Laboratory thesis research and writing under direction of supervisor.

**Prerequisite(s):** Permission of department.  
**Notes:** Minimum of 3 credits for first two enrollment periods.

**Schedule Type:** IND  
**Hours of Lecture or Seminar per week:** 1-12  
**Hours of Lab or Studio per week:** 0  
**Grading:** S/NC

### CHEM 814 - Advanced Bioorganic Chemistry

Credits: 3  
Not Repeatable for Credit  
Offered by Chemistry and Biochemistry  
Introduces the chemical nature of biomolecules, with a focus on their organic properties. Focuses on the chemical principals that underlie the diverse structures, properties and reactions of biomolecules. Core course in the Chemistry and Biochemistry doctoral program.

**Prerequisite(s):** CHEM 313, 314, and 463 or equivalent; or permission from instructor.  
**Schedule Type:** LEC  
**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

### CHEM 817 - Organic Structural Spectroscopy

Credits: 3  
Not Repeatable for Credit  
Offered by Chemistry and Biochemistry  
Spectroscopic determination of organic molecular structure using 1H, 13H, 19F, and 31P nuclear magnetic resonance, infrared, ultraviolet, visible, and Raman spectroscopy, and mass spectrometry.
Prerequisite(s): CHEM 314 or equivalent.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

CHEM 821 - Theory of Analytical Processes

Credits: 3
Not Repeatable for Credit
Offered by Chemistry and Biochemistry
Theory and application of contemporary analytical processes and methods used in chemistry research. Emphasis on analytical signals and accompanying noise, sample preparation techniques, and quality assurance in measurements. Core course in the Chemistry and Biochemistry doctoral program.

Prerequisite(s): Admission to Chemistry and Biochemistry doctoral program.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CHEM 833 - Physical Chemistry and Biochemistry

Credits: 3
Not Repeatable for Credit
Offered by Chemistry and Biochemistry
The theory and practical use of thermodynamics, kinetics, spectroscopy and quantum chemistry in chemical and biochemical research. Core course in the Chemistry and Biochemistry doctoral program.

Prerequisite(s): CHEM 331 or permission of instructor.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CHEM 891 - Doctoral Scientific Critique, Writing and Presentation

Credits: 3
Not Repeatable for Credit
Offered by Chemistry and Biochemistry
Development of skills associated with scientific communication and research such as oral presentation of scientific material, analysis of scientific research and preparation of scientific proposals. In preparing scientific proposals, students will learn how to identify scientific questions of interest and how to plan a course of experiments to address these questions. Core course in the Chemistry and Biochemistry doctoral program.

Prerequisite(s): Permission of academic advisor, research advisor and/or research committee.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
CHEM 896 - Doctoral Directed Reading and Research

Credits: 1-6
Repeatable within Degree for Credit
Offered by Chemistry and Biochemistry
Reading and research on a specific topic in Chemistry or Biochemistry under direction of a faculty member.

Prerequisite(s): Admission to the Ph.D. in Chemistry and Biochemistry or affiliated programs.
Notes: May be repeated for up to a total of 15 credits.

Schedule Type: IND
Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0
When Offered: Fall, Summer, Spring

CHEM 998 - Doctoral Dissertation Proposal

Credits: 1-12
Repeatable within Degree for Credit
Offered by Chemistry and Biochemistry
Development of a research proposal under the guidance of the research advisor and graduate committee. The resulting proposal, once approved by the student's research advisor and committee, forms the basis of the student's doctoral dissertation. May be repeated for credit, but no more than 24 combined credits from CHEM 998 and CHEM 999 may be applied toward satisfying doctoral degree requirements, with no more than 12 credits of CHEM 998.

Prerequisite(s): Permission of research advisor and/or graduate committee.
Schedule Type: IND
Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 1-12
Grading: Satisfactory/No credit only

CHEM 999 - Doctoral Dissertation Research

Credits: 1-12
Repeatable within Degree for Credit
Offered by Chemistry and Biochemistry
Research in the concentration pertinent to student's program of study under the direction of their research advisor and committee. Students may enroll for credits in this course once their research proposal has been approved. May be repeated for credit, but no more than 24 combined credits from CHEM 998 and CHEM 999 may be applied toward satisfying doctoral degree requirements, with no more than 12 credits of CHEM 998.

Prerequisite(s): Admission to candidacy in Chemistry and Biochemistry Doctoral Program.
Schedule Type: IND
Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 1-12
Grading: S/IP
Chinese (CHIN)

Offered by the College of Humanities and Social Sciences

**CHIN 101 - Elementary Chinese**

Credits: 3  
Not Repeatable for Credit  
Offered by Modern and Classical Languages.  
Introduction to Mandarin, including basic grammar, oral expression, listening comprehension, reading, and writing.

**Notes:** Students may not receive credit for CHIN 101 and CHIN 109 or 110.

**Schedule Type:** LEC  
**Hours of Lecture or Seminar per week:** 1-2  
**Hours of Lab or Studio per week:** 0

**CHIN 102 - Elementary Chinese**

Credits: 3  
Not Repeatable for Credit  
Offered by Modern and Classical Languages.  
Continuation of CHIN 101.

**Prerequisite(s):** CHIN 101.  
**Notes:** Students may not receive credit for CHIN 102 and CHIN 109 or 110.

**Schedule Type:** LEC  
**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**CHIN 109 - Intensive Elementary Chinese**

Credits: 6  
Not Repeatable for Credit  
Offered by Modern and Classical Languages.  
Recommended for students who desire training in Chinese language to an intermediate level of competence in a relatively short period of time.

**Notes:** Equivalent to CHIN 101 and 102 taught in single semester. Students may not receive credit for CHIN 109 and CHIN 101, 102, or 110.

**Schedule Type:** LEC  
**Hours of Lecture or Seminar per week:** 6  
**Hours of Lab or Studio per week:** 0
CHIN 110 - Elementary Chinese

Credits: 6  
Not Repeatable for Credit  
Offered by Modern and Classical Languages.  
Introduces elements of grammar, vocabulary, oral skills, listening comprehension, and reading.

Notes: Lab work required. Students may not receive credit for CHIN 110 and CHIN 101, 102, or 109.

Schedule Type: LEC  
Hours of Lecture or Seminar per week: 6  
Hours of Lab or Studio per week: 1

CHIN 201 - Intermediate Chinese I

Credits: 3  
Not Repeatable for Credit  
Offered by Modern and Classical Languages.  
Further development of skills acquired in CHIN 101 and 102, including grammar, oral expression, listening comprehension, reading, and writing.

Prerequisite(s): CHIN 101 and 102.  
Notes: CHIN 201 and 202 must be taken in sequence. Students may not receive credit for CHIN 201 and CHIN 209 or 210.

Schedule Type: LEC  
Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0

CHIN 202 - Intermediate Chinese II

Credits: 3  
Not Repeatable for Credit  
Offered by Modern and Classical Languages.  
Continuation of CHIN 201.

Prerequisite(s): CHIN 201 or equivalent.  
Notes: Students may not receive credit for CHIN 202 and CHIN 209 or 210.

Schedule Type: LEC  
Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0

CHIN 209 - Intensive Intermediate Chinese
CHIN 209 - Elementary Chinese

Credits: 6
Not Repeatable for Credit
Offered by Modern and Classical Languages.
Recommended for students who desire training in Chinese to an intermediate level of competence in a relatively short period of time.

Prerequisite(s): CHIN 102, 109, appropriate placement score, or permission of instructor.
Notes: Equivalent to CHIN 201 and 202 taught in single semester. Students may not receive credit for CHIN 209 and CHIN 201, 202, or 210.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 6
Hours of Lab or Studio per week: 0

CHIN 210 - Intermediate Chinese

Credits: 3
Not Repeatable for Credit
Offered by Modern and Classical Languages.
Continuation of the development of basic components of the language, with focus on listening, speaking, reading, and writing skills. Introduces students to the cultures and histories of Chinese-speaking regions.

Prerequisite(s): CHIN 110 or appropriate placement score.
Notes: Students may not receive credit for CHIN 210 and CHIN 201, 202, or 209.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CHIN 250 - Gateway to Advanced Chinese

Credits: 3
Not Repeatable for Credit
Offered by Modern and Classical Languages.

Integration of advanced intermediate-level Chinese reading, writing, listening, and speaking skills; and the development of critical thinking about authentic texts from around the globe.

Prerequisite(s): CHIN 210, appropriate placement score, or permission of department.
Notes: Taught in Chinese.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
CHIN 300 - Reading Skills Development

Credits: 3
Not Repeatable for Credit
Offered by Modern and Classical Languages.
Develops reading proficiency, emphasizing vocabulary and grammar of standard written Chinese. Introduces discourse structure, sociolinguistic and cultural knowledge, and strategies for reading Chinese at an advanced level.

Prerequisite(s): CHIN 250, appropriate placement score, or permission of instructor.
Notes: Taught in Chinese.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CHIN 301 - Advanced Grammar and Syntax

Credits: 3
Not Repeatable for Credit
Offered by Modern and Classical Languages.
In-depth review of Chinese grammar and syntax. Provides extensive practice in controlled and free writing, emphasizing fundamental difficulties and points of interference between English and Chinese.

Prerequisite(s): CHIN 250 or equivalent; appropriate placement score; or permission of instructor.
Notes: Taught in Chinese.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CHIN 305 - Chinese for the Business World

Credits: 3
Not Repeatable for Credit
Offered by Modern and Classical Languages.
Introduces terminology and structure of business Chinese. Emphasizes acquiring vocabulary and developing facility in Chinese business articles and correspondence.

Prerequisite(s): CHIN 250 or equivalent; appropriate placement score; or permission of instructor.
Notes: Taught in Chinese. May be repeated for credit once with permission of department when content is different.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CHIN 310 - Survey of Chinese Literature
Credits: 3  
Repeatable within Degree for Credit  
Offered by Modern and Classical Languages.  
Introduces outlines of Chinese literature to the 19th century, presented through literary sources arranged in roughly chronological order. Readings include poetry; fiction; personal essays; documents of philosophy, history, and religion; and transcribed oral records.  
Fulfills Mason Core requirement in literature.  

Prerequisite(s): ENGL 101/ENGH 101, or permission of instructor.  
Notes: Taught in English. Knowledge of Chinese helpful but not required. May be repeated for a maximum of 6 credits when topic is different with approval of department.  

Schedule Type: LEC  
Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0

CHIN 311 - Modern Chinese Literature in Translation

Credits: 3  
Repeatable within Term for Credit  
Offered by Modern and Classical Languages.  
Introduction of outlines of modern Chinese literature from early 20th century to post-Mao era, presented through literary sources arranged in roughly chronological order. Readings include poetry, fiction, personal essays.  
Fulfills Mason Core requirement in literature.  

Prerequisite(s): ENGL 101/ENGH 101, or permission of instructor.  
Notes: Taught in English. Knowledge of Chinese helpful but not required. May be repeated for a maximum of 6 credits when topic is different with approval of department.  

Schedule Type: LEC  
Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0

CHIN 318 - Introduction to Classical Chinese

Credits: 3  
Not Repeatable for Credit  
Offered by Modern and Classical Languages.  
Introduces basic structures and vocabulary of Classical Chinese, which still has a significant influence on the formal written prose of modern newspapers and documents.  

Prerequisite(s): CHIN 250, appropriate placement score, or permission of instructor.  
Notes: Taught in Chinese. Fulfills the college requirement in non-Western culture.  

Schedule Type: LEC  
Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0
CHIN 320 - Contemporary Chinese Film

Credits: 3
Not Repeatable for Credit
Offered by Modern and Classical Languages.
Explores China from 1949 to present through cinematic and literary representations. Discussions focus on representations of cultural, social, and political changes in the movies. Also introduces critical readings that address issues of gender and youth, family, ethnicity, modernity and the nation, as well as visuality and memory.

Notes: Taught in English. Knowledge of Chinese language helpful but not required. Fulfills the college requirement in non-Western culture.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CHIN 325 - Major Chinese Writers

Credits: 3
Repeatable within Degree for Credit
Offered by Modern and Classical Languages.
Studies works of major Chinese writers. Writers studied may vary.

Fulfills Mason Core requirement in literature.

Prerequisite(s): ENGL 101/ENGH 101, or permission of instructor.

Notes: Taught in English. Knowledge of Chinese helpful but not required. May be repeated for a maximum of 6 credits when topic is different with approval of department. Fulfills the college requirement in non-Western culture.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CHIN 328 - Asian American Women Writers

Credits: 3
Not Repeatable for Credit
Offered by Modern and Classical Languages.
Introduction to selected works by female writers of Chinese, Filipino, Indian, Japanese, and Korean descent. Analyzes themes, form, style, language, and structure of a variety of works, mainly novels and short stories. Assesses role and significance of writings as part of ethnic American and women's literature by exploring questions of identity formation and disintegration, and how they are rooted in gender, social status, ethnicity, community, geography, and generational conflict.

Fulfills Mason Core requirement in literature.

Notes: Taught in English. Knowledge of Asian languages not required.
CHIN 355 - Readings in Chinese Poetry and Poetics

Credits: 3
Repeatable within Degree for Credit
Offered by Modern and Classical Languages.
Close readings and discussions of primary texts covering major periods in Chinese poetry to 1949. Analyzes variety of themes, forms, and styles.

Prerequisite(s): CHIN 300 or permission of instructor.
Notes: Taught in Chinese. May be repeated for a maximum of 6 credits when readings are different with permission of department.

CHIN 365 - Readings in Chinese Fiction after Mao

Credits: 3
Repeatable within Degree for Credit
Offered by Modern and Classical Languages.
Close readings and discussions of primary texts after the Cultural Revolution. Analyzes themes, subjects, language, and styles.

Prerequisite(s): CHIN 300 or permission of instructor.
Notes: Taught in Chinese. May be repeated for a maximum of 6 credits when readings are different with permission of department.

CHIN 470 - Special Topics in Chinese Studies

Credits: 3
Repeatable within Degree for Credit
Offered by Modern and Classical Languages.
Covers topics on Chinese language, literature, or culture organized by theme, genre approach, or era.

Notes: Taught in Chinese. May be repeated once for a maximum of 6 credits when topic is different with permission of department.
CHIN 475 - Chinese Popular Culture

Credits: 3  
Not Repeatable for Credit  
Offered by Modern and Classical Languages  
Combines language learning with an introduction to the complex and vibrant popular culture of contemporary China: music, food, games, gender and family issues, commercial culture, and digital media. Authentic texts will include popular music and poems, films, TV shows, and social media posts.

Prerequisite(s): Three years of college Chinese or equivalent.  
Notes: Taught in Chinese.

Schedule Type: LEC  
Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0

CHIN 480 - Fourth-Year Chinese I

Credits: 3  
Not Repeatable for Credit  
Offered by Modern and Classical Languages.  
Advanced work in major grammatical and lexical topics of Chinese. Applies theoretical principles to guided written and oral exercises.

Fulfills writing intensive requirement in the major.

Prerequisite(s): CHIN 300 and 301; appropriate placement score or permission of instructor.  
Notes: Taught in Chinese.

Schedule Type: LEC  
Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0

CHIN 481 - Fourth-Year Chinese II

Credits: 3  
Not Repeatable for Credit  
Offered by Modern and Classical Languages.  
Advanced work in major grammatical and lexical topics of Chinese. Applies theoretical principles to guided written and oral exercises.

Prerequisite(s): CHIN 300, 301, 480; and appropriate placement score or permission of instructor.  
Notes: Taught in Chinese.
CHIN 490 - Internship in Chinese Studies

Credits: 1-9
Repeatable within Term for Credit
Offered by Modern and Classical Languages.
Work with schools, social service programs, government agencies, interest groups, museums, or corporations locally and in Chinese-speaking regions. With a faculty supervisor, students develop an internship contract, which requires the approval of the director. For each credit, student works on site at least 45 hours.

Prerequisite(s): CHIN 210 or equivalent.
Notes: Contact the department one semester prior to enrollment. May be repeated for a maximum of 9 credits.

Civil and Infrastructure Engineering (CEIE)

Offered by the Volgenau School of Engineering.

Students may attempt an undergraduate course taught by the Volgenau School of Engineering twice. A third attempt requires approval of the department offering the course.

CEIE 100 - Environmental Engineering around the World

Credits: 3
Limited to 2 Attempts
Offered by Sid and Reva Dewberry Department of Civil, Environmental, and Infrastructure Engineering

Introduces environmental engineering as practiced in different societies around the world. Environmental engineering is broadly defined as organizational and physical infrastructure to manage natural resources. Focuses on how different contemporary and past societies have responded to environmental challenges related to engineering opportunities. Issues include construction of large dams to manage river systems; use of forecast climate and weather data to improve agriculture, emergency response, or water supply; collection and treatment of wastewater; public health and pollution control; disposal of waste nuclear materials; and management of significantly polluted sites.
Designated a Green Leaf Course.
Fulfills Mason Core requirement in global understanding.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
CEIE 203 - Geomatics and Engineering Graphics

Credits: 3  
Limited to 2 Attempts  
Offered by Sid and Reva Dewberry Department of Civil, Environmental, and Infrastructure Engineering  
Introduces topographic surveying and engineering drawing for civil engineering applications. Topics include surveying, GPS, GIS, digital terrain modeling, design of horizontal and vertical curve geometry for road applications, engineering drawing concepts, and drawing with CAD-based software. Field work required on selected topics.

Prerequisite(s): C or better in CEIE 117 or CDS 130.  
Prerequisite(s) enforced by registration system.

Schedule Type: LEC  
Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0  
When Offered: Fall, Spring

CEIE 210 - Statics

Credits: 3  
Limited to 2 Attempts  
Offered by Sid and Reva Dewberry Department of Civil, Environmental, and Infrastructure Engineering  
Covers force vectors and operations in 2D and 3D; equilibrium of a particle; moment of a force vector; equilibrium of a rigid body; truss analysis; center of gravity, centroid and moment of inertia; shear force and bending moment diagrams; dry friction; virtual work.

Prerequisite(s): Grade of C or better in PHYS 160 and MATH 114 or MATH 116.  
Prerequisite(s) enforced by registration system.

Schedule Type: LEC  
Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0  
When Offered: Fall, Spring

CEIE 240 - Hydraulics

Credits: 3  
Limited to 2 Attempts  
Offered by Sid and Reva Dewberry Department of Civil, Environmental, and Infrastructure Engineering  
Principles of fluids in equilibrium and motion. Topics include hydrostatic pressure; continuity, Bernoulli, and momentum equations; viscosity flow problems; pressure pipe flow and turbomachinery; measuring instruments; and applications to closed conduits and open channels.

Prerequisite(s): Grade of C or better in PHYS 160.  
Prerequisite(s) enforced by registration system.

Schedule Type: LAB, LEC
**CEIE 301 - Engineering and Economic Models in Civil Engineering**

Credits: 3  
Limited to 2 Attempts  
Offered by Sid and Reva Dewberry Department of Civil, Environmental, and Infrastructure Engineering  
Applies planning, analysis, control, and engineering economic models to life cycle of physical infrastructure. Introduces infrastructure design process and application of quantitative and probabilistic models. Presents applications of model building for engineering economics; decision making; forecasting; resource scheduling and allocation; estimating; work measurement and materials; and quality and process control in water, transportation, environmental, energy, and telecommunications infrastructure systems and the built environment.  
Fulfills writing intensive requirement in the major.  
Equivalent to ME 352.  
Prerequisite(s): Grade of C or better in STAT 344 and ENGH 302 or HNRS 353. Prerequisite(s) enforced by registration system.  
Notes: Fulfills writing-intensive requirement for civil and infrastructure engineering major.

**CEIE 304 - Jr Engineering Competency Exam**

Credits: 0  
Repeatable within Term for Credit  
Offered by Sid and Reva Dewberry Department of Civil, Environmental, and Infrastructure Engineering  
Assess student preparation for the Fundamentals of Engineering exam after completing engineering science requirements for a BS degree in engineering.  
Prerequisite(s): Grade of C or better in MATH 114 or MATH 116 and PHYS 260. Prerequisite(s) enforced by registration system.

**CEIE 310 - Mechanics of Materials**
CEIE 311 - Structural Analysis

Credits: 3
Limited to 2 Attempts
Offered by Sid and Reva Dewberry Department of Civil, Environmental, and Infrastructure Engineering
Basic concepts and assumptions of structural analysis, including statical and geometric redundancy. Analysis, by integration of deformation of simple structural members. Virtual work method for the analysis of deformations of simple structural systems such as articulate beams, trusses, frames, and arches. Method of forces to analyze statically indeterminate systems, method of displacements to analyze geometrically indeterminate systems, and symmetry and antisymmetry in structural analysis. Uses computer programs for structural analysis.

Prerequisite(s): Grade of C or better in CEIE 310 or ENGR 310.
Prerequisite(s) enforced by registration system.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

CEIE 331 - Soil Mechanics

Credits: 3
Limited to 2 Attempts
Offered by Sid and Reva Dewberry Department of Civil, Environmental, and Infrastructure Engineering
Covers soil classification, soil properties and engineering characteristics of soils. Includes seepage effects, effective stresses, soil strength and deformation characteristics. Also, the determination of immediate and consolidation settlement, lateral earth pressures and bearing capacities. Introduces foundation design fundamentals.

Prerequisite(s): Grade of C or better in (CEIE 210 or ENGR 210) and in (CEIE 230 or CEIE 240).
Prerequisite(s) enforced by registration system.
CEIE 340 - Water Resource Engineering

Credits: 3  
Limited to 2 Attempts  
Offered by Sid and Reva Dewberry Department of Civil, Environmental, and Infrastructure Engineering  
Introduces principles and practice of water resources engineering. Topics include hydrology, governing principles, design and evaluation methods, common models, and typical applications in water resource engineering. Laboratory and field work required on selected topics.

Prerequisite(s): Grade of C or better in CEIE 240 or CEIE 230.  
Prerequisite(s) enforced by registration system.

CEIE 355 - Environmental Engineering and Science

Credits: 3  
Limited to 2 Attempts  
Offered by Sid and Reva Dewberry Department of Civil, Environmental, and Infrastructure Engineering  
Introduces students to the concepts of water pollution, air pollution, noise, and solid waste generation and management. Relationships between human population growth and pollution are introduced. Contemporary environmental engineering topics such as sustainability and global climate change are presented. Designated a Green Leaf Course.

Prerequisite(s): Grade of C or better in (CEIE 230 or CEIE 240) and (CHEM 211 or CHEM 251).  
Prerequisite(s) enforced by registration system.

CEIE 360 - Introduction to Transportation Engineering

Credits: 3  
Limited to 2 Attempts  
Offered by Sid and Reva Dewberry Department of Civil, Environmental, and Infrastructure Engineering
Introduces transportation systems and the factors that influence their planning, design, and operation. Topics include fundamentals of urban travel, travel demand forecasting, and traffic flow; principles of highway design; highway capacity and level of services; introduction to traffic control; traffic signal control systems; intersection design; speed zoning and control; and introduction to Intelligent Transportation Systems and travel demand management. Requires laboratory, field work on selected topics.

**Prerequisite(s):** Grade of C or better in (ENGR 210 or CEIE 210), and (CEIE 290 or CEIE 203) and Satisfactory in CEIE 304. Prerequisite(s) enforced by registration system.

**Schedule Type:** LEC  
**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall, Spring

### CEIE 370 - Construction Systems

Credits: 3  
Limited to 2 Attempts  
Offered by Sid and Reva Dewberry Department of Civil, Environmental, and Infrastructure Engineering  
Overview of the modern construction industry and principles and practices of construction management. Topics include project planning, construction administration, the contract environment, equipment operations, cost estimation and scheduling, and legal theories. Current industry trends are emphasized as are the uses of modern scheduling and cost-estimating software and online databases.

**Prerequisite(s):** Grade of C or better in (CEIE 290 or CEIE 203) and CEIE 301. Prerequisite(s) enforced by registration system.

**Schedule Type:** LEC  
**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall, Spring

### CEIE 395 - Mentored Research in Civil and Environmental Engineering

Credits: 1-3  
Repeatable within Degree for Credit  
Offered by Sid and Reva Dewberry Department of Civil, Environmental, and Infrastructure Engineering.  
Introduces the scientific research process through hands-on experience: students are matched with faculty mentors who are actively involved in civil engineering-related research. Requires no less than 60 hours per semester working with mentors.

**Prerequisite(s):** At least 60 credit hours applicable to the Civil and Infrastructure Engineering program.  
**Notes:** Three credits of CEIE 395 may substitute for a maximum of 3 credits of CEIE 4xx technical elective credits with department permission.

**Schedule Type:** IND  
**Hours of Lecture or Seminar per week:** 0  
**Hours of Lab or Studio per week:** 0  
**Grading:** Regular  
**When Offered:** Fall, Spring, Summer
CEIE 400 - Civil Engineering Planning and Management

Credits: 3  
Limited to 2 Attempts  
Offered by Sid and Reva Dewberry Department of Civil, Environmental, and Infrastructure Engineering  
Quantitative and qualitative analysis in planning, design, construction, and management of engineering systems and facilities. Introduces policies, programs, and regulations that influence land development, history-enabling legislation, governing and regulating bodies, control of site plan development, and approval process. Examines structure, function, and purpose of urban design systems and how they can be achieved. Discusses physical relationships among development, land use, transportation, energy, communications, and water systems. Studies public- and private-sector urban development industry. Other topics include innovation, competition, new technology, and environmental issues. Requires design projects.

Prerequisite(s): Grade of C or better in CEIE 340 and CEIE 360.  
Prerequisite(s) enforced by registration system.

Schedule Type: LEC  
Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0  
When Offered: Fall, Spring

CEIE 401 - Sustainable Land Development

Credits: 3  
Limited to 2 Attempts  
Offered by Sid and Reva Dewberry Department of Civil, Environmental, and Infrastructure Engineering

Introduces students to sustainable land development topics including low impact development, site resource conservation, ultra low water design, deconstruction and materials reuse, healthy building design, green house gas reduction, zero and low energy design, and other topics related to sustainable practices in facilities and infrastructure design and construction. Designated a Green Leaf Course.

Prerequisite(s): Grade of C or better in CEIE 355, CEIE 340 and CEIE 360.  
Prerequisite(s) enforced by registration system.

Corequisite(s): CEIE 400

Schedule Type: LEC  
Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0  
When Offered: Fall

CEIE 402 - Highway Design and Construction

Credits: 1.5  
Limited to 2 Attempts  
Offered by Sid and Reva Dewberry Department of Civil, Environmental, and Infrastructure Engineering
Provides a survey of the tools, techniques, and methods used by the various civil engineering disciplines to design and construct highways. Combines lectures, individual readings, and hands-on exposure to the tools and processes used in design and construction of highways. All facets of a project are covered including planning, project management, survey and mapping, preliminary design, geotechnical, pavements, environmental, hydraulics, bridge design, PS&E design, materials, and construction.

**Prerequisite(s):** Senior CEIE status and grade of C or better in CEIE 310. Prerequisite(s) enforced by registration system.

**Notes:** Course meets off-campus at the federal Highway Administration Eastern Federal Lands Highway Division in Sterling, VA.

**Schedule Type:** LAB, LEC
**Hours of Lecture or Seminar per week:** 1
**Hours of Lab or Studio per week:** 2
**When Offered:** Fall

### CEIE 403 - Experimental Methods in Civil Engineering

Credits: 1.5
Limited to 2 Attempts
Offered by Sid and Reva Dewberry Department of Civil, Environmental, and Infrastructure Engineering
Surveys common testing and laboratory experimental methods that civil engineers encounter in their professional practice and in research settings. Students fabricate specimens of civil engineering materials and conduct experiments in the following laboratories at the Federal Highway Administration's Turner-Fairbank Highway Research Center: Concrete and Steel Materials, Structures, Hydraulics, Geotechnical, and Asphalt.

**Prerequisite(s):** Senior CEIE status and grade of C or better in CEIE 310. Prerequisite(s) enforced by registration system.

**Notes:** Course meets off-campus at the Federal Highway Administration's Turner-Fairbank Highway Research Center in McLean, VA.

**Schedule Type:** LAB, LEC
**Hours of Lecture or Seminar per week:** 1-3
**Hours of Lab or Studio per week:** 2
**When Offered:** Spring

### CEIE 404 - Sr Engineering Competency Exam

Credits: 0
Repeatable within Term for Credit
Offered by Sid and Reva Dewberry Department of Civil, Environmental, and Infrastructure Engineering
Assess student preparation for the Fundamentals of Engineering exam after completing engineering design electives required for a BS degree in engineering.

**Prerequisite(s):** Satisfactory grade in CEIE 304. Prerequisite(s) enforced by registration system.
CEIE 409 - Professional Practice and Management in Engineering

Credits: 1
Limited to 2 Attempts
Offered by Sid and Reva Dewberry Department of Civil, Environmental, and Infrastructure Engineering
Introduces professional ethics and management principles, and prepares students for leadership roles in practice. Topics include introduction to professional and technical societies; code of ethics related to the public, clients, contractors, suppliers, employers, agreements, contracts, competitive bidding, the engineering profession, conflict of interest, legal responsibilities and case law. Case studies of professional ethics; professional licensure; engineering versus engineering management; personal development; time management, career versus grad school, continuing education; public policy considerations in engineering practice; practical considerations in project management; effectively communicating with employees, contractors and clients; marketing, competitive bidding and project selection; conflict resolution; and managing a small business.

Fulfills Mason Core requirement in information technology (ethics only).

Prerequisite(s): Senior standing.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

CEIE 410 - Geographic Information Systems in Engineering

Credits: 3
Limited to 2 Attempts
Offered by Sid and Reva Dewberry Department of Civil, Environmental, and Infrastructure Engineering
Introduces geographic information systems (GIS) and their application in environmental, transportation, land-use planning, and other situations. Explores methods, technologies for spatial data acquisition, specification, storage, manipulation, query, thematic analysis, presentation, and application in the design process. Introduces relationships, integration of GIS with computer-aided design and global positioning system. Hands-on projects.

Prerequisite(s): Grade of C or better in (CDS 130, CS 112, ENGR 117 or CEIE 117) and CEIE 360 and CEIE 355.
Prerequisite(s) enforced by registration system.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CEIE 411 - Introduction to Design and Inventive Engineering
CEIE 412 - Structural Steel Design

Credits: 3
Limited to 2 Attempts
Offered by Sid and Reva Dewberry Department of Civil, Environmental, and Infrastructure Engineering
Covers analysis and design of structural steel members including tension members, compression members, bolted and welded connections, columns, beams, and beam-columns.

Prerequisite(s): Grade of C or better in CEIE 311.
Prerequisite(s) enforced by registration system.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring

CEIE 413 - Reinforced Concrete Design

Credits: 3
Limited to 2 Attempts
Offered by Sid and Reva Dewberry Department of Civil, Environmental, and Infrastructure Engineering
Covers analysis and design of reinforced concrete members including beams, columns, slabs and footings; sizing of structural members for flexure and shear; determining serviceability limits; detailing reinforcing steel bars.

Prerequisite(s): Grade of C or better in CEIE 311.
Prerequisite(s) enforced by registration system.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

CEIE 432 - Foundation Design
CEIE 431 - Geotechnical Engineering

Credits: 3  
Limited to 2 Attempts  
Offered by Sid and Reva Dewberry Department of Civil, Environmental, and Infrastructure Engineering  
Introduction to various principles and practices of geotechnical engineering including estimation of soil properties using in-situ tests, laboratory tests, and correlations. Course includes study of earth pressure theories as applied to the design of retaining walls, anchored bulkheads, and excavation bracing. Additional topics include retaining wall stability, bearing capacity and settlement of shallow foundations on sands and clays and design considerations and capacity analysis of deep foundations.

Equivalent to CEIE 431 (2012-2013 Catalog).

Prerequisite(s): Grade C or better in CEIE 305 or CEIE 331.  
Prerequisite(s) enforced by registration system.

Schedule Type: LEC  
Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0  
When Offered: Fall, Spring

CEIE 435 - Engineering Geology

Credits: 3  
Limited to 2 Attempts  
Offered by Sid and Reva Dewberry Department of Civil, Environmental, and Infrastructure Engineering  
Introduction to formation and occurrence of earth materials: rock and soil; weathering processes, geomorphology, structural geology, interpreting topographic and geologic maps; field investigation fundamentals, field engineering properties of soil and rock; standards and terminology; rock mass engineering classification systems; subsurface water control; rock as a construction material; special case studies in foundations, such as sinkholes, waste impoundments, dam failures, earth spillway performance.

Prerequisite(s): Grade C or better in CEIE 305 or CEIE 331.  
Prerequisite(s) enforced by registration system.

Schedule Type: LEC  
Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0  
When Offered: Fall

CEIE 440 - Water Supply and Distribution

Credits: 3  
Limited to 2 Attempts  
Offered by Sid and Reva Dewberry Department of Civil, Environmental, and Infrastructure Engineering  
Analysis and design of public water supplies. Topics include: water supply evaluation; water quality; demand projections; hydraulic analysis of water distribution systems including line sizing, fire protection, pumps, valves, and storage; surge analysis; water modeling; concepts in management, business, and public policy of public water supplies; and federal, state, and local government laws and regulations related to public water systems.

Prerequisite(s): Grade of C or better in CEIE 340.  
Prerequisite(s) enforced by registration system.
**CEIE 442 - Open Channel Flow**

Credits: 3  
Limited to 2 Attempts  
Offered by Sid and Reva Dewberry Department of Civil, Environmental, and Infrastructure Engineering  
Analysis and design of open channels. Topics include principles of open channel flow including conservation of mass, momentum and energy; flow regimes including uniform, gradually varied, rapidly varied, and unsteady flows; sediment transport; channel design; and modeling and computer applications in open channel analysis and design.

Prerequisite(s): Grade of C or better in CEIE 340.  
Prerequisite(s) enforced by registration system.

**CEIE 450 - Environmental Engineering Systems**

Credits: 3  
Limited to 2 Attempts  
Offered by Sid and Reva Dewberry Department of Civil, Environmental, and Infrastructure Engineering  
Introduces the concepts and applications of systems analysis in environmental engineering. Tools and methodologies of systems analysis are applied to improve the understanding and resolution of complex environmental engineering problems related to air, soil, water quality and pollution. Scientific, engineering, political, social, legal, regulatory, medical, economic, and financial impacts of environmental engineering decisions are considered.

Designated a Green Leaf Course.

Prerequisite(s): Grade of C or better in CEIE 355.  
Prerequisite(s) enforced by registration system.

**CEIE 453 - Water and Wastewater Treatment Processes**
CEIE 454 - Sustainable Water Resources Infrastructure in Developing Countries

Credits: 3  
Limited to 2 Attempts  
Offered by Sid and Reva Dewberry Department of Civil, Environmental, and Infrastructure Engineering  
This course addresses the principles of infrastructure engineering and planning in developing countries, with a focus on sustainable technologies for rural and small-scale water supply and wastewater treatment. Students will design simple, reliable water supply and sanitation systems for developing countries with limited human and material resources and with regard to local customs and socio-cultural public health and economic factors.

Prerequisite(s): Grade C or better in CEIE 355.
Prerequisite(s) enforced by registration system.

Schedule Type: LEC  
When Offered: Fall, Spring

CEIE 457 - Remote Sensing in Civil Engineering

Credits: 3  
Limited to 2 Attempts  
Offered by Sid and Reva Dewberry Department of Civil, Environmental, and Infrastructure Engineering  
This course provides an introduction to the fundamentals of remote sensing. It will focus on how remote sensing data are acquired, displayed, restored, enhanced, and analyzed. The course will be taught with an emphasis on remote sensing techniques as a tool for engineering practices, such as regional planning, site investigation, terrain mapping, urban infrastructure development, water resources engineering, and flood monitoring.

Prerequisite(s): C or better in CEIE 355.
Schedule Type: LEC  
When Offered: Fall, Spring
CEIE 461 - Traffic Engineering

Credits: 3  
Limited to 2 Attempts  
Offered by Sid and Reva Dewberry Department of Civil, Environmental, and Infrastructure Engineering  
Elements of traffic engineering analysis; system components of traffic operations: driver, vehicle, and roadway; traffic flow design elements including volume, density, and speed; intersection design elements including traffic control device warrants, signal timing, delay, capacity, and accident countermeasures; and terminal design elements including inflow, outflow, and circulation.  

Prerequisite(s): Grade of C or better in CEIE 360.  
Prerequisite(s) enforced by registration system.  

Schedule Type: LEC  
Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0  
When Offered: Fall

CEIE 462 - Urban Transportation Planning

Credits: 3  
Limited to 2 Attempts  
Offered by Sid and Reva Dewberry Department of Civil, Environmental, and Infrastructure Engineering  
Technical and qualitative aspects of urban transportation planning process. Topics include urban travel characteristics and data collection methods; urban transportation modeling system, including land use, trip generation, trip distribution, mode choice, and trip assignment models; site traffic impact studies; environmental impacts; project and plan evaluation; and technology options for urban transport.  

Prerequisite(s): Grade of C or better in CEIE 360.  
Prerequisite(s) enforced by registration system.  

Schedule Type: LEC  
Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0

CEIE 471 - Construction Administration

Credits: 3  
Limited to 2 Attempts  
Offered by Sid and Reva Dewberry Department of Civil, Environmental, and Infrastructure Engineering  
Examines the principals of project planning and administration using modern specification and project delivery methods. The role of the project manager as facilitator, constructability advisor, and on-site administrator is emphasized. Project risk transference, market conditions, and legal requirements are explored in the construction contract environment. Other topics include green specifications, design-build delivery, job order contracting, turnkey construction, and public-private partnerships. Appropriate for students, engineering and design professionals, project managers, contract administrators, and owners interested in the planning and administration needs of construction.  

Prerequisite(s): Grade of C or better in CEIE 370.  
Prerequisite(s) enforced by registration system.
CEIE 472 - Building Information Modeling

Credits: 3  
Limited to 2 Attempts  
Offered by Sid and Reva Dewberry Department of Civil, Environmental, and Infrastructure Engineering  
Virtual design and construction techniques are covered using modern 3D Building Information Modeling (BIM) software. Historical and technological basis for virtual building and infrastructure design are presented. Design and construction coordination are emphasized using clash detection, conflict management, constructability analysis, specification mapping, and asset management. Industry supported model component databases are used with commercial software design environments for hands-on simulated design and construction projects.

Prerequisite(s): Grade of C or better in CEIE 370.  
Prerequisite(s) enforced by registration system.

CEIE 490 - Senior Design Project

Credits: 3  
Limited to 2 Attempts  
Offered by Sid and Reva Dewberry Department of Civil, Environmental, and Infrastructure Engineering  
Capstone design experience. Integrates all design fundamentals employed by a typical civil engineering design team. Major team efforts include land use, transportation, water and sewerage, storm water, site analysis, economic and regulatory considerations, sectioning, grading, and siting. Students focus on teamwork, interdisciplinary interaction, and tradeoff decision making. Design team analyzes all aspects of a major urban project, develops solutions to design problems, and produces project report and oral presentation. Design effort completed and report is prepared, presented, and evaluated. Primary course goal is to produce design for contemporary civil infrastructure project.

Fulfills Mason Core requirement in synthesis.

Prerequisite(s): Senior standing. Grade C or better in CEIE 301, CEIE 311, CEIE 340, CEIE 355, CEIE 360, (CEIE 305 or CEIE 331), CEIE 370, and three 4xx level technical electives. Grade of S (Satisfactory) in CEIE 404.  
Prerequisite(s) enforced by registration system.
CEIE 498 - Independent Study in Civil Engineering

Credits: 1-3
Repeatable within Term for Credit
Offered by Sid and Reva Dewberry Department of Civil, Environmental, and Infrastructure Engineering
Directed self-study of special topics of current interest.

Prerequisite(s): Must have completed 60 credits of course work; permission of the Department Chair.
Notes: May be repeated for maximum 6 credits if topics are substantially different.

Schedule Type: IND
Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0

CEIE 499 - Special Topics in Civil Engineering

Credits: 1-3
Repeatable within Term for Credit
Offered by Sid and Reva Dewberry Department of Civil, Environmental, and Infrastructure Engineering
Varies with nature of topic. Topics of special interest to undergraduates.

Notes: May be repeated for maximum 6 credits if topics are substantially different.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 0

CEIE 501 - Sustainable Development

Credits: 3
Not Repeatable for Credit
Offered by Sid and Reva Dewberry Department of Civil, Environmental, and Infrastructure Engineering

Introduction to sustainability concepts and terminology including the development and use of sustainability indices. Exploration of sustainability tools and frameworks such as the Leadership in Energy and Environmental Design (LEED) Green Building Rating System, American Institute of Architects Sustainable Design Resources Guide, and the Natural Step (TNS) Framework. Methods for evaluation of sustainable sites, water/energy efficiency, sustainable materials and resources, and indoor air quality are presented.
Designated a Green Leaf Course.

Prerequisite(s): Graduate standing.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CEIE 510 - Geographic Information Systems in Engineering
Credits: 3
Not Repeatable for Credit
Offered by Sid and Reva Dewberry Department of Civil, Environmental, and Infrastructure Engineering
Introduces geographic information systems (GIS) and their application in environmental, transportation, land-use planning, and other engineering-related decision situations. Introduces methods and technologies for spatial data acquisition, specification, storage, manipulation, query, thematic analysis, presentation, and application in the design process. Introduces relationships, integration of GIS with computer-aided design and global positioning system. Hands-on projects.

Prerequisite(s): Knowledge of computer programming and databases or permission of instructor.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0
When Offered: Fall

CEIE 512 - Structural Steel Design

Credits: 3
Not Repeatable for Credit
Offered by Sid and Reva Dewberry Department of Civil, Environmental, and Infrastructure Engineering
Covers analysis and design of structural steel members including tension members, compression members, bolted and welded connections, columns, beams, and beam-columns.

Prerequisite(s): CEIE 311
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring

CEIE 513 - Reinforced Concrete Design

Credits: 3
Not Repeatable for Credit
Offered by Sid and Reva Dewberry Department of Civil, Environmental, and Infrastructure Engineering
Covers analysis and design of reinforced concrete members including beams, columns, slabs and footings; sizing of structural members for flexure and shear; determining serviceability limits; detailing reinforcing steel bars.

Prerequisite(s): CEIE 311.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

CEIE 524 - Introduction to Bridge Engineering

Credits: 3
Not Repeatable for Credit
Offered by Sid and Reva Dewberry Department of Civil, Environmental, and Infrastructure Engineering
A balanced theoretical and practical insight into the art and science of bridge engineering. Various methodologies of bridge design and evaluation are investigated, including constructability reviews. Bridges of steel, reinforced concrete, and pre-stressed concrete materials are included. Short-span composites; major innovation and low cost solutions targeted at aging infrastructure.

**Prerequisite(s):** Graduate Standing in CEIE; CEIE 512 or CEIE 513 or equivalent.

**Schedule Type:** LEC

**Hours of Lecture or Seminar per week:** 2

**Hours of Lab or Studio per week:** 0

**When Offered:** Fall

---

**CEIE 525 - Structural Evaluation and Rehabilitation**

Credits: 3

Not Repeatable for Credit

Offered by Sid and Reva Dewberry Department of Civil, Environmental, and Infrastructure Engineering

Structural condition survey and evaluation for strength and serviceability of existing structures including foundation elements; older building practices and materials; criteria for rehabilitation; retrofit techniques for change in function, loading, and seismic forces. Historic preservation issues. Repair, remediation, and structural strengthening methods and current trends. Carbon fiber external P.T. Material selection criteria, including mechanical and environmental factors. Cost/value feasibility analysis; estimating remedial construction costs; engineering oversight of rehabilitation work.

**Prerequisite(s):** Graduate Standing in CEIE.

**Schedule Type:** LEC

**Hours of Lecture or Seminar per week:** 3

**Hours of Lab or Studio per week:** 0

**When Offered:** Spring

---

**CEIE 526 - Advanced Steel Design**

Credits: 3

Not Repeatable for Credit

Offered by Sid and Reva Dewberry Department of Civil, Environmental, and Infrastructure Engineering

Behavior, strength, and design of vertical steel structures using the LRFD approach; plate girders, composite beams, welded built-up columns, bolted and welded connections, beam-columns, and torsion; introduction to plastic analysis and its application to members and vertical structures; erection procedure and methods field inspection issues; unique properties of high strength steels.

**Prerequisite(s):** Graduate Standing in CEIE; CEIE 512 or equivalent.

**Schedule Type:** LEC

**Hours of Lecture or Seminar per week:** 3

**Hours of Lab or Studio per week:** 0

**When Offered:** Spring

---

**CEIE 527 - Pre-stressed Concrete**

Credits: 3

Not Repeatable for Credit
Offered by Sid and Reva Dewberry Department of Civil, Environmental, and Infrastructure Engineering
Strength, behavior, analysis, and design of pre-stressed concrete members, vertical building structures, and bridges, with emphasis on pre-tensioned, precast construction, and post-tensioned construction; basics of segmental concrete bridges, cable-stayed bridges, and spliced-girder concrete bridges; continuous span theory; protection of pre- & post-tensioned systems; secondary effects. Composite Portland Cement with cast-in-place topping; precast as a stay-in-place system; connection detailing; durability issues; advantages in a marine environment.

Prerequisite(s): Graduate Standing in CEIE; CEIE 513 or equivalent.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 0
When Offered: Spring

CEIE 531 - Earth Retaining Structures and Slope Stability

Credits: 3
Not Repeatable for Credit
Offered by Sid and Reva Dewberry Department of Civil, Environmental, and Infrastructure Engineering
Earth pressure theory and limit equilibrium theory used in the design of temporary and permanent earth retaining structures; limit equilibrium slope stability; retaining wall design and associated construction issues of gravity walls, conventional concrete retaining walls, mechanically stabilized walls, braced and tiedback excavation support systems, and soil nailing walls; guidelines for the selection of retention method for permanent and temporary conditions.

Prerequisite(s): Graduate Standing in CEIE;
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

CEIE 532 - Foundation Design

Credits: 3
Not Repeatable for Credit
Offered by Sid and Reva Dewberry Department of Civil, Environmental, and Infrastructure Engineering
Introduction to various principles and practice of geotechnical engineering including estimation of soil properties using in-situ tests, laboratory tests, and correlations. Course includes the study of earth pressure theories as applied to the design of retaining walls, anchored bulkheads, and excavation bracing. Additional topics include retaining wall stability, bearing capacity and settlement of shallow foundations on sands and clays and design considerations for deep foundations.

Prerequisite(s): Graduate Standing.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring.

CEIE 535 - Engineering Geology
Introduction to formation and occurrence of earth materials - rock and soil; weathering processes, geomorphology, structural geology, interpreting topographic and geologic maps; field investigation fundamentals, field engineering properties of soil and rock; standards and terminology; rock mass engineering classification systems; subsurface water control; rock as a construction material; special case studies in foundations, such as sinkholes, waste impoundments, dam failures, earth spillway performance.

Prerequisite(s): Graduate Standing in CEIE.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 0
When Offered: Fall

CEIE 540 - Water Supply and Distribution

Analysis and design of public water supplies. Topics include supply evaluation; water quality and quantity requirements; treatment requirements and methods; hydraulic analysis of water distribution systems including line sizing, fire protection, pumps, valves, and storage; sustainability; security; concepts in management, business, and public policy of public water systems; and federal, state, and local government laws and regulations related to public water systems. Requires laboratory, field work on selected topics.
Designated a Green Leaf Course.

Prerequisite(s): A course in hydraulics or fluid mechanics.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CEIE 542 - Open Channel Flow

Analysis and design of open channels. Topics include principles of open channel flow including conservation of mass, momentum and energy; flow regimes including uniform, gradually varied, rapidly varied, and unsteady flows; sediment transport; channel design; modeling and computer applications in open channel analysis and design.

Prerequisite(s): A course in hydraulics or fluid mechanics.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
CEIE 550 - Environmental Engineering Systems

Credits: 3
Not Repeatable for Credit
Offered by Sid and Reva Dewberry Department of Civil, Environmental, and Infrastructure Engineering
Introduces the concepts and applications of systems analysis in environmental engineering. Tools and methodologies of systems analysis are applied to improve the understanding and resolution of complex environmental engineering problems related to air, soil, and water quality and pollution. Scientific, engineering, political, social, legal, regulatory, medical, economic, and financial impacts of environmental engineering decisions are considered.

Prerequisite(s): CEIE 355.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0
When Offered: Spring

CEIE 553 - Water and Wastewater Treatment Processes

Credits: 3
Not Repeatable for Credit
Offered by Sid and Reva Dewberry Department of Civil, Environmental, and Infrastructure Engineering
Studies unit treatment processes used in the treatment of water and wastewater systems. Topics include water quality, regulatory requirements, physical unit processes, chemical treatment processes and an introduction to biological treatment processes as applied to a range of community sizes.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring.

CEIE 556 - Environmental Law

Credits: 3
Not Repeatable for Credit
Offered by Sid and Reva Dewberry Department of Civil, Environmental, and Infrastructure Engineering
Introductory course in the study of environmental laws as they pertain to urban systems infrastructure management. Reviews the National Environmental Policy Act, Clean Air Act, Clean Water Act, Safe Drinking Water Act, Resource Conservation and Recovery Act, Comprehensive Environmental Response, Compensation, and Liability Act, and other environmentally related legislation. Also reviews laws for allocation of surface and groundwater supplies, and reviews environmental law databases.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0
When Offered: Spring

CEIE 560 - Public Transportation Systems
CEIE 561 - Traffic Engineering

Credits: 3
Not Repeatable for Credit
Offered by Sid and Reva Dewberry Department of Civil, Environmental, and Infrastructure Engineering
Covers elements of traffic engineering analysis; system components of traffic operations: driver, vehicle, and roadway; traffic flow design elements including volume, density, and speed; intersection design elements including traffic control device warrants, signal timing, delay, capacity, and accident countermeasures; and terminal design elements including inflow, outflow, and circulation.

Prerequisite(s): CEIE 365.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 0
When Offered: Fall

CEIE 562 - Urban Transportation Planning

Credits: 3
Not Repeatable for Credit
Offered by Sid and Reva Dewberry Department of Civil, Environmental, and Infrastructure Engineering
Covers technical and qualitative aspects of urban transportation planning process. Topics include urban travel characteristics and data collection methods; urban transportation modeling system, including land use, trip generation and distribution, mode choice, and trip assignment models; site traffic impact studies; environmental impacts; project and plan evaluation; and technology options for urban transport.

Prerequisite(s): CEIE 360.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 4
Hours of Lab or Studio per week: 0
When Offered: Spring

CEIE 571 - Construction Administration
CEIE 572 - Building Information Modeling

Credits: 3
Not Repeatable for Credit
Offered by Sid and Reva Dewberry Department of Civil, Environmental, and Infrastructure Engineering
Virtual design and construction techniques are covered using modern 3D Building Information Modeling (BIM) software. Historical and technological basis for virtual building and infrastructure design are presented. Design and construction coordination are emphasized using clash detection, conflict management, constructability analysis, specification mapping, and asset management. Industry-supported model component databases are used with commercial software design environments for hands-on simulated design and construction projects.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CEIE 573 - Legal Aspects of the Construction Process

Credits: 3
Not Repeatable for Credit
Offered by Sid and Reva Dewberry Department of Civil, Environmental, and Infrastructure Engineering
Examines the legal principles associated with the construction process. Introduces legal and project delivery concepts and review of the rights and responsibilities of construction project participants. Topics include the application of differing site conditions clauses, delay claims, termination rights, remedies for breach of contract, and dispute resolution techniques. Also includes review of industry legal issues, such as principles of risk management, LEED liability, and design-build contracts.

Prerequisite(s): Graduate Standing in CEIE.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 1-15
Hours of Lab or Studio per week: 0
When Offered: Fall

CEIE 575 - Design for Constructability
Systems design of structures to consider foundations, structures and constructability; foundation alternatives; structural design to simplify erection; prefabrication, modulation of structures; material handling on a construction site; crane selection and placement; temporary works.

Prerequisite(s): Graduate Standing in CEIE.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 5
Hours of Lab or Studio per week: 0
When Offered: Spring

CEIE 576 - Construction Cost Estimating

Overview of cost estimating and financial management in the modern construction industry. Techniques and software applications for construction take-offs, bidding, bonding, insurance, equipment ownership, material and labor costing. Additional topics include: cost recovery planning; budgeting, forecasting, acquisition, cast flow management, managerial accounting concepts, and taxes.

Prerequisite(s): Graduate Standing in CEIE.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0
When Offered: Fall

CEIE 601 - Infrastructure Modeling

Concepts of modeling for infrastructure engineering. Covers modeling, simulation, optimization, deterministic and stochastic models, and limitations of modeling approaches. Also includes multiple objective, multiple decision-maker problems, and case studies in areas such as transportation, water resources, the environment, energy, telecommunications, and construction.

Prerequisite(s): CEIE 605
Schedule Type: LEC
Hours of Lecture or Seminar per week: 1-4
Hours of Lab or Studio per week: 0
When Offered: Spring

CEIE 605 - Risk and Uncertainty in Civil Engineering
CEIE 607 - Public Infrastructure Management and Finance

Credits: 3
Not Repeatable for Credit
Offered by Sid and Reva Dewberry Department of Civil, Environmental, and Infrastructure Engineering
Current and projected outlook for managing and financing public works infrastructure including, transportation, public utilities, water and waste water facilities, energy, and public buildings; Infrastructure management including the impact of built infrastructure on the environment, tracking and improving infrastructure performance, government regulations, emerging technologies, social concerns, and the impacts of disasters; Infrastructure finance including public and private sources of capital, special financing districts, bond markets, federal and state grants, public-private partnerships, and design-build project delivery.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

CEIE 611 - Advanced Structural Analysis

Credits: 3
Not Repeatable for Credit
Offered by Sid and Reva Dewberry Department of Civil, Environmental, and Infrastructure Engineering
Application of the stiffness method in planar trusses, beams, planar frames, curved beams, and three-dimensional structures; Introduction to non-linear structural analysis with emphasis on geometric non-linearity.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

CEIE 612 - Structural Mechanics

Credits: 3
Not Repeatable for Credit
Offered by Sid and Reva Dewberry Department of Civil, Environmental, and Infrastructure Engineering
Covers the foundations of structural modeling and theories of elasticity. Topics include: multidimensional theories of stress and
strain, governing equations of elasticity, numerical solution techniques, material failure criteria, basics of nonlinear analysis.

**Schedule Type:** LEC  
**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall, Spring

---

**CEIE 613 - Structural Dynamics**

Credits: 3  
Not Repeatable for Credit  
Offered by Sid and Reva Dewberry Department of Civil, Environmental, and Infrastructure Engineering  
This course covers the fundamental principles necessary to analyze the responses of structures subjected to dynamic loads such as blast, earthquake, rotating machinery, etc. Idealized linear structural models subjected to free vibrations, harmonic vibrations, and impulsive loadings are presented. Practical applications of structural dynamics for solving simplified problems in blast and earthquake engineering are included.

**Prerequisite(s):** Differential Equations.

---

**CEIE 619 - Special Topics in Structural Engineering**

Credits: 0-3  
Repeatable within Degree for Credit  
Offered by Sid and Reva Dewberry Department of Civil, Environmental, and Infrastructure Engineering  
Advanced topics in recently developed areas of structural engineering. May be repeated for credit when topics vary.

**Prerequisite(s):** Graduate standing in CEIE or permission of the instructor.

---

**CEIE 620 - Intelligent Structural Systems**

Credits: 3  
Not Repeatable for Credit  
Offered by Sid and Reva Dewberry Department of Civil, Environmental, and Infrastructure Engineering  
Covers modern "smart" structures, structural health monitoring, and intelligent inspection technologies. Laboratory exercises with sensing and data acquisition systems. Applied data filtering and pattern recognition (machine learning). Modern image analysis and inspection techniques.

**Schedule Type:** LEC  
**Hours of Lecture or Seminar per week:** 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

CEIE 623 - Advanced Reinforced Concrete Design

Credits: 3
Not Repeatable for Credit
Offered by Sid and Reva Dewberry Department of Civil, Environmental, and Infrastructure Engineering
Covers the behavior, analysis and design of two-way reinforced concrete slabs; design of long columns including slenderness effects; structural design of isolated footings, combined footings and pile caps; design of deep beams using the strut-and-tie models; introduction bearing, retaining and shear wall designs.

Prerequisite(s): Reinforced Concrete Design.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

CEIE 634 - Groundwater and Geoenvironmental Design

Credits: 3
Not Repeatable for Credit
Offered by Sid and Reva Dewberry Department of Civil, Environmental, and Infrastructure Engineering
Equations of groundwater flow and seepage, groundwater site investigations, parameter determination, flownets, well design and aquifer testing, design of dewatering systems, seepage control. Conservative and non-conservative pollutant transport in groundwater, transport processes, modeling techniques for flow and transport. Groundwater remediation technologies, Brownfields and land revitalization.

Prerequisite(s): Graduate Standing in CEIE;
Schedule Type: LEC
Hours of Lecture or Seminar per week: 1 - 3
Hours of Lab or Studio per week: 0
When Offered: Spring

CEIE 635 - Advanced Soil Mechanics

Credits: 3
Not Repeatable for Credit
Offered by Sid and Reva Dewberry Department of Civil, Environmental, and Infrastructure Engineering
Consolidation of soil: primary and secondary; and rate. Soil strength in the framework of Critical State Soil Mechanics: normally consolidated, lightly and heavily overconsolidated, drained and undrained, elastic and plastic deformation.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring
CEIE 636 - Sources of Geotechnical Data

Credits: 3
Not Repeatable for Credit
Offered by Sid and Reva Dewberry Department of Civil, Environmental, and Infrastructure Engineering
Resources for conducting desk top studies; tools for field investigations; subsurface investigations (options and selection of
techniques); laboratory testing of soil and rock; accepted testing procedures; typical values; empirical relationships between
properties and testing techniques; risk and uncertainty; use of lab testing, insitu strength testing, and empirical methods in design;
identifying slickensides.

Prerequisite(s): Graduate Standing in CEIE.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

CEIE 638 - Advanced Foundation Design

Credits: 3
Not Repeatable for Credit
Offered by Sid and Reva Dewberry Department of Civil, Environmental, and Infrastructure Engineering
Design of shallow and deep foundations for civil engineering structures, including time rate of consolidation settlement, stress
distribution, elastic settlement, and bearing capacity. Driven piles and drilled shafts subjected to axial and lateral loading, both
single and group action.

Prerequisite(s): Graduate Standing in CEIE.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

CEIE 639 - Special Topics in Geotechnical Engineering

Credits: 1-3
Repeatable within Degree for Credit
Offered by Sid and Reva Dewberry Department of Civil, Environmental, and Infrastructure Engineering
Advanced topics in recently developed areas of geotechnical engineering. May be repeated for credit when topics vary.

Prerequisite(s): Graduate standing in CEIE or permission of the instructor.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Summer, Spring
CEIE 641 - Water Resources Engineering I: Principles and Practice

Credits: 3
Not Repeatable for Credit
Offered by Sid and Reva Dewberry Department of Civil, Environmental, and Infrastructure Engineering
Introduction to the principles of hydrology and hydraulics and their application to the planning, design and management of modern water resources.

Prerequisite(s): Graduate standing in CEIE; CEIE 340 or equivalent.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 0
When Offered: Fall

CEIE 642 - Flood Hazards Engineering

Credits: 3
Not Repeatable for Credit
Offered by Sid and Reva Dewberry Department of Civil, Environmental, and Infrastructure Engineering
Introduction to the principles of flood hazards engineering. Theory and practice of the application of hydrology and hydraulics to flood hazards delineation. Theory and practice of the application of geospatial analyses to support flood hazards modeling. Application of computational methods to support planning, design and management of flood hazards.

Prerequisite(s): Graduate standing in CEIE and CEIE 340 or equivalent.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

CEIE 643 - Coastal Flood Hazards

Credits: 3
Not Repeatable for Credit
Offered by Sid and Reva Dewberry Department of Civil, Environmental, and Infrastructure Engineering.
Introduction to the theory and practice of coastal flooding and hazards engineering. Topics include the theory of hurricane storm surges, tides, coastal hydrodynamics, waves and coastal processes. Use of the Surface Water Modeling System (SMS) and the Advanced Circulation Model (ADCIRC) for coastal flooding analysis. Introduction to High Performance Computing (HPC) modeling of hurricane storm surge. Introduction to Geographic Information Systems (GIS) applications to support coastal flood modeling and hazard analysis. Applications of coastal engineering to support coastal flood mapping and hazard prevention.

Prerequisite(s): Graduate Standing in CEIE
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

CEIE 644 - Groundwater Systems Modeling
CEIE 649 - Special Topics in Water Resources Engineering

Credits: 0-3
Repeatable within Degree for Credit
Offered by Sid and Reva Dewberry Department of Civil, Environmental, and Infrastructure Engineering
Advanced topics in recently developed areas of water resources engineering. May be repeated for credit when topics vary.

Prerequisite(s): Graduate standing in CEIE or permission of the instructor.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Summer, Spring

CEIE 657 - Environmental Engineering Microbiology

Credits: 3
Not Repeatable for Credit
Offered by Sid and Reva Dewberry Department of Civil, Environmental, and Infrastructure Engineering
Addresses the fundamental aspects of microbial physiology and ecology and their application to environmental engineering processes. Specific topics include cell structure and function, energetics, metabolism, enzyme and growth kinetics, microbial/environmental interactions (e.g. interactions with organic pollutants), biogeochemical cycles, and an introduction to engineering applications including bioremediation, wastewater treatment, biosensors and microbial fuel cells.

Prerequisite(s): Graduate standing.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

CEIE 658 - Water Quality

Credits: 3
Not Repeatable for Credit
Offered by Sid and Reva Dewberry Department of Civil, Environmental, and Infrastructure Engineering
This course addresses the physical, chemical and biological principles that define water quality. Mathematical and chemical
models are formulated and employed to predict fate and transport of contaminants in both surface and groundwater. Laboratory and field-work are required.

**CEIE 659 - Hazardous Waste**

Credits: 3  
Not Repeatable for Credit  
Offered by Sid and Reva Dewberry Department of Civil, Environmental, and Infrastructure Engineering  
Physical, chemical and biological properties of hazardous waste; abiotic and biotic transformation of hazardous wastes and their fate in the environment; design of remediation schemes including incineration, landfill, bioremediation and other physical and chemical stabilization processes; principles of risk assessment to select and optimize hazardous waste treatment; methods and strategies for hazardous waste reduction.

**CEIE 662 - Travel Demand Modeling**

Credits: 3  
Not Repeatable for Credit  
Offered by Sid and Reva Dewberry Department of Civil, Environmental, and Infrastructure Engineering  
Covers elements of Travel Demand Modeling at considerable detail. Design and execution of travel surveys; analysis of survey data; economic and demographic data and analysis; development of classification, regression and discrete choice models for four-step and activity based travel demand models; spatial analysis of data; matrix methods; validation and calibration of models; traffic and transit assignment methods and their application; select-link analysis. Hands-on modeling assignments.

**CEIE 663 - Intelligent Transportation Systems**

Credits: 3  
Not Repeatable for Credit  
Offered by Sid and Reva Dewberry Department of Civil, Environmental, and Infrastructure Engineering  
Advanced transportation system operations and safety through the use of wireless and wireline communications; integrated transportation systems; in-vehicle technologies; industry standards; and systems architecture. Provides skills to apply advanced technologies to transportation systems to improve operational and safety performance. Provides nontraditional tools to address issues of congestion and improved safety performance.
Prerequisite(s): CEIE 561 or 562.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 0

CEIE 664 - Transportation Engineering and the Environment
Credits: 3
Not Repeatable for Credit
Offered by Sid and Reva Dewberry Department of Civil, Environmental, and Infrastructure Engineering
Introduction to transportation and air quality; Clean Air Act; greenhouse gases, climate change, and modeling for green house gases; travel activity; The NEPA process for transportation projects; road transportation and noise; noise abatement.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

CEIE 665 - Travel Survey Methods and Data Analysis
Credits: 3
Not Repeatable for Credit
Offered by Sid and Reva Dewberry Department of Civil, Environmental, and Infrastructure Engineering
Covers the concept and practice of travel survey methods; national household travel survey; Census transportation survey and products; travel diary based, roadside, mail-in and web-based and GPS-based travel surveys; longitudinal vs. cross-sectional surveys; stated-preference survey; interactive and adaptive survey method; transit survey methods; special generator surveys; sampling approach and representativeness analysis; econometric data analysis; panel data; self-selection issues; other data mining methods; data security, privacy, IRB process, and ethics.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CEIE 667 - Multi-modal Transportation Systems
Credits: 3
Not Repeatable for Credit
Offered by Sid and Reva Dewberry Department of Civil, Environmental, and Infrastructure Engineering
Topical coverage of freight and logistics; non-motorized transportation considerations; and public transit planning. Freight topics include demand and supply modeling concepts; freight flow data sources; and truck size and weight policies. Bicycle and pedestrian planning considering traveler response to facility and policy improvements and identifying common resources for addressing non-motorized project concerns. Public transportation planning coverage including mass transit technology typologies, corridor planning and operations concepts, and finance and public policy issues, including environmental justice.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
CEIE 668 - Transportation Economics

Credits: 3
Not Repeatable for Credit
Offered by Sid and Reva Dewberry Department of Civil, Environmental, and Infrastructure Engineering
Application of micro- and macro-economic theories to transportation system analysis; interaction between transportation system, land use, and regional economics; mobility, accessibility, and system reliability; market equilibrium; pricing, willingness to pay, and welfare analysis; cost benefit analysis; project finance.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CEIE 669 - Special Topics in Transportation Engineering

Credits: 0-3
Repeatable within Degree for Credit
Offered by Sid and Reva Dewberry Department of Civil, Environmental, and Infrastructure Engineering
Advanced topics in recently developed areas of transportation engineering. May be repeated for credit when topics vary.

Prerequisite(s): Graduate standing in CEIE or permission of the instructor.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Summer, Spring

CEIE 679 - Special Topics in Construction Management

Credits: 0-3
Repeatable within Degree for Credit
Offered by Sid and Reva Dewberry Department of Civil, Environmental, and Infrastructure Engineering
Advanced topics in recently developed areas of construction management. May be repeated for credit when topics vary.

Prerequisite(s): Graduate standing in CEIE or permission of the instructor.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Summer, Spring

CEIE 680 - Introduction to Infrastructure and Security Engineering

Credits: 3
Not Repeatable for Credit
Offered by Sid and Reva Dewberry Department of Civil, Environmental, and Infrastructure Engineering
In-depth review of present and proposed practices and issues to manage civil infrastructure, focusing on performance and security through the full life cycle, including planning, designing, and construction of new, rehabilitated, modified, and recycled or decommissioned components. Covers asset-management methods and their effectiveness in managing all types of risk. Profiles policies leading civil infrastructure industry toward adoption of such methods, and examines industry case studies. Special attention to vulnerability assessment and risk management in context of broad sampling of potential threats.

Prerequisite(s): BS in civil engineering, or permission of instructor.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 1 - 6
Hours of Lab or Studio per week: 0

CEIE 683 - Water and Wastewater Systems Security

Credits: 3
Not Repeatable for Credit
Offered by Sid and Reva Dewberry Department of Civil, Environmental, and Infrastructure Engineering
Examines overall security of water and wastewater systems. Covers theory and methods to define water and wastewater infrastructure as physical and organizational systems. Explores concepts of infrastructure systems security; identifies actors, interactions in organizational infrastructure, and threats to water and wastewater infrastructure; describes behavior of physical and organizational infrastructures under stress; examines history of threats or attacks against water and wastewater systems; and explores evolution of design, operations, and maintenance paradigms in response to changes in threats. Covers proactive responses to security threats through vulnerability assessments, and models of organizational and physical infrastructure system.

Prerequisite(s): BS in Civil Engineering or CEIE 440 and CEIE 455.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0

CEIE 685 - Civil Engineering Information Management

Credits: 3
Not Repeatable for Credit
Offered by Sid and Reva Dewberry Department of Civil, Environmental, and Infrastructure Engineering
Advanced course covering all phases of information management life cycle from conceptual design and data collection through systems development, archiving, and disposal. Covers software engineering such as structured analysis, rapid prototyping, and object-oriented analysis as applied to urban systems infrastructure problem solving. Reviews database technology, spreadsheets, communications software, customized applications software, groupware, and graphics software including computer-aided design and geographic information systems. Covers selection and use of appropriate software to match specific engineering problems related to the design, construction, and management of civil engineering infrastructure. Includes design and development of system for engineering application.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 1-9
Hours of Lab or Studio per week: 0
When Offered: Spring

CEIE 686 - Transportation System Security and Safety
CEIE 690 - Topics in Civil Engineering

Credits: 3
Repeatable within Term for Credit
Offered by Sid and Reva Dewberry Department of Civil, Environmental, and Infrastructure Engineering
Topics not covered in the regular civil engineering offerings.

Prerequisite(s): Determined by topic.
Notes: Course content may vary each semester. Course may be repeated with change in topic.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 0

CEIE 742 - Water Resources Engineering II: Water Resource Systems

Credits: 3
Not Repeatable for Credit
Offered by Sid and Reva Dewberry Department of Civil, Environmental, and Infrastructure Engineering
Introduces concepts, applications, and tools of systems analysis for water resources planning, management, and design. Problems including river basin planning, real-time hydrosystem operations, water quality management, capacity expansion, urban drainage network design, and sanitary sewer design used to illustrate applications of systems analysis. Tools include optimization and simulation modeling and knowledge-based systems.

Prerequisite(s): Graduate Standing in CEIE; CEIE641 or equivalent.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 0

CEIE 762 - Network Models for Transportation Planning
CEIE 763 - Discrete Choice Analysis in Transportation

Credits: 3
Not Repeatable for Credit
Offered by Sid and Reva Dewberry Department of Civil, Environmental, and Infrastructure Engineering
Utility theory and individual choice behavior; Binary choice model; Multinomial choice model; Characteristics of Probit and Logit models; Aggregate forecasting techniques; Travel survey and sampling; Test and choice of model structure; Correlation and nested Logit Model, Advanced models and estimation techniques; Travel, route choice and car ownership models.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

CEIE 767 - Traffic Engineering Modeling and Analysis

Credits: 3
Not Repeatable for Credit
Offered by Sid and Reva Dewberry Department of Civil, Environmental, and Infrastructure Engineering
Covers fundamentals of traffic flow theory; shock-wave analysis; queuing theory; macroscopic traffic flow models on freeway and arterials; fundamentals of traffic simulation; car following models; network analysis based on traffic simulation models; and developing skills to select most appropriate model for given scenarios.

Prerequisite(s): CEIE 561.
Corequisite(s): CEIE 601.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0

CEIE 795 - Civil and Infrastructure Engineering Seminar

Credits: 0
Repeatable within Degree for Credit
Offered by Sid and Reva Dewberry Department of Civil, Environmental, and Infrastructure Engineering
Invited speakers, faculty, and CEIE graduate students lecture on current topics and research. Fulfills seminar requirement for MS in civil and infrastructure engineering.

**Prerequisite(s):** Graduate standing.
**Notes:** Students must enroll in CEIE 795 each semester (fall and spring) for the duration of their M.S. studies. The course is repeatable.

**Schedule Type:** SEM
**Hours of Lecture or Seminar per week:** 1
**Hours of Lab or Studio per week:** 0
**Grading:** Satisfactory/No Credit.

**CEIE 796 - Directed Reading**

Credits: 1-3
Repeatable within Degree for Credit
Offered by Sid and Reva Dewberry Department of Civil, Environmental, and Infrastructure Engineering
Reading on specific topic under direction of faculty member.

**Prerequisite(s):** Graduate standing and permission of instructor.
**Notes:** May be repeated with change in topic.

**Schedule Type:** IND
**Hours of Lecture or Seminar per week:** 1-6
**Hours of Lab or Studio per week:** 0

**CEIE 798 - Research Project in Civil Engineering**

Credits: 3
Not Repeatable for Credit
Offered by Sid and Reva Dewberry Department of Civil, Environmental, and Infrastructure Engineering
Analyzes and investigates contemporary problem in civil, environmental, and infrastructure engineering. Requires prior approval by faculty member who supervises student's work.

**Prerequisite(s):** Permission of instructor
**Corequisite(s):** CEIE 795.

**Notes:** Written report also required.

**Schedule Type:** LEC
**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0

**CEIE 799 - Master's Thesis**
CEIE 800 - Civil, Environmental, and Infrastructure Engineering Colloquium

Credits: 1
Repeatable within Degree for Credit
Offered by Sid and Reva Dewberry Department of Civil, Environmental, and Infrastructure Engineering
Seminar series required of Civil and Infrastructure PhD students. Features variety of speakers from universities, government, and private sectors. Topics include civil engineering technologies, research advancements, and policies. Doctoral students take 2 credits of CEIE 800 and make a presentation of their dissertation research at the seminar. No more than 1 credit per semester may be taken. Students eligible to register upon successful completion of qualifying exams.

Prerequisite(s): Graduate Standing.
Schedule Type: SEM
Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

CEIE 890 - Special Topics in Urban Transportation

Credits: 3
Repeatable within Degree for Credit
Offered by Sid and Reva Dewberry Department of Civil, Environmental, and Infrastructure Engineering
Includes traffic safety analysis, simulation in transportation, intelligent transportation systems, advanced public transportation systems, congestion and travel demand management, geographic information systems and information technology, and innovative refinancing and public-private partnerships.

Prerequisite(s): CEIE 560 and 660 or equivalent; or permission of instructor.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

CEIE 892 - Special Topics in Environmental and Water Resource Systems Engineering
Possible topics include studies in waste minimization; pollution prevention; hazardous waste management; wastewater management; air pollution control; solid waste management; environmental decision making; sustainability; water resource and environmental economics; wetlands management, design and construction; groundwater contamination modeling; stochastic hydrology; river basin planning and management; and water quality modeling.

Designated a Green Leaf Course.

Prerequisite(s): CEIE 601
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

CEIE 894 - Design and Inventive Engineering

Credits: 3
Not Repeatable for Credit
Offered by Sid and Reva Dewberry Department of Civil, Environmental, and Infrastructure Engineering
Topics include Fundamentals: successful intelligence and creative intelligence, creative class, the Medici Effect, the Renaissance Man and Da Vinci's Seven Principles, engineering creativity; Design Engineering: system designing and architecting, designing as search, evolutionary designing, constraint search, constructive induction, Axiomatic and Inferential Design Theories; Inventive Engineering: Brainstorming, Synectics, Morphological Analysis, TRIZ, Visual Thinking, Inventive Design in Practice; Project Presentations.

Prerequisite(s): Graduate Status
Notes: This is transdisciplinary course focused on creativity in engineering and science. Open to all graduate students in the Volgenau School of IT and Engineering; graduate students from other schools are encouraged to register with the instructor's permission.

Schedule Type: SEM
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

CEIE 896 - Civil Engineering Research Topics

Credits: 3
Repeatable within Degree for Credit
Offered by Sid and Reva Dewberry Department of Civil, Environmental, and Infrastructure Engineering
Reading on specific topic under direction of faculty member. May be repeated with change in topic.

Prerequisite(s): Admission into CEIE PhD program, or permission of instructor.
Schedule Type: IND
Hours of Lecture or Seminar per week: 3
CEIE 990 - Civil and Infrastructure Dissertation Topic Presentation

Credits: 1  
Not Repeatable for Credit  
Offered by Sid and Reva Dewberry Department of Civil, Environmental, and Infrastructure Engineering  
Opportunity for PhD students to present research proposal for critique. Covers presentation of research topic for PhD in Civil and Infrastructure Engineering. Students complete dissertation research proposal. May be repeated with change in topic, but degree credit is given only once.

Prerequisite(s): Graduate Standing; completion of all course work required for PhD in Civil and Infrastructure Engineering or permission of instructor.  
Schedule Type: LEC  
Hours of Lecture or Seminar per week: 1  
Hours of Lab or Studio per week: 0  
When Offered: Fall, Spring

CEIE 998 - Doctoral Dissertation Proposal

Credits: 1-12  
Repeatable within Degree for Credit  
Offered by Sid and Reva Dewberry Department of Civil, Environmental, and Infrastructure Engineering  
Work on research proposal that forms basis for doctoral dissertation. May be repeated for credit.

Notes: No more than 24 credits of CEIE 998 and 999 may be applied to doctoral degree requirements.

Schedule Type: IND  
Hours of Lecture or Seminar per week: 0  
Hours of Lab or Studio per week: 1-12  
Grading: Satisfactory/No credit only

CEIE 999 - Doctoral Dissertation

Credits: 1-12  
Repeatable within Degree for Credit  
Offered by Sid and Reva Dewberry Department of Civil, Environmental, and Infrastructure Engineering  
Formal record of commitment to doctoral dissertation research under direction of faculty member in civil engineering and infrastructure engineering.

Notes: May be repeated for credit.

Schedule Type: IND  
Hours of Lecture or Seminar per week: 0  
Hours of Lab or Studio per week: 1-12  
Grading: Satisfactory/No credit only
Classical Studies (CLAS)

Offered by the College of Humanities and Social Sciences

CLAS 240 - Greek and Latin Elements in English

Credits: 3
Not Repeatable for Credit
Offered by Modern and Classical Languages.
Studies formation of English vocabulary derived from Greek and Latin prefixes, stems, and suffixes to increase word power in English (vocabulary, style). Special emphasis on bioscientific, medical, and legal terminology. Intended for native and non-native speakers of English. Literary texts illustrate word analyses, vocabulary uses.

Prerequisite(s): ENGL 101/ENGH 101 or equivalent, or permission of instructor.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CLAS 250 - Classical Mythology

Credits: 3
Not Repeatable for Credit
Offered by Modern and Classical Languages.
Illustrates role of classical myths in classical and modern literature and art.

Fulfills Mason Core requirement in literature.

Prerequisite(s): ENGL 101/ENGH 101 or equivalent, or permission of instructor.
Notes: Course work in English.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CLAS 260 - The Legacy of Greece and Rome

Credits: 3
Not Repeatable for Credit
Offered by Modern and Classical Languages.
Introduces history, culture, and literature of Greece and Rome through close readings of central passages from classical literature dealing with some of the most important aspects of human existence. Illustrates importance of classical antiquity for the Western tradition.

Fulfills Mason Core requirement in literature.
**Prerequisite(s):** ENGL 101/ENGH 101 or equivalent, or permission of instructor.

**Notes:** Course work in English.

**Schedule Type:** LEC  
**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**CLAS 330 - Roman Law and Society**

Credits: 3  
Not Repeatable for Credit  
Offered by Modern and Classical Languages.  
Introduces the Roman legal system, from the Law of the Twelve Tables to Justinian's Digest. Explores the fundamental concepts of Roman Law and its importance for Roman society and the legal history of the West.

**Schedule Type:** LEC  
**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall, Spring

---

**CLAS 340 - Greek and Roman Epic**

Credits: 3  
Not Repeatable for Credit  
Offered by Modern and Classical Languages.  
Examines development of classical epic as genre, from beginnings with Homer to transformations in the works of later Greek and Roman authors.  
Fulfills Mason Core requirement in literature.

**Prerequisite(s):** ENGL 101/ENGH 101 or equivalent, or permission of instructor.  
**Notes:** Course work in English.

**Schedule Type:** LEC  
**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**CLAS 350 - Greek and Roman Tragedy**

Credits: 3  
Not Repeatable for Credit  
Offered by Modern and Classical Languages.  
Follows development of tragedy from its origins to the works of Aeschylus, Sophocles, and Euripides, and its reappearance in the Roman world in the tragedies of Seneca. Considers influence of Greek tragedy on later cultures.  
Fulfills Mason Core requirement in literature.
Prerequisite(s): ENGL 101/ENGH 101 or equivalent, or permission of instructor.

Notes: Course work in English.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CLAS 360 - Greek and Roman Comedy

Credits: 3
Not Repeatable for Credit
Offered by Modern and Classical Languages.
Studies forms, contexts, and developments of comedy as a dramatic form in Greco-Roman world. Traces development of New Comedy in Hellenistic age and translation and adaptation of New Comedy by Roman dramatists Plautus and Terence.

Fulfills Mason Core requirement in literature.

Prerequisite(s): ENGL 101/ENGH 101 or equivalent, or permission of instructor.
Notes: Course work in English.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CLAS 370 - Greek and Roman Historians

Credits: 3
Not Repeatable for Credit
Offered by Modern and Classical Languages.
Examines writings of major Greek and Roman historians, including Herodotus, Thucydides, Sallust, Livy, and Tacitus; their interpretations of the past; and their influence.

Prerequisite(s): ENGL 101/ENGH 101 or equivalent, or permission of instructor.
Notes: Course work in English.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CLAS 380 - Greek and Roman Novels

Credits: 3
Not Repeatable for Credit
Offered by Modern and Classical Languages.
Examines novels written in antiquity, and influences on postclassical and modern literature. Emphasizes works of Longus, Heliodorus, Petronius, and Apuleius.
Fulfills Mason Core requirement in literature.

**Prerequisite(s):** ENGL 101/ENGH 101 or equivalent, or permission of instructor.

**Notes:** Course work in English.

**Schedule Type:** LEC  
**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**CLAS 390 - Topics in Classical Literature and Culture**

Credits: 3  
Repeatable within Degree for Credit  
Offered by Modern and Classical Languages.  
Studies forms, contexts, and developments of distinctive literary genre or cultural phenomenon in the Greco-Roman world.

**Prerequisite(s):** ENGL 101/ENGH 101 (or equivalent) or permission of instructor.

**Notes:** May be repeated for credit when topic is different.

**Schedule Type:** LEC  
**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**CLAS 499 - Senior Seminar in Classical Studies**

Credits: 3  
Not Repeatable for Credit  
Offered by Modern and Classical Languages.  
Individual research on specialized topic culminating in seminar paper. Fulfills writing-intensive requirement. Subject of seminar determined by instructor in consultation with student.

**Prerequisite(s):** Classical studies minors, 90 credits including 15 credits in classics, and permission of instructor.

**Notes:** Permission must be obtained in advance. Students may present no more than 3 credits for graduation.

**Schedule Type:** SEM  
**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**Climate (CLIM)**

Offered by the College of Science

**CLIM 101 - Global Warming: Weather, Climate, and Society**
Survey of the scientific and societal issues associated with weather and climate variability and change. Examines physical phenomena observed in the Earth's weather and climate, providing sufficient scientific and technical background to enable students to critically examine arguments being discussed by policymakers and the public at large. Also reviews the current debate on climate change from a scientific point of view with a focus on those aspects that have the largest potential impact on global society.

Designated a Green Leaf Course.

Fulfills Mason Core requirement in natural science (nonlab).

**Schedule Type:** LEC  
**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**CLIM 102 - Introduction to Global Climate Change Science**

The scientific basis of computer models that simulate past and present climate and predict future climate change; How complex models are built, tested, and interpreted to better understand physical, chemical, and biological processes; how uncertainty is managed. Students conduct laboratory experiments through an online interface and apply results to policy and planning.

Designated a Green Leaf Course.

Fulfills Mason Core requirement in natural science (lab).

**Prerequisite(s):** Basic math skills (Geometry, Algebra).  
**Notes:** Computer models are used in the lab.

**Schedule Type:** LAB, LEC  
**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 3  
**When Offered:** Fall

**CLIM 111 - Introduction to the Fundamentals of Atmospheric Science**

Credits: 3

Not Repeatable for Credit

Offered by Atmospheric, Oceanic and Earth Sciences

**Credits:** 3  
**Not Repeatable for Credit**  
**Offered by:** Atmospheric, Oceanic and Earth Sciences
Overview of the Earth's atmosphere, its history, and the physical and chemical process that determine its characteristics. Focuses on key concepts from thermodynamics, radiation, chemistry, and dynamics that are essential for understanding the state, variability, and long term evolution of the atmosphere; especially in the context of comparisons with other planetary atmospheres.
Designated a Green Leaf Course.

Fulfills Mason Core requirement in natural science (lab).

Equivalent to PHYS 111

**Schedule Type:** LEC
**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0

### CLIM 112 - Introduction to the Fundamentals of Atmospheric Science Lab

Credits: 1
Not Repeatable for Credit
Offered by Atmospheric, Oceanic and Earth Sciences

Laboratory course associated with CLIM 111. Study of the Earth's atmosphere based on concepts taken from thermodynamics, radiation transport, chemistry, and dynamics.
Designated a Green Leaf Course.

Fulfills Mason Core requirement in natural science (lab).

Equivalent to PHYS 112

**Corequisite(s):** CLIM 111

**Schedule Type:** LAB
**Hours of Lecture or Seminar per week:** 1-6
**Hours of Lab or Studio per week:** 1

### CLIM 301 - Weather Analysis and Prediction

Credits: 4
Not Repeatable for Credit
Offered by Atmospheric, Oceanic and Earth Sciences
Large-scale behavior of mid-latitude weather systems. Includes coupling of synoptic motion to mesoscale processes that lead to significant weather events. Introduces the observational network, numerical weather models, and prediction. Laboratory portion gives practical experience in weather analysis, prediction, and technology currently used for visualization and analysis.

**Prerequisite(s):** MATH 113 or equivalent; one of CLIM/PHYS 111/112 or EOS 121 or GGS 121.

**Schedule Type:** LAB,
**LEC**
CLIM 312 - Physical Climatology

Credits: 3
Not Repeatable for Credit
Offered by Atmospheric, Oceanic and Earth Sciences
Quantitative description of nature and theory of the climate system, dynamics of atmosphere-ocean-land surface, internal interactions and response to external forcing, description of the climate record and simple climate models.

Equivalent to GGS 312.

Prerequisite(s): CLIM/PHYS 111/112 OR GGS 121; and PHYS 243,244, or permission of instructor.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring

CLIM 314 - Severe and Extreme Weather

Credits: 3
Not Repeatable for Credit
Offered by Atmospheric, Oceanic and Earth Sciences

Behavior of weather events ranging from small scale (e.g., thunderstorms and tornadoes) to mesoscale (e.g., fronts and hurricanes). Introduces the dynamical and physical processes, atmospheric boundary layer processes, and coupling between different spatial scales that create and shape severe and localized weather events.
Designated a Green Leaf Course.

Equivalent to GGS 314

Prerequisite(s): MATH 113 or equivalent; CLIM/PHYS 111/112 or GGS 121.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CLIM 319 - Air Pollution

Credits: 3
Not Repeatable for Credit
Offered by Atmospheric, Oceanic and Earth Sciences

Description of major types of air pollution and introduction to how their characteristics are influenced by interaction with the
atmosphere. Topics include sources and distribution of pollution from local to global scales, effects of radiation and wind on pollution, modeling of plume dispersion, and pollution effects on climate.
Designated a Green Leaf Course.

**Prerequisite(s):** CLIM 111 or GGS 121.

**Schedule Type:** LEC

**Hours of Lecture or Seminar per week:** 3

**Hours of Lab or Studio per week:** 0

**When Offered:** Fall

---

**CLIM 390 - Topics in Climate Research**

Credits: 1-4

Repeatable within Degree for Credit

Offered by Atmospheric, Oceanic and Earth Sciences

Selected topics not covered in fixed content courses. May be included for credit by AOES majors in the 45 credits of courses required for BS degree.

**Prerequisite(s):** 15 credits of AOES courses within concentration.

**Schedule Type:** IND

**Hours of Lecture or Seminar per week:** 1-4

**Hours of Lab or Studio per week:** 1-6

---

**CLIM 408 - Senior Research**

Credits: 3

Repeatable within Degree for Credit

Offered by Atmospheric, Oceanic and Earth Sciences

Independent research under guidance of faculty member on a research project in numerical, experimental, observational, or theoretical atmospheric or climate-related research. A written report on the project is required.

**Prerequisite(s):** 15 credits of AOES courses within major.

**Notes:** May be taken twice with department permission.

**Schedule Type:** IND

**Hours of Lecture or Seminar per week:** 3

**Hours of Lab or Studio per week:** 0

---

**CLIM 409 - Research Internship**

Credits: 3

Repeatable within Degree for Credit

Offered by Atmospheric, Oceanic and Earth Sciences

On-the-job experience for AOES majors in industry or government laboratories, including summer research programs. Students work in observational, experimental, or theoretical research, and prepare a written report at the end of the internship.

**Prerequisite(s):** 75 credits. 15 credits of courses in major and permission of department. See department for requirements and
CLIM 411 - Atmospheric Dynamics

Credits: 3
Not Repeatable for Credit
Offered by Atmospheric, Oceanic and Earth Sciences
Observational bases and fundamentals of fluid dynamic principle for understanding atmospheric motions across multiple spatial and temporal scales; covers basic conservation laws of mass, momentum, and energy; concepts of circulation and vorticity; balanced atmospheric flows, e.g. geostrophic wind and shear, thermal wind; quasi-geostrophic and isentropic potential vorticity analysis for mid-latitude cyclones and fronts.

Equivalent to CLIM 311 (2013-2014 Catalog).

Prerequisite(s): CLIM 111 and MATH 213, or permission of instructor.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

CLIM 412 - Physical Oceanography

Credits: 3
Not Repeatable for Credit
Offered by Atmospheric, Oceanic and Earth Sciences
Reviews global patterns of temperature, salinity, currents and waves in the world's oceans and how these patterns influence marine biota, climate, and human activity. Introduces key concepts which explain physical features of the ocean ranging from microscopic turbulence to global circulation. Designated a Green Leaf Course.

Equivalent to GEOL 412.

Prerequisite(s): MATH 113 or MATH 115, and PHYS 160 or PHYS 243, or permission of instructor
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CLIM 429 - Atmospheric Thermodynamics

application procedure prior to enrollment.
Notes: May be taken twice with department permission.

Schedule Type: IND
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
CLIM 438 - Atmospheric Chemistry

Credits: 3
Not Repeatable for Credit
Offered by Atmospheric, Oceanic and Earth Sciences
Reviews fundamental chemical processes of the Earth's atmosphere including chemical cycles, thermodynamics, reaction kinetics, photochemistry, radiative balance, ozone chemistry and environmental issues, including air pollution, acid rain and global change. Includes some review of extraterrestrial atmospheric chemistry.

Equivalent to CHEM 438

Prerequisite(s): CHEM 331 and 332 or permission of instructor.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CLIM 440 - Climate Dynamics

Credits: 3
Not Repeatable for Credit
Offered by Atmospheric, Oceanic and Earth Sciences
Structure, dynamics and thermodynamics of atmospheric and oceanic circulations that maintain the climate. Role of the large scale transport of energy, moisture and angular momentum. Relationships of large scale circulation to weather and weather extremes, and implications for past and future climates.

Prerequisite(s): MATH 213, MATH 214, and CLIM 411.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring

CLIM 470 - Numerical Weather Prediction

Credits: 3
Not Repeatable for Credit
Offered by Atmospheric, Oceanic and Earth Sciences
Concepts and techniques of numerical prediction of weather, including the numerical models used and the rationale for large suites of meteorological forecasts. Sources of errors in the forecast: errors in the initial conditions and in the numerical weather prediction models. Interpretation of model output.

Prerequisite(s): MATH 213, MATH 214, and CLIM 411.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring

CLIM 512 - Physical Oceanography

Credits: 3
Not Repeatable for Credit
Offered by Atmospheric, Oceanic and Earth Sciences
Course describes the global patterns of temperature, salinity, currents and waves in the world's oceans, and how these patterns influence marine biota, climate, and human activity. Course introduces key concepts which explain physical feature of the ocean ranging from microscopic turbulence to global circulation.

Prerequisite(s): MATH 113 or MATH 115; PHYS 160 or PHYS 243, or permission of instructor.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
When Offered: Fall

CLIM 690 - Scientific Basis of Climate Change

Credits: 3
Not Repeatable for Credit
Offered by Atmospheric, Oceanic and Earth Sciences
A rigorous treatment of global warming, especially with regard to anthropogenic causes, based on the IPCC 4th Assessment Report "The Physical Science Basis". Topics include 1) Overview of observed climate, 2) Variability of climate, 3) Modeling of climate response to green house gas forcing, 4) Green house gases, chemistry, and aerosols, and 5) Projections of climate change and its societal impact.

Prerequisite(s): BS or MS in a natural science or engineering, or permission of instructor.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CLIM 700 - Climate Comprehensive Exam

Credits: 1
Repeatable within Degree for Credit
Offered by Atmospheric, Oceanic and Earth Sciences
Preparation for and completion of written comprehensive exam, on a climate-related subject, within AOES department. The exam is part of the degree requirements in lieu of writing a master's thesis. Instructor should be the chair of the examination
committee. The exam committee will specify exam content.

Prerequisite(s): At least 15 graduate credits, approved project proposal, and permission of major advisor or chair of the examination committee.

Schedule Type: IND
Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0
Grading: Satisfactory/No Credit
When Offered: Fall, Summer, Spring

CLIM 710 - Introduction to Physical Climate System

Credits: 3
Not Repeatable for Credit
Offered by Atmospheric, Oceanic and Earth Sciences
Provides modern understanding of ocean, atmosphere, and land based on fundamental physical laws. Describes current climate and physical processes by which climate is maintained. Covers theoretical models of general circulation of atmosphere, including time mean and transient behavior. Describes basics of ocean circulation and interactions between ocean and atmosphere. Reviews past climate change, stratosphere and its interactions with troposphere, and role of land processes in modulating climate.

Prerequisite(s): BS or MS in mathematics or a physical science, or permission of instructor.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CLIM 711 - Introduction to Atmospheric Dynamics

Credits: 3
Not Repeatable for Credit
Offered by Atmospheric, Oceanic and Earth Sciences
Covers basic conservation laws of mass, momentum, and energy and scaling analysis of equation of motion and thermodynamic equation. Discusses balanced flows in atmosphere, such as geostrophic wind and its vertical shear, and thermal wind relationship. Also explores circulation and vorticity; role of atmospheric boundary layer in mass, momentum, and energy transfer; synoptic scale motions; and role of gravity and Rossby waves in controlling general circulation of atmosphere.

Equivalent to PHYS 676

Prerequisite(s): BS or MS in mathematics or a physical science, or permission of instructor.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CLIM 712 - Physical and Dynamical Oceanography

Credits: 3
Not Repeatable for Credit
Offered by Atmospheric, Oceanic and Earth Sciences
Introduces climatology and dynamics of oceans. Covers nature of seawater, heat, and salt budgets; general circulation of the ocean, including the Gulf Stream and thermohaline circulations; dynamics of wind-driven ocean circulation; and processes influencing biological and chemical behavior.

**Prerequisite(s):** CSI 751 or CLIM 710 or permission of instructor.

**Schedule Type:** LEC

**Hours of Lecture or Seminar per week:** 3

**Hours of Lab or Studio per week:** 0

---

**CLIM 713 - Atmosphere-Ocean Interactions**

Credits: 3

Not Repeatable for Credit

Offered by Atmospheric, Oceanic and Earth Sciences

Provides comprehensive observational and mechanistic understanding of El Niño and Southern Oscillation (ENSO) phenomena. Topics include observations and theories of seasonal and interannual changes in ocean circulation and temperature and interactions with atmosphere; equations of motion and theories of wind-driven circulation; mixed layer observations and theories; midlatitude and equatorial ocean waves; interannual variability and atmosphere-ocean coupling; and tropical oceanography and meteorology.

**Prerequisite(s):** CLIM 712 or 711 or equivalent, or permission of instructor.

**Schedule Type:** LEC

**Hours of Lecture or Seminar per week:** 3

**Hours of Lab or Studio per week:** 0

---

**CLIM 714 - Land-Climate Interactions**

Credits: 3

Not Repeatable for Credit

Offered by Atmospheric, Oceanic and Earth Sciences

Interdisciplinary course providing detailed description of surface energy and water balance over land and radiative and turbulent transfer. Introduces numerical techniques for modeling land surface and applications in weather, climate, and hydrologic forecasting and simulation. Includes hands-on experience with land surface models in computer laboratory, including sensitivity experiments to reinforce theoretical concepts. Exposure to contemporary research through reading and reviewing seminal journal papers.

**Prerequisite(s):** BS or MS in mathematics or physical science, or permission of instructor.

**Schedule Type:** LEC

**Hours of Lecture or Seminar per week:** 3

**Hours of Lab or Studio per week:** 0

---

**CLIM 715 - Numerical Methods for Climate Modeling**

Credits: 3

Not Repeatable for Credit

Offered by Atmospheric, Oceanic and Earth Sciences

Foundation and theory of computational methods for atmosphere and ocean modeling, with special emphasis on finite-difference
and spectral methods. Topics include accuracy, consistency, convergence and stability; time stepping schemes; nonlinear computational stability; energy and enstrophy conserving schemes for momentum equations; staggered and curvilinear grids; alternate vertical coordinate systems; implicit and split-explicit barotropic mode solution; pressure gradient errors and vorticity constraints; spectral methods for atmospheric models; and treatment of model physics.

**Prerequisite(s):** CLIM 712 or 711 or equivalent, or permission of instructor.

**Schedule Type:** LEC

**Hours of Lecture or Seminar per week:** 3

**Hours of Lab or Studio per week:** 0

---

**CLIM 750 - Geophysical Fluid Dynamics**

Credits: 3

Not Repeatable for Credit

Offered by Atmospheric, Oceanic and Earth Sciences

Introduces geophysical fluid dynamics, the study of rotating stratified flows. Covers hydrostatics; equations of motion, gravity wave dynamics, and stratified flow; effects of rotation, midlatitude dynamics, Rossby number and quasigeostrophic expansion; beta plane approximation; and equatorial Kelvin and Rossby waves.

**Prerequisite(s):** CLIM 711, or permission of instructor.

**Schedule Type:** LEC

**Hours of Lecture or Seminar per week:** 3

**Hours of Lab or Studio per week:** 0

---

**CLIM 751 - Predictability and Prediction of Weather and Climate**

Credits: 3

Not Repeatable for Credit

Offered by Atmospheric, Oceanic and Earth Sciences

Covers predictability and seamless prediction of weather and climate for timescales ranging from days to decades. Studies limitations to predictability due to chaos, and possible sources of predictability due to slowly varying surface boundary conditions produced by interactions among atmospheres, ocean and land system. Discusses predictability of droughts and floods, monsoons, ENSO, decadal variations and climate change.

**Prerequisite(s):** CLIM 711 or equivalent, or permission of instructor.

**Schedule Type:** LEC

**Hours of Lecture or Seminar per week:** 3

**Hours of Lab or Studio per week:** 0

---

**CLIM 752 - Ocean General Circulation**

Credits: 3

Not Repeatable for Credit

Offered by Atmospheric, Oceanic and Earth Sciences

Description and theory of large-scale ocean circulation and how it affects climate. Focus is on ubiquitous flow structures such as gyres, equatorial currents, and meridional overturning cells. Examines how the circulation follows from wind and thermohaline forcing, as well as physical principles. The influence of the circulation on heat transport and climate variability is also discussed.
Conceptual guideposts include barotropic gyres, Ekman cells, potential vorticity, western intensification, the interplay of gravity and the Earth's rotation, advective-diffusive balance, multiple flow states, and Rossby waves.

**Prerequisite(s):** CLIM 712 or 711 or equivalent, or permission of instructor.

**Schedule Type:** LEC
**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0

---

**CLIM 753 - General Circulation of the Atmosphere**

Credits: 3  
Not Repeatable for Credit  
Offered by Atmospheric, Oceanic and Earth Sciences  
Overview and several theoretical perspectives of atmospheric transport of energy, moisture, and angular momentum, and how these processes fundamentally affect the climate on various time scales.

**Prerequisite(s):** CLIM 710 and 711.

**Schedule Type:** LEC
**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0

---

**CLIM 754 - Elements of the Tropical Climate System**

Credits: 3  
Not Repeatable for Credit  
Offered by Atmospheric, Oceanic and Earth Sciences  
Observations and dynamics of key processes of tropical weather and climate. Topics include: structure of the tropical atmosphere and ocean, convection, dynamics of tropical waves in the atmosphere and ocean, tropical intraseasonal variability, tropical the global monsoons, cyclones, and stratospheric quasi-biennial oscillation.

**Prerequisite(s):** CLIM 711.

**Corequisite(s):** CLIM 710.

**Schedule Type:** LEC
**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0
**When Offered:** Spring

---

**CLIM 759 - Topics in Climate Dynamics**

Credits: 3  
Repeatable within Term for Credit  
Offered by Atmospheric, Oceanic and Earth Sciences  
Covers selected topics in climate dynamics not covered in fixed-content courses.

**Prerequisite(s):** Permission of instructor.

**Notes:** May be repeated for credit when offered with different content.
CLIM 762 - Statistical Methods in Climate Research

Credits: 3  
Not Repeatable for Credit  
Offered by Atmospheric, Oceanic and Earth Sciences  
Introduction to a core set of statistical methods that have proven useful to modern climate and predictability research. Topics include detecting and attributing climate change, describing climate variability with empirical orthogonal functions, statistical forecasting with regression and time series models, and identifying coupled patterns of variability with canonical correlation analysis.

Prerequisite(s): Undergraduate-level linear algebra and STAT 344 (or equivalent), or permission of instructor.

CLIM 763 - Advanced Statistical Methods in Climate Research

Credits: 3  
Not Repeatable for Credit  
Offered by Atmospheric, Oceanic and Earth Sciences  
Introduction to multivariate statistical techniques commonly used in climate science, with special emphasis on estimation in large dimensional spaces. Topics include: multivariate regression, canonical correlation analysis, predictable component analysis, field significance tests, data assimilation (especially the ensemble Kalman Filter), discriminant analysis, and multivariate detection and attribution of climate change.

Prerequisite(s): CLIM 762 or permission of instructor.

CLIM 796 - Directed Reading and Research

Credits: 1-6  
Repeatable within Term for Credit  
Offered by Atmospheric, Oceanic and Earth Sciences  
Reading and research on a specific topic in climate dynamics under the direction of a faculty member.

Prerequisite(s): Admission into climate dynamics doctoral program and permission of instructor.

Notes: May be repeated as necessary.
CLIM 798 - Master's Climate Research Project

Credits: 1-6
Repeatable within Degree for Credit
Offered by Atmospheric, Oceanic and Earth Sciences
Research or literature-review project in climate science or related topic chosen and completed under the guidance of a faculty member. Proposal required before enrollment. Technical report acceptable to student's project committee required for completion.

Prerequisite(s): At least 15 graduate credits, approved project proposal, and permission of major advisor or chair of the examination committee.

Schedule Type: IND

Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 0
Grading: Satisfactory/No Credit
When Offered: Fall, Summer, Spring

CLIM 799 - Master's Thesis in Climate

Credits: 1-6
Repeatable within Degree for Credit
Offered by Atmospheric, Oceanic and Earth Sciences
Research project in climate science or related topic chosen and completed under the supervision of a faculty member. Resulting thesis acceptable to student's committee and potentially publishable is required for completion.

Prerequisite(s): Degree candidacy, thesis proposal approved by thesis committee, and permission of major advisor or instructor.

Schedule Type: IND

Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 0
Grading: Satisfactory/No Credit
When Offered: Fall, Summer, Spring

CLIM 991 - Climate Dynamics Seminar

Credits: 1
Repeatable within Degree for Credit
Offered by Atmospheric, Oceanic and Earth Sciences
Presentations in climate dynamics field by Mason faculty and invited speakers.

Prerequisite(s): Graduate standing.
Notes: May be repeated for credit; however, a maximum of 3 credits may be applied toward the climate dynamics PhD.

Schedule Type: SEM
CLIM 996 - Doctoral Reading and Research

Credits: 1-6
Repeatable within Term for Credit
Offered by Atmospheric, Oceanic and Earth Sciences
Reading and research on a specific topic in climate dynamics under the direction of a faculty member.

Prerequisite(s): Admission into climate dynamics doctoral program and permission of instructor.
Notes: May be repeated as necessary.

Schedule Type: IND
Hours of Lecture or Seminar per week: 1-12
Hours of Lab or Studio per week: 0
Grading: Graduate Special

CLIM 998 - Doctoral Dissertation Proposal

Credits: 1-12
Repeatable within Degree for Credit
Offered by Atmospheric, Oceanic and Earth Sciences
Covers development of research proposal under guidance of dissertation director and doctoral committee. Proposal forms basis for climate dynamics doctoral dissertation.

Prerequisite(s): Doctoral standing and permission of instructor.
Notes: Course may be repeated, but no more than 12 credits of CLIM 998 may be applied to doctoral degree requirements.

Schedule Type: IND
Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0
Grading: Satisfactory/No credit only

CLIM 999 - Doctoral Dissertation

Credits: 1-12
Repeatable within Degree for Credit
Offered by Atmospheric, Oceanic and Earth Sciences
Doctoral dissertation research under direction of dissertation director.

Prerequisite(s): Admission to doctoral candidacy and permission of instructor.
Notes: May be repeated, but no more than 24 credits total in CLIM 998 and 999 may be applied to doctoral degree requirements.

Schedule Type: IND
Hours of Lecture or Seminar per week: 0
College of Humanities and Social Sciences (CHSS)

Offered by the College of Humanities and Social Sciences

CHSS 310 - Introduction to Entrepreneurship

Credits: 1
Not Repeatable for Credit
Offered by College of Humanities and Social Sciences
Introduces students to the intellectual underpinnings of entrepreneurship, entrepreneurial leadership, social innovation, intrapreneurship, and social enterprise development. Students shape a entrepreneurial learning plan for their own professional development in line with their career aspirations.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

CHSS 390 - Peer Tutoring in Writing across the Disciplines

Credits: 0-1
Repeatable within Degree for Credit
Offered by College of Humanities and Social Sciences
Experiential learning course in teaching of writing across disciplines. Students receive Writing Center training in theory and techniques of tutoring writing and work a minimum of 3 hours per week in Writing Center. Focus is on practical application of writing theory and pedagogy from course readings, development of tutoring skills, and self-reflection through journals and final paper.

Prerequisite(s): Grade of A in ENGL 302/ENGH 302, 60 credits, and overall minimum GPA of 3.00 with a minimum GPA in major of 3.50.
Notes: Students must submit two faculty recommendations and a sample of recent academic writing, and complete an interview with the director of the Writing Center. May be repeated for a maximum of 3 credits.

Schedule Type: INT
Hours of Lecture or Seminar per week: 1-12
Hours of Lab or Studio per week: 0

College of Science (COS)

Offered by the College of Science
COS 120 - Introduction to Research

Credits: 1-3
Repeatable within Degree for Credit
Offered by College of Science
Introduction to research, involving work on a research project. May involve lab study, computer modeling and analysis, mathematics, or other original research as appropriate. Research formulated and completed under instructor's guidance. Culminates in a written or oral final report. May be repeated for a total of 6 credits.

Schedule Type: IND
Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 3-9
When Offered: Fall, Summer, Spring

COS 401 - RS: Discipline Based Education Research

Credits: 2 or 3
Not Repeatable for Credit
Offered by College of Science
Students will conduct an original Discipline-Based Education Research (DBER) project with their faculty mentor and STEM Accelerator faculty mentor.

Designated as a research and scholarship intensive course.

Prerequisite(s): Success in the Learning Assistants Program for one semester.
Schedule Type: IND
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring

College of Visual and Performing Arts (CVPA)

Offered by the College of Visual and Performing Arts

CVPA 101 - Arts Pass

Credits: 2
Repeatable within Degree for Credit
Offered by College of Visual and Performing Arts
Introduction to appreciation of the arts through lectures and demonstrations in visual art, music, dance, and theater. Emphasizes aesthetic principles in modern society. Students attend performances and exhibitions and develop analytical skills through written journal and discussion.

Notes: May be repeated for total 4 credits.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 0

CVPA 102 - Experiencing the Arts

Credits: 3
Not Repeatable for Credit
Offered by College of Visual and Performing Arts
Reserved for high school students enrolled in CVPA. Introduces collaborative and interdisciplinary arts experiences in visual art, music, dance, theater, film, and media through daily intensive immersion in the arts for two and a half weeks.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 2

CVPA 105 - Special Topics in the Arts

Credits: 1-3
Repeatable within Term for Credit
Offered by College of Visual and Performing Arts
Exploration of topical studies on the arts.

Notes: Subject matter varies. May be repeated for a maximum 12 credits when taken under different topics.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0

CVPA 308 - Cross-Cultural Arts Appreciation

Credits: 3
Repeatable within Term for Credit
Offered by College of Visual and Performing Arts
Provides cumulative arts experience by tying subject matter to major cultural production of Center for the Arts.

Notes: Subject matter varies. May be repeated for maximum 12 credits when taken under different topics.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CVPA 399 - Special Topics in the Arts
Credits: 1-6
Repeatable within Term for Credit
Offered by College of Visual and Performing Arts
In-depth presentation and exploration of topical studies on the arts.

Notes: Subject matter varies. May be repeated for maximum 24 credits when taken under different topics.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 3

CVPA 430 - Topics in Arts and Wellness

Credits: 1-3
Repeatable within Degree for Credit
Offered by College of Visual and Performing Arts
In-depth presentation and exploration of topical studies in arts and wellness or related areas such as injury prevention, performance enhancement, and health and wellness training.

Prerequisite(s): Junior standing, or permission of instructor.
Notes: Topic depends on instructor. May be repeated for up to 9 credits if taken under different topics.

Schedule Type: LEC, SEM
Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0

CVPA 489 - Field Experience in the Arts

Credits: 3-6
Repeatable within Term for Credit
Offered by College of Visual and Performing Arts
Apprenticeship, internship, or project with organization or individual in the arts. Must be prearranged with division director before enrollment.

Prerequisite(s): Junior standing; completion of 6 credits in CVPA courses in area of residency; CVPA 305; or permission of instructor.
Notes: May be repeated for maximum 6 credits.

Schedule Type: INT
Hours of Lecture or Seminar per week: 1-12
Hours of Lab or Studio per week: 0

CVPA 499 - Research/Performance/Topics in the Arts

Credits: 3-6
Repeatable within Degree for Credit
Offered by College of Visual and Performing Arts
Advanced research, performance, or exploration of topical studies in arts.

Prerequisite(s): Permission of department chair.
Notes: May be repeated for maximum 6 credits.

Schedule Type: IND
Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 0

CVPA 530 - Topics in Arts and Wellness

Credits: 1-3
Repeatable within Degree for Credit
Offered by College of Visual and Performing Arts
In-depth presentation and exploration of topical studies in arts and wellness and/or related areas (e.g., injury prevention, performance enhancement, health and wellness training to educators and arts professionals). Topic depends on instructor.

Prerequisite(s): 90 hours or permission of the instructor.
Notes: May be repeated up to 9 credits if taken under different topics.

Schedule Type: LEC,
SEM
Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0

CVPA 592 - Special Topics in Interdisciplinary Arts Studies

Credits: 1-3
Repeatable within Term for Credit
Offered by College of Visual and Performing Arts
Topics in interdisciplinary arts.

Prerequisite(s): Undergraduate degree or equivalent, or permission of instructor.
Notes: May be repeated for maximum 12 credits.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CVPA 599 - Independent Study

Credits: 1-6
Not Repeatable for Credit
Offered by College of Visual and Performing Arts
Independent reading, performance, or research on specific project under direction of selected faculty member. May include attendance in parallel undergraduate course.
CVPA 600 - CVPA Graduate ProSeminar

Credits: 0
Not Repeatable for Credit
Offered by College of Visual and Performing Arts
Introduces students into graduate studies in the arts; the course reviews graduate practices and policies, and the graduate colloquia.

Prerequisite(s): Acceptance into a CVPA Graduate Program.
Schedule Type: SEM
Grading: Satisfactory/No Credit
When Offered: Fall, Spring

CVPA 700 - Academic Writing in the Arts

Credits: 1
Repeatable within Degree for Credit
Offered by College of Visual and Performing Arts
Prepares graduate students for the rigors of academic writing in the arts at the advanced level and supports students' acculturation in the academic writing skills and practices of their discourse communities.

Schedule Type: SEM
Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0
Grading: Satisfactory/No Credit only

CVPA 701 - Thesis and Project Writing

Credits: 1
Repeatable within Degree for Credit
Offered by College of Visual and Performing Arts
Students will develop an expertise within the specific rhetorical context of the thesis/project genre, understand the specialized features of the final project or thesis, and apply the strategies they have learned in their disciplines to their capstone event.

Prerequisite(s): Completion of 21 graduate credits in a CVPA graduate degree.
Schedule Type: SEM
Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0
Grading: Satisfactory/No credit only
Communication (COMM)

Offered by the College of Humanities and Social Sciences

COMM 100 - Public Speaking

Credits: 3
Not Repeatable for Credit
Offered by Communication
Presents principles to develop effective presentations for public and professional settings while integrating appropriate technologies. Emphasizes analyzing audience; composing meaningful, coherent messages; conducting responsible research; developing effective arguments; and improving delivery skills to strengthen confidence and credibility.

Fulfills Mason Core requirement in oral communication.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

COMM 101 - Interpersonal and Group Interaction

Credits: 3
Not Repeatable for Credit
Offered by Communication
Presents principles to develop appropriate and effective communication strategies in one-to-one and small group communication settings. Emphasizes analyzing and assessing communication skills to create and sustain effective communication in personal and professional relationships.

Fulfills Mason Core requirement in oral communication.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

COMM 140 - Forensics Seminar in Creative Arts

Credits: 1
Repeatable within Term for Credit
Offered by Communication
Intensive work in creative forensics events, including rhetorical criticism and informative, persuasive, extemporaneous, after-dinner, and impromptu speaking.

Prerequisite(s): Audition.
Notes: May be taken four times.
Schedule Type: SEM
Hours of Lecture or Seminar per week: 3-6
Hours of Lab or Studio per week: 6

COMM 141 - Forensics Seminar in Recreative Arts

Credits: 1
Repeatable within Term for Credit
Offered by Communication
Intensive work in recreative forensic events, including dramatic duo, program interpretation, poetry interpretation, dramatic interpretation, and prose interpretation.

Prerequisite(s): Audition.
Notes: May be taken four times.

Schedule Type: SEM
Hours of Lecture or Seminar per week: 3-6
Hours of Lab or Studio per week: 6

COMM 142 - Forensics Seminar in Debate: Affirmative Strategies

Credits: 1
Repeatable within Term for Credit
Offered by Communication
Work in affirmative research, case construction, and oral presentation; directed toward affirmative analysis of intercollegiate debate proposition.

Notes: May be taken four times.

Schedule Type: SEM
Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 6

COMM 143 - Forensics Seminar in Debate: Negative Strategies

Credits: 1
Repeatable within Term for Credit
Offered by Communication
Work in negative research, case attacks, and oral presentation directed toward negative analysis of intercollegiate debate proposition.

Notes: May be taken four times.
COMM 145 - Newspaper Workshop I

Credits: 1
Repeatable within Term for Credit
Offered by Communication
Practical experience in writing, editing, or business aspects of newspaper production at Broadside or other papers. Coordinated by newspaper faculty advisor.

Notes: May be repeated for total 3 credits.

Schedule Type: LAB,
SEM
Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 2

COMM 148 - Radio Workshop I

Credits: 1
Repeatable within Degree for Credit
Offered by Communication
Students receive individual guidance while learning to be on-air show hosts at student internet radio station WGMU. New technologies such as computer automation systems and advanced production software are integrated throughout the curriculum to prepare students to engage in the most current applications for commercial and internet radio and podcasting.

Prerequisite(s): 100-level COMM course, or permission of instructor.
Notes: May be taken three times.

Schedule Type: STU
Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 3

COMM 150 - Communication Skills for International Students

Credits: 3
Not Repeatable for Credit
Offered by Communication
Introduction to speaking, listening, and nonverbal skills required to communicate appropriately in university study.

Prerequisite(s): International student in first year of study in the United States, non-native speakers of English with some difficulty speaking clearly and accurately, or permission of instructor.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
COMM 157 - Digital Media Workshop

Credits: 1
Repeatable within Degree for Credit
Offered by Communication
Offers students a hands-on introduction to digital tools of creative expression, involving the use of specific software and hardware, including operating systems, media editing programs, authoring applications, and software utilities.

Notes: Students who have already completed or are in COMM 208 are not eligible to take this course. May be taken three times.

Schedule Type: LAB, SEM
Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 2

COMM 200 - Communication Theory

Credits: 3
Not Repeatable for Credit
Offered by Communication
Introduces the field of communication, including perspectives on theory and research, topical areas within the discipline, basic research methodologies, and a survey of theories in those areas. Covers basic procedures for theory-building, research, and writing about communication.

Prerequisite(s): COMM 100 or 101 and declared major or minor in communication, undeclared major, or permission of undergraduate program director.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

COMM 201 - Small Group Communication

Credits: 3
Not Repeatable for Credit
Offered by Communication
Principles of communicating effectively in small group situations. Emphasizes problem-solving group communication. Practice in working cooperatively with others to complete projects using systematic approach to problem solving.

Prerequisite(s): COMM 101 or equivalent course.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

COMM 202 - Media and Society
Examines the relationship between media and society through the study of the development of various media systems in the United States, including print media, radio, television, film, the recording industry, and new communication technologies. Introduces media effects and basic theories.

**Schedule Type:** LEC  
**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**COMM 203 - Introduction to Journalism**

Credits: 3  
Not Repeatable for Credit  
Offered by Communication  
American journalism including history and First Amendment components; role of professional journalist; print, broadcast, and computer assisted news operations; economics of publishing; and effect of new technologies. Serves as starting point for those interested in journalism careers and as orientation for those interested in learning more about news business operations.

**Schedule Type:** LEC  
**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**COMM 204 - Introduction to Public Relations**

Credits: 3  
Not Repeatable for Credit  
Offered by Communication  
Introduces the evolving field of public relations and the role it plays in global business, politics and social interactions. Focuses on creation of integrated digital communication and social media engagement. This is a required course for the Communication Department Public Relations concentration and a prerequisite for several upper-level public relations courses.

**Schedule Type:** LEC  
**Hours of Lecture or Seminar per week:** 3

**COMM 208 - Introduction to Media Production**

Credits: 3  
Not Repeatable for Credit  
Offered by Communication  
Provides a general introduction to media production with emphasis on the basics of multimedia tools for camera, audio, lighting, and editing, focusing on non-fiction, journalism, or public relations/advocacy presentations.
COMM 210 - Voice and Articulation

Credits: 3
Not Repeatable for Credit
Offered by Communication
Principles of voice production, with practice in effective vocal use of American English. Emphasizes student participation.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

COMM 230 - Case Studies in Persuasion

Credits: 3
Not Repeatable for Credit
Offered by Communication
Examines common persuasive message strategies and approaches. Covers basic principles of persuasive process. Case studies include advertisements, speeches, and persuasive activities from all segments of society.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

COMM 249 - Communication Industry Experience

Credits: 2
Repeatable within Degree for Credit
Offered by Communication
On-site training related to one of the five communication department concentration fields through faculty-approved field work-study programs. Related class work includes navigating in-process media workplace culture and the post-CIE progression, including refining the resume, preparing for the COMM 450 internship, and ultimately interviewing for a job.

Prerequisite(s): 45 credits total, 6 credits in COMM.
Notes: May be repeated for maximum of 4 credits.
COMM 255 - Introduction to Media Literacy

Credits: 3
Not Repeatable for Credit
Offered by Communication
Principles and practices of media literacy. Emphasizes critical viewing, listening, and reading media skills; and media effects on consumer.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

COMM 260 - Basic Debate Theory and Practice

Credits: 3
Not Repeatable for Credit
Offered by Communication
Theory and practice of formal debate, including approaches to analytical reasoning, research, delivery, and conceptual basis for debate. Does not require tournament participation.

Schedule Type: LEC,
RCT
Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 3

COMM 261 - Theories of Argumentation

Credits: 3
Not Repeatable for Credit
Offered by Communication
Analyzes argument within communicative settings. Emphasizes deductive and inductive forms of reasoning, fallacies in reasoning, tests of evidence, and models for such analyses.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

COMM 300 - Foundations of Public Communication

Credits: 3
Not Repeatable for Credit
Offered by Communication
Theories and principles of public communication, emphasizing methods of persuasion, critical analysis, speaker-listener alignments in public setting, and measurements of effective public communication.

Fulfills writing intensive requirement in the major.
Prerequisite(s): COMM 200 with a grade of C or better. Prerequisite(s) enforced by registration system.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

COMM 301 - Foundations of Interpersonal Communication

Credits: 3
Not Repeatable for Credit
Offered by Communication
Theories and principles of interpersonal communication emphasizing models of communication, verbal and nonverbal message systems, and analysis of communicative relationships.

Prerequisite(s): COMM 200 with a grade of C or better. Prerequisite(s) enforced by registration system.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

COMM 302 - Foundations of Media Theory

Credits: 3
Not Repeatable for Credit
Offered by Communication
Provides a comprehensive review of mass communication and media theory, focusing on media effects and the complex relationships between media producers, messages, technologies, and users/audiences. Examines role of media in news, politics, and popular culture.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

COMM 303 - Writing across the Media

Credits: 3
Not Repeatable for Credit
Offered by Communication
Foundation course focusing on writing for the mass media: Internet, public relations, newspapers, broadcast (television and radio) and advertising with a strong emphasis on adherence to Associated Press Style.

Prerequisite(s): 30 credits.
Notes: Prerequisite for all communication media writing courses. Lab work required.
COMM 304 - Foundations of Health Communication

Credits: 3
Not Repeatable for Credit
Offered by Communication
Explores health communication research practice: the role of communication in health care delivery, health promotion and disease prevention, risk communication, and personal as well as psychological well-being. Examines interpersonal, organizational, team, family, and intercultural relationships.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

COMM 305 - Foundations of Intercultural Communication

Credits: 3
Not Repeatable for Credit
Offered by Communication
Analyses communication variables as they relate to intercultural encounters. Emphasizes culture's influence on communication process, particularly influence of verbal and nonverbal communication on how message is interpreted.

Fulfills Mason Core requirement in global understanding.

Prerequisite(s): 3 credits of 100 or 200-level COMM courses or 60 credits.
Notes: Communication majors are encouraged to complete COMM 200 prior to enrolling in this course.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

COMM 306 - Issues in Intercultural Communication

Credits: 3
Not Repeatable for Credit
Offered by Communication
Applies basic principles of intercultural communication to analyze specific situations involving communication and cultural differences.

Prerequisite(s): COMM 305, or permission of instructor.
Notes: Continuation of COMM 305.

Schedule Type: LEC
COMM 307 - Field Study in Communication

Credits: 3
Repeatable within Degree for Credit
Offered by Communication
Structured communication learning experience: one to three weeks of travel in a foreign environment involving another country or relevant U.S. co-cultures. Students must complete appropriate readings, laboratory assignments, and personal learning paper to process communication concepts and experiences.

Prerequisite(s): Permission of instructor
Notes: May be repeated for credit when field study is substantially different with permission of the undergraduate director.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

COMM 310 - Performance for Communication Arts

Credits: 3
Not Repeatable for Credit
Offered by Communication
Principles and theories of performance for communication arts. Practice in spoken performance of prose, poetry, and drama.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

COMM 320 - Business and Professional Communication

Credits: 3
Not Repeatable for Credit
Offered by Communication
Study of basic theories and skills of communication in professional contexts, including interviewing, relationship maintenance, small group teams, and public presentations. Emphasizes developing practical and critical thinking skills.

Prerequisite(s): COMM 100, 101 or 104 or permission of instructor.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

COMM 326 - Rhetoric of Social Movements and Political Controversy
COMM 330 - Principles of Public Relations

Credits: 3
Not Repeatable for Credit
Offered by Communication
Surveys nature, history, scope, and practice of public relations in business, trade associations, nonprofit organizations, and educational and government institutions. Covers principles, practice of public relations, including media relations, issues management, and public service announcements; marketing and research; planning and publicity for special events; house publications; and institutional advertising.

Prerequisite(s): 3 COMM credits and 60 credits, or permission of instructor.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

COMM 331 - Advanced Principles in Public Relations

Credits: 3
Not Repeatable for Credit
Offered by Communication
Develops the conceptual knowledge and practical skills students need to thrive in challenging public relations situations, such as crisis management, research for clients, communication with clients, and development of client work. Students complete the course with a portfolio of research, writing, and visual materials they have created.

Prerequisite(s): C or higher in COMM 204 or COMM 330
Prerequisite(s) enforced by registration system.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

COMM 332 - Nonverbal Communication
Credits: 3
Not Repeatable for Credit
Offered by Communication
Theory, principles, and methods to analyze nonverbal communication. Emphasizes physical behavior, facial expression, personal space and territoriality, physical appearance, vocal cues, and environment.

Prerequisite(s): 3 COMM credits.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

COMM 334 - Family and Health Communication

Credits: 3
Not Repeatable for Credit
Offered by Communication
Examines how family communication contributes to physical, psychological, and social wellness. Explores how family communication affects our experience with health transitions (e.g., coping with cancer; becoming a caregiver; losing a loved one), contributes to health outcomes (e.g., stress and anxiety; disordered eating behavior; schizophrenia; drug abuse), and is central to health promotion behavior (e.g., understanding health history and genetics).

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

COMM 335 - Organizational Communication

Credits: 3
Not Repeatable for Credit
Offered by Communication
Theory, practice, and methods to analyze communication in organizations. Emphasizes process and structure, interaction formats, mechanisms for modification, and career paths in organizational communication.

Prerequisite(s): COMM 100, 101, or 301; or permission of instructor.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

COMM 340 - Forensics Seminar in Creative Arts

Credits: 1
Repeatable within Term for Credit
Offered by Communication
Intensive work in various types of creative forensics events, including rhetorical criticism and informative, persuasive, extemporaneous, after-dinner, and impromptu speaking.
Prerequisite(s): Completion of 60 hours, or 4 hours of COMM 140. Audition required.
Notes: May be taken four times.

Schedule Type: SEM
Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 6

COMM 341 - Forensics Seminar in Recreative Arts

Credits: 1
Repeatable within Term for Credit
Offered by Communication
Intensive work in various types of recreative forensics events, including dramatic duo, program interpretation, poetry interpretation, dramatic interpretation, and prose interpretation.

Prerequisite(s): Completion of 60 hours, or 4 hours of COMM 141. Audition required.
Notes: May be taken four times.

Schedule Type: SEM
Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 6

COMM 342 - Forensics Seminar in Debate: Affirmative Strategies

Credits: 1
Repeatable within Term for Credit
Offered by Communication
Work in affirmative research, case construction, and oral presentation directed toward affirmative analysis of intercollegiate debate proposition.

Prerequisite(s): 4 credits of COMM 142, or 60 credits and audition.
Notes: May be taken four times.

Schedule Type: SEM
Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 6

COMM 343 - Forensics Seminar in Debate: Negative Strategies

Credits: 1
Repeatable within Term for Credit
Offered by Communication
Work in negative research, case attacks, and oral presentation directed toward negative analysis of intercollegiate debate proposition.

Prerequisite(s): 4 credits of COMM 143, or 60 credits and audition.
Notes: May be taken four times.
COMM 345 - Newspaper Workshop II

Credits: 1  
Repeatable within Term for Credit  
Offered by Communication  
Practical experience in writing and editing for student newspaper or other papers.

Prerequisite(s): 3 credits of COMM 145, COMM 351, or permission of instructor  
Notes: May be taken three times.

COMM 346 - Yearbook Workshop

Credits: 1  
Repeatable within Term for Credit  
Offered by Communication  
Practical experience in promotion, marketing, and sales of video yearbook, or practical experience working on Senior Expressions, a print supplement to the video yearbook.

Notes: May be taken three times.

COMM 347 - Cable TV Programming and Marketing

Credits: 1  
Repeatable within Degree for Credit  
Offered by Communication  
Practical experience in television programming, promotion, and marketing of a campus television cable network operation.

Schedule Type: LEC  
Hours of Lecture or Seminar per week: 1  
Hours of Lab or Studio per week: 2
COMM 348 - Radio Workshop II

Credits: 1
Repeatable within Term for Credit
Offered by Communication
Intensive practical application of previously acquired on-air show hosting skills at student internet radio station WGMU. Skill development in commercial production and writing included. New technologies such as social media, computer automation systems and advanced production software are integrated throughout the curriculum to prepare students to engage in the most current applications for commercial and internet radio and podcasting.

Prerequisite(s): COMM 148, or permission of instructor.
Notes: May be taken three times.

Schedule Type: LAB, SEM
Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 3

COMM 350 - Mass Communication and Public Policy

Credits: 3
Not Repeatable for Credit
Offered by Communication
Investigates how matters of public importance are communicated via various mass communication channels. Emphasizes regulations to minimize influence of mass media on public decision-making, and media manipulation by pressure groups, politicians, and media gatekeepers.

Prerequisite(s): COMM 102, 202, or 302; or permission of instructor.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

COMM 351 - News Writing and Reporting

Credits: 3
Not Repeatable for Credit
Offered by Communication
Experience in actual news gathering. Students write and report for print and online outlets. Numerous in-class and out-of-class writing assignments train students in unique styles of print and online journalism.

Prerequisite(s): C or higher in COMM 303.
Prerequisite(s) enforced by registration system.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

COMM 352 - News Editing: Print and Beyond
Copy preparation, headline writing, news judging, and layout for various forms of print and electronic formats. Introduces working on news copy desks.

Prerequisite(s): C or higher in COMM 303.
Prerequisite(s) enforced by registration system.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

COMM 353 - Broadcast Journalism

Prerequisite(s): C or higher in COMM 303.
Prerequisite(s) enforced by registration system.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

COMM 354 - Radio Production

Offers theory and practice of operational digital media and radio broadcasting. The curriculum emphasizes core skills and knowledge in writing and digital radio production. Topics include content creation, production techniques (including digital audio software) and promotion, management and other aspects of commercial and noncommercial radio, internet radio, satellite radio, podcasting, and other audio/radio art forms.

Prerequisite(s): COMM 302, or permission of instructor.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 4

COMM 356 - Video: Performance and Writing

Credits: 3
Not Repeatable for Credit
Offered by Communication
Writing for video, performance skills for on-air work, interviewing.

**Schedule Type:** LEC  
**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

### COMM 358 - Multi-Camera Studio Production

Credits: 3  
Not Repeatable for Credit  
Offered by Communication  
Provides an in-depth exploration of the creative, technical, logistical, and aesthetic requirements of production in a multiple camera environment. The fundamental skills learned in this class will serve as a foundation for narrative, event, live sports, talk show, broadcast journalism, and magazine-styled television and webcast programming.

**Prerequisite(s):** COMM 208 or FAVS 255 with a grade of C or better or portfolio assessment.  
Prerequisite(s) enforced by registration system.

**Schedule Type:** LEC  
**Hours of Lecture or Seminar per week:** 2  
**Hours of Lab or Studio per week:** 1  
**When Offered:** Fall, Spring, Summer

### COMM 359 - Media Management

Credits: 3  
Not Repeatable for Credit  
Offered by Communication  
Principles, practices of media management from general techniques to operation of individual departments within a media organization.

**Schedule Type:** LEC  
**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

### COMM 360 - Digital Postproduction

Credits: 3  
Not Repeatable for Credit  
Offered by Communication  
Offers instruction on delivering high-quality image and video products for digital media. Students will be introduced to an array of video-audio editing and digital image software for integrating video, audio, photo and graphic postproduction. **Prerequisite(s):** COMM 208 or FAVS 255 with a grade of C or better or portfolio assessment.  
Prerequisite(s) enforced by registration system.
**Schedule Type:** LEC  
**Hours of Lecture or Seminar per week:** 2  
**Hours of Lab or Studio per week:** 1  
**When Offered:** Fall, Spring

---

**COMM 361 - Online Journalism**

Credits: 3  
Not Repeatable for Credit  
Offered by Communication  
Focuses on online journalism, research, reporting, web page and weblog creation, and writing for Internet.

**Prerequisite(s):** C or higher in COMM 303, or permission of instructor  
Prerequisite(s) enforced by registration system.

---

**COMM 362 - Argument and Public Policy**

Credits: 3  
Not Repeatable for Credit  
Offered by Communication  
Develops argumentative skills while examining contemporary public policy. Applies methods of argumentative analysis to design, implementation of public policy. Students learn by constructing, examining, and using public argument.

Fulfills Mason Core requirement in synthesis.

---

**COMM 363 - Media Career Seminar**

Credits: 1  
Not Repeatable for Credit  
Offered by Communication  
Practicum for students with production experience; students produce a final resume in area of expertise.

**Prerequisite(s):** Two courses completed in area of media production focus.

---
**COMM 364 - Videography**

Credits: 3  
Not Repeatable for Credit  
Offered by Communication  
Provides a comprehensive overview of the principles and practices of visual storytelling, encompassing short documentaries, campaigns, commercial work, news and other non-fiction narratives. Mobile, DSLR and fixed-lens cameras will be used to explore all facets of visual production that tell human stories, with emphasis on character, conflict, drama, and surprise.

Prerequisite(s): COMM 208 or FAVS 255 with a grade of C or better or portfolio assessment.  
Prerequisite(s) enforced by registration system.

Schedule Type: LEC  
Hours of Lecture or Seminar per week: 2  
Hours of Lab or Studio per week: 1  
When Offered: Fall, Spring

**COMM 365 - Gender, Race, and Class in the Media**

Credits: 3  
Not Repeatable for Credit  
Offered by Communication  
Introduces concepts of power, influence of mass media. Allows students to see themselves as products, producers of media influence, and gives sense of the roles in the media or lack thereof, of groups based on their gender, race and/or class.

Prerequisite(s): COMM 302, or permission of instructor.  
Schedule Type: LEC  
Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0

**COMM 366 - Visual Communication**

Credits: 3  
Not Repeatable for Credit  
Offered by Communication  
Teaches visual communication theories and applies them to creation of videos, web pages, multimedia production, Computer Based Training (CBT) and other technologies. Covers limits of visual communication in terms of perception, economics, and technology. Partial distance course includes viewing video modules and using electronically mediated discussion.

Prerequisite(s): COMM 208 or FAVS 255 with a grade of C or better or portfolio assessment.  
Prerequisite(s) enforced by registration system.

Schedule Type: LEC  
Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0  
When Offered: Fall, Spring, Summer
COMM 367 - Children and Media

Credits: 3
Not Repeatable for Credit
Offered by Communication
Provides an overview of the relationships between children and mass media. Focus of the course is on the effects of media consumption on children's social and psychological well-being. Students will learn major child development theories, review history, economics and regulation of children's programming, and explore children's use of and responses to various media.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3

COMM 370 - Feature Writing

Credits: 3
Not Repeatable for Credit
Offered by Communication
Introduces aspiring journalists to research techniques and critical writing skills needed to produce publishable magazine or newspaper feature stories.

Prerequisite(s): C or higher in COMM 303.
Prerequisite(s) enforced by registration system.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

COMM 371 - Sports Writing and Reporting

Credits: 3
Not Repeatable for Credit
Offered by Communication
Experience in actual sports-related news gathering and reporting. Covers writing and reporting on sports-related subjects for print and online media. Numerous in-class and out-of-class writing assignments train students in the unique style of covering sports events, reporting breaking news, and writing feature stories.

Prerequisite(s): C or higher in COMM 303 or permission of instructor.
Prerequisite(s) enforced by registration system.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

COMM 372 - Sports and the Media
Examines the role of mass media in constructing images of athletes, sport, and sports culture. Critical attention is given to broadcast, print, and film of sport media. Assesses sociological and cultural issues that shape sport media and culture.

**Schedule Type:** LEC  
**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**COMM 373 - Business and Economic Journalism**

Credits: 3  
Not Repeatable for Credit  
Offered by Communication  
Writing and reporting about business and the economy with focus on understanding financial news and reporting about companies, trade, and markets for print, broadcast, and online media. Students practice through in-class and out-of-class writing assignments.

**Prerequisite(s):** C or higher in COMM 303.  
Prerequisite(s) enforced by registration system.

**Schedule Type:** LEC  
**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**COMM 374 - Political Journalism**

Credits: 3  
Not Repeatable for Credit  
Offered by Communication  
Writing and reporting about politics, elections and campaigns, and the legislative and executive branches of government for print, broadcast, and online media. Students practice the style and substance of covering political news through in-class and out-of-class writing assignments. A unique collaboration with C-SPAN including video conference opportunities with political and media personalities.

**Prerequisite(s):** C or higher in COMM 303 or permission of instructor.  
Prerequisite(s) enforced by registration system.

**Schedule Type:** LEC  
**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**COMM 375 - Mass Communication Advertising and Promotions**

Credits: 3  
Not Repeatable for Credit
Offered by Communication

History, regulation, and ratings of advertising, as well as media buying, advertising campaigns, and strengths and weaknesses of media vehicles used in advertising.

Prerequisite(s): COMM 302, or permission of instructor.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

COMM 380 - Media Criticism

Credits: 3
Not Repeatable for Credit
Offered by Communication

Examines practical criticism of a wide variety of media texts including television programs, newspapers, articles, films, photographs, and advertisements. Introduces principles of major contemporary modes of analysis for systematically interpreting visual and verbal forms of communication.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

COMM 385 - Special Topics in Interpersonal and Organizational Communication

Credits: 3
Repeatable within Degree for Credit
Offered by Communication

Topics vary. Counts toward Organizational and Interpersonal Communication concentration in the Communication Department.

Notes: May be repeated for credit when topic is different.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Summer, Spring

COMM 386 - Special Topics in Political Communication

Credits: 3
Repeatable within Degree for Credit
Offered by Communication

Topics vary. Counts toward Political Communication concentration in the Communication Department.

Notes: May be repeated for credit when topic is different.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
COMM 387 - Special Topics in Journalism

Credits: 3  
Repeatable within Degree for Credit  
Offered by Communication  
Topics vary. Counts toward Journalism concentration in the Communication Department.

Notes: May be repeated for credit when topic is different.

Schedule Type: LEC  
Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0  
When Offered: Fall, Summer, Spring

COMM 388 - Special Topics in Public Relations

Credits: 3  
Repeatable within Degree for Credit  
Offered by Communication  
Topics vary. Counts toward Public Relations concentration in the Communication Department.

Notes: May be repeated for credit when topic is different.

Schedule Type: LEC  
Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0  
When Offered: Fall, Summer, Spring

COMM 389 - Public Relations for Associations and Nonprofits

Credits: 3  
Not Repeatable for Credit  
Offered by Communication  
Principles of editing and journalism applied to publications, public relations, and advertising needs within corporate environment.  
Job requirements of editorial positions in public relations, publications, and information as defined by trade associations, nonprofit organizations, and large corporations.

Prerequisite(s): 60 credits, or 3 credits of lower-division COMM courses.

Schedule Type: LEC  
Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0
COMM 390 - Issues in Public Relations

Credits: 3
Not Repeatable for Credit
Offered by Communication
Focuses on current issues in corporate, government, and nonprofit public relations.

Prerequisite(s): C or higher in COMM 204 or COMM 330.
Prerequisite(s) enforced by registration system.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

COMM 391 - Writing for Public Relations

Credits: 3
Not Repeatable for Credit
Offered by Communication
Focuses on public relations writing including news releases, client memos, broadcasting, speeches, brochures, journals, and advertisements. Includes writing styles, formats, organization, and writing research.

Prerequisite(s): C or higher in COMM 303.
Prerequisite(s) enforced by registration system.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

COMM 392 - Public Relations Study Abroad

Credits: 3
Not Repeatable for Credit
Offered by Communication
Concentrated survey course in public relations for business, trade associations, nonprofit organizations, and governmental institutions from the perspective of a location abroad. Emphasis placed on the global and intercultural aspects of public relations.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

COMM 395 - Special Topics in Health Communication

Credits: 3
Repeatable within Degree for Credit
Offered by Communication
Topics vary.

Notes: May be repeated for credit when topic is different.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Summer, Spring

COMM 396 - Special Topics in Mass Communication

Credits: 3
Repeatable within Degree for Credit
Offered by Communication
Topics vary. Counts toward Media Production and Criticism Concentration in the Communication Department.

Notes: May be repeated for credit when topic is different.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Summer, Spring

COMM 397 - Special Topics in Production

Credits: 1-3
Repeatable within Term for Credit
Offered by Communication
Provides hands-on media production experience. Topics vary.

Notes: May be repeated for credit when topic is different.

Schedule Type: LEC,
STU
Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0

COMM 398 - Research Practicum in Communication

Credits: 1-3
Repeatable within Degree for Credit
Offered by Communication
Work individually with a faculty member on a faculty research project. Requires readings in research methods and topic area and a final project.

Prerequisite(s): 60 credits including at least 9 hours of COMM credit toward the major; minimum GPA of 2.5 overall and 3.0 in the major; approval of department.
Notes: Students must submit an application for COMM 398 at least one week prior to the beginning of the semester. May be repeated for a maximum of 6 credits.

Schedule Type: IND
Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 1-12

COMM 399 - Special Topics in Communication

Credits: 1-3
Repeatable within Term for Credit
Offered by Communication
Topics vary; some require laboratories.

Prerequisite(s): Permission of instructor.
Notes: May be repeated for credit when topic is different.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

COMM 400 - Research Methods in Communication

Credits: 3
Not Repeatable for Credit
Offered by Communication
Explores applications for primary research methodologies used in communication. Research project with focus on survey, critical ethnographic, or experimental methodologies.

Prerequisite(s): COMM 200 and two of COMM 300, 301, 302, 305 each one with a minimum grade of 2.00 (C).
Prerequisite(s) enforced by registration system.

Notes: Students may not receive credit for both COMM 400 and COMM 490.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

COMM 401 - Interpersonal Communication in the Workplace

Credits: 3
Not Repeatable for Credit
Offered by Communication
Comprehensive study of theories and research associated with dynamics of interpersonal relationships in the workplace. Emphasizes individual motivation, interpersonal needs, communication styles, leadership, problem solving, decision making, diversity, interpersonal conflict, individual adaptation to organizational change, and influence of technology on workplace relationships.
Prerequisite(s): COMM 301, or permission of instructor.

Schedule Type: LEC

Hours of Lecture or Seminar per week: 3

Hours of Lab or Studio per week: 0

COMM 411 - Public Relations Practicum

Credits: 3
Not Repeatable for Credit
Offered by Communication

Helps communication majors apply their public relations education. Covers three general areas: public relations theory and applications, writing and editing, and networking/story placement. Includes public relations strategy and tactics, interviewing and analysis, writing and message delivery.

Prerequisite(s): C or higher in COMM 204 or COMM 330.
Prerequisite(s) enforced by registration system.

Schedule Type: LEC

Hours of Lecture or Seminar per week: 3

Hours of Lab or Studio per week: 0

COMM 412 - Politics and the Mass Media

Credits: 3
Not Repeatable for Credit
Offered by Communication

Covers responsibilities, freedoms of mass media in a democracy; and media influence on citizens' opinions, elections, and decisions of public officials.

Equivalent to GOVT 412

Prerequisite(s): GOVT 103, or permission of instructor.
Schedule Type: LEC

Hours of Lecture or Seminar per week: 3

Hours of Lab or Studio per week: 0

COMM 430 - Persuasion

Credits: 3
Not Repeatable for Credit
Offered by Communication

Theories of persuasive communication including traditional and contemporary attitudinal change; relationship among speaker, message, and audience; and relationship between attitudinal and behavioral change.

Prerequisite(s): None
Schedule Type: LEC
COMM 431 - New Media and Democracy

Credits: 3  
Not Repeatable for Credit  
Offered by Communication  
Examines how an evolving media environment, including new information sources and new opportunities to produce content, changes how people understand their place in American society. Engages with questions of where and how people learn about, discuss, and engage with issues of public importance, such as political policy concerning science, health, technology, and society.

Prerequisite(s): 60 credits or permission of instructor.  
Schedule Type: LEC  
Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0  
When Offered: Fall, Spring, Summer

COMM 432 - Political Communication

Credits: 3  
Not Repeatable for Credit  
Offered by Communication  
Studies how political communication shapes development of "political reality." Examines interactions between media and politics with respect to the ways communication functions in political settings.

Schedule Type: LEC  
Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0

COMM 433 - Environmental Communication

Credits: 3  
Not Repeatable for Credit  
Offered by Communication  
Rhetoric and persuasion about environmental issues in contemporary society. Investigation of case studies in corporate, institutional, and movement attempts to mobilize and cope with ecological concerns. Critical assessment of public communication is emphasized.

Schedule Type: LEC

COMM 434 - Interviewing

Credits: 3
Not Repeatable for Credit
Offered by Communication
Offers practical application, skill development, and theoretical and critical assessment of mediated communication, including digital networking and social media. Discusses and engages with digital communication in terms of culture and language, functional and dysfunctional communication, social interaction, critical perspectives and ideology, copyright, freedom, ethics and responsibility, and images of the future.

Prerequisite(s): 60 credits or permission of instructor
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

COMM 440 - Ceremonial Speech Writing and Performance

Credits: 3
Not Repeatable for Credit
Offered by Communication
Provides students with the opportunities to develop speaking skills for a variety of contexts from eulogies to commencement speeches.

Prerequisite(s): 75+ hours or permission of instructor.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

COMM 450 - Internship in Communication

Credits: 3
Repeatable within Degree for Credit
Offered by Communication
On-the-job training in communication through approved field work study programs. Internships arranged and supervised by Department of Communication through internship coordinator. Related class work in resume preparation and job interviewing.
**Prerequisite(s):** 75 credits, major or minor in communication, electronic journalism or sports communication, 15 credits in COMM for majors, 12 credits for non-COMM majors, and permission of department.

**Notes:** See department for the application process. May be repeated for a maximum of 6 credits.

**Schedule Type:** INT  
**Hours of Lecture or Seminar per week:** 1  
**Hours of Lab or Studio per week:** 0  
**Grading:** Undergraduate Special

**COMM 451 - Facilitating Communication Education**

Credits: 3  
Not Repeatable for Credit  
Offered by Communication  
Theory and practice in facilitating learning of communication principles and skills. Students work as instructor aides in lower-division classes under supervision of faculty member. Activities include facilitating small-group activities and individually critiquing oral performances.

**Schedule Type:** IND  
**Hours of Lecture or Seminar per week:** 1  
**Hours of Lab or Studio per week:** 5

**COMM 452 - Media Production Practicum**

Credits: 1-3  
Repeatable within Degree for Credit  
Offered by Communication  
Theory and practice in creation, distribution, and response to media productions. Students complete minimum 150 hours of work as assistants to engineers, producers, directors, and organizers of media production facilities on campus, under supervision of a sponsoring faculty member.

**Prerequisite(s):** COMM 208, 303, or 348.  
**Notes:** May be repeated for a maximum of 6 credits. Only 3 credits may be applied to the communication major.

**Schedule Type:** INT  
**Hours of Lecture or Seminar per week:** 1-3  
**Hours of Lab or Studio per week:** 0

**COMM 453 - Multimedia Journalism**

Credits: 3  
Not Repeatable for Credit  
Offered by Communication  
Applies concepts of advanced visual storytelling within today's fluid media landscape. Students report and tell compelling stories across multiple platforms using simple, portable equipment and software essential to reporters working in the contemporary converged newsroom. Highlights a multimedia approach to journalism to include broadcast, mobile reporting skills and backpack
journalism techniques.

**Prerequisite(s):** C or higher in COMM 303. COMM 353 is recommended but not required. Prerequisite(s) enforced by registration system.

**Schedule Type:** LEC  
**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**COMM 454 - Free Speech and Ethics**

Credits: 3  
Not Repeatable for Credit  
Offered by Communication  
Major issues surrounding roles of speech, press, and electronic media in society. Includes history of free speech and press issues in society, government role in regulating marketplace of ideas, and responsibility of individual in free society.

Fulfills Mason Core requirement in synthesis.

**Prerequisite(s):** 60 credit hours or permission of instructor.

**Schedule Type:** LEC  
**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall, Spring, Summer

---

**COMM 455 - History of Journalism**

Credits: 3  
Not Repeatable for Credit  
Offered by Communication  
Development of print journalism, emphasizing interaction of technology, audience, and government intervention. Topics include birth of press, development of modern newspaper, and American development including Revolutionary and Civil wars, rise of independent press, and yellow journalism.

Equivalent to HIST 455 (2014-2015 Catalog)

**Prerequisite(s):** 3 credits in COMM or HIST courses.

**Schedule Type:** LEC  
**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**COMM 456 - Comparative Mass Media**

Credits: 3  
Not Repeatable for Credit  
Offered by Communication  
Survey of major foreign mass media systems as they compare with American system. Focuses on broad dimensions of
international mass media and describes issues facing global journalism and media systems. Provides substantive framework to critically evaluate various national media systems.

Fulfills Mason Core requirement in global understanding.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

COMM 465 - Topics in Communication and Gender

Credits: 3
Repeatable within Term for Credit
Offered by Communication
Topics may include gender and culture, women as rhetors, male and female communication, and communication and gender roles. Examines specific interests, ideally in seminar setting.

Notes: May be repeated for credit when topic is different with permission of department.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

COMM 469 - Structure of the Telecommunications Industry

Credits: 3
Not Repeatable for Credit
Offered by Communication
Explores complex interrelationships that affect modern telecommunications and how major mergers, acquisitions, regulatory decisions, congressional initiatives, or engineering breakthroughs can profoundly affect telecommunications industry at any given time.

Prerequisite(s): 90 credits or permission of instructor.
Notes: Serves as capstone seminar in telecommunications minor.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

COMM 475 - Journalism Law

Credits: 3
Not Repeatable for Credit
Offered by Communication
Examines law as it relates to working journalist. Topics include libel, invasion of privacy, free press and fair trial, First Amendment, broadcast regulation, access to media, advertising, and effect of new technologies on these issues. Uses case approach to study leading court decisions in mass media law.
COMM 480 - College to Career: Strategies for Transition

Credits: 1
Not Repeatable for Credit
Offered by Communication
Designed to assist soon-to-be graduates in the employment transition process. Fundamental to the course are effective communication skills, creative research, and the desire to actively and aggressively seek meaningful employment.

Prerequisite(s): 60+ credits or permission of instructor.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 1-12

COMM 490 - Honors Research Methods in Communication

Credits: 3
Not Repeatable for Credit
Offered by Communication
Honors version of COMM 400.

Prerequisite(s): Admission to honors in the major.
Notes: Students may not receive credit for both COMM 400 and 490.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

COMM 491 - RS: Honors Research Project in Communication

Credits: 3
Repeatable within Term for Credit
Offered by Communication
Completion of independent honors research project under the guidance of the student's faculty sponsor.

Designated as a research and scholarship intensive course.

Prerequisite(s): Completion of COMM 490 with minimum grade of 3.0 and approval of honors project prospectus.
Schedule Type: LEC
COMM 498 - RS: Research Projects in Communication

Credits: 3  
Not Repeatable for Credit  
Offered by Communication  
Students plan, execute, and present an empirical research project exploring communication issues of their own choosing.

Designated as a research and scholarship intensive course.

Prerequisite(s): COMM 200, COMM 400.  
Schedule Type: IND  
Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0  
When Offered: Fall, Summer, Spring

COMM 499 - Independent Study in Communication

Credits: 1-3  
Repeatable within Term for Credit  
Offered by Communication  
Study of a selected area in communication. Independent study application must be processed before start of semester in which work is to take place.

Prerequisite(s): 75 credits and permission of department.  
Notes: May be repeated for credit with permission of director of undergraduate program. Communication courses at the 500 level open to post-baccalaureate students or advanced undergraduates with permission of department.

Schedule Type: IND  
Hours of Lecture or Seminar per week: 1-6  
Hours of Lab or Studio per week: 0

COMM 504 - Communication and Interpersonal Conflict

Credits: 3  
Not Repeatable for Credit  
Offered by Communication  
Focuses on interpersonal interactions, including dyadic and small-group levels in various settings such as friendships, marriage, family, and workplace. Examines factors that generate conflicts and communication strategies and skills that help shape conflict interaction toward productive ends.

Schedule Type: LEC  
Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0
COMM 506 - Communication in International Organizations

Credits: 3  
Not Repeatable for Credit  
Offered by Communication  
Analyzes communication variables as they relate to organizational and managerial functions in international organizations. Topics include developing understanding of how cultural differences influence managerial activities and learning to deal effectively with differences.

Schedule Type: LEC  
Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0

COMM 530 - Theories of Small Group Communication

Credits: 3  
Not Repeatable for Credit  
Offered by Communication  
Advanced-level theory and practice of small group interaction. Examines current research with a focus on learning applications of theories to relevant settings.

Schedule Type: LEC  
Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0

COMM 590 - Seminar in Communication

Credits: 3  
Repeatable within Term for Credit  
Offered by Communication  
Intensive study of specific topics; content varies.

Notes: May be repeated for credit when topic is different.

Schedule Type: SEM  
Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0

COMM 600 - Introduction to Graduate Studies

Credits: 3  
Not Repeatable for Credit  
Offered by Communication  
Offers a broad introduction to the field of communication in terms of communication-based theories and research.
Prerequisite(s): Admission to graduate program in communication or permission of graduate program director.

COMM 601 - Communication in Professional Relationships

Credits: 3
Not Repeatable for Credit
Offered by Communication
Explores theoretical perspectives and relevant research to communication strategies and skills for various professional roles and situations. Relates theoretical foundations to practice, assessing theories and applications in individual professional fields.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

COMM 602 - Theories and Research of Mass Communication

Credits: 3
Not Repeatable for Credit
Offered by Communication
Explores theories that have guided development of mass media. Emphasizes major scientific and humanistic approaches to mass media effects.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

COMM 604 - Communication Research Practicum

Credits: 3
Not Repeatable for Credit
Offered by Communication
Helps communication master's students determine focus for program of study, thesis, and projects. Includes readings in applied communication research and exercises in topic selection, analysis.

Prerequisite(s): COMM 634 or permission of instructor
Schedule Type: SEM
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

COMM 605 - Intercultural Communication
Credits: 3
Not Repeatable for Credit
Offered by Communication
Analyzes communication variables related to communication across cultures. Topics include nonverbal communication, time conceptualizations, perceptions and attitudes, values, social organization patterns, cultural norms, language, ethics, conflict across cultures, and research in intercultural communication.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

COMM 615 - Political Communication

Credits: 3
Not Repeatable for Credit
Offered by Communication
Analyzes how political communication messages and strategies shape the development of perceptions and behavior in US presidential elections. Examines the interactions between media content and political action in election campaigns.

Schedule Type: SEM
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

COMM 620 - Health Communication

Credits: 3
Not Repeatable for Credit
Offered by Communication
Examines interpersonal communicative processes associated with health in consumer-provider, family, and health communication campaign contexts. Focus on understanding cultural differences in perceptions of/communication about health and disease.

Schedule Type: SEM
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

COMM 630 - Theories of Public Relations

Credits: 3
Not Repeatable for Credit
Offered by Communication
Provides a survey of public relations theories and major ethical issues. Examines ways theories relate to organizations, mass and international communication research, rhetoric, persuasion, and social movements.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
COMM 631 - Approaches to Group Facilitation

Credits: 3
Not Repeatable for Credit
Offered by Communication
Introduces various theoretical and practical approaches to group facilitation with in-depth focus and practice in one approach. Students participate in group sessions, analyze videotapes of decision-making groups, and practice methodologies for facilitating group interaction.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

COMM 632 - Persuasion Theory

Credits: 3
Not Repeatable for Credit
Offered by Communication
Introduces students to the processes and effects of persuasive communication. Covers key theories of persuasion, behavior change, information processing, message effects, as well as important frameworks that guide the practice of persuasion in applied settings. Particular attention is paid to message features that generate predictable effects and how such effects may vary across different communicative situations.

Schedule Type: SEM
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

COMM 634 - Theories of Interpersonal Communication

Credits: 3
Not Repeatable for Credit
Offered by Communication
Analyzes contemporary theories, concepts, and approaches to improving interpersonal communication. Examines interpersonal communication research.

Prerequisite(s): COMM 301 or permission of instructor.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

COMM 635 - Organizational Communication

Credits: 3
Not Repeatable for Credit
Offered by Communication
Analyzes communication systems, processes in public and private organizations. Topics include conflict management, group decision making, interviewing, technical presentations, and using various channels for improving internal and external communication.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

COMM 636 - Communication Consulting

Credits: 3
Not Repeatable for Credit
Offered by Communication
Investigates theories providing foundation for communication consulting. Provides theoretical information and mechanisms for application necessary to modify communicative behavior within organizations.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

COMM 637 - Risk Communication

Credits: 3
Not Repeatable for Credit
Offered by Communication
Research on sharing information about physical hazards such as toxic waste, radiation, disease, injury, biohazards. Topics include communication concerning workplace safety, environmental problems, risk assessments, and scientific uncertainties.

Schedule Type: SEM
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

COMM 639 - Science Communication

Credits: 3
Not Repeatable for Credit
Offered by Communication
Reviews research on best practices in science communication for scientists and communication professionals. Explores theory on conceptualizing science communication as disseminating knowledge, promoting informed decision making, involving citizens in scientific research (i.e., citizen science), promoting legislative and individual actions, or creating entertainment. Students practice communicating complex science and designing contexts for public engagement with scientific research.

Prerequisite(s): Graduate Standing.
Schedule Type: SEM
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
COMM 640 - Controversies in Science Communication

Credits: 3
Repeatable within Degree for Credit
Offered by Communication
Examines the communication implications related to selected current topics of scientific controversy.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

COMM 641 - Advanced Communication Skills for STEM

Credits: 3
Not Repeatable for Credit
Offered by Communication
Examines the specific oral, written, and mediated communication competencies needed by STEM professionals in modern society.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

COMM 642 - Science and the Public

Credits: 3
Not Repeatable for Credit
Offered by Communication
Examines the relationship between science and society, with a particular emphasis on the role of communication in shaping public opinion on issues related to science and technology.

Prerequisite(s): Graduate standing.
Schedule Type: SEM
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

COMM 644 - Analysis and Criticism of Science Journalism

Credits: 3
Not Repeatable for Credit
Offered by Communication
Examines media coverage of technically complex topics in science, social science, environment, health and medicine, and technology. Explores the influence of institutional media practices on news about science and technology.
Prerequisite(s): Graduate standing.

COMM 650 - Research Methodologies in Communication

Credits: 3
Not Repeatable for Credit
Offered by Communication
Introduces various research methods used by communication professionals. Focus on achieving understanding and knowledge of social scientific research, qualitative and quantitative, and critical analysis through use and application.

Prerequisite(s): Admission to graduate program in communication or permission of graduate program director.

COMM 653 - Graduate Seminar in Instructional Communication

Credits: 3
Not Repeatable for Credit
Offered by Communication
Investigates theoretical and practical implications of instructional communication. Exposes graduate students to communication principles and practices of teaching college courses at upper and lower divisions.

COMM 655 - Theory and Practice of Digital Communication

Credits: 3
Not Repeatable for Credit
Offered by Communication
Applies visual communication theory to the production of digital media. Emphasizes theories in nonfiction digital filmmaking, sound theory for audio production, and ethical and aesthetic topics in digital storytelling. Provides a community engaged learning component allowing students to partner with community organizations to produce digital media tools that address issues of social importance.

COMM 660 - Climate Change and Sustainability Communication Campaigns
COMM 670 - Social Marketing

Credits: 3
Not Repeatable for Credit
Offered by Communication

Offers conceptual overview of social marketing: marketing methods designed to influence people to behave in ways that benefit society. Develops skills necessary to conduct a social marketing initiative and provides an opportunity for practical application of those skills. Designated a Green Leaf Course.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

COMM 690 - Special Topics in Communication

Credits: 3
Repeatable within Term for Credit
Offered by Communication

Explores contemporary issues in communication theory, research, and practice. Designated a Green Leaf Course.

Prerequisite(s): Graduate standing.
Notes: Topics vary. May be repeated for a maximum of 15 credits when topic is different.

Schedule Type: SEM
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

COMM 694 - Communication Internship

Credits: 3
Not Repeatable for Credit
Offered by Communication

Offers practical application, skill development, and theoretical basis of communication campaigns developed in response to global warming and other threats to sustainability. Focuses on purposive campaigns to promote changes in individual behavior and public policy.

Prerequisite(s): Graduate standing.
Schedule Type: SEM
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
COMM 696 - Directed Readings and Research

Credits: 1-3
Repeatable within Term for Credit
Offered by Communication
Reading and research on specific topic under direction of faculty member. Written report required; oral or written exam may be required.

Prerequisite(s): Permission of department.
Notes: May be repeated for a maximum 6 credits.

Schedule Type: IND
Hours of Lecture or Seminar per week: 1-12
Hours of Lab or Studio per week: 0
Grading: Graduate Special

COMM 697 - Independent Production

Credits: 1-3
Not Repeatable for Credit
Offered by Communication
Media or creative production activities under direction of faculty member. Requires completed production; written report, oral exam may be required.

Prerequisite(s): Permission of department.
Notes: May be repeated for maximum 6 credits.

Schedule Type: IND
Hours of Lecture or Seminar per week: 1-4
Hours of Lab or Studio per week: 0
Grading: Graduate Special

COMM 700 - Building Social Science Theory
Credits: 3  
Not Repeatable for Credit  
Offered by Communication  
Explores the process of developing and testing social science theories. Emphasizes the components and mechanisms of theory - such as variables and causality - in a manner intended to inform rigorous social science inquiry using quantitative or qualitative methods.

Schedule Type: SEM  
Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0

**COMM 705 - Intercultural Health and Risk Communication**

Credits: 3  
Not Repeatable for Credit  
Offered by Communication  
Examines intercultural health and risk communication interventions; including health communication campaigns, public relations and advertising for health organizations, and how the media and Internet present health information.

Schedule Type: LEC  
Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0

**COMM 706 - Strategic Communication**

Credits: 3  
Not Repeatable for Credit  
Offered by Communication  
Examines commonalities of strategic communication campaigns across fields (e.g., military, diplomacy, health, politics, marketing, public relations) in order to understand strategic communication, compare fields, and emphasize strategic and evaluative research across fields.

Prerequisite(s): COMM 630 or permission of the instructor.  
Schedule Type: LEC  
Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0

**COMM 716 - International Public Relations**

Credits: 3  
Not Repeatable for Credit  
Offered by Communication  
Provides a survey of international public relations with an emphasis in three areas: applied knowledge for actual international practice, relevant theory, and ethical issues.

Equivalent to COMM 806 (2013-2014 Catalog).
**Prerequisite(s):** COMM 706 or permission of instructor.

**Schedule Type:** LEC

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

## COMM 720 - Consumer-Provider Health Communication

Credits: 3  
Not Repeatable for Credit  
Offered by Communication

Explores relational health communication research and practice. Examines the role of interpersonal communication in health care delivery, health promotion, disease prevention, risk communication, and promoting personal and psychosocial well being.

**Schedule Type:** LEC  
**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

## COMM 721 - E-Health Communication

Credits: 3  
Not Repeatable for Credit  
Offered by Communication

Explores the use of computer-mediated communication technologies in health care and health promotion, including examination of technology in health information dissemination, health education, health communication interventions, and the management of health care delivery.

**Schedule Type:** LEC  
**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

## COMM 725 - Qualitative Methods

Credits: 3  
Not Repeatable for Credit  
Offered by Communication

Examines qualitative research in communication. Emphasis is placed on techniques of naturalistic inquiry such as observation, interviewing, focus group methods, and ethnography, as well as tools for analyzing and reporting qualitative data.

**Schedule Type:** LEC  
**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

## COMM 735 - Crisis Communication
COMM 750 - Research Methods II

Credits: 3
Not Repeatable for Credit
Offered by Communication
Examines crisis communication contexts with a particular emphasis on the role of communication in a variety of crises and how the media and Internet present crisis information to the public.

Prerequisite(s): Permission of instructor.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

COMM 775 - Media Content Analysis

Credits: 3
Not Repeatable for Credit
Offered by Communication
Introduces content analysis, a research technique for making replicable and valid inferences about text in sources such as news articles, advertisements, and television programs. Students design and conduct research using content analysis techniques.

Equivalent to COMM 675 (2012-2013 Catalog).

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

COMM 798 - Communication Studies Project

Credits: 3
Not Repeatable for Credit
Offered by Communication
Final research seminar for all MA in communication students. Students discuss practical and theoretical issues related to project or thesis. Includes readings related to underlying theoretical, methodological, and ethical issues facing contemporary communication researchers and practitioners.
Prerequisite(s): COMM 600 and COMM 650.

Schedule Type: IND

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
Grading: Graduate Special

COMM 799 - Master's Thesis

Credits: 1-6
Repeatable within Degree for Credit
Offered by Communication
Original research endeavor related to student's concentration in communication under supervision of faculty committee.

Prerequisite(s): 24 graduate credits and approval of thesis proposal by faculty committee.

Schedule Type: IND

Hours of Lecture or Seminar per week: 1-9
Hours of Lab or Studio per week: 0
Grading: Satisfactory/No credit only

COMM 800 - Studies for the Doctor of Philosophy in Education

Credits: 3-6
Not Repeatable for Credit
Offered by Communication
Program of studies designed by student's discipline director and approved by doctoral committee. Students participate in research activity of discipline director and write paper reporting original contributions.

Notes: May be repeated.

Schedule Type: IND

Hours of Lecture or Seminar per week: 3-6
Hours of Lab or Studio per week: 3-6
Grading: Graduate Special

COMM 820 - Health Communication Campaigns

Credits: 3
Not Repeatable for Credit
Offered by Communication
Explores use of communication campaigns to promote health and reduce health risks; examines how health communication campaigns are designed, implemented, and evaluated; and describes the role of communication research throughout the campaign process.

Schedule Type: LEC

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
COMM 890 - Special Topics in Communication

Credits: 3  
Repeatable within Degree for Credit  
Offered by Communication  
Selected topics reflecting specialized areas in communication.

Prerequisite(s): PhD rank or permission of instructor.  
Notes: Topics vary. May be repeated for credit when topic is different.

Schedule Type: LEC  
Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0

COMM 896 - Independent Study

Credits: 3  
Repeatable within Degree for Credit  
Offered by Communication  
Independent reading on a topic agreed on by student and faculty member.

Prerequisite(s): PhD rank or permission of instructor.  
Notes: Content varies. May be repeated.

Schedule Type: LEC  
Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0

COMM 998 - Doctoral Dissertation Proposal

Credits: 1-15  
Repeatable within Degree for Credit  
Offered by Communication  
Development of a research proposal that constitutes the basis for a doctoral dissertation.

Prerequisite(s): Approval of program director.  
Schedule Type: IND  
Hours of Lecture or Seminar per week: 0  
Hours of Lab or Studio per week: 0  
Grading: Satisfactory/No Credit

COMM 999 - Doctoral Dissertation Research
Credits: 1-15
Repeatable within Degree for Credit
Offered by Communication
Research on an approved dissertation topic under the direction of dissertation committee.

Prerequisite(s): Completion of COMM 998.
Notes: May be repeated. No more than 18 credits of COMM 998 and 999 may be applied to doctoral degree requirements.

Schedule Type: IND
Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0
Grading: S/NC

**Comparative Literature (CL)**

Offered by the College of Humanities and Social Sciences

**CL 300 - Introduction to Comparative Literature**

Credits: 3
Not Repeatable for Credit
Offered by Modern and Classical Languages.
Introduces methods of comparative literature through study, in translation, of selected theme or motif as it appears in various periods, genres, or national literatures. Readings drawn from English, American, or European literature; on occasion, non-Western literature featured.

Prerequisite(s): 60 credits.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**CL 514 - Theories of Comparative Literature**

Credits: 3
Not Repeatable for Credit
Offered by Modern and Classical Languages.
Intensive study of major theories of comparative literature, with special emphasis on international movements and characteristic themes. Students work with texts in foreign language of their concentration; other texts studied in translation.

Prerequisite(s): CL 300 and 90 credits, or permission of instructor.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**Computational and Data Sciences (CDS)**
Offered by the College of Science

**CDS 101 - Introduction to Computational and Data Sciences**

Credits: 3  
Not Repeatable for Credit  
Offered by Computational and Data Sciences  
Introduction to the use of computers in scientific discovery through simulations and data analysis. Covers historical development and current trends in the field.

Fulfills Mason Core requirement in natural science (lab).

Prerequisite(s): Appropriate score on the math placement test.  
Schedule Type: LEC  
Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0

**CDS 102 - Introduction to Computational and Data Sciences Lab**

Credits: 1  
Not Repeatable for Credit  
Offered by Computational and Data Sciences  
Experiments in computational and data sciences explore the connections between on-going advances in the natural sciences and the rapid advances in computing and data handling. Lab exercises demonstrate the use of computers in analyzing data, in modeling science problems, and in creating numerical simulations across the science disciplines.

Fulfills Mason Core requirement in natural science (lab).

Prerequisite(s): CDS 101  
Corequisite(s): CDS 101  
Schedule Type: LAB  
Hours of Lecture or Seminar per week: 1  
Hours of Lab or Studio per week: 3  
When Offered: Fall

**CDS 130 - Computing for Scientists**

Credits: 3  
Not Repeatable for Credit  
Offered by Computational and Data Sciences  
Covers use of computers to solve practical scientific problems. Topics include creating effective scientific presentations, analysis of experimental data, online literature, data/information ethics, scientific modeling, and communication/collaboration tools. Designed to equip students with the knowledge and confidence they need to use future hardware and software systems both as students and throughout their scientific careers.

Fulfills Mason Core requirement in information technology (all).
Prerequisite(s): Passing score on the math placement test for MATH 110 or MATH 113.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CDS 151 - Data Ethics in an Information Society

Credits: 1
Not Repeatable for Credit
Offered by Computational and Data Sciences
Examination of ethical issues related to access and use of information and data in the Internet age, for the general student, with special emphasis on ethical issues that apply to the proper use and interpretation of scientific and technical information.

Fulfills Mason Core requirement in information technology (ethics only).

Schedule Type: LEC
Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0

CDS 201 - Introduction to Computational Social Science

Credits: 3
Not Repeatable for Credit
Offered by Computational and Data Sciences
Undergraduate-level introduction to computational concepts, principles, and modeling approaches in social sciences, emphasizing simulations and elements of complexity theory as they apply to social phenomena. Survey includes systems dynamics, cellular automata, and agent-based models.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

CDS 205 - Introduction to Agent-based Modeling and Simulation

Credits: 3
Not Repeatable for Credit
Offered by Computational and Data Sciences
Undergraduate-level introduction to Agent-based Modeling. Provides a background onto why agent-based models and hands-on examination of agent-based models in the social sciences by examining and experimenting with a variety of social simulation projects.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring
CDS 230 - Modeling and Simulation I

Credits: 3  
Not Repeatable for Credit  
Offered by Computational and Data Sciences  
This course expands upon the foundation provided by CDS 130. Fundamental computational modeling techniques are used in a variety of disciplines with special emphasis on biological systems. Continued development of algorithmic thinking skills will be done using different computational environments.

Prerequisite(s): CDS 130 or permission of instructor.  
Schedule Type: LEC  
Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0  
When Offered: Fall, Spring

CDS 251 - Introduction to Scientific Programming

Credits: 3  
Not Repeatable for Credit  
Offered by Computational and Data Sciences  
Focuses on elements of programming using the Fortran language and selected elements of the C language with emphasis on the aspects used in the computational and data sciences. Conducted through a combination of lecture and interactive computer laboratory.

Prerequisite(s): CDS 130.  
Schedule Type: LEC  
Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0  
When Offered: Fall, Summer.

CDS 290 - Topics in Computational and Data Sciences

Credits: 1-4  
Repeatable within Degree for Credit  
Offered by Computational and Data Sciences  
Selected topics in Computational and Data Sciences. May be accepted for credit by CDS majors and CDS minors.

Schedule Type: IND  
Hours of Lecture or Seminar per week: 1-4  
Hours of Lab or Studio per week: 0

CDS 292 - Introduction to Social Network Analysis
Credits: 3
Not Repeatable for Credit
Offered by Computational and Data Sciences
An introduction to methods and applications that examine social systems based on relations, structures, connectivity, location, roles, interactions, and other network properties. Example applications of Social Network Analysis covered will include politics, diseases, organizations, along with a variety of other social phenomena.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring

CDS 301 - Scientific Information and Data Visualization

Credits: 3
Not Repeatable for Credit
Offered by Computational and Data Sciences
The techniques and software used to visualize scientific simulations, complex information, and data visualization for knowledge discovery. Includes examples and exercises to help students develop their understanding of the role visualization plays in computational science and provides a foundation for applications in their careers.

Prerequisite(s): CDS 101 or CDS 130 or equivalent, or permission of instructor.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

CDS 302 - Scientific Data and Databases

Credits: 3
Not Repeatable for Credit
Offered by Computational and Data Sciences
Data and databases used by scientists. Includes basics about database organization, queries, and distributed data systems. Student exercises will include queries of existing systems, along with basic design of simple database systems.

Prerequisite(s): CDS 101 or CDS 130 or equivalent, or permission of instructor.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

CDS 303 - Scientific Data Mining

Credits: 3
Not Repeatable for Credit
Offered by Computational and Data Sciences
Data mining techniques from statistics, machine learning, and visualization to scientific knowledge discovery. Students will be
given a set of case studies and projects to test their understanding of this field and provide a foundation for future applications in their careers.

Prerequisite(s): CDS 101 or CDS 130 or equivalent, or permission of instructor.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

CDS 410 - Numerical Analysis II

Credits: 3
Not Repeatable for Credit
Offered by Computational and Data Sciences
Numerical differentiation and integration, initial-value and boundary-value problems for ordinary differential equations, methods of solution of partial differential equations, iterative methods of solution of nonlinear systems, and approximation theory.

Equivalent to MATH 447

Prerequisite(s): MATH 214 or 216, and 446.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CDS 411 - Modeling and Simulation II

Credits: 3
Not Repeatable for Credit
Offered by Computational and Data Sciences
Covers the application of modeling and simulation methods to various scientific applications, including fluid dynamics, solid mechanics, materials science, molecular mechanics, and astrophysics. Provides an introduction to modeling and simulation software, as well as high-performance computing.

Prerequisite(s): MATH 446, PHYS 262 or PHYS 245, and a 200- or higher-level computational methods course, or permission of instructor.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CDS 421 - Introduction to Computational Fluid Dynamics

Credits: 3
Not Repeatable for Credit
Offered by Computational and Data Sciences
Covers the governing equations of fluid dynamics; numerical discretization of the governing equations and popular techniques for solving flow problems; applications of CFD to some classic fluid dynamics problems; and setting up the CFD simulation using a CFD software package. Students will understand the process of developing a geometrical model of the flow, applying
appropriate boundary conditions, specifying solution parameters, and visualizing the results. Students are expected to complete several computer projects, including writing their own CFD computer program to analyze simple fluid flow problems, as well as setting up the CFD simulation using a CFD software package.

**Prerequisite(s):** MATH 446, proficiency in at least one computer programming language and computer operating system, or permission of instructor.

**Schedule Type:** LEC

**Hours of Lecture or Seminar per week:** 3

**Hours of Lab or Studio per week:** 0

---

**CDS 461 - Molecular Dynamics and Monte Carlo Simulations**

Credits: 3

Not Repeatable for Credit

Offered by Computational and Data Sciences

Covers particle methods to solve variety of physical systems. Emphasizes study and development of numerical results and visualization of these results in complex physical systems. Applications and projects include stellar and galaxy dynamics, smoothed particle hydrodynamics, plasma simulations, and semiconductor device theory algorithms on parallel and vectorized systems.

**Prerequisite(s):** Competency in programming at CDS 251 level, college physics, and MATH 214 or MATH 216, or permission of instructor.

**Schedule Type:** LEC

**Hours of Lecture or Seminar per week:** 3

**Hours of Lab or Studio per week:** 0

**When Offered:** Fall, Spring, Summer

---

**CDS 486 - Topics in Computational and Data Sciences**

Credits: 3

Repeatable within Degree for Credit

Offered by Computational and Data Sciences

Covers selected topics in computational and data sciences not covered in fixed content courses.

**Schedule Type:** LEC

**Hours of Lecture or Seminar per week:** 3

**Hours of Lab or Studio per week:** 0

---

**CDS 487 - Electronic Structure Computations**

Credits: 3

Not Repeatable for Credit

Offered by Computational and Data Sciences

Covers computational aspects of materials science, such as first-principles methods of electronic structure calculations of periodic solids, clusters, and molecules, as well as the use of empirical potentials. Examples will be drawn from metals, insulators, and semiconductors. Students will construct simple codes and be guided in the use of the more sophisticated available computational packages.
Prerequisite(s): PHYS 308 or PHYS 402.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CDS 490 - Directed Study and Research

Credits: 1-3
Repeatable within Degree for Credit
Offered by Computational and Data Sciences
Students work under the guidance of a faculty member on an independent study or directed research project in the computational and data sciences. May be repeated in combination with CDS 491 for a total of 6 credits between the two classes.

Prerequisite(s): Students must be CDS majors or minors in their junior or senior year and have permission of the instructor.
Schedule Type: IND
Hours of Lecture or Seminar per week: 1-12
Hours of Lab or Studio per week: 0

CDS 491 - Internship

Credits: 1-3
Repeatable within Degree for Credit
Offered by Computational and Data Sciences
On-the-job experience for CDS majors and minors working in industry and government laboratories, including summer programs. Supervision and approval of this course must be arranged with department before registering. May be repeated in combination with CDS 490 for a total of 6 credits between the two classes.

Prerequisite(s): Students must be CDS majors or minors in their junior or senior year and have permission of the instructor.
Schedule Type: INT
Hours of Lecture or Seminar per week: 1-9
Hours of Lab or Studio per week: 0

CDS 501 - Scientific Information and Data Visualization

Credits: 3
Not Repeatable for Credit
Offered by Computational and Data Sciences
Techniques and software used to visualize scientific simulations, complex information, and data visualization for knowledge discovery. Includes examples and exercises to help students develop their understanding of the role visualization plays in computational science and provides a foundation for applications in their careers.

Prerequisite(s): CDS 130 or CDS 101; or permission of instructor.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring
CDS 502 - Introduction to Scientific Data and Databases

Credits: 3
Not Repeatable for Credit
Offered by Computational and Data Sciences
Data and databases used by scientists. Includes basics about database organization, queries, and distributed data systems. Student exercises will include queries of existing systems, along with basic design of database systems. Examples from different disciplines will be given.

Prerequisite(s): CDS 130 or CDS 101; or permission of instructor.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

Computational Sciences and Informatics (CSI)

Offered by the College of Science

CSI 500 - Computational Science Tools

Credits: 3
Not Repeatable for Credit
Offered by Computational and Data Sciences
Introduces computer skills and packages commonly used in quantitative scientific research.

Prerequisites: 1 year of college calculus, knowledge of matrix algebra, and computer programming.
Notes: CSI 601 and CSI 602, including additional material, have merged to create CSI 500.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

CSI 501 - Introduction to Scientific Programming

Credits: 3
Not Repeatable for Credit
Offered by Computational and Data Sciences
Introduces and reviews programming in C and FORTRAN with emphasis on the aspects used in the computational and data sciences. Conducted through a combination of both lecture and interactive computer laboratory.

Prerequisite(s): Permission of instructor
Schedule Type: LEC
CSI 597 - Topics in Science and Engineering Simulation

Credits: 3
Not Repeatable for Credit
Offered by Computational and Data Sciences
Covers selected topics in Science and Engineering simulation, not covered in fixed content computational sciences and informatics courses.

Prerequisite(s): Permission of instructor.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CSI 600 - Quantitative Foundations for Computational Sciences

Credits: 3
Not Repeatable for Credit
Offered by Computational and Data Sciences
Accelerated review of mathematical tools for scientific applications and analysis. Topics include vectors and matrices; differential and difference equations; linear systems; Fourier, Laplace, and Z-transforms; and probability theory.

Equivalent to SYST 500

Prerequisite(s): MATH 213 and 214.
Notes: Not applicable to 48-credit course total for CSI PhD.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CSI 615 - Quantum Computation

Credits: 3
Not Repeatable for Credit
Offered by Computational and Data Sciences
Introduces field of quantum computation. Emphasizes scientific principles involved and presentation of strengths and weaknesses of approach. Topics include basic quantum physics and quantum algorithms.

Prerequisite(s): Undergraduate course in quantum physics, and undergraduate degree in physical or computer sciences, or permission of instructor.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
CSI 629 - Topics in Continuum Systems

Credits: 3  
Not Repeatable for Credit  
Offered by Computational and Data Sciences  
Covers selected topics in the computational aspects of continuum systems not covered in fixed-content courses in dynamical systems. Possible topics are smooth-particle hydrodynamics, radiation hydrodynamics, algorithms for continuum systems, adaptive grids for continuum computations, spectral methods in computational fluid dynamics, algorithms for concurrent machines, formation of high energy particle jets in astrophysical applications, application to Earth atmospheric problems, and flow considerations in molten materials.

Equivalent to CSI 729 (2013-2014 Catalog).

Prerequisite(s): Permission of instructor.  
Schedule Type: LEC  
Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0

CSI 638 - The Policy Process for Scientists

Credits: 2  
Not Repeatable for Credit  
Offered by Computational and Data Sciences  
Introduces relationship among government, science, scientists, and issues and processes that shape science policy. Emphasizes examples taken from space weather and meteorology.

Prerequisite(s): Graduate standing.  
Schedule Type: LEC  
Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0

CSI 639 - Ethics in Scientific Research

Credits: 3  
Not Repeatable for Credit  
Offered by Computational and Data Sciences  
Reviews purpose of scientific research and principles for evaluating ethical issues. Teaches skills for survival through training in moral reasoning and responsible conduct. Discusses ethical issues and applying critical-thinking skills to design, execution, and analysis of experiments. Issues include using animals, humans in research; ethical standards in computer community; research fraud; and currently accepted guidelines for data ownership, manuscript preparation, and conduct of those in authority.

Schedule Type: LEC  
Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0
CSI 654 - Data and Data Systems in the Physical Sciences

Credits: 3
Not Repeatable for Credit
Offered by Computational and Data Sciences
Introduces data issues associated with modern physical sciences. Examines data access, formats, browsing, analysis, visualization, and data information systems in federated environments. Uses examples from physical sciences, including astronomy and space sciences; Earth sciences; Earth observing and other fields of physics; and model output data and associated special issues. Introduces mathematical techniques particularly important for large databases.

Prerequisite(s): Competency in programming at CSI 601-607 level, or permission of instructor.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CSI 659 - Dispersal Methods of Hazardous Releases

Credits: 3
Not Repeatable for Credit
Offered by Computational and Data Sciences
Covers physics of aerosols; engineering, mechanics of building ventilation systems; and mechanical dissemination utilizing hand-held, automatic, vehicle, and truck mounted systems. Also discusses basic concepts, theories, and models of pollutant dispersal in atmosphere, and related atmospheric systems affecting dispersal of biological agents.

Prerequisite(s): CSI 655, or permission of instructor.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CSI 662 - Introduction to Space Weather

Credits: 3
Not Repeatable for Credit
Offered by Computational and Data Sciences
Introduction to space weather involving systems such as the sun, the heliosphere, and the Earth's magnetosphere and ionosphere. Covers the solar magnetic field, solar flares, coronal mass ejections, particle acceleration mechanisms, the solar wind, and the Earth's magnetic field, radiation belt, geomagnetic storms, and ionospheric disturbances.

Prerequisite(s): PHYS 303, 305, 307, and MATH 213, or permission of instructor.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CSI 670 - Economic Systems Design
CSI 672 - Statistical Inference

Credits: 3
Not Repeatable for Credit
Offered by Computational and Data Sciences
Covers critical aspects of probability, random variables and distributions, characteristic functions, stochastic convergence, optimal estimation, maximum-likelihood estimation, asymptotic theory, Bayesian methods, likelihood-ratio tests, statistical decision theory, sequential methods.

Equivalent to STAT 652.

Prerequisite(s): B- or higher in STAT 544 or permission of instructor.
Prerequisite(s) enforced by registration system.

Corequisite(s): STAT 554.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CSI 674 - Bayesian Inference and Decision Theory

Credits: 3
Not Repeatable for Credit
Offered by Computational and Data Sciences
Introduces decision theory and relationship to Bayesian statistical inference. Teaches commonalities, differences between Bayesian and frequentist approaches to statistical inference, how to approach a statistics problem from the Bayesian perspective and how to combine data with informed expert judgment in a sound way to derive useful and policy-relevant conclusions. Teaches necessary theory to develop firm understanding of when and how to apply Bayesian and frequentist methods, and practical procedures for inference, hypothesis testing, and developing statistical models for phenomena. Teaches fundamentals of Bayesian theory of inference, including probability as a representation for degrees of belief, likelihood principle, use of Bayes Rule to revise beliefs based on evidence, conjugate prior distributions for common statistical models, and methods for approximating the posterior distribution. Introduces graphical models for constructing complex probability and decision models from modular components.

Equivalent to SYST 664; STAT 664 (2014-2015 Catalog).
Prerequisite(s): STAT 544 or CSI 672, or equivalent.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CSI 676 - Regression Analysis

Credits: 3
Not Repeatable for Credit
Offered by Computational and Data Sciences
Simple and multiple linear regression, polynomial regression, general linear models, subset selection, step-wise regression, and model selection. Also covered are multicollinearity, diagnostics, and model building. Both the theory and practice of regression analysis are covered.

Equivalent to STAT 656.

Prerequisite(s): B- or higher in STAT 554, matrix algebra and working knowledge of SAS.
Prerequisite(s) enforced by registration system.

Corequisite(s): STAT 544.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CSI 678 - Times Series Analysis and Forecasting

Credits: 3
Not Repeatable for Credit
Offered by Computational and Data Sciences
Modeling stationary and nonstationary processes; autoregressive, moving average and mixed model processes; hidden periodicity models; properties of models; autocovariance and autocorrelation functions, and partial autocorrelation function; spectral density functions; identification of models; estimation of model parameters, and forecasting techniques.

Equivalent to STAT 658.

Prerequisite(s): B- or higher in STAT 544 and STAT 554, or permission of instructor.
Prerequisite(s) enforced by registration system.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CSI 685 - Fundamentals of Materials Science

Credits: 3
Not Repeatable for Credit

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
Offered by Computational and Data Sciences
Covers fundamentals of materials science with emphasis on physical topics including crystal structure and symmetry, dislocation theory, theory of interfaces, multicomponent phase diagrams, theory of phase transformations, nano-materials, metallic glasses. Includes a term project, assignments from current literature, and application of computation in materials science.

Equivalent to PHYS 615

**Prerequisite(s):** CDS 385/PHYS 385; or undergraduate degree in physics, chemistry, materials, electrical or mechanical engineering or related disciplines; or permission of instructor.

**Schedule Type:** LEC

**Hours of Lecture or Seminar per week:** 3

**Hours of Lab or Studio per week:** 0

---

**CSI 687 - Solid State Physics and Applications**

Credits: 3
Not Repeatable for Credit
Offered by Computational and Data Sciences
Covers crystal structures, binding, lattice vibrations, free electron model, metals, semiconductors and semiconductor devices, superconductivity, and magnetism.

Equivalent to PHYS 512

**Prerequisite(s):** PHYS 502 or equivalent.

**Schedule Type:** LEC

**Hours of Lecture or Seminar per week:** 3

**Hours of Lab or Studio per week:** 0

---

**CSI 690 - Numerical Methods**

Credits: 3
Not Repeatable for Credit
Offered by Computational and Data Sciences
Covers computational techniques for solving science, engineering problems. Develops algorithms to treat typical problems in applications, emphasizing types of data encountered in practice. Covers theoretical development as well as implementation, efficiency, and accuracy issues in using algorithms and interpreting results. When applicable, uses computer graphical techniques to enhance interpretation.

Equivalent to MATH 685, OR 682; CSI 700 (2013-2014 Catalog).

**Prerequisite(s):** MATH 203 and 214 or equivalent, and some programming experience.

**Schedule Type:** LEC

**Hours of Lecture or Seminar per week:** 3

**Hours of Lab or Studio per week:** 0

---

**CSI 695 - Scientific Databases**
Study of database support for scientific data management. Covers requirements and properties of scientific databases, data models for statistical and scientific databases, semantic and object-oriented modeling of application domains, statistical database query languages and query optimization, advanced logic query languages, and case studies such as the human genome project and Earth-orbiting satellites.

Equivalent to CSI 710 (2013-2014 Catalog).

**Prerequisite(s):** INFS 614 or equivalent, or permission of instructor.

**Schedule Type:** LEC

**Hours of Lecture or Seminar per week:** 3

**Hours of Lab or Studio per week:** 0

---

**CSI 701 - Foundations of Computational Science**

Credits: 3

Not Repeatable for Credit

Offered by Computational and Data Sciences

Covers mapping of mathematical models to computer software, including all aspects of developing scientific software such as architecture, data structures, advanced numerical algorithms, languages, documentation, optimization, validation, verification, and software reuse. Examples in bioinformatics, computational biology, computational physics, and global change demonstrate scientific advances enabled by computation. Class projects involve working in teams to develop software that implements mathematical models, using software to address important scientific questions, and conducting computational experiments with it.

**Prerequisite(s):** Competency in UNIX and programming at CSI 501 level, and CSI 690; or permission of instructor

**Schedule Type:** LEC

**Hours of Lecture or Seminar per week:** 3

**Hours of Lab or Studio per week:** 0

---

**CSI 702 - High-Performance Computing**

Credits: 3

Not Repeatable for Credit

Offered by Computational and Data Sciences

Hardware and software associated with high-performance scientific computing. Computer architectures, processor design, programming paradigms, parallel and vector algorithms. Emphasizes importance of software scalability in science problems.

**Prerequisite(s):** Competency in Linux and programming at CSI 501 level or permission of instructor

**Schedule Type:** LEC

**Hours of Lecture or Seminar per week:** 3

**Hours of Lab or Studio per week:** 0

**When Offered:** Fall, Spring, Summer

---

**CSI 703 - Scientific and Statistical Visualization**
CSI 709 - Topics in Computational Sciences and Informatics

Credits: 3
Repeatable within Term for Credit
Offered by Computational and Data Sciences
Covers selected topics in computational sciences and informatics not covered in fixed-content computational sciences and informatics courses.

Prerequisite(s): Admission to PhD program, and permission of instructor.
Notes: May be repeated for credit as needed.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CSI 711 - Chemical Thermodynamics and Kinetics

Credits: 3
Not Repeatable for Credit
Offered by Computational and Data Sciences
Advanced study of thermodynamics and kinetics. Covers application of kinetics to elucidation of reaction mechanisms and application of statistical thermodynamics to theory of elementary reaction rates.

Equivalent to CHEM 633

Prerequisite(s): CHEM 331 and 332.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CSI 712 - Introduction to Solid Surfaces
CSI 713 - Quantum Chemistry

Credits: 3
Not Repeatable for Credit
Offered by Computational and Data Sciences
Illustrates fundamental concepts of quantum mechanics with applications to chemical systems, including atomic and molecular electronic structure and properties, molecular symmetry, and intermolecular forces.

Equivalent to CHEM 732

Prerequisite(s): CHEM 332.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CSI 714 - Spectroscopy and Structure

Credits: 3
Not Repeatable for Credit
Offered by Computational and Data Sciences
Covers quantum mechanics of the interaction of atoms and molecules with electromagnetic radiation. Also covers modern spectroscopic methods as applied to the elucidation of molecular structure and dynamics.

Prerequisite(s): CHEM 332.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CSI 715 - Quantum Complexity Theory

Credits: 3
Not Repeatable for Credit
Offered by Computational and Data Sciences
Discusses fundamental aspects of complexity theory and its applications from perspective of quantum physics. Explores current research in emerging field of quantum complexity theory and discusses related issues in quantum algorithms.

**Prerequisite(s):** CSI 615 or equivalent, or permission of instructor.
**Schedule Type:** LEC
**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0

---

**CSI 716 - Quantum Information Theory**

Credits: 3
Not Repeatable for Credit
Offered by Computational and Data Sciences
Introduces quantum information theory and its practical applications to information processing and secure communications. Emphasizes applications involving commercial and defense systems.

**Prerequisite(s):** CSI 615, and CSI 783 or 784; or permission of instructor.
**Schedule Type:** LEC
**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0

---

**CSI 717 - Quantum Computer Programming**

Credits: 3
Not Repeatable for Credit
Offered by Computational and Data Sciences
Covers methods for programming quantum computers. Topics include quantum computing concepts, currently known algorithms for quantum computers, denotational semantics, existing languages for quantum computers, application of logic programming to quantum computers, and programming for different types of novel computer architectures.

**Prerequisite(s):** CSI 615 or equivalent, or permission of instructor.
**Schedule Type:** LEC
**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0

---

**CSI 718 - Quantum Computer Realization**

Credits: 3
Not Repeatable for Credit
Offered by Computational and Data Sciences
Introduces physical implementation of quantum computation and practical applications to developing scalable quantum computers. Special emphasis on various schemes for achieving practical quantum computers.

**Prerequisite(s):** CSI 615, and 784 or equivalent; or permission of instructor.
**Schedule Type:** LEC
**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0
CSI 719 - Topics in Computational Chemistry

Credits: 3
Repeatable within Degree for Credit
Offered by Computational and Data Sciences
Covers selected topics in computational chemistry not covered in fixed-content computational chemistry courses.

Prerequisite(s): Permission of instructor.
Notes: May be repeated for credit as needed.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CSI 720 - Fluid Mechanics

Credits: 3
Not Repeatable for Credit
Offered by Computational and Data Sciences
Covers basic and advanced fluid mechanics and continuous hypothesis to define fluids. Introduces tensor analysis; Euclidean and Lagrangian representations of fluid flow; Laplace's equation; continuity equation; Navier-Stokes equations; Bernoulli's theorem and Crocco's form of the equations; steady and unsteady flows; potential, incompressible, and compressible flows; gravity and sound waves; gas dynamics; and viscous flows.

Prerequisite(s): CSI 690 and CSI 780, or permission of instructor.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CSI 721 - Computational Fluid Dynamics I

Credits: 3
Not Repeatable for Credit
Offered by Computational and Data Sciences
Covers fundamentals including spatial and temporal approximation techniques for partial differential equations, solution of large systems of equations, data structures, solvers of the Laplace/ full potential equation, and simple Euler solvers. Includes two major projects: Laplace solver and 2-D Euler solver on unstructured grids. Students expected to write their own codes.

Prerequisite(s): Course in partial differential equations such as MATH 678 or equivalent; knowledge of linear algebra at level of MATH 603 or CSI 740/MATH 625; coding experience in FORTRAN or C; or permission of instructor.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
CSI 722 - Computational Fluid Dynamics II

Credits: 3
Not Repeatable for Credit
Offered by Computational and Data Sciences
Covers more advanced topics in computational fluid dynamics, including high-resolution schemes for hyperbolic PDEs, advanced Euler solvers, Navier-Stokes solvers, grid generation, adaptive mesh refinement, efficient use of supercomputing hardware, and future trends. Projects include topics in grid generation and adaptive refinement. Students expected to write their own codes.

Prerequisite(s): CSI 721 or permission of instructor.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CSI 723 - Fluid Mechanics II

Credits: 3
Not Repeatable for Credit
Offered by Computational and Data Sciences
Covers gas dynamics, shock waves, method of characteristics, boundary layer flows, instabilities, and turbulence modeling. Special topics include biological, non-Newtonian, and free surface flows; aeroelasticity; and magneto-hydrodynamics.

Prerequisite(s): CSI 720 or permission of instructor.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CSI 739 - Topics in Bioinformatics

Credits: 3
Not Repeatable for Credit
Offered by Computational and Data Sciences
Selected topics in bioinformatics not covered in fixed-content bioinformatics courses.

Prerequisite(s): Permission of instructor.
Notes: May be repeated for credit as needed.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CSI 740 - Numerical Linear Algebra

Credits: 3
Not Repeatable for Credit
Offered by Computational and Data Sciences
Covers computational methods for matrix systems; theory and development of numerical algorithms for the solution of linear systems of equations, including direct and iterative methods; analysis of sensitivity of system to computer round off; and solution of least squares problems using orthogonal matrices. Also covers computation of eigenvalues and eigenvectors, singular value decomposition, and applications.

Equivalent to MATH 625

Prerequisite(s): MATH 203 and some programming experience.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CSI 742 - The Mathematics of the Finite Element Method

Credits: 3
Not Repeatable for Credit
Offered by Computational and Data Sciences
The finite element method is commonly used for developing numerical approximations to problems involving ordinary and partial differential equations. Course develops underlying mathematical foundation, examines specific types of finite elements, analyzes convergence rates and approximation properties, and uses method to solve important equations. Students develop their own codes and are expected to complete independent projects.

Prerequisite(s): MATH 446 or 685, or permission of instructor.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CSI 744 - Linear and Nonlinear Modeling in the Natural Sciences

Credits: 3
Not Repeatable for Credit
Offered by Computational and Data Sciences
Develops tools of mathematical modeling while carrying out numerical simulations. Considers examples from across the sciences. Topics include basic issues such as models, simplification, linearity, and nonlinearity; dimensionless parameters; dimensional analysis; models involving differential equations; examples from population growth and chemical kinetics; models involving partial differential equations; diffusion, transport, nonlinearity and shocks; probabilistic modeling; perturbation methods; extrapolation; and introduction to stability.

Prerequisite(s): Permission of instructor.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CSI 746 - Wavelet Theory
Credits: 3
Not Repeatable for Credit
Offered by Computational and Data Sciences

Studies theory and computational aspects of wavelets and wavelet transform. Emphasizes computational aspects of wavelets. Defines Fast Wavelet Transform in one and two dimensions and develops appropriate numerical algorithms and theory of wavelet bases on the real line. Covers multiresolution analysis, splines, time-frequency localization, and wavelet packets.

Equivalent to MATH 772

Prerequisite(s): Knowledge of convolution and Fourier transforms of sequences; some familiarity with Hilbert space theory helpful but not required; knowledge of scientific programming language.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CSI 747 - Nonlinear Optimization and Applications

Credits: 3
Not Repeatable for Credit
Offered by Computational and Data Sciences

Introduction to practical aspects of nonlinear optimization. Covers applications of optimization algorithms to solving problems in science and engineering. Applications include data analysis, materials science, nanotechnology, mechanics, optical design, shape design, and trajectory optimization.

Prerequisite(s): MATH 213 and 216, or permission of instructor.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CSI 749 - Topics in Computational Mathematics

Credits: 3
Not Repeatable for Credit
Offered by Computational and Data Sciences

Selected topics in computational mathematics not covered in fixed-content computational mathematics courses.

Prerequisite(s): Permission of instructor.
Notes: May be repeated for credit as needed.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CSI 750 - Earth Systems and Global Changes

Credits: 3
Not Repeatable for Credit
Offered by Computational and Data Sciences
Introduces global system interactions responsible for global environmental change. Discusses natural causes of past and present global changes, and how human activities affect them; and ecological and human consequences of global changes. Topics include climate and hydrological systems, global warming, deforestation, ozone depletion, ecological system dynamics, introduction to climate and global change monitoring, satellite instrumentation and calibration, and model predictions.

Prerequisite(s): Course in ecology, environmental geology, or atmospheric physics; or permission of instructor.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CSI 745 - Earth Science Data and Advanced Data Analysis

Credits: 3
Not Repeatable for Credit
Offered by Computational and Data Sciences
Covers accessing and applying Earth observations and remote-sensing data for Earth system science research and applications. Major topics are data formats, analysis and visualization tools, advanced data analysis methods, and data applications. Also covers combining innovative information technology techniques and Earth science data to set up online data centers for accessing data through the web.

Prerequisite(s): GGS 579 or permission of instructor.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CSI 757 - Techniques and Algorithms in Earth Observing and Remote Sensing

Credits: 3
Not Repeatable for Credit
Offered by Computational and Data Sciences
Covers retrieval, analysis, and application of geophysical parameters derived from remotely sensed data for Earth system research and applications. Includes theory of visible and infrared and microwave remote sensing, heritage sensors, sensor calibration, retrieval algorithms, validation, and error estimates.

Equivalent to GGS 757

Prerequisite(s): CSI 753 or permission of instructor.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CSI 758 - Visualization and Modeling of Complex Systems

Credits: 3
Not Repeatable for Credit
Offered by Computational and Data Sciences
Covers elements of modeling and analysis of Earth and space sciences data and systems. Concentrates on sample projects and student-initiated projects to use visualization and graphical analysis techniques as they apply to modeling of complex data sets and systems. Uses several different analysis and visualization packages. Spacecraft data sets from the Naval Research Laboratory (NRL) Backgrounds Data Center and other NRL data sets are available for course projects; perusal of web data sets also possible. Modeling and analysis accompanied by appropriate readings from current literature.

Prerequisite(s): Permission of instructor.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CSI 761 - N-Body Methods and Particle Simulations

Credits: 3
Not Repeatable for Credit
Offered by Computational and Data Sciences
Covers particle methods to solve variety of physical systems. Emphasizes study and development of numerical results and visualization of these results in complex physical systems. Applications and projects include stellar and galaxy dynamics, smoothed particle hydrodynamics, plasma simulations, and semiconductor device theory algorithms on parallel and vectorized systems.

Equivalent to ASTR 761

Prerequisite(s): PHYS 613, CSI 780 and CSI 700 or permission of instructor.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CSI 763 - Statistical Methods in Space Sciences

Credits: 3
Not Repeatable for Credit
Offered by Computational and Data Sciences
Covers statistical and data analysis methods applicable to problems in space science, remote sensing, and astrophysics. Includes parametric and nonparametric hypothesis testing, parameter estimation, correlation analysis, time series analysis, spatial analysis, and image reconstruction. Emphasizes imperfect nature of actual data sets and hypothesis. Examples drawn from current space science research.

Prerequisite(s): ASTR 530 or permission of instructor.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CSI 764 - Computational Astrophysics

Credits: 3
Not Repeatable for Credit
Offered by Computational and Data Sciences
Covers statistical mechanics concepts important in astrophysics. Presents unified approach to particle acceleration and interaction theory based on analytical and numerical analysis of Boltzmann and Liouville equations. Discusses computational methods relevant to particle transport problems, with emphasis on Fokker-planck and Monte Carlo solution techniques. Applications from space sciences include studies of cosmic ray acceleration, photon comptonization, particle transport in the near-Earth environment, energy transport in stellar atmospheres, and self-gravitating system dynamics.

Equivalent to ASTR 764

**Prerequisite(s):** ASTR 530.
**Schedule Type:** LEC
**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0

### CSI 771 - Computational Statistics

Credits: 3
Not Repeatable for Credit
Offered by Computational and Data Sciences
Covers basic computationally intensive statistical methods and related methods, which would not be feasible without modern computational resources. Covers nonparametric density estimation including kernel methods, orthogonal series methods and multivariate methods, recursive methods, cross-validation, nonparametric regression, penalized smoothing splines, the jackknife and bootstrapping, computational aspects of exploratory methods including the grand tour, projection pursuit, alternating conditional expectations, and inverse regression methods.

Equivalent to STAT 751.

**Prerequisite(s):** B- or higher in CSI 672 or permission of instructor.
Prerequisite(s) enforced by registration system.

**Schedule Type:** LEC
**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0

### CSI 772 - Statistical Learning

Credits: 3
Not Repeatable for Credit
Offered by Computational and Data Sciences
Focuses on statistical learning theory by introducing the statistical and optimization background essential for developing new efficient statistical learning algorithms. Also discusses applications of statistical learning algorithms to the solution of important problems in many areas of science.

**Prerequisite(s):** B- or higher in STAT 652 / CSI 672, or permission of instructor.
Prerequisite(s) enforced by registration system.

**Schedule Type:** LEC
CSI 773 - Statistical Graphics and Data Exploration

Credits: 3
Not Repeatable for Credit
Offered by Computational and Data Sciences
Exploratory data analysis provides a reliable alternative to classical statistical techniques, which are designed to be the best possible when stringent assumptions apply. Topics include graphical techniques such as scatter plots, box plots, parallel coordinate plots, and other graphical devices; re-expression and transformation of data; influence and leverage; and dimensionality reduction methods such as projection pursuit.

Equivalent to STAT 663

Prerequisite(s): A 300-level statistics course and a programming course, or permission of instructor.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CSI 775 - Graphical Models for Inference and Decision Making

Credits: 3
Not Repeatable for Credit
Offered by Computational and Data Sciences
Theory and methods for inference and decision making in environments characterized by uncertain information. Covers graphical probability and decision models. Studies approaches to representing knowledge about uncertain phenomena, and planning and acting under uncertainty. Topics include knowledge engineering, exact and approximate inference in graphical models, learning in graphical models, temporal reasoning, planning, and decision-making. Practical model-building experience provided. Students apply what they learn to a project of their own choosing.

Equivalent to OR 719; STAT 719 (2014-2015 Catalog).

Prerequisite(s): STAT 652 or 664, or permission of instructor.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CSI 776 - Stochastic Differential Equations

Credits: 3
Not Repeatable for Credit
Offered by Computational and Data Sciences
Introduces modern theory of stochastic calculus. Covers stochastic integrals, martingales, counting processes, diffusion processes, and Ito-type processes in general. Considers applications of these methods to engineering, biology, and economics.
**CSI 777 - Principles of Knowledge Mining**

Credits: 3  
Not Repeatable for Credit  
Offered by Computational and Data Sciences  
Principles and methods for synthesizing task-oriented knowledge from computer data and prior knowledge and presenting it in human-oriented forms such as symbolic descriptions, natural language-like representations, and graphical forms. Topics include fundamental concepts of knowledge mining; methods for target data generation and optimization; statistical and symbolic approaches; knowledge representation and visualization; and new developments such as inductive databases, knowledge generation languages, and knowledge scouts.

**Prerequisite(s):** INFS 614 or equivalent, or permission of instructor.

**Schedule Type:** LEC  
**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**CSI 779 - Topics in Computational Statistics**

Credits: 3  
Repeatable within Term for Credit  
Offered by Computational and Data Sciences  
Selected topics in computational statistics not covered in fixed-content computational statistics courses.

**Prerequisite(s):** Permission of instructor.  
**Notes:** May be repeated for credit as needed.

**Schedule Type:** LEC  
**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**CSI 780 - Principles of Modeling and Simulation in Science**

Credits: 3  
Not Repeatable for Credit  
Offered by Computational and Data Sciences  
Applies numerical methods to study of variety of physical systems, with emphasis on modeling and simulation. Develops numerical algorithms and simulation codes to gain understanding of mechanisms, processes in physical systems. Includes several projects drawn from such areas as atomic and molecular interactions, molecular dynamics, lattice dynamics, quantum systems, chaos, percolation, random walks, aggregation mechanisms of soft solids, nanomaterials, and nonlinear dynamics.

**Prerequisite(s):** Competency in programming at CSI 501 level and college physics, or permission of instructor.  
**Schedule Type:** LEC
CSI 781 - Plasma Science

Credits: 3
Not Repeatable for Credit
Offered by Computational and Data Sciences
Study of ionized matter, theory, and some computation with application to astrophysics, industrial plasma processing, magnetosphere, and ionosphere problems. Vlasov and fluid equations derived and applied in plasma science, including study of plasmas with and without magnetic fields.

Prerequisite(s): PHYS 513 or PHYS 722/CSI 785; PHYS 711/CSI 782/CHEM 730 or permission of instructor.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CSI 782 - Statistical Mechanics for Modeling and Simulation

Credits: 3
Not Repeatable for Credit
Offered by Computational and Data Sciences
Studies microcanonical, canonical, and grand canonical ensembles and fluctuations, as well as Fermi-Dirac and Bose-Einstein statistics. Modeling of ideal, dilute, and diatomic gases, liquids, and crystals. Also covers Liouville equation and simulation in classical statistical mechanics. Introduces Brownian motion, kinetic theory, and transport processes.

Prerequisite(s): CSI 690, or permission of instructor.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CSI 783 - Computational Quantum Mechanics

Credits: 3
Not Repeatable for Credit
Offered by Computational and Data Sciences
Studies fundamental concepts of quantum mechanics from computational point of view, review of systems with spherically symmetric potentials, many electron atom solutions to Schrodinger's equation, electron spin in many-electron systems, atomic structure calculations, algebra of many-electron calculations, Hartree-Fock self-consistent field method, molecular structure calculations, scattering theory computations, and solid-state computations.

Equivalent to PHYS 736/CHEM 736

Prerequisite(s): PHYS 502 and PHYS 613/ CSI 780, or permission of instructor.
Schedule Type: LEC
CSI 786 - Molecular Dynamics Modeling

Credits: 3
Not Repeatable for Credit
Offered by Computational and Data Sciences

Introduces simulation methods in physical chemistry sciences. Covers computational approaches to modeling molecular and condensed matter systems, including interatomic and molecular potentials, molecular dynamics, time averages, ensemble distributions, numerical sampling, thermodynamic functions, response theory, transport coefficients, and dynamic structure. Includes stochastic simulations such as Brownian motion, Langevin dynamics, Monte Carlo methods and random walks, and introduction to cellular automata.

Prerequisite(s): CSI 690 or equivalent, CSI 780 or CHEM 633/CSI 711, or permission of instructor.

Schedule Type: LEC

CSI 787 - Computational Materials Science

Credits: 3
Not Repeatable for Credit
Offered by Computational and Data Sciences

Covers selected topics in computational aspects of condensed matter, such as methods of electronic structure calculations, surface science, molecular clusters, lattice dynamics, nanomaterials, semiconductors, superconductivity, magnetism, Hubbard model, mesoscopic systems, and liquids.

Prerequisite(s): PHYS 512/CSI 687 and PHYS 736/CSI 783, or permission of instructor.

Schedule Type: LEC

CSI 788 - Simulation of Large-Scale Physical Systems

Credits: 3
Not Repeatable for Credit
Offered by Computational and Data Sciences

Study of diverse, large-scale physical systems with emphasis on modeling and simulation. Students will undertake several projects which will draw from such areas as many-body dynamics, atmospheric structure and dynamics, high-temperature plasmas, stellar structure, hydro dynamical systems, galactic structure and interactions, and cosmology.

Equivalent to PHYS 728

Prerequisite(s): PHYS 613/CSI 780 and CSI 700 or permission of instructor.

Schedule Type: LEC
CSI 789 - Topics in Computational Physics

Credits: 3
Not Repeatable for Credit
Offered by Computational and Data Sciences
Selected topics in computational physics not covered in fixed-content computational physics courses.

Prerequisite(s): Permission of instructor.
Notes: May be repeated for credit as needed.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CSI 796 - Directed Reading and Research

Credits: 1-6
Repeatable within Degree for Credit
Offered by Computational and Data Sciences

Reading and research on specific topic in computational sciences and informatics under direction of faculty member. May be repeated for a total of 6 credits.

Prerequisite(s): Permission of instructor.
Schedule Type: IND
Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0

CSI 798 - Research Project

Credits: 1-3
Repeatable within Degree for Credit
Offered by Computational and Data Sciences
Research project chosen and completed under guidance of a graduate faculty member, resulting in acceptable technical report. The course is accepted for credit toward the Master in Computational Science (COMP) and is not accepted for the PhD in Computational Sciences and Informatics (CSI).

Prerequisite(s): 12 graduate credits in the Master in Computational Science and permission of the graduate coordinator.
Schedule Type: IND
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
Grading: Satisfactory/No Credit

When Offered: Fall, Spring, Summer

CSI 799 - Master's Thesis

Credits: 1-6
Repeatable within Degree for Credit
Offered by Computational and Data Sciences
Project chosen and completed under guidance of graduate faculty member, resulting in acceptable technical report (master's thesis) and oral defense.

Prerequisite(s): 12 graduate credits, and permission of instructor.
Schedule Type: IND
Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0
Grading: Satisfactory/No credit only

CSI 819 - Quantum Information Science Topics

Credits: 3
Repeatable within Degree for Credit
Offered by Computational and Data Sciences
Selected topics in quantum information science not covered in fixed-content computational sciences courses.

Prerequisite(s): Permission of instructor.
Notes: Course may be repeated for credit as needed.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CSI 854 - Hyperspectral Imaging Applications

Credits: 3
Not Repeatable for Credit
Offered by Computational and Data Sciences
Includes advanced hyperspectral concepts, multisystems tradeoffs, data collection and processing systems, imaging radar systems, laser systems, data fusion, calibration and data compression techniques, remote sensing and U.S. national policy. Applications include environmental, homeland security, medical, military, disaster mitigation, agricultural, and transportation topics.

Equivalent to GGS 840

Prerequisite(s): CSI 753 or equivalent or permission of instructor.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
CSI 873 - Computational Learning and Discovery

Credits: 3  
Not Repeatable for Credit  
Offered by Computational and Data Sciences  
Presents modern ideas, theories, and methods for computational learning and discovery, along with relevant applications including medical diagnosis, Earth science data analysis, and neuronal modeling. Includes background elucidation of fundamental concepts in computational learning, addressing discovery of equations, theory of causality, and comparison with biological and cognitive models. Students make presentations on topics of their research interest and work on projects involving state-of-the-art systems.

Prerequisite(s): CS 580 or equivalent, or permission of instructor.  
Schedule Type: LEC  
Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0

CSI 876 - Measure and Linear Spaces

Credits: 3  
Not Repeatable for Credit  
Offered by Computational and Data Sciences  
Covers measure theory and integration, convergence theorems, and the theory of linear spaces and functional analysis, including normed linear spaces, inner product spaces, Banach and Hilbert spaces, Sobolev spaces, and reproducing kernels. Topics include wavelets, applications to stochastic processes, and nonparametric functional inference.

Equivalent to STAT 876  
Prerequisite(s): IT 776 or permission of instructor.  
Schedule Type: LEC  
Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0

CSI 877 - Geometric Methods in Statistics

Credits: 3  
Not Repeatable for Credit  
Offered by Computational and Data Sciences  
Develops foundations of geometric methods for statistics. Topics include n-dimension Euclidian geometry; projective geometry; differential geometry, including curves, surfaces, and n-dimensional differentiable manifolds; and computational geometry, including computation of convex hulls, tessellations of two-, three-, and n-dimensional spaces, and finite element grid generation. Examples include applications to scientific visualization.

Equivalent to STAT 877  
Prerequisite(s): STAT 751 or permission of instructor.  
Schedule Type: LEC
CSI 885 - Atomistic Modeling of Materials

Credits: 3
Not Repeatable for Credit
Offered by Computational and Data Sciences
Advanced course focusing on utilization of atomistic modeling and computer simulation techniques to analyze structure of crystalline materials. Introduces modern methodology of largescale atomistic simulations and provides hands-on experience through numerous examples and homework assignments based on simulation packages. Provides background knowledge on theory of lattice defects (point defects, interfaces, dislocations) and thermal and mechanical properties of solid materials (plastic deformation, fracture).

Prerequisite(s): CSI 685, 700, and 786; or permission of instructor.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CSI 888 - Topics in Quantum Systems

Credits: 3
Not Repeatable for Credit
Offered by Computational and Data Sciences
Selected topics in quantum systems in physics and chemistry not covered in fixed-content courses in quantum mechanics. Possible topics are new spectroscopic methods, density functional theory, energy transfer and fluorescence, nuclear magnetic resonance, Mossbauer spectroscopy, advanced computational considerations in atomic or molecular structure, nuclear scattering theory, quantum considerations in condensed matter problems, and quantum gravity.

Prerequisite(s): PHYS 736/CSI 783 or PHYS 732/CSI 784; or permission of instructor.
Notes: May be repeated for credit as needed.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CSI 898 - Research Colloquium in Computational Sciences and Informatics

Credits: 1
Repeatable within Term for Credit
Offered by Computational and Data Sciences
Presentations in specific research areas in computational sciences and informatics by faculty and staff members and professional visitors.

Notes: May be repeated for credit, but maximum 3 credits of CSI 898, 899, and 991 may be applied to PhD.
Schedule Type: SEM
CSI 899 - Colloquium in Computational Sciences and Informatics

Credits: 1
Repeatable within Term for Credit
Offered by Computational and Data Sciences
Presentations in specific research areas in computational sciences and informatics by faculty and staff members and professional visitors.

Notes: May be repeated for credit, but maximum 3 credits of CSI 898, 899, and 991 may be applied to PhD.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0
Grading: S/NC

CSI 909 - Advanced Topics in Computational Sciences and Informatics

Credits: 3
Not Repeatable for Credit
Offered by Computational and Data Sciences
Covers selected topics in computational sciences and informatics not covered in fixed-content courses.

Prerequisite(s): Permission of instructor.
Notes: May be repeated for credit as necessary.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CSI 971 - Probability Theory

Credits: 3
Not Repeatable for Credit
Offered by Computational and Data Sciences
A rigorous measure-theoretic treatment of probability. Includes expectation, distributions, laws of large numbers and central limit theorems for independent random variables, characteristic function convergence, and Markov chains.

Equivalent to STAT 971

Prerequisite(s): B- or higher in STAT 544 and C or higher in MATH 315.
Prerequisite(s) enforced by registration system.

Schedule Type: LEC
CSI 972 - Mathematical Statistics I

Credits: 3
Not Repeatable for Credit
Offered by Computational and Data Sciences
Focuses on theory of estimation, exploring method of moments, least squares, maximum likelihood, and maximum entropy methods. Details methods of minimum variance unbiased estimation. Other topics include sufficiency and completeness of statistics, Fisher information, Cramer-Rao bounds, Bhattacharyya bounds, asymptotic consistency and distributions, statistical decision theory, minimax and Bayesian decision rules, and applications to engineering and scientific problems.

Equivalent to STAT 972

Prerequisite(s): B- or higher in CSI 672/STAT 652 or equivalent and B- or higher in either CSI 876/IT 876/STAT 876 or IT 971/STAT 971.
Prerequisite(s) enforced by registration system.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CSI 973 - Mathematical Statistics II

Credits: 3
Not Repeatable for Credit
Offered by Computational and Data Sciences
Concentrates on theory of hypothesis testing. Topics include characterizing the decision process; simple versus simple hypothesis tests; Neyman Pearson Lemma; and uniformly most powerful, unbiasedness, invariance, randomized, and sequential tests. Applies testing principles to situations in normal distribution family and other families of distributions.

Equivalent to STAT 973

Prerequisite(s): B- or higher in CSI 972.
Prerequisite(s) enforced by registration system.

Notes: Continuation of CSI 972.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CSI 976 - Statistical Inference for Stochastic Processes

Credits: 3
Not Repeatable for Credit
Offered by Computational and Data Sciences
Covers modern theory of parameter estimation and hypothesis testing for stochastic processes, counting processes with random intensities, and solutions to stochastic differential equations driven by martingales. Considers applications to engineering, biology, and economics.

Equivalent to IT 976

Prerequisite(s): CSI 776 or permission of instructor.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CSI 978 - Statistical Analysis of Signals

Credits: 3
Not Repeatable for Credit
Offered by Computational and Data Sciences
Advanced course in analysis of discrete- and continuous-time signals using methods of stochastic differential equation and time series. Presumes familiarity with methods of harmonic analysis and times series modeling. Topics include state-space modeling and eigenvalue processing, nonlinear modeling of signals, non-Gaussian stochastic process structure, detection and estimation of vector-valued signals, robust signal detection, and array processing and target tracking.

Equivalent to IT 978

Prerequisite(s): STAT 544 and 658, or equivalent.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CSI 979 - Advanced Topics in Computational Statistics

Credits: 3
Repeatable within Degree for Credit
Offered by Computational and Data Sciences
Covers selected topics in computational statistics not covered in fixed-content computational statistics courses.

Prerequisite(s): Permission of instructor.
Notes: May be repeated for credit as needed.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CSI 986 - Advanced Topics in Large-Scale Physical Simulation

Credits: 3
Repeatable within Degree for Credit
Offered by Computational and Data Sciences
Covers simulation of physical systems not covered in fixed-content physical simulation courses.

**Prerequisite(s):** Permission of instructor.
**Notes:** May be repeated for credit as needed.

**Schedule Type:** LEC
**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0

---

**CSI 991 - Seminar in Scientific Computing**

Credits: 1
Repeatable within Term for Credit
Offered by Computational and Data Sciences
Considers selected topics in specific area of computational sciences and informatics not covered in fixed-content courses or as extension of fixed-content courses. Format for presentation is seminar with student participation.

**Notes:** May be repeated for credit, but maximum 3 credits of CSI 898, 899, and 991 may be applied to PhD.

**Schedule Type:** SEM
**Hours of Lecture or Seminar per week:** 1
**Hours of Lab or Studio per week:** 0
**Grading:** S/NC

---

**CSI 996 - Doctoral Reading and Research**

Credits: 1-6
Repeatable within Degree for Credit
Offered by Computational and Data Sciences
Reading and research on specific topic in computational sciences and informatics under direction of faculty member. May be repeated for a total of 6 credits.

**Prerequisite(s):** Admission to doctoral program, and permission of instructor.
**Schedule Type:** IND
**Hours of Lecture or Seminar per week:** 1-3
**Hours of Lab or Studio per week:** 0

---

**CSI 998 - Doctoral Dissertation Proposal**

Credits: 1-12
Repeatable within Term for Credit
Offered by Computational and Data Sciences

**Prerequisite(s):** Permission of advisor.
CSI 999 - Doctoral Dissertation

Credits: 1-12
Repeatable within Degree for Credit
Offered by Computational and Data Sciences
Involves doctoral dissertation research under direction of dissertation director.

Prerequisite(s): Admission to doctoral candidacy.
Notes: May be repeated as needed, but no more than 24 credits in CSI 998 and 999 may be applied to doctoral degree.

Computational Social Science (CSS)

Offered by the College of Science.

CSS 600 - Introduction to Computational Social Science

Credits: 3
Not Repeatable for Credit
Offered by Computational and Data Sciences
Graduate-level introduction to computational concepts, principles, and modeling approaches in social sciences, emphasizing simulations and elements of complexity theory as they apply to social phenomena. Survey includes systems dynamics, cellular automata, and agent-based models.

Schedule Type: SEM
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CSS 605 - Object-Oriented Modeling in Social Science

Credits: 3
Not Repeatable for Credit
Offered by Computational and Data Sciences
Presents and applies concepts and principles from object-based modeling paradigm. Emphasizes Unified Modeling Language (UML) to render structure and operation of complex social systems and processes.

**Prerequisite(s):** CSS 600, or approval by instructor and program director

**Corequisite(s):** CSS 600, or approval by instructor and program director

**Schedule Type:** SEM

**Hours of Lecture or Seminar per week:** 3

**Hours of Lab or Studio per week:** 0

**CSS 610 - Agent-based Modeling and Simulation**

Credits: 3
Not Repeatable for Credit
Offered by Computational and Data Sciences
Provides hands-on examination of agent-based models in social sciences by examining and experimenting with variety of social-simulation projects conducted in modeling environments such as Swarm, Repast, Ascape, and MASON (Multi-Agent Simulator of Networks and Neighborhoods).

**Prerequisite(s):** CSS 600, or permission of instructor

**Corequisite(s):** CSS 600, or permission of instructor

**Schedule Type:** SEM

**Hours of Lecture or Seminar per week:** 3

**Hours of Lab or Studio per week:** 0

**CSS 620 - Origins of Social Complexity**

Credits: 3
Not Repeatable for Credit
Offered by Computational and Data Sciences
Examines when, where, and how social complexity emerged in human societies, emphasizing long-term analysis and comparative information processing in four civilizations of the ancient world: West Asia, East Asia, Andean Peru, and Mesoamerica.

**Prerequisite(s):** CSS 600 or permission of instructor

**Schedule Type:** LEC

**Hours of Lecture or Seminar per week:** 3

**Hours of Lab or Studio per week:** 0

**CSS 625 - Complexity Theory in the Social Sciences**

Credits: 3
Not Repeatable for Credit
Offered by Computational and Data Sciences
Examines social phenomena including language, terrorism, the Internet, warfare, and wealth based on power laws and far-from-equilibrium nonlinear dynamics. Emphasizes data analysis, and modeling and interpreting complexity-theoretic dynamics.
CSS 630 - Comparative Computational Social Science

Credits: 3
Not Repeatable for Credit
Offered by Computational and Data Sciences
Applies comparative method for analyzing different types of computational models in the social sciences. Strong crossdomain and interdisciplinary emphasis akin to comparative economic systems, government, or linguistics.

Prerequisite(s): CSS 600, or permission of instructor
Corequisite(s): CSS 600, or permission of instructor

Schedule Type: SEM
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CSS 635 - Cognitive Foundations of Computational Social Science

Credits: 3
Not Repeatable for Credit
Offered by Computational and Data Sciences
Examines cognitive foundations and information processing in computational social agents and compares to human cognitive phenomena, including emotions, trust, and reciprocity. Emphasizes modeling project.

Prerequisite(s): CSS 600 and 610, or permission of instructor
Corequisite(s): CSS 600 and 610, or permission of instructor

Schedule Type: SEM
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CSS 640 - Human and Social Evolutionary Complexity

Credits: 3
Not Repeatable for Credit
Offered by Computational and Data Sciences
Examines long-term evolution of human and societal complexity from global and cross-cultural perspective with emphasis on computational aspects leading to today's globalization. Global history from the computational social science perspective.

Prerequisite(s): CSS 600, 620; and permission of instructor
CSS 643 - Land-Use Modeling Techniques and Applications

Credits: 3  
Not Repeatable for Credit  
Offered by Computational and Data Sciences  
Survey of literature on spatially explicit empirical models of land-use change. Hands-on experience developing and running simple models. Techniques include statistical models, mathematical programming models, cellular automata, agent-based models, and integrated models.

Prerequisite(s): CSS 600 or permission of instructor

CSS 645 - Spatial Agent-Based Models of Human-Environment Interactions

Credits: 3  
Not Repeatable for Credit  
Offered by Computational and Data Sciences  
Discusses key challenges in spatial modeling of human-environment interactions. Reviews agent-based modeling applications in urban and rural interactions, agriculture, forestry, and other areas. Hand-on development of simple ABM models. Investigates linkages between GIS and ABM.

Prerequisite(s): GGS 631 or CSS 600, or permission of instructor

Notes: CSS 600 may be taken concurrently.

CSS 650 - Physics Methods for Analyzing Social Complexity

Credits: 3  
Not Repeatable for Credit  
Offered by Computational and Data Sciences  
Surveys complexity theoretic tools including strange attractors, Ising models, correlation functions, ergodic theory, power spectra, meanfield theory, and renormalization group. Emphasizes application to social, economic, or political systems.

Prerequisite(s): CSS 600, and permission of instructor
Corequisite(s): CSS 600, and permission of instructor

Schedule Type: SEM
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CSS 655 - Social Systems Dynamics

Credits: 3
Not Repeatable for Credit
Offered by Computational and Data Sciences
Introduces systems dynamics modeling of social systems governed by levels/rates or stocks/flows processes, with applications to global modeling, terrorism, urban dynamics, organizations, and social and international conflict.

Prerequisite(s): CSS 600
Corequisite(s): CSS 600

Schedule Type: SEM
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CSS 665 - Complex Adaptive Systems in Public Policy

Credits: 3
Not Repeatable for Credit
Offered by Computational and Data Sciences
Students learn (i) basic concepts of complex adaptive systems (CAS) and how they can be applied to policy analysis, and (ii) how to use agent-based modeling as a tool for policy analysis. Address modeling issues on representing a system, agent decision making, validation, experiment design and analysis, as well as incorporating empirical data and methods to inform agent-based modeling.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

CSS 692 - Social Network Analysis

Credits: 3
Not Repeatable for Credit
Offered by Computational and Data Sciences
Methods and applications that examine complex social systems based on relations, structures, connectivity, matrix representations, location, roles, interactions, and other network properties. Applications to terrorism, cognition, organizations, and other social phenomena.

Prerequisite(s): CSS 600
Corequisite(s): CSS 600
CSS 695 - Agent-based Computational Economics

Credits: 3
Not Repeatable for Credit
Offered by Computational and Data Sciences
Present lectures on neoclassical economic theory as we investigate how to use agent technology to move beyond neoclassical specifications. Survey the most well known results in agent-based economics. Read and present papers that are at the research frontier. A semester long research project 1. Will be the focal point of weekly model development (coding), data analysis, and writing.

Prerequisite(s): CSS 610.
Undergraduate microeconomics.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

CSS 710 - Advanced Agent-based Modeling and Simulation

Credits: 3
Not Repeatable for Credit
Offered by Computational and Data Sciences
Cover topics related to large-scale agent models including how to 1) make use of available compute resources (CPU and memory) through threading and related code parallelization ideas and technologies; 2) sample data from large-scale models and calibrate/estimate such models, and 3) design experiments for models that are expensive to evaluate. Digress into other topics at the frontier of agent modeling.

Prerequisite(s): CSS 610.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

CSS 739 - Topics in Computational Social Science

Credits: 3
Repeatable within Degree for Credit
Offered by Computational and Data Sciences
Selected topics in computational social science not covered in fixed-content computational social science courses.

Prerequisite(s): Permission of instructor.
Notes: May be repeated for credit for up to 9 credits.
CSS 796 - Directed Reading and Research

Credits: 3
Repeatable within Degree for Credit
Offered by Computational and Data Sciences
Reading and research on specific topic in computational social science under direction of a faculty member.

Prerequisite(s): Permission of instructor.
Notes: May be repeated as necessary.

CSS 798 - Research Project

Credits: 3
Repeatable within Degree for Credit
Offered by Computational and Data Sciences
Project chosen and completed under guidance of graduate faculty member, resulting in acceptable technical report.

Prerequisite(s): 12 graduate credits from core requirements, and permission of instructor.
Schedule Type: IND
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
Grading: Graduate Special

CSS 898 - Research Colloquium in Computational Social Science

Credits: 1
Repeatable within Degree for Credit
Offered by Computational and Data Sciences
Presentations in specific research areas in computational social science by Center for Social Complexity-associated faculty and professional visitors.

Notes: May be repeated for credit, but maximum 3 credits of CSS 898 and 899 may be applied toward PhD.

Schedule Type: SEM
Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0
Grading: Satisfactory/No credit only
CSS 899 - Colloquium in Computational Social Science

Credits: 1
Repeatable within Degree for Credit
Offered by Computational and Data Sciences
Presentations in variety of areas of computational social science by Center for Social Complexity-associated faculty and professional visitors.

Notes: May be repeated for credit, but maximum 3 credits of CSS 898 and 899 may be applied toward PhD.

Schedule Type: SEM
Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0

CSS 909 - Advanced Topics in Computational Social Science

Credits: 3
Repeatable within Degree for Credit
Offered by Computational and Data Sciences
Covers selected topics in computational social science and socioinformatics not covered in fixed-content courses.

Prerequisite(s): Permission of instructor.
Notes: May be repeated for credit as necessary.

Schedule Type: SEM
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CSS 996 - Doctoral Reading and Research

Credits: 1-12
Repeatable within Degree for Credit
Offered by Computational and Data Sciences
Reading and research on specific topic in computational social science under direction of faculty member.

Prerequisite(s): Admission to doctoral program, and permission of instructor.
Notes: May be repeated as necessary.

Schedule Type: IND
Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 0

CSS 998 - Doctoral Dissertation Proposal
CSS 998 - Doctoral Proposal

Credits: 1-12
Repeatable within Degree for Credit
Offered by Computational and Data Sciences
Covers development of research proposal, which forms basis for doctoral dissertation, under guidance of dissertation director and doctoral committee.

Prerequisite(s): Permission of advisor.
Notes: Candidates must complete a combined minimum of 12 credits of doctoral proposal (CSS 998) and doctoral dissertation research (CSS 999), of which at least three credits must be of CSS 999. A combined maximum of 24 credits of CSS 998 and CSS 999 may be applied to the degree.

Schedule Type: IND
Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0
Grading: S/IP

CSS 999 - Doctoral Dissertation

Credits: 1-12
Repeatable within Degree for Credit
Offered by Computational and Data Sciences
Doctoral dissertation research under direction of dissertation director.

Prerequisite(s): Approval of dissertation proposal.
Notes: Candidates must complete a combined minimum of 12 credits of doctoral proposal (CSS 998) and doctoral dissertation research (CSS 999), of which at least three credits must be of CSS 999. A combined maximum of 24 credits of CSS 998 and CSS 999 may be applied to the degree.

Schedule Type: IND
Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0
Grading: S/IP

Computer Forensics (CFRS)

Offered by the Volgenau School of Engineering

CFRS 500 - Introduction to Forensic Technology and Analysis

Credits: 3
Not Repeatable for Credit
Offered by Electrical and Computer Engineering
Presents an overview of technologies of interest to forensics examiners. It will provide an introduction to, software, hardware, analysis, and other aspects required for forensic examinations.

Prerequisite(s): Graduate standing.
CFRS 510 - Digital Forensics Analysis

Credits: 3
Not Repeatable for Credit
Offered by Electrical and Computer Engineering
Explains computer forensics crime scene procedures, beginning with initial walk-through and evaluation; identification and collection of potential evidence; preparation of intrusion investigation; aspects of working with investigators and attorneys; reverse engineering with file identification and profiling; application of critical thinking in determination of significance of artifacts; and analysis and reporting of evidence.

Prerequisite(s): Graduate standing or permission of instructor

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

CFRS 590 - Special Topics in Computer Forensics

Credits: 3
Repeatable within Degree for Credit
Offered by Electrical and Computer Engineering
Presents selected topics from recent developments and applications in various computer forensics disciplines. Helps the professional computer forensics community keep abreast of current developments, and provides an applications-oriented introduction to emerging areas of computer forensics.

Prerequisite(s): Graduate standing or permission from department.
Notes: Repeatable for credit within the degree.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring, Summer

CFRS 660 - Network Forensics

Credits: 3
Not Repeatable for Credit
Offered by Electrical and Computer Engineering
Deals with the collection, preservation, and analysis of network-generated digital evidence such that the evidence can be successfully presented in a court of law (both civil and criminal). The relevant federal laws will be examined as well as private sector applications. The capture/intercept of digital evidence, the analysis of audit trails, the recording of running processes, and the reporting of such information will be examined.
CFRS 661 - Digital Media Forensics

Credits: 3
Not Repeatable for Credit
Offered by Electrical and Computer Engineering
Covers the collection, preservation, and analysis of digital media such that the evidence can be successfully presented in a court of law (both civil and criminal). The relevant federal laws and private sector applications will be examined, as well as the seizure, preservation, and analysis of digital media.

Equivalent to TCOM 661

Prerequisite(s): CFRS 500 and a working knowledge of computer operating systems (e.g. CS 471, IT 342, or equivalent).
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CFRS 663 - Operations of Intrusion Detection for Forensics

Credits: 3
Not Repeatable for Credit
Offered by Electrical and Computer Engineering
Introduces students to network and computer intrusion detection and its relation to forensics. Addresses intrusion detection architecture, system types, packet analysis, and products. Presents advanced intrusion detection topics such as intrusion prevention and active response, decoy systems, alert correlation, data mining, and proactive forensics.

Equivalent to TCOM 663

Prerequisite(s): TCOM 535 and a working knowledge of computer programming
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CFRS 664 - Incident Response Forensics

Credits: 3
Not Repeatable for Credit
Offered by Electrical and Computer Engineering
Addresses incident detection, response, and those aspects of computer forensics pertinent to the investigation of trade secret theft, economic espionage, copyright infringement, piracy, and fraud. Procedures for gathering, preserving, and analyzing forensic evidence are discussed in detail and are applied to both computer and network incident response forensics.
Equivalent to TCOM 664

Prerequisite(s): TCOM 535
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CFRS 698 - Independent Reading and Research

Credits: 1-3
Repeatable within Degree for Credit
Offered by Electrical and Computer Engineering
Studies selected area in computer forensics under the supervision of a faculty member. A written report is required.

Prerequisite(s): Graduate standing; completion of at least two core courses in the CFRS program; and permission of instructor
Notes: No more than a total of six credits may be taken from a combination of CFRS 698 and CFRS 798 for credit within the CFRS program.

Schedule Type: IND
Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring, Summer

CFRS 730 - Forensic Deep Packet Inspection

Credits: 3
Not Repeatable for Credit
Offered by Electrical and Computer Engineering
Presents tools, techniques, and methodologies used to conduct deep packet forensic analysis. Application of industry best practices to both the collection and subsequent analysis of network packets with an emphasis on hands-on exercises using various digital analytical tools.

Prerequisite(s): CFRS 660.
Notes: Course will consist of exercises conducted in a lab environment with concurrent lectures (combined total of 3 credits for lab and lecture exercises).

Schedule Type: LAB, LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

CFRS 760 - Legal and Ethical Issues in IT

Credits: 3
Not Repeatable for Credit
Offered by Electrical and Computer Engineering
Presents legal and ethics topics in the context of computer forensics. Includes legal principles, types of crimes, witness testimony, and forensics report writing.

Prerequisite(s): CFRS 500
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CFRS 761 - Malware Reverse Engineering

Credits: 3
Not Repeatable for Credit
Offered by Electrical and Computer Engineering
Reviews disassembled code for potentially malicious binary, or piece of malware, in order to gain a better understanding of how a binary functions when executed. Analyzes behavioral aspects as they are executed in a controlled environment. Environment changes (file, system, network, process, etc.), network communications, communications with remote devices, and so on, are closely observed for actionable information.

Prerequisite(s): CFRS 500 and CFRS 660.
Notes: Course will consist of exercises conducted in a lab environment with concurrent lectures (combined total of 3 credits for lab and lecture exercises).

Schedule Type: LAB,
LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

CFRS 762 - Mobile Device Forensics

Credits: 3
Not Repeatable for Credit
Offered by Electrical and Computer Engineering
Reviews forensic evidence contained within mobile devices, including address books, call logs, text messages, video files, audio files, and Internet history. Discusses procedures and technologies associated with mobile devices and how such procedures differ from traditional computer forensics. Analyzes collected data and correlates information with data from carriers. Hands-on exercises included.

Prerequisite(s): CFRS 500, CFRS 661.
Notes: Course will consist of exercises conducted in a lab environment with concurrent lectures (combined total of 3 credits for lab and lecture exercises).

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring
CFRS 763 - Registry Forensics - Windows

Credits: 3  
Not Repeatable for Credit  
Offered by Electrical and Computer Engineering  

Presents the concepts, tools, and techniques used for forensic collection, identification, and analysis of the Windows registry; review the structure and layout of the Windows registry and be introduced to the types of artifacts that can be found within; evaluate and interpret data from the Windows registry with emphasis on hand-on exercises.

Prerequisite(s): CFRS 500, CFRS 661.  
Notes: Course will consist of exercises conducted in a lab environment with concurrent lectures (combined total of 3 credits for lab and lecture exercises).

Schedule Type: LAB, LEC  
Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0  
When Offered: Fall, Spring

CFRS 764 - Mac Forensics

Credits: 3  
Not Repeatable for Credit  
Offered by Electrical and Computer Engineering  

Presents the basic tools and techniques used to conduct a Mac and iOS forensic analysis. Application of industry best practices to both the collection and subsequent analysis of Mac iOS systems with an emphasis on hands-on exercises using currently available open-source and commercial tools.

Prerequisite(s): CFRS 500, CFRS 661.  
Notes: Course will consist of exercises conducted in a lab environment with concurrent lectures (combined total of 3 credits for lab and lecture exercises).

Schedule Type: LEC  
Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0  
When Offered: Fall, Spring

CFRS 767 - Penetration Testing in Computer Forensics

Credits: 3  
Not Repeatable for Credit  
Offered by Electrical and Computer Engineering  

Presents the concepts, tools, and techniques used for penetration testing, vulnerability exploitation, assessment, reporting, and forensics; teaches multiple attack vectors as well as the defensive measures protecting against such attacks; focuses heavily on post attack forensics allowing for a complete picture of the attack process.

Prerequisite(s): CFRS 660, CFRS 663.  
Notes: Course will consist of exercises conducted in a lab environment with concurrent lectures (combined total of 3 credits for lab and lecture exercises).
CFRS 768 - Digital Warfare

Credits: 3
Not Repeatable for Credit
Offered by Electrical and Computer Engineering
Presents concepts of forensic attribution, context, and motivations behind computer attacks including those tied to cyber warfare and cyber terrorism activities. Tactics, techniques, and procedures of current cyber attacks will be addressed.

Prerequisite(s): CFRS 500, CFRS 660.

CFRS 769 - Anti-Forensics

Credits: 3
Not Repeatable for Credit
Offered by Electrical and Computer Engineering
Presents concepts of anti-forensics and obfuscation used in order to inhibit, frustrate, and mislead computer forensics examiners. Techniques, attempts, and actions used to negatively impact the existence, volume, or amount of evidence from digital repositories will be examined with goal of understanding and detecting anti-forensics.

Prerequisite(s): CFRS 500, CFRS 660.

CFRS 770 - Fraud and Forensics in Accounting

Credits: 3
Not Repeatable for Credit
Offered by Electrical and Computer Engineering
Prepares students to undertake forensic accounting, a specialty practice area of accounting, in order to develop the necessary expertise to be prepared to give expert evidence in any resultant trial.

Prerequisite(s): CFRS 500
CFRS 771 - Digital Forensic Profiling

Credits: 3
Not Repeatable for Credit
Offered by Electrical and Computer Engineering
Presents the application of criminal profiling to digital forensic evidence and cybercrime. Covers typologies of cyber criminals and reviews how the results of digital forensics can be used to profile individuals to better facilitate investigative interviews and prosecutions. Applies digital profiling to the identification of criminal behavior for insider threats and fraud.

Prerequisite(s): CFRS 500, CFRS 661.
Schedule Type: LAB,
LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

CFRS 772 - Forensic Artifact Extraction

Credits: 3
Not Repeatable for Credit
Offered by Electrical and Computer Engineering
Presents tools and techniques for the extraction and processing of digital artifacts from various media and formats. Foundations are presented and examples are developed for Windows, Linux, Mac, and media filesystems, files, RAM, Windows Registry, solid state devices, network traffic, and mobile devices. Emphasis on applications and hands-on exercises.

Prerequisite(s): CFRS 500, CFRS 661.
Notes: Course will consist of exercises conducted in a lab environment with concurrent lectures (combined total of 3 credits for lab and lecture.

Schedule Type: LAB,
LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

CFRS 773 - Mobile Application Forensics and Analysis

Credits: 3
Not Repeatable for Credit
Offered by Electrical and Computer Engineering
Presents mobile applications forensics and analysis. Analyze mobile applications on both the android and iPhone platforms in a lab environment in order to understand the weaknesses, pitfalls, and forensic challenges that exist or potentially exist when developing mobile client side software as well as identify forensic artifacts left behind from applications.
Prerequisite(s): CFRS 762.
Schedule Type: LAB, LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

CFRS 775 - Kernel Forensics and Analysis

Credits: 3
Not Repeatable for Credit
Offered by Electrical and Computer Engineering
Introduces students to low level programming analysis and low level API's. Students will learn the basics of kernel level device drivers, how to load and unload software from the kernel, modification of kernel objects, interrupt and call hooking and memory hiding techniques.

Prerequisite(s): CFRS 761.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Summer, Spring

CFRS 780 - Advanced Topics in Computer Forensics

Credits: 3
Repeatable within Term for Credit
Offered by Electrical and Computer Engineering
Teaches advanced topics from recent developments and applications in various areas of computer forensics. Enhances the professional engineering community's understanding of breakthrough developments in specific areas of computer forensics. Active participation of the students is encouraged in the form of writing and presenting papers in various research areas of the advanced topic.

Prerequisite(s): Permission of instructor
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CFRS 790 - Advanced Computer Forensics

Credits: 3
Not Repeatable for Credit
Offered by Electrical and Computer Engineering
Capstone course for the MS in computer forensics program. Students will be exposed to case studies and be required to conduct computer forensic investigations of digital media, intercepted packet switched data, and multisource log information to successfully complete each case study.

Prerequisite(s): CFRS 660, CFRS 661, and CFRS 663 or CFRS 664; minimum of 18 credits completed in the MS in Computer
Forensics Program prior to registration.

Notes: To be taken in the last year prior to the completion of degree requirement.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CFRS 798 - Research Project

Credits: 1-3
Repeatable within Degree for Credit
Offered by Electrical and Computer Engineering
Conduct a research project to be chosen and completed under guidance of a graduate faculty member that results in an acceptable technical report.

Prerequisite(s): Graduate standing; completion of at least two core courses and a minimum of 12 credits in the CFRS program; permission of instructor.
Notes: No more than a total of six credits may be taken from a combination of CFRS 698 and CFRS 798 for credit within the CFRS program.

Schedule Type: IND
Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring, Summer

Computer Game Design (GAME)

Offered by the College of Visual and Performing Arts

GAME 101 - Introduction to Game Design

Credits: 3
Not Repeatable for Credit
Offered by Computer Game Design
Introductory overview of the game development process with an emphasis on game design. Through detailed study of historical and current games, students will learn the language and structure needed to develop their own game ideas. Students will learn the many aspects of a game development team and how each of these roles contributes to a game's overall design.

Fulfills Mason Core requirement in arts.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring
GAME 210 - Basic Game Design

Credits: 3
Not Repeatable for Credit
Offered by Computer Game Design
Introduction to computer game design and development including a brief history of the field and current industry practice and production. Current major game design software, hardware, and associated tools are explored through simple game design projects.

Schedule Type: LEC, STU
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GAME 230 - History of Computer Game Design

Credits: 3
Not Repeatable for Credit
Offered by Computer Game Design
History of computer game design including games as a new medium for education, entertainment, and communications. Aspects of the business of computer game publishing, game criticism, storytelling, interactive fiction, violence, and virtual communities will be explored.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GAME 231 - Computer Animation for Games

Credits: 3
Not Repeatable for Credit
Offered by Computer Game Design
2D and 3D modeling, character design, and animation projects are constructed using commercial and proprietary software and game design tool kits and engines. Simple texturing and models rigging for game animation will be discussed.

Prerequisite(s): GAME 210 and GAME 230.
Schedule Type: STU
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GAME 232 - Online and Mobile Gaming

Credits: 3
Not Repeatable for Credit
Offered by Computer Game Design
Class covers the history, practice, and design of online and mobile games. Class will discuss the current state of the smartphone
applications and study the best practices to be successful in the applications market. Students will learn the development process for smartphone applications and develop original and innovative applications in a team-based environment.

**Prerequisite(s):** GAME 210 and GAME 230.

**Schedule Type:** LEC, STU

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**GAME 250 - Music for Film and Video**

Credits: 3  
Not Repeatable for Credit  
Offered by Computer Game Design  
Selection, editing, processing, and integration of sounds and music (post-production) for film, video, and animation. Time, frequency, and amplitude domain digital post-production techniques will be studied.

**Schedule Type:** LEC, STU  
**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**GAME 300 - Portfolio Preparation**

Credits: 1  
Not Repeatable for Credit  
Offered by Computer Game Design  
Student creates and refines a web portfolio to utilize throughout the course of study in presenting projects to aid in internship application and professional development.

**Notes:** Must have passed GAME 231 and GAME 232 with a C or better.

**Schedule Type:** LEC  
**Hours of Lecture or Seminar per week:** 1  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall, Spring

---

**GAME 310 - Game Design Studio**

Credits: 3  
Not Repeatable for Credit  
Offered by Computer Game Design  
Studio course that focuses on team-based game design. In collaboration with undergraduate students from VSITE's CS game design concentration, student teams design and develop complete computer-based and online serious and/or entertainment games.

**Prerequisite(s):** GAME 231 and GAME 232.
GAME 320 - Digital Painting for Games

Credits: 3
Not Repeatable for Credit
Offered by Computer Game Design
Students develop observational, sketching, and rendering skills in the digital medium. Students practice digital painting from reference and imagination as they create convincing game surfaces and simple concept drawings.

Prerequisite(s): GAME 231
AVT 323 or AVT 333.

GAME 330 - Computer Game Platform Analysis

Credits: 3
Not Repeatable for Credit
Offered by Computer Game Design
Current and prototype consumer gaming platforms and consoles. Analysis will include conversion, transposition, and porting game media among most commercially produced platforms for analysis and comparisons.

Prerequisite(s): GAME 310 and CS 112.
Corequisite(s): GAME 331.

GAME 331 - Consumer Gaming Platform Analysis Lab

Credits: 1
Not Repeatable for Credit
Offered by Computer Game Design
Current and prototype consumer gaming platforms and consoles. Analysis will include conversion, transposition, and porting game media among most commercially produced platforms for analysis and comparisons.

Prerequisite(s): GAME 310 and CS 112.
Corequisite(s): GAME 330.
GAME 332 - RS: Story Design for Computer Games

Credits: 3
Not Repeatable for Credit
Offered by Computer Game Design
Use of narrative structure and new media for designing computer game scenarios and stories. Traditional narrative techniques (text stories, novels, films) will be examined, as well as translations of the traditional to interactive, non-linear modes of communications. Analysis of current computer game story design theories, philosophies, and techniques will be covered.

Fulfills writing intensive requirement in the major.

Designated as a research and scholarship intensive course.

Prerequisite(s): Completion of 30 credits within major or permission of the instructor.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GAME 367 - Writing and Editing Music and Sound

Credits: 3
Not Repeatable for Credit
Offered by Computer Game Design
Composition, editing, processing, and integration of voice, environmental sounds and music into non-linear computer game environments. Special emphasis will be placed on HD sound and music post-production and mixing (3 & 5 transducer point listening spaces), sequential composition and sample-splicing techniques, and the study of competing compression algorithms for sound and music.

Prerequisite(s): C or higher in GAME 250.
Prerequisite(s) enforced by registration system.

Schedule Type: LEC,
STU
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GAME 398 - Advanced Game Design Animation

Credits: 3
Not Repeatable for Credit
Offered by Computer Game Design
Advanced 2D and 3D animation projects for interactive game scenes and scenarios are built using commercial and proprietary software and game design tool kits. Advanced texturing, rigging, lighting, and perspective manipulation will be covered.
Prerequisite(s): C or higher in GAME 231. Prerequisite(s) enforced by registration system.

Schedule Type: STU
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GAME 399 - Special Topics

Credits: 1-4
Repeatable within Term for Credit
Offered by Computer Game Design
In-depth presentation and exploration of topical studies in computer game design. Subject matter varies.

Notes: May be repeated for a maximum of 12 credits when taken under different topics.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 1-4
Hours of Lab or Studio per week: 0

GAME 400 - Game Design Practicum

Credits: 3
Not Repeatable for Credit
Offered by Computer Game Design
Studio/lecture course focuses on the design strengths and weaknesses inherent in current entertainment and serious games. UI design, level design and map structure, scoring stratum, on-line support, game ecologies, gaming communities, and designing/writing documentation and specifications will be studied.

Prerequisite(s): GAME 330, 367 or 398. Must be a Computer Game Design minor.
Schedule Type: LEC,
STU
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring

GAME 410 - Advanced Game Design Studio

Credits: 3
Not Repeatable for Credit
Offered by Computer Game Design
In collaboration with undergraduate students from VSITE's CS game design concentration, student teams design and develop complete computer-based and online serious and entertainment games.

Prerequisite(s): GAME 310, GAME 330 and GAME 331.
Schedule Type: STU
GAME 431 - Advanced Game Animation I

Credits: 3
Not Repeatable for Credit
Offered by Computer Game Design
Builds advanced 3D character animation skills. Students animate from reference using the principles of weight, follow through, and anticipation. Projects focus on creating interactive motions for characters using commercial software and game engines. Intermediate rigging will also be covered.

Prerequisite(s): GAME 398.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

GAME 489 - Pre-Internship Seminar

Credits: 1
Not Repeatable for Credit
Offered by Computer Game Design
Student prepares for interview and application processes associated with securing an internship, finishing the course with a professional resume and portfolio ready for submission to potential employers.

Schedule Type: SEM
Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring, Summer

GAME 490 - Senior Game Design Capstone

Credits: 3
Repeatable within Degree for Credit
Offered by Computer Game Design
Student develops a case study of a publicly or commercially published computer game exploring the technical, economic, ethical, social and political ramifications on its intended target market. A public lecture of the case study is required.

Fulfills Mason Core requirement in synthesis.

Prerequisite(s): Completion of 60 credits in major. Students must be granted permission by the program director to take the course.
Notes: Restricted to GAME majors. Students must be granted permission by the program director to take the course. Students are required to complete 6 credits for the degree program.

Schedule Type: LEC
GAME 491 - Internship

Credits: 3-4
Repeatable within Degree for Credit
Offered by Computer Game Design
Placement in an appropriate internship within a program approved by a federal, state or commercial game design/publishing agency or firm.

Prerequisite(s): GAME 489 and completion of 60 credits in major.
Notes: 135 hours of internship on-site work must be completed for 3 credits.
180 hours of internship on-site work must be complete for 4 credits.

Schedule Type: INT
Hours of Lecture or Seminar per week: 3-4
Hours of Lab or Studio per week: 0

GAME 492 - Independent Study

Credits: 1-6
Repeatable within Degree for Credit
Offered by Computer Game Design
Advanced research, computer game design, or exploration of topical studies in computer game design.

Notes: May be repeated for a maximum of 12 credits

Schedule Type: IND
Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 0

GAME 499 - Advanced Studies in Game Design

Credits: 1-4
Repeatable within Term for Credit
Offered by Computer Game Design
Exploration of various issues in computer game design, including theoretical aspects of games studies and production.

Prerequisite(s): Admittance to BFA Game Design Program or instructor permission.
Notes: Topics and credit vary with instructor. May be repeated when taken under different topics.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 1-4
When Offered: Fall, Summer, Spring
GAME 599 - Advanced Studies in Game Design

Credits: 1-4
Repeatable within Term for Credit
Offered by Computer Game Design
Explore various issues in computer game design, including theoretical aspects of games studies and production.

Prerequisite(s): Admittance to MA Game Design Program or instructor permission.
Notes: Topics and credit vary with instructor. May be repeated when taken under different topics.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 1-4
Hours of Lab or Studio per week: 0
When Offered: Fall, Summer, Spring

GAME 600 - Research Methodologies in Game Design

Credits: 3
Not Repeatable for Credit
Offered by Computer Game Design
Graduate seminar focusing on development of independent research project in student's area of emphasis. Explores principal methods of researching and documenting game design and game practice. Along with traditional methods of library research, emphasizes new processes of examination and investigation through the use of computer-aided research clouds and systems. Students will research and write a publishable paper following standard scientific research practice.

Prerequisite(s): Admittance to MA Game Design Program or instructor permission.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

GAME 605 - Game Design Graduate Seminar

Credits: 1
Repeatable within Degree for Credit
Offered by Computer Game Design
Students present their own research and projects, or the work of contemporary game designers for discussion and peer and faculty critiques. Special focus on developing professional public communication and presentation skills about contemporary issues in the game design and production fields.

Prerequisite(s): Admittance to MA Game Design Program or instructor permission.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring
GAME 610 - Game Production

Credits: 3
Repeatable within Degree for Credit
Offered by Computer Game Design
Studio and lecture course in the history, practice and design and production of computer games with an emphasis on serious games development. Students will research, design and develop a fully functioning game, for desktop, console, and/or mobile platforms in this two-semester course. This course will also support the thesis research and project development.

Prerequisite(s): Admittance to the MA Game Design Program or permission of instructor.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

GAME 617 - Teaching Practicum

Credits: 3
Not Repeatable for Credit
Offered by Computer Game Design
Supervised classroom teaching in Mason's Computer Game Design undergraduate program, or summer Game-focused Potomac Academy Program.

Prerequisite(s): GAME 605 and 3 credits of GAME 610.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

GAME 626 - Game Business, Entrepreneurship and Practice

Credits: 3
Not Repeatable for Credit
Offered by Computer Game Design
Combined lecture and studio course in discovering and developing entrepreneurial skill sets in the game design, production and publishing industry. Special focus will be given to developing communication skills, planning strategies, and nurturing the aptitude and attitudes that enable students to creatively solve problems, identify opportunities, and execute those opportunities in the game design and production industry.

Prerequisite(s): GAME 605 and GAME 610.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring

GAME 628 - Advanced Game Art
GAME 630 - Advanced Game Animation

Credits: 3
Not Repeatable for Credit
Offered by Computer Game Design
Combined Studio and Lecture course in creating advanced animations for interactive games, with an emphasis on realtime characters. Non-bipedal motions, rotoscoping, rigging, and other advanced topics in animation will also be explored.

Prerequisite(s): Admittance to the MA Game Design Program or permission of instructor.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring

GAME 635 - Issues in Interactive Entertainment

Credits: 3
Not Repeatable for Credit
Offered by Computer Game Design
Studio and lecture course in advanced design concepts for interactive game and entertainment platforms and systems. Microsoft's Kinect, Nintendo's Wii U, and Apple's AirPlay Mirroring will be studied.

Prerequisite(s): GAME 600, GAME 605 and 3 credits of GAME 610.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

GAME 638 - Game Studio Management

Credits: 3
Not Repeatable for Credit
Offered by Computer Game Design
Lecture Courses in managerial responsibilities and issues concerning successfully managing a small to mid-size game design
studio in today's game industry marketplace.
Human resources and personnel management, investor relations and board management, contract negotiations and development analysis, game design and production team oversight, research and development, budget management and realistic financial projections will be covered.

Prerequisite(s): GAME 610 and GAME 626.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

GAME 650 - Advanced Music and Sound for Games

Credits: 3
Not Repeatable for Credit
Offered by Computer Game Design
Combined studio and lecture course that will focus on the composition, editing, processing, mixing, and integration of sound assets, such as sfx, narration, and music into computer games. Time, frequency, and amplitude domain digital production and post-production techniques will be reviewed. Standard 2-channel, and 5.1 channel post-production/mixing, as well as contemporary middleware sound management applications will be studied.

Prerequisite(s): Admittance to the MA Game Design Program or permission of instructor.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

GAME 658 - Interactive Game Systems Design

Credits: 3
Not Repeatable for Credit
Offered by Computer Game Design
Studio and lecture course in advanced interactive games and simulations. A variety of entertainment platforms, systems, and their unique input devices will be explored, including augmented reality, social networks, and motion controllers. Games developed will use the latest online, mobile, and console platforms, as well as non-commercial prototype platforms.

Prerequisite(s): GAME 635.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

GAME 710 - Graduate Internship

Credits: 3
Not Repeatable for Credit
Offered by Computer Game Design
This course prepares students to succeed in the game design industry by assisting their placement in an appropriate internship within a program approved public or commercial game design/publishing agency or firm. A total of 180 hours of internship on-site work must be earned within the semester of registration. Each student is assigned a program internship coordinator, and an on-site internship supervisor.

**Prerequisite(s):** GAME 610 and GAME 617 and permission of Program Director.

**Schedule Type:** INT

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall, Spring

### GAME 796 - Directed Reading

**Credits:** 1  
Repeatable within Degree for Credit  
Offered by Computer Game Design  

Directed Reading must be taken in the fall of year two. Prior to the end of the first year, each student must identify a faculty member, based on interest and chosen topic that will serve as the student's faculty mentor for the thesis research and writing, or project development process. Students should also plan to devote the summer between the two academic years of study to focused preliminary reading and research for the thesis paper or project.

**Prerequisite(s):** GAME 600 and GAME 605.  
**Notes:** Directed Reading is overseen by the chosen faculty mentor, and will be tailored to each student's original thesis research paper or project.

**Schedule Type:** LEC  
**Hours of Lecture or Seminar per week:** 1  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall, Spring

### GAME 797 - Proposal Writing

**Credits:** 1  
Repeatable within Degree for Credit  
Offered by Computer Game Design  

Proposal Writing is overseen by the chosen faculty mentor, and will be tailored to each student's original thesis research paper or project. Prior to the end of the first year, each student must identify a faculty member, based on interest and chosen topic that will serve as the student's faculty mentor for the Proposal Writing course to prepare for the thesis writing, or project development process.

**Prerequisite(s):** GAME 796.  
**Schedule Type:** LEC  
**Hours of Lecture or Seminar per week:** 1  
**Hours of Lab or Studio per week:** 0  
**Grading:** Satisfactory/No credit.  
**When Offered:** Fall, Spring
GAME 798 - Project and Applied Research

Credits: 3  
Repeatable within Degree for Credit  
Offered by Computer Game Design  
The research project and supporting written document must reflect original research, development, and production of a complete serious game for graduate level work.  
The graduate project will involve a study of historical practice, and suitable for a public viewing experience and presentation.  
The written component will support the evolution of the creative process, the historical context of the work, the intended purpose and intent, all supported with scholarly citations and references. Faculty mentors will guide the project development process.

Prerequisite(s): Permission of Graduate Faculty Mentor.  
Schedule Type: LEC  
Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0  
Grading: Satisfactory/No Credit  
When Offered: Fall, Spring

GAME 799 - Thesis

Credits: 4  
Not Repeatable for Credit  
Offered by Computer Game Design  
The thesis project and or written document must reflect original research, analysis, and writing appropriate for graduate level work. The thesis written document should be between 85-100 pages in length, following university library standards of format for graduate thesis. If a thesis project is chosen, the project should compose a complete game design document, a completed and QA tested functional game using a commercially available engine, and a public presentation. Faculty mentors will guide the thesis development process for each student.

Prerequisite(s): Permission of Graduate Faculty Mentor.  
Schedule Type: LEC  
Hours of Lecture or Seminar per week: 4  
Hours of Lab or Studio per week: 0  
Grading: Satisfactory/No Credit  
When Offered: Spring

Computer Science (CS)

Offered by the Volgenau School of Engineering

Students may attempt an undergraduate course taught by the Volgenau School of Engineering twice. A third attempt requires approval of the department offering the course.

CS 100 - Principles of Computing

Credits: 3  
Limited to 2 Attempts
Offered by Computer Science
This course is intended to help students learn to think in the manner necessary to fully grasp the nature and power of the digital world around us. The early era of the Internet and the personal computer led to the need for "computer literacy." Now, the changing nature of our global society requires that students learn new ways to think about problems and how to solve them, regardless of students' specific fields of endeavor. Through this course, students will explore major issues related to the "big ideas" of computational thinking (namely, (i) Creativity, (ii) Abstraction, (iii) Data, (iv) Algorithms, (v) Programming, (vi) Internet, and (vii) Societal Impact), as well as how these issues will impact their future lives.

Fulfills Mason Core requirement in information technology (all).

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CS 101 - Preview of Computer Science

Credits: 2
Limited to 2 Attempts
Offered by Computer Science
Offers a broad overview of computer science designed to provide students with an introduction to the field of computer science and an orientation to the Computer Science department and the computing environment at the university. Includes a project to introduce problem solving using computers.

Prerequisite(s) enforced by registration system.

Corequisite(s): CS 112.

Notes: All computer science majors are required to take this course within their first year.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 0
Grading: Satisfactory/No Credit

CS 105 - Computer Ethics and Society

Credits: 1
Limited to 2 Attempts
Offered by Computer Science
Intensive introduction to legal, social, and ethical issues surrounding software development and computer use. Stresses professional conduct, social responsibility, and rigorous standards for software testing and reliability. Examines issues such as liability, ownership of information, and computer crime.

Fulfills Mason Core requirement in information technology (ethics only).

Schedule Type: LEC
Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0
CS 112 - Introduction to Computer Programming

Credits: 4
Limited to 2 Attempts
Offered by Computer Science
Rigorous introduction to problem solving through development of computer programs. Focuses on identifying algorithmic patterns in problems, describing problem solutions in high-level pseudocode, then implementing in a procedural programming language. Basic programming concepts are covered in detail including expressions, control structures, simple data types, and input/output. Program testing and debugging are discussed to verify that problems are solved correctly.

Fulfills Mason Core requirement in information technology (all except ethics).

Prerequisite(s): C or better in MATH 104 or MATH 105 or specified score on math placement test, or MATH 113 with a C or better.
Prerequisite(s) enforced by registration system.

Schedule Type: LAB, LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 1
Grading: Undergraduate Special

CS 211 - Object-Oriented Programming

Credits: 3
Limited to 2 Attempts
Offered by Computer Science
Thorough treatment of programming according to object-oriented principles. Introduces classes, interfaces, inheritance, polymorphism, and single dispatch as means to decompose problems. Covers intermediate programming techniques including error handling through exceptions, arrangement of source code into packages, and simple data structures. Intermediate debugging techniques and unit testing are covered.

Prerequisite(s): Grade of C or better in CS 112.
Prerequisite(s) enforced by registration system.

Schedule Type: LAB, LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 1
Grading: Undergraduate Special

CS 222 - Computer Programming for Engineers

Credits: 3
Limited to 2 Attempts
Offered by Computer Science
Introduction to C as a second programming language with emphasis on problems and language features relevant to engineers. Topics include basic data types, pointers, elementary data structures, file/output, bitwise operations, and Unix commands for compilation and debugging.
Prerequisite(s): Grade of C or better in CS 112.
Prerequisite(s) enforced by registration system.

Notes: Intended as terminal course in computer programming.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CS 225 - Culture and Theory of Games

Credits: 3
Limited to 2 Attempts
Offered by Computer Science
Explores the theory, history, culture, and lore of games with particular emphasis on the varieties of computer game environments.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CS 261 - Introduction to a Second Language

Credits: 1
Limited to 2 Attempts
Offered by Computer Science
Advanced programming using Java programming language. Other languages may be offered at times.

Prerequisite(s): Grade of C or better in CS 211.
Notes: Not available for credit for CS majors.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0

CS 262 - Introduction to Low-Level Programming

Credits: 2
Limited to 2 Attempts
Offered by Computer Science
Introduction to the language C, as well as operating system concepts, in UNIX, to prepare students for topics in systems programming.

Prerequisite(s): Grade of C or better in CS 211 or CS 222.
Prerequisite(s) enforced by registration system.

Schedule Type: LAB,
CS 306 - Synthesis of Ethics and Law for the Computing Professional

Credits: 3
Limited to 2 Attempts
Offered by Computer Science
Practical course to become effective computer professional. Examines legal and ethical issues surrounding computer technology and its use, as well as the foundation building that is necessary to deal with those challenges. Applies philosophical bases for ethical decision making to modern concerns raised by computers and technology. Addresses topics covered by CS 105 in a more intensive manner and focuses on the emerging legal and ethical issues involved in e-commerce and widespread use of the Internet.

Fulfills Mason Core requirement in synthesis.

Fulfills writing intensive requirement in the major.

Prerequisite(s): C or higher in CS 105; (COMM 100, and ENGH 302) or (HNRS 110 and HNRS 122, 130, 131, 230 or 240); junior standing (at least 60 credit hours).
Prerequisite(s) enforced by registration system.

Corequisite(s): All required Mason Core courses.

Notes: Computer science majors may use this course to satisfy the Mason Core synthesis requirement, so long as they have not previously taken CS 305 for credit.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CS 310 - Data Structures

Credits: 3
Limited to 2 Attempts
Offered by Computer Science
Focuses on object-oriented programming with an emphasis on tools and techniques for developing moderate to large programs. Topics include use and implementation of linear and nonlinear data structures and the design and analysis of elementary algorithms.

Prerequisite(s): Grade of C or better in CS 211 and MATH 113.
Prerequisite(s) enforced by registration system.

Corequisite(s): CS 105.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
CS 321 - Software Engineering

Credits: 3
Limited to 2 Attempts
Offered by Computer Science
An introduction to concepts, methods, and tools for the creation of large-scale software systems. Methods, tools, notations, and validation techniques to analyze, specify, prototype, and maintain software requirements. Introduction to object-oriented requirements modeling, including use of case modeling, static modeling, and dynamic modeling using the Unified Modeling Language (UML) notation. Concepts and methods for the design of large-scale software systems. Fundamental design concepts and design notations are introduced. A study of object-oriented analysis and design modeling using the UML notation. Students participate in a group project on software requirements, specification, and object-oriented software design.

Fulfills writing intensive requirement in the major.

Prerequisite(s): Grade of C or better in CS 310 and ENGH 302. Students who have received credit for CS 421 or SWE 421 may not take CS 321.
Prerequisite(s) enforced by registration system.

Notes: CS 321 is restricted to students in the Applied Computer Science, Computer Science, or Systems Engineering Bachelor's programs or the Computer Science or Software Engineering minors.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CS 325 - Introduction to Game Design

Credits: 3
Limited to 2 Attempts
Offered by Computer Science
Game design, in various electronic entertainment technologies, involves a diverse set of skills and backgrounds from narrative and art to computer programming. Surveys the technical aspects of the field, with an emphasis on programming.

Prerequisite(s): Grade of C or better in CS 211.
Prerequisite(s) enforced by registration system.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CS 330 - Formal Methods and Models

Credits: 3
Limited to 2 Attempts
Offered by Computer Science
Abstract concepts that underlie much advanced work in computer science, with major emphasis on formal languages, models of computation, logic, and proof strategies.
Prerequisite(s): Grade of C or better in CS 211 and MATH 125. Prerequisite(s) enforced by registration system.

Notes: CS 330 is restricted to students in the Applied Computer Science, Computer Science, or Systems Engineering Bachelor's programs or the Computer Science or Software Engineering minors.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CS 332 - Object-Oriented Software Design and Implementation

Credits: 3
Limited to 2 Attempts
Offered by Computer Science
In-depth study of software design and implementation using a modern, object-oriented language with support for graphical user interfaces and complex data structures. Topics covered will be specifications; design patterns; and abstraction techniques; including typing, access control, inheritance, and polymorphism. Students will learn the proper engineering use of techniques such as information hiding, classes, objects, inheritance, exception handling, event-based systems, and concurrency.

Equivalent to SWE 332

Prerequisite(s): Grade of C or better in CS 310. Prerequisite(s) enforced by registration system.

schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CS 351 - Visual Computing

Credits: 3
Limited to 2 Attempts
Offered by Computer Science
Focuses on programming essential mathematical and geometric concepts underlying computer graphics. Covers fundamental topics in computational geometry, 3D modeling, graphics algorithms, and graphical user interfaces using both 2D and 3D implementations. Reinforces object-oriented programming practices.

Prerequisite(s): C or better in CS 262 and CS 310. Prerequisite(s) enforced by registration system.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CS 367 - Computer Systems and Programming
Introduces students to computer systems from a programmer's perspective. Topics include data representation, assembly and machine-level representation of high-level language programs, the memory hierarchy, linking, exceptions, interrupts, processes and signals, virtual memory, and system-level I/O. Foundation for courses on compilers; networks; operating systems; and computer architecture, where a deeper understanding of systems-level issues is required.

Prerequisite(s): Grade of C or better in CS 262 or 222 and ECE 301 or 331.
Prerequisite(s) enforced by registration system.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CS 390 - Research and Project Design Principles in Computing

This course introduces students to the research and project design process within the computing field. Students will learn about the tools of the trade, work through design principles beginning with the articulation of a question, reviewing methods of exploration, gathering evidence, communicating results, and assessing and evaluating research or project outcomes.

Prerequisite(s): C or better in CS 262; CS 310 and CS 321 highly recommended.
Prerequisite(s) enforced by registration system.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CS 391 - Advanced Programming Lab

Programming-intensive lab course. Students refine problem-solving and programming skills while gaining experience in teamwork. Focuses on data structures, recursion, backtracking, dynamic programming, and debugging. Central focus is applying familiar and new algorithms and data structures to novel circumstances.

Corequisite(s): Grade of C or better in CS 310 and permission of instructor.

Schedule Type: LAB
Hours of Lecture or Seminar per week: 1-4
Hours of Lab or Studio per week: 1

CS 425 - Game Programming I
Credits: 3
Limited to 2 Attempts
Offered by Computer Science
Introduction to technologies and techniques used in modern computer games. Teams will explore the various facets of a complete design using sophisticated tools. Includes a project in which a game is prototyped; this prototype and initial design will serve as the starting point for the project in CS 426.

**Prerequisite(s):** Grade of C or better in CS 310 and CS 351.
Prerequisite(s) enforced by registration system.

**Schedule Type:** LEC
**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0

---

**CS 426 - Game Programming II**

Credits: 3
Limited to 2 Attempts
Offered by Computer Science
Project-orientated continuation of CS 425 with an emphasis on the implementation of a complete game.

**Prerequisite(s):** Grade of C or better in CS 325 and CS 425.
Prerequisite(s) enforced by registration system.

**Schedule Type:** LEC
**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0

---

**CS 440 - Language Processors and Programming Environments**

Credits: 3
Limited to 2 Attempts
Offered by Computer Science
Survey of basic programming language processors and software development tools such as assemblers, interpreters, and compilers. Topics include design and construction of language processors, formal syntactic definition methods, parsing techniques, and code-generation techniques.

**Prerequisite(s):** Grade of C or better in CS 310, 330, and 367.
Prerequisite(s) enforced by registration system.

**Schedule Type:** LEC
**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0

---

**CS 444 - Introduction to Computational Biology**
CS 445 - Computational Methods for Genomics

Credits: 3
Limited to 2 Attempts
Offered by Computer Science
Fundamental principles and techniques for implementing computational algorithms to solve problems in biology arising from the need to process large volumes of genomic information. Topics include sequence analysis, alignment, and assembly, gene prediction, and knowledge-based protein structure prediction. Projects involve designing and programming basic alignment and prediction methods.

Prerequisite(s): C or better in CS 310 and STAT 344.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CS 450 - Database Concepts

Credits: 3
Limited to 2 Attempts
Offered by Computer Science
Covers basics to intermediate knowledge for the design, implementation, and use of relational database systems. Topics include the Entity-Relationship (ER) and Entity-Enhanced Relationship (EER) models for database design, Relational Algebra (RA), Structured Query Language (SQL), SQL programming techniques, functional dependencies and normalization, object and object-relational databases, and security. Students will practice to design, develop, and implement a relational ORACLE database and use the database for queries, transaction processing, and report generation.

Prerequisite(s): Grade of C or better in CS 310 and 330.
Prerequisite(s) enforced by registration system.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CS 451 - Computer Graphics
Basic graphics principles and programming. Topics include scan conversion, transformation, viewing, lighting, blending, texture mapping, and some advanced graphics techniques.

Prerequisite(s): Grade of C or better in MATH 203, CS 310, and CS 367. Prerequisite(s) enforced by registration system.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CS 455 - Computer Communications and Networking

Data communications and networking protocols, with study organized to follow layers of Internet Protocol Suite (TCP/IP family of protocols). Topics include role of various media and software components, local and wide area network protocols, network performance, and emerging advanced commercial technologies.

Prerequisite(s): Grade of C or better in CS 310 and 367, and STAT 344. Prerequisite(s) enforced by registration system.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CS 463 - Comparative Programming Languages

Key programming mechanisms described independently of particular machines or languages, including control, binding, procedural abstraction, types, and concurrency. Includes basic programming competence in several different types of programming languages, including a language that provides concurrency.

Equivalent to CS 363 (2013-2014 Catalog).

Prerequisite(s): C or better in CS 330 and CS 367. Prerequisite(s) enforced by registration system.

Notes: Students who have taken CS 363 may not receive credit for CS 463.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
CS 465 - Computer Systems Architecture

Credits: 3
Limited to 2 Attempts
Offered by Computer Science
Computer subsystems and instruction set architectures. Single-cycle, multiple-cycle, and pipeline architectures. Memory hierarchy, cache, and virtual memory input-output processing.

Prerequisite(s): Grade of C or better in CS 367.
Prerequisite(s) enforced by registration system.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CS 468 - Secure Programming and Systems

Credits: 3
Limited to 2 Attempts
Offered by Computer Science
Fundamental principles and techniques for implementing secure computer systems. Topics include security and cryptography basics, vulnerability analysis, secure software development, and distributed system security. Projects involve designing and programming basic security tools, secure programs, and distributed systems.

Prerequisite(s): Grade of C or better in CS 310 and CS 367.
Prerequisite(s) enforced by registration system.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CS 469 - Security Engineering

Credits: 3
Limited to 2 Attempts
Offered by Computer Science
Covers the software subsystems that are involved in defending computer systems. Studies threats and architecting solutions against them, including but not limited to access control and identity management, network and system security, intrusion detection and recovery systems, monitoring and forensic systems.

Prerequisite(s): C or better in CS 330, CS 367, and STAT 344.
Prerequisite(s) enforced by registration system.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
CS 471 - Operating Systems

Credits: 3
Limited to 2 Attempts
Offered by Computer Science
Issues in multiprogramming. Covers concurrent processes and synchronization mechanisms; processor scheduling; memory, file, I/O, and deadlock management; performance of operating systems; and projects dealing with synchronization in multiprogrammed OS and virtual memory management.

Prerequisite(s): C or better in CS 310 and (CS 367 or ECE 445).
Prerequisite(s) enforced by registration system.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CS 475 - Concurrent and Distributed Systems

Credits: 3
Limited to 2 Attempts
Offered by Computer Science
Practical issues in designing and implementing concurrent and distributed software. Topics include concurrent programming, synchronization, multithreading, local and wide-area network protocols, distributed computation, systems integration, and techniques for expressing coarsegrained parallelism at the application level. Projects involve network programming at application level.

Prerequisite(s): Grade of C or better in CS 310 and 367.
Prerequisite(s) enforced by registration system.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CS 477 - Mobile Application Development

Credits: 3
Limited to 2 Attempts
Offered by Computer Science
This project based course will teach fundamental principles of software development for the mobile device environment, emphasizing the application of numerous academic concepts and the new design and programming paradigms that stem from the use of mobile devices. Topics include user interfaces, event-based programming, interprocess communications, networking, mobile-specific capabilities and performance in a resource restricted environment.

Prerequisite(s): C or better in CS 310 and CS 367.
Prerequisite(s) enforced by registration system.

Schedule Type: LEC
**CS 480 - Introduction to Artificial Intelligence**

Credits: 3  
Limited to 2 Attempts  
Offered by Computer Science  
Principles and methods for knowledge representation, reasoning, learning, problem solving, planning, heuristic search, and natural language processing and their application to building intelligent systems in a variety of domains. Uses LISP, PROLOG, or expert system programming language.

Prerequisite(s): Grade of C or better in CS 310 and 330.  
Prerequisite(s) enforced by registration system.

Schedule Type: LEC  
Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0

**CS 482 - Computer Vision**

Credits: 3  
Limited to 2 Attempts  
Offered by Computer Science  
Basic principles of visual perception and their implementation on computer systems. Topics include early visual processing, edge detection, segmentation, intrinsic images, image modeling, representation of visual knowledge, and image understanding. Students complete projects involving real images.

Prerequisite(s): Grade of C or better in CS 310, MATH 203 and STAT 344  
Prerequisite(s) enforced by registration system.

Schedule Type: LEC  
Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0

**CS 483 - Analysis of Algorithms**

Credits: 3  
Limited to 2 Attempts  
Offered by Computer Science  
Analyzes computational resources for important problem types by alternative algorithms and their associated data structures, using mathematically rigorous techniques. Specific algorithms analyzed and improved.

Prerequisite(s): Grade of C or better in CS 310, CS 330 and MATH 125.  
Prerequisite(s) enforced by registration system.

Schedule Type: LEC
CS 484 - Data Mining

Credits: 3
Limited to 2 Attempts
Offered by Computer Science
Basic principles and methods for data analysis and knowledge discovery. Emphasizes developing basic skills for modeling and prediction and performance evaluation. Topics include system design; data quality, preprocessing, and association; event classification; clustering; biometrics; business intelligence; and mining complex types of data.

Prerequisite(s): Grade of C or better in CS 310 and STAT 344.
Prerequisite(s) enforced by registration system.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CS 485 - Autonomous Robotics

Credits: 3
Limited to 2 Attempts
Offered by Computer Science
Covers various basic topics in autonomous robotics, such as autonomous architectures and their interaction with physical hardware, elementary kinematics and robot control, motion and trajectory planning, localization, task planning, learning and adaptation, modeling, and sensor fusion. Includes projects involving physical robots.

Prerequisite(s): CS 262, CS 310, MATH 203 or permission of the instructor.
Prerequisite(s) enforced by registration system.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CS 490 - Design Exhibition

Credits: 3
Repeatable within Degree for Credit
Offered by Computer Science
Capstone course focusing on design and successful implementation of major software project, encompassing broad spectrum of knowledge and skills, developed by team of students. Requires final exhibition to faculty-industry panel.

Prerequisite(s): Grade of C or better in CS 321, CS 483; two other CS 400-level courses; and senior standing.
Prerequisite(s) enforced by registration system.

Schedule Type: LEC
CS 498 - Independent Study in Computer Science

Credits: 1-3
Repeatable within Term for Credit
Offered by Computer Science
Research and analysis of selected problems or topics in computer science. Topic must be arranged with instructor and approved by department chair before registering.

Prerequisite(s): 60 credits, major in computer science, and permission of instructor.
Notes: May be repeated for maximum 6 credits if topics substantially different.

Schedule Type: IND
Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0

CS 499 - Special Topics in Computer Science

Credits: 3
Repeatable within Term for Credit
Offered by Computer Science
Topics of special interest to undergraduates.

Prerequisite(s): 60 credits and permission of instructor; specific prerequisites vary with nature of topic.
Notes: May be repeated for maximum 6 credits if topics substantially different.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CS 504 - Principles of Data Management and Mining

Credits: 3
Not Repeatable for Credit
Offered by Computer Science

Prerequisite(s): Graduate Standing.
Notes: This course cannot be taken for credit by students of the MS CS, MS ISA, MS SWE, CS PhD or IT PhD programs.

Schedule Type: LEC
CS 530 - Mathematical Foundations of Computer Science

Credits: 3
Not Repeatable for Credit
Offered by Computer Science
This course focuses on the topics of basic mathematical structures, mathematical logic and probability theory; and application of these concepts to problem solving and formal reasoning through hand-on practice with the use of computational tools.

Prerequisite(s): MATH 125 and STAT 344.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CS 531 - Fundamentals of Systems Programming

Credits: 3
Not Repeatable for Credit
Offered by Computer Science
Introduces systems and network programming for UNIX and Windows using lectures and hands-on labs. Covers ANSI C programming, system libraries and APIs, forking and threads, interprocess communications, synchronization, Windows API, and code debugging

Prerequisite(s): CS 310 or equivalent
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CS 540 - Language Processors

Credits: 3
Not Repeatable for Credit
Offered by Computer Science
Basic programming language processors such as assemblers, interpreters, and compilers. Topics include design and construction of language processors, formal syntactic definition methods, parsing techniques, and code generation techniques. Lab includes construction of language processors and experience with programming environments.

Prerequisite(s): MATH 125 and CS 310 and CS 330 and CS 465.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
CS 550 - Database Systems

Credits: 3
Not Repeatable for Credit
Offered by Computer Science
An introduction to database management with focus on architecting databases and using them in applications. Topics to be covered include: data modeling with the Entity-Relationship model, the relational data model and its formal languages, SQL, the theory of database design, object databases, XML and Web data.

Prerequisite(s): (CS 310 and CS 330) or (INFS 501 and INFS 515 and INFS 519 and SWE 510).
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CS 551 - Computer Graphics

Credits: 3
Not Repeatable for Credit
Offered by Computer Science
Graphics principles and programming. Topics include graphics hardware, antialiasing, transformations, viewing, illumination, blending, texture mapping, color models, curves, surfaces, and animation.

Prerequisite(s): CS 310 and CS 367.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

CS 555 - Computer Communications and Networking

Credits: 3
Not Repeatable for Credit
Offered by Computer Science
Techniques and systems for communication of data between computational devices and layers of Internet Protocol Suite. Topics include role of various media and software components, local and wide area network protocols, network design, performance and cost considerations, and emerging advanced commercial technologies. Emphasizes TCP/IP family of protocols.

Prerequisite(s): CS 310 and CS 367 and STAT 344.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CS 571 - Operating Systems

Credits: 3
Not Repeatable for Credit
Offered by Computer Science
Models of operating systems. Major functions including processes, memory management, I/O, interprocess communication, files, directories, shells, distributed systems, performance, and user interface.

Prerequisite(s): CS 310 and CS 367 and CS 465.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CS 580 - Introduction to Artificial Intelligence

Credits: 3
Not Repeatable for Credit
Offered by Computer Science
Principles and methods for knowledge representation, reasoning, learning, problem solving, planning, heuristic search, and natural language processing and their application to building intelligent systems in a variety of domains. LISP, PROLOG, or expert system programming language.

Prerequisite(s): CS 310 and CS 330.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CS 583 - Analysis of Algorithms

Credits: 3
Not Repeatable for Credit
Offered by Computer Science
Topics include analyzing sequential and parallel algorithmic strategies such as greedy methods, divide and conquer strategies, dynamic programming, search and traversal techniques, and approximation algorithms; and analyzing specific algorithms falling into these classes, NP-Hard and NP-Complete problems.

Prerequisite(s): CS 310 and CS 330 and MATH 125.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CS 584 - Theory and Applications of Data Mining

Credits: 3
Not Repeatable for Credit
Offered by Computer Science
Concepts and techniques in data mining and multidisciplinary applications. Topics include databases; data cleaning and transformation; concept description; association and correlation rules; data classification and predictive modeling; performance analysis and scalability; data mining in advanced database systems, including text, audio, and images; and emerging themes and future challenges.
Equivalent to CS 659 (2014-2015 Catalog).

**Prerequisite(s):** CS 310 and STAT 344.
**Schedule Type:** LEC
**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0

---

**CS 600 - Theory of Computation**

Credits: 3
Not Repeatable for Credit
Offered by Computer Science
Introduction to logic and proof techniques, formal languages, automata theory, and computational complexity. Specific topics include regular and context-free languages, Turing machines, NP-completeness, and undecidability.

**Prerequisite(s):** B- or higher in CS 583.
Prerequisite(s) enforced by registration system.

**Schedule Type:** LEC
**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0

---

**CS 611 - Computational Methods for Genomics**

Credits: 3
Not Repeatable for Credit
Offered by Computer Science
Covers fundamental principles and techniques for implementing computational algorithms to solve problems in biology arising from the need to process large volumes of genomic information. Topics include sequence analysis, alignments, sequence assembly, gene prediction, and protein structure prediction.

**Prerequisite(s):** B- or higher in CS 583.
Prerequisite(s) enforced by registration system.

**Schedule Type:** LEC
**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0

---

**CS 630 - Advanced Algorithms**

Credits: 3
Not Repeatable for Credit
Offered by Computer Science
Provides an overview of advanced algorithm design and analysis techniques. Topics include algorithms for hash tables, matrix operations, number theory, string matching, computational geometry, combinatorial optimization, and linear programming; also the areas of NP-completeness and approximation algorithms.
Prerequisite(s): B- or higher in CS 583. Prerequisite(s) enforced by registration system.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CS 633 - Computational Geometry

Credits: 3
Not Repeatable for Credit
Offered by Computer Science
Basic principles and methods for computing in field of geometric modeling. Emphasizes data structures used to represent geometric objects and algorithms for manipulating those data structures. Topics include range searching, polygon triangulation, convex hulls, motion-planning, visibility, and mesh generation.

Prerequisite(s): B- or higher in CS 583. Prerequisite(s) enforced by registration system.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CS 635 - Foundations of Parallel Computation

Credits: 3
Not Repeatable for Credit
Offered by Computer Science
Covers three major parallel computing paradigms: MIMD computation, SIMD computation, and data flow computation. Emphasizes interfaces between algorithm design and implementation, architecture, and software. Examines parallel algorithms and parallel programming languages relative to architecture of particular parallel computers.

Prerequisite(s): B- or higher in CS 583 and CS 571 and proficiency in C programming language. Prerequisite(s) enforced by registration system.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CS 640 - Advanced Compilers

Credits: 3
Not Repeatable for Credit
Offered by Computer Science
Examines advanced compiler techniques such as code optimizations for sequential and parallel machines; compilers for logical, functional, or object-oriented languages; and other topics in current literature.
Prerequisite(s): B- or higher in CS 540 and CS 583.
Prerequisite(s) enforced by registration system.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CS 650 - Advanced Database Management

Credits: 3
Not Repeatable for Credit
Offered by Computer Science
Study of the internal architecture of database systems. Topics include: physical data organization and indexing, query processing and optimization, transaction processing, database system architectures, Web services and Web data security.

Prerequisite(s): B- or higher in CS 550 or INFS 614.
Prerequisite(s) enforced by registration system.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CS 657 - Mining Massive Datasets with MapReduce

Credits: 3
Not Repeatable for Credit
Offered by Computer Science
Covers the techniques to mine large datasets, including Distributed File Systems and Map-Reduce, similarity search, and data stream processing. Covers classic problems in data mining, such as clustering, association rule mining, and others from the point of view of scalability. Includes a final project to exercise concepts covered in class.

Prerequisite(s): B- or higher in CS 584.
Prerequisite(s) enforced by registration system.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CS 658 - Networked Virtual Environments

Credits: 3
Not Repeatable for Credit
Offered by Computer Science
Networked virtual environment overview, networking and multimedia concepts, virtual simulation concepts, efficiency/performance issues, and online conferencing/virtual classrooms. Course is based around a project with multiple
segments, each covering one aspect of networked virtual environments, plus a final session where one- or two-person teams create a minimally functional networked virtual environment over the Internet using multicast network software. Lectures available online/recorded.

Prerequisite(s): B- or higher in CS 555.
Prerequisite(s) enforced by registration system.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CS 662 - Computer Graphics Game Technologies

Credits: 3
Not Repeatable for Credit
Offered by Computer Science
Addresses some graphics game techniques including collision detection, levels of detail, physics-based simulations, textures, maps, and shadows.

Prerequisite(s): B- or higher in CS 551.
Prerequisite(s) enforced by registration system.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CS 667 - Biometrics and Identity Management

Credits: 3
Not Repeatable for Credit
Offered by Computer Science
Basic principles and methods for automatic authentication of individuals. Technologies include face, fingerprint, and iris recognition; and speaker verification. Additional topics cover multimodal biometrics, system design, performance evaluation, and privacy concerns. Term project required.

Prerequisite(s): B- or higher in CS 580.
Prerequisite(s) enforced by registration system.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CS 672 - Computer System Performance Evaluation

Credits: 3
Not Repeatable for Credit
Offered by Computer Science
Theory and practice of analytical models of computer systems. Topics include open and closed multiclass queuing networks, single and multiple class Mean Value Analysis, Markov Chains, performance and availability models of Internet data centers, software performance engineering, and e-commerce performance.

**Prerequisite(s):** B- or higher in CS 571.  
Prerequisite(s) enforced by registration system.

**Schedule Type:** LEC  
**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**CS 673 - Multimedia Computing and Systems**

Credits: 3  
Not Repeatable for Credit  
Offered by Computer Science  
Focuses on technological and development environments in developing multimedia applications. Projects involve experience with multimedia authoring tools and simulations to assess performance.

**Prerequisite(s):** B- or higher in CS 571.  
Prerequisite(s) enforced by registration system.

**Schedule Type:** LEC  
**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**CS 674 - Data Mining on Multimedia Data**

Credits: 3  
Not Repeatable for Credit  
Offered by Computer Science  
Covers advanced techniques for managing, searching, and mining of various types of data such as text, web links, images, time series, video, and audio. Issues related to handling such data will be discussed, including feature selection, high dimensional indexing, interactive search and information retrieval, pattern discovery, and scalability.

**Prerequisite(s):** B- or higher in CS 584.  
Prerequisite(s) enforced by registration system.

**Schedule Type:** LEC  
**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**CS 675 - Distributed Systems**
Issues in design and implementation of distributed systems and applications. Topics include distributed communication paradigms, middleware, coordination and synchronization, distributed transactions, consistency and replication, fault-tolerance and reliability, and peer-to-peer systems.

Prerequisite(s): B- or higher in CS 571.
Prerequisite(s) enforced by registration system.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CS 681 - Knowledge Engineering

Design, construction, and evaluation of software systems that solve problems generally deemed to require human expertise. Topics include modeling expert's knowledge, reasoning based on knowledge and evidence, ontology design and development, rule learning, and knowledge-based maintenance. Programming projects include development of tools or small-scale systems.

Prerequisite(s): B- or higher in CS 580.
Prerequisite(s) enforced by registration system.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CS 682 - Computer Vision

Study of computational models of visual perception and their implementation in computer systems. Topics include early visual processing, edge detection, segmentation, intrinsic images, image modeling, representation of visual knowledge, and image understanding.

Prerequisite(s): B- or higher in CS 580 and CS 583.
Prerequisite(s) enforced by registration system.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
Examines design and analysis of parallel algorithms. Material focuses on algorithms for both theoretical and practical models of parallel computation. Considers algorithm design and analysis for PRAM and existing SIMD and MIMD type architectures. Topics include sorting, graph algorithms, numerical algorithms, and computational complexity.

Prerequisite(s): B- or higher in CS 583. Prerequisite(s) enforced by registration system.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CS 684 - Graph Algorithms

Data structures and analytical techniques to study graph algorithms. Data structures include disjoint sets, heaps, and dynamic trees. Algorithms include minimum spanning trees, shortest path, maximum flow, and graph planarity.

Prerequisite(s): B- or higher in CS 583. Prerequisite(s) enforced by registration system.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CS 685 - Autonomous Robotics

Reviews developments in intelligent autonomous systems. Studies applications of artificial intelligence, computer vision, and machine learning to robotics. Topics include analysis and design of algorithms and architectures for planning, navigation, sensory data understanding, sensor fusion, spatial reasoning, motion control, knowledge acquisition, learning concepts and procedures, self-organization, and adaptation to environment.

Prerequisite(s): B- or higher in CS 580. Prerequisite(s) enforced by registration system.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CS 686 - Image Processing and Applications
Credits: 3
Not Repeatable for Credit
Offered by Computer Science
Concepts and techniques in image processing. Discusses methods for image capture, transformation, enhancement, restoration, and encoding. Students complete projects involving naturally occurring images.

Prerequisite(s): B- or higher in CS 583.
Prerequisite(s) enforced by registration system.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CS 687 - Advanced Artificial Intelligence

Credits: 3
Not Repeatable for Credit
Offered by Computer Science
Explores foundational issues of artificial intelligence, such as roles of knowledge and search, formalization of knowledge and inference, and symbolic versus emergent approaches to intelligence. Studies advanced programming techniques for artificial intelligence, relationship to foundational issues, and important application areas for artificial intelligence.

Prerequisite(s): B- or higher in CS 580.
Prerequisite(s) enforced by registration system.

Notes: Major programming project required.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CS 688 - Pattern Recognition

Credits: 3
Not Repeatable for Credit
Offered by Computer Science
Explores statistical pattern recognition and neural networks. Pattern recognition topics include Bayesian classification and decision theory, density (parametric and nonparametric) estimation, linear and nonlinear discriminant analysis, dimensionality reduction, feature extraction and selection, mixture models and EM, and vector quantization and clustering. Neural networks topics include feed-forward networks and back-propagation, self-organization feature maps, and radial basis functions. Emphasizes experimental design, applications, and performance evaluation.

Prerequisite(s): CS 580 or CS 584
Prerequisite(s) enforced by registration system.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
CS 689 - Planning Motions of Robots and Molecules

Credits: 3
Not Repeatable for Credit
Offered by Computer Science
Covers topics from artificial intelligence, algorithms and databases. Presents algorithms that model and simulate physical and biological systems and focuses on motion-planning algorithms for robotic systems in the presence of obstacles. Simple deterministic and sampling-based approaches to motion planning will be covered, as well as advanced planning methods including planning with kinematics and dynamic constraints. Selected topics include sensor-based motion planning, manipulation planning, assembly planning, planning under uncertainty and robotics-inspired methods to compute functionally-relevant motions of molecular chains.

Prerequisite(s): B- or higher in CS 583.
Prerequisite(s) enforced by registration system.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CS 695 - Topics in Computer Science

Credits: 3
Repeatable within Term for Credit
Offered by Computer Science
Special topics in computer science not occurring in regular computer science sequence.

Prerequisite(s): Completion of two core courses, and permission of instructor.
Notes: May be repeated for credit when subject distinctly different.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CS 697 - Independent Reading and Research

Credits: 1-3
Not Repeatable for Credit
Offered by Computer Science
Students may undertake a course of study under supervision of consenting faculty member. Students usually submit written statement of course content and tentative reading list as part of request for approval. Literature review, project report, or other written product usually required.

Prerequisite(s): Graduate standing; completion of at least two core courses, and permission of the instructor.
Schedule Type: IND
Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0
CS 700 - Quantitative Methods and Experimental Design in Computer Science

Credits: 3  
Not Repeatable for Credit  
Offered by Computer Science  
Integrated treatment of models and practices in experimental computer science. Topics include scientific methods applied to computing, workload characterization, forecasting of performance and quality metrics of systems, uses of analytic and simulation models, design of experiments, interpretation and presentation of experimental results, hypothesis testing, and statistical analyses of data. Involves one or more large-scale projects.

**Prerequisite(s):** Admission to PhD program in Computer Science or Information Technology, and at least two 600-level courses offered by the Computer Science Department.  
**Schedule Type:** LEC  
**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

CS 706 - Concurrent Software Systems

Credits: 3  
Not Repeatable for Credit  
Offered by Computer Science  
Topics include concurrent programming languages and constructs, and specification, design, verification, and validation of concurrent programs. Students required to solve concurrent programming problems and check solutions by using verification, testing, and debugging tools.

**Prerequisite(s):** B- or higher in CS 571.  
Prerequisite(s) enforced by registration system.  
**Schedule Type:** LEC  
**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

CS 719 - Scalable Internet Services

Credits: 3  
Not Repeatable for Credit  
Offered by Computer Science  
Discusses, from quantitative point of view, characteristics of most important technologies used to support implementation of e-business sites. Includes topics such as hardware and software architectures of e-business sites, authentication, payment services, understanding customer behavior, workload characterization, scalability analysis, and performance prediction.

**Prerequisite(s):** B- or higher in CS 555 and CS 571.  
Prerequisite(s) enforced by registration system.  
**Notes:** Term paper and project required.  
**Schedule Type:** LEC
Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0

**CS 752 - Interactive Graphics Software**

Credits: 3  
Not Repeatable for Credit  
Offered by Computer Science  
Advanced graphics methods and tools. Topics include visualization, modeling, rendering, animation, simulation, virtual reality, graphics software tools, and current research topics.

**Prerequisite(s):** B- or higher in CS 551 and CS 583.  
Prerequisite(s) enforced by registration system.

Schedule Type: LEC  
Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0

**CS 755 - Advanced Computer Networks**

Credits: 3  
Not Repeatable for Credit  
Offered by Computer Science  
Current and emerging issues in advanced computer networks and applications. Topics include software systems associated with packet and cell-switched networking architectures and protocols, high-performance LANs, scheduling and congestion control, mobile networking, multimedia applications, and next generation of Internet.

**Prerequisite(s):** B- or higher in CS 555.  
Prerequisite(s) enforced by registration system.

Schedule Type: LEC  
Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0

**CS 756 - Performance Analysis of Computer Networks**

Credits: 3  
Not Repeatable for Credit  
Offered by Computer Science  
Analytical, measurement, and simulation techniques for modeling and analyzing computer networks. Examines elementary queuing analysis; networks of queues; routing and flow controls; and applications to local and wide area networks, Internet, and emerging networking technologies. A large portion of the course is devoted to projects, normally performed in student teams, who apply the techniques presented.

**Prerequisite(s):** B- or higher in CS 555.  
Prerequisite(s) enforced by registration system.
CS 773 - Real-Time Systems Design and Development

Credits: 3
Not Repeatable for Credit
Offered by Computer Science
Real-time systems and principles supporting design and implementation. Emphasizes fundamental results from real-time scheduling theory and relevance to computer system design. Topics include system design issues for real-time applications involving operating systems, communication networks, databases, and multimedia

Prerequisite(s): B- or higher in CS 571.
Prerequisite(s) enforced by registration system.

CS 774 - Computational Vision

Credits: 3
Not Repeatable for Credit
Offered by Computer Science
Studies recent advances in development of machine vision algorithms and knowledge-based vision systems. Topics include scale space; Gabor and wavelet processing; distributed and hierarchical processing using neural networks; motion analysis; active, functional, and selective perception; object and target recognition; expert systems; data fusion; and machine learning. Emphasizes system integration in terms of perception, control, action, and adaptation. Presents applications to robotics, intelligent highways, inspection, forensic, and data compression.

Prerequisite(s): B- or higher in CS 682 and CS 686.
Prerequisite(s) enforced by registration system.

CS 775 - Advanced Pattern Recognition

Credits: 3
Not Repeatable for Credit
Offered by Computer Science
Covers statistical pattern recognition, neural network, and statistical learning theory approaches. Topics include decision theory and Bayes' theorem, density (parametric and nonparametric) estimation, linear and nonlinear discriminant analysis, SVM and kernel methods, SRM and model selection, performance evaluation, mixture of experts (AdaBoost), dimensionality reduction, feature selection and extraction, and clustering. Emphasizes experimental design, applications, and performance evaluation.
Prerequisite(s): B- or higher in CS 688. 
Prerequisite(s) enforced by registration system.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CS 777 - Human-Computer Intelligent Interaction

Credits: 3
Not Repeatable for Credit
Offered by Computer Science
Current and emerging issues in human-computer intelligent interaction, and human-centered systems and their applications. Topics include video processing, visualization, virtual environments, adaptation and tutoring, image and scene modeling, analysis and synthesis, face and gesture recognition, and speech and natural language processing.

Prerequisite(s): B- or higher in CS 580 and CS 551 or CS 682. 
Prerequisite(s) enforced by registration system.

Notes: Term project and topical review required.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CS 779 - Topics in Resilient and Secure Computer Systems

Credits: 3
Not Repeatable for Credit
Offered by Computer Science
Covers study of alternate computer security, including how these methods can be combined in a layered defense and factors that affect the selection of the architectures. Reviews recent papers and reports.

Prerequisite(s): CS 571 or ISA 562
Prerequisite(s) enforced by registration system.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CS 782 - Machine Learning

Credits: 3
Not Repeatable for Credit
Offered by Computer Science
Surveys machine learning concerning development of intelligent adaptive systems that are able to improve through learning from
input data or from their own problem-solving experience. Topics provide broad coverage of developments in machine learning, including basic learning strategies and multistrategy learning.

**Prerequisite(s):** B- or higher in CS 681 or CS 687 or CS 688. Prerequisite(s) enforced by registration system.

**Schedule Type:** LEC  
**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

### CS 787 - Decision Guidance Systems

Credits: 3  
Not Repeatable for Credit  
Offered by Computer Science  
Decision-guidance systems support an iterative process of giving actionable recommendations to and extracting feedbacks from human decision-makers, with the goal of arriving at the best possible course of action. Focuses on models, languages, algorithms and applications of Decision-Guidance Management Systems, used for fast development of decision-guidance applications.

**Prerequisite(s):** B- or higher in INFS 614 or CS 550. Prerequisite(s) enforced by registration system.

**Schedule Type:** LEC  
**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

### CS 788 - Autonomic Computing

Credits: 3  
Not Repeatable for Credit  
Offered by Computer Science  
Studies self-managing, self-optimizing, self-configuring, self-tuning, self-healing, and self-protecting computing systems. This course analyzes many examples of autonomic systems as well as various techniques to design and build such systems. This is a doctoral seminar based on reading and analysis of current papers.

**Prerequisite(s):** B- or higher in CS 555 or CS 571 or ISA 562. Prerequisite(s) enforced by registration system.

**Schedule Type:** LEC  
**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

### CS 795 - Advanced Topics in CS

Credits: 3  
Repeatable within Term for Credit  
Offered by Computer Science
Advanced topics not occurring in regular sequence.

**Prerequisite(s):** Admission into computer science PhD program.
**Notes:** May be repeated for credit when subject differs. Satisfies MS breadth requirement only if explicitly stated in syllabus in given section. Only one such course should be used for breadth requirements.

**Schedule Type:** LEC  
**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**CS 798 - Project Seminar**

Credits: 3  
Not Repeatable for Credit  
Offered by Computer Science  
Master's degree candidates undertake a project using knowledge gained in MS program.

**Prerequisite(s):** 18 credits applicable toward MS in computer science.  
**Notes:** Topics chosen in consultation with advisor. Meets project or thesis requirement for MS in computer science.

**Schedule Type:** SEM  
**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**Grading:** Graduate Special

---

**CS 799 - Thesis**

Credits: 1-6  
Repeatable within Degree for Credit  
Offered by Computer Science  
Original or expository work evaluated by committee of three faculty members.

**Prerequisite(s):** 18 credits applicable toward MS in computer science.  
**Schedule Type:** IND  
**Hours of Lecture or Seminar per week:** 1-6  
**Hours of Lab or Studio per week:** 0  
**Grading:** Satisfactory/No Credit

---

**CS 800 - Computer Science Colloquium**

Credits: 0  
Repeatable within Degree for Credit  
Offered by Computer Science  
Students are required to attend colloquia including talks by distinguished speakers, faculty candidates, and Mason faculty.

**Prerequisite(s):** Admission to CS PhD program.  
**Notes:** This course introduces PhD students to research topics in computer science. This course can be taken twice for credit.
CS 811 - Research Topics in Machine Learning and Inference

Credits: 3
Not Repeatable for Credit
Offered by Computer Science
Presents unifying principles that underlie diverse methods, paradigms, and approaches to machine learning and inference. Reviews most known learning and inference systems, discusses strengths and limitations, and suggests most appropriate areas of application. Hands-on experience by experimenting with state-of-the-art learning and inference systems and working on projects tailored to research interests.

Prerequisite(s): B- or higher in CS 681 or CS 687 or CS 688.
Prerequisite(s) enforced by registration system.

CS 818 - Topics in Computer Systems

Credits: 3
Not Repeatable for Credit
Offered by Computer Science
Discussion of current research topics in computer systems. Topics vary according to faculty interest. Possible topics include peer-to-peer computing, high-performance distributed computing, sensor and ad hoc networks, autonomic computing, virtualization, and web services and middleware.

CS 880 - Research Topics in Artificial Intelligence

Credits: 3
Repeatable within Degree for Credit
Offered by Computer Science
Special topics in artificial intelligence not occurring in regular computer science sequence.

Notes: Requires substantial student participation. Subject matter may include continuation of existing 600- or 700-level courses in artificial intelligence or other topics. May be repeated for credit when subject matter differs.
CS 884 - Advanced Topics in Computer Vision and Robotics

Credits: 3
Repeatable within Degree for Credit
Offered by Computer Science
Covers recent developments. Topics motivated by applications to autonomous robotic systems, mobile robot navigation, multirobot systems, human-computer-environment interaction, image/video search and analysis, content discovery, and visual surveillance. Topics include 3D structure and motion recovery, motion understanding, map building and localization, object detection and recognition, and target tracking. Projects and experimental evaluation emphasized.

Prerequisite(s): B- or higher in CS 682 or CS 685.
Prerequisite(s) enforced by registration system.

Notes: Course may be repeated with change of topic.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CS 895 - Research Topics in CS

Credits: 3
Repeatable within Term for Credit
Offered by Computer Science
Advanced topics not occurring in regular sequence.

Prerequisite(s): Doctoral status.
Notes: May be repeated for credit when subject differs. Only one such course should be used for breadth requirements.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CS 896 - Directed Reading and Research

Credits: 1-6
Repeatable within Degree for Credit
Offered by Computer Science
Reading and research on a specific topic under the direction of a faculty member.

Prerequisite(s): Permission of Instructor.
Notes: May be repeated up to a total of 18 credits. Students can sign up for this class only after passing the CS PhD qualifying exams.
CS 990 - Dissertation Topic Presentation

Credits: 0
Not Repeatable for Credit
Offered by Computer Science
Students put together a professional presentation of a research proposal and present it for critique to fellow students and interested faculty.

Equivalent to IT 990, STAT 990.

Prerequisite(s): Student must have passed the PhD qualifying examinations.
Notes: Must be completed before the presentation of a dissertation research proposal.

CS 998 - Doctoral Dissertation Proposal

Credits: 1-12
Repeatable within Degree for Credit
Offered by Computer Science
Work on a research proposal that forms the basis for a doctoral dissertation.

Prerequisite(s): Student must have passed the PhD qualifying examinations and must have a dissertation advisor.
Notes: No more than 24 credits of CS 998 and 999 may be applied to the doctoral degree requirements.

CS 999 - Doctoral Dissertation

Credits: 1-12
Repeatable within Degree for Credit
Offered by Computer Science
Dissertation research under the supervision of the dissertation director.

Prerequisite(s): Admission to candidacy.
Notes: No more than 24 credits of CS 998 and 999 may be applied to the doctoral degree requirements.
Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0
Grading: Satisfactory/No Credit

Conflict Analysis and Resolution (CONF)

Offered by the School for Conflict Analysis and Resolution

CONF 101 - Conflict and Our World

Credits: 3
Not Repeatable for Credit
Offered by School for Conflict Analysis and Resolution
Brief history of field, survey of key conflict resolution themes and theories, and intervention methods. Overview includes general factors of conflict and its resolution; and nature of conflict in interpersonal, group, organizational, and international situations.

Fulfills Mason Core requirement in social and behavioral science.

Schedule Type: LEC,
RCT
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring, Summer

CONF 210 - Theories of Conflict Analysis and Resolution

Credits: 3
Not Repeatable for Credit
Offered by School for Conflict Analysis and Resolution
Students will utilize critical thinking and analytical skills to begin an in-depth examination of the major theories of conflict analysis and resolution. Theories and case studies will include root causes and dynamics of conflict and methods of conflict analysis and resolution.

Prerequisite(s): None
Notes: Required course for all CONF majors (BA and BS) beginning Fall 2011.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

CONF 300 - Conflict Resolution Techniques and Practice

Credits: 3
Not Repeatable for Credit
Offered by School for Conflict Analysis and Resolution
Advanced consideration of CONF 101 topics, introduction of core notion of reflective practice, conflict resolution techniques, practice, third party roles, and ethics.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CONF 301 - Research and Inquiry in Conflict Resolution

Credits: 3
Not Repeatable for Credit
Offered by School for Conflict Analysis and Resolution
Introduces social science research methods at undergraduate level. Covers basic epistemology of social research, including quantitative and qualitative methods, emphasizing participatory action research, and evaluation and assessment work.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CONF 302 - Culture, Identity, and Conflict

Credits: 3
Not Repeatable for Credit
Offered by School for Conflict Analysis and Resolution
Covers deeply rooted, intractable, or protracted social conflicts around core issues of identity, including race, ethnicity, religion, and nationalism. Explores cultural, symbolic, and discursive approaches to identity conflict.

Fulfills writing intensive requirement in the major.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

CONF 310 - Special Topics in Practice

Credits: 1-6
Repeatable within Term for Credit
Offered by School for Conflict Analysis and Resolution
Examines selected topics related to practice in the field of conflict analysis and resolution. Topics vary, but will address practical skills and knowledge base necessary to conflict resolution practice.

Notes: May be repeated for up to 6 credits if topics vary.

Schedule Type: SEM
Hours of Lecture or Seminar per week: 1-6
CONF 314 - Advising Seminar for Conflict Majors

Credits: 1
Not Repeatable for Credit
Offered by School for Conflict Analysis and Resolution
Examines issues and opportunities relevant to CONF majors to enhance their overall success in the program. Topics may include academic planning, field experience processes, critical thinking in coursework, career exploration and readiness, and co-curricular opportunities.

Equivalent to CONF 190 (2014-2015 Catalog).

Prerequisite(s): None.
Schedule Type: SEM
Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

CONF 320 - Interpersonal Conflict Analysis and Resolution

Credits: 3
Not Repeatable for Credit
Offered by School for Conflict Analysis and Resolution
Covers conflict at micro level, introducing theories drawn from various disciplines including psychology, anthropology, and conflict resolution. Uses readings, case studies, and role plays to develop ability to analyze and intervene in interpersonal conflicts. Also prepares for further course work for interpersonal conflict concentration.

Prerequisite(s): None.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CONF 325 - Dialogue and Difference

Credits: 3
Not Repeatable for Credit
Offered by School for Conflict Analysis and Resolution
Covers challenges of communicating across differences of age, gender, language, culture, political orientation, and contextual situations. Students will engage in preparing and analyzing communication strategies in conflict situations and will participate in a dialogue over the term that explores the meaning and experience of difference on the Mason campus.

Schedule Type: SEM
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring
CONF 330 - Community, Group, and Organizational Conflict Analysis and Resolution

Credits: 3  
Not Repeatable for Credit  
Offered by School for Conflict Analysis and Resolution  
Covers conflict at mezzo level, introducing theories of social harmony and conflict, drawing on sociology, social psychology, community psychology, organizational psychology, administration of justice, philosophy, and conflict resolution. Uses case studies, class presentations, and group projects to develop ability to analyze conflict and make recommendations for change. Also prepares for further course work for community and organizational conflict concentration.

Prerequisite(s): None.  
Schedule Type: LEC  
Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0

CONF 331 - Simulation in Community and Organizational Conflict Resolution

Credits: 1  
Not Repeatable for Credit  
Offered by School for Conflict Analysis and Resolution  
Builds on the theories and concepts presented in CONF 330 to focus on the practice of group and community conflict. Through intensive simulations using conflict cases, students will have the opportunity to practice conflict resolution skills such as dialogue, problem solving, mediation and negotiation and gain a practical understanding of third party roles and intervention strategies in community, group, and organizational settings.

Schedule Type: LAB  
Hours of Lecture or Seminar per week: 0  
Hours of Lab or Studio per week: 1-12  
When Offered: Fall, Spring

CONF 340 - Global Conflict Analysis and Resolution

Credits: 3  
Not Repeatable for Credit  
Offered by School for Conflict Analysis and Resolution  
Covers conflict at macro level, introducing theories of international and global violence and conflict, drawing from disciplines of international relations, political science, intercultural communication, and conflict resolution. Covers impact of globalization and structural causes of conflict. Uses class discussions, case studies, and final paper to develop analytical skills to help in analysis of conflict. Prepares for further course work for international conflict concentration.

Prerequisite(s): None.  
Schedule Type: LEC, RCT  
Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0
CONF 341 - Simulation in Global Conflict Resolution

Credits: 1
Not Repeatable for Credit
Offered by School for Conflict Analysis and Resolution
Focuses primarily on global conflict resolution practice. Using the methodologies of dialogue, problem-solving, and intensive simulation, students will increase their theoretical and practical understanding of peace making, peace building, and transformation processes within a specific international case.

Prerequisite(s): None.
Schedule Type: LAB
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CONF 345 - Social Dynamics of Terrorism, Security, and Justice

Credits: 3
Not Repeatable for Credit
Offered by School for Conflict Analysis and Resolution
Presents students with analytical frameworks to account for terrorist acts and organizations and explore social dynamics underlying the development of, and response to, terrorism. Topics may include recruitment into violent groups, counterterrorism and human rights concerns, role of religious and political ideologies in terrorism and counterterrorism, media coverage of terrorism, and effects of terrorism on social structures and processes.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

CONF 370 - Internship Field Experience

Credits: 1-9
Repeatable within Degree for Credit
Offered by School for Conflict Analysis and Resolution
Internships will provide an opportunity for students to gain practical experience, reflect on those experiences, and apply academic theories outside of the normal classroom environment. Students will apply academic theories learned in the classroom to situations that arise in the work environment. Students must obtain approval and complete an internship proposal application in order to be registered for the course.

Prerequisite(s): None.
Notes: Course does not have a regular meeting time; students submit work via blog and e-mail; some meetings with instructor.

Schedule Type: INT
Hours of Lecture or Seminar per week: 1-9
Hours of Lab or Studio per week: 1-12
When Offered: Fall, Spring, Summer
CONF 375 - Special Programs Field Experience

Credits: 1-6  
Repeatable within Degree for Credit  
Offered by School for Conflict Analysis and Resolution  
Learning experience in the application of conflict analysis and resolution (CAR) skills in special program settings. Provides supervised practice in CAR techniques, leadership, program implementation, and strategies to facilitate conflict resolution in educational institutions or community settings.

Prerequisite(s): None.  
Schedule Type: INT  
Hours of Lecture or Seminar per week: 2  
Hours of Lab or Studio per week: 0

CONF 385 - International Field Experience

Credits: 3  
Repeatable within Degree for Credit  
Offered by School for Conflict Analysis and Resolution  
Investigates conflict theory through international field experience including participation in formally organized course offered by Center for Global Education or another form of international field experience approved by program director.

Prerequisite(s): CONF 101 and permission of advisor.  
Notes: May be repeated for up to 6 credits.  
Schedule Type: SEM  
Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0

CONF 393 - Philosophy, Conflict Theory, and Violence

Credits: 3  
Not Repeatable for Credit  
Offered by School for Conflict Analysis and Resolution  
Examines causes, sources, and origins of group violence with particular attention to group violence of ethnicity conflict. Explores alternative proposals that explain why violence becomes primary, or at least viable, form of revolving conflict in some societies.

Prerequisite(s): CONF 101 or permission of instructor.  
Schedule Type: LEC  
Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0

CONF 394 - Human Rights and Inequality

Credits: 3  
Not Repeatable for Credit
Offered by School for Conflict Analysis and Resolution
Examines inequality, social justice, and human rights in an age of globalization. Topics may include international law and order, welfare-and social policy, regionalism and multilateralism, environmental protection, gender equality, terrorist and transnational criminal networks, human trafficking, modern slavery, world poverty, corporate military firms, governance of global financial institutions, security, and transnational social movements.

Schedule Type: LEC,
SEM
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

CONF 397 - Study Abroad Special Topics
Credits: 1-9
Repeatable within Term for Credit
Offered by School for Conflict Analysis and Resolution
Transfer credit for relevant coursework taken during direct exchange study abroad trips.

Prerequisite(s): None.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Summer, Spring

CONF 398 - Special Topics in Advanced Techniques and Practices
Credits: 3
Repeatable within Term for Credit
Offered by School for Conflict Analysis and Resolution
Examines selected topics relating to conflict resolution techniques and practices. Topics vary but may include mediation, negotiation, reflective practice, and facilitation.

Prerequisite(s): None.
Notes: May be repeated for up to 9 credits if topics vary.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Summer, Spring

CONF 399 - Special Topics in Conflict Analysis and Resolution
Credits: 3
Repeatable within Term for Credit
Offered by School for Conflict Analysis and Resolution
Examines selected topics relating to analysis or resolution of conflict. Topics vary but may include historical examination of
conflict, social issues stemming from conflict, ethical issues in intervention, globalization, human rights, sources of conflict, or relationship of particular identity domains to conflict.

Notes: May be repeated for up to 9 credits if topics vary.

Schedule Type: LEC  
Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0

CONF 425 - Mediating Conflict

Credits: 3  
Not Repeatable for Credit  
Offered by School for Conflict Analysis and Resolution  
A skill development course connecting conflict resolution theory and practice to the mediation process through lectures, discussion, self-reflection, experiential learning, and role-plays. This course has been approved to meet the 20-hour basic education requirements for mediation certification by the Judicial Council of Virginia and the Office of the Executive Secretary, Supreme Court of Virginia.

Schedule Type: SEM  
Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0  
When Offered: Fall, Spring

CONF 435 - Building Peace in Divided Societies

Credits: 3  
Not Repeatable for Credit  
Offered by School for Conflict Analysis and Resolution  
A major challenge to peacebuilding efforts domestically and globally are the boundaries that communities believe separates themselves from others. The boundaries have ethnic, racial, religious or cultural roots, often with long histories of division and violence. This class will examine case studies and strategies from around the globe of peacebuilding in complex communities.

Schedule Type: SEM  
Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0  
When Offered: Fall, Spring

CONF 485 - Service Learning Intensive

Credits: 1-9  
Repeatable within Term for Credit  
Offered by School for Conflict Analysis and Resolution  
Provides students with real-world setting to link conflict theory to resolution practice. Students will engage with grassroots organizations in conflict assessment, resolution process designs, trainings, and project implementation in domestic and international settings.
Prerequisite(s): None.
Notes: May be repeated for up to 12 credits. May require additional fees.

Schedule Type: SEM
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Summer, Spring

CONF 490 - RS: Integration

Credits: 3
Not Repeatable for Credit
Offered by School for Conflict Analysis and Resolution
Capstone course in which students reflect on what they have learned, integrating knowledge from course work and synthesizing it to cogent body of knowledge. Includes class discussion and final project that demonstrates understanding of conflict theory and reflective practice.

Fulfills Mason Core requirement in synthesis.

Designated as a research and scholarship intensive course.

Prerequisite(s): C or higher in CONF 301.
Prerequisite(s) enforced by registration system.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CONF 499 - Independent Research in Conflict Analysis and Resolution

Credits: 1-6
Repeatable within Degree for Credit
Offered by School for Conflict Analysis and Resolution
Readings and research conducted on individual basis in consultation with instructor.

Prerequisite(s): None.
Notes: Student may not present more than 3 credits for graduation credit.

Schedule Type: IND
Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 0

CONF 501 - Introduction to Conflict Analysis and Resolution

Credits: 3
Not Repeatable for Credit
Offered by School for Conflict Analysis and Resolution
Prerequisite or corequisite for all MS CONF majors. Introduces field of conflict analysis and resolution. Examines definitions of conflict and diverse views of its "resolution." Explores thinking about human behavior, and social systems as they relate to origins of conflict and role of conflict in violent and peaceful social change. Considers appropriate responses to conflict at interpersonal, intergroup, industrial, communal, and international levels.

Prerequisite(s): CONF 501
Notes: Permission of instructor not required for this course.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CONF 502 - Intensive Introduction to Conflict Analysis and Resolution

Credits: 3
Not Repeatable for Credit
Offered by School for Conflict Analysis and Resolution
Introduces field of conflict analysis and resolution. Examines the origins of social conflict, the practices and strategies for responding to conflict, and frameworks for constructive intervention. Considers interpersonal, community, and large-scale intergroup conflict.

Schedule Type: SEM
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CONF 595 - Special Topics

Credits: 1-3
Repeatable within Term for Credit
Offered by School for Conflict Analysis and Resolution
Topics vary each semester and are announced each academic year.

Prerequisite(s): CONF 501.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CONF 600 - Foundations of Conflict Analysis and Resolution

Credits: 6
Not Repeatable for Credit
Offered by School for Conflict Analysis and Resolution.
This course offers an integration of theory, research and practice to investigate the inner workings of our field. It includes conflict theories, models and modes of practice that function as the grounding to subsequent courses in the curriculum, and exploration of some of the key contemporary debates. The course includes opportunities for linking theory to practice with experimental learning activities.
CONF 601 - Theories of Conflict and Conflict Resolution

Credits: 3
Not Repeatable for Credit
Offered by School for Conflict Analysis and Resolution
Examines major theories of conflict causation and motivation. Emphasizes need for theories to inform processes of conflict resolution. Weaves together ideas from conventional disciplines with new approaches, especially with regard to causes and methods of resolving deep-rooted conflict.

Prerequisite(s): CONF 501 or 801
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CONF 610 - Conflict Inquiry

Credits: 3
Not Repeatable for Credit
Offered by School for Conflict Analysis and Resolution
Introduces students to the philosophies behind social science research and the methods for conducting research in the field of conflict resolution. Focuses on the identification of research problems associated with particular conflict situations, selection of appropriate research methods, and the design of effective research projects.

Prerequisite(s): CONF 600.
Schedule Type: SEM
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring, Summer

CONF 611 - MS-Research II

Credits: 3
Not Repeatable for Credit
Offered by School for Conflict Analysis and Resolution
Guides students through design, execution, interpretation, analysis, presentation, and evaluation of field research in conflict and resolution.

Prerequisite(s): CONF 501 and 610
Notes: Builds on CONF 610.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
CONF 620 - Reflective Practice in Interpersonal-Multiparty Conflicts

Credits: 3  
Not Repeatable for Credit  
Offered by School for Conflict Analysis and Resolution  
Introductory skill-building course integrating conflict theory and practice using reflective practitioner model. Students learn necessary skills for third-party facilitation and mediation, including active listening, empathy, paraphrasing, reframing, and negotiation, in addition to analytical skills of problem solving and creation of transformational processes. Cases for practice focus on interpersonal and intergroup conflict.

Corequisite(s): CONF 501.

Schedule Type: LAB  
Hours of Lecture or Seminar per week: 0  
Hours of Lab or Studio per week: 3  
When Offered: Fall, Spring

CONF 621 - Reflective Practice in Organizational or Community Conflict

Credits: 3  
Not Repeatable for Credit  
Offered by School for Conflict Analysis and Resolution  
Moves from conflicts that are simply described to those with multilevel components, such as community and organizational conflicts. Expands skills acquired in CONF 620 by adding recording chronology, identifying roles played by various participants, observing turning points in process, and precisely stating agreed-on solution.

Corequisite(s): CONF 501 and CONF 620.

Schedule Type: LAB  
Hours of Lecture or Seminar per week: 0  
Hours of Lab or Studio per week: 3  
When Offered: Fall, Spring

CONF 622 - Reflective Practice in International Conflict and Civil Strife

Credits: 3  
Not Repeatable for Credit  
Offered by School for Conflict Analysis and Resolution  
Continues study of resolution processes as applied to highly complex systems, especially where one party denies legitimacy of existing political authority. Considers third-party options for intervention in revolutionary and international conflicts, building communication and trust among parties, and implementing agreements.

Corequisite(s): CONF 501 and CONF 620.

Schedule Type: LAB  
Hours of Lecture or Seminar per week: 0
CONF 625 - Engaging Conflict

Credits: 3
Repeatable within Degree for Credit
Offered by School for Conflict Analysis and Resolution.
This course will provide students an experiential opportunity to consider the relationship between social science theories and conflict analysis and resolution work; and engagement in a variety of forms with real world conflict. Each course will provide students the opportunity to engage in research and practice activities, choosing the appropriate modalities for the conflict they are engaging with.

Prerequisite(s): CONF 600
Schedule Type: SEM
Hours of Lecture or Seminar per week: 3
When Offered: Fall, Spring, Summer

CONF 642 - Integration of Theory and Practice

Credits: 3
Not Repeatable for Credit
Offered by School for Conflict Analysis and Resolution
Taken in last semester of master's student course work. Assists in developing students' own theories of conflict and conflict resolution by reviewing and integrating prior course work. Students expected to demonstrate holistic comprehension by writing major essay of publishable quality.

Prerequisite(s): CONF 501, 601, 610, 713
Corequisite(s): CONF 501, 601, 610, 713

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CONF 643 - Practicum: Conflict Analysis and Resolution

Credits: 3
Not Repeatable for Credit
Offered by School for Conflict Analysis and Resolution
Schedule Type: IND
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
Grading: Graduate Special

CONF 650 - Conflict Analysis and Resolution Advanced Skills
Credits: 3
Not Repeatable for Credit
Offered by School for Conflict Analysis and Resolution
Introduces innovative practices and provides structure to reflect on and improve ability to work within conflict settings.
Considers the intersection of theory and practice, with special attention to the challenges of translation, adaptation, and transfer of skills and models.

Prerequisite(s): CONF 501 or 502
Corequisite(s): CONF 501 or 502

Schedule Type: SEM
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CONF 651 - Collaborative Community Planning

Credits: 3
Not Repeatable for Credit
Offered by School for Conflict Analysis and Resolution

Covers designing collaborative processes to work with diverse stakeholders to build meaningful and lasting shared agreements. Considers applications in land use, development, or other community planning contexts. Designated a Green Leaf Course.

Prerequisite(s): CONF 501 or 502.
Corequisite(s): CONF 501 or 502.

Schedule Type: SEM
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CONF 652 - Conflict Analysis and Resolution for Prevention, Reconstruction, and Stabilization Contexts

Credits: 3
Not Repeatable for Credit
Offered by School for Conflict Analysis and Resolution
Considers conflict analysis and resolution approaches to designing, implementing, and evaluating holistic cross-sectoral, conflict-sensitive initiatives in areas of potential violence and postconflict reconstruction and stabilization contexts.

Prerequisite(s): CONF 501 or 502
Corequisite(s): CONF 501 or 502

Schedule Type: SEM
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
CONF 653 - World Religions, Diplomacy, and Conflict Resolution

Credits: 3  
Not Repeatable for Credit  
Offered by School for Conflict Analysis and Resolution  
Analyzes ways world religions play role in conflicts, war, diplomacy, peace making, and conflict resolution.

Prerequisite(s): CONF 501 or 502  
Corequisite(s): CONF 501 or 502

Schedule Type: SEM  
Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0

CONF 656 - Integrating Complementary Approaches in Conflict Analysis and Resolution

Credits: 3  
Not Repeatable for Credit  
Offered by School for Conflict Analysis and Resolution  
Considers designs and methods for conflict analysis and resolution that integrate multiple approaches, stakeholders, and methods.  
Applies to social conflicts in local and international contexts.

Prerequisite(s): CONF 501 or 502  
Corequisite(s): CONF 501 or 502

Schedule Type: SEM  
Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0

CONF 657 - Facilitation Skills

Credits: 3  
Not Repeatable for Credit  
Offered by School for Conflict Analysis and Resolution  
Covers range of skills in group facilitation processes, with emphasis on conflict analysis and resolution approaches to improve group communication. Includes skill-building exercises.

Prerequisite(s): CONF 501 or 502  
Corequisite(s): CONF 501 or 502

Schedule Type: SEM  
Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0

CONF 658 - Diversity and Difference in Conflict Analysis and Resolution
Covers elements of cultural diversity, understanding, and awareness, as well as creative ways of approaching issues of diversity, identity, worldviews, and territory. Considers individuals, organizations, communities and nations.

**Prerequisite(s):** CONF 501 or 502  
**Corequisite(s):** CONF 501 or 502

**Schedule Type:** SEM  
**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**CONF 659 - Leadership in Conflict Analysis and Resolution**

Covers roles and styles of leadership in interpersonal, organizational, community, group, and international conflicts. Considers cultural roles of leaders as insider-partials, negotiators, facilitators, and mediators.

**Prerequisite(s):** CONF 501 or 502  
**Corequisite(s):** CONF 501 or 502

**Schedule Type:** SEM  
**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**CONF 660 - Conflict Assessment and Program Evaluation**

Covers assessment methods appropriate to conflict contexts and related evaluation approaches and techniques for use in areas of peace building, community processes, or interpersonal conflict.

**Prerequisite(s):** CONF 501 or 502  
**Corequisite(s):** CONF 501 or 502

**Schedule Type:** SEM  
**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**CONF 665 - Special Topics in Conflict Analysis and Resolution**

Repeatable within Degree for Credit
Offered by School for Conflict Analysis and Resolution
In-depth study of contemporary areas of conflict resolution practice.

**Prerequisite(s):** CONF 502 or permission of the instructor
**Notes:** Fulfills elective requirement for certificate program. Topics vary.

**Schedule Type:** LEC
**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0

### CONF 668 - Applied Integration for Graduate Certificates

Credits: 3
Not Repeatable for Credit
Offered by School for Conflict Analysis and Resolution
Capstone course facilitating integration of learning in the graduate certificate programs and appropriate mentored application and experiential learning.

**Prerequisite(s):** CONF 501 or 502; CONF 660; and CONF 650, 651, 652 or 653
**Schedule Type:** SEM
**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0

### CONF 682 - Principles of Environmental Conflict Resolution

Credits: 3
Not Repeatable for Credit
Offered by School for Conflict Analysis and Resolution

Explores the nature and characteristics of environmental conflict and efforts to manage, resolve or transform it. Students will develop a capacity to assess the strengths and weaknesses of environmental conflict resolution processes while learning about best practices for preventing, preparing for, and addressing environmental conflict. Designated a Green Leaf Course.

Equivalent to EVPP 682

**Prerequisite(s):** CONF 501, 502, EVPP 607 or permission of instructor
**Schedule Type:** LEC
**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0

### CONF 683 - Environmental Conflict Resolution and Collaboration: Situation Assessment, Process Design and Best Practices
Explores best practices for managing, resolving, and transforming environmental conflict using environmental conflict resolution (ECR) processes. Nature and dynamics of environmental disputes, methods for assessing conflict situations, and methods for conducting various forms of ECR processes will be covered in the context of selected case studies with emphasis on student involvement. Designated a Green Leaf Course.

Equivalent to EVPP 683

**Prerequisite(s):** CONF 682/EVPP 682 or permission of instructor

**Schedule Type:** LEC

**Hours of Lecture or Seminar per week:** 3

**Hours of Lab or Studio per week:** 0

---

**CONF 684 - Environmental Conflict Resolution and Collaboration: Leadership Practicum/Capstone**

Credits: 3
Not Repeatable for Credit
Offered by School for Conflict Analysis and Resolution

Capstone course for the Graduate Certificate in Environmental Conflict Resolution and Collaboration. Under supervision of the instructor, students will undertake an assessment of an active environmental conflict and recommend a range of processes that promote identified goals for preferred conflict outcomes.

Equivalent to EVPP 684

**Prerequisite(s):** CONF 682/EVPP 682, CONF 683/EVPP 683

**Schedule Type:** LEC

**Hours of Lecture or Seminar per week:** 3

**Hours of Lab or Studio per week:** 0

---

**CONF 690 - Practicum in Conflict Analysis and Resolution**

Credits: 3
Repeatable within Degree for Credit
Offered by School for Conflict Analysis and Resolution

In-depth field study of ongoing conflict situations, and design and delivery of intervention processes to manage or resolve conflicts.

**Prerequisite(s):** CONF 501 or 801, and 713

**Notes:** Two semesters, 3 credits per semester.

**Schedule Type:** INT, LEC

**Hours of Lecture or Seminar per week:** 1
CONF 694 - Internship

Credits: 1-6
Repeatable within Term for Credit
Offered by School for Conflict Analysis and Resolution
Students are expected to mesh theory and practice through observation and experience. Includes comprehensive report analyzing experiences. For 3 credits of internship students must complete 160 hours of work on site. Students must receive permission of the Internship Coordinator prior to registering.

Prerequisite(s): 21 credits, including CONF 620.
Notes: Under direction of internship coordinator, students spend at least 160 hours on project involving study, resolution of conflict for each 3-credit internship.

Schedule Type: INT
Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 1-6
Grading: Graduate Special

CONF 695 - Selected Topics

Credits: 3
Repeatable within Term for Credit
Offered by School for Conflict Analysis and Resolution
Topics vary; announced each academic year.

Schedule Type: LEC,
SEM
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CONF 697 - Directed Readings and Research

Credits: 1-3
Repeatable within Term for Credit
Offered by School for Conflict Analysis and Resolution
Independent reading at master's level on specific topic related to conflict analysis and resolution, as agreed to by student and faculty member.

Notes: May be repeated up to 6 credits.

Schedule Type: IND,
LEC
Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 1-3
CONF 702 - Peace Studies

Credits: 3  
Not Repeatable for Credit  
Offered by School for Conflict Analysis and Resolution

Examines diverse meanings of peace, conflict, and violence, and then reviews different issues relevant to understanding peace and conflict, including the sources of war, poverty and economic disparities, and ecological degradation. Other topics to be covered are peace keeping, peace building, sustainable development, ecological preservation, nonviolence, and peace movements.  
Designated a Green Leaf Course.

Schedule Type: LEC  
Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0

CONF 704 - Narrative Approaches to Conflict Analysis

Credits: 3  
Not Repeatable for Credit  
Offered by School for Conflict Analysis and Resolution  
This course provides participants with the analytic tools needed to conduct their own research on conflict and conflict resolution, using a narrative perspective. This course enables students to a) review the key narrative research in the field of conflict resolution; b) design a narrative analysis of conflict; c) conduct a narrative analysis of conflicts.

Corequisite(s): CONF 501, 801, or permission by instructor.

Schedule Type: LEC  
Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0

CONF 705 - Conflict and Discourse Analysis

Credits: 3  
Not Repeatable for Credit  
Offered by School for Conflict Analysis and Resolution  
The study of discourse, culture, narratives and public interpretations are becoming ever more important to the field of Conflict Analysis and Resolution. In this class we explore these concepts as they have been used in cutting edge approaches to the analysis and resolution of conflict.

Corequisite(s): CONF 501, 801 , or permission by instructor.

Schedule Type: LEC  
Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0
CONF 706 - Ethics and Conflict

Credits: 3
Not Repeatable for Credit
Offered by School for Conflict Analysis and Resolution
Students explore issues and controversies in our field about what is just and unjust, morally right and wrong, and good and bad. Such issues are relevant to analysis and practice before, during, after the occurrence of conflict; The major topics include: validity of pacifism, the notions of a just war, the challenges of genocide prevention, non-violent resistance, humanitarian interventions, and human rights activism.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Summer

CONF 707 - Gender and Violence

Credits: 3
Not Repeatable for Credit
Offered by School for Conflict Analysis and Resolution
This course will address gendered dimensions of violent conflict and its transformation. Key themes to be explored include gender and post-conflict justice and reconciliation; the gendered politics of memory, speech and representation; militarism and masculinity; sexual violence and discourses of trauma, victimization and agency; and the ethics and politics of analytic and practice approaches. Case studies will include the partition of India/Pakistan; wartime sexual assault in Bosnia/the DRC; and domestic violence in the U.S. and South Asia.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Summer

CONF 708 - Identity and Conflict

Credits: 1-3
Not Repeatable for Credit
Offered by School for Conflict Analysis and Resolution
Explores complex interrelations of social identity and postmodern conflicts in society. Emphasizes the role of identity in processes of conflict resolution and transformation. Critical rethinking of ethnic, national, and religious identities as both generators and outcomes of conflict are an important part of the course. Extends knowledge on structure and dynamics of identity-based conflicts and develops a framework for their resolution. Course includes lectures, simulations, and case studies.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
CONF 709 - War, Violence, and Conflict Resolution

Credits: 3  
Not Repeatable for Credit  
Offered by School for Conflict Analysis and Resolution  
Considers various theories, causes, and conditions of violence, and applies them to variety of cases: family abuse, religious and ethnic violence, terrorism, revolution, and warfare. Applies insights from study of initiation, escalation, management, resolution, and prevention of violence to theories about resolving deep rooted conflicts.

Prerequisite(s): CONF 501 or 801  
Schedule Type: LEC  
Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0

CONF 720 - Ethnic and Cultural Factors in Conflict Resolution

Credits: 1-3  
Not Repeatable for Credit  
Offered by School for Conflict Analysis and Resolution  
Examines the role culture plays in genesis, structuring, and resolution of processes of conflict within and between groups. Special attention to ethnicity and other subcultural markers of identity in complex social systems as generators and outcomes of conflict. Explores relevance of variables to success or failure of conflict resolution.

Prerequisite(s): CONF 501 or 801  
Schedule Type: LEC  
Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0

CONF 721 - Conflict and Race

Credits: 3  
Not Repeatable for Credit  
Offered by School for Conflict Analysis and Resolution  
Addresses historic analyses of racial and ethnic identity conflicts and their resolution.

Equivalent to SOCI 523

Prerequisite(s): CONF 501 or 801  
Schedule Type: LEC  
Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0

CONF 722 - Conflict and Religion

Credits: 3  
Not Repeatable for Credit
Offered by School for Conflict Analysis and Resolution
Explores role of religious ideas, practices, and organizations in conflict, war, peace making, and conflict resolution.

**Prerequisite(s):** CONF 501 or 801
**Schedule Type:** LEC
**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0

CONF 723 - Conflict and Gender

Credits: 3
Not Repeatable for Credit
Offered by School for Conflict Analysis and Resolution
Examines constructs of gender and conflict as they relate to critical analysis of theory and practice. Reviews feminist theories for contributions to social and conflict theories. Uses narratives to explore how gender, power dynamics interact in conflict.

**Prerequisite(s):** CONF 501 or 801
**Schedule Type:** LEC
**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0

CONF 724 - Conflict and 'Isms'

Credits: 3
Not Repeatable for Credit
Offered by School for Conflict Analysis and Resolution

**Prerequisite(s):** CONF 501 or 801; 720 recommended.
**Schedule Type:** LEC
**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0

CONF 725 - Conflict and Spirituality

Credits: 3
Not Repeatable for Credit
Offered by School for Conflict Analysis and Resolution

**Prerequisite(s):** CONF 501 or 801.
**Schedule Type:** LEC
**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0

CONF 726 - Moral and Philosophical Foundations of Conflict
CONF 728 - Human Rights Theory and Practice in Comparative Perspective

Credits: 3
Not Repeatable for Credit
Offered by School for Conflict Analysis and Resolution
Introduces major controversies and debates surrounding use of human rights theory and practice cross-culturally. After basic study of human rights philosophy, uses case studies from around the world to examine problems and potential of human rights in today's globalized world.

Prerequisite(s): CONF 501 or 801, or permission of instructor
Schedule Type: SEM
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CONF 729 - Approaches to Violence

Credits: 3
Not Repeatable for Credit
Offered by School for Conflict Analysis and Resolution
Explores violence from variety of intellectual and political perspectives. Readings are wide-ranging and interdisciplinary, addressing levels of analysis from biological to nation-state and transnational processes.

Prerequisite(s): CONF 501 or 801
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CONF 730 - Structural Sources of Conflict

Credits: 3
Not Repeatable for Credit
Offered by School for Conflict Analysis and Resolution
Examines how structures and institutions affect behavior and give rise to conflictual relationships at all social levels, from interpersonal to the international. Explores role of conflict resolution as political process providing opportunities for nonviolent system change.
CONF 731 - Conflict in Organizations

Credits: 3
Not Repeatable for Credit
Offered by School for Conflict Analysis and Resolution
Explores intersection and dynamics of organizational behavior and dimensions of conflict. Involves theoretical perspectives and cases examining conflict analysis and resolution. Practices strategies for prevention and intervention. Field research in greater metropolitan area integrates course content.

Prerequisite(s): CONF 501 or 801
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CONF 732 - Conflict in Development

Credits: 3
Not Repeatable for Credit
Offered by School for Conflict Analysis and Resolution
Examines the relationship between processes of political and economic change and conflict; the relationship between democratization and conflict; the relationship between structural adjustment policies and conflict; and the challenges of postconflict reconstruction.

Prerequisite(s): CONF 501 or 801
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CONF 733 - Law and Justice from a Conflict Perspective

Credits: 1-3
Not Repeatable for Credit
Offered by School for Conflict Analysis and Resolution
Contrasts legal processes and institutions with alternative approaches to dispute resolution. Defines and distinguishes among law, "alternative dispute resolution," and problem-solving analysis as methods for resolving rather than controlling conflict. Examines to what extent legal procedures are truly applicable to resolving deep-rooted conflict.

Prerequisite(s): CONF 501 or 801
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
CONF 734 - Conflict and Crime

Credits: 3
Not Repeatable for Credit
Offered by School for Conflict Analysis and Resolution
Prerequisite(s): CONF 501 or 801 or permission of instructor.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CONF 735 - Global Context of Conflict

Credits: 3
Not Repeatable for Credit
Offered by School for Conflict Analysis and Resolution
Advances skills and knowledge base in critical analysis and creative problem-solving. Examines root causes of conflict in global context in terms of gender inequality, cultural differences, unequal North and South relations, militarism, economic oppression, genocide, maldevelopment, religious and ethnic struggles, and environmental scarcity. Students develop their own conceptual tool boxes to analyze conflicts in different parts of the world.

Prerequisite(s): CONF 501 or 801
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CONF 736 - Globalization and International Conflict

Credits: 3
Not Repeatable for Credit
Offered by School for Conflict Analysis and Resolution
Explores economic, political, social, and cultural meanings of globalization; how they affect conflict processes at international level; and when and under what conditions globalization promotes cooperation or conflict.

Prerequisite(s): CONF 501 or 801.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CONF 737 - Societies, Globalization and Conflict

Credits: 3
Not Repeatable for Credit
Offered by School for Conflict Analysis and Resolution
Prerequisite(s): CONF 501 or permission of instructor.
CONF 739 - Collective Action, Social Movements, and Globalization

Credits: 3
Not Repeatable for Credit
Offered by School for Conflict Analysis and Resolution
Explores how people translate underlying grievances into collective action. Examines how groups organize, frame, and develop strategies and tactics to pursue agendas, and how processes of globalization have influenced social movement dynamics.

Prerequisite(s): CONF 501 or 801.

CONF 740 - Conflict Roles, Resources, and Ethics

Credits: 3
Not Repeatable for Credit
Offered by School for Conflict Analysis and Resolution
Analyzes and critiques nature and roles in conflicts. Uses theoretical perspectives, case histories to understand how settings affect roles. Includes ethical assessment of interventions in a variety of conflict settings.

Prerequisite(s): CONF 501 or 801, 713

CONF 741 - Negotiations

Credits: 3
Not Repeatable for Credit
Offered by School for Conflict Analysis and Resolution
Uses negotiating experiences to construct framework for thinking about and analyzing negotiation processes. Framework then used to organize review of research literature on rhythms and patterns of negotiation and to analyze actual cases. Interweaves exercises, class projects with state-of-the-art concepts and findings.

Prerequisite(s): CONF 501 or 801 or permission of instructor.

CONF 742 - Environment and Policy
CONF 743 - Dynamics of Conflict Termination

Credits: 3
Not Repeatable for Credit
Offered by School for Conflict Analysis and Resolution

Prerequisite(s): CONF 501 or 801 or permission of instructor.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CONF 744 - Peace Keeping

Credits: 3
Not Repeatable for Credit
Offered by School for Conflict Analysis and Resolution

Prerequisite(s): CONF 501 or 801.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CONF 745 - Leadership Roles in Conflict and Conflict Resolution

Credits: 3
Not Repeatable for Credit
Offered by School for Conflict Analysis and Resolution

Leadership responses to conflict are affected by several variables, including race, ethnicity, and gender. Explores roles of leadership decision-making styles as agents of conflict across range of conflict scenarios at interpersonal, community, organizational, and international levels.

Prerequisite(s): CONF 501 or 801

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
CONF 746 - Peace Building

Credits: 3
Not Repeatable for Credit
Offered by School for Conflict Analysis and Resolution
Building on initiatives of United Nations and other multilateral organizations, explores dynamics of post-conflict peace building. Prepares students of conflict resolution to play innovative roles in reconstruction of civil societies.

Prerequisite(s): CONF 501 or 801
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CONF 747 - Reconciliation

Credits: 3
Not Repeatable for Credit
Offered by School for Conflict Analysis and Resolution
Explores processes of acknowledgment, reconciliation, forgiveness, and restitution. Reviews literature, case studies, and other research to assess applicability and impact of these efforts.

Prerequisite(s): CONF 501 or 801
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CONF 748 - Comparative Peace Processes

Credits: 3
Not Repeatable for Credit
Offered by School for Conflict Analysis and Resolution
Compares case studies drawn from actual peace processes, both successful and unsuccessful, to illuminate principles and complexities.

Prerequisite(s): CONF 501 or 801, and 601 or 803.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CONF 749 - World Religions, Violence, and Conflict Resolution

Credits: 1-3
Not Repeatable for Credit
Offered by School for Conflict Analysis and Resolution
Examines how world religions play a role in conflict and conflict resolution. Investigates how values, world view, and hermeneutics influence strategies for successful conflict interventions.
CONF 750 - Evaluation of Conflict Resolution Initiatives

Credits: 3
Not Repeatable for Credit
Offered by School for Conflict Analysis and Resolution
Examination of models and methodologies for evaluation of conflict resolution initiatives. Evaluation approaches taught will include action evaluation, program evaluation, formative evaluation, and summative evaluation. Students will be expected to complete an evaluation design for an actual conflict resolution-related initiative as the major course requirement and participate in the class evaluation project.

Prerequisite(s): CONF 501 or 801.
Schedule Type: SEM
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CONF 751 - Political Economy of Civil War and Peacebuilding I

Credits: 3-6
Not Repeatable for Credit
Offered by School for Conflict Analysis and Resolution
The course will cover the latest research, theories, and case analysis on civil wars and peacebuilding, including topics such as: The social, economic, and political institutional origins of conflict; The roles of resources, institutions, and social formations in shaping dynamics of civil war and other related forms of contentious politics; War termination and comparative peace processes; Components and dynamics of peacebuilding and the relationships among peacebuilding, democratization, and state-building; Roles of third parties in promoting negotiations, peace implementation and sustainable peacebuilding and reconciliation. Case studies of contemporary civil wars will be used to illustrate and test these conceptual frameworks. This course is the first in a year-long seminar. Students are required to take the second course in the seminar CONF 752.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

CONF 752 - Political Economy of Civil War and Peacebuilding II

Credits: 3-6
Not Repeatable for Credit
Offered by School for Conflict Analysis and Resolution
The course will cover the latest research, theories, and case analysis on civil wars and peacebuilding, including topics such as: The social, economic, and political institutional origins of conflict; The roles of resources, institutions, and social formations in shaping dynamics of civil war and other related forms of contentious politics; War termination and comparative peace processes;
Components and dynamics of peacebuilding and the relationships among peacebuilding, democratization, and state-building; Roles of third parties in promoting negotiations, peace implementation and sustainable peacebuilding and reconciliation. Case studies of contemporary civil wars will be used to illustrate and test these conceptual frameworks. This course is the second in a year-long seminar. Students are required to have taken CONF 751 in the previous semester.

**Prerequisite(s):** CONF 751.

**Schedule Type:** LEC

**Hours of Lecture or Seminar per week:** 3

**Hours of Lab or Studio per week:** 0

**When Offered:** Fall

---

**CONF 753 - Post-Conflict Contexts: Between Global and Local**

Credits: 3

Not Repeatable for Credit

Offered by School for Conflict Analysis and Resolution

Focuses on the aftermath of violent conflict, attending to issues of structural inequality, memory, narrative, gender, trauma, culture and identity. Critically evaluates theories and practices of transitional justice and post-conflict peacebuilding, including justice, reparation, truth-telling, reconciliation, memorialization and psychosocial repair. Considers forms of social change and governance that emerge through post-conflict interventions, and explores dynamic frictions between globalizing models and local concerns.

**Schedule Type:** LEC

**Hours of Lecture or Seminar per week:** 3

**Hours of Lab or Studio per week:** 0

**When Offered:** Fall, Summer

---

**CONF 754 - Micro-theories of Conflict**

Credits: 3

Not Repeatable for Credit

Offered by School for Conflict Analysis and Resolution

The goal of this course is to explore theoretical approaches to psychological processes, personality, in-group and intergroup dynamics, and social processes in the society as a whole with the emphasis on their role in the processes of conflict resolution and transformation. Critical understanding of psychological and socio-psychological phenomena as both generators and outcomes of conflict will be an important part of the course. This course has three main parts: psychological processes, approaches to person, and group processes and society.

**Corequisite(s):** CONF 501.

**Schedule Type:** LEC

**Hours of Lecture or Seminar per week:** 3

**Hours of Lab or Studio per week:** 0

**When Offered:** Fall

---

**CONF 755 - Transforming Conflict through Insight**
The Insight approach is best understood as an applied human science. Like other applied sciences, it requires students to master an explanatory framework that enables them to frame their questions, formulate their hypotheses, verify their findings, and plan their actions. Thus, the course is designed follow an activity-based, problem-solving approach to learning and using the Insight approach. The objective is to enable students to master the Insight approach by putting it to work, with course meetings build around analytical exercises and activities designed to illuminate assigned readings.

**Corequisite(s):** CONF 501.

**Schedule Type:** LEC  
**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall

## CONF 756 - Addressing Intractable Conflict

Credits: 3  
Not Repeatable for Credit  
Offered by School for Conflict Analysis and Resolution  
This course is about the biggest problems facing our communities, our nation, and our world today. Our communities, our nations (the US and others), and the world have proven remarkably unable to "solve" any of these problems. Why? We assert it is because they are all underlain by a more fundamental problem — the inability to constructively deal with difficult and intractable conflicts. These conflicts prevent us as individuals, organizations, and governments (at all levels) from making wise decisions or taking effective action that will address any of these pressing problems.

**Corequisite(s):** CONF 501.

**Schedule Type:** LEC  
**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall

## CONF 757 - Conflict and Literature

Credits: 3  
Not Repeatable for Credit  
Offered by School for Conflict Analysis and Resolution  
The purpose of this course is to teach students to read/interpret written and oral texts; explore what imaginative literature can teach us about the causes, motives, dynamics, and possibilities of resolving violent social conflicts; deepen our understanding of the human dimensions of conflicts involving mass movements for social transformation; and practice creating imaginative works of our own.

**Corequisite(s):** CONF 501.

**Schedule Type:** LEC  
**Hours of Lecture or Seminar per week:** 3
CONF 758 - Social Dynamics of Terrorism

Credits: 3
Not Repeatable for Credit
Offered by School for Conflict Analysis and Resolution
Presents students with analytical frameworks to account for terrorist acts and organizations and explore social dynamics underlying the development of, and response to, terrorism. Topics may include recruitment into violent groups, counterterrorism and human rights concerns, role of religious and political ideologies in terrorism and counterterrorism, media coverage of terrorism, and effects of terrorism on social structures and processes.

Corequisite(s): CONF 501 or CONF 801.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring

CONF 795 - Professional Development Seminars

Credits: 1-2
Repeatable within Term for Credit
Offered by School for Conflict Analysis and Resolution
These 1- and 2-credit courses are scheduled non-conventionally using weekends, concentrated presentations, and intersession periods to develop advanced professional skills. Possible topics include marketing conflict resolution services, academic course design, training design, mediation, facilitation, family practice, fundraising, writing for publication, advanced field research techniques, and grassroots applications of conflict resolution.

Prerequisite(s): CONF 501 or 801, or permission of instructor.
Notes: May be repeated.

Schedule Type: LEC, SEM
Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0

CONF 797 - Proposal Development

Credits: 1
Not Repeatable for Credit
Offered by School for Conflict Analysis and Resolution
Covers development of research proposal for master's thesis, including framing a question, literature review, and designing appropriate methodology. Students form master's thesis committee and review Human Subjects Review Board's guidelines and procedures.
Corequisite(s): CONF 501 and 610

Schedule Type: LEC
Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0
Grading: Satisfactory/No Credit only
When Offered: Fall, Spring

CONF 799 - Thesis

Credits: 1-6
Repeatable within Term for Credit
Offered by School for Conflict Analysis and Resolution
Two semesters, usually taken as 3 credits per semester. Original research or analysis under direction of thesis committee.

Prerequisite(s): CONF 501, 713, 610.
Schedule Type: IND, INT
Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 1-6
Grading: Satisfactory/No Credit

CONF 801 - Introduction to Conflict Analysis and Resolution

Credits: 3
Not Repeatable for Credit
Offered by School for Conflict Analysis and Resolution
Introduces field of conflict analysis and resolution for doctoral students. Examines definitions of conflict and diverse views of resolution. Explores thinking about human behavior and social systems as they relate to origins and role of conflict in violent and peaceful social change. Considers appropriate responses to conflict at interpersonal, intergroup, industrial, communal, and international levels.

Notes: Prerequisite or corequisite for all PhD CONF students

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CONF 802 - Theories of the Person

Credits: 3
Not Repeatable for Credit
Offered by School for Conflict Analysis and Resolution
Understanding human conflict requires knowledge of human behavior, motivation, and perception. Reviews and critically analyzes several psychological theories for application to conflict analysis and resolution theory and practice.
CONF 803 - Structural Theories

Credits: 3
Not Repeatable for Credit
Offered by School for Conflict Analysis and Resolution
Understanding social conflict and potential for conflict resolution requires that both conflict and cooperation be perceived in relation to patterns of social change. Reviews and critiques significant theories of social change to establish a basis for creative conflict analysis and resolution.

Prerequisite(s): CONF 801.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CONF 804 - Alternate Theoretical Foundations

Credits: 3
Not Repeatable for Credit
Offered by School for Conflict Analysis and Resolution
Familiarizes students with the ideas generated by the Frankfurt School of social theorists and others who have extended or altered these ideas. Students will use these insights to deepen an understanding of serious social conflicts and to explore the implications of critical theories for conflict resolution processes.

Corequisite(s): CONF 801
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CONF 811 - Quantitative Foundations

Credits: 3
Not Repeatable for Credit
Offered by School for Conflict Analysis and Resolution
Building on logic of inquiry, introduces steps in research process to prepare dissertation and implement published research. Covers wide array of quantitative research approaches in social sciences, with emphasis on conflict analysis.

Prerequisite(s): CONF 801.
Schedule Type: LEC
CONF 812 - Qualitative Foundations: Social Sciences

Credits: 3
Not Repeatable for Credit
Offered by School for Conflict Analysis and Resolution
Continuation of steps in research process to prepare dissertation and implement published research. Builds on CONF 811 by examining qualitative research approaches used in social sciences, with emphasis on conflict analysis.

Prerequisite(s): CONF 801.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CONF 813 - Qualitative Foundations: Humanities

Credits: 3
Not Repeatable for Credit
Offered by School for Conflict Analysis and Resolution
Explores qualitative research design as it pertains to the humanities, including the methods and epistemology behind the various issues likely to emerge in the process of conducting research. In addition to material on research design and methodology, reading assignments include several monographs that employ different qualitative methodologies.

Prerequisite(s): CONF 801
Co-requisite(s): CONF 801
Schedule Type: SEM
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CONF 820 - Reflective Practice in Interpersonal-Multiparty Conflicts

Credits: 3
Not Repeatable for Credit
Offered by School for Conflict Analysis and Resolution
Introductory skill-building course integrating conflict theory and practice using reflective practitioner model. Students learn necessary skills for third-party facilitation and mediation, including active listening, empathy, paraphrasing, reframing, and negotiation, in addition to analytical skills of problem solving and creation of transformational processes. Cases for practice focus on interpersonal and intergroup conflict.

Co-requisite(s): CONF 801.
Schedule Type: LAB
Hours of Lecture or Seminar per week: 0
CONF 821 - Reflective Practice in Organizational or Community Conflict

Credits: 3
Not Repeatable for Credit
Offered by School for Conflict Analysis and Resolution
Moves from conflicts that are simply described to those with multilevel components, such as community and organizational conflicts. Expands skills acquired in CONF 820 by adding recording chronology, identifying roles played by various participants, observing turning points in process, and precisely stating agreed-on solution.

Corequisite(s): CONF 801 and CONF 820.

Schedule Type: LAB
Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 3
When Offered: Fall, Spring

CONF 822 - Reflective Practice in International Conflict and Civil Strife

Credits: 3
Not Repeatable for Credit
Offered by School for Conflict Analysis and Resolution
Continues study of resolution processes as applied to highly complex systems, especially where one party denies legitimacy of existing political authority. Considers third-party options for intervention in revolutionary and international conflicts, building communication and trust among parties, and implementing agreements.

Corequisite(s): CONF 801 and CONF 820.

Schedule Type: LAB
Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 3
When Offered: Fall, Spring.

CONF 890 - Practicum in Conflict Analysis and Resolution

Credits: 3
Repeatable within Degree for Credit
Offered by School for Conflict Analysis and Resolution
In-depth field study of ongoing conflict situations. Design and delivery of intervention processes to manage or resolve conflicts.

Prerequisite(s): CONF 801 and 713.
Schedule Type: INT
Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 5
Grading: Graduate Special
CONF 897 - Directed Reading

Credits: 1-3
Repeatable within Degree for Credit
Offered by School for Conflict Analysis and Resolution
Independent reading at doctoral level on a specific topic related to conflict and conflict resolution as agreed to by student and faculty member.

Schedule Type: IND
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CONF 900 - Integrating Theory, Practice, and Method in Conflict Analysis

Credits: 3
Not Repeatable for Credit
Offered by School for Conflict Analysis and Resolution
Analyzes theoretical basis undergirding methods of research in conflict resolution. Explores how theory is built through reciprocal influence of research and practice. Assists students to fill in gaps in their knowledge and prepare for comprehensive examinations. Prepares students to write integrated research proposals.

Prerequisite(s): CONF 801 and 802, and at least 9 additional credits of required doctoral courses
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CONF 901 - Theory Development

Credits: 3
Not Repeatable for Credit
Offered by School for Conflict Analysis and Resolution
Prerequisite(s): CONF 801, 802, or permission of instructor.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CONF 998 - Doctoral Dissertation Proposal

Credits: 1-6
Repeatable within Degree for Credit
Offered by School for Conflict Analysis and Resolution
Work on research proposal that forms basis for doctoral dissertation.

Prerequisite(s): Successful completion of all course work and doctoral qualifying exams
CONF 999 - Doctoral Dissertation Research

Credits: 1-12
Repeatable within Degree for Credit
Offered by School for Conflict Analysis and Resolution
Research on approved dissertation topic under direction of committee. Student's dissertation proposal must be approved before registering for 999.

Notes: At least 12 credits of 998 and 999 must be accumulated toward degree.

Conservation Studies (CONS)

Offered by the Provost's Office

CONS 100 - Introduction to Field Conservation Ecology

Credits: 2
Not Repeatable for Credit
Offered by Smithsonian Mason School of Conservation
In this immersive I-week experience, students will acquire firsthand exposure to fieldwork in conservation and how conservation professionals contribute to survival of species in natural habitats. Through a combination of lectures, discussions, fieldwork and outdoor adventure students will be introduced to major concepts of ecology (including diversity, succession, species interactions, communities, populations and ecosystems) in the context of species and habitat conservation.

Prerequisite(s): Participation in the Washington Youth Summit on the Environment.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 0

CONS 110 - Special Topics in Conservation

Credits: 1-3
Repeatable within Degree for Credit
Offered by Smithsonian Mason School of Conservation

Students acquire first-hand exposure to a specific topic in conservation and how conservation professionals contribute to the long-term survival of species. Through a combination of lectures, discussions, and field/lab work, students explore current questions, methods and applications related to a particular topic in conservation.

**Prerequisite(s):** Varies with topics.

**Notes:** Course Format: Sections of this Smithsonian-Mason School of Conservation course will be taught as an intensive, mixed-format (lectures, lab exercises, field exercises) offerings, in residential, full-day, 1-3-week sessions held at the 3,200 acre Smithsonian Conservation Biology Institute in Front Royal, VA. Students may also be required to complete pre-course reading assignments, and carry out and submit final projects during (or within six weeks after) the onsite session.

**Schedule Type:** LEC  
**Hours of Lecture or Seminar per week:** 1-3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall, Summer, Spring

### CONS 320 - Conservation in Practice

Credits: 3  
Not Repeatable for Credit  
Offered by Smithsonian Mason School of Conservation  
Work with a conservation mentor in a practicum experience. Create a portfolio documenting professional development.

**Prerequisite(s):** 60 credits and college level coursework in the biological or environmental sciences.

**Notes:** Must be taken concurrently with CONS 401, CONS 402, CONS 410, and CONS 490 or CONS 403, CONS 404, CONS 411, and CONS 491. Only offered through the Smithsonian-Mason Semester.

**Schedule Type:** LEC  
**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

### CONS 401 - Conservation Theory

Credits: 3  
Not Repeatable for Credit  
Offered by Smithsonian Mason School of Conservation

Introduces the field of conservation biology and science-based management of threatened wildlife, habitats, and human landscapes. Provides theoretical background for understanding the importance of biodiversity conservation and sustainability.  
Designated a Green Leaf Course.

**Prerequisite(s):** 60 credits and college level coursework in the biological or environmental sciences.

**Notes:** Must be taken concurrently with CONS 320, CONS 402, CONS 410, and CONS 490. Only offered through the Smithsonian-Mason Semester. Students cannot get credit for this course and Biology 318 or NCLC 401.

**Schedule Type:** LEC  
**Hours of Lecture or Seminar per week:** 2  
**Hours of Lab or Studio per week:** 1
CONS 402 - Applied Conservation

Credits: 4  
Not Repeatable for Credit  
Offered by Smithsonian Mason School of Conservation

A practical scientific approach to the nature of biodiversity and species loss. Students participate in field conservation exercises in a variety of settings, as well as endocrine and reproductive technology labs. Students apply field and laboratory experiences to understanding science's connection to management decision-making for conservation. Designated a Green Leaf Course.

Prerequisite(s): 60 credits and college level coursework in the biological or environmental sciences.  
Notes: Must be taken concurrently with CONS 320, CONS 401, CONS 410, and CONS 490. Only offered through the Smithsonian-Mason Semester.

Schedule Type: LAB, LEC  
Hours of Lecture or Seminar per week: 2  
Hours of Lab or Studio per week: 2

CONS 403 - Ecology and Conservation Theory

Credits: 3  
Not Repeatable for Credit  
Offered by Smithsonian Mason School of Conservation

Students learn ecological theories that underlie successful conservation practice. Content includes an in-depth examination of factors that influence the distribution and abundance of organisms within landscapes across temporal and spatial scales. In individual and group activities, students review conservation case studies, interpret scientific data, and apply their analysis to conservation scenarios at many scales. Designated a Green Leaf Course.

Prerequisite(s): Admission into the Smithsonian-Mason Monitoring Semester.  
Corequisite(s): Enrollment in the Smithsonian-Mason Monitoring Semester.

Schedule Type: LAB, LEC  
Hours of Lecture or Seminar per week: 0-3  
Hours of Lab or Studio per week: 0-3

CONS 404 - Monitoring and Assessment of Biodiversity

Credits: 4  
Not Repeatable for Credit  
Offered by Smithsonian Mason School of Conservation
In lab and field experiences, students learn practical techniques for the assessment, monitoring and conservation of species and habitats. Students practice sampling species and learn to evaluate the effectiveness of those techniques. Through individual and group projects, students collect, analyze data across a variety of temporal and spatial scales.

Designated a Green Leaf Course.

**Prerequisite(s):** Admission into the Smithsonian-Mason Monitoring Semester.

**Corequisite(s):** Enrollment in the Smithsonian-Mason Monitoring Semester.

**Schedule Type:** LAB, LEC

**Hours of Lecture or Seminar per week:** 3

**Hours of Lab or Studio per week:** 3

### CONS 410 - Human Dimensions in Conservation

Credits: 3

Not Repeatable for Credit

Offered by Smithsonian Mason School of Conservation

Provides sociological, local and global perspectives on conservation issues including adaptive management, conflict resolution, environmental economics, sustainability, public policy, environmental values and public opinion, and conservation ethics.

Designated a Green Leaf Course.

Fulfills Mason Core requirement in social and behavioral science.

**Prerequisites:** 60 credits and college level coursework in the biological or environmental sciences.

**Notes:** Must be taken concurrently with CONS 320, CONS 401, CONS 402, and CONS 490. Only offered through the Smithsonian-Mason Semester.

**Schedule Type:** LEC

**Hours of Lecture or Seminar per week:** 3

**Hours of Lab or Studio per week:** 0

### CONS 411 - Science Communication for Conservation

Credits: 3

Not Repeatable for Credit

Offered by Smithsonian Mason School of Conservation

Addresses the need for clear, direct and proactive communication of scientific processes. Students design communication strategies for diverse audiences and learn skills to engage stakeholders in dialogue related to specific conservation issues. Through individual and group activities that emphasize written, visual and oral communications techniques, students learn how the messages can affect people.

Designated a Green Leaf Course.

**Prerequisite(s):** Admission into the Smithsonian-Mason Monitoring Semester.

**Corequisite(s):** Enrollment in the Smithsonian-Mason Monitoring Semester.
CONS 420 - Human-Wildlife Conflict

Credits: 3
Not Repeatable for Credit
Offered by Smithsonian Mason School of Conservation
Covers the impact of human-wildlife conflict on conservation efforts and human health and well being.

CONS 490 - RS: Integrated Conservation Strategies

Credits: 3
Not Repeatable for Credit
Offered by Smithsonian Mason School of Conservation

Integrates the course work of the Smithsonian-Mason Semester through study of current conservation issues. Students incorporate interdisciplinary aspects of conservation into a summative group case study on a chosen conservation issue and present formally before a faculty panel.
Designated a Green Leaf Course.
Fulfills Mason Core requirement in synthesis.
Designated as a research and scholarship intensive course.

Prerequisite(s): Junior standing and a college level biological or environmental science course
Notes: Must be taken concurrently with CONS 320, CONS 401, CONS 402, and CONS 410. Only offered through the Smithsonian-Mason Semester.

CONS 491 - RS: Comprehensive Conservation Planning

Credits: 3
Not Repeatable for Credit
Offered by Smithsonian Mason School of Conservation
Students construct a synthesis project integrating the conservation theory, application, and communications techniques presented throughout the semester. With a mentor, students develop a monitoring and assessment plan for a species or habitat of conservation concern, working individually and in teams. This plan includes background, measurable objectives, sampling strategies, proposed data analysis and a communications and media plan.

Designated a Green Leaf Course.

Fulfills Mason Core requirement in synthesis.

Designated as a research and scholarship intensive course.

**Prerequisite(s):** Admission into the Smithsonian-Mason Monitoring Semester.
**Corequisite(s):** Enrollment in the Smithsonian-Mason Monitoring Semester.

**CONS 497 - Special Topics in Conservation**

Credits: 1-3
Repeatable within Degree for Credit
Offered by Smithsonian Mason School of Conservation
Topics of current relevance to the field of conservation.

**Schedule Type:** LEC
**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0

**CONS 498 - Internship**

Credits: 1-3
Repeatable within Degree for Credit
Offered by Smithsonian Mason School of Conservation
Directed readings and final reflective paper or project in conjunction with an internship subject to instructor approval. Permission to enroll must be obtained from the Mason Center for Conservation Studies at least two weeks prior to the start of the semester.

**Schedule Type:** INT
**Hours of Lecture or Seminar per week:** 1-3
**Hours of Lab or Studio per week:** 1-6

**CONS 499 - Independent Study/Research**
An independent project or directed exploration into an area of conservation not covered by other courses.

Prerequisite(s): Permission of instructor.
Schedule Type: IND
Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 1-12

CONS 620 - Spatial Ecology, Geospatial Analysis & Remote Sensing for Conservation

Credits: 3
Not Repeatable for Credit
Offered by Smithsonian Mason School of Conservation
Teaches students to use spatial ecology, geospatial analysis, and remote sensing tools to assess and model species distribution and habitat use in dynamic landscapes. Includes computer and field labs with examples using data from Smithsonian research.

Notes: Offered through the Mason Center for Conservation Studies in cooperation with the Smithsonian Conservation Biology Institute on site in Front Royal, VA. This course is not available to students pursuing a degree at George Mason without prior written approval of the graduate director of the student's program.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CONS 625 - Statistics for Ecology and Conservation Biology

Credits: 3
Not Repeatable for Credit
Offered by Smithsonian Mason School of Conservation
Provides an overview of experimental design and analysis techniques used in cutting-edge ecological research and conservation. Focuses on increasing knowledge of statistical tests, interpretation of results, and ability to disseminate and clearly explain these results. Students gain an overview of applied monitoring and analysis techniques such as distance sampling, genetic analysis, niche and species distribution modeling, and spatial analysis.

Prerequisite(s): Basic statistics course
Notes: Offered through the Mason Center for Conservation Studies in cooperation with the Smithsonian Conservation Biology Institute on site in Front Royal, VA. This course is not available to students pursuing a degree at George Mason without prior written approval of the graduate director of the student's program.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
CONS 630 - Species Monitoring & Conservation

Credits: 3
Repeatable within Degree for Credit
Offered by Smithsonian Mason School of Conservation
Explores monitoring and conservation research methods and approaches for specific taxa through lectures, case studies, lab exercises, and field work. Focuses on conservation science and conservation outreach techniques.

Prerequisite(s): A general biology (or relevant species-related) course and a statistics course, or permission of instructor. Prior coursework in environmental science, zoology, and ecology recommended.
Notes: May be repeated for credit with approval of the Mason Center for Conservation Studies. A maximum of 6 credits may be applied to the Applied Conservation Science Certificate.

Offered through the Mason Center for Conservation Studies in cooperation with the Smithsonian Conservation Biology Institute on site in Front Royal, VA. This course is not available to students pursuing a degree at George Mason without prior written approval of the graduate director of the student's program.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CONS 635 - Non-Invasive Genetic Techniques in Wildlife Conservation

Credits: 2
Not Repeatable for Credit
Offered by Smithsonian Mason School of Conservation
Introduces the benefits, drawbacks and applications of non-invasive genetic techniques to wildlife conservation; focuses on answering questions in animal behavior, population biology, and population management, particularly for vertebrate populations; provides hands-on experience relating to all stages of a research project utilizing modern noninvasive methods from sample collection to data analysis and interpretation.

Prerequisite(s): College-level Genetics Course AND College-level Ecology/Evolution Course.
Notes: This course is taught as an intensive, mixed-format (lectures, discussions, lab and computer exercises) offering, in a residential, full-day, 1-week session held at the Smithsonian Conservation Biology Institute in Front Royal , VA. Students also complete pre-course reading assignments, and prepare and submit final projects after the intensive onsite session has concluded.

Schedule Type: LAB,
LEC
Hours of Lecture or Seminar per week: 0-2
Hours of Lab or Studio per week: 0-2

CONS 640 - Adaptive Management for Conservation Success

Credits: 3
Not Repeatable for Credit
Offered by Smithsonian Mason School of Conservation
Sound training in adaptive management is essential for conservationists dealing with the challenges of a changing planet. In groups, students develop a management plan for a real-world conservation project using the adaptive management framework of the Open Standards for the Practice of Conservation. Students can extend the techniques to their own work after the course.
Notes: This Smithsonian-Mason Conservation Studies Program course is an intensive 2-week fulltime residential session, incorporating lectures, discussions, and student exercises on group projects. This course will be held at the Smithsonian Conservation Biology Institute's 3,200 acre facility in Front Royal, VA, USA

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CONS 645 - Estimating Animal Abundance and Occupancy

Credits: 3
Not Repeatable for Credit
Offered by Smithsonian Mason School of Conservation
Provides a strong theoretical and analytical background to the current and accepted methods of estimating population parameters including abundance, survival, and population change. The course teaches study design, implementation and analysis of data from distance sampling, mark-recapture, and occupancy modeling techniques, with a strong focus on the practical use of field data in the programs DISTANCE MARK and PRESENCE.

Prerequisite(s): College-level Introductory Statistics Course

Notes: Course Format: This course is taught as an intensive, mixed format (lectures and computer work) offering, in a residential full-day (8:30am-6pm), 2-week session held at the Smithsonian Conservation Biology Institute in Front Royal, VA. Students complete pre-course reading assignments, and are graded in participation, computer exercises and a final exam. Some night sessions occur throughout the two weeks as well.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
When Offered: Fall, Summer, Spring

CONS 660 - Effective Conservation Leadership

Credits: 3
Not Repeatable for Credit
Offered by Smithsonian Mason School of Conservation
Teaches effective leadership and management through individual assignments and group exercises. Explores international environmental and conservation case studies, offers hands-on experience to help students develop their own leadership styles.

Prerequisite(s): None; students should have a basic background in conservation, ecology, environmental sciences, or similar field.

Notes: Offered through the Mason Center for Conservation Studies in cooperation with the Smithsonian Conservation Biology Institute on site in Front Royal, VA. This course is not available to students pursuing a degree at George Mason without prior written approval of the graduate director of the student's program.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
CONS 665 - Conservation Conflict Resolution

Credits: 3  
Not Repeatable for Credit  
Offered by Smithsonian Mason School of Conservation

Focuses on approaches to cultivating sustainable conservation solutions, including determining root causes of complex conflict dynamics, designing decision-making processes to address conflict, and building mutual respect and trust among stakeholders. Employing principles and strategies developed by the Human-Wildlife Conflict Collaboration (HWCC), students learn how to resolve current conservation conflicts, anticipate arising ones, and reconcile old conflicts that impede new progress. Designated a Green Leaf Course.

Notes: Offered through the Mason Center for Conservation Studies in cooperation with the Smithsonian Conservation Biology Institute on site in Front Royal, VA. This course is not available to students pursuing a degree at George Mason without prior written approval of the graduate director of the student's program.

Schedule Type: LEC  
Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0

CONS 697 - Special Topics in Conservation

Credits: 1-3  
Repeatable within Degree for Credit  
Offered by Smithsonian Mason School of Conservation  
Topics of current relevance to the field of conservation.

Prerequisite(s): Vary with topic.  
Notes: May be repeated for credit with approval of the Mason Center for Conservation Studies. A maximum of 6 credits may be applied to the Applied Conservation Science Certificate.

Offered through the Mason Center for Conservation Studies in cooperation with the Smithsonian Conservation Biology Institute on site in Front Royal, VA. This course is not available to students pursuing a degree at George Mason without prior written approval of the graduate director of the student's program.

Schedule Type: LEC  
Hours of Lecture or Seminar per week: 1-3  
Hours of Lab or Studio per week: 0

Counseling and Development (EDCD)

Offered by the College of Education and Human Development

EDCD 525 - Advanced Human Growth and Development
EDCD 601 - Introduction to Research in Counseling

Credits: 3  
Not Repeatable for Credit  
Offered by Graduate School of Education  
Enhances knowledge of and involvement in counseling research by introducing techniques and principles to design, implement, and evaluate research projects and program development in community and school settings.

Schedule Type: LEC  
Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0

EDCD 602 - Foundations in Counseling

Credits: 3  
Not Repeatable for Credit  
Offered by Graduate School of Education  
Provides students with an introduction to the field of professional counseling. Provides graduate students in counseling with knowledge about the history and foundations of counseling, the professional identity and multifaceted role of the counselor, program mission statement and its relationship to counseling.

Schedule Type: LEC  
Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0

EDCD 603 - Counseling Theories and Practice

Credits: 3  
Not Repeatable for Credit  
Offered by Graduate School of Education  
Covers major theoretical approaches to counseling from a multicultural perspective and provides supervised introduction to basic skills.

Prerequisite(s): Admission to CNDV program; EDCD 602 (course may be taken concurrently).

Schedule Type: LEC  
Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0
EDCD 604 - Assessment and Appraisal in Counseling

Credits: 3
Not Repeatable for Credit
Offered by Graduate School of Education
Prepares students to become informed about psychological and educational tests and assessment procedures that are used and applied in a counseling context.

Prerequisite(s): Admissions to CNDV; EDCD601.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDCD 606 - Counseling Children and Adolescents

Credits: 4
Not Repeatable for Credit
Offered by Graduate School of Education
Presents theories, techniques, and counseling issues relevant to children and adolescents. Counseling lab provides practice with an emphasis on process and culturally competent counseling strategies.

Prerequisite(s): Admission to CNDV program, EDCD 525 and EDCD 603
Schedule Type: LAB,
LEC
Hours of Lecture or Seminar per week: 4
Hours of Lab or Studio per week: 0

EDCD 608 - Group Processes and Analyses

Credits: 4
Not Repeatable for Credit
Offered by Graduate School of Education
Presents theories appropriate to various types of groups and descriptions of group practices, methods, dynamics, and facilitative skills. Focuses on applying theory to practice. Includes lab.

Prerequisite(s): Admission to CNDV program, EDCD 603; and EDCD 606 or EDCD 609
Schedule Type: LAB,
LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 1

EDCD 609 - Advanced Counseling Skills and Strategies
EDCD 610 - Career and Educational Counseling

Credits: 3
Not Repeatable for Credit
Offered by Graduate School of Education
Presents theories and counseling issues relevant to career counseling in schools and community agencies.

Prerequisite(s): Admission to CNDV program; EDCD 603, 606 or 609.
Corequisite(s): EDCD 604.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDCD 611 - Introduction to Ethical and Legal Issues in School Counseling

Credits: 2
Not Repeatable for Credit
Offered by Graduate School of Education
Introduces principles, practices, and application of ethical and legal issues in school counseling.

Prerequisite(s): Admission to counseling and development program and EDCD 626
Schedule Type: LEC
Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 0

EDCD 626 - Principles and Practices of School Counseling

Credits: 3
Not Repeatable for Credit
Offered by Graduate School of Education
Introduces school counseling program development at K-12 levels. Presents philosophy, principles, and practices of effective school counseling.
EDCD 628 - Counseling and Social Justice

Credits: 3
Not Repeatable for Credit
Offered by Graduate School of Education
Discusses the Counseling and Development program's mission statement of Social Justice, Multiculturalism, Internationalism, Advocacy and Leadership. Provides an overview of theories and models of social justice, advocacy, and leadership. Examines theories and models from a multicultural perspective and discusses within the context of counseling in school and community settings. Examines the role of counselors as change agents, leaders, and advocates.

Prerequisite(s): Admission to CNDV program, EDCD 603, and 626 or 654.
Corequisite(s): EDCD 660.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDCD 652 - Introduction to Substance Abuse Counseling

Credits: 3
Not Repeatable for Credit
Offered by Graduate School of Education
Introduces substance abuse counseling. Covers addiction issues, diagnosis and treatment planning, and individual and group counseling strategies with diverse populations.

Prerequisite(s): Admission to the Counseling and Development program and EDCD 603 or concurrent.
Corequisite(s): EDCD 603

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDCD 654 - Counseling, Ethics, and Consultation in Community Agencies

Credits: 3
Not Repeatable for Credit
Offered by Graduate School of Education
Provides a foundation for engaging in counseling, consultation, and ethical decision making within agency settings. Examines the role of the community agency counselor, with attention to multicultural and social justice perspectives.

Prerequisite(s): Admission to counseling and development program and EDCD 603
Corequisite(s): EDCD 603
EDCD 656 - Diagnosis and Treatment Planning for Mental Health Professionals

Credits: 3
Not Repeatable for Credit
Offered by Graduate School of Education
Introduces students to fundamental concepts in the classification of psychopathology as well as the clinical interviewing skills necessary to apply DSM-5 diagnoses to clients in a sound and ethical manner. Incorporates an explicit focus on the role of race and culture in diagnosis and treatment.

Prerequisite(s): Admission to CNDV program, EDCD 603 (course may be taken concurrently).

EDCD 658 - Couples and Family Counseling

Credits: 3
Not Repeatable for Credit
Offered by Graduate School of Education
Introduces major approaches to counseling couples and families. Uses case studies and simulations to facilitate transition from theory to practice.

Prerequisite(s): Admission to CNDV program; EDCD 609 (may be taken concurrently).

EDCD 660 - Multicultural Counseling

Credits: 3
Not Repeatable for Credit
Offered by Graduate School of Education
Examines multicultural issues in counseling and explores the complexities of culture and its influence on the client/counselor relationship. Promotes awareness and understanding of cultural differences and their effect on the counseling relationship. Investigates variables that interact with culture that may interfere with the counseling relationship, such as historical, political, socioeconomic, psychosocial adjustment, racism, prejudice, discrimination, and oppression.

Prerequisite(s): Admission to CNDV program, EDCD 608.
EDCD 754 - Practicum in Counseling and Development

Credits: 3-6
Not Repeatable for Credit
Offered by Graduate School of Education
Provides supervised practice in counseling setting similar to setting in which student may work. Weekly graduate class emphasizes site processing.

Prerequisite(s): Completion of CNDV program except for practicum and internship; permission of advisor; overall GPA of 3.00; no grade of C in skills courses EDCD 605, 607, 608, and 610; and no more than two grades of C in any other graduate course work required by counseling and development program.
Schedule Type: INT
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 3

EDCD 755 - Practicum in Counseling

Credits: 3
Not Repeatable for Credit
Offered by Graduate School of Education
Provides supervised practice in a counseling setting similar to the setting in which the student may work with an emphasis on the counseling process.

Prerequisite(s): Completion of CNDV program course work except for EDCD 610 or electives (total credits cannot exceed 3 credits); overall GPA of 3.00; no grade lower than B in skills courses EDCD 603, 606/609 and 608; no more than two grades of C in any other graduate course work required by CNDV program; permission of advisor.
Notes: Weekly graduate class emphasizes site processing.
Schedule Type: INT
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 3
Grading: Satisfactory/No Credit
When Offered: Fall, Spring

EDCD 790 - Internship in Counseling and Development

Credits: 3-6
Not Repeatable for Credit
Offered by Graduate School of Education
Provides supervised practice in counseling setting similar to setting in which student may work. Skills and practice build on previous practicum experiences. Weekly graduate class emphasizes site processing.

Prerequisite(s): Completion of CNDV program except for internship; permission of advisor; overall GPA of 3.00; no grade of C in any skills courses EDCD 605, 607, 608, 610, and 754; no more than two grades of C in any other graduate course work required by CNDV program.
Schedule Type: INT
Hours of Lecture or Seminar per week: 3
EDCD 791 - Internship in Counseling

Credits: 3
Not Repeatable for Credit
Offered by Graduate School of Education
Provides supervised practice in a counseling setting similar to the setting in which the student may work with an emphasis on the counseling process. Builds on previous practicum experiences.

Prerequisite(s): Completion of CNDV program course work except for electives; overall GPA of 3.00; no grade lower than B in skills courses EDCD 603, 606/609, 608 and 755; no more than two grades of C in any other graduate course work required by CNDV program; permission of advisor.

Schedule Type: INT

EDCD 797 - Advanced Topics in Education

Credits: 1-6
Repeatable within Term for Credit
Offered by Graduate School of Education
See EDUC 797.

Prerequisite(s): Admission to CNDV program, EDCD 603.

Schedule Type: LEC

EDCD 894 - Advanced Family and Systems Counseling

Credits: 3
Not Repeatable for Credit
Offered by Graduate School of Education
Develops advanced level skills and competencies in the practice of family and systems counseling. Multiple theoretical models for practice in a multicultural society will be explored, as will the applications of those models in multiple professional settings.

Prerequisite(s): Admission to PhD in Counseling and Development Program.
EDCD 895 - Emerging Issues in Counseling and Development

Credits: 3
Not Repeatable for Credit
Offered by Graduate School of Education
Examines issues in counseling profession, including counseling theory and methodology, development of client groups, new roles and settings for counselors, emerging assessment procedures, new understanding of diagnosis; and impact of societal changes on counseling profession.

Prerequisite(s): Admission to PhD program, or permission of instructor.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDCD 896 - Advanced Multicultural Counseling

Credits: 3
Not Repeatable for Credit
Offered by Graduate School of Education
Focuses on advanced issues in multicultural counseling, including multicultural counseling theories, skills, assessment, supervision, research, and ethics.

Prerequisite(s): Master's degree in counseling or related counseling field from accredited institution of higher education, EDCD 660 or equivalent, EDCD 895, and admission to counseling and development PhD specialization; or permission of instructor.
Schedule Type: SEM
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDCD 897 - Advanced Group Counseling

Credits: 3
Not Repeatable for Credit
Offered by Graduate School of Education
For doctoral students who have had experience and training in group work. Provides greater understanding and advanced skill application in group dynamics, group process, and group leadership.

Prerequisite(s): Master's degree in counseling or related counseling field from accredited institution of higher education, EDCD 608 or equivalent, EDCD 895, and admission to counseling and development PhD specialization; or permission of instructor.
Schedule Type: SEM
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDCD 898 - Grant Writing and Publishing

Credits: 3
Not Repeatable for Credit
Offered by Graduate School of Education
Focuses on grant writing and publishing in counseling and psychology.

Equivalent to EFHP 880.

**Prerequisite(s):** Master's degree in counseling or related counseling field from accredited institution of higher education, EDCD 895, and admission to counseling and development PhD specialization; or permission of instructor.

**Schedule Type:** SEM
**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0

**EDCD 899 - The Theory and Practice of Counseling Supervision**

Credits: 4
Not Repeatable for Credit
Offered by Graduate School of Education
Explores counseling supervision theory from a multicultural and social justice perspective. Students will apply these theories by supervising Master's level community agency and school counseling practicum students under the supervision of the instructor.

**Prerequisite(s):** Admission to PhD in Counseling and Development Program; Master's degree in Counseling or related field, or permission of the instructor.

**Schedule Type:** LEC
**Hours of Lecture or Seminar per week:** 4
**Hours of Lab or Studio per week:** 0

**EDCD 900 - Leadership and Advocacy in the Counseling Profession**

Credits: 4
Not Repeatable for Credit
Offered by Graduate School of Education
Introduces students to broad theoretical concepts, strategies, and skills related to leadership and advocacy within the counseling profession, and will help students integrate leadership and advocacy into their professional identity.

**Prerequisite(s):** Admission to PhD in Counseling and Development Program.

**Schedule Type:** LEC
**Hours of Lecture or Seminar per week:** 4
**Hours of Lab or Studio per week:** 0
**When Offered:** Fall, Spring

**EDCD 990 - Advanced Internship in Counseling Leadership**

Credits: 3
Not Repeatable for Credit
Offered by Graduate School of Education
Provides supervised practice in counseling leadership setting or position. Emphasizes counseling leadership in practice.

**Prerequisite(s):** Admission to the Ph.D. in Education program, Counseling and Development specialization; EDCD 628 or
EDCD 895:

Notes: Biweekly class emphasizes site processing, leadership skills, and topical seminars.

Schedule Type: INT
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDCD 991 - Advanced Internship in Counseling

Credits: 6
Not Repeatable for Credit
Offered by Graduate School of Education
Provides an intensive multicultural social justice oriented field based supervised experience. Emphasizes intensive use of multicultural competencies in practice, supervision, and program development and evaluation in order to address social justice issues for clients in school or community settings.

Prerequisite(s): Admission to counseling and development PhD specialization; and EDCD 895, 896, and 628 or equivalent.

Schedule Type: INT
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

EDCD 992 - Advanced Internship in Social Justice

Credits: 3
Not Repeatable for Credit
Offered by Graduate School of Education
Provides opportunities to implement programs and strategies to affect social justice for clients in school or community settings.

Prerequisite(s): Admission to counseling and development PhD specialization, EDCD 628 or equivalent, and EDCD 895.
Notes: Biweekly class emphasizes topical seminars and supervision.

Schedule Type: INT
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
Grading: Graduate Special

Criminology (CRIM)

Offered by the College of Humanities and Social Sciences

CRIM 100 - Introduction to Criminal Justice

Credits: 3
Not Repeatable for Credit
Offered by Criminology, Law and Society
Overview of the American system of criminal justice, covering theories of justice, criminal law, policing, courts and associated pre and post-trial legal processes, punishment and corrections, and juvenile justice. Required for all criminology majors and minors.

Fulfills Mason Core requirement in social and behavioral science.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CRIM 210 - Introduction to Criminology

Credits: 3
Not Repeatable for Credit
Offered by Criminology, Law and Society
Explores and evaluates how crime is defined and measured, and examines crime patterns and trends. Provides an overview and critical assessment of the major theories of crime causation.

Prerequisite(s): CRIM 100.
Notes: CRIM majors who are concentrating in criminal justice are strongly encouraged to take this course before or during the first semester of taking upper-level courses in the concentration.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CRIM 220 - Introduction to Law and Society

Credits: 3
Not Repeatable for Credit
Offered by Criminology, Law and Society
Introduces the relationship between law and society. Discusses theoretical perspectives from a number of social science disciplines. Promotes a foundational understanding of the concept of law and the origins, development, and role of law in society, particularly outside of formal legal institutions. Topics covered may include legal mobilization, law and social change, social movements, law and inequality, and law's relationship to social control.

Prerequisite(s): CRIM 100.
Notes: CRIM majors who are concentrating in Law and Society are strongly encouraged to take this course before or during the first semester of taking upper-level courses in the concentration.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CRIM 230 - Introduction to Homeland Security
Credits: 3
Not Repeatable for Credit
Offered by Criminology, Law and Society
Introduces fundamental concepts of homeland security. Examines governmental actions designed to prevent, prepare for, respond to, and recover from man-made and natural disasters. Focuses on efforts to align preparedness, incident management, and emergency response plans from various agencies (federal, state, local, tribal, private sector, and non-governmental).

Prerequisite(s): CRIM 100.
Notes: CRIM majors who are concentrating in homeland security and justice are strongly encouraged to take this course before or during the first semester of taking upper-level courses in the concentration.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CRIM 301 - Public Law and the Judicial Process

Credits: 3
Not Repeatable for Credit
Offered by Criminology, Law and Society
Covers American judicial organization and operation, role of the Supreme Court in policy formation, and selected constitutional principles.

Equivalent to GOVT 301.

Prerequisite(s): CRIM 100.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CRIM 302 - Delinquency

Credits: 3
Not Repeatable for Credit
Offered by Criminology, Law and Society
Presents theories of juvenile delinquency and societal reactions to it, gender differences in rates and types, historical overview, development of juvenile justice system, and critical assessment of juvenile justice and its alternative.

Prerequisite(s): CRIM 100.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CRIM 304 - Computer Crime, Forensics, and Auditing

Credits: 3
Not Repeatable for Credit
Offered by Criminology, Law and Society
Covers computer crime, relevant laws, agencies, standards, auditing, logging, forensics, and related software. Explores legal principles such as chain of evidence, electronic document discovery, eavesdropping, and entrapment. Hands-on experience with forensics tools.

Equivalent to IT 357.

Prerequisite(s): IT 103 and 223.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CRIM 305 - Crime and Crime Policy

Credits: 3
Not Repeatable for Credit
Offered by Criminology, Law and Society
Examines the development of crime policy, including the influence of crime trends, politics, public opinion, media, criminological theory, and empirical research. Considers the effectiveness of crime policy.

Prerequisite(s): CRIM 100.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CRIM 306 - Criminal Justice Ethics

Credits: 3
Not Repeatable for Credit
Offered by Criminology, Law and Society
Analyzes ethical principles relevant for those working in criminal justice. Required for all criminology majors.

Prerequisite(s): CRIM 100.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CRIM 307 - Social Inequality, Crime, and Justice

Credits: 3
Not Repeatable for Credit
Offered by Criminology, Law and Society
Explores the significance of social inequality (especially race and gender inequality) for several crime and criminal justice issues. Examines the effect of gender and race on rates of criminal offending and victimization and explanations for the variation in offending and victimization.

Prerequisite(s): CRIM 100.
CRIM 308 - Human Rights and Justice

Credits: 3
Not Repeatable for Credit
Offered by Criminology, Law and Society
Studies the norms, laws, and systems for the promotion and protection of human rights. Provides a foundation for understanding historical, legal, political, economic, and ethical aspects of human rights. Examines ideological and cultural perspectives, sources of violations, the United Nations, regional and national mechanisms, special issues (e.g., women, torture, children, minorities), and the role of nongovernmental organizations.

Prerequisite(s): CRIM 100.

CRIM 310 - Introduction to the Intelligence Community

Credits: 3
Not Repeatable for Credit
Offered by Criminology, Law and Society
Introduces students to the structure, function, and process of the intelligence community including the basic skills in writing, research, and presentation used in intelligence analysis. Required for all intelligence analysis minors.

CRIM 312 - Intelligence Analysis Techniques

Credits: 3
Not Repeatable for Credit
Offered by Criminology, Law and Society
Introduces the key analytical techniques used by entry-level analysts in the Intelligence community.

Prerequisite(s): Grade of D or higher in CRIM 310.
Prerequisite(s) enforced by registration system.
CRIM 315 - Research Methods and Analysis in Criminology

Credits: 3  
Not Repeatable for Credit  
Offered by Criminology, Law and Society  
Provides an introduction to research design, methods, and analysis in the field of criminology. Students learn to understand, interpret, and critique quantitative and qualitative research approaches, and become intelligent consumers of research.

Prerequisite(s): CRIM 100.  
Notes: This course does not meet the College's IT requirements.

Schedule Type: LEC  
Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0

CRIM 320 - Crime and Place

Credits: 3  
Not Repeatable for Credit  
Offered by Criminology, Law and Society  
Focuses on the analysis of locations that attract and repel crime, displacement of crime, and identifying and measuring crime concentrations.

Prerequisite(s): CRIM 100.  
Schedule Type: LEC  
Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0  
When Offered: Fall, Spring

CRIM 350 - Counterintelligence

Credits: 3  
Not Repeatable for Credit  
Offered by Criminology, Law and Society.  
Introduces the legal authority, objectives, and guidelines of the counterintelligence discipline. Covers the investigative, defensive, offensive, and collection activities of the counterintelligence function.

Prerequisite(s): CRIM 310.  
Prerequisite enforced by registration system.  
Notes: Elective course for the Intelligence Analysis minor.

Schedule Type: LEC  
Hours of Lecture or Seminar per week: 3  
Grading: Regular

CRIM 400 - Applied Criminal Psychology
CRIM 401 - Policing in America

Credits: 3
Not Repeatable for Credit
Offered by Criminology, Law and Society
Fundamental issues relevant to contemporary public policing in America: role and history of police; impact on crime, disorder, and other social problems; discretion and its control; moral hazards; police legitimacy and public support; police culture and the police organization; and community policing.

Prerequisite(s): CRIM 100.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CRIM 402 - Punishment and Corrections

Credits: 3
Not Repeatable for Credit
Offered by Criminology, Law and Society
Covers theories on forms of punishment systems; punishment and corrections as a product of historical, cultural, and political changes; differences by race and gender in punishment and corrections; problems of social control and violence in prisons; alternative rehabilitation; and community prevention strategies.

Prerequisite(s): CRIM 100.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CRIM 403 - Community Corrections

Credits: 3
Not Repeatable for Credit
Offered by Criminology, Law and Society
Studies the purposes and goals of community-based corrections and its various components, including pretrial diversion, probation, parole, and emerging alternatives to traditional incarceration. Addresses issues related to offenders returning to the community and critical issues facing jails, community corrections, and the management of offenders in community settings. Examines the role of community corrections within the broader correctional system.
Prerequisite(s): CRIM 100.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CRIM 404 - Crime Victims and Victimization

Credits: 3
Not Repeatable for Credit
Offered by Criminology, Law and Society
Explores experiences of crime victims, distribution of the risks of victimization, and causes and consequences of victimization. Also considers nature and influence of victim's rights advocates.

Prerequisite(s): CRIM 100.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CRIM 405 - Law and Justice around the World

Credits: 3
Not Repeatable for Credit
Offered by Criminology, Law and Society
Comparative inquiry into the models of legal and justice systems around the world. Considers how social and legal norms are created, and how different societies exercise powers of social control. Evaluates justice models in action, including law and courts, policing, corrections, and juvenile justice.

Fulfills Mason Core requirement in global understanding.

Prerequisite(s): CRIM 100.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CRIM 406 - Family Law and the Justice System

Credits: 3
Not Repeatable for Credit
Offered by Criminology, Law and Society
Introduction to the elements of family law, and exploration of its influence on American social life and contemporary notions of justice. Topics include marriage and parenting, divorce, custody and support, nontraditional families, and domestic violence.

Prerequisite(s): CRIM 100.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
CRIM 407 - Advanced Topics in Law and Society

Credits: 3
Not Repeatable for Credit
Offered by Criminology, Law and Society
Provides an in-depth examination of the law's role in social life to deepen students' appreciation of the law in action. Focuses on scholarly research that describes and explains how legal actors, processes, and institutions operate in the world. Topics include: theories of legal change, law's relationship to class, gender, and race, and law, culture, and identity.

Prerequisite(s): CRIM 100 or GOVT 301.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CRIM 408 - Criminal Courts

Credits: 3
Not Repeatable for Credit
Offered by Criminology, Law and Society
Studies the workings, advantages, and frailties of criminal courts, and explores whether the system works effectively and efficiently.

Prerequisite(s): CRIM 100 or GOVT 301.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CRIM 409 - Community Policing

Credits: 3
Not Repeatable for Credit
Offered by Criminology, Law and Society
Study of community policing, particularly in the United States. Covers history and development of community policing, community relations, problem solving, and issues of organizational change.

Prerequisite(s): CRIM 100.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CRIM 410 - Criminal Investigations

Credits: 3
Not Repeatable for Credit
Offered by Criminology, Law and Society
Focuses on criminal investigations and the role of the criminal investigator in the criminal justice system.

**Prerequisite(s):** CRIM 100.
**Schedule Type:** LEC
**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0
**When Offered:** Fall, Summer, Spring

---

**CRIM 422 - Controversial Legal Issues**

Credits: 3
Not Repeatable for Credit
Offered by Criminology, Law and Society
Focuses on the study of law as an institution that continuously interacts with other social institutions at the individual, community, state, and federal levels. Examines how constitutional and statutory laws are interpreted by the courts to determine and define the law through contemporary, controversial, legal issues. Explores how the courts, using the law, resolve today's most controversial issues.

**Prerequisite(s):** CRIM 100.
**Schedule Type:** LEC
**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0

---

**CRIM 423 - Constitutional Law: Civil Rights and Liberties**

Credits: 3
Not Repeatable for Credit
Offered by Criminology, Law and Society
Studies First Amendment freedoms of speech, press, assembly, association, and religion; the right to privacy; and Fourteenth Amendment right to equal protection.

Equivalent to GOVT 423.

**Prerequisite(s):** CRIM 100.
**Schedule Type:** LEC
**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0

---

**CRIM 424 - Constitutional Law: Criminal Process and Rights**

Credits: 3
Not Repeatable for Credit
Offered by Criminology, Law and Society
Studies constitutional law pertaining to the rights of the criminally accused from investigation and evidence through attorney, trial, and punishment stages at federal and state levels. Required for all criminology majors.
Equivalent to GOVT 424 (2013-2014 Catalog).

Prerequisite(s): CRIM 100.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CRIM 425 - Criminal Justice Management

Credits: 3
Not Repeatable for Credit
Offered by Criminology, Law and Society
Explains the management function for current and future criminal justice managers. Emphasizes communication, leadership skills, and organizational development.

Prerequisite(s): D or higher in CRIM 100.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CRIM 460 - Surveillance and Privacy in Contemporary Society

Credits: 3
Not Repeatable for Credit
Offered by Criminology, Law and Society
Philosophical perspectives, historical context, technological developments, and institutional changes that surround controversies about privacy and surveillance in contemporary society. Explores public and private institutions conducting surveillance, how they calculate and manage risk, and legal constraints on surveillance activities.

Prerequisite(s): CRIM 100.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CRIM 462 - Law Enforcement and Homeland Security

Credits: 3
Not Repeatable for Credit
Offered by Criminology, Law and Society
Examines the effect of 9/11 on law enforcement organizations in the United States and explores the evolving relationship between the military, federal, state, and local law enforcement agencies in the post-9/11 era. Emphasis on understanding the entire framework of homeland security in the United States and the unique issues faced by local law enforcement.

Prerequisite(s): CRIM 100.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
CRIM 471 - Prevention and Deterrence of Crime

Credits: 3
Not Repeatable for Credit
Offered by Criminology, Law and Society
Theoretical and practical strategies for crime prevention and deterrence. Discusses social, environmental, and mechanical developments, police courts, and correctional elements of law enforcement in terms of current effectiveness and future potential for crime prevention.

Prerequisite(s): CRIM 100.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CRIM 475 - Theory and Politics of Terrorism

Credits: 3
Not Repeatable for Credit
Offered by Criminology, Law and Society
Explores origins of terrorism, tracing development from early states to a modern mode of conflict. Presents national, regional, and global perspectives.

Prerequisite(s): CRIM 100.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CRIM 479 - Preparation for Internship

Credits: 3
Not Repeatable for Credit
Offered by Criminology, Law and Society
Preparation for internship in a justice organization or justice-related work activity. Students develop a relationship with a prospective internship sponsor and develop a plan for the internship and the research to be reported.

Prerequisite(s): CRIM 100, CRIM 306, and CRIM 315.
Notes: This course is only open to students majoring in Criminology, Law and Society, and should only be taken by students who intend to complete an internship.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CRIM 480 - Internship
CRIM 490 - Special Topics

Credits: 1-3
Repeatable within Term for Credit
Offered by Criminology, Law and Society
Recent developments in the field.

Prerequisite(s): CRIM 100.
Notes: Topics vary. May be used to fulfill requirements for different concentrations in the BS in criminology, law, and society depending on the topic. May be repeated for a maximum of 15 credits when topic is different.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0
CRIM 491 - Research Seminar
Credits: 3
Repeatable within Degree for Credit
Offered by Criminology, Law and Society
Course includes readings and discussion of seminar papers, leading to a research project under the direction of a faculty member.

Designated as a research and scholarship intensive course.

Prerequisite(s): CRIM 491.
Notes: Second of a two-course sequence. Subject varies. Oral exam on the research and report may be required. May be repeated for a maximum of 6 credits when topic varies.

Schedule Type: SEM
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CRIM 495 - Capstone in Criminology, Law and Society
Credits: 3
Not Repeatable for Credit
Offered by Criminology, Law and Society
Provides an in-depth examination of a historical and contemporary issues facing criminology and law and society scholars. Focuses on the philosophies, practices, and procedures used by individuals and organizations and uses a variety of materials, experiences and resources.

Fulfills Mason Core requirement in synthesis.
Fulfills writing intensive requirement in the major.

Prerequisite(s): CRIM 100; ENGL 101/ENGH 101; ENGL 302/ENGH 302; COMM 100, or 104; 60 credits.
Schedule Type: LEC,
RCT
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CRIM 498 - Research Practicum
Credits: 1-3
Repeatable within Term for Credit
Offered by Criminology, Law and Society
Supervised research experience with a professor in a non-classroom setting. Offers students an opportunity to gain valuable research experience and training in research. Students are required to work 45 hours (across the semester) per credit.

Prerequisite(s): CRIM 100 and CRIM 315.
Notes: Open to majors in CRIM with 60 credits and permission of instructor and department. May be repeated for a maximum of 6 credits.

Schedule Type: IND
Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0
CRIM 499 - Independent Study

Credits: 1-3
Repeatable within Term for Credit
Offered by Criminology, Law and Society
Reading and research on a specific topic under the direction of a faculty member.

Prerequisite(s): CRIM 100 and 90 credits.
Notes: Open to majors in CRIM with 90 credits and permission of instructor and department. Written report is required; an oral exam or report may also be required. Degree requirements to be fulfilled by a particular independent study determined by student's advisor. May be repeated for a maximum of 9 credits.

Schedule Type: IND
Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0

CRIM 509 - Justice Organizations and Processes

Credits: 3
Not Repeatable for Credit
Offered by Criminology, Law and Society
Examines structures, practices, and performance of organizations involved in administration of justice: law enforcement, courts and legal agencies, corrections, regulatory and related agencies, and private organizations.

Equivalent to PUAD 509.

Schedule Type: SEM
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CRIM 510 - Policing in a Democratic Society

Credits: 3
Not Repeatable for Credit
Offered by Criminology, Law and Society
Fundamental issues in policing a democratic society: police mission, subculture, performance measurement, moral hazards, discretion, impact on crime and disorder, legitimacy, community policing, and other reforms.

Schedule Type: SEM
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CRIM 700 - Theories of Justice
CRIM 720 - Behavior of Law

Credits: 3
Not Repeatable for Credit
Offered by Criminology, Law and Society
Examines development of law and law's effect on human behavior. Reviews theories of law's meaning and aims. Examines
collection of law and investigates consequences of law and legal decisions.
Equivalent to GOVT 728.

Schedule Type: SEM
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CRIM 721 - The Constitution, Criminal Procedure, and Security

Credits: 3
Not Repeatable for Credit
Offered by Criminology, Law and Society
Focuses on understanding legal doctrines that form basis of U.S. constitutional procedural rights and how doctrines develop, why
courts rule as they do, and evaluating strengths, weaknesses of rights.
Equivalent to GOVT 713.

Prerequisite(s): CRIM 720/GOVT 728 or permission of instructor.
Schedule Type: SEM
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CRIM 723 - Law and Social Control

Credits: 3
Not Repeatable for Credit
Offered by Criminology, Law and Society
Competing conceptions of law, political systems, and social control. Intellectual traditions behind social control, its definitions,
and mechanisms for regulating public and private behavior, by both individuals and organizations in society.

**Prerequisite(s):** CRIM 720/GOVT 728 or permission of instructor.

**Schedule Type:** SEM

**Hours of Lecture or Seminar per week:** 3

**Hours of Lab or Studio per week:** 0

---

**CRIM 730 - Courts and Constitutional Law**

Credits: 3
Not Repeatable for Credit
Offered by Criminology, Law and Society

Role, influence, and effects of U.S. courts in creating constitutional norms and interpreting them. Special attention to First and Fourteenth Amendments, Commerce Clause. Analyzes leading court cases.

**Schedule Type:** SEM

**Hours of Lecture or Seminar per week:** 3

**Hours of Lab or Studio per week:** 0

---

**CRIM 740 - Justice Organization and Administration**

Credits: 3
Not Repeatable for Credit
Offered by Criminology, Law and Society

Examines organization and administration of justice and security organizations. Covers organization theory and behavior as applied to justice and security organizations.

Equivalent to PUAD 790.

**Schedule Type:** SEM

**Hours of Lecture or Seminar per week:** 3

**Hours of Lab or Studio per week:** 0

---

**CRIM 741 - Conduct of Justice Organizations at the Street Level**

Credits: 3
Not Repeatable for Credit
Offered by Criminology, Law and Society

How justice organizations behave at lowest levels, where service is delivered and discretion is greatest (suspects, victims, witnesses, police officers, prison guards, parole officers, attorneys, and others who interact with the justice system).

Equivalent to PUAD 793.

**Prerequisite(s):** CRIM 740/PUAD 790 or permission of instructor.

**Schedule Type:** SEM

**Hours of Lecture or Seminar per week:** 3

**Hours of Lab or Studio per week:** 0
CRIM 742 - Leadership in Justice and Security Organizations

Credits: 3  
Not Repeatable for Credit  
Offered by Criminology, Law and Society  
Examines leadership theories, and explores fundamental questions about leadership in justice and security organizations today.

Prerequisite(s): CRIM 740/GOVT 790 or permission of instructor.  
Schedule Type: SEM  
Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0

CRIM 743 - Changing Justice and Security Organizations

Credits: 3  
Not Repeatable for Credit  
Offered by Criminology, Law and Society  
Examines challenges of changing justice organizations, how changes have been successfully and unsuccessfully implemented in the past, and what change strategies appear to be the most effective.

Equivalent to PUAD 797.  
Prerequisite(s): CRIM 740/PUAD790 or permission of instructor.  
Schedule Type: SEM  
Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0

CRIM 744 - Corrections

Credits: 3  
Not Repeatable for Credit  
Offered by Criminology, Law and Society  
Covers the social institutions and processes involved in punishment, control, and behavior change. Reviews the consequences of different policies and organizational approaches.

Prerequisite(s): CRIM 740.  
Schedule Type: SEM  
Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0  
When Offered: Fall, Spring

CRIM 760 - Crime and Crime Policy
Credits: 3
Not Repeatable for Credit
Offered by Criminology, Law and Society
Explores relationship between crime policy and empirical evidence about etiology of crime. Includes crime measurement and trends in crime over time, effectiveness of various policy interventions.

Schedule Type: SEM
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CRIM 761 - Politics of Crime Policy

Credits: 3
Not Repeatable for Credit
Offered by Criminology, Law and Society
Explores political context of crime policy. Examines influence of public opinion, interest groups, scientific community, and other political forces. In-depth, case-study comparison of several crime policies.

Prerequisite(s): CRIM 760/GOVT 792 or permission of instructor.
Schedule Type: SEM
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CRIM 762 - Crime and Place

Credits: 3
Not Repeatable for Credit
Offered by Criminology, Law and Society
Examines the concentration of crime at places, including geographic, environmental, and sociological features that attract or repel crime. Discusses theoretical explanations, crime prevention strategies, and the measurement of crime concentrations.

Prerequisite(s): CRIM 760.
Schedule Type: SEM
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

CRIM 764 - Sentencing

Credits: 3
Not Repeatable for Credit
Offered by Criminology, Law and Society
Explores theories of punishment and sentencing practices. Examines political, sociological, criminological, and organizational influences on sentencing processes and decisions.

Prerequisite(s): CRIM 760.
Schedule Type: SEM
CRIM 780 - Research Methods

Credits: 3
Not Repeatable for Credit
Offered by Criminology, Law and Society
Introduces logic and methods of scientific inquiry in justice, law, and crime policy. Includes conceptualization of research questions, observation, measurement, research design, and principles of causality. Evaluation of extant research according to scientific principles.

Prerequisite(s): Undergraduate course in social science research methods or statistics, or permission of instructor.
Schedule Type: SEM
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CRIM 781 - Justice Program Evaluation

Credits: 3
Not Repeatable for Credit
Offered by Criminology, Law and Society
Practical exploration of assessment techniques used in evaluating need for and consequences of justice programs and policies. Design and measurement, interpreting and presenting results.

Equivalent to PUAD 791.

Prerequisite(s): PUAD 511/612 CRIM 780 or two graduate-level statistics courses; or permission of instructor.
Schedule Type: SEM
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CRIM 782 - Statistics I

Credits: 3
Not Repeatable for Credit
Offered by Criminology, Law and Society
Focuses on descriptive and inferential statistical methods and theory with application to problems within the justice field. Explores the logic of inferential statistical methods in general and null hypothesis significance testing in particular. Covers widely used statistical procedures within the applied social sciences.

Prerequisite(s): An undergraduate social science research methods course or an undergraduate statistics course.
Schedule Type: SEM
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
CRIM 783 - Statistics II

Credits: 3
Not Repeatable for Credit
Offered by Criminology, Law and Society
Focuses on the theory and application of multivariate regression methods as applied within the justice field. Topics include tests for and consequences of violating assumptions of the generalized linear model, dummy coding of categorical variables, testing of interaction effects, logistic regression, ordered and multinominal logit, and missing data analysis.

Prerequisite(s): CRIM 782 or a comparable course.
Schedule Type: SEM
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CRIM 784 - Experimental Criminology

Credits: 3
Not Repeatable for Credit
Offered by Criminology, Law and Society
Discusses the methodological, statistical, ethical, and practical concerns associated with experimental research designs in criminology.

Prerequisite(s): CRIM 780.
Schedule Type: SEM
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

CRIM 790 - Capstone in Policy and Practice

Credits: 3
Not Repeatable for Credit
Offered by Criminology, Law and Society
Student-initiated research project supervised by instructor. Students must work with a justice organization to conduct useful research and produce a policy-oriented white paper.

Prerequisite(s): CRIM 780 or permission of instructor.
Notes: May be repeated for a maximum of 6 credits.

Schedule Type: IND
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring
CRIM 795 - Special Topics

Credits: 3
Repeatable within Term for Credit
Offered by Criminology, Law and Society
Recent developments in field, or topics not covered by regularly listed courses.

Prerequisite(s): To be determined by instructor.
Notes: Topics vary. May be repeated for a maximum of 15 credits when topic is different.

Schedule Type: SEM
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CRIM 796 - Directed Reading

Credits: 1-3
Repeatable within Term for Credit
Offered by Criminology, Law and Society
Independent reading at doctoral level on specific topic related to justice, law, or crime policy as agreed to by student and faculty member and approved by coordinator of CRIM program.

Prerequisite(s): Successful completion of 12 graduate level CRIM credits.
Notes: Repeatable.

Schedule Type: IND
Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 0
Grading: Graduate Special.
When Offered: Fall, Spring, Summer

CRIM 797 - Professionalization Seminar

Credits: 0
Not Repeatable for Credit
Offered by Criminology, Law and Society
Introduces doctoral students to research, scholarship and teaching practices in the field to promote their professional development.

Notes: Required for Ph.D. students.

Schedule Type: SEM
Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0
Grading: Satisfactory/No Credit

CRIM 799 - Master's Thesis
Credits: 1-6
Repeatable within Degree for Credit
Offered by Criminology, Law and Society
Research on approved master's thesis topic under direction of thesis committee with approval of chair.

Prerequisite(s): Submission and approval of thesis proposal.
Notes: Repeatable. Minimum 3, maximum 6 credits for doctorate. Maximum of 6 credits of CRIM 799 applicable to masters degree requirements.

Schedule Type: IND
Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 0
Grading: Satisfactory/No Credit

CRIM 998 - Doctoral Dissertation Proposal

Credits: 1-6
Repeatable within Degree for Credit
Offered by Criminology, Law and Society
Work on a research proposal forming basis for doctoral dissertation.

Prerequisite(s): Students must complete all core and analytical course degree requirements.
Notes: Repeatable. Minimum 3, maximum 6 credits for doctorate. Maximum of 27 credits of CRIM 998/999 applicable to doctoral degree requirements.

Schedule Type: IND
Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0
Grading: Satisfactory/No Credit only

CRIM 999 - Doctoral Dissertation Research

Credits: 1-21
Repeatable within Degree for Credit
Offered by Criminology, Law and Society
Doctoral dissertation research and writing under direction of student's dissertation committee.

Prerequisite(s): Advancement to doctoral Candidacy.
Notes: Repeatable. Minimum 12, maximum 21 credits for doctorate. Maximum of 27 credits of CRIM 998/999 applicable to doctoral degree requirements.

Schedule Type: IND
Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0
Grading: Satisfactory/No Credit only

Cultural Studies (CULT)
Offered by the College of Humanities and Social Sciences

CULT 320 - Globalization and Culture

Credits: 3
Not Repeatable for Credit
Offered by Cultural Studies
Examines cultures in globalization, with special attention to the role of technologies and new media. Provides historical and contemporary contexts for understanding the relationships among circuits of production and consumption; population flows; social inequalities and collective identities; globalization from "above" and "below;" built and natural environments.

Prerequisite(s): 30 credits; GLOA 101 or SOCI 120.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CULT 390 - Topics in Cultural Studies

Credits: 1-3
Repeatable within Term for Credit
Offered by Cultural Studies
Topics of current interest in interdisciplinary cultural studies, covering such fields as media, popular culture, political economy, social identities, or regions in globalization.

Notes: May be repeated for a maximum of 9 credits when topic is different.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CULT 802 - Histories of Cultural Studies

Credits: 3
Not Repeatable for Credit
Offered by Cultural Studies
Historical survey of principal works and theories in the development of cultural studies.

Prerequisite(s): Admission to doctoral program, related master's degree, or permission of instructor.
Notes: This course is designed for PhD level students. Students in a related MA program may take this course as the capstone to their MA as they are about to matriculate into the PhD in cultural studies.

Schedule Type: SEM
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall
CULT 804 - Histories of Cultural Studies II

Credits: 3
Not Repeatable for Credit
Offered by Cultural Studies
Continues the historical survey of cultural studies up to the present and assesses possibilities for future development.

Prerequisite(s): Admission to a PhD program and CULT 802 or permission of instructor.

Schedule Type: LEC, SEM
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

CULT 806 - Research Seminar in Cultural Studies

Credits: 3
Not Repeatable for Credit
Offered by Cultural Studies
Introduces research methods in cultural studies.

Prerequisite(s): Admission to a doctoral; completion CULT 802 and CULT 804.
Notes: Specific topics vary.

Schedule Type: LEC, SEM
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring

CULT 808 - Student/Faculty Colloquium in Cultural Studies

Credits: 1
Repeatable within Degree for Credit
Offered by Cultural Studies
Forum for presentation of original and current research in cultural studies.

Prerequisite(s): Admission to doctoral program.
Notes: Students register for 1 credit per semester over a three-semester period. May be repeated for a maximum of 4 credits.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0
Grading: Satisfactory/No Credit

CULT 810 - Culture and Political Economy
CULT 812 - Visual Culture

Credits: 3
Not Repeatable for Credit
Offered by Cultural Studies
Examines theories, production, consumption, and reception of visual culture. Covers film, video, visual arts, music, display, ritual, performance, performativity, and theories of the aesthetic. Includes key readings from theorists such as Adorno, Artaud, Benjamin, Brecht, Bryson, Doane, Fiske, Heath, Marcuse, Merleau-Ponty, and Sartre.

Prerequisite(s): Admission to a doctoral program, or permission of instructor.
Notes: This course is designed for the PhD student. Those students not admitted to a PhD program are required to contact the instructor.

Schedule Type: SEM
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

CULT 814 - Gender and Sexuality

Credits: 3
Not Repeatable for Credit
Offered by Cultural Studies
Investigates notion of gender functions in maintaining and analyzing issues of social and cultural power. Examines conflicting notions of sexuality and their role in cultural signification. Seeks to explicate relationship of sexuality, gender.

Prerequisite(s): Admission to a doctoral program, or permission of instructor
Notes: This course is designed for the PhD student. Those students not admitted to a PhD program are required to contact the instructor.

Schedule Type: SEM
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring
CULT 816 - Science/Technology

Credits: 3  
Not Repeatable for Credit  
Offered by Cultural Studies  
Considers theories and major debates on culture of science, social construction of nature, and effects of technology on modern cultural forms. Includes readings from theorists such as Nietzsche, Heidegger, Horkheimer, Feyerabend, Bahro, Haraway, and Latour.

Prerequisite(s): Admission to a doctoral program, or permission of instructor.  
Notes: This course is designed for the PhD student. Those students not admitted to a PhD program are required to contact the instructor.

Schedule Type: SEM  
Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0  
When Offered: Fall, Spring

CULT 818 - Social Institutions

Credits: 3  
Not Repeatable for Credit  
Offered by Cultural Studies  
Considers theories of institutional practice and social structures, from Max Weber to Michel Foucault. Covers prisons, bureaucracies, museums, schools, political parties, and social movements.

Prerequisite(s): Admission to a doctoral program, or permission of instructor.  
Notes: This course is designed for the PhD student. Those students not admitted to a PhD program are required to contact the instructor.

Schedule Type: LEC  
Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0  
When Offered: Fall, Spring

CULT 820 - After Colonialism

Credits: 3  
Not Repeatable for Credit  
Offered by Cultural Studies  
Surveys racial, ethnic, caste, and national identities in colonial contexts; scientific racism in periphery and core sites; subsequent history of race, ethnic, national identities and conflicts; classical and contemporary texts by authors such as DuBois, Fanon, Gilroy, and Spivak; and particular place of issues of national, racial, and ethnic identities in contemporary cultural studies.

Prerequisite(s): Admission to a doctoral program, or permission of instructor.  
Notes: This course is designed for the PhD student. Those students not admitted to a PhD program are required to contact the instructor.
CULT 860 - Special Topics in Cultural Studies

Credits: 3
Repeatable within Term for Credit
Offered by Cultural Studies
Specialized interdisciplinary topics in cultural theory and analysis.

Prerequisite(s): Admission to a doctoral program, or permission of instructor.
Notes: These courses are designed for the PhD student. Those students not admitted to a PhD program are required to contact the instructor. Topics vary. May be repeated for credit when topic is different.

CULT 870 - Independent Study

Credits: 1-3
Repeatable within Term for Credit
Offered by Cultural Studies
Reading and research on a specific topic guided by advisors, supporting the development of a Field Concentration.

Prerequisite(s): Admission to a PhD program, successful completion of all core courses, or permission of director.
Notes: May be repeated.

CULT 880 - Field Concentration

Credits: 3
Repeatable within Term for Credit
Offered by Cultural Studies
Intensive research course, resulting in a Field Statement and oral defense.

Prerequisite(s): Admission to cultural studies doctoral program successful completion of core courses and an additional 18 credits.
Notes: Requires permission of field advisor. May be repeated for a maximum of 6 credits.
CULT 998 - Doctoral Dissertation Proposal

Credits: 1-6
Repeatable within Degree for Credit
Offered by Cultural Studies
Develop research proposal that forms basis for doctoral dissertation.

Prerequisite(s): Advancement to candidacy.

Notes: May be repeated for credit. A maximum of 6 credits may be applied to the degree. Subject to continuous registration requirement.

CULT 999 - Doctoral Dissertation

Credits: 1-12
Repeatable within Degree for Credit
Offered by Cultural Studies
Doctoral dissertation research and writing under direction of dissertation committee.

Prerequisite(s): Completion of CULT 998, and public presentation of dissertation proposal.

Cyber Security Engineering (CYSE)

Offered by the Volgenau School of Engineering

Students may attempt an undergraduate course taught by the Volgenau School of Engineering twice. A third attempt requires approval of the department offering the course.

CYSE 101 - Introduction to Cyber Security Engineering
Provides comprehensive introduction to the principles, applications, and practice of cyber security engineering. Students learn the basic concepts and terminology of cyber security and how cyber security is commonly addressed after the design and implementation phases. Students are introduced to the systems engineering and design processes and learn to integrate and apply cyber security tools and techniques in these processes.

**Schedule Type:** LAB, LEC

**Hours of Lecture or Seminar per week:** 3

**Hours of Lab or Studio per week:** 2

**When Offered:** Spring

---

### CYSE 205 - Systems Engineering Principles

Credits: 3

Limited to 2 Attempts

Offered by Volgenau School of Engineering

Introduction to systems engineering with a focus on cyber security engineering. Emphasize development of analytical, technical, management, and teamwork skills through exercises in planning, documentation, presentation, and the creative process of IT engineering design. Analyze case studies involving systems engineering role in cyber security.

**Schedule Type:** LEC

**Hours of Lecture or Seminar per week:** 3

**Hours of Lab or Studio per week:** 0

**When Offered:** Fall

---

### CYSE 211 - Operating Systems and Lab

Credits: 3

Limited to 2 Attempts

Offered by Volgenau School of Engineering

Addresses basic issues such as virtual memory, kernel and user mode, system calls, threads, context switches, interrupts, interprocess communication, coordination of concurrent activities. May also address: concurrency, processes and multi-threading, context switching, synchronization, scheduling, and deadlock. Memory management, dynamic memory allocation, address translation. Management of file systems, storage devices, directories, protection, scheduling and crash recovery.

**Schedule Type:** LAB, LEC

**Hours of Lecture or Seminar per week:** 3

**Hours of Lab or Studio per week:** 0

**When Offered:** Spring

---

### CYSE 220 - Systems Modeling
Credits: 3
Limited to 2 Attempts
Offered by Volgenau School of Engineering
Introduces modeling of dynamical systems. Formulation of mathematical models from system descriptions, including computer, economic, transportation, electrical power and mechanical systems. Analytical and numerical methods for solving models and studying their behavior. Discrete-time and continuous time systems. Linear and nonlinear systems. Introduction to computer modeling using MATLAB.

Prerequisite(s): C or higher in MATH 203 and PHYS 160.
Prerequisite(s) enforced by registration system.

Schedule Type: LAB,
LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 3
When Offered: Spring

CYSE 230 - Computer Networking

Credits: 3
Limited to 2 Attempts
Offered by Volgenau School of Engineering
Introduces network concepts; OSI reference model and layering; data coding; analog/digital communications review; physical layer and data link control; Data Link Layer Control protocols; flow control; error control; link management; common link protocols. LAN and WAN; connection-oriented and connectionless packet switching; circuit-switched networks and control signaling; congestion control and traffic management; transport layer client-server model; domain name systems, routing methods.

Prerequisite(s): CS 112.
Schedule Type: LAB,
LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 2
When Offered: Spring

CYSE 301 - Digital Systems

Credits: 3
Limited to 2 Attempts
Offered by Volgenau School of Engineering
Introduces digital circuits, systems and computers. Topics include binary systems and codes, digital logic gates and circuits, microelectronics and integrated circuits, coding and multiplexing, multi-vibrators, shift registers, counters, analog-to-digital converters, and elementary computer architecture.

Equivalent to ECE 301.

Schedule Type: LAB,
LEC
Hours of Lecture or Seminar per week: 3
CYSE 325 - Discrete Events Systems Modeling

Credits: 3  
Limited to 2 Attempts  
Offered by Volgenau School of Engineering  
Introduces basic modeling of the dynamics of discrete event systems. Both analytical and simulation techniques for the modeling and analysis of such systems are considered. Relevant concepts from discrete mathematics are included and appropriate software tools are used to examine different engineering applications.  

Prerequisite(s): C or higher in STAT 344.  
Prerequisite(s) enforced by registration system.

Schedule Type: LAB, LEC  
Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 3  
When Offered: Fall

CYSE 330 - Introduction to Network Security

Credits: 3  
Limited to 2 Attempts  
Offered by Volgenau School of Engineering  
Introduces cryptography and its applications in networks. Reviews basic firewalls architectures and VPNs. Overview of current network security protocols, security of routing protocols, the DNS, and e-mail security. Discuss threat of attacks that use viruses, worms, rootkits, botnets and countermeasures; distributed denial of service attacks and spam countermeasures. Introduces basic concepts of security of wireless networks.  

Prerequisite(s): C or higher in CYSE 101, CS 222, CYSE 230.  
Prerequisite(s) enforced by registration system.

Schedule Type: LEC  
Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0  
When Offered: Fall

CYSE 411 - Secure Software Engineering

Credits: 3  
Limited to 2 Attempts  
Offered by Volgenau School of Engineering  
This course provides a foundation for building secure software by applying security principles to the software development lifecycle. Topics covered include: security in requirements engineering, secure designs, risk analysis, threat modeling, deploying cryptographic algorithms, defensive coding, penetration testing, fuzzing, static analysis, and security assessment. Students will
learn the practical skills for developing and testing secure software.

**Prerequisite(s):** C or higher in CS 222.
Prerequisite(s) enforced by registration system.

**Notes:** This course may be of interest to students specializing in software aspects of cyber security engineering.

**Schedule Type:** LEC
**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0
**When Offered:** Spring

### CYSE 421 - Industrial Control Systems Security

Credits: 3
Limited to 2 Attempts
Offered by Volgenau School of Engineering

**Prerequisite(s):** C or higher in CYSE 220, CYSE 230, CYSE 301.
Prerequisite(s) enforced by registration system.

**Schedule Type:** LEC
**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0
**When Offered:** Spring

### CYSE 424 - Embedded and Real Time Systems

Credits: 3
Limited to 2 Attempts
Offered by Volgenau School of Engineering
Presents design methodology, principles and practice for the development of real-time embedded systems and their application to robotics, mechatronics, sensing, signal processing, and control. They include automated sensors, switches and PLCs. Topics include system decomposition, multi-tasking, task communication and synchronization, system modeling, time analysis, principles of filter and controller implementation, 'fuzzy' engineering, and multimicrocontroller systems.

**Prerequisite(s):** C or higher in CYSE 301.
Prerequisite(s) enforced by registration system.

**Schedule Type:** LEC
**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0
**When Offered:** Fall
**CYSE 425 - Secure RF Communications**

Credits: 3  
Limited to 2 Attempts  
Offered by Volgenau School of Engineering  

**Prerequisite(s):** C or higher in CS 222 and in CYSE 230.  
Prerequisite(s) enforced by registration system.

**Schedule Type:** LEC  
**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall

---

**CYSE 430 - Critical Infrastructure Protection**

Credits: 3  
Limited to 2 Attempts  
Offered by Volgenau School of Engineering  
Consists of a four week lecture course followed by ten weekly seminars presented by students. The lecture part provides a description of US Designated Critical Infrastructure Sectors and a corresponding list of federal sector specific agencies (SSAs). Each student selects a sector, develops and presents a seminar talk on critical cyber security issues involved in a given sector.

**Schedule Type:** LEC  
**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Spring

---

**CYSE 445 - System Security and Resilience**

Credits: 3  
Limited to 2 Attempts  
Offered by Volgenau School of Engineering  
Focuses on modeling and evaluation of the engineering systems that are expected to operate in a contested cyber environment. Covers architectures and modeling, uses a variety of techniques, establishing measures of performance that are relevant to the domain of operation, evaluating the security or vulnerability of the system to cyber exploits, and then assessing its resilience.

**Prerequisite(s):** C or higher in CYSE 325 and CYSE 330.  
Prerequisite(s) enforced by registration system.

**Corequisite(s):** CYSE 450.

**Schedule Type:** LEC  
**Hours of Lecture or Seminar per week:** 3
CYSE 450 - Cyber Vulnerability Lab

Credits: 1
Limited to 2 Attempts
Offered by Volgenau School of Engineering
Lab for CYSE 445. Provides hands-on experience in security issues of network systems. Issues in ethical hacking, penetration testing, forensics and incident handling and response will be discussed.

Corequisite(s): CYSE 445.

Notes: This is a hands-on lab course, with short lecture introductions.

Schedule Type: LAB
Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 3
When Offered: Fall

CYSE 460 - Power Systems and Smart Grid

Credits: 3
Limited to 2 Attempts
Offered by Volgenau School of Engineering
Covers fundamentals of power systems; basics of electricity, electricity generation, economics of supply and demand, and electricity market operations in regulated and deregulated environment. The other part of the course will cover Smart Grid and its impact on the energy industry. Also includes Energy policy modeling and analysis.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

CYSE 461 - Power Grid Security

Credits: 3
Limited to 2 Attempts
Offered by Volgenau School of Engineering
Overview of integrating smart grid into the current system. Includes the seven domains (bulk generation, transmission, distribution, customer, operations, markets, and service providers) as well as the electrical and communication interfaces that connect the layers and domains. Focuses on monitoring equipment in the smart grid. Provides an overview of security principles and approaches for applying them to the smart grid.

Prerequisite(s): C or higher in CYSE 460.
Prerequisite(s) enforced by registration system.
CYSE 462 - Mobile Devices and Network Security

Credits: 3
Limited to 2 Attempts
Offered by Volgenau School of Engineering
Embedded security features of hand-held wireless devices. Data link layer encryption and authentication protocols applied in mobile devices. Security factors in the decisions on configuring wireless mobile devices and network infrastructure. Robust cryptography that is needed to attain the highest levels of integrity, authentication, and confidentiality.

CYSE 465 - Transportation Systems Design

Credits: 3
Limited to 2 Attempts
Offered by Volgenau School of Engineering
Discusses common elements and differences among problems that occur securing road, rail, air and sea transportation systems. Covers threats to control systems. Introduces control measures. Discusses past, present and future of in-vehicle and on-road safety systems, and cyber threats to emerging autonomous cars. Analyzes cyber threats to aviation and sea transportation security and available countermeasures.

CYSE 467 - GPS Security

Credits: 3
Limited to 2 Attempts
Offered by Volgenau School of Engineering
Provides background in long-range navigation developments; early global systems; space based systems; GPS and GLONASS systems; system architecture; spacecraft and earth station characteristics; design concepts of the CA and P GPS signal modes; frequencies, modulation, and other design aspects; clock issues; range and accuracy calculations and limitations; advanced concepts. Explains advanced concepts in global navigation satellite systems.

Prerequisite(s): C or higher in CYSE 425.
Prerequisite(s) enforced by registration system.
CYSE 470 - Human Factors and Cyber Security Engineering

Credits: 3
Limited to 2 Attempts
Offered by Volgenau School of Engineering
This course explores the human factor in cyber security engineering. The focus is on understanding human performance characteristics and limitations, and the various research, design, and evaluation methods needed to address them when engineering secure systems. Topics include, for example, perception, cognition, memory, situation awareness, decision making, stress, automation, and human-computer display and interaction design principles.

Prerequisite(s): C or higher in CYSE 205 and STAT 344.
Prerequisite(s) enforced by registration system.

CYSE 475 - Cyber Physical Systems

Credits: 3
Limited to 2 Attempts
Offered by Volgenau School of Engineering
Introduces cyber physical systems as an integration of physical processes, computation, and networking. Discusses modeling and simulation of cyber physical systems, system design and implementation. Analyze such systems based on abstractions for modeling physical systems and abstractions for modeling data transformations. Covers security issues in cyber physical systems and applications selected from infrastructure, energy, transportation, robotics, manufacturing, and communications domains.

Prerequisite(s): C or higher in CYSE 330, CYSE 421, and CYSE 450.
Prerequisite(s) enforced by registration system.

Notes: This course integrates the core material about physical systems and cyber systems and builds on the application domains in the required courses and the technical electives. This is a new course not usually offered in other programs at the undergraduate level. The dual track of physical and cyber systems in the core curriculum enables the offering of such a course. Developed jointly by CS and ECE faculty.
Credits: 3
Limited to 2 Attempts
Offered by Volgenau School of Engineering
Covers basic concepts of cryptology, types of cryptosystems, implementation of security services, key management, public key certificates, public key infrastructure, e-mail and web security. Discusses modern secret-key ciphers, modes of operation, hash functions, message authentication codes, public key cryptography, and digital signature schemes. Covers cryptographic standards and secure internet protocols. Introduces educational and public domain software implementing modern cryptographic algorithms.

Prerequisite(s): C or higher in CYSE 101 and CYSE 330.
Prerequisite(s) enforced by registration system.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

CYSE 477 - Intrusion Detection

Credits: 3
Limited to 2 Attempts
Offered by Volgenau School of Engineering
The objective of this course is to provide an in depth introduction to the science and art of intrusion detection. The course covers methodologies, techniques, and tools for monitoring events in computer systems or networks, with the objective of preventing and detecting unwanted process activity and recovering from malicious behavior.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

CYSE 478 - Cyber Security Audit and Compliance

Credits: 3
Limited to 2 Attempts
Offered by Volgenau School of Engineering
Fundamental concepts of the Cyber Security Compliance and Testing process. This will revolve around defining a control framework, the attendant control objectives and the reporting system for an organization. Covers the process of creating a control structure with goals and objectives, audit a given cyber infrastructure against it, and if found inadequate, establish a systematic remediation procedure.

Prerequisite(s): C or higher in CYSE 421.
Prerequisite(s) enforced by registration system.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall
CYSE 479 - Methods of User Authentication

Credits: 3
Limited to 2 Attempts
Offered by Volgenau School of Engineering
Discusses limitations of passwords and PINs and introduces alternatives. Covers user authentication based on security tokens and smart cards. Introduces basics of biometric systems, based on information such as fingerprints, facial features, iris, and voice. Discusses the use and security of electronic ID cards and passports. Covers methods of distinguishing human from internet bots over the network, such as CAPTCHA's.

Prerequisite(s): C or higher in CYSE 211, 301, and 330.
Prerequisite(s) enforced by registration system.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

CYSE 480 - Malicious Software and Hardware

Credits: 3
Limited to 2 Attempts
Offered by Volgenau School of Engineering
Introduces various types of malicious software (malware). Discusses malware analysis using virtual machines, sandboxes, process monitors, packet sniffers, de-obfuscation, etc. Introduces hardware Trojans and other forms of malicious hardware. Discusses prevention techniques at the design, fabrication, and post-fabrication level. Introduces various countermeasures against malicious software and hardware. The course has a lab with Windows and Android operating systems.

Prerequisite(s): C or higher in CYSE 211 and CYSE 301.
Prerequisite(s) enforced by registration system.

Schedule Type: LAB,
LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 1
When Offered: Fall

CYSE 491 - Engineering Senior Seminar

Credits: 2
Limited to 2 Attempts
Offered by Volgenau School of Engineering
This course covers a variety of responsibilities of cyber security engineers including: engineering ethics, government policies, laws and regulations affecting cyber security engineering, industry practices, entrepreneurship. Effective technical communications. Incorporates global implications of cyber security engineering. Speakers include faculty, invited guests from industry and government, as well as students.
Corequisite(s): CYSE 491.

Notes: Meets ABET requirements in writing, presentations, ethics and global understanding. Also will be Writing Across the Curriculum (WAC) of the university.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 0
When Offered: Fall

CYSE 492 - Senior Advanced Design Project I

Credits: 2
Limited to 2 Attempts
Offered by Volgenau School of Engineering
First semester of a two semester capstone course in the Cyber Security Engineering program. Development of a design project by a team of students. Conception of the project and determination of its feasibility. Work includes developing preliminary design and implementation plan. Projects will aim at the integration of the technical material learned in several courses and incorporation of industry input.

Corequisite(s): CYSE 491.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 0
When Offered: Fall

CYSE 493 - Senior Advanced Design Project II

Credits: 3
Limited to 2 Attempts
Offered by Volgenau School of Engineering
Second semester of a two semester capstone course in the Cyber Security Engineering program. Project includes designing a cyber-physical security system, writing required software, assembling hardware if needed, conducting experiments or studies, and testing the complete system. Requires oral and written reports during project and at completion.

Prerequisite(s): C or higher in CYSE 492.
Prerequisite(s) enforced by registration system.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring

Dance (DANC)

Offered by the College of Visual and Performing Arts
**DANC 101 - Dance Appreciation**

Credits: 3  
Not Repeatable for Credit  
Offered by School of Dance  
Introduces dance as universal human activity, expression of cultural identity, and art form. Survey of global dance includes folk, ceremonial and ritual, trance, court, classical, and theatrical.

Fulfills Mason Core requirement in arts.

**Schedule Type:** LEC  
**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**DANC 114 - Rhythmic Analysis and Music Resources for Dance**

Credits: 3  
Not Repeatable for Credit  
Offered by School of Dance  
Introduces rhythmic structure, notation, and basic forms of music.

**Prerequisite(s):** Admission to the dance major. Prerequisite enforced by registration system.  
**Notes:** Lecture, studio.

**Schedule Type:** LEC, STU  
**Hours of Lecture or Seminar per week:** 1  
**Hours of Lab or Studio per week:** 2

---

**DANC 118 - World Dance**

Credits: 3  
Repeatable within Term for Credit  
Offered by School of Dance  
Performance of a world dance form through presentation of fundamental techniques, music and culture. Area of concentration may vary to include an array of world dance forms.

Fulfills Mason Core requirement in global understanding.

**Notes:** May be repeated for total 6 credits. Fulfills non-Western culture requirement for CHSS and COS students.

**Schedule Type:** STU  
**Hours of Lecture or Seminar per week:** 1  
**Hours of Lab or Studio per week:** 2
DANC 119 - Dance in Popular Culture: Afro-Latino Dance

Credits: 3  
Repeatable within Degree for Credit  
Offered by School of Dance  
Performance of a popular dance form through presentation of fundamental techniques, music, and culture. Area of concentration may vary to include an array of popular dance forms.  
Fulfills Mason Core requirement in arts.

Notes: May be repeated for total 6 credits.

Schedule Type: STU  
Hours of Lecture or Seminar per week: 0  
Hours of Lab or Studio per week: 3

DANC 120 - Special Topics in Dance

Credits: 1-3  
Repeatable within Term for Credit  
Offered by School of Dance  
Rotating topic. Introduction and exploration of topical studies in dance or related study areas; topic depends on instructor.

Notes: May be repeated for total 9 credits if course content differs.

Schedule Type: STU  
Hours of Lecture or Seminar per week: 1-3  
Hours of Lab or Studio per week: 1-3

DANC 125 - Modern/Contemporary Dance I

Credits: 3  
Repeatable within Degree for Credit  
Offered by School of Dance  
Introduces fundamentals of modern dance technique. Emphasizes improving anatomical awareness and alignment, increasing strength and flexibility, and developing rhythmic sensitivity.

Fulfills Mason Core requirement in arts.

Notes: May be repeated for total 6 credits.

Schedule Type: STU  
Hours of Lecture or Seminar per week: 0  
Hours of Lab or Studio per week: 3

DANC 131 - Beginning Jazz Technique
Credits: 3
Repeatable within Degree for Credit
Offered by School of Dance
Introduces fundamentals of jazz dance technique, explores the musical and cultural traditions of jazz dance, and its historical context. Emphasizes improving anatomical awareness and alignment, increasing strength and flexibility, and developing rhythmic sensitivity. Also introduces jazz improvisation and choreography.

Fulfills Mason Core requirement in arts.

Notes: May be repeated for 6 credits.

Schedule Type: STU
Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 3

DANC 145 - Ballet I

Credits: 3
Repeatable within Degree for Credit
Offered by School of Dance
Introduces fundamental elements of ballet technique and vocabulary. Stresses learning vocabulary and movement characteristics of this highly stylized art form. Emphasizes improving anatomical awareness and alignment, increasing strength and flexibility, and developing musicality.

Fulfills Mason Core requirement in arts.

Notes: May be repeated for total 6 credits.

Schedule Type: STU
Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 3

DANC 150 - Dance Improvisation

Credits: 3
Not Repeatable for Credit
Offered by School of Dance
Explores movement invention and discovery. Movement explored in relation to other art forms such as literature, painting, sculpture, and architecture; enhancing kinesthetic awareness; sensitivity to others; and the environment. Prerequisite for dance composition and choreography series.

Prerequisite(s): Admission to the dance major. Prerequisite enforced by registration system.
Schedule Type: STU
Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 3

DANC 161 - Beginning Tap Dance
Introductory exploration of rhythms and steps basic to the art form of tap dancing including its musical and cultural traditions. Emphasizes improving anatomical awareness and alignment, increasing strength and flexibility and developing rhythmic sensitivity.

Fulfills Mason Core requirement in arts.

**Notes:** May be repeated for total 6 credits.

**Schedule Type:** STU  
**Hours of Lecture or Seminar per week:** 0  
**Hours of Lab or Studio per week:** 3

### DANC 170 - Orientation to Dance Production

Credits: 1  
Not Repeatable for Credit  
Offered by School of Dance  
Introduces sound, lighting, and stage management elements and terminology as related to dance performance. Intensive workshop setting emphasizes laboratory experience.

**Prerequisite(s):** Admission to the dance major. Prerequisite enforced by registration system.  
**Schedule Type:** LAB  
**Hours of Lecture or Seminar per week:** 0  
**Hours of Lab or Studio per week:** 1

### DANC 190 - First Year Seminar

Credits: 0  
Not Repeatable for Credit  
Offered by School of Dance  
Introduction to School of Dance, CVPA, and university resources available to dance majors. Weekly meetings focus on learning about opportunities for involvement in dance, the community, and adjusting academically. Each class addresses a topic to assist dance majors to effectively transition to college life.

**Prerequisite(s):** Admission to the dance major. Prerequisite enforced by registration system.  
**Schedule Type:** SEM  
**Hours of Lecture or Seminar per week:** 0-1  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall

### DANC 210 - Anatomy and Kinesiology for Dance

Credits: 3  
Not Repeatable for Credit
Offered by School of Dance
Covers aspects of anatomy and kinesiology that directly apply to correct development of dance technique. Emphasizes exercise correctives and imagery to correct insufficient muscle pattern and reduce stress on the body.

Prerequisite(s): Admission to the dance major. Prerequisite enforced by registration system.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 1

**DANC 225 - Modern/Contemporary Dance II**

Credits: 3  
Repeatable within Degree for Credit  
Offered by School of Dance  
Further develops knowledge, skills, and appreciation of modern dance through continued exploration of techniques, aesthetics, and creativity. Continuing the development of anatomical awareness and alignment, technical clarity, and rhythmic sensitivity.

Fulfills Mason Core requirement in arts.

Prerequisite(s): DANC 125 or permission of instructor.  
Notes: May be repeated for total 9 credits.

Schedule Type: STU  
Hours of Lecture or Seminar per week: 0  
Hours of Lab or Studio per week: 3

**DANC 231 - Intermediate Jazz Technique**

Credits: 3  
Repeatable within Degree for Credit  
Offered by School of Dance  
Further study of the concepts of jazz dance technique, and in-depth study of 21st century jazz dance forms. Emphasizes furthering anatomical awareness and alignment, developing technical clarity, rhythm and syncopation. Continues exploration of jazz improvisation and choreography.

Fulfills Mason Core requirement in arts.

Prerequisite(s): DANC 131 or permission of instructor.  
Notes: May be repeated for 12 credits.

Schedule Type: STU  
Hours of Lecture or Seminar per week: 0  
Hours of Lab or Studio per week: 3

**DANC 245 - Ballet II**
Further develops fundamental elements of ballet technique and vocabulary. Stresses increasing vocabulary and movement characteristics of this highly stylized art form. Continuing emphasis on improving anatomical awareness and alignment, increasing strength and flexibility, and developing musically.

Fulfills Mason Core requirement in arts.

**Prerequisite(s):** DANC 145 or permission of instructor.
**Notes:** May be repeated for total 9 credits.

**Schedule Type:** STU  
**Hours of Lecture or Seminar per week:** 0  
**Hours of Lab or Studio per week:** 3

---

**DANC 251 - Dance Composition I**

Credits: 3  
Not Repeatable for Credit  
Offered by School of Dance  
Introduces basic principles for composing dance movement. Focuses on simple compositional forms as they apply to solo performer, discussion, analysis, and evaluation of artistic choices. Students maintain video and written journals to document their artistic process.

**Prerequisite(s):** C or higher in DANC 150.  
Prerequisite(s) enforced by registration system.

**Schedule Type:** STU  
**Hours of Lecture or Seminar per week:** 0  
**Hours of Lab or Studio per week:** 3

---

**DANC 252 - Dance Composition II**

Credits: 3  
Not Repeatable for Credit  
Offered by School of Dance  
Explores compositional elements in dance as they apply to group forms. Offers continued experience in developing and manipulating movement phrases using a variety of compositional forms. Introduces conducting rehearsals and selecting music. Students discuss, analyze, and evaluate artistic choices in composition using appropriate dance arts vocabulary and terminology, and maintain video and written journals to document artistic process.

**Prerequisite(s):** C or higher in DANC 150 and DANC 251.  
Prerequisite(s) enforced by registration system.

**Schedule Type:** STU
DANC 270 - Dance Production Lab

Credits: 1
Repeatable within Term for Credit
Offered by School of Dance
Practical experience in stage crew, sound, or lighting of dance productions through rehearsal to public performance for university dance concerts or guest artist programs.

Prerequisite(s): C or higher in DANC 170.
Prerequisite(s) enforced by registration system.

Notes: May be repeated for total 6 credits.

Schedule Type: LAB
Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 1

DANC 301 - What is Dance?

Credits: 3
Not Repeatable for Credit
Offered by School of Dance
Explores connections among literature, music, theater, and visual art within aesthetic framework of dance. Examines development and ideals of Western theatrical dance, and historical and social context in which they were created. Method of instruction includes lecture, discussion, and studio experiences.

Fulfills Mason Core requirement in arts.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 1

DANC 318 - Global Perspectives: World Dance Forms

Credits: 3
Repeatable within Degree for Credit
Offered by School of Dance
Continued in-depth study of world dance form including technique, music, and culture. Texts, video, performances, music, participatory events, and guest artist presentations. Lecture, studio. Area of concentration varies to include as many cultures as possible.

Fulfills Mason Core requirement in global understanding.

Prerequisite(s): C or higher in DANC 118 or DANC 119; or permission of instructor.
Prerequisite(s) enforced by registration system.

Notes: May be repeated for total 6 credits.

Schedule Type: STU
Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 2

DANC 324 - Introduction to Dance Conditioning

Credits: 1-3
Repeatable within Term for Credit
Offered by School of Dance
Course involves intensive rehabilitation and conditioning exercises and realignment training geared for the individual dancer. In-depth understanding of injury prevention and neuromuscular re-education are applied to ballet and modern technique classes.

Prerequisite(s): Admission to the dance major and permission of director; prerequisites enforced by registration system.
Notes: May be repeated for a total of 12 credits

Schedule Type: STU
Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 1-3

DANC 325 - Modern/Contemporary Dance III

Credits: 1-3
Repeatable within Term for Credit
Offered by School of Dance

Explores intermediate level of modern dance technique. Emphasizes improving anatomical awareness, increasing strength and flexibility, expanding modern dance vocabulary, and developing flow and dynamic range.

Fulfills Mason Core requirement in arts (for transfer students only).

Prerequisite(s): Admission to the dance major. Prerequisite enforced by registration system.
Notes: May be repeated for total 24 credits.

Schedule Type: STU
Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 1-3

DANC 331 - Advanced Jazz Dance

Credits: 3
Repeatable within Degree for Credit
Offered by School of Dance
In-depth studio study of 21st century jazz dance forms. Continues concepts and vocabulary introduced in DANC 231, and further emphasizes alignment, technical clarity and virtuosity. Emphasizes mastery of rhythm and syncopation.

Fulfills Mason Core requirement in arts (for transfer students only).

**Prerequisite(s):** DANC 231 or permission of instructor.

**Schedule Type:** STU
**Hours of Lecture or Seminar per week:** 0
**Hours of Lab or Studio per week:** 3

---

**DANC 345 - Ballet III**

Credits: 1-3
Repeatable within Term for Credit
Offered by School of Dance
Provides continued ballet training for intermediate-level dancer. Emphasizes increasing technical proficiency, improving anatomical awareness, and developing deeper understanding of skills and principles of ballet technique and how they provide foundation to teach and perform.

Fulfills Mason Core requirement in arts.

**Prerequisite(s):** Admission to the dance major. Prerequisite enforced by registration system.

**Notes:** May be repeated for 24 credits.

**Schedule Type:** STU
**Hours of Lecture or Seminar per week:** 0
**Hours of Lab or Studio per week:** 1-3

---

**DANC 360 - Choreography**

Credits: 3
Not Repeatable for Credit
Offered by School of Dance
Continued choreographic exploration and research, culminating in bringing completed works to production.

**Prerequisite(s):** C or higher in DANC 150, DANC 251 and DANC 252.
Prerequisite(s) enforced by registration system.

**Schedule Type:** STU
**Hours of Lecture or Seminar per week:** 0
**Hours of Lab or Studio per week:** 3

---

**DANC 362 - RS: Directed Choreography**

Credits: 1
Repeatable within Term for Credit
Offered by School of Dance
Faculty-guided, individual learning experience where students learn to choreograph a dance work by auditioning dancers, costuming, staging, lighting, selecting musical accompaniment, and composing original movement material.

Designated as a research and scholarship intensive course.

Prerequisite(s): C or higher in DANC 150, DANC 251, DANC 252 and DANC 360. Prerequisite(s) enforced by registration system.

Notes: May be repeated for total 6 credits.

Schedule Type: STU
Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 1

DANC 370 - Dance Performance

Credits: 1
Repeatable within Degree for Credit
Offered by School of Dance
Practical experience in performance, repertory, and choreography through rehearsal and public performance of university dance concerts or guest artist programs.

Prerequisite(s): Audition and admission to the dance major. Prerequisite enforced by registration system.
Notes: May be repeated for total 12 credits.

Schedule Type: STU
Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0-1

DANC 371 - Residency Workshop

Credits: 1
Repeatable within Term for Credit
Offered by School of Dance
Rehearsal and performance of new or restaged dance by guest choreographer in intensive rehearsal setting.

Prerequisite(s): Audition and admission to the dance major. Prerequisite enforced by registration system.
Notes: May be repeated for total 6 credits.

Schedule Type: STU
Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0-1

DANC 372 - Advanced Dance Production
DANC 390 - Dance History I

Credits: 3
Not Repeatable for Credit
Offered by School of Dance
Examines dance as it developed as Western theatrical form from its beginnings in social and folk dance through evolution into ballet. Emphasizes romantic and classical ballet. Also studies American dance forms as they evolved in spectacles, burlesques, minstrelsy, and social dance. All forms of dance placed in social, political, cultural, aesthetic, and historical contexts.

Fulfills Mason Core requirement in arts.

Fulfills writing intensive requirement in the major.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

DANC 391 - Dance History II

Credits: 3
Not Repeatable for Credit
Offered by School of Dance
Examines revolutions in transformation of 20th-century Western dance into forms and institutions that radically departed from predecessors. Development of contemporary dance carried with it reflections of the influence of technology and media as well as concept of global culture. Renewed interest in traditional dance forms acknowledges power of dance to serve as carrier of cultural and societal values. Dance forms placed in social, political, cultural, aesthetic, and historical contexts.

Fulfills Mason Core requirement in arts.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
DANC 399 - Independent Study

Credits: 1-3
Repeatable within Term for Credit
Offered by School of Dance
Individual research or creative project supervised by faculty member.

Prerequisite(s): Permission of director of School of Dance.
Notes: May be repeated for total 6 credits.

Schedule Type: IND
Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 1-3

DANC 410 - Introduction to Contemporary Movement Theories

Credits: 3
Not Repeatable for Credit
Offered by School of Dance
Introduction to movement theories combining somatic theory with practical application to dance training. Focus on ways somatic practices can deepen perceptual processes and influence movement aesthetics. Theories studied may include: Alexander Technique, Feldenkrais Method, Body-Mind Centering, and Ideokinesis.

Prerequisite(s): C or higher in DANC 210.
Prerequisite(s) enforced by registration system.

Schedule Type: LAB, LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

DANC 418 - Global Dance Intensive

Credits: 3
Repeatable within Degree for Credit
Offered by School of Dance
Intensive investigation of selected dance idiom within cultural and artistic contexts. Course work supplemented by participation in and observation of ambient culture. Analyzes similarities, differences, and common antecedents between selected culture and North American dance idioms.

Fulfills Mason Core requirement in global understanding.

Notes: May be repeated for total 6 credits.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
DANC 420 - Special Topics in Dance

Credits: 1-3
Repeatable within Term for Credit
Offered by School of Dance
In-depth presentation and exploration of topical studies in dance or related study areas.

Prerequisite(s): 9 credits of dance courses, or permission of instructor.
Notes: Topic depends on instructor. May be repeated for total 9 credits.

Schedule Type: STU
Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 1-3

DANC 425 - Modern/Contemporary Dance IV

Credits: 1-3
Repeatable within Term for Credit
Offered by School of Dance

Advanced-level exploration of modern dance technique. Emphasizes refining alignment, developing ability to self-correct, and replicating sophisticated movement sequences. Preparation to enter professional field of dance.

Fulfills Mason Core requirement in arts (for transfer students only).

Prerequisite(s): Admission to the dance major. Prerequisite enforced by registration system.
Notes: May be repeated for 18 credits.

Schedule Type: STU
Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 1-3

DANC 445 - Ballet IV

Credits: 1-3
Repeatable within Term for Credit
Offered by School of Dance
Provides preprofessional ballet training for advanced-level dancer. Emphasizes attainment of high-quality technical and performance skills, application of anatomical principles, and mastery of sophisticated classical movement sequences.

Fulfills Mason Core requirement in arts.

Prerequisite(s): Admission to the dance major. Prerequisite enforced by registration system.
Notes: May be repeated for 18 credits.

Schedule Type: STU
DANC 453 - Teaching Creative Movement

Credits: 3
Not Repeatable for Credit
Offered by School of Dance
Provides theory, methodology, and practicum experience in preparation for teaching creative movement to children K-12, with some application to special populations.

Prerequisite(s): Admission to the dance major. Prerequisite enforced by registration system.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

DANC 454 - Methods of Teaching Dance

Credits: 3
Not Repeatable for Credit
Offered by School of Dance
Examines dance pedagogy, focusing on principles needed for teaching sound technique. Students learn skills, methods, and instructional procedures for classroom. Emphasizes curriculum development, proper course sequencing, implementation of teaching strategies, and classroom management techniques. Students study teaching methods appropriate for K-12, gifted and talented, and special-needs students. Intensive practice in implementing these skills includes lab, field-teaching experiences.

Prerequisite(s): Admission to the dance major; senior standing; prerequisite enforced by registration system.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

DANC 490 - Senior Dance Seminar

Credits: 3
Not Repeatable for Credit
Offered by School of Dance
Culminating seminar devoted to analyzing and synthesizing knowledge and skills gained through undergraduate course work as it applies to dance, arts education, and professional development. Students develop senior project including written and oral presentation in public forum.

Fulfills Mason Core requirement in synthesis.

Prerequisite(s): Admission to the dance major; senior standing; prerequisite enforced by registration system.
Schedule Type: SEM
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
**DANC 501 - Graduate Dance Seminar**

Credits: 1-3  
Repeatable within Degree for Credit  
Offered by School of Dance  
Presentation and discussion of current issues in dance specific to education, research, and professional development in the field.

Prerequisite(s): Admission to MFA in dance program.  
Schedule Type: SEM  
Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0

**DANC 510 - Contemporary Movement Theories**

Credits: 3  
Repeatable within Degree for Credit  
Offered by School of Dance  
In-depth study of movement theories combining somatic theory with practical application to dance training. Focus is on ways somatic practices can deepen perceptual processes and influence movement aesthetics.

Prerequisite(s): Admission to Dance MFA program.  
Schedule Type: STU  
Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0

**DANC 520 - Special Topics in Dance**

Credits: 1-3  
Repeatable within Term for Credit  
Offered by School of Dance  
In-depth presentation and exploration of topical studies in dance and/or related study areas.

Prerequisite(s): Admission to Dance MFA program.  
Notes: Topic depends on instructor. May be repeated for total 9 credits.  
Schedule Type: LEC  
Hours of Lecture or Seminar per week: 1-3  
Hours of Lab or Studio per week: 0

**DANC 525 - Advanced Modern Dance**

Credits: 1-3  
Repeatable within Term for Credit  
Offered by School of Dance
Advanced study of modern technique, emphasizing sophisticated technical ability and performance skills, includes comparison of pedagogical perspectives.

**Prerequisite(s):** Admission to Dance MFA program.
**Notes:** May be repeated for total 18 credits.

**Schedule Type:** STU  
**Hours of Lecture or Seminar per week:** 0  
**Hours of Lab or Studio per week:** 1-3

### DANC 545 - Advanced Ballet

Credits: 1-3  
Repeatable within Term for Credit  
Offered by School of Dance  
Advanced study of ballet technique with an emphasis on high technical ability, performance skills and ballet vocabulary, includes comparison of pedagogical perspectives.

**Prerequisite(s):** Admission to Dance MFA program.  
**Notes:** May be repeated for total 18 credits.

**Schedule Type:** STU  
**Hours of Lecture or Seminar per week:** 0  
**Hours of Lab or Studio per week:** 1-3

### DANC 560 - Advanced Choreography

Credits: 3  
Repeatable within Term for Credit  
Offered by School of Dance  
Intensive study and exploration of choreographic forms.

**Prerequisite(s):** Admission to Dance MFA program.  
**Notes:** May be repeated for 12 credits.

**Schedule Type:** LAB  
**Hours of Lecture or Seminar per week:** 0  
**Hours of Lab or Studio per week:** 3

### DANC 570 - Advanced Dance Performance

Credits: 1-3  
Repeatable within Degree for Credit  
Offered by School of Dance  
Public performance/presentations in university or professional productions.

**Prerequisite(s):** Admission to Dance MFA program.
Notes: May be repeated for total 12 credits.

**DANC 571 - Residency Workshop**

Credits: 3
Repeatable within Degree for Credit
Offered by School of Dance
Rehearsal direction of a new or restaged work by a guest choreographer in an intensive rehearsal process.

Prerequisite(s): Admission to Dance MFA program.
Notes: May be repeated for 9 credits.

**DANC 580 - Laban Movement Analysis**

Credits: 3
Not Repeatable for Credit
Offered by School of Dance
Introduction to the components of Laban Movement Analysis: body, shape, effort and space.

Prerequisite(s): Admission to Dance MFA program.

**DANC 598 - Philosophy and Aesthetics of Dance**

Credits: 3
Not Repeatable for Credit
Offered by School of Dance
Study of philosophical theories and aesthetic principles of dance as a performing art.

Prerequisite(s): DANC 390 and 391, or permission of instructor.

**DANC 599 - Independent Study**
Credits: 3
Repeatable within Term for Credit
Offered by School of Dance
Individual research or creative project.

Prerequisite(s): Admission to Dance MFA program.
Notes: May be repeated for total 6 credits.

Schedule Type: IND
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
Grading: Graduate Special

DANC 615 - Contemporary Trends

Credits: 3
Not Repeatable for Credit
Offered by School of Dance
Study of contemporary art and artists and their philosophical theories, aesthetics and practices as they relate to the creation of new work.

Prerequisite(s): Admission to Dance MFA program.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

DANC 627 - Advanced Teaching Seminar

Credits: 3
Not Repeatable for Credit
Offered by School of Dance
Discussion and readings from varied pedagogical theories examining diverse approaches to teaching technique and theory culminating in development of a teaching portfolio.

Prerequisite(s): Admission to Dance MFA program.
Schedule Type: SEM
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

DANC 672 - Dance Production

Credits: 3
Repeatable within Degree for Credit
Offered by School of Dance
Artistic Direction of university or professional performance including mentoring of choreographers, adjudication of work, coordination with lighting designer, costumer, sound technician and managing director.
**DANC 680 - Dance Management**

Credits: 3
Not Repeatable for Credit
Offered by School of Dance
Exploration of the technical, financial and economical aspects of dance management including areas of marketing, fundraising, publicity, incorporation, booking non-profit vs. profit making organizations and issues relating to current practices in the performing arts industry.

**Prerequisite(s):** Admission to Dance MFA program.

**Schedule Type:** LEC

**Hours of Lecture or Seminar per week:** 3

**Hours of Lab or Studio per week:** 0

---

**DANC 790 - Internship**

Credits: 1-3
Repeatable within Degree for Credit
Offered by School of Dance
In depth study in selected subject area of interest.

**Prerequisite(s):** Admission to Dance MFA program.

**Notes:** May be repeated for total 9 credits.

**Schedule Type:** INT

**Hours of Lecture or Seminar per week:** 1-3

**Hours of Lab or Studio per week:** 0

---

**DANC 798 - Directed Choreography/Project**

Credits: 1-3
Repeatable within Degree for Credit
Offered by School of Dance.
This course provides intensive independent choreographic study, culminating in the creation of a significant dance work or body of works, presented in a professional level public performance. The choreography must demonstrate the student's mastery of choreographic craft, an original concept and compelling artistry.

Equivalent to DANC 562 (2015-2016 Catalog)
**Prerequisite(s):** Admission to MFA in Visual and Performing Arts: Dance Concentration and DANC 560.
**Notes:** May be repeated for 6 credits.

**Schedule Type:** STU  
**Hours of Lecture or Seminar per week:** 0  
**Hours of Lab or Studio per week:** 3  
**Grading:** S/NC  
**When Offered:** Fall, Spring, Summer

---

**DANC 799 - Thesis**

Credits: 1-6  
Repeatale within Degree for Credit  
Offered by School of Dance  
Creation and documentation of original research including planning, performance, recording and written reflecting under direction of thesis committee.

**Prerequisite(s):** Admission to Dance MFA program.  
**Notes:** May be repeated for total 6 credits.

**Schedule Type:** IND  
**Hours of Lecture or Seminar per week:** 1-3  
**Hours of Lab or Studio per week:** 0  
**Grading:** Satisfactory/No credit only

---

**Data Analytics Engineering (DAEN)**

Offered by Volgenau School of Engineering

---

**DAEN 690 - Data Analytics Project**

Credits: 3  
Not Repeatable for Credit  
Offered by Volgenau School of Engineering  
Capstone project course for MS in Data Analytics program. Key activity is completion of a major applied team project resulting in an acceptable technical report and oral briefing. Student should plan to take this course in the last semester of studies.

**Prerequisite(s):** Completion of twelve credit hours of coursework in MS Data Analytics program.  
**Schedule Type:** SEM  
**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall, Spring

---

**DAEN 698 - Data Analytics Research Project**
Credits: 1-3
Repeatable within Term for Credit
Offered by Volgenau School of Engineering
Conduct a research project to be chosen and completed under guidance of a graduate faculty member that results in an acceptable technical report.

Prerequisite(s): Graduate Standing, completion of at least two core courses and a minimum of 12 credits in the DAEN program, and permission of instructor.
Notes: No more than a total of three credits may be taken from within the DAEN program.

Schedule Type: IND
Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0
When Offered: Fall, Summer, Spring

Early Childhood Education (ECED)

Offered by the College of Education and Human Development

ECED 401 - Developmental Pathways of Diverse Learners, Birth-Adolescence

Credits: 3
Not Repeatable for Credit
Offered by Graduate School of Education
Examines child and adolescent development from diverse perspectives. Addresses typical and atypical physical, social, and emotional, language, and intellectual development. Explores role of individual differences and culture in understanding and interpreting child and adolescent development.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring, Summer

ECED 402 - Foundations of Language and Literacy for Diverse Young Learners

Credits: 3
Not Repeatable for Credit
Offered by Graduate School of Education
Examines complexity of language acquisition and literacy development. Focuses on typical and atypical language development, connections between language and literacy, and diversity of communication styles in families and cultures. Emphasizes first and second language acquisition.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring, Summer
ECED 403 - Inclusive Curriculum for Young Learners: Planning Instruction and Guidance

Credits: 3
Not Repeatable for Credit
Offered by Graduate School of Education

Notes: Field experience required.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

ECED 404 - Engaging Families of Diverse Young Learners

Credits: 3
Not Repeatable for Credit
Offered by Graduate School of Education
Focuses on strategies for developing culturally appropriate family professional partnerships to benefit children, including children from diverse cultural and linguistic backgrounds and children with special needs. Explores theories and research supporting a family-centered approach, including family and professional rights and responsibilities, especially in the special education process.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Summer

ECED 405 - Introduction to Early Childhood Special Education

Credits: 3
Not Repeatable for Credit
Offered by Graduate School of Education
Surveys current knowledge about young children with disabilities within the context of human growth and development and learning expectations in the preschool years. Includes historical factors and legislation affecting service delivery.

Notes: Field experience required.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring, Summer
ECED 406 - Medical Aspects of Physical and Sensory Disabilities of Diverse Young Learners

Credits: 3
Not Repeatable for Credit
Offered by Graduate School of Education

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring

ECED 422 - Developing Language, Literacy, and Communication of Diverse Young Learners

Credits: 3
Not Repeatable for Credit
Offered by Graduate School of Education
Examines strategies to develop language, literacy, and communication in young children with varying abilities. Explores the importance of adult-child interaction and the effect of bilingualism, cultural diversity, cognitive ability, and language disorders.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

ECED 423 - Early Intervention for Infants and Toddlers with Disabilities: Collaborative and Consultative Approaches

Credits: 3
Not Repeatable for Credit
Offered by Graduate School of Education
Covers methods of service delivery for infants and toddlers with disabilities and their families. Explores key aspects of consultation, interdisciplinary collaboration, service coordination, and family-centered services. Focuses on culturally responsive practices.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

ECED 497 - Special Topics in Early Childhood Education
Credits: 1-3
Repeatable within Term for Credit
Offered by Graduate School of Education
Provides study on selected topic or emerging issue in Early Childhood Education.

Notes: May be repeated for credit with ECE program permission.

Schedule Type: SEM
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring, Summer

ECED 501 - Developmental Pathways of Diverse Learners, Birth-Adolescence

Credits: 3
Not Repeatable for Credit
Offered by Graduate School of Education
Examines child and adolescent development from diverse perspectives. Addresses typical and atypical physical, social, and emotional, language, and intellectual development. Explores role of individual differences and culture in understanding and interpreting child and adolescent development.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring, Summer

ECED 502 - Foundations of Language and Literacy for Diverse Young Learners

Credits: 3
Not Repeatable for Credit
Offered by Graduate School of Education
Examines complexity of language acquisition and literacy development. Focuses on typical and atypical language development, connections between language and literacy, and diversity of communication styles in families and cultures. Emphasizes first and second language acquisition.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring, Summer

ECED 503 - Inclusive Curriculum for Young Learners: Planning Instruction and Guidance

Credits: 3
Not Repeatable for Credit
Offered by Graduate School of Education
Explores principles of learning, curriculum development, and relationship between assessment and instruction. Examines role of play and active exploration in learning. Addresses guiding children's behavior and the role of families and culture in children's
ECED 504 - Engaging Families of Diverse Young Learners

Credits: 3
Not Repeatable for Credit
Offered by Graduate School of Education
Focuses on strategies for developing culturally appropriate family professional partnerships to benefit children, including children from diverse cultural and linguistic backgrounds and children with special needs. Explores theories and research supporting a family centered approach, including family and professional rights and responsibilities, especially in the special education process.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring, Summer

ECED 505 - Introduction to Early Childhood Special Education

Credits: 3
Not Repeatable for Credit
Offered by Graduate School of Education
Surveys current knowledge about young children with disabilities within the context of human growth and development and learning expectations in the preschool years. Includes historical factors and legislation affecting service delivery.

Notes: Field experience required.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring, Summer

ECED 506 - Medical Aspects of Physical and Sensory Disabilities of Diverse Young Learners

Credits: 3
Not Repeatable for Credit
Offered by Graduate School of Education
Focuses on medical aspects of young children with disabilities and the role of professionals in service delivery. Explores etiology, symptomatology, and management of neuromotor disabilities. Emphasizes positioning, adaptive strategies, and
understanding assistive technology devices.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring

ECED 511 - Assessment of Diverse Young Learners

Credits: 3
Not Repeatable for Credit
Offered by Graduate School of Education
Examines types of assessment, including family-centered child assessment, for planning and implementing effective programs for culturally, linguistically, and ability diverse children, birth through third grade. Addresses selection, administration, analysis, and interpretation of formal and informal assessments.

Prerequisite(s): ECED 401 or ECED 501 and ECED 403 or ECED 503 or Approval of course instructor
Notes: Field Experience Required.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

ECED 512 - Language and Literacy Assessment and Instruction for Diverse Young Learners

Credits: 3
Not Repeatable for Credit
Offered by Graduate School of Education
Examines ways to assess and develop reading, writing, listening, and speaking in preschool through third-grade classrooms. Addresses instructional strategies and practices that promote language and literacy development in culturally, linguistically, and ability diverse children.

Prerequisite(s): Admission to the Early Childhood Education program or approval of course instructor.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

ECED 513 - Curriculum Across the Content Areas for Diverse Young Learners

Credits: 3
Not Repeatable for Credit
Offered by Graduate School of Education
Explores assessment, curriculum development, planning, and instructional practices across content areas. Examines strategies for guiding children's behavior, integrating instruction across content areas, and planning and implementing community of learners
inclusive of children with diverse disabilities.

**Prerequisite(s):** ECED 503.

**Schedule Type:** LEC

**Hours of Lecture or Seminar per week:** 3

**Hours of Lab or Studio per week:** 0

**When Offered:** Fall, Spring

---

**ECED 514 - Mathematics and Science for Diverse Young Learners**

Credits: 3

Not Repeatable for Credit

Offered by Graduate School of Education

Examines ways to foster development of mathematics and science in preschool to third-grade children. Covers construction of math and science lessons and hands-on experiences that address the needs of culturally, linguistically, and ability diverse children.

**Prerequisite(s):** Admission to the Early Childhood Education program or approval of course instructor.

**Notes:** Field experience required.

---

**ECED 521 - Family-Centered Assessment of Diverse Young Learners**

Credits: 3

Not Repeatable for Credit

Offered by Graduate School of Education

Examines types of assessment, including family-centered assessment, used for planning and implementing effective programs for children from diverse cultures and with varied learning needs. Addresses selection, administration, and interpretation of formal and informal assessments.

**Prerequisite(s):** Admission to the Early Childhood Education program or approval of course instructor.

---

**ECED 522 - Developing Language, Literacy, and Communication of Diverse Young Learners**

Credits: 3

Not Repeatable for Credit

Offered by Graduate School of Education

Examines strategies to develop language, literacy, and communication in young children with varying abilities. Explores the
importance of adult-child interaction and the effect of bilingualism, cultural diversity, cognitive ability, and language disorders.

Prerequisite(s): Admission to the Early Childhood Education program or approval of course instructor
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

ECED 523 - Early Intervention for Infants and Toddlers with Disabilities: Collaborative and Consultative Approaches

Credits: 3
Not Repeatable for Credit
Offered by Graduate School of Education
Covers methods of service delivery for infants and toddlers with disabilities and their families. Explores key aspects of consultation, interdisciplinary collaboration, service coordination, and family-centered services. Focuses on culturally responsive practices.

Prerequisite(s): Admission to the Early Childhood Education program or approval of course instructor.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

ECED 524 - Families of Children with Special Needs

Credits: 3
Not Repeatable for Credit
Offered by Graduate School of Education
Focuses on strategies for developing culturally appropriate family-professional partnerships to benefit children with special needs. Explores theories and research supporting a family-centered approach. Includes family and professional rights and responsibilities in the special education process.

Prerequisite(s): Admission to the Early Childhood Education program or approval of course instructor.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring, Summer

ECED 597 - Special Topics in Early Childhood Education

Credits: 1-3
Repeatable within Term for Credit
Offered by Graduate School of Education
Provides study on selected topic or emerging issue in Early Childhood Education.

Notes: May be repeated for credit with ECE program permission.
ECED 601 - Frameworks for Early Childhood Education

Credits: 3
Not Repeatable for Credit
Offered by Graduate School of Education
Analyzes foundational frameworks for developing perspectives for working with culturally, linguistically, and ability diverse young learners, birth to age 8, and their families. Examines foundational work from fields of early childhood education, early childhood special education, multicultural education, and second language acquisition.

Prerequisite(s): Must be taken with or after final course of program.
Notes: Must be taken as final course or with final courses of the program.

ECED 685 - Applied and Teacher Research in Early Childhood Education

Credits: 3
Not Repeatable for Credit
Offered by Graduate School of Education
Develops fundamental concepts, principles, and methods of research in early childhood education, with emphasis on interpreting and applying research results. Critiques research and uses findings in educational settings.

Prerequisite(s): Instructor's approval
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

ECED 691 - Policy Perspectives in Early Childhood Education

Credits: 3
Not Repeatable for Credit
Offered by Graduate School of Education
Explores historical and current trends and issues involving legislation and policy in early childhood education, multilingual education, early childhood special education, and multicultural education. Focuses on historical role of social advocacy, development of advocacy skills, and collaboration and consultation with other professionals and staff in early childhood education of services and context of service delivery.

Prerequisite(s): Instructor's approval
ECED 702 - Early Writing: Cognition, Language, and Literacy

Credits: 3
Not Repeatable for Credit
Offered by Graduate School of Education
Examines early writing research and practice related to cognition, language, and literacy in the early education of diverse learners, including special education and multicultural/multilingual education.

Prerequisite(s): Approval of instructor and admission to the Ph.D. program.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
When Offered: Fall, Summer, Spring

ECED 704 - Family Research and Practice in Early Childhood Education

Credits: 3
Not Repeatable for Credit
Offered by Graduate School of Education
Explores the relationship between families and professionals in providing appropriate early care and education, birth through grade 3, including children wit special education needs and those from culturally, linguistically, and economically diverse backgrounds. Includes in-depth study, analysis, and discussions of original research as well as synthesis of findings.

Prerequisite(s): Approval of instructor and admissions to Ph.D. program.

Schedule Type: SEM
Hours of Lecture or Seminar per week: 3
When Offered: Fall

ECED 710 - International Perspectives in Early Childhood Education

Credits: 3
Not Repeatable for Credit
Offered by Graduate School of Education
Examines international perspectives in early childhood education in various contexts to increase students' knowledge of approaches to planning and implementing effective programs for culturally, linguistically, and ability diverse children by professionals working with young children and families to inform, connect, and enrich U.S. based programs in early childhood education.

Prerequisite(s): Admissions to the M.Ed. in Curriculum and Instruction, Concentration in Early Childhood Education for Diverse Learners, the Ph.D. in Education, or permission of instructor.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
When Offered: Fall
ECED 790 - Internship with Diverse Preschool Children

Credits: 3  
Repeatable within Degree for Credit  
Offered by Graduate School of Education  
Enables students to participate full time in an internship with diverse preschool children. Links university course work to real world of working with diverse young learners and their families.

Prerequisite(s): ECED 511 and ECED 514, and Admission to the Early Childhood Education Prekindergarten - Third Grade Licensure Graduate Certificate Program. All endorsement and standardized test requirements (Praxis Core Academics Skills for Educators or qualifying substitution, Praxis II, and Virginia Communication and Literacy Assessment) must be met the semester prior to the internship.

Schedule Type: INT  
Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0  
Grading: Satisfactory/No Credit  
When Offered: Fall, Spring

ECED 791 - Internship with Diverse Infants and Toddlers

Credits: 3  
Repeatable within Degree for Credit  
Offered by Graduate School of Education  
Enables students to participate full time in an internship with diverse infants/toddlers. Links university course work to real world of working with diverse young learners and their families.

Prerequisite(s): ECED 511, and Admission to the Early Childhood Special Education Licensure Graduate Certificate Program. All standardized test requirements (Praxis Core Academic Skills for Educators or qualifying substitution and Virginia Communication and Literacy Assessment) must be met the semester prior to the internship.

Notes: Students enroll in both infant/toddler (3 credits) and preschool (3 credits) internships.

Schedule Type: INT  
Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0  
Grading: Satisfactory/No Credit  
When Offered: Fall, Spring, Summer

ECED 792 - Internship in Early Childhood Education-TFA

Credits: 1-6  
Repeatable within Degree for Credit  
Offered by Graduate School of Education  
Enables students to participate full time in an internship in early childhood education. Links university course work to real world of working with diverse young learners and their families.

Prerequisite(s): Admission to the Early Childhood Education program or approval of course instructor.

Schedule Type: INT
ECED 793 - Internship in Preschool Early Childhood Special Education

Credits: 3
Repeatable within Degree for Credit
Offered by Graduate School of Education
Enables students to participate full time in an internship in preschool early childhood special education. Links university course work to real world of working with diverse young learners and their families.

Prerequisite(s): ECED 511, and Admission to the Early Childhood Special Education Licensure Graduate Certificate Program. All standardized test requirements (Praxis Core Academic Skills for Educators or qualifying substitution and Virginia Communication and Literacy Assessment) must be met the semester prior to the internship.

Schedule Type: INT

ECED 795 - Internship in Kindergarten - Third Grade

Credits: 3
Repeatable within Degree for Credit
Offered by Graduate School of Education
Enables students to participate full time in an internship in early childhood education in kindergarten through third grade. Links university course work to real world of working with diverse young learners and their families.

Prerequisite(s): ECED 501, ECED 502, ECED 503, ECED 504, ECED 511, ECED 514, ECED 790, and Admission to the Early Childhood Education Prekindergarten - Third Grade Licensure Graduate Certificate Program. All endorsement and standardized test requirements (Praxis Core Academics Skills for Educators or qualifying substitution, Praxis II, Virginia Communication and Literacy Assessment, and Reading for Virginia Educators) must be met the semester prior to the internship.

Schedule Type: INT

ECED 798 - Internship in Early Childhood Education PreKindergarten-Third Grade

Credits: 6
Not Repeatable for Credit
Offered by Graduate School of Education
Enables students to participate full time in an internship in early childhood education (preK-3). Links university course work to real world of working with diverse young learners and their families.
**Prerequisite(s):** ECED 511, ECED 514, and Admission to the Early Childhood Education Prekindergarten - Third Grade Licensure Graduate Certificate Program. All endorsement and standardized test requirements (Praxis core Academics Skills for Educators or qualifying substitution, Praxis II, and Virginia Communication and Literacy Assessment) must be met the semester prior to the internship.

**Schedule Type:** INT  
**Grading:** Satisfactory/No Credit  
**When Offered:** Fall, Spring

---

**ECED 799 - Internship in Early Childhood Special Education Birth - Five**

Credits: 6  
Not Repeatable for Credit  
Offered by Graduate School of Education  
Enables students to participate full time in an internship in early childhood special education (birth-5). Links university course work to real world of working with children with special needs and their families.

**Prerequisite(s):** ECED 511 and Admission to the Early Childhood Special Educational Licensure Graduate Certificate Program. All standardized test requirements (Praxis Core Academic Skills of Educators or qualifying substitution and Virginia Communication and Literacy Assessment) must be met the semester prior to the internship.

**Schedule Type:** INT  
**Grading:** Satisfactory/No Credit  
**When Offered:** Fall

---

**ECED 801 - Current Research and Trends in Early Childhood Education**

Credits: 3  
Repeatable within Term for Credit  
Offered by Graduate School of Education  
Examines research and trends in the early education of children. Explores issues that influence the education of young children with special education needs and children from culturally, linguistically, and economically diverse backgrounds. Examines practices appropriate for diverse young learners.

**Prerequisite(s):** Admission to the PhD in Education program or post-master's status and approval of course instructor.

**Schedule Type:** SEM  
**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall

---

**ECED 803 - Teacher Preparation and Professional Development**

Credits: 3  
Not Repeatable for Credit  
Offered by Graduate School of Education  
Explores research and current recommended practices related to teacher preparation and professional development. Provides opportunity for practical application with preservice or inservice teachers.
Equivalent to EDUC 803.

Prerequisite(s): Admission to the PhD in Education program or post-master's status and approval of course instructor.

Schedule Type: SEM
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

ECED 804 - Family Research and Practice in Early Childhood Education

Credits: 3
Not Repeatable for Credit
Offered by Graduate School of Education.
Explores the relationship between families and professionals in providing appropriate early care and education, birth through grade 3, including children with special education needs and those from culturally, linguistically, and economically diverse backgrounds. Includes in-depth study, analysis, and discussions of original research as well as syntheses of findings.

Prerequisite(s): Admission to the PhD in Education Program or advanced-master's status with approval of course instructor.

Schedule Type: SEM
Hours of Lecture or Seminar per week: 3
When Offered: Spring

ECED 812 - Early Writing: Cognition, Language, and Literacy

Credits: 3
Not Repeatable for Credit
Offered by Graduate School of Education
Examines writing research and practice related to cognition, language, and literacy in the early education of diverse learners, including special education and multicultural/multilingual education.

Prerequisite(s): Admission to the PhD in Education program or advanced-master's status with approval of course instructor.

Schedule Type: SEM
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

Economics (ECON)

Offered by the College of Humanities and Social Sciences

Individual courses taken for credit under their former numbers may not be repeated for credit under their present numbers. A grade of C or better in ECON 103 and 104 is prerequisite to upper-division economics courses.

ECON 100 - Economics for the Citizen
Credits: 3
Not Repeatable for Credit
Offered by Economics
Not available to economics majors. Broad introduction to economic concepts and how they can contribute to a better understanding of the world around us. Applies and develops concepts to current economic and social problems and issues. Less formal modeling than in the 103-104 sequence.

Fulfills Mason Core requirement in social and behavioral science.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**ECON 103 - Contemporary Microeconomic Principles**

Credits: 3
Not Repeatable for Credit
Offered by Economics
Introduces microeconomics in the context of current problems. Explores how market mechanism allocates scarce resources among competing uses; uses supply, demand, production, and distribution theory to analyze problems.

Fulfills Mason Core requirement in social and behavioral science.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**ECON 104 - Contemporary Macroeconomic Principles**

Credits: 3
Not Repeatable for Credit
Offered by Economics
Introduces macroeconomics in the context of current problems. National income analysis, money and banking, economic growth and stability, unemployment, inflation, and role of government.

Fulfills Mason Core requirement in social and behavioral science.

**Prerequisite(s):** ECON 103.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**ECON 105 - Environmental Economics for the Citizen**

Credits: 3
Not Repeatable for Credit
Offered by Economics
Introduction to economic concepts and how they can be applied to environmental policy issues such as air and water pollution, climate change, natural resource use, and sustainability. Focus is on concepts, policy, and case studies rather than formal modeling exercises.
Designated a Green Leaf Course.

Fulfills Mason Core requirement in social and behavioral science.

**ECON 110 - Introduction to Economic Science**

Credits: 2  
Not Repeatable for Credit  
Offered by Economics  
Introduces economics as an observational science, covering personal vs. impersonal exchange, strategic interdependence and game theory, group decision making, and market design.

Notes: Registration is controlled; contact instructor for guidelines.

**ECON 296 - Special Topics in Economics**

Credits: 3  
Repeatable within Term for Credit  
Offered by Economics  
Provides coverage of a specialized topic in economics at the introductory level. Topics vary by section.

Notes: May be repeated for credit when topic is different for a maximum of 9 hours.

**ECON 306 - Intermediate Microeconomics**

Credits: 3  
Not Repeatable for Credit  
Offered by Economics  
Basic factors of price and distribution theory: analysis of demand, costs of production and supply relationships, and price and output determination under various market structures.

Prerequisite(s): ECON 103 and 104, and MATH 108 or 113.
ECON 308 - Managerial Economics and Strategy

Credits: 3
Not Repeatable for Credit
Offered by Economics
Analysis of major strategic business situations including pricing strategy, incentives and contracts, game theory, and vertical and horizontal integration.

Prerequisite(s): ECON 306.

ECON 309 - Economic Problems and Public Policies

Credits: 3
Not Repeatable for Credit
Offered by Economics
Economic problems in light of current and proposed public policies. Topics include environmental issues, international trade policies, and regulatory issues and their historical roots.

Fulfills Mason Core requirement in synthesis.

Prerequisite(s): ECON 100 or 103 and 104 or permission of instructor.

ECON 310 - Money and Banking

Credits: 3
Not Repeatable for Credit
Offered by Economics
Monetary, commercial, and central banking systems, with particular emphasis on their relationship with American government programs, fiscal policies, and controls.

Prerequisite(s): ECON 103 and 104, or permission of instructor.
ECON 311 - Intermediate Macroeconomics

Credits: 3  
Not Repeatable for Credit  
Offered by Economics  
Aggregate economic accounts, including measuring national income; determinants of levels of income and output; and causes and solutions for problems of unemployment, inflation, and economic growth.

Prerequisite(s): ECON 103 and 104, or permission of instructor.  
Schedule Type: LEC  
Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0

ECON 320 - Labor Problems

Credits: 3  
Not Repeatable for Credit  
Offered by Economics  
Explores American labor unions and their effect on society, including causes of and proposed solutions to selected problems.

Prerequisite(s): ECON 103 and 104, or permission of instructor.  
Schedule Type: LEC  
Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0

ECON 321 - Economics of Labor

Credits: 3  
Not Repeatable for Credit  
Offered by Economics  
Defines factors that determine levels of wages and employment, and economic consequences. Emphasizes recent developments in unionism, collective bargaining, and industrial technology.

Prerequisite(s): ECON 306.  
Schedule Type: LEC  
Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0

ECON 330 - Public Finance

Credits: 3  
Not Repeatable for Credit  
Offered by Economics  
Covers intergovernmental financial relationships; types, incidences, and consequences of taxation; other sources of governmental income; governmental expenditures and their effect; public economic enterprises; public borrowing; and debt management and its economic effect.
Prerequisite(s): ECON 306 or permission of instructor.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ECON 335 - Environmental Economics

Credits: 3
Not Repeatable for Credit
Offered by Economics

Microeconomic analysis of environmental problems. Topics include externalities and market failure, alternative solutions and policies, problems in monitoring and enforcement, economic analysis of development of legislation and regulation, and applications to current policy issues.
Designated a Green Leaf Course.

Prerequisite(s): ECON 103 and 104
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ECON 340 - Introduction to Mathematical Economics

Credits: 3
Not Repeatable for Credit
Offered by Economics
Mathematical treatment of theory of firm and household behavior, stabilization policy, growth theory, input-output analysis, and linear programming.

Prerequisite(s): C or higher in ECON 306 and 311, and MATH 113; or permission of instructor.
Prerequisite(s) enforced by registration system.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ECON 345 - Introduction to Econometrics

Credits: 3
Not Repeatable for Credit
Offered by Economics
Modern statistical techniques in estimating economic relations.

Fulfills writing intensive requirement in the major.
Prerequisite(s): D or higher in ECON 306, ECON 311, and STAT 250 and STAT 350 or STAT 344 and STAT 354. Prerequisite(s) enforced by registration system.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ECON 355 - The Political Economy of Nonprofit Institutions

Credits: 3
Not Repeatable for Credit
Offered by Economics
Applies the basic principles of economics to teach students to think critically about nonprofit institutions. Examines the economics of nonprofit institutions, how incentives influence the evolution of charities, and current issues in nonprofit organizations.

Fulfills writing intensive requirement in the major.

Prerequisite(s): ECON 103 and ECON 104 or permission of instructor.

Schedule Type: SEM
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ECON 360 - Economics of Developing Areas

Credits: 3
Not Repeatable for Credit
Offered by Economics
Economic growth characteristic of developing countries. Economic development, obstacles to development, policies, and planning.

Fulfills Mason Core requirement in global understanding.

Prerequisite(s): ECON 103 and 104, or permission of instructor.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ECON 361 - Economic Development of Latin America

Credits: 3
Not Repeatable for Credit
Offered by Economics
Economic development, institutions, and problems of Latin America.

Fulfills Mason Core requirement in global understanding.
ECON 362 - African Economic Development

Credits: 3  
Not Repeatable for Credit  
Offered by Economics  
Issues of economic development as applied to Africa. Includes overview of early economic history in Africa and post-independence development, and contemporary development problems.

Fulfills Mason Core requirement in global understanding.

Prerequisite(s): ECON 103 and 104.  
Notes: Fulfills the college requirement in non-Western culture.

Schedule Type: LEC  
Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0

ECON 365 - Topics in Economic History

Credits: 3  
Repeatable within Term for Credit  
Offered by Economics  
Possible topics include ancient, medieval, modern European, and American economic history, using econometric analysis as necessary.

Fulfills writing intensive requirement in the major.

Prerequisite(s): ECON 103 and 104.  
Notes: May be repeated for a maximum of 6 credits when topic is different.

Schedule Type: LEC  
Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0

ECON 367 - Money, Markets, and Economic Policy

Credits: 3  
Not Repeatable for Credit  
Offered by Economics  
Applies basic economic concepts and principles to issues facing the U.S. and global economies. Topics include productivity and
economic growth, taxes, healthcare, globalization, income distribution and financial crises, with an emphasis on market structure, social institutions and the not-always rational behavior of investors and consumers.

Fulfills Mason Core requirement in Social and Behavioral Sciences.

Equivalent to GOVT 367

Schedule Type: SEM
Hours of Lecture or Seminar per week: 3

ECON 370 - Economics of Industrial Organization

Credits: 3
Not Repeatable for Credit
Offered by Economics
Factors influencing industrial structure, and industrial conduct and performance.

Prerequisite(s): ECON 306, or permission of instructor.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ECON 374 - Health Economics

Credits: 3
Not Repeatable for Credit
Offered by Economics
Microeconomic analysis of health and medicine. Topics include the determinants of health, health externalities, health insurance, the health effects of medicine, the supply and demand of medicine, medical quality and regulation, and information asymmetries.

Prerequisite(s): ECON 103 and ECON 104 or permission of instructor.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ECON 380 - Economies in Transition

Credits: 3
Not Repeatable for Credit
Offered by Economics
Examines problems and achievements of formerly communist and socialist countries including China, Eastern European countries, and Russia and other countries of the former Soviet Union as they transition to more market-oriented economies. Includes market economics and central planning.

Fulfills Mason Core requirement in global understanding.

Prerequisite(s): ECON 103 and 104, or permission of instructor.
ECON 385 - International Economic Policy

Credits: 3  
Not Repeatable for Credit  
Offered by Economics  
Introduces economic way of thinking on trade and international finance. Presents historical and current information on consequences of trade and protectionism.

Notes: May not be applied toward the elective course requirement needed for a major or minor in economics.

ECON 390 - International Economics

Credits: 3  
Not Repeatable for Credit  
Offered by Economics  
Foreign exchange market, balance of payment, foreign trade policies, and theories of international trade.

Fulfills Mason Core requirement in global understanding.

Prerequisite(s): ECON 306 and 311, or permission of instructor.

ECON 403 - Austrian Economics

Credits: 3  
Not Repeatable for Credit  
Offered by Economics  
Microeconomic and macroeconomic models and misallocation of resources.

Prerequisite(s): ECON 306 and 311.  
Notes: Alternative economic tools from noted Austrian economists.
**ECON 410 - Public Choice**

Credits: 3  
Not Repeatable for Credit  
Offered by Economics  
Applies economic theory, methodology to study nonmarket decision making.

**Prerequisite(s):** ECON 306.  
**Schedule Type:** LEC  
**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**ECON 412 - Game Theory and Economics of Institutions**

Credits: 3  
Not Repeatable for Credit  
Offered by Economics  
Introduces game theory and its relevance for analyzing framework of rules and institutions within which economic processes occur. Applies game theoretical concepts to comparative analysis of causes and effects of alternative institutional arrangements.

**Prerequisite(s):** ECON 306 or permission of instructor.  
**Schedule Type:** LEC  
**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**ECON 415 - Law and Economics**

Credits: 3  
Not Repeatable for Credit  
Offered by Economics  
Economic analysis of the law. Topics include introduction to legal institutions and legal analysis; application of economic concepts to the law of property, contracts and torts, criminal and constitutional law; economic efficiency of common law; and public choice perspective on the evolution of the law.

**Prerequisite(s):** ECON 306 or permission of instructor.  
**Schedule Type:** LEC  
**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**ECON 420 - International Money and Finance**

Credits: 3  
Not Repeatable for Credit  
Offered by Economics  
Examines models of balance of payments, exchange rate behavior, and open economy macroeconomics. Includes international financial system and issues such as globalization and international financial instability.
Prerequisite(s): ECON 306 and 311, or permission of instructor.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ECON 421 - Financial Economics

Credits: 3
Not Repeatable for Credit
Offered by Economics
Provides a survey of financial economics including a brief overview of the U.S. and international financial system and the role of different financial institutions. Covers the leading theoretical models in the field.

Prerequisite(s): ECON 103, ECON 104, ECON 306, ECON 311
Schedule Type: SEM
Hours of Lecture or Seminar per week: 3

ECON 435 - Economics of Energy

Credits: 3
Not Repeatable for Credit
Offered by Economics
Examines various issues in the energy industry using tools from microeconomic theory, law and economics and public choice. Topics include issues related to oil, historical and current energy regulation, and environmental issues associated with energy.

Fulfills writing intensive requirement in the major.

Prerequisite(s): Econ 306.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring

ECON 440 - Economic Systems Design: Principles and Experiments

Credits: 3
Not Repeatable for Credit
Offered by Economics
Introduces design principles to develop systems to allocate resources. Students must participate in experiment demonstrations of different allocation mechanisms. They also are exposed to experimental methods in economics and market design.

Equivalent to SYST 480

Prerequisite(s): MATH 213.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**ECON 441 - Economic Systems Design: Case Studies and Analysis**

Credits: 3
Not Repeatable for Credit
Offered by Economics
Requires students to design and develop mechanism to specific allocation problem. Students develop analytical and working engineering models of their mechanism.

Prerequisite(s): ECON 440.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**ECON 442 - Economic Systems Design: Implementation**

Credits: 3
Not Repeatable for Credit
Offered by Economics
Involves students in developing experimental design to test proposed allocation solution. Design process includes construction of experimental parameters, treatments, and initial test in laboratory setting.

Prerequisite(s): ECON 441.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**ECON 445 - Design and Analysis of Experiments**

Credits: 3
Not Repeatable for Credit
Offered by Economics
Topics include comparing two or more treatments, and computing and interpreting analysis of variance. Discusses randomized block, Latin square, and factorial designs; and applications to economics experiments.

Prerequisite(s): STAT 250, 344; and MATH 351 or IT 250; or permission of the instructor.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**ECON 460 - Senior Seminar in Philosophy, Politics, and Economics**
ECON 460 - Institutions, Information, and Collective Action

Credits: 3
Not Repeatable for Credit
Offered by Economics
Covers issues in the philosophy, economics, and political science of institutions, information, and collective action. Through case studies of existing legal and political institutions, applies the insights to problems in politics, policy making, social-choice theory, and social, moral, and political philosophy. (Specific content varies).

Equivalent to PHIL 460, GOVT 469.

Prerequisite(s): PHIL 358 and ECON 412 or permission of instructor.
Notes: Serves as the capstone course for the PPE program.

Schedule Type: SEM
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ECON 470 - Economics of Regulation

Credits: 3
Not Repeatable for Credit
Offered by Economics
Examines various issues surrounding concepts of regulation using tools from microeconomic theory and public choice. Topics include antitrust, rate regulation, policy rationales for regulation, and issues of current interest.

Fulfills writing intensive requirement in the major.

Prerequisite(s): Econ 306.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

ECON 481 - The Development of Economic Thought

Credits: 3
Not Repeatable for Credit
Offered by Economics
Developments in economic thought from 1500 to the present. Emphasizes historical origins, impact on contemporary economics, and theoretical validity.

Prerequisite(s): ECON 306 and 311, or permission of instructor.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ECON 492 - Study Abroad
Credits: 1-6
Repeatable within Degree for Credit
Offered by Economics
Study abroad under supervision of George Mason faculty. Course topics, content, and locations vary.

Notes: May be repeated for a maximum of 12 credits with permission of department.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring, Summer

ECON 494 - Honors Thesis Writing Seminar

Credits: 3
Not Repeatable for Credit
Offered by Economics
Develops skills in finding and evaluating sources, oral presentation, and academic writing.

Prerequisite(s): ECON 306 and 311, an overall GPA of 3.5, and permission from the instructor.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Summer

ECON 495 - RS: Honors Thesis in Economics

Credits: 3-6
Repeatable within Degree for Credit
Offered by Economics
Honors-level research on a self-selected topic in economics culminating in a substantial research paper and an oral presentation.

Designated as a research and scholarship intensive course.

Prerequisite(s): ECON 494 with minimum grade of B or permission from the instructor with an approved research proposal.
Notes: Requirements for departmental honors in the major are in addition to the coursework required for the major. ECON 495 credit may not be applied toward the elective course requirement needed for a major or minor in economics.

Schedule Type: IND
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
Grading: Undergraduate Special

ECON 496 - Special Topics in Economics

Credits: 3
Repeatable within Term for Credit
Offered by Economics
Subject matter varies.

Prerequisite(s): Varies with topic.
Notes: May be repeated for credit when topic is different.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**ECON 498 - Internship**

Credits: 3-6
Not Repeatable for Credit
Offered by Economics
Students find economics-related internship with assistance from Career Services. Pre-internship proposal and final reflections paper required.

Prerequisite(s): 6 upper-level credits of economics, junior standing, and permission of instructor.
Schedule Type: INT
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
Grading: Satisfactory/No Credit

**ECON 499 - Independent Study**

Credits: 1-4
Repeatable within Term for Credit
Offered by Economics
Individual study of selected area of economics.

Prerequisite(s): Economics majors with 90 credits, and permission of both department and instructor.
Notes: Directed research paper required. May be repeated for a maximum of 6 credits.
Schedule Type: IND
Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 0

**ECON 535 - Survey of Applied Econometrics**

Credits: 3
Not Repeatable for Credit
Offered by Economics
Applied introduction to estimating economic relationships. Includes simple equation and simultaneous equation system estimation.

Prerequisite(s): Admission to master's program in economics, or OM 210 or STAT 250 and 350, and ECON 306 and 311, and
MATH 113; or permission of instructor.

Notes: Contact Graduate Coordinator at econgrad@gmu.edu for permission to register and CRN. Students who take ECON 535 may not take ECON 637 for credit. Non-Degree students are permitted to enroll based on space availability determined one week before the first day of classes AND on meeting the prerequisites AND with permission of instructor.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ECON 600 - Economics for Educators

Credits: 3
Not Repeatable for Credit
Offered by Economics
Introduces current and prospective K-12 teachers to the fundamentals of economics. Prepares teachers to instruct students in the economics and personal finance course now required by the Virginia Department of Education. Supports teachers in successfully teaching the economics content of the Virginia SOLs in history and social sciences.

Prerequisite(s): Undergraduate degree.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ECON 611 - Microeconomic Theory

Credits: 3
Not Repeatable for Credit
Offered by Economics
Covers theory of behavior of consumers, firms, and resource suppliers; theories of choice under risk and uncertainty; partial equilibrium analysis of competitive and noncompetitive markets; general equilibrium analysis; and welfare economics. Introduces capital theory.

Prerequisite(s): Admission to master's program in economics or ECON 306 and 311, and MATH 113; or permission of instructor.
Notes: Contact Graduate Coordinator at econgrad@gmu.edu for permission to register and CRN. Non-Degree students are permitted to enroll based on space availability determined one week before the first day of classes AND on meeting the prerequisites AND with permission of instructor.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ECON 612 - Microeconomic Theory II

Credits: 3
Not Repeatable for Credit
Offered by Economics
Nature of the firm; theory of supply; and production functions, factor pricing, and supplies. Introduces microeconomic foundations of theories of public finance and public choice.

**Prerequisite(s):** ECON 611.

**Notes:** Contact Graduate Coordinator at econgrad@gmu.edu for permission to register and CRN. Non-Degree students are permitted to enroll based on space availability determined one week before the first day of classes AND on meeting the prerequisites AND with permission of instructor.

**Schedule Type:** LEC  
**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**ECON 615 - Macroeconomic Theory**

Credits: 3  
Not Repeatable for Credit  
Offered by Economics  
Survey course covering monetary theory, theories of consumption and saving, budget deficits, economic growth, international finance, and monetary and fiscal policies.

**Prerequisite(s):** Admission to master's program in economics, or ECON 306 and 311, and MATH 113; or permission of instructor.

**Notes:** Contact Graduate Coordinator at econgrad@gmu.edu for permission to register and CRN. Non-Degree students are permitted to enroll based on space availability determined one week before the first day of classes AND on meeting the prerequisites AND with permission of instructor.

**Schedule Type:** LEC  
**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**ECON 623 - American Economic History**

Credits: 3  
Not Repeatable for Credit  
Offered by Economics  
Explores development of American economy and evolution of economic institutions.

**Prerequisite(s):** ECON 611 and 615, or ECON 715 and 811, taken concurrently; or permission of instructor.

**Notes:** ECON 637 recommended.

**Schedule Type:** LEC  
**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**ECON 630 - Mathematical Economics I**
ECON 632 - Economic Systems Design Principles and Experiments

Credits: 3  
Not Repeatable for Credit  
Offered by Economics  
Introduces analytical and engineering principles to develop exchange systems. Students must become familiar with literature on applied mechanism design; and understand behavioral aspects of auction systems, matching, assignment and transportation problems, and information markets. Also introduces methods for testbedding systems using experimental economics and statistical design.

Prerequisite(s): Courses in linear and nonlinear optimization, and linear algebra.

Schedule Type: LEC  
Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0

ECON 633 - Economic Systems Design Case Studies and Analysis

Credits: 3  
Not Repeatable for Credit  
Offered by Economics  
Students begin process of doing research in design economic exchange system. Design process includes electronic instructions, and design of information structures. Students responsible for research into economic issues, and practical design issues.

Prerequisite(s): ECON 632.

Schedule Type: LEC  
Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0

ECON 634 - Economic Systems Design Implementation
Students do original research in economic systems design by constructing engineering model of solution to allocation problem. Research includes experimental and statistical design, and complete description of hypothesis related to construction of experimental parameters and treatments to test mechanism. Requires initial test of mechanism in laboratory setting.

**Prerequisite(s):** ECON 633.

**Schedule Type:** LEC

**Hours of Lecture or Seminar per week:** 3

**Hours of Lab or Studio per week:** 0

---

**ECON 637 - Econometrics I**

Techniques of estimating relationships between economic variables. Introduces multiple regression and problems associated with single equation model-autocorrelation, multicollinearity, and heteroscedasticity.

**Prerequisite(s):** Acceptance to PhD program in economics, or permission of instructor.

**Notes:** Contact Graduate Coordinator at econgrad@gmu.edu for permission to register and CRN. Non-Degree students are permitted to enroll based on space availability determined one week before the first day of classes AND on meeting the prerequisites AND with permission of instructor.

**Schedule Type:** LEC

**Hours of Lecture or Seminar per week:** 3

**Hours of Lab or Studio per week:** 0

---

**ECON 676 - Comparative Economic Systems**

Capitalism, socialism, and corporatism historical perspective. Includes examination of economies of representative contemporary countries.

**Schedule Type:** LEC

**Hours of Lecture or Seminar per week:** 3

**Hours of Lab or Studio per week:** 0

---

**ECON 695 - Special Topics in Economics**

Topics vary according to interests of instructor. Emphasizes new areas of discipline.
Notes: May be repeated for a maximum of 9 credits when topic is different.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

ECON 715 - Macroeconomic Theory I

Credits: 3
Not Repeatable for Credit
Offered by Economics
Covers classical, neoclassical, Keynesian, and post-Keynesian theories of income and employment determination; theories of inflation and growth; and demand for money and implications for effectiveness of monetary vs. fiscal policy.

Prerequisite(s): Admission to doctoral program in economics, or permission of instructor.
Notes: Contact Graduate Coordinator at econgrad@gmu.edu for permission to register and CRN. Non-Degree students are permitted to enroll based on space availability determined one week before the first day of classes AND on meeting the prerequisites AND with permission of instructor.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ECON 799 - Master's Thesis

Credits: 1-6
Repeatable within Degree for Credit
Offered by Economics
Research on approved thesis topic under direction of thesis committee.

Prerequisite(s): Admission to MA economics program and permission of thesis advisor.
Notes: Students must register for a minimum of three credit hours in their first semester of 799 and maintain continuous enrollment in 799 while writing and submitting a thesis. A maximum of 6 credits of 799 may be applied to the degree.

Schedule Type: IND
Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 1-12
Grading: Satisfactory/No credit only

ECON 811 - Microeconomic Theory I

Credits: 3
Not Repeatable for Credit
Offered by Economics
Theory and applications of behavior of consumers, firms, and resource suppliers. Partial equilibrium analysis of various market
structures and introduction to intertemporal choice and capital theory. Review and analysis of classic works in microeconomic theory.

Prerequisite(s): Admission to doctoral program in economics, or permission of instructor.

Notes: Contact Graduate Coordinator at econgrad@gmu.edu for permission to register and CRN. Non-Degree students are permitted to enroll based on space availability determined one week before the first day of classes AND on meeting the prerequisites AND with permission of instructor.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ECON 812 - Microeconomic Theory II

Credits: 3
Not Repeatable for Credit
Offered by Economics
Examines nature of firm; theory of supply; and production functions, factor pricing, and supplies. Introduces microeconomic foundations of theories of public finance and public choice.

Prerequisite(s): ECON 811.

Notes: Contact Graduate Coordinator at econgrad@gmu.edu for permission to register and CRN. Non-Degree students are permitted to enroll based on space availability determined one week before the first day of classes AND on meeting the prerequisites AND with permission of instructor.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ECON 816 - Macroeconomic Theory II

Credits: 3
Not Repeatable for Credit
Offered by Economics
Aggregate economic activity and price levels with emphasis on dynamic models.

Prerequisite(s): ECON 715 and 811, or permission of instructor.

Notes: Contact Graduate Coordinator at econgrad@gmu.edu for permission to register and CRN. Non-Degree students are permitted to enroll based on space availability determined one week before the first day of classes AND on meeting the prerequisites AND with permission of instructor.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ECON 817 - Monetary Theory and Policy
ECON 820 - History of Economic Thought

Credits: 3
Not Repeatable for Credit
Offered by Economics
Explores major figures in history of economic thought and tools of analysis they created. Emphasizes classical, neoclassical, and Keynesian theories.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ECON 821 - History of Economic Thought II

Credits: 3
Not Repeatable for Credit
Offered by Economics
Covers development of economic analysis from marginal revolution of 1877 to present. Emphasizes development of neoclassical economic theory.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ECON 823 - Topics in Economic History

Credits: 3
Not Repeatable for Credit
Offered by Economics
Offers economic analysis of various historical epochs including Industrial Revolution, evolution of political reform, rise of unions, and growth of government.

Prerequisite(s): ECON 611 and 615, or ECON 715 and 811; or permission of instructor.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
ECON 825 - Political Economy and Public Policy I

Credits: 3
Not Repeatable for Credit
Offered by Economics
Covers economic process of public policy formulation and implementation; and economic behavior of principals in policy making and execution.

Prerequisite(s): ECON 611 and 811, or permission of instructor.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ECON 826 - Political Economy and Public Policy II

Credits: 3
Not Repeatable for Credit
Offered by Economics
Specific issues related to political economy of public policy, including privatization, political economy of deficit spending, regulation and deregulation, and economics of rent seeking.

Prerequisite(s): ECON 611 or 811; or permission of instructor.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ECON 827 - Economic Philosophy

Credits: 3
Not Repeatable for Credit
Offered by Economics
Analyzes philosophical organization, including interrelations between economics and legal and political institutions; philosophical presuppositions of capitalist economy under constitutional democracy; alternative presuppositions for non-capitalist economies; and critical evaluation of history of ideas in social and moral philosophy.

Prerequisite(s): ECON 611 or 811 or permission of instructor.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ECON 828 - Constitutional Economics

Credits: 3
Not Repeatable for Credit
Offered by Economics
Analyzes existing and proposed elements of economic constitution. Emphasizes fiscal, monetary, transfer, and regulatory powers of government and constitutional limits on such powers, especially in the United States. Includes analysis of proposed changes in limits.

**Prerequisite(s):** ECON 611 or 811 or permission of instructor.

**Schedule Type:** LEC

**Hours of Lecture or Seminar per week:** 3

**Hours of Lab or Studio per week:** 0

---

**ECON 829 - Economics of Institutions**

Credits: 3
Not Repeatable for Credit
Offered by Economics
Analyzes framework of rules and institutions for economic activities and transactions. Includes emergence and working properties of different institutions, and classical and contemporary approaches to economic theory of institutions.

**Prerequisite(s):** ECON 611 or 811 or permission of instructor.

**Schedule Type:** LEC

**Hours of Lecture or Seminar per week:** 3

**Hours of Lab or Studio per week:** 0

---

**ECON 830 - Mathematical Economics I**

Credits: 3
Not Repeatable for Credit
Offered by Economics
Includes set theory, function, differential calculus, integration, series, and matrix algebra, with special emphasis on economic applications.

**Prerequisite(s):** Admission to doctoral program in economics, or ECON 306 and 311, and MATH 113; or permission of instructor.

**Notes:** Contact Graduate Coordinator at econgrad@gmu.edu for permission to register and CRN. Non-degree students are permitted to enroll on space availability determined one week before the first day of classes AND on meeting the prerequisites AND with permission of instructor.

**Schedule Type:** LEC

**Hours of Lecture or Seminar per week:** 3

**Hours of Lab or Studio per week:** 0

**When Offered:** Fall

---

**ECON 831 - Mathematical Economics II**

Credits: 3
Not Repeatable for Credit
Offered by Economics
Develops the foundations of choice, price, and general equilibrium theory. Topics include choice, preference and utility; consumer demand; competitive firms; general equilibrium; and social choice and welfare. Special attention is paid to uncertainty and dynamic choice.

**Prerequisite(s):** Admission to doctoral program in economics, or ECON 306 and ECON 311, and MATH 113; or permission of instructor.

**Schedule Type:** LEC  
**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**ECON 838 - Econometrics II**

Credits: 3  
Not Repeatable for Credit  
Offered by Economics  
Explores econometric models and simultaneous equation systems. Includes identifying parameters and least squares bias, alternative estimation methods, and block recursive systems.

**Prerequisite(s):** ECON 637 or permission of instructor.

**Schedule Type:** LEC  
**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**ECON 839 - Constitutional Economics II**

Credits: 3  
Not Repeatable for Credit  
Offered by Economics  
Uses economic analysis and methods to explore more deeply than in Constitutional Economics I specific issues in Constitutional Economics.

**Prerequisite(s):** ECON 828

**Schedule Type:** LEC  
**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**ECON 840 - Law and Economics I**

Credits: 3  
Not Repeatable for Credit  
Offered by Economics  
Uses economics to analyze U.S. Common-law system, evaluating efficiency and logic of evolution.

**Prerequisite(s):** ECON 611 or 811; or permission of instructor.  
**Notes:** No prior knowledge of law required.

**Schedule Type:** LEC
ECON 841 - Law and Economics II

Credits: 3
Not Repeatable for Credit
Offered by Economics
Explores empirical analyses of law of property, torts, crime, and family. Also looks at law's effects on freedom and economic growth.

Prerequisite(s): ECON 611 or 811, and ECON 535 or 637; or permission of instructor.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ECON 844 - Industrial Organization and Public Policy I

Credits: 3
Not Repeatable for Credit
Offered by Economics
Structure of American industry and underlying determinants. Includes structure and conduct on industrial performance in light of theory and empirical evidence; and rational antitrust policy and analysis of impact on structure and performance.

Prerequisite(s): ECON 611 or 811 or permission of instructor.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ECON 846 - Industrial Organization and Public Policy II

Credits: 3
Not Repeatable for Credit
Offered by Economics
Covers relationship of law, economics, and theories of social control of property rights. Includes theories of market structure and industrial performance.

Prerequisite(s): ECON 844, and ECON 535 or 637; or permission of instructor.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ECON 849 - Public Finance
ECON 852 - Public Choice I

Credits: 3
Not Repeatable for Credit
Offered by Economics
Applies economic theory and methodology to study of nonmarket decision making.

Prerequisite(s): ECON 611 or 811 or permission of instructor.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ECON 854 - Public Choice II

Credits: 3
Not Repeatable for Credit
Offered by Economics
Applies public choice approach to study such topics as causes and consequences of governmental growth, behavior of public bureaucracies, and economic reasoning behind constitutional limitations on size and growth of government.

Prerequisite(s): ECON 852 or permission of instructor.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ECON 856 - Non-Market Decision Making

Credits: 3
Not Repeatable for Credit
Offered by Economics.
Explores the economics of non-market decision making. Considers the application of rational choice theory to decision making by a variety of persons who are neither traditional buyers nor sellers in a variety of contexts that are not traditional markets.

Prerequisite(s): ECON 852 or permission of instructor.
Schedule Type: LEC
ECON 866 - Economic Development

Credits: 3
Not Repeatable for Credit
Offered by Economics
Explores forces contributing to or retarding economic progress in developing countries. Includes role of foreign trade, economic integration, foreign investment, multinational corporations, and technological transfers.

Prerequisite(s): ECON 611 and 615, or 715 and 811, or permission of instructor.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ECON 869 - International Trade and Policy

Credits: 3
Not Repeatable for Credit
Offered by Economics
Studies classical, neoclassical, and modern theories of international trade; theory and practice of world trade models such as project LINK; foreign investment and economic growth, tariffs and nontariff barriers, and economic integration; and recent developments, with emphasis on natural resources.

Prerequisite(s): ECON 611 or 811 or permission of instructor.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ECON 871 - International Monetary Economics

Credits: 3
Not Repeatable for Credit
Offered by Economics
Examines international adjustment mechanism, price and income effects, controls, and monetarist approach; development of international monetary system; demand for international reserves; capital movements; and role of International Monetary Fund.

Prerequisite(s): ECON 615 or 715 or permission of instructor.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ECON 880 - Theory of the Market Process I
ECON 881 - Theory of Market Process II (Topic Varies)

Credits: 3
Not Repeatable for Credit
Offered by Economics
Continuation of ECON 880. Topics vary and include market-process approach to analyzing capital accumulation and growth; money and credit institutions; inflation and unemployment; and industrial fluctuations.

Prerequisite(s): ECON 880, or permission of instructor.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ECON 885 - Experimental Economics

Credits: 3
Not Repeatable for Credit
Offered by Economics
Designed for graduate students to learn how experimental methods can be used to inform economic research and practice. Students expected to have working understanding of basic economic concepts and multivariate calculus.

Prerequisite(s): ECON 611 or 811 or permission of instructor.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ECON 886 - Experimental Economics II

Credits: 3
Not Repeatable for Credit
Offered by Economics
Research in experimental design. Topics represent basic tools to build, test, and implement exchange mechanisms in an applied setting.

Prerequisite(s): ECON 885 or permission of instructor.
Schedule Type: LEC
**ECON 895 - Special Topics in Economics**

Credits: 3  
Repeatable within Term for Credit  
Offered by Economics  
Topics vary according to interests of instructor. Emphasizes new areas of discipline.

**Schedule Type:** LEC, SEM  
**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**ECON 896 - Directed Reading and Research**

Credits: 1-9  
Repeatable within Term for Credit  
Offered by Economics  
Independent reading and research paper on a topic agreed on by student and faculty member.

**Schedule Type:** IND  
**Hours of Lecture or Seminar per week:** 1-6  
**Hours of Lab or Studio per week:** 0

**ECON 950 - Seminar in Public Finance**

Credits: 3  
Not Repeatable for Credit  
Offered by Economics  
Important public finance issues treated in seminar format.

**Prerequisite(s):** ECON 849 or permission of instructor.  
**Schedule Type:** SEM  
**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**ECON 985 - Workshop in Experimental Economics**

Credits: 3  
Repeatable within Degree for Credit  
Offered by Economics  
Designed for graduate students who have taken Experimental Economics and Economic Systems Design and are applying experimental methods to their own or collaborative research projects.
Prerequisite(s): ECON 886.
Notes: May be repeated for a maximum of 6 credits.

Schedule Type: SEM
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ECON 998 - Doctoral Dissertation Proposal Research.

Credits: 1-9
Repeatable within Degree for Credit
Offered by Economics
Research on prospective dissertation topic.

Prerequisite(s): Admission to PhD economics program, and completed at least 48 credits of coursework, and passed required doctoral exams, and permission of dissertation advisor.
Notes: For students who have completed course work but have not yet advanced to candidacy.

Schedule Type: IND
Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 1-9
Grading: S/NC

ECON 999 - Doctoral Dissertation Research

Credits: 1-15
Repeatable within Degree for Credit
Offered by Economics
Research on approved dissertation topic under direction of dissertation committee.

Prerequisite(s): Admission to PhD economics program, and advancement to candidacy, and permission of dissertation advisor.
Notes: May be repeated; 24 credits may be applied to doctoral degree requirement.

Schedule Type: IND
Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 1-15
Grading: S/NC

Education (EDUC)

Offered by the College of Education and Human Development

EDUC 203 - Disability in American Culture
Examines disability, past and present, in American culture through changes in historical, political, legal and societal responses to people with disabilities. Analyzes the disability experience through social and behavioral science perspectives, including diversity, bioethical and human rights conceptualizations/constructs of disability.

Fulfills Mason Core requirement in social and behavioral science.

**Schedule Type:** LEC  
**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall, Spring, Summer

**EDUC 300 - Introduction to Teaching**

Credits: 3  
Not Repeatable for Credit  
Offered by Graduate School of Education  
Introduction to educational issues; not applicable in graduate-level teacher education programs. Examines roles of teacher, nature of American schools, and potential contributions of students.

**Notes:** Requires school-based field experience during course.

**Schedule Type:** LEC  
**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**EDUC 301 - Educationally Diverse Populations: Handicapped, Gifted, Multicultural**

Credits: 3  
Not Repeatable for Credit  
Offered by Graduate School of Education  
Introduction to educational issues; not applicable in graduate-level teacher education programs. Introduces psychological, sociological, educational, and physical aspects of diverse populations in today's schools for early and middle education. Emphasizes litigation and legislation pertaining to education of diverse populations.

**Notes:** Requires school-based field experience during course.

**Schedule Type:** LEC  
**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**EDUC 302 - Human Growth and Development**

Credits: 3  
Not Repeatable for Credit
Offered by Graduate School of Education
Introduction to educational issues; not applicable in graduate-level teacher education programs. Examines human development through life span with special emphasis on cognitive, language, physical, social, and emotional development of children. Emphasizes contemporary theories of human development and their relevance to educational practice.

**Notes:** Requires school-based field experience during course.

**Schedule Type:** LEC  
**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**EDUC 303 - Politics of American Education**

Credits: 3  
Not Repeatable for Credit  
Offered by Graduate School of Education  
Focus on the study of the American political system. Designed for students studying the American political system and students interested in careers in education. Explores how interactions between various levels and branches of government affect education.

**Schedule Type:** LEC  
**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**EDUC 372 - Human Development, Learning, and Teaching**

Credits: 3  
Not Repeatable for Credit  
Offered by Graduate School of Education  
Explores processes that influence intellectual, social, emotional, moral, ethical, and physical development of middle and high school students. Examines research and theories for understanding learning process.

Fulfills Mason Core requirement in social and behavioral science.

**Notes:** School-based field experience required.

**Schedule Type:** LEC  
**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**EDUC 400 - In-Service Educational Development**

Credits: 1-6  
Repeatable within Term for Credit  
Offered by Graduate School of Education  
Offered at request of school division or other educational agency.

**Notes:** Content varies; may be repeated for credit.
EDUC 415 - Student Teaching in Physical Education

Credits: 12  
Not Repeatable for Credit  
Offered by Graduate School of Education  
See PHED 415.

Prerequisite(s): Concurrent enrollment in PHED 472, completion of all courses in the approved program, and admission to and good standing in the Teacher Education Program.

EDUC 422 - Foundations of Secondary Education

Credits: 3  
Not Repeatable for Credit  
Offered by Graduate School of Education  
Analyzes philosophical assumptions, curriculum issues, learning theories, and history associated with current teaching styles. Emphasizes applications to all disciplines taught in secondary schools. Examines educational trends and issues.

Prerequisite(s): Admission to the secondary Education Program.

Notes: 15 hours school-based field experience required.

EDUC 511 - Child and Adolescent Development in Global Contexts

Credits: 3  
Not Repeatable for Credit  
Offered by Graduate School of Education  
Provides an introduction to teaching culturally & linguistically diverse and exceptional learners, includes analysis of human growth and development, an overview of psychology, and introduction to using technology across the curriculum. Requires 20 hours of PK-12 classroom fieldwork.

Prerequisite(s): Admission to FAST TRAIN or Permission of Instructor.
EDUC 512 - Teaching Elementary Social Studies in International Schools

Credits: 3
Not Repeatable for Credit
Offered by Graduate School of Education
Focuses on translation of knowledge and data-gathering processes from social sciences into appropriate and meaningful international PK-6 social studies experiences. Develops understanding of aims, methodologies of history, geography, government and political sciences, sociology, anthropology and psychology. Requires 20 hours of PK-6 classroom fieldwork.

Prerequisite(s): EDUC 511
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
Grading: Graduate Special

EDUC 513 - Teaching Elementary Math in International Schools

Credits: 3
Not Repeatable for Credit
Offered by Graduate School of Education
Presents topics in school mathematics with particular emphasis on developing common PK-6 strands for application in international schools. Focuses on exploring, verifying, and explaining concepts using concrete materials. Requires 20 hours of PK-6 classroom fieldwork.

Prerequisite(s): EDUC 511 and EDRD 515
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
Grading: Graduate Special

EDUC 514 - Teaching Elementary Science in International Schools

Credits: 3
Not Repeatable for Credit
Offered by Graduate School of Education
Covers theory and practices of effective teaching of PK-6 science in international schools. Uses laboratory and discovery techniques to design essential science components and integrate them with other disciplines. Introduces design and implementation of activities for developing concepts solving problems, and strengthening thinking skills in PK-6 science. Requires 20 hours of PK-6 classroom fieldwork.

Prerequisite(s): EDUC 511 and EDRD 515
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
Grading: Graduate Special
EDUC 516 - Language Across the Elementary International School Curriculum

Credits: 3  
Not Repeatable for Credit  
Offered by Graduate School of Education  
Introduces current methods of teaching integrated language arts in elementary school settings (PK-6). Includes language and literacy development, second language acquisition, reading and writing in content areas, and children's literature. International focus considers needs of second-language learners in regular classroom settings. Requires 20 hours of PK-6 classroom fieldwork.

Prerequisite(s): EDUC 511 and EDRD 515  
Schedule Type: LEC  
Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0  
Grading: Graduate Special

EDUC 520 - Elementary Curriculum, Instruction, and Assessment in International Schools

Credits: 3  
Not Repeatable for Credit  
Offered by Graduate School of Education  
Addresses interrelationship of instruction, curriculum, and assessment in international schools. Includes review of research and effective practice. Requires 20 hours of PK-6 classroom fieldwork.

Prerequisite(s): EDUC 511 and EDRD 515  
Schedule Type: LEC  
Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0  
Grading: Graduate Special

EDUC 521 - Foundations of Education, PK-12

Credits: 3  
Not Repeatable for Credit  
Offered by Graduate School of Education  
Introduces various ways of educating and socialization processes in American educational institutions. Analyzes current education practices in terms of history, philosophy, psychology, and sociocultural factors of formal and informal learning. Emphasizes trends, issues, and alternative futures.

Notes: School-based field experience required. Course fulfills the Virginia Department of Education requirement for provisionally licensed teachers.

Schedule Type: LEC  
Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0

EDUC 522 - Foundations of Secondary Education
EDUC 537 - Introduction to Culturally & Linguistically Diverse Learners

Credits: 3  
Not Repeatable for Credit  
Offered by Graduate School of Education  
Examines culturally & linguistically diverse learners through historical, sociological, and philosophical foundations. Explores teacher's culturally identity and implications for teaching diverse learners. Discusses culturally & linguistically responsive instructional and assessment practices and working with families and other school professionals. Requires 20 hours of PK-12 classroom fieldwork.  
Notes: Requires field experience.

Schedule Type: LEC  
Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0

EDUC 539 - Human Development and Learning PK-12

Credits: 3  
Not Repeatable for Credit  
Offered by Graduate School of Education  
Provides practicing teachers with foundations of psychological theory, research, and professional practice relating to development and learning in inclusive PK-12 classroom settings.  
Notes: School-based field experience required.

Schedule Type: LEC  
Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0

EDUC 542 - Foundations of Education

Credits: 3  
Not Repeatable for Credit
Offered by Graduate School of Education
Examines the historical, philosophical, and sociological foundations of education as they relate to elementary schools, with a particular emphasis on teaching a culturally diverse population. Students will develop an understanding of the relationship between society and education.

Prerequisite(s): Admission to the Elementary Education licensure program. School-based field experience required.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDUC 543 - Children, Family, Culture, and Schools, 4-12 Year Olds

Credits: 3
Not Repeatable for Credit
Offered by Graduate School of Education
Examines child and family development and ways children, families, schools, and communities interrelate. Links children's developing physical, social, emotional, and cognitive abilities to planning curriculum and developing instructional strategies.

Prerequisite(s): Admission to elementary education licensure program.
Notes: Requires school-based field experience.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDUC 547 - Scientific Inquiry and the Nature of Science

Credits: 3
Not Repeatable for Credit
Offered by Graduate School of Education
Incorporates understanding about scientific knowledge in K-12 classrooms. Builds fundamental knowledge of scientific inquiry and the nature of scientific knowledge and skills to weave this knowledge explicitly in curriculum. Focuses on developing inquiry-based lessons for students to investigate science and assessing student understanding of science and the nature of science.

Schedule Type: SEM
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Summer

EDUC 592 - Effective Collaboration for Teaching Diverse Learners in Secondary Social Studies

Credits: 3
Not Repeatable for Credit
Offered by Graduate School of Education
Provides history-social studies candidates in secondary education with knowledge and skills necessary to meet the needs of diverse learners in the history-social studies classroom. Emphasizes teacher collaboration between general and special education
teachers as an authentic model of practice.

Notes: Taught concurrently and in close proximity with special education faculty teaching EDSE 662 to emphasize collaboration between special education and general education teachers.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Summer, Spring

EDUC 597 - Special Topics in Education

Credits: 1-6
Repeatable within Term for Credit
Offered by Graduate School of Education
Provides advanced study on selected topic or emerging issue in American or international education.

Prerequisite(s): Admission to program in Graduate School of Education.
Notes: May be repeated for credit with GSED permission.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 0

EDUC 598 - Directed Reading, Research, and Individual Projects

Credits: 1-6
Repeatable within Term for Credit
Offered by Graduate School of Education
Presents various subjects and projects, principally by directed study, discussion, research, and participation under supervision of graduate faculty member.

Prerequisite(s): Admission to degree program, and permission of dean.
Notes: May be repeated for up to 12 credits.

Schedule Type: IND
Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 0

EDUC 606 - Education and Culture

Credits: 3
Repeatable within Degree for Credit
Offered by Graduate School of Education
Uses cultural inquiry process (CIP) and web site to acquire cultural, social, and language-related perspectives on educational processes; and teaches skills to analyze educational settings and expand strategies to address puzzlements in students' own practice.
EDUC 611 - Cultural Issues in Second Language Acquisition

Credits: 3
Repeatable within Degree for Credit
Offered by Graduate School of Education
Explores impact of linguistic and cultural diversity among students in teaching of second language across curriculum. Draws on theoretical foundations in second language acquisition, cross-cultural communication, socio- and psycholinguistics, and educational anthropology.

Prerequisite(s): Admission to TESL or bilingual or multicultural education program, doctoral status, or permission of instructor.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDUC 612 - Inquiry into Practice

Credits: 2
Repeatable within Degree for Credit
Offered by Graduate School of Education
Provides experience using research skills to foster systematic and thoughtful inquiry into classroom practice. Explores relevant classroom practice issues through critical writing, action, and research. Emphasizes cultural diversity and gender issues in research.

Prerequisite(s): Admission to the ASTL Program.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 0
Grading: Graduate Special

EDUC 613 - How Students Learn

Credits: 3
Repeatable within Degree for Credit
Offered by Graduate School of Education
Advanced course in study of learning based on research and theory from different disciplines. Focuses on increasing students' learning through study of different learning systems, and understanding each learner in context of learning process itself.

Prerequisite(s): Admission to the ASTL Program; EDUC 612.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
EDUC 614 - Designing and Assessing Teaching and Learning

Credits: 2
Repeatable within Degree for Credit
Offered by Graduate School of Education
Explores design and development of curricular, pedagogical, and assessment strategies responsive to needs and interests of students. Investigates factors that affect teaching and learning, and examines multiple ways of knowing that teachers bring to classrooms.

Prerequisite(s): Admission to the M.Ed in Curriculum and Instruction program, ASTL concentrations; EDUC 612; EDUC 613 (may be taken concurrently)
Schedule Type: LEC
Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 0
Grading: Graduate Special

EDUC 615 - Educational Change

Credits: 2
Not Repeatable for Credit
Offered by Graduate School of Education
Explores influences on educational change at classroom, school, community, state, and national levels. Investigates implications of factors and influences that affect educational change. Analyzes influences and factors, and involves students in reflecting on their own experiences.

Prerequisite(s): Admission to the M.Ed in Curriculum and Instruction program, ASTL concentrations; completion of EDUC 612, EDUC 613, EDUC 614, EDUC 606 (may be taken concurrently)
Schedule Type: LEC
Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 0
Grading: Graduate Special

EDUC 621 - Teaching and Learning in the International Baccalaureate Program

Credits: 3
Not Repeatable for Credit
Offered by Graduate School of Education
Focuses on principles and practices of the International Baccalaureate, organized around four areas of inquiry: curriculum processes, teaching & learning, assessment, and professional learning. Requires 20 hours of PK-12 classroom fieldwork.

Prerequisite(s): Admission to GSE, enrollment in FAST TRAIN initial licensure program or permission of instructor.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
EDUC 622 - Curriculum Development across IB Programs

Credits: 3
Not Repeatable for Credit
Offered by Graduate School of Education
Explores the development of practical knowledge about the design and structure of the IB programs' curricula. Provides a foundation for understanding how the programs are implemented and how student learning developed within them is assessed.

Prerequisite(s): Admission to GSE, enrollment in FAST TRAIN IB certificate program, and completion of EDUC 621, or permission of the instructor.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
Grading: Graduate Special

EDUC 623 - Models and Strategies for Teaching and Learning in IB Schools

Credits: 3
Not Repeatable for Credit
Offered by Graduate School of Education
Focuses on the development of the capacity of teachers in IB schools to adopt appropriate teaching strategies and techniques instrumental in ensuring program learning outcomes are achieved. Furthermore, participants develop a deep understanding of the critical relationship between teaching and learning.

Prerequisite(s): Admission to GSE, enrollment in FAST TRAIN IB certificate program, and completion of EDUC 621, or permission of the instructor.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
Grading: Graduate Special

EDUC 624 - Assessment and Learning in IB Schools

Credits: 3
Not Repeatable for Credit
Offered by Graduate School of Education
Explores the essential role of assessment in teaching IB learners. Addresses formative and summative assessment practices as an integral part of the IB curriculum as well as the use of assessment for differentiation and planning.

Prerequisite(s): Admission to GSE, enrollment in FAST TRAIN IB certificate program, and completion of EDUC 621, or permission of the instructor.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
EDUC 626 - Inquiry into Action: IB Teachers, Learners, and Schools

Credits: 3
Not Repeatable for Credit
Offered by Graduate School of Education
Uses the action research and qualitative process to help educational practitioners plan and complete an action research study related to IB learners, teachers, or schools. Furthermore, the course examines the social, cultural, and ethical issues of conducting research with students.

Prerequisite(s): Admission to GSE, enrollment in FAST TRAIN IB certificate program, and completion of EDUC 621, or permission of the instructor.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
Grading: Graduate Special

EDUC 627 - Contemporary Issues and Trends in IB

Credits: 3
Not Repeatable for Credit
Offered by Graduate School of Education
Focuses on current IB research, trends, and issues as well as international, national, and state/provincial legislation concerning schools and the potential impact on IB schools. Participants are prepared as leaders and advocates for IB programs and their students.

Prerequisite(s): Admission to GSE, enrollment in FAST TRAIN IB certificate program, and completion of EDUC 621, or permission of the instructor.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
Grading: Graduate Special

EDUC 647 - Critical Reflective Practice

Credits: 1.5
Not Repeatable for Credit
Offered by Graduate School of Education
Engages students in a learning community of teachers to develop skills of critical reflection on professional practice.

Prerequisite(s): Admission into the MEd Curriculum and Instruction concentration in Transformative Teaching program.
Schedule Type: SEM
Hours of Lecture or Seminar per week: 1.5
Hours of Lab or Studio per week: 0
When Offered: Summer
EDUC 649 - Critical Dialogue in Education

Credits: 1.5  
Not Repeatable for Credit  
Offered by Graduate School of Education  
Offers opportunity to develop critical dialogue and peer feedback skills focused on professional practice.

Prerequisite(s): Admission into the MEd Curriculum and Instruction concentration in Transformative Teaching program.  
Schedule Type: SEM  
Hours of Lecture or Seminar per week: 1.5  
Hours of Lab or Studio per week: 0  
When Offered: Summer

EDUC 651 - Critical Theories and Pedagogies

Credits: 3  
Not Repeatable for Credit  
Offered by Graduate School of Education  
Explores critical theories and pedagogies experientially, including alternative assessments that address educational equity and access, power, and approaches for deepening our practice as citizens in a democracy.

Prerequisite(s): Admission into the MEd Curriculum and Instruction concentration in Transformative Teaching program.  
Completion of the EDUC 647.  
Schedule Type: SEM  
Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0  
When Offered: Fall

EDUC 653 - Technology and Learning

Credits: 3  
Not Repeatable for Credit  
Offered by Graduate School of Education  
Develops technological knowledge and skills to support teaching and learning and to sustain and enhance learning communities. Teachers explore and critique the possibilities and concerns of using technology in learning environments.

Prerequisite(s): Admission into the MEd Curriculum and Instruction concentration in Transformative Teaching program.  
Completion of the EDUC 647.  
Schedule Type: SEM  
Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0  
When Offered: Fall

EDUC 655 - Teacher Research Methods
Introduces teacher research methods and situates them in relation to other research approaches. Emphasizes the understanding and use of various research methods as innovative approaches to teaching and learning.

**Prerequisite(s):** Admission into the MEd Curriculum and Instruction concentration in Transformative Teaching program. Completion of the EDUC 651 and the EDUC 653.

**Schedule Type:** SEM

**Hours of Lecture or Seminar per week:** 3

**When Offered:** Spring

---

**EDUC 657 - Teaching for Democracy and Social Justice**

Focuses on the research that supports teachers to create democratic classroom practices and to support PK-12 students in exercising civic rights.

**Prerequisite(s):** Admission into the MEd Curriculum and Instruction concentration in Transformative Teaching program. Completion of the EDUC 651 and the EDUC 653.

**Schedule Type:** SEM

**Hours of Lecture or Seminar per week:** 3

**When Offered:** Spring

---

**EDUC 659 - Teacher Leadership**

Engages learners in data gathering exercises toward articulating a leadership agenda in the context of PK-12 educational environments.

**Prerequisite(s):** Admission into the MEd Curriculum and Instruction concentration in Teacher Inquiry, Development and Empowerment for Social Justice program (TIDES) cohort. Completion of the EDUC 655 and the EDUC 657.

**Schedule Type:** SEM

**Hours of Lecture or Seminar per week:** 1.5

**When Offered:** Summer

---

**EDUC 661 - Teacher Empowerment and Policy**

**Prerequisite(s):** Admission into the MEd Curriculum and Instruction concentration in Transformative Teaching program. Completion of the EDUC 651 and the EDUC 653.

**Schedule Type:** SEM

**Hours of Lecture or Seminar per week:** 1.5

**When Offered:** Summer
Offered by Graduate School of Education
Provides advanced study on a selected topic or emerging issue in American or international education with particular attention to
developing policy solutions.

Prerequisite(s): Admission into the MEd Curriculum and Instruction concentration in Transformative Teaching program.
Completion of the EDUC 655 and the EDUC 657.

Schedule Type: SEM

Hours of Lecture or Seminar per week: 1.5
Hours of Lab or Studio per week: 0
When Offered: Summer

EDUC 663 - Culturally Relevant Pedagogy

Credits: 3
Not Repeatable for Credit
Offered by Graduate School of Education

Offers opportunity to view how language and culture shape realities, including perceptions of children as learners. Explores
cultural constraints and transformative possibilities embedded within cultures.

Prerequisite(s): Admission into the MEd Curriculum and Instruction concentration in Transformative Teaching program.
Completion of the EDUC 659 Teacher Leadership Course.

Schedule Type: SEM

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

EDUC 665 - Teacher Inquiry in Practice I

Credits: 3
Not Repeatable for Credit
Offered by Graduate School of Education

Builds further understanding of teacher research as teachers form and frame salient questions, examine the existing literature
related to their questions, and take actions to improve teaching and learning.

Prerequisite(s): Admission into the MEd Curriculum and Instruction concentration in Transformative Teaching program.
Completion of the EDUC 659.

Schedule Type: SEM

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

EDUC 667 - Teacher Inquiry in Practice II

Credits: 3
Not Repeatable for Credit
Offered by Graduate School of Education

Builds on the teacher research project begun in Teacher Inquiry in Practice I as teachers continue to address their pedagogical
questions, take actions to improve teaching and learning, gather, analyze and interpret multiple forms of data, and share their experience in communities of practice.

**Prerequisite(s):** Admission into the MEd Curriculum and Instruction concentration in Transformative Teaching program. Completion of the EDUC 663 and EDUC 665.

**Schedule Type:** SEM

**Hours of Lecture or Seminar per week:** 3

**Hours of Lab or Studio per week:** 0

**When Offered:** Spring

---

**EDUC 669 - Teaching and Learning in Practice**

Credits: 3
Not Repeatable for Credit
Offered by Graduate School of Education
Admission into the MEd Curriculum and Instruction concentration in Transformative Teaching program. Completion of the EDUC 663 and EDUC 665.

**Prerequisite(s):** Admission into the MEd Curriculum and Instruction concentration in Transformative Teaching program. Completion of the EDUC 663 and EDUC 665.

**Schedule Type:** SEM

**Hours of Lecture or Seminar per week:** 3

**Hours of Lab or Studio per week:** 0

**When Offered:** Spring

---

**EDUC 670 - The Culture of Teaching**

Credits: 3
Not Repeatable for Credit
Offered by Graduate School of Education
Explores roles, responsibilities, and realities of teaching in secondary schools. Examines teaching in context of contemporary educational issues, legal matters, diverse and exceptional learners, classroom management, and professional practices.

**Prerequisite(s):** Admission to secondary education program

**Corequisite(s):** Initial methods course.

**Schedule Type:** LEC

**Hours of Lecture or Seminar per week:** 3

**Hours of Lab or Studio per week:** 0

---

**EDUC 671 - Schools and Culture in the Future**

Credits: 3
Not Repeatable for Credit
Offered by Graduate School of Education
Focuses on relationship between schools and communities from the past to the future. Research-based education reform, ideas from futurists, and ISTE technology standards influence teacher planning for students in the 21st century.
Prerequisite(s): EDUC 522 and EDUC 670
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDUC 672 - Human Development and Learning: Secondary Education

Credits: 3
Not Repeatable for Credit
Offered by Graduate School of Education
Explores developmental issues associated with middle and high school students, and theories that provide basis for understanding learning process. Addresses implications for designing instruction and curriculum.

Prerequisite(s): EDUC 522.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDUC 674 - Assessing Learning and Teaching in the Secondary School Classroom

Credits: 3
Not Repeatable for Credit
Offered by Graduate School of Education
Supports beginning teachers' development and design of assessment practices for promoting student learning. Focuses on individual differences and classroom, teacher, school, and cultural factors that impact assessment; different types and purposes of assessment; and relationship of assessment to national and state standards.

Prerequisite(s): EDUC 522 and first and advanced methods course must be completed prior to taking this class.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDUC 675 - Research in Secondary Education

Credits: 3
Not Repeatable for Credit
Offered by Graduate School of Education
Links evidence of student learning to make informed instructional decisions. Engages students in critiquing various research paradigms, reviewing literature, and systematically collecting and interpreting evidence to improve practice. Facilitates completion of the M.Ed. exit requirement.

Prerequisite(s): Grade of B- or better in EDCI 790.
Prerequisite(s) enforced by registration system.

Notes: All students enrolled in this course must be working daily in or have access to a classroom setting classroom setting, since the major course assignment involves a classroom-based teacher research project. The M.Ed. program exit requirement is
completed in EDUC 675.

**EDUC 695 - Northern Virginia Writing Project-Service Program**

Credits: 1-3
Repeatable within Term for Credit
Offered by Graduate School of Education
Offered at request of school division or other educational agency.

Equivalent to ENGH 695

**Notes:** Content varies. May be repeated with permission of department, but no more than 6 credits in EDUC 695, 695, or 699 may be applied toward master's degree.

**EDUC 751 - Mentoring/Supervising Intern Teachers and Mentor Teacher Career Development**

Credits: 3
Not Repeatable for Credit
Offered by Graduate School of Education
Examines multiple roles of teachers as they mentor and supervise intern teachers in schools. Covers career development, leadership, and instructional roles and strategies. Designed to assist intern teachers in their first year, and provide quality career and staff development to their mentors.

**Schedule Type:** LEC
**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0

**EDUC 795 - Seminar in Brain-Compatible Teaching and Learning in Multicultural Settings**

Credits: 3
Not Repeatable for Credit
Offered by Graduate School of Education
Course examines brain-compatible learning styles theories and their impact on today's classrooms comprised of culturally, linguistically, and cognitively diverse (CLCD) learners. Situates current pedagogy and its efficacy at reaching all learners. Issues examined are those involving perception, attention, consciousness, memory and emotion. Focus is particularly placed on responsive teaching methods highlighting situated cognition, brain-based learning principles and authentic learning principles.
Prerequisite(s): Admission to the PhD in Education program or permission of instructor.

Schedule Type: SEM
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDUC 797 - Advanced Topics in Education

Credits: 1-6
Repeatable within Term for Credit
Offered by Graduate School of Education
Advanced study of selected topics in education for students preparing for doctoral studies or who have been admitted to the PhD program in education.

Notes: May be repeated for credit with GSED approval.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 0

EDUC 800 - Ways of Knowing

Credits: 3
Not Repeatable for Credit
Offered by Graduate School of Education
Provides understanding of characteristic ways of knowing in various liberal arts disciplines while examining subject matter, scope, key concepts, principles, methods, and theories. Analyzes philosophical traditions underlying educational practice and research.

Prerequisite(s): Admission to PhD program.
Notes: Required course during first spring semester of study in the program.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
Grading: Graduate Special

EDUC 802 - Leadership Seminar

Credits: 3
Not Repeatable for Credit
Offered by Graduate School of Education
Intensive study of leadership, emphasizing decision and change processes, and assessment and development of leadership skills.

Prerequisite(s): Admission to PhD program.
Notes: Required course during first semester of study in the program.

Schedule Type: IND,
EDUC 803 - Teacher Preparation and Professional Development

Credits: 3
Not Repeatable for Credit
Offered by Graduate School of Education
Explores research and current recommended practices related to teacher preparation and professional development. Provides opportunity for practical application with preservice or inservice teachers.

Equivalent to ECED 803

Prerequisite(s): Approval of instructor and acceptance to PH.D. program.
Schedule Type: SEM
Hours of Lecture or Seminar per week: 3
When Offered: Spring

EDUC 805 - Research and Scholarship in Education

Credits: 2
Not Repeatable for Credit
Offered by Graduate School of Education
Provides an intellectual framework for research and scholarship in education, including consideration of specific scholarship of CEHD faculty as representative of the range of educational scholarship that make up the educational research community.

Prerequisite(s): Admission to PhD in Education Program
Schedule Type: LEC
Hours of Lecture per week: 2
Hours of Lab or Studio per week: 0

EDUC 815 - Research Inquiries in International Education

Credits: 3
Not Repeatable for Credit
Offered by Graduate School of Education
Focuses on the intersection of international education and research methodologies in educational settings. Students will delve into the construction, implementation, and impact of research in international settings or with an internationally-minded perspective. Through critical inquiry into practice, the course offers students the opportunity to develop more sophisticated understandings of the research process in international education settings.

Prerequisite(s): EDUC 880 or permission of instructor.
Schedule Type: SEM
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall
EDUC 845 - Multilingual Learners With Diverse Educational Needs

Credits: 3
Not Repeatable for Credit
Offered by Graduate School of Education
Examines examine issues surrounding identification, assessment, and instruction of multilingual learners with diverse educational needs.

Prerequisite(s): Admission to the PhD Program in Education or Permission of instructor.
Schedule Type: SEM
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

EDUC 850 - The Study of Teaching

Credits: 3
Not Repeatable for Credit
Offered by Graduate School of Education
Explores the history and development of the search for teaching effectiveness. The course will trace the various definitions of effectiveness and the methods created to assess effectiveness.

Prerequisite(s): EDRS 810.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDUC 851 - Research on Teacher Education

Credits: 3
Not Repeatable for Credit
Offered by Graduate School of Education
Explores the history and development of the search for effectiveness in the preparation of preservice teachers and the continuing professional development of practicing teachers. The students will examine the substance and gaps in the study of the education of educators.

Prerequisite(s): EDRS 810.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDUC 853 - World Perspectives of Teacher Education
EDUC 870 - Education Policy: Process, Context, and Politics

Credits: 3
Not Repeatable for Credit
Offered by Graduate School of Education
Examines public policy decision-making in education at local, state, and national levels, and its impact on education institutions, students, and public. Focuses on theories and methodological approaches, and resolution of competing policy arguments in political arena.

Prerequisite(s): Admission to PhD in education program, or permission of instructor.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDUC 871 - Advanced Policy Issues in Education

Credits: 3
Not Repeatable for Credit
Offered by Graduate School of Education
In-depth analysis of selected education policy issues. Focuses on issue interactions and education-related policy actions by different levels of government.

Prerequisite(s): EDUC 870 or permission of instructor.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDUC 872 - Social Science Research and Education Policy

Credits: 3
Not Repeatable for Credit
Offered by Graduate School of Education
Focuses on research base used to support education policy actions. Focuses on analyzing strength of this research.

Prerequisite(s): EDRS 810, 811, and 812 or permission of instructor.
Schedule Type: LEC
EDUC 873 - Education Policy: Comparative and International Perspectives

Credits: 3
Not Repeatable for Credit
Offered by Graduate School of Education
Using interdisciplinary approach, addresses education policy issues that transcend national boundaries and have implications for educators in fostering social justice and global awareness.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDUC 874 - The Achievement Gap

Credits: 3
Not Repeatable for Credit
Offered by Graduate School of Education
Focuses on achievement gap in schools. Students research and analyze gaps in student achievement related to race and ethnicity, limited English proficiency, family background, gender, poverty, and ableism, and practices designed to close the gap.

Prerequisite(s): Admission to PhD program or permission of instructor
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDUC 875 - Contemporary and Emerging Issues in Education Policy

Credits: 3
Not Repeatable for Credit
Offered by Graduate School of Education
Focuses on identifying and analyzing factors that promote new initiatives in education policy agenda. Attention given to nontraditional sources of education policy initiatives.

Prerequisite(s): EDUC 870
Corequisite(s): EDUC 870
Notes: Must be admitted to PhD program.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
EDUC 876 - Teacher Development and Education Policy

Credits: 3
Not Repeatable for Credit
Offered by Graduate School of Education
Focuses on the impact of policy actions at the local, state, and national levels on teacher preparation and continuing professional development.

Prerequisite(s): EDUC 870 or permission of instructor.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDUC 877 - Teacher Policy in Historic Perspective

Credits: 3
Not Repeatable for Credit
Offered by Graduate School of Education
Examines the history of policies pertaining to public school teachers in the United States. Evaluate and engage current policy debates by putting the past and present into conversation.

Prerequisite(s): Admission to The PhD in Education program, or permission of instructor.
Schedule Type: SEM
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Summer, Spring

EDUC 878 - Intercultural Competence: Theory and Research Application to International Education

Credits: 3
Not Repeatable for Credit
Offered by Graduate School of Education
Explores and examines intercultural competence theory and research as a teaching and learning framework in international education. Emphasizes the comparison of alternative models of intercultural competence development, research paradigms using intercultural competence theory in international education, and empirical studies that examine and explore the use of intercultural competence theory in education.

Prerequisite(s): EDUC 880.
Schedule Type: SEM
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring

EDUC 879 - Language and Second Language Acquisition Research in International Education
Examines the theoretical and historical role of language in international education, with special emphasis on the foundations and variables of second language acquisition. Focuses the role of language in cross-cultural and international contexts, the application of language acquisition theories and empirical studies globally.

Prerequisite(s): EDUC 880.

Schedule Type: SEM
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring

EDUC 880 - Introduction to International Education

Using interdisciplinary approach, addresses education policy issues that transcend national boundaries and have implications for educators in fostering social justice and global awareness.

Prerequisite(s): Admission to PhD in education program or permission of instructor

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDUC 881 - Seminar in Bilingual Education: Policy

Examines historical development of education for language minority students in United States, including federal and state legislation and court decisions. Explores policy issues regarding administrative program models, instructional approaches, curricular reform, and assessment policies for language minority students developed in response to legal mandates, legislative decisions, and school reform movement.

Prerequisite(s): Admission to PhD program.

Schedule Type: SEM
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDUC 882 - Second Language Acquisition: Theory, Research, and Practice

Examines the theoretical foundations of second language acquisition with focus on linguistic, anthropological, sociological,
psychological, and educational research through theory and practice.

**EDUC 883 - Seminar in Sociocultural Theory**

Credits: 3  
Repeatable within Degree for Credit  
Offered by Graduate School of Education  
Explores and analyzes the theoretical contributions of sociocultural theory. Focuses on the growing body of contemporary research on literacy, equity in education and emancipatory teaching for diverse students.

**Prerequisite(s):** Admission to PhD program in Education or permission of instructor  
**Schedule Type:** SEM  
**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall, Spring

**EDUC 885 - History of Education in the United States**

Credits: 3  
Not Repeatable for Credit  
Offered by Graduate School of Education  
Examines the history of education in the United States and explores the social, political, cultural, and economic forces that have shaped reform initiatives. Uses history to engage questions around citizenship, equality, and democracy.

**Prerequisite(s):** Admission to the PhD in Education program, or permission of instructor  
**Schedule Type:** SEM  
**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall, Summer, Spring

**EDUC 886 - School Reform in the United States: Politics and Policies**

Credits: 3  
Not Repeatable for Credit  
Offered by Graduate School of Education  
Explores a broad range of reform initiatives shaping public education and examines the ways politics infuses education policy. Investigates the disciplinary and methodological frameworks scholars have used to study school reform.

**Prerequisite(s):** Admission to the PhD in Education program, or permission of instructor  
**Schedule Type:** SEM  
**Hours of Lecture or Seminar per week:** 3  
**When Offered:** Fall, Summer, Spring
EDUC 887 - Neighborhood, Community, Education Policy

Credits: 3
Not Repeatable for Credit
Offered by Graduate School of Education
Explores the intersection of historical, social, political, and economic policies and conditions and communities in the US. Focuses on understanding trends in the formation of neighborhoods and the development of American cities, schools, and communities. Examine the politics and policies of selected neighborhoods and communities through developing community development profiles and proposals.

Prerequisite(s): Admission to PhD in Education program or with permission of instructor.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Summer, Spring

EDUC 890 - Doctoral Internship in Education

Credits: 1-6
Not Repeatable for Credit
Offered by Graduate School of Education
Interns work with appropriate staff member in cooperating school, school system, or other educational institution, agency, or setting.

Prerequisite(s): Admission to PhD program, and prior approval of advisor and PhD director.
Notes: Requires 100 hours of on-site internship completed over at least a five-week period. Up to 6 credits of EDUC 890 may be applied toward PhD degree requirements.

Schedule Type: INT
Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 0
Grading: Graduate Special

EDUC 892 - Social Justice and Equity in International Education

Credits: 3
Not Repeatable for Credit
Offered by Graduate School of Education
Examines ideological, cultural, and systemic structural inequities in various educational settings at national and international levels. Focuses on educational practices that promote equity and social change throughout the world.

Prerequisite(s): EDUC 880.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
EDUC 893 - Seminar in Educational Anthropology

Credits: 3  
Not Repeatable for Credit  
Offered by Graduate School of Education  
Examines theories and research from educational anthropology and educational sociology to clarify and address contemporary educational issues and concerns. Focuses on U.S. public schools, with comparative materials from other educational settings and societies.

Prerequisite(s): Admission to PhD program, or permission of instructor.  
Schedule Type: SEM  
Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0

EDUC 894 - Seminar in Multicultural Education

Credits: 3  
Not Repeatable for Credit  
Offered by Graduate School of Education  
Examines knowledge base, policy issues, and curricular and instructional features of multicultural education in United States and other countries.

Prerequisite(s): Admission to the Ph.D. in Education program or permission of instructor.  
Schedule Type: SEM  
Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0

EDUC 895 - Seminar in Emerging Issues of Education

Credits: 3  
Repeatable within Term for Credit  
Offered by Graduate School of Education  
Study of selected emerging issues or problems in education. Students engage in research, study, discussion, and writing.

Notes: May be repeated for credit. Up to 6 hours of 895 course work may be applied to PhD requirements.

Schedule Type: LEC  
Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0

EDUC 897 - Independent Study for the Doctor of Philosophy in Education

Credits: 1-6  
Repeatable within Term for Credit  
Offered by Graduate School of Education  
Structured learning experience to extend and develop skills and knowledge relative to field of professional expertise.
Prerequisite(s): Admission to PhD program and prior approval of advisor and PhD director.

Schedule Type: IND

Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 0
Grading: Graduate Special

EDUC 994 - Advanced Internship in Education

Credits: 3
Not Repeatable for Credit
Offered by Graduate School of Education
Internship in setting related to student's major area of study. Requires minimum of 100 hours completed over at least a five-week period. Each intern works with appropriate staff member in cooperating school, school system, or other educational institution or agency.

Prerequisite(s): admission to PhD program, and prior approval of advisor and PhD director.
Notes: Internship must be in setting that differs from regular employment.

Schedule Type: INT
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
Grading: Graduate Special

EDUC 998 - Doctoral Dissertation Proposal

Credits: 1-6
Not Repeatable for Credit
Offered by Graduate School of Education
Prerequisite(s): Admission to candidacy in PhD program; successful completion of doctoral qualifying exam; and EDRS 810, 811, and 812 or their equivalents.

Schedule Type: IND

EDUC 999 - Doctoral Dissertation Research

Credits: 1-9
Repeatable within Degree for Credit
Offered by Graduate School of Education
Provides continued faculty assistance on individual basis to complete dissertation planned in EDUC 998 and initiate new projects.

Notes: Requires successful completion of EDUC 998 and faculty approval of proposal.

Schedule Type: IND
Education Leadership (EDLE)

Offered by the College of Education and Human Development

EDLE 412 - Schools and the Law

Credits: 3
Not Repeatable for Credit
Offered by Graduate School of Education
Provides an extensive overview of legal and ethical issues in schools. In the course, students will review and analyze key legal and ethical principles, read court decisions, and examine federal and state statutes.

Prerequisite(s): C or higher in EDUC 300.
Prerequisite(s) enforced by registration system.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDLE 420 - Organization and Management of Schools

Credits: 3
Not Repeatable for Credit
Offered by Graduate School of Education
Studies basic issues in leadership, organization, and governance of schools. Explores theories and models of leadership how leaders conceptualize school organization, with an emphasis on distributed leadership in professional environments, systems thinking, and organizational change.

Prerequisite(s): C or higher in EDUC 300
Prerequisite(s) enforced by registration system.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDLE 597 - Special Topics in Education

Credits: 1-6
Repeatable within Degree for Credit
Offered by Graduate School of Education
Provides advanced study on selected topic or emerging issue in American or international education.
Prerequisite(s): Admission to program in GSE.
Notes: May be repeated for credit with GSE permission.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 0

EDLE 610 - Leading Schools and Communities

Credits: 3
Not Repeatable for Credit
Offered by Graduate School of Education
Examines critical functions of leadership and organizational management, complex decision making responsibilities of school executives, and constructive relationships between schools and communities. Incorporates historical, ethical, philosophical, and sociological foundations of American education and the impact of organizational structure on reform and student achievement. Practical and academic emphasis on leadership skill development and dispositions.

Prerequisite(s): B- or higher in EDLE 620 OR EDSE 743; EDLE 690; EDLE 791.
Prerequisite(s) enforced by registration system.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDLE 612 - Education Law

Credits: 3
Not Repeatable for Credit
Offered by Graduate School of Education
Provides legal foundations of U.S. public schools. Examines general principles of statutory and case law, and applies judicial decisions to educational environments. Focuses on legal responsibilities, constraints, and opportunities of public school officials. Includes component of Special Education law.

Prerequisite(s): B- or higher in EDLE 620 or EDSE 743; EDLE 690 and EDLE 791.
Prerequisite(s) enforced by registration system.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDLE 614 - Managing Financial and Human Resources

Credits: 3
Not Repeatable for Credit
Offered by Graduate School of Education
Explores basic functions in financial and human resource management. Examines legalities, ethics, and politics of resource
procurement and allocation. Provides experiences to help students better understand tasks typically performed by school leaders.

**Prerequisite(s):** B- or higher in EDLE 620, EDLE 690, and EDLE 791. Prerequisite(s) enforced by registration system.

**Schedule Type:** LEC  
**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

### EDLE 616 - Curriculum Development and Evaluation

Credits: 3  
Not Repeatable for Credit  
Offered by Graduate School of Education  
Examines the relationship of the written, taught, and tested curriculum and identifies critical leadership decisions that can positively impact student achievement. Identifies components of effective curriculum guides. Mini-document for personal use is constructed.

**Prerequisite(s):** B- or higher in EDLE 620, EDLE 690, and EDLE 791. Prerequisite(s) enforced by registration system.

**Schedule Type:** LEC  
**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

### EDLE 618 - Supervision and Evaluation of Instruction

Credits: 3  
Not Repeatable for Credit  
Offered by Graduate School of Education  
Provides a theoretical and practical overview of the supervision and evaluation of instruction. Introduces the domains of supervision and inquiry into current issues and best practices in supervision. Uses a variety of interactive exercises to assist in the development of practical skills for using the clinical process and developmental approach to supervision.

**Prerequisite(s):** B- or higher in EDLE 620 or EDSE 743; EDLE 690, and EDLE 791. Prerequisite(s) enforced by registration system.

**Schedule Type:** LEC  
**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

### EDLE 620 - Organizational Theory and Leadership

Credits: 3  
Not Repeatable for Credit  
Offered by Graduate School of Education  
Studies basic organizational theories and models of leadership and management. Emphasizes shared leadership in professional
environments, communication skills, systems thinking, and personal and organizational change. Bridges theory to practical applications in educational settings.

Corequisite(s): Application to the Education Leadership Program.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDLE 634 - Contemporary Issues in Education Leadership

Credits: 3
Not Repeatable for Credit
Offered by Graduate School of Education
Examines current and emerging issues and trends impacting education. Includes demographic shifts; globalization; technology; data-based decision making; inclusion of diverse learners in American schools; and recent research on student achievement when influenced by race, gender, and poverty.

Prerequisite(s): Admission to program.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDLE 636 - Adult Motivation and Conflict Management in Education Settings: A Case Study Approach

Credits: 3
Not Repeatable for Credit
Offered by Graduate School of Education
Uses case studies and simulations to examine conflict mediation and resolution skills, and safety and security issues. Focuses on character and ethics education in schools, coaching and mentoring, and adult motivation to support positive behaviors in work settings.

Prerequisite(s): Admission to program.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDLE 690 - Using Research to Lead School Improvement

Credits: 3
Not Repeatable for Credit
Offered by Graduate School of Education
Develops skills, insights, and understanding of how leaders use research to improve schools, with emphasis on the use of assessment and research data to identify school improvement needs and to design school improvement projects.

Prerequisite(s): B- or higher in EDLE 620 or 743 (may be taken concurrently if application has been submitted to the MEd in
Education Leadership program or the MEd in EDLE with a Concentration in Special Education Leadership program
Prerequisite(s) enforced by registration system.

**Schedule Type:** LEC  
**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**EDLE 770 - Introduction to Education Leadership**

Credits: 3  
Not Repeatable for Credit  
Offered by Graduate School of Education  
Introduces the study of education leadership, theoretical traditions in leadership studies, and scholarship on leadership and organizational change.

**Prerequisite(s):** Admission to Ph.D. in Education Program.  
**Schedule Type:** LEC  
**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall, Summer, Spring.

**EDLE 791 - Internship in Educational Leadership**

Credits: 3  
Not Repeatable for Credit  
Offered by Graduate School of Education  
Offers wide range of practical experiences and professional challenges in authentic educational settings. Activities emphasize strategic, instructional, organizational, political, and community leadership.

**Prerequisite(s):** Admission to the MEd in Education Leadership (EDLE) program or MEd in EDLE with a concentration in Special Education Leadership; EDLE 620 or 743 (may be taken concurrently)  
**Notes:** Course must be taken in second term of program.

**Schedule Type:** INT  
**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**Grading:** Satisfactory/No Credit

**EDLE 797 - Advanced Topics in Education**

Credits: 1-9  
Repeatable within Term for Credit  
Offered by Graduate School of Education  
Advanced study of selected topics in education for students preparing for doctoral studies or who have been admitted to the PhD program in education.

**Notes:** May be repeated for credit with CEHD approval.
EDLE 801 - Contemporary Organization Theory

Credits: 3
Not Repeatable for Credit
Offered by Graduate School of Education
Engages students in the study of major organization theories that inform educational leadership research. Students use theory to help inform their own research interests. Students begin work on analytical literature review.

Prerequisite(s): Admission to PhD in education program.
Corequisite(s): EDLE 802.

Notes: May be taken as corequisite with EDLE 802. First in three-course sequence.

EDLE 802 - Leadership and Decision Making

Credits: 3
Not Repeatable for Credit
Offered by Graduate School of Education
Engages students in the study of major leadership and decision theories that inform educational leadership research. Students use theory to help inform their own research interests. Students begin work on analytical literature review.

Prerequisite(s): EDLE 801.
Notes: May be taken as corequisite with EDLE 801. Second in three course sequence.

EDLE 803 - Foundations of Education Leadership: Economics and Leadership

Credits: 3
Not Repeatable for Credit
Offered by Graduate School of Education
Emphasizes economic foundations of U.S. education, and evolution of school, district, and state leadership. Students complete work on analytical literature review.
Prerequisite(s): EDLE 801 and 802.
Notes: Third in a three-course sequence.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDLE 813 - Social and Political Forces in Education Leadership

Credits: 3
Not Repeatable for Credit
Offered by Graduate School of Education
Examines the social and political forces that shape education in the United States and the effect of these forces on school leadership. Examines the social and political functions of schooling in the past and present.

Prerequisite(s): Admission to Ph.D. in Education Program.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Summer, Spring.

EDLE 815 - Conceptual Frameworks in Education Leadership

Credits: 3
Not Repeatable for Credit
Offered by Graduate School of Education
Introduces three different disciplinary perspectives on education leadership, and helps identify and articulate different conceptual frameworks. Major focus is designing a conceptual framework that informs research questions.

Prerequisite(s): Admission to PhD in education program or permission of instructor
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDLE 816 - Instructional Leadership-Curriculum Policy and Practice

Credits: 3
Not Repeatable for Credit
Offered by Graduate School of Education
Focuses on curriculum and instruction theory, policy, and practice with research emphasis on instructional leadership. Students develop research proposals to investigate instructional leadership in schools and districts, and relate instructional leadership to their own specific research interests.

Prerequisite(s): Admission to Ph.D. in Education Program.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
EDLE 818 - Instructional Leadership-Supervision Policy and Practice

Credits: 3
Not Repeatable for Credit
Offered by Graduate School of Education
Introduces current topics and research in supervision and instruction, including theory and empirical work focused on instruction, teacher learning, teacher evaluation, and instructional leadership.

Prerequisite(s): Admission to Ph.D. in Education Program.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Summer, Spring.

EDLE 895 - Emerging Issues in Administration and Supervision

Credits: 3
Repeatable within Degree for Credit
Offered by Graduate School of Education
Covers selected emerging issues in educational leadership. Students engage in research, study, discussion, and writing about various topics selected for study.

Prerequisite(s): Admission to PhD program, or permission of instructor.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

Education Research (EDRS)

Offered by the College of Education and Human Development

EDRS 531 - Educational and Psychological Measurement

Credits: 3
Not Repeatable for Credit
Offered by Graduate School of Education
Emphasizes techniques and principles used in the construction, administration, and quantification of measuring devices for evaluation purposes. Discusses interpretation of standardized tests of ability, aptitude, achievement, interest, and personality.

Prerequisite(s): Appropriate methods and advanced methods courses.
Corequisite(s): Appropriate methods and advanced methods courses.
EDRS 590 - Education Research

Credits: 3
Not Repeatable for Credit
Offered by Graduate School of Education
Develops skills, insights, and understanding to perform research, with emphasis on interpreting and applying research results. Critiques research, and uses findings in educational settings.

EDRS 597 - Special Topics in Education

Credits: 1-6
Repeatable within Degree for Credit
Offered by Graduate School of Education
Provides advanced study on selected topic or emerging issue in American or international education.

Prerequisite(s): Admission to program in GSE.
Notes: May be repeated for credit with CEHD approval.

EDRS 620 - Quantitative Inquiry in Education

Credits: 3
Not Repeatable for Credit
Offered by Graduate School of Education
Examines fundamental concepts and methods of statistics as applied to educational problems, including descriptive and inferential statistics.

Prerequisite(s): EDRS 590 or equivalent experience.

EDRS 621 - Qualitative Inquiry in Education
Focuses on basic application of naturalistic research methods. Examines major theoretical frameworks and qualitative research techniques, which include content analysis, coding, and interpretation of data.

**Prerequisite(s):** EDRS 590 or equivalent experience.

**Schedule Type:** LEC

**Hours of Lecture or Seminar per week:** 3

**Hours of Lab or Studio per week:** 0

### EDRS 630 - Educational Assessment

Credits: 3

Not Repeatable for Credit

Offered by Graduate School of Education

Examines research theory and practice relevant to assessments. Focuses on assessment strategies for students including developing skills to select, score, and interpret educational assessments.

**Schedule Type:** LEC

**Hours of Lecture or Seminar per week:** 3

**Hours of Lab or Studio per week:** 0

### EDRS 631 - Program Evaluation

Credits: 3

Not Repeatable for Credit

Offered by Graduate School of Education

Focuses on perspectives of existing and emerging issues, theories, and models of program evaluation. Involves implementation of program evaluation in related fields and school districts.

**Schedule Type:** LEC

**Hours of Lecture or Seminar per week:** 3

**Hours of Lab or Studio per week:** 0

**When Offered:** Fall

### EDRS 797 - Advanced Topics in Education

Credits: 1-6

Repeatable within Degree for Credit

Offered by Graduate School of Education

Advanced study of selected topics in education for students preparing for doctoral studies or who have been admitted to the PhD program in education.

**Notes:** May be repeated for credit with CEHD approval.

**Schedule Type:** LEC
EDRS 810 - Problems and Methods in Education Research

Credits: 3
Not Repeatable for Credit
Offered by Graduate School of Education
Advanced course in interpreting and applying education research methods. Emphasizes comparison of alternative philosophies of research, ways of formulating questions and hypotheses, research plans, and analysis procedures. Students evaluate existing studies, and investigate a range of research approaches.

Equivalent to CTCH 710, CTCH 801 (2013-2014 Catalog).

Prerequisite(s): Admission to PhD program, or permission of instructor.

Schedule Type: LEC

EDRS 811 - Quantitative Methods in Educational Research

Credits: 3
Not Repeatable for Credit
Offered by Graduate School of Education
Emphasizes advanced methods of conducting research using quantitative methods of data collection, and analysis appropriate for research in education. Includes design of experimental and quasi-experimental research studies, and methods of analysis appropriate to these studies, including analyzing variance and multiple linear regression.

Prerequisite(s): B- or higher and satisfactory completion of EDUC 810 or equivalent, or permission of instructor.

Schedule Type: LEC

EDRS 812 - Qualitative Methods in Educational Research

Credits: 3
Not Repeatable for Credit
Offered by Graduate School of Education
Teaches how to apply qualitative data collection and analysis procedures in educational research, including ethnographic and other field-based methods, and unobtrusive measures.

Prerequisite(s): B- or higher and satisfactory completion of EDUC 810 or equivalent, or permission of instructor.

Notes: Emphases vary depending on student interests and needs.
EDRS 818 - Critical Discourse Analysis in Education Research

Credits: 3
Not Repeatable for Credit
Offered by Graduate School of Education
Prepares students with a working knowledge of discourse analysis and its application to ethnographic and qualitative research in education. Focuses on critical discourse analysis as a resource to improve classroom interaction and transform educational practice and as an analytic tool for a social analysis of education in a wide variety of local, national and international education contexts and settings.

Prerequisite(s): EDRS 810
EDRS 811
EDRS 812
Or permission of instructor

Schedule Type: SEM
Hours of Lecture or Seminar per week: 3
Grading: Graduate Special
When Offered: Fall, Summer, Spring

EDRS 820 - Evaluation Methods for Educational Programs and Curricula

Credits: 3
Not Repeatable for Credit
Offered by Graduate School of Education
Explores development and types of current systems and models for evaluating educational programs and curricula. Emphasizes evaluation needs and problems of public and private elementary and secondary schools, and colleges and universities. Also considers needs of government agencies, industry, and health-related organizations.

Prerequisite(s): Successful completion of EDRS 810, or permission of instructor.
Notes: Prior completion of EDRS 811 and 812 helpful but not required.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDRS 821 - Advanced Applications of Quantitative Methods

Credits: 3
Not Repeatable for Credit
Offered by Graduate School of Education
Advanced study of applications of quantitative methods in educational research, reinforcing and building on concepts and skills acquired in EDRS 811. Uses modular approach, and provides advanced study of techniques appropriate to survey research,
group-experimental and quasiexperimental research, selected multivariate procedures and factor analysis, and quantitative synthesis (meta-analysis) of research. Combines text reading assignments, critiques, and discussion of relevant journal articles; and application activities.

Prerequisite(s): EDRS 810 and 811.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDRS 822 - Advanced Applications of Qualitative Methods

Credits: 3
Not Repeatable for Credit
Offered by Graduate School of Education
Advanced seminar devoted to study of current topics in qualitative research. Deals with cutting-edge information on selected advanced topics in qualitative research, and provides opportunities to apply new skills and knowledge to projects related to students' interests.

Prerequisite(s): EDRS 810 and 812.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDRS 823 - Advanced Research Methods in Single Subject/Case Design

Credits: 3
Not Repeatable for Credit
Offered by Graduate School of Education
Prepares students to conduct research using single subject design and single case study design. Provides understanding of salient features as well as advantages, disadvantages of these research methodologies. Students critique and analyze published research using these methodologies. Provides opportunities to apply these methodologies to research questions related to student interests.

Prerequisite(s): EDRS 810, 811, and 812.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDRS 824 - Mixed Methods Research: Integrating Qualitative and Quantitative Approaches

Credits: 3
Not Repeatable for Credit
Offered by Graduate School of Education
Advanced research seminar that integrates qualitative and quantitative approaches, methods, and data in a single study. The course covers the paradigms and "mental models" that inform both approaches, and the ways in which qualitative and quantitative goals, questions, methods, and interpretive strategies can be productively combined.
EDRS 825 - Advanced Research Methods in Self-Study of Professional Practice

Credits: 3
Not Repeatable for Credit
Offered by Graduate School of Education
Prepares students to conduct research using the self-study research methodology, a qualitative research approach for systematically examining one's practitioner role for improvement-aimed purposes with contributions to the educational field and knowledge base.

Prerequisite(s): Admission to PhD in Education program; EDRS 810; EDRS 811 or EDRS 812
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDRS 826 - Qualitative Case Study Methods

Credits: 3
Not Repeatable for Credit
Offered by Graduate School of Education
Advanced research seminar on qualitative case study design and application in educational research. Topics include descriptive, theoretical, evaluation, and policy case study design and methods. Students will conduct and critique a case study appropriate to their discipline.

Prerequisite(s): EDRS 812 or permission of instructor.
Schedule Type: SEM
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Summer.

EDRS 827 - Development and Validation of Assessment Scales

Credits: 3
Not Repeatable for Credit
Offered by Graduate School of Education
Focusing on the acquisition of knowledge and skills related to development of assessment scales and validation of assessment scale data in the context of education, psychology, and related fields.

Prerequisite(s): EDRS 811.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
EDRS 828 - Modern Measurement in Education and Human Development

Credits: 3
Not Repeatable for Credit
Offered by Graduate School of Education
Focuses on the acquisition of knowledge and skills related to modern theory of measurement with application in the context of education, psychology, and related fields.

Prerequisite(s): EDRS 811 or permission of instructor.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Summer, Spring.

EDRS 830 - Hierarchical Linear Modeling

Credits: 3
Not Repeatable for Credit
Offered by Graduate School of Education
Analyzes nested data structures (e.g. students within classrooms) as well as student growth. Students will learn through reading assignments, lecture and applications using a computer program for data analysis. Students will be expected to critically read multilevel methods used in published research, analyze data, and provide written report of results in APA format.

Prerequisite(s): EDRS 821.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

EDRS 831 - Structural Equation Modeling

Credits: 3
Not Repeatable for Credit
Offered by Graduate School of Education
Focusing on the development of knowledge and skills related to structural equation modeling and research applications in education, psychology, and related fields.

Prerequisite(s): EDRS 811.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring
EDRS 890 - Research in Practice

Credits: 3
Not Repeatable for Credit
Offered by Graduate School of Education
Interns work with appropriate staff member in cooperating school, school system, or other educational institution, agency, or setting.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
Grading: Graduate Special

Educational Psychology (EDEP)

Offered by the College of Education and Human Development

EDEP 402 - Brain, Behavior, and Neuroimaging in Children

Credits: 3
Not Repeatable for Credit
Offered by Graduate School of Education
Focus on research regarding the development of cognitive processes in children, their neurobiological substrates, and the imaging technology used to explore the functioning brain.

Prerequisite(s): At least junior standing or sophomore honors/university scholar candidate.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDEP 405 - The Neuroscience of Learning and Cognition

Credits: 3
Not Repeatable for Credit
Offered by Graduate School of Education
Focuses on research regarding the development of cognitive processes in children and adults of various ages, their neurobiological substrates, and the imaging technology used to explore the functioning brain.

Equivalent to EDEP 655

Prerequisite(s): Junior standing or sophomore honors / university scholar candidate.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring
**EDEP 550 - Theories of Learning and Cognition**

Credits: 3  
Not Repeatable for Credit  
Offered by Graduate School of Education  
Explores theoretical perspectives on learning and cognition, and relation of these theories to construction of learning environments, student motivation, classroom management, assessment, and technology to support teaching and learning.

Schedule Type: LEC  
Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0

**EDEP 551 - Principles of Learner Motivation**

Credits: 3  
Not Repeatable for Credit  
Offered by Graduate School of Education  
Focuses on theories and concepts of human motivation; and examines strategies, techniques, and interventions that promote and sustain learner motivation.

Schedule Type: LEC  
Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0

**EDEP 591 - Data-Driven Decision Making for Continuous Educational Improvement**

Credits: 3  
Not Repeatable for Credit  
Offered by Graduate School of Education  
Provides an intellectual and practical framework for creating and understanding formative and summative assessments of student performance. Emphasis is placed on the learning principles, cognitive processes, and psychometric models as they pertain to assessment issues.

Schedule Type: LEC  
Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0  
When Offered: Summer

**EDEP 592 - Data-Driven Decision-Making: Development of Assessments**

Credits: 3  
Not Repeatable for Credit  
Offered by Graduate School of Education  
Focuses on strategies to design assessments for students and schools with a particular emphasis on developing and using assessment methods to inform instructional decisions.
EDEP 593 - Data-Driven Decision Making: Analysis and Interpretation of Assessment Data

Credits: 3
Not Repeatable for Credit
Offered by Graduate School of Education
Focusing on the development of knowledge and skills related to analyzing and interpreting educational assessment data.

Prerequisite(s): EDEP 592.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

EDEP 594 - Data-Driven Decision-Making Application in Education Contexts

Credits: 3
Not Repeatable for Credit
Offered by Graduate School of Education
Applies fundamental knowledge of assessment using team-based projects. Incorporates development of assessments and the analysis, interpretation, and reporting of assessment data to inform curriculum and instruction based on the context-specific needs of educators.

Prerequisite(s): EDEP 593.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
Grading: Graduate Special
When Offered: Spring

EDEP 597 - Special Topics in Educational Psychology

Credits: 1-3
Repeatable within Term for Credit
Offered by Graduate School of Education
Covers critical current and emerging issues in educational psychology across the span of human development with an emphasis on research methodology and evidence-based practice.

Prerequisite(s): Permission of instructor.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 1-3
EDEP 601 - Creativity and Cognition in the Arts and Media

Credits: 3  
Not Repeatable for Credit  
Offered by Graduate School of Education  
Focuses on research on cognition, development, learning, and creativity in the visual arts and media in formal and informal educational settings.

Equivalent to AVT 606

Schedule Type: LEC  
Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0

EDEP 632 - Introduction to Human Development through Research Methods

Credits: 3  
Not Repeatable for Credit  
Offered by Graduate School of Education  
Develops understanding of the study of human development from early childhood through adulthood through research methods within the context of educational psychology. Emphasizes foundational research in education and human development as it pertains to varied learning contexts.

Schedule Type: SEM  
Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0  
When Offered: Fall, Spring.

EDEP 650 - High-Stakes Assessment and Accountability Systems

Credits: 3  
Not Repeatable for Credit  
Offered by Graduate School of Education  
Focuses on school effectiveness, assessment tools, and accountability models on state and national levels. Explores issues and methods relevant to educational policy, standardized testing, and classroom assessment.

Schedule Type: LEC  
Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0
EDEP 651 - Modern Measurement with Applications in Education and the Behavioral Sciences

Credits: 3
Not Repeatable for Credit
Offered by Graduate School of Education
Provides background in modern measurement theory and applications. Covers topics from classical test theory, generalizability theory, and item response theory. Applications include advanced techniques in test construction, analysis of binary and rating data, test equating, item fairness, and cognitive diagnosis.

Prerequisite(s): EDRS 531
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDEP 652 - Process of Learning and Development

Credits: 3
Not Repeatable for Credit
Offered by Graduate School of Education
Explores different theoretical perspectives on learning and development. Focuses on historical and contemporary theories of learning and cognitive development, and examines current research and its application in educational settings.

Prerequisite(s): EDEP 550.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDEP 653 - Culture and Intelligence

Credits: 3
Not Repeatable for Credit
Offered by Graduate School of Education
Explores different theoretical perspectives on intelligence as they relate to individual and cultural differences. Examines issues related to heritability and measures of intelligence, and intelligence in the cultural context.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDEP 654 - Learning, Motivation, and Self-Regulation

Credits: 3
Not Repeatable for Credit
Offered by Graduate School of Education
Focuses on theories and research on self-regulation of academic learning. Presents multidimensional conceptual framework for
studying and applying self-regulation in educational contexts.

**Prerequisite(s):** EDEP 550, 551.
**Schedule Type:** LEC
**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0

**EDEP 655 - The Neuroscience of Learning and Cognition**

Credits: 3
Not Repeatable for Credit
Offered by Graduate School of Education
Focuses on research regarding the development of cognitive processes in children and adults of various ages, their neurobiological substrates, and the imaging technology used to explore the functioning brain.

Equivalent to EDEP 405

**Prerequisite(s):** EDEP 550
**Schedule Type:** LEC
**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0
**When Offered:** Spring

**EDEP 798 - Directed Inquiry in Educational Psychology**

Credits: 1-3
Repeatable within Degree for Credit
Offered by Graduate School of Education
Offers a capstone experience to students after completion of majority of program coursework with the exception of 6 credit hours. Enables students to demonstrate their integrative knowledge and skills accrued through study in their concentration area in educational psychology.

**Prerequisite(s):** Project mentor approval and completion of coursework in the MS in Educational Psychology exclusive of 6 credit hours.
**Schedule Type:** IND, LEC
**Hours of Lecture or Seminar per week:** 1-3
**Hours of Lab or Studio per week:** 1-9
**Grading:** Graduate Special
**When Offered:** Fall, Spring, Summer

**EDEP 799 - Thesis in Educational Psychology**

Credits: 1-3
Repeatable within Degree for Credit
Offered by Graduate School of Education
The thesis is based on original research. It enables students to demonstrate their integrative knowledge and skills accrued through study in their concentration area in educational psychology.
EDEP 820 - Teaching, Learning, and Cognition

Credits: 3
Not Repeatable for Credit
Offered by Graduate School of Education
Focuses on foundational educational psychology theories including cognitive, social, and constructivist themes and their implications for improving instructional practices and learning at all developmental levels and content areas.

Prerequisite(s): EDUC 800, 805; EDLE 802; and EDRS 810.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDEP 821 - Sociocultural Processes in Learning, Instruction, and Motivation

Credits: 3
Not Repeatable for Credit
Offered by Graduate School of Education
Examines processes by which social, cultural, and linguistic variables influence human behavior. Focuses on differences within and between cultural groups related to student's learning and achievement in educational settings.

Prerequisite(s): EDUC 800, 805; EDLE 802; and EDRS 810.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDEP 822 - Advanced Learning, Motivation, and Self-Regulation

Credits: 3
Not Repeatable for Credit
Offered by Graduate School of Education
Examines development of self-regulatory and motivational processes as they relate to educational practice. Emphasizes how processes influence students' self-motivation and achievement in various domains.

Prerequisite(s): EDUC 800, 805; EDLE 802; and EDRS 810.
Schedule Type: LEC
EDEP 823 - Research Project in Educational Psychology: Sequence I

Credits: 3
Not Repeatable for Credit
Offered by Graduate School of Education
Focuses on development and implementation of research studies in educational psychology. Students acquire skills regarding developing research questions and a sound methodological approach for their study.

Prerequisite(s): EDEP 820, 821, 822.
Notes: First in two-course sequence.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDEP 824 - Research Project in Educational Psychology: Sequence II

Credits: 3
Not Repeatable for Credit
Offered by Graduate School of Education
Focuses on development and implementation of research studies in educational psychology. Students acquire skills regarding collecting, analyzing, and interpreting data.

Prerequisite(s): EDEP 823.
Notes: Second in two course sequence.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

Electrical and Computer Engineering (ECE)

Offered by the Volgenau School of Engineering
Students may attempt an undergraduate course taught by the Volgenau School of Engineering twice. A third attempt requires approval of the department offering the course.

ECE 101 - Introduction to Electrical and Computer Engineering

Credits: 3
Limited to 2 Attempts
Offered by Electrical and Computer Engineering
Introduces fundamental concepts in Electrical and Computer engineering and provides insight to the various careers in each field. Both theory and practical applications of electronic components are covered through examples of real world applications. Topics are reinforced through hands-on laboratory experiments.

**Prerequisite(s):** C or better in MATH 105 or specified score on math placement test, or MATH 113 with a C or better.

**Schedule Type:** LAB, LEC

**Hours of Lecture or Seminar per week:** 3

**Hours of Lab or Studio per week:** 3

---

**ECE 201 - Introduction to Signal Analysis**

Credits: 3
Limited to 2 Attempts
Offered by Electrical and Computer Engineering
Provides technically more rigorous introduction to problems and tools commonly encountered by electrical engineers. Introduces mathematical modeling of engineering problems and their solutions. Introduces standard software packages for electrical engineering as tools to simulate engineering problems on computer. Mathematical and computer models are related to physical reality provided by hands-on experiments.

**Prerequisite(s):** Grade of C or better in MATH 113.
Prerequisite(s) enforced by registration system.

**Schedule Type:** LAB, LEC

**Hours of Lecture or Seminar per week:** 3

**Hours of Lab or Studio per week:** 2

**When Offered:** Fall, Spring, Summer

---

**ECE 220 - Signals and Systems I**

Credits: 3
Limited to 2 Attempts
Offered by Electrical and Computer Engineering
First of two-semester sequence of courses providing mathematical background for many ECE courses taken in junior and senior years. Introduces methods of representing continuous time signals and systems, and interaction between signals and systems. Covers analysis of signals and systems via differential equations and transform methods; Laplace and Fourier transforms as convenient analysis tools; frequency response of systems; and stability of systems in time and frequency domains. Presents application examples from communications, circuits, control, and signal processing.

**Prerequisite(s):** C or better in ECE 201 or equivalent.
Prerequisite(s) enforced by registration system.

**Corequisite(s):** MATH 203, 214

**Notes:** Students cannot receive credit for both ECE 220 and BENG 220.

**Schedule Type:** LAB, LEC, RCT
ECE 280 - Electric Circuit Analysis

Credits: 5
Limited to 2 Attempts
Offered by Electrical and Computer Engineering
Includes circuit analysis using superposition, equivalent circuits, and transient and steady-state analysis of RL, RC, and RLC circuits; applications of Laplace transform in circuit analysis; sinusoidal excitations and phasors; resonance; filters; AC steady-state analysis; coupled coils; and three-phase circuits. Includes lab demonstrating and investigating circuit analysis concepts.

Prerequisite(s): Grade of C or better in PHYS 260 and 261.
Prerequisite(s) enforced by registration system.

Corequisite(s): ECE 220 must be taken concurrently or before ECE 280.

Notes: Builds on simple circuit concepts introduced in PHYS 260.

Schedule Type: LAB,
LEC,
RCT
Hours of Lecture or Seminar per week: 4
Hours of Lab or Studio per week: 3
When Offered: Fall, Spring

ECE 285 - Electric Circuit Analysis I

Credits: 3
Limited to 2 Attempts
Offered by Electrical and Computer Engineering
Covers the first half of electric circuit theory and practice. Topics include DC analysis of circuits including Ohm's and Kirchhoff's laws, Thevenin and Norton equivalents, and analysis of circuits with resistors, capacitors, inductors, and operational amplifiers. Includes lab experiments to reinforce topics covered in the course.

Prerequisite(s): C or higher in PHYS 260 and 261.
Prerequisite(s) enforced by registration system.

Corequisite(s): MATH 214.

Schedule Type: LAB,
LEC,
RCT
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 2
When Offered: Fall, Spring
ECE 286 - Electric Circuit Analysis II

Credits: 3
Limited to 2 Attempts
Offered by Electrical and Computer Engineering
Covers the second half of electric circuit theory and practice. Topics include AC analysis of circuits including phasors, frequency response, power analysis, and transformers. Includes a project and lab experiments to reinforce topics covered in the course.

Prerequisite(s): C or higher in ECE 285 and MATH 214.
Prerequisite(s) enforced by registration system.

Schedule Type: LAB, LEC, RCT
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 2
When Offered: Fall, Spring

ECE 301 - Digital Electronics

Credits: 3
Limited to 2 Attempts
Offered by Electrical and Computer Engineering
Introduces digital systems, circuits, and computers. Topics include binary systems and codes, digital logic gates and circuits, microelectronics and integrated circuits, coding and multiplexing, multivibrators, shift registers, counters, A/D converters, and elementary computer architecture.

Prerequisite(s): Grade of C or better in MATH 125 or MATH 112.
Prerequisite(s) enforced by registration system.

Notes: Not intended for those majoring in electrical or computer engineering.

Schedule Type: LAB, LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 2
When Offered: Fall, Spring

ECE 305 - Electromagnetic Theory

Credits: 3
Limited to 2 Attempts
Offered by Electrical and Computer Engineering
Static and time varying electric and magnetic fields, dielectrics, magnetization, Maxwell's Equations, and introduction to transmission lines. Course uses vector calculus and algebra of complex numbers.

Prerequisite(s): Grade of C or better in PHYS 260 and MATH 214.
Prerequisite(s) enforced by registration system.

Schedule Type: LEC,
ECE 320 - Signals and Systems II

Credits: 3
Limited to 2 Attempts
Offered by Electrical and Computer Engineering
Second of two-semester sequence providing mathematical background for many ECE courses taken in junior, senior years. Provides methods of representing and analyzing discrete-time signals and systems. Studies effects of converting from continuous-time to discrete time, and presents Z-transform as convenient analysis tool. Emphasizes powerful concept of frequency response of systems developed in first semester. Presents application examples from communications, circuits, control, and signal processing.

Prerequisite(s): Grade of C or better in ECE 220 and MATH 203.
Prerequisite(s) enforced by registration system.

Notes: Students cannot receive credit for both ECE 320 and BENG 320.

Schedule Type: LAB,
LEC,
RCT
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

ECE 331 - Digital System Design

Credits: 3
Limited to 2 Attempts
Offered by Electrical and Computer Engineering
Covers principles of digital logic and digital system design and implementation in VHDL. Topics include number systems; Boolean algebra; analysis, design, and minimization of combinational logic circuits; analysis and design of synchronous and asynchronous finite state machines; and introduction to VHDL and behavioral modeling of combinational and sequential circuits.

Prerequisite(s): Grade of C or better in PHYS 260 and PHYS 261.
Prerequisite(s) enforced by registration system.

Corequisite(s): ECE 332.

Notes: ECE 332 should be taken concurrently with ECE 331. Credit may not be received for ECE 301 and 331.

Schedule Type: LEC,
RCT
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

ECE 332 - Digital Electronics and Logic Design Lab

Credits: 1
Limited to 2 Attempts
Offered by Electrical and Computer Engineering
Lab associated with ECE 331.

Prerequisite(s): C or higher in PHYS 261 or 265, or permission of instructor
Prerequisite(s) enforced by registration system.

Corequisite(s): ECE 331.

Schedule Type: LAB
Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 3
When Offered: Fall, Spring

ECE 333 - Linear Electronics I

Credits: 3
Limited to 2 Attempts
Offered by Electrical and Computer Engineering
Principles of operation and application of electron devices and linear circuits. Topics include semiconductor properties, diodes, bipolar and field effect transistors, biasing, amplifiers, frequency response, operational amplifiers, and analog design.

Fulfills writing intensive requirement in the major.

Prerequisite(s): Grade of C or better in ECE 280 or ECE 285.
Prerequisite(s) enforced by registration system.

Corequisite(s): ECE 286 (required only if ECE 285 is taken).

Notes: ECE 334 is usually taken concurrently with ECE 333.

Schedule Type: LEC, RCT
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring, Summer

ECE 334 - Linear Electronics Lab I

Credits: 1
Limited to 2 Attempts
Offered by Electrical and Computer Engineering
Lab associated with ECE 333.

**Prerequisite(s):** C or higher in PHYS 261 or 265, or permission of instructor.
Prerequisite(s) enforced by registration system.

**Corequisite(s):** ECE 333.

**Schedule Type:** LAB
**Hours of Lecture or Seminar per week:** 0
**Hours of Lab or Studio per week:** 3
**When Offered:** Fall, Spring

## ECE 390 - Engineering Design and Fabrication

Credits: 3
Limited to 2 Attempts
Offered by Electrical and Computer Engineering
Project based course where students will design projects containing analog and digital components as well as mechanical parts. Students will simulate, build, and test their projects.

Equivalent to BENG 390.

**Prerequisite(s):** Grade of C or better in BENG 380, or in ECE 280, or in ECE 285.
Prerequisite(s) enforced by registration system.

**Schedule Type:** LEC
**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0
**When Offered:** Fall

## ECE 392 - Engineering Design Studio

Credits: 1
Repeatable within Degree for Credit
Offered by Electrical and Computer Engineering
Identification and feasibility study of advanced engineering problems. Application of math, physics and engineering methods to challenging projects. Preliminary design, modeling, simulation and prototyping of projects. This course should be taken the semester preceding ECE/BENG 492.

Equivalent to BENG 392.

**Prerequisite(s):** 75 hours of completed coursework applicable to the EE, CpE, or BIOE degree and permission of instructor.

**Schedule Type:** LEC
**Hours of Lecture or Seminar per week:** 1
**Hours of Lab or Studio per week:** 0
**When Offered:** Fall, Spring
ECE 410 - Applications of Discrete-Time Signal Processing

Credits: 3
Limited to 2 Attempts
Offered by Electrical and Computer Engineering
Introduces fundamental concepts of digital signal processing. Emphasis on the theoretical and numerical tools used for frequency domain analysis of sampled signals. Topics covered include sampling, the discrete Fourier transform, fast transform algorithms, spectral analysis, and digital filtering.

Prerequisite(s): C or higher in ECE 320.
Prerequisite(s) enforced by registration system.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ECE 421 - Classical Systems and Control Theory

Credits: 3
Limited to 2 Attempts
Offered by Electrical and Computer Engineering
Introduces analysis and synthesis of feedback systems, including functional description of linear and nonlinear systems, block diagrams and signal flow graphs; state-space representation of dynamical systems, frequency response methods, Root Locus, Nyquist, and other stability criteria; performance indices and error criteria; and applications to mechanical and electromechanical control systems.

Equivalent to SYST 421

Prerequisite(s): Grade of C or better in ECE 220.
Prerequisite(s) enforced by registration system.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

ECE 422 - Digital Control Systems

Credits: 3
Limited to 2 Attempts
Offered by Electrical and Computer Engineering
Introduces analysis, design of digital control systems, Z-transform, discrete linear systems, frequency domain, and state variable techniques. Discusses use of microcomputers in control systems.

Prerequisite(s): Grade of C or better in ECE 320 and 421.
Prerequisite(s) enforced by registration system.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
ECE 429 - Control Systems Lab

Credits: 1
Limited to 2 Attempts
Offered by Electrical and Computer Engineering
Laboratory experiments for topics in control systems analysis, design, and implementation with emphasis on using microcomputers.

Prerequisite(s): Grade of C or better in ECE 421.
Prerequisite(s) enforced by registration system.

Schedule Type: LAB
Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 3
When Offered: Spring

ECE 430 - Principles of Semiconductor Devices

Credits: 3
Limited to 2 Attempts
Offered by Electrical and Computer Engineering
Introduces solid-state physics and its application to semiconductors and semiconductor devices. Topics include band theory, doping, p-n junctions, diffusion theory, low-frequency circuits, devices including bipolar transistor, MOSFET, CMOS, and photo transistors.

Prerequisite(s): Grade of C or better in ECE 333, ECE 305 and MATH 214.
Prerequisite(s) enforced by registration system.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

ECE 431 - Digital Circuit Design

Credits: 3
Limited to 2 Attempts
Offered by Electrical and Computer Engineering
Analysis and design of discrete and integrated switching circuits. Topics include transient characteristics of diodes, bipolar, and field-effect transistors; MOS and bipolar inverters; nonregenerative and regenerative circuits; TTL, ECL, IIL, NMOS, and CMOS technologies; semiconductor memories; VLSI design principles; and SPICE circuit analysis.

Prerequisite(s): Grade of C or better in ECE 331 and 333.
Prerequisite(s) enforced by registration system.
**ECE 433 - Linear Electronics II**

Credits: 3  
Limited to 2 Attempts  
Offered by Electrical and Computer Engineering  
Second course in linear electronics. Covers differential amplifiers, feedback circuits, power amplifiers, feedback amplifier frequency response, analog integrated circuits, operational amplifier systems, oscillators, wide band and microwave amplifiers, and computer-aided design.

**Prerequisite(s):** Grade of C or better in ECE 333.  
Prerequisite(s) enforced by registration system.

**Schedule Type:** LEC  
**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall, Spring

**ECE 434 - Linear Electronics II Laboratory**

Credits: 1  
Limited to 2 Attempts  
Offered by Electrical and Computer Engineering  
Second lab course in linear electronics involving analysis and design of topics listed in ECE 433.

**Prerequisite(s):** C or higher in ECE 334.  
Prerequisite(s) enforced by registration system.

**Corequisite(s):** ECE 433.

**Schedule Type:** LAB  
**Hours of Lecture or Seminar per week:** 1-6  
**Hours of Lab or Studio per week:** 3  
**When Offered:** Fall, Spring

**ECE 435 - Digital Circuit Design Laboratory**

Credits: 1  
Limited to 2 Attempts  
Offered by Electrical and Computer Engineering  
Lab experiments for topics covered in ECE 431.
Prerequisite(s): C or higher in ECE 334.
Prerequisite(s) enforced by registration system.

Corequisite(s): ECE 431.

Schedule Type: LAB
Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 3
When Offered: Fall, Spring

ECE 437 - Principles of Microelectronic Device Fabrication

Credits: 3
Limited to 2 Attempts
Offered by Electrical and Computer Engineering
Introduces fundamentals of microelectronic semiconductor device fabrication technology. Processing steps include photolithography, oxidation, diffusion, ion implantation, chemical vapor deposition, ohmic contact metalization, interconnects, packaging, MOS process integration, and bipolar process integration. Laboratory project integral to course.

Prerequisite(s): Grade of C or better in ECE 333 or 430.
Prerequisite(s) enforced by registration system.

Schedule Type: LAB,
LEC
Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 3

ECE 445 - Computer Organization

Credits: 3
Limited to 2 Attempts
Offered by Electrical and Computer Engineering
General overview of operating a digital computer. Topics include computer arithmetic, arithmetic unit, hardwired and microprogrammed control, memory, register-to-register, input-output operations, and behavioral modeling of computer organization using VHDL.

Fulfills writing intensive requirement in the major.

Prerequisite(s): Grade of C or better in ECE 331 and ECE 332 and in either CS 262 or CS 222.
Prerequisite(s) enforced by registration system.

Schedule Type: LAB, LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 2
When Offered: Fall, Spring, Summer

ECE 446 - Device Driver Development
Credits: 3
Limited to 2 Attempts
Offered by Electrical and Computer Engineering
Addresses device driver and kernel level software programming and development. The C programming language and program
trouble shooting are reviewed. Basics of device driver software, Character driver operations and data structures, concurrency and
race conditions, kernel timers, memory allocation, communications with hardware, interrupt handling, kernel data types, memory
mapping and Direct Memory Access concepts are explored.

Prerequisite(s): C or better in ECE 445.
Prerequisite(s) enforced by registration system.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

ECE 447 - Single-Chip Microcomputers

Credits: 4
Limited to 2 Attempts
Offered by Electrical and Computer Engineering
Explores designing with single-chip microcomputers and microcomputer interfacing. Topics include role of microcomputers
compared with microprocessors and other computers, microcomputer architecture and organization, real-time control issues,
assembly language programming for control, design of control software, input/output methods, design tools, and available single-
chip microcomputers. Students select project and design, and construct system including single-chip microcomputer and ancillary
hardware to implement control system.

Prerequisite(s): Grade of C or better in ECE 445 and in either CS 367 or CS 222.
Prerequisite(s) enforced by registration system.

Notes: This course is highly recommended for ECE 492/493 students interested in using microcontroller technology in their
senior design projects. It should be taken before ECE 493.

Schedule Type: LAB,
LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 3
When Offered: Fall, Spring

ECE 448 - FPGA and ASIC Design with VHDL

Credits: 4
Limited to 2 Attempts
Offered by Electrical and Computer Engineering
Practical introduction to modeling of digital systems with VHDL for logic synthesis. Overview and comparative analysis of
design flow and tools for FPGAs and standard-cell ASICs. Discusses verification of digital systems using testbenches,
prototyping boards and modern testing equipment, and illustrates VHDL-based design methodology with multiple examples from
communications, control, DSP, and cryptography. Laboratory experiments create link between simulation and actual hardware
implementation based on FPGA boards.
Prerequisite(s): Grade of C or better in ECE 445. Prerequisite(s) enforced by registration system.

Schedule Type: LAB, LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 3
When Offered: Spring

ECE 450 - Introduction to Robotics

Credits: 3
Limited to 2 Attempts
Offered by Electrical and Computer Engineering
Introduces mobile robotic systems. Topics include overview of power systems, motors, behavior-based programming, sensors, and sensor integration. Design projects conceived, developed, implemented, and presented.

Prerequisite(s): CS 112, ECE 280, ECE 331 and either ECE 332 or ECE 301, all with grade of C or better.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

ECE 460 - Communication and Information Theory

Credits: 3
Limited to 2 Attempts
Offered by Electrical and Computer Engineering
Introduction to analog and digital communications. Topics include review of important concepts from signals and systems theory and probability theory; Gaussian processes and power spectral density; digital transmission through additive white Gaussian channels; sampling and pulse code modulation; analog signal transmission and reception using amplitude, frequency and phase modulation; and affects of noise on analog communication systems.

Prerequisite(s): Grade of C or better in ECE 220 and STAT 346.
Prerequisite(s) enforced by registration system.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

ECE 461 - Communication Engineering Laboratory

Credits: 1
Limited to 2 Attempts
Offered by Electrical and Computer Engineering
Lab experiments in analog and digital communication areas covered in ECE 460.

**Prerequisite(s):** C or higher in ECE 460 and 334.
Prerequisite(s) enforced by registration system.

**Schedule Type:** LAB
**Hours of Lecture or Seminar per week:** 1-12
**Hours of Lab or Studio per week:** 3
**When Offered:** Fall, Spring

---

**ECE 462 - Data and Computer Communications**

Credits: 3  
Limited to 2 Attempts  
Offered by Electrical and Computer Engineering  
Introduces modern data communications and computer networks. Topics include point-to-point communication links and transmission of digital information, modems, and codecs; packet switching, multiplexing, and concentrator design; multiaccess and broadcasting; local area and wide area networks; architectures and protocols for computer networks; OSI reference model and seven layers; physical interfaces and protocols; and data link control layer and network layer. Provides examples of data networks.

**Prerequisite(s):** STAT 344 or 346, and ECE 220, and ECE 331 or 303, all with grade of C or better.
Prerequisite(s) enforced by registration system.

**Schedule Type:** LEC
**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0
**When Offered:** Fall

---

**ECE 463 - Digital Communications Systems**

Credits: 3  
Limited to 2 Attempts  
Offered by Electrical and Computer Engineering  
Introduces digital transmission systems. Topics include quantization, digital coding of analog waveforms, PCM, DPCM, DM, baseband transmission, digital modulation schemes, ASK, FSK, PSK, MSK, QAM, pulse shaping, intersymbol interference, partial response, voice-band and wideband modems, digital cable systems, regenerative repeaters, clock recovery and jitter, multipath fading, digital radio design, optimal receiver design, MAP receiver, and probability of error.

**Prerequisite(s):** C or higher in ECE 460.
Prerequisite(s) enforced by registration system.

**Schedule Type:** LEC
**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0
**When Offered:** Spring
ECE 465 - Computer Networking Protocols

Credits: 3
Limited to 2 Attempts
Offered by Electrical and Computer Engineering
Introduces computer networking protocols and concepts, emphasizing Internet and Internet Protocol Suite. Covers computer networking protocols at application, transport, and network layers, including multimedia networking protocols, and network security and management.

Prerequisite(s): C or higher in (STAT 346 or STAT 344) and (CS 222 or CS 211).
Prerequisite(s) enforced by registration system.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

ECE 467 - Network Implementation Laboratory

Credits: 1
Limited to 2 Attempts
Offered by Electrical and Computer Engineering
Hands-on experience in implementing, configuring, and operating local and wide area networks in live laboratory environment equipped with modern local and wide area network devices and technologies. Students exposed to real-world computer networking scenarios including local area network implementation, asynchronous communication setup, and wide area network implementation using various protocols and technologies covering all layers of computer network protocol stack.

Prerequisite(s): C or higher in ECE 462.
Prerequisite(s) enforced by registration system.

Corequisite(s): ECE 465.

Schedule Type: LAB
Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 3
When Offered: Fall, Spring

ECE 469 - Microwave Circuit Laboratory

Credits: 1
Limited to 2 Attempts
Offered by Electrical and Computer Engineering
Introduces microwave engineering laboratory techniques and measurements, and the design, fabrication, and test of microwave microstrip circuits.

Prerequisite(s): ECE 305 and 334.
Schedule Type: LAB
Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 2
ECE 470 - Introduction to Humanoid Robotics

Credits: 3
Limited to 2 Attempts
Offered by Electrical and Computer Engineering
Covers basic robot architecture with a focus on humanoid robotics. Topics include mechanical design philosophies, electrical design philosophies, and controller design of high DOF systems. Simulation of various parts and functionalities of humanoids culminates in a term project, which includes hardware demonstrations.

Prerequisite(s): C or higher in CS 112, (ECE 280 or ECE 285 or BENG 380), ((ECE 331 and ECE 332) or (ECE 301)).
Prerequisite(s) enforced by registration system.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

ECE 491 - Engineering Seminar

Credits: 1
Limited to 2 Attempts
Offered by Electrical and Computer Engineering
Engineering ethics, professionalism, role of engineer in society, current topics, and employment opportunities.

Fulfills writing intensive requirement in the major.

Equivalent to BENG 491

Prerequisite(s): 90 credits applicable to electrical engineering or computer engineering program, and C or higher in COMM 100.
Prerequisite(s) enforced by registration system.

Notes: Students cannot receive credit for both ECE 491 and BENG 491.

Schedule Type: SEM
Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

ECE 492 - Senior Advanced Design Project I

Credits: 1
Limited to 2 Attempts
Offered by Electrical and Computer Engineering

Conception of senior design project and determination of feasibility of proposed project. Work includes developing preliminary
design and implementation plan. Students planning to use microcontroller technology in their projects should enroll in ECE 447 before taking ECE 493.

Fulfills Mason Core requirement in synthesis.

Prerequisite(s): 90 credits applicable to electrical engineering or computer engineering program and C or higher in COMM 100 and ENGH 302. Prerequisite(s) enforced by registration system.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

ECE 493 - RS: Senior Advanced Design Project II

Credits: 2  
Limited to 2 Attempts  
Offered by Electrical and Computer Engineering

Implementation of project for which preliminary work was done in ECE 492. Project includes designing and constructing hardware, writing required software, conducting experiments or studies, and testing complete system. Requires oral and written reports during project and at completion.

Fulfills Mason Core requirement in synthesis.

Designated as a research and scholarship intensive course.

Prerequisite(s): C or higher in ECE 492, preferably in preceding semester. Prerequisite(s) enforced by registration system.

Notes: Students planning to use microcontroller technology in their projects should enroll in ECE 447 before taking ECE 493.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

ECE 498 - Independent Study in Electrical and Computer Engineering

Credits: 1-3  
Repeatable within Term for Credit  
Offered by Electrical and Computer Engineering  
Directed self-study of special topics of current interest in ECE. Topic must be arranged with an instructor and approved by department chair before registering.
Notes: Maximum 3 credits.

Schedule Type: IND
Hours of Lecture or Seminar per week: 1-9
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

ECE 499 - Special Topics in Electrical Engineering

Credits: 0-4
Repeatable within Term for Credit
Offered by Electrical and Computer Engineering
Topics of special interest to undergraduates.

Prerequisite(s): Permission of instructor; specific prerequisites vary with nature of topic.
Notes: May be repeated for maximum of 6 credits if topics substantially different.

Schedule Type: LAB, LEC
Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

ECE 507 - Seminar in Emerging Technologies

Credits: 3
Not Repeatable for Credit
Offered by Electrical and Computer Engineering
Study of emerging technologies, how they are identified, how they evolve, actions which may encourage or stifle their growth, government influences, societal influences, examples of success and failure, and some lessons to be learned which are unique to government information technology. Topics covered will include a general introduction to emerging technologies, with emphasis on IT, discussion of difficulty in letting go of legacy systems, the DOD Global Information Grid, Cyberwarfare, Complex Adaptive Systems, and Federal Government support of Research and Development. Cannot be used in the PhD IT program.

Prerequisite(s): Graduate Standing.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

ECE 510 - Real-Time Concepts

Credits: 3
Not Repeatable for Credit
Offered by Electrical and Computer Engineering
Presents design methodology, principles and practice for the development of real-time embedded systems and their application to robotics, mechatronics, sensing, signal processing, and control. Topics include system decomposition, multi-tasking, task
communication and synchronization, system modeling, time analysis, principles of filter and controller implementation, 'fuzzy' engineering, and multi-microcontroller systems.

**Prerequisite(s):** ECE 450 or ECE 447 or permission of instructor.
**Schedule Type:** LEC
**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0
**When Offered:** Fall, Spring.

---

**ECE 511 - Microprocessors**

Credits: 3
Not Repeatable for Credit
Offered by Electrical and Computer Engineering
Introduces microprocessor software and hardware architecture. Includes fundamentals of microprocessor system integration, instruction set design, programming memory interfacing, input/output, direct memory access, interrupt interfacing, and microprocessor architecture evolution. Studies Intel family of microprocessors, and reviews other microprocessor families and design trends.

**Prerequisite(s):** ECE 445 or equivalent.
**Schedule Type:** LEC
**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0

---

**ECE 513 - Applied Electromagnetic Theory**

Credits: 3
Not Repeatable for Credit
Offered by Electrical and Computer Engineering
Maxwell's Equations, electromagnetic wave propagation, wave guides, transmission lines, radiation, and antennas.

**Prerequisite(s):** ECE 305 or equivalent.
**Schedule Type:** LEC

---

**ECE 521 - Modern Systems Theory**

Credits: 3
Not Repeatable for Credit
Offered by Electrical and Computer Engineering
Introduces linear systems theory and design of linear feedback control systems. Reviews linear algebra, state variables, state-space description of dynamic systems, analysis of continuous-time and discrete-time linear systems, controllability and observability of linear systems, and stability theory.

**Prerequisite(s):** ECE 421.
**Schedule Type:** LEC
**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0
ECE 528 - Introduction to Random Processes in Electrical and Computer Engineering

Credits: 3
Not Repeatable for Credit
Offered by Electrical and Computer Engineering
Probability and random processes are fundamental to communications, control, signal processing, and computer networks. Provides basic theory and important applications. Topics include probability concepts and axioms; stationarity and ergodicity; random variables and their functions; vectors; expectation and variance; conditional expectation; moment-generating and characteristic functions; random processes such as white noise and Gaussian; autocorrelation and power spectral density; linear filtering of random processes, and basic ideas of estimation and detection.

Prerequisite(s): ECE 220 and STAT 346, or permission of instructor.
Schedule Type: LEC, RCT
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ECE 530 - Sensor Engineering

Credits: 3
Not Repeatable for Credit
Offered by Electrical and Computer Engineering
Presents the fundamentals of sensor characteristics and transfer functions, sensor circuits and interfacing, sensor noise, and protection methods. Studies of different methods used in sensing position, motion, acceleration, force, humidity, temperature, chemicals, etc. are developed, followed by an analysis of specific sensor designs.

Prerequisite(s): Graduate Standing, or permission from instructor.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

ECE 531 - Introduction to Wireless Communications and Networks

Credits: 3
Not Repeatable for Credit
Offered by Electrical and Computer Engineering
Presents the basics of modern wireless communications and wireless networking at the first-year graduate level. Topics include wireless signal design, channel characterization, receiver structure, multiple access technologies, cellular concepts, capacity enlargement, mobility management, and wireless/wireless interworking.

Prerequisite(s): ECE 460 or equivalent
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall
ECE 535 - Digital Signal Processing

Credits: 3
Not Repeatable for Credit
Offered by Electrical and Computer Engineering
Representation analysis and design of digital signals and systems. Covers sampling and quantization, z-transform and discrete Fourier transform, digital filter realizations, design techniques for recursive and non-recursive filters, fast Fourier transform algorithms, and spectral analysis. Additional topics may include adaptive filtering, homomorphic digital signal processing, digital interpolation and decimation.

Prerequisite(s): ECE 320 and STAT 346.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

ECE 537 - Introduction to Digital Image Processing (DIP)

Credits: 3
Not Repeatable for Credit
Offered by Electrical and Computer Engineering
First course in digital-image processing; introduces scanning systems, focal plane array detectors, data acquisition methods, display hardware, image preprocessing algorithms, feature extraction, and basic image processing methods. Semester-long image processing project includes utilizing modern image processing system prototyping software.

Prerequisite(s): Graduate standing.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ECE 538 - Medical Imaging

Credits: 3
Not Repeatable for Credit
Offered by Electrical and Computer Engineering
Provides an introduction to the physical, mathematical and engineering foundations of modern medical imaging systems, medical image processing and analysis methods. In addition, this course introduces engineering students to clinical applications of medical imaging. The emphasis is on diagnostic ultrasound and magnetic resonance imaging methods, although several other modalities are covered. The course also provides an overview of recent developments and future trends in the field of medical imaging, discusses some of the challenges and controversies, and involves hands-on experience applying the methods learned in class to real-world problems.

Equivalent to BENG 538

Prerequisite(s): Graduate Standing or permission of instructor; ECE 320 or equivalent; PHYS 262 or equivalent.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
ECE 542 - Computer Network Architectures and Protocols

Credits: 3  
Not Repeatable for Credit  
Offered by Electrical and Computer Engineering  
Introduction to architectures and protocols of computer networks and concept of packet switching. Topics include ISO standard layer model, physical interfaces and protocols, data link control, multiaccess techniques, packet switching, routing and flow control, network topology, data communication subsystems, error control coding, local area network, satellite packet broadcasting, packet radio, interconnection of packet-switching networks, network security and privacy, and various examples of computer networks.

Prerequisite(s): STAT 344 or equivalent, and graduate standing in VSITE.  
Schedule Type: LEC  
Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0  
When Offered: Fall, Spring, Summer

ECE 545 - Digital System Design with VHDL

Credits: 3  
Not Repeatable for Credit  
Offered by Electrical and Computer Engineering  
Introduction to the design of complex digital systems using hardware description languages. Emphasizes the design methodology based on the partitioning of a digital system into a datapath and control unit. Introduces a clear sequence of steps leading from specification to synthesizable, register transfer level (RTL), and fully verified HDL code. Covers VHDL for digital circuit design, including dataflow, structural, and behavioral coding styles. Introduces and illustrates the concepts of VHDL simulation, verification, synthesis, mapping, placing, routing, timing analysis and performance optimization. Requires semester long project devoted to the design of a complex digital system using VHDL as a hardware description language and FPGA as an implementation platform.

Prerequisite(s): Graduate standing.  
Schedule Type: LEC  
Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0

ECE 548 - Sequential Machine Theory

Credits: 3  
Not Repeatable for Credit  
Offered by Electrical and Computer Engineering  
Theoretical study of sequential machines. Topics include sets, relations and lattices, switching algebra, functional decomposition, iterative networks, representation, minimization and transformation of sequential machines, state identification, state recognizers, and linear and stochastic sequential machines.
Prerequisite(s): ECE 331, or permission of instructor.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring

ECE 550 - System Engineering Design

Credits: 3
Not Repeatable for Credit
Offered by Electrical and Computer Engineering
System engineering design methods are studied and practiced, including object-oriented and structured analysis based techniques. Design Description languages such as UML, SysML, IDEF0 and IDEF1x are introduced and used in carrying out complete system designs. Teams make presentations of their designs.

Equivalent to SYST 520.

Prerequisite(s): Graduate Standing.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

ECE 565 - Introduction to Optical Electronics

Credits: 3
Not Repeatable for Credit
Offered by Electrical and Computer Engineering
Introduces optoelectronic devices for generation, detection, and modulation of light. Topics include electro-optic modulators, gas, solid state and semiconductor lasers, photodetectors, and detector arrays.

Prerequisite(s): ECE 305 and 333.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ECE 567 - Optical Fiber Communications

Credits: 3
Not Repeatable for Credit
Offered by Electrical and Computer Engineering
Studies components and integration of fiber-optic transmission systems. Topics include optical fibers, signal degradation, optical sources, power launching and coupling, photodetectors, receiver circuits, link analysis, and optical measurements.

Prerequisite(s): ECE 565 or permission of instructor.
Schedule Type: LEC
ECE 584 - Semiconductor Device Fundamentals

Credits: 3
Not Repeatable for Credit
Offered by Electrical and Computer Engineering
Studies principals of operation of semiconductor devices based on solid state physics. Topics include band theory of solids, intrinsic and extrinsic semiconductor properties, pn junction diode, bipolar junction transistor, Schottky diode, metal insulator semiconductor junctions, field-effect transistors, and hetero-structures.

Prerequisite(s): ECE 430 or permission of instructor.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

ECE 586 - Digital Integrated Circuits

Credits: 3
Not Repeatable for Credit
Offered by Electrical and Computer Engineering
Studies design and analysis of digital integrated circuits, emphasizing CMOS technology. Reviews MOSFET operation and SPICE modeling. Covers analysis and design of basic inverter circuits, structure and operation of combinational and sequential logic gates, dynamic logic circuits, chip I/O circuits, and brief introduction to VLSI methodologies.

Prerequisite(s): ECE 331 and 430, or permission of instructor.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

ECE 587 - Design of Analog Integrated Circuits

Credits: 3
Not Repeatable for Credit
Offered by Electrical and Computer Engineering
Studies design methodologies of CMOS-based analog integrated circuits. Topics include differential amplifiers, current sources, output stages, operational amplifiers, comparators, frequency response, noise, and computer-aided design.

Prerequisite(s): ECE 333 and 430, or permission of instructor.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall
ECE 590 - Selected Topics in Engineering

Credits: 3
Repeatable within Term for Credit
Offered by Electrical and Computer Engineering
Selected topics from recent developments, and applications in various engineering disciplines. Designed to help professional engineering community keep abreast of current developments.

Prerequisite(s): Graduate standing or permission of department.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ECE 611 - Advanced Microprocessors

Credits: 3
Not Repeatable for Credit
Offered by Electrical and Computer Engineering
Covers principles of advanced 32-bit and 64-bit microprocessors. Includes microprocessor structure and architecture, pipeline hazards, instruction-level parallelism, superscalar and superpipelined execution, thread-level parallelism; and RISC principles and advantages. Offers examples of RISC-type microprocessors. Studies in detail Intel IA-32, Intel and HP IA-64, and Motorola M68000 families.

Prerequisite(s): ECE 511 or permission of instructor.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ECE 612 - Real-Time Embedded Systems

Credits: 3
Not Repeatable for Credit
Offered by Electrical and Computer Engineering
Study of real-time operating systems and device drivers for embedded computers. Emphasizes microprocessor systems and associated input device sampling strategies, including interrupt driven and polled I/O. Covers basic input/output operations, analog to digital conversion methods, I/O programming techniques and process, and communication control methodologies. Involves design project.

Prerequisite(s): ECE 511 or permission of instructor.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ECE 620 - Optimal Control Theory
Detailed treatment of optimal control theory and its applications. Topics include system dynamics and performance criteria, calculus of variations and Pontryagin's minimum principle, computational methods in optimal control, and applications of optimal control.

Prerequisite(s): ECE 521 or permission of instructor.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ECE 621 - Systems Identification

Prerequisite(s): ECE 521 and 528, or permission of instructor.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ECE 624 - Control Systems

Analysis, design, and implementation of digital feedback control systems. Topics include discrete-time models, pole-placement, controller design methods, MIMO system decoupling, and observer design.

Prerequisite(s): ECE 421 and 521, or permission of instructor.
Notes: Course may include simulation and design project.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ECE 630 - Statistical Communication Theory

Course may include simulation and design project.
Introduces optimum receiver design in the additive white Gaussian noise environment. Topics include efficient signal set design, modulation techniques, matched filter, correlation detector, coherent and noncoherent detections, fading and diversity channels, random amplitude and phase, diversity techniques, performance bounds of communications, and waveform communications.

**Prerequisite(s):** ECE 528.
**Schedule Type:** LEC
**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0

### ECE 633 - Coding Theory

Credits: 3  
Not Repeatable for Credit  
Offered by Electrical and Computer Engineering  
Mathematics of coding groups, rings, and fields, and polynomial algebra. Topics include linear block codes, generator and parity check matrices; error syndromes, binary cyclic and convolutional codes; and implementation of encoders and decoders.

**Prerequisite(s):** ECE 528 or permission of instructor  
**Schedule Type:** LEC  
**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

### ECE 635 - Adaptive Signal Processing

Credits: 3  
Not Repeatable for Credit  
Offered by Electrical and Computer Engineering  
Introduces adaptive systems and adaptive signal processing. Topics include correlation functions and matrices; performance functions; search of minimum; steepest descent and Newton algorithms; least mean squares algorithm; noise perturbed search and misadjustment; sequential regression algorithm and convergence issues; recursive least squares algorithm and forgetting factor; frequency domain algorithms; adaptive equalization; pseudorandom binary sequences and system identification; adaptive interference cancellation; and adaptive beam forming and arrays. Simulates adaptive algorithms.

**Prerequisite(s):** ECE 528.  
**Schedule Type:** LEC  
**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

### ECE 641 - Computer System Architecture

Credits: 3  
Not Repeatable for Credit  
Offered by Electrical and Computer Engineering  
Advanced course in computer architecture. Covers definitions, multiple processors, VLSI architecture, data flow, computation, semantic gap, high-level language architecture, object-oriented design, RISC architecture, and current trends in computer architecture.
Prerequisite(s): ECE 511 or permission of instructor.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**ECE 642 - Design and Analysis of Computer Communication Networks**

Credits: 3
Not Repeatable for Credit
Offered by Electrical and Computer Engineering
Introduces queuing theory. Other topics include concentrator design, multiplexing, capacity assignments, random access schemes, polling and probing techniques, topology design, flow control and routing, packet radio, protocol specification, and validation.

Prerequisite(s): ECE 542 and 528, or equivalent.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**ECE 643 - Network Switching and Routing**

Credits: 3
Not Repeatable for Credit
Offered by Electrical and Computer Engineering
Fundamentals of switching and routing with application to communications networks, both wireline and wireless. Topics include concepts of space and time for switching and forwarding of data, scalability and performance, label swapping, algorithms for routing and path computation, constrained route optimization, traffic theory, control and signaling, and traffic engineering. The course also covers the concepts and issues underlying the design and implementation of the contemporary switched networks.

Prerequisite(s): ECE 528 and 542
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**ECE 645 - Computer Arithmetic**

Credits: 3
Not Repeatable for Credit
Offered by Electrical and Computer Engineering
Covers computer arithmetic as applied to the design of general-purpose microprocessors and application-specific integrated circuits for cryptography, coding, and digital signal processing. Focuses on efficient implementations of all basic arithmetic operations in three major domains: integers, real numbers, and elements of Galois Fields GF(2^n). Illustrates tradeoffs among various hardware algorithms and architectures depending on primary optimization criteria, such as speed, area, and power consumption. Demonstrates the use of software implementations as a source of test vectors for verification of hardware implementations and for evaluating hardware versus software speed-up.

Prerequisite(s): ECE 545 or permission of instructor.
ECE 646 - Cryptography and Computer Network Security

Credits: 3  
Not Repeatable for Credit  
Offered by Electrical and Computer Engineering  
Topics include need for security services in computer networks, basic concepts of cryptology, historical ciphers, modern symmetric ciphers, public key cryptography (RSA, elliptic curve cryptosystems), efficient hardware and software implementations of cryptographic primitives, requirements for implementation of cryptographic modules, data integrity and authentication, digital signature schemes, key exchange and key management, standard protocols for secure mail, the web and electronic payments, security aspects of mobile communications, key escrow schemes, zero-knowledge identification schemes, smart cards, quantum cryptography, and quantum computing.

Prerequisite(s): ECE 542 or permission of instructor.

Schedule Type: LEC  
Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0

ECE 650 - Robotics

Credits: 3  
Not Repeatable for Credit  
Offered by Electrical and Computer Engineering  
Introduces robotics and advanced automation from electrical engineering standpoint. Topics include hardware overview; coordinate systems and manipulator kinematics; differential motion and inverse Jacobian; manipulator path control and motion planning; design and control of articulated hands; sensory feedback; machine vision; and applications to industrial automation.

Prerequisite(s): ECE 521 or permission of instructor.

Schedule Type: LEC  
Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0

ECE 652 - Mobile Robots

Credits: 3  
Not Repeatable for Credit  
Offered by Electrical and Computer Engineering  
Treats kinematic modeling of mobile robots with wheels, steering control, navigation and remote sensing. GPS as well as inertial navigation discussed. Kalman filtering applied to state estimation of robot position and attitude and also applied to estimation of the location of detected objects. Target tracking is developed for repeated observations of a detected object as well as simultaneous tracking of multiple objects.

Prerequisite(s): ECE 521 and ECE 528 or permission of instructor.

Schedule Type: LEC
**ECE 670 - Principles of C4I**

Credits: 3  
Not Repeatable for Credit  
Offered by Electrical and Computer Engineering  
Provides broad introduction to fundamental principles of command, control, communication, computing, and intelligence (C4I). Applies principles, techniques to wide range of civilian and military situations. Discusses modeling, simulation of combat operations; studies sensing, fusion, and situation assessment processes. Derives optimal decision-making rules. Discusses concepts of C4I architectures and tools to evaluate and design systems such as queuing theory.

**Prerequisite(s):** ECE 528 or SYST 611 or OR 542, or equivalent.  
**Schedule Type:** LEC  
**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**ECE 673 - Discrete Event Systems**

Credits: 3  
Not Repeatable for Credit  
Offered by Electrical and Computer Engineering  
Introduces modeling and analysis of discrete event dynamical systems. Course covers elements of discrete mathematics and then focuses on Petri Net models and their basic properties. Relation to other discrete event models of dynamical systems.

Equivalent to SYST 620.

**Prerequisite(s):** ECE 521, or SYST 611 or permission of instructor.  
**Schedule Type:** LEC  
**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**ECE 674 - System Architecture Design**

Credits: 3  
Not Repeatable for Credit  
Offered by Electrical and Computer Engineering  
Architecture design and representation and the methodologies used to obtain them. Approaches based on system engineering constructs such as object orientation and service oriented architectures are used to design architectures and then represent them in conformance with an architecture framework such as DoDAF. Executable models of the architecture are derived to be used for architecture evaluation. Examples from current practice are used.

Equivalent to SYST 621.

**Prerequisite(s):** ECE 550
ECE 675 - System Integration and Arch. Evaluation

Credits: 3
Not Repeatable for Credit
Offered by Electrical and Computer Engineering

Equivalent to SYST 622.

Prerequisite(s): ECE 674

ECE 680 - Physical VLSI Design

Credits: 3
Not Repeatable for Credit
Offered by Electrical and Computer Engineering

Introduces NMOS, CMOS, and BiMOS integrated circuit technology and fabrication. Reviews MOS and BiCMOS inverter structures and operation, MOS and BiCMOS circuit design processes, MOS layers, stick diagrams, design rules, and layout. Covers subsystem design and layout illustration of design process through design of 4bit arithmetic processor and its parts, adder, multiplier, register, and memory cells; and aspects of system timing, test and testability. Reviews currently available VLSI CAS tools.

Prerequisite(s): ECE 586 or permission of instructor.

ECE 681 - VLSI Design for ASICs

Credits: 3
Not Repeatable for Credit
Offered by Electrical and Computer Engineering

Introduces VLSI design of application-specific integrated circuits (ASICs) from front-end to back-end using HDL and modern design automation software. Covers simulation, synthesis of digital circuits using standard cells, static timing analysis, formal verification, power analysis, test generation/fault simulation, and physical design including floor planning, placement, routing, and design rule checking. Addresses deep submicron CMOS scaling issues and other advanced topics.

Prerequisite(s): ECE 545, or permission of instructor.
Corequisite(s): ECE 586

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ECE 682 - VLSI Test Concepts

Credits: 3
Not Repeatable for Credit
Offered by Electrical and Computer Engineering
Broad introduction to basic concepts, techniques, and tools of modern VLSI testing. Fundamentals of defect modeling, fault
simulation, design for testability, built-in self-test techniques, and failure analysis. Test economics, physical defects and fault
modeling, automated test pattern generation, fault simulation, design for test, built-in self test, memory test, PLD test, mixed-
signal test, Iddq test, boundary scan and related standards, test synthesis, diagnosis and failure analysis, automated test
equipment, embedded core test.

Prerequisite(s): ECE 586
Schedule Type: LAB,
LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ECE 684 - MOS Device Electronics

Credits: 3
Not Repeatable for Credit
Offered by Electrical and Computer Engineering
Study of Metal Oxide Semiconductor (MOS)-based device theory, characteristics, models, and limitations. Topics include MOS
capacitor, MOSFETs, CMOS, charge coupled devices, scaling, hot carrier effects, latchup, radiation effects, and isolation
techniques.

Prerequisite(s): ECE 584 or permission of instructor.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ECE 685 - Nanoelectronics

Credits: 3
Not Repeatable for Credit
Offered by Electrical and Computer Engineering
Emphasizes the fundamental concepts and principles that govern the operation of nano-electronic devices (100 nm down to 1
nm.). Addresses basic device building blocks such as quantum dot (QD), single electron tunneling transistor (SETT), carbon
nanotube (CNT), nanowire, etc. Considers the design and analysis of a variety of nano-devices ("quantum" or "mesoscopic"
deVICES) and examine some notable applications.
Prerequisite(s): ECE 584
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

ECE 698 - Independent Reading and Research

Credits: 1-3
Repeatable within Degree for Credit
Offered by Electrical and Computer Engineering
Independent study under the supervision of a faculty member, resulting in an acceptable technical report. No more than a combined total of 3 credits may be taken towards satisfying the master's degree, although students may register for more credits. No more than a combined total of 3 credits may be taken of ECE 698 and ECE 798 towards satisfying the master's degree, although students may register for more credits. Students may not count both ECE 799 and ECE 698 for master's credit.

Prerequisite(s): Graduate standing, completion of at least two core courses, and permission of instructor.
Notes: Requires written report. May be taken no more than twice for graduate credit.

Schedule Type: IND
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ECE 699 - Advanced Topics in Electrical and Computer Engineering

Credits: 1-6
Repeatable within Term for Credit
Offered by Electrical and Computer Engineering
Advanced topics of current interest in electrical and computer engineering. Topics chosen so they do not duplicate other courses in department. Active participation encouraged in form of writing and presenting papers in research areas.

Prerequisite(s): Permission of instructor.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ECE 721 - Nonlinear Systems

Credits: 3
Not Repeatable for Credit
Offered by Electrical and Computer Engineering
Includes motivating examples; analysis techniques include basic fixed-point theory, implicit function theorem, and dependence of trajectories on initial data and parameters. Also covers computational simulation techniques; stability theory including Lyapunov's direct method; nonlinear control systems of input-output and absolute stability; strong positive real transfer functions; feedback linearization of nonlinear systems; nonlinear canonical forms; nonlinear decoupling; sliding control; and applications to adaptive control, neural networks, and robotics.
ECE 722 - Kalman Filtering with Applications

Credits: 3
Not Repeatable for Credit
Offered by Electrical and Computer Engineering
Detailed treatment of Kalman Filtering Theory and its applications, including some aspects of stochastic control theory. Topics include state-space models with random inputs, optimum state estimation, filtering, prediction and smoothing of random signals with noisy measurements, all within the framework of Kalman filtering. Additional topics are nonlinear filtering problems, computational methods, and various applications such as global positioning system, tracking, system control, and others. Stochastic control problems include linear-quadratic-Gaussian problem and minimum-variance control.

Prerequisite(s): ECE 521 and 528 or equivalent, or permission of instructor.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ECE 728 - Random Processes in Electrical and Computer Engineering

Credits: 3
Not Repeatable for Credit
Offered by Electrical and Computer Engineering
Recommended for advanced master's and doctoral students. Provides background in random processes needed for pursuing graduate studies and research in statistical signal processing, communications, control, and computer networks. Covers probability spaces, random variables, Lebesque integration, conditional mean on a sigma field, convergence of random variables, limit and ergotic theorems, Markov processes, and Martingales.

Prerequisite(s): ECE 528 or permission of instructor.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

ECE 731 - Digital Communications

Credits: 3
Not Repeatable for Credit
Offered by Electrical and Computer Engineering
Digital transmission of voice, video, and data signals. Covers signal digitization, pulse code modulation, delta modulation, low bit-rate coding, multiplexing, synchronization, intersymbol interference, adaptive equalization, frequency spreading, encryption,
transmission codes, digital transmission using band-width compression techniques, and satellite communications.

Prerequisite(s): ECE 630 or equivalent.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ECE 732 - Mobile Communication Systems

Credits: 3
Not Repeatable for Credit
Offered by Electrical and Computer Engineering
Topics include modeling of mobile communication channel, signal set and receiver design for mobile communication channel, access and mobility control, mobile network architectures, connection to fixed network, and signaling protocols for mobile communication systems. Examples of mobile communication systems are presented, including pan-European GSM, North American D-AMPS, and personal communication systems.

Prerequisite(s): ECE 542 and 630.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ECE 734 - Detection and Estimation Theory

Credits: 3
Not Repeatable for Credit
Offered by Electrical and Computer Engineering
Introduces detection and estimation theory with communication and radar and sonar applications. Topics include classical detection and estimation theory, detection of known signals in Gaussian noise, signal parameter and linear waveform estimation, and Wiener and Kalman filters.

Equivalent to IT 830

Prerequisite(s): ECE 528.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ECE 738 - Advanced Digital Signal Processing

Credits: 3
Not Repeatable for Credit
Offered by Electrical and Computer Engineering
Theory and practice of advanced digital signal processing techniques. Topics may include efficient high-speed algorithms for convolution, correlation, orthogonal transforms, multirate processing of digital signals, multiresolution time-frequency and time-scale analysis of one- and two-dimensional signals, and multitaper spectral estimation.
ECE 740 - Digital Signal Processing Hardware Architectures

Credits: 3
Not Repeatable for Credit
Offered by Electrical and Computer Engineering
Addresses topics that include high-level DSP optimizations, such as pipelining, unfolding, and parallel processing; common DSP structures such as FFTs, filters, direct digital frequency synthesizers, and correlators; modeling of DSP algorithms in MATLAB and conversion of MATLAB models into fixed-point VHDL blocks; platform implementation issues: hardware vs. software, FPGA vs. ASIC, power, area, throughput, and applications of DSP hardware.

Prerequisite(s): ECE 535 and ECE 545 or equivalents or permission of instructor.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

ECE 741 - Wireless Networks

Credits: 3
Not Repeatable for Credit
Offered by Electrical and Computer Engineering
Theoretical foundation and practice in design of wireless networks. Emphasizes mobility and teletraffic modeling aspects, and networking issues and state-of-the-art performance evaluation methods of radio and system infrastructure applicable to wireless cellular and local networks. Topics include analysis of mobility, handoff, control traffic loading, resource allocation techniques, multiaccess protocols, admission policy and call control, network infrastructure and multilayer configuration, wireless LANs, and packet data systems.

Prerequisite(s): ECE 642 or equivalent.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ECE 742 - High-Speed Networks

Credits: 3
Not Repeatable for Credit
Offered by Electrical and Computer Engineering
Theories for design, analysis and evaluation of high-speed networks including scalability, performance, and issues related to local area, metropolitan, and wide area networks. Includes architecture, protocols, and applications of high-speed networks; performance modeling of high-speed networks; flow control and routing; design issues for high-speed switches, interfaces, and controllers; all optical networks and their architectures; examples of high-speed computer networks and Internet working; video, imaging, and multimedia applications; software issues, robustness, and applications; and selected topics in current research areas
in high-speed computer networks.

Equivalent to IT 834

**Prerequisite(s):** ECE 528 and 642, or permission of instructor.

**Schedule Type:** LEC

**Hours of Lecture or Seminar per week:** 3

**Hours of Lab or Studio per week:** 0

---

**ECE 745 - ULSI Microelectronics**

Credits: 3

Not Repeatable for Credit

Offered by Electrical and Computer Engineering

Studies UltraLargeScaleIntegration (more than a million devices in a single chip) by considering limits of packing density, modeling of devices, and circuit topology. Semiconductor material and device physics imposed "second order effects" and limitations on deep submicron CMOS performance. Reliability studied through analytical (compact) modeling and numerical simulations. Presents and evaluates new ULSI technologies such as SOI CMOS.

**Prerequisite(s):** ECE 684.

**Schedule Type:** LEC

**Hours of Lecture or Seminar per week:** 3

**Hours of Lab or Studio per week:** 0

---

**ECE 746 - Advanced Applied Cryptography**

Credits: 3

Not Repeatable for Credit

Offered by Electrical and Computer Engineering

Discusses complex cryptographic algorithms and their implementations in software and hardware. Provides mathematical background necessary to understand, implement, and break modern cryptoalgorithms. Covers implementations of cryptosystems using smart cards, network processors, and other platforms. Discusses side channel attacks against implementations of cryptography, including timing attacks, power analysis, fault analysis, cache attacks, etc. Introduces advanced topics, such as random and pseudorandom number generators, secret sharing, zero-knowledge, and quantum cryptography. Requires a semester-long project devoted to implementation of selected algorithms or protocols in software or hardware, and/or comparative analysis of various algorithms, protocols, or implementations.

**Prerequisite(s):** ECE 646 or permission of instructor.

**Schedule Type:** LEC

**Hours of Lecture or Seminar per week:** 3

**Hours of Lab or Studio per week:** 0

---

**ECE 747 - Cryptographic Engineering**

Credits: 3

Not Repeatable for Credit

Offered by Electrical and Computer Engineering
Discusses efficient implementations of cryptographic algorithms and protocols in hardware and software, ranging from high-performance to low-power, as well as resistance to side-channel and fault attacks. Covers code breaking algorithms and practical implementations of side-channel attacks. Introduces research techniques. Requires semester-long project devoted to study of a cryptographic engineering problem, including a comprehensive literature review, problem definition, and research plan.

Prerequisite(s): ECE 646 or permission of instructor.

Notes: Course will be partially lecture style, partially seminar. Students will give hour long, in depth presentations on their research topics.

Schedule Type: SEM
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring

ECE 751 - Information Theory

Credits: 3
Not Repeatable for Credit
Offered by Electrical and Computer Engineering
Introduces information theory, which is mathematical theory of communication systems. Topics include measures of information such as entropy, relative entropy, and mutual information; Shannon-McMillan-Breiman theorem and applications to data compression; entropy rate and source coding theorem; Huffman, arithmetic and Lempel-Ziv codes; method of types, channel capacity, and channel-coding theorem; joint source-channel coding theorem; differential entropy; Gaussian channel; rate distortion theory; and vector quantization.

Equivalent to IT 886

Prerequisite(s): ECE 528 or permission of instructor.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ECE 754 - Optimum Array Processing I

Credits: 3
Not Repeatable for Credit
Offered by Electrical and Computer Engineering

Prerequisite(s): ECE 528 and ECE 535.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ECE 780 - Radio Frequency Electronics
Credits: 3
Not Repeatable for Credit
Offered by Electrical and Computer Engineering
This course addresses the design of electronic building blocks for radio frequency (RF) microelectronic circuits. Topics include trade-offs in RF design, transceiver architectures, low-noise amplifiers, mixers, oscillators, frequency-synthesizers, phase-locked loops, and power amplifiers.

Equivalent to IT 845

Prerequisite(s): ECE 587 and 684, or permission of instructor.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ECE 795 - Engineering Seminar

Credits: 0
Repeatable within Degree for Credit
Offered by Electrical and Computer Engineering
Fulfills seminar requirement for MS in electrical and computer engineering programs. Invited speakers, faculty, and ECE graduate students lecture on current topics and research.

Prerequisite(s): Graduate standing.
Notes: Students must enroll in ECE 795 the final semester they file to graduate. Once the department verifies that the seminar requirement has been met, a grade of S (satisfactory) will be submitted. Students who have not met the seminar requirement in their final semester must continue to register for ECE 795 in subsequent semesters until the requirement is met.

Schedule Type: SEM
Grading: Graduate Special.
When Offered: Fall, Summer, Spring

ECE 797 - Scholarly Paper

Credits: 0
Repeatable within Degree for Credit
Offered by Electrical and Computer Engineering
Student must develop a rigorous, technical report (called Scholarly Paper) on a topic of current interest in Electrical and Computer Engineering and make an oral presentation of this report. Students fulfill this requirement through and individual project in a 600-level or above ECE graduate course.

Prerequisite(s): Completed 18 credit hours of graduate work.
Schedule Type: SEM
Grading: Graduate Special.
When Offered: Fall, Summer, Spring

ECE 798 - Research Project
Credits: 1-6
Repeatable within Degree for Credit
Offered by Electrical and Computer Engineering
Student must complete a one-semester long research project on an ECE technical topic under the guidance of a faculty advisor, and write a research report that will be presented as a departmental seminar.

Prerequisite(s): Completed 18 credit hours of graduate work.
Notes: No more than a combined total of 3 credits may be taken towards satisfying the master's degree, although students may register for more credits. No more than a combined total of 3 credits may be taken of ECE 698 and ECE 798 towards satisfying the master's degree, although students may register for more credits. Students may not count both ECE 799 and ECE 798 for master's degree.

Schedule Type: IND
Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 0
Grading: Graduate Special
When Offered: Fall, Spring, Summer

ECE 799 - Master's Thesis

Credits: 1-6
Repeatable within Degree for Credit
Offered by Electrical and Computer Engineering
Research project chosen and completed under guidance of graduate faculty member that results in technical report and oral defense acceptable to thesis committee of three faculty members.

Prerequisite(s): 9 graduate credits, and permission of instructor.
Schedule Type: IND
Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0
Grading: Satisfactory/No Credit

ECE 899 - Research Topics in ECE

Credits: 3
Repeatable within Degree for Credit
Offered by Electrical and Computer Engineering
Studies advanced research areas in Electrical and Computer Engineering within a course format. Students will develop specialized research skills, which will also involve the presentation of their own work, developed individually and within groups. This course may be repeated for credit if the research areas differ.

Prerequisite(s): Completion of at least one 600 or 700 level course in the Research Topic area; and permission of instructor.
Notes: This will be an irregularly scheduled course intended for advanced master's students who want to pursue a specific topic to more depth than a typical course offers at the master's level. It will prepare students to undertake their individual research topics when they move on to pursue a Ph.D. program, or enter a research environment in their chosen professional careers.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
ECE 998 - Doctoral Dissertation Proposal

Credits: 1-12
Repeatable within Degree for Credit
Offered by Electrical and Computer Engineering
Work on research proposal that forms basis for doctoral dissertation.

Notes: May be repeated. No more than 24 credits of ECE 998 and 999 may be applied to doctoral degree requirements.

Schedule Type: IND
Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0
Grading: Satisfactory/No credit only

ECE 999 - Doctoral Dissertation

Credits: 1-12
Repeatable within Degree for Credit
Offered by Electrical and Computer Engineering
Formal record of commitment to doctoral dissertation research under direction of ECE faculty member.

Prerequisite(s): Admission to candidacy.
Notes: May be repeated as needed. Students must complete minimum 12 credits of doctoral proposal (ECE 998) and doctoral dissertation research (ECE 999) Maximum of 24 credits of ECE 998 and 999 may be applied to degree. Students who choose to take less than 24 credits of ECE 998 and 999 may earn remaining credits from approved course work. Students cannot enroll in ECE 999 before research proposal accepted and approved by dissertation committee.

Schedule Type: IND
Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 1-12
Grading: Satisfactory/No credit only

Elementary/Secondary Education (EDCI)

Offered by the College of Education and Human Development

EDCI 370 - Young Adult Literature in Multicultural Settings

Credits: 3
Not Repeatable for Credit
Offered by Graduate School of Education
Examines literary works written for and about young adults, introduces critical issues surrounding teaching of young adult
literature in multiculturally diverse schools, and requires reading and review of young adult literature.

Notes: Significant online work is required.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDCI 372 - Teaching Mathematics in the Secondary School

Credits: 3
Not Repeatable for Credit
Offered by Graduate School of Education
Covers curricula, current issues, and research literature in secondary school mathematics. Emphasis is on developing different styles of teaching. Field experience is required for those seeking initial teacher licensure.

Corequisite(s): EDUC 422

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDCI 469 - Teaching English in Secondary School

Credits: 3
Not Repeatable for Credit
Offered by Graduate School of Education
Provides study of advanced methods, materials, content, and organization of English programs in secondary school.

Prerequisite(s): EDUC 422
Corequisite(s): EDUC 422

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDCI 472 - Advanced Methods for Teaching Mathematics in the Secondary School

Credits: 3
Not Repeatable for Credit
Offered by Graduate School of Education
Focuses on learning processes for mathematics. Introduces national and state standards regarding content and methodologies for teaching mathematics. Examines instructional methods and materials in relation to secondary mathematical content, curriculum, and assessment.

Prerequisite(s): EDCI 372, EDUC 422
Schedule Type: LEC
EDCI 473 - Teaching Science in the Secondary School

Credits: 3
Not Repeatable for Credit
Offered by Graduate School of Education
Builds fundamental knowledge of science teaching and learning including standards-based curriculum design and research-based teaching strategies.

Prerequisite(s): Admission to the Secondary Education Program.
Notes: School-based field experience required for those seeking initial teacher licensure.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDCI 479 - Advanced Methods of Teaching English in the Secondary School

Credits: 3
Not Repeatable for Credit
Offered by Graduate School of Education
Guides students in working effectively with national and local standards for teaching secondary English. Continuation course in methods from EDCI 469.

Prerequisite(s): EDCI 469.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDCI 483 - Advanced Methods of Teaching Science in Secondary School

Credits: 3
Not Repeatable for Credit
Offered by Graduate School of Education
Provides advanced study of teaching and curriculum development based on research and current issues. Emphasizes integrating science and technology, adapting instruction to needs of diverse learners, and promoting safety.

Prerequisite(s): EDCI 473.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
EDCI 490 - Student Teaching in Education

Credits: 6
Not Repeatable for Credit
Offered by Graduate School of Education
Provides intensive, supervised clinical experience in approved school for fall or spring semester.

Fulfills Mason Core requirement in synthesis.

Prerequisite(s): Completion of licensure and all endorsement course work
Schedule Type: INT
Hours of Lecture or Seminar per week: 6
Hours of Lab or Studio per week: 0
Grading: Undergraduate Special

EDCI 491 - Internship Seminar in Secondary Training

Credits: 2
Not Repeatable for Credit
Offered by Graduate School of Education

Focuses on critical reflection regarding effects of teacher actions others; develops skills as reflective practitioner; presents research-based rationales for instructional decision-making.

Prerequisite(s): Admission to the professional semester
Corequisite(s): EDCI 490
Schedule Type: SEM
Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

EDCI 510 - Linguistics for PreK-12 ESOL Teachers

Credits: 3
Not Repeatable for Credit
Offered by Graduate School of Education
Examines language as a system, with particular focus on teaching culturally and linguistically diverse students in grades PreK-12.
Considers teaching implications of phonology, morphology, syntax, semantics, and pragmatics. Requires 20 hours of PK-12 classroom fieldwork.

Prerequisite(s): EDUC 537 and EDRD 515.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
EDCI 511 - Developing Curriculum and Designing Instruction in Early Childhood Education

Credits: 3
Not Repeatable for Credit
Offered by Graduate School of Education
Covers procedures, materials, and organization of environments for young children.

Notes: Field experiences required for students without previous teaching or administrative experience in early childhood settings.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDCI 516 - Bilingualism and Language Acquisition Research

Credits: 3
Not Repeatable for Credit
Offered by Graduate School of Education
Examines research in first and second language acquisition, including interaction of bilingual person's two languages with application for the classroom. Requires 20 hours of PK-12 classroom fieldwork.

Prerequisite(s): EDUC 537 and EDRD 515. May be taken concurrently with EDRD 515.
Corequisite(s): EDCI 560

Notes: School-based field experience required.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
Grading: Graduate Special

EDCI 519 - Methods of Teaching Culturally & Linguistically Diverse Learners

Credits: 3
Not Repeatable for Credit
Offered by Graduate School of Education
Examines approaches, methods, and techniques for teaching culturally & linguistically diverse learners in bilingual & ESL classrooms, as well as resources available in the field. Critically analyzes and demonstrates teaching approaches based on second language acquisition research, including teaching language through content. Requires 20 hours of PK-12 classroom fieldwork.

Prerequisite(s): EDCI 516.
EDRD 515 and EDUC 537
Notes: Field experience in public schools required.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
Grading: Graduate Special
EDCI 520 - Assessment of Language Learners

Credits: 3
Not Repeatable for Credit
Offered by Graduate School of Education
Examines innovative approaches to assessing language learners. Topics include identification, placement, monitoring of student progress, development of authentic performance-based measures, design of portfolios, application of measurement concepts, analysis of assessment instruments, and linking assessments to instruction. Requires 20 hours of PK-12 classroom fieldwork.

Prerequisite(s): EDCI 519 or EDCI 560
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
Grading: Graduate Special

EDCI 521 - Curriculum Development for Language Learners

Credits: 3
Not Repeatable for Credit
Offered by Graduate School of Education
Examines current approaches to curriculum development for second language learners and language minority students. Participants review, evaluate, and develop curricular materials, with emphasis on learner-centered activities, cooperative learning, interdisciplinary and thematic approaches, authentic and problem-based learning, integration of language and content, and linking assessment and instruction.

Prerequisite(s): EDCI 516 and 519.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
Grading: Graduate Special

EDCI 544 - Curriculum and Methods of Teaching in Elementary Education

Credits: 3
Not Repeatable for Credit
Offered by Graduate School of Education
Introduction to general methods of teaching in elementary schools focusing on planning, teaching strategies, management, assessment, and differentiation.

Prerequisite(s): Admission into elementary education graduate program; must be taken in programmatic sequence.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
EDCI 545 - Assessment and Differentiation

Credits: 3
Not Repeatable for Credit
Offered by Graduate School of Education
Provides a research-based introduction to differentiated instruction for children in grades PK-6. Emphasis on the assessment of learners and differentiation of instruction to meet the needs of all learners.

Prerequisite(s): Admission into elementary education graduate program; must be taken in programmatic sequence.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDCI 546 - Integrating Technology in Elementary Classrooms: Literacy

Credits: 1
Not Repeatable for Credit
Offered by Graduate School of Education
Studies the development and integration of technology in the elementary education literacy curriculum.

Prerequisite(s): Admission into elementary education graduate program.
Corequisite(s): EDCI 556.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0

EDCI 547 - Integrating Technology in Elementary Classrooms: Mathematics

Credits: 1
Not Repeatable for Credit
Offered by Graduate School of Education
Studies the development and integration of technology in the elementary education mathematics curriculum.

Prerequisite(s): Admission into elementary education graduate program.
Corequisite(s): EDCI 552.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0

EDCI 548 - Integrating Technology in Elementary Classrooms: Social Studies and Fine Arts

Credits: 1
Not Repeatable for Credit
Offered by Graduate School of Education
Studies the development and integration in the elementary education social studies and fine arts curriculum.

Prerequisite(s): Admission into elementary education graduate program.
Corequisite(s): EDCI 554.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0

EDCI 549 - Foreign Language Immersion in the Elementary School

Credits: 3
Not Repeatable for Credit
Offered by Graduate School of Education
Covers theories and methods of teaching foreign language through elementary school curriculum; and curriculum development, assessment, and community relations in foreign language immersion classes.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDCI 552 - Mathematics Methods for the Elementary Classroom

Credits: 1-3
Repeatable within Degree for Credit
Offered by Graduate School of Education
Introduces methods for teaching all children topics in arithmetic, geometry, algebra, probability, and statistics in elementary grades. Focuses on using manipulatives and technologies to explore mathematics and solve problems.

Prerequisite(s): Admission to elementary education licensure program.
Notes: Requires field experience in public schools.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0
Grading: Graduate Special

EDCI 553 - Science Methods for the Elementary Classroom

Credits: 1-3
Repeatable within Degree for Credit
Offered by Graduate School of Education
Develops skills and abilities in science teaching methods, applications of technology, safety practices, and creation of integrated science curricula. Examines science teaching based on contemporary theory, practice, and standards.

Prerequisite(s): Admission to elementary education licensure program.
EDCI 554 - Methods of Teaching Social Studies and Integrating Fine Arts in the Elementary Classroom

Credits: 3
Repeatable within Degree for Credit
Offered by Graduate School of Education
Focuses on the design and delivery of standards-based integrated curriculum centered on the social sciences. Includes integration of fine arts and examines the central role of the arts in learning.

Prerequisite(s): Admission into elementary education graduate program; must be taken in programmatic sequence.
Notes: Field experience is required.

EDCI 555 - Literacy Teaching and Learning in Diverse Elementary Classrooms I

Credits: 3
Not Repeatable for Credit
Offered by Graduate School of Education
Provides research-based introduction to literacy teaching and learning for younger children. Emphasizes language development; reading and writing processes; emergent literacy; culture, families, and literacy; and literacy integration in the curriculum.

Prerequisite(s): Admission to elementary education licensure program
Notes: School-based field experience required.

EDCI 556 - Literacy Teaching and Learning in Diverse Elementary Classrooms II

Credits: 1-3
Repeatable within Degree for Credit
Offered by Graduate School of Education
Provides research-based introduction to literacy teaching and learning for older children. Emphasizes literacy and language processes and development; connections among cultures, families, and literacy; and literacy integration in curriculum.
EDCI 557 - Integrating Technology in PreK-6

Credits: 3
Not Repeatable for Credit
Offered by Graduate School of Education
Studies the development and integration of technology in the elementary education curriculum including the use of technology to address the learning needs of diverse students.

Prerequisite(s): Admission to elementary education licensure program
Notes: School-based field experience required.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0
Grading: Graduate Special

EDCI 558 - Integrating Fine Arts and Movement in Elementary Education

Credits: 3
Not Repeatable for Credit
Offered by Graduate School of Education
Includes art, drama, music, and movement. Examines central role of arts in children's learning. Focuses on integration and interdisciplinary learning experiences. Includes developmental theory, addressing diverse learners through multiple intelligences, and movement for physical health.

Prerequisite(s): Admission to PDS or Partnership Elementary Licensure Program.
Notes: School-based field experience required.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDCI 559 - Research and Assessment in Elementary Education

Credits: 3
Not Repeatable for Credit
Offered by Graduate School of Education
Provides teacher candidates an understanding of research paradigms utilizing systematic evidence to improve practice and further skills in assessment of learning outcomes. Emphasizes linking research and practice, making instructional decisions based on systematically collected data.
Prerequisite(s): Admission into elementary education graduate program; capstone course for degree must be taken last in programmatic sequence.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDCI 560 - Methods of Teaching in Foreign/World Languages

Credits: 3
Not Repeatable for Credit
Offered by Graduate School of Education
Covers approaches, theories, and methods of teaching foreign and second languages, with practical application to classroom. Students demonstrate teaching strategies, develop lesson and unit-planning skills, and evaluate curricula and materials.

Corequisite(s): EDCI 516

Notes: Requires field experience in schools.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDCI 567 - Teaching Social Studies in the Secondary School

Credits: 3
Not Repeatable for Credit
Offered by Graduate School of Education
Provides teacher candidates an introduction to methods, frameworks, and practices of teaching social studies in secondary schools.

Notes: Requires 15 hours of field experience.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDCI 569 - Teaching English in the Secondary School

Credits: 3
Not Repeatable for Credit
Offered by Graduate School of Education
Provides study of advanced methods, materials, content, and organization of English programs in secondary school.

Prerequisite(s): EDUC 522.
Corequisite(s): EDUC 522.
Notes: 15 hours school-based field experience required.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDCI 570 - Teaching Young Adult Literacy in a Multicultural Setting

Credits: 3
Not Repeatable for Credit
Offered by Graduate School of Education
Examines literary works written for and about young adults. Introduces critical issues surrounding teaching young adult literature in multiculturally diverse public schools and requires reading and reviewing young adult literature from several genres.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDCI 572 - Teaching Mathematics in the Secondary School

Credits: 3
Not Repeatable for Credit
Offered by Graduate School of Education
Emphasizes developing different styles of teaching.

Prerequisite(s): EDUC 522.
Corequisite(s): EDUC 522.

Notes: 15 hours school-based field experience required.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDCI 573 - Teaching Science in the Secondary School

Credits: 3
Not Repeatable for Credit
Offered by Graduate School of Education

Provides study of methods, materials, content, and organization of science programs. Emphasizes curriculum planning, current methodologies, safety, and trends in secondary schools.
Designated a Green Leaf Course.

Prerequisite(s): EDUC 522.
Corequisite(s): EDUC 522.
Notes: 15 hours school-based field experience required.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDCI 577 - Curriculum and Methods of Teaching, PK-12

Credits: 3
Repeatable within Degree for Credit
Offered by Graduate School of Education
Blends theory and practice by providing instruction in curriculum and planning, theoretical concepts, application of research, models of learning and teaching, and practical experiences. Examines educational standards, assessment, and classroom management in PK-12 schools.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDCI 597 - Special Topics in Education

Credits: 1-6
Repeatable within Degree for Credit
Offered by Graduate School of Education
Provides advanced study on selected topic or emerging issue in American or international education.

Prerequisite(s): Admission to program in GSE.
Notes: May be repeated for credit with GSE permission.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 0
Grading: Graduate Special

EDCI 600 - Workshop in Education

Credits: 1-6
Not Repeatable for Credit
Offered by Graduate School of Education
Offers full-time workshops and weekend seminars on selected topics in education and education tour seminars.

Notes: May be repeated for credit.

Schedule Type: SEM
Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 0
EDCI 602 - Technology Applications in Early Childhood Education

Credits: 3  
Not Repeatable for Credit  
Offered by Graduate School of Education  
Examines criteria and methods for integrating technology into all areas of early childhood curriculum. Emphasizes use of instructional technology to facilitate cognitive and social growth.

Schedule Type: LEC  
Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0

EDCI 603 - Trends, Issues, and Research in Early Childhood Education

Credits: 3  
Not Repeatable for Credit  
Offered by Graduate School of Education  
Examines trends, issues, research findings, and resulting program development.

Prerequisite(s): Admission to GSED.  
Schedule Type: LEC  
Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0

EDCI 613 - Curriculum and Assessment in Early Childhood Education I

Credits: 3  
Not Repeatable for Credit  
Offered by Graduate School of Education  
First of two-course sequence addressing current thinking about curriculum and assessment in programs for preschool through third grade. Gives overview of effective ways to plan and implement integrated curriculum; special focus on content, subject matter.

Schedule Type: LEC  
Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0

EDCI 614 - Curriculum and Assessment in Early Childhood Education II

Credits: 3  
Not Repeatable for Credit  
Offered by Graduate School of Education  
Second of two-course sequence focusing on planning and assessing children's knowledge of content and subject matter. Emphasizes action research.
EDCI 615 - Advanced Human Development

Credits: 3
Not Repeatable for Credit
Offered by Graduate School of Education
Advanced course in development and learning across lifespan. Critically reviews contemporary research and theories of human development and learning, and relevance to educational practice and family contexts as they relate to children under eight.

EDCI 617 - Using Digital and Popular-Culture Media with Grades 4-12

Credits: 3
Not Repeatable for Credit
Offered by Graduate School of Education
Exposes students to recent knowledge on how middle and high school teachers can use digital media and popular culture texts to engage students in subject area learning or literacy development. Focus is on grades 4-12.

Prerequisite(s): Admission to a GSE licensure, Master's, or doctoral program and at least one year of PK-12 teaching experience, completion of EDCI 569, EDCI 567, EDCI 572, EDCI 573, or EDCI 544, or permission of instructor.

EDCI 621 - Introduction to Gifted and Talented Learners

Credits: 3
Not Repeatable for Credit
Offered by Graduate School of Education
Examines nature and needs of gifted and talented learners. Participants become knowledgeable about characteristics of gifted and talented students, and examine role of culture in manifestation of gifts and talents as well as gifted behaviors in special populations.
EDCI 622 - Curriculum Differentiation for Diverse Learners

Credits: 3
Not Repeatable for Credit
Offered by Graduate School of Education
Develops personal and professional rationale for differentiating instruction in mixed-ability classrooms, as well as skills and knowledge of strategies to utilize pre-assessment data and plan for and implement differentiated instruction.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDCI 623 - Models and Strategies for Teaching Gifted Learners

Credits: 3
Not Repeatable for Credit
Offered by Graduate School of Education
Provides framework to examine and apply curriculum models and instructional strategies advocated for use with gifted students according to national and state standards that reflect best practices in gifted education.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDCI 624 - Assessment, Identification, and Evaluation of Gifted Learners

Credits: 3
Not Repeatable for Credit
Offered by Graduate School of Education
Examines broad understandings of intelligence and assessment. Provides techniques to identify gifted students. Develops specific understandings of assessment techniques and awareness of the influences of language, culture, ethnicity, gender, and exceptionality on recognition and subsequent identification of giftedness.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDCI 625 - Contemporary Issues and Trends in Gifted Education

Credits: 3
Not Repeatable for Credit
Offered by Graduate School of Education
Focuses on research, trends, issues, legislation, and litigation concerning gifted and talented children. Provides professionals in gifted education and related fields with knowledge and skills to serve as advocates for gifted-child education.

Prerequisite(s): EDCI 621, 622, 623, 624.
EDCI 626 - Action Research in Gifted Education

Credits: 3
Not Repeatable for Credit
Offered by Graduate School of Education
Opportunity to identify and investigate school-based problem and apply inquiry, writing, and research skills to relevant issue or concern in gifted education.

EDCI 627 - Advanced Practicum in Gifted Education

Credits: 3
Not Repeatable for Credit
Offered by Graduate School of Education
Intensive supervised clinical experiences for one semester in accredited elementary or secondary school. Students supervised in setting that includes scheduled observations and seminar experiences.

Prerequisite(s): EDCI 621, 622, 623, 624.

EDCI 632 - Advanced Social Studies Methods for the Elementary Classroom

Credits: 3
Not Repeatable for Credit
Offered by Graduate School of Education
Provides advanced study of teaching social studies in elementary education. Uses inquiry, research, and reflection to improve teaching. Emphasizes design and delivery of integrated social studies curriculum centered on knowledge, skills, and dispositions from history, geography, civics and economics, arts and humanities, and multicultural education. Covers student assessment and using student data in instructional decision-making and improvement.

Prerequisite(s): Completion of elementary education (PK-6) licensure, and EDCI 631.
Notes: Requires extensive field experience in public schools.
EDCI 633 - Advanced Mathematics Methods for the Elementary Classroom

Credits: 3  
Not Repeatable for Credit  
Offered by Graduate School of Education  
Focuses on teaching all children, including those from nonmainstreamed populations. Emphasizes teaching problem-solving and higher-order thinking skills promoted by National Council of Teachers of Mathematics and Virginia Mathematics Standards of Learning. Uses techniques and materials to develop specific problem-solving strategies in hands-on, activity, and workshop-oriented experience. Explores teaching of problem-solving, reasoning, communications, and connections in PK-6 mathematics by working with manipulatives and technologies.

Prerequisite(s): Completion of elementary education (PK-6) licensure, and EDCI 631.  
Notes: Requires field experience in public schools.

Schedule Type: LEC  
Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0

EDCI 634 - Advanced Science Methods for the Elementary Classroom

Credits: 3  
Not Repeatable for Credit  
Offered by Graduate School of Education  
Emphasizes inquiry and extensions of theoretical understanding of how children learn. Develops expertise in teaching and assessment, and incorporates technology, safety, and issues of culture and gender into day-to-day teaching activities.

Prerequisite(s): Completion of elementary education (PK-6) licensure, and EDCI 631.  
Schedule Type: LEC  
Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0

EDCI 635 - Applied Research in Elementary Education

Credits: 3  
Not Repeatable for Credit  
Offered by Graduate School of Education  
Helps beginning teachers plan and complete action research project related to teaching assignment. Students apply research methods explored during prerequisite series of courses.

Prerequisite(s): Completion of elementary education (PK-6) licensure; and EDCI 631, 632, 633, and 634.  
Schedule Type: LEC  
Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0
EDCI 644 - Mathematics Learning and Assessment (K-8)

Credits: 3
Not Repeatable for Credit
Offered by Graduate School of Education
Introduces students to learning theories and associated assessment practices specific to mathematics education. Intended for mathematics specialists and teachers interested in problems of learning and assessment across K-8 settings in mathematics education.

Prerequisite(s): Admission to the MEd in Education Leadership Mathematics Education Leadership concentration
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDCI 645 - Curriculum Development in Mathematics Education

Credits: 3
Not Repeatable for Credit
Offered by Graduate School of Education
Analysis, design, and evaluation of school mathematics curricula.

Prerequisite(s): Admission to mathematics education leadership master's degree program, or permission of instructor.
Notes: Yearlong seminar for master's-level students in mathematics education leadership cohort program.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
Grading: Graduate Special

EDCI 646 - Mathematics Education Leadership for School Change

Credits: 1-3
Not Repeatable for Credit
Offered by Graduate School of Education
Surveys current literature and large-scale studies in mathematics education. Engages students in research, study, and discussion of factors that affect teaching and learning of mathematics in school settings.

Prerequisite(s): Admission to mathematics education leadership master's degree program, or permission of instructor.
Notes: Yearlong seminar for master's-level students in mathematics education leadership cohort program.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0
Grading: Graduate Special

EDCI 663 - Research in Science Teaching
EDCI 666 - Research in Mathematics Teaching

Credits: 3
Not Repeatable for Credit
Offered by Graduate School of Education
Explores curricula, current issues, and research literature in elementary school mathematics. Emphasizes development of different styles of teaching.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDCI 667 - Advanced Methods of Teaching Social Sciences in the Secondary School

Credits: 3
Not Repeatable for Credit
Offered by Graduate School of Education
Emphasizes interdisciplinary curriculum and instruction, implementing national state standards, authentic assessment, and adaptations for diverse populations.

Prerequisite(s): EDCI 567 and EDUC 522. 15 hours school-based field experience required.
Corequisite(s): EDRD 619

Notes: School-based field experience required.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDCI 669 - Advanced Methods of Teaching English in the Secondary School

Credits: 3
Not Repeatable for Credit
Offered by Graduate School of Education
Continuation course in methods (See EDCI 569). Guides students in working effectively with national and local standards for
teaching secondary English.

**Prerequisite(s):** EDCI 569 and EDUC 522. 15 hours school-based field experience required.

**Corequisite(s):** EDRD 619

**Schedule Type:** LEC

**Hours of Lecture or Seminar per week:** 3

**Hours of Lab or Studio per week:** 0

---

**EDCI 670 - Advanced Methods in Science Teaching**

Credits: 3
Not Repeatable for Credit
Offered by Graduate School of Education
Application of major principles of education and psychology for the improvements of science teaching in secondary schools.

**Schedule Type:** LEC

**Hours of Lecture or Seminar per week:** 3

**Hours of Lab or Studio per week:** 0

---

**EDCI 671 - Innovations in Science Teaching**

Credits: 3
Not Repeatable for Credit
Offered by Graduate School of Education
Focuses on the development and selection of teaching materials that reflect concepts of technology innovation with an emphasis on middle and secondary school science.

**Schedule Type:** LEC

**Hours of Lecture or Seminar per week:** 3

**Hours of Lab or Studio per week:** 0

---

**EDCI 672 - Advanced Methods of Teaching Mathematics in the Secondary School**

Credits: 3
Not Repeatable for Credit
Offered by Graduate School of Education
Focuses on learning processes for mathematics. Introduces national and state standards regarding content and methodologies for teaching mathematics. Examines instructional methods and materials in relation to secondary mathematical content, curriculum, and assessment.

**Prerequisite(s):** EDCI 572, EDUC 522. 15 hours school-based field experience required.

**Corequisite(s):** EDRD 619

**Schedule Type:** LEC

**Hours of Lecture or Seminar per week:** 3

**Hours of Lab or Studio per week:** 0
EDCI 673 - Advanced Methods of Teaching Science in the Secondary School

Credits: 3  
Not Repeatable for Credit  
Offered by Graduate School of Education  
Provides advanced study of teaching and curriculum development based on research and current issues. Emphasizes integrating science and technology, and adapting instruction to the needs of diverse learners.

Prerequisite(s): EDCI 573 and EDUC 522. 15 hours school-based field experience required.  
Corequisite(s): EDRD 619

Schedule Type: LEC  
Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0

EDCI 683 - Curriculum Development and Evaluation in Science Education

Credits: 3  
Not Repeatable for Credit  
Offered by Graduate School of Education  
Advanced course in science curriculum design and development. Emphasizes instructional materials and assessment.

Prerequisite(s): EDCI 663, or permission of instructor.  
Schedule Type: LEC  
Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0  
Grading: Graduate Special

EDCI 684 - Advanced Methods of Teaching Foreign/Second Languages in PK-12 Schools

Credits: 3  
Not Repeatable for Credit  
Offered by Graduate School of Education  
Blends theoretical knowledge and practical application. Provides advanced study of second language pedagogy and teaching trends. Topics include multiple learning styles, alternative forms and assessment, and teaching diverse populations.

Prerequisite(s): EDCI 560 or permission of instructor. Field experience in public schools will be required during course.  
Notes: Requires field experience.

Schedule Type: LEC  
Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0

EDCI 693 - Leadership and Organizational Issues in Science Education
EDCI 702 - Internship in Mathematics Education

Credits: 3
Not Repeatable for Credit
Offered by Graduate School of Education
Offers practical experiences and professional challenges for mathematics leaders in authentic educational settings. Activities emphasize school-based and classroom based research and leadership. Develops the skills and abilities of the mathematics leaders to analyze classroom practice, investigate teaching and disseminate information about mathematics education in professional development settings for teachers.

Prerequisite(s): Internship Math Education
Schedule Type: INT
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

EDCI 705 - Instructional Design

Credits: 3
Not Repeatable for Credit
Offered by Graduate School of Education
Helps students analyze, apply, and evaluate principles of instructional design to develop education and training materials spanning a wide range of knowledge domains and instructional technologies. Focuses on variety of instructional design models, with emphasis on recent contributions from cognitive science and related fields.

Equivalent to EDIT 705

Prerequisite(s): Teaching experience.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDCI 725 - National and International Leadership Issues in Mathematics Education
EDCI 726 - State and Local Leadership Issues in Mathematics Education

Credits: 3
Not Repeatable for Credit
Offered by Graduate School of Education
Students study issues and policies that affect mathematics teaching and learning, including current trends in mathematics school reform at state, district, and individual school levels.

Prerequisite(s): Admission to mathematics education leadership PhD program.
Notes: Yearlong seminar for PhD students in the mathematics education leadership cohort program.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
Grading: Graduate Special

EDCI 776 - Consultation & Collaboration in Diverse K-12 Settings

Credits: 3
Not Repeatable for Credit
Offered by Graduate School of Education
Focuses on ways in which practicing education professionals collaborate in serving diverse learners and their families. Explores methods for co-planning and co-teaching in the general education classroom and their families. Explores methods for co-planning and co-teaching in the general education classroom and ways for sharing responsibilities for instruction and assessment. Includes ways for dealing with difficult interactions are part of understanding how to implement collaborative and inclusive models of education for diverse learners.

Prerequisite(s): Completion of 12 credits in concentration. Admission to the Culturally and Linguistically Diverse and Exceptional Learners concentration or permission of the program.
Schedule Type: SEM
Hours of Lecture or Seminar per week: 3
Grading: Graduate Special
When Offered: Fall, Summer, Spring
EDCI 777 - Research to Practice

Credits: 3
Not Repeatable for Credit
Offered by Graduate School of Education
Provides culminating experience that synthesizes and applies essential elements of teaching culturally & linguistically diverse and exceptional learners in international contexts. Emphasizes teacher as change agent through critical inquiry into practice. Promotes collaboration among teachers and school professionals to advance achievement of diverse learners.

Prerequisite(s): Completion of all other program requirements.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
Grading: Graduate Special

EDCI 784 - Capstone Seminar in Early Childhood Education

Credits: 3
Not Repeatable for Credit
Offered by Graduate School of Education
Culminating seminar devoted to analyzing and synthesizing knowledge and skills gained through graduate course work as it applies to early childhood education.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDCI 790 - Internship in Education

Credits: 1-6
Repeatable within Term for Credit
Offered by Graduate School of Education
Intensive, supervised clinical experience for full semester in accredited school. Students must register for appropriate section.

Prerequisite(s): EDUC 522, EDUC 672, two methods classes in content area; passing Praxis II and VCLA, completing all endorsements.
Corequisite(s): EDCI 791 only for students enrolled in Curriculum and Instruction M.Ed, Concentration in Secondary Education.

Schedule Type: INT
Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 0
Grading: Satisfactory/No Credit

EDCI 791 - Internship Seminar in Secondary Teaching
EDCI 796 - Science Education Curriculum

Credits: 3
Not Repeatable for Credit
Offered by Graduate School of Education
Explores science education curriculum from preschool through high school, including identifying and evaluating curriculum materials and resources. Emphasizes research-based exemplary materials and use of technology.

Prerequisite(s): EDCI 891.
Schedule Type: SEM
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
Grading: Graduate Special

EDCI 797 - Advanced Topics in Education

Credits: 1-6
Not Repeatable for Credit
Offered by Graduate School of Education
Advanced study of selected topics in education for students preparing for doctoral studies or who have been admitted to the PhD program in education.

Notes: May be repeated for credit with CEHD approval.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 0
Grading: Graduate Special

EDCI 810 - Foundations of Science Education Research

Credits: 3
Not Repeatable for Credit
Offered by Graduate School of Education

Explores and analyzes the range of research designs currently utilized by science education researchers. Develops an understanding of the assumptions and frameworks of different types of science education inquiry through an examination of ways of knowing. Examines historical trends that have taken place in science education.

**Prerequisite(s):** Permission of instructor.

**Corequisite(s):** EDUC 800.

**Schedule Type:** LEC

**Hours of Lecture or Seminar per week:** 3

**Hours of Lab or Studio per week:** 0

**When Offered:** Fall.

---

**EDCI 811 - Current Trends in Science Education Research**

Credits: 3

Not Repeatable for Credit

Offered by Graduate School of Education

Provides an in-depth examination and analysis of literature and research in science education. Examines theoretical foundations of research studies in science education, discusses methodologies of research, critique research, and examines trends in emerging science education research. Includes presentations by science education researchers as well as opportunities for graduate students to explore research ideas with colleagues within the class.

**Prerequisite(s):** EDCI 810.

**Schedule Type:** LEC

**Hours of Lecture or Seminar per week:** 3

**Hours of Lab or Studio per week:** 0

**When Offered:** Spring.

---

**EDCI 813 - Focused Science Education Research**

Credits: 3

Not Repeatable for Credit

Offered by Graduate School of Education

Provides an opportunity for students to gain hands-on experience designing and conducting a research study in science education that leads to publication and/or conference presentations. The scholarship embodied in student development to this point in the doctoral program will lead students to work with a science education faculty member of their choice to development and seek to answer a research question of interest.

**Prerequisite(s):** EDRS 810, EDRS 811, EDRS 827.

**Schedule Type:** INT

**Hours of Lecture or Seminar per week:** 3

**Hours of Lab or Studio per week:** 0

**When Offered:** Fall, Summer, Spring.

---

**EDCI 855 - Mathematics Education Research on Teaching and Learning**
EDCI 856 - Mathematics Education Curriculum Design and Evaluation

Credits: 3
Not Repeatable for Credit
Offered by Graduate School of Education
Students engage in research, analysis, design, and evaluate school mathematics curricula.

Prerequisite(s): Admission to mathematics education leadership PhD program.
Notes: Yearlong seminar for PhD students in the mathematics education leadership cohort program.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
Grading: Graduate Special

EDCI 857 - Preparation and Professional Development of Mathematics Teachers

Credits: 3
Not Repeatable for Credit
Offered by Graduate School of Education
Students study attributes of effective professional development in mathematics education, develop expertise in designing and teaching mathematics methods courses, and learn to create and teach professional development experiences for practicing teachers.

Prerequisite(s): Admission to mathematics education leadership PhD program.
Notes: Yearlong seminar for PhD students in the mathematics education leadership cohort program.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
Grading: Graduate Special

EDCI 858 - Mathematics Education Research Design and Evaluation
EDCI 891 - Science Teaching and Learning

Credits: 3
Not Repeatable for Credit
Offered by Graduate School of Education
Explores research, theory, and practice for effective science teaching and learning. Focuses on science education standards at local, state, national, and international levels. Students review common core of research literature and topics of individual interest.

Schedule Type: SEM
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
Grading: Graduate Special

EDCI 893 - Science Education Staff Development

Credits: 3
Not Repeatable for Credit
Offered by Graduate School of Education
Explores staff development in science education with emphasis on planning and conducting professional development on key topics in science teaching and learning. Reviews common core of research literature; students conduct research of individual interest.

Prerequisite(s): EDCI 891.
Schedule Type: SEM
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
Grading: Graduate Special

EDCI 894 - Science Education Leadership and Policy

Credits: 3
Not Repeatable for Credit
Offered by Graduate School of Education
Focuses on leadership and policy issues at local, state, and national levels that affect science education. Emphasizes understanding decision-making structure and process; current issues; and trends. Students participate in leadership and policy events.

Prerequisite(s): EDCI 891.
Schedule Type: SEM
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
Grading: Graduate Special

EDCI 895 - Emerging Issues in Curriculum and Instruction

Credits: 3
Not Repeatable for Credit
Offered by Graduate School of Education
Covers issues in curriculum and instruction through individual and group research, discussion, writing, and presentations by experts. Students conduct critical analysis of specific field.

Prerequisite(s): Admission to PhD program, or permission of instructor.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
Grading: Graduate Special

Engineering (ENGR)

Offered by the Volgenau School of Engineering
Students may attempt an undergraduate course taught by the Volgenau School of Engineering twice. A third attempt requires approval of the department offering the course.

ENGR 107 - Introduction to Engineering

Credits: 2
Limited to 2 Attempts
Offered by Electrical and Computer Engineering
Introduces engineering profession fundamentals and problem-solving. Topics include description of engineering disciplines, functions of the engineer, professionalism, ethics and registration, problem solving and representation of technical information, estimation and approximations, and analysis and design.

Fulfills Mason Core requirement in information technology (ethics only).

Corequisite(s): MATH 105, or Math Placement Test score qualifying student for MATH 113.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 2
**ENGR 395 - Engineering Internship**

Credits: 0-3  
Repeatable within Degree for Credit  
Offered by Electrical and Computer Engineering  
Students will participate in experiential learning in an industrial setting. Students must identify work opportunity and seek advisor approval prior to registering. Course credit will not satisfy degree requirements.

**Prerequisite(s):** Completion of at least 30 credit hours  
**Schedule Type:** INT  
**Hours of Lecture or Seminar per week:** 0-3  
**Grading:** Satisfactory/No Credit  
**When Offered:** Fall, Summer, Spring

---

**ENGR 396 - Engineering Co-Op I**

Credits: 0-3  
Not Repeatable for Credit  
Offered by Electrical and Computer Engineering

1st Semester of a multi-semester co-operative education experience. Students will apply concepts and theories from the classroom to an industrial setting. Students must identify work opportunity and seek advisor approval prior to registering. Course credit will not satisfy degree requirements.

**Prerequisite(s):** Completion of at least 30 credit hours.  
**Schedule Type:** LEC  
**Hours of Lecture or Seminar per week:** 0-3  
**Grading:** Satisfactory/No Credit  
**When Offered:** Fall, Summer, Spring

---

**ENGR 397 - Engineering Co-Op II**

Credits: 0-3  
Not Repeatable for Credit  
Offered by Electrical and Computer Engineering

Second Semester of a multi-semester co-operative education experience. Students will apply concepts and theories from the classroom to an industrial setting. Students must continue employment from ME 396 and seek advisor approval prior to registering. Course credit will not satisfy degree requirements.

**Prerequisite(s):** ME 396.  
**Schedule Type:** INT  
**Hours of Lecture or Seminar per week:** 0-3
Grading: Satisfactory/No Credit
When Offered: Fall, Summer, Spring

ENGR 498 - Independent Study in Engineering

Credits: 1-3
Repeatable within Term for Credit
Offered by Electrical and Computer Engineering
Directed self-study of special topics of current interest in ENGR.

Prerequisite(s): 60 credits; must be arranged with instructor and approved by department chair before registering.
Notes: May be repeated for maximum 6 credits if topics substantially different.

Schedule Type: IND
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ENGR 499 - Special Topics in Engineering

Credits: 0-4
Repeatable within Term for Credit
Offered by Electrical and Computer Engineering
Topics of special interest to undergraduates.

Prerequisite(s): 60 credits and permission of instructor; specific prerequisites vary with nature of topic.
Notes: May be repeated for maximum 6 credits if topics substantially different.

Schedule Type: LAB, LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ENGR 794 - Graduate Internship

Credits: 0-3
Repeatable within Degree for Credit
Offered by Volgenau School of Engineering
Students with an Internship/Externship/Co-Op opportunity will gain practical experience while engaging in an experiential learning opportunity.

Prerequisite(s): Completion of at least 18 credit hours.
Schedule Type: INT
Hours of Lecture or Seminar per week: 0-3
Hours of Lab or Studio per week: 0
Grading: Satisfactory/No Credit
When Offered: Fall, Summer, Spring
English (ENGH)

Offered by the College of Humanities and Social Sciences

Effective 2011-2012 Catalog, the English course prefix has changed from ENGL to ENGH.

Prerequisite to all 200-level and above: 3 credits of 100-level English. Prerequisite to all English courses numbered above 302 unless otherwise noted: Satisfaction of University requirements in 100-level English and in Mason Core literature.

Nonnative speakers of English with limited language proficiency are encouraged to take ENGH 100 instead of ENGH 101. Students may not receive credit for both ENGH 100 and 101.

ENGH 100 - Composition for Non-native Speakers of English

Credits: 4
Not Repeatable for Credit
Offered by English
Intensive practice in drafting, revising, and editing expository essays of some length and complexity. Studies logical, rhetorical, and linguistic structure of expository prose, with attention to particularly difficult aspects of the language for non-native speakers. Methods and conventions of preparing research papers.

Fulfills Mason Core requirement in written communication (lower level).

Equivalent to ENGH 122.

Notes: For non-native English speakers, Students must attain minimum grade of C to fulfill degree requirements.

Schedule Type: LEC, RCT
Hours of Lecture or Seminar per week: 4
Hours of Lab or Studio per week: 0

ENGH 101 - Composition

Credits: 3
Not Repeatable for Credit
Offered by English
Intensive practice in drafting, revising, and editing expository essays of some length and complexity. Studies logical, rhetorical, and linguistic structure of expository prose. Methods and conventions of preparing research papers.

Fulfills Mason Core requirement in written communication (lower level).

Equivalent to ENGH 122.

Notes: Students must attain minimum grade of C to fulfill degree requirements.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
ENGH 121 - Enhanced Composition For Multilingual Writers of English I

Credits: 3
Not Repeatable for Credit
Offered by English
Provides intensive practice in drafting, revising, and editing essays in common academic genres such as description, exposition, and analysis, with additional language support for building English fluency. Addresses logical, rhetorical, and linguistic structures of expository prose. This course is the first of a two-part course for students in the Undergraduate International Pathway Program.

Prerequisite(s): Admission to the Undergraduate International Pathway Program for international Students.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
Grading: Undergraduate Special.

ENGH 122 - Enhanced Composition For Multilingual Writers of English II

Credits: 3
Not Repeatable for Credit
Offered by English
Provides intensive practice in drafting, revising and editing essays in common academic genres such as argumentation and research based writing, with additional language support for building English fluency. Addresses logical, rhetorical, and linguistic structures of expository prose, and builds critical reading strategies. This course is the second of a two-part course for students in the Undergraduate International Pathway Program.

Equivalent to ENGH 100, ENGH 101.

Prerequisite(s): Satisfactory progress in ENGL 121/ENGH 121.
Notes: Students must attain minimum grade of C to fulfill Mason Core degree requirement for written communication (lower level).
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
Grading: Undergraduate Special.

ENGH 201 - Reading and Writing about Texts

Credits: 3
Not Repeatable for Credit
Offered by English
Close analysis of literary texts, including but not limited to poetry, fiction, and drama. Emphasizes reading and writing exercises to develop basic interpretive skills. Examines figurative language, central ideas, relationship between structure and meaning, narrative point of view.

Fulfills Mason Core requirement in literature.
**Prerequisite(s):** 3 credits of 100-level English.

**Schedule Type:** LEC

**Hours of Lecture or Seminar per week:** 3

**Hours of Lab or Studio per week:** 0

---

**ENH 202 - Texts and Contexts**

Credits: 3

Repeatable within Term for Credit

Offered by English

Studies literary texts within the framework of culture. Examines texts within such categories as history, gender, sexuality, religion, race, class, and nation.

Fulfills Mason Core requirement in literature.

**Prerequisite(s):** 3 credits of 100-level English.

**Notes:** Builds on reading and writing skills taught in ENGH 201.

**Schedule Type:** LEC, SEM

**Hours of Lecture or Seminar per week:** 3

**Hours of Lab or Studio per week:** 0

---

**ENH 203 - Western Literary Tradition**

Credits: 3

Not Repeatable for Credit

Offered by English

Major works of Western literature in historical progression. Focuses on writers such as Homer, Sophocles, Euripides, Dante, Cervantes, Machiavelli, and Montaigne.

Fulfills Mason Core requirement in literature.

**Prerequisite(s):** 3 credits of 100-level English.

**Notes:** All readings are in modern English. Courses build on reading and writing skills taught in ENGH 201.

**Schedule Type:** LEC

**Hours of Lecture or Seminar per week:** 3

**Hours of Lab or Studio per week:** 0

---

**ENH 204 - Western Literary Traditions**

Credits: 3

Not Repeatable for Credit

Offered by English

Major works of Western literature in historical progression. Covers writers such as Moliere, Mme. de Lafayette, Goethe, Ibsen,
Flaubert, Dostoyevski, Tolstoy, Mann, Kafka, Borges, and Soyinka. All readings are in modern English.

Fulfills Mason Core requirement in literature.

**Prerequisite(s):** 3 credits of 100-level English.

**Notes:** Courses build on reading and writing skills taught in ENGH 201.

**Schedule Type:** LEC

**Hours of Lecture or Seminar per week:** 3

**Hours of Lab or Studio per week:** 0

---

**ENGH 300 - Cover to Cover**

Credits: 3

Repeatable within Degree for Credit

Offered by English

Introduction to various topics in English; many have an interdisciplinary emphasis. Appropriate for non-majors. Topic changes each time course is offered.

**Prerequisite(s):** ENGL 101/ENGH 101

**Notes:** May be repeated for a maximum of 6 credits when topic is different.

**Schedule Type:** LEC

**Hours of Lecture or Seminar per week:** 3

**Hours of Lab or Studio per week:** 0

**When Offered:** Fall, Spring

---

**ENGH 301 - The Fields of English**

Credits: 3

Not Repeatable for Credit

Offered by English

Introduces the fields of English studies, focusing on discipline-specific forms of practice within the concentrations in the major. Explores central concepts including reading, language, medium, text, author/producer. Maps histories and contexts of English as a discipline.

**Prerequisite(s):** Satisfaction of University requirements in 100-level English and in Mason Core literature.

**Schedule Type:** LEC

**Hours of Lecture or Seminar per week:** 3

---

**ENGH 302 - Advanced Composition**

Credits: 3

Not Repeatable for Credit

Offered by English

Intensive practice in writing and analyzing expository forms such as essay, article, proposal, and technical or scientific reports
with emphasis on research related to student's major field.

Fulfills Mason Core requirement in written communication (upper level).

**Prerequisite(s):** Completion of 45 credits including the Mason core composition and literature requirements, requires a grade of C or better.

**Notes:** Students must attain minimum grade of C to fulfill degree requirements. Schedule of Classes designates particular sections of ENGH 302 in business, humanities, natural sciences and technology, and social sciences.

**Schedule Type:** LEC
**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0

---

**ENGH 303 - Humanities College to Career**

Credits: 1
Not Repeatable for Credit
Offered by English
Focuses on career choices and effective self-presentation for soon-to-be graduating students with majors in the humanities. Explores how skills typically learned in humanities majors can be leveraged for a successful transition to post-graduation employment.

Equivalent to FRLN 309, HIST 385, PHIL 393.

**Schedule Type:** LEC
**Hours of Lecture or Seminar per week:** 1
**Hours of Lab or Studio per week:** 0

---

**ENGH 304 - Topics: Literary Surveys**

Credits: 3
Repeatable within Term for Credit
Offered by English
Advanced introduction to major movements and representative figures of two or more centuries or periods of American, British, European, or world literature.

**Prerequisite(s):** Satisfaction of University requirements in 100-level English and in Mason Core literature.

**Notes:** May be repeated for a maximum of 6 credits when topic is different.

**Schedule Type:** LEC
**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0

---

**ENGH 305 - Dimensions of Writing and Literature**

Credits: 3
Not Repeatable for Credit
Offered by English
Teaches students the conventions of writing in literary studies while emphasizing writing process. Develops interpretive skills for further study in the major though the teaching of in-depth close reading, intertextual analysis, and critical reading in scholarship.

Fulfills writing intensive requirement in the major.

Prerequisite(s): Satisfaction of University requirements in 100-level English and in Mason Core literature.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**ENGH 307 - English Grammar**

Credits: 3
Not Repeatable for Credit
Offered by English
Overview of grammatical structure of English including word classes, phrases, and complex sentences. English grammar analyzed using modern syntactic theory. Students engage in language description through problem solving.

Equivalent to LING 307.

Prerequisite(s): Satisfaction of University requirements in 100-level English and in Mason Core literature.
Schedule Type: LEC, RCT
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**ENGH 308 - Theory and Inquiry**

Credits: 3
Repeatable within Term for Credit
Offered by English
Investigates a problem or debate central to the discipline of English. Teaches students how to read, understand, and engage with theoretical texts.

Prerequisite(s): None
Notes: May be repeated for credit when topic is different.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**ENGH 309 - Topics in Literature**

Credits: 1-3
Repeatable within Term for Credit
Offered by English
Studies literature by topics, such as women in literature, science fiction, and literature of the avant garde.

**Prerequisite(s):** Satisfaction of University requirements in 100-level English and in Mason Core literature.  
**Notes:** Topic varies. May be repeated for credit when topic is different.

**Schedule Type:** LEC  
**Hours of Lecture or Seminar per week:** 1-3  
**Hours of Lab or Studio per week:** 0

### ENGH 310 - Topics: Women and Literature

Credits: 3  
Repeatable within Term for Credit  
Offered by English  
Explores experiences of women as both authors and subjects of imaginative literature.

Equivalent to WMST 305.

**Prerequisite(s):** Satisfaction of University requirements in 100-level English and in Mason Core literature.  
**Notes:** May be repeated for a maximum of 6 credits when topic is different.

**Schedule Type:** LEC  
**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

### ENGH 315 - Folklore and Folklife

Credits: 3  
Not Repeatable for Credit  
Offered by English  
Topics include folktales, personal narratives, legends, proverbs, jokes, folk songs, folk art and craft, and folk architecture. Considers ethnicity, community, family, festival, folklore in literature, and oral history. Discusses traditions in students' own lives.

**Prerequisite(s):** Satisfaction of University requirements in 100-level English and in Mason Core literature.  
**Schedule Type:** LEC  
**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

### ENGH 316 - Topics in Myth and Literature

Credits: 3  
Repeatable within Term for Credit  
Offered by English  
Studies how traditional mythologies are reflected in English and American literature and other texts as themes, motifs, and patterns.
Prerequisite(s): Satisfaction of University requirements in 100-level English and in Mason Core literature.
Notes: May be repeated for a maximum of 6 credits when topic is different.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**ENGH 318 - Introduction to Cultural Studies**

Credits: 3
Not Repeatable for Credit
Offered by English
Introduces interpretive practices associated with cultural studies.

Prerequisite(s): Satisfaction of University requirements in 100-level English and in Mason Core literature.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**ENGH 319 - Popular Culture**

Credits: 3
Repeatable within Term for Credit
Offered by English
Emphasizes popular fiction and adaptation of popular prose genres to media that have strong verbal and visual elements. Relationship between verbal and nonverbal elements of media such as film, comics, and radio.

Prerequisite(s): Satisfaction of University requirements in 100-level English and in Mason Core literature.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**ENGH 320 - Literature of the Middle Ages**

Credits: 3
Not Repeatable for Credit
Offered by English
Selected English narrative, dramatic, and homiletic literature written between 1300 and 1500, exclusive of Chaucer.

Prerequisite(s): Satisfaction of University requirements in 100-level English and in Mason Core literature.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**ENGH 321 - English Poetry and Prose of the 16th Century**
ENGH 322 - Shakespeare

Credits: 3
Not Repeatable for Credit
Offered by English
Introduction to Shakespeare's art.

Prerequisite(s): Satisfaction of University requirements in 100-level English and in Mason Core literature.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ENGH 323 - Shakespeare: Special Topics

Credits: 3
Repeatable within Degree for Credit
Offered by English
Study of one aspect of Shakespeare's art or critical issues surrounding it.

Prerequisite(s): Satisfaction of University requirements in 100-level English and in Mason Core literature.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ENGH 324 - English Renaissance Drama

Credits: 3
Not Repeatable for Credit
Offered by English
Major dramas and dramatists of English Renaissance, such as Lyly, Marlowe, Jonson, Middleton, Webster, and Ford.

Prerequisite(s): Satisfaction of University requirements in 100-level English and in Mason Core literature.
Schedule Type: LEC
ENGH 325 - English Poetry and Prose of the 17th Century

Credits: 3
Not Repeatable for Credit
Offered by English
English poetry and prose from 1603 to 1688, excluding Milton.

Prerequisite(s): Satisfaction of University requirements in 100-level English and in Mason Core literature.
Schedule Type: LEC, RCT
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ENGH 330 - Augustan Age: 1660-1745

Credits: 3
Not Repeatable for Credit
Offered by English
English literature from late 17th century to mid-18th century. Includes Dryden, Rochester, Behn, Defoe, Swift, Pope, and Montagu.

Prerequisite(s): Satisfaction of University requirements in 100-level English and in Mason Core literature.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ENGH 331 - Age of Sensibility: 1745-1800

Credits: 3
Not Repeatable for Credit
Offered by English
English literature of later 18th century, time of American and French Revolutions, including new developments in novel, drama, biography, and poetry. Includes Johnson, Boswell, Blake, Goldsmith, Sterne, Gray, Cowper, Burney, Godwin, and Wollstonecraft.

Prerequisite(s): Satisfaction of University requirements in 100-level English and in Mason Core literature.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ENGH 332 - Restoration and 18th Century Drama
ENGH 333 - British Novel of the 18th Century

Credits: 3
Not Repeatable for Credit
Offered by English
English novel from its beginnings through turn of 19th century. Covers works by Behn, Defoe, Haywood, Richardson, Fielding, Sterne, Burney, Smollett, and Austen.

Prerequisite(s): Satisfaction of University requirements in 100-level English and in Mason Core literature.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ENGH 334 - British Poetry of the Romantic Period

Credits: 3
Not Repeatable for Credit
Offered by English

Prerequisite(s): Satisfaction of University requirements in 100-level English and in Mason Core literature.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ENGH 335 - Prose and Poetry of the Victorian Period

Credits: 3
Not Repeatable for Credit
Offered by English
Poetry and nonfiction prose by such authors as Carlyle, Arnold, Tennyson, Elizabeth Barrett Browning, Robert Browning, Ruskin, Mill, and Wilde.

Prerequisite(s): Satisfaction of University requirements in 100-level English and in Mason Core literature.
Schedule Type: LEC
ENGH 336 - British Novel of the 19th Century

Credits: 3
Not Repeatable for Credit
Offered by English
Works by Dickens, Thackeray, the Brontes, Eliot, Trollope, and Hardy.

Prerequisite(s): Satisfaction of University requirements in 100-level English and in Mason Core literature.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ENGH 337 - British Poetry after 1900

Credits: 3
Not Repeatable for Credit
Offered by English
Emphasizes Hardy, Yeats, Lawrence, Graves, Auden, Thomas, and Hughes. Fiction works employing poetic techniques, such as Joyce's Ulysses, may also be studied.

Prerequisite(s): Satisfaction of University requirements in 100-level English and in Mason Core literature.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ENGH 338 - British Novel after 1900

Credits: 3
Not Repeatable for Credit
Offered by English
Works by Conrad, Forster, Lawrence, Joyce, Woolf, Greene, Lessing, Spark, and Fowles.

Prerequisite(s): Satisfaction of University requirements in 100-level English and in Mason Core literature.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ENGH 339 - British and Irish Drama after 1900

Credits: 3
Not Repeatable for Credit
Offered by English
English or Irish drama from Yeats to the present. Plays by authors such as Yeats, Synge, O'Casey, Osborne, Wesker, Pinter, Friel, Churchill, and Gems.

Prerequisite(s): Satisfaction of University requirements in 100-level English and in Mason Core literature.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ENGH 340 - Early American Literature

Credits: 3
Not Repeatable for Credit
Offered by English
Works of first 200 years of American literature, including Edwards, Franklin, Irving, Cooper, and Bryant.

Prerequisite(s): Satisfaction of University requirements in 100-level English and in Mason Core literature.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ENGH 341 - Literature of the American Renaissance

Credits: 3
Not Repeatable for Credit
Offered by English
Major writers of American Renaissance (1830-1865), with emphasis on Emerson, Thoreau, Hawthorne, Melville, Whitman, Poe, Stowe, Douglass, and Dickinson.

Prerequisite(s): Satisfaction of University requirements in 100-level English and in Mason Core literature.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ENGH 343 - Development of the American Novel to 1914

Credits: 3
Not Repeatable for Credit
Offered by English
Major American novels of the pre-World War I period with emphasis on Brown, Cooper, Hawthorne, Melville, Twain, Howells, James, Crane, Dreiser, Norris, and others.

Prerequisite(s): Satisfaction of University requirements in 100-level English and in Mason Core literature.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
ENGH 344 - Development of the American Novel since 1914

Credits: 3
Not Repeatable for Credit
Offered by English
Works by Fitzgerald, Hemingway, Faulkner, Dos Passos, Wolfe, Bellow, and Nabokov.

Prerequisite(s): Satisfaction of University requirements in 100-level English and in Mason Core literature.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ENGH 345 - American Drama of the 20th Century

Credits: 3
Not Repeatable for Credit
Offered by English
American drama of 20th century, with special attention to playwrights such as Glaspell, O'Neil, Miller, Williams, Fornes, and Albee.

Prerequisite(s): Satisfaction of University requirements in 100-level English and in Mason Core literature.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ENGH 346 - American Poetry of the 20th Century

Credits: 3
Not Repeatable for Credit
Offered by English
Emphasizes work of Robinson, Frost, Stevens, Williams, Pound, Crane, Eliot, and Lowell. May include work of fiction employing poetic techniques, such as Faulkner's *The Sound and the Fury*.

Prerequisite(s): Satisfaction of University requirements in 100-level English and in Mason Core literature.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ENGH 348 - Beginnings of African American Literature Through 1865

Credits: 3
Not Repeatable for Credit
Offered by English
Concentrating on such poets as Phillis Wheatley, Jupiter Hammon, Lucy Terry, and George Moses Horton, examines significant
African American literary, social, and political texts produced through 1865. Special attention to narrative accounts of enslavement and freedom by Frederick Douglass, Harriet Jacobs, and Olaudah Equiano; political writings and orations of David Walker and Sojourner Truth; fiction of Harriet Wilson and William Wells Brown; and nonwritten cultural artifacts such as slave songs and spirituals.

Prerequisite(s): Satisfaction of University requirements in 100-level English and in Mason Core literature.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ENGH 349 - African American Literature: Reconstruction to 1903

Credits: 3
Not Repeatable for Credit
Offered by English

Prerequisite(s): Satisfaction of University requirements in 100-level English and in Mason Core literature.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ENGH 350 - African American Literature Through 1946

Credits: 3
Not Repeatable for Credit
Offered by English
Focusing on fiction, poetry, drama, and autobiography, explores evolution of African American literature and aesthetics and major social, cultural, and historical movements such as the Harlem Renaissance of the 1920s and emergence of black naturalism, realism, and modernism in the 1930s-40s. Major authors include Zora Neale Hurston, Langston Hughes, Jessie Fauset, James Weldon Johnson, Jean Toomer, Nella Larsen, Margaret Walker, Chester Himes, Richard Wright, and Ann Petry.

Prerequisite(s): Satisfaction of University requirements in 100-level English and in Mason Core literature.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ENGH 351 - Contemporary African American Literature

Credits: 3
Not Repeatable for Credit
Offered by English
Encompassing array of genres and forms, examines black writing from mid-20th century to present. Engages textual, critical,
political, and theoretical issues related to cardinal literary movements, such as Black Arts Movement of 1960s and Third Renaissance of 1980s-90s. Examines how musical forms such as blues, jazz, and rap shaped literary production. Major authors include Ralph Ellison, Gwendolyn Brooks, James Baldwin, Lorraine Hansberry, Amiri Baraka, Alice Walker, Ernest Gaines, Gloria Naylor, August Wilson, and Toni Morrison.

Prerequisite(s): Satisfaction of University requirements in 100-level English and in Mason Core literature.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ENGH 352 - Topics in Ethnic American Literature

Credits: 3
Repeatable within Term for Credit
Offered by English
Studies particular ethnic American literatures. Focuses on literatures such as Asian American, Native American, Latino/a, Arab American, or Jewish American.

Prerequisite(s): Satisfaction of University requirements in 100-level English and in Mason Core literature.

Repeatable within Term for Credit
Offered by English
Under supervision of a faculty director, students report and reflect on their work as interns at organizations of their choosing, usually in writing and/or editing positions. For 3 credits, students work on site at least 135 hours as specified in the agreement developed with the internship supervisor and approved by the faculty director.

Prerequisite(s): Permission of internship director. 60 credits. English majors need 18 credits of English (3 credits of 100-level English course; 3-6 credits of 200-level English courses; 3 credits of ENGL 302/ENGH 302, and 6-9 credits of upper-level English courses). Non-English majors must meet the same requirements, except that they replace one upper-level English course with an upper-level course in their major.

Notes: Contact the English Department one semester prior to enrollment. No more than 3 credits can be counted in concentration or English minor. May be repeated for a total of 6 credits with permission of department.

Schedule Type: INT,
LEC
Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 1-9
When Offered: Fall, Spring

ENGH 470 - RS: Topics in Film/Media History

Credits: 3
Repeatable within Term for Credit
Offered by English
Advanced studies of development of film language, both as cultural practice and medium for formal innovation. Topics might include studies of national cinemas, historical periods, genres, or individual directors.

Designated as a research and scholarship intensive course.

Prerequisite(s): ENGL 332/ENGH 372 or permission of instructor
Notes: May be repeated for a maximum of 6 credits when topic is different.
ENGH 472 - Topics in Film/Media Theory

Credits: 3
Repeatable within Term for Credit
Offered by English
Advanced studies of theories about various aspects of production, distribution, and reception of film-mediated experiences. Topics may include theories of spectator, semiotics, feminist film theory, theories of narrativity, structuralist film theory, or deconstruction.

Prerequisite(s): ENGL 332/ENGH 372 or permission of instructor.
Notes: May be repeated for a maximum of 6 credits when topic is different.

ENGH 474 - Topics in Film/Media Studies

Credits: 3
Repeatable within Term for Credit
Offered by English
American and foreign films selected by type, period, or director with emphasis varying from year to year. Required viewings, student discussion, and written critiques.

Prerequisite(s): ENGL 332/ENGH 372 or permission of instructor.
Notes: May be repeated for a maximum of 6 credits with permission of department.

ENGH 483 - Technical Editing

Credits: 3
Not Repeatable for Credit
Offered by English
Instruction in revising, editing, and preparing specialized writing for print production. Emphasizes methods of achieving clarity, accuracy, and completeness. Lecture and discussion on editing and printing techniques; practical exercise in revision, layout, and production.

Schedule Type: SEM
**ENGH 484 - RS: Writing Ethnography**

Credits: 3  
Not Repeatable for Credit  
Offered by English  
Study and practice of ethnographic writing. Students conduct ethnographic investigations and practice journal keeping, field note recording, interviewing, transcription, and interpretation. Includes introduction to current issues in ethnographic writing.

Designated as a research and scholarship intensive course.

**Prerequisite(s):** ENGH 302.  
**Schedule Type:** LEC  
**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**ENGH 485 - Document Design**

Credits: 3  
Not Repeatable for Credit  
Offered by English  
Theory and practice of using computer programs to design and produce publications including brochures, fliers, newsletters, and small magazines. Includes readings, writing papers, and producing and editing copies and original publications.

**Schedule Type:** SEM  
**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**ENGH 486 - RS: Writing Nonfiction for Publication**

Credits: 3  
Not Repeatable for Credit  
Offered by English  
Workshop course. Intensive practice in advanced nonfiction writing; emphasizes writing for publication. Occasional special topics sections in such forms as autobiography and scientific writing.

Designated as a research and scholarship intensive course.

**Prerequisite(s):** ENGL 309/ENGH 382 or ENGL 399/ENGH 399 or permission of instructor.  
**Schedule Type:** LEC  
**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0
ENGH 488 - Topics in Writing and Rhetoric

Credits: 3
Repeatable within Degree for Credit
Offered by English
Advanced studies in rhetoric and writing. Introduces key rhetorical terminology and examines how texts construct meaning and how those meanings are determined within social contexts. Topics may include the relationship between rhetorics and poetics, rhetoric and new media, histories of rhetoric, global rhetorics, argument theory, discourse analysis, theories of technical communication, or advanced theories of composition and pedagogy.

Prerequisite(s): Satisfaction of University requirements in 100-level English and in Mason Core literature.
Notes: May be repeated for a maximum of 6 credits when topic is different with permission of department.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ENGH 489 - Proposal Writing and Development

Credits: 3
Not Repeatable for Credit
Offered by English
Provides foundation in the skills and knowledge required to effectively create proposals for various types of organizations. Emphasizes best practices in management, presentation, and research skills necessary to find funding, manage proposal efforts, and build relationships with funders. Reviews editing, concision, and technical writing skills required for proposal writers.

Prerequisite(s): ENGH 302.
Schedule Type: SEM
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ENGH 492 - Advanced Fiction Writing Workshop

Credits: 3
Repeatable within Degree for Credit
Offered by English
Workshop; intensive practice in creative writing and study of creative process. Intended for students already writing original creative work.

Prerequisite(s): ENGL 398/ENGH 398 and manuscript review.
Notes: Enrollment is controlled. Submit 8-10 pages of fiction to instructor for review. May be repeated for a maximum of 6 credits with permission of instructor.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
**ENGH 493 - Advanced Workshop in Nonfiction**

Credits: 3  
Repeatable within Degree for Credit  
Offered by English  
Workshop in varieties of nonfiction, along with creative process and techniques such as research and interview methods. Includes reading and writing of essays, biographies, autobiographies, travel, journalism, etc.

**Prerequisite(s):** ENGH 396, ENGH 399  
**Notes:** Registration is controlled. Submit 8-10 pages of nonfiction to instructor for review. May be repeated for a maximum of 6 credits.

**Schedule Type:** LEC  
**Hours of Lecture or Seminar per week:** 3

**ENGH 494 - Advanced Poetry Writing Workshop**

Credits: 3  
Repeatable within Degree for Credit  
Offered by English  
Intensive practice in the craft of poetry and study of the imagination in creative process. Intended for students already writing original poetry.

**Prerequisite(s):** ENGL 397/ENGH 397 and manuscript review.  
**Notes:** Enrollment is controlled. Submit 8-10 pages of poetry to instructor for review. May be repeated for a maximum of 6 credits with permission of instructor.

**Schedule Type:** LEC  
**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**ENGH 495 - Capstone and Thesis**

Credits: 3  
Not Repeatable for Credit  
Offered by English  
Presentations of original work for critique by peers and faculty. Students synthesize what they have learned during prior work in the program through workshops for final revisions of manuscripts for the BFA portfolio. Students submit the revised manuscripts as their final submission for evaluation by faculty. Students receive guidance in research methods as they investigate the lives of writers and learn the procedures for such tasks as submitting original work for publication and applying for jobs.

**Prerequisite(s):** ENGH 396; ENGH 391, 392, or 393; ENGH 397, 398, and 399.  
**Schedule Type:** LEC  
**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0
**ENGH 497 - Topics in Creative Writing**

Credits: 3  
Repeatable within Term for Credit  
Offered by English  
Intensive practice in creative writing and study of creative process. Workshop course. Concentrates on specialized literary type other than short story or poetry such as playwriting, screenwriting, children's literature, travel literature, autobiography, gothic novel, or translation.

**Prerequisite(s):** ENGL 396/ENGH 396 or equivalent and permission of instructor.  
**Notes:** For students already writing original creative work. Students must submit typed manuscript at least one week before registration. May be repeated for a maximum of 6 credits.

**Schedule Type:** LEC  
**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**ENGH 499 - Independent Study**

Credits: 1-6  
Repeatable within Term for Credit  
Offered by English  
Intensive study of particular author, genre, period, or critical or theoretical problem in literature or linguistics, to be conducted by student in close consultation with instructor. Student produces at least one substantial piece of written work during semester on research findings.

**Prerequisite(s):** Permission of department and instructor.  
**Notes:** Individualized section form required. May be repeated for a maximum of 6 credits with approval of department.

**Schedule Type:** IND  
**Hours of Lecture or Seminar per week:** 1-6  
**Hours of Lab or Studio per week:** 0

---

**ENGH 501 - Introduction to Professional Writing and Rhetoric**

Credits: 3  
Not Repeatable for Credit  
Offered by English  
Provides historical and theoretical background in professional writing and editing in a seminar format. Explores professional writing's emergence as a field of scholarship and practice, emphasizes the relationships between rhetorical theories and practice, and introduces students to bibliographic research in the field.

**Schedule Type:** LEC  
**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

Credits: 3
Repeatable within Degree for Credit
Offered by English
Instruction in revising, editing, and preparing specialized writing for printing. Emphasizes methods of achieving clarity, accuracy, and completeness. Lecture and discussion on editing and printing techniques; practical exercise in revision, layout, and production.

Notes: May be repeated for a maximum of 6 credits when topic is different.

Schedule Type: LEC  
Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0

ENGH 504 - Internship

Credits: 1-6
Repeatable within Degree for Credit
Offered by English
Under supervision of a faculty director, students report and reflect on their work as interns at organizations of their choosing, usually in writing and/or editing positions. For 3 credits, students work on site at least 135 hours as specified in the agreement developed with the internship supervisor and approved by the faculty director.

Prerequisite(s): Permission of internship director.
Notes: Contact the English Department one semester prior to enrollment. May be repeated for a maximum of 6 credits.

Schedule Type: INT  
Hours of Lecture or Seminar per week: 1-6  
Hours of Lab or Studio per week: 0  
When Offered: Fall, Spring

ENGH 505 - Document Design
Theory and practice of using computer programs to design and produce publications including brochures, fliers, newsletters, and small magazines. Includes readings, writing papers, and producing and editing copies and original publications.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ENGH 506 - Research for Narrative Writing

Combines study of basic research tools with field work and writing workshop experience. Helps students develop techniques and skills necessary for writing a research-dependent project of sufficient complexity to be of book or long essay length. Emphasis on finding story behind facts, using material from numerous sources.

Schedule Type: LEC, SEM
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ENGH 507 - Web Authoring and Design

Provides a rhetorical foundation for web authoring and design in professional settings. Teaches basic principles of writing for the web, information architecture, coding for accessibility, and usability testing. Production-oriented component provides instruction in writing valid code and practice with web- and graphic-editing software tools.

Schedule Type: INT, LEC, SEM
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ENGH 508 - Digital Rhetoric

Provides an examination of major works on digital rhetoric and digital media framed by contemporary rhetorical theories that inform the emergent field of digital rhetoric. Course work includes projects that engage in the design, analysis, and assessment of digital media.
ENGH 509 - Proposal Writing and Development

Credits: 3
Not Repeatable for Credit
Offered by English
Provides foundation in the skills and knowledge required to effectively create proposals for various types of organizations. Emphasizes best practices in management, presentation, and research skills necessary to find funding, manage proposal efforts, and build relationships with funders. Reviews editing, concision, and technical writing skills required for proposal writers.

Credits: 3  
Not Repeatable for Credit  
Offered by English  
Presents historically based introduction to major debates within feminist theory and criticism. Stressing gender in literature and its interpretation, explores diverse collection of feminist interpretive practices.

**Schedule Type:** SEM  
**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**ENGH 676 - Introduction to Cultural Studies**

Credits: 3  
Not Repeatable for Credit  
Offered by English  
Advanced introduction to theoretical practice known as cultural studies, with attention to role in textual studies. Part of interdisciplinary cultural studies PhD and MA in English programs.

**Schedule Type:** LEC  
**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**ENGH 681 - Advanced Topics in Folklore Studies**

Credits: 3  
Repeatable within Degree for Credit  
Offered by English  
Explores advanced folklore and folklife topics such as bodylore, sense of place, festival, folk drama, and folk narrative studies.
Notes: May be repeated for a maximum of 12 credits when topic is different.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

**ENGH 684 - Proseminar in Poetry**

Credits: 3
Repeatable within Degree for Credit
Offered by English
For students working on independent reading and research in poetry. Designed for students preparing to take the MFA reading exam in poetry but open to others with comparable reading projects in poetry.

Notes: May be repeated for a maximum of 6 credits.

Schedule Type: SEM
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
Grading: Satisfactory/No credit only

**ENGH 685 - Selected Topics, Movements, or Genres of Literature in English**

Credits: 3
Repeatable within Term for Credit
Offered by English
Content varies.

Notes: May be repeated for a maximum of 12 credits with permission of department.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**ENGH 689 - Advanced Proposal Writing**

Credits: 3
Repeatable within Degree for Credit
Offered by English
Introduces the federal contract and grants proposal process and provides an overview of the federal acquisition process, the capture and proposal management processes, and best practices for writing winning proposals in the federal arena. Students work individually and in teams to write and manage proposals.

Prerequisite(s): ENGH 509.
Notes: May be repeated for a maximum of 6 credits.
ENH 690 - Special Topics in Writing and Rhetoric

Credits: 3
Repeatable within Term for Credit
Offered by English
Includes readings and discussion in a wide range of topics related to writing and rhetoric. May focus on a specific theory, method or practice in writing and rhetoric.

Notes: May be repeated for credit when topic varies.

ENH 695 - Northern Virginia Writing Project Inservice Program

Credits: 1-3
Repeatable within Term for Credit
Offered by English
Offered at request of school division or other education agency to assist teachers in improving student writing and use of writing to learn.

Equivalent to EDUC 695.

Prerequisite(s): Admission to graduate program, or permission of department.
Notes: Content varies. May be repeated for credit with permission of department.

ENH 696 - Northern Virginia Writing Project Teacher/Research Seminar

Credits: 3
Not Repeatable for Credit
Offered by English
Acquaints classroom teachers with current research on composing as well as methods of studying writing in school settings. Participants collect data and write up results of their research.

Prerequisite(s): ENGL 615/ENGH 615, ENGL 695/ENGH 695, the Northern Virginia Writing Project Summer Institute, or other course in the teaching of writing.
Schedule Type: SEM
ENGH 697 - Composition Theory

Credits: 3
Not Repeatable for Credit
Offered by English
Acquaints classroom teachers with theory relating to writing and teaching composition. Focuses on explaining theories of participants, reading works of leading theorists, and developing statement describing implications of theoretical consistency in teaching writing.

Equivalent to EDUC 697 and ENGL 697 (2014-2015 Catalog)

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ENGH 699 - Workshop in English

Credits: 1-3
Repeatable within Term for Credit
Offered by English
Concentrated workshops, educational tours, independent studies, and special seminars dealing with selected topics in writing, linguistics, film, electronic media, and literature written in English.

Prerequisite(s): Admission to MFA program or permission of department.
Notes: All tours are optional, and may be replaced by specified work conducted on campus. May be repeated for a maximum of 12 credits with permission of department, but no more than 6 credits of ENGH 699 may be applied to master's degree in English. No more than 3 credits of 699 may be applied to literature requirement for MFA degree.

Schedule Type: SEM
Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0

ENGH 701 - Research in English Studies

Credits: 3
Not Repeatable for Credit
Offered by English
Introduces research in English studies, including practice in library methods, writing critical bibliography, evaluating issues and problems, and surveying scholarly activities in department.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
ENGH 702 - Research Methods in Rhetoric and Writing

Credits: 3
Not Repeatable for Credit
Offered by English
Explores a variety of text-based and empirical approaches and methods for addressing questions and problems related to public rhetoric and writing programs. Seminar participants work through a complete research design and pilot study.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ENGH 705 - Literary Theory and Criticism

Credits: 3
Repeatable within Degree for Credit
Offered by English
Major theories of literature and methods of analyzing and evaluating literary works.

Notes: Topics vary. May be repeated for a maximum of 6 credits when topic is different with permission of department.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ENGH 720 - Histories of Institutional Rhetorics

Credits: 3
Not Repeatable for Credit
Offered by English
Examines the development of rhetorics within their historical and institutional contexts. Investigates rhetoric and rhetoricians across the development of oral rhetorics and the shift to written genres, the rise of scientific discourses, and the establishment of educational and bureaucratic organizations.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ENGH 722 - Composition Pedagogies and Programs in Context

Credits: 3
Not Repeatable for Credit
Offered by English
Examines scholarship on pedagogy, curriculum design and assessment, faculty development, and program management related to
the practice of teaching or training writers in an institutional setting: two- and four-year colleges, K-12 schools, and workplace training seminars. Students will complete independent projects analyzing a current or potential writing program.

**Schedule Type:** LEC  
**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**ENGH 724 - Professional Writing Theory and Research**

Credits: 3  
Not Repeatable for Credit  
Offered by English  
Examines current research in the field and the theories that inform it. Special emphasis is placed on workplace contexts and users in technological contexts. Course may include theories and methods such as activity theory, actor-network theory, complexity theory, cross-cultural rhetoric, digital rhetoric, discourse analysis, ethnography, genre theory, usability, and systems theory.

**Schedule Type:** LEC  
**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**ENGH 726 - Rhetorical Theory and Public Spaces**

Credits: 3  
Not Repeatable for Credit  
Offered by English  
Covers the major theories of public rhetoric and the public sphere; explores how rhetoric influences public perceptions; examines publics as a site of interpretive mediation.

**Schedule Type:** LEC  
**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**ENGH 740 - Seminar in English/Cultural Studies**

Credits: 3  
Repeatable within Degree for Credit  
Offered by English  
Analyzes historical shifts in literary and cultural discourse or of relationships between literary and nonliterary elements of culture within specific historical moment.

**Prerequisites:** 9 credits of graduate English courses including ENGL 701/ENGH 701, or permission of department.  
**Notes:** Major research paper required. Topics vary. May be repeated for a maximum of 6 credits when topic is different with permission of department.

**Schedule Type:** LEC  
**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0
ENGH 750 - Advanced Workshop in Poetry Writing

Credits: 3
Repeatable within Degree for Credit
Offered by English
Intensive practice in craft of poetry for experienced writers.

Prerequisite(s): Admission to MFA concentration in poetry, ENGL 564/ENGH 564, and ENGL 617/ENGH 617.
Notes: May be repeated for credit with permission of department.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ENGH 751 - Advanced Workshop in Fiction Writing

Credits: 1-6
Repeatable within Degree for Credit
Offered by English
Intensive practice in craft of fiction for experienced writers.

Prerequisite(s): Admission to MFA concentration in fiction, ENGL 566/ENGH 566, and ENGL 618/ENGH 618.
Notes: May be repeated for credit with permission of department.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 0

ENGH 752 - Advanced Workshop in Nonfiction Writing

Credits: 1-6
Repeatable within Degree for Credit
Offered by English
Intensive practice in craft of nonfiction for experienced writers.

Prerequisite(s): Admission to MFA concentration in nonfiction, ENGL 565/ENGH 565 and ENGL 616/ENGH 616.
Notes: May be repeated for credit with permission of department.

Schedule Type: SEM
Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 0

ENGH 790 - Projects in Literary Studies
Credits: 3
Not Repeatable for Credit
Offered by English
Students complete a capstone project guided by instructor and a faculty consultant based on work produced in a previous graduate course. Class meetings focus on building skills in research, revision, and editing, discussing topics related to professionalization both in and out of academia, and revising work in a workshop environment. Students will produce a professional-quality article or similar final project.

Prerequisite(s): 21 credits in MA coursework including ENGH 701, permission of instructor.
Schedule Type: SEM
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
Grading: Satisfactory/No Credit
When Offered: Spring.

ENGH 797 - Projects in Professional Writing and Rhetoric

Credits: 3
Not Repeatable for Credit
Offered by English
Students complete a capstone project guided by instructor and a faculty consultant. Reflecting on theories and methods learned in previous course work and applying them to a concrete rhetorical situation, students produce a professional-quality project for a primary audience located in the professional workplace or the discipline of rhetoric and professional writing.

Prerequisite(s): 21 credits in MA coursework, including the core, theory, PWR and Writing requirements, or permission of instructor.
Schedule Type: SEM
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
Grading: S/NC

ENGH 798 - Directed Reading and Research

Credits: 1-6
Repeatable within Term for Credit
Offered by English
Reading, research, and writing on specific project under direction of department member.

Notes: Oral or written report required. For MA students: May be repeated for a maximum of 6 credits with permission of department. For MFA students: May be repeated for a maximum of 12 credits; 12 credits may be applied to the MFA requirements but no more than 3 credits may count toward completing the literature requirement.

Schedule Type: IND
Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0
Grading: Graduate Special
**ENGH 799 - Thesis**

Credits: 1-6  
Repeatable within Degree for Credit  
Offered by English  
Students who take ENGH 798 to develop thesis topic and then elect thesis option receive 3 credits for ENGH 799 on completion of thesis. Students who do not take ENGH 798, or who take it to work on project unrelated to thesis, receive up to 6 credits for ENGH 799 on completion of thesis.

**Schedule Type:** IND  
**Hours of Lecture or Seminar per week:** 1-6  
**Hours of Lab or Studio per week:** 0  
**Grading:** S/NC

**ENGH 821 - Writing Program Design and Administration**

Credits: 3  
Not Repeatable for Credit  
Offered by English  
Examines the theory and practice of writing program leadership. Investigates the principles that inform faculty support, curriculum development, program assessment, institutional alignment, and leadership approaches with regard to administering writing instruction.

**Schedule Type:** SEM  
**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**ENGH 822 - Studies in Composition**

Credits: 3  
Repeatable within Term for Credit  
Offered by English  
Offers advanced study of theoretical, practical, or pedagogical topics related to composition.

**Notes:** May be repeated for a maximum of 12 credits when topic is different.

**Schedule Type:** LEC  
**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**ENGH 824 - Studies in Professional Writing**

Credits: 3  
Repeatable within Term for Credit  
Offered by English  
Offers advanced study of theoretical, practical, or pedagogical topics related to professional writing and technical
communication.

Notes: May be repeated for a maximum of 12 credits when topic is different.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**ENGH 826 - Studies in Public Rhetorics**

Credits: 3
Repeatable within Term for Credit
Offered by English
Offers advanced study of theoretical, practical, or pedagogical topics related to public rhetorics.

Notes: May be repeated for a maximum of 12 credits when topic is different.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**ENGH 897 - Directed Research**

Credits: 1-3
Repeatable within Degree for Credit
Offered by English
Reading, research, and writing on a specific project under direction of faculty member.

Prerequisite(s): Permission of Instructor.
Schedule Type: IND
Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0
Grading: Satisfactory/No Credit

**ENGH 898 - Qualifying Exams Seminar**

Credits: 1-3
Repeatable within Degree for Credit
Offered by English
Work on PhD qualifying exams.

Prerequisite(s): Completion of 36 credits in coursework in the writing and rhetoric PhD Program.
Schedule Type: IND
Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0
Grading: Satisfactory/No Credit.
ENGH 998 - Doctoral Dissertation Proposal

Credits: 1-6
Repeatable within Degree for Credit
Offered by English
Work on research proposal that forms the basis for the doctoral dissertation.

Prerequisite(s): Advancement to candidacy.
Schedule Type: IND
Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 0
Grading: Satisfactory/No Credit

ENGH 999 - Doctoral Dissertation

Credits: 1-12
Repeatable within Degree for Credit
Offered by English
Doctoral dissertation research and writing under direction of student's dissertation committee.

Prerequisite(s): Completion of ENGH 898.
Schedule Type: IND
Hours of Lecture or Seminar per week: 1-12
Hours of Lab or Studio per week: 0
Grading: Satisfactory/No Credit

English for Academic Purposes (EAP)

Offered by the Provost's Office

EAP 097 - Verbal Preparation for the Graduate Record Examination

Credits: 0
Repeatable within Degree
Offered by INTO Mason
Prepares students in the International Graduate Pathways requiring the general Graduate Record Examination test for progression to take the computer adaptive version of the exam where the emphasis is placed primarily on the verbal section. This course primarily emphasizes the verbal portion of the exam along with test language and testing strategies; identifying common test-taking errors; and managing in test anxiety.

Schedule Type: SEM
Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 0
Grading: Satisfactory/No Credit
When Offered: Fall, Summer, Spring
EAP 098 - Individualized Language Instruction

Credits: 0
Repeatable within Degree
Offered by INTO Mason
Individualized language instruction for Pathway students. Focus on reading, writing, listening, and speaking skills.

Equivalent to PROV 098 (2014-2015 Catalog).

Schedule Type: IND
Grading: Satisfactory/No Credit
When Offered: Fall, Summer, Spring

EAP 099 - Individualized Language Instruction

Credits: 0
Repeatable within Degree
Offered by INTO Mason
Individualized language instruction for Pathway students. Focus on reading, writing, listening, and speaking skills.

Equivalent to PROV 099 (2014-2015 Catalog).

Schedule Type: IND
Grading: Satisfactory/No Credit
When Offered: Fall, Summer, Spring

EAP 102 - Language Support for American Cultures

Credits: 1
Repeatable within Degree for Credit
Offered by INTO Mason
Academic language support course for Undergraduate Pathways students taking American Cultures. Designed to increase students' ability to comprehend and respond to readings, discussions, and lectures related to American Cultures. Emphasizes the development of successful strategies for intrapersonal and small/large group communication activities, student familiarity with anthropological and sociological terminology and effective application of reading /annotating strategies. Also listed as PROV 102.

Corequisite(s): PROV 105.

Notes: Students must attain minimum grade of C to fulfill program requirements.

Schedule Type: SEM
Hours of Lecture or Seminar per week: 1.5
Hours of Lab or Studio per week: 0
When Offered: Fall, Summer, Spring
EAP 103 - Language Support for Public Speaking

Credits: 1
Repeatable within Degree for Credit
Offered by INTO Mason
Academic language support course for Public Speaking. Focus on increasing students' comprehension and use of key grammatical structures, vocabulary, word forms, and reading/annotating strategies in oral speech.

Equivalent to PROV 103 (2014-2015 Catalog).

Corequisite(s): COMM 100.

Notes: Students must attain minimum grade of C to fulfill program requirements.

Schedule Type: SEM
Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0
When Offered: Fall, Summer, Spring

EAP 104 - Language Support World History

Credits: 1
Repeatable within Degree for Credit
Offered by INTO Mason
Academic language support course for Introduction to World History. Focus on increasing students' comprehension and use of key grammatical structures, vocabulary, word forms, and reading/annotating strategies in literacy/reading.

Equivalent to PROV 104 (2014-2015 Catalog).

Corequisite(s): HIST 125.

Notes: Students must attain minimum grade of C to fulfill program requirements.

Schedule Type: SEM
Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0
When Offered: Fall, Summer, Spring

EAP 107 - The Grammar of Academic Writing

Credits: 3
Repeatable within Degree for Credit
Offered by INTO Mason
This course is designed to improve students' understanding of written language and to provide mechanisms that allow students to take advantage of this flexible but structured form of communication. Providing this knowledge and these tools will improve students' abilities to identify and correct grammatical mistakes, write cohesive and coherent paragraphs, and condense essential information-necessary skills for effective academic writing.

EAP 108 - Language Support for Business in American Society

Credits: 1  
Repeatable within Degree for Credit  
Offered by INTO Mason  
Academic language support course for Undergraduate Pathway students taking Business in American Society. This course is designed to increase students' ability to read and analyze qualitative and quantitative information, understand and use business terminology, and utilize oral English fluency and literacy practices/strategies in anticipation of group discussions, debates, and oral/written critiques of business-related current events. Also listed as PROV 108.

Corequisite(s): SOM 100.

Notes: Students must attain minimum grade of C to fulfill program requirements.

Schedule Type: SEM  
Hours of Lecture or Seminar per week: 1.5  
Hours of Lab or Studio per week: 0  
When Offered: Fall, Summer, Spring

EAP 109 - College Reading Skills

Credits: 1  
Repeatable within Degree for Credit  
Offered by INTO Mason  
Academic reading support for Undergraduate Pathways students in specific pathways. Designed to increase students' ability to read, summarize, and analyze texts, including information graphics and visuals. Focuses on student comprehension and utilization of discipline-specific genres/terminology and effective literacy practices/strategies in anticipation of group discussions, reading research, and responding to writing assignments. Also listed as PROV 109.

Corequisite(s): See advisor for approved corequisite courses for specific pathways.

Notes: Students must attain minimum grade of C to fulfill program requirements.

Schedule Type: SEM  
Hours of Lecture or Seminar per week: 1.5  
Hours of Lab or Studio per week: 0  
When Offered: Fall, Summer, Spring

EAP 111 - Language Support for Introduction to Information Technology
EAP 111 - Language Support for Information Technology

Credits: 1
Repeatable within Degree for Credit
Offered by INTO Mason
Academic language support for Undergraduate Pathways students taking Information Technology. Designed to increase students' IT literacy, including familiarity and accurate usage of terms related to digital devices, computer hardware, software, telecommunications, networking and multimedia. Supports students' oral and written academic English skills in anticipation of class lectures, textbook readings, individual assignments, and online discussion boards. Also listed as PROV 111.

Corequisite(s): IT 101.

Notes: Students must attain minimum grade of C to fulfill program requirements.

Schedule Type: SEM
Hours of Lecture or Seminar per week: 1.5
Hours of Lab or Studio per week: 0
When Offered: Fall, Summer, Spring

EAP 112 - Language Support for Introduction to Computer Programming

Credits: 1
Repeatable within Degree for Credit
Offered by INTO Mason
Academic language support for Undergraduate Pathways students taking Computer Programming. This course is designed to increase students' ability to respond accurately to computer programming problems in English, understand and use programming terminology, and utilize oral English fluency and literacy practices/strategies in anticipation of class lectures, lab work, individual assignments, and online discussion boards. Also listed as PROV 112.

Corequisite(s): CS 112.

Notes: Students must attain minimum grade of C to fulfill program requirements.

Schedule Type: SEM
Hours of Lecture or Seminar per week: 1.5
Hours of Lab or Studio per week: 0
When Offered: Fall, Summer, Spring

EAP 113 - Language Support for University Physics

Credits: 1
Repeatable within Degree for Credit
Offered by INTO Mason
Academic language support course for Undergraduate Pathways students taking program University Physics I. This course is designed to increase students' ability to respond accurately to physical problems in English, understand and use mathematical and physics terminology, and utilize oral English fluency and literacy practices/strategies in anticipation of class lectures, lab/recitation work, and online discussion boards. Also listed as PROV 113.

Corequisite(s): PHYS 160 and PHYS 161.

Notes: Students must attain minimum grade of C to fulfill requirements.
EAP 114 - Language Support for General Chemistry I

Credits: 1
Repeatable within Degree for Credit
Offered by INTO Mason
Academic language support for Undergraduate Pathways students taking General Chemistry I. This course is designed to increase students' ability to read and comprehend qualitative and quantitative information, understand and use general science and chemistry-related terminology, set-up and solve numerical problems in English, and take notes from oral lectures and textbook chapters. Also listed as PROV 114.

Corequisite(s): CHEM 211.

Notes: Students must attain minimum grade of C to fulfill requirements.

Schedule Type: SEM
Hours of Lecture or Seminar per week: 1.5
Hours of Lab or Studio per week: 0
When Offered: Fall, Summer, Spring

EAP 115 - Language Support for Introductory Geology I

Credits: 1
Repeatable within Degree for Credit
Offered by INTO Mason
Academic language support for Undergraduate Pathways students taking Introductory Geology I. This course is designed to increase students' ability to read and comprehend qualitative and quantitative information in English, understand and use general science and geology-related terminology, take notes from oral lectures and textbook chapters, and participate in group discussions. Also listed as PROV 115.

Corequisite(s): GEOL 101.

Notes: Students must attain minimum grade of C to fulfill program requirements.

Schedule Type: SEM
Hours of Lecture or Seminar per week: 1.5
Hours of Lab or Studio per week: 0
Grading: Satisfactory/No Credit
When Offered: Fall, Summer, Spring

EAP 120 - Linguistics Capstone
Credits: 0
Repeatable within Degree for Credit
Offered by INTO Mason
Required to complete all standard undergraduate pathways. Provides students with opportunity to demonstrate mastery of English language skills in reading, writing, speaking, listening, grammar and/or vocabulary. Builds on work in language support classes. Includes language assessment, feedback on skills, and review of post-program support. Required during second semester of the Undergraduate Pathways program. Also listed as PROV 120.

Notes: A passing grade of "S" confirms the student's English language proficiency is sufficient for degree-seeking study.

Schedule Type: SEM
Hours of Lecture or Seminar per week: 0.5
Hours of Lab or Studio per week: 0
Grading: Satisfactory/No Credit
When Offered: Summer, Spring

EAP 503 - Interpersonal Communication for International Students: Practicum and Theory

Credits: 2
Not Repeatable for Credit
Offered by INTO Mason
The course requires that students use intensive practice in oral communication contexts typical at universities to build knowledge and skills for informal interpersonal communication settings with faculty, peers, and students, and skills needed for formal presentations, class discussion, and tutoring. Readings & assignments cover research on first impression management; informative and explanatory communication; conveying emotional support; listening, and narrative skill.

Equivalent to PROV 503 (2013-2014 Catalog).

Prerequisite(s): Completion of undergraduate degree at a university outside of the US.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 0
When Offered: Fall, Summer, Spring

EAP 504 - Advanced English for Academic Purposes Reading and Writing

Credits: 2
Not Repeatable for Credit
Offered by George Mason University
This 8-week course is designed for graduate international students who are studying abroad, emphasizing advanced skill development in graduate-level English for Academic Purposes for reading and writing within their disciplines. Utilizing a multimodal and interactive format, students will complete guided and independent research papers as well as read, discuss and write about excerpts from college texts and academic journals.

Notes: In as much as possible, materials for the course will be discipline specific and individualized course goals will be determined by the needs of the students and their cultural experiences.
EAP 505 - Special Topics in Advanced English for Academic Purposes

Credits: 2
Not Repeatable for Credit
Offered by INTO Mason
This special topics course is tailored to international students who received their undergraduate degrees outside the United States. The course provides intensive practice and individualized feedback in advanced communication methods appropriate at the graduate level.

Equivalent to PROV 505 (2013-2014 Catalog).

Prerequisite(s): Completion of undergraduate degree at a university outside of the US.

EAP 506 - Graduate Communication in the Disciplines I

Credits: 3-4
Not Repeatable for Credit
Offered by INTO Mason
Students develop strategies for completing research-based writing and presentations in their field and review rhetorical structures and organizational strategies common to US scholarly communications generally and in their particular field. Students will practice strategies at the sentence and discourse levels to increase the clarity, precision, and appropriateness of their communication skills. Group instruction will be supplemented by one-on-one conferencing.

Prerequisite(s): Completion of undergraduate degree at a university outside of the US.

EAP 507 - Graduate Communication in the Disciplines II

Credits: 3 or 4
Not Repeatable for Credit
Offered by INTO Mason
The second course in a series that helps students develop strategies for completing research-based writing and presentations in their field. Students will review rhetorical structures and organizational strategies common to US scholarly communications generally and in their particular field. Students will also practice strategies at sentence and discourse levels to increase the clarity, precision, and appropriateness of their communication skills.
Prerequisite(s): EAP 506.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 4
Hours of Lab or Studio per week: 0
When Offered: Fall, Summer, Spring

**EAP 508 - Graduate Communication in the Disciplines III**

Credits: 4
Not Repeatable for Credit
Offered by INTO Mason

Students develop strategies for completing research-based writing and presentations in their field. Students will review rhetorical structures and organizational strategies common to US academic scholarly communications generally and in their particular field. Students will also review and practice strategies at the sentence and discourse levels to increase the clarity, precision and appropriateness of their oral and written communication skills. Group instruction will be supplemented by one-on-one conferencing as students complete a major graduate-level project.

Prerequisite(s): Completion of undergraduate degree at a university outside the United States.
Notes: This course may not count towards academic degree requirements at the graduate level without permission from the academic dean/director.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 4
Hours of Lab or Studio per week: 0
When Offered: Fall, Summer, Spring

**EAP 510 - Linguistic Capstone**

Credits: 0
Not Repeatable for Credit
Offered by INTO Mason

Course builds on work in language support classes throughout the program and enables students to demonstrate acceptable mastery of their academic English language skills in reading, writing, speaking, listening, grammar, and vocabulary. Students take proficiency assessment receive feedback on skills, and review post-program language support resources.

Prerequisite(s): Standard pathway students must have completed first semester of program, or at least 9 credits.
Schedule Type: SEM
Grading: Satisfactory/No Credit
When Offered: Fall, Summer, Spring

**Environmental Science and Public Policy (EVPP)**

Offered by the College of Science

See additional course work under Biology (BIOL), Chemistry (CHEM), Public and International Affairs (PUAD), School of Public Policy (PUBP), Geography (GEOG), and Geology (GEOL)
EVPP 110 - The Ecosphere: An Introduction to Environmental Science I

Credits: 4
Not Repeatable for Credit
Offered by Environmental Science and Policy

Studies components and interactions that make up natural systems of our home planet. Teaches basic concepts in biological, chemical, physical, and earth sciences in integrated format with lecture, laboratory, and field exercises. Designated a Green Leaf Course.

Fulfills Mason Core requirement in natural science (lab).

Notes: One of two semesters of environmental lab science that fulfills Mason Core science requirements for non science majors. Along with EVPP 111, can be taken in any order.

Schedule Type: LAB,
LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 3

EVPP 111 - The Ecosphere: An Introduction to Environmental Science II

Credits: 4
Not Repeatable for Credit
Offered by Environmental Science and Policy

Studies components and interactions that make up natural systems of our home planet. Teaches basic concepts in biological, chemical, physical, and Earth sciences in integrated format with lecture, laboratory, and field exercises. Designated a Green Leaf Course.

Fulfills Mason Core requirement in natural science (lab).

Notes: One of two semesters of environmental lab science that fulfills Mason Core science requirements for non science majors. Along with EVPP 110, can be taken in any order.

Schedule Type: LAB,
LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 3

EVPP 201 - Environment and You: Issues for the Twenty-First Century

Credits: 3
Not Repeatable for Credit
Offered by Environmental Science and Policy
Introduces broad aspects of human-environmental interactions in the contemporary world. Topics range broadly from global populations and wastewater treatment to environmental law, and genetic engineering. Includes both science and science policy of the environment.
Designated a Green Leaf Course.
Fulfills Mason Core requirement in natural science (nonlab).

**Schedule Type:** LEC
**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0

### EVPP 210 - Environmental Biology: Molecules and Cells

Credits: 4  
Not Repeatable for Credit
Offered by Environmental Science and Policy
This course provides environmental science majors with the cellular foundation required for subsequent courses in the BS curriculum with a focus on how biological systems respond to environmental threats. The course emphasizes the connection between cellular processes and a healthy environment, and how this relationship is jeopardized by a variety of chemical and physical environmental perturbations.

**Corequisite(s):** CHEM 211.

**Schedule Type:** LAB, LEC
**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 3
**When Offered:** Fall

### EVPP 301 - Environmental Science: Biological Diversity and Ecosystems

Credits: 4  
Not Repeatable for Credit
Offered by Environmental Science and Policy
This course provides environmental science majors with the necessary background in biological diversity and ecological science required for subsequent courses in the BS curriculum. The course reviews the diversity of life on earth and the structure and functioning of ecosystems and populations.

**Prerequisite(s):** Grade of C or better in EVPP 210 or permission of the instructor.
Prerequisite(s) enforced by registration system.

**Schedule Type:** LAB, LEC
**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0
**When Offered:** Spring
EVPP 302 - Environmental Science: Biomes and Human Dimensions

Credits: 4
Not Repeatable for Credit
Offered by Environmental Science and Policy
This course provides environmental science majors with the necessary background in biomes and human dimensions required for subsequent courses in the BS curriculum. The course reviews the functioning of aquatic and terrestrial biomes and human interactions with and impacts on the environment.

Prerequisite(s): Grade of C or better in EVPP 301, or permission of the instructor.
Prerequisite(s) enforced by registration system.

Schedule Type: LAB,
LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 3
When Offered: Fall, Summer, Spring

EVPP 305 - Environmental Microbiology Essentials

Credits: 3
Not Repeatable for Credit
Offered by Environmental Science and Policy
Provides understanding of microbes and their function as a vital part of an environmental education. The role of microbes is central to many environmental issues such as climate change, biodegradation of toxics, wastewater treatment and drinking water contamination. Course provides an introduction to the breadth of microbiology including essential information for students studying environmental problems and their solution.

Prerequisite(s): EVPP 210 and 30 credit hours, or permission of instructor.
Corequisite(s): EVPP 306.

Notes: Laboratory section (EVPP 306 proposed) is a corequisite unless previously completed.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 3
When Offered: Fall, Spring, Summer

EVPP 306 - Environmental Microbiology Essentials Laboratory

Credits: 1
Not Repeatable for Credit
Offered by Environmental Science and Policy
Laboratory study of environmental microbiology. Course provides an introduction to the microbiological techniques for students studying environmental problems and their solution. Examples include microbiology of natural ecosystems (e.g., Potomac River), bacteria in fresh and estuarine waters and sediments, Indicator organisms (e.g., coliform bacteria), molecular identification of unknown bacteria from nature, and visualization of bacteria in their natural habitat.

Prerequisite(s): EVPP 210 and 30 credit hours, or permission of instructor.
Corequisite(s): EVPP 305.

Notes: Lecture section (EVPP 305 proposed) is a corequisite.

Schedule Type: LAB
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 3
When Offered: Fall, Spring, Summer

EVPP 309 - Introduction to Oceanography

Credits: 3
Not Repeatable for Credit
Offered by Environmental Science and Policy
Introduces physical, chemical, biological, and geological aspects of oceanic environment.

Equivalent to GEOL 309, BIOL 309.

Prerequisite(s): Two of the following lab None sciences courses are required for a total of 8 credits:
[GEOL 101 or 102], [EVPP 110 or 111 or 210], CHEM 211, [BIOL 103 or 213], [PHYS 160 and 161 or 243 and 244].
Notes: May include field trip.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

EVPP 318 - Conservation Biology

Credits: 3
Not Repeatable for Credit
Offered by Environmental Science and Policy
Introduces science used to identify species in need of conservation, and techniques to manage and protect organisms.

Equivalent to BIOL 318.

Prerequisite(s): BIOL 308 or BIOL 310, or permission of instructor.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EVPP 322 - Business and Sustainability

Credits: 3
Not Repeatable for Credit
Offered by Environmental Science and Policy
Examines the types of approaches businesses can take to take to respond to sustainability concerns. Designed to prepare students for assisting organizations to incorporate sustainability considerations into their strategic decision-making. Designated a Green Leaf Course.

Prerequisite(s): 30 credit hours, recommend EVPP 361/GOVT 361 - Introduction to Environmental Policy
Notes: Students from multiple disciplines (business, social sciences, natural sciences, humanities, education, etc.) can participate in the class without having had previous courses in management.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

**EVPP 336 - Human Dimensions of the Environment**

Credits: 3
Not Repeatable for Credit
Offered by Environmental Science and Policy

Overview of current knowledge regarding human and environment interactions and human ecology. Topics include basic theoretical and conceptual issues, relationship between social and biological sciences, human causes and consequences of environmental change, and contemporary perspectives on environmental issues. Designated a Green Leaf Course.

Prerequisite(s): One of either EVPP 110 or EVPP 111 or GEOL 101 or SOCI 101 or ANTH 114 or 60 credits.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**EVPP 337 - Environmental Policy Making in Developing Countries**

Credits: 3
Not Repeatable for Credit
Offered by Environmental Science and Policy

Overview of environmental policy process in developing countries around the world. Major focus on understanding distinctive problems and dynamics of environmental policy making in poor countries to generate better policy decisions and management. Designated a Green Leaf Course.

Fulfills writing intensive requirement in the global affairs major and environmental science major.

Prerequisite(s): 60 credits.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
EVPP 338 - Economics of Environmental Policy

Credits: 3
Not Repeatable for Credit
Offered by Environmental Science and Policy

Introduction to environmental, resource, and ecological economics for non-economist undergraduates. Covers basic theories of scarce resource allocation and examines conditions under which market allocations are efficient and sustainable. Includes graphical and verbal presentation of theory.
Designated a Green Leaf Course.

Prerequisite(s): ECON 100 or ECON 103 or ECON 105 or ECON 110, or permission from instructor.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EVPP 350 - Freshwater Ecosystems

Credits: 4
Not Repeatable for Credit
Offered by Environmental Science and Policy
Studies physical, chemical, and biological processes in lakes, streams, and wetlands. Teaches physical and chemical aspects of aquatic systems and life cycles, and adaptations of aquatic organisms. Lectures, field trips, lab exercises.
Equivalent to BIOL 350

Prerequisite(s): Either CHEM 211 and CHEM 212 or CHEM 155 and CHEM 156, and either EVPP 110 or BIOL 308, or permission of instructor.
Schedule Type: LAB, LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 3

EVPP 355 - Ecological Engineering and Ecosystem Restoration

Credits: 4
Not Repeatable for Credit
Offered by Environmental Science and Policy

Provides definition, classification, and practice of ecological engineering and ecosystem restoration. Describes general system ecology, ecosystem restoration (i.e., wetland and river systems), and the use of natural processes to provide ecosystem services to society. Provides students with a systems-oriented perspective on designing and managing ecosystems. Students will study principles in designing field ecological studies, ecological models, ecological engineering, and explore practices in sustainable ecological design by carrying out a hands-on experimental design project with the field wetland mesocosm on the Mason campus. One field trip is required part of the course.
Designated a Green Leaf Course.
Equivalent to BIOL 355

Prerequisite(s): CHEM 211 and EVPP 301 or BIOL 308; or permission of instructor.
Schedule Type: LAB, LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 3

EVPP 361 - Introduction to Environmental Policy

Credits: 3
Not Repeatable for Credit
Offered by Environmental Science and Policy

Environmental politics and policymaking since the 1970s. Primary focus on United States, with some discussion of global issues. Examines policy strategies and outcomes, ethical and economic debates, political controversies, lawmaking and enforcement, and role of key players.
Designated a Green Leaf Course.

Equivalent to GOVT 361

Prerequisite(s): 30 credit hours
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EVPP 362 - Intermediate Environmental Policy

Credits: 3
Not Repeatable for Credit
Offered by Environmental Science and Policy

Examines environmental issues building on learning objectives from EVPP 361. Focuses on environmental and policy issues in the US and internationally, exploring the politics of nature and the interaction of environmental science and politics and resulting controversy. Risk and uncertainty loom large in most environmental issues. "Natural" disasters as well as direct "man-made" problems will be covered.
Designated a Green Leaf Course.

Prerequisite(s): EVPP 361 or GOVT 361 or permission of instructor.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

EVPP 363 - Coastal Morphology and Processes
EVPP 377 - Applied Ecology

Credits: 3
Not Repeatable for Credit
Offered by Environmental Science and Policy
Introduces ecosystem concepts and applications to natural and managed ecosystems.

Equivalent to BIOL 377

Prerequisite(s): 60 credits, including 8 credits of biology, geology, or chemistry; or permission of instructor.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EVPP 378 - RS: Ecological Sustainability

Credits: 4
Not Repeatable for Credit
Offered by Environmental Science and Policy

Introduces the concepts and applications of several important topics relating to ecological sustainability. Focuses on the role of soils in maintaining and managing environmental quality. Teaches students how to understand and interpret scientific data presented in various types of literature covering ecological sustainability. Designated a Green Leaf Course.

Designated as a research and scholarship intensive course.

Equivalent to BIOL 379.

Prerequisite(s): BIOL 308 or permission of instructor.
Schedule Type: LAB, LEC
Hours of Lecture or Seminar per week: 3
EVPP 380 - Wetlands of the World

Credits: 4
Not Repeatable for Credit
Offered by Environmental Science and Policy
A study of the ecosystems of the world. Emphasizes different types of wetland ecosystems and their services, including water quality, coastal protection, flood mitigation, and wildlife protection. The course includes trips to local wetlands and to the Everglades National Park.

Prerequisite(s): EVPP 301 or BIOL 308 or BIOL 310, or permission of instructor.
Schedule Type: LAB, LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring

EVPP 395 - Undergraduate Research in Environmental Science and Policy

Credits: 1-3
Repeatable within Degree for Credit
Offered by Environmental Science and Policy
Original research project. May involve field and lab study, computer modeling and analysis, or other original research as appropriate. Research formulated and completed under instructor's guidance.

Prerequisite(s): 45 credits including at least two upper-level science lab courses.
Notes: Culminates in final report. May be repeated for a total of 10 credits.

Schedule Type: IND
Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 0

EVPP 396 - Directed Topic in Environmental Science and Policy

Credits: 1-4
Repeatable within Degree for Credit
Offered by Environmental Science and Policy
Study of topics not available in fixed-topics courses. May involve readings, lectures, lab assignments, and tutorials as jointly agreed on by student and instructor.

Prerequisite(s): 45 credits.
Notes: Culminates in term paper, final exam, or both. May be repeated for a total of 8 credits.

Schedule Type: IND
EVPP 408 - Mushrooms, Molds and Society

Credits: 3
Not Repeatable for Credit
Offered by Environmental Science and Policy
Provides a modern, comprehensive knowledge of fungal biology including classification, phylogeny, structure, physiology/metabolism, growth and development, genetics, industrial applications including biotechnology, ecological roles including pathogenic interactions with plants, animals, and man.

Equivalent to BIOL 408.

Prerequisite(s): EVPP 110 and 111 or EVPP 210 or BIOL 213.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring

EVPP 409 - Medical Mycology

Credits: 3
Not Repeatable for Credit
Offered by Environmental Science and Policy
Provides the student with current knowledge of both the medical and microbiological aspects of fungal diseases in humans, including the etiologic agents, geographic distribution, epidemiology, transmission, determinants of pathogenicity, laboratory detection, and therapy associated with the major human mycoses.

Equivalent to BIOL 409.

Prerequisite(s): EVPP 110 and 111 or EVPP 210 or BIOL 213.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Summer

EVPP 419 - Marine Mammal Biology and Conservation

Credits: 3
Not Repeatable for Credit
Offered by Environmental Science and Policy
Covers the evolution, biology, ecology, and behavior of marine mammals from polar bears and sea otters to whales and dolphins. Marine mammal conservation and policy is also a major component of the course; several lecture sessions are devoted to the issue of whaling, threats to marine mammal populations, and recent conservation issues such as marine mammals and noise pollution. The course also includes a number of guest lectures from a variety of international marine mammal experts.
Equivalent to BIOL 454.

**Prerequisite(s):** BIOL/EVPP/GEOL 309 or BIOL/EVPP 449; and 60 credit hours.

**Schedule Type:** LEC

**Hours of Lecture or Seminar per week:** 3

**Hours of Lab or Studio per week:** 0

---

**EVPP 420 - Marine Mammal Biology and Conservation Field Course**

Credits: 1

Not Repeatable for Credit

Offered by Environmental Science and Policy

This course provides laboratory, seminar sessions and field work to accompany EVPP 419-001 - marine mammal biology and conservation. Field work includes several day-long boat trips. The field course may take place in the US or abroad.

Equivalent to BIOL 455.

**Prerequisite(s):** EVPP 419 or BIOL 454.

**Corequisite(s):** EVPP 419 or BIOL 454.

**Schedule Type:** LAB, SEM

**Hours of Lecture or Seminar per week:** 1

**Hours of Lab or Studio per week:** 1-12

**When Offered:** Summer

---

**EVPP 421 - Marine Conservation**

Credits: 3

Not Repeatable for Credit

Offered by Environmental Science and Policy

Provides an overview of threats to the marine environment, and discusses the scientific, socioeconomic, and political issues behind marine conservation. Covers categories of marine pollutants (chemical, biological, and physical contaminants) and their impacts on the marine ecosystem, as well as impacts on humans (health, social, and economic), threats to key marine species (e.g., coral, sharks, turtles, and marine mammals) and initiatives and laws developed to reduce these threats. Scientific and socioeconomic problems that hinder sustainable fisheries management and the science and policy behind the global warming debate are also discussed. Provides an overview of marine environmental law and policy issues related to marine conservation policy.

Designated a Green Leaf Course.

Equivalent to BIOL 450.

**Prerequisite(s):** BIOL/EVPP/GEOL 309.

**Schedule Type:** LEC

**Hours of Lecture or Seminar per week:** 3

**Hours of Lab or Studio per week:** 0
EVPP 427 - Disease Ecology and Conservation

Credits: 3
Not Repeatable for Credit
Offered by Environmental Science and Policy
Presents the trans-disciplinary discipline of conservation medicine, the study of relationships between organism and ecosystem health and environmental conditions. Topics include infectious and noninfectious diseases, pathogens, processes, and impacts on human, biotic, and ecosystem health, and how to address the consequences of diseases to populations and ecological communities.

Prerequisite(s): 60 credits and BIOL 213 or BIOL/EVPP 305/306 and BIOL 308.
Notes: This course will co-meet with EVPP 527. Undergraduate students in this course will have separate (shorter) reading and writing assignments and will be graded according to a different rubric than the graduate students.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

EVPP 429 - Environmental Science Communication

Credits: 3
Not Repeatable for Credit
Offered by Environmental Science and Policy
Communicating environmental science is inherently challenging whether in academia, the public policy realm, or to the general public. The aim of this course is to expose students to the multiple ways environmental science can be communicated. Such exposure will be made both through a theoretical approach by examining science communication literature, as well as through practical, hands-on activities and assignments.

Prerequisite(s): Completion of 60 credit hours.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
When Offered: Spring

EVPP 430 - Fundamentals of Environmental Geographic Information Systems

Credits: 3
Not Repeatable for Credit
Offered by Environmental Science and Policy
Provides the basic knowledge to explore complex environmental data sets and relationships among biological, ecological, physical and anthropogenic variables using geographic information systems. Using spatial mapping and exploration tools students will be capable of independent analysis of complex environment.

Prerequisite(s): EVPP 110 and 111 or EVPP 210, and IT 103 or CDS 130, and 60 credit hours; or permission of instructor.
Notes: Previous knowledge of fundamentals of geography, coordinate systems and map projections is an asset. Knowledge of operating systems, text editor and spreadsheet is required.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
EVPP 432 - Energy Policy

Credits: 3
Not Repeatable for Credit
Offered by Environmental Science and Policy
Overview of economic, political, and technological aspects of energy policy development. Students will examine various energy sources in the context of national and global considerations regarding electricity generation, efficiency and conservation, energy economics, and climate change. Updated yearly. The course may include one field trip.

Prerequisite(s): 60 credits and EVPP 361/GOVT 361, or Permission of Instructor
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

EVPP 436 - The Human Dimensions of Global Climate Change

Credits: 3
Not Repeatable for Credit
Offered by Environmental Science and Policy
Social science investigation of humans' role(s) in global climate change, including diversity of ecological, cultural and policy issues. Focuses on current science, causes and responses, human rights and social justice, vulnerability of marginalized populations, relevant issues associated with communication and behavior change, place of policy, and the multiple existing and potential roles of academic action. Discussion format.

Prerequisite(s): EVPP 336, CLIM 101 and 60 credits, or Permission of Instructor
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

EVPP 440 - Field Environmental Science

Credits: 0-4
Repeatable within Degree for Credit
Offered by Environmental Science and Policy
Directed field studies emphasizing ecology and behavior. Topics vary but include design of field manipulations, data collection and analysis, and introduction to organisms of study site.

Equivalent to BIOL 440.

Prerequisite(s): BIOL 308 or 310 or permission of instructor.
Notes: Students bear cost of required field trips. May be repeated with permission of Environmental Science and Policy.
EVPP 445 - Principles of Environmental Toxicology

Credits: 3  
Not Repeatable for Credit  
Offered by Environmental Science and Policy  
Explores basic principles of toxicology with an emphasis on the environment. Includes the history and scope of the field; absorption, distribution, metabolism and excretion of toxicants; mechanisms of toxic action; genetic toxicology; ecotoxicology as well as specific examples important toxicants. Introduces regulatory toxicology and human and ecological risk assessment.

**Prerequisite(s):** EVPP 210 or both EVPP 110 and 111; and CHEM 211 and CHEM 212; and 60 credit hours; or permission of instructor.

Schedule Type: LEC  
Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0  
When Offered: Spring

EVPP 449 - Marine Ecology

Credits: 3  
Not Repeatable for Credit  
Offered by Environmental Science and Policy  
Plants and animals of marine environments and physical and chemical conditions that affect their existence.

Equivalent to BIOL 449.

**Prerequisite(s):** BIOL 308 and BIOL/EVPP/GEOL 309 or permission of instructor.  
**Notes:** Will be cross-listed with BIOL 449.

Schedule Type: LEC  
Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0  
When Offered: Spring

EVPP 451 - Fungi and Ecosystems

Credits: 3  
Not Repeatable for Credit  
Offered by Environmental Science and Policy  
Considers impact of fungi on ecosystems in terms of effects on biogeochemical cycling, primary and secondary production, and regulating community structure and populations of individual species through activities as symbionts and parasites.

Equivalent to EVPP 551; BIOL 459; BIOL 559
Prerequisite(s): BIOL 301 or BIOL 308 or course in microbiology; or permission of instructor.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EVPP 468 - Vertebrate Natural History

Credits: 4
Not Repeatable for Credit
Offered by Environmental Science and Policy
Introduces vertebrates with emphasis on systematics, evolution, life history, behavior, and ecology. Laboratory emphasis on identification, taxonomy, and natural history of local vertebrates.

Equivalent to BIOL 468

Prerequisite(s): EVPP 301 and 302 or BIOL 308 and BIOL 310; or permission of instructor.
Schedule Type: LAB, LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 3
When Offered: Fall

EVPP 475 - Global Biodiversity Governance

Credits: 3
Not Repeatable for Credit
Offered by Environmental Science and Policy

Study global biodiversity governance from a political/policy science perspective. Regime and governance literature, and empirical examples including intergovernmental policy, such as biodiversity-related climate change policy (REDD+), and certification standards, such as the Forest Stewardship Council (RSC), will be examined, with guest lecturers and a simulation of an intergovernmental negotiation.
Designated a Green Leaf Course.

Prerequisite(s): One (environmental) social science course.
Notes: This course will co-meet with EVPP 575. Undergraduate students in this course will be graded according to a different rubric than the graduate students.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
When Offered: Spring

EVPP 480 - Sustainability in Action
EVPP 480 - Sustainability Internship

Credits: 4
Not Repeatable for Credit
Offered by Environmental Science and Policy

Provide students with valuable and tangible experience in practical aspects of realizing sustainability goals and to transfer theory into practice. Allows students to engage in real-world, sustainability-related projects that provide benefits for a target community. Identify and attempt to solve a sustainability-related problem or address a sustainability-related need in a specific target community.
Designated a Green Leaf Course.

Fulfills Mason Core requirement in synthesis.

Prerequisite(s): Completed or concurrent enrollment in all other required Mason Core courses; completion of 60 credits.
Notes: Capstone course for the Sustainability Minor – see Environmental Science and Policy department listing for details.

Schedule Type: INT, SEM
Hours of Lecture or Seminar per week: 4
Hours of Lab or Studio per week: 3
When Offered: Spring, Summer

EVPP 490 - Special Topics in Environmental Science and Policy

Credits: 0-4
Repeatable within Degree for Credit
Offered by Environmental Science and Policy

Studies selected topics in environmental science and policy using lectures, guest lectures, student presentations, or laboratory exercises.

Prerequisite(s): 60 credits, and permission of instructor.
Notes: Topics vary, but each offering has coherent syllabus. May be repeated for credit if topics are significantly different.

Schedule Type: LAB, LEC
Hours of Lecture or Seminar per week: 1-4
Hours of Lab or Studio per week: 1-4

EVPP 494 - Internship

Credits: 1-3
Repeatable within Degree for Credit
Offered by Environmental Science and Policy

Involves off-campus, professional student work with approved agencies, institutions, non-profits, or businesses. Work must produce one or more academic products such as: comprehensive report, departmental presentation, poster, or article. At least one substantive piece of work will be assessed for each internship credit being undertaken. Scope of work, credits, and academic product(s) are determined in consultation with the internship instructor.

Prerequisite(s): 60 credits and permission of instructor.
Notes: Credit will be assigned based on the number of hours participating in the internship each week:
1 Credit = 4-6 hours/week, 2 Credits= 8-12 hours/week, 3 Credits= 12-18 hours/week.

Schedule Type: INT
When Offered: Fall, Summer, Spring

**EVPP 503 - Field Mapping Techniques**

Credits: 3
Not Repeatable for Credit
Offered by Environmental Science and Policy
Basic techniques for collecting, recording, and plotting spatial field data, including topographic maps, compass, transit, alidade, and global positioning systems. Field work and field-based research project.

Equivalent to GEOL 303

Prerequisite(s): MATH 105 or equivalent; and EVPP 110, GGS 102, or GEOL 101 or equivalent.

Schedule Type: LAB
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 6

**EVPP 505 - Selected Topics in Environmental Science**

Credits: 0-4
Repeatable within Term for Credit
Offered by Environmental Science and Policy
Topic depends on instructor's specialty.

Prerequisite(s): Course in ecology or geology, or permission of instructor.

Schedule Type: LAB, LEC

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0-6

**EVPP 506 - Science of the Environment I**

Credits: 3
Not Repeatable for Credit
Offered by Environmental Science and Policy
Environmental science is explored in this 2-semester sequence providing the foundation in chemistry (I) and biology (II) required for graduate students with social sciences backgrounds seeking a degree and career in environmental science and policy.

Prerequisite(s): Permission of the instructor.
Notes: For graduate students entering the Environmental Science and Policy or other programs. Not available to students with undergraduate degrees in the natural sciences. This course is in addition to all other degree requirements.

Schedule Type: LEC
EVPP 507 - Science of the Environment II

Credits: 3
Not Repeatable for Credit
Offered by Environmental Science and Policy
Environmental science is explored in this 2-semester sequence providing the foundation in chemistry (I) and biology (II) required for graduate students with social sciences backgrounds seeking a degree and career in environmental science and policy.

Prerequisite(s): EVPP 506 or permission of instructor.
Notes: For graduate students entering the Environmental Science and Policy or other programs. Not available to students with undergraduate degrees in the natural sciences. This course is in addition to all other degree requirements.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EVPP 515 - Molecular Environmental Biology I

Credits: 3
Not Repeatable for Credit
Offered by Environmental Science and Policy
Introduces molecular environmental biology covering basic concepts of molecular biology, molecular evolution, and bioinformatics, and application to problems in molecular and environmental biology.

Prerequisite(s): Introductory biology and genetics course, or permission of instructor.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EVPP 518 - Conservation Biology

Credits: 3
Not Repeatable for Credit
Offered by Environmental Science and Policy
Introduction to the science used to identify species in need of conservation, and techniques to manage and protect organisms.

Prerequisite(s): Course in Ecology.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring
EVPP 519 - Marine Mammal Biology and Conservation

Credits: 3
Not Repeatable for Credit
Offered by Environmental Science and Policy
Covers the evolution, biology, ecology, and behavior of marine mammals from polar bears and sea otters to whales and dolphins. Marine mammal conservation and policy is also a major component of the course; several lecture sessions are devoted to the issue of whaling, threats to marine mammal populations, and recent conservation issues such as marine mammals and noise pollution. The course also includes a number of guest lectures from a variety of international marine mammal experts.

Equivalent to BIOL 508.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EVPP 520 - Marine Mammal Biology and Conservation Field Course

Credits: 1
Not Repeatable for Credit
Offered by Environmental Science and Policy
This course provides laboratory, seminar sessions and field work to accompany EVPP 519-001 marine mammal biology and conservation. Field work includes several day-long boat trips. The field course may take place in the US or abroad.

Corequisite(s): EVPP 519.

Notes: At present the two week residential field course takes place in Scotland at the University (of London) Marine Biological Station, which is equipped with boats and laboratories. The course has been running for 11 years, 2 years with GMU as a special topics course.

Schedule Type: SEM
When Offered: Summer

EVPP 521 - Marine Conservation

Credits: 3
Not Repeatable for Credit
Offered by Environmental Science and Policy

Provides an overview of threats to the marine environment, and discusses the scientific, socioeconomic, and political issues behind marine conservation. Covers categories of marine pollutants (chemical, biological, and physical contaminants) and their impacts on the marine ecosystem, as well as impacts on humans (health, social, and economic), threats to key marine species (e.g., coral, sharks, turtles, and marine mammals) and initiatives and laws developed to reduce these threats. Scientific and socioeconomic problems that hinder sustainable fisheries management and the science and policy behind the global warming debate are also discussed. Provides an overview of marine environmental law and policy issues related to marine conservation policy.
Designated a Green Leaf Course.
Equivalent to EVPP 421/BIOL 507

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EVPP 524 - Introduction to Environmental and Resource Economics

Credits: 3
Not Repeatable for Credit
Offered by Environmental Science and Policy
Introduces theory of external costs and benefits, public goods, natural resource management, and benefit and cost analysis for noneconomists. Lecture-discussion format with student presentations and participation. Analytical problems set, short writing assignments, and exams.

Equivalent to GGS 524

Prerequisite(s): Basic algebra skills.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EVPP 525 - Economics of Human/Environment Interactions

Credits: 3
Not Repeatable for Credit
Offered by Environmental Science and Policy

Advanced topics in environmental, natural resource, and ecological economics for noneconomist. Emphasizes sustainability, intergenerational equity, and economic-ecological feedbacks.
Designated a Green Leaf Course.

Equivalent to ECON 895/GGS 525

Prerequisite(s): EVPP 524/GGS 524 or equivalent.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EVPP 527 - Disease Ecology and Conservation

Credits: 3
Not Repeatable for Credit
Offered by Environmental Science and Policy
Presents the trans-disciplinary discipline of conservation medicine, the study of relationships between organism and ecosystem health and environmental conditions. Topics include infectious and noninfectious diseases, pathogens, processes, and impacts on
human, biotic, and ecosystem health, and how to address the consequences of diseases to populations and ecological communities.

**Prerequisite(s):** Courses in microbiology, ecology, or conservation, or permission of instructor.

**Schedule Type:** LEC
**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0
**When Offered:** Fall

---

**EVPP 529 - Environmental Science Communication**

Credits: 3  
Not Repeatable for Credit  
Offered by Environmental Science and Policy  
Communicating environmental science is inherently challenging whether in academia, the public policy realm, or to the general public. The aim of this course is to expose students to the multiple ways environmental science can be communicated. Such exposure will be made both through a theoretical approach by examining science communication literature, as well as through practical, hands-on activities and assignments.

**Schedule Type:** LEC  
**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Spring

---

**EVPP 531 - Land-use Modeling Techniques and Applications**

Credits: 3  
Not Repeatable for Credit  
Offered by Environmental Science and Policy  
Surveys literature on spatially explicit empirical models of land-use change. Offers hands-on experience developing and running simple models. Includes statistical models, mathematical programming models, cellular automata, agent-based models, and integrated models.

Equivalent to GGS 531

**Prerequisite(s):** GGS 550, or permission of instructor.  
**Schedule Type:** LEC  
**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**EVPP 532 - Animal Behavior**

Credits: 3  
Not Repeatable for Credit  
Offered by Environmental Science and Policy  
Ecological aspects of animal behavior.
Prerequisite(s): Permission of instructor.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring

EVPP 533 - Energy Policy

Credits: 3
Not Repeatable for Credit
Offered by Environmental Science and Policy
Discusses resource options in the context of 3E's: energy security, environment, and economics. Examines how these considerations apply to 3 P's developed by Jennifer Sklarew: priorities, politics, and process. Examines sustainability and environmental angles of resources, reasons for specific nations' policy choices, and possibilities for future energy policies. Considers how energy policies can create cooperation and conflict domestically and internationally.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring

EVPP 536 - The Diversity of Fishes

Credits: 3
Not Repeatable for Credit
Offered by Environmental Science and Policy
This course delves into the biology and ecology of fishes. Subjects of this class include fish anatomy, taxonomy, evolution, habitat adaptations, community dynamics, and ecosystem interactions. The course will also touch on human impacts on fishes, and conservation.

Equivalent to BIOL 536 (2015-2016 Catalog).

Prerequisite(s): Ecology course, or permission of instructor.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring

EVPP 537 - Ornithology

Credits: 4
Not Repeatable for Credit
Offered by Environmental Science and Policy
Study of evolution, systematics, physiology, ecology, and behavior of birds, emphasizing field work.

Prerequisite(s): Course in ecology or equivalent.
Schedule Type: LAB,
LEC

**Hours of Lecture or Seminar per week:** 3

**Hours of Lab or Studio per week:** 1

**When Offered:** Spring

---

**EVPP 538 - Mammalogy**

Credits: 4  
Not Repeatable for Credit  
Offered by Environmental Science and Policy  
Study of evolution, systematics, physiology, ecology, and behavior of mammals, emphasizing fieldwork.

Equivalent to BIOL 538

**Prerequisite(s):** BIOL 303 and BIOL 307 or permission of the instructor.

**Schedule Type:** LAB, LEC

**Hours of Lecture or Seminar per week:** 3

**Hours of Lab or Studio per week:** 1

**When Offered:** Fall

---

**EVPP 539 - Herpetology**

Credits: 4  
Not Repeatable for Credit  
Offered by Environmental Science and Policy  
Study of evolution, systematics, physiology, ecology, and behavior of amphibians and reptiles, emphasizing field work.

**Prerequisite(s):** Course in ecology or equivalent.

**Schedule Type:** LAB, LEC

**Hours of Lecture or Seminar per week:** 3

**Hours of Lab or Studio per week:** 1

**When Offered:** Spring

---

**EVPP 543 - Tropical Ecosystems**

Credits: 4  
Not Repeatable for Credit  
Offered by Environmental Science and Policy  
Terrestrial, aquatic, and marine ecosystems in the tropics, emphasizing plant communities, plant-animal interactions, and role of humans in tropics.

Equivalent to BIOL 543

**Prerequisite(s):** Ecology course, and permission of instructor.

**Notes:** Requires field trip to tropics as part of lab.
EVPP 549 - Marine Ecology

Credits: 3
Not Repeatable for Credit
Offered by Environmental Science and Policy
Presents the Ecology of Marine Ecosystems including from the intertidal zone to the deep sea, and from coral reefs to seagrass beds and polar seas. Overviews the evolutionary characteristics and ecological processes and community structure of species and their habitats; and special problems that confront marine organisms due to anthropogenic change.

Prerequisite(s): BIOL 308 and BIOL/EVPP/GEOL 309 (or the equivalent), or permission of instructor.

EVPP 550 - Waterscape Ecology and Management

Credits: 3
Not Repeatable for Credit
Offered by Environmental Science and Policy
Studies physical, chemical, and biological components of freshwater ecosystems with emphasis on streams, rivers, and lakes; links between watersheds and freshwater ecosystems; and impact of human management.

Equivalent to BIOL 550

Prerequisite(s): A course in chemistry and a course in ecology.

EVPP 551 - Fungi and Ecosystems

Credits: 3
Not Repeatable for Credit
Offered by Environmental Science and Policy
Considers impact of fungi on ecosystems in terms of effects on biogeochemical cycling, primary and secondary production, and regulating community structure and populations of individual species through activities as symbionts and parasites.

Equivalent to EVPP 451; BIOL 459; BIOL 559

Prerequisite(s): BIOL 304 or course in microbiology, or permission of instructor.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EVPP 555 - Lab in Waterscape Ecology

Credits: 1
Not Repeatable for Credit
Offered by Environmental Science and Policy
Field and laboratory approaches to freshwater ecology with emphasis on study design, sampling methods, laboratory and data analysis, and report writing.

Equivalent to BIOL 555

Prerequisite(s): EVPP 550 or permission of instructor.

Schedule Type: LAB
Hours of Lecture or Seminar per week: 1-12
Hours of Lab or Studio per week: 3

EVPP 563 - Coastal Morphology and Processes

Credits: 4
Not Repeatable for Credit
Offered by Environmental Science and Policy
Studies global coastal geomorphology and processes, emphasizing U.S. Atlantic and gulf coasts. Topics include plate tectonics; sea-level changes; sediment supply; impact of waves, tides, storms; and human activities. Lecture, extended weekend field trips to mid-Atlantic coast.

Equivalent to EVPP 363/GEOL 363

Prerequisite(s): Previous courses in geology, oceanography, marine science or physical geography; or permission of instructor.

Schedule Type: LAB,
LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 3

EVPP 575 - Global Biodiversity Governance

Credits: 3
Not Repeatable for Credit
Offered by Environmental Science and Policy
Study global biodiversity governance from a political/policy science perspective. Regime and governance literature, and empirical examples including intergovernmental policy, such as biodiversity-related climate change policy (REDD+), and certification standards, such as the Forest Stewardship Council (FSC), will be examined, with guest lecturers and a simulation of an inter governmental negotiation.
Designated a Green Leaf Course.

Prerequisite(s): One (environmental) social science course.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring

EVPP 577 - Biogeochemistry: A Global Perspective

Credits: 3
Not Repeatable for Credit
Offered by Environmental Science and Policy
Structure and function of ecosystems, their interactions as components of landscapes, and contributions to the global environment. Emphasizes biogeochemical cycles of natural, disturbed, and managed ecosystems, and integration at landscape and global level as related to current ecological problems such as transfer of nonpoint source pollutants, atmospheric deposition, stratospheric ozone depletion, and global change.

Equivalent to BIOL 577

Prerequisite(s): Course in ecology and course in chemistry; or permission of instructor.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EVPP 581 - Estuarine and Coastal Ecology

Credits: 3
Not Repeatable for Credit
Offered by Environmental Science and Policy
Emphasizes marine biology of estuarine and coastal habitats of Chesapeake Bay region, and factors affecting distribution and abundance of organisms.

Equivalent to BIOL 581

Prerequisite(s): Course in ecology and permission of instructor.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EVPP 582 - Estuarine and Coastal Ecology Laboratory

Credits: 1
Not Repeatable for Credit
Offered by Environmental Science and Policy
Provides training in field measurement of physical and chemical parameters, and collection and identification of local organisms. Emphasizes the practice of ecological field research.
Equivalent to BIOL 582

Prerequisite(s): EVPP 581/BIOL 581
Schedule Type: LAB
Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 3

EVPP 607 - Fundamentals of Ecology

Credits: 3
Not Repeatable for Credit
Offered by Environmental Science and Policy
Overview of concepts in physiological, population, community, ecosystem, biogeographical and human ecology.

Equivalent to BIOL 607

Notes: Restricted to graduate students with little or no background in ecology. Students who have taken BIOL 307 or the equivalent elsewhere are ineligible for this course.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EVPP 608 - Introduction to Environmental Social Science

Credits: 3
Not Repeatable for Credit
Offered by Environmental Science and Policy

The course Environmental Social Science - ESS - aims to provide insight into the some of the most relevant social sciences and social scientific perspectives for studying environmental issues. The course introduces students to different social scientific disciplines. They will also learn about different social scientific theoretical perspectives and concepts, which they will apply in a research project.
Designated a Green Leaf Course.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

EVPP 610 - Bioremediation: Theory and Applications

Credits: 3
Not Repeatable for Credit
Offered by Environmental Science and Policy
Provides basis for understanding proper application of bioremedial technologies to treatment of hazardous wastes. Includes evaluation of data to determine successful treatment.

Equivalent to BIOL 610

**Prerequisite(s):** Courses in microbiology and either organic chemistry or biochemistry; or permission of instructor.

**Schedule Type:** LEC

**Hours of Lecture or Seminar per week:** 3

**Hours of Lab or Studio per week:** 0

**EVPP 613 - Environmental Geochemistry and Mineralogy**

Credits: 3  
Not Repeatable for Credit  
Offered by Environmental Science and Policy  
Explores hot topics and aids students in developing intellectual skills to identify key research problems. Students will also improve their writing and presentation skills.

Equivalent to GEOL 613

**Prerequisite(s):** Graduate standing.

**Schedule Type:** LEC

**Hours of Lecture or Seminar per week:** 3

**Hours of Lab or Studio per week:** 0

**EVPP 615 - Molecular Environmental Biology II**

Credits: 4  
Not Repeatable for Credit  
Offered by Environmental Science and Policy  
Applied course covering theory and methodology of molecular environmental biology, including analysis of selected case studies in conservation biology of macro-organisms, molecular systematics, and microbial ecology.

**Prerequisite(s):** EVPP 515 or permission of instructor.

**Schedule Type:** LAB,  
LEC

**Hours of Lecture or Seminar per week:** 3

**Hours of Lab or Studio per week:** 3

**EVPP 619 - The Challenge of Biodiversity**

Credits: 3  
Not Repeatable for Credit  
Offered by Environmental Science and Policy  
The Challenge of Biodiversity examines the science and policy of biodiversity conservation, through case studies, current events, guest speakers, class discussion, reading and assignments. Emphasis is placed on problem solving, communication skills and critical thinking.
Prerequisite(s): Graduate Standing and 6 credit hours of graduate course work or permission of instructor.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring

**EVPP 620 - Development of U.S. Environmental Policies**

Credits: 3
Not Repeatable for Credit
Offered by Environmental Science and Policy

Examines nature and historical development of environmental policy in the United States, including consideration of social, political, economic and environmental factors, and ways it is expressed and implemented. Also considers sustainability and emerging issues.
Designated a Green Leaf Course.

Prerequisite(s): 8 graduate credits including graduate course in policy process and course in ecology; or permission of instructor.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**EVPP 621 - Overview of Biodiversity Conservation**

Credits: 3
Not Repeatable for Credit
Offered by Environmental Science and Policy

Lectures, reading assignments, class discussions, and orally presented and written case studies to explore what biodiversity is, why it is important, how conservation has evolved, and status today.

Prerequisite(s): 8 graduate credits in ecology and environmental science or environmental policy, or permission of instructor.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**EVPP 622 - Management of Wild Living Resources**

Credits: 3
Not Repeatable for Credit
Offered by Environmental Science and Policy

Examines management of different types of wild living resources: animal and plant, aquatic and terrestrial. Reviews status of resources, analyzes factors that have led to present situation, and considers what may be required to achieve effective and sustainable management.
Designated a Green Leaf Course.

**Prerequisite(s):** 8 graduate credits of ecology or permission of instructor.

**Schedule Type:** LEC

**Hours of Lecture or Seminar per week:** 3

**Hours of Lab or Studio per week:** 0

---

**EVPP 623 - Translating Environmental Policy into Action**

Credits: 3

Not Repeatable for Credit

Offered by Environmental Science and Policy

Guest lecturers, class discussions, written and orally presented case studies, and assigned reading to identify and analyze factors involved in moving from science and policy to concrete action. Provides understanding of basic principles, skills, and strategies.

**Prerequisite(s):** 8 graduate credits in environmental science or environmental policy, or permission of instructor.

**Schedule Type:** LEC

**Hours of Lecture or Seminar per week:** 3

**Hours of Lab or Studio per week:** 0

---

**EVPP 626 - Environment and Development in Asia**

Credits: 3

Not Repeatable for Credit

Offered by Environmental Science and Policy

Examine environment and development in selected countries of South, Southeast, and East Asia. Reviews relationship between environment and development, considers background and history leading up to the present, and considers requirements to achieve more effective and sustainable results.

Designated a Green Leaf Course.

**Prerequisite(s):** 8 graduate credits in policy process, international development, and ecology; or permission of instructor.

**Schedule Type:** LEC

**Hours of Lecture or Seminar per week:** 3

**Hours of Lab or Studio per week:** 0

---

**EVPP 627 - Environmental Policy in Latin America**

Credits: 3

Not Repeatable for Credit

Offered by Environmental Science and Policy

Examine environmental policy in Latin America. Reviews evolution of environmental policy and relationship between environment and development, considers background and history leading up to the present, and considers requirements to achieve more effective and sustainable results.
Designated a Green Leaf Course.

**Prerequisite(s):** 8 graduate credits in policy process, international development, and ecology; or permission of instructor.

**Schedule Type:** LEC

**Hours of Lecture or Seminar per week:** 3

**Hours of Lab or Studio per week:** 0

**EVPP 628 - Environment and Development in Africa**

Credits: 3
Not Repeatable for Credit
Offered by Environmental Science and Policy

Examine environment and development in sub-Saharan Africa. Reviews relationship between environment and development, considers background and history leading up to present, and considers requirements to achieve more effective and sustainable results.

Designated a Green Leaf Course.

**Prerequisite(s):** 8 graduate credits in policy process, international development, and ecology; or permission of instructor.

**Schedule Type:** LEC

**Hours of Lecture or Seminar per week:** 3

**Hours of Lab or Studio per week:** 0

**EVPP 630 - Methods and Logic of Social Inquiry**

Credits: 3
Not Repeatable for Credit
Offered by Environmental Science and Policy

Emphasizes gathering, interpretation, and evaluation of scientific evidence. Develops critical thinking skills and covers logic of scientific inquiry, including various data collection methods such as experiments, observational research, and Q methodology.

**Prerequisite(s):** Undergraduate statistics and research methods, or permission of instructor.

**Schedule Type:** LEC

**Hours of Lecture or Seminar per week:** 3

**Hours of Lab or Studio per week:** 0

**EVPP 631 - Spatial Agent-based Models of Human-Environment Interactions**

Credits: 3
Not Repeatable for Credit
Offered by Environmental Science and Policy

 Discusses key challenges in spatial modeling of human-environment interactions. Reviews agent-based modeling applications in urban and rural interactions, agriculture, forestry, and other areas. Hands-on development of simple ABM models, and investigation of links between GIS and ABM.

Equivalent to CSI 709; GGS 631
Prerequisite(s): EVPP 531 or CSS 600, or permission of instructor.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EVPP 632 - Qualitative Research Methods for Environmental Scientists

Credits: 3
Not Repeatable for Credit
Offered by Environmental Science and Policy
Course engages questions of qualitative research methods for scientists conducting human-environment research. Focuses on tools to investigate the human-environment nexus, including community-based conservation and management research and decolonizing methodologies. Students discuss and practice 'triangulation'-- the integration of qualitative and quantitative methods-- a necessary skill for environmental/human-environment research.

Prerequisite(s): Graduate standing.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EVPP 635 - Environment and Society

Credits: 3
Not Repeatable for Credit
Offered by Environmental Science and Policy

Human-environment interactions in human ecology perspective, historical basis of human environmental impact, indigenous and nonindigenous worldviews in context of modernization, environmental degradation and globalization, and contemporary policy and research initiatives geared toward resilience and sustainability. Discussion format. Designated a Green Leaf Course.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EVPP 636 - Gender, Race, and the Natural World

Credits: 3
Not Repeatable for Credit
Offered by Environmental Science and Policy
Advanced study of links among gender, race, and nature using social-psychological framework, original sources, and seminar and discussion. Analyzes ideologies that underpin the interlocking narratives of gender, race, and nature, and examines role of science in producing these ideologies.

Schedule Type: LEC
**EVPP 637 - Human Dimensions of Global Change**

Credits: 3  
Not Repeatable for Credit  
Offered by Environmental Science and Policy  
Examines human dimensions of climate change, biodiversity loss, ozone depletion, and related anthropogenic alterations of biosphere.  

**Prerequisite(s):** Graduate standing, or permission of instructor.  
**Schedule Type:** LEC  
**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**EVPP 638 - Corporate Environmental Management and Policy**

Credits: 3  
Not Repeatable for Credit  
Offered by Environmental Science and Policy  
Provides understanding of how environmental issues interact with business strategy decisions. Emphasizes learning about proactive win-win environmental management strategies being implemented by world's leading firms, and shows how government policies and regulations can be designed to simultaneously promote higher environmental protection and competitiveness. Combines mini lectures, participatory discussions.  

**Schedule Type:** LEC  
**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**EVPP 641 - Environmental Science and Public Policy**

Credits: 3  
Not Repeatable for Credit  
Offered by Environmental Science and Policy  
Effects of human activities on environment. Considers airborne, waterborne, and solid waste contaminants with respect to sources, control, and effect on ecosystems and humans. Focus is on scientific and technical aspects of environmental contamination. Includes discussion of science policy related to these topics.  

**Prerequisite(s):** Course in ecology, or permission of instructor.  
**Schedule Type:** LEC  
**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**EVPP 642 - Environmental Policy**
In-depth examination of U.S. efforts since 1970 to mitigate pollution of air, land, and water. Addresses issues of global concern, including biodiversity loss, ozone depletion, and climate change. Designated a Green Leaf Course.

Equivalent to PUAD 642

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EVPP 643 - Microbial Ecology

Credits: 4
Not Repeatable for Credit
Offered by Environmental Science and Policy
Studies relationships between microorganisms and their natural environment, and methodology for observing the microbes in nature and the biochemistry of environmental systems. Includes discussion of the role of microbes both in creating and removing toxic threats in the environment. Laboratory component includes field sampling/analyses and laboratory isolation and identification of microbes as well as measurement of their physiological activities.

Equivalent to BIOL 643

Prerequisite(s): Course in microbiology, or permission of instructor.
Schedule Type: LAB,
LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 3

EVPP 645 - Freshwater Ecology

Credits: 3
Not Repeatable for Credit
Offered by Environmental Science and Policy
Studies biotic and abiotic interactions that affect structure and composition of freshwater ecosystems. Emphasizes research literature.

Prerequisite(s): EVPP 550, or permission of instructor.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EVPP 646 - Wetland Ecology and Management
Credits: 3
Not Repeatable for Credit
Offered by Environmental Science and Policy
Emphasizes structure, functions, and ecological processes of created and natural wetlands from an ecosystem perspective. Students will be expected to develop an understanding of hydrologic, physicochemical, and ecological aspects of wetlands and the management of these systems through in-class and field/lab works. Each student is required to carry out an individual research project that involves field and lab works, and write a research paper.

Prerequisite(s): BIOL 307 or EVPP 377, or permission of instructor.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EVPP 647 - Wetland Ecology Lab and Field

Credits: 1
Not Repeatable for Credit
Offered by Environmental Science and Policy
Use laboratory and field work to study the structure and function of wetland ecosystems.

Prerequisite(s): EVPP 646 (formerly EVPP 644)
Schedule Type: LAB
Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 3

EVPP 648 - Population Ecology

Credits: 3
Not Repeatable for Credit
Offered by Environmental Science and Policy
Surveys ecological models and theory. Topics include population growth and regulation, competition, predator-prey, herbivore-plant, and parasite-host interactions, mutualism, and metapopulation ecology.

Equivalent to BIOL 648

Prerequisite(s): Course in ecology or permission of instructor.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EVPP 650 - Environmental Analysis and Modeling

Credits: 4
Not Repeatable for Credit
Offered by Environmental Science and Policy
Introduces principles, history, and methodologies of systems ecology, emphasizing development and simulation of ecological models for natural resource/ecosystem management, conceptual and symbolic models, and simulation techniques on
microcomputers.

**Prerequisite(s):** Course in ecology or permission of instructor.

**Schedule Type:** LAB, LEC

**Hours of Lecture or Seminar per week:** 3

**Hours of Lab or Studio per week:** 3

---

**EVPP 651 - Multivariate Data Analysis for Ecology and Environmental Science**

Credits: 3

Not Repeatable for Credit

Offered by Environmental Science and Policy

Provides graduate students in ecology and environmental science with tools needed to analyze multivariate data sets. Topics include classification and ordination.

**Prerequisite(s):** EVPP 607 or equivalent.

**Schedule Type:** LEC

**Hours of Lecture or Seminar per week:** 3

**Hours of Lab or Studio per week:** 0

**When Offered:** Spring

---

**EVPP 652 - The Hydrosphere**

Credits: 3

Not Repeatable for Credit

Offered by Environmental Science and Policy

Components and transfer processes within hydrosphere, which consists of aqueous envelope of Earth including oceans, lakes, rivers; snow, ice, glaciers, soil, moisture, ground water, and atmospheric water vapor.

Equivalent to GGS 656

**Prerequisite(s):** Two semesters of calculus and partial differential equation.

**Schedule Type:** LEC

**Hours of Lecture or Seminar per week:** 3

**Hours of Lab or Studio per week:** 0

---

**EVPP 670 - Environmental Law**

Credits: 3

Not Repeatable for Credit

Offered by Environmental Science and Policy

Studies environmental laws such as the National Environmental Policy Act, and regulatory issues such as the Clean Water and Clean Air Acts. Emphasizes critical evaluation of alternatives to unresolved issues in environmental policies.

Equivalent to BIOL 670
Prerequisite(s): Courses in ecology and environmental biology, or permission of instructor.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**EVPP 675 - Environmental Planning and Administration**

Credits: 3
Not Repeatable for Credit
Offered by Environmental Science and Policy
Examines interaction of man and ecological systems; causes of damage or deterioration in environment; content, oversights, and externalities in management decision processes that affect environment and effectiveness of plan implementation; means of assessing environmental impact; and administrative approaches for minimizing environmental impact.

Prerequisite(s): Permission of instructor.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**EVPP 677 - Applied Ecology and Ecosystem Management**

Credits: 3
Not Repeatable for Credit
Offered by Environmental Science and Policy
Uses ecological principles to manage natural resources. Emphasizes hierarchical levels of organization within ecological systems, and management of ecosystems to conserve biodiversity, natural resources, and environment.

Prerequisite(s): BIOL 607 or EVPP 607 or equivalent.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**EVPP 681 - Introduction to Bioinformatics**

Credits: 3
Not Repeatable for Credit
Offered by Environmental Science and Policy
Overview of methods and tools in bioinformatics including Internet interfaces to sequence databases, methods for performing searches of biological databases, sequence alignment, phylogenetic analysis, other types of DNA sequence analysis, web-based tools, and databases in structural biology.

Prerequisite(s): Course in molecular biology, or permission of instructor.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
EVPP 682 - Principles of Environmental Conflict

Credits: 3
Not Repeatable for Credit
Offered by Environmental Science and Policy
Explores the nature and characteristics of environmental conflict and efforts to manage, resolve or transform it. Students will develop a capacity to assess the strengths and weaknesses of environmental conflict resolution processes while learning about best practices for preventing, preparing for, and addressing environmental conflict.

Equivalent to CONF 682

Prerequisite(s): EVPP 607, CONF 501, and CONF 502, or permission of instructor.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

Credits: 3
Not Repeatable for Credit
Offered by Environmental Science and Policy
This course explores best practices for managing, resolving, and transforming environmental conflict using environmental conflict resolution (ECR) processes. Nature and dynamics of environmental disputes, methods for assessing conflict situations, and methods for conducting various forms of ECR processes will be covered in the context of selected case studies with emphasis on student involvement.

Equivalent to CONF 683

Prerequisite(s): EVPP 682 or CONF 682, or permission of instructor.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EVPP 684 - Environmental Conflict Resolution and Collaboration: Leadership Practicum/Capstone

Credits: 3
Not Repeatable for Credit
Offered by Environmental Science and Policy
This course is the capstone course for the Graduate Certificate in Environmental Conflict Resolution and Collaboration. Under supervision of the instructor, students will undertake an assessment of an active environmental conflict and recommend a range of processes that promote identified goals for preferred conflict outcomes.

Equivalent to CONF 684

Prerequisite(s): EVPP 682 or CONF 682, and EVPP 683 or CONF 683.
Schedule Type: LEC
EVPP 692 - Master's Seminar in Environmental Science and Public Policy

Credits: 1
Repeatable within Term for Credit
Offered by Environmental Science and Policy
Explores selected topics in environmental science and public policy using lectures, guest lectures, student presentations, and discussions of current literature.

Notes: Topics vary. May be repeated for credit.

Schedule Type: SEM
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EVPP 693 - Directed Studies in Environmental Science and Public Policy

Credits: 1-4
Repeatable within Term for Credit
Offered by Environmental Science and Policy
Studies topic not otherwise available in graduate program. May involve reading assignments, tutorials, lectures, papers, presentations, and lab or field study determined in consultation with instructor.

Prerequisite(s): Permission of instructor and chair.
Notes: Short study plan required. May not be used to fulfill explicit undergraduate prerequisites for graduate work.

Schedule Type: IND
Hours of Lecture or Seminar per week: 1-4
Hours of Lab or Studio per week: 0
Grading: Graduate Special

EVPP 730 - Environmental Policy Research in Practice

Credits: 3
Repeatable within Degree for Credit
Offered by Environmental Science and Policy
Course is designed for students interested in social science-oriented environmental research. Student learn how to ground their research ideas in social science theory, develop a central research question and construct original research hypotheses that are grounded in social science literature. They also hone their peer reviewing skills by assessing other students' research and offering constructive commentary.

Prerequisite(s): 12 credit hours of graduate course work at Mason or approval of instructor.
Schedule Type: SEM
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring

**EVPP 738 - Sustainable Enterprise Theory**

Credits: 3
Not Repeatable for Credit
Offered by Environmental Science and Policy
This course is designed to critically evaluate the scholarly research related to sustainable enterprise. The class provides an overview of the major theories, research designs, and methodologies associated with this emerging research domain. Students apply these theories to develop social science research proposals for empirical investigation.

**Prerequisite(s):** EVPP 638 Corporate Environmental Management and Policy, equivalent class, or permission of instructor.
**Schedule Type:** LEC
**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0
**When Offered:** Spring

**EVPP 741 - Advanced Topics in Environmental Science and Public Policy**

Credits: 0-4
Repeatable within Term for Credit
Offered by Environmental Science and Policy
Studies selected advanced topics in environmental science and public policy. Lectures, guest lectures, student presentations, laboratory exercises.

**Prerequisite(s):** 8 credits of graduate course work in environmental science and public policy, or permission of instructor.
**Notes:** Topics vary; each offering has coherent theme. May be repeated for credit if topics significantly differ.

**Schedule Type:** LAB, LEC
**Hours of Lecture or Seminar per week:** 0-4
**Hours of Lab or Studio per week:** 0-4

**EVPP 745 - Environmental Toxicology**

Credits: 3
Not Repeatable for Credit
Offered by Environmental Science and Policy
Studies nature, distribution, and interaction of toxic chemicals released into environment. Topics include acute, subchronic, and chronic toxicity testing; uptake, distribution and metabolism of toxins as well as their distribution in the environment. Emphasizes effects on nonhuman biota, detection and fate of chemicals, and includes discussion of implications for government regulation.

Equivalent to BIOL 745.

**Prerequisite(s):** EVPP 445 or EVPP 545 or equivalent; or permission of instructor.
EVPP 792 - Seminar in Earth Systems Science

Credits: 2
Not Repeatable for Credit
Offered by Environmental Science and Policy
Seminar for Earth systems science graduate students with background in major systems. Capstone experience. Seminars presented by faculty and students.

Equivalent to GGS 792

Prerequisite(s): 15 graduate credits; and courses on atmosphere, hydrosphere and lithosphere.
Notes: Topics vary from semester to semester.

EVPP 793 - Research in Environmental Science and Public Policy

Credits: 1-3
Repeatable within Degree for Credit
Offered by Environmental Science and Policy
Library, laboratory, or field investigation under supervision of instructor.

Prerequisite(s): 8 graduate credits in EVPP, and permission of instructor and chair.
Notes: Short proposal required. May be repeated for total of 6 credits.

EVPP 798 - Master's Research Project in Environmental Science and Public Policy

Credits: 1-3
Repeatable within Degree for Credit
Offered by Environmental Science and Policy
Experimental, observational, literature-based, or theoretical research project chosen and completed under guidance of faculty member. Proposal required before enrollment. Comprehensive report acceptable to student's committee required for completion.

Prerequisite(s): Approved project proposal, and permission of instructor and chair.
Notes: Students taking EVPP 798 may receive no more than 6 credits for both EVPP 793 and EVPP 798.
EVPP 799 - Master's Thesis in Environmental Science and Public Policy

Credits: 1-6
Repeatable within Degree for Credit
Offered by Environmental Science and Policy
Experimental, observational, or theoretical research under instructor's supervision that culminates in production of thesis. Thesis work should be potentially publishable.

Prerequisite(s): Approved thesis proposal, and permission of instructor and chair.
Notes: No more than 6 credits of EVPP 793 and EVPP 799 may be applied to master's degree.

EVPP 894 - Supervised Internship

Credits: 3-12
Repeatable within Degree for Credit
Offered by Environmental Science and Policy
Training in application of ecological skills to environmental management and policy under supervision of a qualified environmental scientist at governmental agency, consulting firm, industry, or other acceptable organization.

Prerequisite(s): Permission of student's doctoral committee, graduate program director and department chair.

EVPP 991 - Advanced Seminar in Environmental Science

Credits: 2
Repeatable within Term for Credit
Offered by Environmental Science and Policy
Topics generally address interface between environmental science and public policy.

Prerequisite(s): 8 hours of ecology, or permission of instructor.
Notes: May be repeated for credit.
EVPP 998 - Doctoral Dissertation Proposal

Credits: 1-6
Repeatable within Degree for Credit
Offered by Environmental Science and Policy
Work on research proposal that forms basis for a doctoral dissertation.

Prerequisite(s): Admission to doctoral candidacy.
Schedule Type: IND

EVPP 999 - Doctoral Dissertation Research

Credits: 1-12
Repeatable within Degree for Credit
Offered by Environmental Science and Policy
Research on basic or applied problem in environmental science and public policy.

Prerequisite(s): Approval of dissertation proposal.
Schedule Type: IND

Executive Master of Business Administration (EMBA)

Offered by the School of Business

EMBA 500 - Workshop

Credits: 0
Repeatable within Term for Credit
Offered by School of Business
Workshop.

Prerequisite(s): Acceptance into EMBA program.
Schedule Type: LAB

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 3
Grading: Not Gradable.
When Offered: Fall, Summer, Spring.

EMBA 603 - Managerial Economics

Credits: 3
Not Repeatable for Credit
Offered by School of Business
Develops and applies economic analysis tools in managerial decision situations. Focuses on economic analysis to understand firm's competitive environment.

Prerequisite(s): Admission to EMBA program, or permission of the director.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
Grading: Graduate Special
When Offered: Fall

EMBA 612 - Cost Accounting

Credits: 1-3
Not Repeatable for Credit
Offered by School of Business
Focuses on developing accounting information for use by managers in planning and control activities. Examines traditional and emerging cost-management systems. Special emphasis on information for decision-making, operational control, and performance evaluation.

Prerequisite(s): Admission to EMBA program.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0
Grading: Graduate Special
When Offered: Fall

EMBA 613 - Financial Accounting

Credits: 3
Not Repeatable for Credit
Offered by School of Business
Develops framework of concepts and procedures essential for interpreting general-purpose financial statements and internal managerial accounting reports. Emphasizes understanding basic concepts and applying selected procedures to problem-solving situations.

Prerequisite(s): Admission to EMBA program.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
EMBA 623 - Marketing

Credits: 3
Not Repeatable for Credit
Offered by School of Business
Develops market-based knowledge and skills for effective marketing strategy design, implementation, and evaluation. Develops ability to make marketing decisions in wide variety of institutional and competitive situations. Addresses the importance of companies being market-driven and customer-focused. Emphasis on case studies, team work, and projects.

Prerequisite(s): Admission to EMBA program.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
Grading: Graduate Special
When Offered: Spring

EMBA 633 - Statistics for Business Decision Making

Credits: 3
Not Repeatable for Credit
Offered by School of Business
Applies statistical methods in analyzing problems in business decision-making. Topics include descriptive statistics, probability distributions, estimation and hypothesis testing, and linear regression.

Prerequisite(s): Admission to EMBA program, or permission of the director.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
Grading: Graduate Special
When Offered: Fall

EMBA 638 - Services and Operations Management

Credits: 3
Not Repeatable for Credit
Offered by School of Business
Integrates theory and practice of operations management with mathematical modeling and quantitative techniques of management science. Addresses range of operations management issues, including technology and strategy decisions, systems design issues, project operations, quality control, and inventory planning.

Prerequisite(s): Admission to EMBA program, or permission of the director.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
Grading: Graduate Special
When Offered: Spring

**EMBA 641 - Building the High-Performing Team**

Credits: 0-3
Not Repeatable for Credit
Offered by School of Business
Develops the knowledge and skills needed for creating powerful, high-performance teams within and among organizational units. Strategies are offered for alignment of goals, building conditions for coordinated action, generating innovation, and resolving breakdowns.

**Prerequisite(s):** Admission to EMBA program.
**Schedule Type:** LEC
**Hours of Lecture or Seminar per week:** 0-3
**Hours of Lab or Studio per week:** 0
**Grading:** Satisfactory/No Credit
**When Offered:** Fall

**EMBA 643 - Managerial Finance**

Credits: 3
Not Repeatable for Credit
Offered by School of Business
Introduces theories of finance and their application to the formulation of business policy. Topics include internal financial analysis, financial forecasting, valuation, risk and return analysis, capital allocation, and capital structure.

**Prerequisite(s):** Admission to EMBA program.
**Schedule Type:** LEC
**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0
**Grading:** Graduate Special
**When Offered:** Spring

**EMBA 653 - Organizational Behavior and Teams**

Credits: 3
Not Repeatable for Credit
Offered by School of Business
Examines development, theories, and practice of management within organizations. Emphasizes human behavior and how it influences organizational effectiveness.

**Prerequisite(s):** Admission to EMBA program.
**Schedule Type:** LEC
**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0
EMBA 660 - Management of Information Technology

Credits: 3
Not Repeatable for Credit
Offered by School of Business
Examines computer-based information technologies and their interrelation with management processes, especially problem-solving and decision-making at individual, work group, and organization levels. Topics include management information system life cycle, with emphasis on manager's perspective, and modeling and analysis to support decision-making.

Prerequisite(s): Admission to EMBA program, or permission of the director.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
Grading: Graduate Special
When Offered: Fall

EMBA 673 - Legal Environment for Executives

Credits: 1.5
Not Repeatable for Credit
Offered by School of Business
Examines the managerial impact of the law upon decision-making processes in business organizations. Lectures as well as discussions of judicial opinions and readings.

Prerequisite(s): Admission to EMBA program.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0
Grading: Graduate Special
When Offered: Fall

EMBA 674 - Business Ethics

Credits: 1-3
Not Repeatable for Credit
Offered by School of Business
Designed to strengthen the ability to identify, critically analyze, appropriately respond to, and provide leadership regarding the issues of ethical and socially responsible behavior you may confront as an executive in charge of people, projects, and organizations.

Prerequisite(s): Admission to the EMBA program.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 1-3
EMBA 678 - Business Strategy

Credits: 3
Not Repeatable for Credit
Offered by School of Business
Integrates business strategy and policy with functional knowledge developed in other courses and business practice. Issues include formulation of strategy, industry analysis, building core competencies, and strategy implementation.

Prerequisite(s): Admission to EMBA program.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
Grading: Graduate Special
When Offered: Spring

EMBA 696 - Directed Studies in Executive MBA

Credits: 1-3
Repeatable within Degree for Credit
Offered by School of Business
Approval by faculty member and program director required prior to registration. Studies specialized topics in business not otherwise available in the curriculum.

Prerequisite(s): Admission to the EMBA program or permission of the program director.
Schedule Type: IND
Hours of Lecture or Seminar per week: 1-3

EMBA 697 - Special Topics in Executive MBA

Credits: 1-3
Repeatable within Term for Credit
Offered by School of Business
Sections established as necessary to focus on various topical issues that emerge in practice of executive business administration.

Prerequisite(s): Admission to the EMBA program or permission of the program director.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
Grading: Graduate Special.

EMBA 703 - Financial Markets
Credits: 0-3
Repeatable within Degree for Credit
Offered by School of Business
Explores the relationships between financial markets and their impact on corporate financial decision making. Considers cross-market interrelationships, including how financial markets respond by creating financial instruments to meet the varying financial requirements of business firms. The course includes a domestic financial residency in New York that focuses on contemporary developments in these markets.

Prerequisite(s): Admission to EMBA program.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
Grading: Graduate Special
When Offered: Fall

EMBA 710 - Global Macro Economics

Credits: 1.5
Not Repeatable for Credit
Offered by School of Business
Focuses on the modern system of international trade and the opportunities that the global trading environment creates for firms. Attention will be directed toward the roles of national policies, international agreements, and business activities in the development of the system.

Prerequisite(s): Admission to EMBA program.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 1.5
Hours of Lab or Studio per week: 0
Grading: Graduate Special
When Offered: Spring

EMBA 712 - International Macroeconomics

Credits: 1.5
Not Repeatable for Credit
Offered by School of Business
Focuses on the basic concepts of international macroeconomics—national income accounts, monetary and fiscal policies, balance of payments, and exchange rates. These concepts are introduced and discussed in situations where national economic strategies affect the decisions and performance of business operations.

Prerequisite(s): Admission to EMBA program.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0
When Offered: Fall

EMBA 716 - Managing Change
Focuses on how organizations can successfully adapt and change. Topics include understanding forces that make change necessary, developing vision of appropriate course, aligning organization behind that vision, and motivating people to achieve it.

**Prerequisite(s):** Admission to EMBA program.

**Schedule Type:** LEC

**Hours of Lecture or Seminar per week:** 1-3

**Hours of Lab or Studio per week:** 0

**Grading:** Graduate Special

**When Offered:** Fall

---

**EMBA 718 - Leadership and Change Management**

Focuses on the essential elements of successful organizational change. Emphasis on understanding the forces for change, as well as developing skills to manage a successful change process. Gives a deeper understanding of organizational leadership and an increased ability to be a successful leader. Incorporates and integrates theory, research, and application, with the ultimate goal of providing the student with practical information about leadership.

**Prerequisite(s):** Admission to the EMBA program.

**Schedule Type:** LEC

**Hours of Lecture or Seminar per week:** 3

**Hours of Lab or Studio per week:** 0

**When Offered:** Fall, Spring

---

**EMBA 725 - Leadership and the Role of the General Manager**

Explores key leadership roles in organizations and their own leadership competencies. Provides understanding of leadership development, power and influence, motivation, strategic decision making, leading change, the influence of globalization and diversity on leadership, and ethical issues.

**Prerequisite(s):** Admission to the EMBA program or permission of the program director.

**Schedule Type:** LEC

**Hours of Lecture or Seminar per week:** 1-3

**Hours of Lab or Studio per week:** 0

**Grading:** Graduate Special

**When Offered:** Fall

---

**EMBA 729 - Introduction to Critical Infrastructure Protection**
Course provides an introduction to the policy, strategy, and practical application of critical infrastructure security and resilience from an all-hazards perspective. It describes the strategic context presented by the 21st century risk environment, and discusses the challenges and opportunities associated with the following: public-private partnerships; information-sharing; risk analysis and prioritization; risk mitigation and management; performance measurement; incident management; and addressing future risks.

Prerequisite(s): Admission to EMBA program.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0
Grading: Graduate Special

EMBA 730 - Assessing and Managing Risk to Critical Infrastructure Systems

Course provides an introduction to the policy, strategy, and practical application of an all-hazards risk assessment and management in the context of critical infrastructure security and resilience. Course promotes subject matter understanding, critical discussion of analytic approaches, and proficiency in communicating information on risk methodologies and their utilization in oral and written form.

Prerequisite(s): Admission to EMBA program.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 1-3

EMBA 731 - Partnering and Information Sharing for Critical Infrastructure Security and Resilience

Course provides an overview of partnerships and information sharing within the homeland security enterprise with a focus on the collaboration and information products, processes, and systems necessary to protect and enhance the resilience of the Nation's critical infrastructure. Course is designed to promote subject-matter understanding, critical analysis of issues, and insight into senior leader decision-making in both the government and private sectors.

Prerequisite(s): Admission to EMBA program.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0

EMBA 732 - Critical Infrastructure Security and Resilience and Cybersecurity
EMBA 733 - Advanced Topics in Critical Infrastructure Protection

Credits: 1-3
Not Repeatable for Credit
Offered by School of Business
Course provides an advanced focus on critical infrastructure security and resilience policy, strategy, planning, and incident management operations in an all-hazards context. In terms of the audience, this course assumes a base level of student knowledge and practical experience in the critical infrastructure security and resilience field.

Prerequisite(s): Admission to EMBA program.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0

EMBA 734 - Critical Infrastructure Protection Residency

Credits: 3
Not Repeatable for Credit
Offered by School of Business.
This course takes the concepts from previous Critical Infrastructure Protection track courses and provides an opportunity to see these concepts in a "field environment." The course will engage with decision makers to learn how they operate profit generating firms in the critical infrastructure sectors while addressing considerations of security and resilience.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
When Offered: Fall, Spring

EMBA 735 - Systems Thinking and Dynamics

Credits: 1-3
Not Repeatable for Credit
Offered by School of Business
Enables students to develop, express, improve, and validate holistic mental models of problems. In doing so, they will build a
foundation for better decision making leading to improved business performance. The main strength of the systems-thinking approach is its emphasis on long-term strategic outcomes as opposed to short-term tactical ones.

**Prerequisite(s):** Admission to the MBA program, or permission of the program director.

**Schedule Type:** LEC
**Hours of Lecture or Seminar per week:** 1-3
**Hours of Lab or Studio per week:** 0
**When Offered:** Fall

### EMBA 740 - Introduction to Global Business

Credits: 1-3
Repeatable within Degree for Credit
Offered by School of Business
The seminar topics would incorporate student and industry partner feedback and consultation by the Program Director and Academic Director with the GPC and Area Chairs. Possible topics include: European Union, Global Social Entrepreneurship, Emerging Markets and Product Development.

**Prerequisite(s):** Admission to the EMBA program.
**Schedule Type:** SEM
**Hours of Lecture or Seminar per week:** 1-3
**Hours of Lab or Studio per week:** 0
**Grading:** Graduate Special.

### EMBA 741 - Introduction to National Security

Credits: 1-3
Repeatable within Degree for Credit
Offered by School of Business
The seminar topics would incorporate student and industry partner feedback and consultation by the Program Director and Academic Director with the GPC and Area Chairs. Possible topics include: National Defense Commercial Strategy, Competing Internationally in National Defense Sector, Small Business and National Defense.

**Prerequisite(s):** Admission to the EMBA program.
**Schedule Type:** SEM
**Hours of Lecture or Seminar per week:** 1-3
**Hours of Lab or Studio per week:** 0
**Grading:** Graduate Special.

### EMBA 742 - Advanced Topics in Global Business

Credits: 1.5
Not Repeatable for Credit
Offered by School of Business.
The course discusses current issues in globalization and the ramifications of globalization on business strategy; comparatively reviews emerging markets and development in Asia, Africa, and Latin America and in financial services, healthcare, and eGovernment; considers the role of ICT and mobiles in international development; and reviews the role and development of
institutions and significance for business in emerging markets.

**EMBA 743 - Advanced Topics in National Security**

Credits: 1.5  
Not Repeatable for Credit  
Offered by School of Business.

Students will be provided an in-depth look at the strategy side of the National Security industry and will learn how security business position and re-position themselves in this changing market place. The process that firms go through to determine their overall strategy will be explored.

**Schedule Type:** LEC  
**Hours of Lecture or Seminar per week:** 2  
**When Offered:** Fall, Spring

**EMBA 745 - Special Topics in Finance**

Credits: 1-6  
Repeatable within Term for Credit  
Offered by School of Business  
In-depth examination of advanced topics in finance.

**Prerequisite(s):** Admission to EMBA program.  
**Schedule Type:** LEC  
**Hours of Lecture or Seminar per week:** 1-3  
**Hours of Lab or Studio per week:** 0  
**Grading:** Graduate Special  
**When Offered:** Offered on an irregular basis at the discretion of the department or school

**EMBA 750 - Capstone Project: Part 1**

Credits: 1.5  
Repeatable within Degree for Credit  
Offered by School of Business  
The Integrated Project Application is a lab-based course designed to provide an action learning experience that integrates course content from throughout the EMBA program. Students work in teams to develop solutions to organizational challenges and opportunities. They select one project from those offered by sponsoring organizations and approved by the faculty members for the course. Student teams evaluate the strategic issues for their assigned clients, design a solution, and present results to an executive panel. Depending on the nature of the issue and faculty requests, team presentations of results include one or more of the following sections: 1) an analysis of the situation 2) recommendations including changes in goals and organizational design, 3) a plan of action integrating marketing, human resource development, organizational design, finance, and operations, and 4) an implementation plan using theories of communication and change management, to include the business case and a business plan.
Students are expected to draw upon course work from multiple disciplines in completing this project.

**Prerequisite(s):** Admission to the EMBA program or permission of the program director.
**Notes:** Course is repeatable within the term. Offered twice in spring semester for a total of 3 credit hours.

**Schedule Type:** LEC  
**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**Grading:** Graduate Special  
**When Offered:** Spring

### EMBA 751 - Corporate Global Strategy

Credits: 1.5-3  
Not Repeatable for Credit  
Offered by School of Business  
Examines issues in strategy for firms operating in multiple markets or businesses, including diversification, portfolio approaches to corporate strategy, mergers and acquisitions, corporate alliances and joint ventures, restructuring, and coordinating multibusiness corporations.

**Prerequisite(s):** Admission to EMBA program.  
**Schedule Type:** LEC  
**Hours of Lecture or Seminar per week:** 1.5-3  
**Hours of Lab or Studio per week:** 0  
**Grading:** Graduate Special  
**When Offered:** Spring

### EMBA 752 - A Strategic View of the Firm

Credits: 0-3  
Not Repeatable for Credit  
Offered by School of Business  
Examines the interplay between the industry environment and a firm's resources and capabilities to drive superior performance. The course seeks to integrate multiple functional perspectives to arrive at a complete understanding of the firm within its environment.

**Prerequisite(s):** Admission to EMBA program.  
**Schedule Type:** LEC  
**Hours of Lecture or Seminar per week:** 0-3  
**Hours of Lab or Studio per week:** 0  
**Grading:** Satisfactory/No Credit  
**When Offered:** Fall

### EMBA 754 - Capstone Project: Part 2

Credits: 1.5  
Not Repeatable for Credit
Offered by School of Business

Students will work in teams to develop solutions to complex organizational challenges and opportunities. The Capstone project is divided into two parts with regard to course work. In Part II, students will evaluate the strategic issues for their client based upon interviews, outside primary and secondary research, and industry analysis.

**Schedule Type:** LEC

**Hours of Lecture or Seminar per week:** 1.5

**Hours of Lab or Studio per week:** 0

**When Offered:** Fall, Spring

---

**EMBA 755 - Special Topics in Management**

Credits: 1-6

Repeatable within Term for Credit

Offered by School of Business

In-depth examination of advanced topics in management.

**Prerequisite(s):** Admission to the EMBA program or permission of the program director.

**Schedule Type:** LEC

**Hours of Lecture or Seminar per week:** 1-6

**Hours of Lab or Studio per week:** 1-9

**Grading:** Graduate Special

---

**EMBA 790 - National Security Residency**

Credits: 3

Not Repeatable for Credit

Offered by School of Business

Develops National Security perspective through seminars led by professors and high-level managers; briefings by officials of government and other policy-making organizations.

**Prerequisite(s):** Admission to EMBA Program or permission of the program director.

**Schedule Type:** LEC

**Hours of Lecture or Seminar per week:** 1-6

**Hours of Lab or Studio per week:** 0

**Grading:** Satisfactory/No Credit

**When Offered:** Fall, Summer

---

**EMBA 791 - The Regulatory and Business Environment of the European Union**

Credits: 0-1.5

Repeatable within Degree for Credit

Offered by School of Business

Considers contemporary interactions of businesses, government, and regulation. Seminars and presentations with business, government, and regulatory officials.

**Prerequisite(s):** Admission to the EMBA program, or permission of the director.
EMBA 795 - Global Residency

Credits: 0-3
Repeatable within Term for Credit
Offered by School of Business
Develops global perspective through seminars led by professors and high-level managers; briefings by officials of government and other policy-making organizations; and site visits to production and distribution facilities, research centers, IT units, and other corporate offices.

Prerequisite(s): Admission to the EMBA program or permission of the program director.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
Grading: Graduate Special
When Offered: Spring, Summer

Exercise, Fitness, and Health Promotion (EFHP)

Offered by the College of Education and Human Development

EFHP 500 - Workshop in Exercise, Fitness, and Health Promotion

Credits: 1-3
Repeatable within Degree for Credit
Offered by School of Recreation, Health, and Tourism
Provides concentrated full-time workshops, weekend seminars, and workshops on selected topics in exercise, fitness, and health promotion.

Prerequisite(s): Graduate standing or permission of instructor
Notes: May be repeated. No more than 6 credits may be applied for degree credit.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0

EFHP 520 - Medical Terminology of Health Professionals

Credits: 3
Not Repeatable for Credit
Offered by School of Recreation, Health, and Tourism
Analyzes foundation of scientific and medical vocabulary including prefixes, suffixes and stems used to form compound words for health professionals.

Prerequisite(s): Graduate Standing or POI
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
When Offered: Fall

**EFHP 522 - Functional Anatomy for Health and Wellness Practitioners**

Credits: 3
Not Repeatable for Credit
Offered by School of Recreation, Health, and Tourism
Promotes familiarity and proficiency with anatomy of neuromuscular and musculoskeletal systems, which relate directly to sports related injuries.

Prerequisite(s): BIOL 124 and 125 or equivalent, and permission of instructor
Schedule Type: LEC
Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 1

**EFHP 524 - Physiology for the Athletic Trainer Including the Pharmacology of Sports Injuries**

Credits: 3
Not Repeatable for Credit
Offered by School of Recreation, Health, and Tourism
Promotes familiarity and proficiency in physiology, pharmacology, and rehabilitation of sports injuries.

Prerequisite(s): BIOL 124 and 125 or equivalent, and permission of instructor
Schedule Type: LEC
Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 1

**EFHP 526 - Prevention, Recognition, and Management of Fitness Related Injuries**

Credits: 3
Not Repeatable for Credit
Offered by School of Recreation, Health, and Tourism
Promotes familiarity and proficiency with assessment and physical examination of sports-related injuries.

Prerequisite(s): BIOL 124 and 125 or equivalent, and permission of instructor
Notes: Recommended that this course be taken concurrently with EFHP 522.
Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 1

**EFHP 528 - Advanced Athletic Training**

Credits: 3
Not Repeatable for Credit
Offered by School of Recreation, Health, and Tourism
Promotes familiarity and proficiency with assessment and intervention of neuromusculoskeletal system and other systems of body that relate directly to sports-related injuries.

**Prerequisite(s):** BIOL 124 and 125 or equivalent, EFHP 526, and permission of instructor
**Schedule Type:** LEC

**EFHP 598 - Special Topics**

Credits: 1-6
Repeatable within Term for Credit
Offered by School of Recreation, Health, and Tourism
Focuses on projects related to exercise, fitness, or health promotion.

**Prerequisite(s):** Graduate standing or permission of instructor
**Notes:** May be repeated with no more than 6 credits earned.

**Schedule Type:** LEC

**EFHP 599 - Independent Study EFHP**

Credits: 1-3
Repeatable within Degree for Credit
Offered by School of Recreation, Health, and Tourism
Studies problem areas in exercise, fitness, and health promotion research, theory, or practice under direction of faculty member.
May be repeated. No more than 3 credits may be earned.

**Schedule Type:** IND

**EFHP 605 - History of American Sport, Exercise, and Physical Culture**
EFHP 610 - Advanced Exercise Physiology

Credits: 3
Not Repeatable for Credit
Offered by School of Recreation, Health, and Tourism
Lecture, demonstration, and seminar experiences in applying research findings to understanding physiological function and effects of exercise on people.

Prerequisite(s): Graduate standing or permission of instructor
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EFHP 611 - Fitness Assessment: Theory and Practice

Credits: 3
Not Repeatable for Credit
Offered by School of Recreation, Health, and Tourism
Promotes familiarity and proficiency with methods and instrumentation in assessing individual fitness and establishing base for exercise and other lifestyle alternatives to improve fitness.

Prerequisite(s): Graduate standing or permission of instructor
Schedule Type: LEC
Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 2

EFHP 612 - Scientific Foundation of Applied Kinesiology

Credits: 3
Not Repeatable for Credit
Offered by School of Recreation, Health, and Tourism
An integrated study of human anatomy, physiology, chemistry, and microbiology, presenting a complete picture of how the body functions and the diseases and disorders that cause the body to malfunction.

Prerequisite(s): For Masters level: Admission to the MS EFHP Program.
For Doctoral level: Admission to PhD in Education Program or Permission of Instructor.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
EFHP 613 - Advanced Applied Biomechanics

Credits: 3
Not Repeatable for Credit
Offered by School of Recreation, Health, and Tourism
Examines kinetic and kinematic concepts and how they apply to the qualitative and quantitative assessment of human movement. Discusses advanced applied motion analysis techniques.

Prerequisite(s): For Masters level: Admission to the MS EFHP Program.
For Doctoral level: Admission to PhD in Education Program or Permission of Instructor.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring

EFHP 614 - Advanced Exercise Nutrition

Credits: 3
Not Repeatable for Credit
Offered by School of Recreation, Health, and Tourism
Advanced study of nutrition's relation to physical activity, exercise, and sports. Reviews biochemical, physiological, and behavioral aspects of nutrition in promoting health, fitness, and sports performance. Focuses on nutrient needs during life cycle stages.

Prerequisite(s): Graduate standing or permission of instructor
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EFHP 615 - Epidemiology and Environmental Health

Credits: 3
Not Repeatable for Credit
Offered by School of Recreation, Health, and Tourism
Principles, methods, and application of epidemiology. Reviews behavioral, psychological, social, and environmental risks to disease distribution. Focuses on lifestyle, exercise patterns, and environmental factors to health and disease conditions.

Prerequisite(s): Graduate standing or permission of instructor
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
EFHP 616 - Motor Behavior and Development

Credits: 3  
Not Repeatable for Credit  
Offered by School of Recreation, Health, and Tourism  
Human motor behavior development and theory with application to evaluation of skill acquisition.

Prerequisite(s): Graduate standing or permission of instructor.  
Schedule Type: LEC  
Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0

EFHP 618 - Exercise and Sport Psychology

Credits: 3  
Not Repeatable for Credit  
Offered by School of Recreation, Health, and Tourism  
Covers psychological and social-psychological antecedents and consequences of exercise, physical activity, and sports participation. Emphasizes theory and research on personality, motivation, arousal, cognition, attributions, attitudes, self-efficacy, leadership effectiveness, and group dynamics.

Prerequisite(s): Graduate standing or permission of instructor  
Schedule Type: LEC  
Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0

EFHP 620 - Research Methods for Applied Kinesiology

Credits: 3  
Not Repeatable for Credit  
Offered by School of Recreation, Health, and Tourism  
Introduction to the techniques of research generally employed in the fields of exercise science and health.

Schedule Type: LEC  
Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0

EFHP 621 - Statistical Methods for Applied Kinesiology

Credits: 3  
Not Repeatable for Credit  
Offered by School of Recreation, Health, and Tourism  
Introduction to practical and applied aspects of both descriptive and applied aspects of both descriptive and inferential statistics in exercise science and health.

Prerequisite(s): Full admission to EFHP graduate program, MATH 102, STAT 250 or permission of the instructor.
EFHP 623 - Research Design and Statistical Reasoning

Credits: 3
Not Repeatable for Credit
Offered by School of Recreation, Health, and Tourism
Introduces techniques of research and methods of data analysis.

Prerequisite(s): Graduate standing or permission of instructor

EFHP 630 - Exercise, Health, and Fitness Program Development

Credits: 3
Not Repeatable for Credit
Offered by School of Recreation, Health, and Tourism
Covers exercise and health program development related to fitness and health of adult populations.

Prerequisite(s): Graduate standing or permission of instructor
Notes: Provides 3 to 6 hours of field experience.

EFHP 640 - Principles of Strength and Conditioning

Credits: 3
Not Repeatable for Credit
Offered by School of Recreation, Health, and Tourism
Analyzes exercise techniques, training program designs, organization and administration, and testing and evaluation using scientific principles of strength and conditioning.

Prerequisite(s): Graduate standing or permission of instructor

EFHP 650 - Scientific Principles of Motor Learning
Biomechanical analysis and application of scientific principles of movement to instructing sport skills in physical education and sport programs.

Prerequisite(s): Graduate standing or permission of instructor.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EFHP 660 - Management of Exercise, Fitness, and Health Promotion Organizations

Advanced study in management and administration of organizations dedicated to human development and improvement of quality of life. Covers application of theories and practices of management and behavioral sciences, fiscal management, marketing, and evaluation research.

Prerequisite(s): Graduate standing or permission of instructor
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EFHP 680 - Ethical Issues in Exercise, Fitness, and Health Promotion

Covers formulation of coherent framework for ascertaining good, right, and just; and for assessing evidence and reason underlying positions and arguments. Examines ethical issues in exercise, fitness, and health promotion.

Prerequisite(s): Graduate standing or permission of instructor
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EFHP 690 - Scientific Communications

Studies and applies written and verbal communication skills in reading, analyzing, writing, and distributing scientific information in Applied Kinesiology.

Prerequisite(s): For Masters level: Admission to the MS EFHP Program.
EFHP 730 - Motor Learning

Credits: 3
Not Repeatable for Credit
Offered by School of Recreation, Health, and Tourism
Appraisal of motor learning theories and an analysis of motor skill development including the roles of information processing, practice, feedback, and motivation.

Prerequisite(s): For Masters level: Admission to the MS EFHP Program
For Doctoral level: Admission to PhD in Education Program
or Permission of Instructor.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

EFHP 798 - Project

Credits: 1-3
Repeatable within Degree for Credit
Offered by School of Recreation, Health, and Tourism
Addresses an applied exercise, fitness, and health promotion issue under supervision of graduate faculty member.

Prerequisite(s): Graduate standing or permission of instructor

Schedule Type: LEC
Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0
Grading: Graduate Special

EFHP 799 - Thesis

Credits: 1-6
Repeatable within Degree for Credit
Offered by School of Recreation, Health, and Tourism
Explores exercise, fitness, and health promotion problem using appropriate research methodology and under supervision of graduate faculty member.

Prerequisite(s): Graduate standing or permission of instructor

Schedule Type: IND
Hours of Lecture or Seminar per week: 1-6
**EFHP 802 - Readings for the Doctor of Arts in Community College Education**

Credits: 3-9  
Repeatable within Degree for Credit  
Offered by School of Recreation, Health, and Tourism  
Intensive reading in recent scholarship in physical education and related fields. Students must propose reading list that must be approved by faculty advisor and use list to prepare potentially publishable literature review.

**Prerequisite(s):** Graduate standing or permission of instructor  
**Schedule Type:** IND  
**Hours of Lecture or Seminar per week:** 3-9  
**Hours of Lab or Studio per week:** 0  
**Grading:** Graduate Special

**EFHP 820 - Careers in the Academy Seminar**

Credits: 3  
Not Repeatable for Credit  
Offered by School of Recreation, Health, and Tourism  
Examines careers in the academy in a seminar format including faculty role, institutional fit, and the higher education academic job search (including developing cover letters and job portfolio outlines); introduces teaching, research, and service expectations at higher education institutions to help prepare for future academic careers.

**Prerequisite(s):** Admission to the PhD in Education program or Permission of Instructor.  
**Schedule Type:** SEM  
**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall

**EFHP 840 - Doctoral Seminar in Exercise, Fitness, and Health Promotion**

Credits: 3  
Not Repeatable for Credit  
Offered by School of Recreation, Health, and Tourism  
Examines problem areas in Exercise, Fitness, and Health Promotion research, theory, or practice using a combination of self-directed, guided learning, and critical peer reviews in a seminar format.

**Prerequisite(s):** Admission to the PhD in Education Program or Permission of Instructor.  
**Schedule Type:** SEM  
**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Spring
EFHP 860 - Critical Perspectives in Exercise, Fitness, and Health Promotion

Credits: 3
Not Repeatable for Credit
Offered by School of Recreation, Health, and Tourism
Critically examines current topics in Exercise, Fitness and Health Promotion, and Applied Kinesiology.

Prerequisite(s): Admission in the PhD in Education Program or Permission of Instructor.
Schedule Type: SEM
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

EFHP 880 - Grant Writing

Credits: 3
Not Repeatable for Credit
Offered by Graduate School of Education
Provides an overview of grants and contracts; examines federal and non-federal proposal development guidelines; emphasizes National Institutes of Health (NIH) research grant mechanisms as a 'gold standard'.

Prerequisite(s): Graduate Standing or Permission of Instructor.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
Grading: Graduate Special.
When Offered: Fall

Film and Video Studies (FAVS)

Offered by the College of Visual and Performing Arts

FAVS 100 - Film and Video Studies Colloquium

Credits: 1
Repeatable within Degree for Credit
Offered by Film and Video Studies
Students are exposed to the film and video industry through film professionals. Students are required to attend all sessions, review the speaker's materials prior to the class, prepare questions, and complete written critiques. FAVS majors are required to take FAVS 100 twice.

Prerequisite(s): FAVS majors only.
Notes: Students may repeat for a total of 5 credits but only 2 credits of C or better may be applied to the degree.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 1
FAVS 225 - The History of World Cinema

Credits: 3
Not Repeatable for Credit
Offered by Film and Video Studies
This course is a survey of the history of cinema. It explores the development of world cinema from its beginnings in the late nineteenth century to the 1990s. The course will enable students to comprehend the evolution of the history and language of cinema in order to connect the art of filmmaking with the "outside forces" (i.e., the economic institutions, key figures, historical events and social issues) that profoundly shape and influence it.

Fulfills Mason Core requirement in arts.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
When Offered: Fall, Spring, Summer

FAVS 250 - Business of Film and Video

Credits: 3
Not Repeatable for Credit
Offered by Film and Video Studies
This course provides an overview of the film industry from a business perspective. Students learn basic business practices, film financing, business plans, film distribution, and management and marketing techniques appropriate for the film industry.

Equivalent to FAVS 355.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

FAVS 255 - Video Production for Film

Credits: 3
Not Repeatable for Credit
Offered by Film and Video Studies
This course is a hands-on methods course in video production for film. Through practice, reading, film viewing and discussions, you will be introduced to the art and activity of digital filmmaking across film genres. Students must complete reading, writing, and production assignments that justify and plan for their creative choices. Handouts describing projects, expectations and evaluative criteria will be provided.

Equivalent to COMM 355.

Notes: FAVS majors only.
FAVS 260 - Video Editing for Film

Credits: 3
Not Repeatable for Credit
Offered by Film and Video Studies
This course will instruct on the theories and technical expertise pertaining to video editing by utilizing various video editing software. The course will combine lectures, discussions, and demonstrations with hands on projects.

Prerequisite(s): AVT 204, and FAVS 255 or COMM 355.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

FAVS 280 - Writing for the Moving Image

Credits: 3
Not Repeatable for Credit
Offered by Film and Video Studies
This course is an introduction to writing for the moving image through lecture, discussion, and critiques of exercises and written works. By the end of the semester, each student will have produced a variety of analyses and/or blueprints for creative moving image projects including short fiction, commercial advertisement, scripted television, collaborative fiction, short non-fiction reality programming, and other forms.

Prerequisite(s): Must be enrolled in Film and Video Studies Program.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

FAVS 300 - Global Horror Film

Credits: 3
Not Repeatable for Credit
Offered by Film and Video Studies
Taking an historical approach through various national and international cinemas, the course begins with horror film's literary and theatrical origins and traces its development into a modern (and postmodern) form of universal storytelling.

Fulfills Mason Core requirement in global understanding.

Schedule Type: LEC
**FAVS 311 - Producing I**

Credits: 3
Not Repeatable for Credit
Offered by Film and Video Studies

A comprehensive introduction to producing, production management, and assistant directing for motion pictures. Students will gain practical experience as producers, production managers, and assistant directors on Mason student film productions and GMU-TV's Studio A show. The course will cover script breakdown, budgeting, shooting schedules, market research, fundraising, recruiting and managing cast and crew, payroll, and other areas in producing.

Prerequisite(s): AVT 204, FAVS 250, FAVS 255 or COMM 355, and FAVS 280, or permission of instructor.

Schedule Type: LEC

**FAVS 331 - Cinematography**

Credits: 3
Not Repeatable for Credit
Offered by Film and Video Studies

This course aims to recreate a professional camera department environment. By the end of the course, students should be able to understand and perform the function of first assistant cameraperson or second assistant cameraperson on a camera crew. Students will understand the history, function, art, craft, and science of cinematography.

Prerequisite(s): AVT 204, and FAVS 255 or COMM 355, or permission of instructor.

Schedule Type: LEC

**FAVS 333 - Sound Editing and Recording**

Credits: 3
Not Repeatable for Credit
Offered by Film and Video Studies

This course instructs students on the theories, techniques and technologies pertaining to recording audio in the field and studio and to audio editing and mixing for film and video. The course will be lecture based with practical lab and field exercises applying concepts and equipment presented during the lecture.

Prerequisite(s): AVT 204, FAVS 255 or COMM 355.

Schedule Type: LEC
FAVS 335 - Sound and Lighting for Film and Video

Credits: 3
Not Repeatable for Credit
Offered by Film and Video Studies
This course will instruct students on the theories, techniques, and technologies pertaining to recording audio and lighting scenes in both field and studio video productions. The course will be lecture based with practical lab styled exercises reinforcing topics presented during lecture.

Prerequisite(s): COMM 355 or permission of instructor.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

FAVS 352 - Ethics of Film and Video

Credits: 3
Not Repeatable for Credit
Offered by Film and Video Studies
An examination of ethical issues associated with image production and consumption. Topics include the technological development of the film apparatus, privacy, the pursuit of objectivity, excess, consent, and representing others. All issues highlight the increasingly sophisticated and powerful role of film and media authorship. Students will develop a more complex view of the ethics of screen representation (both fiction and nonfiction) and be encouraged to take stock of the ethics of their own media literacy.

Fulfills Mason Core requirement in synthesis.

Prerequisite(s): Completion or concurrent enrollment in all other required Mason Core courses and completion of 21 credits within the FAVS program.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

FAVS 356 - Film Marketing

Credits: 3
Not Repeatable for Credit
Offered by Film and Video Studies
This course is designed to teach students how to market their film projects (pre- and post-production) using traditional methods and techniques of the 21st century.

Prerequisite(s): FAVS 250 or other business course as approved by instructor
Schedule Type: LEC
FAVS 357 - New Media and Film Distribution

Credits: 3
Not Repeatable for Credit
Offered by Film and Video Studies
This course explores how emerging media technologies function and how the film and video firms are changing with the advent of new media technologies. Through research and guided projects, students learn how new media technologies are altering the financing, distribution, exhibition, and marketing of films and videos.

Prerequisite(s): FAVS 250 or other business course as approved by instructor.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

FAVS 365 - Documentary Filmmaking

Credits: 3
Not Repeatable for Credit
Offered by Film and Video Studies
An introduction to documentary filmmaking in which each student makes a short digital documentary, from concept development to finished piece. The class covers essential technical skills, emerging styles of nonfiction film, and documentary storytelling techniques.

Prerequisite(s): AVT 204, FAVS 250, FAVS 255, FAVS 280 or COMM 355.
Notes: Restricted to Film and Video Studies majors only.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

FAVS 375 - Fiction Film Directing

Credits: 3
Not Repeatable for Credit
Offered by Film and Video Studies
This course examines techniques for directing fiction films. Students study the directorial approaches of a variety of directors by viewing and critiquing classic films. Students learn about the director's role in each stage of film production. Students shoot, direct and edit fictional scenes and sequences intended to develop and convey the beginnings of the authorial signatures.

Prerequisite(s): AVT 204, FAVS 250, FAVS 255 or COMM 355, and FAVS 280.
Notes: Restricted to Film and Video Studies majors only.
FAVS 378 - Web Series

Credits: 3
Not Repeatable for Credit
Offered by Film and Video Studies
A production course that explores the creative and logistical process of creating a fiction series for the web. Production techniques for web series will be explored, including permissions, contracts, and budgets for web development. The course will consider and study successful web series and explore contemporary discussions and professional organizations centered on web series.

Prerequisite(s): AVT 204, FAVS 250, FAVS 255 or COMM 355, and FAVS 280.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

FAVS 399 - Special Topics in Film and Video Studies

Credits: 1-3
Repeatable within Term for Credit
Offered by Film and Video Studies
In-depth presentation and exploration of topical studies.

Notes: Subject matter varies. May be repeated for a maximum 12 credits when taken under different topics.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring, Summer

FAVS 400 - Film and Video Career Seminar

Credits: 1
Repeatable within Degree for Credit
Offered by Film and Video Studies
This course is designed to guide students through the portfolio process. At the end of the semester, students will have a completed, professionally reviewed resume and demo reel, and have experienced a professional interview.

Prerequisite(s): Completion of required courses within chosen concentration or permission of instructor.
Schedule Type: SEM
Hours of Lecture or Seminar per week: 1
**FAVS 450 - Internship in Film and Video Studies**

Credits: 3  
Repeatable within Degree for Credit  
Offered by Film and Video Studies  
On-the-job training in film and video studies through approved fieldwork study programs. Internships are arranged and supervised by the FAVS director.

**Prerequisite(s):** 75 credits, 15 credits in core/elective FAVS courses, and permission of the Internship Coordinator.  
**Notes:** Required for all FAVS majors.

**Schedule Type:** INT  
**Hours of Lecture or Seminar per week:** 1  
**Hours of Lab or Studio per week:** 0

**FAVS 453 - Film and Video Studies Pedagogy and Principles**

Credits: 3  
Repeatable within Degree for Credit  
Offered by Film and Video Studies  
Theory and practice in facilitating the learning of principles and skills in film and video. Students work as instructor aids under the supervision of a faculty member. Activities include facilitating small group activities and individually critiquing classroom performances.

**Prerequisite(s):** Declared FAVS major. Student must have successfully completed the course they will facilitate with a grade of B or better, have comparable experience, or receive permission from the instructor.  
**Schedule Type:** INT  
**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall, Summer, Spring

**FAVS 455 - Studio and Field Productions Practicum**

Credits: 3  
Not Repeatable for Credit  
Offered by Film and Video Studies  
Practical knowledge in studio and field productions. Students complete a minimum 150 hours of work as assistants to engineers, producers, directors, and organizers of video production facilities on campus.

**Prerequisite(s):** COMM 355 and permission of instructor.  
**Notes:** Not repeatable.

**Schedule Type:** INT  
**Hours of Lecture or Seminar per week:** 3
FAVS 460 - Advanced Video Editing

Credits: 3
Not Repeatable for Credit
Offered by Film and Video Studies
This course will instruct students on the theories, techniques and technologies pertaining to video editing for fiction and documentary films, as well as commercials. The course will combine lectures, discussions, and demonstrations with hands on projects.

**Prerequisite(s):** FAVS 260 or COMM 360

**Schedule Type:** LEC

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0

**When Offered:** Fall, Spring

FAVS 470 - Film and Video Screenwriting

Credits: 3
Not Repeatable for Credit
Offered by Film and Video Studies
The purpose of this course is to build a strong foundation in fundamental, narrative, screenwriting techniques for film. Students will learn how to express their unique story ideas through character development, plot and dialogue.

Fulfills writing intensive requirement in the major.

**Prerequisite(s):** FAVS 280.

**Schedule Type:** LEC

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0

**When Offered:** Fall, Summer, Spring

FAVS 483 - Feature-Length Scriptwriting

Credits: 3
Not Repeatable for Credit
Offered by Film and Video Studies
This course is an introduction to the development and analysis of feature length screenplays. The approach combines lecture, discussion, screening and presentation of student work. By the end of the semester, each student should have a complete first draft of an original screenplay. Students will also complete story reports/coverage reports of screenplays by other writers.

**Prerequisite(s):** FAVS 470 or THR 482 or permission of instructor.

**Schedule Type:** LEC

**Hours of Lecture or Seminar per week:** 3
FAVS 490 - Independent Study

Credits: 1-6
Repeatable within Degree for Credit
Offered by Film and Video Studies
Independent research on specific project under direction of selected faculty member.

Prerequisite(s): Permission of instructor.
Schedule Type: IND
Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 0
When Offered: Fall

FAVS 496 - Advanced Visual Storytelling

Credits: 3
Not Repeatable for Credit
Offered by Film and Video Studies
A culminating seminar devoted to analyzing and synthesizing knowledge and skills gained through undergraduate course work in the screenwriting concentration, resulting in substantial individualized writing projects.

Prerequisite(s): AVT 204, FAVS 250, FAVS 255 or COMM 355, FAVS 280, FAVS 483, and THR 482 or FAVS 470. Must be a senior in the Film and Video Studies Program and must have permission of instructor.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

FAVS 497 - Senior Film Practicum

Credits: 3
Repeatable within Degree for Credit
Offered by Film and Video Studies
A senior capstone course for students in the Production/Post-Production concentration. Students put their area of focus (cinematography, editing, sound design, production design, etc.) into practice. Students play a key role in film projects directed by other students throughout the semester. This course includes a written/research component.

Prerequisite(s): AVT 204, FAVS 260 or COMM 360, FAVS 250, FAVS 255 or COMM 355, FAVS 280. Must be a senior in the Film and Video Studies Program and have permission of instructor.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring
FAVS 498 - Creative Producing and Development

Credits: 3
Not Repeatable for Credit
Offered by Film and Video Studies
An introduction to the creative process of researching and developing material for film and video for senior projects. The course examines evaluating and developing existing literary material, documentary work, and/or fictional material.

Fulfills writing intensive requirement in the major.

Prerequisite(s): Must have all lower-level FAVS Core Courses and Concentration Requirements completed. Must be a senior the Film and Video Studies Program and have permission of instructor.
Notes: Restricted to Film and Video Studies majors only. Must have permission of instructor.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring.

FAVS 499 - Senior Project

Credits: 3
Not Repeatable for Credit
Offered by Film and Video Studies
Culminating seminar devoted to analyzing and synthesizing knowledge and skills gained through undergraduate course work as it applies to film, video studies, and professional development.

Prerequisite(s): Successful completion of FAVS 498 (C or better) and permission of instructor.
Restricted to Film and Video Studies majors only. Must have permission of instructor.
Notes: Students will be required to develop and present written materials and documentation related to the development and presentation of their works, as well as present their work in FAVS 100 Film and Video Studies Colloquium as part of their formal oral presentation.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

FAVS 535 - Sound and Lighting

Credits: 3
Not Repeatable for Credit
Offered by Film and Video Studies
This course will instruct students on the theories, techniques, and technologies pertaining to recording audio and lighting scenes in both field and studio video productions. The course will be lecture based with practical lab styled exercises reinforcing topics presented during lecture.
Prerequisite(s): Admission to the MAIS in Film and Video Studies or permission of instructor.

Schedule Type: LEC

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Summer, Spring

FAVS 550 - Internship

Credits: 3
Repeatable within Degree for Credit
Offered by Film and Video Studies
On-the-job training in film and video studies through approved fieldwork study programs. Internships are arranged and supervised by the FAVS director.

Prerequisite(s): Permission of the Internship Coordinator.

Schedule Type: INT

When Offered: Fall, Spring, Summer

FAVS 565 - Documentary Filmmaking

Credits: 3
Not Repeatable for Credit
Offered by Film and Video Studies
A documentary filmmaking workshop in which each student makes a short digital documentary, from concept development to finished piece. The class covers essential technical skills, emerging styles of nonfiction film, and documentary storytelling techniques.

Prerequisite(s): Admission to the MAIS in Film and Video Studies or permission of instructor.

Schedule Type: LEC

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Summer, Spring

FAVS 570 - Screenwriting

Credits: 3
Not Repeatable for Credit
Offered by Film and Video Studies
Screenwriting course emphasizing student development in screenplay form, structure, and storytelling with emphasis on craft, character, and story culminating in a screenplay.

Prerequisite(s): Undergraduate degree or equivalent, or permission of instructor.

Schedule Type: LEC

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring, Summer
FAVS 575 - Fiction Film Directing

Credits: 3  
Not Repeatable for Credit  
Offered by Film and Video Studies  
This course examines techniques for directing fiction films. Students study the directorial approaches of a variety of directors by viewing and critiquing classic films. Students learn about the director's role in each stage of film production. Students shoot, direct and edit fictional scenes and sequences intended to develop and convey the beginnings of the authorial signatures.

Prerequisite(s): Admission to the MAIS in Film and Video Studies or permission of instructor.

Schedule Type: LEC  
Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0  
When Offered: Fall, Summer, Spring

FAVS 590 - Independent Study

Credits: 1-6  
Repeatable within Degree for Credit  
Offered by Film and Video Studies  
Independent research on specific project under direction of selected faculty member.

Prerequisite(s): Undergraduate degree or equivalent, or permission of instructor.

Schedule Type: IND  
Hours of Lecture or Seminar per week: 1-6  
Hours of Lab or Studio per week: 0  
When Offered: Fall, Spring, Summer

FAVS 597 - Independent Production

Credits: 1-3  
Repeatable within Degree for Credit  
Offered by Film and Video Studies  
Media or creative production activities under direction of faculty member. Requires completed production; written report, oral exam may be required.

Prerequisite(s): Permission from department.

Schedule Type: IND  
Hours of Lecture or Seminar per week: 1-3  
Hours of Lab or Studio per week: 0  
When Offered: Fall, Spring, Summer

FAVS 598 - Seminar in Film and Video Studies
Credits: 3
Repeatable within Degree for Credit
Offered by Film and Video Studies
Develop tools and techniques for successful pursuit of a career in film and video production, distribution and marketing through readings, original projects, case studies, analysis of industry practices, and study of film and media tools and projects.

Prerequisite(s): Enrollment in CVPA or CHSS graduate program.
Schedule Type: SEM
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

FAVS 599 - Special Topics

Credits: 1-6
Repeatable within Term for Credit
Offered by Film and Video Studies
In-depth presentation and exploration of topical studies.

Prerequisite(s): Undergraduate degree or equivalent, or permission of instructor.
Notes: Subject matter varies. May be repeated for a maximum 9 credits when taken under different topics.
Schedule Type: SEM
Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring, Summer

Finance (FNAN)

Offered by the School of Business.
If a student takes noncore, upper-level business courses before admission to the School of Business, those courses will not count on an undergraduate degree application for any major in the school, except as general elective credit. A grade of C or higher must be presented on the graduation application for each upper-level course in the major. Course prerequisites are strictly enforced. Degree status is defined as formal admission to BS degree status in the School of Business.

FNAN 300 - Personal Financial Management

Credits: 3
Not Repeatable for Credit
Offered by School of Business
Emphasis is on understanding the importance of developing financial goals and how financial decisions affect those goals throughout their lifetime. In addition, students will develop their own financial goals along with a financial plan that would enable them to meet those goals. This course may be taken for regular grading or S/NC. Students must notify instructor which option they want. FNAN 300 may be taken for general elective credit by School of Business students.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
FNAN 301 - Financial Management

Credits: 3
Limited to 3 Attempts
Offered by School of Business

Introduction to managing a firm's financial resources given wealth maximization decision criterion. Includes working capital management, fixed-asset investment, cost of capital, capital structure, and dividend decision analysis. School of Business students will not be permitted to make more than three attempts to achieve a C or higher in FNAN 301. Those who do not successfully complete this course within three attempts will be terminated from their major and will not be eligible to receive a degree from the School of Business. For more information about this, see the "Termination from the Major" section under Academic Policies.

Equivalent to FNAN 303.

Prerequisite(s): Grade of C or higher in each of the following courses: ECON 103, ACCT 203 or ACCT 204, and OM 210; sophomore standing.

Prerequisite(s) enforced by registration system.

Notes: Lecture, problems, and discussion. Requires attendance in weekly lectures and recitations. The final exam for FNAN 301 may be scheduled to take place for all sections at the same time during the final exam period. Accommodations will be made for exam and religious conflicts and for certain official university-sponsored activities.

Students cannot receive credit for both FNAN 301 and FNAN 303.

Schedule Type: LEC, RCT
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring, Summer

FNAN 302 - Financial Analysis, Forecasting, and Valuation

Credits: 3
Not Repeatable for Credit
Offered by School of Business

Examines techniques for analyzing, understanding, and applying financial information in decision situations. Topics include financial statement analysis, development of financial models, and financial planning and forecasting.

Prerequisite(s): Grade of B- or higher in FNAN 301 or FNAN 303, degree status. Prerequisite enforced by registration system.

Prerequisite(s) enforced by registration system.

Notes: Lecture, discussion, computer-assisted research.

Schedule Type: LEC
**FNAN 303 - Financial Management**

Credits: 3  
Limited to 3 Attempts  
Offered by School of Business

Introduction to managing a firm's financial resources given wealth maximization decision criterion. Includes working capital management, fixed-asset investment, cost of capital, capital structure, and dividend decision analysis.  
Note: Students cannot receive credit for both FNAN 301 and FNAN 303.

Equivalent to FNAN 301.

**Prerequisite(s):** Grade of C or higher in each of the following courses:

- BUS 103 and BUS 200 are strongly recommended.
- The following courses are required:  
  - ACCT 203 or ACCT 204  
  - BUS 100 or SOM 100  
  - BUS 210  
  - MATH 108 or MATH 113 or MATH 114 or HNRT 225

Degree status.  
Prerequisite(s) enforced by registration system.

**Notes:** School of Business students will not be permitted to make more than three attempts to achieve a C or higher in FNAN 303. Those who do not successfully complete this course within three attempts will be terminated from their major and will not be eligible to receive a degree from the School of Business. For more information about this, see the "Termination from the Major" section under Academic Policies.

Notes: Lecture, problems, and discussion. Requires attendance in weekly lectures and recitations. The final exam for FNAN 303 may be scheduled to take place for all sections at the same time during the final exam period. Accommodations will be made for exam and religious conflicts and for certain official university-sponsored activities.

**Schedule Type:** LEC, RCT  
**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**FNAN 311 - Principles of Investment**

Credits: 3  
Not Repeatable for Credit  
Offered by School of Business  
Introduces analysis of the valuation of equity and debt securities given modern capital market theory. Includes discussion of
portfolio analysis as related to valuation of securities.

**Prerequisite(s):** Grade of B- or higher in FNAN 301 or FNAN 303, degree status. Prerequisite enforced by registration system. Prerequisite(s) enforced by registration system.

**Notes:** Lecture, discussion, and computer-assisted research.

**Schedule Type:** LEC  
**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall, Spring

---

**FNAN 321 - Financial Institutions**

Credits: 3  
Not Repeatable for Credit  
Offered by School of Business  
Discusses basic objectives of financial institutions in light of industry structure and regulatory environment, and decision variables that management should concentrate on to achieve objectives. Includes role of financial institutions in allocation of funds in financial markets.

**Prerequisite(s):** Grade of B- or higher in FNAN 301 or FNAN 303, degree status. Prerequisite(s) enforced by registration system.

**Notes:** Lecture, discussion, and computer-assisted research.

**Schedule Type:** LEC  
**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall, Spring

---

**FNAN 341 - Introduction to Firm Valuation**

Credits: 3  
Not Repeatable for Credit  
Offered by School of Business  
Examines techniques for analyzing, understanding, and applying financial information in decision situations. Topics include financial statement analysis, development of financial models, and financial planning and forecasting.

Equivalent to FNAN 302.

**Prerequisite(s):** Grade of B- or higher in FNAN 301 or FNAN 303. Degree status. Prerequisite(s) enforced by registration system.

**Schedule Type:** LEC  
**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall, Spring
FNAN 351 - Principles of Real Estate

Credits: 3
Not Repeatable for Credit
Offered by School of Business
Studies dimensions and specialties involved in public control and private development, sale, finance, and management of real estate. Includes land planning, land-use control, appraisal, finance, brokerage, property management, and investment.

Prerequisite(s): Grade of C or higher in FNAN 301 or FNAN 303, degree status.
Prerequisite(s) enforced by registration system.

Notes: Lecture, discussion, and computer-assisted research.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

FNAN 401 - Advanced Financial Management

Credits: 3
Not Repeatable for Credit
Offered by School of Business
Analyzes decision-making in firm, emphasizing conceptual structure of problems and using advanced analytic techniques. Topics include current asset management, capital budgeting and structure, dividend policy, long-term financing, mergers, and corporate planning models.

Prerequisite(s): Grade of B- or higher in FNAN 301 or FNAN 303, degree status.
Prerequisite(s) enforced by registration system.

Notes: Lecture, discussion, and case analysis.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

FNAN 411 - Investment Analysis and Portfolio Management

Credits: 3
Not Repeatable for Credit
Offered by School of Business
Analyzes modern techniques of portfolio management including evaluating standards for selecting individual securities to include or delete from portfolios. Presents risk-return analysis for portfolios and portfolio performance measures. Lecture, discussion, computer assisted research.

Prerequisite(s): Degree Status and a grade of C or higher in FNAN 311.
FNAN 412 - Futures and Options Markets

Credits: 3
Not Repeatable for Credit
Offered by School of Business
Introduces options, commodity, and financial futures markets as they function to provide pricing mechanisms and alternative investment vehicles. Lecture, discussion, and computer-assisted research.

Prerequisite(s): Degree Status and a grade of C or higher in FNAN 311.
Prerequisite(s) enforced by registration system.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

FNAN 421 - Money and Capital Markets

Credits: 3
Not Repeatable for Credit
Offered by School of Business
Discussion of how financial markets are organized, their role in the allocation of funds to various market segments, and interaction between markets. Topics include aggregate flow of funds analysis; and money, government, corporate, and mortgage markets. Lecture, discussion, and computer-assisted research.

Prerequisite(s): Degree Status and a grade of C or higher in FNAN 321.
Prerequisite(s) enforced by registration system.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

FNAN 430 - Empirical Methods in Finance

Credits: 3
Not Repeatable for Credit
Offered by School of Business
Examines statistical and econometric techniques used in analyzing financial data and developing financial models. Combines development of understanding of fundamental concepts with applications. Includes extensive use of standard software.
FNAN 431 - Venture Capital and Private Financing of Startups

Credits: 3
Not Repeatable for Credit
Offered by School of Business
This course focuses on how venture capitalists arrange the financing for a company; what they look for in a business plan; how they value a business; and how they structure the terms of an agreement.

Prerequisite(s): Grade of B- or better in FNAN 301 or FNAN 303. Degree status.
Prerequisite(s) enforced by registration system.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

FNAN 432 - Fixed-Income Securities

Credits: 3
Not Repeatable for Credit
Offered by School of Business
Focuses on analysis of fixed-income securities, including corporate and government bonds, mortgage-backed securities, and derivatives. Major topics include institutional features of fixed-income securities markets, valuation, analysis of risks, and portfolio management decisions.

Prerequisite(s): C or higher in FNAN 311; BS degree status.
Prerequisite(s) enforced by registration system.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

FNAN 436 - Probability Methods for Finance

Credits: 3
Not Repeatable for Credit
Offered by School of Business
This course focuses on the development and use of probability models for analyzing risks and financial decisions. Emphasis is on Monte Carlo simulation modeling, linear programming, and decision analysis of complex problems in corporate finance and in investment analysis.

**Prerequisite(s):** C or better in FNAN 301 or FNAN 303; AND OM 210 or BUS 210 or equivalent.

**Schedule Type:** LEC

**Hours of Lecture or Seminar per week:** 3

**Hours of Lab or Studio per week:** 0

**When Offered:** Fall, Spring

### FNAN 440 - International Financial Management

Credits: 3
Not Repeatable for Credit
Offered by School of Business
Introduces management of contemporary firm's international financial operations. Topics include foreign exchange risk, political risk, returns and risks of international projects, international money and capital markets, financial accounting, capital structure, and cost of capital. Lecture, discussion, readings, and problems.

**Prerequisite(s):** Grade of B- or higher in FNAN 301 or FNAN 303, degree status.
Prerequisite(s) enforced by registration system.

**Schedule Type:** LEC

**Hours of Lecture or Seminar per week:** 3

**Hours of Lab or Studio per week:** 0

**When Offered:** Fall, Spring

### FNAN 441 - Advanced Topics in Firm Valuation

Credits: 3
Not Repeatable for Credit
Offered by School of Business
Course will focus on complex valuation techniques and build on the knowledge and skills developed in FNAN 341. Course will cover: research and value companies of different sizes, value private equity, mezzanine financing, develop advance discounted cash flow models, and other relevant topics.

**Prerequisite(s):** Grade of C or higher in FNAN 341 or FNAN 302. Degree status.
Prerequisite(s) enforced by registration system.

**Schedule Type:** LEC

### FNAN 451 - Real Estate Finance

Credits: 3
Not Repeatable for Credit
Offered by School of Business
Studies mechanisms of real estate finance, sources of funds, loan contracts, principles of mortgage risk analysis, and secondary
mortgage markets. Develops analytical skills including using microcomputer and appropriate software.

Prerequisite(s): C or higher in FNAN 351, degree status. Prerequisite(s) enforced by registration system.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

**FNAN 454 - Real Estate Development**

Credits: 3
Not Repeatable for Credit
Offered by School of Business
Examines commercial real estate development process and principles plus actual residential, office, retail, and industrial projects. Includes financial analytical techniques to investigate project feasibility, density, financing viability, cash flows, and valuation. Emphasis placed on real-world, entrepreneurial, decision-making skills for developing commercial real estate. Lecture, discussion, project analysis.

Prerequisite(s): C or higher in FNAN 351, degree status. Prerequisite(s) enforced by registration system.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

**FNAN 462 - Honors Seminar in Finance**

Credits: 3
Not Repeatable for Credit
Offered by School of Business
Provides an in-depth study and analysis of contemporary developments and topics of interest in finance. Topics and format will vary. Enrollment is limited and competitive.

Prerequisite(s): Finance major, degree status, senior standing, permission of the instructor.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

**FNAN 491 - Special Topics in Finance**

Credits: 3
Not Repeatable for Credit
Offered by School of Business
Advanced study of special topics in finance.

Prerequisite(s): Grade of C or higher in FNAN 301 or FNAN 303, degree status. Prerequisite(s) enforced by registration system.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

FNAN 498 - Contemporary Topics in Finance

Credits: 3
Not Repeatable for Credit
Offered by School of Business
Course focuses on contemporary topics in finance and will be writing intensive. Possible topics include: financial institutions, asset pricing, valuation and capital markets, 2008 crisis and the Federal Reserve/Treasury's intervention, emerging economies and exchange rate conversion, stability of the European Union and its currency.

Fulfills writing intensive requirement in the major.

Prerequisite(s): Grade of C or higher in FNAN 341 or FNAN 311 or FNAN 321 or FNAN 401. Degree status. Prerequisite(s) enforced by registration system.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Summer, Spring

FNAN 499 - Independent Study

Credits: 1-3
Repeatable within Term for Credit
Offered by School of Business
May be repeated to a maximum of 6 credits if topics vary. Degree status. Research and analysis of selected problems or topics in finance.

Prerequisite(s): Finance majors with at least 9 upper-level credits, degree status.
Notes: Must be arranged with instructor and approved in writing by associate dean for undergraduate programs before registration. Written report required. May be repeated for maximum 6 credits if topics vary.

Schedule Type: IND
Hours of Lecture or Seminar per week: 1-10
Hours of Lab or Studio per week: 0

Foreign Languages (FRLN)
Offered by the College of Humanities and Social Sciences

**FRLN 309 - Humanities College to Career**

Credits: 1  
Not Repeatable for Credit  
Offered by Modern and Classical Languages.  
Focuses on career choices and effective self-presentation for soon-to-be graduating students with majors in the humanities.  
Explores how skills typically learned in humanities majors can be leveraged for a successful transition to post-graduation employment.

Equivalent to ENGH 303, HIST 385, PHIL 393.

**Schedule Type:** LEC  
**Hours of Lecture or Seminar per week:** 1  
**Hours of Lab or Studio per week:** 0

**FRLN 330 - Topics in World Literature**

Credits: 3  
Repeatable within Term for Credit  
Offered by Modern and Classical Languages.  
Major works of world literature with varying perspectives and topics, such as specific cultures, histories, myths, or music and the arts, as represented in literature.

Fulfills Mason Core requirement in literature.

**Prerequisite(s):** ENGL 101/ENGH 101 and 45 credits, or permission of instructor.  
**Notes:** Taught in English. May be repeated for a maximum of 9 credits when topic differs with permission of department.

**Schedule Type:** LEC  
**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**FRLN 331 - Topics in World Cinema**

Credits: 3  
Repeatable within Degree for Credit  
Offered by Modern and Classical Languages.  
Major works of world cinema with varying perspectives and topics, such as specific genres, periods, schools.

Fulfills Mason Core requirement in global understanding.

**Prerequisite(s):** English 101 or permission of instructor.  
**Notes:** Course work in English. May be repeated for a maximum of 9 credits when topic is different with permission of department.
FRLN 380 - Topics in the Sociopolitics of Language

Credits: 3  
Repeatable within Degree for Credit  
Offered by Modern and Classical Languages.  
Addresses relationship between language and other social and cultural systems (macro sociolinguistics), and critical study of people's ideas about language (language ideology). Utilizes comparative approach to explore ways people use language to perform and communicate various social identities and categories; how and why people attach social meanings and values to particular ways of using language; development of official and unofficial language policies; and impact of language policies.

Prerequisite(s): ENGL 101/ENGH 101 and 45 credits, or permission of instructor.  
Notes: May be repeated for a maximum of 6 credits when topic is different.

FRLN 385 - Multilingualism, Identity, and Power

Credits: 3  
Not Repeatable for Credit  
Offered by Modern and Classical Languages.  
Study of individual and societal aspects of multilingualism including language choice, linguistic maintenance and shift, code-switching, language planning, educational policy, and representations of multilingualism. Interdisciplinary approach emphasizes the social and political aspects of multilingualism, as well as the relationship of language to cultural, ethnoracial, and national identities and categories.

Fulfills Mason Core requirement in synthesis.

Prerequisite(s): Completion or concurrent enrollment in all other required Mason Core courses.

FRLN 430 - Topics in Comparative World Literatures

Credits: 3  
Repeatable within Degree for Credit  
Offered by Modern and Classical Languages.  
Explores comparative studies of a topic through literary works written in at least two different languages. All material provided in translation.

Schedule Type: LEC
FRLN 431 - Medieval Intellectual Topics

Credits: 3
Not Repeatable for Credit
Offered by Modern and Classical Languages.
Focuses on topic in intellectual history of Middle Ages. Emphasizes literary or historical, depending on discipline of instructor. Relevant material may be drawn from philosophy, theology, and art.

Equivalent to ENGH 421/HIST 431 (2015-2016 Catalog).

Notes: May be taken for credit by English or history majors.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

FRLN 490 - Internship in Foreign Language Studies

Credits: 1-6
Repeatable within Degree for Credit
Offered by Modern and Classical Languages.
Qualified students work with schools, social service programs, government agencies, interest groups, museums, or corporations locally or abroad. Specific arrangements must be made with, and approved by, a faculty member of the specific language program during semester prior to enrollment. For each credit, student works on site at least 45 hours.

Prerequisite(s): Permission of department.
Schedule Type: INT
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

FRLN 510 - Bibliography and Research in Foreign Languages and Literature

Credits: 3
Not Repeatable for Credit
Offered by Modern and Classical Languages.
Use of basic bibliographical tools and methodologies for scholarly research in French, German, and Spanish. Taught in cooperation with university library staff.

Prerequisite(s): Graduate standing or permission of department.
Notes: Conducted in English.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
FRLN 525 - Literary Translation

Credits: 3
Not Repeatable for Credit
Offered by Modern and Classical Languages.
Critical approach and analysis of diverse texts such as poetry, drama, essay, and novel excerpts.

Prerequisite(s): Graduate standing or permission of department and advanced coursework in literary translation.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

FRLN 550 - Special Topics

Credits: 3
Repeatable within Term for Credit
Offered by Modern and Classical Languages.
Themes, periods, or genres vary from semester to semester. Focuses on topics that incorporate one or more languages taught in department, but instruction is in English.

Notes: May be repeated for a maximum of 6 credits with permission of department.
Schedule Type: IND, LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

FRLN 551 - Special Topics

Credits: 3
Repeatable within Degree for Credit
Offered by Modern and Classical Languages.
Themes, periods, or genres vary from semester to semester. Focuses on topics that incorporate one or more languages taught in department, but instruction is in English.

Notes: May be repeated for a maximum of 6 credits with permission of department.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

FRLN 565 - Theory of Translation

Credits: 3
Not Repeatable for Credit
Offered by Modern and Classical Languages.
Lectures on nature, function of translating process. Evaluates theories of translation with respect to text typology. Critiques selected translations from target languages to English and vice versa.

**Schedule Type:** LEC  
**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

### FRLN 572 - Integrating Technology into Language Learning

Credits: 3  
Not Repeatable for Credit  
Offered by Modern and Classical Languages.  
Explores pedagogical and theoretical basis for integrating interactive technologies into language learning programs, and examines potential for learning, teaching, testing, and research. Includes hands-on analysis and evaluation of materials.

**Prerequisite(s):** Graduate standing or permission of department, language teaching methods course, and language teaching experience.  
**Notes:** Prior experience with technology not required.

**Schedule Type:** LEC  
**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

### FRLN 573 - Basic Issues in Language Pedagogy

Credits: 3  
Not Repeatable for Credit  
Offered by Modern and Classical Languages.  
Explores major issues controversial in language pedagogy. Topics include communicative competence as pedagogical goal, role of explicit grammar teaching, proficiency movement, cultural authenticity, student-centered learning, and technology.

**Prerequisite(s):** Graduate standing or permission of department, language teaching methods course, and language teaching experience.  
**Schedule Type:** LEC  
**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

### FRLN 590 - Internship and Seminar in Translation

Credits: 3  
Not Repeatable for Credit  
Offered by Modern and Classical Languages.  
Internships are nonpaying, work-study positions that focus on the practice of translation. Qualified students placed with area institutions, interest groups, agencies, or corporations.

**Prerequisite(s):** Admission to translation certificate program.  
**Notes:** Placement depends on availability of positions.
FRLN 600 - Workshop in Foreign Languages

Credits: 1-6
Repeatable within Term for Credit
Offered by Modern and Classical Languages.
In-service workshops, tours, and seminars on selected topics in literature, language, bilingualism, culture, methodology.

Notes: May not be applied toward MA in foreign languages without permission of department.

FRLN 620 - Literary Theory and Criticism

Credits: 3
Not Repeatable for Credit
Offered by Modern and Classical Languages.
Studies nature of literary work, and analyzes contemporary critical approaches to literature.

Notes: May not be taken for credit by students who previously received credit for FRLN 615.

FRLN 650 - The Teaching of Culture in Foreign Language Programs

Credits: 3
Not Repeatable for Credit
Offered by Modern and Classical Languages.
Purpose and methods of study of culture, with emphasis on strategies and techniques for teaching culture in foreign language programs.

FRLN 660 - Approaches to the Study of Language
Linguistics and its relationship to other disciplines, including study of generative grammar with syntactic problems drawn from commonly taught foreign languages.

**FRLN 670 - Foreign Language Learning and Teaching**

Credits: 3  
Not Repeatable for Credit  
Offered by Modern and Classical Languages.  
Theories, methods, and strategies of second and foreign language learning and teaching.

Notes: May not be taken by students who have completed FRLN 570.

**Forensics (FRSC)**

Offered by the College of Science

**FRSC 200 - Survey of Forensic Science**

Credits: 3  
Not Repeatable for Credit  
Offered by Forensic Science Program  
This course will familiarize students with the basic principles and uses of forensic science in the American system of justice. This course will review the basic applications of biological, physical, chemical, medical and behavioral sciences to questions of evidence and law. In doing so, students should gain a basic understanding of the capabilities and limitations of the forensic sciences as they are practiced.

Schedule Type: LEC  
Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0  
When Offered: Fall
An overview of the field of criminalistics, with a focus on the recognition, collection, preservation, and analysis of physical evidence. An introduction to topics such as fingerprints examination, trace evidence analysis, and to prepare students for additional, more in-depth classes in criminalistics/forensic science.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

**FRSC 302 - Forensic Trace Analysis**

Credits: 3
Not Repeatable for Credit
Offered by Forensic Science Program
This course will familiarize students with an overview of the field of forensic science, including areas of trace and biological evidence. Various topics address the analysis of blood and physiological fluid identification, typing, reporting results, and expert testimony.

Fulfills writing intensive requirement in the major.

Prerequisite(s): Admitted to Forensic Science Program FRSC 200, FRSC 201, BIOL 213.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

**FRSC 303 - Forensic Evidence and Ethics**

Credits: 3
Not Repeatable for Credit
Offered by Forensic Science Program
This course will acquaint the student with the application of scientific methods and the interaction it may have with legal principles. It will prepare, in a broad sense, the student for future applications of forensic science with its role in the administration of justice, and the ethical rules and duties under codes of professional conduct.

Prerequisite(s): Admitted to Forensic Science Program, FRSC 200, and CRIM 100; or permission of instructor.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

**FRSC 304 - Forensic Chemistry**
FRSC 405 - Introduction to Forensic Science

Credits: 3
Not Repeatable for Credit
Offered by Forensic Science Program
Introduction to the theme of forensic science in its application to the fundamentals of chemistry exposing students to widely used concepts of toxicology and arson investigation. An introduction to microscopy helps students master the foundational principles of microscopy in analyzing forensic trace evidence.

Fulfills writing intensive requirement in the major.

Prerequisite(s): Admitted to Forensic Science Program, CHEM 211, and CHEM 212; or permission of instructor.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring

FRSC 405 - Independent Studies / Research

Credits: 3
Not Repeatable for Credit
Offered by Forensic Science Program
Independent Studies / Research. Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.

Prerequisite(s): Admitted to Forensic Science Program and 90 hours, or permission of instructor.
Schedule Type: IND
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring, Summer

FRSC 415 - Selected Topics in Forensic Science

Credits: 3
Repeatable within Degree for Credit
Offered by Forensic Science Program
Topics vary according to instructor's specialty.

Prerequisite(s): Permission of instructor
Notes: May be repeated only with permission of program chair.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

FRSC 420 - Forensic Toxicology
Examines toxic substances and their effects on human cellular and organ systems. The course focuses on human physiological concepts, the human enzymatic detoxification processes, methodologies for identifying toxins, and specific toxic analytes.

Prerequisite(s): Completion of forensic science foundation courses
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**FRSC 440 - Advanced Forensic Chemistry**

Credits: 3
Not Repeatable for Credit
Offered by Forensic Science Program
The principles of forensic chemistry will be addressed in this course, including analytical chemistry, instrumentation, sample handling, drug chemistry and pharmacology, and analysis of physical evidence such as papers, inks, paints, and coatings.

Prerequisite(s): Completion of forensic science foundation courses
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**FRSC 460 - Forensic DNA Sciences**

Credits: 3
Not Repeatable for Credit
Offered by Forensic Science Program
Presentation of the general principles and methodologies used in forensic DNA profiling. Topics include the development of DNA profiling methods, current DNA typing techniques, forensic DNA and paternity-related issues, and legal issues associated with quality control, frequency estimates, sample conditions, chain of custody, and admissibility.

Prerequisite(s): Completion of forensic science foundation courses
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**FRSC 500 - Introduction to Forensic Science**

Credits: 3
Not Repeatable for Credit
Offered by Forensic Science Program
Overview of forensic science and related investigative techniques. Includes coverage of crime scene investigation, crime scene procedures, the role of the forensic pathologist, the modern forensic laboratory, DNA analysis techniques, microanalysis, examination of trace evidence, hair and fibers, examination of questioned documents, forensic anthropology, forensic odontology, homicide investigation, and analysis of a mock crime scene.
FRSC 510 - Basic Crime Analysis

Credits: 3
Not Repeatable for Credit
Offered by Forensic Science Program
Examines the role of the first officer at the scene, search, seizure and related legal issues, traditional crime scene measurements, photogrammetry, processing latents, crime scene reconstruction methods, 2-D and 3-D impressions, blood spatter analysis, collection of trace evidence, packaging and preserving evidence, outdoor crime scenes, and explosion and fire scenes.

FRSC 511 - Advanced Crime Scene Analysis

Credits: 3
Not Repeatable for Credit
Offered by Forensic Science Program
Advanced Crime Scene Analysis is designed to build on concepts introduced in FRSC 510 (Basic Crime Scene Analysis), and to provide an enhanced foundation in the field of criminalistics for those students who are interested in learning the application of science to solving crimes.

FRSC 512 - Physical Evidence Analysis

Credits: 3
Not Repeatable for Credit
Offered by Forensic Science Program
This is a series of practical laboratory exercises that introduces the student to sophisticated crime scene documentation techniques including collection of evidence, examination of hairs, fibers, toolmarks and other trace evidence. Advanced topics in blood spatter, trajectory, pattern casting, and alternate light sources will be explored.
FRSC 513 - Forensic Photography

Credits: 3
Not Repeatable for Credit
Offered by Forensic Science Program
This series of lecture and practical exercises introduces the student to sophisticated crime scene documentation techniques including photography, digital imaging, use of lighting, and legal issues relating to images.

Prerequisite(s): Admitted to the Forensic Science Master's Program, or permission of instructor.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring

FRSC 515 - Selected Topics in Forensic Science

Credits: 3
Repeatable within Degree for Credit
Offered by Forensic Science Program
Topics vary with instructor's specialty. May be repeated only with permission of program chair.

Prerequisite(s): Permission of instructor
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring, Summer

FRSC 517 - Questioned Document Examination

Credits: 3
Not Repeatable for Credit
Offered by Forensic Science Program
Theory and principles of handwriting, duplicating and printing processes, paper manufacture and fiber analysis, fracture match comparison, ink analysis, and indented writing examinations; methods of examining questioned documents.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring

FRSC 520 - Toxicology
FRSC 530 - Law and Forensic Science

Credits: 3
Not Repeatable for Credit
Offered by Forensic Science Program
A detailed examination and analysis of the law affecting forensic science across the discipline range. Special emphasis is given to the laws affecting evidence, courtroom procedure, and the forensic expert.

Prerequisite(s): Minimum of 10 credit hours of graduate Forensic Science coursework.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

FRSC 540 - Forensic Chemistry

Credits: 3
Not Repeatable for Credit
Offered by Forensic Science Program
The principles of forensic chemistry will be addressed in this course, including analytical chemistry, instrumentation, sample handling, drug chemistry and pharmacology, and analysis of physical evidence such as papers, inks, paints, and coatings.

Prerequisite(s): Undergraduate degree in chemistry or biology, or permission of instructor.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

FRSC 541 - Forensic Chemistry Laboratory

Credits: 1
Not Repeatable for Credit
Offered by Forensic Science Program
This course will familiarize students with chemical knowledge gained from experimental observations and studies in the laboratory. Students will examine, test and establish for themselves the forensic chemistry discussed in the lecture courses.

Corequisite(s): FRSC 540.
FRSC 550 - Issues in Forensic Anthropology

Credits: 3  
Not Repeatable for Credit  
Offered by Forensic Science Program  
Examines issues related to skeletal analyses and interpretation of forensic case reports in determining personal identification and cause of death. Discussions include skeletal variation, age criteria, sexing criteria, pathology, trauma, and postmortem damage.

Prerequisite(s): Graduate standing.

FRSC 560 - Forensic DNA Sciences

Credits: 3  
Not Repeatable for Credit  
Offered by Forensic Science Program  
Intensive introduction to parameters affecting data QC and analysis, including factors arising from biochemistry, chemistry, genetics, statistics, instrumentation, and software.

Equivalent to BINF 637  
Prerequisite(s): Graduate standing or permission of instructor.

FRSC 561 - Forensic DNA Laboratory

Credits: 1  
Not Repeatable for Credit  
Offered by Forensic Science Program  
This laboratory course will provide comprehensive coverage of the various types of DNA testing currently used in forensic biology laboratories. Students will have hands-on experience with the analytical equipment employed and the techniques used for human identification in forensic casework, such as, DNA extraction, quantitation, PCR amplification, genotyping, and interpretation.

Schedule Type: LAB  
Hours of Lecture or Seminar per week: 0
FRSC 570 - Introduction to Biochemical Forensics

Credits: 3
Not Repeatable for Credit
Offered by Forensic Science Program
An introduction to biochemical forensics for non-scientists. This class will first lay a basic groundwork in chemistry and biochemistry. This background will be used in the explanation of forensic toxicology, DNA and blood analysis, identification of bodily fluids and stains, and analysis of controlled substances.

Prerequisite(s): A course in introductory biology or chemistry, or permission of instructor.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

FRSC 580 - Image Analysis in Forensic Science

Credits: 3
Not Repeatable for Credit
Offered by Forensic Science Program
This course begins with an introduction to methods used in image analysis, and the methods of facial reconstruction. The course will then explore modern techniques applied to several areas of forensic imaging. Advance topics in forensic sculpturing, 3D imagery, and post-mortem imagery will be explored.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

FRSC 590 - Medicolegal Death Investigation and Pathology

Credits: 3
Not Repeatable for Credit
Offered by Forensic Science Program
Medical, scientific, sociological, and legal methodologies applied to sudden or unexpected deaths, homicides, suicides, accidental deaths, and trauma. Aspects of death scene analysis by a medicolegal death investigator, and autopsy procedures, unidentified remains, child death investigations, and mass disaster investigations.

Prerequisite(s): FRSC 510.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring
FRSC 600 - Forensics Seminar

Credits: 1
Repeatable within Degree for Credit
Offered by Forensic Science Program
Selected topics in forensic science research, generally consisting of research presentations by forensic professionals and faculty members. Students must write an article of their choosing, not to exceed four pages, from a set of peer-reviewed journals to be established by the instructor. Recent articles are preferred; generally those having been published during the previous two years.

Prerequisite(s): Admission to the Forensic Science MS program.
Notes: Students enrolled in the forensic science MS program must attend at least 80% of the seminars. May be repeated for a total of 3 credits.

Schedule Type: SEM
Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0

FRSC 610 - Forensics Research Project

Credits: 1-4
Repeatable within Degree for Credit
Offered by Forensic Science Program
Research project in a current area of forensic science performed under the direction of a faculty member or affiliated forensic science professional.

Prerequisite(s): Admission to Forensic Science MS program.
Notes: May be repeated for a total of 4 credits.

Schedule Type: IND
Hours of Lecture or Seminar per week: 1-4
Hours of Lab or Studio per week: 0
Grading: Graduate Special.
When Offered: Fall, Spring, Summer

FRSC 620 - Face and Biometric Pattern Analysis

Credits: 3
Not Repeatable for Credit
Offered by Forensic Science Program
This course will familiarize students with the basic principles and uses of biometrics for automated searches and comparisons by forensic examiners. This course will review the basics of face, fingerprints, iris, and speaker recognition. Students should gain an understanding of how automated systems and forensic examiners perform recognition. Students will also learn the capabilities and limitations of biometric recognition.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring
FRSC 630 - Fingerprint Identification

Credits: 3
Not Repeatable for Credit
Offered by Forensic Science Program
This course will cover the exploration of the techniques and methods of identification, capture and analysis of fingerprint evidence, including consideration of the fundamentals of fingerprint patterns, classification formulas and extensions, techniques for taking good fingerprints, problems in fingerprinting, preparation of fingerprint charts for court testimony, and practical exercises for capturing fingerprints.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

FRSC 640 - Legal, Privacy and Ethical Issues in Identity Analysis

Credits: 3
Not Repeatable for Credit
Offered by Forensic Science Program
This course will review basic policies and doctrinal guidance related to the applications of biological, physical, chemical, and medical sciences to questions of evidence and law. In doing so, students should gain a basic understanding of the high level policies, protocols, standards, privacy, civil liberties, and doctrine related to the forensic sciences as they are practiced relating to identity analysis.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

FRSC 650 - Identity Analysis Applications

Credits: 1
Not Repeatable for Credit
Offered by Forensic Science Program
This course will review the basics of biometrics and how the various biometric modalities can be used to aid in identification and identity verification. The course will also focus on how biometrics and forensics are used, or can be used, in various applications from military uses, intelligence/counter-terrorism, border and immigrations control and in support of state development.

Schedule Type: SEM
Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring
FRSC 690 - Forensics Capstone Course

Credits: 3
Not Repeatable for Credit
Offered by Forensic Science Program
Integrates all the various techniques used in the study of forensic science and medicine, and applies them to the interpretation of facts and the reconstruction of the sequence of events at a variety of typical death scenes. Integrates medical, scientific, sociological, and legal methodology as they apply to medicolegal death investigations, using a variety of forensic literature and text resources. Presents an integrative approach to crime scene analysis based on actual case studies, in which students apply theoretical concepts discussed in class to real-world situations. Includes weekly group projects, with students organized in rotating groups and assigned a research topic in forensic medicine. Students discuss, examine, and analyze forensic, medical, and physical elements present at the death scenes, and develop their own hypotheses, which are then evaluated and discussed as the case is reconstructed.

Prerequisite(s): Permission of instructor.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

FRSC 790 - Internship in Forensic Science

Credits: 1-3
Repeatable within Degree for Credit
Offered by Forensic Science Program
On the job experience for Forensic Science majors in industry or government laboratories or investigative units, or approved study programs with specific employers. Students work in observational, experimental, or theoretical research, and prepare weekly journals, as well as a written report at the end of the internship.

Prerequisite(s): Admitted to Forensic Science Program, or permission of instructor. See department for requirements and application procedures prior to enrollment.
Schedule Type: INT
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring, Summer

FRSC 799 - Master's Thesis

Credits: 1-6
Repeatable within Degree for Credit
Offered by Forensic Science Program
Project chosen and completed under guidance of graduate faculty member. Comprehensive report (thesis) acceptable to student's advisory committee is required.

Prerequisite(s): Permission of forensic science MS program director.
Schedule Type: IND
Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0
Grading: Satisfactory/No credit only
French (FREN)

Offered by the College of Humanities and Social Sciences

Placement: See Academic Testing in the Admissions section.

See also FRLN course listings.

FREN 101 - Elementary French I

Credits: 3
Not Repeatable for Credit
Offered by Modern and Classical Languages.
For students with no knowledge of French. Introduces elements of grammar, vocabulary, oral skills, listening comprehension, and reading.

Notes: Students may not receive credit for FREN 101 and FREN 110.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

FREN 102 - Elementary French II

Credits: 3
Not Repeatable for Credit
Offered by Modern and Classical Languages.
Continuation of FREN 101.

Prerequisite(s): FREN 101, appropriate placement score, or permission of instructor.
Notes: Students may not receive credit for FREN 102 and FREN 110.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

FREN 110 - Elementary French

Credits: 6
Not Repeatable for Credit
Offered by Modern and Classical Languages.
Introduces elements of grammar, vocabulary, oral skills, listening comprehension, and reading.

Notes: Students may not receive credit for FREN 110 and FREN 101, 102.
FREN 115 - Review of Elementary French

Credits: 3
Not Repeatable for Credit
Offered by Modern and Classical Languages.
Reviews elements of French for students who have studied French previously.

Prerequisite(s): Appropriate placement score or permission of the department.
Notes: Students may not receive credit for FREN 115 and FREN 102, or 110.

FREN 201 - Intermediate French I

Credits: 3
Not Repeatable for Credit
Offered by Modern and Classical Languages.
Further development of skills in listening, speaking, reading, and writing.

Prerequisite(s): FREN 102; appropriate placement score; or permission of department.
Notes: FREN 201 and 202 must be taken in sequence. Students may not receive credit for FREN 201 and FREN 210.

FREN 202 - Intermediate French II

Credits: 3
Not Repeatable for Credit
Offered by Modern and Classical Languages.
Applies language skills to reading, composition, and class discussion.

Prerequisite(s): FREN 201, appropriate placement score, or permission of department.
Notes: Students may not receive credit for FREN 202 and FREN 210.
FREN 210 - Intermediate French

Credits: 3  
Not Repeatable for Credit  
Offered by Modern and Classical Languages.  
Continuation of the development of basic components of the language, with focus on listening, speaking, reading, and writing skills. Introduces students to the cultures and histories of French-speaking regions.

Prerequisite(s): FREN 110 or appropriate placement score.  
Notes: Students may not receive credit for FREN 210 and FREN 201, 202.

Schedule Type: LEC  
Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0

FREN 250 - Gateway to Advanced French

Credits: 3  
Not Repeatable for Credit  
Offered by Modern and Classical Languages.  
Integration of advanced intermediate-level French reading, writing, listening, and speaking skills, and the development of critical thinking about authentic texts from around the globe.

Prerequisite(s): FREN 210, appropriate placement score, or permission of department.  
Notes: Taught in French.

Schedule Type: LEC  
Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0

FREN 300 - Study Tour in France

Credits: 1-6  
Not Repeatable for Credit  
Offered by Modern and Classical Languages.  
Directed study tour of cultural and literary points of interest in France. Briefing sessions and reading selection given before the trip.

Prerequisite(s): FREN 250, appropriate placement score or permission of instructor.  
Notes: All papers and exams required for credit are due by end of summer session.

Schedule Type: LEC  
Hours of Lecture or Seminar per week: 1-6  
Hours of Lab or Studio per week: 1-12

FREN 309 - Reading and Writing Skills Development
Credits: 6  
Not Repeatable for Credit  
Offered by Modern and Classical Languages.  
Development of ability to write on topics of current interest. Readings provide examples of each topic and necessary vocabulary for compositions. Introduces reading strategies and provides practice in reading of different kinds of texts.

Fulfills writing intensive requirement in the major.

**Prerequisite(s):** FREN 202, 250, or equivalent; appropriate placement score; or permission of instructor.  
**Notes:** Taught in French.

**Schedule Type:** LEC  
**Hours of Lecture or Seminar per week:** 6  
**Hours of Lab or Studio per week:** 0

---

**FREN 310 - Oral Proficiency in French**

Credits: 3  
Not Repeatable for Credit  
Offered by Modern and Classical Languages.  
Develops conversational proficiency in French with attention to various specific communicative strategies and functions. Practice in pronunciation and diction based on systematic study of sound system of French.

**Prerequisite(s):** FREN 250, appropriate placement score or permission of instructor.  
**Notes:** Taught in French.

**Schedule Type:** LEC  
**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**FREN 320 - Contemporary Tour de France**

Credits: 3  
Not Repeatable for Credit  
Offered by Modern and Classical Languages.  
Examines contemporary social, political, economic, cultural trends in France. Covers domestic and international topics such as debates around French identity, migration and civil rights, political parties, the media, family life, work-related issues, participation in international organizations and involvement with former colonies and overseas regions.

**Prerequisite(s):** FREN 309 or permission of the instructor.  
**Notes:** Taught in French.

**Schedule Type:** LEC  
**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**FREN 325 - Major French Writers (Topic Varies)**
FREN 329 - Problems of Western Civilization in French Literature

Credits: 3
Not Repeatable for Credit
Offered by Modern and Classical Languages.
Basic philosophical, moral, social, and political dilemmas reflected in literature of major French writers.
Fulfills Mason Core requirement in literature.

Prerequisite(s): ENGL 101/ENGH 101 or equivalent, or permission of instructor.
Notes: Taught in English. May be repeated for credit with permission of department.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

FREN 340 - Francophone Identities

Credits: 3
Not Repeatable for Credit
Offered by Modern and Classical Languages.
Provides opportunity to learn about richness, variety, and complexity of francophone world through study of literature, culture, social life, and identities of various francophone regions including Caribbean, Africa, Quebec, and Indochina.

Prerequisite(s): FREN 309, appropriate placement score, or permission of instructor.
Notes: Taught in French.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

FREN 357 - Introduction to Translation
FREN 350 - French to English, English to French Translations

Credits: 3
Not Repeatable for Credit
Offered by Modern and Classical Languages.
French to English, English to French translations, of texts from current periodicals and newspapers in various fields.

Prerequisite(s): FREN 250, appropriate placement score or permission of instructor.
Notes: Recommended for students who wish to improve language skills.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

FREN 370 - French Civilization, Culture, and Literature: Ancient Gaul to 1789

Credits: 3
Not Repeatable for Credit
Offered by Modern and Classical Languages.
Examines history, civilization (daily life, politics, science, philosophy, religion), culture (architecture, art, music, dance), and literature of France from Ancient Gaul to the eve of the French Revolution. Studies development of French nation and its people through written texts, visual arts, and music.

Prerequisite(s): FREN 309, or permission of instructor.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

FREN 371 - French Civilization, Culture, and Literature: 1789 to the Present

Credits: 3
Not Repeatable for Credit
Offered by Modern and Classical Languages.
Examines history, civilization (daily life, politics, science, philosophy, religion), culture (architecture, art, music, dance), and literature of France from French Revolution of 1789 to present. Studies development of French nation and its people through written texts, visual arts, and music.

Prerequisite(s): FREN 309, or permission of instructor.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

FREN 381 - Introduction to Literary Analysis

Credits: 3
Not Repeatable for Credit
Offered by Modern and Classical Languages.
Structured approach to reading and analysis of French literary texts.
Prerequisite(s): 15 credits of French.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

FREN 391 - French for the Business World

Credits: 3
Not Repeatable for Credit
Offered by Modern and Classical Languages.
Studies written and oral styles of communication in commercial, governmental and non-governmental settings. Satisfies needs of students preparing for work in multinational business and foreign service.

Prerequisite(s): 15 credits of French, or permission of instructor.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

FREN 400 - Study Abroad in France or Francophone Region

Credits: 1-6
Repeatable within Degree for Credit
Offered by Modern and Classical Languages.
2 to 4 week programs in France or the Francophone world with language, culture and literature courses, local visits and excursions.

Prerequisite(s): 15 credits of French at the 300 level or permission of instructor.
Schedule Type: IND,
INT
Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 0

FREN 415 - Topics in Medieval French Literature and Culture

Credits: 3
Repeatable within Degree for Credit
Offered by Modern and Classical Languages.
Analyzes a selection of important literary texts (chanson, novel, poetry, short story) and authors in their historical and cultural contexts: geste, feudalism, socio-political and religious (in)stability.

Prerequisite(s): 15 credits of French at the 300 level or permission of instructor.
Notes: May be repeated for a maximum of 6 credits when topic is different.
Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
FREN 416 - Topics in Renaissance French Literature and Culture

Credits: 3
Repeatable within Degree for Credit
Offered by Modern and Classical Languages.
Analyzes a selection of important literary texts (novel, short story, poetry, and theater) and authors in their historical and cultural contexts: humanism, reformation, codification of language and birth of nation-state.

Prerequisite(s): 15 credits of French at the 300 level or permission of instructor.
Notes: May be repeated for a maximum of 6 credits when topic is different.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

FREN 417 - Topics in Seventeenth-Century French Literature and Culture

Credits: 3
Repeatable within Degree for Credit
Offered by Modern and Classical Languages.
Analyzes a selection of important literary texts (novel, short story, poetry, and theater) and authors in their historical and cultural contexts: baroque, classicism, social and philosophical essays, satirical plays.

Prerequisite(s): 15 credits of French at the 300 level or permission of instructor.
Notes: May be repeated for a maximum of 6 credits when topic is different.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

FREN 418 - Topics in Eighteenth-Century French Literature and Culture

Credits: 3
Repeatable within Degree for Credit
Offered by Modern and Classical Languages.
Analyzes a selection of important literary texts (novel, short story, poetry, and theater) and authors in their historical and cultural contexts: enlightenment, social, political and philosophical trends and issues, pre-romanticism.

Prerequisite(s): 15 credits of French at the 300 level or permission of instructor.
Notes: May be repeated for a maximum of 6 credits when topic is different.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
FREN 419 - Topics in Nineteenth-Century French Literature and Culture

Credits: 3  
Repeatable within Degree for Credit  
Offered by Modern and Classical Languages.  
Analyzes a selection of important literary texts (novel, short story, poetry, and theater) and authors in their historical and cultural contexts: pre-Romanticism; Romanticism; Realism; Symbolism; Naturalism.  

Prerequisite(s): 15 credits of French at the 300 level or permission of instructor.  
Notes: May be repeated for a maximum of 6 credits when topic is different.  

Schedule Type: LEC  
Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0

FREN 420 - Topics in Twentieth and Twenty-First-Century French Literature and Culture

Credits: 3  
Repeatable within Degree for Credit  
Offered by Modern and Classical Languages.  
Analyzes a selection of important literary texts (novel, short story, poetry, and theater) and authors in their historical and cultural contexts: surrealists, existentialists, new novelists, feminists, etc.  

Prerequisite(s): 15 credits of French at the 300 level or permission of instructor.  
Notes: May be repeated for a maximum of 6 credits when topic is different.  

Schedule Type: LEC  
Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0

FREN 450 - Special Topics Related to French Literature and Culture

Credits: 3  
Repeatable within Degree for Credit  
Offered by Modern and Classical Languages.  
Analyzes selected texts, authors, movements, and issues within a comparative historical and cultural context over two or more centuries or with an interdisciplinary approach.  

Prerequisite(s): 15 credits of French at the 300 level or permission of instructor.  
Notes: May be repeated for a maximum of 6 credits when topic is different.  

Schedule Type: LEC  
Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0

FREN 451 - Topics in Sub-Saharan Francophone Literature and Culture
FREN 453 - Topics in North African Francophone Literature and Culture

Credits: 3
Repeatable within Degree for Credit
Offered by Modern and Classical Languages.
Analyzes a selection of literary texts (novel, short story, poetry, and/or theater) and authors in their historical and cultural contexts with a focus on the construction of identity: Maghreb in pre and (post)colonial era, recent ideological trends in writing.

Prerequisite(s): 15 credits of French at the 300 level or permission of instructor.
Notes: May be repeated once for credit with permission of instructor.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

FREN 454 - Topics in Caribbean Francophone Literature and Culture

Credits: 3
Repeatable within Degree for Credit
Offered by Modern and Classical Languages.
Analyzes a selection of important literary texts (novel, short story, poetry, and/or theater) and authors in their historical and cultural contexts: the construction of identity through and beyond Négritude, Antillanité, Créolité, and migration.

Prerequisite(s): 15 credits of French at the 300 level or permission of instructor.
Notes: Fulfills the college requirement in non-Western culture.

Schedule Type: LEC
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
